# Selection of Statistical Publications

## **International Financial Statistics (IFS)**

Acknowledged as a standard source of statistics on all aspects of international and domestic finance, IFS publishes, for most countries of the world, current data on exchange rates, international liquidity, international banking, money and banking, interest rates, prices, production, international transactions (including balance of payments and international investment position), government finance, and national accounts. Information is presented in tables for specific countries and in tables for area and world aggregates. IFS is published monthly and annually. Price: Subscription price is US\$945 a year (US\$614 to university faculty and students) for twelve monthly issues and the yearbook. Single copy price is US\$191 for a yearbook issue.

## **Balance of Payments Statistics Yearbook (BOPSY)**

Balance of Payments Statistics Yearbook (BOPSY): Contains two sections; World and Regional Tables, and Country Tables. The first section presents 21 world and regional tables for major components of the balance of payments, net International Investment Position (IIP), and total financial assets and total liabilities for the IIP. The second section provides detailed tables on balance of payments statistics for 192 economies and IIP data for 152 economies. Price: US\$171.

## **Direction of Trade Statistics (DOTS)**

The yearbook and quarterly issues of the Direction of Trade publication provide tables with current reported data (or estimates) on the value of merchandise trade statistics (exports and imports) by partner country for all IMF member states and other non-member countries. Summary tables are also presented for the world and major areas. Price: Subscription price is US\$276 a year (US\$236 to university faculty and students) for the quarterly issues and the yearbook. Price for the yearbook is US\$122.

## **Government Finance Statistics Yearbook (GFSY)**

This annual publication provides detailed data on transactions in revenue, expense, net acquisition of assets and liabilities, other economic flows, and balances of assets and liabilities of general government and its subsectors. The data are compiled according to the framework of the 2001 Government Finance Statistics Manual, which provides for several summary measures of government fiscal performance. Price: US\$119.

## **DVD-ROM Subscriptions**

International Financial Statistics (IFS), Balance of Payments Statistics (BOPS), Direction of Trade Statistics (DOTS), and Government Finance Statistics (GFS) are available on DVD-ROM by annual subscription. The DVD-ROMs incorporate a Windows-based browser facility, as well as a flat file of the database in scientific notation. Price of each subscription: US\$250 a year for single-user PC license (US\$125 for university faculty and students). Network and redistribution licenses are negotiated on a case-by-case basis. Please visit [www.bookstore.imf.org/pricing](http://www.bookstore.imf.org/pricing) for information.

## **Subscription Packages**

### **Combined Subscription Package**

The combined subscription package includes all issues of IFS, DOTS, GFS, and BOPSY. Combined subscription price: US\$1,505 a year (US\$1,204 for university faculty and students). Expedited delivery available at additional cost; please inquire.

### **Combined Statistical Yearbook Subscription**

This subscription comprises BOPSY, IFSY, GFSY, and DOTSY at a combined rate of US\$597. Because of different publication dates of the four yearbooks, it may take up to one year to service an order. Expedited delivery available at additional cost; please inquire.

## **IFS, BOPS, DOTS, GFS on the Internet**

The Statistics Department of the Fund is pleased to make available to users the International Financial Statistics (IFS), Balance of Payments Statistics (BOPS), Direction of Trade Statistics (DOTS), and Government Finance Statistics (GFS) databases through the new, easy-to-use data.IMF.org online service. New features include Data Portals, which provide quick access to predefined tables, maps, graphs, and charts aimed at visualizing many common data searches. Data.IMF.org lets you create a basic custom-built data query using the Query tool which offers great flexibility to create larger and more complex queries. Once you have defined your query, you can structure the table the way you want it, and then convert your data into a chart or download it. A number of personalization options are available in the "My data" section such as accessing your favorites and saved queries. Free registration for My data can be obtained by clicking on the Sign In or Register link on the data.IMF.org home page.

# Introduction

The quarterly issues, yearbook, CD-ROM, and on-line portal of the Direction of Trade Statistics (DOTS) present, for all member countries of the International Monetary Fund (the Fund) and other non-member countries, the value of merchandise exports and imports by partner country. DOTS republish monthly, quarterly, annual trade statistics as submitted by countries to the Fund. Furthermore, reported data are supplemented by estimates whenever such data are not current or are not available on a monthly basis. Monthly estimates are consistent with quarterly and annual reported data, when available.

Data reported to DOTS follow the concepts and definitions of the United Nations' *International Merchandise Trade Statistics* (IMTS 2010), which provides the conceptual framework and guidance for recording physical movements of goods between countries and areas. The term "merchandise" has the same meaning as the term "goods".

The quarterly issues (DOTSQ) and the yearbook (DOTSY) present figures for the most recent quarters and years, respectively. The CD-ROM presents information from 1980 onwards for monthly, quarterly, and annual data. The on-line portal, accessible from the IMF data page (<http://data.imf.org/>), presents monthly and quarterly series starting 1960, and annual data starting 1941. Area and world aggregates showing trade flows between major areas of the world are also presented.

World and area tables present (1) world aggregates comprising all countries, including countries that do not report to the Fund and are estimated based on trade partner data, (2) advanced economies aggregates derived from the figures for the countries classified as advanced economies with a subgroup of the Euro Area, (3) emerging and developing countries aggregates and subgroups, namely, Developing Asia, Europe with a sub-group of Commonwealth of Independent States (CIS), Middle East North Africa and Pakistan, Sub-Saharan Africa, and Western Hemisphere, and (4) Africa, Middle East, and European Union aggregates. Aggregates for the World table are calculated as the sum of aggregates from the tables for the Advanced Economies and Emerging and Developing Economies. It also includes trade of countries comprising the group "other countries n.i.e." and data for a country or area not specified and for "special categories."

The term "country," as used in this publication, does not in all cases refer to a territorial entity that is a state as understood by international law and practice; the term also

covers some nonsovereign territorial entities, for which statistical data are maintained and provided internationally on a separate and independent basis. The information on exports and imports by trading partners that countries report to the Fund varies in terms of frequency and timeliness. Monthly data are made available on a regular and current basis (i.e., with a delay of four months or less from the current month) by all of the advanced countries plus developing and emerging economies with large shares of world trade. Together, these countries have represented more than 90 percent of the value of recorded world exports and imports in recent years (Table 1). Other countries may report monthly data that are less current, or the information may be compiled and made available in quarterly or annual frequency.

Coverage of DOTS is augmented by using trade statistics available from other international organizations. Monthly data for all European Union member countries are sourced from the COMEXT database maintained by EUROSTAT. Annual data reported to the United Nations COMTRADE database are incorporated in DOTS for countries that do not report to the Fund. Furthermore, the availability of partner data makes it possible to calculate estimates of countries for which data are not obtainable from other sources.

## Estimation procedure

The estimation procedure is described in the IMF working paper *New Estimates for Direction of Trade Statistics* (IMF (2017), forthcoming).<sup>1</sup> Reported data at the monthly, quarterly, and annual frequencies are the basis of all estimates in DOTS. When monthly data are unavailable, the DOTS database is supplemented with estimates. Briefly, the estimation procedure proceeds as follows:

Estimation occurs if a reporting country does not report trade with its partners for a specific period. Data are estimated for all partners. In the absence of some or all of the monthly DOTS, quarterly or annual reported DOTS are used. Annual reported data to the UN COMTRADE database are treated as reported to the Fund. When only annual or quarterly data are available, the monthly trade between country A and B

<sup>1</sup> The current methodology is used to estimate periods starting January 2000. Estimates from January 1981 to December 1999 are based on the previous methodology, described in *A Guide to Direction of Trade Statistics* (1993) and available from the Fund's Publications Section ([www.imf.org/external/pubs/cat/longres.cfm?sk=154.0](http://www.imf.org/external/pubs/cat/longres.cfm?sk=154.0)). Estimates prior to January 2000 will be recalculated using the current methodology in the coming months.

is distributed over the relevant months using the following information (in order of priority): (1) the monthly value of the partner trade reported by country B; (2) the monthly total value of imports and exports reported in the Fund's *International Financial Statistics* (IFS) by country A; or (3) the monthly value of trade that all other partner countries have reported with country A for the specific month. The monthly distribution is done through a time-series procedure that reproduces at the best the month-to-month changes of the information available at the monthly level and, simultaneously, produces estimates that are consistent with quarterly or annual data reported by countries. Estimates are computed for months, and then quarterly and annual totals are obtained by summation.

The sum of the DOTS may not coincide with the IFS totals. This happens, for example, when countries do not report all their trade by geographic destination due to confidentiality reasons. Official reported data to DOTS are not adjusted to comply with the IFS totals. The IFS totals are used in the validation checks to verify the quality of trade statistics by partner countries in DOTS. Furthermore, IFS totals are also used in the estimation of bilateral trade when no information is available on the bilateral trade. For comparison purposes, total exports and total imports are shown in the lines IFS World Total and DOTS World Total for each country.

Only for countries that have never reported data by trade partners to the Fund or to the United Nations COMTRADE, estimates are obtained by using directly the corresponding bilateral flow reported by counterpart countries. For example, if country B has never reported trade statistics with a geographical breakdown, but country A has reported imports from country B, then A's data for imports are used to estimate B's exports. Because imports are valued on a cost, insurance, and freight (CIF) basis and exports on a free on board (FOB) basis, the data are adjusted for the cost of freight and insurance. A CIF/FOB factor of 1.06 is currently used. Reported imports CIF are divided by 1.06 (i.e., the CIF/FOB factor) to give partner country estimates of exports FOB. Similarly, reported exports FOB are multiplied by 1.06 to give partner country imports CIF. Given the absence of timely data

on cost, insurance, and freight, the 6 percent CIF/FOB factor represents a simplified estimate of these costs, which vary widely across countries and transactions. Further details on the choice of the CIF/FOB factor are provided in IMF (2017).

Overall, only a small portion of world trade is omitted from DOTS; this portion may comprise (1) unreported trade among developing countries; (2) unreported trade between developing countries and the countries comprising the group "other countries n.i.e."; and (3) unreported trade among "other countries n.i.e."

No estimates, however, are compiled for periods prior to 1981 or based on benchmark data referring to 1980 or earlier. Moreover, data reported from countries' own records, even with longer delays, continually broaden the base of reported data, thereby replacing previously estimated figures. Area and world totals are compiled from reported data and estimates. The share of estimates in world and area totals increases over time due to the increased recourse to estimation for countries that report their trade statistics with delay (see Table 1).

## Symbols

Figures shown without symbols are data reported from the respective country's own records.

Figures followed by the letter 'r' indicate that data are estimated on a monthly basis, but reconciled with official monthly, quarterly and/or annual information available by the reporting country.

Figures followed by the letter 'e' indicate that data are estimated using counterpart information only.

The following symbols are used throughout DOTS as well:

All figures are rounded to one decimal place.

An ellipse (...) indicates a lack of data.

A "0" indicates that a figure is zero or less than half a significant digit.

Table 1. DATA COVERAGE FOR RECENT PERIODS

| Period  | World Trade                      |                        |                     |                        |

## Composition of country, world, and area pages

Country pages are shown for all countries with both reported and estimated data. Estimated figures – which are clearly indicated in the tables – should be intended as IMF staff estimates and not as data officially reported by countries. Both reported and estimated trade are included in the calculation of world and area totals.

Country pages include lines for all partner countries that have been reported or estimated. Where relevant, these pages also include lines for country or area data not specified and for “special categories.” Trade included under “special categories” may cover military trade, transactions in free zones, or transactions in aircraft or ships. These data have not been designated to a partner country by the trade statistics compilers, nor have they been included by item in the reported data as an area not specified.

Country pages also include memorandum item lines for Africa, Middle East, the European Union (EU), Export Earnings: Fuel, and Export Earnings: Non-Fuel Countries. Data in these memorandum lines show trade by all members of the group with the respective country. Similarly, these memorandum lines appear on the area and world pages. The memorandum line represents trade by all individual members of the group. For example, the EU line on the world page represents trade by all EU members with the world, including trade among members. It does not present the EU data as if the EU was a single country. Users interested in such statistics would need to subtract intra-EU trade.

Summary tables for the world and areas are calculated from the data shown on the country page. They show the trade by a group of countries to and from the individual countries listed in the table. This is analogous to stacking all the pages for the individual countries in an area and adding vertically to yield an aggregate table on the top of the stack.

## Currency

All data are expressed in terms of U.S. dollars. As most of the countries report in their national currency, U.S. dollar equivalents are obtained by converting data at period average exchange rates published in lines rf or rh on the country pages in IFS. Data are generally converted at their highest available frequency and are subsequently aggregated to longer periods: for example, monthly data are converted at monthly exchange rates and the resulting U.S. dollar equivalents are aggregated to quarterly and annual values.

## Consistency between partner country data

It is sometimes assumed that corresponding export and import data between partner countries should be consistent. That is, the exports from Country A to B should be equal to the imports of Country B from A, after taking into account the insurance and freight costs under the generally observed case that Country B imports are valued on a CIF basis. The DOTS estimation system uses this assumption in the few cases where one partner has never reported data.

However, in addition to the inclusion of insurance and freight in imports CIF, it should be noted that there are several complications that can cause inconsistency between exports to a partner and the partner's recorded imports FOB, or between imports FOB from a partner and the partner's recorded exports. The principal reasons for inconsistent statistics on destination and origin for a given shipment are differences in 1) classification concepts and detail, 2) time of recording, 3) valuation, and 4) coverage, as well as 5) processing errors.

## Classification concepts and detail

*Destination/origin classification concepts in the presence of transshipment:* Much trade is consigned via other countries, for example, a substantial volume of German trade passes through the Netherlands. An inconsistency in reported trade data can arise when the trade of the originating country is classified as going to either a first or proximate destination that is a transshipment point, whereas the ultimate destination country classifies the same trade according to its ultimate source. Sometimes, the final destination country is unknown at the point of exports.

Alternatively, the originating country may classify the shipment as going to the ultimate destination country, whereas the ultimate destination country classifies the same trade according to a proximate source that is a transshipment point. The lack of uniformity in the classification may also result from the application of different national customs instructions used in determining origin, transshipment, and destination countries.

*Lack of destination/source country detail in published statistics:* These conditions cause immediate problems in identifying trade counterparty information from published data. Destination/origin country for military and other confidential items and government goods may not be published or may be published only by regional aggregates. A destination can also be indeterminate and thus not be published, because the transshipment dispatcher may lack knowledge about the ultimate destination at the time of consignment. Regional aggregates without country detail may also be published when the trade of individual partners in a region is below a threshold level.

## Time of recording

A lag occurs between shipment of an export and receipt of an import, especially for goods that are shipped over long distances. To avoid timing inconsistencies, international national accounts and balance of payments accounting standards recommend a change of ownership principle to assign a date to transactions. Under this principle, an exported good changes ownership at shipment from the exporting country, at which time the exporting country records an export and the destination country records an import (FOB). However, for practical reasons in accordance with *IMTS 2010*, the customs authorities of the importing country record the receipt of these goods later, when they arrive at the receiving country's frontier. This can cause a timing inconsistency. The result is that the same shipment can appear in an importing

country's statistics for a month, quarter, and/or year that is later than the period that appears in the exporting country's statistics.

### **Valuation**

Apart from the CIF and FOB valuations, possible reasons for inconsistent valuation of a given shipment between source and destination include inconsistent currency conversion, evasion, anti-evasion procedures, values not known at the time of consignment, and differences in treatment of particular costs or procedures for assessment.

### **Coverage**

Shipments to and from free-trade zones and bonded warehouses, exclusion of military and other confidential items and government goods, value thresholds for customs registration of shipments, returned goods, and other goods missed by customs (or surveys) are examples of coverage differences that can result in inconsistencies.

### **Processing errors**

As a result of reporting and processing lags, trade data for a given period are often released before all customs documents for the period have been processed. These data

are sometimes not revised, or, if data are revised, errors are nevertheless made in assigning the date on which goods are shipped or received and the late data are assigned to the wrong month, quarter, and/or year. Errors can also be made in assigning a destination to exports and an origin to imports during customs clearances, or in cases when the ultimate destination is changed after the initial consignment during trans-shipment, the change is not incorporated into published statistics via the release of revised data.

These issues should be considered in interpreting the data. International cooperation in harmonizing and reconciling customs procedures and definitions may assist in reducing differences, and, in a few cases, countries have reconciled data or have used partner data to make their own estimates.

### **Suppression of Partner Country Data Lines**

A partner country is not shown in a table if for all periods present in the publication figures for the partner country are less than 50,000 in tables expressed in millions of U.S. Dollars, or less than 50,000,000 in tables expressed in billions of U.S. Dollars. Please note that all data is available on-line at <http://data.imf.org/dot>.

# Introduction

Les numéros trimestriels, l'annuaire, le disque optique compact (CD-ROM) et le portail en ligne des statistiques sur la répartition géographique des échanges (*Direction of Trade Statistics* — DOTS) présentent pour l'ensemble des pays membres du Fonds monétaire international (FMI) et pour d'autres pays non membres, la valeur des marchandises qu'ils ont exportées et importées ventilée par pays partenaire. DOTS republie les statistiques sur les échanges communiquées par les pays au FMI sur une base mensuelle, trimestrielle ou annuelle. En outre, lorsque les données ne sont pas actualisées ou disponibles tous les mois, elles sont complétées par des estimations. Les estimations mensuelles cadrent avec les données trimestrielles et les données annuelles, lorsqu'elles sont disponibles.

Les données sont communiquées à DOTS suivant les concepts et les définitions des *International Merchandise Trade Statistics* (IMTS 2010 — traduction française à paraître) des Nations Unies. Ce manuel propose un cadre conceptuel et des orientations pour l'enregistrement des déplacements physiques de marchandises d'un pays et d'une région à l'autre. Les termes « marchandise » et « bien » ont la même signification.

Les numéros trimestriels (DOTSQ) et l'annuaire (DOTSY) présentent, respectivement, les chiffres disponibles pour les trimestres et années les plus récentes. Le CD-ROM présente des informations sur les données mensuelles, trimestrielles et annuelles à partir de 1980. Le portail en ligne, accessible sur le site Web du FMI (<http://data.imf.org/>), propose des séries mensuelles et annuelles à partir de 1960 et des données annuelles à partir de 1941. Des agrégats mondiaux et régionaux des flux commerciaux entre les principales régions du monde sont aussi présentés.

Les tableaux établis pour le monde et les régions présentent 1) les agrégats mondiaux couvrant l'ensemble des pays, y compris des pays qui ne communiquent pas de données au FMI, pour lesquels des estimations sont établies à partir des données des partenaires commerciaux ; 2) les agrégats des économies avancées dérivés des données transmises par les pays faisant partie de cette catégorie, avec un sous-groupe pour la zone euro ; 3) les agrégats et sous-groupes des pays émergents ou en développement, à savoir : Afrique subsaharienne, Europe (avec le sous-groupe de la Communauté des États indépendants (CEI), Hémisphère occidental, Moyen-Orient, Afrique du Nord et Pakistan

et pays d'Asie en développement, — et 4) les agrégats de l'Afrique, du Moyen-Orient et de l'Union européenne. Les agrégats du tableau mondial correspondent à la somme des agrégats des tableaux des économies avancées et des pays émergents ou en développement. Le tableau présente également les données sur les échanges d'un ensemble de pays regroupés sous la rubrique « Other countries n.i.e. » (Autres pays n.i.a.), ainsi que les données de pays ou de régions non identifiées et celles appartenant aux « Catégories spéciales ».

Dans la présente publication, le terme « pays » ne recouvre pas toujours une entité territoriale constituant un État tel qu'il est défini selon la pratique et le droit internationaux. Ce terme recouvre également certaines entités territoriales qui ne sont pas des États souverains, mais sur lesquelles des données statistiques sont tenues à jour et fournies, séparément et indépendamment, au niveau international. Les données que les pays communiquent au FMI sur leurs exportations et importations ventilées par partenaires commerciaux ne sont pas toutes communiquées avec la même fréquence et n'ont pas toutes le même degré d'actualité. Toutes les économies avancées et les pays émergents ou en développement qui représentent une part importante des échanges mondiaux, transmettent des données mensuelles sur une base régulière et pour la période en cours (c'est-à-dire, dans un délai de quatre mois ou moins). Ces dernières années, les échanges commerciaux de ces pays ont représenté ensemble plus de 90 % de la valeur des exportations et importations mondiales enregistrées (tableau 1). D'autres pays communiquent des données mensuelles moins récentes, ou n'établissent et ne transmettent des données que sur une base trimestrielle ou annuelle.

La couverture DOTS est amplifiée grâce aux statistiques sur les échanges recueillies par d'autres organisations internationales. Des données mensuelles pour tous les pays membres de l'Union européenne sont tirées de la base de données COMEXT, qui est gérée par EUROSTAT. Les données communiquées à COMTRADE (base de données des Nations Unies) sont ajoutées à DOTS dans le cas des pays qui ne communiquent pas de données au FMI. Par ailleurs, les renseignements communiqués par les partenaires commerciaux permettent d'établir des estimations pour les pays dont on ne dispose pas de statistiques d'autres sources.

## Méthodes d'estimation

La méthode d'estimation est décrite dans le document de travail du FMI intitulé *New Estimates for Direction of Trade Statistics* (FMI 2017, à paraître).<sup>1</sup> Les données mensuelles, trimestrielles et annuelles qui sont déclarées servent de base à toutes les estimations contenues dans DOTS. La base de données tout entière est régulièrement mise à jour avec de nouvelles estimations. La méthode d'estimation est la suivante :

On procède à une estimation lorsqu'un pays déclarant n'indique pas le montant de ses échanges avec un de ses partenaires commerciaux pour une période donnée. Les chiffres sont estimés pour tous les partenaires. Lorsque les statistiques mensuelles de DOTS font partiellement ou entièrement défaut, ce sont les statistiques trimestrielles ou annuelles communiquées pour DOTS qui sont utilisées. Les données annuelles communiquées à la base de données COMTRADE des Nations Unies sont considérées comme étant communiquées au FMI. Lorsque seules des données annuelles ou trimestrielles sont disponibles, les échanges mensuels entre les pays A et B sont ventilés entre les mois respectifs en utilisant les informations suivantes (en ordre de priorité) : 1) la valeur mensuelle des échanges des partenaires communiqués par le pays B, 2) la valeur mensuelle totale des importations et des exportations déclarées dans les Statistiques financières internationales (SFI) du FMI par le pays A ou 3) la valeur mensuelle des échanges que tous les

pays partenaires ont déclarés avec le pays B pour le mois en question. La ventilation mensuelle s'effectue au moyen d'une procédure qui reproduit au mieux les variations d'un mois sur l'autre des informations disponibles au niveau mensuel et, simultanément, produit des estimations qui cadrent avec les données trimestrielles ou annuelles communiquées par les pays. Les estimations sont calculées pour chaque mois, et ensuite des totaux trimestriels et annuels sont calculés.

La somme dans DOTS ne coïncide peut-être pas avec les totaux des SFI. C'est le cas, par exemple, lorsque les pays ne déclarent pas tous leurs échanges par destination géographique pour des raisons de confidentialité. Les données officielles qui sont communiquées à DOTS ne sont pas ajustées pour correspondre aux totaux des SFI. Ces derniers sont utilisés pour vérifier la qualité des statistiques commerciales des pays partenaires dans DOTS. Ils sont aussi utilisés dans l'estimation des échanges bilatéraux lorsqu'aucune information n'est disponible à ce sujet. À des fins de comparaison, les exportations totales et les importations totales figurent dans les lignes IFS World Total et DOTS World Total pour chaque pays.

Uniquement pour les pays qui n'ont jamais communiqué de données par partenaires commerciaux au FMI ou à la base de données COMTRADE des Nations Unies, on obtient des estimations en utilisant directement les flux bilatéraux correspondants qui sont communiqués par les pays de contrepartie. Par exemple, si le pays B n'a jamais communiqué de statistiques commerciales avec une ventilation géographique, mais que le pays A a déclaré des importations en provenance du pays B, les données du pays A pour les importations sont utilisées pour estimer les exportations du pays B. Comme les importations sont évaluées en base coût, assurance et fret (c.a.f.) et les exportations en base franco à bord (f.à.b.), les données sont ajustées de manière à tenir compte du coût du fret et de l'assurance. Un coefficient c.a.f./f.à.b. de 1,06 est utilisé actuellement. Les importations c.a.f. sont divisées par 1,06

<sup>1</sup> La méthodologie actuelle est utilisée afin de produire des estimations pour les périodes à partir de janvier 2000. Les estimations pour les périodes à partir de janvier 1981 jusqu'à décembre 1999 sont basées sur la méthodologie précédente, décrite dans le Guide pour l'établissement des statistiques sur la répartition géographique des échanges (A Guide to Direction of Trade Statistics, 1993), disponible à la Section des publications du FMI ([www.imf.org/external/pubs/cat/longres.cfm?sk=154.0](http://www.imf.org/external/pubs/cat/longres.cfm?sk=154.0)). Dans les mois à venir, les estimations pour les périodes avant janvier 2000 seront recalculées selon la méthodologie actuelle.

TABEAU 1 : COUVERTURE DES DONNEES DE PERIODES RECENTES

| Période | Commerce mondial     |  |                  |  |
|---------|----------------------|--|------------------|--|
|         | Données communiquées |  | Données estimées |  |
|         | Nombre de pays       | Part du commerce mondial, en pourcentage | Nombre de pays   | Part du commerce mondial, en pourcentage |
| 2014    | 151                  | 96.0                                     | 59               | 4.0                                      |
| 2015    | 145                  | 96.2                                     | 65               | 3.8                                      |
| 2016    | 127                  | 94.3                                     | 83               | 5.7                                      |
| 2016 Q1 | 78                   | 85.2                                     | 132              | 14.8                                     |
| 2016 Q2 | 78                   | 85.1                                     | 132              | 14.9                                     |
| 2016 Q3 | 78                   | 85.0                                     | 132              | 15.0                                     |
| 2016 Q4 | 78                   | 84.6                                     | 132              | 15.4                                     |
| 2017 Q1 | 89                   | 91.9                                     | 121              | 8.1                                      |

(c'est-à-dire le coefficient c.a.f./f.à.b.) pour donner des estimations des exportations f.à.b. pour le pays partenaire. De la même manière, les exportations f.à.b. sont multipliées par 1,06 pour donner des estimations des importations c.a.f. pour le pays partenaire. En l'absence de données à jour sur le coût, assurance et fret, le coefficient c.a.f./f.à.b. de 6 % représente une estimation simplifiée de ces coûts, qui varie fortement d'un pays à l'autre et d'une opération à l'autre. Des détails supplémentaires sur le choix de ce coefficient sont fournis dans FMI (2017).

Globalement, seule une faible part des échanges mondiaux est omise dans DOTS; il peut s'agir des éléments suivants : 1) échanges non déclarés entre pays en développement; 2) échanges non déclarés entre pays en développement et pays du groupe « Autres pays n.i.a. » et 3) échanges non déclarés entre « Autres pays n.i.a. ».

Toutefois, aucune estimation n'a été établie pour les périodes antérieures à 1981, et aucune n'est fondée sur des données de référence correspondant à 1980 ou aux années antérieures. De plus, les données tirées des documents des pays, même si elles couvrent des périodes plus longues, enrichissent continuellement la base de données communiquées et viennent remplacer les estimations antérieures. Les totaux régionaux et mondiaux sont calculés à partir des données communiquées et des estimations. La part des estimations dans les totaux mondiaux et régionaux augmente au fil du temps en raison du recours accru aux estimations pour les pays qui déclarent leurs statistiques commerciales avec retard (voir Tableau 1).

## Symboles

Les chiffres qui ne sont pas suivis d'un symbole sont des données tirées des documents des pays en question.

La lettre « r » indique que les données sont estimées sur une base mensuelle, mais sont rapprochées avec les données officielles trimestrielles et annuelles qui sont communiquées par le pays déclarant.

La lettre « e » indique que les données sont estimées à l'aide d'informations soumises par le pays de contrepartie uniquement.

Les symboles ci-après sont utilisés aussi dans DOTS :

Tous les chiffres sont arrondis à une décimale près.

Une ellipse ( . . . ) indique l'absence de données.

Un « 0 » indique une valeur égale à zéro ou inférieure à la moitié d'un chiffre significatif.

## Composition des pages consacrées aux pays, aux régions et au monde entier

Il existe des pages pour tous les pays ayant des données déclarées ou estimées. Les chiffres estimés, qui sont clairement indiqués dans les tableaux, doivent être considérés comme des estimations des services du FMI et

non comme des données officiellement déclarées par les pays. Tant les échanges déclarés et que les échanges estimés sont inclus dans le calcul des totaux mondiaux et régionaux.

Les pages consacrées aux pays comportent pour chacun des partenaires commerciaux du pays concerné des lignes de données communiquées directement ou obtenues par estimation. Le cas échéant, on ajoute une ligne se rapportant aux pays ou groupes de pays non spécifiés (Country/area not specified) ou pour des catégories spéciales (Special categories). Les échanges classés dans cette dernière catégorie peuvent recouvrir les opérations à caractère militaire, celles des zones franches ou celles qui concernent les aéronefs ou les navires. Ces données ne sont pas attribuées à un partenaire commercial déterminé par les statisticiens du commerce extérieur, et elles ne sont pas ventilées non plus sous un poste spécifique dans les données transmises pour la catégorie des groupes de pays non spécifiés.

Les pages consacrées aux pays comportent aussi des lignes de postes pour mémoire pour l'Afrique, le Moyen-Orient et l'Union européenne (UE), les pays exportateurs de combustibles et les autres pays. Les chiffres qui y figurent couvrent les échanges de l'ensemble des membres du groupe avec le pays concerné. Des postes pour mémoire similaires figurent aux pages des tableaux régionaux et mondiaux. Les chiffres inscrits à ces postes représentent la somme des échanges de tous les pays appartenant au groupe. Par exemple, le poste pour mémoire du tableau « World » qui se rapporte à l'UE recouvre les échanges de l'ensemble des pays membres de l'UE avec le reste du monde, y compris les échanges entre ces mêmes pays. Les données de l'UE n'y sont pas traitées comme s'il s'agissait d'un pays unique. Les utilisateurs intéressés par ces statistiques doivent donc soustraire du total les chiffres se rapportant aux échanges intra-UE.

Des tableaux récapitulatifs sont établis pour le monde et les régions à partir des données figurant sur les pages consacrées aux pays. Ils indiquent la répartition des échanges globaux d'un groupe de pays à destination et en provenance de chacun des pays figurant dans le tableau. Le calcul s'apparente à empiler les pages de tous les pays d'une région et à ajouter verticalement tous les chiffres de façon à obtenir un tableau global au sommet de la pile.

## Monnaie

Toutes les données sont exprimées en dollars EU. Comme la plupart des pays communiquent leurs données en monnaie nationale, il convient d'obtenir leurs équivalents en dollars EU en utilisant les moyennes périodiques des taux de change des séries **rf** ou **rh** publiées aux pages consacrées aux pays dans SFI. Les données sont généralement converties à leur fréquence la plus élevée, et sont ensuite agrégées sur des périodes plus longues : ainsi, les données mensuelles sont converties à l'aide des valeurs mensuelles du taux de change, et les équivalents en dollars EU qui en découlent sont ensuite agrégés en valeurs trimestrielles et annuelles.

## Cohérence des données entre pays partenaires

On présume parfois que les chiffres d'exportations et d'importations correspondants entre pays partenaires sont censés concorder. C'est-à-dire que le chiffre des exportations du pays A à destination du pays B devrait être égal à celui des importations du pays B en provenance du pays A, après ajustement pour coûts de fret et d'assurance, étant entendu que les importations du pays B sont généralement évaluées sur la base c.a.f. Le système d'estimation de DOTS se fonde sur cette hypothèse dans les quelques cas où l'un des partenaires n'a jamais communiqué de données.

Il convient toutefois de noter que, outre l'inclusion des coûts d'assurance et de fret dans les importations c.a.f., diverses autres difficultés peuvent provoquer une incohérence entre les chiffres des exportations à destination d'un pays partenaire et ceux des importations f.à.b. recensées par ledit partenaire, ou entre les chiffres des importations f.à.b. en provenance d'un pays partenaire et les exportations recensées par ledit partenaire. Le manque de concordance des statistiques entre le point d'origine et celui de destination d'une expédition donnée tient essentiellement à des différences dans 1) les critères et le niveau de détail de la classification; 2) les dates d'enregistrement; 3) les méthodes d'évaluation; 4) le champ couvert par les données; et 5) des erreurs de traitement..

### Critères et niveaux de classification

*Critères de classification en fonction de la destination ou de l'origine en cas de réexpédition :* De nombreuses marchandises sont expédiées par l'intermédiaire d'autres pays (par exemple, un volume substantiel du commerce extérieur de l'Allemagne transite par les Pays-Bas). Une asymétrie peut se faire jour dans les chiffres recensés si l'opération commerciale du pays d'origine est classée en tant qu'expédition vers une première destination, ou destination la plus proche, qui constitue un point de réexpédition, alors que le pays de destination finale classe cette même opération sur la base de l'origine. Parfois, le pays de destination finale est inconnu au point de l'exportation.

À l'inverse, le pays d'origine peut classer l'opération en tant qu'expédition vers le pays de destination finale, tandis que ce dernier l'enregistre sur la base de la provenance la plus proche qui constitue un point de réexpédition. Ce manque d'uniformité dans les méthodes de classement s'explique par les règles diverses qu'appliquent les administrations douanières nationales pour déterminer le pays d'origine, de réexpédition et de destination.

*Absence de ventilation par pays de destination ou d'origine (ou de provenance) dans les statistiques publiées :* Cette situation crée d'emblée des difficultés lorsqu'il s'agit d'identifier les informations sur les échanges entre pays partenaires à partir des données publiées. La ventilation, par pays de destination

ou d'origine, des biens militaires et autres articles à caractère confidentiel et biens des administrations publiques peut ne pas être publiée, ou bien ne l'être qu'au niveau des agrégats régionaux. Il est possible aussi que la destination soit indéterminée, et donc non publiée, parce que le réexpéditeur ne connaît pas nécessairement la destination finale au moment de l'expédition. Enfin, les agrégats régionaux peuvent être publiés sans ventilation par pays lorsque les transactions commerciales de certains partenaires n'atteignent pas une valeur minimale donnée..

### Date d'enregistrement

Un délai s'écoule entre la date d'expédition d'une exportation et celle de la réception de l'importation, surtout lorsque les marchandises parcourent de grandes distances. Pour éviter les décalages entre les dates d'enregistrement des transactions, les normes internationales en matière de comptabilité nationale et de balance des paiements recommandent de dater les transactions sur la base du critère de changement de propriété. En vertu de ce principe, la marchandise exportée change de propriétaire au moment où elle est expédiée par le pays exportateur, date à laquelle celui-ci la comptabilise en tant qu'exportation et le pays destinataire, en tant qu'importation (f.à.b.).

Or, pour des raisons pratiques, les autorités douanières du pays importateur n'enregistrent la réception desdites marchandises qu'à une date ultérieure, lors de leur arrivée à la frontière du pays concerné, ce qui crée une asymétrie dans les dates d'enregistrement. La même expédition se trouve par conséquent enregistrée dans les statistiques du pays importateur au titre d'une période (mois, trimestre ou année) postérieure à celle où elle est recensée dans les statistiques du pays exportateur.

### Évaluation

Outres les évaluations c.a.f. et f.à.b., les causes possibles du manque d'homogénéité entre l'évaluation d'une expédition donnée à son point d'origine et celui de destination sont notamment les suivantes : application de conversions différentes du taux de change, fraude et manque de cohérence des dispositifs de lutte contre la fraude, valeur non encore connue au moment de la réexpédition et manières diverses de traiter certains coûts spécifiques ou de calculer la valeur.

### Champ couvert par les données

Les expéditions à destination et en provenance de zones franches et d'entrepôts sous douane, l'exclusion des biens militaires et autres articles à caractère confidentiel et biens des administrations publiques, l'application de valeurs minimales pour l'immatriculation des expéditions en douane, les marchandises renvoyées et autres biens échappant à l'administration douanière (ou aux enquêtes) sont autant d'exemples de différences du champ couvert qui peuvent conduire à des anomalies.

## **Erreurs de traitement**

En raison des décalages de communication et de traitement, les données du commerce extérieur d'une période donnée sont souvent diffusées avant que la documentation douanière de la période considérée n'ait été entièrement traitée. De telles données ne sont parfois pas révisées, ou, même si elles se sont, des erreurs se produisent néanmoins lorsqu'il s'agit de déterminer la date de l'expédition des biens ou celle de leur livraison, et les données tardives sont attribuées à un mois, trimestre ou année erronés. D'autres erreurs sont commises lorsqu'il convient d'attribuer une destination aux exportations ou une origine aux importations à l'occasion du dédouanement, ou encore lorsque la destination finale est modifiée postérieurement à la date d'expédition initiale, en cours de réexpédition, auquel cas le changement n'est pas diffusé sous forme de révision et n'est donc pas pris en considération dans les statistiques publiées.

Ces difficultés doivent donc être prises en compte pour l'interprétation des données. Un effort concerté d'harmonisation et d'alignement des réglementations et définitions douanières à l'échelon international peut aider à combler ces lacunes; dans quelques cas, les pays ont en outre procédé à un rapprochement des données ou se sont inspiré des statistiques des pays partenaires pour établir leurs propres estimations.

## **Suppression des lignes de données des partenaires commerciaux**

Un partenaire commercial n'est pas représenté dans un tableau si, pour toutes les périodes présentes les chiffres publiés pour le partenaire commercial, représentent moins de 50.000 dans les tableaux exprimés en millions de dollars américains ou moins de 50.000.000 dans des tableaux exprimés en milliards de dollars américains. Veuillez noter que toutes les données sont disponibles en ligne à <http://data.imf.org/dot>.

# Introducción

En los números trimestrales, el anuario, el CD-ROM y el portal en línea de *Direction of Trade Statistics* (DOTS) se presentan, para todos los países miembros del Fondo Monetario Internacional (el Fondo) y otros países que no son miembros, el valor de las exportaciones e importaciones de mercancías por país con que se comercia. DOTS vuelve a publicar estadísticas de comercio mensuales, trimestrales y anuales conforme los países las suministran al Fondo. Además, cuando los datos suministrados están desactualizados o no están disponibles mensualmente, se complementan con estimaciones. Las estimaciones mensuales son coherentes con los datos suministrados trimestral y anualmente, cuando estos están disponibles.

Los datos suministrados a DOTS siguen los conceptos y las definiciones de *Estadísticas del comercio internacional de mercancías* (ECIM 2010), documento que aporta el marco conceptual y las directrices para el registro de los movimientos físicos de bienes entre países y regiones. El término “mercancías” tiene el mismo significado que el término “bienes”.

En los números trimestrales (DOTSQ) y en el anuario (DOTSY) se presentan cifras de los trimestres y años más recientes, respectivamente. En el CD-ROM se presenta información de 1980 en adelante, correspondiente a datos mensuales, trimestrales y anuales. En el portal en línea, al que se puede acceder a través de la página de datos del Fondo (<http://data.imf.org/>), se presentan series mensuales y trimestrales de 1960 en adelante, y datos anuales de 1941 en adelante. También se presentan los agregados mundiales y regionales que muestran los flujos comerciales entre las principales regiones del mundo.

En los cuadros mundiales y regionales se presentan:

- 1) agregados mundiales que abarcan todos los países, incluidos países que suministran información al Fondo y cuyos agregados se estiman a partir de datos de sus socios comerciales;
- 2) agregados sobre las economías avanzadas, derivados de las cifras correspondientes a los países clasificados como tales, con un subgrupo correspondiente a la zona del euro;
- 3) agregados de los países emergentes y en desarrollo y de una serie de subgrupos, a saber: África subsahariana, América, Europa con un subgrupo de la Comunidad de Estados

Independientes (CEI), los Países en desarrollo de Asia y Oriente Medio Norte de África y Pakistán, y 4) agregados de África, Oriente Medio y la Unión Europea. Los agregados correspondientes al cuadro mundial se calculan como la suma de los agregados de los cuadros sobre las economías avanzadas y las economías emergentes y en desarrollo. También se incluye el comercio de los países comprendidos en el grupo de “otros países no incluidos separadamente”, así como datos sobre países o regiones no especificados y algunas “categorías especiales”.

En esta publicación, el término “país” no siempre se refiere a una entidad territorial que sea un Estado, conforme al Derecho y a la práctica internacionales; dicho término abarca asimismo algunas entidades territoriales que no son Estados soberanos, sobre las cuales se declaran y mantienen estadísticas internacionales por separado y de forma independiente. La información que los países suministran al Fondo en relación con sus exportaciones e importaciones, clasificada por países con que comercian, varía en cuanto a su frecuencia y puntualidad. Todos los países avanzados y las economías emergentes y en desarrollo que representan proporciones importantes del comercio mundial facilitan datos mensuales de forma periódica y con carácter actualizado (es decir, en un plazo no superior a cuatro meses a partir del mes al que se refieren). En los últimos años estos países, en conjunto, han representado más del 90% del valor de las exportaciones e importaciones registradas a escala mundial (cuadro 1). Otros países declaran datos mensuales menos actualizados, o compilan y suministran información de forma trimestral o anual.

Para ampliar la cobertura de DOTS se utilizan estadísticas de comercio de otras organizaciones internacionales. Los datos mensuales de todos los Estados miembros de la Unión Europea provienen de la base de datos COMEXT, gestionada por EUROSTAT. En el caso de países que no suministran datos al Fondo, se incorporan a DOTS los datos anuales declarados a la base de datos COMTRADE de las Naciones Unidas. Además, la información disponible sobre los países con que se comercia permite preparar estimaciones sobre los países cuyos datos no pueden obtenerse de otras fuentes.

## Procedimiento de estimación

El procedimiento de estimación se describe en un documento de trabajo del Fondo acerca de las nuevas estimaciones de las estadísticas sobre distribución geográfica del comercio, *New Estimates for Direction of Trade Statistics* (FMI (2017), de próxima publicación).<sup>1</sup> Todas las estimaciones que aparecen en DOTS se basan en datos declarados con frecuencia mensual, trimestral y anual. Cuando no se dispone de datos mensuales, la base de datos de DOTS se complementa con estimaciones. La manera en se llevan a cabo los procedimientos de estimación puede resumirse del modo siguiente:

Cuando un país no declara cifras sobre el comercio con alguno de sus socios comerciales en determinado período, se realiza una estimación. Los datos estimados corresponden a la totalidad de los socios comerciales. Si no se dispone de todos o de algunos datos mensuales de DOTS, se utilizan los datos trimestrales o anuales declarados de DOTS. Los datos anuales declarados a la base de datos COMTRADE de las Naciones Unidas se consideran como si fueran declarados al Fondo. Si solo se dispone de datos anuales o trimestrales, el comercio mensual entre los países A y B se distribuye entre los meses pertinentes utilizando la siguiente información (en orden de prioridad): 1) el valor mensual del comercio realizado con el socio, declarado por el país B; 2) el valor mensual total de las importaciones y exportaciones declaradas por el país A en *International Financial Statistics* (IFS) del Fondo; o 3) el valor mensual del comercio que todos los otros países socios declararon haber realizado con el país A en el mes en cuestión. La distribución

<sup>1</sup> La metodología actual se usa para estimar períodos desde enero de 2000. Las estimaciones correspondientes a períodos entre enero de 1981 y diciembre de 1999 se basan en la metodología anterior, descrita en la *Guía de las estadísticas sobre la distribución geográfica del comercio* (1993), que puede solicitarse a la Sección de Publicación del Fondo ([www.imf.org/external/pubs/cat/longres.cfm?sk=154.0](http://www.imf.org/external/pubs/cat/longres.cfm?sk=154.0)). Las estimaciones previas a enero de 2000 se volverán a calcular empleando la metodología actual en los próximos meses.

mensual se realiza mediante un procedimiento de series temporales que reproduce de la mejor manera posible las variaciones ocurridas de un mes a otro en la información disponible a nivel mensual, y que simultáneamente genera estimaciones que son coherentes con los datos trimestrales o anuales declarados por los países. Se calculan las estimaciones correspondientes a los meses, y luego se suman los datos mensuales para obtener totales trimestrales y anuales.

Es posible que la suma de DOTS no coincida con los totales de IFS. Esto ocurre, por ejemplo, cuando un país no declara todo su comercio por destino geográfico por motivos de confidencialidad. Los datos oficiales declarados a DOTS no se modifican para que coincidan con los totales de IFS. Los totales de IFS se emplean en los controles de validación para verificar la calidad de las estadísticas de comercio de los países socios en DOTS. Además, los totales de IFS también se utilizan para estimar el comercio bilateral cuando no se dispone de información al respecto. Para fines de comparación, las exportaciones e importaciones totales aparecen en las líneas de total mundial de IFS y total mundial de DOTS correspondientes a cada país.

Solo en el caso de países que nunca han declarado datos por socios comerciales al Fondo o a la base de datos COMTRADE de las Naciones Unidas, las estimaciones se obtienen utilizando directamente el flujo bilateral correspondiente declarado por los países de contraparte. Por ejemplo, si el país B nunca ha declarado estadísticas de comercio desglosadas geográficamente, pero el país A ha declarado importaciones del país B, entonces los datos de A correspondientes a importaciones se utilizan para estimar las exportaciones de B. Dado que las importaciones se valoran según el criterio costo, seguro y flete (c.i.f.) y las exportaciones se valoran según el criterio franco a bordo (f.o.b.), los datos se ajustan en función de costo del flete y seguro. En la actualidad se utiliza un factor c.i.f./f.o.b. de 1,06. Los datos declarados con respecto a las importaciones c.i.f. se dividen por 1,06 (es

CUADRO 1: COBERTURA DE LOS DATOS DE PERÍODOS RECIENTES

| Período | Comercio mundial |                                 |                  |                                 |
|---------|------------------|---------------------------------|------------------|---------------------------------|
|         | Datos declarados |                                 | Datos estimados  |                                 |
|         | Número de países | Porcentaje del comercio mundial | Número de países | Porcentaje del comercio mundial |
|         |                  |                                 |                  |                                 |
| 2014    | 151              | 96.0                            | 59               | 4.0                             |
| 2015    | 145              | 96.2                            | 65               | 3.8                             |
| 2016    | 127              | 94.3                            | 83               | 5.7                             |
| 2016 Q1 | 78               | 85.2                            | 132              | 14.8                            |
| 2016 Q2 | 78               | 85.1                            | 132              | 14.9                            |
| 2016 Q3 | 78               | 85.0                            | 132              | 15.0                            |
| 2016 Q4 | 78               | 84.6                            | 132              | 15.4                            |
| 2017 Q1 | 89               | 91.9                            | 121              | 8.1                             |

decir, el factor c.i.f./f.o.b.) para obtener las estimaciones de las exportaciones f.o.b. del país con que se comercia. Análogamente, los datos declarados con respecto a las exportaciones f.o.b. se multiplican por 1,06 para obtener las importaciones c.i.f. Dado que no se dispone de datos puntuales con respecto al costo, seguro y flete, el factor c.i.f./f.o.b. de 6% constituye una estimación simplificada de estos costos, que varían mucho de un país a otro y según el tipo de transacción. En FMI (2017) se proporcionan más detalles sobre la manera de decidir el factor c.i.f./f.o.b.

En general, solo una pequeña proporción del comercio mundial no queda incluida en DOTS; la misma que puede comprender 1) el comercio no declarado entre los países en desarrollo; 2) el comercio no declarado entre los países en desarrollo y los países pertenecientes al grupo “otros países no incluidos separadamente”; y 3) el comercio no declarado entre los países que componen este último grupo.

No obstante, no se han elaborado estimaciones para los períodos anteriores a 1981 o basadas en datos de referencia correspondientes a 1980 o años anteriores. Por otra parte, los datos provenientes de los registros propios de los países, aun los declarados después de un plazo prolongado, amplían continuamente la base de los datos declarados, sustituyendo las cifras de las estimaciones previas. Los totales mundiales y regionales se compilan tomando como base los datos declarados y las estimaciones. La proporción de estimaciones en los totales mundiales y regionales aumenta con el transcurso del tiempo debido a que se recurre a las estimaciones en el caso de países que declaran su estadísticas de comercio con retraso (véase el cuadro 1).

## Símbolos

Las cifras que aparecen sin símbolos se refieren a datos provenientes de los registros propios de los países respectivos.

Las cifras seguidas de la letra ‘r’ corresponden a datos estimados con frecuencia mensual, pero conciliados con información oficial trimestral y anual disponible por parte del país declarante.

Las cifras seguidas de la letra ‘e’ corresponden a datos estimados utilizando solo información de la contraparte.

En DOTS se utilizan asimismo las siguientes convenciones y los siguientes símbolos:

Todas las cifras se redondean a un decimal.

Los puntos suspensivos (...) indican que no se dispone de datos.

Un “0” indica que la cifra es cero o inferior a la mitad de un dígito significativo.

## Composición de las páginas de países, del mundo y de las regiones

Se presentan páginas de países relativas a todos los países, con datos tanto declarados como estimados. Las cifras estimadas—indicadas claramente en los cuadros—deben considerarse estimaciones del personal técnico del Fondo y no datos declarados oficialmente por los países. Los cálculos de los totales mundiales y regionales incluyen comercio tanto declarado como estimado.

En las páginas de países figuran líneas relativas a todos los países con los que se comercia que se hayan declarado o estimado. En los casos en que sea pertinente, se incluyen asimismo las líneas correspondientes a los datos de países o regiones no especificados y a “categorías especiales”. El comercio incluido en estas últimas puede abarcar el comercio militar, las transacciones en las zonas francas o las transacciones de aeronaves o buques. Los compiladores de las estadísticas sobre el comercio no han asignado estos datos a ningún país con que se comercia, ni se han incluido por partidas en los datos declarados como región no especificada.

Las páginas de países también incluyen partidas informativas correspondientes a África, Oriente Medio y la Unión Europea (UE), los países exportadores de combustibles y los otros países. Los datos que figuran en esas partidas presentan el comercio exterior de todos los países miembros del grupo con el país respectivo. De igual forma, esas partidas aparecen en las páginas de las regiones y del mundo. La partida informativa representa el comercio exterior de cada uno de los países miembros del grupo. Por ejemplo, la línea UE de la página del mundo representa el comercio exterior de todos los países de la UE con el mundo, incluidos los intercambios entre los países miembros de la Unión. En esta línea no se presentan los datos de la UE como si ésta fuera un solo país. Los usuarios que deseen obtener estas estadísticas deberán restar el comercio interior entre los países de la UE.

Los cuadros resumidos del mundo y las regiones se calculan a partir de los datos que figuran en las páginas de países. En esos cuadros se registra el comercio de un grupo de países con cada uno de los países enumerados en el cuadro. Esto equivale a colocar una sobre otra todas las páginas de los distintos países de una región y sumar todas las cifras verticalmente en una página superior que viene a ser un cuadro agregado.

## Moneda

Todos los datos se presentan en dólares de EE.UU. Puesto que la mayoría de los países declaran datos en su moneda nacional, los equivalentes en dólares de EE.UU. se obtienen convirtiendo los datos a los tipos de cambio medios del período publicados en las líneas rf o rh de las páginas de países de in IFS. Por lo general, las conversiones se basan en los datos disponibles correspondientes al período más corto y luego son agregados para obtener datos con respecto a períodos más largos: por ejemplo,

los datos mensuales se convierten usando los tipos de cambio mensuales y los equivalentes en dólares de EE.UU. se agregan para obtener los valores trimestrales y anuales.

## Coherencia de los datos que proporcionan los países que comercian entre sí

Se da por supuesto a veces que los datos de exportación e importación correspondientes de los países que comercian entre sí deberán ser coherentes. Es decir, el monto de las exportaciones del país A al país B deberá ser igual al de las importaciones del país B provenientes del país A, tras los ajustes por concepto de los costos de flete y del seguro conforme al criterio de que las importaciones del país B se valoran generalmente sobre la base c.i.f.. El sistema de estimación de DOTS se basa en este supuesto en los pocos casos en que uno de los dos países nunca ha declarado datos.

Sin embargo, cabe señalar que, además de la inclusión de los costos del flete y del seguro en las importaciones c.i.f., existen otras dificultades de diversa índole que pueden dar lugar a incoherencias entre las exportaciones con destino a un país con que se comercia y las importaciones f.o.b. registradas por ese país, o entre las importaciones f.o.b. provenientes del país con que se comercia y las exportaciones registradas por dichos países. La falta de coherencia de las estadísticas entre el punto de origen y el de destino de un envío determinado se debe principalmente a las diferencias en 1) los criterios y desglose de la clasificación, 2) el momento de registro, 3) la valoración y 4) la cobertura, así como 5) a los errores de procesamiento.

### Criterios y desglose de la clasificación

*Criterios de clasificación en función del origen o del destino en caso de reexportación:* Muchas mercancías se envían a través de otros países, por ejemplo, un gran volumen del comercio de Alemania se envía a través de los Países Bajos. Es posible que los datos declarados no sean coherentes si el comercio del país de origen se clasifica como comercio hacia un primer destino o a un destino más próximo que constituye el punto de reexportación, mientras que el país de destino final clasifica el mismo comercio de acuerdo con el país de origen. A veces, el país de destino final no es conocido en el punto de exportación.

Por otra parte, el país de origen puede clasificar la operación como un envío hacia el país de destino final, mientras que este último clasifica dicha operación de acuerdo con el origen más próximo, que constituye un punto de reexportación. La falta de uniformidad en lo que respecta a la clasificación también puede ser el resultado de las diferentes normas que aplican las administraciones aduaneras nacionales para determinar el país de origen, de reexportación y de destino.

*Falta de desglose por país de origen o de destino en las estadísticas publicadas:* Esta situación crea inmediatamente

problemas para identificar la información sobre el comercio entre los países a partir de los datos publicados. Es posible que no se publique información sobre el país de origen y de destino de los bienes militares y otros artículos de carácter confidencial y de los bienes públicos, o que esta información se publique en forma de agregados regionales. También es posible que no se determine el destino y que, por lo tanto, éste no se publique porque la persona encargada de la reexportación no conoce el destino final en el momento del envío. Además, es posible que se publiquen agregados regionales sin un desglose por países si las transacciones comerciales de algunos países con que se comercia no alcanzan un nivel mínimo.

### Momento de registro

Transcurre algún tiempo entre el envío de una exportación y el recibo de una importación, sobre todo si las mercancías se transportan lejos. Para evitar estas incoherencias en el momento de registro, las normas internacionales en materia de contabilidad nacional y de balanza de pagos recomiendan basarse en el criterio del traspaso de propiedad para asignar una fecha a las transacciones. Conforme a este criterio, un bien exportado cambia de propietario en el momento en que el país exportador envía dicho bien, fecha en que el país exportador registra dicha transacción como una exportación y el país de destino como una importación (f.o.b.). Sin embargo, por razones prácticas conforme a ECIM 2010, las autoridades aduaneras del país importador contabilizan el recibo de estos bienes en una fecha posterior, cuando llegan a la frontera del país receptor, lo que puede crear una incoherencia en cuanto al momento de registro. Por lo tanto, el mismo envío puede aparecer en las estadísticas del país importador correspondientes a un período (un mes, un trimestre o un año) posterior al período en dicho envío aparece en las estadísticas del país exportador.

### Valoración

Aparte de las valoraciones c.i.f. y f.o.b., entre las causas posibles de la falta de coherencia entre la valoración un envío determinado en el punto de origen y en el punto de destino cabe señalar la aplicación de conversiones diferentes del tipo de cambio, el fraude, los procedimientos contra el fraude, los valores desconocidos en el momento del envío y los diferentes tratamientos de algunos costos específicos o procedimientos de evaluación.

### Cobertura

Los envíos destinados a las zonas francas y a los almacenes bajo control aduanero y provenientes de éstos, salvo los bienes militares u otros artículos de carácter confidencial y los bienes públicos, los valores mínimos para el registro aduanero de los envíos, y los bienes devueltos y otros bienes no registrados por la administración aduanera (ni incluidos en las encuestas) son algunos ejemplos de las diferencias en materia de cobertura que pueden dar lugar a incoherencias.

## **Errores de procesamiento**

Debido a los desfases de declaración y de procesamiento, en muchos casos los datos sobre el comercio exterior correspondientes a un período determinado se divulgan antes de que se hayan procesado todos los documentos aduaneros correspondientes a dicho período. Estos datos a veces no se revisan o, si se revisan, se cometen errores al asignar la fecha en que se envían o se reciben los bienes y los datos desfasados se incluyen en el mes, el trimestre o el año equivocado. También pueden cometerse errores al asignar el destino de las exportaciones y el origen de las importaciones durante el despacho de aduana, o en los casos en que se modifica el destino final después del envío inicial durante la reexpedición, pero no se revisan los datos y, por lo tanto, el cambio no se incorpora en las estadísticas publicadas.

Estas cuestiones deberán considerarse al momento de interpretar los datos. La cooperación internacional en materia de armonización y conciliación de los procedimientos aduaneros y las definiciones podría contribuir a reducir las diferencias; en algunos casos, los países han conciliado los datos o han utilizado los datos de los países con que comercian para preparar sus propias estimaciones.

## **Supresión de líneas de datos de países socios**

Un país socio no está representado en una tabla, si para todos los períodos presentes las cifras publicadas para el país socio, son menos de 50.000 en las tablas expresadas en millones de dólares E.E.U.U., o menos de 50.000.000 en las tablas expresadas en billones de dólares E.E.U.U. Tenga en cuenta que todos los datos están disponibles en línea en <http://data.imf.org/dot>.
