
Index

Page numbers followed by *f*, *n*, or *t* refer to figures, footnotes, or tables, respectively.

B

- Balance of payments
 - carry trade and, 100
 - exchange rate and, 113
 - external conditions and, 109, 111*t*, 114*t*
 - shocks, 37
- Bayesian techniques, 17
- Brazil
 - capital inflows into, 83–84
 - derivatives market, 84
 - foreign investment in, 84, 85*f*
- Broad money, 40, 41*f*
- Budget cycles, 120, 123, 133
- Business cycle
 - expenditure smoothing and, 124
 - fiscal behavior and, 126*f*
 - public debt targeting and, 133–138
 - structural balance rules and, 123

C

- Capital controls
 - CFMs, 91–98
 - effectiveness of, 99, 102
 - IOF imposition, 90–91
- Capital flows
 - composition of, 93–96
 - currency appreciation and, 7, 12–13
 - exchange rate and, 92–93, 113
 - monthly, 93*t*
- Capital flows management measures (CFMs)
 - downsides of, 97–98
 - IOF imposition and, 90–91
 - role and effectiveness, 91–98, 102–103
- Capital inflows
 - into Brazil, 83–84
 - currency appreciation and, 7, 12–13
 - Dutch disease phenomenon and, 14
 - economic growth and, 21
 - emerging markets and, 85*f*
 - exchange rate and, 86
 - gross and net, 84*f*, 87*f*
 - introduction to, 1–2
 - policy response, 86–91
 - predicted and actual, 87*f*
 - stylized facts on, 84–86
- Capital market development, 159, 160*f*, 167
- Caribbean countries
 - budget issues, 139
 - fiscal framework proposal for, 125–133
- Carry trade
 - in the futures market, 89, 100, 101*f*
 - monetary policy and, 96–97
- Central America, international reserve accumulation in, 38–44, 51
- Chicago Board of Options Exchange
 - Volatility Index (VIX), 106, 107*f*
- Choleski decomposition, 155
- Commodity exporters, 44, 106, 173
- Commodity prices, 8*f*, 96, 172*n*
- Consumer price index (CPI) inflation, 175, 177*t*, 182, 183*f*
- Consumption insurance, 44, 45, 49, 50, 56
- Credit dollarization
 - capital market development and, 159, 160*f*
 - by category, 153*f*

changes in, 154*n*
 decline in, 151
 empirical approach, 155
 impulse responses and, 160–161
 variance decomposition, 166*t*
See also Deposit dollarization
 Credit growth, 89, 90, 107, 108, 111*t*
 Credit markets, 173, 184
 Credit-to-output ratio, 184, 185
 Currency appreciation
 capital flows and, 7, 12–13
 CFMs and, 91, 92
 Current account balance (CAB), 63, 64*f*,
 67, 71–72*f*, 77*f*, 78*t*
 Current account norms
 conditional distribution of, 70*f*
 fixed-effects panel regression and, 75*t*
 introduction to, 61
 net foreign assets and, 73*t*
 Cyclically adjusted primary balances, 134,
 135*t*

D

Debt-to-GDP ratio, 43, 125, 131, 133,
 137, 138
 Dedollarization
 decline in, 151
 decomposition of, 154*t*
 empirical approach, 154–160
 empirical results, 160–167
 exchange rate and, 150, 163
 inflation and, 150, 167
 introduction to, 149–150
 monetary policy and, 186–187
 reserve requirements and, 160
 short-term drivers of, 151, 166–167
 stylized facts, 151–154
 De-industrialization, 9, 14, 23
 Deposit dollarization
 decline in, 151, 152, 164
 empirical approach, 155
 impulse responses and, 160–161
 by maturity, 153*f*
 variance decomposition, 166*t*
 Derivatives market, 84, 85, 90*t*, 97, 98
 Developing economies
 domestic impact for, 107–108
 econometric regression and, 108–112
 exchange rate regimes and, 112–116
 external environment for, 105–107
 See also Emerging markets
 Dollar deposits, 44, 45, 46, 47, 48,
 149*n*
 Dollarization
 banking sector, 174*f*
 conclusion about, 167–168
 decline in, 153, 156, 167
 description of, 149
 exchange rate and, 157–158*f*; 163*f*,
 164*f*
 forced, 150
 in Latin American countries, 150*f*,
 152*f*
 prudential measures and,
 162*f*
 public bonds and, 162*f*
 reserve requirements and,
 161*f*
 See also Dedollarization; Monetary pol-
 icy transmission
 Domestic bonds, 42, 84, 90, 97
 Domestic demand, 107, 108, 109–110*f*,
 111*t*, 114*t*, 116
 Domestic savings, 10, 22, 97
 Dutch disease phenomenon
 application and empirical studies,
 16–20, 25*f*
 economic growth and, 7, 13
 effects of, 14
 exchange rate and, 16
 fiscal policy and, 28
 foreign-aid-induced, 14–15
 literature review in numbers, 23–27
 low-income countries and, 15
 negative implications of, 15
 net foreign assets and, 14
 policy discussion, 27–29
 real appreciation and, 11–12
 RER and, 9–11, 15

- theory related to, 12–16
See also Real exchange rate (RER)
- Dynamic stochastic general equilibrium (DSGE), 17
- E**
- Economic growth
 Dutch disease phenomenon and, 7, 13
 fear of appreciation on, 22
 foreign aid and, 17–18
 real exchange rate and, 7–8, 10, 20–22, 26*f*, 27
- Emerging markets
 capital inflows and, 85*f*
 macroeconomic indicators, 109–110*f*
 quantile regression framework and, 77–78
 REER in, 8*f*
 reserve holdings of, 37, 38, 39–40*f*, 51
- Equilibrium exchange rate, 61, 63–67
- Equilibrium phenomenon, 8, 11, 27, 29
- Exchange rate
 adjustment, 63–64
 assessment of, 61, 62, 70
 capital flows and, 92–93, 113
 capital inflows and, 86
 dedollarization and, 150, 163
 dollarization and, 156, 157–158*f*, 163*f*, 164*f*
 Dutch disease phenomenon and, 16
 inflation and, 182, 183*f*
 interest rate and, 182
 IOF imposition and, 88*f*
 misalignment, 62
 nominal, 142, 143, 157*f*
 volatility, 27, 156, 158*f*, 161, 163, 164*f*
- Exchange rate flexibility
 domestic demand and, 113
 exchange rate regimes and, 112–116
 export and imports and, 113
 reserve holdings and, 41, 43
- Exports and imports, 43, 62, 63, 107, 109, 110
- F**
- Factor reallocation, 12, 23, 24–25*f*; 27, 29
- FDI inflows, 94, 95
- Financial dollarization. *See* Dollarization
- Fiscal adjustment, 66*f*; 86–87
- Fiscal balances, 65, 72, 73, 76, 78, 115*t*
- Fiscal policy
 Dutch disease phenomenon and, 28
 fiscal framework proposal and, 121–123, 140–141
 introduction to, 2
 passive, 131–132*f*
- Fixed-effects panel regression, 70, 75–76*f*
- Foreign aid
 Dutch disease phenomenon and, 14–15
 growth and, 17–18
 low-income countries and, 18
 real exchange rate and, 18
 shocks to, 24*f*
- Foreign currency debt, 41, 52*t*, 129, 158
- Foreign exchange inflows, 8, 11
- Foreign investment, 84, 85*f*, 101*f*
- Forward prices, 102–103
- Futures market, 97, 100, 101*f*
- G**
- Greenspan-Guidotti rule, 39, 41, 44, 57
- Growth. *See* Economic growth
- I**
- Impulse response functions, 160, 180, 181*f*; 183*f*, 185
- Increasing-returns-to-scale (IRS) sector, 19
- Inflation
 actual and expected, 175, 176*f*
 average annual, 156*f*
 dedollarization and, 150, 167
 dollarization and, 149
 domestic currency and, 186*f*

- exchange rate and, 182, 183*f*
- policy rate and, 177*t*
- Inflation targeting regime, 171, 172*n*, 180, 187
- Intercompany loans, 94, 95*f*
- Interest rate
 - domestic and futures-implied, 98*f*; 102
 - exchange rate and, 182
 - high, 84, 89, 96
 - IOF imposition and, 103*f*
 - nominal, 84, 142, 143
 - pass-through, 177–178, 179*t*
 - See also* Monetary policy
- International reserve accumulation
 - actual vs. optimal, 44–50, 58–59*f*
 - broad money and, 41*f*
 - data sources, 52*t*
 - defined, 38*n*
 - evolution of, 39*f*
 - median, 112*f*
 - in months of imports, 39*f*
 - rationale for, 37
 - reserve demand regressions and, 40–43, 53*t*
 - rules of thumb for, 38–43
 - short-term debt and, 40*f*
- IOF imposition
 - carry trade and, 96–97
 - exchange rate and, 88*f*
 - interest rate and, 103*f*
 - as a new measure, 90–91
 - regulatory changes affecting, 90*t*
 - See also* Capital flows management measures (CFMs)

J

“Joneses” variables, 42, 43

L

- Latin America
 - current account balances and, 77*f*; 78*t*
 - dollarization in, 150*f*; 152*f*
 - international reserves and, 37, 38, 39*f*; 41*f*

- Learning by doing (LBD) spillover effects, 9, 13, 15, 16, 17, 18
- Lending rates, 177, 178*f*; 179*t*
- Low-income countries
 - Dutch disease phenomenon and, 15
 - foreign aid and, 18

M

- Maastricht Treaty, 123
- Macroeconomic balance approach
 - for assessing equilibrium exchange rate, 63–67
 - development of, 61
 - purpose of, 62
- Macroeconomic framework, medium-term, 122–123
- Macroprudential instruments, 88–90
- Manufacturing sector, 14, 18, 20, 28
- Medium-term macroeconomic framework, 122–123
- Monetary policy
 - carry trade and, 96–97
 - dedollarization and, 186–187
 - introduction to, 2–3
- Monetary policy transmission
 - data sources, 188–190*t*
 - empirical analysis of, 179–183
 - exchange rate and, 182
 - financial factors’ role in, 183–187
 - interest rate and, 177–179
 - policy rate and, 176, 177*t*, 178*f*
- Money market rate, 172, 178, 179*t*, 180, 188*t*
- Monte Carlo simulation, 128–130, 133, 134*t*, 135*t*, 137*t*, 141

N

- Natural resource shocks, 9, 11, 12, 18–19
- Net foreign assets (NFA)
 - current account norms and, 73*t*
 - Dutch disease phenomenon and, 14
 - pooled OLS and, 67, 74*f*

New Zealand, 173, 175, 177*t*, 178, 179*t*,
180–187
 Nondeliverable currency forwards (NDFs),
85, 97, 102, 103
 Non-dollarized economies, 38,
172*n*
 Nontradable goods, 9, 12, 13, 14, 15, 27

O

Oil-exporting countries, 20, 62, 63, 65
 Old-age dependency ratio, 65, 75, 76

P

Peer or “Joneses” effects, 42, 51
 Pooled ordinary least squares (OLS), 67,
70, 72*f*, 73, 74*f*, 75
 PPP-GDP per capita, 65, 71*t*, 73*t*, 75
 Primary expenditures
 cyclical properties of, 136–137
 debt-to-GDP ratio and, 131, 133
 financial variables and, 125
 public debt projections and, 129–130
 Primary expenditure smoothing, 122, 124,
133–135
 Probability of a crisis, 50
 Prudential measures, 158–161
 Public bonds, 159, 161, 162*f*, 166
 Public debt targeting
 business cycle and, 133–138
 Caribbean countries and, 125–133
 debt-to-GDP ratio under, 131–132*f*
 dispersion and, 137*t*
 introduction to, 119–120
 smoothing properties of, 134*t*
 sovereign debt dynamics and, 141–144
 structural balance rules and, 123–124
 Purchasing power parity (PPP), 20, 21, 64, 65

Q

Quantile regression approach
 for assessing equilibrium exchange rate,
67–69

description of, 62
 fixed-effects panel regression and, 76*f*
 Latin America and, 77–78
 pooled OLS and, 72*f*, 74*f*

R

Real appreciation, 86, 93*f*
 Real effective exchange rate (REER)
 in emerging markets, 8*f*
 percent a year, 111*f*
 savings-investment norm and, 63, 64*f*
 Real exchange rate (RER)
 application, 9–13, 17–18, 28–30
 competitive, 22
 Dutch disease phenomenon and, 9–11,
15
 economic growth and, 7–8, 10, 20–22,
26*f*, 27
 foreign aid and, 18
 misalignment and instability, 20, 21,
24, 25, 26*f*, 29
 undervalued, competitive or overvalued,
10, 21, 22
 Remittances, impact of, 16–17, 23, 24*f*
 Reserve accumulation, 43, 51, 86, 92, 93*t*
 Reserve cover
 conclusion about, 51
 models of, 44–50
 rules of thumb for, 38–43
 Reserve requirements
 capital inflows and, 88, 89, 113
 dedollarization and, 160
 dollarization and, 161*f*
 IOF imposition and, 90*t*, 97
 raising of, 159*n*
 Reserves-to-GDP ratio, 42, 47, 50
 Risk aversion parameter, 49

S

Savings-investment norms
 assessment of, 63
 determinants of, 64–66
 econometric models for, 67

estimation of, 62, 78–79
 fiscal adjustment on, 66*f*
 fitted values of, 71*t*
 REER and, 63, 64*f*
 Short-term foreign currency debt, 41, 52*t*
 Size of output loss, 50
 Sovereign debt dynamics, 141–144
 Spillover effects, 9, 21, 28
 Structural balance rules, 123–124, 135,
 136, 139

T

Term premium, 49–50
 Terms of trade
 export and import growth and,
 109
 improvement in, 106, 107–108*f*

Tradable goods, 9, 13, 14, 15
 Trade openness, 173, 174*f*

U

Unemployment, 13, 14, 15
 U.S. dollar interest rate, 46, 95, 102, 103*f*

V

Variance decompositions, 125*n*, 126*f*,
 160, 166*t*
 Vector autoregression (VAR) model,
 127–128, 155*t*, 172, 185

W

World growth, 106*f*, 110, 115
