Prescription of currency requirements Yes. For countries with indemnity agreements concerning compensation for nationalized property, certain settlements are made through special accounts in pounds with the CBE. The balances in these accounts are minimal. Suez Canal dues are expressed in SDRs and may be settled in any foreign currency. Settlements with Sudan are made in accordance with the terms of a bilateral agreement.

Controls on the use of domestic currency Yes. Pursuant to Article 212 of Law No. 194/2020, dealings within Egypt—whether purchases or sales of goods and services—must be in Egyptian pounds unless stipulated otherwise in an international convention or another law.

For current transactions and payments Yes.

For capital transactions No.

Transactions in capital and money market instruments No.

Transactions in derivatives and other instruments No.

Credit operations No.

Use of foreign exchange among residents Yes. Egypt is a member of COMESA.

Payments arrangements Yes.

Bilateral payments arrangements No.

Operative No.

Inoperative No.

Regional arrangements Yes. Banks are authorized to execute foreign exchange transactions within the framework of a general authorization, without obtaining specific exchange control approval.

Clearing agreements No.

Barter agreements and open accounts No.

Administration of control Yes.

Payments arrears No.
Official

No.

Egypt does not have official payment arrears.

Private

No.

Controls on trade in gold (coins and/or bullion)

No.

On domestic ownership and/or trade

No.

On external trade

No.

Controls on exports and imports of banknotes

Yes.

On exports

Yes.

*Domestic currency* Yes. Travelers may take out up to LE 5,000 in banknotes. Exporting domestic or foreign currency through mail or postal parcels is not allowed.

*Foreign currency* Yes. Egyptian citizens may not export more than US$10,000 or its equivalent in other foreign currencies, including bearer negotiable instruments; foreigners may take out the remaining balance of the amounts (including bearer negotiable instruments) previously declared on arrival. In all cases, travelers departing Egypt must declare to the customs authorities any foreign currency and bearer negotiable instruments exceeding US$5,000 or its equivalent in other foreign currencies.

On imports

Yes.

*Domestic currency* Yes. Travelers may bring in up to LE 5,000 in banknotes. Importing domestic or foreign currency through mail or postal parcels is not allowed.

*Foreign currency* No. Travelers must declare to the customs authorities on entry foreign currency and bearer negotiable instruments exceeding US$10,000 or its equivalent in other foreign currencies.

Resident Accounts

Foreign exchange accounts permitted Yes.

Held domestically

Yes.

There are no restrictions on deposits or withdrawals for individuals or companies. Individuals and companies may also transfer abroad without maximum limits. In response to the COVID-19 outbreak, the CBE introduced temporary daily limits on cash deposits and withdrawals from banks: LE 50,000 for individuals and companies (except disbursements needed for wage payments) and LE 20,000 for automated teller machine (ATM) withdrawals. Effective August 25, 2022, the maximum deposit limit for individuals and companies was removed, and the cash withdrawals limit for individuals and companies from bank branches was increased to LE 150,000 from LE 50,000.

Approval required

No.

Held abroad

Yes.

There are no limits on foreign currency transfers.

Approval required

No.

Accounts in domestic currency held abroad

No.

Accounts in domestic currency convertible into foreign currency

Yes. Balances may be converted through the foreign exchange market in accordance with Know-Your-Customer (KYC) criteria. There are no restrictions set by the CBE to limit the conversion of domestic
currency to foreign currencies through banks or authorized foreign exchange dealers. Banks are free to set their own policy regarding this matter.

This exemption was extended three times without gaps, most recently until March 15, 2022 (effective March 24, 2021) and until March 15, 2023, (effective March 10, 2022).

Effective February 13, 2022, the CBE instructed banks that all import transactions must be conducted via LCs, with some exceptions.

Effective February 20, 2022, the CBE allowed the CGC to cover the risks associated with LCs issued by banks.

Most items may be imported freely. Automobiles may be imported only during the year of their manufacture. Imports of telecommunications equipment require permits from the National Telecommunications Regulatory Authority (NTRA). Imports of used telecommunications materials for trading purposes are prohibited.

Importers must register with the General Organization for Export and Import Control within the Ministry of Foreign Trade and Industry. All registered importers must be Egyptian nationals and satisfy a number of other conditions, including those regarding financial liability and the presentation of a proven record of past commercial activities. For registration, importers must also provide details of the products they intend to import. Payments for imports must be made through a bank operating in Egypt.

Products are classified into six groups for customs purposes, with tariff rates ranging from 2% to 32%, with two exceptions.

Liquefied petroleum gas, butane, and oil are imported only by the state-owned Egyptian General Petroleum Corporation and Egyptian Natural Gas Holding Company. Some other petroleum products may be imported by the private sector.

**Exports and Export Proceeds**

For monitoring purposes, the CBE issued a circular on April 28, 2013, requiring repatriation of export proceeds within 180 days of shipment for products specified in Decree No. 235 of the Ministry of
Industry and Foreign Trade, as amended by Circular of November 12, 2015. Banks must report to the CBE exporters that do not comply. These exporters are prohibited from entering into future similar export transactions through the banking sector.

There are no surrender requirements; however, for monitoring purposes, the CBE issued a circular on April 28, 2013, requiring repatriation of export proceeds within 180 days of shipment for products specified in Decree No. 235 of the Ministry of Industry and Foreign Trade, as amended by Circular of November 12, 2015. Banks must report to the CBE exporters that do not comply. These exporters are prohibited from entering into future similar export transactions through the banking sector.

Export licenses

Without quotas Yes. Exporters must register with the General Organization for Export and Import Control. They must meet a minimum capital requirement of LE 3,000 and must not have a criminal record. Public sector and government employees may not register as exporters.

With quotas No.

Export taxes No.

Collected through the exchange system No.

Other export taxes No.

Payments for Invisible Transactions and Current Transfers

- Sale or issue locally by nonresidents: No.
- Purchase abroad by residents: Yes.
- Sale or issue abroad by residents: No.

Controls on derivatives and other instruments: Yes.

The Financial Regulatory Authority (FRA) must approve local and foreign securities offerings (by companies that practice any of the activities in Article 27 of Law No. 95 of 1992) in advance. Primary and secondary offerings by nonresidents require FRA approval. Secondary offerings by residents usually do not require FRA approval.

Private pension funds may not invest in foreign securities or assets abroad. The FRA does not allow Egyptian brokerage and asset management firms to purchase international securities not listed on the Egyptian Stock Exchange on behalf of their Egyptian clients.

Capital Market Law No. 95 of 1992 as amended by Law No. 123 of 2008 allows international institutions to issue bonds in the local market with FRA approval.

Private pension funds may not invest in foreign securities or assets abroad. The FRA does not allow Egyptian brokerage and asset management firms to purchase international securities not listed on the Egyptian Stock Exchange on behalf of their Egyptian clients.

Private pension funds may not invest in foreign securities or assets abroad.

repricing date according to the residual periods until the maturity dates, while the principle is slotted according to the residual period until the repricing date. (2) Regarding interest rate sensitive items on the asset side: (a) For CBE reserves in foreign currency with interest, interest is slotted in the time buckets prior to the repricing date according to the residual periods until the maturity dates, while the reserves balance (the principle) is slotted according to the residual period until the repricing date; (b) for accrued interest on CBE deposits with fixed interest rate, the accrued interest is slotted according to the residual periods until the maturity dates for these interests, while the principle is slotted in the residual period until its maturity date; and (c) for CBE deposits with variable interest rates, the interest is slotted in the time bucket prior to the repricing date according to the residual periods until the maturity dates, while the principle is slotted according to the residual period until the repricing date.

Credit controls No.

Differential treatment of deposit accounts held by nonresidents No.

Reserve requirements No.

Liquid asset requirements No.

Interest rate controls No.

Credit controls No.

Investment regulations Yes.

Abroad by banks Yes.

Banks’ maximum exposure abroad is calculated by country, financial institution, and group, taking into consideration a specific methodology. The CBE sets exposure limits to countries, financial institutions, and financial groups, related mainly to the bank’s capital base, countries’ ratings, and their gross domestic product. The regulation sets concentration limits to high-risk exposures and does not specify exposure limits to each type of borrower as follows: The total high-risk exposure for each country should not exceed 40% of the concentration limit of that country. The total high-risk exposures for all countries should not exceed 100% of the bank’s capital base. The total high-risk exposures for non-investment grade countries should not exceed 20% of the bank’s capital base. The unutilized portion of the high-risk exposure limit may be directed to low-risk exposures, but not vice versa.

In banks by nonresidents Yes.

Investments in banks are subject to “fit and proper” tests: Shares held by residents or nonresidents in a bank in Egypt exceeding 5% of the issued capital must be reported to the CBE. Shares exceeding 10% require CBE approval.

Open foreign exchange position limits Yes.

On resident assets and liabilities Yes.

The net long or short position in any foreign currency of a bank operating in Egypt, including branches of foreign banks, may not exceed 10% of the capital base, the long or short position in all currencies may not exceed 20% of the capital base, and the long or short position in local currency (that is, in an opposing position) may not exceed 10% of the capital base.

On nonresident assets and liabilities Yes.

The net long or short position in any foreign currency of a bank operating in Egypt, including branches of foreign banks, may not exceed 10% of the capital base, the long or short position in all currencies may not exceed 20% of the capital base, and the long or
short position in local currency (that is, in an opposing position) may not exceed 10% of the capital base.

Pursuant to Law No. 10 of 1981 (as amended), if an individual or entity owns more than 5% of the total shares of an insurance or reinsurance company, the company must notify the FRA within two weeks on the appropriate form. No individual—except by inheritance—or corporate entity may own 10% or more of the issued capital of an insurance or reinsurance company, except with the approval of the prime minister. The approval requirement applies to residents and nonresidents.

By law, insurance and reinsurance companies must allocate funds in Egypt at least equal to the value of their technical reserves for business carried out in Egypt. Companies must maintain the funds of life insurance completely separate from the funds of property and liability insurance. Cash and securities that form part of these funds must be deposited in one of the banks registered at the CBE. Therefore, by law, investments may not be held abroad.

Insurance and reinsurance companies must invest their allocated funds with respect to life insurance plans as follows: (1) at least 25% in government securities or guaranteed certificates; (2) a maximum of 20% in bonds, provided the amount invested in bonds of a single issuer does not exceed 5% of the total allocated funds, 20% of the capital of the entity issuing the bonds, or 10% of the paid-up capital of the insurance or reinsurance company, whichever is less; (3) a maximum of 20% in stocks and investment funds, provided the amount invested in stocks and investment funds of a single issuer does not exceed 5% of the total allocated funds, 20% of the capital of the entity issuing these stocks, 20% of the total issued instruments of the investment fund, or 10% of the paid-up capital of the insurance or reinsurance company, whichever is less; (4) a maximum of 10% of paid-up capital in bonds, stocks, and investment funds of a single issuer; (5) a maximum of 30% in real estate in Egypt that is registered by notarization or recorded with the relevant notary public office, provided the value of the real estate does not exceed 5% of the total allocated funds or 10% of the paid-up capital of the insurance or reinsurance company, whichever is less; (6) loans guaranteed by insurance policies within 90% of their recovered value, which is determined at the end of the financial year according to the company’s actuarial certificate; (7) a maximum of 20% in mortgage loans, provided the loans do not exceed 5% of total allocated funds, 60% of the market value of the real estate, or 10% of the paid-up capital of the insurance or reinsurance company, whichever is less; (8) a maximum of 50% in bank deposits or savings or certificates of deposit issued by the CBE or registered banks; and (9) a maximum of 20% in other investments approved by the FRA.

Insurance and reinsurance companies must invest their allocated funds with respect to property and liability insurance plans as follows: (1) at least 20% in government securities or guaranteed certificates; (2) a maximum of 15% in bonds, provided the amount invested in bonds of a single issuer does not exceed 5% of the total allocated funds or 10% of the paid-up capital of the insurance or reinsurance company, whichever is less; (3) a maximum of 25% in stocks and investment funds, provided the amount invested in stocks and mutual funds of a single issuer does not exceed 5% of the total allocated funds, 20% of the capital of the entity issuing these stocks,
20% of the total issued instruments of mutual funds, or 10% of the paid-up capital of the insurance or reinsurance company, whichever is less; (4) a maximum of 10% of paid-up capital in bonds, stocks, and mutual funds of a single issuer; (5) a maximum of 30% in real estate in Egypt that is registered by notarization or recorded with the appropriate notary public office, provided the value of the real estate does not exceed 10% of the total allocated funds or 10% of the paid-up capital of the insurance or reinsurance company, whichever is less; (6) a maximum of 50% in bank deposits or savings or certificates of deposit issued by the CBE or registered banks; and (7) a maximum of 20% in other investments approved by the FRA.

FRA procedures govern currency matching on the composition of insurance companies’ assets and liabilities. According to these procedures, an insurance company must define its requirements for personal and property operations in foreign currencies and pounds to be sure it satisfies currency-matching requirements for assets and liabilities composition.

Private pension funds are not allowed to invest in foreign securities or assets abroad.

Pursuant to Ministerial Decree No. 109 of 2015 of Law No. 54 of 1975, private pension funds (known as private insurance funds) must invest their funds as follows: (1) a maximum of 35% as deposits and savings certificates in local or foreign currencies at registered banks, provided the total deposits and savings certificates in one bank do not exceed 25% of the total funds of the pension fund in case the funds of the pension fund exceeds one hundred million Egyptian pounds; (2) at least 15% in government bonds or guaranteed certificates with maximum of 70% of the total funds of the pension fund; (3) a maximum of 15% of the total funds of the pension fund in securitization bonds and tradable sukuk in the capital market, provided the amount invested in bonds issued from one entity does not exceed 5% of the total invested funds of the pension fund or 10% of the total value of the issuances of the entity whichever is less; (4) a maximum of 20% of fixed income investment funds and cash investment funds, provided the value of the investments in one investment fund does not exceed 5% of the total invested funds of the pension fund or 10% of the net assets of the investment fund whichever is less; (5) a maximum of 15% of open investment funds, provided the value of the investments in one investment fund does not exceed 5% of the pension fund or 10% of the net assets of the investment fund whichever is less; (6) a maximum of 15% in stocks, provided the amount invested in stocks of a single issuer does not exceed 5% of the total invested funds of the pension fund or 10% of the capital of the entity issuing the stocks; (7) the total invested amounts in securities and bonds stated in items (3) and (6) issued of a single issuer should not exceed 5% of the total funds of the pension fund; (8) the total invested amounts in investment funds stated in item (5) and stocks in item (6) should not exceed 20% of the total funds of the pension fund; (9) a maximum of 10% in real estate funds, provided the amount invested in a single real estate fund does not exceed 5% of the total invested funds of the pension fund or 10% of the net value of the assets of the investment fund whichever is less; (10) a maximum of 10% in real estate to be owned in Egypt that is registered by notarization or recorded with the appropriate notary public office, provided the value of one real estate does not exceed 5% of the total allocated funds; (11) the total
invested amounts in investment funds stated in item (8) and real estate stated in item (9) should not exceed 15% of the total funds of the pension fund; (12) a maximum of 25% of the funds of the pension fund to the members as loans, provided no more than 75% of member’s rights in the fund to be paid; and (13) a maximum of 5% in other investments approved by the FRA.

Currency-matching regulations on assets/liabilities composition
No.

Investment firms and collective investment funds
Yes.

Limits (max.) on securities issued by nonresidents
No.

Limits (max.) on investment portfolio held abroad
Yes.

Capital Market Law No. 95 of 1992 requires investment funds to disclose their investment policies via their prospectus. Investment funds established in Egypt do not have investments abroad, according to their disclosed investment strategies. Private portfolio investments are made solely in accordance with the investors’ decisions.

Limits (min.) on investment portfolio held locally
No.

Currency-matching regulations on assets/liabilities composition
No.

Changes during 2021 and 2022

Resident Accounts

Foreign exchange accounts permitted
Held domestically 08/25/2022
The maximum deposit limit for individuals and companies was removed, and the cash withdrawals limit for individuals and companies from bank branches was increased to LE 150,000 from LE 50,000.

Imports and Import Payments

Financing requirements for imports
Minimum financing requirements 03/24/2021
The exemption for banks from cash cover requirements for certain food products of March 6, 2019, was extended for one more year until March 15, 2022.

02/13/2022 The Central Bank of Egypt instructed banks that all import transactions must be conducted via LCs, with some exceptions.

02/20/2022 The Central Bank of Egypt allowed the Credit Guarantee Company to cover the risks associated with LCs issued by banks.

03/10/2022 The exemption for banks from cash cover requirements for certain food products of March 6, 2019, was extended for one more year until March 15, 2023.

Documentation requirements for release of foreign exchange for imports
Letters of credit 03/24/2021
The exemption for banks from cash cover requirements for certain food products of March 6, 2019, was extended for one more year until March 15, 2022.

**Exchange rate structure**

- **Unitary**: Yes.
- **Dual**
- **Multiple**

**Classification**

- **No separate legal tender**: Yes.

The exchange rate arrangement is an exchange arrangement with no separate legal tender. On January 1, 2001, the US dollar became unrestricted legal tender with unlimited redeemability for the settlement of debt in El Salvador. The US dollar is used as a unit of account and a medium of exchange. The Central Reserve Bank (CRB) must exchange colones in circulation for US dollars at banks’ request at a fixed and unalterable exchange rate of C 8.75 per US dollar. Both the US dollar and the Salvadoran colón are legal tender; payments may be made in either dollars or colones.

The Bitcoin Law was passed on June 8, 2021; its intent is to regulate bitcoin as unrestricted legal tender which may be used without limitation in any transaction for any purpose that individuals or legal entities, public or private, may need to perform. This is without prejudice to the application of the Monetary Integration Law. The Bitcoin Law became effective September 7, 2021.

Silver and gold commemorative coins in denominations of C 150 and C 2,500, respectively, are also legal tender.
prejudice to the application of the Monetary Integration Law. The Bitcoin Law became effective September 7, 2021.

*Exchange tax* No.

*Exchange subsidy* No.

*Foreign exchange market* Yes. There are currently no regulations governing ADs’ determination of the bid-ask spread and foreign exchange commissions.

Spot exchange market Yes. Exchange bureaus may operate in the foreign exchange market with the authorization of the Superintendency of the Financial System (SSF), which issues operating certificates in accordance with Article 122 of the Law on the Supervision and Regulation of the Financial System. One exchange bureau is currently authorized. Exchange bureaus may buy and sell foreign exchange in accordance with the Exchange Bureau Law and implementing instructions. They may also open accounts abroad and make transfers but not payments on behalf of their customers. As of December 31, 2021, there is one authorized exchange bureau.

*Operated by the central bank* No.

Foreign exchange standing facility No.

Allocation No.

Auction No.

Fixing No.

*Interbank market* Yes. A foreign exchange market for other currencies (especially Central American) is conducted through banks and exchange bureaus. As of...
December 31, 2021, 14 banks and 1 exchange bureau were authorized to participate in the foreign exchange market; the cooperative banks also participate. The SSF licenses exchange bureaus and banks. Because of the dollarization regime, they do not deal directly with the CB. There are no limits on the bid-ask spreads and commissions of market participants.

Over the counter Yes. The foreign exchange market operates on a formal basis over the counter.

Brokerage Yes. Brokers participating in the foreign exchange market deal on their own account.

Market making No.

Forward exchange market Yes. Banks participate in the forward exchange market for hedging purposes. The CB did not engage in any forward transactions in 2021.

Official cover of forward operations No.

**Arrangements for Payments and Receipts**

**Prescription of currency requirements** No. Monetary obligations may be contracted in US dollars or any other currency and must be settled in the currency specified in the contract.

Controls on the use of domestic currency No.

*For current transactions and payments* No.

*For capital transactions* No.

Transactions in capital and money market instruments No.

Transactions in derivatives and other instruments No.

Credit operations No.

Use of foreign exchange among residents No.

**Payments arrangements** Yes.

Bilateral payments arrangements No.

*Operative* No.

*Inoperative* No.

**Regional arrangements** Yes. El Salvador is a member of the Central American Monetary Council and is a signatory of the Treaty on Payment and Securities Settlement Systems in Central America and the Dominican Republic, which has been in effect in the country since December 2008. The Treaty enables the Central American Monetary Council to establish regional payments systems that are legally protected under the Treaty. An interconnected payments system for Central America and the Dominican Republic (SIPA) had been in effect since January 2011.

Clearing agreements No.

Barter agreements and open accounts No.

**Administration of control** Yes. All private sector foreign exchange transactions take place through commercial banks and exchange bureaus. There are no exchange controls, and economic agents may freely carry out legal transactions in foreign currency through legally authorized institutions, that is,
commercial banks, Banco Hipotecario, Banco de Fomento Agropecuario, exchange bureaus, and cooperative banks. Article 122 of the Law on Supervision and Regulation of the Financial System states: “The powers conferred upon the Central Reserve Bank of El Salvador under the Law on Foreign Currency Exchange Houses shall be transferred by operation of law to the Superintendency of the Financial System governed by this Law, except for the authority to issue the Instruction implementing the law on foreign currency exchange bureaus which regulates the operations of exchange bureaus, which will continue to be the responsibility of the Central Reserve Bank. The files containing information on the exchange bureaus currently in operation, as well as the pertinent guarantees, shall be transferred by the Central Reserve Bank to the Superintendency, within the three months after the date of this Law.” As a result, on November 1, 2011, the CRB delivered to the SSF the records and guarantees for exchange bureaus Puerto Bus, S.A. de C.V., Gigante, S.A. de C.V., Latin Faz, S.A. de C.V., and Corfinge, S.A. de C.V., and formalized the delivery through instruments of delivery for each exchange bureau.

**Import licenses and other nontariff measures**

- **No.**
- **Yes.**

Importers are free to determine payments arrangements for their imports, including advance payments.

Certain products require import licenses issued by specific government agencies, in areas related to (1) Ministry of National Defense: arms, ammunition, explosives, combustible chemical substances, lead, and pyrotechnic products; (2) Ministry of Agriculture and Livestock through the General Directorate of Plant Health and the General Directorate of Livestock: animal- and plant-based products and subproducts, agrochemicals, and biological products; (3) Ministry of Health: food products and beverages processed industrially, dangerous ingredients and potable and nonpotable alcohol, and fishery products; (4) Ministry of Environment and Natural Resources: ozone-depleting substances, solid waste, hazardous materials, and wildlife; and (5) National Directorate of Medications; pharmaceutical products and chemicals; cleaning products, cosmetics, narcotics, psychotropic substances,
aggregates, precursors, medications for human consumption, and controlled substances.
For products and by-products of animal and plant origin, and the means that transport them, the intervention of the International Regional Organization for Agricultural Health (Organismo Internacional Regional de Sanidad Agropecuaria (OIRSA)) is required through the application of quarantine treatments.

During the COVID-19 pandemic, automation projects were implemented by the foreign trade one-stop window, the Import/Export Processing Center (CIEX El Salvador), administered by the CRB, to streamline foreign trade procedures and reduce the risk of contagion. These projects include:

(1) As of May 28, 2020, the electronic authorization of import visas of the National Directorate of Medicines for pharmaceutical products and chemical substances was implemented; cleaning products, cosmetic products, narcotics, psychotropics, aggregate products, precursors, medicines for human consumption and controlled substances.
(2) Effective May 5, 2021, the authorization of alcohols regulated by the Ministry of Health was implemented through electronic interconnection.
(3) Effective September 29, 2021, electronic payment was implemented for quarantine treatment services of the Regional International Organization for Plant and Animal Health for products and by-products of animal and plant origin, and the means of transport that move them.
(4) Effective October 22, 2021, the electronic issuance of visas for agricultural and veterinary products, regulated by the Ministry of Agriculture and Livestock, was implemented through electronic interconnection.
(5) Effective April 1, 2022, the CIEX El Salvador Document Manager was implemented, which allows importers to store digital documents and register applications to manage the authorization of import permits.

Positive list

Yes.
Licenses issued by the MOF are required for authorized imports of ethyl alcohol, whether denatured or not, and authorization is required to import refined or raw cane sugar. The minister of health issues permits for ethyl alcohol, except when raw materials for various food industries are involved. Authorization by the Ministry of Defense is required for imports of weapons and explosives. An environmental permit is also required for imports of chemicals, either from the Ministry of Environment and Natural Resources, the Ministry of Agriculture and Livestock, or from the Ministry of Health.
Importation of regulated industrial products requires registration with the Ministry of Health. The National Directorate of Medicines is the regulatory agency for the import of pharmaceutical products, medical inputs, cosmetics, hygiene products, drugs and psychotropic products, and aggregates.

Negative list

Yes.
El Salvador prohibits imports of the following products for reasons of health, security, public morality, or environmental protection: subversive material or teachings contrary to the political, social, and economic order; obscene materials; unethical or indecent films; abortion-related products; opium containing less than 9% morphine; opium residue and ash; devices for smoking opium; unstamped cigarette paper; counterfeit coins and banknotes; plain silver coins; and slot machines. Imports of coffee in a form that can be used as seeds for planting and imports of coffee bushes are prohibited. Also prohibited are lightweight passenger and freight motor vehicles more
than 8 years old and heavy passenger and freight vehicles more than 15 years old (except collector’s items and vehicles donated to the government or to public service or charitable organizations; those used exclusively by physically challenged persons; those providing a specific service, such as agricultural, earth-moving, or industrial work; and those connected with power generation plants, well drilling, and water purification units). Effective May 28, 2021, the importation of used electric or hybrid automotive vehicles more than 3 years old is prohibited.

Open general licenses

No.

Licenses with quotas

Yes. The Ministry of Economy grants import permits or licenses for products that are subject to some form of agricultural quota under the United States FTA, meaning that a given quantity may be imported with a 0 tariff, including beef, pork, milk in liquid or powdered form, other dairy products, yellow or white corn, sorghum, chicken parts, and rice. A cheddar cheese quota is granted under the WTO commitments. Under the Partnership Agreement between Central America and the EU, licenses are granted for products subject to agricultural quotas, such as whey, cured and streaky hams, prepared and preserved pork, milk powder, and cheese. Finally, an import quota is granted on a “first-come, first-served” basis to access the cheese quota negotiated in the FTA with Panama and for the yellow corn quota under the FTA between Central America and Mexico. It is important to clarify that these are not limits on imports but rather quotas with preferential tariffs. In addition to these set amounts, importers are free to import any amount subject to payment of the corresponding tariff.

Other non-tariff measures

Yes. Sugar intended for the domestic market must be fortified with vitamin A. The importation of dairy products prepared with reconstituted milk is prohibited.

Import taxes and/or tariffs

Yes. The Central American Import Tariff has the following base rates: 0% on raw materials and intermediate and capital goods not produced in the CACM, 5% on raw materials produced in the CACM, 10% on intermediate and capital goods produced in the CACM, and 15% on finished goods. El Salvador also has trade agreements with Bolivia (signed on November 16, 2018, pending ratification as of June, 2022), Chile, Colombia, South Korea, Cuba (Partial Scope Agreement), Ecuador (Partial Scope Agreement), the United States, Mexico, Panama, Taiwan Province of China, the EU (Association Agreement with 27 countries), the Association Agreement with the United Kingdom (effective January 1, 2021), and the Dominican Republic, under which certain products included in tariff elimination programs are duty free. All goods originating in Central American countries may be traded without restriction within the region, except for those defined in Annex A to the General Treaty on Central American Economic Integration. The average of the applied tariffs of El Salvador is 6.0%, the agricultural average is 11.8%, and the non-agricultural average is 5.1%. The minimum tariff is 0% and the maximum 164%.

Unilateral elimination (El Salvador) of temporary MFN import duties on certain foodstuffs, pharmaceuticals, and personal protective equipment (Harmonized System Chapters 04, 07, 10, 11, 19, 20, 21, 28, 30, 34, 38, 40, and 96) because of the COVID-19 pandemic. Some products are also exempt from VAT.

Effective June 13, 2021, the tax exemptions applicable to all imports of raw materials, machinery, and equipment for newspaper printing were eliminated pursuant to the provisions of Legislative Decree No.
6 of May 5, 2021, which amends the Printing Law.

Permanent Measures:
Alignment of the SAC with the 7th Amendment to the Harmonized System (SAC 2022);

Effective June 17, 2022, Modifications to SAC 2022:
Reduction of import duties to 0% for products specified in Chapter 38; Res. 452;
Modifies nomenclature of products Chapter 76; Res. 453;
Amendments to the subheading note to Chapter 38 and amendments to the nomenclature in Chapters: 3, 29, 30, 38, 39, 76, 84 and 85; Res. 455;
Introduction and modification of tariffs to 0% for products of Chapter 38, Res. 457.

Temporary Measures

As of September 17, 2012, elimination of import duties on the import of iron and steel products D. L. No. 114 (temporary, still valid).

Effective December 17, 2021, increase of import duties to 40% for products specified in Chapter 3 (tilapia) Res. 458 (temporary until December 31, 2024).

Effective May 28, 2021, tax incentives for the import of hybrid and electric vehicles, among which is the reduction of the import duties, which is not automatic but must be governed by the procedure referred to in Article 21 of said Law (temporary for 10 years).

Effective March 13, 2022, temporary unilateral elimination of tariffs on commodities (Chapters 4, 7, 8, 10, 11, 15, 17, 19, 23, 31, 38 of the Central American Tariff System SAC), to combat inflation (temporary until March 31, 2023).

Effective July 5, 2022, extension of unilateral measure to reduce import tariffs on beef to combat inflation. (Chapter 2 of SAC) (temporary until March 31, 2023).

</tr>
<tr>
<td>Other</td>
<td>Yes.</td>
<td>All exporters must be registered with the CIEX El Salvador, before making any exports. The legislative decree established the CIEX El Salvador to centralize, expedite, and simplify the established legal procedures for the registration, authorization, and issuance of documents by various institutions and/or dependencies of the country involved in import and export operations in conformity with their respective responsibilities. The Integrated Foreign Trade System (SICEX) is used for exports, and if the transaction destinations are Costa Rica, Guatemala, Honduras, and Nicaragua, the operation is recorded in the exit customs of El Salvador and the entry customs of the relevant importing Central American country; the amount of taxes payable is reported by the Internet. This process allows exporters to obtain the three authorizations through a single, integrated procedure. A software tool, the Foreign Trade Facilitation System, allows importers and exporters to register and pay for the nonintrusive inspection service, and also to register ground transportation documents for international cargo. There are service charges for obtaining prior processing for imports, covering the services of the Ministry of National Defense, the Ministry of Health, and the National Directorate of Medications. The system allows payment to be made electronically via seven banks of the financial system, thus facilitating the handling of prior processing for imports through the Foreign Trade Facilitation System, which is administered by the CIEX El Salvador. There is one-stop electronic invoicing (facturación única) on behalf of third parties, which allows using a single tax number for various services provided by government institutions, registered in the CIEX El Salvador. The electronic payment system was also implemented for the product registry, the mutual recognition registry, and the updating of the product registry; these three services, which cover food products, thus simplify compliance with the required procedures for importing such products that fall within the purview of the Ministry of Health, which participates in the foreign trade one-stop window.</td>
</tr>
<tr>
<td>Export licenses</td>
<td>Yes.</td>
<td>Exporters must be registered with the CIEX before exporting any products. Exports are authorized via the Internet through the SICEX, which is designed exclusively for that purpose. El Salvador has signed the CITES agreement, which is currently in force and prohibits exports of endangered plant and animal species, cultural heritage goods, as well as products, such as red beans that suffer domestic shortages. Other export products require authorization by other institutions before processing at the SICEX and the CIEX because of quota controls—for example, for cane sugar; agrochemicals; biological products; drugs and food for veterinary use (which also require registration); wildflowers and plants; basic foods such as beans of domestic origin, rice, sorghum, fresh loroco, and fresh papayas (which also require preshipment inspection); dairy</td>
</tr>
</tbody>
</table>
products (which also require laboratory testing); meat; fish products (which may not be harvested without a permit); foodstuffs for human consumption; coffee (including roasted and ground); machinery; maquila textiles and garments subject to quotas; diesel fuel; propane; and butane gas. Ferrous and nonferrous products require authorization by the Directorate General of Customs. Exports of waste products from melting ferrous and nonferrous products included in tariff items 7204.10.00, 7204.29.00, and 7404.00.00 are prohibited. Citizens, foreigners, and legal entities are exempt from this provision if they are registered with the Directorate General of Customs and the waste products originate directly from their industrial processes.

During the COVID-19 pandemic, automation projects were implemented by the foreign trade one-stop window, the CIEX of El Salvador, administered by the CRB, to streamline foreign trade procedures and reduce the risk of contagion. These projects include:

1. As of October 15, 2020, the electronic authorization by barcode of non-preferential certificates of origin for exports was implemented.
2. Effective March 10, 2021, the electronic transmission of transport documents for exports between CIEX El Salvador and the General Directorate of Customs was implemented.
3. Effective January 18, 2022, the CIEX El Salvador Document Manager was implemented, which allows importers to store digital documents and register applications to manage the authorization of export permits and certificates of origin.

Exports of sugar require the approval of the Salvadoran Sugar Council (CONSAA) and are administered under two arrangements. The portion traded with the United States, which is called the American quota or preferential market, is subject to preferential treatment that consists of a negotiated quantity of metric tons to be exported. Exporters are free to export the remaining sugar production to any country. In addition, under CAFTA-DR, quotas have been allocated for other products, such as beef, dairy products, ethanol, and peanuts. A reciprocal tariff quota arrangement with Panama has been introduced to protect the monetary value of certain types of cheeses. Under the Association Agreement with the EU, export tariff quotas are negotiated for garlic, cassava starch, sweet corn, mushrooms, sugar including organic sugar and products with a high sugar content, rice, beef, bulk rum, tuna loin, plastics, electrical harnesses and conductors, certain clothing products, and articles made of aluminum. An export quota for cheese was negotiated in the FTA with Panama.

Effective January 1, 2021, the Association Agreement between Central America and the United Kingdom entered into force. Through this trade agreement export tariff quotas were negotiated for garlic, cassava starch, sweet corn, mushrooms, sugar, including organic sugar and products with high sugar content, rice, beef, and rum in bulk.

There are no export taxes. The rate tax on Transfer of Movable Property and Services Act is 0%.
## Payments for Invisible Transactions and Current Transfers

Insurance companies may invest abroad up to 20% of investments of net technical reserves.
Sale or issue abroad by residents No.

Controls on derivatives and other instruments
Purchase locally by nonresidents No.
Sale or issue locally by nonresidents Yes. In the case of banks, Article 51 of the Banking Law sets out all the lending and borrowing operations that banks can perform and the banking services they can provide, whereas paragraph(w) of the said article empowers the CRB of El Salvador to authorize banks to perform operations and provide banking services other than those listed.
In that regard, in October 2012, the CRB approved the “Minimum guidelines for operations with the forward foreign exchange derivative financial instrument to be fulfilled by banks in order to offer them in the local market.” According to these guidelines, banks that offer their clients forward foreign exchange services must request and obtain prior authorization from the CRB.
Purchase abroad by residents Yes. Under Article 45 of the Banking Law, banks’ cash reserves may be invested abroad, deposited in first-tier banks rated and authorized for this purpose by the Superintendency, or invested in highly negotiable low-risk securities. Insurance companies may invest abroad up to 20% of investments of net technical reserves.
Sale or issue abroad by residents No.

Controls on credit operations
Yes.
Commercial credits No.
By residents to nonresidents No.
To residents from nonresidents No.
Financial credits Yes.
By residents to nonresidents Yes.

Loans granted by banks to nonresidents or for investment abroad may not exceed 10% of the creditor bank’s equity capital. Total loans in this category may not exceed 150% of a bank’s equity capital. Loans in excess of 75% of the equity capital require authorization subject to documentation requirements. Specific provisions apply to these loans, ranging from a minimum of 0% to 100%, depending on the risk rating of the country in which the assets are held.

To residents from nonresidents No.

Guarantees, sureties, and financial backup facilities No.

By residents to nonresidents No.

To residents from nonresidents No.

Controls on direct investment Yes.

Outward direct investment No.

Inward direct investment Yes.

Investments in certain public works (for example, railroads, ports, and canals) require government approval. FDI and inflows of capital with a maturity of more than one year must be registered with the Ministry of Economy. There are minimum capital requirements for businesses owned by foreign residents and those with foreign resident shareholders. Foreign individuals and legal entities may invest in El Salvador and enjoy the same rights and obligations as national investors and corporations. The constitution restricts foreign investment in the following activities: trade; industry; and small-scale services—specifically, coastal fishing—which are reserved for Salvadorans. The subsoil belongs to the government, which may grant concessions for its exploitation. Investments in shares of banks, finance companies, and exchange bureaus are subject to applicable laws.

Controls on liquidation of direct investment No.

Foreign investors may transfer abroad funds related to their investments without delay. Such transfers include net profits and dividends generated by their investments, proceeds from partial or total disposal of investments, and proceeds from the transfer of investments to third parties. As part of the 2012 amendments to the Law on Income Tax, Title VII Chapter III of Article 7 now includes a section titled “Income Tax on Distribution of Profits,” which requires income tax withholding of 5% of profits paid by domiciled taxpayers, parent companies, subsidiaries, branches, agencies, and other permanent establishments to partners, shareholders, associates, trustees, members, investors, and beneficiaries not domiciled in El Salvador.

Controls on real estate transactions Yes.

Foreign individuals and legal entities may purchase real estate. Rural real estate may be acquired by foreigners only if there is a reciprocal arrangement with their home country. (An exception is allowed for industrial establishments.) A single individual or legal entity may not own more than 245 hectares of rural land. This limit does not apply to rural cooperative or community associations, which are subject to special provisions.

Purchase abroad by residents No.

Purchase locally by nonresidents Yes.

Foreign individuals and legal entities may purchase real estate. Rural real estate may be acquired by foreigners only if there is a reciprocal arrangement with their home country. (An exception is allowed for industrial establishments.) A single individual or legal entity may not own more than 245 hectares of rural land. This limit
 Sale locally by nonresidents No.

Controls on personal capital transactions No. For the CRB’s statistical purposes, authorized banks and exchange bureaus must obtain from their customers foreign exchange export and import forms for all transactions equal to or larger than US $5,000. The anti-money- and anti-asset-laundering law requires institutions subject to the law to report transactions and multiple transactions by a single user or individual on the same day or within a period of one month of sums exceeding US$10,000 or the equivalent in foreign currency, if there is evidence to suggest they are irregular or if required by the financial intelligence unit of the office of the prosecutor general.

Loans No.

By residents to nonresidents No.

To residents from nonresidents No.

Gifts, endowments, inheritances, and legacies No.

By residents to nonresidents No.

To residents from nonresidents No.

Settlement of debts abroad by immigrants No.

Transfer of assets No.

Transfer abroad by emigrants No.

Transfer into the country by immigrants No.

Transfer of gambling and prize earnings No.

Provisions Specific to the Financial Sector

Provisions specific to commercial banks and other credit institutions Yes. The Financial System Supervision and Regulation Act modified the financial sector regulatory and supervisory architecture through (1) creation of the Financial Supervision and Regulation System, consisting of the CB and the SSF; (2) establishment of a single superintendency for banking, insurance, securities, pensions, and other financial intermediaries; and (3) transfer of regulatory authority over the financial system to the CB.

The Law against Usury defines usury and sets the maximum rate of interest on loans obtained by individuals. This law applies to individuals and legal entities, financial institutions, commercial firms, savings banks, merchants engaged in the delivery of goods and services, pawn merchants, and in general, any person or entity who lends money, regardless of the manner used to record, conceal, or hide the operation. The CRB sets maximum rates based on the simple average of the effective interest rate on loans, expressed as a percent and published semiannually.

Borrowing abroad Yes. External borrowing by financial institutions is subject to a reserve requirement. As a result of the pandemic emergency, the BCR Standards Committee issued the “Temporary Technical Regulations for Calculating the Liquidity Reserve on Deposits and Other Liabilities,” to temporarily reduce the Liquidity Reserve requirement,
so that financial institutions have more financial resources to tackle the COVID-19 crisis; therefore, the Liquidity Reserve requirement was temporarily reduced to 3% from 5%. The validity of these regulations is 180 days, which will be extended for an equal period of time if the underlying circumstances persist.

Effective June 23, 2021, the BCR’s Standards Committee issued the Technical Standards for the Calculation and Use of the Liquidity Reserve on Deposits and Other Obligations (NRP-28), to provide the parameters for the calculation of the Liquidity Reserve requirement to be maintained by regulated entities, as well as the provisions for its use. These standards repealed the Standards for the Calculation and Use of the Liquidity Reserve on Deposits and Other Obligations (NPB3-06) and replaced the Temporary Technical Regulations related to liquidity issued in the context of the COVID-19 pandemic. As of June 30, 2022, the above-mentioned reserve requirement remains at 3%.

<tbody>
<tr>
<td>In El Salvador, the term reserve requirement (encaje legal) is not used. The term liquidity reserve (reserva de liquidez) is preferred. There are no specific reserve requirements on foreign (nondollar) currencies. The average reserve requirement is currently about 22% of deposits but would vary as it depends on the maturity of deposits. As a result of the pandemic emergency, the BCR Standards Committee issued the “Temporary Technical Regulations for Calculating the Liquidity Reserve on Deposits and Other Liabilities,” to temporarily reduce the Liquidity Reserve requirement. So, after making the corresponding calculation, the current liquidity reserve is approximately 10% of deposits and the liquidity reserves actually held by the institutions is approximately 17% of deposits.</td>

<tbody>
<tr>
<td>On the other hand, the Standards Committee of the CRB approved, during Session No. CN-01/2019, the extension of the Temporary Measures for the Calculation of the Liquidity Reserve (Medidas Temporales para el Cálculo de la Reserva de Liquidez—MTL) to February 23, 2023. These measures reduced the liquidity reserve by 10% of the productive credit granted by financial institutions. However, in response to the emergency caused by the pandemic, these measures were repealed as of March 19, 2020, and replaced by the “Temporary Technical Regulations for the Granting of Loans” for</td>

</tr>
</tbody>
</table>
a period of 180 days (until September 15, 2020), which also reduce the liquidity reserve based on the increase in the loan balance of certain economic sectors.

On September 21, 2020, the “Temporary Technical Regulations for Calculating the Liquidity Reserve on Deposits and Other Liabilities” were extended as of September 21, 2020, until March 16, 2021, this time being listed under code NPBT-03.

As of December 30, 2020, the NPBT-03 Temporary Technical Standards were further extended from March 2021 as per code NPBT-04, until June 22, 2021.

The Technical Standards for the Calculation and Use of the Liquidity Reserve on Deposits and Other Obligations (NRP-28), which are intended to provide the parameters for the calculation of the Liquidity Reserve requirement to be maintained by regulated entities, entered into force effective June 23, 2021. These standards repealed NPB3-06 and made changes to the Temporary Technical Standards related to the liquidity reserve that were issued in the context of the COVID-19 pandemic.

The aforementioned standards establish that during the phase-in period, which began on June 23, 2021, and ends on June 21, 2022, the liquidity reserve requirement will be subject to discounts related to:

1. A percentage of the average balance that the entities subject to the Temporary Technical Standards for the Calculation of the Liquidity Reserve (NPBT-04) used for the calculation of the Liquidity Reserve requirement in the 14-day periods from March 31 to May 11, 2021 (approximated to two decimal places) and

2. A percentage of the amount that the entities subject to the Temporary Technical Standards to Encourage Lending (NPBT05) reported as a discount for the calculation of the Liquidity Reserve requirement in the 14-day period from June 9 to June 22, 2021 (approximated to two decimal places).

Effective February 21, 2022, temporary Technical Standards for the Calculation of the Liquidity Reserve on Deposits and Other Obligations (NPBT-07) were issued, which repealed Article 19 of NRP-28 about the calculation and phase-in period of liquidity reserve. It established new temporary parameters for the liquidity reserve requirement so that institutions have more financial resources available to support the dynamism and growth in the placement of loans to the different economic sectors. These standards were in place from February 21, 2022, to August 16, 2022.

On July 25, 2022, NPBT-07 was extended under a new NPBT-08 standard effective August 17, 2022, until February 23, 2023.

Liquid asset requirements No.

Interest rate controls No.

The Law against Usury defines usury and sets the maximum rate of interest on loans obtained by individuals, without establishing differential treatment of foreign currency. This law applies to individuals and legal entities; financial institutions; commercial firms; savings banks; merchants engaged in the delivery of goods and services; pawn merchants; and in general, any person or entity who lends money, regardless of the manner used to record, conceal, or
hide the operation. The CRB sets maximum rates based on the simple average of the effective interest rate on loans, expressed as a percent and published semiannually.

**Investment regulations** Yes.

**Abroad by banks** Yes. Under Article 45 of the Banking Law, banks’ cash reserves may be invested abroad, deposited in first-tier banks rated and authorized for this purpose by the Superintendency, or invested in highly negotiable low-risk securities.

**In banks by nonresidents** No.

**Open foreign exchange position limits** Yes. The limit on the net open foreign exchange positions of commercial banks is 10% of capital and reserves. Regulations governing banks’ foreign currency borrowing and lending operations limit the difference between the institution’s total foreign-currency-denominated assets and future and contingent rights and its total foreign-currency-denominated liabilities and future and contingent obligations to 10% of equity. Because the Monetary Integration Act went into effect January 2001, the volume of foreign currency managed by financial intermediaries declined considerably.

**On resident assets and liabilities** Yes. The regulations make no distinction between resident and nonresident.

**On nonresident assets and liabilities** Yes. The regulations make no distinction between resident and nonresident.

**Provisions specific to institutional investors** Yes.

**Insurance companies** Yes.

**Limits (max.) on securities issued by nonresidents** Yes. Insurance companies are permitted to invest abroad up to 20% of investments of net technical reserves.

**Limits (max.) on investment portfolio held abroad** Yes. Insurance companies are permitted to invest abroad up to 20% of investments of net technical reserves.

**Limits (min.) on investment portfolio held locally** No.

**Currency-matching regulations on assets/liabilities composition** No.

**Pension funds** Yes. Pursuant to Decree Law No. 787 of September 28, 2017, under Article 91(o) of the Law on the Pension Savings System, pension funds are permitted to invest abroad up to 20% of investments of net technical reserves.
funds may invest between 10% and 30% in foreign securities and foreign investment fund participation certificates. Additionally, differentiated limits may be established for investment in these instruments, depending on whether they are open funds or closed funds.

Limits (max.) on investment portfolio held abroad

Yes.

Under Article 18, letter (d), of the Investment Rules for the Pension Savings System, pension funds may invest up to 10% of fund assets in foreign securities recorded in the SSF public stock exchange register, excluding securities issued by regional and international financial organizations of which the government or the CRB is a member.

All instruments in which the fund may invest must be registered with a national stock exchange, except for banks’ deposits and pension obligations. Pursuant to Decree Law No. 787 of September 28, 2017, under Article 91(o) of the Law on the Pension Savings System, pension funds may invest between 10% and 30% in foreign securities and foreign investment fund participation certificates. Additionally, differentiated limits may be established for investment in these instruments, depending on whether they are open funds or closed funds.

Limits (min.) on investment portfolio held locally

Yes.

Under Article 223-A of the Law on the Pension Savings System, pension funds must buy social security investment certificates that are part of the Annual Issue Program of the Social Security Bonds Trust, provided the total stock purchased does not exceed 45% of the pension fund’s assets, as provided for in Article 91(m) of the Law on the Pension Savings System (amended by Legislative Decree No. 1036 of March 29, 2012).

Under Article 91(a)–(n) and (p) of the Law on the Pension Savings System, pension funds may invest in the following: (1) Securities issued by the Directorate General of the Treasury of El Salvador, traded either on a Salvadoran securities exchange or on organized international securities markets, between 20% and 50%; (2) Securities issued by the CRB of El Salvador, between 20% and 30%; (3) Securities issued or guaranteed by state-owned enterprises and official autonomous institutions, except those of Banco de Desarrollo de El Salvador and the Social Housing Fund, between 5% and 20%; (4) Securities issued by Banco de Desarrollo de El Salvador, between 20% and 30%. Issues of social security investment certificates by this bank in the capacity of trustee should not be included in the calculation of this limit; (5) Marketable bonds having a maturity of more than one year issued by Salvadoran companies, between 30% and 40%; (6) Shares and convertible bonds of Salvadoran companies, between 20% and 45%; (7) Salvadoran investment fund participation certificates, between 5% and 40%, with the possibility of establishing differentiated limits for investment in the certificates of participation, depending on whether the funds are open or closed; (8) Certificates of deposit and securities issued or guaranteed by Salvadoran banks, between 30% and 40%; (9) Mortgage-backed or collateralized securities for housing financing purposes, including those issued by the Social Housing Fund, between 30% and 40%. In any case, investment in securities issued by a single entity may not exceed 10%; (10) Financial instruments of the insured mortgage system or insured mortgage certificates, between 15% and 20%; (11) Publicly offered securities issued by Salvadoran securitization companies and trust participation certificates, between 10% and 20%; (12) Other publicly offered instruments, including securities registered with a national securities exchange, between 10% and 30%; (13) Social security investment certificates issued by the Social Security Bonds Trust for the payment of services for members of the Public Pension System, a maximum investment limit of 45%; (14) Securities issued
for the financing of real estate, infrastructure, or development projects such as roads, ports, and other works, between 5% and 15% of the managed fund’s assets. With the backing of multilateral organizations, governments, or first-line reinsurers, between 10% and 30% of the managed fund’s assets; and (15) Distributions traded on local markets, up to 5% of the pension fund’s assets, provided the collateral security meets the criteria specified in the regulation.

**Exchange Arrangement**

**Currency**

- Other legal tender
  - 09/07/2021: The Bitcoin Law was passed on June 8, 2021; its intent is to regulate bitcoin as unrestricted legal tender which may be used without limitation in any transaction for any purpose that individuals or legal entities, public or private, may need to perform. This is without prejudice to the application of the Monetary Integration Law.

**Classification**

- No separate legal tender
  - 09/07/2021: The Bitcoin Law was passed on June 8, 2021; its intent is to regulate bitcoin as unrestricted legal tender which may be used without limitation in any transaction for any purpose that individuals or legal entities, public or private, may need to perform. This is without prejudice to the application of the Monetary Integration Law.

**Imports and Import Payments**

- Import licenses and other nontariff measures
  - 05/05/2021: The authorization of alcohols regulated by the Ministry of Health was implemented through electronic interconnection (Import/Export Processing Center El Salvador).
  - 09/29/2021: Electronic payment (Import/Export Processing Center El Salvador) was implemented for quarantine treatment services of the Regional International Organization for Plant and Animal Health for products and by-products of animal and plant origin, and the means of transport that move them.
  - 10/22/2021: The electronic issuance of visas for agricultural and veterinary
products, regulated by the Ministry of Agriculture and Livestock, was implemented through electronic interconnection (Import/Export Processing Center El Salvador).

04/01/2022

The Import/Export Processing Center El Salvador Document Manager was implemented, which allows importers to store digital documents and register applications to manage the authorization of import permits.

04/01/2022

Negative list

05/28/2021

The importation of used electric or hybrid automotive vehicles more than 3 years old is prohibited.

05/28/2021

Import taxes and/or tariffs

01/01/2021

The Association Agreement with the United Kingdom entered into force.

05/28/2021

Tax incentives for the import of hybrid and electric vehicles, among which is the reduction of the import duties, which is not automatic but must be governed by the procedure referred to in Article 21 of said Law.

06/13/2021

The tax exemptions applicable to all imports of raw materials, machinery, and equipment for newspaper printing were eliminated pursuant to the provisions of Legislative Decree No. 6 of May 5, 2021, which amends the Printing Law.

12/17/2021

Increase of import duties to 40% for products specified in Chapter 3 (tilapia) Res. 458 (temporary until December 31, 2024).

03/13/2022

Temporary unilateral elimination of tariffs on commodities (Chapters 4, 7, 8, 10, 11, 15, 17, 19, 23, 31, 38 of the Central American Tariff System SAC), to combat inflation (temporary until March 31, 2023).

06/17/2022

Reduction of import duties to 0% for products specified in Chapter 38; Res. 452 ( Modifications to SAC 2022).

06/17/2022

Modifies nomenclature of products Chapter 76; Res. 453 (Modifications to SAC 2022).

06/17/2022

Amendments to the subheading note to Chapter 38 and amendments to the nomenclature in Chapters: 3, 29, 30, 38, 39, 76, 84 and 85; Res. 455 (Modifications to SAC 2022).

06/17/2022

Introduction and modification of tariffs to 0% for products of Chapter 38, Res. 457 (Modifications to SAC 2022).

07/05/2022

Extension of unilateral measure to reduce import tariffs on beef to combat inflation. (Chapter 2 of SAC) (temporary until March 31, 2023).

Exports and Export Proceeds

Export licenses

03/10/2021

The electronic transmission of transport documents for exports between Import/Export Processing Center El Salvador and the General Directorate of Customs was implemented.

01/18/2022

The Import/Export Processing Center El Salvador Document Manager was implemented, which allows importers to store digital documents and register applications to manage the authorization of export permits and certificates of origin.

With quotas

01/01/2021

With the entry into force of the Association Agreement between Central America and the United Kingdom, export tariff quotas were negotiated for garlic, cassava starch, sweet corn, mushrooms, sugar, including organic sugar and products with high sugar content, rice, beef, and rum in bulk.

Provisions Specific to the Financial Sector

Provisions specific to commercial banks and other credit institutions

Borrowing abroad

06/23/2021

The BCR’s Standards Committee issued the Technical Standards for the Calculation and Use of the Liquidity Reserve on Deposits and Other Obligations (NRP-28), to provide the parameters for the calculation of the Liquidity Reserve requirement to be maintained by
regulated entities, as well as the provisions for its use. These standards repealed the Standards for the Calculation and Use of the Liquidity Reserve on Deposits and Other Obligations (NPB3-06) and replaced the Temporary Technical Regulations related to liquidity issued in the context of the COVID-19 pandemic. As of June 30, 2021, the Liquidity Reserve requirement remains at 3%.

The Technical Standards for the Calculation and Use of the Liquidity Reserve on Deposits and Other Obligations (NRP-28) which are intended to provide the parameters for the calculation of the Liquidity Reserve requirement to be maintained by regulated entities establish that during the phase-in period, which began on June 23, 2021, and ends on June 21, 2022, the liquidity reserve requirement will be subject to discounts related to:

1. A percentage of the average balance that the entities subject to the Temporary Technical Standards for the Calculation of the Liquidity Reserve (NPBT-04) used for the calculation of the Liquidity Reserve requirement in the 14-day periods from March 31 to May 11, 2021 (approximated to two decimal places) and

2. A percentage of the amount that the entities subject to the Temporary Technical Standards to Encourage Lending (NPBT-05) reported as a discount for the calculation of the Liquidity Reserve requirement in the 14-day period from June 9 to June 22, 2021 (approximated to two decimal places).

Temporary Technical Standards for the Calculation of the Liquidity Reserve on Deposits and Other Obligations (NPBT-07) were issued, which repealed Article 19 in NRP-28. It established new temporary parameters for the liquidity reserve requirement so that institutions have more financial resources available to support the dynamism and growth in the placement of loans to the different economic sectors. These standards were in place until August 16, 2022. NPBT-07 was extended under a new NPBT-08 standard that will be in place until February 23, 2023.
EQUATORIAL GUINEA

(Position as of June 30, 2022)

Status under IMF Articles of Agreement

Date of membership

December 22, 1969.

Article VIII

Yes. Date of acceptance: June 1, 1996.

Article XIV

Exchange Measures

Restrictions and/or multiple currency practices

No.

No restrictions as reported in the latest IMF staff report as of December 31, 2021.

Exchange measures imposed for security reasons

Yes.

For security reasons, the CEMAC member countries support UNSC Resolution No. 1373 to combat money laundering and terrorism financing.

Other security restrictions

Yes.

In accordance with IMF Executive Board Decision No. 144-(52/51) No.

Exchange Arrangement

Currency

Yes.

The currency issued within the CEMAC, which is legal tender in Equatorial Guinea and the other member countries, is the CFA franc.

Other legal tender

No.

Exchange rate structure

Unitary

Yes.

Dual

Multiple

Classification

No separate legal tender

Currency board

Conventional peg

Yes.

The exchange rate arrangement of the CAMU is a conventional peg. Equatorial Guinea participates in the CAMU and has no separate legal tender. The Monetary Cooperation Agreement (MCA) between CEMAC member countries and France is based on three principles: (1) a common CB; (2) fixed parity with the euro; and (3) an unlimited convertibility guarantee. Article 16 empowers the finance ministers of signatory countries (Joint Monetary Committee) to amend the MCA. Article 17 permits signatories to renounce the agreement. Article 18 specifies that the expulsion of a member country from the BEAC automatically results in that country’s renunciation of the MCA.

Stabilized arrangement

Crawling peg
Crawl-like arrangement

Pegged exchange rate within horizontal bands

Other managed arrangement

Floating

Free floating

Official exchange rate

Yes. The CFA franc is officially pegged to the euro, the intervention currency, at a fixed rate of CFAF 655.957 per euro. The exchange rate is fixed by Article 12 of the MCA of November 23, 1972, between the BEAC and France, which states that the par value may be modified following consultation among the signatory countries (BEAC members and France), taking into account the demands of the economic and financial situation of the member countries. Exchange transactions in euros between the BEAC and commercial banks are made at this rate. Buying and selling rates for certain other foreign currencies are also listed officially based on the fixed rate for the euro and the rates for these foreign currencies prevailing in the Paris foreign exchange market. The official rate is used for accounting and valuation.

Monetary policy framework

Exchange rate anchor

Yes. The monetary policy framework is an exchange rate anchor vis-à-vis the euro.

U.S. dollar

Euro

Yes. The monetary policy framework is an exchange rate anchor vis-à-vis the euro.

Exchange tax  Yes. Transfers of funds with the rest of the world are subject to transfer fees determined freely by the market but not exceeding 1%, excluding any other special tax. Licensed intermediaries may affect transfers with the rest of the world through the BEAC. Within the CEMAC, transfers of funds are subject to transfer fees determined freely by the market and not exceeding 0.25%, excluding the VAT and any other special tax.

Exchange subsidy  No.

Foreign exchange market  Yes.

Spot exchange market  Yes. Licensing of exchange bureaus is the responsibility of the MOFs of the CEMAC member countries. Their operations are limited to OTC transactions. Licensed intermediaries, who set their own exchange rates with their customers for currencies other than the euro, may freely conduct foreign exchange transactions with their customers. The BEAC’s OTC foreign exchange transactions are conducted exclusively with national public accountants and treasuries.

Operated by the central bank  Yes. The BEAC’s OTC exchange transactions are conducted exclusively with national public accountants and treasuries.

Foreign exchange standing facility  Yes. Within the limits of available stocks, the BEAC’s OTC exchange transactions are conducted exclusively with national public accountants and treasuries.

Allocation  No.

Auction  No.
Fixing No.

**Interbank market**

Yes. There are no restrictions on interbank foreign exchange transactions within the CEMAC. Exchange transactions are OTC transactions. The BEAC does not intervene in exchange transactions within the CEMAC. These transactions are freely conducted by operators licensed by the MOF with the approval of the Central African Banking Commission (COBAC). A fee of no more than 3% for CFA franc area notes and 5% for other currencies, not including the VAT and any other specific tax, is collected by licensed intermediaries on transactions in foreign banknotes and traveler’s checks. This fee covers all charges on OTC transactions and the intermediation margin.

In principle, all authorized banks participate in the interbank market, but at different levels.

Over the counter Yes. Foreign exchange transactions are conducted on an OTC basis.

Brokerage No.

Market making No.

**Forward exchange market**

Yes. There is no forward foreign exchange market in the CEMAC. Licensed intermediaries may enter into forward exchange contracts up to a limit of CAF 100 million on presentation of supporting documentation (invoices, debt repayment schedules, or other foreign-currency-denominated debt instruments) and must report such activities to the BEAC. For amounts over CAF 100 million, requests for forward exchange contracts must be made to the BEAC so that their purpose may be verified.

Official cover of forward operations No.

### Arrangements for Payments and Receipts

**Prescription of currency requirements**

Yes.

Controls on the use of domestic currency No. Within the CEMAC, the CFA franc is used freely for payments and receipts relating to current and capital transactions and payments. Settlements with all countries other than CEMAC members must be made through correspondent banks in one of the currencies of the two parties or in any other currency agreed on by the two parties to the transaction.

**For current transactions and payments**

No.

**For capital transactions**

No.

Transactions in capital and money market instruments No.

Transactions in derivatives and other instruments No.

Credit operations No.

Use of foreign exchange among residents Yes. The monetary unit is the CFA franc, which is the sole official currency and legal tender in all CEMAC member countries. Consequently, transactions among residents must be settled in domestic currency. However, the Central African Republic adopted a law on April 22, 2022, which governs cryptocurrency transactions in the country and considers Bitcoin as the reference currency.

**Payments arrangements**

Yes.

Bilateral payments arrangements No.
An operations account links all the countries with the French Treasury. All purchases and sales of foreign currencies and euros in exchange for CFA francs are ultimately settled by a debit or credit to the operations account. Governments may maintain foreign currency deposits related to oil reserves at commercial banks and use them to meet their external debt service obligations. Exchange regulations in the CEMAC member countries are harmonized.

<table>
<thead>
<tr>
<th>Clearing agreements</th>
<th>No.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Barter agreements and open accounts</td>
<td>No.</td>
</tr>
</tbody>
</table>

There is no official clearing agreement between a CEMAC country and the outside. Nor does any regulatory provision regulate this mechanism. In practice, however, it may happen that in return for financial flows, certain financiers and certain countries receive production or capital goods from outside.

Administration of control

Administration of the foreign exchange regulations is the responsibility of the MOFs of the CEMAC countries, which may delegate all or a portion of their authority to the BEAC, the COBAC, and licensed intermediaries. For example, authority is delegated to licensed intermediaries to carry out transactions with the rest of the world. They must verify the validity of transactions, collect statistics, and report these activities to the monetary authorities. However, certain types of transactions may not be delegated. The BEAC supervises the exchange regulations; evaluates foreign exchange hedging operations; reviews requests for approval of opening of foreign exchange accounts by some resident legal entities; and monitors the repatriation of export proceeds. The COBAC ensures that licensed intermediaries comply with certain provisions of these regulations, especially to prevent weakening of the CEMAC banking system.

Payments arrears

Licensed intermediaries may freely execute their customers' payment orders. The related transfers may, at their request, be made through the BEAC. In this context, the MCA with France serves to guarantee the convertibility of the CFA franc. No payment arrears are allowed on the grounds that insufficient foreign exchange is available.

Controls on trade in gold (coins and/or bullion)

CEMAC residents are free to hold, purchase, and sell gold in any form within the CEMAC.

On external trade

Except in the case of manufactured articles containing small quantities of gold, CEMAC gold imports and exports are subject to approval by the appropriate authorities. The national treasuries and the BEAC are exempt from this requirement.

Residents and nonresidents traveling from one country to another within the CEMAC may take with them an unlimited amount of CEMAC banknotes and coins.

On exports

CFA francs issued by the BEAC may not be exported to countries outside the CEMAC. However, departing resident travelers may have in their possession up to CFAF 5 million. During their trips outside the CEMAC, travelers must use payment instruments other than
Resident and nonresident travelers crossing CEMAC borders must, on exit, declare any foreign currency, securities, or instruments valued at more than CFA 5 million to the customs authorities. Nonresident travelers leaving the CEMAC may take with them foreign currency valued at up to the amount they declared on entering the CEMAC. If they made no declaration on entry or if they are carrying sums exceeding those they brought into the CEMAC, they must explain the source of the amount in excess of CFA 1 million. Supporting documents include pay slips and work permits (wage income), student cards (parental assistance for students and trainees), and notarized instruments (donations), among others.

On imports

Yes.

Domestic currency

Yes. CFA francs issued by the BEAC may not be imported from countries outside the CEMAC. However, arriving resident travelers may have in their possession up to CFA 5 million.

Foreign currency

No. Resident and nonresident travelers crossing CEMAC borders must, on entry, declare foreign currency, securities, or instruments valued at more than CFA 5 million to the customs authorities.

Resident Accounts

Foreign exchange accounts permitted

Yes. Residents may not open foreign exchange accounts in local banks. However, the BEAC may allow certain resident legal entities to open foreign exchange accounts. These accounts may not be credited with CFA francs or with debits from CFA franc accounts.

Approval required

Yes. The BEAC can allow resident legal entities to open foreign exchange accounts. These accounts may not be credited with CFA francs or with debits from CFA franc accounts. The authorization to open bank accounts in foreign currency is granted by the BEAC. Generally, the agreement of the Central Bank is given when the entity concerned cannot easily carry out all its operations with accounts in CFA francs only or when a financial arrangement resulting from external financial assistance requires the opening of accounts in currencies.

Held abroad

Yes. Resident legal entities, except credit institutions, are prohibited from opening foreign currency bank accounts outside the CEMAC in accordance with Regulation No. 02/18/CEMAC/UMAC/CM of December 21, 2018. However, the BEAC may allow a resident legal entity to open a foreign currency account outside the CEMAC in accordance with the terms and conditions set out in a BEAC directive on June 10, 2019. In general, when resident entities borrow abroad and the lenders require the establishment of foreign currency accounts, these are authorized by the Central Bank. In addition, effective December 23, 2021, companies in the extractive sector benefit from a special provision allowing them to hold foreign currency accounts abroad as part of their ordinary operations.

Approval required

Yes. The BEAC may allow a resident legal entity to open a foreign currency account outside the CEMAC in accordance with the terms and conditions set out in a BEAC directive in June 2019.

Accounts in domestic currency held abroad

Yes. Accounts in domestic currency held abroad are permitted.

Accounts in domestic currency

No.
convertible into foreign currency

Nonresident Accounts

Foreign exchange accounts permitted Yes. There are no restrictions on the opening of nonresident foreign exchange accounts within the CEMAC. Licensed intermediaries may open such accounts for any nonresident, on request, provided they inform the monetary authorities. Such accounts may not be overdrawn.

Approval required No.

Domestic currency accounts Yes. There are no restrictions on the opening of nonresident CFA franc accounts within the CEMAC. Licensed intermediaries may open such accounts for nonresidents, on request, provided they inform the monetary authorities. Such accounts may not be overdrawn.

Convertible into foreign currency No.

Approval required No.

Blocked accounts No.

Imports and Import Payments

Foreign exchange budget No. The exchange regulations do not limit access to foreign exchange. Payments for imports must be made regularly through licensed intermediaries.

Financing requirements for imports No. Economic agents may freely enter into commercial contracts with their partners abroad. These contracts are executed through the banking system, subject to compliance with the exchange regulations.

Minimum financing requirements No. There are no financing requirements.

Advance payment requirements No.

Advance import deposits No.

Documentation requirements for release of foreign exchange for imports Yes. For import payments of less than CFAF 100 million, the licensed intermediary must obtain a pro forma or original invoice, a bill of lading, or the commercial contract, along with the most recent tax receipt or a professional license. Payments of more than CFAF 100 million must be settled through a licensed intermediary, which must check the supporting documents. Legally registered legal entities and declared or certified professionals may be exempt from the requirement to produce supporting documents, provided they submit an annual estimate of imports corroborated by a business forecast.

Domiciliation requirements Yes. Imports valued at more than CFAF 5 million must be domiciled with a resident licensed intermediary.

Preshipment inspection No. There are no specific provisions for inspections at the CEMAC level. The member countries may freely apply their own regulations in this regard.

Letters of credit No. The use of LCs by economic agents for the settlement of transactions is allowed but optional.

Import licenses used as exchange licenses No. Import licenses are not used in the CEMAC countries to restrict the availability of foreign exchange for legitimate trade, as defined in the Compilation Guide. When such licenses exist, they are used for trade policy purposes.

Other Yes. For import payments of less than CFAF 100 million, the licensed intermediary must obtain a pro forma or original invoice, a bill of lading, or the commercial contract, along with the most recent tax
receipt or a professional license (registration number, professional ID card, extract from the commercial registry, or tax clearance). Payments of more than CFA 100 million must be settled through a licensed intermediary, which must check the supporting documents. Legal entities and certified professionals can no longer use annual estimates of imports and must produce all supporting documents to carry out transactions.

**Import licenses and other nontariff measures**  
Yes. In general, CEMAC countries no longer use quantitative restrictions as a means of protecting local production. Merchandise originating from all countries may be freely imported, with the exception of gold, to which special regulations apply.

**Positive list**  
No.

**Negative list**  
Yes. Imports of some products may be prohibited, restricted, or require national authorization for humanitarian, security, or health reasons.

**Open general licenses**  
No. There is no system of OGLs at the CEMAC level.

**Licenses with quotas**  
No.

**Other nontariff measures**  
No.

**Import taxes and/or tariffs**  
Yes. The CEMAC CET applies to imports from non-CEMAC countries, at four rates: 5% for staple goods, 10% for raw materials and capital goods, 20% for intermediate goods, and 30% for consumer goods. The taxes are imposed by the national customs administration in CFA francs at the merchandise point of entry.

**Taxes collected through the exchange system**  
Yes. Licensed intermediaries are responsible for withholding all taxes and related fees established by law and surrendering them to the monetary authority.

**State import monopoly**  
No.

### Exports and Export Proceeds

**Repatriation requirements**  
Yes. Export-related transactions must be reported to the appropriate administrative authorities, and all those exceeding CFA 5 million must be domiciled at a licensed CEMAC bank. Export proceeds originating in non-CEMAC countries must be collected and repatriated immediately, through the domiciling bank, with the BEAC acting as intermediary.

**Surrender requirements**  
Yes.

**Surrender to the central bank**  
Yes. Export proceeds collected in foreign currencies must be surrendered to the BEAC within 3 days of collection.

**Surrender to authorized dealers**  
No.

**Financing requirements**  
No. Economic agents and their partners abroad may enter freely into commercial contracts, which are executed through the banking system, subject to compliance with the exchange regulations. There are no financing requirements.

**Documentation requirements**  
Yes. Transactions related to exports to non-CEMAC countries valued at more than CFA 5 million must be domiciled with a local licensed bank. Each domiciliation file must contain an export contract, a foreign exchange declaration under which the exporter agrees to repatriate all export earnings within a month of the payment due date, and a customs export certificate duly signed by a customs officer.

**Letters of credit**  
No. The use of LCs by economic agents for the settlement of transactions is allowed but optional.

**Guarantees**  
n.r.
Domiciliation | Yes. | Transactions related to exports to non-CEMAC countries valued at more than CFAF 5 million must be domiciled with a local licensed bank.

Preshipment inspection | No. | There are no specific provisions for inspections at the CEMAC level. The member countries may freely apply their own regulations in this regard.

Other | No. | Export licenses | No. |

Export licenses | No. | Without quotas | No. |

Without quotas | No. | With quotas | No. |

Export taxes | Yes. | Export taxes established by the budget laws are levied by the Customs Directorate or via licensed intermediaries.

Collected through the exchange system | Yes. | Licensed intermediaries are responsible for withholding all taxes and fees established in the law and surrendering them to the monetary authority.

Other export taxes | Yes. | Payments for Invisible Transactions and Current Transfers

Controls on these transfers | Yes. | Trade-related payments | Yes. | There are no exchange restrictions on service-related transactions. Payments for such transactions are subject to the same requirements as the underlying commercial transactions.

Prior approval | No. | Quantitative limits | No. |

Quantitative limits | No. | Indicative limits/bona fide test | Yes. | All service-related expenditures must be declared, and amounts exceeding CFAF 5 million must also be domiciled with a resident licensed intermediary. Supporting documents must be provided, and amounts exceeding CFAF 100 million must be settled through licensed intermediaries. Licensed intermediaries must obtain a pro forma invoice or other supporting documents for payments for service-related expenditures under CFAF 10 million.

Investment-related payments | Yes. | Prior approval | No. |

Prior approval | No. | Quantitative limits | No. |

Quantitative limits | No. | Indicative limits/bona fide test | Yes. | There are no restrictions on transfers of capital income outside the CEMAC in the form of profits, dividends, interest, royalties, etc., payable to nonresidents, provided the underlying transaction was authorized or is not subject to authorization. Supporting documents on the decision to distribute income (profits and dividends), the repayment schedule, and the debt security involved (loans contracted and granted) must be provided.

Payments for travel | Yes. | Prior approval | No. |

Prior approval | No. | Quantitative limits | No. |

Quantitative limits | No. | Indicative limits/bona fide test | Yes. | Indicative limits are established for OTC foreign exchange
allocations to residents traveling outside the CEMAC. A single indicative threshold of CFAF 5 million is set for all travels. However, all substantiated requests must be granted, regardless of the amount. Licensed intermediaries must serve their customers’ foreign currency needs, to the extent that funds are available to them, and check supporting documentation, including, as applicable, a valid travel document and ticket, a mission order, a health evacuation authorization, or a certificate of registration at a school or university, and report to the appropriate authorities.

All service-related expenditures must be declared, and amounts exceeding CFAF 5 million must also be domiciled with a resident licensed intermediary. Supporting documents must be provided.

For operations exceeding 100 million CFA francs, approved intermediaries must ensure the proper outcome of the operation by means of more rigorous checks.

### Proceeds from Invisible Transactions and Current Transfers

<table>
<thead>
<tr>
<th>Repatriation requirements</th>
<th>Yes.</th>
</tr>
</thead>
</table>

Amounts owed by nonresidents for services and all income from
foreign assets earned outside the CEMAC must be collected through a licensed bank and repatriated immediately.

Surrender requirements  Yes.
Surrender to the central bank  Yes. Amounts collected in foreign currency must be surrendered to the BEAC within 3 days of receipt.
Surrender to authorized dealers  No.
Restrictions on use of funds  No.

Capital Transactions

Controls on capital transactions  Yes. The exchange regulations, including the section on capital flows within the CEMAC, do not apply to transactions between CEMAC member countries. There are no restrictions on most capital flows between CEMAC and non-CEMAC countries, provided they comply with the laws and regulations prohibiting drug financing and trafficking. Certain loans, direct investments, and the issuance, advertisement, and sale of foreign securities within the CEMAC are subject to administrative controls and require approval from the appropriate authorities. Controls on these transactions are applied indiscriminately to countries in the CFA franc area, other than CEMAC member countries, and all non-CFA franc area countries. Moreover, Article 61 of the General Regulations of the Central African Financial Market Supervisory Commission (COSUMAF), which entered into effect January 15, 2009, specifies that “when a nonresident legal entity plans a public offering on the Central African regional financial market, it must prepare a disclosure document and submit it to COSUMAF for approval prior to dissemination. The prior approval of the exchange control authority in the various countries concerned must also be obtained.” The article also states that “the issuer must appoint a correspondent (securities dealer) established in a CEMAC member state, where it elects domicile. This correspondent must be responsible for: (1) receiving correspondence from COSUMAF and (2) forwarding to COSUMAF all documents and information required under the laws and regulations or requested by COSUMAF.”

Repatriation requirements  Yes. In the context of the centralization of foreign exchange reserves, foreign currency collected from capital transactions must be repatriated immediately after collection.
Surrender requirements  Yes.
Surrender to the central bank  Yes. Amounts collected in foreign currencies must be surrendered to the BEAC no later than 3 days after receipt.
Surrender to authorized dealers  No.

Controls on capital and money market instruments  Yes. The issuance, advertisement, and sale of foreign securities (shares and bonds issued by foreign enterprises) whose value exceeds CFAF 10 million are subject to MOF approval. Under CEMAC exchange regulations, transactions in capital market securities are treated in the same way as simple borrowing and lending operations, as opposed to direct investments, when the shares or equity held by the individual or legal entity represent less than 10% of the enterprise’s total equity. Borrowing and lending are not regulated by type of instrument or maturity.

On capital market securities  Yes.

Shares or other securities of a participating nature  Yes.

Controls on direct investment  Yes.

Outward direct investment  Yes. Outward direct investment by CEMAC countries is subject to prior approval by the CB. Only licensed banks may verify and execute such transactions. The following may serve as supporting documents: (1) the list of registered shareholders of the direct investment enterprise; (2) a copy of the decision to create the enterprise or increase its capital; (3) a description of the enterprise’s type of business; (4) the balance sheets, income statements, and auditors’ reports for the previous three years, if the investment exceeds CFAF 100 million; and (5) projected balance sheets and income statements, in cases of new enterprises.

Inward direct investment  Yes. Inward direct investment to CEMAC countries is unrestricted when the related transactions do not exceed CFAF 100 million. Only licensed banks may verify and execute such transactions. Transactions exceeding CFAF 100 million must be reported to the MOF 30 days in advance, except for capital increases resulting from the reinvestment of undistributed earnings. The following may serve as supporting documents: (1) the list of registered shareholders of the direct investment enterprise; (2) a copy of the decision to create the enterprise or increase its capital; (3) a description of the enterprise’s type of business; (4) the balance sheets, income statements, and auditors’ reports for the previous three years, if the investment exceeds CFAF 100 million; and (5) projected balance sheets and income statements, in cases of new enterprises.

Controls on liquidation of direct investment  Yes. The total or partial liquidation of CEMAC countries’ outward (and inward) direct investment in amounts exceeding CFAF 100 million must be reported to the MOF 30 days before execution.

Controls on real estate transactions  Yes. This category of transaction is not subject to specific regulations. It is implicitly subject to the same regulations as FDI.

Purchase abroad by residents  Yes. Outward direct investment by CEMAC countries is unrestricted when the related transactions do not exceed CFAF 100 million. Only licensed banks may verify and execute such transactions. Transactions exceeding CFAF 100 million must be reported to the MOF 30 days in advance, except for capital increases resulting from the reinvestment of undistributed earnings. The following may serve as supporting documents: (1) the list of registered shareholders of the direct investment enterprise; (2) a copy of the decision to create the enterprise or increase its capital; (3) a description of the enterprise’s type of business; (4) the balance sheets, income statements, and auditors’ reports for the previous three years, if the investment exceeds CFAF 100 million; and (5) projected balance sheets and income statements, in cases of new enterprises.

Purchase locally by nonresidents  Yes. Inward direct investment to CEMAC countries is unrestricted when the related transactions do not exceed CFAF 100 million. Only
licensed banks may verify and execute such transactions. Transactions exceeding CFAF 100 million must be reported to the MOF 30 days in advance, except for capital increases resulting from the reinvestment of undistributed earnings. ### Provisions Specific to the Financial Sector

**Provisions specific to commercial banks and other credit institutions**  
Yes. Banks’ capital transactions must be reported after their execution. The business and accounting regulations applicable in the banking sector are based on the application of the COBAC regulations and instructions.

**Borrowing abroad**  
No. Borrowing by resident licensed banks from nonresidents and repayment of such loans are not subject to prior approval, but must be reported within 30 days of their execution to the MOF and the BEAC. Licensed banks may undertake such operations, subject to the COBAC prudential rules.

**Maintenance of accounts abroad**  
No. Licensed banks may, without prior approval, open accounts with their correspondent banks abroad for their business purposes. Such
accounts are monitored by the COBAC in the context of its supervision of the banking system.

Lending by resident licensed banks to nonresidents and repayment of such loans are not subject to approval, but must be reported within 30 days of their execution to the MOF and the BEAC. Licensed banks may undertake such operations, subject to the COBAC prudential rules.

Transactions between residents must be effected in domestic currency. Residents may purchase foreign currency for the settlement of their transactions with nonresidents.

Securities issued within the CEMAC are denominated in domestic currency.

The books of licensed banks are maintained in CFA francs. No specific requirements apply to foreign currency deposit accounts.

In the exchange regulations, the applicable provisions are the same as those for borrowing and lending by the private sector. Insurance companies’ capital transactions must be reported within 30 days to the MOF and the BEAC. Transactions exceeding CFAF 100 million are subject to approval by the appropriate authorities. The business and accounting regulations for the insurance sector are based on the Code of the Inter-African Conference on Insurance Markets (CIMA Code) of the CFA franc area member countries.
### EQUATORIAL GUINEA

| Limits (min.) on investment portfolio held locally | n.a. |
| Limits (max.) on investment portfolio held abroad | n.a. |
| Limits (max.) on securities issued by nonresidents | n.a. |
| Currency-matching regulations on assets/liabilities composition | n.a. |
| Pension funds | n.a. |
| Investment firms and collective investment funds | Yes. |

The capital transactions of investment firms and collective investment funds must be reported within 30 days to the MOF and the BEAC. Transactions exceeding CFAF 100 million are subject to approval by the appropriate authorities. The business and accounting regulations for this sector are based on the regulations and instructions of the COSUMAF.

### Changes during 2021 and 2022

#### Resident Accounts

<table>
<thead>
<tr>
<th>Foreign exchange accounts permitted&lt;br&gt;Held abroad</th>
<th>12/23/2021</th>
</tr>
</thead>
</table>

Companies in the extractive sector benefit from a special provision allowing them to hold foreign currency accounts abroad as part of their ordinary operations.
ERITREA

(Position as of June 30, 2022)

Status under IMF Articles of Agreement

Date of membership

Article VIII
Yes.

Article XIV
Yes.

Exchange Measures

Restrictions and/or multiple currency practices
n.a. Information is not publicly available.

Exchange measures imposed for security reasons
No.

In accordance with IMF Executive Board Decision No. 144-(52/51)
No.

Other security restrictions
No.

Exchange Arrangement

Currency
Yes. The currency of Eritrea is the Eritrean nakfa.

Other legal tender
No.

Exchange rate structure

Unitary

Dual
Yes. Since the conversion of the national currency in 2016, the parallel market rate is much closer to the official rate. Because the black market rate is prohibited, the exchange rate is unknown, but not far from the official rate.

Multiple

Classification

No separate legal tender

Currency board

Conventional peg
Yes. The exchange rate arrangement is a conventional pegged arrangement. Directive 1/2005 on the unified exchange rate is the legal document that establishes the fixed exchange rate arrangement.

Stabilized arrangement

Crawling peg

Crawl-like arrangement

Pegged exchange rate within horizontal bands

Other managed arrangement

Floating
The nakfa is pegged to the US dollar, and since December 2016, the buying and selling rates for USD are ERN 15 and ERN 15.15, respectively. This rate is used for accounting and valuation. The Bank of Eritrea (BE) is authorized to change the exchange rate arrangement.

The monetary policy framework is an exchange rate anchor vis-à-vis the US dollar.
Accountability

Open letter
Parliamentary hearings
Other

Transparency

Publication of votes
Publication of minutes
Publication of inflation forecasts

Other monetary framework

**Exchange tax** Yes. The BE prescribes a 0.5% commission on sales and a 0.25% commission on purchases of foreign exchange, except for banknote transactions. ADs are permitted, but not required, to levy an additional service charge of up to 0.25% for buying and 0.75% for selling foreign exchange on their own account.

**Exchange subsidy** No.

**Foreign exchange market** Yes. ADs conducting transactions in the foreign exchange market are to apply the official exchange rate of ERN 15 per US dollar. Only one foreign exchange bureau (Himbol Financial Services, which has branches throughout the country) is authorized to engage in foreign exchange operations. The parallel market premium is informally reported to be about 160%, but the size of the parallel market is unknown.

**Spot exchange market** Yes. One exchange bureau (Himbol Financial Services) is licensed to deal in foreign exchange with the public in addition to the commercial banks. Its operations are limited to purchases and sales of banknotes. The Ministry of Trade and Industry (MTI) is authorized to grant licenses.

**Operated by the central bank** Yes.

**Foreign exchange standing facility** Yes. The BE buys and sells dollars for nakfa at the request of ADs (commercial banks and exchange bureaus) and the government at the official rate without a margin or commission.

**Allocation** Yes. The FEC, a government-appointed committee, which includes the governor of the BE, is in charge of allocating foreign exchange across sectors. Essential commodity imports are given priority access to foreign currency.

**Auction** No.

**Fixing** No.

**Interbank market** No. There is no interbank foreign exchange market.

**Over the counter** No.

**Brokerage** No.

**Market making** No.

**Forward exchange market** No.

**Official cover of forward operations** No.
### Arrangements for Payments and Receipts

| Prescription of currency requirements | Yes. |
| Controls on the use of domestic currency | No. |
| For current transactions and payments **For capital transactions** | No. |
| Transactions in capital and money market instruments | No. |
| Transactions in derivatives and other instruments | No. |
| Credit operations | No. |
| Use of foreign exchange among residents | Yes. |

Unless the BE specifically authorizes payment in foreign currency, all payments relating to commercial transactions and contracts in Eritrea may only be made in nakfa.

| Payments arrangements | Yes. |
| Bilateral payments arrangements | No. |
| **Operative** | No. |
| **Inoperative** | No. |
| Regional arrangements | Yes. |

Eritrea is a member of COMESA.

| Clearing agreements | Yes. |

A clearing arrangement operates among the members of COMESA.

| Barter agreements and open accounts | No. |

| Administration of control | Yes. |

The BE oversees foreign exchange transactions of ADs and issues regulations, directives, and instructions on foreign exchange matters. The MTI regulates foreign investment and licenses importers, exporters, and commercial agents. The Asmara Chamber of Commerce issues certificates of origin for exports.

| Payments arrears | Yes. |
| Official | Yes. |

Some technical arrears have arisen in connection with loans from two governments.

| Private | Yes. |

There are arrears on overdue bonds. The arrears are the result of a lack of foreign exchange or private default.

| Controls on trade in gold (coins and/or bullion) | Yes. |
| On domestic ownership and/or trade | Yes. |

Authorization from the Ministry of Energy and Mines is required for ownership or possession of gold or other precious metals or ores. Residents may own gold jewelry without restriction.

| On external trade | Yes. |

| Controls on exports and imports of banknotes | Yes. |
| On exports | Yes. |

**Domestic currency** | Yes. |

Travelers are not allowed to take out of the country domestic currency over ERN 1,000.

**Foreign currency** | Yes. |

There is no limit on the amount of foreign currency that travelers may take out of Eritrea. They are required to declare the amount they take out if it exceeds US$10,000 or its equivalent in foreign currency.
### Resident Accounts

<table>
<thead>
<tr>
<th>Foreign exchange accounts permitted</th>
<th>Yes.</th>
</tr>

<td>No.</td>
</tr>
<tr>
<td>Accounts in domestic currency convertible into foreign currency</td>
<td>No.</td>
</tr>
</tbody>
</table>

**Foreign currency**

There is no limit on the amount of foreign currency that travelers arriving at Eritrea may carry. They are required to declare the amount they bring in if it exceeds US$10,000 or its equivalent in foreign currency.

**Government institutions**

Government institutions authorized by the MOF and institutions authorized by the BE may open foreign currency accounts in Eritrea and use this currency for international transactions. Eritreans residing in Eritrea may open foreign currency accounts in Eritrean banks and use their foreign currency for legitimate means on presentation of acceptable documentation.

### Nonresident Accounts

**Eritrean citizens**

Eritrean citizens residing outside Eritrea may open foreign currency accounts in Eritrean banks and use their foreign currency without any restrictions.

**Domestic currency accounts**

These accounts are available only to members of the diplomatic community, welfare organizations, nongovernmental organizations and their personnel, and joint ventures and other business firms that invest their capital, wholly or partially, in foreign exchange.

### Imports and Import Payments

| Foreign exchange budget       | No. |
| Financing requirements for imports | Yes. |
| Minimum financing requirements | No. |
| Advance payment requirements  | No. |
| Advance import deposits       | Yes. |
| Documentation requirements for release of foreign exchange for imports | Yes. |

**Most imports**

Most imports financed with official foreign exchange are effected under LCs or on a cash-against-documents basis.

**Advance import deposits**

These are required only for imports under LCs.

**Importers must obtain a permit**

Importers must obtain a permit from the MTI for each import shipment.

Derivatives and other similar instruments are currently not available in Eritrea.

ADs may borrow abroad and overdraw their correspondent accounts abroad.

Domestic retail and wholesale trade and import and commission agencies are open to foreign investors only if Eritrea has a bilateral agreement of reciprocity with the resident country of the investor; this condition may be waived by the government. Approved investments and their subsequent expansion are exempt from customs duty, and capital goods and spare parts associated with the
investment are exempt from sales taxes. There are no exemptions from income taxes.

## Changes during 2021 and 2022

No significant changes occurred in the exchange and trade system.
ESTONIA

(Position as of June 30, 2022)

Status under IMF Articles of Agreement

Date of membership

Article VIII
Yes. Date of acceptance: August 15, 1994.

Article XIV

Exchange Measures

Restrictions and/or multiple currency practices
No.

Exchange measures imposed for security reasons
Yes.

In accordance with IMF Executive Board Decision No. 144-(52/51)
Yes.

Other security restrictions
No.

Estonia applies international security restrictions in accordance with the Common Foreign and Security Policy (CFSP) of the EU.

Estonia applies all sanctions and restrictive measures that have been adopted by the UNSC and the EC.

Exchange Arrangement

Currency
Yes.
The currency of Estonia is the euro.

Other legal tender
No.

Exchange rate structure

Unitary
Yes.

Dual

Multiple

Classification

No separate legal tender

Currency board

Conventional peg

Stabilized arrangement

Crawling peg

Crawl-like arrangement

Pegged exchange rate within horizontal bands

Other managed arrangement

Floating

Free floating
Yes.
The exchange rate arrangement of the euro area is free floating. Estonia participates in a currency union (EMU) with 18 other members of the EU and has no separate legal tender. The ECB
publishes information regarding its interventions; it last intervened in March 2011. When it intervenes, the ECB intervenes at the quotes of the market makers.

The ECB publishes a reference rate based on the daily concertation procedure between CBs within and outside the European System of Central Banks. The published exchange rates, which are the average of the sale and purchase rates, reflect the market conditions prevailing at the time of the concertation. The publication time of the euro foreign exchange reference rates (ECB reference rates) is around 4:00 p.m. Central European Time. The publication regime reinforces the concept of the ECB foreign exchange rate as a purely informative one.

**Official exchange rate**  Yes.

*Band/Range*

*Target measure*

*CPI*

*Core inflation*

*Target horizon*

*Operating target (policy rate)*
To maintain price stability is the primary objective of the Eurosystem and of the single monetary policy for which it is responsible. This is stated in the Treaty on the Functioning of the European Union, Article 127(1). “Without prejudice to the objective of price stability,” the Eurosystem will also “support the general economic policies in the Community with a view to contributing to the achievement of the objectives of the Community.” These include a “high level of employment” and “sustainable and non-inflationary growth.” Effective July 7, 2021, price stability is defined as a symmetric 2% inflation target over the medium term (previously, it was defined as inflation rate below but close to 2% over the medium term). For the Bank of Estonia (BOE), the price stability as the primary objective is set down by the BOE Act, Section 2(1).

Transactions in convertible currencies are effected by commercial banks, which are free to quote their own exchange rates. According to the Money Laundering and Terrorism Financing Prevention Act (MLTFPA), foreign exchange bureaus are required to have authorization by the FIU, a governmental authority in the area of government of the MOF, which is autonomously engaged in regulatory enforcement. Foreign exchange bureaus are supervised by the FIU.

There are no limits on the bid-ask spreads and commissions of market participants. The BOE does not intervene in the foreign exchange market.

The foreign exchange market operates over the counter.
Brokersage  No.
Market making  No.
Forward exchange market  Yes. Residents and nonresidents may freely negotiate forward exchange contracts for both commercial and financial transactions in all leading convertible currencies in the domestic exchange market and in international foreign exchange markets. The BOE does not participate in the forward foreign exchange market.
Official cover of forward operations  No.

Arrangements for Payments and Receipts

Prescription of currency requirements  No.
Controls on the use of domestic currency  No.
For current transactions and payments  No.
For capital transactions  No.
Transactions in capital and money market instruments  No.
Transactions in derivatives and other instruments  No.
Credit operations  No.
Use of foreign exchange among residents  No.
Payments arrangements  Yes.
Bilateral payments arrangements  Yes.
Operative  No.
Inoperative  Yes. Estonia has bilateral agreements with Armenia, Azerbaijan, Belarus, Kazakhstan, the Kyrgyz Republic, Latvia, Lithuania, Moldova, Russia, Tajikistan, Turkmenistan, Ukraine, and Uzbekistan. Euro balances held by the CBs of these countries in their correspondent accounts are fully convertible without delay. No swing credits or overdraft facilities are provided by these arrangements. These agreements were concluded at the end of the Union of Soviet Socialist Republics as an ad hoc measure, to regulate bilateral obligations with the former Soviet Republics after the demise of the central authority. For now, all these agreements have been inoperative for a very long time.
Regional arrangements  No.
Clearing agreements  No.
Barter agreements and open accounts  No.
Administration of control  Yes. The BOE issues and enforces foreign exchange regulations. The MOF controls and monitors imports and exports. Providers of currency exchange services and companies trading in precious metals are required to register and have authorization by the FIU, a governmental authority in the area of government of the MOF, which is autonomously engaged in regulatory enforcement. And they are supervised by the FIU.
Payments arrears  Yes. There are some unsettled balances with Russia and certain other CIS countries that originated in the early 1990s.

<td>In accordance with Regulation (EC) No. 2018/1672, cash controls have been implemented based on a mandatory declaration system for amounts of cash entering or leaving the EU with a value of €10,000 or more. Travelers entering or leaving the EU and carrying more than €10,000 are required to make a declaration to the relevant authorities of the member country through which they enter or leave the EU. The authorities must keep a record of such information and report it to their national FIU. The obligation to declare is not fulfilled if the traveler makes no declaration or if the information provided is incorrect or incomplete. To check compliance with the regulation, the national authorities have the right to search natural persons, their baggage, and their means of transportation. In the event of failure to comply with the declaration obligation, cash may be confiscated. The EU regulation requires member countries to impose penalties for failure to comply with the declaration obligation. If there are indications that cash is related to illegal activity, authorities of one member country may exchange information with authorities in other member countries. Under the framework of existing agreements on mutual administrative assistance, information obtained under the EU regulation may also be communicated to a third country in compliance with relevant national and EU provisions on the transfer of personal data to third countries. The EU regulation does not apply to physical cross-border transportation from one EU member country to another (that is, intra-EU transportation). Such transportation is not considered “cross-border” for the purposes of the EU regulation; the EU regulation only harmonizes the system for the EU’s external borders.</td>

<td>Yes.</td>
</tr>
</tbody>
</table>

- **Foreign exchange accounts permitted** are permitted according to banks’ own terms and conditions of current account agreements. The principal currency is the euro, unless specified otherwise by the client in the agreement. Clients may change the principal currency. Only currency quoted by the bank may be held in the account. Clients must specify the currencies to be held in the account in the agreement, and they may change the currencies during the term of the agreement. The procedure for fulfillment of payment transactions in foreign currencies is in the bank’s settlement terms and conditions.

- **Held abroad**
  - Commercial banks in Estonia may open correspondent accounts with commercial banks worldwide, including in Russia and other CIS countries. Restrictions according to the MLTFPA apply.

### Nonresident Accounts

<td>Yes.</td>
</tr>
</tbody>
</table>

- **Blocked accounts**
  - In the event of suspicion of money laundering or terrorism financing, the FIU may issue an instruction to suspend transactions for up to 30 days after the percept is issued and impose restrictions on disposal of the proceeds of an account or other property constituting the object of the transaction, official operation, or official service or other suspect assets or property (MLTFPA, Section 57(1)). Within the term specified in this section of the MLTFPA, transactions may take place or restriction of disposal of an account or other property may be waived only with written consent of the FIU. During the restriction period, the credit institution or financial institution may not execute any account debit requests by the account holder. In addition to the provisions of this section of the MLTFPA, the FIU may, on the basis of an instruction, restrict the use of property for up to 60 days if (1) during verification of the origin of the property there is suspicion of money laundering and the owner or possessor of the property fails to submit evidence certifying a legal origin of the property to the FIU within 30 days of the suspension of the transaction or as of the imposition of restrictions or (2) the property is suspected to be used for terrorism financing. The Tax and Customs Board may block accounts used to enable illegal gambling through issuance of an order to the relevant bank instructing it to block the account and freeze the assets. The Tax and Customs Board specifies a period during which anyone who has transferred funds to this account may
apply for a refund. The application must be accompanied by evidence (proof of transaction). After investigation, but no more than 30 days later, the Tax and Customs Board decides whether the application is substantiated and the refund should be granted. Seizure of any assets held in an account with a credit or financial institution means imposition of such restrictions on the use of the account during which the credit institution or financial institution does not comply with any account debiting instructions to the extent of the assets seized.

The International Sanctions Act (2020) regulates the internal imposition, implementation, and supervision of international sanctions of the UN, EU, other international organizations, and the Estonian government. It imposes obligations, including to block accounts and notify the FIU of possible international financial sanctions. International sanctions are imposed with regard to a state, territory, territorial unit, regime, organization, association, group or person by a resolution of the UNSC, a decision of the EC or any other legislation imposing obligations on Estonia. International sanctions imposed by a resolution of the UNSC must be implemented with regard to the subjects of the international sanctions listed by the committee established on the basis of the resolution until the regulation of the EC is updated or adopted.

OGLs are required for alcohol, nonanimal food, fuel and energy, precious metal products, and tobacco. Licenses or special permits are required to import explosives, weapons and ammunition, plants, seeds, rare species of animals and plants, goods subject to veterinary and phytosanitary controls, certain nonanimal food products, fertilizers, narcotics and psychotropic substances and their precursors, strategic goods, radioactive materials, products that deplete the ozone layer, and waste products.
Other nontariff measures: Yes. The importation of certain dangerous chemicals, waste products, goods that infringe on intellectual property rights, and goods harmful to human welfare is prohibited.

Import taxes and/or tariffs: Yes. Import taxes include customs duties and national taxes on goods (regulated by the Tax Act). Imported goods are subject to VAT (with a standard rate of 20%) and excise duties that are levied on specific products, such as tobacco, alcohol, energy products, electricity, and packaging materials. Similar taxes are levied on domestically produced goods. Almost all excise duty rates are above the EU minimum rates. Customs duties are established in accordance with EU regulations.

Taxes collected through the exchange system: No.

State import monopoly: No.

Exports and Export Proceeds

Controls on direct investment
Yes.

**Outward direct investment**
No.

**Inward direct investment**
Yes. For nonresidents, controls apply to (1) the acquisition of agricultural land and forestland and real estate on Estonia’s islands (except the four largest) and in seven territorial units bordering Russia. The reservation on the acquisition of agricultural land and forest ceased to apply May 31, 2011; (2) majority ownership of an Estonian flag maritime vessel by non-EU residents, except through a company established in Estonia; (3) majority ownership of an airline by non-EU residents; and (4) the extent that under EU Directive 2009/65/EC (former Directive 85/611/EEC), a depository of a UCITS must either have its registered office or be established in the UCITS home member country (EU country). Regulation (EU) No. 2019/452 of March 19, 2019, established an EU-wide framework for FDI screening and for the European Commission and the Member States to coordinate their actions on foreign investments.

Controls on liquidation of direct investment
No.

Controls on real estate transactions
Yes. Regulations on the purchase and sale of land are harmonized with EU regulations.

**Purchase abroad by residents**
No.

**Purchase locally by nonresidents**
Yes. Ownership of large parcels of agricultural land and forestland (exceeding ten hectares) may be transferred to foreigners and foreign legal entities only with the permission of the relevant local government unit. Foreigners, foreign entities, and foreign countries...
ESTONIA

may not acquire real estate on islands (except the four largest) or in seven territorial units bordering Russia. EEA, UK nationals, and OECD residents are not subject to restrictions. EEA and OECD legal entities may own up to 10 hectares without restriction. If they wish to purchase more than 10 hectares, they must have been active in farming or forestry for at least three consecutive years. Persons from third countries must apply for permission from the relevant local government unit.

Sale locally by nonresidents No.

Controls on personal capital transactions Yes.

Loans

By residents to nonresidents No.

To residents from nonresidents No.

Gifts, endowments, inheritances, and legacies Yes.

By residents to nonresidents Yes. Controls apply to the transfer of real estate as a gift.

To residents from nonresidents No.

Settlement of debts abroad by immigrants No.

Transfer of assets No.

Transfer abroad by emigrants No.

Transfer into the country by immigrants No.

Transfer of gambling and prize earnings No.

Provisions Specific to the Financial Sector

Provisions specific to commercial banks and other credit institutions Yes. EU legislation applies (Regulation (EU) No. 575/2013 of the European Parliament and of the Council of June 26, 2013, on prudential requirements for credit institutions and investment firms and amending Regulation (EU) No. 648/2012 text with EEA relevance). There is no differentiation on the basis of currency or residence. For example, interest rate restriction (annual percentage rate restriction for consumer credits) applies to all consumer credit contracts. Also, credit institutions have liquidity requirements, which do not depend on currency.

Effective February 10, 2021, the Estonian Financial Supervision Authority recommended financial sector institutions be conservative in paying out dividends to soothe the impact of COVID-19. The introduced recommended limits for the distribution of profits by credit institutions, insurance companies, and investment firms expired effective September 30, 2021.

Borrowing abroad No. There is no restriction on borrowing from abroad.

Maintenance of accounts abroad No. Commercial banks may open correspondent accounts with commercial banks worldwide, including in Russia and other CIS countries. Restrictions according to the MLTFPA apply.

Lending to nonresidents (financial or commercial credits) No. Regulations regarding lending do not differentiate on the basis of nonresidents and residents. Regulations covering lending provisions are the same for all.

Lending locally in foreign exchange No. There is no restriction on currencies. Contracting parties can agree
Purchase of locally issued securities denominated in foreign exchange | No. | between themselves as to which is the contract currency. There is no restriction for purchasing locally issued securities denominated in foreign exchange.
Differential treatment of deposit accounts in foreign exchange | No. | There is no differentiation between local and foreign currency deposit accounts.
  - Reserve requirements | No.
  - Liquid asset requirements | No.
  - Interest rate controls | No.
  - Credit controls | No.
Differential treatment of deposit accounts held by nonresidents | No. | There is no differentiation between local and foreign currency deposit accounts.
  - Reserve requirements | No.
  - Liquid asset requirements | No.
  - Interest rate controls | No.
  - Credit controls | No.
Investment regulations | No. | There is no investment restriction in national-level legislation.
  - Abroad by banks | No.
  - In banks by nonresidents | No.
Open foreign exchange position limits | Yes. | The capital requirements in Article 351 of the CRR (EU) No. 575/2013 applies to credit institutions. Effective June 26, 2021, the CRR regulation for investment companies was replaced by the IFR regulation. Although the IFR-I articles refer to the CRR, the CRR in its entirety no longer applies to investment firms.
  - On resident assets and liabilities | Yes.
  - On nonresident assets and liabilities | Yes.
Provisions specific to institutional investors | Yes.
  - Insurance companies | No.
    - Limits (max.) on securities issued by nonresidents | No. | According to the EU legislation (Directive 2009/138/EC of the European Parliament and of the Council of November 25, 2009, on the taking up and pursuit of the business of Insurance and Reinsurance (Solvency II)), prudent person principle applies and there is no differential treatment of securities issued by nonresidents or residents.
    - Limits (max.) on investment portfolio held abroad | No. | EU legislation applies. There are no specific limits on investment portfolios held abroad just as there are no limits on investment portfolios held locally.
    - Limits (min.) on investment portfolio held locally | No.
    - Currency-matching regulations on assets/liabilities composition | No. | There are no currency-matching regulations on the composition of assets and liabilities.
  - Pension funds | Yes.
    - Limits (max.) on securities issued by nonresidents | No. | A pension fund may invest up to 100% of its assets in foreign securities traded in regulated markets of Estonia or other countries, as specified in the fund rules. Pension funds may also invest their...
assets in money market instruments and units or shares of funds that are not traded in regulated markets. The investment portfolio must be diversified. Assets of a conservative pension fund (mandatory pension fund) may be invested in bonds: (1) with at least an investment grade rating from a rating agency registered in accordance with Regulation (EC) No. 1060/2009 of the European Parliament and of the Council on credit rating agencies (OJ L 302, November 17, 2009, pp. 1–31—hereinafter in this section “rating agency”); (2) whose issuer has at least an investment grade rating from a rating agency, if the bonds have no rating; (3) whose issuer, if the parent company is a credit institution, has at least an investment grade rating from a rating agency, if the bonds and their credit institution issuer have no credit rating; and (4) guaranteed by a contracting country or an OECD member with at least an investment grade rating from a rating agency. If the specified rating agencies have issued different credit ratings, the management company must take the lowest current credit rating into consideration. Up to 20% of the market value of the assets of a conservative pension fund may also be invested in other assets not listed above.

Limits (max.) on investment portfolio held abroad
No.

Limits (min.) on investment portfolio held locally
No.

Currency-matching regulations on assets/liabilities composition
Yes.

Conservative pension funds’ overall net open position of investments in securities denominated in foreign exchange may not exceed 25% of the assets of a conservative pension fund. Effective June 12, 2021, there is no ceiling for other mandatory funds (previously 50%).

Investment firms and collective investment funds
Yes.

Limits (max.) on securities issued by nonresidents
Yes.

All investment funds may invest up to 100% of their assets in foreign securities. In general, the assets of UCITS and other open-end public funds must be invested in securities that are freely transferable and traded in regulated markets of Estonia and EEA members or other countries, as specified in the fund rules. As a general rule, no more than 10% of investment fund assets may be invested in transferable securities (including covered bonds) issued by the same body. However, UCITS may invest up to 25% of their assets in covered bonds of a single body if the bonds are issued by an EU credit institution.
Changes during 2021 and 2022

Exchange Arrangement

Monetary policy framework

Other monetary framework 07/07/2021

Price stability is defined as a symmetric 2% inflation target over the medium term (previously, it was defined as inflation rate below but close to 2% over the medium term).

Provisions Specific to the Financial Sector

Provisions specific to commercial banks and other credit institutions 02/10/2021

The Estonian Financial Supervision Authority recommended financial sector institutions be conservative in paying out dividends to soothe the impact of COVID-19. The recommended limits for the distribution of profits by credit institutions, insurance companies, and investment firms were introduced until the end of September 2021.

09/30/2021

The recommended limits for the distribution of profits by credit institutions, insurance companies, and investment firms introduced on February 10, 2021, to soothe the impact of COVID-19 expired.

Open foreign exchange position limits 06/26/2021

The CRR regulation for investment companies was replaced by the IFR regulation. Although the IFR-I articles refer to the CRR, the CRR in its entirety no longer applies to investment firms.

Provisions specific to institutional investors

Pension funds

Limits (max.) on investment portfolio held abroad 06/12/2021

There is no ceiling for the net open position of investments in securities denominated in foreign exchange of mandatory funds other than conservative pension funds (previously 50%).

Currency-matching regulations on assets/liabilities composition 06/12/2021

There is no ceiling for the net open position of investments in securities denominated in foreign exchange of mandatory funds other than conservative pension funds (previously 50%).

06/13/2022

The assets of a pension fund may be placed in precious metals and securities whose underlying assets are precious metals or raw materials or whose price is dependent on precious metals or raw materials, up to 25% of the value of the assets of the pension fund.
KINGDOM OF ESWATINI
(Position as of June 30, 2022)

Status under IMF Articles of Agreement

Date of membership

September 22, 1969.

Article VIII

Yes.

Article XIV

Date of acceptance: December 11, 1989.

Exchange Measures

Restrictions and/or multiple currency practices

No.

Exchange measures imposed for security reasons

No.

In accordance with IMF Executive Board Decision No. 144-(52/51)

No.

Other security restrictions

No.

Exchange Arrangement

Currency

Yes.

The currency of Eswatini is the Eswatini lilangeni.

Other legal tender

Yes.

The South African rand is also official legal tender.

Exchange rate structure

Unitary

Yes.

Dual

Multiple

Classification

No separate legal tender

Currency board

Conventional peg

Yes.

The exchange rate arrangement is a conventional pegged arrangement vis-à-vis the rand. The Central Bank of Eswatini (CBE) (Swaziland) Order of 1974 is the legal document that establishes the fixed exchange rate arrangement.
Official exchange rate

Yes. The lilangeni is pegged to the rand at par. Exchange rates for the US dollar quoted by the CBE are based on the exchange rate of the rand against the US dollar. Rates are also quoted for the Canadian dollar, euro, Japanese yen, pound sterling, and Swiss franc, based on the London and New York market quotes for these currencies against the US dollar. The official exchange rate is used for accounting and valuation. The Monetary Policy Consultative Committee is the institution authorized to change the exchange rate arrangement.

Monetary policy framework

Yes. Exchange rate anchor to the SA rand currency under the CMA/Multilateral Monetary Agreement (MMA) agreement between SA, Eswatini, Lesotho, and Namibia. The primary objective is to maintain the 1-to-1 exchange rate peg between SA and Eswatini. The secondary objective of the Central Bank is to ensure price stability through monetary policy. The Monetary Policy Consultative Committee advises the Central Bank Governor on Monetary Policy decisions based on domestic and international developments. Inflation forecasts and other economic fundamentals considered in monetary policy decision are published to the public.

Other monetary framework

Exchange tax  No.

Exchange subsidy  No.

Foreign exchange market  Yes.

Spot exchange market  Yes. The CBE conducts foreign exchange transactions with four ADs (commercial banks), three bureaus – ADs with limited authority – and the government; and issues licenses. Foreign exchange bureaus may engage in the purchase and sale of foreign exchange with travelers and other ADs. Three bureaus are currently licensed, and they report to the CBE.

Operated by the central bank  Yes.

Foreign exchange standing facility  Yes. The CBE buys and sells rand at the official exchange rate with no commission charged. The CBE conducts foreign exchange transactions with four ADs (commercial banks), three bureaus – ADs with Limited Authority, and with the government.

Allocation  No.

Auction  No.

Fixing  No.

Interbank market  Yes. There is an interbank foreign exchange market, but the transaction volume is low. High-volume transactions in foreign exchange are conducted between local commercial banks and commercial banks based in South Africa. There are four banks participating in the interbank market.

The CBE does intervene directly in the market to:
(1) Provide ZAR liquidity by buying and selling against the local currency (SZL), with the four local commercial banks.
(2) Buy foreign currency export proceeds from local commercial banks in spot market.

Over the counter: Yes.
Brokerage: No.
Market making: No.
Forward exchange market: Yes. The CBE permits ADs to engage in forward exchange operations. The forward exchange rates are market determined. Since May 2018, the CBE has actively participated in the local market by buying foreign currency export proceeds from the local commercial banks. Currently, the CBE trades only with three banks in these operations. This is for both spot and outright forward transactions. No swaps are traded.

Official cover of forward operations: No.

Arrangements for Payments and Receipts

Prescription of currency requirements: Yes. The rand is a legal tender in Eswatini as per the CMA agreement; it is convertible at par with lilangeni.

Controls on the use of domestic currency: Yes. Domestic currency may be used freely within the CMA. Accounts for individuals temporarily visiting the CMA are permitted with restrictions.

For current transactions and payments: Yes. Domestic currency may be used only to buy foreign currency to settle foreign trade transactions with countries outside the CMA.

For capital transactions: Yes.
Transactions in capital and money market instruments: Yes. Transactions in domestic capital and money market instruments are conducted in the domestic currency.
Transactions in derivatives and other instruments: Yes. Transactions in domestic securities derivatives are conducted in the domestic currency.
Credit operations: Yes. CBE approval is required.

Use of foreign exchange among residents: Yes. These transactions may be effected only between foreign exchange accounts.

Payments arrangements: Yes.
Bilateral payments arrangements: No.
Operative: No.
Inoperative: No.

Regional arrangements: Yes. Eswatini is part of the CMA; no restrictions are applied to payments within the CMA, and, in principle, payments are not subject to controls. Residents of Eswatini have access to the Johannesburg market, in accordance with the terms and conditions applied in that market.

Barter agreements and open accounts: Yes. Barter agreements involving an Eswatini resident require CBE approval.

Administration of control: Yes. The CBE, on behalf of the MOF, controls all external currency transactions. In dealings with countries outside the CMA, Eswatini applies exchange controls that are generally similar to those of South Africa.

**Exports and Export Proceeds**

**Repatriation requirements**

Yes. For goods shipped to countries outside the SACU, licensing is used to ensure that export proceeds are repatriated in the prescribed manner and within the stipulated period. Export proceeds must be received in Eswatini within 180 days of shipment.

**Surrender requirements**

Yes.

**Surrender to the central bank**

Yes. Since May 1, 2018, any AD who purchases foreign currency acquired from export proceeds by any person resident in Eswatini must, within seven days after such purchase, offer such foreign currency for sale to the Minister. The Minister may purchase such foreign currency for not less than the market value of such currency on the day of purchase. Foreign exchange must be sold to the minister by electronic transfer made payable to the CB.

This is only applicable to export proceeds from goods.

**Surrender to authorized dealers**

Yes. Unless otherwise permitted, export proceeds must be remitted to Eswatini not later than six months from the date of shipment. The law allows exporting companies to retain export proceeds to make payments for imports and all costs related thereto and expenses such as commission, freight, insurance, and demurrage, which are expressed in foreign currency. The remaining export proceeds must be offered for sale.

**Financing requirements**

No.

**Documentation requirements**

Yes.

</table>

**Without quotas**

Yes.
### Kingdom of Eswatini

| With quotas | Yes. | Quotas apply to exports of beef and sugar. |
| Export taxes | No. | There are currently no levies on sugar exports to all destination markets (including the EU). Levies that applied in the past to sugar exports to the EU market were discontinued in 2009 at the commencement of EU sugar reforms. |
| Collected through the exchange system | No. |
| Other export taxes | No. |

#### Payments for Invisible Transactions and Current Transfers

| Controls on these transfers | Yes. | Payments to nonresidents for current account transactions, although subject to control, are not normally restricted. Authority to approve some types of current account payments up to established limits is delegated to ADs. |
| Trade-related payments | Yes. |
| Prior approval | Yes. | Approval may be required, depending on the purpose of the transfer. |
| Quantitative limits | No. |
| Indicative limits/bona fide test | Yes. | Documentary evidence confirming the amount due must be provided. |
| Investment-related payments | Yes. |
| Prior approval | No. |
| Quantitative limits | No. |
| Indicative limits/bona fide test | Yes. | Authority to transfer dividends, profits, and other income is delegated to ADs, subject to the submission of documentary evidence. |
| Payments for travel | Yes. |
| Prior approval | Yes. | Approval is required for amounts exceeding permissible limits. |
| Quantitative limits | Yes. | The annual limits on foreign exchange purchases by permanent residents for business and holiday travel are the equivalent of an E 1 million single discretionary allowance for an adult and an E 160,000 travel allowance for a person under 18 years. |
| Indicative limits/bona fide test | Yes. | Permission to purchase larger amounts is granted on application supported by proof of need. |
| Personal payments | Yes. |
| Prior approval | No. |
| Quantitative limits | Yes. | A single discretionary allowance of E 1 million applies. |
| Indicative limits/bona fide test | Yes. | Documentary evidence must be provided. |
| Foreign workers' wages | Yes. |
| Prior approval | No. |
| Quantitative limits | No. |
| Indicative limits/bona fide test | Yes. | Documentary evidence substantiating the income earned must be produced. |
| Credit card use abroad | Yes. |
**Prior approval** Yes. Resident cardholders must complete a letter of intent before departure to use credit cards outside the CMA.

**Quantitative limits** Yes. Residents may use up to 100% of the approved travel facility.

**Indicative limits/bona fide test** Yes.

**Other payments** Yes.

**Prior approval** No.

**Quantitative limits** No.

**Indicative limits/bona fide test** Yes.

| On capital market securities | Yes. |

| Shares or other securities of a participating nature | Yes. |
| Purchase locally by nonresidents | No. |

Purchases may be processed through normal banking channels directly in foreign currency or through local currency nonresident accounts held in a CMA member country.

Securities law does not place any restriction on nonresidents as far as purchasing domestic securities. Nonresidents can purchase local securities through locally licensed services providers.

| Sale or issue locally by nonresidents | Yes. |

Balances in blocked accounts for emigrants may be invested in listed securities and other such investments as may be approved by the CBE. Other nonresidents may effect these transactions freely.
A nonresident can sell/issue securities through locally licensed services providers. Sale of securities locally by nonresidents constitutes a financial service requiring local license.

Quantitative limitation – a limit of E 4 million applies; however, an excess of E 4 million requires approval from the CBE. The E 4 million one-off allowance per private individual was effected in 2012, and in 2018, it was liberalized to E 4 million an annum a private individual.

These transactions are subject to CBE approval.

There are no specific controls; however, the underlying documentation must specify that a nonresident is effecting the transaction, to distinguish nonresidents’ certificates from those of residents.

These transactions are restricted to private persons’ investment entitlements. Purchases abroad of bonds or other debt instruments by a resident individual are limited to the equivalent of E 4 million.

Purchases by corporations are subject to Exchange Control approval.

The regulations governing purchases abroad by residents apply.

These transactions are restricted to private persons’ investment entitlements. Purchases abroad of money market instruments by a resident individual are limited to the equivalent of E 4 million.

The regulations governing purchases abroad by residents apply.

Quantitative limitation – in terms of collective investment scheme management companies, limit is subject to 35% of the total assets under management. This limit has been in effect since August 2018.

Quantitative limitation – in terms of collective investment scheme management companies, limit is subject to 35% of the total assets under management. This limit has been in effect since August 2018.

All credit operations are controlled.

The IMF staff report for the 2019 Article IV Consultation with Ethiopia states that, as of December 11, 2019, Ethiopia maintained four restrictions on payments and transfers for current international transactions, which relate to: (1) the tax certification requirement for repatriation of dividend and other investment income; (2) restrictions on repayment of legal external loans and suppliers of foreign partners credits; (3) the prioritization and rationing of foreign exchange to certain imports of goods and services, debt payments and invisibles, and (4) the requirement to provide a clearance certificate from the National Bank of Ethiopia (NBE) to obtain import permits. These restrictions are inconsistent with Article VIII, Section 2(a), of the IMF’s Articles of Agreement. (Country Report No. 20/29)

The currency of Ethiopia is the Ethiopian birr.

The de jure exchange rate arrangement is managed floating. The de
The facto exchange rate arrangement is classified as crawl-like. The NBE publishes the exchange rates and the amount traded in the interbank market on its periodical publications. Currently, the NBE intervenes in the foreign exchange market an amount of US$50,000 on daily basis to determine the indicative exchange rate. The intervention data are publicly available on monthly basis in the quarterly and annual bulletins of the Bank. After 1-month lag of each quarter and fiscal year, the intervention information is available to the public.

| Pegged exchange rate within horizontal bands | Yes. |
| Other managed arrangement | |
| Floating | |
| Free floating | |
| **Official exchange rate** | Yes. |

The official exchange rate of the birr against the US dollar is determined in the interbank foreign exchange market as the weighted average exchange rate. The official exchange rate applies to all transactions, including purchases from exporters, remittances, and purchases by commercial banks. The rate of change in the official exchange rate has been constant, except during periods of ad hoc adjustment.

**Monetary policy framework**

**Exchange rate anchor**

- **U.S. dollar**
- **Euro**
- **Composite**
- **Other**

**Monetary aggregate target**

Yes.

The objectives of monetary policy are to maintain price and exchange rate stability and support economic growth. In achieving these objectives, the NBE sets broad money as an intermediate target and reserve money as its operational target. The document for Ethiopia’s Monetary Policy Framework was formally developed in February 2009.

**Exchange tax**  Yes.  Authorized banks must charge a commission of 2.5% on sales of foreign exchange, which accrues to the NBE. Effective May 2, 2022, exchange commission increased to 2.5% from 1.5%.

**Exchange subsidy**  No.

**Foreign exchange market**  Yes.

**Spot exchange market**  Yes.  The foreign exchange rate for commercial banks is the NBE interbank indicative buying rate of the day. The margin between the buying and selling rates may not exceed 2% of the NBE interbank indicative buying rate of the day. Commercial banks must be licensed by the NBE to open a foreign exchange bureau. These bureaus may make legitimate payments for business and holiday travel, education, medical expenses abroad, etc. The NBE sells foreign exchange to commercial banks but not directly to foreign exchange bureaus. As of August 24, 2022, there were 3,262 foreign exchange bureaus. Effective May 2, 2022, the NBE charges a fee of 2.5% (previously 1.5%) on foreign exchange transactions.

**Operated by the central bank**  Yes.

**Foreign exchange standing facility**  No.
### Allocation

**Yes.** The NBE supplies foreign exchange to finance priority sector projects through public banks based on estimates at the beginning of each fiscal year. In the allocation of foreign currency, the NBE identifies the categories of priority or essential import goods as listed: The first priority import goods are categories as pharmaceuticals. The second priority goods are input for agriculture and input for manufacturing. And the third priority import goods are motor oil, lubricant, liquefied petroleum gas, agricultural input and machines, pharmaceutical product, procurement machinery for manufacturing industry, etc. Since October 5, 2020, fuel import excluded from priority import list.

### Auction

**No.**

### Fixing

**No.**

### Interbank market

**Yes.** All NBE-licensed commercial banks may participate in the market. As of August 24, 2021, 30 banks are licensed but only 17 are active. The NBE does not propose its own quotes to market participants, rather participants other than the NBE quote their buying and selling rates.

### Over the counter

**No.**

### Brokerage

**No.**

### Market making

**Yes.** The market operates based on a market-making agreement; eligible participants quote their buying and selling rates on their own behalf.

### Forward exchange market

**No.**

### Official cover of forward operations

**No.**

### Arrangements for Payments and Receipts

**Prescription of currency requirements**  
**Yes.**

**Controls on the use of domestic currency**  
**Yes.** Eligible entities for accepting payments in foreign currency cash notes can use foreign currency in their transactions with nonresidents.

**For current transactions and payments**  
**Yes.** All payments for valuable export goods must be made in foreign exchange or by the debit of a “Nonresident Transferable Birr or Foreign Currency Account” maintained with local banks by their correspondent banks abroad. Similarly, no carrier, shipping, or forwarding agent, whether foreign or national, must accept only foreign exchange for conveyance of cargo on f.o.b. basis unless specifically authorized by the NBE. Import payments also must be made in foreign exchange. Freight payments for resident and nonresident shipping carriers should be made also in foreign exchange.

**For capital transactions**  
**Yes.**

**Transactions in capital and money market instruments**  
**Yes.** In money and capital markets, resident-to-resident transaction should be made in domestic currency.

**Transactions in derivatives and other instruments**  
**No.** There is currently no derivative market in Ethiopia.

**Credit operations**  
**Yes.** In domestic credit operations, resident-to-resident transaction should be made in domestic currency.

**Use of foreign exchange among residents**  
**Yes.** Residents may not use foreign currency among themselves.

**Payments arrangements**  
**Yes.**

**Nonresident Accounts**

Three types of nonresident accounts are allowed: foreign exchange accounts, nonresident transferable birr accounts, and nonresident nontransferable birr accounts. Deposits to these accounts must be in foreign currency. Balances in the first two accounts may be transferred abroad or used for international payments; balances in nonresident nontransferable birr accounts must be used mainly for local expenses. Transfers from fixed and current foreign exchange accounts to nonresident nontransferable birr accounts do not require NBE approval. Diplomatic missions, members of international organizations, foreign investors, nonresident Ethiopians, and nonresident foreign nationals of Ethiopian origin may open all the three types of foreign exchange accounts. Other nonresidents may open only nonresident nontransferable birr accounts. Nonresident accounts must be demand deposit accounts and may earn interest, but interest may not be paid on nonresident foreign currency current accounts. These must have the equivalent of US$100 as a minimum deposit. Foreign currency fixed accounts must have at least the equivalent of US$5,000, but there is no maximum. Foreign exchange accounts may hold only US dollars, pounds sterling, and euros. Banks may accept deposits in other convertible currencies, but they must be converted to one of the three above-named currencies. Foreign exchange accounts may be used for payments and transfers abroad, provided the account holder has a business license to do so. According to the Diaspora Account Directive (No. FXD/69/2021), a bank is allowed to set their own interest rate on nonresident fixed foreign currency account on negotiation but not less than LIBOR. Similarly, interest rate payment on non-repatriable birr account is also on negotiation, provided the interest rate should not be less than the minimum deposit rate set by the NBE. Nonresident Ethiopians and nonresident foreign nationals of Ethiopian Origin are allowed to open foreign currency saving accounts so as to encourage inflow of foreign exchange. This foreign exchange account holders have the right to sell to banks, pay travel expenses, withdraw 10% of balance in debt card and other domestic payments. The interest rate must be calculated in foreign currency but paid in local currency. The minimum interest rate must be LIBOR plus 4%.

Nonresident foreign exchange diaspora accounts do not require approval. However, foreign investment companies and non-governmental organizations (NGOs) are required to obtain authorization from NBE to open foreign exchange accounts.
international organizations, foreign investors, nonresident Ethiopians, and nonresident foreign nationals of Ethiopian origin may open only nontransferable birr accounts.

### Convertible into foreign currency
Yes. Balances in nonresident nontransferable birr accounts must be used only for local expenses. Transfers of funds from fixed and current foreign exchange accounts to nonresident nontransferable birr accounts do not require NBE approval.

### Approval required
Yes. Approval by the NBE is required for the conversion of balances in nonresident nontransferable birr accounts to foreign exchange.

### Blocked accounts
No.

## Imports and Import Payments

### Foreign exchange budget
No.

### Financing requirements for imports
Yes. Importation under a supplier credit requires approval of the terms and conditions of the credit, and such importation is allowed only for individuals or enterprises engaged in export activities and/or who generate foreign exchange.

### Minimum financing requirements
No.

### Advance payment requirements
Yes. Advance payment is not allowed for payments greater than US$5,000 unless backed by a foreign bank guarantee.

### Advance import deposits
No.

### Documentation requirements for release of foreign exchange for imports
Yes. Final invoices that separately show f.o.b., c.f.r. charges, and nonnegotiable bills of lading are required.

### Domiciliation requirements
Yes. Importers are required to insure their goods with local insurance companies.

### Preshipment inspection
Yes. Preshipment inspection is required only for imports from China.

### Letters of credit
No. LCs are considered an acceptable payment method for imports but are not required.

### Import licenses used as exchange licenses
No.

### Other
Yes. Exchange licenses may be obtained when a valid importer’s license is presented. Applications for exchange licenses must be accompanied by information regarding costs and payment terms and evidence that adequate insurance has been purchased from an Ethiopian insurance company.

### Import licenses and other nontariff measures
Yes.

#### Positive list
No.

#### Negative list
Yes. The negative list includes items restricted for reasons of health and security.

#### Open general licenses
Yes. However, imports by federal and regional offices are exempt from this requirement. Except prohibited goods (used cloths, arms and ammunitions) and restricted goods which require special permit (pharmaceuticals and medicines, telecommunication and communication equipment’s), goods such as chemicals and fertilizer and food products are allowed to import via a general license.

#### Licenses with quotas
No.

#### Other nontariff measures
No.

### Import taxes and/or tariffs
Yes. The item-weighted average tariff rate is 15.3%. Imports are subject to a 3% withholding tax.
Taxes collected through the exchange system

State import monopoly

Exports and Export Proceeds

Repatriation requirements  Yes.  All exporters must repatriate 100% of their export proceeds in foreign exchange within 90 days from the date of issue of export applications.

Surrender requirements  Yes.  Commercial banks bear the responsibility for ensuring that export proceeds for all export permits approved are repatriated into the country within 90 days from the date of issue of export permits for all modes of payments applicable. Banks must make follow-ups, exercise reasonable care, and take measures to insure timely repatriation of proceeds.

Surrender to the central bank  Yes.  Effective September 1, 2021, all commercial banks, except for Development Bank of Ethiopia, are required to surrender 50% of their foreign exchange inflow from export of goods, services, private transfers, and NGO transfers to the NBE. (Previously, the surrender requirement was 30% of foreign exchange inflow.)

Effective January 6, 2022, all commercial banks, except for Development Bank of Ethiopia, are required to surrender 70% of their foreign exchange inflow from export of goods, services, private transfers, and NGO transfers to NBE at the prevailing mid exchange rate immediately on the day of the receipt. (Previously, the surrender requirement was 50% of foreign exchange inflow, calculated using the weighted average daily interbank buying exchange rate.)

Surrender to authorized dealers  Yes.  Effective September 1, 2021, exporters and inward remittances beneficiaries may retain 40% (previously 30%) of their export proceeds in foreign exchange for an indefinite period in their domestic foreign exchange accounts. The remaining balance in excess of 40% of export proceeds, which may be retained in domestic foreign exchange accounts, must be surrendered to respective banks at the prevailing mid exchange rate immediately on the day of the receipt. (Previously, it was possible to retain the remaining balance for up to 28 days.)

Effective January 6, 2022, exporters and inward remittances beneficiaries may retain 20% (previously 40%) of their export proceeds in foreign exchange for an indefinite period in their domestic foreign exchange accounts. The retained 20% of export proceeds must be retained in domestic banks. The remaining balance must be surrendered to respective banks at the prevailing buying exchange rate immediately on the day of the receipt.

Financing requirements  No.

Documentation requirements  Yes.

Letters of credit  No.  LCs are considered an acceptable payment method for exports but are not required.

Guarantees  Yes.  An export credit guarantee plan is operational.

Domiciliation  Yes.  Domiciliation is required for coffee exports.

Preshipment inspection  No.

Other  Yes.  Exporters must prove to the NBE that they have repatriated 100% of previous export earnings before they may export again.
Export licenses: Yes. Export licenses are processed by commercial banks, with the exception of coffee and gold exports, which are licensed by the NBE.

Without quotas: Yes. With quotas: No.

Export taxes: No. Collected through the exchange system: No. Other export taxes: No.

Payments for Invisible Transactions and Current Transfers

Controls on these transfers: Yes.

Trade-related payments: Yes.

Prior approval: Yes. Approval is given by commercial banks.

Quantitative limits: No.

Indicative limits/bona fide test: Yes. Documentary evidence of unloading, storage, commission, and administrative expenses is required.

Investment-related payments: Yes.

Prior approval: Yes. After paying local taxes, foreign companies may remit dividends from their invested and reinvested capital in any currency. Approval is required for amortization of loans and depreciation of direct investment.

Quantitative limits: No.

Indicative limits/bona fide test: Yes. These are subject to an assessment based on the NBE’s criteria. Evidence of a contractual agreement between parties is required by the NBE.

Payments for travel: Yes.

Prior approval: No.

Quantitative limits: Yes. Individuals traveling abroad on holiday may purchase foreign currency up to US$4,000 and business travelers up to US$10,000 or its equivalent in cash; the rest must be in other payment instruments.

Indicative limits/bona fide test: Yes. Travelers must present passports and airline tickets.

Personal payments: Yes.

Prior approval: Yes. Approval is given by commercial banks.

Quantitative limits: No. There are no limits on allowances for medical treatment and study abroad. A foreign exchange bureau may sell foreign exchange for medical treatment abroad on presentation of a medical board certificate, passport, and airline ticket. Up to US$4,000 or its equivalent may be in cash and the balance in other instruments. Additional foreign exchange may be approved for a patient being treated abroad, provided the application is supported by medical bills or hospital statements. A foreign exchange bureau may sell foreign exchange for tuition, subsistence, and other associated education expenses on presentation of a letter of admission and evidence of a student’s attendance. Sales of foreign exchange to a student may be approved up to US$4,000 or its equivalent in other instruments. The
tuition fee, subsistence, and other associated expenses must be paid directly through a bank transfer or draft to the institution.

Development Bank of Ethiopia, are required to surrender 70% of their foreign exchange inflow from export of goods, services, private transfers, and NGO transfers to NBE.

**Surrender to authorized dealers**

Effective September 1, 2021, exporters and inward remittances beneficiaries may retain 40% (previously 30%) of their export proceeds in foreign exchange for an indefinite period in their domestic foreign exchange accounts. The remaining balance in excess of 40% of export proceeds, which may be retained in domestic foreign exchange accounts, must be surrendered to respective banks at the prevailing mid exchange rate immediately on the day of the receipt. (Previously, it was possible to retain the remaining balance for up to 28 days.)

Effective January 6, 2022, exporters and inward remittances beneficiaries may retain 20% (previously 40%) of their export proceeds in foreign exchange for an indefinite period. The retained 20% of export proceeds must be retained in domestic banks. The remaining balance must be surrendered to respective banks at the prevailing buying exchange rate immediately on the day of the receipt.

Regarding foreign exchange from travel and other means, Ethiopian residents are not allowed to hold foreign currency for more than 30 days since the date of acquisition or declaration and has the duty to convert the currency in possession with authorized foreign exchange bureaus.

**Restrictions on use of funds**

These funds may be used for imports of goods and services, export promotion, training and education, credit repayment, and other NBE-approved payments.

**Capital Transactions**

Effective September 1, 2021, all commercial banks, except for Development Bank of Ethiopia, are required to surrender 50% (previously 30%) of their foreign exchange inflow to the NBE.

Effective January 6, 2022, all commercial banks, except Development Bank of Ethiopia, are required to surrender 70% (previously 50%) of their foreign exchange inflow to NBE. Since August 29, 2018, the CB uses the mid-rate instead of the buying exchange rate for payment and settlement of accounts.

Authorized banks must attempt to obtain information regarding the purpose of inward remittances before they disburse funds remitted in foreign exchange from abroad. In particular, loans and capital investment must be identified with the prior NBE authorization.

| Outward direct investment       | Yes    | Investment Proclamation No. 1180/2020 introduced a new framework to register and administer FDI, including a provision for a minimum capital amount per project a foreign investor must invest, ranging from US$50,000 to US$200,000 depending on the type of investment being undertaken. According to Investment Regulation No. 474/2020, five sectors are reserved for joint investment with the government, thirty-two sectors exclusively reserved for domestic investors, and seven sectors for a joint venture with domestic investors. All sectors that are not listed in these categories are open for foreign investment. Any investor (foreign or domestic) may only invest in the following sectors jointly with the government: defense industries, import and export of electrical energies, international air transport services, bus rapid transit and postal services excluding courier services. Investment Regulation (No. 474/2020) lists sectors which are reserved for only domestic investors. These include investments in finance sector except capital goods finance, the transmission and supply of electricity through the Integrated National Grid System as well as wholesale and retail trades, health services, export of raw coffee, khat, oil seeds, pulses, minerals, hides and skins, products of natural forests, chicken and livestock, and hospitality industries. In addition, a foreign investor may jointly invest with a domestic investor in freight forwarding and shipping agency services, domestic air transport services, and cross-country public transport using buses having a capacity of more than 45 seats, advertisement, audiovisual, accounting and auditing services. In such cases, foreign investor(s) can own up to a maximum of 49% of share capital. Previously, investment only in the telecommunications and defense industries was allowed in partnership with the government. Investment in the postal service (except courier service), the transmission and supply of electricity through the Integrated National Grid System, and air transport services using aircraft that seat more than 50 passengers was reserved for the government. All investment (except expansion of air transport services, the generation or transmission or distribution of electric power, and the provision of communications services) must be approved and certified by the Ethiopian Investment Commission (EIC). However, the issuance, renewal, amendment, substitution, replacement and cancellation of investment permits, and the issuance of investment expansion or upgrading permits for air transport services, the generation or transmission or distribution of electric power, and the provision of communications services must be carried out by the Ethiopian Civil Aviation Authority, the Ethiopian Energy Authority, and the Ethiopian Communications Authority, respectively, representing the commission. Income tax exemptions are granted for up to six years for new projects in manufacturing and agro-industry that export at least 50% of production or for which at least 75% of production is used in the.
| Inward direct investment        | Yes    | Investment Proclamation No. 1180/2020 introduced a new framework to register and administer FDI, including a provision for a minimum capital amount per project a foreign investor must invest, ranging from US$50,000 to US$200,000 depending on the type of investment being undertaken. According to Investment Regulation No. 474/2020, five sectors are reserved for joint investment with the government, thirty-two sectors exclusively reserved for domestic investors, and seven sectors for a joint venture with domestic investors. All sectors that are not listed in these categories are open for foreign investment. Any investor (foreign or domestic) may only invest in the following sectors jointly with the government: defense industries, import and export of electrical energies, international air transport services, bus rapid transit and postal services excluding courier services. Investment Regulation (No. 474/2020) lists sectors which are reserved for only domestic investors. These include investments in finance sector except capital goods finance, the transmission and supply of electricity through the Integrated National Grid System as well as wholesale and retail trades, health services, export of raw coffee, khat, oil seeds, pulses, minerals, hides and skins, products of natural forests, chicken and livestock, and hospitality industries. In addition, a foreign investor may jointly invest with a domestic investor in freight forwarding and shipping agency services, domestic air transport services, and cross-country public transport using buses having a capacity of more than 45 seats, advertisement, audiovisual, accounting and auditing services. In such cases, foreign investor(s) can own up to a maximum of 49% of share capital. Previously, investment only in the telecommunications and defense industries was allowed in partnership with the government. Investment in the postal service (except courier service), the transmission and supply of electricity through the Integrated National Grid System, and air transport services using aircraft that seat more than 50 passengers was reserved for the government. All investment (except expansion of air transport services, the generation or transmission or distribution of electric power, and the provision of communications services) must be approved and certified by the Ethiopian Investment Commission (EIC). However, the issuance, renewal, amendment, substitution, replacement and cancellation of investment permits, and the issuance of investment expansion or upgrading permits for air transport services, the generation or transmission or distribution of electric power, and the provision of communications services must be carried out by the Ethiopian Civil Aviation Authority, the Ethiopian Energy Authority, and the Ethiopian Communications Authority, respectively, representing the commission. Income tax exemptions are granted for up to six years for new projects in manufacturing and agro-industry that export at least 50% of production or for which at least 75% of production is used in the.
Production of export items. Expansion and upgrading of existing projects are also eligible for exemption from income tax for two years if the expansion or upgrade increases production value by 25% and if 50% of the production is for export. Investment activities that export less than 50% of their production and produce exclusively for the local market receive up to three years of income tax exemption. Imports of investment goods and inputs for such ventures are also eligible for exemption from customs duties and other specified import levies. The new investment incentives as well as the type and amount of investment incentives must be determined by a Regulation to be enacted by the council of ministers. The council of ministers issued new investment incentive regulation on July 12, 2022.

| Controls on liquidation of direct investment | Yes. | EIC authorization is required for repatriation of capital. Registration of capital inflows with the EIC establishes the evidence of inflows required for authorization. All recognized and registered foreign investment may be terminated on presentation of documents regarding liquidation and on payment of all taxes and other liabilities. Subject to appropriate documentation, foreign investors may transfer their capital without limitation on final departure from Ethiopia. All foreign investors may also transfer abroad in convertible currency payments for debts, fees, or royalties with respect to technology transfer agreements. |
| Controls on real estate transactions | Yes. |
| Purchase abroad by residents | Yes. | The purchase of personal real estate abroad is not permitted. |
| Purchase locally by nonresidents | Yes. | All ownership rights to land are vested in the state; private ownership is not allowed. Land user rights may be acquired through certificates or lease arrangements. Foreign investors may not own land, but may obtain access to land through lease arrangements with the government. |
| Sale locally by nonresidents | Yes. | All ownership rights to land are vested in the state; private ownership is not allowed. |
| Controls on personal capital transactions | Yes. |
| Loans | Yes. |
| By residents to nonresidents | Yes. | No person may enter into a foreign loan contract without the prior consultation with the NBE in the case of the government and approval by the NBE in all other cases. |
| To residents from nonresidents | Yes. | No person may enter into a foreign loan contract without the prior consultation with the NBE in the case of the government and approval by the NBE in all other cases. |
| Gifts, endowments, inheritances, and legacies | Yes. |
| By residents to nonresidents | Yes. | The regulations on financial credits apply. |
| To residents from nonresidents | Yes. | The regulations on financial credits apply. |
| Settlement of debts abroad by immigrants | No. |
| Transfer of assets | Yes. | These transactions are not allowed. |
| Transfer abroad by emigrants | Yes. | These transactions are not allowed. |
| Transfer into the country by immigrants | Yes. | These transactions are not allowed. |
| Transfer of gambling and prize earnings | Yes. | These transactions are not allowed. |
## Provisions Specific to the Financial Sector

<table>
<thead>
<tr>
<th>Provisions specific to commercial banks and other credit institutions</th>
<th>Yes.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Borrowing abroad</td>
<td>Yes. Commercial banks may engage in foreign currency intermediation through borrowing foreign currency including from foreign lenders and granting credit to local borrowers in foreign currency.</td>
</tr>
<tr>
<td>Maintenance of accounts abroad</td>
<td>Yes. Banks may maintain nostro accounts with their correspondents, with NBE approval.</td>
</tr>
<tr>
<td>Lending to nonresidents (financial or commercial credits)</td>
<td>Yes. Commercial banks may not provide financial or commercial credits to nonresidents.</td>
</tr>
<tr>
<td>Lending locally in foreign exchange</td>
<td>Yes. Commercial banks may lend locally in foreign exchange. However, foreign currency acquired through external borrowing must be utilized only to foreign currency generating activities in Ethiopia or depositing at NBE or at foreign correspondent bank. The loan should not exceed 70% of the total cost of project or net worth of the business to which the credit is extended and the remaining 30% must be contributed by the borrower.</td>
</tr>
<tr>
<td>Purchase of locally issued securities denominated in foreign exchange</td>
<td>Yes. Commercial banks may not acquire shares, stocks, and bonds issued abroad denominated in foreign exchange unless authorized by the NBE. This might apply for locally issued securities in foreign exchange.</td>
</tr>
<tr>
<td>Differential treatment of deposit accounts held by nonresidents</td>
<td>Yes. According to Diaspora Account Directive (No. FXD/69/2021), a bank is allowed to set their own interest rate on nonresident fixed foreign currency account on negotiation but not less than LIBOR. Similarly, interest rate payment on nonresident non-repatriable birr account is also on negotiation, provided the interest rate should not be less than the minimum deposit rate set by the NBE.</td>
</tr>
<tr>
<td>Investment regulations</td>
<td>Yes. Authorized banks may not acquire shares, stocks, and bonds denominated in foreign exchange unless authorized by the NBE.</td>
</tr>
<tr>
<td>Open foreign exchange position limits</td>
<td>Yes. Only foreign nationals of Ethiopian origin and organizations fully owned by foreign nationals of Ethiopian origin or jointly owned by foreign nationals of Ethiopian origin and Ethiopian nationals can subscribe to bank shares in foreign exchange. It is not allowed to invest in banks for nonresidents who are not Ethiopian origin.</td>
</tr>
</tbody>
</table>
On resident assets and liabilities

Yes.

The overall foreign currency position of each bank at the close of business each Friday may not exceed 15% of its capital. Commercial banks’ holdings of foreign currency notes are limited to 5% of paid-up capital. The overall open foreign currency position is computed as follows: First, the difference between assets and liabilities in each foreign currency is determined and categorized either as a long or as a short position. Second, open positions in each foreign currency as determined and categorized under the first step are converted to their birr equivalents using the buying rate at the close of business on Friday. Third, the birr equivalents of open positions in each foreign currency obtained under the second step are added up to arriving at the total long and short positions. Fourth, the greater of the total long or short position determined under the third step is divided by the bank’s total capital to obtain the ratio. Last, the ratio obtained under the fourth step is compared with the limit on the overall open foreign currency position.

There is no differential treatment for resident and nonresident asset and liabilities.

On nonresident assets and liabilities

Changes during 2021 and 2022

Exchange Arrangement

Exchange tax

05/02/2022  Exchange commission increased to 2.5% from 1.5%.

Foreign exchange market

Spot exchange market

05/02/2022  The National Bank of Ethiopia charges a fee of 2.5% (previously 1.5%) on foreign exchange transactions.

Exports and Export Proceeds

Repatriation requirements

Surrender requirements

Surrender to the central bank

09/01/2021  All commercial banks, except for Development Bank of Ethiopia, are required to surrender 50% of their foreign exchange inflow from export of goods, services, private transfers, and non-governmental organization transfers to the National Bank of Ethiopia. (Previously, the surrender requirement was 30% of foreign exchange inflow.)

01/06/2022  All commercial banks, except for Development Bank of Ethiopia, are required to surrender 70% of their foreign exchange inflow from export of goods, services, private transfers, and non-governmental organization transfers to National Bank of Ethiopia at the prevailing mid exchange rate immediately on the day of the receipt. (Previously, the surrender requirement was 50% of foreign exchange inflow, calculated using the weighted average daily interbank buying exchange rate.)

Surrender to authorized dealers

09/01/2021  The remaining balance in excess of 40% of export proceeds, which may be retained in domestic foreign exchange accounts, must be surrendered to respective banks at the prevailing mid exchange rate immediately on the day of the receipt. (Previously, it was possible to retain the remaining balance for up to 28 days.)

09/01/2021  Exporters and inward remittances beneficiaries may retain 40% (previously 30%) of their export proceeds in foreign exchange for an indefinite period in their domestic foreign exchange accounts.

01/06/2022  Exporters and inward remittances beneficiaries may retain 20% (previously 40%) of their export proceeds in foreign exchange for an indefinite period in their domestic foreign exchange accounts. The retained 20% of export proceeds must be retained in domestic banks. The remaining balance must be surrendered to respective banks at the prevailing buying exchange rate immediately on the day of the receipt.

Exchange Measures

The IMF staff report for the 2021 Article IV Consultation with Fiji states that, as of November 8, 2021, exchange restrictions subject to Article VIII arise from the Fiji Revenue and Customs Authority tax certification requirements on the transfer abroad of profits and dividends, on the proceeds of airline ticket sales, and on the making of external debt and maintenance payments and from limits on large payments (for example, oil imports and dividends repatriation of foreign banks). The authorities further tightened the controls for payments of international transactions in April 2020, at the onset of the COVID-19 pandemic by either reducing the delegated limits to commercial banks or replacing these limits with the Reserve Bank of Fiji (RBF) discretionary approval requirement on large payments. (Country Report No. 21/257)

Exchange rate structure

Unitary | Yes.
Dual
Multiple

Classification

No separate legal tender
Currency board
Conventional peg | Yes. The exchange rate arrangement is a conventional peg vis-à-vis a currency composite. The RBF does not publish intervention data. The power to establish the fixed exchange rate arrangement is provided in the RBF Act. A change in the exchange rate arrangement may be proposed by the RBF and approved by the minister for economy. The exchange rate weights at the latest weight review are as follows:
US dollar 39.8%, Australian dollar 29.3%, New Zealand dollar 21.9%, Japanese yen 4.8%, and euro 4.2%. The weights are published in the RBF’s annual reports.

The external value of the Fiji dollar is officially determined on the basis of a weighted basket of currencies comprising the Australian dollar, Japanese yen, New Zealand dollar, euro, and US dollar. The relative weights are based on three-year moving averages of Fiji’s direction of trade and are reviewed annually. The exchange rate of the Fiji dollar vis-à-vis the US dollar, the intervention currency, is fixed daily by the RBF on the basis of quotes for the US dollar and other currencies in the basket. The spread is 5 basis points (bps) on either side of the midrate. The official exchange rate is used for accounting and valuation purposes.

The monetary policy framework is an exchange rate anchor vis-à-vis a composite. The fixed exchange rate regime, combined with capital controls, allows some autonomy in monetary policy. The main policy instrument is the overnight policy rate. Its target corridor comprises a 25 bps band around the overnight rate, with the repurchase rate at the upper bound and the deposit rate at the lower bound. While the current system targets interest rates through monetary operations, the bank continues to monitor monetary aggregates such as liquidity/bank demand deposits, which serve as indicators and cross-checks.

Exchange tax No.

Exchange subsidy No.

Foreign exchange market Yes. The RBF determines the maximum spreads of the currencies in the basket within which commercial banks may deal with their customers. These are 170 bps for the US dollar, 120 bps for the euro, 300 bps for the Japanese yen, 250 bps for the Australian dollar, and 330 bps for the New Zealand dollar. ADs may freely determine their foreign exchange commissions with their clients.

Spot exchange market Yes. Six commercial banks and ten foreign exchange dealers are licensed by the RBF. They may make foreign currency payments and transfers on behalf of their clients and maintain foreign exchange accounts with domestic commercial banks. Their transaction limits are based on their total paid-up capital. Foreign exchange dealers may deal...
only among themselves and not with the RBF. Money changers may deal only in travel-related transactions and the purchase and sale of banknotes.

Operated by the central bank Yes. Foreign exchange standing facility Yes. The RBF buys and sells US dollars at the official buying and selling rates. It deals – with commercial banks – once a day and with selected account holders. The width of the spread is F$0.0005 on either side of the midrate.

Allocation No. Auction No. Fixing No.

Interbank market Yes. ADs are allowed to trade among themselves. The RBF deals only with commercial banks and selected account holders at its own quoted rates. There are six banks participating in the interbank market.

Over the counter Yes. The market operates over the counter.

Brokerage No. Market making No.

Forward exchange market Yes. Forward exchange facilities are provided by banks. Each authorized bank may write net forward sales contracts up to F$50 million. The RBF does not participate actively in the forward foreign exchange market.

Official cover of forward operations No.

Arrangements for Payments and Receipts

Prescription of currency requirements Yes. Although no specific requirements exist, settlements between entities from two countries must be made in convertible currencies acceptable to both countries.

Controls on the use of domestic currency Yes. There are controls on the use of domestic currency and on foreign exchange that may be remitted offshore for the settlement of international current and capital transactions. ADs may transfer up to certain delegated limits without RBF approval, depending on the type of payment, as specified in the Exchange Control regulation.

For current transactions and payments Yes. ADs may transfer up to certain delegated limits without RBF approval, depending on the type of payment, as specified in the Exchange Control regulation.

For capital transactions Yes. ADs may transfer up to certain delegated limits without RBF approval, depending on the type of payment, as specified in the Exchange Control regulation.

Transactions in capital and money market instruments Yes. ADs may transfer up to certain delegated limits without RBF approval, depending on the type of payment, as specified in the Exchange Control regulation.

Transactions in derivatives and other instruments Yes. ADs may transfer up to certain delegated limits without RBF approval, depending on the type of payment, as specified in the Exchange Control regulation.

Credit operations Yes. ADs may transfer up to certain delegated limits without RBF approval, depending on the type of payment, as specified in the Exchange Control regulation.

Use of foreign exchange among residents Yes. RBF approval is required for transactions to be settled in foreign currency between residents.

Payments arrangements No.
Bilateral payments arrangements: No.

Operative: No.

Inoperative: No.

Regional arrangements: No.

Clearing agreements: No.

Barter agreements and open accounts: No.

Administration of control: Yes. Exchange control is administered by the RBF, acting as an agent of the government. The RBF delegates to ADs the authority to approve current payments and transfers up to specified limits. Documentary evidence is required for some payments.

Payments arrears: No.

Official: No.

Private: No.

Controls on trade in gold (coins and/or bullion): Yes.

On domestic ownership and/or trade: Yes. Residents may freely purchase, hold, and sell gold coins but not gold bullion.

On external trade: Yes. The exportation of gold coins, except coins and collectors’ pieces for numismatic purposes, requires specific permission from the RBF. The importation of gold, other than gold coins, from all sources requires a specific import license from the Ministry of Economy (MOE); these are restricted to authorized gold dealers. Gold coins and gold bullion are exempt from fiscal duty but are subject to a 9% VAT. Gold jewelry is also exempt from fiscal duty but is subject to a 9% VAT; and is not under licensing control. Samples of gold and gold jewelry sent by foreign manufacturers require import licenses if their value exceeds the equivalent of F$200. Exports of gold jewelry are free of export duty but require licenses if their value exceeds F$20,000. Exports of gold bullion are subject to an export duty of 3%.

Controls on exports and imports of banknotes: Yes.

On exports: Yes. Exports are allowed up to F$500 a trip for travel-related purposes only.

Domestic currency: Yes. Exports are allowed up to the amount declared at the time of arrival. Residents may take out up to the equivalent of F$10,000 in foreign currency (including a maximum of F$500 in local currency) for each overseas round trip and up to the equivalent of F$5,000 for each overseas one-way trip without RBF approval.

Foreign currency: Yes.

On imports: No.

Domestic currency: No. Travelers may bring in Fiji banknotes freely but must declare them to customs or immigration officials on arrival.

Foreign currency: No. Travelers may bring in foreign currency banknotes freely but must declare them to customs or immigration officials on arrival to export the unused balance on departure.

Resident Accounts

Foreign exchange accounts permitted: Yes.
| Held domestically | Yes. | As of April 2, 2020, offshore investment is suspended, including the delegation to open foreign currency accounts. The Reserve Bank allows exporters to retain their annual export proceeds in foreign currency to meet import payments and other offshore liabilities. These accounts should be funded solely by receipts from export of goods and services. ADs are allowed to make payments from the accounts within the delegated limits for raw materials and other liabilities. |
| Approval required | Yes. | The opening of foreign exchange accounts by resident individuals requires RBF permission. The opening of foreign exchange accounts for film production companies is fully delegated to ADs. ADs may also open foreign exchange accounts for locally registered business entities, up to F$100,000 a company without RBF permission. |
| Held abroad | Yes. | Foreign exchange accounts are permitted, but RBF approval is required. |
| Approval required | Yes. | The conversion of domestic currency to foreign currency requires RBF approval. |
| Accounts in domestic currency held abroad | No. | Residents are not allowed to open accounts in Fiji dollars abroad. |
| Accounts in domestic currency convertible into foreign currency | Yes. | These accounts may be converted to foreign currency for travel and for direct transfer abroad. |

### Nonresident Accounts

| Foreign exchange accounts permitted | Yes. | Foreign exchange accounts may be credited freely with the account holder’s salary (net of tax), interest payable on the account, and payments from other external accounts. Commercial banks may open foreign exchange accounts for regional and international organizations without RBF approval. Balances on nonresident accounts may be freely transferred abroad. |
| Approval required | No. | Domestic currency accounts may be credited freely with (1) the account holder’s salary (net of tax); (2) interest payable on the account; (3) payments from other external accounts; (4) Fiji National Provident Fund proceeds and tax refunds; (5) proceeds of sales of foreign currency or foreign coins by the account holder; and (6) Fiji banknotes the account holder brought into Fiji and acquired by debiting an external account or through the sale of foreign currency during a temporary visit. Residents may also credit external accounts with payments that are generally or specifically authorized. External accounts may be debited for (1) payments to residents of Fiji; (2) transfers to other external accounts; (3) payments in cash in Fiji; and (4) purchases of foreign exchange. As of April 2, 2020, deposits of proceeds from sale of a Fiji asset require RBF approval. ADs may deposit income from rental/directors fees/gratuity up to F$50,000 per annum, living allowances/fees/bonds up to F$2,000 a month and reimbursement of rental bonds/immigration bonds/other up to F$10,000 a month, and other unspecified funds up to F$200 a month without Reserve Bank approval. There are no restrictions on Fiji-dollar-denominated deposits with commercial banks if these investments originate abroad. |
| Convertible into foreign currency | Yes. | These accounts may be converted to foreign currency for travel and for direct transfer abroad. |
| Approval required | No. | Blocked accounts | No. |

**FIJI**

**Exports and Export Proceeds**

- **Repatriation requirements**: Yes. Exporters are required to collect the proceeds from exports within six months of the date of shipment of the goods and may not, without specific permission, grant more than six months’ credit to a nonresident buyer. Customs officials process and approve exports of goods with no monetary return.

- **Surrender requirements**: Yes. RBF permission is required to offset foreign exchange earnings against foreign currency payables, except for imports already landed in Fiji. Foreign receipts are credited to the resident’s Fiji dollar account unless the resident holds a foreign currency account. Exporters may hold foreign currency receipts up to the limit placed on their foreign currency accounts. Any funds in excess of the limit must be cleared/converted within 72 hours (3 days). RBF approval is required to hold in excess of the 72 hours to allow exporters to time its offshore payments.

- **Surrender to the central bank**: No.

- **Surrender to authorized dealers**: Yes. Confirmation of receipt of export proceeds is required six months after exportation of goods.

- **Export licenses**: Yes. Export licenses are issued by customs and monitored by the comptroller of customs. Specific licenses are required only for exports of sugar, wheat bran, copra meal, certain types of lumber, certain animals, and a few other items. The Ministry of Commerce, Business Development and Investment issues export licenses for trochus shells, petroleum, and petroleum products.

- **Without quotas**: Yes. A 3% export duty is levied on exports of sugar, gold, and silver.

- **With quotas**: No.

- **Export taxes**: Yes. A 3% export duty is levied on exports of sugar, gold, and silver.

**Payments for Invisible Transactions and Current Transfers**

- **Controls on these transfers**: Yes. Except for payments above specified limits, which require RBF approval, authorized banks may approve all payments referred to as delegated bank limit. Documentary evidence is required for the equivalent of F$5,000.

- **Trade-related payments**: Yes.
**Prior approval**

- Yes. Authorized banks may remit up to the equivalent of F$1 million for airline tickets. Trade-related payments (for example, fees, services, and charges) may be approved by authorized banks up to the equivalent of, F$1 million an invoice. Lease payments may be approved by authorized banks up to F$500,000 a year and imports of lubricant/engine oil/hydraulic oil up to F$100,000 an invoice. Larger amounts require RBF approval.

**Quantitative limits**

- No.

**Indicative limits/bona fide test**

- Yes. Insurance payments up to F$100,000 are delegated to licensed brokers. Higher amounts require approval by the RBF Insurance Unit, whereupon insurance transfers are fully delegated to authorized banks.

**Investment-related payments**

- Yes.

**Prior approval**

- Yes. As of April 2, 2020, transfers of profits and dividends and withdrawal of investments require RBF approval.

**Quantitative limits**

- Yes. As of April 2, 2020, payment of interest and principal is allowed up to F$50,000 as per scheduled repayment. Authorized banks may approve payments for commissions and royalties up to the equivalent of F$1 million. Payments exceeding these limits require RBF approval.

**Indicative limits/bona fide test**

- Yes.

**Payments for travel**

- Yes.

**Prior approval**

- No.

**Quantitative limits**

- Yes. Exports are allowed up to the amount declared at the time of arrival. Residents may take out up to the equivalent of F$10,000 in foreign currency for each overseas round trip and up to the equivalent of F $5,000 for each overseas one-way trip without RBF approval.

**Indicative limits/bona fide test**

- Yes. Supporting travel documents are required.

**Personal payments**

- Yes.

**Prior approval**

- Yes. Approval is required for payments exceeding the delegated limits.

**Quantitative limits**

- Yes. Authorized banks may pay an institution directly up to the equivalent of F$100,000 for medical or education expenses. The maximum payment for education expenses to an individual is F$20,000; the maximum for medical expenses to an individual is F$50,000. The maximum authorized banks may approve for personal remittances, including wedding expenses, gifts, and family maintenance, which is F$2,000. For lottery tickets and miscellaneous expenses, it is F$500 a person a year. Payments above these limits will require Reserve Bank approval.

**Indicative limits/bona fide test**

- Yes. The beneficiary must hold a valid visa overseas.

**Foreign workers' wages**

- Yes.

**Prior approval**

- No.

**Quantitative limits**

- No.

**Indicative limits/bona fide test**

- Yes. As of April 2, 2020, $50,000 was delegated to ADs for wages paid in foreign currency to foreigners, especially those working in the fishing industry. Amounts above $50,000 will require Reserve Bank approval.
Credit card use abroad: Yes.

**Prior approval**: No.

**Quantitative limits**: Yes. As of April 2, 2020, credit card repayments are delegated to ADs as follows: for individuals F$5,000 a month; for corporate cards F$10,000 a month; and for foreign currency cash withdrawals by resident credit card holders F$1,500 a month.

As of April 2, 2020, debit card payments are limited to F$2,000 a month. Higher amounts require RBF approval. Credit and debit cards funded from an external account are not subject to the monthly limits.

**Indicative limits/bona fide test**: No.

Other payments: Yes.

**Prior approval**: No.

**Quantitative limits**: Yes. ADs may approve the full amount for alimony and court-ordered payments. Out of court settlements will require Reserve Bank approval. The limit on payment for subscriptions is F$20,000 per annum. Higher amounts will require Reserve Bank approval.

**Indicative limits/bona fide test**: No.

### Proceeds from Invisible Transactions and Current Transfers

**Repatriation requirements**: Yes. Proceeds payable to a resident must be repatriated to Fiji within 6 months. 100% proceeds payable to a resident must be repatriated to Fiji unless Reserve Bank approval is obtained to retain the funds offshore.

**Surrender requirements**: Yes.

- **Surrender to the central bank**: No.
- **Surrender to authorized dealers**: Yes. Residents are required to sell all their foreign currency receipts to an ADs within one month of their return from travel abroad.

**Restrictions on use of funds**: No.

### Capital Transactions

**Controls on capital transactions**: Yes.

**Repatriation requirements**: Yes. Proceeds payable to a resident must be repatriated to Fiji within 6 months. 100% proceeds payable to a resident must be repatriated to Fiji unless Reserve Bank approval is obtained to retain the funds offshore.

**Surrender requirements**: No.

- **Surrender to the central bank**: No.
- **Surrender to authorized dealers**: No.

**Controls on capital and money market instruments**: Yes.

**On capital market securities**: Yes.

- **Shares or other securities of a participating nature**: Yes.
- **Purchase locally by nonresidents**: Yes. Approval of investments by nonresidents on the South Pacific Stock Exchange.
Exchange (for investments in listed companies) is fully delegated to ADs. The funding must originate from abroad. As of April 2, 2020, withdrawal of investment (sale of shares or assets) by nonresidents requires RBF approval.

As of April 2, 2020, investments abroad by individuals, companies, the Fiji National Provident Fund, and other nonbank financial institutions continue to be determined by the RBF on a case-by-case basis, based on the outlook for reserves.

Nonresident-controlled companies may borrow up to F$10 million locally but must adhere to the 3:1 total-debt-to-equity ratio (exceptions require RBF approval). Total debt includes local and foreign borrowing, and equity includes paid-up capital, shareholders’ non-interest-bearing loans, retained earnings, and subordinated interest-bearing loans. Authorized banks may lend up to F$2 million per company per annum in foreign currency loans. The $2m borrowing only applies to companies.

These transactions are allowed up to F$5 million a borrower. RBF approval is required for offshore borrowing exceeding F$5 million a borrower. This is not a monthly or annual limit, but an overall limit per borrower. Any subsequent amount over this limit, RBF approval must be obtained.

Nonresident-controlled entities may borrow locally up to F$10 million, but must adhere to the 3:1 total-debt-to-equity ratio (exceptions require RBF approval). Total debt includes local and foreign borrowing, and equity includes paid-up capital, shareholders’ non-interest-bearing loans, retained earnings, and subordinated interest-bearing loans. Nonresident individuals may borrow up to the full amount to purchase property for tourism projects (acquisition of vacant land and constructed units, villas, etc.) but must adhere to the 3:1 total-debt-to-equity ratio and must settle their purchase in Fiji. Nonresidents may borrow up to the full amount to finance construction of residences but must adhere to the 3:1 total-debt-to-equity ratio. Equity includes the amount invested from abroad in the acquisition of land. Nonresidents may borrow up to F$200,000 to finance house maintenance and repairs but must adhere to the 3:1 total-debt-to-equity ratio. Equity includes the amount invested from abroad in the acquisition of property. Nonresidents may not borrow locally to buy vacant land without plans for development. Nonresidents may borrow locally 50% of the total cost of their residence to finance its acquisition. Authorized banks may lend up to F$2 million per company per annum in foreign currency.

These transactions are allowed up to F$5 million per borrower. RBF approval is required for offshore borrowing exceeding F$5 million a borrower. This an overall limit per borrower. Any subsequent amount over this limit, RBF approval must be obtained.

Bank guarantees on trade-related transactions are fully delegated to commercial banks. For other types of guarantees, RBF approval is required if the guarantees will result in future outflows in the event of default. RBF approval is required if there is a charge over a Fiji asset.
Controls on direct investment

Outward direct investment

Yes. As of April 2, 2020, investment abroad by individuals, companies, the Fiji National Provident Fund, and other nonbank financial institutions is suspended. Requests by the Fiji National Provident Fund, other nonbank financial institutions, and companies are determined by the RBF on a case-by-case basis. The first approval was granted on June 9, 2021, to the Fiji National Provident Fund.

Inward direct investment

Yes. Foreign investment must be financed from nonresident sources and must be registered with the RBF to facilitate repatriation of dividends and capital. As of April 2, 2020, transfers of profits and dividends require RBF approval.

Controls on liquidation of direct investment

Yes. As of April 2, 2020, approval is required for the withdrawal of investments. Approval is required for nonresident-owned companies to repatriate the proceeds from sales of assets and capital gains on investments.

Controls on real estate transactions

Yes. The purchase of personal property abroad for investment purposes is not permitted.

Purchase abroad by residents

Yes. Approval by the Ministry of Lands and the Native Land Trust Board is required for purchases of state-owned property and designated Native Lease properties. Settlements offshore of sales transactions in which both parties are nonresidents require RBF permission.

Purchase locally by nonresidents

Yes. Approval by the Ministry of Lands and the Native Land Trust Board is required for purchases of state-owned property and designated Native Lease properties. Settlements offshore of sales transactions in which both parties are nonresidents require RBF permission.

Sale locally by nonresidents

Yes. There are controls on settlements to safeguard local interests before proceeds from sales may be remitted abroad.

Controls on personal capital transactions

Yes.

Loans

Yes. Personal loans to nonresident individuals are delegated to authorized banks, up to F$100,000. Locally borrowed funds may be remitted abroad for medical, education, and travel needs. Reserve Bank approval is required for the remittance offshore. These are still valid after the tightening of controls on April 2, 2020.

By residents to nonresidents

Yes. As of April 2, 2020, offshore investment was suspended, including the delegation to open foreign currency accounts.

To residents from nonresidents

Yes. Repayment is subject to current exchange control guidelines.

Gifts, endowments, inheritances, and legacies

Yes.

By residents to nonresidents

Yes. The limit for the transfer of gifts, maintenance, and wedding expenses to nonresidents is F$2,000 or its equivalent. RBF approval may be granted for larger amounts.

To residents from nonresidents

No.

Settlement of debts abroad by immigrants

No. External accounts are accounts in Fiji currency that are held by nonresidents with authorized banks. If the immigrant maintains an external account, then there are no restrictions on the transfer of funds offshore from an external account.

Reserve Bank approval is required if settlement of debt is sourced from a resident account.

Transfer of assets

Yes.

Transfer abroad by emigrants

Yes. As of April 2, 2020, ADs may approve emigration allowances up to F$150,000 a family a year, except those funded by government pension funds, for which approval is fully delegated to ADs.

</tbody>
</table>
The exchange rate arrangement of the euro area is free floating. Finland participates in a currency union (EMU) with 18 other members of the EU and has no separate legal tender. The ECB publishes information regarding its interventions; it last intervened in March 2011. When it intervenes, the ECB intervenes at the quotes of the market makers.

Euro foreign exchange reference rates are based on a regular daily concordation procedure between CBs across Europe and worldwide, which normally takes place at 2:15 p.m. Central European Time. On July 1, 2016, the ECB changed the publication time of the euro foreign exchange reference rates (ECB reference rates) from around 2.30 p.m. Central European Time to around 4.00 p.m. Central European Time. The reference rate against the euro is the average of the buying and selling rates. The publication regime aims to reinforce the distinction between exchange rate fixings used as benchmarks for transaction purposes and the ECB reference rates that are published for information purposes only.

Inflation target
To maintain price stability is the primary objective of the Eurosystem and of the single monetary policy for which it is responsible. This is stated in the Treaty on the Functioning of the European Union, Article 127(1). “Without prejudice to the objective of price stability,” the Eurosystem will also “support the general economic policies in the Community with a view to contributing to the achievement of the objectives of the Community.” These include a “high level of employment” and “sustainable and non-inflationary growth.” Price stability is defined as, effective July 7, 2021, a symmetric 2% inflation target over the medium term. (Previously, it was defined as inflation below but close to 2%).

ADs may freely determine their exchange rates and foreign exchange commissions in transactions with their clients. Foreign exchange bureaus are not subject to licensing by any Finnish authority if they are engaged only in exchanging currencies without the use of derivatives. Foreign exchange bureaus are not allowed to conduct transactions with the CB.
Operated by the central bank  No.
Foreign exchange standing facility  No.
Allocation  No.
Auction  No.
Fixing  No.

Interbank market  Yes.  Finland is part of the euro-area-wide interbank market. There are no limits on the bid-ask spreads and commissions of market participants.
Over the counter  Yes.  The foreign exchange market operates across the euro area.
Brokerage  Yes.  The foreign exchange market operates across the euro area.
Market making  No.
Forward exchange market  Yes.  The foreign exchange market operates across the euro area.

Official cover of forward operations  No.

There are no exchange controls. Import licensing is administered by the National Board of Customs. Export licensing relating to international export control regimes is administered by the trade department or foreign trade division of the Ministry of Trade and Industry.
Official No.

Private No.

Controls on trade in gold (coins and/or bullion)

On domestic ownership and/or trade No.

On external trade No.

Controls on exports and imports of banknotes No. In accordance with Regulation (EC) No. 1889/2005, cash controls have been implemented based on a mandatory declaration system for amounts of cash entering or leaving the EU with a value of €10,000 or more. Travelers entering or leaving the EU and carrying more than €10,000 are required to make a declaration to the relevant authorities of the member country through which they enter or leave the EU.

The authorities must keep a record of such information and report it to their national FIU. The obligation to declare is not fulfilled if the traveler makes no declaration or if the information provided is incorrect or incomplete. To check compliance with the regulation, the national authorities have the right to search natural persons, their baggage, and their means of transportation. In the event of failure to comply with the declaration obligation, cash may be confiscated. The EU regulation requires member countries to impose penalties for failure to comply with the declaration obligation. If there are indications that cash is related to illegal activity, authorities of one member country may exchange information with authorities in other member countries. Under the framework of existing agreements on mutual administrative assistance, information obtained under the EU regulation may also be communicated to a third country in compliance with relevant national and EU provisions on the transfer of personal data to third countries. The EU regulation does not apply to physical cross-border transportation from one EU member country to another (that is, intra-EU transportation). Such transportation is not considered “cross-border” for the purposes of the EU regulation; the EU regulation only harmonizes the system for the EU’s external borders.

On exports No.

Domestic currency No. In accordance with Regulation (EC) No. 1889/2005, cash controls have been implemented based on a mandatory declaration system for amounts of cash entering or leaving the EU with a value of €10,000 or more. Travelers entering or leaving the EU and carrying more than €10,000 are required to make a declaration to the relevant authorities of the member country through which they enter or leave the EU.

Foreign currency No. In accordance with Regulation (EC) No. 1889/2005, cash controls have been implemented based on a mandatory declaration system for amounts of cash entering or leaving the EU with a value of €10,000 or more. Travelers entering or leaving the EU and carrying more than €10,000 are required to make a declaration to the relevant authorities of the member country through which they enter or leave the EU.

On imports No.

Domestic currency No. In accordance with Regulation (EC) No. 1889/2005, cash controls have been implemented based on a mandatory declaration system for amounts of cash entering or leaving the EU with a value of €10,000 or more. Travelers entering or leaving the EU and carrying more than €10,000 are required to make a declaration to the relevant authorities of the member country through which they enter or leave the EU.

Guarantees, sureties, and financial backup facilities
By residents to nonresidents No.
To residents from nonresidents No.
Controls on direct investment Yes.
Inward direct investment Yes.
Outward direct investment No.

Controls apply to (1) the establishment of branches of non-EU companies, unless authorized; (2) investment by non-EU residents in a company engaged in activities involving the use of nuclear energy or nuclear materials, unless authorized; (3) investment in enterprises operating an airline; airlines established in Finland must be majority owned and effectively controlled by EU members and/or citizens of EU members, unless otherwise provided for through an international agreement to which the EU is a signatory; (4) acquisition of 40% or more in Finnish flag vessels, including fishing vessels, except through a company incorporated in Finland or if authorization is granted by the Ministry of Transport and Communication; these controls do not apply to EU residents who own 60% or more of a vessel and have their central place of management or principal place of business in an EU member; (5) establishment—that is, construction—and acquisition of real property on the Aaland Islands by legal or natural persons who do not have regional citizenship in Aaland without permission of the relevant Aaland Island authorities; (6) investment by a non-EU citizen in a corporation or partnership providing certain legal services; (7) investment in an auditing company by a person not authorized as an auditor in the EU that gives the person majority voting rights in the company; and (8) the extent that under EU Directive 85/611/EEC, a depository of UCITS must have its registered office either in the same EU country as that of the company or be established in the EU country if its registered office is in another EU country. Foreign corporate acquisitions in the field of defense, dual-use, and security are subject to advance confirmation from the Ministry of Economic Affairs and Employment. Other corporate acquisitions considered critical for securing vital functions of society are subject to voluntary notification by the foreign owner, but at the request of the Ministry, the foreign owner is obliged to provide all information necessary for examining the matter.

In defense and dual-use sector, screening covers all foreign owners, including EU/EFTA investors. Regarding other corporate acquisitions, screening covers only foreign owners that are domiciled outside EU/EFTA countries. Corporate acquisition refers to activities as a result of which a foreign owner gains control of at least one-tenth, one-third, or one-half of the votes conferred by all shares in the target company or a corresponding actual influence over the target company.

Regulation (EU) No. 2019/452 established an EU-wide framework for FDI screening and for the European Commission and the Member States to coordinate their actions on foreign investments.

Controls on liquidation of direct investment No.
Controls on real estate transactions Yes.
Purchase abroad by residents Yes. There are no limitations concerning life- and non-life-insurance

| Restrictions and/or multiple currency practices | No. |
| Exchange measures imposed for security reasons | Yes. |
| In accordance with IMF Executive Board Decision No. 144-(52/51) | Yes. |

In accordance with the relevant UNSC resolutions and EU regulations, certain restrictions are maintained on the making of certain payments and transfers for current international transactions with respect to the following:

- Belarus: (1) origin: implementation of EU measures; (2) nature of the restrictions: (a) freeze on the assets of certain individuals and entities; (b) military and paramilitary embargo; and (c) embargo on goods intended for internal repression.
- Myanmar: (1) origin: implementation of EU measures; (2) nature of the restrictions: (a) freeze on the assets of certain individuals and entities; (b) military and paramilitary embargo; (c) embargo on goods intended for internal repression; and (d) embargo on industrial sectors constituting sources of funding for the regime (wood and gems). Most of the restrictions are suspended because of political changes in the country.
- Bosnia and Herzegovina: (1) origin: implementation of EU measures; (2) nature of the restrictions: (a) freeze on the assets of certain individuals and entities;
- Central African Republic: (1) origin: implementation of mix of UNSC resolutions and additional EU measures; (2) nature of the restrictions: (a) freeze on the assets of persons and entities responsible for threatening peace and stability of the Central African Republic and for involving children in wars; and (b) military and paramilitary embargo.
- Democratic Republic of the Congo: (1) origin: implementation of mix of UNSC resolutions and additional EU measures; (2) nature of the restrictions: (a) freeze on the assets of certain individuals and entities; and (b) military and paramilitary embargo.
- Guinea: (1) origin: implementation of EU measures; (2) nature of the restrictions: (a) freeze on the assets of certain individuals and entities; and (b) military and paramilitary embargo.
- Guinea-Bissau: (1) origin: implementation of EU measures; (2) nature of the restrictions: (a) freeze on the assets of certain persons.
- Islamic Republic of Iran: (1) origin: implementation of mix of UNSC resolutions and additional EU measures; (2) nature of the restrictions: (a) freeze on the assets of certain individuals and entities; (b) military and paramilitary embargo; (c) embargo on goods intended for internal repression; (d) embargo on goods and services related to nuclear proliferation and to ballistic vectors; (e) embargo on technologies related to the oil industry; (f) implementation of
strengthened financial monitoring measures; and (g) prior administrative approval of financial transactions over €40,000. An interim agreement signed with Iran allows the suspension of some restrictions from January 2014 until July 2014 (renewable).

Democratic People’s Republic of Korea: (1) origin: implementation of EU measures; (2) nature of the restrictions: (a) freeze on the assets of certain individuals and entities; (b) military and paramilitary embargo; (c) embargo on goods and services related to nuclear proliferation and to ballistic vectors; and (d) embargo on luxury goods.

Effective October 21, 2022, restrictive measures were imposed in view of the situation in Haiti (Resolution (UNSC) No. 2653 (2022) and subsequent resolutions (Council Regulation (EU) No. 2022/2309 and Council Decision (CFSP) No. 2022/2319)).

Lebanon (persons responsible for the assassination of former Lebanese Prime Minister Rafik Hariri): (1) origin: EU measures; (2) nature of the restrictions: (a) asset freeze.

Liberia (former government): (1) origin: implementation of UNSC resolutions and additional EU-specific measures; (2) nature of the restrictions: (a) freeze on the assets of certain individuals and entities; (b) military and paramilitary embargo; and (c) implementation of the Kimberley Process Certification Scheme (KPCS).

Libya (former government): (1) origin: implementation of mix of UNSC resolutions and additional EU measures; (2) nature of the restrictions: (a) freeze on the assets of certain individuals and entities; (b) military and paramilitary embargo; and (c) embargo on goods related to internal repression. Restrictions will be canceled on request from the government of Libya.

Russian Federation: (1) origin: implementation of EU measures; (2) nature of the restrictions: (a) freeze on the assets of certain individuals and entities; (b) embargo on dual-use goods and technologies; (c) restrictions on financial services.

Somalia: (1) origin: implementation of mix of UNSC resolutions and additional EU measures; (2) nature of the restrictions: (a) freeze on the assets of certain individuals and entities; and (b) military and paramilitary embargo.

Sudan: (1) origin: implementation of mix of UNSC resolutions and additional EU measures; (2) nature of the restrictions: (a) military and paramilitary embargo.

Sudan and South Sudan: (1) origin: implementation of mix of UNSC resolutions and additional EU measures; (2) nature of the restrictions: (a) military and paramilitary embargo.

Syria: (1) origin: implementation of EU measures; (2) nature of the restrictions: (a) freeze on the assets of certain individuals and entities; (b) military and paramilitary embargo; (c) embargo on goods related to internal repression; and (d) embargo on oil.

Tunisia (former government): (1) origin: EU measures; (2) nature of the restrictions: freeze on the assets of individuals responsible for misappropriation of government funds.

Ukraine (former government): (1) origin: implementation of EU measures; (2) nature of the restrictions: freeze on the assets of certain individuals and entities responsible for misappropriation of government funds.

Donetsk and Luhansk regions: (1) origin: implementation of EU measures; (2) nature of the restrictions: (a) embargo on goods from...
this regions, (b) embargo to Donetsk and Luhansk on goods and technologies that can be used in the sectors of transport, telecommunications, energy, prospecting, exploration, and production of oil, gas, and mining.

Council Regulation (EU) No. 269/2014 of March 17, 2014, concerning restrictive measures in respect of actions undermining or threatening the territorial integrity, sovereignty, and independence of Ukraine.

Venezuela: (1) origin: implementation of EU measures; (2) nature of the restrictions: (a) freeze on the assets of certain individuals and entities; (b) military and paramilitary embargo; (c) embargo on goods related to internal repression;

Yemen: (1) origin: implementation of EU measures; (2) nature of the restrictions: (a) freeze on the assets of certain individuals and entities; (b) military and paramilitary embargo;

Zimbabwe: (1) origin: implementation of EU measures; (2) nature of the restrictions: (a) freeze on the assets of certain individuals and entities; (b) military and paramilitary embargo; and (c) embargo on goods related to internal repression.

Taliban terrorist asset freeze: (1) origin: implementation of UN measures (Resolution No. 1988); (2) freeze on the assets of individuals.

Al-Qaida terrorist asset freeze: (1) origin implementation of UN measures (Resolution No. 1988); (2) freeze on the assets of individuals.

Afghanistan terrorist asset freeze: (1) origin: implementation of UN measures; (2) freeze on the assets of individuals.

EU external action on terrorist asset freeze: (1) origin: implementation of mix of UNSC resolutions and additional EU measures; (2) freeze on the assets of individuals (Regulation (EU) No. 2580/2001 and Regulation (EU) No. 201/1686).

Burundi: Council Regulation (EU) No. 2015/1755 of October 1, 2015, concerning restrictive measures in view of the situation in Burundi;

Cyber-attacks:
Council Regulation (EU) No. 2019/796 of May 17, 2019, concerning restrictive measures against cyber-attacks threatening the Union or its Member States;

**Exchange Arrangement**

**Currency**
Yes. The currency of France is the euro.

**Other legal tender**
No.

**Exchange rate structure**

Unitary
Yes.

Dual

Multiple

**Classification**

No separate legal tender

Currency board

Conventional peg

Stabilized arrangement

Crawling peg

Crawl-like arrangement
The exchange rate arrangement of the euro area is free floating. France participates in a currency union (EMU) with 18 other members of the EU and has no separate legal tender. The ECB publishes information regarding its interventions; it last intervened in March 2011. When it intervenes, the ECB intervenes at the quotes of the market makers.

The ECB publishes a reference rate based on the daily concertation procedure between CBs within and outside the European System of CBs. The publication time of the euro foreign exchange reference rates is around 14:30 Central European Time to around 16:00 Central European Time. The reference rate against the euro is the average of the buying and selling rates.
To maintain price stability is the primary objective of the Eurosystem and of the single monetary policy for which it is responsible. This is stated in the Treaty on the Functioning of the European Union, Article 127(1). “Without prejudice to the objective of price stability,” the Eurosystem will also “support the general economic policies in the Community with a view to contributing to the achievement of the objectives of the Community.” These include a “high level of employment” and “sustainable and non-inflationary growth.”

Effective July 7, 2021, price stability is defined as a symmetric 2% inflation target over the medium term. Previously, it was defined as inflation below but close to 2% over the medium term.
transaction, provided it is denominated in a different currency.” To conduct money transfer activities, companies must either obtain a license to operate as a credit, electronic money, or payment institution or be an agent of an authorized credit, electronic money, or payment institution. The ACPR is in charge of on-site and off-site control of currency exchange offices’ compliance with the Anti-Money Laundering/Combating the Financing of Terrorism regulations. Accounts in foreign countries are not prohibited. Currency exchange offices submit to the ACPR their total foreign currency sales and purchases annually.

Operated by the central bank  No.
Foreign exchange standing facility  No.
Allocation  No.
Auction  No.
Fixing  No.

Interbank market  Yes.

There are no limits on the bid-ask spreads and commissions of market participants. As of December 31, 2021, there were five major French banking groups active in the interbank foreign exchange market in France. In addition, subsidiaries of foreign banks provide quotes for foreign exchange transactions. The CB intervenes directly with market participants at their quoted rates.

Over the counter  Yes.
The foreign exchange market operates over the counter.

Brokerage  Yes.
Brokerage is used marginally.

Market making  Yes.
The interbank foreign exchange market operates on the basis of a market-making agreement, under which participants commit to a maximum spread and a minimum amount to trade.

Forward exchange market  Yes.
All residents, including private persons, may purchase and sell foreign exchange forward without restriction. Forward sales of foreign currency are not restricted, whether or not they are for hedging purposes. The Bank of France participates in the foreign exchange market on its own account. Under Article L151-2 of the Monetary and Financial Code, the government may, in the national interest, by decree subject to authorization, control, or declaration regulate exchange operations between France and foreign countries.

Official cover of forward operations  No.

Arrangements for Payments and Receipts

Prescription of currency requirements  No.

Controls on the use of domestic currency  No.

For current transactions and payments  No.

For capital transactions  No.

Transactions in capital and money market instruments  No.
Transactions in derivatives and other instruments  No.
Credit operations  No.

Use of foreign exchange among residents  No.
The Ministry of Economy and Finance is the coordinating agency for financial relations with foreign countries. It is responsible for all matters relating to inward and outward direct investment and has authority over matters relating to insurance, reinsurance, annuities, and so on. The execution of all transfers has been delegated to registered banks and stockbrokers and to the postal administration.

In accordance with Regulation (EU) No. 1889/2005, cash controls have been implemented based on a mandatory declaration system for amounts of cash (domestic or foreign currency) entering or leaving the EU with a value of €10,000 or more. Travelers entering or leaving the EU and carrying more than €10,000 are required to make a declaration to the relevant authorities of the member country through which they enter or leave the EU. The authorities must keep a record of such information and report it to their national FIU. The obligation to declare is not fulfilled if the traveler makes no declaration or if the information provided is incorrect or incomplete. To check compliance with the regulation, the national authorities have the right to search natural persons, their baggage, and their means of transportation. In the event of failure to comply with the declaration obligation, cash may be confiscated. The EU regulation requires member countries to impose penalties for failure to comply with the declaration obligation. If there are indications that cash is related to illegal activity, authorities of one member country may exchange information with authorities in other member countries. Under the framework of existing agreements on mutual administrative assistance, information obtained under the EU regulation may also be communicated to a third country in compliance with relevant national and EU provisions on the transfer of personal data to third countries. The EU regulation does not apply to physical cross-border transportation from one EU country to another (that is, intra-EU transportation). Such transportation is not considered “cross-border” for the purposes of the EU regulation; the EU regulation only harmonizes the system for the EU’s external borders.
At the request of Algeria, Morocco, and Tunisia, banknotes issued by these countries may not be exchanged in France. For Algeria and Morocco, the importation/exportation of currency is possible with limit, while for Tunisia, it is generally forbidden.

**Resident Accounts**

- **Foreign exchange accounts permitted**: Yes.
- **Held domestically**: Yes. The rules are the same as for domestic currency accounts.
- **Approval required**: No.
- **Held abroad**: Yes. Tax declaration is mandatory.
- **Approval required**: No.
- **Accounts in domestic currency held abroad**: Yes.
- **Accounts in domestic currency convertible into foreign currency**: Yes.

**Nonresident Accounts**

- **Foreign exchange accounts permitted**: Yes.
- **Approval required**: No.
- **Domestic currency accounts**: Yes.
- **Convertible into foreign currency**: Yes.
- **Approval required**: No.
- **Blocked accounts**: No.

**Imports and Import Payments**

- **Foreign exchange budget**: No.
- **Financing requirements for imports**: No.
- **Minimum financing requirements**: No.
- **Advance payment requirements**: No.
- **Advance import deposits**: No.
- **Documentation requirements for release of foreign exchange for imports**: No.
- **Domiciliation requirements**: No.

</tr>
</tbody>
</table>
vessel, except through a company incorporated in the EU; moreover, citizens of countries that are not EU members may not engage in cabotage; (4) the establishment of branches of insurance companies not headquartered in the EU, which are subject to special authorization with respect to their representatives and to specific requirements relating to the deposit, withdrawal, and transfer of funds; (5) the extent that under EU Directive No. 2009/65/EC, a depository of a UCITS must either have its registered office in the same EU country as that of the company or be established in the EU country if its registered office is in another EU country; and (6) the acquisition by non-EU residents of more than 20% in the voting rights or the authorized capital of a company holding a license for radio or television services via terrestrial hertzian channels broadcast in French.

Moreover, pursuant to Articles L.151-1 and R.151-1 et seq. of the financial and monetary code, foreign investments in France in sectors listed in Article R.151-3 of the financial and monetary code which are likely to jeopardize public order, public security, or national defense interests are subject to prior approval from the Minister for the Economy. There are three categories of sectors: (1) Inherently sensitive activities that fall mainly within the defense and security sectors; (2) Activities relating to infrastructure, goods, and services that are essential to safeguard public order and public security, including, but not limited to, the integrity, security and continuity of energy and water supplies, transportation networks and services, public health, and food security; (3) Research and development activities that relate to critical technologies listed by Order of December 31, 2019, and to dual-use items and technologies carried out in the sectors mentioned above.

In the specific context of COVID-19 crisis, the voting rights threshold in sensitive companies which triggers screening procedure was lowered from 25% to 10%, only for listed companies and according to a special procedure. EU and EEA investors are exempted from this measure, which is set to end on December 31, 2022.

Effective January 1, 2022, in an effort to adapt the French system of FDI screening to ongoing developments and challenges in the renewable energy sector, the Order of September 10, 2021, relating to foreign investment in France added technologies involved in the production of renewable energy to the list of critical technologies.

In an effort to increase stakeholders’ understanding of the French FDI screening regulation, guidelines have been published in September 2022. These guidelines are intended to clarify the legal framework of the screening regulation.

Regulation (EU) No. 2019/452 of March 19, 2019, established an EU-wide framework for FDI screening and for the European Commission and the Member States to coordinate their actions on foreign investments.

The proceeds from liquidating FDI in France may be freely transferred abroad, provided the corresponding funds are reported to the Bank of France. The liquidation must be reported also to the Ministry of Economy and Finance within 20 days.

Credit controls: No.

Investment regulations: No.

Abroad by banks: No.

In banks by nonresidents: No.

Open foreign exchange position limits: Yes.

On resident assets and liabilities: Yes. Pursuant to European Directive No. 2013/36/EU and Regulation (EU) No. 575/2013, if the sum of an institution’s overall net foreign exchange position and net gold position, calculated as set out in Article 352, including for any foreign exchange and gold positions for which own funds requirements are calculated using an internal model, exceeds 2% of its total own funds, the institution must calculate an own funds requirement for foreign exchange risk. This requirement is the sum of its overall net foreign exchange position and net gold position in the reporting currency, multiplied by 8% (Article 351 of the above-mentioned regulation). Institutions’ own funds requirements against positions in relevant closely correlated currencies may be lower. Two currencies are deemed closely correlated if the likelihood of a loss—based on daily exchange rate data for the preceding three or five years—of 4% or less of the value of the matched position in question (in terms of the reporting currency) on equal and opposite positions in such currencies over the following 10 working days has a probability of at least 99% for a three-year observation period and of 95% for a five-year observation period. The own funds requirement on the matched position in two closely correlated currencies is 4% of the value of the matched position (Article 354 of the above-mentioned regulation).

On nonresident assets and liabilities: Yes. Pursuant to European Directive No. 2013/36/EU and Regulation (EU) No. 575/2013, if the sum of an institution’s overall net foreign exchange position and net gold position, calculated as set out in Article 352, including for any foreign exchange and gold positions for which own funds requirements are calculated using an internal model, exceeds 2% of its total own funds, the institution must calculate an own funds requirement for foreign exchange risk. This requirement is the sum of its overall net foreign exchange position and net gold position in the reporting currency, multiplied by 8% (Article 351 of the above-mentioned regulation). Institutions’ own funds requirements against positions in relevant closely correlated currencies may be lower. Two currencies are deemed closely correlated if the likelihood of a loss—based on daily exchange rate data for the preceding three or five years—of 4% or less of the value of the matched position in question (in terms of the reporting currency) on equal and opposite positions in such currencies over the following 10 working days has a probability of at least 99% for a three-year observation period and of 95% for a five-year observation period. The own funds requirement on the matched position in two closely correlated currencies is 4% of the value of the matched position (Article 354 of the above-mentioned regulation).

Provisions specific to institutional investors: Yes.

Insurance companies: Yes.

Limits (max.) on securities issued by nonresidents: No.

Limits (max.) on investment portfolio: No.
<table>
<thead>
<tr>
<th><strong>held abroad</strong></th>
<th><strong>Limits (min.) on investment portfolio held locally</strong></th>
<th>No.</th>

## GABON

*(Position as of June 30, 2022)*

### Status under IMF Articles of Agreement

<table>
<thead>
<tr>
<th>Date of membership</th>
<th>September 10, 1963.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Article VIII</td>
<td>Yes. Date of acceptance: June 1, 1996.</td>
</tr>
<tr>
<td>Article XIV</td>
<td></td>
</tr>
</tbody>
</table>

### Exchange Measures

**Restrictions and/or multiple currency practices**

Yes.

- **Exchange measures imposed for security reasons**
  - Yes. The IMF staff report for 2019 Article IV Consultation Fourth and Fifth Reviews under the Extended Arrangement under the Extended Fund Facility, and Request for Waiver of Nonobservance of Performance Criteria, and Rephasing of the Remaining Purchases with Gabon states that, as of December 4, 2019, Gabon maintained a 1.5% tax on wire transfers abroad that is not consistent with Gabon’s obligations under Article VIII, Section 2(a) of the Articles of Agreement. The proceeds of this tax are used to fund Gabon’s health insurance scheme. (Country Report No. 19/389)
  - Yes. For security reasons, Gabon supports UNSC Resolution No. 1373 to combat money laundering and terrorism financing (Regulation No. 01/03/CEMAC/UMAC/CM of April 4, 2003).

### Exchange Arrangement

**Currency**

Yes. The currency issued within the CEMAC, which is legal tender in Gabon and the other member countries, is the CFA franc.

**Other legal tender**

No.

**Exchange rate structure**

- Yes. The exchange rate arrangement of the CAMU is a conventional peg. Gabon participates in the CAMU and has no separate legal tender. The Monetary Cooperation Agreement (MCA) between the CEMAC member countries and France is based on three principles: (1) a common CB; (2) fixed parity with the euro; and (3) an unlimited convertibility guarantee. Article 16 empowers the finance ministers of signatory countries (Joint Monetary Committee) to amend the MCA. Article 17 permits signatories to renounce the agreement.
Article 18 specifies that the expulsion of a member country from the BEAC automatically results in that country’s renunciation of the MCA.

Stabilized arrangement

Crawling peg

Crawl-like arrangement

Pegged exchange rate within horizontal bands

Other managed arrangement

Floating

Free floating

Official exchange rate Yes. The CFA franc is officially pegged to the euro, the intervention currency, at a fixed rate of CFAF 655.957 per euro. The exchange rate is fixed by Article 12 of the MCA of November 23, 1972, between the BEAC and France, which states that the par value may be modified following consultation among the signatory countries (BEAC members and France), taking into account the demands of the economic and financial situation of the member countries. Exchange transactions in euros between the BEAC and commercial banks are made at this rate. Buying and selling rates for certain other foreign currencies are also listed officially based on the fixed rate for the euro and the rates for these foreign currencies prevailing in the Paris foreign exchange market. The official rate is used for accounting and valuation.

Monetary policy framework

Transfers of funds with the rest of the world are subject to transfer fees determined freely by the market but not exceeding 1%, excluding any other special tax. Licensed intermediaries may effect transfers with the rest of the world through the BEAC. Within the CEMAC, transfers of funds are subject to transfer fees determined freely by the market but not exceeding 0.25%, excluding the VAT and any other special tax.

Licensed intermediaries, who set their own exchange rates with their customers for currencies other than the euro, may freely conduct foreign exchange transactions with their customers. The BEAC’s OTC foreign exchange transactions are conducted exclusively with national public accountants and treasuries. In Gabon, nine banks are licensed to conduct foreign exchange transactions with the public.

An operations account links all the countries with the French Treasury. All purchases and sales of foreign currencies and euros in exchange for CFA francs are ultimately settled by a debit or credit to the operations account. Governments may maintain foreign currency deposits related to oil reserves at commercial banks and use them to meet their external debt service obligations. Exchange regulations in the CEMAC member countries are harmonized.

**Clearing agreements**

| Barter agreements and open accounts | No. |

There is no formal clearing agreement between any CEMAC country and other countries. Nor are there any regulatory provisions governing this mechanism. In practice, however, some countries may receive production or capital goods from abroad in exchange for financial flows.

**Administration of control**

| Payments arrears | No. |

Administration of the foreign exchange regulations is the responsibility of the MOFs of the CEMAC countries, which may delegate all or a portion of their authority to the BEAC, the COBAC, and licensed intermediaries. For example, authority is delegated to licensed intermediaries to carry out transactions with the rest of the world. They must verify the validity of transactions, collect statistics, and report these activities to the monetary authorities. However, certain types of transactions may not be delegated. The BEAC supervises the exchange regulations; evaluates foreign exchange hedging operations; reviews requests for approval of opening of foreign exchange accounts by resident legal entities; and monitors the repatriation of export proceeds. The COBAC ensures that licensed intermediaries comply with certain provisions of these regulations, especially to prevent weakening of the CEMAC banking system.

**Payments arrears**

</table>

### On imports

| On imports                                   | Yes. | CFA francs issued by the BEAC may not be imported from countries outside the CEMAC. However, arriving resident travelers may have in their possession up to CFAF 5 million. |
| Domestic currency                            | Yes. | CFA francs issued by the BEAC may not be imported from countries outside the CEMAC. However, arriving resident travelers may have in their possession up to CFAF 5 million. |
| Foreign currency                             | No.  | Resident and nonresident travelers crossing CEMAC borders must, on entry, declare foreign currency, securities, or instruments valued at more than CFAF 5 million to the customs authorities. |

### Foreign currency accounts permitted

| Foreign exchange accounts permitted          | Yes. | Residents may not open foreign exchange accounts in local banks. However, the BEAC may allow resident legal entities to open foreign exchange accounts. These accounts may not be credited with CFA francs or with debits from CFA franc accounts. |
| Held domestically                            | Yes. | Residents may not open foreign exchange accounts in local banks. However, the BEAC may allow resident legal entities to open foreign exchange accounts. These accounts may not be credited with CFA francs or with debits from CFA franc accounts. |
| Approval required                            | Yes. | The BEAC may allow certain resident legal entities to open foreign exchange accounts. These accounts may not be credited with CFA francs or with debits from CFA franc accounts. Balances may be transferred abroad freely. The authorization to open bank accounts in foreign currency is granted by the BEAC. Generally, the BEAC’s approval is given when the entity in question cannot easily carry out all its operations with accounts in CFA francs only or when a financial arrangement following an external financial contribution requires the opening of foreign currency accounts. |
| Held abroad                                  | Yes. | Resident legal entities, except credit institutions, are prohibited from opening foreign currency bank accounts outside the CEMAC in accordance with Regulation No. 02/18/CEMAC/UMAC/CM of December 21, 2018. However, the BEAC may allow a resident legal entity to open a foreign currency account outside the CEMAC in accordance with the terms and conditions set out in a BEAC directive in June 10, 2019. |
In general, when resident entities borrow abroad and the lenders require foreign currency accounts to be established, these are authorized by the BEAC.

| Approval required | Yes. | The BEAC may allow a resident legal entity to open a foreign currency account outside the CEMAC in accordance with the terms and conditions set out in a BEAC directive in June 2019. |
| Accounts in domestic currency held abroad | Yes. | Accounts in domestic currency held abroad are permitted. |
| Accounts in domestic currency convertible into foreign currency | No. | |

### Nonresident Accounts

| Foreign exchange accounts permitted | Yes. | There are no restrictions on the opening of nonresident foreign exchange accounts within the CEMAC. Licensed intermediaries may open such accounts for any nonresident, on request, provided they inform the monetary authorities. Such accounts may not be overdrawn. |
| Approval required | No. | |
| Domestic currency accounts | Yes. | There are no restrictions on the opening of nonresident CFA franc accounts within the CEMAC. Licensed intermediaries may open such accounts for nonresidents, on request, provided they inform the monetary authorities. Such accounts may not be overdrawn. |
| Convertible into foreign currency | No. | Nonresidents may not convert the balances of their domestic currency accounts to foreign currency or transfer them abroad. |
| Approval required | No. | |
| Blocked accounts | No. | |

### Imports and Import Payments

| Foreign exchange budget | No. | The exchange regulations do not limit access to foreign exchange. Payments for imports must be made regularly through licensed intermediaries. |
| Financing requirements for imports | No. | Economic agents may freely enter into commercial contracts with their partners abroad. These contracts are executed through the banking system, subject to compliance with the exchange regulations. |
| Minimum financing requirements | No. | There are no financing requirements. |
| Advance payment requirements | No. | |
| Advance import deposits | No. | |
| Documentation requirements for release of foreign exchange for imports | Yes. | For import payments of less than CFAF 100 million, the licensed intermediary must obtain a pro forma or original invoice, a bill of lading, or the commercial contract, along with the most recent tax receipt or a professional license. Payments of more than CFAF 100 million must be settled through a licensed intermediary, which must check the supporting documents. Legally registered legal entities and declared or certified professionals may be exempt from the requirement to produce supporting documents, provided they submit an annual estimate of imports corroborated by a business forecast. |
| Domiciliation requirements | Yes. | Imports valued at more than CFAF 5 million must be domiciled with a resident licensed intermediary. |
| Preshipment inspection | Yes. | There are no specific provisions for inspections at the CEMAC level. The member countries may freely apply their own regulations in this regard. |
### Letters of credit
- **No.**

The use of LCs by economic agents for the settlement of transactions is allowed but optional.

### Import licenses used as exchange licenses
- **No.**

Import licenses are not used in the CEMAC countries to restrict the availability of foreign exchange for legitimate trade, as defined in the Compilation Guide. When such licenses exist, they are used for trade policy purposes.

### Other
- **Yes.**

For import payments of less than CFAF 100 million, the licensed intermediary must obtain a pro forma or original invoice, a bill of lading, or the commercial contract, along with the most recent tax receipt or a professional license (registration number, professional ID card, extract from the commercial registry, or tax clearance). Payments of more than CFAF 100 million must be settled through a licensed intermediary, which must check the supporting documents. Legal entities and certified professionals can no longer use annual estimates of imports and must produce all supporting documents to carry out transactions.

### Exports and Export Proceeds

#### Repatriation requirements
- **Yes.**

Export-related transactions must be reported to the appropriate administrative authorities, and all those exceeding CFAF 5 million must be domiciled at a licensed CEMAC bank. Export proceeds originating in non-CEMAC countries must be collected and repatriated immediately, through the domiciling bank, with the BEAC acting as intermediary.

#### Surrender requirements
- **Yes.**

- **Surrender to the central bank**
  - Yes.

  Export proceeds collected in foreign currencies must be surrendered to the BEAC within 3 days of collection.

- **Surrender to authorized dealers**
  - No.

#### Financing requirements
- **No.**

Economic agents and their partners abroad may enter freely into commercial contracts, which are executed through the banking system, subject to compliance with the exchange regulations. There are no financing requirements.
## Documentation requirements

Transactions related to exports to non-CEMAC countries valued at more than CFAF 5 million must be domiciled with a local licensed bank. Each domiciliation file must contain an export contract, a foreign exchange declaration under which the exporter agrees to repatriate all export earnings within a month of the payment due date, and a customs export certificate duly signed by a customs officer.

## Letters of credit

The use of LCs by economic agents for the settlement of transactions is allowed but optional.

## Guarantees

Guarantees are required.

## Domiciliation

Transactions related to exports to non-CEMAC countries valued at more than CFAF 5 million must be domiciled with a local licensed bank.

## Preshipment inspection

There are no specific provisions for inspections at the CEMAC level. The member countries may freely apply their own regulations in this regard.

## Other

No.

## Export licenses

No.

## Without quotas

No.

## With quotas

No.

## Export taxes

Export taxes established by the budget laws are levied by the Customs Directorate or via licensed intermediaries.

## Collected through the exchange system

Licensed intermediaries are responsible for withholding all taxes and fees established in the law and surrendering them to the monetary authority.

## Payments for Invisible Transactions and Current Transfers

### Controls on these transfers

There are no exchange restrictions on service-related transactions. Payments for such transactions are subject to the same requirements as the underlying commercial transactions.

### Prior approval

No.

### Quantitative limits

No.

### Indicative limits/bona fide test

All service-related expenditures must be declared, and amounts exceeding CFAF 5 million must also be domiciled with a resident licensed intermediary. Supporting documents must be provided, and amounts exceeding CFAF 100 million must be settled through licensed intermediaries. Licensed intermediaries must obtain a pro forma invoice or other supporting documents for payments for service-related expenditures under CFAF 10 million.

### Investment-related payments

There are no restrictions on transfers of capital income outside the CEMAC in the form of profits, dividends, interest, royalties, etc., payable to nonresidents, provided the underlying transaction was
authorized or is not subject to authorization. Supporting documents on the decision to distribute income (profits and dividends), the repayment schedule, and the debt security involved (loans contracted and granted) must be provided.

These are treated the same as trade-related payments.
### Quantitative limits

| Indicative limits/bona fide test | Yes. | All service-related expenditures must be declared, and amounts exceeding CFAF 5 million must also be domiciled with a resident licensed intermediary. Supporting documents must be provided. Amounts exceeding CFAF 100 million must be settled through licensed intermediaries with stronger verifications. |

### Proceeds from Invisible Transactions and Current Transfers

| Repatriation requirements | Yes. | Amounts owed by nonresidents for services and all income from foreign assets earned outside the CEMAC must be collected through a licensed bank and repatriated immediately. |
| Surrender requirements | Yes. | Amounts collected in foreign currency must be surrendered to the BEAC within 3 days of receipt. |
| Surrender to the central bank | Yes. | |
| Surrender to authorized dealers | No. | |
| Restrictions on use of funds | No. | |

### Capital Transactions

| Controls on capital transactions | Yes. | Capital flows within the CEMAC are not subject to exchange controls. There are no restrictions on most capital flows between CEMAC and non-CEMAC countries, provided they comply with the laws and regulations prohibiting drug financing and trafficking. Certain loans, direct investments, and the issuance, advertisement, and sale of foreign securities within the CEMAC are subject to administrative controls and require approval from the appropriate authorities. Controls on these transactions are applied to countries in the CFA franc area, other than CEMAC member countries, and to all non-CFA franc area countries. Moreover, Article 61 of the General Regulations of the Central African Financial Market Supervisory Commission (COSUMAF), from January 15, 2009, specifies that “when a nonresident legal entity plans a public offering on the Central African regional financial market, it must prepare a disclosure document and submit it to COSUMAF for approval prior to dissemination. The prior approval of the exchange control authority in the various countries concerned must also be obtained.” The article also states that “the issuer must appoint a correspondent (securities dealer) established in a CEMAC member state, where it selects domicile. This correspondent must be responsible for: (1) receiving correspondence from COSUMAF and (2) forwarding to COSUMAF all documents and information required under the laws and regulations or requested by COSUMAF.” |
| Repatriation requirements | Yes. | In the context of the centralization of foreign exchange reserves, foreign currency collected from capital transactions must be repatriated immediately after collection. |
| Surrender requirements | Yes. | |
| Surrender to the central bank | Yes. | Amounts collected in foreign currencies must be surrendered to the BEAC no later than 3 days after receipt. |
| Surrender to authorized dealers | No. | |
| Controls on capital and money market instruments | Yes. | The issuance, advertisement, and sale of foreign securities (shares and bonds issued by foreign enterprises) whose value exceeds CFAF 10 million are subject to MOF approval. Under CEMAC exchange regulations, transactions in capital market securities are treated in the
same way as simple borrowing and lending operations, as opposed to
direct investments, when the shares or equity held by the individual
or legal entity represent less than 10% of the enterprise’s total equity.
Borrowing and lending are not regulated by type of instrument or
maturity.

<table>

Banks may verify and make payment for purchases of securities abroad by residents. Transactions must be declared to the CB 30 days before when the transaction is less than CFAF 20 million. Above that amount, prior CB approval is required. Moreover, the provisions of Article 255 of the COSUMAF General Regulations specify that “the regulations governing the management of a collective investment fund and the articles of incorporation of an open-end investment company may, subject to COSUMAF prior approval, allow purchases and sales of securities on markets outside the CEMAC.”

Banks may verify and make payment abroad for the sale or issuance of securities by residents. Transactions must be reported within 30 days. When the total outstanding liabilities of a single borrower exceed CFAF 100 million, transactions are subject to MOF approval. Moreover, the provisions of Article 255 of the COSUMAF General Regulations specify that “the regulations governing the management of a collective investment fund and the articles of incorporation of an open-end investment company may, subject to COSUMAF prior approval, allow purchases and sales of securities on markets outside the CEMAC.”

These instruments are not regulated.

There is no derivatives market in the CEMAC.

Licensed banks are free to deal in derivatives, subject to compliance with the prudential rules issued by the Banking Commission, which is responsible for supervision of the banking system.

There is no derivatives market in the CEMAC.

There are no specific regulations on borrowing and lending by instrument type or by maturity.

Borrowing directly related to the financing of commercial transactions and borrowing and lending contracted or granted by resident licensed banks are unrestricted and must be reported to the appropriate MOF and BEAC departments within 30 days of each transaction.

Banks may verify and then execute commercial credits granted to nonresidents, except when the customer’s total outstanding debt exceeds CFAF 100 million, in which case such credits must be reported to the MOF and BEAC for approval 30 days before the transaction. The repayment of borrowing and lending subject to such approval must also be reported within 30 days of the transaction. Supporting documents for such borrowing and lending include the repayment schedule and a copy of the debt security.

Only banks are authorized to verify and then execute commercial credits received by residents, which they must declare to the
appropriate MOF and BEAC departments within 30 days of each transaction.

**Financial credits**

Yes. Loans contracted or granted by resident licensed banks are unrestricted and must be reported to the appropriate MOF and BEAC departments within 30 days of each transaction. Banks may verify and execute borrowing and lending transactions for their customers, as well as their repayment, except when the customer’s total outstanding debt exceeds CFAF 100 million, in which case they must be reported to the MOF and BEAC for approval 30 days before the transaction. The repayment of borrowing and lending subject to such approval must also be reported within 30 days of the transaction. Supporting documents for such borrowing and lending include the repayment schedule and a copy of the debt security.

By residents to nonresidents Yes. For these loans, a statement to the MOF and to the BEAC needs to be submitted.

To residents from nonresidents Yes. For these loans, a statement to the MOF and to the BEAC needs to be submitted.

**Guarantees, sureties, and financial backup facilities**

n.r. Guarantees, sureties, and financial backup facilities are not restricted or specifically regulated in the CEMAC. Their execution derives from the performance of contracts entered into with nonresidents.

By residents to nonresidents n.r.

To residents from nonresidents n.r.

**Controls on direct investment**

Yes. Outward direct investment by CEMAC countries is subject to prior approval by the CB. Only licensed banks may verify and execute such transactions. The following may serve as supporting documents: (1) the list of registered shareholders of the direct investment enterprise; (2) a copy of the decision to create the enterprise or increase its capital; (3) a description of the enterprise’s type of business; (4) the balance sheets, income statements, and auditors’ reports for the previous three years, if the investment exceeds CFAF 100 million; and (5) projected balance sheets and income statements, in cases of new enterprises.

Inward direct investment Yes. Inward direct investment to CEMAC countries is unrestricted when the related transactions do not exceed CFAF 100 million. Only licensed banks may verify and execute such transactions. Transactions exceeding CFAF 100 million must be reported to the MOF 30 days in advance, except for capital increases resulting from the reinvestment of undistributed earnings. The following may serve as supporting documents: (1) the list of registered shareholders of the direct investment enterprise; (2) a copy of the decision to create the enterprise or increase its capital; (3) a description of the enterprise’s type of business; (4) the balance sheets, income statements, and auditors’ reports for the previous three years, if the investment exceeds CFAF 100 million; and (5) projected balance sheets and income statements, in cases of new enterprises.

Controls on liquidation of direct investment Yes. The total or partial liquidation of CEMAC countries’ outward (and inward) direct investment in amounts exceeding CFAF 100 million must be reported to the MOF 30 days before execution.

Controls on real estate transactions Yes. This category of transaction is not subject to specific regulations. It is implicitly subject to the same regulations as FDI.

**Purchase abroad by residents**

Yes. Outward direct investment by CEMAC countries is unrestricted when the related transactions do not exceed CFAF 100 million. Only licensed banks may verify and execute such transactions. Transactions exceeding CFAF 100 million must be reported to the MOF 30 days in advance, except for capital increases resulting from
the reinvestment of undistributed earnings. The following may serve as supporting documents: (1) the list of registered shareholders of the direct investment enterprise; (2) a copy of the decision to create the enterprise or increase its capital; (3) a description of the enterprise’s type of business; (4) the balance sheets, income statements, and auditors’ reports for the previous three years, if the investment exceeds CFAF 100 million; and (5) projected balance sheets and income statements, in cases of new enterprises.

**Purchase locally by nonresidents**

Yes.

Inward direct investment to CEMAC countries is unrestricted when the related transactions do not exceed CFAF 100 million. Only licensed banks may verify and execute such transactions. Transactions exceeding CFAF 100 million must be reported to the MOF 30 days in advance, except for capital increases resulting from the reinvestment of undistributed earnings. The following may serve as supporting documents: (1) the list of registered shareholders of the direct investment enterprise; (2) a copy of the decision to create the enterprise or increase its capital; (3) a description of the enterprise’s type of business; (4) the balance sheets, income statements, and auditors’ reports for the previous three years, if the investment exceeds CFAF 100 million; and (5) projected balance sheets and income statements, in cases of new enterprises.

**Sale locally by nonresidents**

n.r.

Controls on personal capital transactions

Yes.

**Loans**

Yes.

**By residents to nonresidents**

Yes.

Residents may grant loans to nonresidents, as long as the total outstanding amount does not exceed CFAF 100 million. Such loans must be reported to the appropriate MOF and BEAC departments within 30 days of each transaction. Transactions exceeding CFAF 100 million are subject to MOF approval.

**To residents from nonresidents**

Yes.

Residents may contract loans from nonresidents, provided a single borrower’s total outstanding debt does not exceed CFAF 100 million. Such loans must be reported to the appropriate MOF and BEAC departments within 30 days of each transaction. Transactions exceeding CFAF 100 million are subject to MOF approval.

**Gifts, endowments, inheritances, and legacies**

Yes.

Receipts from abroad related to gifts must be reported to the appropriate administrative authorities, and all such items exceeding CFAF 5 million must be domiciled with a licensed CEMAC bank.

**By residents to nonresidents**

n.r.

**To residents from nonresidents**

Yes.

Receipts from abroad related to gifts must be reported to the appropriate administrative authorities, and all such items exceeding CFAF 5 million must be domiciled with a licensed CEMAC bank.

**Settlement of debts abroad by immigrants**

Yes.

Residents’ settlement of debts abroad of up to CFAF 100 million must be reported to the MOF and the BEAC within 30 days of the transaction. Transactions exceeding CFAF 100 million are subject to MOF approval.

**Transfer of assets**

n.r.

This type of transaction is not restricted or specifically regulated in the CEMAC.

**Transfer abroad by emigrants**

n.r.

**Transfer into the country by immigrants**

n.r.

**Transfer of gambling and prize earnings**

n.r.

This type of transaction is not restricted or specifically regulated in the CEMAC.

Article VIII

Yes. Date of acceptance: January 21, 1993.

Article XIV

Exchange Measures

Restrictions and/or multiple currency practices

No. No restrictions as reported in the latest IMF staff report as of December 31, 2021.

Exchange measures imposed for security reasons

Yes. The Gambia maintains exchange restrictions in accordance with UNSC resolutions. These include restrictions on financial transactions, listing and freezing of accounts of individuals and all financial and non-financial institutions and designated non-financial businesses and persons (DNFBPs) in support of (1) UNSC Resolutions Nos. 1267 (1999) and 1373 (2001) and (2) the US State Department’s updated list of organizations associated with terrorism. In addition, pursuant to UNSC resolutions, The Gambia enacted the Anti-Terrorism Act of 2012 and the Money-Laundering Act of 2012.

In accordance with IMF Executive Board Decision No. 144-(52/51)

Yes.

Other security restrictions

No.

INTERNATIONAL MONETARY FUND

©International Monetary Fund. Not for Redistribution
maintained within ±15% of the central rate; however, the authorities have not yet implemented these measures. The Central Bank of The Gambia (CBG) periodically intervenes in the foreign exchange market by selling and buying foreign exchange to augment international reserves and ensure market orderliness. Since May 2021, the exchange rate has followed a depreciating trend within a 2% band against the US dollar. Accordingly, the de facto exchange rate arrangement was reclassified to crawl-like, effective May 20, 2021. The CBG does not publish intervention data, but informs market makers on the results of each auction including prices.

Floating
Free floating

Official exchange rate  Yes. The daily interbank exchange rates are computed after the close of each business day. The CBG collects actual buying and selling rates of all participants in the foreign exchange market (between banks, microfinance institutions, and foreign exchange bureaus, and their respective customers) for each traded currency and calculates the average midmarket rate. The exchange rate for government transactions is the average of the midmarket interbank rates of the previous week. The CBG conducts a foreign exchange market review session on the last business day of each week with the participation of the commercial banks, microfinance institutions, and foreign exchange bureaus. During this session, the average market rate of the week is announced as the rate to be applied to government transactions and customs valuations the following week.

**Exchange subsidy**

No.

**Foreign exchange market**

Yes. All ADs are allowed to determine their rates in line with market fundamentals.

**Spot exchange market**

Yes. Foreign exchange bureaus are subject to annual license renewal by the CBG. As of December 2021, there were 116 licensed bureaus. Because of their involvement in international money transfer operations, licensed foreign exchange bureaus may choose to open accounts abroad; however, they may not open accounts for their customers. The CBG has been authorized to deal with microfinance institutions and foreign exchange bureaus, as stipulated in the Reserve Management Guidelines. Currently, the CBG deals only with commercial banks because the volumes involved in the intervention are not available to foreign exchange bureaus.

**Operated by the central bank**

Yes.

---

©International Monetary Fund. Not for Redistribution
Foreign exchange standing facility: No.

Allocation: No.

Auction: Yes.

CBG auctions (purchase/sale) are conducted by written invitations/solicitation through email to all banks (only banks can participate because of volume) and requesting bids to be submitted in writing. The auction preannounces the foreign exchange amount, currency, bid submission deadline, and the requirement to submit bids in sealed envelopes to the CBG. The most competitive bid, that is, the best rate (lowest buying, highest selling rate), is selected in these auctions. While the cutoff rate is determined by the best bid rate, it is subject to the rate range set by the CBG intervention policy, which limits awarding rates within intervention trading limits of the policy as at trade date. The auctions are sanctioned by the Intervention Committee. Winning bids are limited to 20% of the amount floated. Bids must be settled by T+2. The CBG only settled the dalasi component when swift confirmations are received to mitigate credit risk.

Fixing: No.

Interbank market: Yes.

Commercial banks and foreign exchange bureaus are free to engage in transactions among themselves or with customers at exchange rates agreed on by the parties to these transactions. The daily interbank exchange rates are computed after the close of each business day. The CBG collates actual buying and selling exchange rates of all participants in the foreign exchange interbank (banks, finance companies, and foreign exchange bureaus) for each traded currency and calculates the average midmarket rate. Hence, the interbank exchange rates only include rates between banks, finance companies, and foreign exchange bureaus, and their respective customers. All 12 commercial banks and licensed foreign exchange bureaus and microfinance institutions take part in the interbank foreign exchange market. There is no restriction on the market trading spread. The spread continues to be determined by the fundamentals of demand and supply.

Over the counter: Yes.

Brokerage: No.

Market making: n.a.

The foreign exchange market continues to operate on the fundamentals of demand and supply. All the participants quote their respective prices and consummate deals based on agreements with their customers.

Forward exchange market: No.

Official cover of forward operations: No.

Arrangements for Payments and Receipts

Prescription of currency requirements: No.

There are no limitations on the use of domestic currency in international payments for current or capital transactions, but the dalasi is not readily accepted for international transactions.

Controls on the use of domestic currency: No.

For current transactions and payments: No.

For capital transactions: No.

Transactions in capital and money market: No.
The Gambia participates in the WAMZ.

Resident Accounts

Commercial banks may open foreign currency deposit accounts for their clients, provided the banks have demonstrated to the CBG that they have well-developed internal risk-control systems in place.
### Accounts in domestic currency held abroad
- No.

### Accounts in domestic currency convertible into foreign currency

These transactions apply mainly to imports and exports.

Foreign exchange exposure limits set by the CBG must be observed on a weekly basis, and transactions must be reported daily to the CBG.

There are no independent pension funds. The government pension fund may be subject to controls on investment decisions.

Stabilized arrangement

Crawling peg

Crawl-like arrangement

Pegged exchange rate within horizontal bands

Other managed arrangement

Floating
Yes. The de jure and de facto exchange rate arrangements of Georgia are floating. The National Bank of Georgia (NBG) intervenes in the foreign exchange market through foreign exchange auctions or rules-based interventions, but does not make any explicit or implicit commitment with respect to an exchange rate target or path.
Considering the market conditions, interventions are aimed at filling international reserves or smoothing excessive volatility to avoid inflationary expectations. The amount bought/sold at NBG’s foreign exchange auctions and the average exchange rates are posted on the NBG website the same day, shortly after each auction.

The NBG uses the exchange trading system Bloomberg “BMatch.” This foreign exchange trading platform is based on the principle of automatic “matching” of transactions. Market participants will place foreign currency buying and selling applications on the BMatch platform, and if the exchange rates between the buyer and seller of the currency coincide, then the currency transactions between the parties will be concluded automatically. At the first stage, only commercial banks participated in the BMatch platform. Companies are able to participate and can have access to the BMatch platform in two ways: directly through Bloomberg terminal and indirectly through a commercial bank.

With the introduction of the BMatch system, the NBG started to implement rule-based interventions on the platform—when the volatility of the exchange rate exceeds predetermined level, the intervention is carried out within the predefined limits.

In 2021, pandemic-related restrictions started to ease on the global scale, but uncertainty around pandemic was high and spreading new strains of coronavirus had still a negative impact on international tourism. From the second half of 2021, tourism activities started to recover gradually, but overall tourism remained subdued during 2021. Meanwhile, domestic demand started to recover at a high speed, which was partially reflection of pent up demand. Strong domestic demand boosted imports of goods. Because of high domestic demand coupled with subdued external demand current account deficit remained high and stood at 10.1% of GDP in 2021. Nevertheless current account improved compared to 2020 (in 2020 current account deficit stood at 12.5%). Improvement of current account deficit had a positive impact on exchange rate and lari exchange rate appreciated in both nominal and real effective terms from the second half of 2021.

The NBG intervened in the foreign exchange market throughout 2021 and the beginning of 2022. The NBG sold US$332.9 million via foreign exchange auctions. In addition to standard foreign exchange auctions, the NBG provided to the market around US$22.0 million through the BMatch platform. During the year, the nominal effective exchange rate appreciated annually by 17.9%, while the real effective exchange rate appreciated by 20.4%. In 2022, Russian invasion in Ukraine pushed country risk premium up and initially created depreciatory pressures. Meanwhile, expectations around exchange rate deteriorated as Russia and Ukraine are Georgia’s major partner countries. However, foreign exchange inflows has strengthened since then. Money transfers have increased significantly and stood at record high level mostly driven by increased amount of money transfers from Russia. Meanwhile, tourism revenues started to recover and gradually approach the pre-pandemic level. Increasing tourism revenues are mostly related to increased long stay visitors from Russia and Belarus. Under such circumstances exchange rate appreciated in both nominal and real terms. In June 2022, the nominal effective exchange rate appreciated by 20.5%, and the real effective exchange rate appreciated by 11.9%, annually. In the first half of 2022, the net purchase of NBG amounted to US$31.6 million (as of June 30, 2022). By foreign exchange auctions NBG net selling was US$29.6 million and by Bmatch interventions NBG’s net...
purchases was US$61.2 million. The press release about the foreign exchange interventions is published on the day of the auction and also in the statistics section of the NBG website. Data on the net purchases using the Bmatch platform are published with a time lag of slightly less than one month in the statistics section of the NBG website.

Free floating

**Official exchange rate**

Yes. The official exchange rate for the US dollar is determined daily and may be used (not mandatory) for state budget and tax accounting and for payments between the government and businesses and other legal entities. The official exchange rates for other currencies are based on the cross-rates for the dollar and other currencies in the international market. (1) The calculation period for the official exchange rate of the lari against the US dollar is from 4:30 p.m. of the previous business day to 4:30 p.m. of the calculation day within the BMatch platform of the Bloomberg trading system ("trade platform"), taking into account all registered foreign exchange spot trades. The official exchange rate of the lari vis-à-vis the US dollar is calculated as the average weighted exchange rate on the interbank market during the calculation period within the trade platform for registered trades. Trades concluded with the NBG as counterparty are considered interbank trades. (2) The following instances are not considered in the determination of the official exchange rate of the lari vis-à-vis the US dollar: (a) trades at rates significantly different from other registered trades: A rate is considered significantly different if it is either 2.5% higher or lower than the average weighted exchange rate of all the other registered trades within the calculation period (in practice, since the introduction of the new system in 2009, there have been only a few cases for excluding outliers) and (b) opposite trades between two counterparties with similar rates and amounts. (3) Trades used in the calculation of the official exchange rate of the lari vis-à-vis the US dollar for the previous day may be used in the calculation of the official exchange rate during the calculation period if (a) the number of registered trades within the trade platform during the calculation period that may be used in the calculation of the official exchange rate is three or fewer than three or (b) the total amount of the trades within the trade platform during the calculation period that may be used in the calculation of the official exchange rate is less than US$1.5 million. (4) The official exchange rate of the lari vis-à-vis other foreign currencies is determined according to the rate in international markets or the issuer country’s domestic interbank currency market on the basis of cross-currency exchange rates. (5) The list of market segments for foreign currencies (interbank or CB rate) used in the determination of the cross-currency exchange rate is determined by the NBG. (6) The sources for exchange rates are the Reuters and Bloomberg Information systems and CBs’ websites. (7) In the determination of cross-currency exchange rates, the latest available exchange rates are used. (8) Cross-currency exchange rates, the rates of foreign currencies (other than the lari) vis-à-vis the US dollar, are determined by the CB each business day from 2:45 p.m. to 3:00 p.m. In case of technical difficulties, a delay in the determination of exchange rates is permitted until the problems are resolved. Official exchange rate calculation is automated, using in-house software.

**Monetary policy framework**

Exchange rate anchor
In December 2009, the NBG adopted an inflation-targeting framework. The inflation target is set by the NBG and submitted to the parliament. The MPC decisions are submitted, in the form of recommendations, to the governor of the NBG who will make the final decision. The MPC sets the inflation target and can also decide to set the type of target. The NBG is independent in its decision to set the inflation target and utilize its instruments to conduct the monetary policy.

The MPC consists of 13 NBG staff members and is led by the governor of the NBG. The meetings are held eight times in a year according to a preannounced calendar. (But in extraordinary circumstances, unplanned meetings can also be arranged.) The MPC is responsible for determining the target rate of inflation and setting monetary policy rate. The committee is also responsible for discussing and making decisions on issues regarding open market operations and other monetary and exchange rate operations, the issuance of certificates of deposit, setting the interest rate on NBG loans, minimum reserve requirement (RR) norms, other lending/deposit operations, and monetary policy instruments (except for the lender of last resort).

Inflation target was set at 3% since 2018 (and for 2021–2023), which is also NBG’s long-term target.

The monetary policy of the NBG is forward looking and is based not on the current level of inflation, but, rather, on the forecasted level of inflation and the expectations of economic agents. For this reason, economic conditions are constantly evaluated and inflation forecasts are developed which consider those risks that can influence the price level. Inflation target is expressed in terms of the annual inflation rate.

The CPI annual inflation is used as the point inflation target for the medium term.
### Target horizon

Yes. The target horizon is 3 years.

### Operating target (policy rate)

Yes.

### Policy rate

Yes. The monetary policy rate is the one-week refinancing rate.

### Target corridor band

Yes. Effective August 5, 2021, the interest rate corridor is 2.5%: +75 basis points (bps) for overnight loans and −175 bps for overnight deposits. Previously, it was 1.5%—symmetric around policy rate ±75 bps. The corridor is created by using standing facilities: overnight loans and overnight deposits.

### Accountability

Yes.

### Open letter

No.

### Parliamentary hearings

Yes. Once a year, the NBG presents its annual report to the parliament.

### Transparency

Yes.

### Other

No.

### Accountability

Yes.

### Open letter

No.

### Parliamentary hearings

Yes. Once a year, the NBG presents its annual report to the parliament.

### Other

Yes. In practice, the deviation of inflation from its target is explained in the Quarterly Monetary Policy Reports.

### Other monetary framework

#### Exchange tax

No.

#### Exchange subsidy

No.

#### Foreign exchange market

Yes. Market participants are allowed to freely determine their bid-ask spreads and foreign exchange commissions in transactions with their clients.

#### Spot exchange market

Yes. Spot foreign exchanges market is free from regulation, and no special licenses are required to buy and/or sell the foreign currency. As of December 31, 2021, there were 14 commercial banks, 1 nonbank depository institutions (credit unions), 38 microfinance organizations, 183 loan issuing entities, 732 foreign exchange bureaus, 2 stock exchanges, 18 insurance companies, and 5 pension agency and schemes. Commercial Banks, microfinance organizations, and foreign exchange bureaus may buy and sell foreign currency to their clients. Their potential clients could be individuals and legal entities. Foreign exchange bureaus must be registered and may not enter into foreign exchange transactions directly with the NBG. They may transact only with banknotes. They may maintain accounts abroad on their own behalf, but may not maintain foreign accounts or make transfers on behalf of their clients.

### Operated by the central bank

Yes.
The main goal of foreign exchange interventions (1) for the purpose of accumulating international reserves; (2) for smoothing excessive short-term volatility caused by temporary capital flows; (3) for balancing government’s external operations; and (4) for supporting price stability.

The multiple price foreign exchange auction (introduced in 2009) is held occasionally at the discretion of the NBG in US dollars. The NBG defines the type of intervention (sale/purchase), the amount of currency to be sold/purchased, and minimum and/or maximum acceptable exchange rates for bidding. The amount is announced using the Bloomberg system, at least one hour in advance of the auction. Participants may bid within a corridor around the official exchange rate. Corridor is defined by the NBG for each auction, and it depends on current market conditions. There are no limits on bid amounts; each bank may place only one bid. The settlement of currency exchange operations with successful bidders takes place on t + 1—that is, on the first business day following the trade date in Georgia and in the country whose currency was traded. The volume sold/purchased at the auction and the average exchange rates are posted on the NBG website immediately after the auction. In case of default, the NBG applies a fine. In case of a foreign currency sale auction, if a winning bank does not have sufficient funds in its national currency settlement account before the second cutoff of the real-time gross settlement system on the auction settlement date, settlement will take place on the following business day. In case of foreign currency purchase auction, if a winning bank is unable to transfer sufficient foreign currency to its foreign currency correspondent account at the NBG before the end of business day of the issuer country of the foreign currency, the bank must pay a surcharge equal to 2% of the nominal value of purchased foreign currency. The value date of this transaction is the same as the foreign exchange auction settlement date. If a bank does not have sufficient funds in its settlement account at the NBG before the second cutoff of the real-time gross settlement system on the business day following the auction settlement date, the winning bids of the bank are annulled. There is a surcharge on the national currency settlement account of a bank: If a bank does not have sufficient funds in its national currency settlement account, the surcharge is taken from the bank’s US dollar correspondent account and/or another foreign currency correspondent account at the NBG. The surcharge is calculated and charged using the official foreign exchange rates on the day of the transaction. Auctions are conducted in the Bloomberg system. All commercial banks licensed in Georgia may participate in this auction after receiving participating bank status from the NBG at their request.

In 2019, the NBG introduced a new instrument—foreign exchange options. Foreign exchange options are sold via auctions in exchange for a fee. The auction mechanism for options is based on multiple price auction.

Foreign exchange option is a financial instrument, which gives the right to a holder (but not obligation) to buy national currency in exchange for foreign exchange (US dollar or EUR) during the predetermined period (usually the following month) at the official exchange rate. The condition of using the options is that the lari exchange rate should be stronger than the average of the previous 20 days. The strike price of the option is the official exchange rate of the
day when an option is exercised, that is, average exchange rate of the previous day.
The foreign exchange option instrument is not used since July 2019, given the market conditions.
The NBG uses rule-based interventions on Bloomberg’s “BMatch” platform. When the volatility of the exchange rate exceeds a predetermined level, the intervention is carried out within the predefined limits.

Fixing

Interbank market

The interbank spot exchange market, part of the foreign exchange spot market in Georgia, is based on the Bloomberg trading platform and is not operated by the CB. Any institution (financial and non-financial) that has the Bloomberg system can participate. There are no limits on bid-ask spread and commissions of market participants. As of December 31, 2021, 14 commercial banks and 4 microfinance organizations are participating in interbank foreign exchange market. There are also non-financial organizations that have Bloomberg terminals and can trade between themselves and with financial institutions, but they are not much active. Non-financial institutions are not part of interbank foreign exchange market.
The interbank market uses the Bloomberg system and its new Bmatch platform for foreign exchange trading operations. BMatch is Bloomberg’s foreign exchange trading platform that is based on the principle of automatic “matching” of applications. Market participants will place foreign currency buying and selling applications on the BMatch platform, and if the exchange rates between the buyer and seller of the currency coincide, then the currency trade between the parties will be concluded automatically. From October 2020, companies who have Bloomberg terminal may access Bmatch platform directly, or may access Bmatch via commercial banks, if they do not have Bloomberg terminal.

Over the counter

Yes.

Any organization (financial and non-financial) may trade over the counter at freely determined rates.

Brokerage

No.

There is no restriction for brokers, but in practice there are no foreign exchange brokers; banks and other participants use the Bloomberg trading platform and participate in the foreign exchange market directly.

Market making

Yes.

The market operates on the basis of market makers. Participants are not obligated to serve as market makers.

Forward exchange market

Yes.

Forward foreign exchange market is not active. The NBG does not participate in the forward foreign exchange market. Foreign exchange turnover in outright forward and swap transactions is very shallow.

Arrangements for Payments and Receipts

Prescription of currency requirements

Yes.

Controls on the use of domestic currency

No.

For current transactions and payments

No.

For capital transactions

No.

Transactions in capital and money market instruments

No.

Transactions in derivatives and other

No.
instruments
Credit operations No.

Use of foreign exchange among residents Yes. All domestic settlements that are related to provision of goods and services must be made in lari.

Payments arrangements No.

Bilateral payments arrangements No.

Operative No.

Inoperative No.

Regional arrangements No.

Clearing agreements No.

Barter agreements and open accounts No.

Administration of control No. The NBG is responsible for the supervision of foreign exchange bureaus with the purposes of protection of consumer rights and anti-money laundering (AML). The NBG does not give any guidance regarding the exchange rates that they use. The exchange rate bureaus serve the sole purpose of exchanging currencies. Financial institutions are obliged to report cash, as well as foreign transactions from high risk jurisdictions equal to or more than GEL 50,000 to the FIU. The obligation also applies to any transaction, regardless of the amount, suspected of being proceed of crime/associated with ML/TF.

Payments arrears No.

Official No.

Private No.

Controls on trade in gold (coins and/or bullion) No.

On domestic ownership and/or trade No.

On external trade No.

Controls on exports and imports of banknotes No. No controls apply to the amounts that may be exported and imported, but exports and imports of cash above lari 30,000 or its equivalent must be declared for AML purposes.

On exports No. No controls apply to the amounts that may be exported, but exports of cash above lari 30,000 or its equivalent must be declared for AML purposes.

Domestic currency No. No controls apply to the amounts that may be exported, but exports of cash above lari 30,000 or its equivalent must be declared for AML purposes.

Foreign currency No. No controls apply to the amounts that may be exported, but exports of cash above lari 30,000 or its equivalent must be declared for AML purposes.

On imports No. No controls apply to the amounts that may be imported, but imports of cash above lari 30,000 or its equivalent must be declared for AML purposes.

Domestic currency No. No controls apply to the amounts that may be imported, but imports of cash above lari 30,000 or its equivalent must be declared for AML purposes.

Foreign currency No. No controls apply to the amounts that may be imported, but imports
of cash above lari 30,000 or its equivalent must be declared for AML purposes.

Only general prudential limits apply to financial institutions, which are similar for residents and nonresidents. The NBG has set limits on (1) credits issued by commercial banks to individual borrowers, groups of borrowers, insider borrowers, and all large borrowers and (2) unsecured credits.
To residents from nonresidents No.

Controls on direct investment No. Under the Foreign Investment Law, the taxation and promotion of investment activities by joint ventures and foreign enterprises are regulated by the current tax legislation.

**Outward direct investment** No.

**Inward direct investment** No. The Law on Promotion and Guarantees of Investment Activity guarantees investors national treatment or MFN treatment, whichever is better, in the establishment, operation, and sale of their investments. There is no restriction on foreign direct investments in any sector of the economy.

Controls on liquidation of direct investment No.

Controls on real estate transactions Yes.

**Purchase abroad by residents** No.

**Purchase locally by nonresidents** Yes. Nonresidents may purchase real estate freely. Nonresidents are allowed to purchase agricultural land on the ground of investment plan approved by the government.

**Sale locally by nonresidents** No.

Controls on personal capital transactions No.

**Loans**

By residents to nonresidents No.

To residents from nonresidents No.

**Gifts, endowments, inheritances, and legacies**

By residents to nonresidents No.

To residents from nonresidents No.

**Settlement of debts abroad by immigrants** No.

**Transfer of assets**

Transfer abroad by emigrants No.

Transfer into the country by immigrants No.

**Transfer of gambling and prize earnings** No.

---

**Provisions Specific to the Financial Sector**

**Provisions specific to commercial banks and other credit institutions** Yes. The NBG has set limits on (1) credits issued by commercial banks to individual borrowers, groups of borrowers, insider borrowers, and all large borrowers and (2) unsecured credits.

Borrowing abroad No.

Maintenance of accounts abroad No.

Lending to nonresidents (financial or commercial credits) No.

Lending locally in foreign exchange Yes. Higher capital is required for loans issued in foreign exchange.
Banks are allowed to lend in foreign currency only if the loan amount is equivalent to more than 200,000 lari. This rule is applicable to resident debtors.

Effective January 1, 2022, to support larization, Currency-Induced Credit Risk Buffer is determined based on the level of loan dollarization instead of previous flat 75% risk weight. If the dollarization is 40% or below the risk weight will be set at 40% and each 1 percentage point (pp) increase in dollarization above 40% will result in the rise of risk weight by 3 pp, up to 100%. To facilitate smooth transition towards the renewed scheme, banks that need to increase their capital buffer, will be given 1 year to meet the requirement, while for others the buffer requirement will be decreased immediately.

The RRs on funds borrowed in the national currency amount to 5%. Borrowed funds with a remaining maturity of over one year in the national currency are exempt from RRs.

Effective July 6, 2021, the RRs on funds borrowed in foreign currency were changed as follows and are determined individually for commercial banks based on their deposit dollarization: (1) for borrowed funds with remaining maturity up to 1 year, it is set between 10% and 25%: if deposit dollarization is 70% or above, the RR is 25%; if deposit dollarization is 40% or below, the RR is 10%; and in between, it changes linearly based on dollarization; (2) for borrowed funds with remaining maturity between 1 and 2 years, it is set between 10% and 15%: if deposit dollarization is 70% or above, the RR is 15%; if deposit dollarization is 40% or below, the RR is 10%; and in between, it changes linearly based on dollarization.

Previously, the RR was 25% for borrowed funds with remaining maturity up to 1 year and 15% for borrowed funds with remaining maturity between 1 and 2 years.

Borrowed funds with a remaining maturity of over 2 years in the foreign currency are exempt from RRs.

Capital and funds equalized to capital are exempt from the required reserve norms.

There is also differentiation in remuneration. The interest rate remunerated on national currency required reserves is equal to the monetary policy rate. Effective May 13, 2022, the required reserves denominated in US dollar are remunerated with fixed 0% (previously they were remunerated at a rate equal to the US Fed policy rate minus 0.5 percentage point). The interest rates on euro reserves are 0.2 pps lower than the policy rate on deposit of the ECB.

According to the LCR regulation, bank should maintain 100% LCR in foreign currency, while local currency LCR can be as low as 75%, given that LCR in all currencies in total exceeds 100%.

According to the LCR regulation, bank should maintain 100% LCR in foreign currency, while local currency LCR can be as low as 75%, given that LCR in all currencies in total exceeds 100%. Outflow rates
for nonresident deposits are higher than for deposits of residents, on average, by about 20 pps.

**Interest rate controls**  No.

**Credit controls**  No.

**Investment regulations**  No.

**Abroad by banks**  No.

**In banks by nonresidents**  No.

**Open foreign exchange position limits**  Yes. The limit on the total open foreign exchange position set by the NBG is defined with respect to the amount of all long foreign exchange positions for all currencies or the amount of all short foreign exchange positions for all currencies, whichever is higher. The open position of balance sheet and consolidated balance sheet (including off-balance-sheet) items must not exceed 20% of regulatory capital. Foreign exchange position limit is the same for resident and nonresident banks. It applies equally to the resident and nonresident assets and liabilities. Foreign currency assets were previously accounted on gross-of-reserves bases, while according to recent changes foreign currency LLP will be deducted from open currency position according to quarterly phase-in.

**On resident assets and liabilities**  Yes. The limit on the total open foreign exchange position set by the NBG is defined with respect to the amount of all long foreign exchange positions for all currencies or the amount of all short foreign exchange positions for all currencies, whichever is higher. The open position of balance sheet and consolidated balance sheet (including off-balance-sheet) items must not exceed 20% of regulatory capital. Foreign exchange position limit is the same for resident and nonresident banks. It applies equally to the resident and nonresident assets and liabilities.

**On nonresident assets and liabilities**  Yes. The limit on the total open foreign exchange position set by the NBG is defined with respect to the amount of all long foreign exchange positions for all currencies or the amount of all short foreign exchange positions for all currencies, whichever is higher. The open position of balance sheet and consolidated balance sheet (including off-balance-sheet) items must not exceed 20% of regulatory capital. Foreign exchange position limit is the same for resident and nonresident banks. It applies equally to the resident and nonresident assets and liabilities.

**Provisions specific to institutional investors**  Yes. Only general prudential limits apply to financial institutions, which are similar for residents and nonresidents. Generally, insurers may invest freely abroad. Insurance supervision is under the jurisdiction of the Insurance State Supervision Service. Decree No. 04 of the Head of the Insurance State Supervision Service is the regulation governing insurance companies. Under prudential limits established by the decree, up to 20% of assets covering insurance technical provisions may be placed abroad. Further limits apply as follows: (1) Up to 30% of the total amount of technical provisions may be placed in debt securities (including treasury bills issued by the MOF) issued by Georgia and OECD member countries. (2) Up to 30% may be in debt securities issued by local self-governance agencies of OECD member countries and/or developed economies. (3) Up to 50% may be in debt securities in (1) and (2). (4) Up to 15% may be in corporate bonds, preferred stock, and equity securities traded in the organized securities markets of Georgia and OECD members. (5) Up
to 3% may be in corporate bonds and preferred stock of the same issuer in Georgia and OECD member countries, and up to 2% may be in equity securities. (6) Up to 10% may be in corporate bonds, preferred stock, and equity securities issued by legal entities registered in Georgia, OECD members, and/or developed economies and traded outside the organized securities markets of Georgia and OECD members. (7) Up to 2.5% may be in corporate bonds and preferred stocks of the same issuer traded on securities exchanges other than those of Georgia and OECD members, and up to 1% may be in equity securities. (8) Up to 15% may be in securities in (4) and (6). (9) Up to 20% may be in mortgage loans secured with property registered in Georgia, OECD members, and other developed economies. (Loans to a single person may not exceed 10%.) (10) Up to 20% may be in loans to banking institutions. (Loans to a single bank may not exceed 10%.) (11) Up to 10% may be in loans secured by securities in (1) and (2). (Loans to a single person may not exceed 2%.) (12) Up to 10% may be in real estate registered in Georgia, OECD members, and/or developed economies. (13) Up to 90% may be in bank deposits. (Deposits in a single bank may not exceed 30%.) (14) Up to 10% may be in cash in vault and on the current account, not exceeding 20% in a single bank.

Decree No. 04 of the Head of the Insurance State Supervision Service is the regulation governing insurance companies. Under prudential limits established by the decree, up to 20% of assets covering insurance technical provisions may be placed abroad. Further relevant limits apply as follows: (1) Up to 30% of the total amount of technical provisions may be placed in debt securities (including treasury bills issued by the MOF) issued by Georgia, OECD member countries, and/or developed countries. (2) Up to 30% may be in debt securities issued by local self-governance agencies of OECD member countries and/or developed economies. (3) Up to 50% may be in debt securities in (1) and (2). (4) Up to 15% may be in corporate bonds, preferred stock, and equity securities traded in the organized securities markets of Georgia, OECD members, and/or developed countries. (5) Up to 3% may be in corporate bonds and preferred stock of the same issuer in Georgia and OECD member countries, and up to 2% may be in equity securities. (6) Up to 10% may be in corporate bonds, preferred stock, and equity securities issued by legal entities registered in Georgia, OECD members, and/or developed economies and traded outside the organized securities markets of Georgia and OECD members. (7) Up to 2.5% may be in corporate bonds and preferred stocks of the same issuer traded on securities exchanges other than those of Georgia and OECD members, and up to 1% may be in equity securities. (8) Up to 15% may be in securities in (4) and (6).

Generally, insurers may invest freely abroad. However, under prudential limits regarding assets covering technical provisions, up to 20% of assets covering insurance technical provisions may be placed abroad.

Only general prudential limits apply to financial institutions, which are similar for residents and nonresidents. Generally, funds may be invested freely abroad. The supervision of pension funds is under the jurisdiction of the Insurance State Supervision Service. Decree No. 04 of the Head of the Insurance State Supervision Service is the regulation governing pension funds. Under prudential limits

### Changes during 2021 and 2022

#### Exchange Arrangement

**Monetary policy framework**

Inflation-targeting framework

**Operating target (policy rate)**

Target corridor band

| 08/05/2021 | The interest rate corridor is 2.5%: +75 basis points (bps) for overnight loans and −175 bps for overnight deposits. Previously, it was 1.5%—symmetric around policy rate ±75 bps. |

**Provisions Specific to the Financial Sector**

**Provisions specific to commercial banks and other credit institutions**

Lending locally in foreign exchange

| 01/01/2022 | To support larization, Currency-Induced Credit Risk Buffer is determined based on the level of loan dollarization instead of previous flat 75% risk weight. If the dollarization is 40% or below the risk weight will be set at 40% and each 1 percentage point (pp) increase in dollarization above 40% will result in the rise of risk weight by 3 pp, up to 100%. To facilitate smooth transition towards the renewed scheme, banks that need to increase their capital buffer, will be given 1 year to meet the requirement, while for others the buffer requirement will be decreased immediately. |

**Differential treatment of deposit accounts in foreign exchange**

**Reserve requirements**

| 07/06/2021 | The reserve requirements (RRs) on funds borrowed in foreign currency were changed as follows and are determined individually for commercial banks based on their deposit dollarization: (1) for borrowed funds with remaining maturity up to 1 year, it is set between 10% and 25%; if deposit dollarization is 70% or above, the RR is 25%; if deposit dollarization is 40% or below, the RR is 10%; and in between, it changes linearly based on dollarization; (2) for borrowed funds with remaining maturity between 1 and 2 years, it is set between 10% and 15%; if deposit dollarization is 70% or above, the RR is 15%; if deposit dollarization is 40% or below, the RR is 10%; and in between, it changes linearly based on dollarization. Previously, the RR was 25% for borrowed funds with remaining maturity up to 1 year and 15% for borrowed funds with remaining maturity between 1 and 2 years. |

| 05/13/2022 | The required reserves denominated in US dollar are remunerated with fixed 0% (previously they were remunerated at a rate equal to the US Fed policy rate minus 0.5 percentage point) |

In accordance with EU regulations and the relevant UNSC resolutions, restrictions are maintained with respect to: certain persons, entities, and bodies in view of the situation in Afghanistan; certain persons and entities associated with the Al-Qaida network and ISIL (Da'esh; amended as of July 16, 2018), and other individuals and organizations associated with terrorism; certain persons, entities, and bodies in view of the situation in Belarus and the involvement of Belarus in the Russian aggression against Ukraine; certain persons in view of the situation in Burundi; certain persons, entities, and bodies in view of the situation in the Central African Republic; certain persons in view of the situation in the Democratic Republic of the Congo. From October 16, 2018, restrictive measures were imposed against certain persons, entities, and bodies in connection with proliferation and use of chemical weapons. Restrictive measures are imposed against certain persons, entities, and bodies in connection with cyber-attacks threatening the Union or its Member States. Restrictive measures against certain persons, entities, and bodies in view of the situation in Egypt were repealed with Council Regulation (EU) No. 2021/445, effective March 3, 2021. Restrictive measures are maintained against: certain persons, entities, and bodies with respect to Guinea; certain persons, entities, and bodies threatening the peace, security, or stability of Guinea-Bissau; certain natural and legal persons, entities, and bodies in connection with serious human rights violations and abuses; certain persons, organizations, and entities in view of the situation in the Islamic Republic of Iran and in association with nuclear-proliferation-related activities there; individuals and entities associated with the former government of Iraq; individuals and entities in the Democratic People’s Republic of Korea (DPRK); certain persons suspected of involvement in the assassination of former Lebanese prime minister Rafik Hariri; certain persons, entities, and bodies in view of the situation in Lebanon; certain persons, entities, and bodies in view of the situation in Libya; certain persons, entities, and organizations in view of the situation in Mali; certain persons, entities, and bodies in view of the situation in Myanmar/Burma; certain persons, entities, and bodies in view of the situation in Nicaragua; certain persons, entities, and bodies in view of the situation in Somalia; certain persons, entities, or bodies in view of the situation in South Sudan; certain persons, entities, or bodies in view of the situation in Sudan; certain persons, entities, and bodies in view of the situation in Syria; certain persons, entities, and
bodies with a view to combating terrorism; certain persons, entities, and bodies in view of the situation in Tunisia; certain persons in view of the situation in Ukraine; certain persons, entities, and bodies with respect to actions undermining or threatening the territorial integrity, sovereignty, and independence of Ukraine; restrictive measures in view of Russia’s actions destabilizing the situation in Ukraine; restrictions on the import into the Union of goods originating in Crimea or Sevastopol, in response to the illegal annexation of Crimea and Sevastopol; restrictive measures were imposed against certain persons, organizations, and bodies in view of Turkey’s unauthorized drilling activities in the Eastern Mediterranean by Council Regulation (EU) No. 2019/1890; certain persons, organizations, and bodies in view of the situation in Venezuela; certain persons, entities, and bodies in view of the situation in Yemen; certain persons, entities, and bodies with respect to Zimbabwe.

Additional exchange measures:
Exchange restrictions related to Iran include the provision of financing or financial assistance related to certain military goods and technology to any natural or legal person, entity, or body in or for use in Iran. Also, the provision of financing or financial assistance to Iranian persons, entities, or bodies or for use in Iran related to the following is restricted: goods that could contribute to enrichment-related, reprocessing, or heavy-water-related activities; the development of nuclear weapon delivery systems, graphite and raw or semifinished metals, such as aluminum and steel investment in Iranian persons, entities, or bodies engaged in the manufacture of certain military goods or in enrichment-related, reprocessing, or heavy-water-related activities remains restricted. Restrictions apply to the provision of financing and financial assistance related to certain military goods and technology or related to equipment that could be used for internal repression.

Exchange restrictions related to Syria include restrictions on the provision of financing and financial assistance related to military goods and technology or to equipment that could be used for internal repression of any person, entity, or body in or for use in Syria. Financing and financial assistance related to equipment that can be used for telecommunications surveillance or for the construction of new power plants are restricted. Exports and imports of gold, diamonds, and precious metals are restricted. Financing and financial assistance related to imports, purchases, or transportation of crude oil and petroleum products imported from Syria are restricted. Investment in Syrian persons, entities, or bodies engaged in the exploration or production of crude oil or in the construction or installation of new power plants is restricted.

Restrictions regarding Belarus apply to the provision of financing and financial assistance related to certain military goods and technology or related to equipment that could be used for internal repression of any person, entity, or body in or for use in Belarus. As of June 25, 2021, further restrictions relate to the trade of arms. Prohibition regarding the sale, supply, transfer or export of equipment, technology or software intended primarily for use in the monitoring or interception by or on behalf of the Belarusian authorities of the Internet and of telephone communications on mobile or fixed networks and the sale, supply or transfer of dual-use items to any persons, entities, or bodies in Belarus and financing or
financial assistance related to these goods and technology. Further restrictions apply to trade concerning petroleum products, potassium chloride (“potash”), cement products, iron and steel products, wood products, rubber products, certain machinery, and goods used for the production or manufacturing of tobacco products. Furthermore, there are restrictions on access to Union capital markets in relation to the Belarusian Government as well as Belarusian state-owned financial institutions and entities. More prohibitions relate to providing insurance and reinsurance to the Belarusian Government and Belarusian public bodies and agencies. Certain prohibitions apply to the EIB in relation to projects in the public sector. Transactions related to the management of reserves as well as of assets of the Central Bank of Belarus are prohibited. Further restrictions apply to the listing and the provision of services as of April 12, 2022, on trading venues registered or recognized in the Union for the transferable securities of any legal person, entity, or body established in Belarus and with over 50% public ownership. It is prohibited to provide public financing or financial assistance for trade with or investment in, Belarus. The acceptance of deposits from Belarusian nationals or natural persons residing in Belarus, or legal persons, entities, or bodies established in Belarus is restricted. There are prohibitions for Union central securities depositories to provide any services for transferable securities issued after April 12, 2022, to any Belarusian person or entity and to sell transferable securities or banknotes denominated in any official currency. Restrictions apply to the provision of specialized financial messaging services to certain Belarusian banks.

Restrictions regarding the Central African Republic apply to the provision of financing and financial assistance related to certain military goods and technology to any person, entity, or body in or for use in the Central African Republic. The provision of financing and financial assistance related to military activities or armed mercenary personnel is restricted.

Restrictions regarding the Democratic Republic of the Congo apply to the provision of financing and financial assistance related to military goods.

Restrictions regarding Guinea apply to persons identified by the International Commission of Inquiry as responsible for the September 28, 2009, events in the Republic of Guinea, and natural or legal persons, entities, or bodies associated with them, as designated by the Council in accordance with Article 4(1) of Council Decision 2010/638/CFSP of October 25, 2010, concerning restrictive measures against the Republic of Guinea.

Restrictions regarding the DPRK apply to financing or financial assistance related to certain military goods and technology to any natural or legal person, entity, or body in or for use in the DPRK. Exports and imports of precious metals and diamonds and related financing or financial assistance are restricted. The sale of banknotes and government bonds is restricted. Restrictive measures concerning the opening and maintenance of bank accounts and correspondent banking relationships are in force. Restrictions concerning investments in any commercial activity in the territory of the EU, joint ventures, cooperative entities, and certain investment services are in effect. Restrictive measures concerning real property regarding persons, entities, or bodies of the government of the DPRK are in force. Restrictions on transfers of funds and financial service and also on financing or financial assistance for trade with the DPRK are
Restrictions regarding Lebanon apply to the provision of financing and financial assistance related to certain military goods and technology to any person, entity, or body in or for use in Lebanon. The provision of financing and financial assistance related to military activities in Lebanon is restricted.

Restrictions regarding Libya apply to the provision of certain military goods and technology to any person, entity, or body in or for use in Libya. Financing and financial assistance related to military activities and equipment which might be used for internal repression or for the provision of or use by armed mercenaries in Libya are restricted.

Restrictions regarding Myanmar apply to financing and financial assistance related to certain military goods and technology or related to equipment that could be used for internal repression of any person, entity, or body in or for use in Myanmar. Financing and financial assistance related to military activities are restricted. Restrictions concerning financing or financial assistance of equipment, technology, or software for monitoring or interception of Internet or telephone communications are in effect. Restrictive measures were imposed against certain natural persons from the Myanmar Armed Forces (Tatmadaw) and the Border Guard Police responsible for serious human rights violations, responsible for obstructing the provision of humanitarian assistance to civilians in need, and responsible for obstructing the conduct of independent investigations into alleged serious human rights violations or abuses, as well as persons, entities, or bodies associated with them (Council Regulation (EU) No. 2018/647 amended Regulation (EU) No. 401/2013).

Restrictions regarding Somalia apply to the provision of financing and financial assistance related to imports, transportation, or purchases of charcoal from Somalia. The provision of financing and financial assistance related to military activities is restricted.

Restrictions regarding South Sudan apply to the provision of financing and financial assistance related to military activities, which is restricted.

Restrictions regarding Sudan apply to the provision of financing and financial assistance related to certain military goods and technology to any person, entity, or body in or for use in Sudan. The provision of financing and financial assistance related to military activities is restricted.

Restrictions regarding Ukraine apply to the creation of joint ventures with entities in Crimea or Sevastopol, the provision of financing to entities in Crimea or Sevastopol, and the acquisition or extension of a participation in real estate and entities in Crimea or Sevastopol.

Restrictions regarding Zimbabwe apply to the provision of financing and financial assistance related to certain military goods and technology or related to equipment that could be used for internal repression of any person, entity, or body in or for use in Zimbabwe. Financing and financial assistance related to military activities are restricted.

Restrictions regarding Russia apply to the access to European capital markets for certain Russian government-owned banks, certain
companies engaged in major activity in the military sector, and certain government-owned companies with at least 50% of estimated revenues from the sale or transportation of crude oil or petroleum products. It is forbidden to list and provide services on trading venues registered or recognized in the Union for the transferable securities of any legal person or entity established in Russia or grant new loans to them, to buy certain transferable securities and money market instruments from Russia, its government or the Russian Central Bank. Transactions related to the management of reserves as well as of assets of the Central Bank of Russia including transactions with any legal person, entity, or body acting on behalf of, or at the direction of the Central Bank of Russia are forbidden. Restrictions apply to the sale, export, transport, etc., of dual-use goods to any Russian person or entity, certain other goods contributing to Russia’s military and technological enhancement or to the oil, gas, aviation, and space industry and to the provision of financing or financial assistance related to trade in these sectors. Similar restrictions apply to the import of iron and steel products, coal and other solid fossil fuels and certain goods that generate significant revenues for Russia or contribute to the enhancement of Russian industrial capacities as well as to the purchase, import, or transfer of crude oil or petroleum products and transport to third countries of crude oil or petroleum products originating from Russia.

The acceptance of deposits from Russian nationals or natural persons residing in Russia, or legal persons, entities, or bodies established in Russia is restricted. There are prohibitions for EU central securities depositories to provide any services for transferable securities issued after April 12, 2022, to any Russian person or entity and to sell transferable securities or banknotes denominated in any official currency of the EU. Further restrictions concern the provision of specialized financial messaging services to certain Russian financial institutions as well as the provision of credit rating, trust, and auditing services. It is also prohibited to award or continue to execute public or concession contracts. Restrictions regarding Venezuela apply to financing and financial assistance related to certain military goods and technology or related to equipment that could be used for internal repression as well as equipment, technology, or software used in particular for the monitoring of Internet or telephone traffic.

Restrictions regarding Yemen apply to financing and financial assistance related to military activities.

Other security restrictions No.

Exchange Arrangement

Currency Yes. The currency of Germany is the euro.

Other legal tender No.

Exchange rate structure

Unitary Yes.

Dual

Multiple

Classification
Germany participates in a currency union (EMU) with 18 other members of the EU and has no separate legal tender. The ECB publishes information regarding its interventions; it last intervened in March 2011. When it intervenes, the ECB intervenes at the quotes of the market makers.

The ECB publishes a reference rate based on the daily concertation procedure between CBs within and outside the European System of Central Banks (ESCB). The publication time of the euro foreign exchange reference rates is around 14:30 Central European Time to around 16:00 Central European Time. The reference rate against the euro is the average of the buying and selling rates.

**Other monetary framework** Yes. The Bundesbank is an integral part of the ESCB. Pursuant to Article 127(1) of the Treaty on the Functioning of the EU, the primary objective of the ESCB is to maintain price stability. Without prejudice to the objective of price stability, the ESCB supports the general economic policies in the Union with a view to contributing to the achievement of the objectives of the Union as laid down in Article 3 of the Treaty on the EU. The ESCB acts in accordance with the principle of an open market economy with free competition, favoring an efficient allocation of resources, and with the principles set out in Article 119 of the Treaty on the Functioning of the EU. These include as guiding principles “stable prices, sound public finances and monetary conditions and a sustainable balance of payments.” Effective July 7, 2021, the ECB considers that price stability is best maintained by aiming for a symmetric 2% inflation target over the medium term. Previously, price stability was defined as inflation below but close to 2%.

**Exchange tax** No.

**Exchange subsidy** No.

**Foreign exchange market** Yes. ADs may determine freely their exchange rates and foreign exchange commissions in transactions with their clients.
Spot exchange market: Yes. Conducting banking business and providing financial services require a license from the ECB (see Article 4(1) (a) Regulation (EU) No. 1024/2013). Providing financial services requires a license from the Federal Financial Supervisory Authority (Section 32 of the Banking Act). Dealing in foreign notes and coins requires a license because of the risk of money laundering. This refers primarily to exchange bureaus as specialized financial institutions: A license to conduct the overall banking business already includes permission to deal in foreign currency. Hotels, travel agencies, and department stores dealing in foreign currency only as a secondary business do not need a license. As of July 28, 2022, about 1,283 deposit-taking credit institutions, 7 financial services institutions (non-microfinance institutions), 3 payment institutions, and 7 other institutions were permitted to deal in foreign currency.

Operated by the central bank: No.
Foreign exchange standing facility: No.
Allocation: No.
Auction: No.
Fixing: No.

Interbank market: Yes. There are no limits on the bid-ask spreads and commissions of market participants.
Over the counter: Yes. The foreign exchange market operates over the counter.
Brokerage: No.
Market making: Yes. The interbank foreign exchange market operates on the basis of a market-making agreement, in which participants commit to a maximum spread and a minimum amount to trade.
Forward exchange market: Yes. Residents and nonresidents may freely negotiate forward exchange contracts for both commercial and financial transactions in all leading convertible currencies in the domestic exchange market and in international foreign exchange markets. Germany has no officially fixed rates in the forward exchange market. All transactions are negotiated at free-market rates.

Official cover of forward operations: No.

Arrangements for Payments and Receipts

Prescription of currency requirements: No.
Controls on the use of domestic currency: No.
For current transactions and payments: No.
For capital transactions: No.
Transactions in capital and money market instruments: No.
Transactions in derivatives and other instruments: No.
Credit operations: No.
Use of foreign exchange among residents: No.
Payments arrangements: No.
Bilateral payments arrangements: No.
Operative: No.
Inoperative: No.
Regional arrangements: No.
Clearing agreements: No.
Barter agreements and open accounts: No.
Administration of control: No. All banks in Germany are permitted to carry out foreign exchange transactions.
Payments arrears: No.
Official: No.
Private: No.
Controls on trade in gold (coins and/or bullion): No.
On domestic ownership and/or trade: No.
On external trade: No.
Controls on exports and imports of banknotes: No.

Effective June 3, 2021, in accordance with Regulation (EU) No. 2018/1672, cash controls have been implemented based on a mandatory declaration system for amounts of cash entering or leaving the EU with a value of €10,000 or more. According to Article 3 of Regulation (EU) No. 2018/1672, travelers entering or leaving the EU and carrying more than €10,000 are required to make a declaration to the competent authorities of the Member State through which they enter or leave the EU. The competent authorities must record the obtained information and transmit it to the FIU of the Member State in which it was obtained. The obligation to declare is not fulfilled if the traveler makes no declaration or if the information provided is incorrect or incomplete or if the cash is not made available for control. To verify compliance with the obligation to declare, the competent authorities have the power to carry out controls on natural persons, their luggage, and their means of transport (Article 5(1) of Regulation (EU) No. 2018/1672). The competent authorities may temporarily detain cash by means of an administrative decision where the obligation to declare accompanied cash under Article 3 has not been fulfilled or there are indications that the cash, irrespective of the amount, is related to criminal activity (Article 7(1) of Regulation (EU) No. 2018/1672). The Regulation requires Member States to impose penalties for failure to comply with the declaration obligation (Article 14 of Regulation (EU) No. 2018/1672). Where there are indications that the cash is related to criminal activity, the competent authority of each Member State must transmit obtained declarations to the competent authorities of all the other Member States and, under certain conditions, to the Commission, the European Public Prosecutor's Office (EPPO), and Europol (Article 10 of Regulation (EU) No. 2018/1672). According to Article 11 of Regulation (EU) No. 2018/1672, information can be exchanged with third countries. In addition to the obligation in Article 3 of Regulation (EU) No. 2018/1672 to declare, there is an obligation to disclose unaccompanied cash of a value of €10,000 or more entering or leaving the Union (Article 4 of Regulation (EU) No. 2018/1672).
this respect, there are comparable provisions on the powers of the competent authorities and on the exchange of information. The Regulation does not apply to physical cross-border transportation from one EU-member country to another (that is, intra-EU transportation). Such transportation is not considered “cross-border” for the purposes of the Regulation; the Regulation only harmonizes the system for the EU’s external borders. According to Section 1(4) Zollverwaltungsgesetz (ZollVG)—Customs Administration Act (German national law), the transfer of cash and equivalent means of payment into, out of, and through the scope of application of this Act (that is, Germany) is also monitored. Section 12a ZollVG stipulates an obligation to disclose cash verbally on request of the competent authorities, when travelers enter or leave Germany from or to another EU-member country carrying cash or equivalent means of payment with a value of €10,000 or more. Procedural provisions, for example, regarding violations or possibilities to check compliance, are similar.

Pursuant to Article 12 of Council Regulation (EU) No. 2017/1509, it is prohibited to sell, supply, transfer, or export, directly or indirectly, newly printed or unissued DPRK-denominated banknotes and minted coinage, to or for the benefit of the Central Bank of DPRK.

Pursuant to Article 11 of Council Regulation (EU) No. 36/2012, it is prohibited to sell, supply, transfer, or export, directly or indirectly, new Syrian-denominated banknotes and coinage, printed or minted in the Union, to the Central Bank of Syria.

Pursuant to Article 5i of Council Regulation (EU) No. 833/2014, it is prohibited to sell, supply, transfer, or export banknotes denominated in any official currency of a EU Member State to Russia or to any natural or legal person, entity, or body in Russia, including the government and the Central Bank of Russia, or for use in Russia, other than for diplomatic or personal usage.

No.

To residents from nonresidents

No.

Controls on direct investment

Yes.

Outward direct investment

Yes.

Inward direct investment

Yes.

Controls apply (1) to investment in air transportation enterprises, which (in accordance with Regulation (EC) No. 1008/2008) must be more than 50% owned directly or indirectly through one or more intermediate companies by members and/or nationals of EU members; an enterprise must notify its licensing authority within 14 days of any change in ownership of a single shareholding that represents 10% or more of the total; (2) to the acquisition of a German flag vessel, except through an enterprise incorporated in Germany or in another member of the EU; (3) to investment in the broadcasting (radio and television) sector, except through a subsidiary incorporated in Germany, as required for both residents and nonresidents; (4) to the use of depository banks for investment funds of capital investment companies, which is (in accordance with Directive No. 2009/65/EC) not permitted for branches of nonresident financial institutions whose head office is outside the EU, except for funds not covered under Directive No. 2009/65/EC and not sold in other EU-member countries; (5) to a depository of a UCITS, which (under EC Directive No. 2009/65) must have its registered office either in the same EU country as that of the company or be established in the EU country if its registered office is in another EU country; (6) to investments in companies in sectors related to goods on the German export control list or other defense technology, IT security products to process classified state material, and facilities that are vital for defense, which (under Section 60 et seq. of the German Foreign Trade Ordinance) require notification if the transaction will give a foreign investor at least 10% of the voting rights; restrictions may be imposed to secure the “material security interests” of Germany; and (7) in general, under Section 55 et seq. of the German Foreign Trade Ordinance, which may, to secure “public order or security,” restrict investments in any other German enterprise by an investor from outside the EU or EFTA that will give the investor at least 25% of the voting rights or 10% or 20% in one of 27 sensitive civil sectors (for example, critical infrastructure, emerging/sensitive technologies). Effective May 1, 2021, the amendment expands controls to investments in any German enterprise by an investor outside the EU or EFTA that will give the investor at least 20% (previously 25%) of voting rights in the case of an enterprise in a sensitive sector as categorized in Section 55a(1) No. 8-27 of the Foreign Trade and Payments Ordinance (for example, critical infrastructure, emerging/sensitive technologies). With respect to enterprises in sensitive civil sectors as set out in Section 55a(1) No.1-7 of the Foreign Trade and Payment Ordinance previously covered by the sector-specific regime, the relevant voting rights threshold remains at 10%. For all other acquisitions, the 25% threshold applies. Asset deals are in the scope of the FDI screening regime and the review may take into account whether an acquirer is directly or indirectly controlled by foreign government or its agencies.

Regulation (EU) No. 2019/452 of March 19, 2019, established an EU-wide framework for FDI screening and for the European Commission and the Member States to coordinate their actions on
foreign investments. The German Foreign Trade and Payments Ordinance was amended in line with this by amendments that entered into force October 29, 2020 (“Sechzehnte Verordnung zur Änderung der Außenwirtschaftsverordnung”) and May 1, 2021 (“Siebzehnte Verordnung zur Änderung der Außenwirtschaftsverordnung”).

Commission Delegated Regulation (EU) No. 2015/61 of October 10, 2014 (LCR DR), provides criteria to identify less stable retail deposits, for the purposes of liquidity reporting, by defining the characteristics that may lead to higher outflows during the next 30 days under stress conditions. Deposits denominated in a currency other than the euro or the domestic currency of a Member State are according to Article 25(2)(e) of LCR DR one criterion for applying a higher outflow rate according to Article 25(3) of LCR DR.

Commission Delegated Regulation (EU) No. 2015/61 of October 10, 2014 (LCR DR), provides criteria to identify less stable retail deposits, for the purposes of liquidity reporting, by defining the characteristics that may lead to higher outflows during the next 30 days under stress conditions. Deposits where the depositor is resident in a third country are according to Article 25(2)(e) of LCR DR one criterion for applying a higher outflow rate according to Article 25(3) of LCR DR.

Regulation (EU) No. 575/2013 on Prudential Requirements for Credit Institutions and Investment Firms (CRR) does not impose an explicit limit on open foreign exchange positions. However, CRR Article 351 prescribes that if the sum of an institution’s overall net foreign exchange position and its net gold position, calculated in accordance with the procedure set out in CRR Article 352, exceeds 2% of its total own funds, the institution must calculate an own funds requirement of 8% in general for foreign exchange risk (for exemptions to this rule, see CRR Article 354).

There are certain provisions for prudential regulation of portfolios of life insurance and pension funds.

According to the Investment Regulation—Regulation on the Investment of the Restricted Assets of “Pensionskassen,” Death Benefit Funds, and Small Insurance Undertakings, the investment of...
restricted and guarantee assets in EEA countries, other OECD countries, and countries outside the OECD is allowed, with certain requirements. Investments must be in the same currency as liabilities under the pension or insurance contracts. Exemptions from that rule are laid down in the annex to Section 5 of the Investment Regulation.

“Pensionskassen,” Death Benefit Funds, and Small Insurance Undertakings may acquire investments in all investment categories in any OECD or EEA country. Investments must be with some exemptions in the same currency as liabilities under the pension or insurance contracts. According to the Act on the Supervision of Insurance (Versicherungsaufsichtsgesetz—VAG) Undertakings Section 125(4), investments of the restricted assets are to be held within the EEA. Exemptions may be granted on application.

| Limits (max.) on investment portfolio held abroad | Yes. |
| Limits (min.) on investment portfolio held locally | No. |
| Currency-matching regulations on assets/liabilities composition | Yes. |

Restricted assets must be, with some exemptions, invested in assets in the same currency as liabilities under insurance contracts (matching rules). Land and land rights are deemed denominated in the currency of the country in which they are located, and shares and participating interests in the currency in which they are included in an organized market. Shares and participating interests not traded in an organized market are deemed denominated in the currency of the issuer’s home country.

| Pension funds | Yes. |
| Limits (max.) on securities issued by nonresidents | Yes. |
| Limits (max.) on investment portfolio held abroad | Yes. |
| Limits (min.) on investment portfolio held locally | No. |
| Currency-matching regulations on assets/liabilities composition | Yes. |

According to the PFAV, the investment of restricted and guarantee assets in EEA countries, other OECD countries, and countries outside the OECD is allowed, with certain requirements. Investments must be in the same currency as liabilities under the pension or insurance contracts. Exemptions from that rule are laid down in the annex to Section 20 of the Regulation.

| Investment firms and collective investment funds | Yes. |
| Limits (max.) on securities issued by nonresidents | No. |
| Limits (max.) on investment portfolio held abroad | No. |
| Limits (min.) on investment portfolio held locally | No. |
| Currency-matching regulations on assets/liabilities composition | Yes. |

There are currency-matching regulations for real estate investment.
Changes during 2021 and 2022

Exchange Measures

Exchange measures imposed for security reasons
In accordance with IMF Executive Board Decision No. 144-(52/51)
03/03/2021
Restrictive measures against certain persons, entities, and bodies in view of the situation in Egypt were repealed with Council Regulation (EU) No. 2021/445.

Exchange Arrangement

Monetary policy framework
Other monetary framework
07/07/2021
Price stability is defined as a symmetric 2% inflation target over the medium term. Previously, it was defined as inflation below but close to 2%.

Arrangements for Payments and Receipts

Controls on exports and imports of banknotes
06/03/2021
In accordance with Regulation (EU) No. 2018/1672 which repealed Regulation (EC) No. 1889/2005, cash controls are implemented based on a mandatory declaration system for amounts of cash entering or leaving the EU with a value of €10,000 or more (same declaration amount as in Regulation (EC) No. 1889/2005).

On exports
Domestic currency
06/03/2021
In accordance with Regulation (EU) No. 2018/1672 which repealed Regulation (EC) No. 1889/2005, cash controls are implemented based on a mandatory declaration system for amounts of cash entering or leaving the EU with a value of €10,000 or more (same declaration amount as in Regulation (EC) No. 1889/2005).

Foreign currency
06/03/2021
In accordance with Regulation (EU) No. 2018/1672 which repealed Regulation (EC) No. 1889/2005, cash controls are implemented based on a mandatory declaration system for amounts of cash entering or leaving the EU with a value of €10,000 or more (same declaration amount as in Regulation (EC) No. 1889/2005).

On imports
Domestic currency
06/03/2021
In accordance with Regulation (EU) No. 2018/1672 which repealed Regulation (EC) No. 1889/2005, cash controls are implemented based on a mandatory declaration system for amounts of cash entering or leaving the EU with a value of €10,000 or more (same declaration amount as in Regulation (EC) No. 1889/2005).

Foreign currency
06/03/2021

**Exchange Measures**

Restrictions and/or multiple currency practices | Yes. The IMF staff report for the 2021 Article IV Consultation with Ghana states that as of July 1, 2021, Ghana maintained one exchange restriction and a MCP subject to IMF approval. The exchange restriction arises from the limitation/prohibition on purchasing and transferring foreign exchange for import transactions by importers that have not submitted to the commercial bank customs entry forms for any past foreign exchange transactions related to imports and that are unrelated to the underlying transaction. An MCP also arises, because the Bank of Ghana (BOG) requires the use of its internal rate (that is, the previous day’s weighted average interbank exchange rate) for government transactions and the surrender of foreign exchange proceeds from cocoa exports funded through the cocoa syndicated loan without having a mechanism in place to ensure that, at the time of the transaction, this exchange rate does not differ from the rate prevailing in the market rate (that is, the interbank exchange rate) and the rates used by banks in their transactions with their customers by more than 2%. (Country Report No. 21/165) |
| Exchange measures imposed for security reasons | No. |
| In accordance with IMF Executive Board Decision No. 144-(52/51) | No. |
| Other security restrictions | No. |

**Exchange Arrangement**

<table>
<thead>
<tr>
<th>Currency</th>
<th>Yes. The currency of Ghana is the Ghana cedi (GH₵).</th>

<td>No.</td>
</tr>
</tbody>
</table>

**Exchange rate structure**

<table>
<thead>
<tr>
<th>Unitary</th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>Dual</td>
<td>Yes. The BOG uses a reference rate for certain official transactions. This rate does not involve a mechanism to ensure that it does not differ from the prevailing market rate by more than 2%, thus giving rise to an MCP. The BOG publishes daily reference foreign exchange rates against cedis. The US dollar–cedi reference midrate is the weighted average of all the daily spot foreign exchange market transactions of at least US$10,000 reported by all banks until 2:30 p.m. to the BOG, excluding transactions where the BOG was a counterparty. The other currencies’ reference rate to cedis is based on the current cross-rates in the international foreign exchange market from Reuters.</td>
</tr>
<tr>
<td>Multiple</td>
<td></td>
</tr>
</tbody>
</table>
The de jure exchange rate arrangement is floating. The exchange rate of the cedi is determined by market forces. Ghana joined the W-ERM II of the WAMZ, which requires that the spot exchange rate between the cedi and the US dollar be maintained within a margin of ±15% around the central rate. The BOG does not publish information on its interventions.

Since February 2022, the exchange rate has increased its flexibility. However, more observations are needed to determine its new trend. Until then, the de facto exchange rate arrangement remains classified as crawl-like.

The BOG publishes daily reference foreign exchange rates against the cedi. The US dollar–cedi reference midrate is the weighted average of all the daily spot foreign exchange market transactions of at least US$10,000 reported by all banks until 2:30 p.m. to the BOG excluding, transactions where the BOG was a counterparty. All bank-bank and bigger size (above US$10,000) bank–customer deals concluded and reported are included. The other currencies’ reference rate to the cedi is based on the current cross-rates in the international foreign exchange market from Reuters. The previous day’s reference rate as computed is used for all transactions involving the BOG, except market intervention.

The Inflation-Targeting Framework was formally adopted for the conduct of the Bank’s monetary policy in 2007 and remains the monetary policy framework.

Target setting body

Yes.
The inflation target is set by consensus between the CB and the Government (MOF), taking into consideration prevailing macroeconomic conditions and policy consistency, and the need to provide certainty in the outlook. The current target of 8% was set in 2014 and has not been revised since. Prior to that, annual targets were set, given the prevalence of high inflation rates in the country.

The medium-term inflation target remains 8% with a tolerance band of ±2%.

The CB targets inflation, which is defined as the year-on-year (y-o-y) change in the CPI. The CPI measures the change in the general price level of goods and services with August 2018 as the revised base year.

The target horizon is four quarters ahead.

The policy rate was used in fixed-rate full allotment auctions of 14-day BOG bills. The monetary policy rate is currently at 22% (August 2022).

The interest rate corridor is the monetary policy rate ±1% for the early window (10:00 am - 12:30 pm) and ±5% for the late window (3:00 pm - 4:00 pm).

The Bank is accountable to the legislature and is required to submit monetary and financial stability reports that provide extensive details on the monetary policy course of action to parliament in February and July each year. As conditions determine, the legislature may issue summons to the governor to appear before its Finance Committee to address specific issues bordering on the conduct of monetary policy and financial stability.

Market making | No.
--- | ---
Forward exchange market | Yes.
ADs may engage in forward foreign exchange transactions. The BOG has conducted a number of swaps with AD banks as a means of promoting and developing foreign exchange products on the market.
Official cover of forward operations | No.

### Arrangements for Payments and Receipts

| Prescription of currency requirements | Yes. Settlemens related to transactions covered by bilateral payments agreements are made through government nostro accounts maintained at the BOG and other countries' CBs and commercial banks. All convertible currencies are accepted for all transactions. |
| Controls on the use of domestic currency | Yes. Local currency may not be used in international current and capital transactions. All transactions in Ghana must be conducted in cedis, which is the sole legal tender (BOG/GOV/SEC/2012/12). |
| For current transactions and payments | Yes. Local currency may not be used in international current transactions. All transactions in Ghana must be conducted in cedis, which is the sole legal tender (BOG/GOV/SEC/2012/12). |
| For capital transactions | Yes. Local currency may not be used in international capital transactions. All transactions in Ghana must be conducted in cedis, which is the sole legal tender (BOG/GOV/SEC/2012/12). |
| Transactions in capital and money market instruments | Yes. Local currency may not be used in international capital transactions. All transactions in Ghana must be conducted in cedis, which is the sole legal tender (BOG/GOV/SEC/2012/12). |
| Transactions in derivatives and other instruments | Yes. Local currency may not be used in international capital transactions. All transactions in Ghana must be conducted in cedis, which is the sole legal tender (BOG/GOV/SEC/2012/12). |
| Credit operations | Yes. Local currency may not be used in international capital transactions. All transactions in Ghana must be conducted in cedis, which is the sole legal tender (BOG/GOV/SEC/2012/12). |
| Use of foreign exchange among residents | Yes. Cash withdrawals over the counter from FEAs and Foreign Currency Accounts (FCAs) are permitted. For travel outside Ghana, cash withdrawals may not exceed US$10,000 or its equivalent in convertible foreign currency, a person, a trip (BG/GOV/SEC/2014/09 and BOG Press Release of August 8, 2014). Transactions among residents in foreign currency are prohibited, unless the BOG gives prior authorization to do so. |

### Payments arrangements

| Payments arrangements | Yes. |
| Bilateral payments arrangements | Yes. |

Operative | No.

Inoperative | Yes. Ghana has bilateral payment agreements with Bulgaria, China, Cuba, the Czech Republic, Poland, Romania, and the Slovak Republic. There have been delays in the settlement of clearing balances on these agreements.

Regional arrangements | Yes. Ghana is a member of the WAMA, WAMZ, and ECOWAS.

Clearing agreements | No. A regional clearing system called Pan African Payment and Settlement System has been set up but is yet to be operationalized.

Barter agreements and open accounts | No.

Administration of control | Yes. The BOG records and confirms foreign capital inflows and administers foreign exchange for official payments and travel. All other foreign exchange transactions by the private sector are approved and effected by ADs without reference to the BOG.

Payments arrears | No.
Official No.

Private No.

**Controls on trade in gold (coins and/or bullion)**

- **On domestic ownership and/or trade** No. Residents may purchase, sell, and hold gold in all forms.
- **On external trade** No. Gold bullion exports must be reported to the BOG.

**Controls on exports and imports of banknotes**

- **On exports** Yes.
- **On imports** Yes.

**Domestic currency** Yes. The exportation of Ghanaian banknotes is permitted up to, effective January 1, 2021, GHC10,000 (previously GHC500); larger amounts may not be exported. Residents and nonresidents travelling abroad are permitted to carry up to GHC10,000 in cash or bank drafts without declaration.

**Foreign currency** Yes. Residents and nonresidents travelling abroad are permitted to carry up to the equivalent of US$10,000 in cash, traveler’s checks, or bank drafts for direct purchases. Nonresident travelers may reexport foreign currency in excess of US$10,000, provided the amount was declared on entry. ADs may freely export foreign currency but must provide documentation.

Any person arriving in or departing from Ghana is permitted to carry up to US$10,000.00 or its equivalent in any monetary instruments without declaration. Any amount in excess of US$10,000.00 must be declared indicating the source and purpose for carrying such an amount.

**On imports** Yes.

**Domestic currency** Yes. Travelers may reimport up to, effective January 1, 2021, GHC10,000 (previously GHC500) they initially exported. Residents and nonresidents travelling abroad are permitted to carry up to GHS10,000 in cash or bank drafts without declaration. Banks and other financial institutions are not allowed to import banknotes in domestic currency. This is within the purview of the CB.

**Foreign currency** No. Commercial banks are allowed to import foreign currency with notice to the BOG indicating the amount and currencies, for monitoring purposes only.

Any person arriving in or departing from Ghana is permitted to carry up to US$10,000.00 or its equivalent in any monetary instruments without declaration. Any amount in excess of US$10,000.00 must be declared indicating the source and purpose for carrying such an amount.

**Resident Accounts**

**Foreign exchange accounts permitted** Yes. Residents and nonresidents may open FEAs and FCAs. Balances in these accounts are held in foreign currency.

**Held domestically** Yes. FEAs may be opened by Ghana residents and nonresidents with any AD bank in Ghana. FEAs can be credited with foreign exchange generated from activities in Ghana such as proceeds from exports of goods and services and any other foreign exchange earnings not subject to surrender requirements.

Balances on these accounts cannot be freely transferred without the necessary supporting documentation to back the underlying...
transaction. Holders of the account can transfer up to US$10,000.00 per annum from these accounts to meet payment obligations abroad without documentation. The thresholds for transfers abroad by importers without initially submitting documentation to their bankers are US$50,000.00.

FCAs may be opened by residents, nonresidents, and non-Ghanaians with any AD bank in Ghana. These accounts can be credited only with unrequited transfers such as transfers from abroad for investment or embassy transfers. Balances are freely transferrable in Ghana and abroad in convertible currencies. These accounts may be debited for payment, for transfers to other foreign accounts, and for purchases of external currencies. These accounts are free from any restrictions, besides being fed only with unrequited transfers.

Documentation for transfers from FCAs is the regular form used by the banks, which also indicates the purpose of the transfer. Transfers from FEAs and FCAs to cedi accounts are permitted. Except for transfers from FEA to FCA which are prohibited, all other transfers between accounts are permitted. Checks and checkbooks may be issued by banks to holders of FEAs and FCAs (BOG Press Release of August 8, 2014).

External transfers from FEAs and electronic card payments by importers up to US$50,000 are permitted without initial documentation. Where documentation in respect of a transfer remains outstanding, any subsequent import transaction by the importer, irrespective of value, can only be made on prior provision of documentation required for the current import transaction. Importers were allowed to continue to use the margin account (managed by banks on their behalf) to build up foreign exchange to be used exclusively for the purpose for which the account was opened (BG/GOV/SEC/2014/09). Importers effect transfers for payments only from their FEA accounts and not the FCAs.

Approval required

No. FEAs and FCAs could be held abroad. FEAs are subject to BOG approval, while FCA may be opened without the BOG approval.

Approval required

Yes. BOG approval is required for FEAs.

Accounts in domestic currency held abroad

No.

Accounts in domestic currency convertible into foreign currency

Yes. Conversion is allowed for approved purposes, subject to a documentation requirement. Conversion is not allowed to a FCA.

Nonresident Accounts

Residents and nonresidents may open FEAs and FCAs. Balances in these accounts are held in foreign currency.

FEAs may be opened by Ghana residents and nonresidents with any AD bank in Ghana. FEAs can be credited with foreign exchange generated from activities in Ghana such as proceeds from exports of goods and services and any other foreign exchange earnings not subject to surrender requirements.

Balances on these accounts cannot be freely transferred without the necessary supporting documentation to back the underlying transaction. Holders of the account can transfer up to US$10,000.00 per annum from these accounts to meet payment obligations abroad without documentation. The thresholds for transfers abroad by importers without initially submitting documentation to their bankers are US$50,000.00.

FCAs may be opened by residents, nonresidents, and non-Ghanaians with any AD bank in Ghana. These accounts can be credited only
with unrequited transfers such as transfers from abroad for investment or embassy transfers. Balances are freely transferrable in Ghana and abroad in convertible currencies. These accounts may be debited for payment, for transfers to other foreign accounts, and for purchases of external currencies. These accounts are free from any restrictions, besides being fed only with unrequited transfers. Documentation for transfers from FCAs is the regular form used by the banks, which also indicates the purpose of the transfer.

Transfers from FEAs and FCAs to cedi accounts are permitted. Except for transfers from FEA to FCA which are prohibited, all other transfers between accounts are permitted. Checks and checkbooks may be issued by banks to holders of FEAs and FCAs (BOG Press Release of August 8, 2014).

External transfers from FEAs and electronic card payments by importers up to US$50,000 are permitted without initial documentation (BG/GOV/SEC/2014/09).

Import licenses and other nontariff measures

Yes.

Positive list

No.

Negative list

Yes. Imports of narcotic drugs are prohibited, and imports of small weapons are restricted.

Open general licenses

No.

Licenses with quotas

No.

Other nontariff measures

No.

Import taxes and/or tariffs

Yes. The maximum tariff rate is 20% of the c.i.f. value of imports, in addition to a VAT of 15% and a national health insurance levy of 2.5%. Importers without a taxpayer identification number are subject to a 5% withholding tax on the value of their imports.

Taxes collected through the exchange system

No.

State import monopoly

No.

Exports and Export Proceeds

Repatriation requirements

Yes. All exporters, except exporters who operate in accordance with retention agreements and who have been permitted to operate accounts offshore, would be required to repatriate in full all their export receipts to banks in Ghana, within a maximum repatriation period not exceeding 60 days from the day of shipment of goods.

Surrender requirements

Yes.

Surrender to the central bank

Yes. The proceeds of the cocoa syndicated loan are subject to be surrendered to the BOG. Subject to agreements between each mining company and the MOF, a proportion of gold export proceeds must be surrendered to the BOG in accordance with the Minerals and Mining Act (Act No. 703) of 2006.

Surrender to authorized dealers

Yes. Exporters are required to sell foreign exchange receipts from the export of minerals and cocoa (other than the proceeds of the cocoa syndicated loan) directly to the commercial banks within three working days from the date when export proceeds are repatriated. Export proceeds subject to surrender requirement are allowed to be sold by the exporter to any local bank, regardless of where export proceeds are repatriated.

Financing requirements

No.

Documentation requirements

Yes.

Letters of credit

No.

Guarantees

No.

Domiciliation

No.

Preshipment inspection

Yes. Exports are subject to customs inspection.

Export licenses

No.

Without quotas

No.

With quotas

No.
**Export taxes**

Yes.

Collected through the exchange system

No.

Other export taxes

Yes. Cocoa exports are subject to a tax that is calculated as the difference between export proceeds and payments to farmers, together with the Cocoa Board’s costs if proceeds exceed payments. Lumber exports are subject to a 10%–30% tax depending on the species.

**Payments for Invisible Transactions and Current Transfers**

**Controls on these transfers**

Yes.

Trade-related payments

Yes. Freight charges may be paid to the local shipping agents; the transfer of funds to cover such charges is normally permitted, provided the application is properly documented.

**Prior approval**

No.

**Quantitative limits**

No.

**Indicative limits/bona fide test**

Yes. Payments are subject to proper documentation.

Investment-related payments

No. No restrictions apply to the payment of amortization of loans or depreciation of direct investments. Banks are required to submit a report of the transaction to the BOG. There are no restrictions on transfers abroad of nonresidents’ profits, dividends, interest payments, and rent payments. Banks request for underlying supporting documents.

**Prior approval**

No.

**Quantitative limits**

No.

**Indicative limits/bona fide test**

No.

Payments for travel

Yes.

**Prior approval**

No.

**Quantitative limits**

Yes. Residents and nonresidents traveling abroad may carry up to the equivalent of US$10,000 in cash or traveler’s checks or any other instrument. Nonresident travelers may reexport foreign currency in excess of US$10,000, provided the amount was declared on entry. Without prejudice to the limit of US$10,000 withdrawal for travel and the US$10,000 annual transfer without documentation, OTC cash withdrawals from FCAs and FEAs are permitted. OTC cash withdrawals, that is, withdrawing cash from the bank, are permitted up to a limit of US$10,000 per transaction. OTC withdrawals are for travelling purposes, and the OTC limit is applicable to FCAs. The withdrawal limit is per person, per travel.

**Indicative limits/bona fide test**

Yes. Payments for travel must be within the prescribed cash limits of US$10,000. Valid passport, tickets, and visa are required. For transfer purposes, a customer may transfer in excess of US$10,000 on confirmation of bona fide nature of transaction by presenting the supporting documentation.

**Personal payments**

Yes.

**Prior approval**

No.

**Quantitative limits**

No.

**Indicative limits/bona fide test**

Yes. These payments are allowed up to US$10,000 a year without
documentation. Transfers in excess of the mandatory US$10,000.00 are not permitted, unless they are supported with the relevant underlying documents.

<td>Certain areas of economic activity (hairdressing, barbering, and lottery) are not open to foreigners. Foreign investors in Ghana must register and comply with the requirements of the Ghana Investment Promotion Center, if they are to benefit from the incentives available under the Ghana Investment Promotion Center Act 2013 (Act No. 865), such as tax holidays and initial capital allowances. The minimum qualifying amounts of investment by a non-Ghanaian are as follows: (1) US$200,000 or its equivalent in capital goods by way of equity participation in a joint-venture enterprise with a Ghanaian partner; (2) US$500,000 or its equivalent in capital goods by way of equity capital when the enterprise is wholly owned by a non-Ghanaian; and (3) US$1 million or its equivalent in goods by way of equity capital when the enterprise is either wholly or partly owned by a non-Ghanaian, employs at least 20 Ghanaians, and is involved in the purchase and sale of goods. BOG approval is required for an equity stake of more than 10% in the banking sector by nonresidents. The minimum capital requirement for all banks is GHC400 million. In accordance with Section 10(2) C of Act No. 930 of 2016, where the applicant for a banking license is a subsidiary of a foreign company, the applicant will maintain within the country, the required capital in the form of funds transferred from abroad together with other funds that may be determined by the BOG. There are no restrictions on the repatriation of capital, dividends, or profits; banks must submit a report to the BOG.</td>

requirement on domestic and foreign deposit liabilities in cedis only (BOG letter # SF. 28 of November 17, 2014, on Revised Monetary Policy Measure). Banks do not hold reserves in different currencies. Measures aimed at containing the impact of the COVID-19 pandemic on Ghana included a reduction in the primary reserve requirements from 10% to 8% for banks and Microfinance Institutions, as well as from 8% to 6% for Savings and Loans companies, Finance Houses, and Rural and Community Banks. These are in effect until further notice, which will be based on the monitoring of the pandemic as well as stress tests.

Following the issuance of the policy measures, a Notice No. BG/GOV/SEC/2020/01 was issued to ensure that BOG’s objective of enabling banks and Specialized Deposit-taking Institutions (SDIs) to provide more liquidity and financial support to critical sectors of the economy to mitigate the adverse impact of COVID-19 on the Ghanaian economy was met. Restrictions such as suspension on the declaration or payment of dividends or distributing reserves to shareholders as well as desisting from utilizing the released liquidity based on the policy measures to purchase Government of Ghana and BOG Securities were introduced.

In monitoring the impact of COVID-19, BOG issued Notice No. BG/GOV/SEC/2021/06 effective April 12, 2021, as a revision to the notice on the suspension of dividend payments. This Notice directs banks and SDIs to desist from paying dividends unless some conditions are met. The conditions include compliance to original CAR of 13%, Cash Reserve Ratio of 10% as well as NPL ratio of below industry average at all times.

**Domestic currency**

01/01/2021

Travelers may reimport up to GHC10,000 (previously GHC500) they initially exported.

**Provisions Specific to the Financial Sector**

In monitoring the impact of COVID-19, Bank of Ghana issued Notice No. BG/GOV/SEC/2021/06 as a revision to the notice on the suspension of dividend payments. This Notice directs banks and Specialized Deposit-taking Institutions to desist from paying dividends unless some conditions are met. The conditions include compliance to original CAR of 13%, Cash Reserve Ratio of 10% as well as NPL ratio of below industry average at all times.

## Exchange Measures

| Restrictions and/or multiple currency practices | No. |
| Exchange measures imposed for security reasons | Yes. |
| In accordance with IMF Executive Board Decision No. 144-(52/51) | Yes. |

Restrictive measures against persons, entities, groups, countries, and territories are in place for security reasons (including but not limited to combating terrorism and its financing, proliferation of nuclear technology and weapons of mass destruction and its financing, genocide, and piracy), in accordance with (1) financial sanctions against officials of Belarus responsible for the crackdown on civil society and democratic opposition; (2) freezing of funds and economic resources of persons in Côte d’Ivoire, the Democratic Republic of the Congo, and Lebanon, as designated by the UN Sanctions Committee; (3) restrictive measures on persons and entities identified as responsible for the misappropriation of government funds in Egypt and Tunisia; (4) freezing of funds and economic sanctions on persons in Eritrea designated by the UN Sanctions Committee; (5) restrictive measures with respect to Guinea concerning members of the National Council for Democracy and Development and persons associated with them, including an asset freeze; (6) financial sanctions against the Islamic Republic of Iran in accordance with Regulation (EU) No. 961/2010 and against the Democratic People’s Republic of Korea in accordance with Regulation (EU) No. 329/2007 and all relevant UNSC resolutions; (7) restrictive measures on persons responsible for serious human rights violations in the Islamic Republic of Iran; (8) prohibition against the satisfaction of Iraqi claims with regard to contracts and transactions whose performance was affected by UNSC Resolution No. 661 (1990) and related resolutions; (9) measures with respect to Liberia implemented in UNSC Resolution No. 1532 (2004) in the EU; (10) relevant measures with respect to Libya in UNSC Resolution No. 1970 (2011) in the EU and additional EU measures; (11) restrictions on investment in companies owned or controlled by persons associated with the military regime of Myanmar and the freezing of funds and economic resources of all senior serving members of the Myanmar military; (12) measures with respect to Somalia implemented under various EU Council regulations; (13) the freezing of assets of persons identified as responsible for the violent repression of the civilian population in Syria, in accordance with Regulation (EU) No. 36/2012; (14) financial sanctions on persons from the former Yugoslavia indicted by the International Criminal Tribunal for the Former Yugoslavia; (15) measures in UNSC Resolution No. 1591 (2005) in the EU; (16) measures against certain persons and entities with a view to combating terrorism; (17) a ban...
on technical assistance, financing, and financial assistance related to military activities, a ban on exports of equipment that might be used for international repression, and the freezing of funds and economic resources of members of the government of Zimbabwe and of natural and legal persons, entities, and bodies associated with them; (18) restrictive measures directed at certain persons, entities, and bodies in view of the situation in Ukraine, in accordance with Regulation (EU) No. 208/2014, and with respect to actions undermining or threatening the territorial integrity, sovereignty, and independence of Ukraine, in accordance with Regulation (EU) No. 269/2014; (19) a ban on provision of certain services, prohibition against satisfying certain claims made by certain persons, entities, or bodies and a ban on investment in entities in Crimea and Sevastopol, in accordance with Regulation (EU) No. 692/2014; and (20) prohibition against financing the travel of individuals who travel to a country other than their country of residence or nationality for the purpose of the perpetration, planning, preparation of, or participation in terrorist acts or providing or receiving terrorism training, in accordance with UNSC Resolution No. 2178 (2014), with the necessary implementing measures in progress.

Other security restrictions Yes.

Exchange Arrangement

Currency

Yes. The currency of Greece is the euro.

Other legal tender No.

Exchange rate structure

Unitary Yes.

Dual

Multiple

Classification

No separate legal tender

Currency board

Conventional peg

Crawl-like arrangement

Pegged exchange rate within horizontal bands

Other managed arrangement

Floating

Free floating Yes. The exchange rate arrangement of the euro area is free floating.
Greece participates in a currency union (EMU) with 18 other members of the EU and has no separate legal tender. The ECB publishes information regarding its interventions; it last intervened in March 2011. When it intervenes, the ECB intervenes at the quotes of the market makers.

Official exchange rate  Yes.  The ECB publishes a reference rate based on the daily concertation procedure between CBs within and outside the European System of CBs. The euro foreign exchange reference rates are determined by the ECB daily at 14:15 Central European Time, and are published at around 16:00 Central European Time. The reference rate against the euro is the average of the buying and selling rates. The ECB reference rates are not used for foreign exchange transactions by the Bank of Greece (BOG) since July 1, 2016.

To maintain price stability is the primary objective of the Eurosystem and of the single monetary policy for which it is responsible. This is stated in the Treaty on the Functioning of the EU, Article 127(1). “Without prejudice to the objective of price stability,” the Eurosystem will also “support the general economic policies in the EU with a view to contributing to the achievement of the objectives of the Union, as laid down in Article 3 of the Treaty on European Union.” These include “balanced economic growth,” “a highly competitive social market economy, aiming at full employment and social progress, and a high level of protection and improvement of the quality of the environment.” Effective July 7, 2021, price stability is defined as a symmetric 2% inflation target over the medium term. (Previously, it was defined as inflation rate below but close to 2% over the medium term.)

exchange bureaus. As of December 31, 2021, there were 10 foreign exchange bureaus authorized to engage in foreign exchange transactions directly with the BOG. They engage in purchasing and selling foreign banknotes and traveler’s checks, money transfer intermediation, promotion of and intermediation in the supply of bank products and services (excluding commitments on behalf of credit institutions and the execution of payments or receipts on behalf of such institutions), advance payments to credit card holders, payment of bills issued by noncredit institutions, and so on. Subject to certain conditions, such companies may cooperate with credit institutions in the transfer of funds that (1) are credited to deposit accounts of the principals or beneficiaries; (2) maintained with the cooperating credit institution, either directly or through deposit accounts maintained by these companies with the cooperating credit institutions; or (3) concern the payment of bills/liabilities of the principals to credit institutions. Some of these conditions do not apply to cooperation with a parent credit institution based in Greece or another EEA country.

OPFs may invest only in shares in mutual funds and UCITS that fall under Directive No. 2009/65/EC and operate in an EU or EEA member country.

Controls apply to non-EU investors regarding (1) acquisition of real estate in border regions; (2) investment in the mining sector, unless concession of mineral rights is granted; (3) establishment of a representative office or a branch of a non-EEA foreign bank, unless authorization is granted; (4) investment in airlines established in the country that must be majority owned and effectively controlled by EU members and/or nationals of EU members, unless otherwise provided for through an international agreement to which the EU is a signatory; (5) ownership of more than 49% of a Greek flag vessel for maritime transportation or fishing purposes; (6) ownership of more than 25% of the capital of a television (including cable television) company or a radio broadcasting company; (7) investment in the...
accounting sector; and (8) to the extent that under Directive (EU) No. 85/611, a depository of a UCITS must either have its registered office in the same EU country as that of the company or be established in the EU country if its registered office is in another EU country.

Regulation (EU) 2019/452 of March 19, 2019, established an EU-wide framework for FDI screening and for the European Commission and the Member States to coordinate their actions on foreign investments.

Provisions specific to institutional investors
Insurance companies Yes.
Limits (max.) on securities issued by nonresidents No.
Limits (max.) on investment portfolio held abroad No.
Limits (min.) on investment portfolio held locally Yes. There are certain prudential provisions that differ according to the type of institutional investor.

According to Article 104 (prudent person principle) of Law No. 4364/2016 (Transposition of Directive No. 2009/138/EC of the European Parliament and of the Council of November 25, 2009, on the taking-up and pursuit of the business of insurance and reinsurance (Solvency II) into Greek legislation), the following apply: Insurance and reinsurance companies invest all their assets in accordance with the prudent person principle, as specified in Paragraphs 2, 3, and 4 of this article. With respect to the whole portfolio of assets, insurance and reinsurance companies must invest only in assets and instruments whose risks the investor can properly identify, measure, monitor, manage, control, and report and appropriately take into account in the assessment of its overall solvency needs in accordance with Article 33 Paragraph 1 (a). All assets, in particular those covering the Minimum Capital Requirement and the Solvency Capital Requirement, must be invested in such a manner as to ensure the security, quality, liquidity, and profitability of the portfolio as a whole. In addition, the localization of those assets must be such as to ensure their availability. Assets held to cover the technical provisions must also be invested in a manner appropriate to the nature and duration of the insurance and reinsurance liabilities. Those assets must be invested in the best interest of all policyholders and beneficiaries, taking into account any disclosed policy objective. In the case of a conflict of interest, insurance companies, or the entity that manages their asset
portfolio, must ensure that the investment is made in the best interest of policyholders and beneficiaries. Without prejudice to Paragraph 2, with respect to assets held with respect to life insurance contracts where the investment risk is borne by the policyholders, the second, third, and fourth subparagraphs of this paragraph apply. Where the benefits provided by a contract are directly linked to the value of units in a UCITS as defined in l. 4099/2012 (Government Gazette A 250) or in Directive No. 2009/65/EC, or to the value of assets contained in an internal fund held by the insurance companies, usually divided into units, the technical provisions with respect to those benefits must be represented as closely as possible by those units or, if units are not established, by those assets. Where the benefits provided by a contract are directly linked to a share index or some other reference value other than those referred to in the second subparagraph, the technical provisions with respect to those benefits must be represented as closely as possible either by the units deemed to represent the reference value or, if units are not established, by assets of appropriate security and marketability that correspond as closely as possible with those on which the particular reference value is based. Where the benefits referred to in the second and third subparagraphs include a guarantee of investment performance or some other guaranteed benefit, the assets held to cover the corresponding additional technical provisions are subject to Paragraph 4. Without prejudice to Paragraph 2, with respect to assets other than those covered by Paragraph 3, the second to fifth subparagraphs of this paragraph apply. The use of derivative instruments is possible insofar as they contribute to a reduction of risks or facilitate efficient portfolio management. Investment and assets that are not admitted to trading on a regulated financial market must be kept to prudent levels. Assets must be properly diversified in such a way as to avoid excessive reliance on any particular asset, issuer or group of companies, or geographical area and excessive accumulation of risk in the portfolio as a whole. Investments in assets issued by the same issuer, or by issuers belonging to the same group, must not expose the insurance companies to excessive risk concentration.

According to Article 105 (freedom of investment) of Law No. 4364/2016, insurance and reinsurance companies must invest in accordance with this law without any other restriction, and their investment decisions must not be subject to the prior approval or systematic notification the Supervisory Authority.

Special controls apply to second-pillar OPFs in accordance with Law No. 3586/2007 in the form of portfolio diversification limits. These funds are allowed to invest in shares, bonds, and corporate bonds listed on regulated markets and issued in Greece or in another member of the EU or the EEA; shares in mutual funds and UCITS that fall under Directive No. 2009/65/EC, as amended, and operate in any EU or EEA member country; and government securities, bank deposits, and real estate. OPFs, as long-term institutional investors, may invest in the above-mentioned financial instruments within prudential limits, according to Law No. 3586/2007 and the associated ministerial decrees.

Controls apply to the purchase of securities issued by non-EU residents and not listed on the Athens Exchange. Special controls apply to second-pillar OPFs in accordance with Law No. 3586/2007 in the form of portfolio diversification limits. These funds may invest in shares, bonds, and corporate bonds listed on regulated markets and issued in Greece or in another member of the EU or the EEA; shares
in mutual funds and UCITS that fall under Directive No. 2009/65/EC, as amended, and operate in any EU or EEA member country; and government securities, bank deposits, and real estate. OPFs, as long-term institutional investors, may invest in the above-mentioned financial instruments within prudential limits, according to Law No. 3586/2007 and the associated ministerial decrees.

| Limits (min.) on investment portfolio held locally | Yes. | Controls apply if equity investments are to form more than 23% of a public pension fund’s reserves. |
| Currency-matching regulations on assets/liabilities composition | Yes. | In the case of second-pillar OPFs, each fund is allowed to invest up to 30% of the assets that form part of the technical reserves in assets denominated in currencies other than those of its liabilities. |

| Investment firms and collective investment funds | No. |
| Limits (max.) on securities issued by nonresidents | No. |
| Limits (max.) on investment portfolio held abroad | No. |
| Limits (min.) on investment portfolio held locally | No. |
| Currency-matching regulations on assets/liabilities composition | No. |

**Changes during 2021 and 2022**

**Exchange Measures**

**Exchange measures imposed for security reasons**

In accordance with IMF Executive Board Decision No. 144-(52/51) 03/16/2021

**Exchange Arrangement**

**Monetary policy framework**

Price stability is defined as a symmetric 2% inflation target over the medium term. (Previously, it was defined as inflation rate below but close to 2% over the medium term.)
GRENADA
(Position as of June 30, 2022)

Status under IMF Articles of Agreement

Date of membership
August 27, 1975.

Article VIII
Yes. Date of acceptance: January 24, 1994.

Article XIV

Exchange Measures

Restrictions and/or multiple currency practices
No. No restrictions as reported in the latest IMF staff report as of December 31, 2021.

Exchange measures imposed for security reasons
Yes.

In accordance with IMF Executive Board Decision No. 144-(52/51)
No.

Other security restrictions
Yes. Restrictions apply to trade with Libya.

Exchange Arrangement

Currency
Yes. The currency of Grenada is the Eastern Caribbean dollar, issued by the ECCB.

Other legal tender
No.

Exchange rate structure
Unitary
Yes.

Dual

Multiple

Classification
No separate legal tender

Currency board
Yes. The de jure and de facto exchange rate arrangements are classified as a currency board. Grenada participates in a currency union with seven other members of the ECCU and has no separate legal tender. The Eastern Caribbean dollar, the common currency, is pegged to the US dollar at ECS2.70 per US dollar. The ECCB officially covers at least 60% of base money with its foreign reserves. The operational guideline is set at 80%, although in practice, the coverage has been maintained at 95%–100%.

Conventional peg

Stabilized arrangement

Crawling peg

Crawl-like arrangement

Pegged exchange rate within horizontal bands
Other managed arrangement

Floating

Free floating

Official exchange rate  Yes.  The Eastern Caribbean dollar is pegged to the US dollar under a currency board arrangement at ECS2.70 per US dollar. This rate applies to accounting and valuation.

Monetary policy framework

Exchange rate anchor  Yes.  The monetary policy framework is an exchange rate anchor vis-à-vis the US dollar.

U.S. dollar  Yes.

**Foreign exchange market** Yes. The ECCB sets an indicative rate for commercial banks to follow. This rate has been EC$2.6882–EC$2.7169 per US dollar for a long time. Commercial banks may freely set their foreign exchange commissions in transactions with their clients for non-US currencies.

**Spot exchange market** Yes. The ECCB trades US currency with Bank of America.

**Operated by the central bank** Yes.

**Foreign exchange standing facility** Yes. The ECCB is committed to buying and selling US dollars at a fixed exchange rate of EC$2.7 per US dollar. Actual rates may differ slightly so that the ECCB can cover its administrative expenses. There is no bid-ask spread.

Grenada is a member of CARICOM and the OECS.

The Trade and Industry Unit of the MOF administers trade control.

Residents other than the monetary authorities, ADs, and industrial users are not permitted to hold or acquire gold in any form other than jewelry or coins for numismatic purposes.

Imports of gold are permitted for industrial purposes only and are subject to customs duties and charges. The MOF issues licenses to import gold. The exportation of gold is not usually permitted.

Exports of domestic currency, Eastern Caribbean dollar notes, and coins, outside the ECCU, are limited to EC$10,000 as prescribed by the ECCB.
Resident Accounts

Foreign currency No.

Foreign exchange accounts permitted Yes.

Held domestically Yes. Foreign exchange accounts may be freely debited but may be credited only with foreign exchange earned or received from outside the ECCB area. Holders of these accounts must submit regular statements of debits and credits to the MOF.

Approval required No.

Held abroad Yes.

Approval required No.

Accounts in domestic currency held abroad Yes.

Accounts in domestic currency convertible into foreign currency n.r.

Nonresident Accounts

Foreign exchange accounts permitted Yes. The regulations governing resident accounts apply.

Approval required No.

Domestic currency accounts Yes. Domestic currency accounts must be credited with funds from an external source.

Convertible into foreign currency Yes.

Approval required Yes. Approval is required for amounts exceeding EC$10,000.

Blocked accounts No.

Imports and Import Payments

Foreign exchange budget No.

Financing requirements for imports No.

Minimum financing requirements No.

Advance payment requirements No.

Advance import deposits No.

Documentation requirements for release of foreign exchange for imports Yes. Payments for documented imports are free of restrictions; those for restricted imports require the MOF permission.

Domiciliation requirements No.

Preshipment inspection No.

Letters of credit Yes.

Import licenses used as exchange licenses No.

Other No.

Import licenses and other nontariff measures Yes.
Import licenses and other nontariff measures

Positive list
Yes.

Negative list
Yes.
Prohibited goods include whole chickens, chicken eggs, live breeding poultry, war toys, animal skins, Styrofoam, and various drugs deemed to be dangerous.

Open general licenses
Yes.
There are quantitative restrictions on certain items imported from non-CARICOM sources, including arms and ammunition, carbonated beverages, flour, industrial gas, paint, and miscellaneous items associated with the furniture and construction industries. Items imported from the CARICOM countries that require licenses include curry products, industrial gas, furniture, and solar water heaters.

Licenses with quotas
No.

Other nontariff measures
No.

Import taxes and/or tariffs
Yes.
Grenada applies the fourth phase of the CARICOM CET. Imports from non-CARICOM countries are subject to the following CET rates: 40% for most agricultural imports and 5%–20% for most other items. Most imports are subject to a 6% customs service charge. Imports not exempt from customs duties are subject to a VAT regime with a standard rate of 15%, a reduced rate for hotel accommodation and dive activity of 10%, and a rate of 0% for certain goods and services. There are environmental levies of ECS0.25 on each imported glass bottle and ECS0.50 on each plastic bottle containing liquid (including carbonated and noncarbonated beverages and syrups). Other levies include a 1% charge on the c.i.f. value of certain durable consumer items, a 2% charge on the c.i.f. value of imported used cars less than five years old, a 30% charge on the c.i.f. value of imported cars five years old or older, and a 5%–20% charge on the c.i.f. value of imported used trucks. Imports of capital equipment are subject to a minimum charge of 5% under the CET and 15% under the VAT. However, most capital imports are granted exemptions from import duties, and all capital imports by domestic commodity boards involved in the growing or packaging of bananas, cocoa, or nutmeg are exempt from import duties, provided the imports are used for improvements in these industries.

Taxes collected through the exchange system
No.

State import monopoly
Yes.
The Marketing and National Importing Board is the sole authorized importer of bulk purchases of whole milk, white and brown sugar, and brown rice.

Exports and Export Proceeds

Credit card use abroad | No.
Prior approval | No.
Quantitative limits | No.
Indicative limits/bona fide test | No.
Other payments | Yes.
Prior approval | Yes. | The MOF approval is required and is granted on the basis of agreements incorporating payments for consulting services and legal fees. Payments may be made up to the amount approved, subject to withholding of income tax, where applicable.
Quantitative limits | Yes.
Indicative limits/bona fide test | Yes.

Proceeds from Invisible Transactions and Current Transfers

Repatriation requirements | Yes.
Surrender requirements | Yes.
Surrender to the central bank | No.
Surrender to authorized dealers | Yes.
Restrictions on use of funds | No.

Capital Transactions

Controls on capital transactions | Yes.
Repatriation requirements | Yes. | Earnings from investments in certain securities must be repatriated.
Surrender requirements | No.
Surrender to the central bank | No.
Surrender to authorized dealers | No.
Controls on capital and money market instruments | Yes.
On capital market securities | Yes.
Shares or other securities of a participating nature | Yes.
Purchase locally by nonresidents | Yes. | The MOF approval is required.
Sale or issue locally by nonresidents | Yes.
Purchase abroad by residents | Yes. | Certificates of title to foreign currency securities held by residents must be deposited with an authorized depository in Grenada, and earnings on these securities must be repatriated.
Under the Banking Act, investment of a licensed financial institution in another (single) financial institution (including a subsidiary) must not exceed 10% of the capital base. The aggregate amount of such investment, which a licensed financial institution may undertake in other financial institutions (including subsidiaries), must not exceed 25% of its capital base. As per Section 10 of the new Banking Act, financial institutions can no longer acquire or hold shares or ownership interest in a nonfinancial firm (for example, in commercial, agricultural, or industrial company or unincorporated entity).

Other legal tender No.

Exchange rate structure

Unitary Yes.

Dual

Multiple

Classification

No separate legal tender

Currency board

Conventional peg

Stabilized arrangement Yes. The de jure exchange arrangement is floating. In accordance with the Monetary Law and the Free Foreign Exchange Convertibility Law, Guatemala has a flexible exchange rate arrangement under which the rate is determined in the foreign exchange market by supply and demand. However, the Bank of Guatemala (Banco de Guatemala—BOG) may intervene in the foreign exchange market to limit volatility in the nominal exchange rate, without affecting its trend. The BOG intervenes through foreign exchange auctions based on a transparent rule, which limits daily volatility. The fluctuation band (added to or subtracted from the moving average exchange rate from the past five days) used to determine whether the BOG can participate in the foreign exchange market is 0.90%. The maximum amount of daily currency purchases or sales is US$50.0 million. The BOG may also intervene when the nominal exchange rate is unusually volatile, but this instrument has only been used twice: the
first time during the world economic and financial crisis of 2008–2009 and the second during the third week of March 2020, when the nominal exchange rate overreacted in response to the high levels of uncertainty associated with the global spread of COVID-19 and concerns regarding the latter’s potential impact on health and the economy.

In accordance with the policy adopted by the Monetary Board, the Implementing Committee authorized participation with the accumulation mechanism up to US$1,500.0 million as of December 2021. In fact, the first phase of the mechanism, in the amount of US$500.0 million, was implemented in February, and with effect until this amount was achieved or until June 30 of the present year, whichever occurred first. In May, as the amount under the first phase was achieved, the Implementing Committee decided that a second phase should be implemented and that there should be an extension of both the amount (an additional US$500.0 million) and the term (until August 31) to reduce the surplus foreign exchange present on the foreign exchange market. By the end of August, the second phase quota was almost exhausted, so the Implementing Committee decided that a third phase should be implemented and that there should be another extension of both the amount (an additional US$500.0 million) and the term (until December 28), to continue reducing the foreign currency surpluses that prevailed in the market at that time. As of December 31, 2021, the BOG, through the international monetary reserve accumulation mechanism, recorded purchases of US$1,500.0 million, while, through the activation of the exchange rate rule, it purchased US$702.9 million and made sales of US$84.0 million. As a result of the above, the BOG’s net participation on the Institutional Foreign Exchange Market (IFEM) as of December 31, 2021, was US$2,118.9 million, equivalent to 3.43% of the total traded on the IFEM.

As of June 30, 2022, the BOG, through the activation of the exchange rate rule, purchased US$212.0 million and made sales of US$416.0 million; in addition, through the international monetary reserve accumulation mechanism, purchases of US$1,015.0 million were recorded.

In accordance with the exchange rate policy adopted by the Monetary Board for 2022, on two occasions, the Implementing Committee authorized participation through the international monetary reserve accumulation mechanism; on the first occasion, participation up to the amount of US$1,000.0 million was approved; this mechanism was implemented as of January 7 and remained in effect until the amount indicated was reached, to reduce the foreign currency surpluses that prevailed in the market and those that could occur in 2022. Taking into consideration that in May of this year the approved quota had already been reached, the Implementing Committee extended the participation by an additional US$500.0 million; this extension was implemented as of May 24 and will be in effect until the amount is exhausted. In this connection, the net participation of the BOG on the IFEM on June 30, 2022, was US$1,015.0 million, equivalent to 2.23% of the total traded on the market during that period. The de facto exchange rate arrangement is classified as a stabilized arrangement.

Pegged exchange rate within horizontal bands
Other managed arrangement

Floating

Free floating

**Official exchange rate** Yes. The BOG calculates and publishes the reference exchange rate, which is equal to the weighted average of the exchange rates corresponding to all the foreign exchange buying and selling operations engaged in by the institutions in the IFEM. The reference exchange rate is applicable to, inter alia, the settlement of tax and other obligations entailing payments to or from the government and its entities and the resolution of administrative and/or legal disputes.

**Monetary Policy Committee**

Central Bank Board Yes. The target setting body is the Monetary Board (Junta Monetaria). Since 2005, the implementation of monetary, exchange rate, and credit policies in Guatemala has been based on the explicit inflation-targeting framework, which consists, in general terms, of a monetary policy strategy based on a commitment by the monetary authority and the BOG to set an explicit target for inflation, taking into account one or more time frames to reach the said target. Against this background, as a result of the inflation-targeting framework consolidation process, the Monetary Board (Junta Monetaria) set a medium-term inflation target, as of 2013, of 4.0% ±1 percentage point, with the aim of achieving the inflation convergence process to reach the said target by anchoring the inflationary expectations of economic agents. The decisions taken by the Monetary Board are adopted by a majority vote of those members present. In practice, the majority of Monetary Board decisions are taken by consensus (Organic Law of the BOG, Article 21).

**Other**

Government and Central Bank

**Inflation target** Yes.

**Target number** Yes.

**Point target**
The annual inflation target is announced as a central figure with a fluctuation band that it is set at 4.0% ±1 percentage point, which has been the medium-term target since January 2013.

The BOG’s mission is to promote general price stability, measured with year-on-year changes in the CPI at the end of each year. The main monetary policy tool is the lead rate, which is determined through the comprehensive analysis of the balance of medium-term inflation risks. According to the 2009–2010 National Survey of Household Income and Expenditure, the CPI is defined as the measurement of the weighted average of prices of a basket of consumer goods and services corresponding to the largest items of final consumption expenditure. The base month for this index is December 2010.

The target horizon is medium term and has been applied since 2013.

The monetary policy rate used by the BOG is the lead rate, corresponding to the reference rate for overnight operations, that the BOG uses to indicate its monetary policy stance. On December 31, 2021, the monetary policy rate was 1.75%, the lowest level since the scheme of explicit inflation targets was adopted in 2005. The Monetary Board, according to the schedule planned for 2021, met in February, March, April, May, June, August, September, and November, deciding to maintain the level of the interest rate, based on an integral analysis of the external and internal situation, expressed in a balance of inflation risks, with which the accommodative stance of the monetary policy was maintained. As of June 30, 2022, the monetary policy rate stood at 2.25%; in effect, the Monetary Board decided to begin to move gradually toward a more restrictive monetary policy stance, after the monetary accommodation adopted in response to the COVID-19 pandemic; therefore, at its May and June meetings, it decided to raise the level of the leading monetary policy interest rate by 25 basis points on each occasion. During the first half of 2022, according to the established schedule, the Monetary Board met in February, March, April, May, and June to decide the monetary policy interest rate.

There are two parliamentary hearings in January and July of each year.

The number of votes for and against the decision is included in the summary of the arguments taken into account by the Monetary Board to determine the level of the monetary policy rate, although details of
Publication of minutes: No.
Publication of inflation forecasts: Yes. In the days following the meeting to decide on the monetary policy interest rate (held eight times a year), the BOG holds briefings with representatives from the financial sector, columnists, journalists, think tanks, and universities. Information disclosed includes the projection for inflation. This information is published on the BOG website.

Other monetary framework:
Exchange tax: No.
Exchange subsidy: No.
Foreign exchange market: Yes. In accordance with Article 1 of the Free Foreign Exchange Convertibility Law, commercial banks may freely set the exchange rate and commissions for transactions with their customers.

Spot exchange market: Yes. In accordance with Article 1 of the Free Foreign Exchange Convertibility Law (Libre Negociación de Divisas), foreign exchange availability, holding, contracting, remittance, transfer, purchase and sale, and collection and payment are unrestricted. Holding and managing deposits and accounts and financial intermediation operations in foreign currency are unrestricted both in domestic banks and in banks abroad. The issuance of credit instruments or securities denominated in foreign currency requires authorization by the Monetary Board. Article 2 of the Free Foreign Exchange Convertibility Law stipulates that the IFEM comprises the BOG, banks, private financial companies, stock exchanges, and foreign exchange bureaus. Currently, there are 17 banking institutions, 11 private financial companies, and 3 foreign exchange bureaus. Article 3 of the Free Foreign Exchange Convertibility Law defines foreign exchange bureaus as nonbank institutions authorized by the Monetary Board to operate in the IFEM. In accordance with the Annex to Resolution No. JM-131-2001, foreign exchange bureaus may buy foreign currency in the form of banknotes, traveler’s checks, bank drafts, electronic fund transfers, postal orders, and in other forms of payment denominated in foreign currency as well as in the form of documents drawn against their own accounts; such transactions are executed at prices freely agreed by the individuals and legal entities concerned.

Operated by the central bank: Yes.
Foreign exchange standing facility: No.
Allocation: No.
Auction: Yes. Pursuant to Article 54 of the Organic Law of the BOG, the Executive Branch, autonomous and decentralized institutions and, in general, government entities and dependencies, unless otherwise specified by law, must conduct their financial transactions in domestic or foreign currencies, both within and outside of the country, through the CB. The BOG can intervene on the foreign exchange market if the reference exchange rate reaches or exceeds the fluctuation band of, effective January 1, 2022, ±0.90% (previously ±0.85%) around the moving average of the reference exchange rates from the past five business days (Resolution No. JM-119-2021). Previously, effective January 1, 2021, the fluctuation band was increased to ±0.85% from ±0.80%. In such cases, the BOG initiates an auction to buy or sell up to US$10 million in foreign currency. No more than five auctions a day are allowed, and the maximum daily intervention is US$50 million. The BOG may also intervene in the foreign exchange market
by buying or selling foreign currency whenever the nominal exchange rate shows unusual volatility. Auction participants are not required to finance specific international transactions. The IFEM is made up of the BOG, other banks, private finance companies, securities exchanges, and foreign exchange bureaus referred to in Article 3 of the Free Foreign Exchange Convertibility Law, as well as any other institutions designated by the Monetary Board. Noncompliance by any of the parties is deemed a serious sanctionable violation by the National Securities Exchange of Guatemala (Bolsa de Valores Nacional de Guatemala, S.A.). The sanction consists in a suspension for eleven to twenty trading days, plus a fine equivalent to 150 “fine units” for each trading day of suspension.

The results of public auctions are disclosing to the public by publication on the website of the BOG and through print mass media.

**Fixing**

No.

**Interbank market**

Yes.

The IFEM comprises the BOG, banks, private financial companies, stock exchanges, and foreign exchange bureaus (mentioned in Article 3 of the Free Foreign Exchange Convertibility Law), and other institutions designated by the Monetary Board. Currently, there are 32 such institutions. As of December 31, 2021, 17 banks were participating in the interbank market. For statistical control purposes, they are required to report all foreign exchange operations to the BOG daily, in a manner established by the Monetary Board. The Superintendency of Banks supervises and inspects the institutions with regard to their foreign exchange operations, and they must comply with all pertinent Monetary Board rules. No limits are set on the spreads between buying and selling prices. The BOG is not directly involved in the exchange rates quoted between market participants. Authorization to operate on this market is granted by the Monetary Board.

**Over the counter**

Yes.

**Brokerage**

No.

**Market making**

No.

**Forward exchange market**

Yes.

The National Securities Exchange of Guatemala is responsible for operating and administering the forward exchange market, which is very small and conducts neither routine nor significant operations. The BOG does not participate in the foreign exchange derivatives market. Pursuant to the Free Foreign Exchange Convertibility Law, financial intermediation operations in foreign currency have been unrestricted since January 17, 2001.

**Official cover of forward operations**

No.

### Arrangements for Payments and Receipts

**Prescription of currency requirements**

No.

Most transactions in foreign exchange are denominated in US dollars, in accordance with special payments agreements.

**Controls on the use of domestic currency**

No.

**For current transactions and payments**

No.

**For capital transactions**

No.

**Transactions in capital and money market instruments**

No.

**Transactions in derivatives and other**

No.
instruments
Credit operations No.
Use of foreign exchange among residents No.

Payments arrangements Yes.
Bilateral payments arrangements Yes.

Operative Yes. The Panama–Guatemala Clearing and Credit Reciprocal Agreement is in effect.

Inoperative Yes. The Clearing and Credit Reciprocal Agreement between Guatemala and Costa Rica, El Salvador, and Honduras was in effect until 1995, and the Mexico–Guatemala Clearing and Credit Reciprocal Agreement was in effect until 2002.

Regional arrangements Yes. Guatemala has signed the following treaties and agreements: CACM, CAFTA-Dominican Republic (DR), customs union with Honduras and El Salvador; Partial Scope Agreement with Cuba; Partial Scope Agreement with Belize; Unilateral Partial Scope Agreement with Venezuela; Central America-Mexico, Triangle of Northern Guatemala, El Salvador, Honduras–Colombia, Central America—Panama; Protocol admitting Panama to the Central American Economic Subsystem (Permanent Secretariat of the General Treaty on Central American Economic Integration—SIECA); FTA with Taiwan Province of China; FTA with Peru (approved by the Congress of the Republic of Guatemala; both countries decided to withdraw from the process initiated with the WTO related to the price band for sugar, agreeing to ratify its validity during 2019); Partial Scope Agreement with Ecuador; Partial Scope Agreement with Trinidad and Tobago, that has been signed but is still pending approval by the country’s Congress, and the Guatemala–Chile FTA. Association Agreement with the EU (Central America–EU)—in effect for Guatemala from December 1, 2013, only with respect to its trade pillar; the Guatemalan Congress has approved all three pillars. As of June 2022, The EU and each of its parliaments have still to approve the other two pillars (which relate to political dialog and development cooperation) and a Central America–Mexico Convergence Treaty, which went into effect September 1, 2013. The Association Agreement between Central America and the United Kingdom of Great Britain and Northern Ireland entered into force effective January 1, 2021. A trade agreement is currently being negotiated with Canada and the EFTA.

Clearing agreements Yes. There is a Clearing and Credit Reciprocal Agreement between Guatemala and Panama.

Barter agreements and open accounts No.

Administration of control Yes. The Monetary Board approves Guatemala’s exchange policy annually. The BOG administers the foreign exchange regime (Article 26 of the Organic Law of the BOG).

Payments arrears No.

Official No.

Private No.

Controls on trade in gold (coins and/or bullion) No.

- **Financing requirements for imports**: No.
- **Minimum financing requirements**: No.
- **Advance payment requirements**: No.
- **Advance import deposits**: No.
- **Documentation requirements for release of foreign exchange for imports**: No.
- **Domiciliation requirements**: No.
Pre-shipment inspection | No.  
Letters of credit | No.  
Import licenses used as exchange licenses | No.  
Other | No.  
**Import licenses and other nontariff measures** | Yes.  
Positive list | No.  
Negative list | Yes.  
Open general licenses | Yes.  
Licenses with quotas | Yes.  
Other nontariff measures | Yes.  
**Import taxes and/or tariffs** | Yes.  

Imports of most goods are unrestricted and require neither registration nor a license. However, imports of some agricultural commodities and animal products are subject to nontariff restrictions. The list includes goods considered dangerous to society, such as weapons and certain chemicals and drugs. Weapons may be imported only with the approval of the appropriate agency.

In this regard, and in accordance with the provisions of Annex A of the General Treaty on Central American Economic Integration, the common regime for the five countries’ trade in unroasted coffee is subject to import tariffs. Refined and unrefined sugarcane, flavorings and dyes, and other items are subject to import controls. Under the bilateral arrangements concerning Guatemala, trade in roasted coffee between Guatemala and Costa Rica is subject to import duties. Guatemala’s tariff structure exempts certain manufactured products. The tariff on imports of most footwear and textile products is 15%, and rates on tires range from 5% to 15%. In addition, safeguard provisions apply to certain agricultural products, which are subject to tariff rate quotas under WTO rules that allow for tariffs above the maximum rate for imports in excess of quota. Yellow corn is subject to a quota of 200,000 metric tons a year, with a tariff of 0% for imports within quota and 15% in excess of quota. Rice is subject to a quota of 19,000 metric tons a year, with a tariff of 0% for imports within quota and 23.7% in excess of quota. White corn is subject to a quota of 200,000 metric tons a year, with a tariff of 0% for imports within quota and 15% in excess of quota. These quotas are adjusted annually after discussions between the private sector and the government. Within the framework of commitments under the WTO, Guatemala has a consolidated ad valorem tariff ceiling of 40% for agricultural products and 45% for other products (50% for the categories indicated in Chapters 50–64 of the Central American Tariff System); both ceilings are subject to the exceptions mentioned in List No. LXXXVIII. There are also separate bilateral trade agreements with Colombia, the DR, Panama, and Taiwan Province of China. Under the CAFTA, among Central American countries, the DR, and the United States (CAFTA-DR), which took effect in 2006, import duties are imposed on 6,307 items in 10 categories, among which the following relate to goods traded between Guatemala and the United States: (1) Category B contains products such as chicken breasts, fish, and vegetables that are being phased in over a five-year period and that are not subject to duty. (2) Category C contains 788 items for which duty will be eliminated in 10 equal annual phases, starting January 1 of year 1 of the treaty. (3) Category D contains products such as dairy products, green and decaffeinated coffee, and alcoholic beverages that will be phased in over 15 years, for which
the duties are 6%, 9%, and 24%, respectively. (4) Category F contains products such as milk and yogurt, for which duties will remain the same for the first 10 years of the treaty; they will then be reduced in 10 equal annual phases and be duty-free in year 20 of the treaty. (5) Category N contains products such as rum, precooked sausages, and wheat flour, for which duties will be reduced gradually until they are eliminated in 12 equal annual phases, starting on the date CAFTA-DR went into effect; duties applicable to rum, precooked sausages, and wheat flour are 20.0%, 6%, and 0%, respectively. (6) Category O contains black beans, for which duty will remain at its initial rate throughout the first six years of the treaty; on January 1 of year 7, the duty will be reduced by 8% of the base rate every year thereafter through year 11 of the treaty; on January 1 of year 12, the duty will be reduced further by 15% of the base rate and by an additional 15% of the base rate through year 14 of the treaty, and the goods will be duty-free, on January 1 of year 15. (7) In addition, pursuant to the trade agreements, the following quotas are in force: vegetable oil (palm, sunflower, and soybean oil) 1,050 metric tons, dog and cat food 1,368 metric tons, chicken wings 12 metric tons, rice 96,100 metric tons, tuna 500 metric tons, beef 2,383 metric tons, pork 6,265 metric tons, preserved pig meat 1,035 units, white onions 351 metric tons, chicken leg quarters 9,970 metric tons, black beans 1,006.5, ice cream 261 metric tons, cured hams and bacon 1,035 units, condensed milk 625 metric tons, long-life milk 200,000 liters, powdered milk 1,744.5 metric tons, yellow corn 173,000 metric tons, white corn 24,400 metric tons, Manjar caramel spread 46 metric tons, butter 278 metric tons, cream 115 metric tons, other prepared or canned tomatoes 40 metric tons, potatoes 216 metric tons, cheeses 2,330.3 metric tons, and tomato sauce 143.8 metric tons.

GUINEA
(Position as of June 30, 2022)

Status under IMF Articles of Agreement

Date of membership: September 28, 1963.

Article VIII: Yes. Date of acceptance: November 17, 1995.

Article XIV:

Restrictions and/or multiple currency practices: Yes.

Exchange measures imposed for security reasons: No.
In accordance with IMF Executive Board Decision No. 144-(52/51): No.
Other security restrictions: No.

Exchange Measures

The IMF staff report for the 2021 Article IV Consultation with Guinea states that, as of June 3, 2021, the foreign exchange system gives rise to an MCP because the reference rate can potentially deviate by more than 2% from the commercial banks’ purchase and sales rates on a given day. (Country Report No. 21/146)

Exchange Arrangement

Currency: Yes. The currency of Guinea is the Guinean franc. Silver commemorative coins are also legal tender.

Other legal tender: No.

Exchange rate structure:

Unitary

Dual

Multiple: Yes. The exchange rate structure is classified as multiple, because the official exchange rate may differ from the market rate by more than 2%. Guinea maintains an MCP as the value of the official rate lags the weighted average commercial bank rate on which it is based by one day.

As part of the foreign exchange reforms, the Banque Centrale de la République de Guinée (BCRG) developed and implemented Instruction No. 105 effective July 9, 2021, establishing the procedures for monitoring the gross foreign exchange position of commercial banks by the BCRG. This has led to increasing liquidity on the Guinean foreign exchange market and drastically reducing speculative activity of commercial banks. As a result, the banks’ purchase and sale prices moved closer to the reference price calculated and published by the BCRG and this gap does not exceed 2%.

The reference price in the current context does not deviate by more than 2% from the purchase and sale prices of commercial banks, and neither does this reference price deviate by more than 2% from those in the parallel market. Guinea nevertheless continues to calculate the benchmark rate on the basis of the previous day’s rate of commercial banks’ average weighted rate. Guinea aims to eliminate this practice.
through ongoing reforms at the BCRG.

The de jure exchange rate arrangement is managed floating. Guinea announced its participation in the exchange rate mechanisms (ERM and ERM II) of the WAMZ, which formally limits the fluctuation of the franc to ±15% around a central rate vis-à-vis the US dollar, but this has yet to be implemented. As of November 13, 2020, the BCRG may organize an auction for the sale of US dollars for an amount not exceeding 8 million if the reference price of the day calculated and published by the BCRG is more than 0.25% higher than the moving average of the last 5 days. The BCRG’s intervention policy is based on a budget of foreign exchange sales. Banks are allowed to negotiate freely foreign exchange sales and purchases with their clients. While the exchange rate has increased flexibility since January 2022, more observations are necessary to determine its new trend. Until then, the de facto exchange rate arrangement remains classified as a crawl-like arrangement.

The official or reference exchange rate since July 2012 is a weighted average of the transactions of the banking system carried out the day before. It is equal to a quotient with the numerator being the sum of the products of the purchase price multiplied by the total volume bought and the sale price by the total volume sold by all the commercial banks and the denominator being the sum of the cumulative volumes bought and sold. These rates are determined on the basis of supply and demand. Banks may purchase and sell foreign exchange with their customers at freely negotiated rates. The rates of other currencies are calculated on the basis of their previous day’s rate vis-à-vis the SDR, as published by the IMF. The official rate is used by the government in its transactions.

There are 17 active commercial banks licensed to deal in foreign exchange and 19 foreign exchange bureaus in operation. The BCRG is the only institution authorized to grant licenses. Foreign exchange bureaus may not enter into foreign exchange transactions directly with the BCRG; their operations are limited to the purchase and sale of banknotes. Exchange bureaus are prohibited from engaging in the following operations: (1) taking deposits on account for their clients; (2) forward buying and selling of foreign currency banknotes or traveler’s checks in exchange for national currency; (3) forward buying and selling of foreign currency banknotes and checks in exchange for other foreign currencies; (4) making money transfers of any amount, either abroad or domestically; (5) importing or exporting banknotes; and (6) extending loans to clients. Foreign exchange bureaus may not maintain accounts abroad. The BCRG introduced Instruction No. 068/DGCC/DCH/16, which limits transactions conducted through licensed exchange bureaus to retail transactions up to a ceiling of US$100,000 a day.

The BCRG transacts with commercial banks only through auctions, in keeping with the rules in Instruction No. 103 of September 23, 2020.

As of November 13, 2020, the BCRG may organize an auction for the sale of US dollars for an amount not exceeding 8 million if the reference price of the day calculated and published by the BCRG is more than 0.25% higher than the moving average of the last 5 days. Participants are free to use the foreign currency obtained in the rules-based auctions to finance international transactions in accordance with the regulations in force. Banks may purchase and sell foreign exchange with their customers at freely negotiated rates. On the business day preceding the day on which an operation is scheduled, the BCRG communicates the details of the given operation to all eligible participants in two-sided foreign exchange auctions by means of a public announcement, through the press, or by any other means (letter and e-mail). The foreign exchange is allocated to the best bidders at the price they bid, up to a limit of 20% of the auction for a given counterparty. The minimum volume of an offer to purchase or sell foreign exchange is US$50,000. The BCRG reserves the right to cancel an auction session or to reject unrealistic offers. Immediately after an auction session, the participating banks must be notified of the results pertaining to their respective transactions. The aggregated results of an auction session must be published at the same time on the BCRG website. A bank that does not honor its commitments arising from the two-sided foreign exchange auction market must be subject to sanctions provided for in the regulations, in addition to a suspension between one and four auction sessions. In certain exceptional cases, the BCRG may announce in advance that an auction will be a one-sided auction at which the BCRG will be selling US dollars. In these circumstances, no single participant may acquire more than 20% of the amount being sold by the BCRG.
**Interbank market**  
Yes.  
17 active commercial banks are authorized by the BCRG to exchange foreign currency among themselves, as of end 2021. Banks can trade with each other through the two-way auction system operated by the BCRG. There are no limits on the bid-ask spread and commission of market participants. The licensing commission is statutorily empowered to grant licenses to credit institutions.

**Over the counter**  
Yes.  
These transactions are used for official missions abroad.

**Brokerage**  
No.

**Market making**

### Arrangements for Payments and Receipts

**Prescription of currency requirements**  
Yes.  
All current transactions effected in Guinea must be settled in Guinean francs. Settlements for transactions covered by bilateral payments agreements are made in currencies prescribed by, and through accounts established under, the provisions of the agreements. Settlements with countries other than members of the WAMZ are made in designated convertible currencies quoted by the BCRG.

**Controls on the use of domestic currency**  
Yes.

**For current transactions and payments**  
Yes.

**For capital transactions**  
Yes.

- Transactions in capital and money market instruments  
  Yes.
- Transactions in derivatives and other instruments  
  Yes.
- Credit operations  
  Yes.

**Use of foreign exchange among residents**  
Yes.  
All payments and transactions among residents in Guinea must be made or settled in Guinean francs.

### Payments arrangements

**Operative**  
No.

**Inoperative**  
Yes.  
Guinea maintains bilateral payments agreements with China.

**Regional arrangements**  
No.

**Clearing agreements**  
Yes.  
Guinea is part of the multilateral clearing agreement between the WAEMU and WAMZ members.

**Barter agreements and open accounts**  
No.

**Administration of control**  
Yes.  
Exchange control authority is vested in the BCRG, which has delegated to (1) the Ministry of Commerce the authority to sign import descriptions and import applications and (2) commercial banks the authority to (a) allocate foreign exchange to travelers holding airline tickets for travel abroad and (b) manage foreign exchange accounts. All international settlements, including payments...
for imports, may be effected by commercial banks.

The minimum capital requirement for foreign exchange bureaus is GF 100 million. Banks must ensure that order of foreign exchange transfers between accounts or between banks in excess of US$5,000 is subject to the production of appropriate supporting documents guaranteeing that the operation complies with the exchange control regulations in force.

The only permitted form of lending to nonresidents is overdraft protection on checking accounts denominated in foreign currency.
Abroad by banks  Yes.

In banks by nonresidents  Yes.

Open foreign exchange position limits  Yes.  The long foreign exchange positions of credit institutions may not exceed 35% of their net capital. Any excess over that 35% limit must be transferred to the CB within two days after being registered.

On resident assets and liabilities  Yes.  The long foreign exchange positions of credit institutions may not exceed 35% of their net capital. Any excess over that 35% limit must be transferred to the CB within two days after being registered.

On nonresident assets and liabilities  Yes.  The long foreign exchange positions of credit institutions may not exceed 35% of their net capital. Any excess over that 35% limit must be transferred to the CB within two days after being registered.

Changes during 2021 and 2022

Exchange Arrangement

Exchange rate structure

Multiple  07/09/2021  The Banque Centrale de la République de Guinée established procedures for monitoring the gross foreign exchange position of commercial banks. This has led to increasing liquidity on the Guinean foreign exchange market and drastically reducing speculative activity of commercial banks. As a result, the banks’ purchase and sale prices moved closer to the reference price.
## GUINEA-BISSAU

**Position as of June 30, 2022**

No restrictions as reported in the latest IMF staff report as of December 31, 2021.

A regional framework to fight money laundering (AML) and the financing of terrorism (AFT) exists at the regional level through two WAEMU Directives from 2002 (AML) and 2007 (AFT) as amended. This comprehensive framework facilitates the implementation of UNSC resolutions based on a list of persons and entities prepared by the Committee.

### Exchange Arrangement

#### Exchange rate structure

- **Unitary** | Yes. |
- **Dual** |
- **Multiple** |

#### Classification

- **No separate legal tender** |
- **Currency board** |
- **Conventional peg** | Yes. | The exchange rate arrangement of the WAEMU is a conventional peg. Guinea-Bissau participates in a currency union with seven other members of the WAEMU and has no separate legal tender. A monetary cooperation agreement between the WAEMU member states and France was concluded on December 21, 2019 to replace the agreement dated December 4, 1973. The Monetary Cooperation Agreement is based on three pillars: (1) a common issuing institution, (2) fixed parity with the euro, and (3) a guarantee of unlimited convertibility. |
- **Stabilized arrangement** |
- **Crawling peg** |
The CFA franc is officially pegged to the euro, the anchor currency, at the fixed rate of CFAF 655.957 per euro. Exchange rates for other currencies are cross-rates derived from the rate for the currency concerned in the Paris foreign exchange market vis-à-vis the euro. The official rate is used for accounting and valuation purposes. The Conference of Heads of State and Government may decide to amend the Monetary Cooperation Agreement between the WAEMU member countries and France.

The monetary policy framework is an exchange rate anchor vis-à-vis the euro. The operational target of price stability is defined as an annual inflation rate in the WAEMU that falls within a band of ±1% around a central rate of 2%. The Harmonized CPI is the benchmark rate to measure inflation.

Exchange tax Yes. The commission rate charged on transfers to all countries that are not members of the WAEMU area is 0.6%. This commission must be surrendered to the National Treasury and is a portion of its tax revenue.

Exchange subsidy No.

Foreign exchange market Yes. Authorized intermediaries may freely set their exchange rates in transactions with their clients, except for the euro, which must be traded against the CFA franc at the official fixed rate of CFAF 655.957 per euro. However, they can charge a commission of up to 2% of the transaction amount. Instruction No. 013-11-2015 on the terms and conditions for conducting rapid money transfers as a subagent within the WAEMU applies.

Spot exchange market Yes. Authorized intermediaries must comply with the provisions in effect on the financial conditions for executing banknote foreign exchange transactions that involve foreign currencies and issue a transaction slip for all transactions with a client. Moreover, to provide satisfactory information to clients, they are required to (1) permanently post at their windows the rates actually charged for the different currencies and (2) post notification that a transaction slip must be issued for all foreign exchange transactions on presentation of the requestor’s identity document. Banks and registered banknote exchange houses are intermediaries authorized by the Ministry of Economy and Finance (MEF) to conduct foreign exchange transactions with the public. As of December 31, 2021, there were 11 authorized banknote exchanges. Exchange houses are authorized to conduct operations with the BCEAO in any currency except the euro. Authorized exchange
houses are not authorized to make transfers or payments in foreign currency to other countries or to hold accounts abroad. Authorized intermediaries may freely set their exchange rates in transactions with their clients, except for the euro, which must be traded against the CFA franc at the official fixed rate of CFAF 655.957 per euro and may charge a commission of up to 2% of the transaction amount.

The BCEAO supplies, at the official rate, the foreign currency that each authorized intermediary needs to make payments abroad, that is, in the import coverage framework. The CB only purchases foreign exchange on request from the commercial banks, but does not sell foreign exchange to them for purposes other than import coverage. The BCEAO exchanges foreign currency for CFA francs at the rates published on the international markets, with the exception of the euro, which is traded at the official fixed rate of 655.957 CFA francs per euro. The nonelectronic currency exchange windows are open to owners of accounts on the BCEAO books and to the general public. A commission of 0.5% is charged on all transactions with the public (purchases and sales) and all withdrawals by banks and financial institutions (including euro withdrawals). However, commissions are not charged on cash foreign exchange transactions conducted by governments, officials of Member States of the WAMU on missions abroad, officials of the CB and their beneficiaries, or on payments made by banks and financial institutions.

Residents of the WAEMU zone are permitted to conduct the following transactions in the foreign exchange derivatives market with authorized intermediary banks established in the WAMU or with foreign banks: outright forward foreign exchange contracts (over the counter), foreign exchange options, foreign exchange swaps, and cross-currency swaps.

Transactions in foreign exchange options are limited to the following two types of transactions: options to purchase foreign currency, purchased by residents of the WAEMU zone from an authorized intermediary bank established in the WAMU or from a foreign bank, and options to sell foreign currency, purchased by residents of the WAEMU zone from an authorized intermediary bank established in the WAMU or from a foreign credit institution.

Authorized intermediary banks must simultaneously cover the exchange risk they incur with respect to derivative instruments traded with their customers.

The underlying commercial and financial operations must relate to imports and exports of goods and services by a resident, foreign
borrowing operations by a resident (drawings and repayments), or
direct foreign investment in a resident company.
All legitimate foreign currency needs are ultimately met by the
BCEAO.

Official cover of forward operations  No.

Arrangements for Payments and Receipts

Prescription of currency requirements  Yes.  Payments with countries outside the WAEMU are made in foreign
currencies. Trade with other WAEMU countries is settled in CFA
francs.

Controls on the use of domestic currency  Yes.  The CFA franc may not be used as payment for current international
transactions or capital transactions with countries outside the
WAEMU.

For current transactions and payments  Yes.  There is a multilateral clearing agreement between the WAEMU
countries and the other ECOWAS countries (Cabo Verde, The
Gambia, Ghana, Guinea, Liberia, Nigeria, and Sierra Leone) in the
WAMA framework. Payments for current transactions between
countries whose CBs are WAMU members may be made under the
clearing arrangement.

For capital transactions  Yes.  The CFA franc may not be used for capital transactions with
countries outside the WAEMU. Investments by residents of the
WAEMU zone outside the WAEMU are subject to prior authorization
by the minister of finance, and at least 75% of the investment must
be financed through foreign borrowing.

Transactions in capital and money market
instruments  Yes.  The CFA franc may not be used for capital transactions with
countries outside the WAEMU. Foreign investment by residents of
the WAEMU zone is subject to authorization by the MOF. At least
75% of the investment must be financed through foreign borrowing.
The interested party must request authorization through a letter
designating the authorized intermediary to settle the payment.
Purchases of foreign negotiable securities authorized by the regional
capital markets authority to be issued or sold in WAEMU members
do not require MEF authorization.

Transactions in derivatives and other
instruments  Yes.  Residents of WAEMU member countries may engage in the
following operations on derivatives and other instruments with
accredited banks established in the WAEMU or foreign banks: (1)
forward contract, foreign exchange swaps, and options. Operation on
derivatives with foreign banks outside the WAEMU can only relate
to the purchase or sale, by a resident, of foreign exchange other than
the euro or another currency from the Franc Zone.

Credit operations  Yes.  Loans of any kind, CFA franc overdrafts, and, in general, any
advances granted by authorized intermediaries to nonresidents of the
WAEMU zone are subject to prior authorization by the Directorate of
External Financial Relations of the MOF, after BCEAO approval.

Use of foreign exchange among residents  Yes.  The CFA franc is the only legal tender, and residents are not
permitted to use foreign exchange for domestic transactions.

Payments arrangements  Yes.

Bilateral payments arrangements  No.

Operative  No.

Inoperative  No.

Regional arrangements  Yes.  A monetary cooperation agreement between the WAEMU member
states and France was concluded on December 21, 2019, replacing
the previous agreement dated December 4, 1973. This monetary
The cooperation agreement is based on three pillars: (1) a common bank of issue; (2) a fixed exchange rate parity with the euro; and (3) an unlimited convertibility guarantee.

There is a multilateral clearing agreement in the context of the WAMA among the WAEMU countries (Cabo Verde, The Gambia, Ghana, Guinea, Liberia, Mauritania, Nigeria, and Sierra Leone). Payments for current transactions between the member countries may be effected under the clearing arrangement. However, this excludes transactions specified by the committee of governors of the CBs of ECOWAS members and payments for exports from one member country to another member country of finished products originating in countries whose CB or monetary authority is not a WAMA member.

The institutional reform of the WAEMU and the BCEAO went into effect April 1, 2010, with the adoption of the following new basic instruments: (1) the WAMU Treaty, (2) the BCEAO Charter, (3) the Bank Regulation Act, and (4) the Convention governing the WAMU Banking Commission. All WAEMU residents are treated as residents of Guinea-Bissau for the purposes of preparing the external position of banks, domiciliation and repatriation of export revenue, issuance and sales of securities, gold imports and exports, investment and lending transactions, and physical exports of means of payment and securities by postal package or ordinary mail. However, for statistical purposes with regard to the balance of payments, all countries other than Guinea-Bissau are considered foreign countries. Moreover, all transfers with other countries must be made through authorized intermediary banks, the postal service, or the BCEAO.

Gold imports and exports require MOF authorization, except (1) imports and exports by the Public Treasury and the BCEAO; (2) imports and exports of items with a low gold content (lined or plated objects); and (3) imports and exports, by travelers, of objects made of gold limited to a total weight of 500 grams. Imports and exports of gold within the WAEMU area are not subject to any restrictions.

Travelers may freely export CFA franc (XOF) banknotes from one WAEMU member country to another. Resident individuals and legal entities other than the BCEAO and its banking and commercial correspondents outside the WAEMU are prohibited from sending and receiving CFA franc banknotes issued by the BCEAO.

The reexportation of foreign banknotes by nonresident travelers is permitted up to the equivalent of CFAF 500,000; the reexportation of foreign banknotes above this ceiling requires documentation demonstrating either the importation of the foreign banknotes or their purchase against other means of payment registered in the name of
the traveler or through the use of nonresident deposit accounts in local banks. Residents of the WAEMU zone traveling to countries that are not WAEMU members are required to declare foreign currency on their person in excess the equivalent of CFAF 1 million. They may carry up to the equivalent of CFAF 2 million a person in banknotes not issued by the BCEAO. Larger amounts may be exported in the form of traveler’s checks, prepaid debit and payment cards, conventional debit and payment cards, or other means of payment. Foreign exchange allowances issued by authorized intermediaries in the form of traveler’s checks or prepaid debit and payment cards must be based on the need to cover customary, personal travel expenses, if they exceed the equivalent of CFAF 2 million a person. The issuance of foreign currency to resident travelers is subject to the presentation of travel documents and a valid passport or national identification card.

| On imports | Yes. |
| Domestic currency | Yes. | Residents of the WAEMU zone and nonresidents of the WAEMU zone may freely import domestic currency (CFA Franc XOF) banknotes. However, individuals and legal entities other than the BCEAO and its banking and commercial correspondents outside the WAEMU are prohibited from sending and receiving banknotes in domestic currency. BCEAO redemption of banknotes exported outside its area of issuance has been suspended. Pursuant to this measure, registered intermediary banks are not authorized to receive shipments of CFA Franc XOF banknotes from their correspondents located outside the WAEMU area. |
| Foreign currency | No. | Residents of the WAEMU zone and nonresidents of the WAEMU zone may freely import means of payment denominated in foreign currencies. Such means of payment in excess of the equivalent of CFAF 5 million must be declared to customs. Nonresident travelers must declare to customs foreign currency exceeding the equivalent of CFAF 5 million on entry and exit. |

### Resident Accounts

| Foreign exchange accounts permitted | Yes. | Residents may open foreign exchange accounts with MOF authorization, after BCEAO consent. |
| Held domestically | Yes. |
| Approval required | Yes. | Foreign exchange accounts in currencies other than the Euro may be opened domestically with MOF authorization after non-objection from the BCEAO. The authorization specifies the operations that may be credited or debited on each such an account. These accounts are valid for a renewable term of up to one year. They cannot be credited with deposits of CFA banknotes or by debiting a CFA franc account. On expiration of the term set in the authorization, accounts are closed unless a new authorization is obtained. |
| Held abroad | Yes. |
| Approval required | Yes. | Individuals who are residents of the WAEMU temporarily staying or traveling outside of WAEMU may open bank accounts outside the WAEMU to deposit foreign currency legally exported and any income acquired outside of the WAEMU during their travel or temporary stay outside of the WAEMU. These individuals are required to repatriate balances on such accounts within 30 days of return to the WAEMU. In any circumstance other than the foregoing, opening of foreign accounts by WAEMU residents is subject to MOF authorization by after non-objection from the BCEAO. The MOF authorization specifies the operations that may be credited or debited.
on such accounts. In the event of a failure to obtain a new MOF authorization, the accredited intermediary must request that the account be closed by the end of the term authorized and that any balance be repatriated to a WAEMU member country within eight days.

| Accounts in domestic currency held abroad | No.          |
| Accounts in domestic currency convertible into foreign currency | No.          |

Nonresident Accounts

| Foreign exchange accounts permitted | Yes.          |
| Approval required | Yes.          |
| Intermediaries authorized in the WAEMU are authorized to open accounts in euros for the benefit of nonresidents, subject to proof of their status and actual residence. Nonresident accounts denominated in foreign currency other than euros are subject to BCEAO authorization. Nonresident foreign currency accounts are valid for a renewable period of two years. In the event of a failure to obtain renewal (through a new BCEAO authorization for foreign exchange other than the euro), these accounts must be closed. The balances of these accounts may be freely transferred abroad after verification. |

| Domestic currency accounts | Yes.          |
| Convertible into foreign currency | Yes.          |
| Authorized intermediaries may open nonresident accounts in CFA francs and in euros, under their own responsibility, depending on the status and actual residence of the applicant. These accounts may be debited for spot purchases of foreign exchange. |
| Approval required | No.          |
| Blocked accounts | No.          |

Imports and Import Payments

| Foreign exchange budget | Yes.          |
| Financing requirements for imports | Yes.          |
| Minimum financing requirements | No.          |
| Advance payment requirements | Yes.          |
| Advance payments for imports require authorization, and importers may not acquire foreign exchange until the date of payment specified in the contract. |
| Advance import deposits | No.          |
| Documentation requirements for release of foreign exchange for imports | Yes.          |
| Importers may purchase foreign exchange for import payments after establishing bank payment order accounts and submitting supporting documents, but not earlier than eight days before shipment if a documentary credit is opened, or on the due date of payment if the products have already been imported. |
| Domiciliation requirements | Yes.          |
| Import transactions from outside the CFA franc area exceeding CFAF 5 million must be effected through an authorized bank. |
| Preshipment inspection | Yes.          |
| An inspection is required to verify the quantity, quality, and price of imported merchandise. |
| Letters of credit | No.          |
| Import licenses used as exchange licenses | No.          |
Exchange authorization, invoices, and export-import cards are required. Imports, regardless of whether they involve the use of official or free-market foreign exchange, require an import license issued by the Ministry of Commerce and Tourism, primarily for statistical purposes. Licenses are issued automatically after verification of the invoiced prices of taxable goods.

Quantitative restrictions may be applied to products for public health and security reasons.

The WAEMU CET consists of four tariff brackets: 0%, 5%, 10%, and 20%. Imports from countries outside the WAEMU area are also subject to a 1% statistical tax and a community solidarity levy of 0.8%. Moreover, a cyclical import tax (taxe conjoncturelle à l’importation) and a degressive protection tax (taxe dégressive de protection) may at certain times be charged on some products. Neither tax had been applied as at end-2018. Imports from non-ECOWAS members are subject to a 0.5% community levy (CL/ECOWAS).

Resident economic operators are required to collect and repatriate within one month of the payment due date the entire amount of sales of goods abroad in the country of origin with the bank with which the transaction is domiciled. The payment due date is specified in the trade agreement and normally falls within a period of 120 days after the goods are dispatched.

Export proceeds must be surrendered by ADs to the BCEAO within 30 days of the payment due date, which may not exceed 120 days after shipment of the goods. To cover its current foreign exchange needs, the domiciling bank may hold up to 20% of its export proceeds as own foreign exchange resources. However, it must ensure that its total foreign exchange resources to cover its requirements do not exceed 5% of total customer demand deposits; otherwise, the surplus must be surrendered to the BCEAO. Proceeds must be surrendered to authorized banks within 30 days of the payment due date. Authorized intermediaries must then surrender the foreign exchange to the BCEAO by transfer through the bank of issue. Export revenue may be surrendered to intermediaries other than banks with which the transaction is domiciled if authorized by the BCEAO.

| Other | Yes. | Exchange authorization, invoices, and export-import cards are required. |
| Import licenses and other non tariff measures | Yes. | Imports, regardless of whether they involve the use of official or free-market foreign exchange, require an import license issued by the Ministry of Commerce and Tourism, primarily for statistical purposes. Licenses are issued automatically after verification of the invoiced prices of taxable goods. |
| Positive list | No. |
| Negative list | No. |
| Open general licenses | No. |
| Licenses with quotas | No. |
| Other non tariff measures | Yes. | Quantitative restrictions may be applied to products for public health and security reasons. |
| Import taxes and/or tariffs | Yes. | The WAEMU CET consists of four tariff brackets: 0%, 5%, 10%, and 20%. Imports from countries outside the WAEMU area are also subject to a 1% statistical tax and a community solidarity levy of 0.8%. Moreover, a cyclical import tax (taxe conjoncturelle à l’importation) and a degressive protection tax (taxe dégressive de protection) may at certain times be charged on some products. Neither tax had been applied as at end-2018. Imports from non-ECOWAS members are subject to a 0.5% community levy (CL/ECOWAS). |
| Taxes collected through the exchange system | No. |
| State import monopoly | No. |

**Exports and Export Proceeds**

**Repatriation requirements**

Yes. Resident economic operators are required to collect and repatriate within one month of the payment due date the entire amount of sales of goods abroad in the country of origin with the bank with which the transaction is domiciled. The payment due date is specified in the trade agreement and normally falls within a period of 120 days after the goods are dispatched.

**Surrender requirements**

Yes.

**Surrender to the central bank**

Yes. Export proceeds must be surrendered by ADs to the BCEAO within 30 days of the payment due date, which may not exceed 120 days after shipment of the goods. To cover its current foreign exchange needs, the domiciling bank may hold up to 20% of its export proceeds as own foreign exchange resources. However, it must ensure that its total foreign exchange resources to cover its requirements do not exceed 5% of total customer demand deposits; otherwise, the surplus must be surrendered to the BCEAO.

**Surrender to authorized dealers**

Yes. Proceeds must be surrendered to authorized banks within 30 days of the payment due date. Authorized intermediaries must then surrender the foreign exchange to the BCEAO by transfer through the bank of issue. Export revenue may be surrendered to intermediaries other than banks with which the transaction is domiciled if authorized by the BCEAO.

| Financing requirements | No. |
| Documentation requirements | Yes. |
| Letters of credit | No. |
Guarantees | No.
---|---
Domiciliation | Yes. Export transactions of more than CFAF 10 million or its equivalent, except those between WAEMU countries, must be domiciled with an authorized intermediary bank.
Preshipment inspection | No.
Other | Yes. A customs declaration is required.

**Export licenses**
- Without quotas | Yes. Exports require an export license. Only exporters registered with the Ministry of Commerce and Tourism may obtain these licenses, which are granted automatically in most cases and are for statistical purposes. No products are reserved for exportation by the public sector.
- With quotas | No.

**Export taxes**
- Yes. Cashew nut exports, except to ECOWAS countries, are subject to a special export tax of 6% and advance payment of the industrial contribution levy of 3%; an additional 2% charged on cashew exports is classified as a rural property tax. Other agricultural exports are subject to an agricultural fee of 2%.
- Collected through the exchange system | No.
- Other export taxes | Yes. There is an individual processing fee of 1%.

### Payments for Invisible Transactions and Current Transfers

**Controls on these transfers** | Yes. Payments and transfers for current transactions with WAEMU and non-WAEMU countries may be made freely through authorized intermediaries. Transfers exceeding CFAF 500,000 are subject to documentary requirements. Payments and receipts of foreign ships on stopovers in WAEMU countries or by WAEMU ships abroad are considered current transactions.
- Trade-related payments | Yes.
- Prior approval | No.
- Quantitative limits | No.
- Indicative limits/bona fide test | Yes. Payments abroad relating to freight and insurance (including transfers of insurance not related to commercial transactions), unloading and warehousing costs, administrative costs, commissions, and customs duties and fees are permitted in general, subject to the presentation of supporting documentation to the authorized intermediary.

**Investment-related payments** | Yes.
- Prior approval | Yes. Payments for depreciation of direct investments require MOF authorization, because this type of depreciation is not specifically mentioned in the legislation.
- Quantitative limits | No.
- Indicative limits/bona fide test | Yes. Outward transfers of proceeds from the liquidation of investments may be made by authorized banks, subject to presentation of supporting documents.
- Payments for travel | Yes.

outside the WAEMU to cover their current foreign exchange requirements in connection with customer transactions. In addition, ADs must surrender to the BCEAO, at its request, all BCEAO-issued currency and all or part of their assets in euros and in other foreign currencies.

Surrender to authorized dealers Yes. All proceeds from invisible transactions with non-WAEMU countries must be surrendered to an AD within one month of the due date of payment. On their return to Guinea-Bissau, resident travelers must file a customs declaration for all means of payment greater than CFAF 300,000 and surrender them to a registered bank or to the BCEAO no later than one week after their return.

Restrictions on use of funds No.

Capital Transactions

Controls on capital transactions Yes. Capital transactions between WAEMU countries are unrestricted. Outward capital transfers require MOF authorization, except in the case of (1) amortization of debts and repayment of short-term loans granted to finance industrial and commercial operations; (2) payments for the purchase of options; and (3) transfers of the proceeds of liquidated investments or the sale of foreign securities by nonresidents of the WAEMU zone. Capital receipts from non-WAEMU countries, however, are generally permitted.

Repatriation requirements Yes. Proceeds from the sale or liquidation of investments of a resident abroad must be repatriated, if the resident has no reinvestment authorization, within one month through an authorized intermediary.

Surrender requirements Yes. Holdings exceeding the current needs of the credit institution must be surrendered to the BCEAO immediately. Credit institutions may hold net claims in foreign exchange with their banking correspondents outside the WAEMU to cover their current foreign exchange requirements in connection with customer transactions. In addition, ADs must surrender to the BCEAO, at its request, all BCEAO-issued currency and all or part of their assets in euros and in other foreign currencies.

Surrender to the central bank Yes. Proceeds from the sale or liquidation of investments of a resident abroad must be repatriated and surrendered to an AD within one month, if the resident has no reinvestment authorization. The surrender requirement applies to proceeds from all capital transactions.

Controls on capital and money market instruments Yes. RCPSFM authorization is required for the following operations: (1) issuance or marketing of securities and real assets of foreign entities, (2) canvassing, and (3) publicity or advertising for investment abroad. Securities and mutual funds issued outside the WAEMU by a private or public entity that is not a resident of a member country may not be listed on a regional securities exchange. Soliciting the public of the WAEMU by nonresident entities is subject to authorization by the BCEAO in its capacity as the authority responsible for regulating the external financial relations of WAEMU countries. The CIMA Code requires insurance companies of each CIMA member country to invest domestically a minimum of 50% of resources collected locally, with the remainder to be invested only in other CIMA member countries.

On capital market securities Yes. The CIMA Code requires insurance companies of each CIMA member country to invest domestically a minimum of 50% of resources collected locally, with the remainder to be invested only in other CIMA member countries.
| Shares or other securities of a participating nature | Yes. | Purchases in the country by nonresidents of the WAEMU zone are unrestricted. However, these purchases must be declared to the MOF and the BCEAO for statistical purposes. |
| Purchase locally by nonresidents | No. | The issuance of securities and the sale of corporate and foreign securities by nonresidents are subject to RCPSFM authorization. There are no controls on the sale of securities resulting from the divestiture of investment by means of a transfer between a nonresident and a resident, but such sales are subject to the regulations governing the financial settlement of the operation. Settlement of securities transactions by transfer abroad or by credit to a nonresident account requires MOF approval of an exchange authorization and supporting documentation. |
| Sale or issue locally by nonresidents | Yes. | The purchase of foreign securities by residents and the transfer abroad of funds for this purpose are subject to MOF authorization. Authorization is not required for purchases of foreign securities whose issuance or offering for sale in WAEMU countries has been authorized by the RCPSFM. The CIMA Code of the CFA franc area member countries does not allow insurance companies to invest abroad. |
| Purchase abroad by residents | Yes. | Residents may sell local corporate securities abroad. If these operations result in foreign control of resident entities, foreign investors must declare them to the MOF. The sale of securities to liquidate an investment abroad is subject to declaration to the MOF for statistical purposes. Residents may issue securities abroad, unless the securities constitute a loan. Issuance of the latter to nonresidents must be made through an authorized bank and must be reported to the MOF for statistical purposes. |
| Sale or issue abroad by residents | No. | These purchases are subject to declaration to the MOF for statistical purposes. There are no controls on the sale of securities resulting from the divestiture of investment in the form of a transfer between a nonresident and a resident, but such sales are subject to the regulations governing the financial settlement of the operation. There is no minimum holding period. |
| Bonds or other debt securities | Yes. | The issuance of securities and the sale of corporate or foreign securities by nonresidents are subject to authorization from RCPSFM. There are no controls on the sale of securities resulting from the divestiture of investment in the form of a transfer between a nonresident and a resident, but such sales are subject to the regulations governing the financial settlement of the operation. Settlement of securities transactions by transfer abroad or by credit to a nonresident account requires an exchange authorization to be submitted to the MOF for approval, accompanied by supporting documentation. |
| Purchase locally by nonresidents | No. | The purchase of foreign securities by residents and the transfer abroad of funds for this purpose are subject to MOF authorization. Authorization is not required for purchases of foreign securities whose issuance or offering for sale in WAEMU countries has been authorized by the RCPSFM. The CIMA Code of the CFA franc area member countries does not allow insurance companies to invest abroad. |
| Sale or issue locally by nonresidents | Yes. | Residents may sell local corporate securities abroad. If these operations result in foreign control of domestic establishments, foreign investors must declare them to the MOF. The sale of securities to liquidate an investment abroad is subject to declaration to the MOF for statistical purposes. Residents may also issue |
securities abroad, unless the securities constitute a loan. Issuance of the latter to nonresidents must be made through an authorized bank and must be reported to the MOF for statistical purposes.

**On money market instruments**

Yes.

The regulations governing shares or other securities of a participating nature apply.

**Purchase locally by nonresidents**

No.

These purchases must be declared to the MOF for statistical purposes.

**Sale or issue locally by nonresidents**

Yes.

The issuance of money market instruments and the sale of corporate or foreign securities by nonresidents are subject to RCPSFM authorization. There are no controls on the sale of securities resulting from the divestiture of investment in the form of a transfer between a nonresident and a resident, but such sales are subject to the regulations governing the financial settlement of the operation. Settlement of securities transactions by transfer abroad or by credit to a nonresident account requires an exchange authorization to be submitted to the MOF for approval, accompanied by supporting documentation.

**Purchase abroad by residents**

Yes.

The purchase of foreign securities by residents and the transfer abroad of funds for this purpose are subject to MOF authorization. Authorization is not required for purchases of foreign securities whose issuance or offering for sale in WAEMU countries has been authorized by the RCPSFM. The CIMA Code of the CFA franc area member countries does not allow insurance companies to invest abroad.

**Sale or issue abroad by residents**

No.

Residents of the WAEMU zone may sell local money market instruments abroad. The sale of money market instruments to liquidate an investment abroad is subject to declaration to the MEF for statistical purposes. Residents of the WAEMU zone may also issue money market instruments abroad, unless they constitute a loan.

**On collective investment securities**

Yes.

The regulations governing shares or other securities of a participating nature apply.

**Purchase locally by nonresidents**

No.

These purchases must be declared to the MOF for statistical purposes.

**Sale or issue locally by nonresidents**

Yes.

**Purchase abroad by residents**

Yes.

The purchase of foreign securities by residents and the transfer abroad of funds for this purpose are subject to MOF authorization. Authorization is not required for purchases of foreign securities whose issuance or offering for sale in WAEMU countries has been authorized by the RCPSFM. The CIMA Code of the CFA franc area member countries does not allow insurance companies to invest abroad.

**Sale or issue abroad by residents**

No.

Residents may sell local corporate securities abroad. If these operations result in foreign control of domestic establishments, foreign investors must declare them to the MOF. The sale of securities to liquidate an investment abroad must be declared to the MOF for statistical purposes.

**Controls on derivatives and other instruments**

Yes.

Residents of the WAEMU zone may hedge risk using foreign exchange derivatives for the following commercial and financial operations: (1) imports and exports of goods and services; (2) foreign borrowing operations by a resident (drawings and repayments); and (3) negotiation of FDI in a resident enterprise. Foreign exchange derivatives can only relate to the purchase or sale, by a resident, of foreign exchange other than the euro or another currency from the Franc Zone.

**Purchase locally by nonresidents**

Yes.

Residents of the WAEMU zone may hedge risk using foreign exchange derivatives for the following commercial and financial operations: (1) imports and exports of goods and services; (2) foreign borrowing operations by a resident (drawings and repayments); and (3) negotiation of FDI in a resident enterprise. Foreign exchange derivatives can only relate to the purchase or sale, by a resident, of foreign exchange other than the euro or another currency from the Franc Zone.

The granting of guarantees and sureties is subject to MOF approval. Transfers abroad of funds to service these facilities require the issuance of an exchange authorization, subject to MOF approval, and the submission of supporting documents.

These facilities may be granted freely, although the funds required for servicing them must be transferred abroad by an authorized bank. If, however, these transactions take place between a resident direct investment company and its parent company located abroad, they are considered to be direct investments and therefore require declaration to the MEF and the BCEAO for statistical purposes.

Controls on direct investment

<table>
<thead>
<tr>
<th>Status</th>
</tr>
</thead>
<tbody>
<tr>
<td>Yes</td>
</tr>
</tbody>
</table>

Direct investment implies control of a company or enterprise. Mere participation is not considered direct investment, unless it exceeds 10% of the capital of a company whose shares are quoted on a stock exchange. All investment outside of WAEMU by residents of the WAEMU, including investment through foreign companies under the direct or indirect control of WAEMU residents and investment by foreign branches or subsidiaries of companies established in a WAEMU member country, requires MEF authorization.

Outward direct investment

<table>
<thead>
<tr>
<th>Status</th>
</tr>
</thead>
<tbody>
<tr>
<td>Yes</td>
</tr>
</tbody>
</table>

All investment abroad by residents is subject to MOF authorization. At least 75% of such investment must be financed by foreign loans. Authorization is not required for purchases of foreign securities whose issuance or offering for sale in WAEMU countries has been authorized by the RCPSFM.

Inward direct investment

<table>
<thead>
<tr>
<th>Status</th>
</tr>
</thead>
<tbody>
<tr>
<td>Yes</td>
</tr>
</tbody>
</table>

FDI, including by resident companies that are directly or indirectly under foreign control and by branches or subsidiaries of foreign companies, must be reported to the MOF for statistical purposes. An equity holding is not considered a direct investment unless it exceeds 10% of the capital of the company in question.

Controls on liquidation of direct investment

<table>
<thead>
<tr>
<th>Status</th>
</tr>
</thead>
<tbody>
<tr>
<td>No</td>
</tr>
</tbody>
</table>

The liquidation of investments abroad must be reported to the MOF and the CB for statistical purposes. Reinvestment of the liquidation proceeds is subject to MOF authorization. If reinvestment is not authorized, the liquidation proceeds must be repatriated within one month through an authorized intermediary. The sale of foreign investments by nonresidents is unrestricted but must be reported to the MOF and the CB for statistical purposes.

</thead>
<tbody>
<tr>
<td>Yes</td>
</tr>
</tbody>
</table>

Personal capital transactions between residents and nonresidents must be made through the BCEAO, the postal administration, or an authorized intermediary bank, unless authorization is obtained from
**Loans**

By residents to nonresidents: Yes. The regulations governing securities and investments apply.

To residents from nonresidents: No. These transactions may be made freely, but must be declared for statistical purposes to the MOF when granted and when repaid.

**Gifts, endowments, inheritances, and legacies**

By residents to nonresidents: Yes. Inheritances and dowries are generally allowed. Gifts and endowments, however, are subject to MOF and BCEAO authorization. These transactions must be conducted through an authorized intermediary and comply with the relevant anti-money-laundering and terrorism financing provisions.

To residents from nonresidents: No. These transactions do not require authorization but are subject to declaration to the minister of finance and the BCEAO for statistical purposes.

**Settlement of debts abroad by immigrants**

Yes. Immigrants who have received resident status must obtain MOF authorization to settle debts contracted abroad while they were nonresidents.

**Transfer of assets**

Yes. These transactions are subject to MOF authorization if the value exceeds CFAF 500,000 a person. There are no restrictions on transfers of amounts below this threshold.

**Transfer abroad by emigrants**

Yes. Foreign accounts (in foreign currencies or CFA francs) of nonresidents who become residents must be closed. However, these individuals may maintain abroad bank accounts opened and financial assets acquired while they were nonresidents. New transfers to these accounts require MOF approval.

**Transfer of gambling and prize earnings**

Yes. These transfers are conducted freely through authorized intermediaries, subject to the presentation of supporting documents and compliance with the relevant provisions on combating money laundering and financing of terrorism.

### Provisions Specific to the Financial Sector

**Provisions specific to commercial banks and other credit institutions**

Yes. The Uniform Law on the Treatment of Dormant Accounts on the Books of Financial Agencies of the Member States of the WAMU by the Council of Ministers of the Union took effect September 28, 2012. Decision No. CM/UMOA/023/2012 sets the deadline (December 31, 2013) for including this law in the domestic legislation of the WAMU members. It remains to be confirmed that this regulation was incorporated into Guinea-Bissau’s legislation.

**Borrowing abroad**

No. Loans abroad are unrestricted. For statistical purposes, these transactions must be declared to the MOF when they are granted and when they are repaid.

**Maintenance of accounts abroad**

Yes. Banks and financial institutions are authorized to open accounts with their correspondent banks for settling transactions for their own account or the accounts of their customers. However, banks are not authorized to hold in these accounts amounts that exceed their current requirements. A bank’s current requirement is calculated in relation to its equity and takes account of its history of fund movements abroad. The amount is used to meet the bank’s short-term cash needs.

**Lending to nonresidents (financial or commercial credits)**

Yes. Commercial lending is allowed. Financial credits are subject to MOF

GUYANA

(Position as of June 30, 2022)

Status under IMF Articles of Agreement

Date of membership
September 26, 1966.

Article VIII
Yes. Date of acceptance: December 27, 1966.

Article XIV

Exchange Measures

Restrictions and/or multiple currency practices
No.

Exchange measures imposed for security reasons
Yes.

In accordance with IMF Executive Board Decision No. 144-(52/51)
Yes.

Guyana maintains certain exchange restrictions solely for the preservation of national and international security. Financial transactions are restricted, and accounts are frozen of individuals and organizations on the lists of individuals associated with terrorism pursuant to (1) UNSC Resolution No. 1333 and (2) organizations associated with terrorism identified by the 1267 Committee. In accordance with UNSC resolutions, restrictions are applied to financial transactions and assets of the Taliban, Al-Qaida, individuals associated with those organizations, and persons and groups associated with terrorism.

Other security restrictions
No.

Exchange Arrangement

Currency
Yes. The currency of Guyana is the Guyanese dollar.

Other legal tender
No.

Exchange rate structure

Unitary
Yes.

Dual

Multiple

Classification

No separate legal tender

Currency board

Conventional peg

Stabilized arrangement
Yes.

The de jure exchange rate arrangement is floating. The exchange rate of the Guyanese dollar is determined in the foreign exchange market. The Bank of Guyana (BOG) periodically purchases foreign currency from foreign exchange dealers to maintain international reserves at acceptable levels. In accordance with bilateral agreements with the CARICOM CBs, the BOG quotes weekly rates for certain CARICOM currencies. The de facto exchange rate arrangement is classified
Crawling peg

**Target measure**
In addition to transactions between ADs and their clients, a significant share of foreign exchange transactions takes place between the BOG and public entities with large export earnings. To reduce segmentation and facilitate price discovery, the authorities recently moved some official transactions to the foreign exchange market. Transactions between foreign exchange dealers and their customers represent a smaller share of the foreign exchange market and include conversion of remittances to people without bank accounts. All commercial banks have cambios; however, not all nonbank financial institutions are cambios. As of June 30, 2022, 13 nonbank financial institutions and 6 commercial banks were licensed to deal in foreign currency. The BOG grants licenses after consultation with the Minister of Finance. Nonbank foreign exchange dealers may sell specified CARICOM currencies to the CB; their operations are limited to the purchase and sale of banknotes and traveler’s checks. These institutions may have accounts abroad. There is a cap on the bid-ask spread of G$1.50 for wires and G$3.00 for cash. This is applicable to all transactions conducted by both the bank and nonbank cambios with their customers.

The BOG conducts its transactions on the basis of the foreign exchange rate obtained by periodically averaging quotes from the three largest dealers. In response to heightened pressure resulting
from seasonal factors, the BOG on occasion intervenes in the foreign exchange market.

The BOG exercises discretion with regard to its purchases of foreign exchange from exports of sugar and gold by the Guyana Sugar Corporation (GuySuCo, the government-owned sugar company) and the Gold Board and uses a “hard currency budget” for official transactions.

The BOG exercises discretion with regard to its purchases of foreign exchange from exports of sugar and gold by the Guyana Sugar Corporation (GuySuCo, the government-owned sugar company) and the Gold Board and uses a “hard currency budget” for official transactions.

Banks may trade with each other freely. There are six commercial banks, but the interbank market has not been very active. Direct BOG intervention in the market is rare. The BOG occasionally processes requests from commercial banks for the sale of foreign currency at the average market rate. Interbank trades are infrequent, and the volume is insignificant. The market does not operate on a commission basis nor does the cap on the bid-ask spread apply to interbank transactions. As of June 30, 2022, five commercial banks participated in the interbank market.

Interbank transactions take place over the counter.

Domestic currency may not be used for current transactions and payments.

Domestic currency may not be used for capital transactions.

Domestic payments are restricted to the Guyanese dollars.

There are arrangements with all the CARICOM CBs.

Guyana is a member of CARICOM.
Administration of control | No.
--- | ---
Payments arrears | Yes.
Official | Yes. As a consequence of ongoing negotiations, technical arrears are owed to the following bilateral creditors: Argentina, China, India, Italy, Kuwait, Libya, Serbia, Trinidad and Tobago, the United Arab Emirates, and Venezuela. Technical arrears are also owed to commercial creditors in the United States.
Private | Yes. Arrears exist on certain dormant accounts holding domestic currency deposits equivalent in value to pending applications for foreign exchange.

### Controls on trade in gold (coins and/or bullion)

| On domestic ownership and/or trade | Yes. Residents other than the monetary authorities, ADs, producers of gold, and authorized industrial users may not hold or acquire gold in any form, at home or abroad – except for numismatic purposes and jewelry – without special permission.
| On external trade | Yes. Imports and exports of gold in any form by, or on behalf of, the monetary authorities, ADs, producers of gold, and industrial users require permits endorsed by the Guyana Gold Board.

### Controls on exports and imports of banknotes

### Resident Accounts

<table>
<thead>
<tr>
<th>Foreign exchange accounts permitted</th>
<th>Yes.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Held domestically</td>
<td>Yes. Exporters are allowed to maintain and operate foreign exchange accounts. These accounts are approved on merit but are generally granted to bona fide exporters who require imported inputs for production and/or have external loan obligations. These accounts may be credited with all or a portion of retained export proceeds and proceeds of foreign currency loans. They may be debited freely for payments at the discretion of the account holder.</td>
</tr>
</tbody>
</table>

| Approval required | Yes. |
| Held abroad | Yes. |
| Approval required | No. |
| Accounts in domestic currency held abroad | No. |
| Accounts in domestic currency convertible into foreign currency | No. The Foreign Exchange (Miscellaneous Provisions) Act No. 8 of 1996 specifies that “Except with the permission of the Minister, no person
resident in Guyana, other than an AD, shall, in Guyana operate a
foreign currency account.”

Nonresident Accounts

Foreign exchange accounts permitted Yes. External accounts may be opened by commercial banks, without CB
approval, for citizens of Guyana residing permanently abroad,
citizens of other countries temporarily residing in Guyana,
n居民s attached to diplomatic missions or international
organizations, branches of companies incorporated outside Guyana,
and companies incorporated in Guyana but controlled by
nonresidents abroad. These accounts may be maintained in US
dollars, pounds sterling, Canadian dollars, or euros and may be
credited with noncash instruments of convertible foreign currencies
transferred through the banking system. These accounts may also be
credited freely with all authorized payments by residents of Guyana
to nonresidents; other credits require approval. They may be debited
freely for payments for any purpose to residents of any country,
transfers to other external accounts, withdrawals by the account
holder in Guyana, and transfers to nonresident accounts.

Approval required No.

Domestic currency accounts Yes.

Convertible into foreign currency Yes. Domestic currency accounts can only be converted to foreign
currency accounts with approval by the MOF through the CB.
Applications for foreign currency accounts are determined on their
merit but generally granted to:
Bona fide exporters who require imported inputs for production, or
with external loan obligations; certain service providers, including
travel agents, hotels, shipping agents and airlines; large importers of
essential goods and services.

Approval required Yes.

Blocked accounts No.

Imports and Import Payments

Foreign exchange budget No. The BOG prepares a statement of convertible currency receipts and
payments to monitor projected flows.

Financing requirements for imports No. Import transactions effected through the foreign exchange market are
permitted without restriction. Most imports of consumer goods take
place on this basis.

Minimum financing requirements No.

Advance payment requirements No.

Advance import deposits No.

Documentation requirements for release of foreign exchange for imports Yes. Documentation requirements are for all official imports – petroleum,
machinery and equipment, goods, etc.

Domiciliation requirements No.

Preshipment inspection No.

Letters of credit No.

Import licenses used as exchange licenses No.

Other Yes. Documents required include invoices, bills of lading, and certificates
| **Import licenses and other nontariff measures** | Yes. | There are no licensing requirements for permissible imports, except for petroleum products and some 20 items affecting national security, public health and safety, and the environment. |
| Positive list | No. |
| Negative list | Yes. | Imports of unprocessed meat, poultry, fruit, and processed fruit items from non-CARICOM sources are restricted and subject to import-licensing controls. |
| Open general licenses | No. |
| Licenses with quotas | No. |
| Other nontariff measures | No. |
| **Import taxes and/or tariffs** | Yes. | Guyana maintains a CET rate that ranges from 5% to 20%. A tariff rate of 40% applies only to agricultural products. A duty rate of 100% applies to imports of chicken from non-CARICOM sources, but those from CARICOM countries are exempt. The duty on evaporated milk is 20%. Guyana maintains the CARICOM CET rate that ranges from 5% to 20%. A tariff rate of 40% applies only to agricultural products. All duties are value added. The Customs Act allows for the National Assembly to impose import or export duties on any goods. Additionally, the Government of Guyana levies a value-added tax at a rate of 14%, applied equally to imports and locally produced goods and services. |
| Taxes collected through the exchange system | No. |
| State import monopoly | No. |

**Exports and Export Proceeds**

| Repatriation requirements | No. |
| Surrender requirements | No. |
| **Surrender to the central bank** | No. |
| **Surrender to authorized dealers** | No. |
| Financing requirements | No. |
| Documentation requirements | No. |
| Letters of credit | No. |
| Guarantees | No. |
| Domiciliation | No. |
| Preshipment inspection | No. |
| Other | No. |
| **Export licenses** | Yes. | Licenses are required for exports of gold and wildlife. |
| Without quotas | Yes. | Exports of gold are not subject to quotas. |
| With quotas | Yes. | There are quotas for the preferential supply of some commodities to certain markets and for exports of wildlife. |
Export taxes  Yes. There is a levy on rice exports, which is reinvested in the rice industry. Sugar exports are not taxed, but there is a duty of G$1 a ton on unrefined sugar exports outside the region. Exports of timber, bauxite, live birds, aquarium fish, greenheart, raw gold, and precious stones are subject to export duty.

Collected through the exchange system  No.

Other export taxes  Yes. There is a levy on rice exports, which is reinvested in the rice industry. Sugar exports are not taxed, but there is a duty of G$1 a ton on unrefined sugar exports outside the region. Exports of timber, bauxite, live birds, aquarium fish, greenheart, raw gold, and precious stones are subject to export duty.

Proceeds from Invisible Transactions and Current Transfers

Repatriation requirements Yes.
Surrender requirements Yes.
Surrender to the central bank No.
Surrender to authorized dealers Yes.

Money transfer agencies must sell their monthly net inflows to licensed bank cambios with a maximum of 25% of such inflows being sold to any one cambio.

Since June 23, 2020, the Bank temporarily waived the guidelines on the sale of foreign currency by money transfer agencies, in light of the impact of the COVID-19 pandemic, until further notice. The temporary waiver allows for up to 50% to be sold to any one cambio.

Restrictions on use of funds No.

Capital Transactions

Controls on capital transactions Yes.
Repatriation requirements No.

Investors may open accounts in the Guyanese dollars and in foreign convertible currency with any corporate entity licensed under the Banking Act. Capital and investment income may be repatriated freely. Residents and nonresidents have unlimited access to the foreign exchange market to repatriate funds. There is no deadline to repatriate proceeds.

Surrender requirements No.
Surrender to the central bank No.
Surrender to authorized dealers No.

Controls on capital and money market instruments Yes.
On capital market securities Yes.

Shares or other securities of a participating nature Yes.
Purchase locally by nonresidents No.
Sale or issue locally by nonresidents Yes.

Purchase abroad by residents No.
Sale or issue abroad by residents No.
Bonds or other debt securities No.

Investments comprising statutory funds held locally may not fall below 65% of the total statutory fund.

Twenty percent of pension assets, provided for each percentage point of its assets invested in the common stock or long-term debt of a company in Guyana, the 20% maximum may be increased by one percentage point, up to a maximum of a ten percentage-point increase.

Eighty percent of pension plan’s total assets, provided for each percentage point of its assets invested in the common stock or long-term debt of a company in Guyana, the 80% minimum may be reduced by one percentage point, up to a maximum of a ten percentage-point reduction.
Changes during 2021 and 2022
No significant changes occurred in the exchange and trade system.
HAITI
(Position as of July 31, 2022)

Status under IMF Articles of Agreement

Date of membership
September 8, 1953.

Article VIII
Yes. Date of acceptance: December 22, 1953.

Article XIV

Exchange Measures

Restrictions and/or multiple currency practices
No.

Exchange measures imposed for security reasons
No.

In accordance with IMF Executive Board Decision No. 144-(52/51)
No.

Other security restrictions
No.

Exchange Arrangement

Currency
Yes. The currency of Haiti is the Haitian gourde.

Other legal tender
Yes. The US dollar circulates freely and is generally accepted in Haiti. Several gold coins have been issued that are legal tender but do not circulate.

Exchange rate structure

Unitary
Yes.

Dual

Multiple

Classification

No separate legal tender

Currency board

Conventional peg

Stabilized arrangement

Crawling peg

Crawl-like arrangement

Pegged exchange rate within horizontal bands

Other managed arrangement
Yes. The de jure exchange rate arrangement is floating. The Bank of the Republic of Haiti (BRH) intervenes in the foreign exchange market to avoid excessive volatility. The de facto exchange rate arrangement is classified as other managed. The BRH publishes information on foreign exchange interventions monthly on its website.
Floating
Free floating

**Official exchange rate**

Yes. The reference rate is officially used by banks to convert US dollar amounts to gourdes on their books and in their financial statements and other reports. The CB does this to prevent banks from using different rates for the same date. As a result, financial and nonfinancial institutions have used this rate for their exchange transactions. The reference rate is published daily on the BRH website.

Other

Transparency

Publication of votes

Publication of minutes

Publication of inflation forecasts

Other monetary framework Yes. Although base money is an indicative target for monetary policy, the CB looks at exchange rate movements (given the high pass-through to inflation), liquidity conditions, and growth.

Exchange tax No.

Exchange subsidy No.

Foreign exchange market Yes. The Haitian foreign exchange market is divided into a formal and an informal sector. According to an estimate by the CB, the global volume of transactions is divided up as follows: 60% is traded in the formal sector and 40% in the informal sector. Thus, the average rate used in the banking system and the average rate in the informal market are weighted by their sector weights to calculate the reference rate. ADs are allowed to determine freely their bid-ask spread and foreign exchange commissions with their customers.

Spot exchange market Yes. The BRH operates a US dollar clearinghouse mainly for checks drawn on local banks. Commercial banks quote buying and selling rates for certain other currencies based on the buying and selling rates of the US dollar for those currencies in exchange markets abroad. The market is dominated by banks, followed by money changers. According to the monetary authorities, all banks and certain nonbank financial institutions may conduct foreign exchange transactions. Foreign exchange bureaus must obtain licenses, following a process coordinated by the Ministry of Commerce and Industry (MCI), CB, and the Ministry of Economy and Finance. Authorized foreign exchange bureaus may conduct foreign exchange transactions directly with the CB. These bureaus may not hold accounts abroad and may not make foreign currency payments or transfers on behalf of their clients.

Operated by the central bank Yes. The CB buys and sells foreign exchange. Interventions are made in an effort to contain exchange rate fluctuations, to supply the market and build up reserves.

Foreign exchange standing facility Yes.

Allocation No. The CB does not allocate foreign exchange to finance-specific transactions. However, the CB pays oil bills on behalf of the MOF.

Auction No.

Fixing No.

Interbank market Yes. Banks trade among themselves on a small scale; the interbank market
is not well developed. The CB may intervene directly with banks. In case of sales or purchases of foreign currency, the CB does not intervene via market makers. The CB has issued licenses to eight commercial banks, all of which are active in the foreign exchange market. In case of sales of foreign currency, the CB proposes its own quotes, and there are limits on the bid-ask spreads. For procurement operations, however, the CB negotiates the quotes with banks.

### Over the counter
- Yes.

### Brokerage
- No.

### Market making
- No.

### Forward exchange market
- No.

### Official cover of forward operations
- No.

#### Private
- No.

### Controls on trade in gold (coins and/or bullion)
- Yes.

#### On domestic ownership and/or trade
- Yes.

There are no limitations on the use of domestic currency in international payments for current or capital transactions; however, domestic currency has not yet been used for such purposes.

Transactions between residents may be settled in foreign currency.

Haiti is a member of CARICOM.

Residents may hold and acquire gold coins in Haiti for numismatic...
The BRH has the exclusive right to purchase gold domestically and to export gold in the form of coins, mineral dust, or bars. Exports of gold require authorization from the MCI and the Ministry of Economy and Finance, as well as MCI endorsement, before customs clearance. However, commercial imports of articles containing small amounts of gold, such as gold watches, are freely permitted and do not require an import license or other authorization.

Licenses are only required for import of firearms, pharmaceutical and chemical products, petroleum products, alcoholic products, arms, and meat products. These are issued by the MCI. The approval of the MCI is required for the imports of ethanol. Imported goods are subject to verification of compliance with standards before shipment to Haiti.

The four standard tariff rates are 0%, 5%, 10%, and 15%. Some goods have special tariff rates gasoline, 57.8%, and cement, rice, sugar, dried onions, dried mushrooms, dried truffles, and vegetables with a dry hull, 3%. There is a domestic turnover tax on the c.i.f. value plus import duties. There are two specific rates: (1) G 0.82 a kilogram for grated, powdered, or melted cheese and (2) G 0.71 a kilogram for dried garlic. Imports, except inputs for certain export industries, are subject to a 5% verification fee: whisky (12%), beer (12%), wine (12%), cars of 2200 CC and more (10%), cigarettes and tobacco (12%), red sugar (0.075 gourdes/lbs), refined sugar (0.20 gourde/lbs), malt drinks (2 gourdes/the box), and milk-based drinks (5%).

Haiti is a member of CARICOM. Articles 12, 26, 27, 28, and 29 of the 2021–2022 General Budget point out specific tariff rates for some goods.

## Exchange Measures

- **Restrictions and/or multiple currency practices**: Yes.
- The IMF staff report for the Fourth Reviews under the Stand-by Arrangement and the Arrangement under the Standby Credit Facility, Requests for Augmentation of Access, Extension and Rephasing of the Arrangements, and Waivers of Nonobservance of Performance Criteria with Honduras states that, as of August 30, 2021, Honduras maintained two MCPs. The MCPs relate to the use of the previous days’ official exchange rates in certain foreign exchange transactions (which could differ by more than 2% from the official rate in force and the interbank rate on a given day), and the fact that there is no mechanism to prevent a spread of more than 2% between the official exchange rate and the exchange rates resulting from a CB foreign exchange auction. (Country Report No. 21/207)

- **Exchange measures imposed for security reasons**: No.
  - In accordance with IMF Executive Board Decision No. 144-(52/51)
  - Other security restrictions

## Exchange Arrangement

- **Currency**: Yes. The currency of Honduras is the Honduran lempira.
- **Other legal tender**: No.
- **Exchange rate structure**: Yes.
- **Classification**
  - No separate legal tender
  - Currency board
  - Conventional peg
  - Stabilized arrangement
  - Crawling peg

The de jure exchange rate arrangement is a crawling band. The reference exchange rate (TCR) is the average of the weighted average exchange rate of the Mercado Interbancario de Divisas.
(TCPM MID) of the previous day. The prices of the offers for the purchase and sale of foreign currency presented in the MID must be comprised in an exchange bank of 1% above and below the center of the exchange bank, which is the average of the base price used in the last seven events of the MID weighted at 80% and the average of TCPP MID resulting from the last seven MID events, weighted at 20%.

The base price will be calculated every five MID events taking into consideration: (1) the differential between the domestic and external inflation rate; the external inflation rate is defined as the weighted average estimated inflation rates of Honduras’s key trading partners; and domestic inflation will be measured with the CPI. The inflation differential will be determined by comparing the year-on-year change in the CPI recorded during the past month with external inflation weighted to reflect the external trade structure, to be subject to periodic review; (2) the nominal effective exchange rate index, that is, changes in the exchange rate of the key trading partners against the US dollar; and (3) international reserve coverage, number of months of imports covered by the official reserve assets of the Central Bank of Honduras (BCH). The BCH publishes the results of the foreign exchange trading carried out on the MID on a daily basis at its website.

Since February 2022, the exchange rate has stabilized. However, more observations are needed to determine its new trend. Until then, the de facto exchange rate arrangement remains classified as crawling peg.

Crawl-like arrangement

Pegged exchange rate within horizontal bands

Other managed arrangement

Floating

Free floating

Official exchange rate

Yes. Effective March 7, 2022, the calculation of the TCR was modified, such that the result of the TCPP MID becomes the TCR of the following day. The way of calculating the base price is maintained.

Previously, effective June 14, 2021, the BCH through Agreement No. 06/2021 issued on June 3, 2021, establishes that the TCR corresponds to the weighted average by price amounts that result from the event of the day in the MID and the TCR of the day of the currencies withheld by the exchange agents for the payment of their own expenses and direct sale to the clients of the private sector. Prior to that, the official or TCR was defined as the weighted average (by amounts) of the prices from the last foreign exchange auction, from the last MID event, and the TCR of the day of the foreign currencies held by the banks, for the payment of their own expenses and direct sales to private sector clients. The TCR applies to foreign currency purchase and sale operations carried out by foreign exchange agents authorized by the BCH, as well as those carried out by public sector institutions. The purchase and sale commissions will be those stipulated by the BCH Board of Directors.

Monetary policy framework

Exchange rate anchor

Yes.
The monetary policy framework is primarily an exchange rate anchor vis-à-vis the US dollar. The BCH uses an internationally accepted indicator to determine its adequate minimum reserve targets as part of its wider monetary programming framework.
Transparency

Publication of votes
Publication of minutes
Publication of inflation forecasts

Other monetary framework

Exchange tax
No.

Exchange subsidy
No.

Foreign exchange market
Yes. Authorized agents can determine foreign exchange commissions within the limits stipulated in numeral 6.2 of Agreement No. 11/2022 of the BCH of July 28, 2022, and effective August 1, 2022, which complements the Regulations for Trading in the Organized Foreign Currency Market: foreign exchange agents (1) will charge their private sector clients an exchange commission for the sale of foreign currency, which may not exceed 0.5% (previously 0.7%); (2) will charge an exchange fee of 0.3% for currencies sold in the MID; and (3) will not charge a commission for the purchase of foreign currency made from their private sector clients.

Spot exchange market
Yes. Any individual or legal entity that is not a foreign exchange dealer may hold foreign exchange assets but may sell them only to the BCH or ADs. The BCH and ADs must buy foreign exchange at the TCR. The only institutions authorized to negotiate currencies as foreign exchange agents authorized by the BCH are banks in the financial system (15), savings and loan associations (none), and exchange bureaus (1); this number of exchange agents remains accurate. Under the law and regulations, exchange bureaus may purchase the foreign exchange received by the private sector from any source, except what by law or resolution of the BCH Board of Directors must be traded in the domestic financial system. Exchange bureaus may sell foreign exchange for outward payments. To that end, they may manage deposit accounts abroad with first-class institutions. The BCH may establish maximum and minimum limits on their foreign exchange holdings. There is also one state bank. Under the Regulations, all banks can trade foreign currencies, including state-owned banks, as long as they meet the operational requirements to act as an exchange agent.

Operated by the central bank
No.

Foreign exchange standing facility
No.

Allocation
No.

Auction
No. Effective June 14, 2021, through the approval of Agreement Nos. 06/2021 and 7/2021, both on June 3, 2021, the BCH suspended foreign currency auctions for the sale of foreign currency to natural and legal entities. Previously, foreign exchange auctions were held weekdays, excluding holidays.

Fixing
No.

Interbank market
Yes. The MID does not operate according to a system of dealers; the banks participate directly using a price for the offers to buy and sell foreign currency comprised in an exchange band of 1% above and below the center of the exchange bank, which will be made up of the average of the base price used in the last seven events of the MID plus the average of the absolute variation of the current TCR of the
day with respect to that of the previous business day of the seven previous business days. The TCPP of the bids registered in the MID is part of the calculations to determine the TCR, and the maximum commission charged for the purchase is, effective June 14, 2021, 0.3% of the price offered by the banks in the MID (0.3% for the selling bank). Previously, the maximum commission charged for the purchase was 0.4% of the price offered by the banks in the MID (0.1% for the BCH and 0.3% for the selling bank). Only the BCH authorizes exchange agents; however, during 2021 there were no authorizations for new exchange agents.

The exchange market operates directly between individuals and legal entities and the exchange agents; there are no intermediary companies between the participants, and the market maker role is not entirely identified, although some banks, because of their trading volume in the market, become highly prominent. The purchase price of foreign currency is established by the TCR in force for the day and the sale price for the TCR of the day plus an exchange commission of up to 0.7%.

As of December 15, 2021, the participation of exchange houses (1) in the MID is incorporated, in addition to the 15 banks. The foreign exchange agents (banks and exchange houses) participate directly using a price for the currency purchase and sale offers presented in the MID. There are no authorizations for new foreign exchange agents.

Effective December 15, 2021, the calculation of the center of the exchange band of the MID was modified, such that it is the average of the base price used in the last seven events of the MID weighted at 50% and the average of the TCPP MID resulting from the last seven MID events, weighted at 50%; the exchange rate band continues to be 1.0% above or below the center of the exchange rate band. In the same way, the way of calculating the RER and the base price is maintained.

Effective March 7, 2022, the calculation of the center of the exchange band of the MID was modified, such that it is the average of the base price used in the last seven events of the MID weighted at 80% and the average of the TCPP MID resulting from the last seven MID events, weighted at 20%; the exchange rate band continues to be 1.0% above or below the center of the exchange rate band.

Effective March 7, 2022, the calculation of the TCR was modified, so that the result of the TCPP MID becomes the TCR of the following day. The exchange commissions charged in the MID and the calculation of the base price are maintained.

The currency purchase price is established by the current TCR for the day, and the sale price is given by the TCR of the day plus an exchange commission of up to 0.5%.

### Arrangements for Payments and Receipts

**Prescription of currency requirements**  Yes.  

There are no restrictions on the use of lempiras as a means of payment for current international or capital transactions.

**Controls on the use of domestic currency**  No.  

For current transactions and payments  No.  

For capital transactions  No.  

Transactions in capital and money market instruments  No.  

Transactions in derivatives and other instruments  No.  

Credit operations  No.  

**Use of foreign exchange among residents**  Yes.  

All payment obligations to be made in Honduras must be settled in lempiras, except payments that fall within the category of cross-border payments from or to Honduras because they relate to international transactions (Articles 3 and 4 of the Monetary Law). Remittances can be paid in US dollars, on behalf of the beneficiary in an authorized institution only by crediting a foreign currency deposit account (or in lempiras at the choice of those who receive the funds). If the remittances’ original contract in the source country does not specify the currency in which the funds should be paid, they are paid out in the equivalent of the amount of the remittance sent multiplied by the TCR of the day the remittance is collected by the beneficiary; in cases where the contract stipulates the exchange rate, the remittance must be paid out in lempiras for the equivalent of the remittance sent multiplied by the TCR of the day the sender posted the remittance.

**Payments arrangements**  Yes.  

Bilateral payments arrangements  Yes.  

Operative  No.  

Inoperative  Yes.  

The Reciprocal Clearing and Credit Agreement between Honduras and Costa Rica, El Salvador, and Guatemala was in effect until 1995. 

Regional arrangements  Yes.  

Honduras has signed the following treaties: (1) CAFTA–DR (Central America–Dominican Republic) Free Trade Agreement, (2) CACM, (3) CA–Mexico, CA3–Colombia, and CA–Panama, (4) Free Trade Agreement between the Republic of El Salvador, the Republic of Honduras, and the Taiwan Province of China, and (5) Central America–Chile. It has also signed an association agreement with the EU (CA–EU). The CA4 Treaty with Canada, the Costa Rica, El Salvador, Honduras, and Peru; the Central America–Korea; and the EFTA treaties are currently under negotiation. Import tariff quotas in metric tons for 2014 under the free trade treaty between Central America, the Dominican Republic, and the United States were as follows: pork, 3,350; powdered milk, 443; butter, 148; cheese, 606; granza rice, 106,200; yellow corn, 254,012; white corn, 26,680; milled rice, 11,900; ice cream, 141; other dairy products, 197; and chicken (thighs, legs), 3,206. There are also import quotas in other treaties, including for such products as beef, palm oil, stockings and socks, dog and cat food, textiles and garments, sugar, and cured ham.

Clearing agreements  No.  

Barter agreements and open accounts  No.

Individuals entering or leaving Honduras are required to declare under the anti-money-laundering law amounts exceeding US$10,000.

**Resident Accounts**

The Law on the Financial System states that banks may receive foreign currency deposits in the form of demand, savings, and fixed-term deposits and may contract foreign currency obligations with the BCH and other banks or institutions in the financial system of Honduras or abroad. To comply with the foreign currency reserve requirement, depository institutions must open special accounts at correspondent banks abroad and invest in high-liquidity foreign instruments. Insurance institutions may also maintain investments abroad.

Residents may freely open foreign exchange accounts in local banks. Financial system institutions may accept funds in US dollars, euros, Swiss francs, Japanese yen, renminbi (yuan), pounds sterling, and Canadian dollars.

Nonresident Accounts

Foreign exchange accounts permitted Yes.  
Banks may receive deposits in foreign exchange in the form of checking accounts, demand deposits, savings deposits, and time deposits in US dollars, yen, euro, Swiss francs, yuan, sterling, and Canadian dollars.

Approval required No.

Domestic currency accounts No.

Convertible into foreign currency No.

Approval required No.

Blocked accounts No.

Imports and Import Payments

Foreign exchange budget No.

Financing requirements for imports No.

Minimum financing requirements No.

Advance payment requirements No.

Advance import deposits No.

Documentation requirements for release of foreign exchange for imports No.

Domiciliation requirements No.

Preshipment inspection No.

Letters of credit No.

Import licenses used as exchange licenses No.

Other No.

Import licenses and other nontariff measures Yes.

Positive list No.

Negative list No.

Open general licenses No.

Licenses with quotas Yes.  
Tariff rate quotas in metric tons under the free trade treaty between the Central America, Dominican Republic, and the United States are as follows: pork, 3,650; powdered milk, 489; butter, 163; cheese, 668; granza rice, 1,09,800; yellow corn, 2,81,227; white corn, 28,060; milled rice, 13,175; ice cream, 163; other dairy products, 228; and chicken (thighs, legs), 8,810.

Other nontariff measures No.

Import taxes and/or tariffs Yes.  
Tariff rates are 0% for capital goods and raw materials; 5%–10% for intermediate products; and 15% for finished goods, with some exceptions (for example, chicken meat, milk, rice, sugar, cigarettes, fertilizers, and medicines). The tariff rate on goods produced in the
CACM area is 0%, with the exception of the products included in Annex A (sugar and coffee). Free zones for the processing of industrial and agricultural products benefit from tariff exemptions. The tourism industry also benefits from temporary tariff exemptions. Duties on most tariff lines corresponding to industrial and consumer goods were eliminated when the CAFTA-DR agreement came into force. Duties on other goods will be phased out over periods of up to 10 years, with the exception of products negotiated under tariff rate quotas. Some agricultural goods have longer tariff elimination periods or are subject to other provisions, including, in some cases, the application of tariff rate quotas.

**Exports and Export Proceeds**

**Repatriation requirements** Yes. Article 8 of the Law on Entry of Foreign Exchange Derived from Exports states that exporters are required to repatriate all of the foreign exchange generated by their exports and must comply with the time periods set out in Article 5, which vary between 20 and 85 business days. Exports of goods originating in free trade zones or EPZs, as well as low-volume exports and exports by offshore processing enterprises, are exempt.

**Surrender requirements** Yes.

**Surrender to the central bank** Yes. Pursuant to the provisions of Articles 1, 8, and 10 of the Law on the Entry of Foreign Exchange derived from Exports, individuals and legal entities that export goods must declare to the BCH, before exportation for each export operation, the quality, value, and destination of the goods to be exported, as well as the probable date of exportation and the currency in which payment will be received. Under Resolution No. 406-7/94, the BCH board may allow exporters to retain up to 30% of their foreign exchange proceeds for priority purchases abroad of inputs, machinery, and parts used in production of their exports and to pay authorized external debt obligations. Exporters have the obligation to sell 100% of the foreign currency from exports to foreign exchange agents, except for those who have been authorized by the BCH Board of Directors up to 30% as priority foreign currency.

Effective June 14, 2021, the requirement to deliver foreign currency to the BCH by foreign exchange agents was eliminated. Previously, effective March 1, 2021, pursuant to Agreement No. 03/2021, Paragraph 1, Numerals 1.2 and 1.3, exchange agents that purchase foreign exchange from their private sector customers must transfer 20% of it to the BCH no later than the business day following their purchase and that 80% of the foreign currency purchased and not transferred to the BCH by foreign exchange agents must be used for (1) payment of their own expenses; (2) sales to private sector clients for amounts less than or equal to US$1,000,000; and (3) sale in the MID.

Previously, as of January 6, 2020, pursuant to Resolution No. 531-12/2019 of December 5, 2019, Paragraph 1, Numerals 1.2 and 1.3, exchange agents that purchase foreign exchange from their private sector customers, including from capital transactions, had to transfer 40% of it to the BCH no later than the business day following their purchase, and that 60% of the foreign currency purchased and not transferred to the BCH by foreign exchange agents had to be used for (1) payment of their own expenses; (2) sales to private sector clients for amounts less than or equal to US$1,000,000; and (3) sale in the MID.
for amounts less than or equal to US$520,000; and (3) sale in the MID.

**Surrender to authorized dealers**
Yes. Under Article 5 of the Regulation of the Law on Foreign Exchange from Exports, deadlines ranging from 20 to 85 business days have been set for the surrender of foreign exchange, depending on the product.

**Financing requirements**
No.

**Documentation requirements**
Yes.

**Letters of credit**
No.

**Guarantees**
No.

**Domiciliation**
Yes. Before submitting an export declaration, all exporters must have updated the form “Exporter Identification Data”; any individual or legal entity that is legally constituted may export goods.

**Preshipment inspection**
No.

**Other**
No.

**Export licenses**
No. Licenses are not required, but exports must be reported to the BCH in compliance with the Law on the Entry of Foreign Exchange, which requires repatriation of foreign exchange. To expedite authorization, the BCH participates in the Centro de Trámites de Exportación (Export Documentation Center – CENTREX). The BCH authorizes applicants to submit export declarations through the Electronic Foreign Trade System (SECEH).

**Without quotas**
No.

**With quotas**
No.

**Export taxes**
No.

**Collected through the exchange system**
No.

**Other export taxes**
No.

---

**Payments for Invisible Transactions and Current Transfers**

There are no controls on these payments, but all buyers of foreign exchange are required to fill out a form under the anti-money-laundering law for amounts exceeding US$10,000. In addition, enterprises remitting cash to or from Honduras must register and report to the National Banking and Insurance Commission (CNBS) the amounts transferred. Remittances in cash to or from Honduras are limited to US$2,000 or its equivalent in other foreign currency or in lempiras.

To define the scope of the Special Anti-Money-Laundering Law, covered entities (institutions supervised by the CNBS) must generate the corresponding records and reports in the following instances: (1) cash transactions in foreign currency performed by their clients in the amount of US$4,000 or equivalent in foreign currency; (2) cash transactions in national currency by their clients in the amount of L 2,00,000; (3) non-cash transactions with their clients in the amount of L 2,00,000 or equivalent in foreign currency; and (4) remittance transactions of US$2,000 in foreign currency or national currency; multiple cash transactions in legal tender or foreign currency made on behalf of a single individual or legal entity during one calendar month must be considered as a single transaction. Moreover, the...
maximum amount receivable from non-clients during one calendar month is US$4,000.

Nonresidents may not participate in the BCH’s foreign exchange auctions and may buy foreign exchange directly from Ads. Articles 13 and 18 of the Regulations on the Trading of Foreign Currency in the Organized Market state that the only foreigners who may participate in foreign exchange auctions through an AD are foreign residents with a residence card issued by the Ministry of Governance and Justice. There are no limits regarding the payment of dividends or interest. The currencies purchased by exchange agents in the MID should be used for the following: (1) own expenditures; (2) sales per private sector client for amounts less than or equal to, effective June 14, 2021, US$1,500,000 daily (previously, effective March 1, 2021, it was increased to US$1,000,000 from US$520,000); and (3) sale to its clients in the private sector for the conversion of resources in local currency from the service and negotiation of internal debt issued by the MOF (SEFIN, Secretaria de Finanzas) and placed with nonresident investors.

Proceeds from Invisible Transactions and Current Transfers

Repatriation requirements No.
Surrender requirements Yes.
Surrender to the central bank Yes.

Pursuant to the provisions of Articles 1, 8, and 10 of the Law on the Entry of Foreign Exchange derived from Exports, individuals and legal entities that export goods (does not apply to exports of services) must declare to the BCH, before exportation for each export operation, the quality, value, and destination of the goods to be exported, as well as the probable date of exportation and the currency in which payment will be received. Under Resolution No. 406-7/94, the BCH board may allow exporters to retain up to 30% of their foreign exchange proceeds for priority purchases abroad of inputs, machinery, and parts used in production of their exports and to pay authorized external debt obligations. Effective June 14, 2021, the requirement to deliver foreign currency to the BCH by foreign exchange agents was eliminated (Agreement No. 7-2021).

Previously, as of January 6, 2020, pursuant to Resolution No. 531-12/2019 of December 5, 2019, Paragraph 1, Numerals 1.2 and 1.3, exchange agents that purchase foreign exchange from their private sector customers, including from capital transactions, had to transfer 40% of it to the BCH no later than the business day following their purchase, and that 60% of the foreign currency purchased and not transferred to the BCH by foreign exchange agents had to be used for (1) payment of their own expenses; (2) sales to private sector clients for amounts less than or equal to US$520,000; and (3) sale in the MID.

Surrender to authorized dealers No.
Restrictions on use of funds No.

Capital Transactions

Controls on capital transactions Yes.
Repatriation requirements No.
Surrender requirements No.
Effective June 14, 2021, the surrender requirement of foreign currency to the BCH by exchange agents was eliminated, so that exchange agents will be able to retain the foreign currency purchased from their private sector clients, which can be used for the following purposes: (1) own expenditures, (2) daily sales to private sector clients for amounts less than or equal to US$1,500,000, and (3) sale in the MID, in the case of banks (subsequently, as of December 15, 2021, the exchange dealers were integrated to participate in the MID). The currencies not used in the previous concepts will form part of the currency holding, without exceeding the limit authorized by the Board of the BCH. When there are no trading events in the MID, banks may accumulate foreign exchange earnings in the amounts of currency holding, without being considered for the calculation thereof; currencies to be traded in the immediate aftermath of the MID.

Previously, effective March 1, 2021, pursuant to Agreement No. 03/2021 of February 2021, Paragraph 1, Numerals 1.2 and 1.3, exchange agents that purchase foreign exchange from their private sector customers must transfer 20% of it to the BCH no later than the business day following their purchase, and that 80% of the foreign currency purchased and not transferred to the BCH by foreign exchange agents must be used for (1) payment of their own expenses; (2) sales to private sector clients for amounts less than or equal to US$1,000,000; and (3) sale in the MID.

Previously, as of January 6, 2020, pursuant to Resolution No. 531-12/2019 of December 5, 2019, Paragraph 1, Numerals 1.2 and 1.3, exchange agents that purchase foreign exchange from their private sector customers, including from capital transactions, had to transfer 40% of it to the BCH no later than the business day following their purchase, and that 60% of the foreign currency purchased and not transferred to the BCH by foreign exchange agents had to be used for (1) payment of their own expenses; (2) sales to private sector clients for amounts less than or equal to US$520,000; and (3) sale in the MID.

Article 4 of the Investment Promotion and Protection Law affords foreign investors the same treatment as local investors and therefore guarantees free participation of foreign investment in the equity structure of companies, except in industries producing goods related to defense or hazardous substances.

Foreign issuers may issue public offerings of securities, provided such securities and their issuers are registered in Honduras in the Public Stock Market Registry (Registro Público del Mercado de Valores) and with the stock exchange. They must also be listed on the stock exchange of their country of origin, with which there must be reciprocity agreements signed either at the government level and/or between supervisory entities (Article 8 of the Law on the Stock Market).

Insurance companies’ investments abroad may not exceed 25% of total investment resources, except as provided for in Article 88 of the Law on Insurance and Reinsurance Institutions. Investments abroad by depository institutions pursuant to the Regulation on Management...
of Foreign Currency Deposit Accounts may be held only in (1) demand, overnight, and term deposits; CDs; bankers’ acceptances; and other instruments issued by first-class banks or financial institutions abroad; (2) bills, notes, and bonds and other instruments issued and guaranteed by a government; (3) negotiable instruments of government agencies and other public entities or financial institutions guaranteed by governments or government institutions; (4) deposits, notes, and fixed-income bonds issued by supranational financial institutions; and (5) money market mutual funds (MFs), with a maturity not exceeding one year. The investments specified must meet BCH qualifications. Investments in the “other instruments” mentioned in Item (1) may not exceed 5% of the depository institution’s total foreign currency deposits.

Sale or issue abroad by residents  No.
Bonds or other debt securities  Yes.
Purchase locally by nonresidents  Yes. Resident and nonresident individuals and legal entities that submit their bids using the services of entities authorized to engage in brokerage activities related to government securities and that are registered in the Public Stock Exchange Registry and have signed a brokerage agreement with the BCH may participate as investors in the BCH’s securities auctions (Article 11 of the Regulation on Negotiation of Government Securities).
Sale or issue locally by nonresidents  Yes. Foreign public or private sector issuers may issue public offerings of securities, provided such securities and their issuers are registered in Honduras in the Public Stock Exchange Registry (Registro Público del Mercado de Valores) and with the stock exchange. They must also be listed on the stock exchange of their country of origin, with which there must be reciprocity agreements signed either at the government level and/or between supervisory entities. Securities firms are authorized to place in Honduras securities issued abroad (Articles 8 and 65 of the Law on the Stock Market).
Purchase abroad by residents  Yes. According to the Regulation on Investments of Insurance Institutions, investments abroad may not together exceed 25% of investment resources, except as provided for in Article 88 of the Law on Insurance and Reinsurance Institutions. Investments abroad by depository institutions pursuant to the Regulation on Management of Foreign Currency Deposit Accounts may be held only in (1) demand, overnight, and term deposits; CDs; bankers’ acceptances, and other instruments issued by first-class banks or financial institutions abroad; (2) bills, notes, and bonds and other instruments issued and guaranteed by a government; (3) negotiable instruments of government agencies and other public entities or financial institutions guaranteed by governments or government institutions; (4) deposits, notes, and fixed-income bonds issued by supranational financial institutions; and (5) money market MFs, with a maturity not exceeding one year. The investments specified must meet the BCH qualifications. Investments in the “other instruments” mentioned in Item (1) may not exceed 5% of the depository institution’s total foreign currency deposits.
Sale or issue abroad by residents  No.
On money market instruments  Yes.
Purchase locally by nonresidents  Yes. Resident and nonresident individuals and legal entities that submit their bids using the services of entities authorized to engage in brokerage activities related to government securities and that are registered in the Public Stock Exchange Registry and have signed a brokerage agreement with the BCH may participate as investors in...

The Law on Strengthening Income, Social Equity, and Rationalization of Government Expenditure states that all public sector external debt must be approved by the National Congress of Honduras.

According to the Investment Promotion and Protection Law, foreign investors are entitled to access financial system credit. Furthermore, under the Law on the Financial System, BCH authorization is required to grant loans to individuals or legal entities domiciled abroad, except in the case of loans to Honduran citizens for the purchase of land, construction, or the purchase or improvement of housing in Honduras.

Article 46 of the Law on the Financial System states that financial institutions may contract loans or obligations with financial institutions abroad. In the Organic Budget Law, the public debt policy sets the overall external public debt levels and the minimum acceptable grant component of foreign loans contracted by the government. In addition, the Law for Strengthening Income, Social Equity, and Rationalization of Public Expenditure indicates that the contracting of each new external debt must be carried out when the conditions offered in the market define a minimum concessionality element of 35% in terms of present value. However, without prejudice to the provisions of the aforementioned law, in the General Budget of Income and Expenditures of the Republic for Fiscal Year 2021 and in the Law of Aid to the Productive Sector and Workers, Before the effects of the pandemic caused by the COVID-19, it is determined that external financing non-concessional debt may be contracted as long as the total foreign debt portfolio in force maintains a minimum weighted concessionality of 20%. The BCH Law establishes that when official or semi-official institutions plan to contract loans within Honduras or abroad, the MOF or the respective institutions will require a prior opinion from the Board of Directors.

All financing by commercial banks for nonresidents, excluding loans earmarked for investment in Honduras, requires BCH authorization.

The Organic Budget Law establishes that the granting of endorsements, bonds, or guarantees will require in the first instance the authorization of the President of the Republic and subsequently the approval of the National Congress, which will proceed with respect to obligations contracted by the Public Sector Entities and...
According to the Law for the Promotion and Protection of Investment, it is of paramount interest to the government to attract, promote, and protect foreign investment, which should be granted every facility and guarantee to foster its growth and development. Investment is allowed in all sectors, except activities that affect public health, small-scale manufacturing, and trade, pursuant to Article 337 of the constitution; the manufacture, importation, distribution, and sale of arms, ammunition, and similar items, pursuant to Article 292 of the constitution; and in industries related to toxic, hazardous, or radioactive waste.

The Law for the Promotion and Protection of Investment offers real property safeguards for investors: a surety or guarantee with respect to the deed, conflict prevention mechanisms, and arrangements for recovering investments under improvement and for continuation of projects underway on real property in dispute. Individuals and legal entities seeking to invest or that have invested in real estate may purchase sureties or guarantees to protect themselves from deed-related risk. The surety or guarantee must be issued by national or foreign professional legal entities in the field. Purchases of certain land are restricted under Article 107 of the constitution. Article 107 states that ownership of land pertaining to the government, cooperatives, communities, and private owners located within 40 kilometers of borders or both coastlines as well as islands, cays, reefs, crags, rocky outcrops, shallows, and sand banks is restricted to native Hondurans, corporations wholly owned by native Hondurans, and government institutions.

The Anti-Money-Laundering Law requires financial system institutions and remittance companies to fill out a form for foreign currency cash transactions of US$10,000 or more. On April 1, 2017, to define the scope of the Special Anti-Money-Laundering Law, it was established that covered entities (institutions supervised by the CNBS) must generate the corresponding records and reports in the following instances: cash transactions in foreign currency performed by their clients in the amount of US$4,000 or equivalent in foreign currency. Moreover, the maximum amount receivable from non-clients during one calendar month is US$4,000.

| Borrowing abroad | Yes. |
| Article 46 of the Law on the Financial System stipulates that financial institutions may contract loans and obligations with institutions in financial systems abroad. |

| Maintenance of accounts abroad | Yes. |
| The Regulation on management of foreign exchange deposit accounts stipulates that, to meet any additional reserve requirements that the BCH may establish, or to make investments with surplus resources from deposit accounts, depository institutions may open special accounts or make investments with first-tier foreign banks. |

| Lending to nonresidents (financial or commercial credits) | Yes. |
| BCH authorization is required for lending to individuals or legal entities domiciled abroad, except in the case of loans granted to Honduran citizens for the purchase of land, construction, and the purchase or improvement of housing in Honduras. |

| Lending locally in foreign exchange | Yes. |
| Prudential norms are applied by financial system institutions when lending in foreign currency. To that end, they classify borrowers in the following categories: generators and nongenerators of foreign exchange. Institutions authorized to grant foreign currency loans must have policies and procedures in place for evaluating the credit and liquidity risk of borrowers classified in the aforementioned categories. |

| Purchase of locally issued securities denominated in foreign exchange | Yes. |
| The Regulation on Trading in Government Securities authorized the BCH to issue foreign-currency-denominated securities (foreign-
For authorized financial institutions, the reserve requirement, which must be held in demand deposits in the BCH, for foreign currency and mandatory investment of all their foreign currency liabilities is 12%. Resources that financial system institutions obtain through international loans or in the form of loans or deposits from other institutions subject to the reserve requirement are exempt from this requirement. Financial system institutions may also issue foreign currency treasury bills, which are subject to the reserve requirement. Institutions in the financial system may not offset deficits in their reserve requirements, as established by the BCH board of directors. Likewise, no offsetting is allowed in case of noncompliance with the mandatory investment requirement. Both the domestic and foreign currency reserve requirement is composed entirely of demand deposits at the BCH and must be maintained at a minimum daily amount equivalent to 80%.

The additional reserve requirement for liquid investments in first-class foreign financial institutions is set at 0%. Similarly, domestic depository institutions that are Bladex shareholders may maintain investments there up to 5% of their total foreign currency investments.

The interest rates applied by financial system institutions in their transactions are determined on the basis of prevailing market conditions. However, the BCH may regulate them if necessary. Mandatory foreign currency investments must be deposited in the BCH; the balances on these investment accounts are remunerated at the annual equivalent of the fortnightly (catorcenal) average of the one-month London Interbank Bid Rate (LIBID). In accordance with the Law on Credit Cards, credit card interest rates are established and regulated by the BCH, if there is no guarantee of free competition in the sector, on the basis of a report issued by the Commission for the Defense and Promotion of Competition.

Investments abroad by depository institutions pursuant to the Regulation on the management of deposit accounts in foreign exchange may only be held only in (1) demand, overnight, and term deposits; CDs; bankers’ acceptances; and other instruments issued by foreign first-tier foreign banks or financial institutions; (2) bills, notes, and bonds and other instruments issued and guaranteed by a government; (3) negotiable instruments of government agencies and other public entities or financial institutions guaranteed by governments or government institutions; (4) deposits, notes, and fixed-income bonds issued by supranational financial institutions; and (5) money market MFs, having maturities not exceeding one year.
year. Specified investments must meet the requirements and exposure limits authorized by the BCH. Investments in the “other instruments” mentioned in Item (1) may not exceed 5% of the depository institution’s total foreign currency deposits.

Pension funds

Limits (max.) on securities issued by nonresidents

Limits (max.) on investment portfolio held abroad

Limits (min.) on investment portfolio held locally

Pursuant to Article 42(e) of Decree No. 17-2017, investments in securities issued by foreign enterprises, institutions, and governments are allowed up to 10% of the fund resources with the possibility of increasing up to an additional 10% with the prior approval of the CNBS.

Regarding private Pension Funds, the Investment Regulation of Funds managed by Pension Fund Administrators establishes that the limit for investing in securities issued by foreign companies and institutions and governments is 35% of the own resources of the Administrator or the Managed Fund.

Pension funds may not invest more than 5% of their resources in assets abroad, pursuant to the Regulation on the Investment of Government Pension Funds by Provident Institutions.

Investments in instruments issued by domestic institutions are governed by the provisions of Articles 42 and 43 of Decree No. 17-2017 of the Regulation on the Investment of Government Pension Funds by Provident Institutions.
As regards private Pension Funds, the Investment Regulations for Funds managed by the Pension Fund Administrators establish that the limit for investing in personal loans granted to members to finance the acquisition of consumer goods or the payment of services is up to 10% of the resources of the Managed Fund.

Currency-matching regulations on assets/liabilities composition

There are no collective investment funds in Honduras. However, the Law on the Stock Market and the Regulation on Fund Management Companies regulate the functioning and operations of MFs, investment funds, and fund management companies.

Investment firms and collective investment funds

| Limits (max.) on securities issued by nonresidents | No. |
| Limits (max.) on investment portfolio held abroad | No. |
| Limits (min.) on investment portfolio held locally | Yes. |

| Currency-matching regulations on assets/liabilities composition | No. |

Investment funds must hold at least 50% of their investments in securities guaranteed by the government, the BCH, or authorized financial system institutions and must not hold more than 15% of the subscribed and paid-up capital of any one company or more than 25% of the issued securities guaranteed by the same economic grouping (Article 106 of the Law on the Stock Market).

Investment funds may hold deposits in banks abroad as well as in self-issued instruments of such banks issued abroad, in keeping with the provisions established by the CNBS.

The Law on the Stock Market and the Regulation on Fund Management Companies do not contain any articles on this issue.

Changes during 2021 and 2022

Exchange Arrangement

Official exchange rate

The Central Bank of Honduras through Agreement No. 06/2021 issued on June 3, 2021, establishes that the reference exchange rate (TCR) corresponds to the weighted average by price amounts that result from the event of the day in the Mercado Interbancario de Divisas and the TCR of the day of the currencies withheld by the exchange agents for the payment of their own expenses and direct sale to the clients of the private sector. Previously, as of January 6, 2020, the official or TCR was defined as the weighted average (by amounts) of the prices from the last foreign exchange auction, from the last interbank foreign exchange market event, and the TCR of the day of the foreign currencies held by the banks, for the payment of their own expenses and direct sales to private sector clients.

The Central Bank of Honduras modified the calculation of the reference exchange rate (TCR) such that the result of the weighted average exchange rate of Mercado Interbancario de Divisas (MID) is the TCR of the following day. The way of calculating the base price is maintained. Previously, the TCR was the weighted average by price amounts that result from the event of the day in the MID and the TCR of the day of the currencies withheld by the exchange agents for the payment of their own expenses and direct sale to the clients of the private sector.

Foreign exchange market

The Central Bank of Honduras through Agreement No. 11/2022, numeral 6.2 of July 28, 2022, established that foreign exchange agents may charge their private sector clients an exchange commission for the sale of foreign currency, which may not exceed 0.5% (previously 0.7%).

Spot exchange market

Operated by the central bank
Auction

06/14/2021

Through the approval of Agreement Nos. 06/2021 and 7/2021, both on June 3, 2021, the Central Bank of Honduras suspended foreign currency auctions for the sale of foreign currency to natural and legal entities. Previously, foreign exchange auctions were held weekdays, excluding holidays.

Interbank market

06/14/2021

The maximum commission charged for the purchase is 0.3% of the price offered by the banks in the Mercado Interbancario de Divisas (MID) (0.3% for the selling bank). Previously, the maximum commission charged for the purchase was 0.4% of the price offered by the banks in the MID (0.1% for the Central Bank of Honduras and 0.3% for the selling bank).

12/15/2021

The calculation of the center of the exchange band of the Mercado Interbancario de Divisas (MID) was modified, such that it is the average of the base price used in the last seven events of the MID weighted at 50% and the average of the weighted average exchange rate of the MID resulting from the last seven MID events, weighted at 50%. Previously, it was made up of the average of the base price used in the last seven events of the MID plus the average of the absolute variation of the current reference exchange rate of the day with respect to that of the previous business day of the seven previous business days. The exchange rate band continues to be 1.0% above or below the center of the exchange rate band.

03/07/2022

The calculation of the center of the exchange band of the Mercado Interbancario de Divisas (MID) was modified, such that it is the average of the base price used in the last seven events of the MID weighted at 80% and the average of the weighted average exchange rate of the MID (TCPP MID) resulting from the last seven MID events, weighted at 20%. Previously, it was made up of the average of the base price used in the last seven events of the MID weighted at 50% and the average of the TCPP MID resulting from the last seven MID events, weighted at 50%. The exchange rate band continues to be 1.0% above or below the center of the exchange rate band.

Exports and Export Proceeds

Repatriation requirements

Surrender requirements

Surrender to the central bank

03/01/2021

The requirement to deliver foreign currency to the Central Bank of Honduras (BCH) by foreign exchange agents was lowered. Pursuant to Agreement No. 03/2021, Paragraph 1, Numerals 1.2 and 1.3, exchange agents that purchase foreign exchange from their private sector customers, including from capital transactions, must transfer 20% of it to the BCH no later than the business day following their purchase, and that 80% of the foreign currency purchased and not transferred to the BCH by foreign exchange agents must be used for (1) payment of their own expenses; (2) sales to private sector clients for amounts less than or equal to US$1,000,000; and (3) sale in the Mercado Interbancario de Divisas (MID).

Previously, as of January 6, 2020, pursuant to Resolution No. 531-12/2019, Paragraph 1, Numerals 1.2 and 1.3, exchange agents that purchase foreign exchange from their private sector customers,
including from capital transactions, had to transfer 40% of it to the BCH no later than the business day following their purchase, and that 60% of the foreign currency purchased and not transferred to the BCH by foreign exchange agents had to be used for (1) payment of their own expenses; (2) sales to private sector clients for amounts less than or equal to US$520,000; and (3) sale in the MID.

06/14/2021 The requirement to deliver foreign currency to the Central Bank of Honduras (BCH) by foreign exchange agents was eliminated. Previously, as of March 1, 2021, pursuant to Agreement No. 03/2021, Paragraph 1, Numerals 1.2 and 1.3, exchange agents that purchase foreign exchange from their private sector customers must transfer 20% of it to the BCH no later than the business day following their purchase, and that 80% of the foreign currency purchased and not transferred to the BCH by foreign exchange agents must be used for (1) payment of their own expenses; (2) sales to private sector clients for amounts less than or equal to US$1,000,000; and (3) sale in the Mercado Interbancario de Divisas.

Payments for Invisible Transactions and Current Transfers

Controls on these transfers

Investment-related payments

Quantitative limits

03/01/2021 The currencies purchased by exchange agents in the Mercado Interbancario de Divisas that can be used for sales per private sector client increased to amounts less than or equal to US$1,000,000 daily from US$520,000.

06/14/2021 The currencies purchased by exchange agents in the Mercado Interbancario de Divisas that can be used for sales per private sector client increased to amounts less than or equal to US$1,500,000 daily from US$1,000,000.

Surrender to the central bank

03/01/2021 The requirement to deliver foreign currency to the Central Bank of Honduras (BCH) by foreign exchange agents was lowered. Pursuant to Agreement No. 03/2021, Paragraph 1, Numerals 1.2 and 1.3, exchange agents that purchase foreign exchange from their private sector customers, including from capital transactions, must transfer 20% of it to the BCH no later than the business day following their purchase, and that 80% of the foreign currency purchased and not transferred to the BCH by foreign exchange agents must be used for (1) payment of their own expenses; (2) sales to private sector clients for amounts less than or equal to US$1,000,000; and (3) sale in the Mercado Interbancario de Divisas (MID). Previously, as of January 6, 2020, pursuant to Resolution No. 531-12/2019, Paragraph 1, Numerals 1.2 and 1.3, exchange agents that purchase foreign exchange from their private sector customers, including from capital transactions, had to transfer 40% of it to the BCH no later than the business day following their purchase, and that 60% of the foreign currency purchased and not transferred to the BCH by foreign exchange agents had to be used for (1) payment of their own expenses; (2) sales to private sector clients for amounts less than or equal to US$520,000; and (3) sale in the MID.

06/14/2021 The requirement to deliver foreign currency to the Central Bank of Honduras (BCH) by foreign exchange agents was eliminated. Previously, as of March 1, 2021, pursuant to Agreement No. 03/2021,
Paragraph 1, Numerals 1.2 and 1.3, exchange agents that purchase foreign exchange from their private sector customers, including from capital transactions, must transfer 20% of it to the BCH no later than the business day following their purchase, and that 80% of the foreign currency purchased and not transferred to the BCH by foreign exchange agents must be used for (1) payment of their own expenses; (2) sales to private sector clients for amounts less than or equal to US$1,000,000; and (3) sale in the Mercado Interbancario de Divisas.

## Capital Transactions

### Controls on capital transactions

**Repatriation requirements**

**Surrender requirements**

- **Surrender to the central bank**

03/01/2021

The requirement to deliver foreign currency to the Central Bank of Honduras (BCH) by foreign exchange agents was lowered. Pursuant to Agreement No. 03/2021, Paragraph 1, Numerals 1.2 and 1.3, exchange agents that purchase foreign exchange from their private sector customers, including from capital transactions, must transfer 20% of it to the BCH no later than the business day following their purchase, and that 80% of the foreign currency purchased and not transferred to the BCH by foreign exchange agents must be used for (1) payment of their own expenses; (2) sales to private sector clients for amounts less than or equal to US$1,000,000; and (3) sale in the Mercado Interbancario de Divisas (MID).

Previously, as of January 6, 2020, pursuant to Resolution No. 531-12/2019, Paragraph 1, Numerals 1.2 and 1.3, exchange agents that purchase foreign exchange from their private sector customers, including from capital transactions, had to transfer 40% of it to the BCH no later than the business day following their purchase, and that 60% of the foreign currency purchased and not transferred to the BCH by foreign exchange agents had to be used for (1) payment of their own expenses; (2) sales to private sector clients for amounts less than or equal to US$520,000; and (3) sale in the MID.

06/14/2021

The requirement for foreign currency delivery to the Central Bank of Honduras (BCH) by exchange agents was eliminated, so that exchange agents will be able to retain the foreign currency purchased from their private sector clients, which can be used for the following purposes: (1) own expenditures, (2) daily sales to private sector clients for amounts less than or equal to US$1,500,000, and (3) sale in the Mercado Interbancario de Divisas (MID), in the case of banks.

The currencies not used in the previous concepts will form part of the currency holding, without exceeding the limit authorized by the Board of the BCH. When there are no trading events in the MID, banks may accumulate foreign exchange earnings in the amounts of currency holding, without being considered for the calculation thereof; currencies to be traded in the immediate aftermath of the MID.

Previously, as of March 1, 2021, pursuant to Agreement No. 03/2021, Paragraph 1, Numerals 1.2 and 1.3, exchange agents that purchase foreign exchange from their private sector customers must transfer 20% of it to the BCH no later than the business day following their purchase, and that 80% of the foreign currency purchased and not transferred to the BCH by foreign exchange agents must be used for (1) payment of their own expenses; (2) sales to private sector clients for amounts less than or equal to US$1,000,000; and (3) sale in the MID.
HONG KONG SAR
(Position as of June 30, 2022)

Status under IMF Articles of Agreement

Date of membership
China resumed sovereignty over the Hong Kong Special Administrative Region (Hong Kong SAR) on July 1, 1997. Hong Kong SAR shares the same membership date as China, December 27, 1945.

Article VIII
Yes. Hong Kong SAR shares the same Article VIII acceptance date as China, December 1, 1996.

Article XIV

Exchange Measures

Restrictions and/or multiple currency practices
No.

Exchange measures imposed for security reasons
Yes.

In accordance with IMF Executive Board Decision No. 144-(52/51)
No.

Other security restrictions
Yes.

The Hong Kong SAR implements sanctions decided by the UNSC at the instruction of the Ministry of Foreign Affairs of the People’s Republic of China, by way of regulations made under the UN Sanctions Ordinance. Such sanctions include financial sanctions against certain individuals and entities designated by the UNSC or its Committees.

Exchange Arrangement

Currency
Yes. The currency of Hong Kong SAR is the Hong Kong dollar.

Other legal tender
No.

Exchange rate structure

Unitary
Yes.

Dual

Multiple

Classification

No separate legal tender

Currency board
Yes. The exchange rate arrangement is a currency board. The currency board system in Hong Kong SAR, adopted October 17, 1983, requires that the monetary base be backed at least 100% by, and that changes in it be matched 100% by corresponding changes in, the reserve currency (US dollar) at a fixed exchange rate of HK$7.80 a US dollar. A symmetric convertibility zone of HK$7.75–HK$7.85—within which the Hong Kong Monetary Authority (HKMA) may choose to conduct market operations consistent with currency board principles—has been in place since May 18, 2005. The monetary base includes issued notes and coins, sum of clearing account balances kept with the HKMA (that is, the aggregate balance) and outstanding Exchange Fund Bills and Notes. Consistent
with currency board principles, the HKMA may adjust the issuance sizes of Exchange Fund paper, and the program may expand along with the interest payments on such paper. The issuance and redemption of certificates of indebtedness, which back banknotes issued by note-issuing banks (NIBs), must be made against US dollars at a fixed exchange rate of HK$7.80 a US dollar. The issuance and withdrawal of government-issued notes and coins are settled against US dollars at the same fixed rate. The legal documents that establish the currency board include the Basic Law (Chapter V, Section 1, Articles 110 and 111); the Exchange Fund Ordinance (Chapter 66); and an exchange of letters between the Financial Secretary and the Monetary Authority specifying the monetary policy objective and the structure of the monetary system under the Exchange Fund Ordinance. The letters specify that the Financial Secretary is responsible for determining the monetary policy objective and the structure of the monetary system, including the linked exchange rate. Section 3(1) of the ordinance, as amended, specifies that the Exchange Fund “must be under the control of the Financial Secretary and must be used primarily for such purposes as the financial secretary thinks fit affecting, either directly or indirectly, the exchange value of the currency of Hong Kong SAR and for other purposes incidental thereto.” The HKMA is responsible for achieving the monetary policy objective, including determining the strategy, instruments, and operational means for doing so, and for maintaining the stability and integrity of the monetary system. The HKMA makes prompt announcements of the impact on the aggregate balance arising from purchases or sales of US dollars by the currency board via various information vendors, including Reuters and Bloomberg. The information is also available on the HKMA website.

Other managed arrangement
Floating
Free floating

**Official exchange rate**

Yes. The official exchange rate is set at HK$7.80 a US dollar. The issuance and redemption of certificates of indebtedness, which back banknotes issued by NIBs, must be against US dollars at the official exchange rate of HK$7.80 a US dollar. The issuance and withdrawal of government-issued notes and coins are settled against US dollars at the same rate. In accordance with the accounting principles generally accepted in Hong Kong SAR, prevailing exchange rates on the balance sheet date are used for accounting and valuation purposes.

**Monetary policy framework**

Yes. The monetary policy framework is an exchange rate anchor vis-à-vis the US dollar.

**Exchange tax**  No.

**Exchange subsidy**  No.

**Foreign exchange market**  Yes. Commercial banks are free to set their exchange rates, including bid-ask spreads, and commissions in transactions with their clients. Apart from commercial banks, money service operators (MSOs) (namely remittance agents and money changers) may also conduct foreign exchange transactions with the public.

**Spot exchange market**  Yes. Authorized institutions (AIs) are not required to obtain a separate license to conduct foreign exchange transactions with the public. They may enter into foreign exchange transactions in the interbank market on their own account or on behalf of their clients. AIs, which maintain a Hong Kong dollar clearing account within the real-time gross settlement system, are eligible for transactions with the HKMA under the currency board arrangement.

MSOs (formerly known as remittance agents and money changers) must obtain a license from the commissioner of customs and excise. As of December 31, 2021, there were 805 licensed MSOs in Hong Kong SAR. They are subject to regulatory requirements under the Anti-Money-Laundering and Counter-Terrorism Financing Ordinance.

**Operated by the central bank**  Yes.

**Foreign exchange standing facility**  Yes. The HKMA redeems certificates of indebtedness acquired by NIBs in compensation for banknotes on demand and at a fixed exchange rate of HK$7.80 a US dollar. The spot exchange rate has fluctuated within the convertibility zone of HK$7.75–HK$7.85 since May 18, 2005. The HKMA operates convertibility commitments on both the strong side and the weak side of the linked rate of HK$7.80. Under the strong-side convertibility commitment, the HKMA buys US dollars from licensed banks at HK$7.75; under the weak-side convertibility commitment, it sells US dollars at HK$7.85.

**Allocation**  No.

**Auction**  No.

**Fixing**  No.

**Interbank market**  Yes. There are no official limits on the bid-ask spreads or commissions of market participants. No separate licenses are required for AIs to participate in the foreign exchange market. In addition to AIs, other financial institutions operating in Hong Kong SAR or overseas may participate in the interbank market. As of December 31, 2021, there were 188 AIs in Hong Kong SAR, including 160 licensed banks, 16 restricted license banks, and 12 deposit-taking companies.

The HKMA may conduct discretionary foreign exchange operations consistent with currency board principles within the convertibility zone. These are normal foreign exchange transactions consistent with the currency board principles. The HKMA makes prompt announcements of the impact on the aggregate balance arising from these transactions via various information vendors, including Reuters and Bloomberg. The information is also available on the HKMA website.

The interbank foreign exchange market operates on an OTC basis as
well as a brokerage system. The HKMA does not designate any market makers. Prices are determined by market dynamics. AIs enter into foreign exchange transactions in the interbank market by phone or some other electronic trading means. They deal with each other based on credit lines that these AIs extend among themselves. Such deals may be done on their own account or on behalf of their clients, such as major corporations, hedge funds, CBs, and high net worth individuals. There is no centralized system to regulate such trades.

The brokerage systems in Hong Kong SAR operate on private sector initiatives. Deals are done via phone or electronic networks (such as Electronic Broking Services, Reuters Matching). Money brokers operating in Hong Kong SAR must acquire approval from the HKMA. As of December 31, 2021, there were 31 approved money brokers in Hong Kong SAR.

The forward exchange markets operate on private sector initiatives, and the government has no official role. The HKMA does not intervene in the forward foreign exchange market.

There are no exchange controls on capital receipts or payments by residents or nonresidents. A license or authorization is required for companies, whether incorporated in Hong Kong SAR or elsewhere, to conduct banking, insurance, securities, and futures dealings. All overseas companies with a place of business in Hong Kong SAR are required to register with the Companies Registry within one month of establishing a business in Hong Kong SAR.
Hong Kong Exchanges and Clearing Ltd., which oversees the Stock Exchange of Hong Kong, the Hong Kong Futures Exchange, and its associated clearinghouses, imposes disclosure and position limits on derivatives products for risk management reasons. The disclosure and position limits are also stipulated in the subsidiary legislation. The position limits for Hang Seng Index and Hang Seng China Enterprises Index futures and options contracts are determined at a combined delta limit of 10,000 and 12,000 contracts, respectively. Market participants may apply for an excess position limit for Hang Seng Index and Hang Seng China Enterprises Index futures and options contracts. The excess limit was increased to 300%, bringing more flexibility into the existing position limit regime by enabling the Securities and Futures Commission to authorize exchange participants or their affiliates, as well as asset managers to exceed the statutory position limits for Hang Seng Index and Hang Seng China Enterprises Index futures and options contracts to meet their specific business needs as set out in the subsidiary legislation.

Inward direct investment No.

In general, there are no special legal, regulatory, or administrative guidelines governing foreign investment in Hong Kong SAR, except for very limited regulatory requirements concerning investment in broadcasting, for which the requirements are at par with international standards. The foreign control restriction regime does not impose ownership control per se but restricts persons and companies from exercising control of licensed broadcasters on the basis of residency requirement.

Controls on liquidation of direct investment No.
Controls on real estate transactions Yes.

Purchase abroad by residents No.
Purchase locally by nonresidents Yes.

Unless otherwise specified in the Stamp Duty Ordinance (Cap 117), residential properties acquired on or after October 27, 2012, by any person except a Hong Kong Permanent Resident (HKPR) acting on his or her own behalf are subject to Buyer’s Stamp Duty at a flat rate of 15%.

Unless otherwise specified in the Stamp Duty Ordinance, residential properties acquired from February 23, 2013, to November 4, 2016, are subject to Doubled Ad Valorem Stamp Duty (that is, ad valorem stamp duty at the then Scale 1 (which was later rearranged as Part 2 of Scale 1 following the introduction of New Residential Stamp Duty) of the First Schedule to the Stamp Duty Ordinance), except for those residential properties acquired by a HKPR acting on his or her own behalf and does not own any other residential property in Hong Kong SAR at the time of acquisition. For the latter scenario, ad valorem stamp duty at Scale 2 of the First Schedule to the Stamp Duty Ordinance (that is, the original stamp duty rate before the introduction of Doubled Ad Valorem Stamp Duty) will apply.

Unless otherwise specified in the Stamp Duty Ordinance, residential properties acquired on or after November 5, 2016, are subject to the New Residential Stamp Duty at a flat rate of 15%, except for those residential properties acquired by a HKPR acting on his or her own behalf and does not own any other residential property in Hong Kong SAR at the time of acquisition. For the latter scenario, ad valorem stamp duty at Scale 2 of the First Schedule to the Stamp Duty Ordinance will continue to apply. Nonresidential properties acquired on or after November 5, 2016, are not affected and continue to be
subject to Doubled Ad Valorem Stamp Duty. 
Non-HKPRs may continue to purchase residential properties in Hong Kong SAR without restriction on payment of the Buyer’s Stamp Duty and the New Residential Stamp Duty.

</tr>
</tbody>
</table>

The limits and restrictions stated below are set by the HKMA for prudential reasons only.

- **Borrowing abroad**: The HKMA may prohibit AIs from maintaining accounts (including for the purpose of granting loans and credits) with foreign banks if transactions conducted through these accounts are not made in the interest of the depositors of these institutions.

  This restriction is only intended to be applied under an extreme situation and is not a general restriction.

- **Lending to nonresidents (financial or commercial credits)**: AIs incorporated in Hong Kong SAR may extend loans and credit facilities to a single customer group up to 25% of their Tier 1 capital. This limit also governs other financial exposures, including securities issued by the company.

  This is a general large exposure limit which is not designed as a special restriction for nonresidents.

- **Lending locally in foreign exchange**: AIs incorporated in Hong Kong SAR may extend loans and other credit facilities to a single customer group (irrespective of the currency) up to 25% of their Tier 1 capital. This limit also governs other financial exposures, including securities issued by the company.

  This is a general large exposure limit which is not designed as a special restriction on lending locally in foreign exchange.

- **Purchase of locally issued securities denominated in foreign exchange**: AIs incorporated in Hong Kong SAR may hold the securities of one company up to 25% of their Tier 1 capital. This limit also governs...
other financial exposures, including loans and other credit facilities extended to the company, irrespective of the currency.

This is a general large exposure limit which is not designed as a special restriction on purchase of locally issued securities denominated in foreign exchange.

| Differential treatment of deposit accounts in foreign exchange | No. |
| Reserve requirements | No. |
| Liquid asset requirements | No. |
| Interest rate controls | No. |
| Credit controls | No. |

| Differential treatment of deposit accounts held by nonresidents | No. |
| Reserve requirements | No. |
| Liquid asset requirements | No. |
| Interest rate controls | No. |
| Credit controls | No. |

| Investment regulations | Yes. |
| Abroad by banks | Yes. |
| AIs incorporated in Hong Kong SAR must not (1) establish or acquire an overseas banking subsidiary without the HKMA approval; (2) acquire share capital in a company worth more than 5% of the Tier 1 capital of the institution at the time of acquisition without the HKMA approval; (3) incur equity exposures in aggregate more than 25% of the Tier 1 capital of the institution (this restriction does not apply if the equity exposure in the form of share capital (a) is held as security for facilities granted; (b) was acquired through an underwriting or a sub-underwriting contract for a period not exceeding seven days; or (c) was acquired through debt satisfaction, in which case the share capital must be disposed of as soon as possible, but no later than 18 months after its acquisition); or (4) purchase or hold an interest in foreign or domestic land of an aggregate value exceeding 50% of the adjusted Tier 1 capital of the institution and purchase or hold interest in foreign or domestic land, other than for self-use, of an aggregate value exceeding 25% of the Tier 1 capital of the institution (these restrictions do not apply to (a) interest in land that was mortgaged to the institution to secure a debt or (b) interest in land acquired by the institution in the course of satisfaction of debts because of it, provided the interest is disposed of as soon as possible, but no later than 18 months after acquisition). |

| In banks by nonresidents | Yes. |
| No person may become a majority shareholder controller, minority shareholder controller, or indirect controller of an AI incorporated in Hong Kong SAR without the HKMA approval. Any person who becomes such a controller must notify the HKMA within 14 days. Note-issuing activity is subject to review, and the license may be withdrawn if a foreign government or foreign-government-controlled entity holds 20% or more of the shares in a bank. This requirement is intended to prevent close association between NIBs and foreign sovereign controllers, which is a unique concern, because in Hong Kong SAR notes are issued by commercial banks rather than the CB. In most other countries, foreign investment is not allowed in this |
activity because the issuance of banknotes is the responsibility of the monetary authority. This condition affects only the issuance of notes and does not affect banks’ other activities.

AIs are expected to set internal limits on their open position in each foreign currency and their aggregate open position in all foreign currencies. No regulatory foreign exchange position limits have been set by the HKMA. However, the HKMA will review AIs’ internal limits as part of its ongoing supervision. Locally incorporated AIs must provide justification to the HKMA if their aggregate open foreign exchange position limits are very large (for example, higher than 25% of their capital base). Foreign exchange limits of foreign banks’ branches in Hong Kong SAR are monitored by their head offices centrally and home supervisory authorities centrally. However, a foreign bank’s branches in Hong Kong SAR may be required to demonstrate the effectiveness of its risk management systems if its aggregate open foreign exchange position limit is higher than 5% of the bank’s capital base. All AIs are required to report their foreign exchange positions as well as any breach of relevant internal limits to the HKMA on a monthly basis.

The above benchmark thresholds are intended to facilitate the HKMA supervisory monitoring of AIs’ foreign exchange risk and are not a general restriction.

**Changes during 2021 and 2022**

No significant changes occurred in the exchange and trade system.
HUNGARY

(Position as of October 31, 2022)

Status under IMF Articles of Agreement

Date of membership
May 6, 1982.

Article VIII
Yes.
Date of acceptance: January 1, 1996.

Article XIV

Exchange Measures

Restrictions and/or multiple currency practices
No.

Exchange measures imposed for security reasons
Yes.

In accordance with IMF Executive Board Decision No. 144-(52/51)
Yes.

Other security restrictions
Yes.

Hungary maintains certain exchange restrictions related to the freezing of funds and economic resources of the following: (1) certain officials of Belarus; (2) certain individuals and entities in the Democratic Republic of the Congo; (3) certain individuals and entities in Lebanon, Myanmar, Sudan, and Syria; (4) certain individuals and entities in the Islamic Republic of Iran and Libya; (5) certain individuals, entities, and bodies in view of the situation in Ukraine; and (6) certain individuals undermining or threatening the territorial integrity, sovereignty, and independence of Ukraine.

Within the framework of the Common Foreign and Security Policy (CFSP), the EU applies restrictive measures either autonomously or implementing binding resolutions of the UNSC with regard to the Treaty on EU (in particular, Article 29) and the Treaty on the Functioning of the EU (in particular, Article 75 or 215). Restrictive measures imposed by the EU may target governments of third countries, entities, and individuals. They may comprise specific or general trade restrictions (import and export bans), financial restrictions, restrictions on admission (visa or travel bans), and other measures. EU Council regulations imposing sanctions and related Council decisions and Commission regulations are part of the EU law and take precedence over conflicting legislation of Hungary as a member of the EU. Such regulations are directly applicable and have direct effect in all member states. Exchange restrictions are in place in accordance with EU regulations with respect to Afghanistan, Belarus, Bosnia and Herzegovina, Burundi, Central African Republic, the Democratic Republic of the Congo, Egypt, Guinea (Conakry), Guinea-Bissau, the Islamic Republic of Iran, Iraq, Lebanon, the Democratic People’s Republic of Korea, Libya, Mali, Myanmar/Burma, Somalia, Sudan, South Sudan, Syria, groups associated with terrorism (Al-Qaeda, Taliban, ISIL), Tunisia, Ukraine/Russia (concerning restrictive measures following Russia’s actions destabilizing the situation in Ukraine), Ukraine (concerning restrictive measures in respect of actions undermining the territorial integrity and independence of Ukraine), Yemen, Venezuela, and Zimbabwe. An EU sanctions regime against cyber-attacks to safeguard European security and interests has been implemented.

According to Act No. LII of 2017 on the implementation of financial and asset-related restrictive measures ordered by the EU and the UNSC, the Hungarian authorities implement directly, completely,
and without delay the UNSC Resolution decisions about targeted financial sanctions. The method does not require the transposition of UNSC Resolution decisions at the EU level; at the same time, it includes the implementing rules for the relevant EU regulations as well.

**Exchange Arrangement**

**Currency**
- Yes. The currency of Hungary is the Hungarian forint.

**Other legal tender**
- No.

**Exchange rate structure**
- Unitary Yes.

**Classification**
- Dual
- Multiple

**No separate legal tender**
- Currency board
- Conventional peg
- Stabilized arrangement
- Crawling peg
- Crawl-like arrangement
- Pegged exchange rate within horizontal bands
- Other managed arrangement

**Floating**
- Yes. The de jure exchange rate arrangement is free floating. The de facto exchange rate arrangement is classified as floating because of discretionary intervention by the Magyar Nemzeti Bank (MNB) in the foreign exchange market. The general aim is to avoid disruptive market fluctuations and exchange rate overshooting. However, the MNB emphasizes that the Bank generally refrains from intervening in the foreign exchange market. The MNB converts foreign currency for the government and net current and capital transfers from the EU at market rates. These transactions change the foreign exchange reserve position of the MNB. If the resulting reserve dynamics are not in line with the MNB’s reserve management objectives, the Bank will take the necessary measures. The MNB does not publish intervention data.

**Free floating**
- Official exchange rate Yes. In some cases, the law (for example, Accountancy Act, Act on the Implementation of Community Customs Law) requires or allows companies to use the official exchange rate when evaluating assets/liabilities or revenues/expenditures or transferring funds denominated in foreign currency. Official MNB foreign exchange rates are fixed each weekday, except national holidays. These rates are valid until publication of the next day’s rates and are fixed at 11:00 a.m. The official euro–forint fixing rate is the simple arithmetic average of the euro–forint quotes of the 10 most active...

The domestic banks in the forint foreign exchange market, after the two highest and two lowest quotes are eliminated. The US dollar–forint fixing rate is calculated using the euro–forint fixing rate and the euro–US dollar market rate at 11:00 a.m. The forint exchange rates against other currencies are derived from the US dollar–forint fixing and the foreign exchange cross-rates at 11:00 a.m.

The MNB began implementing an inflation-targeting framework in the summer of 2001.

The Monetary Council adopts its resolutions by a simple majority of the votes of the members present. In the event of a tied vote, the chairman of the Monetary Council, or in the absence of the chairman the deputy chairman must have the casting vote. Operational independence is ensured regarding decisions on the inflation target.

The current medium-term target for inflation is 3% increase (±1 percentage point (pp)) in consumer prices as measured by the CPI regularly published by the Hungarian Central Statistical Office. The tolerance band was introduced in 2015.

In August 2005, the Bank adopted an explicit medium-term (“continuous”) inflation target for the period starting in 2007, after year-end targets between 2001 and 2006. The time horizon relevant for the Monetary Council is 1.5–2 years.

The CPI is the measure of the price changes of goods and services intended for household consumption and is calculated on the basis of the same month of the previous year. It is published monthly by the Hungarian Central Statistical Office.
Target horizon
Yes. The time horizon relevant for the Monetary Council is 1.5–2 years.

Operating target (policy rate)
Yes.

Policy rate
Yes. The MNB’s base rate (rate on required reserves) is the policy rate. The MNB overnight deposit rate provides a floor for interbank interest rates.

Target corridor band
Yes. MNB maintains asymmetric overnight interest rate corridor to prevent extreme fluctuations in interbank rates, the interest rate paid on overnight CB deposits equals the base rate minus 50 basis points, and the interest to be paid on overnight collateralized loans equals the base rate (plus 250 basis points).

Other
Yes. To manage the liquidity in the banking system, the MNB regularly holds euro liquidity providing foreign exchange swap tenders keeping short interest rates in all submarkets, including the swap market in line with the short interest rate considered optimal by the Monetary Council. From July 8, 2022, the MNB uses this instrument also within quarters.

The Bank completed the withdrawal of its crisis management programs in December 2021.

The government securities purchase program which was launched to restore the stable liquidity position of the government securities market and improve the effectiveness of monetary policy transmission has been phased out effective December 14, 2021, in accordance with the MNB’s monetary tightening steps. The last auction was held on this date.

The Bank’s programs aimed at supporting environmental sustainability do not affect the tightening stance of monetary policy. In April 2022, the overall amount of the FGS Green Home Program was raised by HUF 100 billion while the energy performance requirements applicable to eligible properties were tightened. The MNB suspended the purchases of mortgage bonds under the Green Mortgage Bond Purchase Program from April 2022.

The liquidity providing foreign exchange swap tenders were suspended in September 2021, though there is still some decreasing outstanding amount.

As for the mortgage bond purchase program, the MNB focuses on green mortgage bond purchases. The liquidity effect of all these programs has been sterilized.

Accountability
Yes.

Open letter
No.

Parliamentary hearings
Yes. The governor of the MNB reports to the parliament’s Standing Committee for Economic Affairs in writing semiannually on the MNB’s semiannual activity. On request, the governor must be obliged to attend in person and supplement the report orally. On request, the governor of the MNB must provide information to the competent committee of the parliament.

Other
No.

Transparency
Yes.

Publication of votes
Yes. The MNB has been publishing individual voting records since 2005. The voting records of the Monetary Council published in the minutes are also available in time series format.

Publication of minutes
Yes. Abridged minutes of the Council’s rate-setting meetings are released regularly after two weeks, before the next policy meeting takes place. The minutes present the decision-makers’ assessment of current economic conditions and the factors they consider when deciding on
Publication of inflation forecasts: Yes.
Inflation forecasts are published quarterly in the Inflation Report.

Other monetary framework:

Exchange tax: No.
Exchange subsidy: No.
Foreign exchange market: Yes.
   Commercial banks may set the exchange rate freely in transactions with their clients.
   The Act on Credit Institutions and Financial Enterprises states that currency exchange activities are subject to authorization by the MNB. According to the law, authorization to engage in currency exchange activities is granted to credit institutions and their agents. On December 31, 2021, there were 1460 foreign exchange bureaus in Hungary and 40 credit institutions. Licensing requires the fulfillment of several technical and personnel criteria. The MNB website provides more detailed information, including a list of authorized agents. Agents may only purchase and sell banknotes, but credit institutions may also make foreign currency payments and transfers on behalf of their clients. Foreign exchange bureaus may not enter into foreign exchange transactions directly with the MNB.

Operated by the central bank: No.
Foreign exchange standing facility: No.
Allocation: No.
Auction: No.
Fixing: No.

Interbank market: Yes.
The foreign exchange market operates based on broker systems (Reuters D-3000 Spot Matching and Electronic Broking Services) and on the OTC bilateral market. There are market makers in both markets. Because there are no controls on foreign exchange transactions, financial institutions do not need a license to trade. All banks and financial institutions are free to participate in the interbank market. There are no limits on the bid-ask spreads and commissions of market participants. As of December 31, 2021, according to the data provided by domestic credit institutions, 259 credit institutions dealt in the forint/foreign exchange spot market, of which 39 were domestic credit institutions.

Over the counter: Yes.
The foreign exchange market is an OTC bilateral market.

Brokerage: Yes.
The foreign exchange market is based in part on broker systems (Reuters D-3000 Spot Matching and Electronic Broking Services).

Market making: Yes.
Market makers are present in the OTC and brokerage markets.

Forward exchange market: Yes.
All banks may engage in forward transactions at exchange rates negotiated freely with their customers. As part of its monetary policy operations, the MNB has a euro liquidity arrangement that provides foreign exchange swap instruments with maturities up to and including 12 months.

Official cover of forward operations: No.

- Hungary is a member of the EU, and the MNB is a member of the European System of Central Banks.

- In accordance with Regulation (EU) No. 2018/1672, effective June 3, 2021, cash controls are based on a mandatory declaration system for amounts of cash entering or leaving the EU with a value of €10,000 or more. Travelers entering or leaving the EU and carrying more than €10,000 are required to make a declaration to the relevant authorities of the member country through which they enter or leave the EU. Also, the sender or the addressee has to make the similar declaration if cash is transferred via mail or a parcel service. Based on the provisions of Act XLI of 2021, on detection of the unaccompanied cash the customs authority will require the declaration from either the sender or the addressee, (including their representatives). The authorities must keep a record of such information and in case of suspicion of money laundering report it to their national Financial Intelligence Unit. The Hungarian Financial Intelligence Unit maintains statistics of suspicious transaction reports by Customs,
including all relevant information. According to the EU regulation, an incorrect or incomplete declaration does not fulfill the obligation. If the cash is not made available for control, the obligation is not fulfilled either. To check compliance with the regulation, national authorities have the right to search natural persons, their baggage, and their means of transport. The EU regulation requires member countries to impose penalties for failure to comply with the declaration obligation. If there are indications that cash is related to illegal activity, authorities of one member country may exchange information with authorities in other member countries. Under the framework of existing agreements on mutual administrative assistance, information obtained under the EC regulation may also be communicated to a third country in compliance with relevant national and EU provisions on the transfer of personal data to third countries. The EU regulation does not apply to physical cross-border transportation from one EU member country to another (that is, intra-EU transportation). Such transportation is not considered “cross-border” for the purposes of the EU regulation. To comply with the new EU legislation, Act No. XLI of 2021 on the Execution of Regulation (EU) No. 2018/1672 of the European Parliament and of the Council on Controls of Cash Entering or Leaving the Union and Repealing Regulation (EC) No. 1889/2005 replaced the former Act No. XLVIII. of 2007 on the Execution of Regulation (EC) No. 1889/2005. The new “Cash Control Act” keeps the effective, proportionate, and dissuasive sanctions for failure to declare or false declaration of cash set out in the former act. It includes an administrative fine of up to 50% of the undeclared amount. The customs authority may retain the object of the procedure (the amount of cash equal to the fine) if there is a risk of nonpayment of the fine. In case of non- or false declaration, on request the fine may be reduced by 50%, if the delinquent presents substantive proof of the origin of the cash in question (equity).

### Resident Accounts

**Foreign exchange accounts permitted**  Yes.

**Held domestically**  Yes.  According to EU Directive No. 2007/64/EC, balances may be transferred abroad freely.

**Approval required**  No.

**Held abroad**  Yes.  Controls apply to deposits of funds with non-EU financial institutions by a small domestic insurance company if such assets are to form part of its technical reserves.

**Approval required**  No.

**Accounts in domestic currency held abroad**  Yes.  Controls apply to deposits of funds with non-EU financial institutions by a small domestic insurance company if such assets are to form part of its technical reserves. The controls mean that these small insurance companies, which do not provide cross-border services, need to keep its technical reserves in assets which are not outside of the OECD.

**Accounts in domestic currency convertible into foreign currency**  Yes.

### Nonresident Accounts

**Foreign exchange accounts permitted**  Yes.

**Approval required**  No.

**Domestic currency accounts**  Yes.

**Convertible into foreign currency**  Yes.

**Approval required**  No.

**Blocked accounts**  No.

### Imports and Import Payments

**Foreign exchange budget**  No.

**Financing requirements for imports**  No.

**Minimum financing requirements**  No.

**Advance payment requirements**  No.

**Advance import deposits**  No.

**Documentation requirements for release of foreign exchange for imports**  No.

**Domiciliation requirements**  No.
In accordance with EU regulations, no import licenses are required, except for certain products that are subject to quantitative restrictions, safeguard measures, or import surveillance. For agricultural products, the import licensing system is automatic and used only for statistical purposes. Imports of certain products are subject to licensing (for example, some industrial products, explosives and firearms; ammunition; military equipment; dual-use goods; certain goods that could be used for capital punishment, torture, or other cruel, inhuman, or degrading treatment or punishment; and certain drugs).

Import restrictions covering certain products (for example, arms or steel products) have been put in place against Russia and Belarus following the Russian invasion of Ukraine. Restrictive measures against Russia are contained in Council Regulation (EU) No. 833/2014 of July 31, 2014, concerning restrictive measures in view of Russia’s actions destabilizing the situation in Ukraine. The restrictive measures were extended, and the regulation was amended 11 times in 2022, last on October 6, 2022. All measures are effective October 7, 2022.

Restrictive measures against Belarus are contained in Council Regulation (EC) No. 765/2006 of May 18, 2006, concerning restrictive measures against President Lukashenko and certain officials of Belarus. The restrictive measures were extended, and the regulation was amended 8 times in 2022, last on July 18, 2022. All measures are effective June 4, 2022.

In accordance with EU regulations, licenses are required for a number of products in the agricultural sector subject to tariff quotas. In addition, licenses are required for certain imports subject to quantitative restrictions.

Sanctions against Russia regarding public procurement issues are applicable effective April 9, 2022.

Goods for personal use brought in by returning Hungarian travelers are subject to import duties above a duty-free value limit in accordance with the EU customs legislation based on the invoice price. Relief from import duties is granted in Article 41 of EU Regulation No. 1186/2009/EC in case of duty-free allowance under EU Directive No. 2007/74/EC which is €430 for air and sea passengers, €300 for other passengers, and €150 for passengers younger than 15. For tobacco products and alcoholic beverages, quantitative limits apply.

Exports of certain products require a license (mainly military and dual-use goods; sport and hunting guns and ammunition; and certain goods that could be used for capital punishment, torture, or other cruel, inhuman, or degrading treatment or punishment).

Effective June 24, 2021, considering the situation in Belarus, the Council adopted Decision No. 2021/1031, which prohibits the export of some products (for example, dual-use goods, equipment used for interception, military products, and technology) to Belarus. Export restrictions regarding certain products (military and luxury goods, machinery, etc.) have been put in place against Russia and Belarus following the Russian invasion of Ukraine. Restrictive measures against Russia are contained in Council Regulation (EU) No. 833/2014 of July 31, 2014, concerning restrictive measures in view of Russia’s actions destabilizing the situation in Ukraine. The restrictive measures were extended, the regulation was amended 11 times in 2022, last on October 6, 2022. All measures are effective October 7, 2022.

Restrictive measures against Belarus are contained in Council Regulation (EC) No. 765/2006 of May 18, 2006, concerning restrictive measures against President Lukashenko and certain
officials of Belarus. The restrictive measures were extended, the regulation was amended 8 times in 2022, last on July 18, 2022. All measures are effective June 4, 2022.

Controls apply to the purchase of shares or other securities of a participating nature that may be affected by regulations on inward direct investment in strategically important corporations (Act No. CXVI of 2007) and establishment in air transportation (Act No. XCVII of 1995, Sections 22–23/A) and in companies licensed to operate in international waters (Act No. XLII of 2000, Section 12).

The following controls apply to investments by foreign investors (1) acquire (directly or indirectly) a majority influence in a strategic company, (2) acquire at least 10% of all shares, provided the overall value of the investment reaches or exceeds HUF 350 million, and (3) acquire 15%, 20%, or 50% in a strategic company or if the joint shareholding of all the foreign investors would exceed 25% in a strategic company, require the approval. This is according to Article 277 of Act LVIII of 2020. Previously, the above control was in effect until June 30, 2021, but the reference to the part “to be applied for actions taken until June 30, 2021,” has been removed from Paragraph (1) of Article 277 of Act LVIII of 2020. As a result, the measure was extended and is currently in force without any limitation in time set by the provisions.

Sale or issue locally by nonresidents
Purchase abroad by residents

Controls apply to the purchase of securities issued by nonresidents if

©International Monetary Fund. Not for Redistribution
such assets are to form part of the cover of the technical provisions of a small domestic insurance company, unless the assets (1) were issued by (a) an OECD or EEA member country, (b) local or regional authorities of OECD or EEA member countries, (c) business operations established in an OECD or EEA member country, or (d) an international organization to which one or more OECD or EEA member countries belong and (2) are kept in the territory of OECD or EEA member countries (Act No. LXXXVIII of 2014, Section 223).

| Sale or issue abroad by residents | No. |
| Bonds or other debt securities    | Yes. |
| Purchase locally by nonresidents | No. |
| Sale or issue locally by nonresidents | No. |
| Purchase abroad by residents     | Yes. |

Controls apply to the purchase of securities issued by nonresidents if such assets are to form part of the cover of the technical provisions of a small domestic insurance company, unless the assets (1) were issued by (a) an OECD or EEA member country, (b) local or regional authorities of OECD or EEA member countries, (c) business operations established in an OECD or EEA member country, or (d) an international organization to which one or more OECD or EEA member countries belong and (2) are kept in the territory of OECD or EEA member countries (Act No. LXXXVIII of 2014, Section 223). A small insurance company is an insurer without cross-border activity, has less than €5 million income from insurance premiums a year, and has a technical reserve of less than €25 million. Moreover, it is not allowed to conduct liability insurance.

| On money market instruments | Yes. |
| Purchase locally by nonresidents | No. |
| Sale or issue locally by nonresidents | No. |
| Purchase abroad by residents     | Yes. |

Controls apply to the purchase of securities issued by nonresidents if such assets are to form part of the cover of the technical provisions of a small domestic insurance company, unless the assets (1) were issued by (a) an OECD or EEA member country, (b) local or regional authorities of OECD or EEA member countries, (c) business operations established in an OECD or EEA member country, or (d) an international organization to which one or more OECD or EEA member countries belong and (2) are kept in the territory of OECD or EEA member countries (Act No. LXXXVIII of 2014, Section 223).

Controls apply to credits and loans granted to nonresidents if the asset is a mortgage loan with real estate collateral outside the EU and is to form part of the technical reserves of a small domestic insurance company.

With respect to nonresidents, controls apply to (1) airlines established in the country that must be majority owned and effectively controlled by EU countries and/or nationals of EU countries, unless otherwise provided for through an international agreement to which the EU is a signatory; (2) acquisition of a shipping license to operate in international waters, which is reserved for companies established in Hungary and operating shipping vessels registered in EU member countries (however, there are no restrictions preventing the establishment by nonresidents of a company in Hungary through which a shipping license is available); (3) asset management services by branches of nonresident investors located outside the EU for domestic mandatory and voluntary private pension funds; (4) the extent that under EU Directive No. 2009/65/EC, a depositary of a UCITS must either have its registered office or be established in the UCITS home member state; and (5) nonresident investors located outside the EU through acquiring or establishing directly or indirectly more than 25% of the shares of companies (or more than 10% of shares of publicly listed company) established in Hungary which engaged in activities described by the Act No. LVII of 2018.
The provisions of Act No. LVII of 2018 were modified to ensure the practical implementation of Regulation (EU) No. 2019/452. The Act No. CXXI of 2020 on amending certain laws relating to records and electronic administration contains the details as follows. A foreign investor may acquire (or establish) directly or indirectly more than 25% of the shares of a company (or more than 10% of shares of public limited company) or according to the Civil Code may acquire a controlling influence in a company established in Hungary carrying out the activities specified in the Act only after the notification to the Minister of the Interior (hereinafter referred to as “Minister”) and confirmation of acknowledgment of such notification. A foreign investor may commence the activity specified in the law after notification to the Minister and confirmation of acknowledgment of the notification. The foreign investor is obliged to provide information to the Minister on the change of the data subject to the notification obligation within the term specified in the Government decree. The detailed rules of the procedure of the Minister, in particular the procedural deadlines, must be established by a Government decree. On the basis of the notification, the Minister examines whether the acquisition of ownership or the right of operation by the foreign investor or the continuation of the newly acquired activity violates the security interests of Hungary. On receipt of the notification, the Minister must immediately verify that the notification complies with the legal requirements and, in light of the Member State’s comments under Article 6 of the FDI or the European Commission’s opinion under Article 6 or 8 of the FDI, examines whether there is a violation of Hungary’s security interests. If so, it will issue a prohibition decision; if not, it will acknowledge receipt of the notification in writing. In particularly justified cases, or if it is necessary to fulfill the obligations specified in the FDI, the Minister may extend the duration of the inspection by a maximum of 60 days, of which the foreign investor must be notified in writing before the expiry of the 60-day period. The Minister notifies the foreign investor in writing of the prohibition decision containing the simplified justification, and the foreign investor may challenge it in an administrative lawsuit. The Metropolitan Court has exclusive jurisdiction over the lawsuit. Anyone who violates his or her obligation under the Act in connection with the notification or the provision of data must be examined by the Minister, after examining all the circumstances of the case, order the payment of the fine set out as follows: in case of a natural person foreign investor from HUF 100,000 to HUF 1,000,000 and in case of legal person foreign investor from HUF 1,000,000 to HUF 10,000,000. The Minister must also take measures provided by the Act if this is justified under Section 7 of the FDI. The personal data processed may be transmitted to the national contact point in accordance with Article 11 (1) of the FDI; such data must be deleted immediately following the procedure described in Section 6-8 of FD. The scope of its addressees to be notified as a foreign investor in accordance with Act No. LVII of 2018 has been extended to nationals of the EU, another state belonging to the EEA and the Swiss Confederation, or to legal persons or other entities registered in such a state (Act. No. XCIX of 2021 on transitional emergency rules, Section 114; the modification is effective for 12 months from the end of the emergency).
Effective June 28, 2021, insurance and reinsurance activities and activities directly related to insurance activities which are subject to reporting in accordance with the provisions of Act No. LXXXVIII of 2014, are notifiable activities (Act. No. XCIX of 2021 on transitional emergency rules, Section 299).
The following controls apply to investments by foreign investors (1) acquire (directly or indirectly) a majority influence in a strategic company, (2) acquire at least 10% of all shares, provided the overall value of the investment reaches or exceeds HUF 350 million, and (3) acquire 15%, 20%, or 50% in a strategic company or if the joint shareholding of all the foreign investors would exceed 25% in a strategic company, require the approval. If the transaction involves a Hungarian strategic company, but that Hungarian strategic company was already foreign-owned, then the indirect change of that foreign ownership falls outside of the Interim Measures Act (Interim Measures Act, Section 277). This is according to Article 277 of Act LVIII of 2020. Previously, the above control was in effect until June 30, 2021, but the reference to the part “to be applied for actions taken until June 30, 2021,” has been removed from Paragraph (1) of Article 277 of Act LVIII of 2020. As a result, the measure was extended and is currently in force without any limitation in time set by the provisions.

Effective June 28, 2021, a limited liability company, private limited company, or higher education institution established in Hungary qualifies as a strategic company, in case the main or additional field of its activity defined in the Government Decree belongs to a sector of strategic importance, in particular in the energy, transport, communications sectors, or in the sectors defined in Article 4 (1) (a) to (e) of FDI, excluding financial infrastructure (Act. No. XCIX of 2021 on transitional emergency rules, Section 160 (2)).

Regulation (EU) No. 2019/452 of March 19, 2019, established an EU-wide framework for FDI screening and for the European Commission and the Member States to coordinate their actions on foreign investments.

Effective June 1, 2022, Government Decree No. 27/2021. (I.29.), which is referred to in Article 114 of Act XCIX of 2021, has been repealed by Government Decree No. 181/2022. (V.24.) (which declared the end of the emergency situation as of June 1, 2022). As Article 114 of Act XCIX of 2021 states that the amendments it made to point 1 of Article 1 of Act LVII of 2018, must remain valid for twelve months after declaring the end of the emergency situation, which happened as of June 1, 2022, therefore the amendments should stay in force until May 31, 2023. The scope of “foreign investors” under Act LVII of 2018 will remain to be extended to nationals of the EU, another state belonging to the EEA and the Swiss Confederation, or to legal persons or other entities registered in such a state until May 31, 2023.

| Controls on liquidation of direct investment | No. |
| Controls on real estate transactions | Yes. |

**Purchase abroad by residents**

Yes.

Real estate investment by small insurance companies is limited to EEA countries. Mandatory and voluntary pension funds may invest only in real estate in the EEA. Controls apply to the acquisition of real estate outside the EU (1) if such assets are to form the technical reserves of a small insurance company and (2) by a voluntary mutual insurance fund or a mandatory pension fund.

**Purchase locally by nonresidents**

Yes.

Controls apply to real estate investments by nonresidents, except (1) the acquisition of agricultural land by EU nationals who want to establish themselves as self-employed farmers and who have been legally resident and active in farming in Hungary for at least three
years continuously; (2) the acquisition of a primary residence by EU nationals and the acquisition of real estate other than agricultural land by legal persons and unincorporated entities established in the EU; and (3) the acquisition of secondary residences by EU nationals who have been legally resident in Hungary for at least four years continuously.

Provisions Specific to the Financial Sector

| Provisions specific to commercial banks and other credit institutions | Yes. |

The foreign exchange funding adequacy ratio (FFAR) is calculated as the ratio of the available amount of stable foreign currency funding divided by weighted foreign-currency-denominated assets outstanding. The FFAR regulation based on the NSFR methodology is in force since July 1, 2012, and has been amended three times to comply with evolving international standards and market developments. The measure aims to reduce the maturity mismatch of the banking sector’s foreign exchange position. The required level of the FFAR is 100%.

Since March 24, 2020, following the modification related to the coronavirus outbreak, foreign exchange liabilities from financial customers with a residual maturity of over one year were subdivided into groups according to residual maturity, with higher (more favorable) weights for longer maturities. The following weights applied.

1. 100% on: (a) foreign currency deposits and foreign currency liabilities with a remaining maturity of 1 year or more; (b) foreign currency bonds with a remaining maturity of 1 year or more; (c) foreign currency deposits and liabilities of households, non-financial corporations (SMEs included) and other sectors with a remaining maturity of 1 year or more; and (d) foreign currency deposits and liabilities of financial corporations with a remaining maturity of 5 years or more.
2. 90% on foreign currency deposits and liabilities of financial corporations with a remaining maturity of 2–5 years, including
deposits of money market funds.

(3) 70% on foreign currency deposits and liabilities of financial corporations with a remaining maturity of 1–2 years, including deposits of money market funds.

Effective from September 17, 2020, the MNB restored the regulation to its form in effect before the COVID-19 pandemic, so all foreign currency deposits and foreign currency liabilities with a remaining maturity of 1 year or more can be taken into account with a 100% weight again.

To further reduce denomination mismatches in the balance sheet of credit institutions and to assist the regulatory objectives of the FFAR, the MNB as macroprudential authority also introduced the foreign exchange coverage ratio (FECR), which limits the on-balance-sheet denomination mismatch of credit institutions to 15% of the balance sheet total.

Since March 24, 2020, in relation to the outbreak of the COVID-19 pandemic, the limit on the foreign exchange mismatches between assets and liabilities relative to the balance sheet total was narrowed from 15% to 10%. Since September 17, 2020, the MNB restored the regulation to its original form, with a 15% limit in effect again.

Effective from December 10, 2021, the minimum value of the FECR is increased to 30% (from 15%) of the balance sheet total when banks’ foreign exchange liabilities exceed the amount of foreign exchange assets. The 15% limit remains unchanged in the case banks’ foreign exchange assets exceed the amount of their foreign exchange liabilities.

Since July 1, 2018, the interbank funding ratio was introduced to prevent excessive reliance on funding originated from financial corporations. Wholesale funding from financial corporations—weighted according to currency and maturity with some exemptions not to hamper normal banking operations—must not exceed 30% of total liabilities excluding own funds. Since September 17, 2020, on-balance-sheet liabilities arising from derivative transactions with financial corporations and from the revaluation of such transactions are exempt when determining the interbank funding ratio requirement, as these show significant volatility for banks active in the foreign exchange swap market, and therefore, they may limit the predictability of compliance and trigger unwanted adjustments.

Borrowing abroad
No.

Maintenance of accounts abroad
No.

Lending to nonresidents (financial or commercial credits)
No.

Notification is required pursuant to EU Directive No. 2013/36/EC in case of cross-border services.

Lending locally in foreign exchange
Yes.

MNB Decree No. 32/2014 (IX. 10) (modified by MNB Decree No. 29/2018 (VIII. 21)) on the regulation of DSTI and LTV ratios introduced new DSTI and LTV limits. The Decree requires that the earnings of the borrower be properly documented, regardless of the currency. The following stricter LTV restrictions differentiate according to the type and the currency of loans: (1) real-estate-backed mortgage loans: 50% for loans in euros, 35% for loans in other foreign currencies, and 80% for loans in Hungarian forint (HUF); (2) financial real estate leasing: 55% for loans in euros, 40% for loans in other foreign currencies, and 85% for loans in HUF; (3) vehicle financing: 45% for loans in euros, 30% for loans in other foreign currencies, and 75% for loans in HUF; and (4) vehicle leasing: 50% for loans in euros, 35% for loans in other foreign currencies, and 80% for loans in HUF. These restrictions do not
affect loan conversions in the same foreign currency (for example, a Swiss franc loan may be converted to another Swiss franc loan). The
MNB Decree differentiates the DSTI limits for new mortgage loans
denominated in HUF with over 5 years of maturity based on the
length of the interest rate fixation period and the net monthly income
of the borrower. The limits are as follows: For borrowers with net
income below HUF 500,000, the limit for (1) floating or fixed
interest rates for less than 5 years is 25%; (2) for interest rates fixed
for at least 5 years but less than 10 years, the limit is 35%; and (3) for
interest rates fixed for at least 10 years or for the whole term, it is
50%. For borrowers with net income of HUF 500,000 or above, the
limit for (1) floating or fixed interest rates for less than 5 years is
30%; (2) for interest rates fixed for at least 5 years but less than 10
years, the limit is 40%; and (3) for interest rates fixed for at least 10
years or for the whole term, it is 60%. EUR limits for the relevant
income categories: for below 5 years interest fixation period 15/20%
and for 5 years or longer interest fixation period 25/30%. Limits for
mortgage loans denominated in other foreign currencies for below 5
years interest fixation period 5/10% and for 5 years or longer interest
fixation period 10/15%.
The applicable DSTI limits for uncovered loans or mortgage loans
with a maturity of up to 5 years depending on the verified net
monthly income of the borrower and the currency of the loan: (1)
50% for net income less than HUF 500,000, 25% for loans in euros,
and 10% for loans in other foreign currencies and (2) 60% for net
income higher than HUF 500,000, 30% for loans in euros, and 15%
for loans in other foreign currencies.

©International Monetary Fund. Not for Redistribution
an international organization to which one or more OECD or EEA member countries belong.

Branch offices of third country insurance companies must (1) have sufficient liquid assets to cover the minimum security capital and must deposit one-quarter of these assets as security and (2) keep the liquid assets covering the minimum security capital in Hungary and keep the remainder in the EU.

Small domestic insurance companies are subject to currency-matching regulations as follows: (1) If coverage is expressed in a contract in a specific currency, the insurance company’s liabilities are deemed to be in that currency. (2) The assets of technical provisions must be placed in assets expressed in the type of currency defined above. (3) For non-life insurance, if the contract does not stipulate the currency, the insurance company’s commitment is deemed to be in the currency of the country where the risk is located (Annex 8 of the Act).

The type of currency in which a pension fund is required to keep reserves set aside to cover payments of pension benefits under its own plan to participating fund members must be specified in accordance with the foreign exchange regulations in effect and with the following provisions: (1) If the fund’s benefit payment obligation is denominated in a specific currency, then, for the purposes of compliance with foreign exchange regulations, the fund’s liabilities must be in that currency. (2) The provisions set aside to cover the fund’s benefit plan must be placed in receivables denominated in the currency defined in Paragraph (1). (3) A fund may place up to 30% of its liabilities denominated in a specific currency in assets other than what is defined in Paragraph (2); however, the value of the assets kept in various currencies may not be less than the value of all liabilities kept in various currencies (Section 67(7) of Act No. LXXXII of 1997 on Private Pensions and Private Pension Funds).

**Changes during 2021 and 2022**

**Exchange Arrangement**
The government security purchase program discontinued, and the last auction was held on this date; hence, the Bank completed the withdrawal of its crisis management programs.

**Arrangements for Payments and Receipts**

06/03/2021 Regulation (EU) No. 2018/1672 on controls on cash entering or leaving the EU entered into force.

**Imports and Import Payments**

06/04/2022 Restrictive measures against Belarus are in effect. They are contained in Council Regulation (EC) No. 765/2006 of May 18, 2006, concerning restrictive measures against President Lukashenko and certain officials of Belarus. The restrictive measures were extended, and the regulation was amended 8 times in 2022, last on July 18, 2022.

10/07/2022 Restrictive measures against Russia are in effect. They are contained in Council Regulation (EU) No. 833/2014 of July 31, 2014, concerning restrictive measures in view of Russia’s actions destabilizing the situation in Ukraine. The restrictive measures were extended, and the regulation was amended 11 times in 2022, last on October 6, 2022.

**Exports and Export Proceeds**

03/11/2021 According to Commission Implementing Regulation (EU) No. 2021/442 and Implementing Regulation (EU) No. 2021/521 making the exportation of certain products subject to the production of an export authorization, for the exportation of certain products (especially COVID-19 vaccines), an export authorization is required. It had to be implemented first until June 30, 2021.

06/24/2021 Considering the situation in Belarus, the Council adopted Decision No. 2021/1031, which prohibits the export of some products (for example, dual-use goods, equipment used for interception, military products, and technology) to Belarus.

09/30/2021 Following the amendment by Commission Implementing Regulation (EU) No. 2021/1071, the measure according to Commission Implementing Regulation (EU) No. 2021/442 above was extended until this date.

01/01/2022 Following the amendment by Commission Implementing Regulation (EU) No. 2021/1728, the measure the measure according to Commission Implementing Regulation (EU) No. 2021/1071 above was extended until December 31, 2021. Hence, this measure is no longer in effect from January 1, 2022.

06/04/2022 Restrictive measures against Belarus are in effect. They are contained in Council Regulation (EC) No. 765/2006 of May 18, 2006, concerning restrictive measures against President Lukashenko and certain officials of Belarus. The restrictive measures were extended, the regulation was amended 8 times in 2022, last on July 18, 2022.

10/07/2022 Restrictive measures against Russia are in effect. They are contained in Council Regulation (EU) No. 833/2014 of July 31, 2014, concerning restrictive measures in view of Russia’s actions destabilizing the situation in Ukraine. The restrictive measures were extended, the regulation was amended 11 times in 2022, last on October 6, 2022.
Capital Transactions

Controls on capital transactions

Controls on capital and money market instruments

On capital market securities

Shares or other securities of a participating nature

Purchase locally by nonresidents

The following controls in Article 277 of Act LVIII of 2020, which were introduced on June 18, 2020, expired: Controls on investments by foreign investors to (1) acquire (directly or indirectly) a majority influence in a strategic company, (2) acquire at least 10% of all shares, provided the overall value of the investment reaches or exceeds HUF 350 million, and (3) acquire 15%, 20%, or 50% in a strategic company or if the joint shareholding of all the foreign investors would exceed 25% in a strategic company, require the approval.

The reference to the part “to be applied for actions taken until June 30, 2021,” has been removed from Paragraph (1) of Article 277 of Act LVIII of 2020. As a result, the measure was extended and is currently in force without any limitation in time set by the provisions.

Controls on direct investment

Inward direct investment

Insurance and reinsurance activities and activities directly related to insurance activities which are subject to reporting in accordance with the provisions of Act No. LXXXVIII of 2014, are notifiable activities (Act. No. XCIX of 2021 on transitional emergency rules, Section 299).

A limited liability company, private limited company, public limited company or higher education institution established in Hungary qualifies as a strategic company, in case the main or additional field of its activity defined in the Government Decree belongs to a sector of strategic importance, in particular in the energy, transport, communications sectors, or in the sectors defined in Article 4 (1) (a) to (e) of FDI, excluding financial infrastructure. (Act. No. XCIX of 2021 on transitional emergency rules, Section 160 (2)).

The following controls in Article 277 of Act LVIII of 2020, which were introduced on June 18, 2020, expired: Controls on investments by foreign investors to (1) acquire (directly or indirectly) a majority influence in a strategic company, (2) acquire at least 10% of all shares, provided the overall value of the investment reaches or exceeds HUF 350 million, and (3) acquire 15%, 20%, or 50% in a strategic company or if the joint shareholding of all the foreign investors would exceed 25% in a strategic company.

The reference to the part “to be applied for actions taken until June 30, 2021,” has been removed from Paragraph (1) of Article 277 of Act LVIII of 2020. As a result, the measure was extended and is currently in force without any limitation in time set by the provisions.

Government Decree No. 27/2021. (I.29.), which is referred to in Article 114 of Act XCIX of 2021, has been repealed by Government Decree No. 181/2022. (V.24.) (which declared the end of the emergency situation as of June 1, 2022). As Article 114 of Act XCIX of 2021 states that the amendments it made to point 1 of Article 1 of Act LVII of 2018, must remain valid for twelve months after declaring the end of the emergency situation, which happened as of June 1, 2022, therefore the amendments should stay in force until May 31, 2023. The scope of “foreign investors” under Act LVII of 2018 will remain to be extended to nationals of the EU, another state belonging to the EEA and the Swiss Confederation, or to legal
persons or other entities registered in such a state until May 31, 2023.

**Provisions Specific to the Financial Sector**

12/10/2021  The minimum value of the foreign exchange coverage ratio is increased to 30% (from 15%) of the balance sheet total when banks’ foreign exchange liabilities exceed the amount of foreign exchange assets. The 15% limit remains unchanged in the case banks’ foreign exchange assets exceed the amount of their foreign exchange liabilities.
ICELAND

Multiple

Classification

No separate legal tender

Currency board

Conventional peg

Stabilized arrangement

Crawling peg

Crawl-like arrangement

Pegged exchange rate within horizontal bands

Other managed arrangement

Floating
Yes. The de jure exchange rate arrangement is free floating. Central Bank of Iceland (CBI) may conduct transactions in the interbank foreign exchange market to mitigate volatility of the króna exchange rate and improve price formation. The domestic foreign currency market was...
strongly affected by the COVID-19 pandemic. As a result, the CBI carried out, in addition to irregular intervention, a pre-announced currency sales to support liquidity in the foreign exchange market from mid-September 2020 until the end of April 2021. The CBI publishes daily data on its interventions in the foreign exchange market with a two-day lag. Developments in the trade balance and the foreign exchange market are covered in CBI publications, including the Monetary Bulletin and Financial Stability. The de facto exchange rate arrangement is classified as a floating arrangement.

Free floating

Official exchange rate Yes. Every trading day at 14:15 hrs. Central European Time (CET), the CBI determines the official exchange rate of the króna against other currencies, which is used as the rate for official agreements, court cases, and other agreements between parties when no other rate is specified (Article 19 of Central Bank Act No. 36/2001). The reference exchange rate is published on the CBI’s website each business day at 4:00 p.m. Icelandic time. The official rate is based on the price of the euro against the króna, as quoted in the domestic foreign exchange market, and price developments in the market. The fixing is a snapshot of the position in the foreign exchange market.

Target setting body Yes.

Government

Central Bank

Monetary Policy Committee

Central Bank Board

Other

Government and Central Bank Yes. Decisions on the application of the CB’s monetary policy instruments are taken by the MPC. These monetary policy instruments are its interest rate decisions, transactions with credit institutions other than loans of last resort, decisions on reserve requirements, purchases of treasury bonds in the secondary market, and foreign exchange market transactions aimed at affecting the exchange rate of the króna. Members of the MPC are the Governor, the Deputy Governor for Monetary Policy, the Deputy Governor for Financial Stability, and two external experts in the fields of economics and monetary policy who are appointed by the prime minister for a term of five years.
The Act on the CBI requires that the Bank’s MPC meet at least six times a year, make public the minutes of its meetings, and explain its decisions and the rationale behind them. Each monetary policy decision is published in a statement released by the MPC before the market opens on the day the decision is announced. The MPC publishes the minutes of its meetings two weeks after each interest rate decision. The minutes contain the Committee’s assessment of economic and monetary developments and prospects, votes of individual MPC members and key points of view expressed by members at the meeting and, if applicable, the range in which members considered it appropriate to keep interest rates. Further information can be found in the MPC Rules of Procedure which are approved by the CBI’s Supervisory Board.

By law, the CBI may declare a quantitative target for inflation, with the approval of the minister. According to the joint declaration made by the CBI and the government in 2001, Iceland’s inflation target is defined as an inflation rate of 2½%. If inflation deviates by more than ±1½ percentage points from the target, the CBI is obliged to submit a report to the government explaining the reasons for the deviations from the target, how the CBI intends to react, and how long it will take to reach the inflation target again in the CBI’s assessment. The report must be made public.

**Inflation target**  
Yes.

**Target number**  
Yes.

**Point target**  
Yes.  
The CBI’s main objective is price stability, defined as a 12-month rise of 2½% in the CPI.

**Target with tolerance band**

**Band/Range**

**Target measure**  
Yes.

**CPI**  
Yes.  
The CPI measures changes in the price of private consumption. Statistics Iceland measures the CPI each month, after having surveyed the price of all goods and services in a defined consumption basket. The consumption basket is based on the results of regularly conducted Statistics Iceland expenditure surveys, which determine the goods and services consumers buy, and in what amounts. The survey findings determine the weight assigned to individual goods and services in the CPI. The expenditure survey has been carried out continuously since 2000, and the results are used in the annual revision of the CPI base.

**Core inflation**

**Target horizon**  
No.

**Operating target (policy rate)**  
Yes.

**Policy rate**  
Yes.  
The 7-day term deposit rate is the policy rate.

**Target corridor band**  
Yes.  
According to the Declaration on Inflation Target and Change in the Exchange Rate Policy, if inflation deviates by more than ±1½ percentage points from the target, the CBI is obliged to submit a report to the government explaining the reasons for the deviations from the target, how the CBI intends to react, and how long it will take to reach the inflation target again in the CBI’s assessment. The report must be made public.
The Act on the CBI stipulates that the MPC must submit to parliament (Althingi) a report on its activities twice a year and that the contents of the report must be discussed in the parliamentary committee of the Speaker’s choice. Deviations of inflation of more than 1½ percentage points in either direction from the inflation target require a public CBI report to the government explaining the reasons for the deviation from the target and the CBI’s response.

The Act on the CBI stipulates that the MPC of the CBI must submit to parliament (Althingi) a report on its activities twice a year and that the contents of the report must be discussed in the parliamentary committee of the Speaker’s choice.

The votes of individual committee members are made public in the MPC’s minutes two weeks after each interest rate decision.

The Act on the CBI stipulates that it is the role of the MPC to set the CBI interest rates and apply other monetary policy instruments. Furthermore, the Act states that minutes of meetings of the MPC must be made public, and an account given of the committee’s decisions and the premises on which they are based. In accordance with the Act, the MPC has decided to publish the minutes of its meetings two weeks after each interest rate decision.

The CBI’s macroeconomic and inflation forecasts are prepared four times a year over a horizon of three years and are published in its quarterly publication, Monetary Bulletin.

Commercial banks may set freely their exchange rates in transactions with their customers.

In accordance with the Foreign Exchange Act No. 70/2021, only the CBI and those parties that either (1) are authorized by law or in accordance with the provisions of international agreements to which Iceland is a party or (2) have been granted specific authorization by the CBI to operate a foreign exchange market, may act as intermediaries in foreign exchange transactions.

The former category includes commercial banks (there are currently four commercial banks operating in Iceland), savings banks (currently five), and other financial companies that provide foreign exchange services in connection with their services. It also includes other currency exchange providers (foreign exchange bureaus) that may offer foreign exchange services, provided they register with the CBI’s Financial Supervisory Authority in accordance with Article 35 of the Act on Measures against Money Laundering and Terrorism Financing No. 140/2018. Currently, one currency exchange provider is operating in Iceland.

There is currently no entity operating a foreign exchange market with a specific authorization from the CBI.
As of December 31, 2021, three banks, Arion banki hf., Íslandsbanki hf., and Landsbankinn hf., which act as market makers, may participate in the organized interbank foreign exchange market, along with the CBI (Article 20, Paragraph 1, Section 7, of the Act on Financial Undertakings No. 161/2002). Eligibility to participate in the organized interbank foreign exchange market is governed by CBI regulations. The price of the króna against the euro is determined in the foreign exchange market by market makers that undertake to give indicative quotes for the buying and selling rates for €1 million.

Quotes are entered and communicated in Bloomberg. The CBI oversees the market and may trade there (intervene) at any time at the market makers’ quoted rates.

Three banks, which act as market makers, are entitled to participate in the foreign exchange market, together with the CBI. The market makers undertake to give indicative quotes for the buying and selling rates for €1 million. Quotes are entered and communicated in Bloomberg.

There is no official market in outright forward or swap transactions. Such transactions are conducted by the banks over the counter. The CBI has only rarely participated in foreign exchange derivatives markets (forward and swap) since January 2009 to reduce banks’ foreign exchange imbalances.

Effective June 29, 2021, following a full repeal of Act No. 37/2016 on the Treatment of Króna-Denominated Assets Subject to Special Restrictions (the Offshore Króna Act), there are no restrictions in effect on transactions in capital and money market instruments regarding the use of domestic currency in the settlement of such transactions.

Previously, there were restrictions on cross-border movement of króna-denominated assets that fell under the scope of Act No. 37/2016 on the Treatment of Króna-Denominated Assets Subject to Special Restrictions.
Restrictions (the Offshore Króna Act), there are no restrictions in effect on transactions in derivative and other instruments regarding the use of domestic currency in the settlement of such transactions. Previously, restrictions applied to assets that fell under the scope of Act No. 37/2016 on the Treatment of Króna-Denominated Assets Subject to Special Restrictions or to hedging in connection with bonds issued abroad in domestic currency (glacier bonds). Effective June 29, 2021, following a full repeal of Act No. 37/2016 on the Treatment of Króna-Denominated Assets Subject to Special Restrictions (the Offshore Króna Act), there are no restrictions in effect on credit operations regarding the use of domestic currency in the settlement of such transactions. Previously, restrictions applied to assets that fell under the scope of Act No. 37/2016 on the Treatment of Króna-Denominated Assets Subject to Special Restrictions.

Effective June 29, 2021, because of the repeal of the older Act on Foreign Exchange, and its replacement by a new Act on Foreign Exchange No. 70/2021, the restrictions on derivative transactions involving the Icelandic kröna for the purposes of speculation and/or in connection with glacier bond issuance are no longer in effect.

Effective June 30, 2021, the CBI introduced limits on the derivative positions of Icelandic banks, by issuing Rules No. 765/2021. These rules were amended and reissued as Rules No. 411/2022 effective April 8, 2022. The limits are twofold: (1) Commercial banks’
forward foreign currency position vis-à-vis each individual counterparty (long or short) may not exceed 10% of their capital base and (2) commercial banks’ gross forward foreign currency position may not exceed 50% of their capital base. These limits apply only to derivatives in which the Icelandic króna is specified in a contract against a foreign currency, and do not apply to derivatives positions between Icelandic commercial banks. Derivative contracts that do not involve the Icelandic króna are unaffected by these rules.

Effective June 30, 2021, the CBI introduced limits on the derivative positions of Icelandic banks, by issuing Rules No. 765/2021. Purchase locally by nonresidents

- Yes.

Residents and legal entities, domiciled outside EEA or EFTA, are subject to restrictions on real property purchases in Iceland, as explained below. Large-scale investment projects are generally exempted from these restrictions via standard clauses in an investment agreement with the Ministry of Industries and Innovation. The Minister of Justice can also grant exemptions, to those that are permitted to run a business in Iceland (EEA and OECD entities and those having received a permission as described in the chapter on Business Enterprises), when the property is to be used as business premises or a permanent residence, or when other reasons apply.

For others, the basic restrictions are that private individuals may purchase real property if they are either Icelandic citizens or have their legal residence in Iceland. Partners of legal entities or
businesses, who have unlimited liability for the debts of the entity or business concerned, must be Icelandic citizens, or individuals domiciled in Iceland for at least five years, to purchase a real property. In the case of a limited liability company or an institution, the company, or the institution, must be domiciled and have its venue in Iceland. Furthermore, the members of the board and directors must be Icelandic citizens or domiciled in Iceland for at least five years. In the case of corporations, 4/5th of the share capital must be owned by Icelandic citizens and Icelandic citizens must exercise the majority of the votes at shareholder meetings.

Before disposing of farmland, either indefinitely or for longer than seven years, nonresident persons must acquire permission from the relevant Minister. Nonresidents may sell real estate locally without restrictions, and proceeds from the sale of real estate in Iceland by nonresidents are convertible and transferable.

| Sale locally by nonresidents | No. |
| Controls on personal capital transactions | No. |
| **Loans** |  |
| By residents to nonresidents | No. |
| To residents from nonresidents | No. |
| **Gifts, endowments, inheritances, and legacies** |  |
| By residents to nonresidents | No. |
| To residents from nonresidents | No. |
| **Settlement of debts abroad by immigrants** | No. |
| **Transfer of assets** |  |
| Transfer abroad by emigrants | No. |
| Transfer into the country by immigrants | No. |
| **Transfer of gambling and prize earnings** | No. |

**Provisions Specific to the Financial Sector**

| Provisions specific to commercial banks and other credit institutions | Yes. |
| Borrowing abroad | No. |
| Maintenance of accounts abroad | No. |
| Lending to nonresidents (financial or commercial credits) | No. |
| Lending locally in foreign exchange | No. |
| Purchase of locally issued securities denominated in foreign exchange | No. |
| Differential treatment of deposit accounts in foreign exchange | No. |
| Reserve requirements | No. |
| Liquid asset requirements | No. |

Commercial banks, savings banks, and other credit institutions operating under the supervision of the CBI may borrow abroad. There are no controls on the opening of accounts abroad.

Commercial banks, savings banks, and other credit institutions operating under the supervision of the CBI may lend abroad. There are no controls on foreign-exchange-denominated loans.
**Interest rate controls**  No.

**Credit controls**  No.

**Differential treatment of deposit accounts held by nonresidents**  No.

**Reserve requirements**  No.

**Liquid asset requirements**  No.

**Interest rate controls**  No.

**Credit controls**  No.

**Investment regulations**  No.

**Abroad by banks**  No.

**In banks by nonresidents**  No.

Residents and nonresidents whose ownership in a banking institution exceeds 10% must be approved as fit and proper by the CBI (following the 2020 merger of the CBI and Financial Supervisory Authority).

There are no controls on investments of nonresidents in banks. Since 1996, when Act No. 34/1991 on Investment by Nonresidents in Business Enterprises was amended in connection with Iceland’s accession to the EEA, the 25% limit on nonresident ownership of Icelandic banks was abolished.

**Open foreign exchange position limits**  Yes.

The requirement on open foreign exchange position limits does not distinguish between resident and nonresident assets and liabilities.

**On resident assets and liabilities**  Yes.

The CBI regulates the net foreign exchange positions of banks. A bank’s open position in individual currencies may not exceed 10% of the financial enterprise’s capital base according to the most recently published financial statements when it comes to systemically important supervised entities. This limit is 15% regarding credit enterprises that are not systemically important supervised entities.

Effective June 30, 2021, the CBI introduced limits on the derivative positions of Icelandic banks, by issuing rules No. 765/2021. These rules were amended and reissued as Rules No. 411/2022 effective April 8, 2022. The limits are twofold: (1) Commercial banks’ forward foreign currency position vis-à-vis each individual counterparty (long or short) may not exceed 10% of their capital base and (2) commercial banks’ gross forward foreign currency position may not exceed 50% of their capital base. These limits apply only to derivatives in which the Icelandic króna is specified in a contract against a foreign currency, and do not apply to derivatives positions between Icelandic commercial banks. Derivative contracts that do not involve the Icelandic króna are unaffected by these rules.

**On nonresident assets and liabilities**  Yes.

The CBI regulates the net foreign exchange positions of banks. A bank’s open position in individual currencies may not exceed 10% of the financial enterprise’s capital base according to the most recently published financial statements when it comes to systemically important supervised entities. | Provisions specific to institutional investors | Yes. |
| Insurance companies | Yes. |
| Limits (max.) on securities issued by nonresidents | No. |
| Limits (max.) on investment portfolio held abroad | No. |
| Limits (min.) on investment portfolio held locally | No. |
| Currency-matching regulations on assets/liabilities composition | Yes. |

An insurance company must choose assets to cover technical provisions with regard to exchange rate risk, to reduce its effects to the extent possible, except when assets in a specific foreign currency amount to 7% or less of total assets in other currencies. An insurance company may invest in assets in another currency to cover up to 20% of its underwriting liabilities in a specific currency. Generally, assets to cover technical provisions must match the currency composition of the underwriting liabilities.

| Pension funds | Yes. |
| Limits (max.) on securities issued by nonresidents | No. |
| Limits (max.) on investment portfolio held abroad | No. |
| Limits (min.) on investment portfolio held locally | No. |
| Currency-matching regulations on assets/liabilities composition | Yes. |

Portfolio investments of pension funds are restricted to listed securities in organized markets within OECD countries and in other markets approved by the CBI.

| Investment firms and collective investment funds | No. |
| Limits (max.) on securities issued by nonresidents | No. |
| Limits (max.) on investment portfolio held abroad | No. |
| Limits (min.) on investment portfolio held locally | No. |
| Currency-matching regulations on assets/liabilities composition | No. |

Foreign currency exposure is limited to 50% of net assets.

Changes during 2021 and 2022

Arrangements for Payments and Receipts

Prescription of currency requirements
Controls on the use of domestic currency
For capital transactions
Transactions in capital and money

Following a full repeal of Act No. 37/2016 on the Treatment of
Króna-Denominated Assets Subject to Special Restrictions (the Offshore Króna Act), restrictions on the use of domestic currency in settling capital and money market transactions were eliminated. Previously, there were restrictions on cross-border movement of króna-denominated assets that fell under the scope of Act No. 37/2016 on the Treatment of Króna-Denominated Assets Subject to Special Restrictions.

Transactions in derivatives and other instruments 06/29/2021
Following a full repeal of Act No. 37/2016 on the Treatment of Króna-Denominated Assets Subject to Special Restrictions (the Offshore Króna Act), there are no restrictions in effect on transactions in derivative and other instruments regarding the use of domestic currency in the settlement of such transactions. Previously, restrictions applied to assets that fell under the scope of Act No. 37/2016 on the Treatment of Króna-Denominated Assets Subject to Special Restrictions or to hedging in connection with bonds issued abroad in domestic currency (glacier bonds).

Credit operations 06/29/2021
Following a full repeal of Act No. 37/2016 on the Treatment of Króna-Denominated Assets Subject to Special Restrictions (the Offshore Króna Act), there are no restrictions in effect on credit operations regarding the use of domestic currency in the settlement of such transactions. Previously, restrictions applied to assets that fell under the scope of Act No. 37/2016 on the Treatment of Króna-Denominated Assets Subject to Special Restrictions.

Resident Accounts

Accounts in domestic currency held abroad 06/29/2021
Following a full repeal of Act No. 37/2016 on the Treatment of Króna-Denominated Assets Subject to Special Restrictions (the Offshore Króna Act), there are no restrictions in effect on residents establishing accounts in kronur abroad. Previously, the transfer of domestic currency deriving from transactions with offshore króna assets falling under the scope of Act No. 37/2016 on the Treatment of Króna-Denominated Assets Subject to Special Restrictions was restricted.

Nonresident Accounts

Domestic currency accounts 06/29/2021
Following a full repeal of Act No. 37/2016 on the Treatment of Króna-Denominated Assets Subject to Special Restrictions (the Offshore Króna Act), there are no restrictions in effect. Previously, restrictions applied on transfers of domestic currency deriving from transactions with offshore króna assets falling under the scope of Act No. 37/2016 on the Treatment of Króna-Denominated Assets Subject to Special Restrictions.

Blocked accounts 06/29/2021
Following a full repeal of Act No. 37/2016 on the Treatment of Króna-Denominated Assets Subject to Special Restrictions (the Offshore Króna Act), there are no restrictions in effect and no accounts are blocked. Previously, Offshore króna assets were segregated in a secure manner with the legislation on the treatment of króna-denominated assets, subject to special restrictions. They could be used for capital transactions within the set of offshore assets and investment in designated government-issued bills and CDs issued by the Central Bank of Iceland.

Capital Transactions

Controls on capital transactions 06/29/2021
With the implementation of a new Act on Foreign Exchange No. 70/2021 and a full repeal of Act No. 37/2016 on the Treatment of Króna-Denominated Assets Subject to Special Restrictions (the
Offshore Króna Act), there are no restrictions on cross-border movement of króna-denominated assets that fell under the scope of Act No. 37/2016 on the Treatment of Króna-Denominated Assets Subject to Special Restrictions.

06/29/2021

Because of the repeal of the older Act on Foreign Exchange, and its replacement by a new Act on Foreign Exchange No. 70/2021, the previous restrictions on derivative transactions involving the Icelandic króna for the purposes of speculation and/or in connection with glacier bond issuance are no longer in effect.

06/30/2021

The Central Bank of Iceland introduced limits on the derivative positions of Icelandic banks, by issuing rules No. 765/2021. The limits are twofold: (1) commercial banks’ forward foreign currency position vis-à-vis each individual counterparty (long or short) may not exceed 10% of their capital base and (2) commercial banks’ gross forward foreign currency position may not exceed 50% of their capital base. These limits apply only to derivatives in which the Icelandic króna is specified in a contract against a foreign currency. Derivative contracts that do not involve the Icelandic króna are unaffected by these rules.

04/08/2022

The rules that apply only to derivatives in which the Icelandic króna is specified in a contract against a foreign currency were amended and reissued as Rules No. 411/2022, such that they do not apply to derivatives positions between Icelandic commercial banks.

06/29/2021

**Free floating**

| Official exchange rate | Yes. | Financial Benchmarks India Private Limited (FBIL) has the responsibility of computation and dissemination of reference rate for USD/INR and exchange rate of other major currencies. The FBIL reference rate for spot US dollar against the Indian rupee is computed on the basis of the volume-weighted average of the actual market transactions that have taken place during a randomly selected 15-minute window between 1130 hours and 1230 hours every weekday. A ±3 standard deviation rule is applied to the transaction data, as above, to remove outliers. For calculation of EURO/INR, GBP/INR, and JPY/INR reference rates, the closing prices of each cross-currency pair, that is, EURO/USD, GBP/USD, and USD/JPY as depicted in the 1-minute charts over the 15-minute time period, are obtained from any electronic platform. All the cross-currency rates are taken from the same randomly selected time period of 15 minutes between 1130 hours and 1230 hours that is used for the calculation of USD/INR reference rate. The mean of the closing prices (closing price of each minute during the 15-minute window), so obtained, is crossed with the USD/INR reference rate to calculate the EURO/INR, GBP/INR, and JPY/INR reference rates. The reference rates are used for the settlement of exchange-traded currency futures and options. The foreign exchange transactions of the Government of India (GOI) undertaken through RBI take place at the reference rate. The RBI's foreign currency assets and liabilities are revalued at weekly and monthly intervals using the reference rate. The IMF also uses the rate for revaluation of SDRs. As stated by the Notification RBI/2018-19/34 of August 2, 2018, banks are advised to use the conversion rate announced by FBIL for the purpose of converting foreign assets/liabilities for reporting in Form “A” return and Form VIII return. As regards conversion of assets/liabilities in other currencies, for which reference rate is not available from FBIL, banks may use New York closing rate pertaining to the day end of the Reporting Friday, for converting such currencies to USD. Banks may use the reference rate of FBIL for USD/INR of the same day for conversion to INR. |

### Monetary policy framework

**Exchange rate anchor**

- **U.S. dollar**
- **Euro**
- **Composite**
- **Other**
Monetary aggregate target

**Inflation-targeting framework**

Yes. The RBI Act, 1934, as amended in 2016 provides for the statutory basis for implementing the flexible inflation-targeting framework.

**Target setting body**

Yes.

- Government
- Central Bank
- Monetary Policy Committee
- Central Bank Board
- Other

Government and Central Bank

Yes. The RBI Act provides for the inflation target to be set by the GOI, in consultation with the RBI, once in every five years. The RBI Act, 1934, also provides for a six-member MPC to determine the policy interest rate required to achieve the inflation target. The MPC was constituted on September 29, 2016, and it held its first meeting on October 3 and 4, 2016. On expiry of the term of the three non-ex-officio members in 2020, the Central Government reconstituted the MPC with appointment of three external members for a period of four years or until further orders, whichever is earlier.

**Inflation target**

Yes.

**Target number**

Yes.

- Point target
- Target with tolerance band

**Band/Range**

Yes. 4% ± 2% (upper tolerance level: 6%; lower tolerance level: 2%).

**Target measure**

Yes. CPI combined inflation rate.

**CPI**

Yes. CPI inflation (defined as year-wise change in monthly CPI expressed in terms of percentage).

**Core inflation**

Yes.

**Target horizon**

Yes. The 4% CPI inflation target is for the period from April 1, 2021, to March 31, 2026.

**Operating target (policy rate)**

Yes.

**Policy rate**

Yes. The policy repo rate is the (fixed) interest rate at which the RBI provides overnight liquidity to banks against the collateral of government and other approved securities under the liquidity adjustment facility. As of August 5, 2022, the policy rate was 5.4%.

**Target corridor band**

Yes. The weighted average call rate (WACR) is the operating target of monetary policy. In April 2022, RBI Standing Deposit Facility (SDF) was introduced under which RBI can accept uncollateralized deposits, on an overnight basis, from all liquid adjustment facility participants. The SDF rate has been kept 25 basis points (bps) below the policy repo rate and has now replaced the fixed reverse repo rate as the floor of the liquid adjustment facility corridor, with the...
marginal standing facility rate, at which scheduled commercial banks can borrow additional amount of overnight money from the RBI, constituting the upper band of the target corridor. As of August 5, 2022, marginal standing facility rate is 5.65% and SDF rate is at 5.15%.

The Central Government announced the following as factors that constitute failure to achieve the inflation target: (1) the average inflation is more than the upper tolerance level of the inflation target for any three consecutive quarters or (2) the average inflation is less than the lower tolerance level for any three consecutive quarters. In the event of failure to achieve the target, the RBI will report to the government on: (1) reasons for the deviation of inflation from the target over three consecutive quarters, (2) remedial measures, and (3) an estimated time frame over which inflation will be brought back to the target.

According to Section 45ZL of the amended RBI Act, 1934, the Reserve Bank publishes, on the fourteenth day after every meeting of the MPC, the minutes of the proceedings of the meeting which include the following:
(1) the resolution adopted at the meeting of the MPC;
(2) the vote of each member of the MPC, ascribed to such member, on the resolution adopted in the said meeting; and
(3) the statement of each member of the MPC under Subsection (11) of Section 45ZI on the resolution adopted in the said meeting.

Dealers in the foreign exchange market (spot and derivatives) are the entities authorized by the RBI to deal with foreign exchange and are known as authorized persons. Authorized persons can be of the following types:
(1) AD Category-I: These dealers can undertake foreign exchange
transactions with customers for all current and capital account transactions. Currently, there are 97 AD Category-I;
(2) AD Category-II: These dealers can undertake foreign exchange transactions with customers for certain non-trade current account transactions (CAT). Currently, there are 78 AD Category-II;
(3) AD Category-III: These dealers can undertake foreign exchange transactions for bespoke current and capital account transactions. Currently, there are 9 AD Category-III; and
(4) Full Fledged Money Changers: These entities can undertake money changing transactions with travelers. Currently, there are around 2000 Full Fledged Money Changers.

The foreign exchange spot market comprises of dealer-to-dealer segment (or interbank market) and dealer-to-customer segment (or customer market). Both banks and nonbank entities (for example, primary dealers) can be dealers. Dealers are free to decide bid-ask spreads and mark-up. Foreign exchange spot transactions can be undertaken in over the counter market only.

In terms of purpose, customer (residents and nonresidents) can undertake foreign exchange spot transaction for purchasing/selling foreign exchange for a permissible current or capital account transaction and dealers can freely undertake foreign exchange spot transactions within their open position limit.

around 2000 Full Fledged Money Changers.

The foreign exchange derivative market (forward, swap, option, and other derivatives) comprises dealer-to-dealer segment (or interbank market) and dealer-to-customer segment (or customer market). Dealers are the entities authorized by the RBI to deal with foreign exchange (known as authorized persons). Both banks and nonbank entities (for example, primary dealers) can be dealers. Dealers are free to decide bid-ask spreads and mark-up. Foreign exchange derivative transactions can be undertaken in both over the counter and exchange-traded markets.

In terms of purpose, customers (residents and nonresidents) can undertake: (1) foreign exchange derivative transactions involving INR for the purpose of hedging a contracted as well as anticipated exposure to exchange rate risk from a permissible current or capital account transaction and (2) foreign exchange derivative transactions not involving INR without any restriction in terms of purpose. Dealers can freely undertake foreign exchange derivative transactions within their open position limit. There are no restrictions on cancelation and rebooking of canceled derivatives.

Official cover of forward operations Yes.

The Export Credit Guarantee Corporation of India Ltd. insures against exchange rate fluctuation for deferred receivables from the date of a bid up to 15 years after a contract is awarded. Exchange rate cover is offered in Australian dollars, euros, Japanese yen, pounds sterling, Swiss francs, UAE dirhams, and US dollars. For payments specified in other convertible currencies, cover is provided at the discretion of the Export Credit Guarantee Corporation of India Ltd.

Arrangements for Payments and Receipts

Prescription of currency requirements Yes. For prescription of currency purposes, countries are divided into two groups: (1) ACU members and (2) the external group (all other countries). For the first group, except Bhutan and Nepal, payments for eligible current international transactions must be settled through the ACU. (Myanmar may also settle transactions in freely convertible currency.) For Nepal and Bhutan, these are settled in Indian rupees. In other cases, payments may be settled in any permitted currency. Payment for imports of oil and gas is permitted outside the ACU mechanism, and all eligible CAT, including trade transactions with the Islamic Republic of Iran, must be settled in any permitted currency outside the ACU mechanism. Effective July 8, 2022, all eligible CAT including trade transactions with Sri Lanka have been allowed to be settled in any permitted currency outside the ACU mechanism until further notice.

Trade settlements can be made through ACU dollar or ACU euro accounts or through ACU yen accounts, which are replenished through the RBI. Members of ACU can use nostro accounts of the commercial banks of ACU countries, that is, ACU dollar or ACU euro accounts or ACU yen accounts, for settling the payments of both exports and imports. Operations in ACU euro are, however, temporarily suspended since July 1, 2016. Payments to countries in the second group may be made in rupees to the account of a bank of any of these countries or in any permitted currency, and receipts from these countries may be obtained in rupees from banks in any of these countries or in any permitted currency. However, special rules may apply to exports under lines of credit extended by the GOI to the governments of certain foreign countries.

An additional arrangement has been put in place for international trade transactions for invoicing, payment, and settlement in INR.
Controls on the use of domestic currency Yes.

For current transactions and payments Yes. Effective July 11, 2022, there is an additional arrangement for international trade transactions for invoicing, payment, and settlement of exports/imports in INR. Before putting in place this mechanism, AD banks shall require prior approval from the Foreign Exchange Department of RBI, Central Office at Mumbai. Mechanisms are (1) invoicing: all exports and imports under this arrangement may be denominated and invoiced in rupee (INR); (2) exchange rate: exchange rate between the currencies of the two trading partner countries may be market determined; and (3) settlement: the settlement of trade transactions under this arrangement shall take place in INR.

For capital transactions Yes.

Transactions in capital and money market instruments Yes.
Transactions in derivatives and other instruments Yes.
Credit operations Yes.

Use of foreign exchange among residents Yes.

Payments arrangements Yes.

Bilateral payments arrangements Yes.
Operative Yes. India and Russia have a bilateral arrangement for settling Indian exports to Russia in INR.

Inoperative No.

Regional arrangements Yes. India is a member of the ACU.

Clearing agreements Yes. AMU is the common unit of the ACU account. AMU is denominated as ACU dollar, ACU euro, and ACU yen which is equivalent in value to US$1, €1, and ¥1, respectively. Although Bhutan and Nepal are members of the ACU, trade with these countries is settled outside the ACU. At present, trade with the Islamic Republic of Iran is also settled outside the ACU mechanism. In addition to the above, all eligible CAT including trade transactions with Sri Lanka have been allowed to be settled in any permitted currency outside the ACU mechanism until further notice. Transactions with Nepal and Bhutan are settled in Indian rupees. Transactions with Nepal may also be settled in any freely convertible currency if permitted by the Nepal Rastra Bank. Transactions with Islamic Republic of Iran and Sri Lanka may be settled in any freely convertible currency or INR. Transactions with all other ACU members are currently being settled through ACU dollar and ACU yen; however, Myanmar can also settle transactions in any freely convertible currency. All eligible CAT including trade transactions in euro are permitted to be settled outside the ACU mechanism from July 1, 2016, until further notice.

Barter agreements and open accounts No. Presently, there are no barter trade agreements with any country.

Administration of control Yes. Exchange management is administered by the RBI in accordance with the Foreign Exchange Management Act (FEMA), 1999, and the general policy established by the government, in consultation with the RBI. Much of the routine work of exchange control is delegated to authorized persons. Import and export licenses, where necessary,
are issued by the director general of foreign trade.

**Controls on trade in gold (coins and/or bullion)**

On domestic ownership and/or trade  Yes.

Domestic gold sales must be made against up-front payments. Banks may grant gold metal loans. While imports of gold coins and medallions are no longer prohibited, pending further review, the restrictions on banks regarding selling gold coins and medallions have not been removed.

Mutual funds (MFs), namely gold exchange-traded funds (ETFs), may invest in gold and gold-related instruments since 2019. Specified categories of MF schemes are also allowed to participate in Exchange-Traded Commodity Derivatives having gold as underlying.

Effective December 9, 2021, MFs, namely silver ETFs, may invest in silver and silver-related instruments. Specified categories of MF schemes are also allowed to participate in Exchange-Traded Commodity Derivatives having silver as underlying.

On external trade  Yes.

Guidelines related to restrictions/control regarding exports and imports of gold are mentioned in the Foreign Trade Policy (FTP) issued by the Directorate General of Foreign Trade (DGFT), GOI. RBI guidelines in respect of import of gold are as given below:

The 20:80 scheme of import of gold was withdrawn on November 28, 2014. However, the obligation to export under the 20:80 scheme would apply to the unutilized gold imported before November 28, 2014.

Nominated banks and nominated agencies, as notified by the DGFT, are permitted to import gold on consignment basis. In addition to the above, qualified jewelers as notified by International Financial Services Centre Authority (IFSCA) will be permitted to import gold under specific Indian Trade Clarification (Harmonized System) Codes through India International Bullion Exchange IFSC Limited (IIBX).

The status holder exporters must adhere to the guidelines contained in extant FTP, as amended from time to time.

The import of gold coins and medallions is permitted. However, prohibition on sale of gold coins and medallions by banks continues pending further review.

**Controls on exports and imports of banknotes**

On exports  Yes.

Domestic currency  Yes.

Any person resident in India: (1) may take outside India (other than to Nepal and Bhutan) currency notes of GOI and RBI notes up to an amount not exceeding Rs 25,000 a person or such amount and subject to such conditions as notified by the RBI from time to time and (2) may take or send outside India (other than to Nepal and Bhutan) commemorative coins not exceeding two coins each.

Effective December 15, 2021, Indian passport holders as well as persons of Indian origin carrying the Overseas Citizen of India (OCI) Card along with their passports traveling to Gurdwara Darbar Sahib, Kartarpur, Narowal, Pakistan, through the Sri Kartarpur Sahib
Corridor, shall be allowed to carry outside and bring into India at the time of his/her return, only Indian currency notes and/or foreign currency in USD, the total value of which may not exceed Rs 11,000.

In case of travel to Nepal and Bhutan, a person may take or send out of India to Nepal or Bhutan, currency notes of GOI and RBI notes up to the denomination of Rs 100 without any limit.

An individual traveling from India to Nepal or Bhutan can carry RBI notes of Mahatma Gandhi (new) Series of denominations Rs 200 and/or Rs 500 up to a total limit of Rs 25,000.

Any person resident outside India may take out of India unspent foreign exchange not exceeding the amount brought in by him and declared in accordance with the proviso to clause (b) of Regulation 6, on his arrival in India of FEM (Export and Import of Currency) Regulations, 2015.

Effective December 15, 2021, Indian passport holders as well as persons of Indian origin carrying the OCI Card along with their passports traveling to Gurdwara Darbar Sahib, Kartarpur, Narowal, Pakistan, through the Sri Kartarpur Sahib Corridor, shall be allowed to carry outside and bring into India at the time of his/her return, only Indian currency notes and/or foreign currency in USD, the total value of which may not exceed Rs 11,000.

Foreign currency Yes. An AD may transfer abroad foreign currency acquired in the normal course of business. Any person may take out of India:
(1) foreign exchange possessed by him in accordance with the Foreign Exchange Management (FEM) (Possession and Retention of Foreign Currency) Regulations, 2015;
(2) unspent foreign exchange brought back by him to India while returning from travel abroad and retained in accordance with the FEM (Possession and Retention of Foreign Currency) Regulations, 2015.

Any person resident outside India may take out of India unspent foreign exchange not exceeding the amount brought in by him and declared in accordance with the proviso to clause (b) of Regulation 6, on his arrival in India of FEM (Export and Import of Currency) Regulations, 2015.

On imports Yes.

Domestic currency Yes. Any person resident in India who had gone out of India on a temporary visit may bring into India at the time of his return from any place outside India (other than from Nepal and Bhutan), currency notes of GOI and RBI notes up to an amount not exceeding Rs 25,000 a person or such amount and subject to such conditions as notified by the RBI from time to time. In case of Nepal and Bhutan, individuals may bring in currency notes of Rs 100 denomination or less without limit.

Effective December 15, 2021, Indian passport holders as well as persons of Indian origin carrying the OCI Card along with their passports traveling to Gurdwara Darbar Sahib, Kartarpur, Narowal, Pakistan, through the Sri Kartarpur Sahib Corridor, shall be allowed to carry outside and bring into India at the time of his/her return, only Indian currency notes and/or foreign currency in USD, the total value of which may not exceed Rs 11,000.

Foreign currency No. Foreign exchange may be brought in without limit, provided the total amount is declared to the customs authorities on arrival, if the value of foreign exchange in the form of foreign currency notes, bank notes, or traveler’s checks exceeds US$10,000 or its equivalent and/or if the aggregate value of foreign currency notes brought in at any one time exceeds US$5,000 or its equivalent.

Resident Accounts

Foreign exchange accounts permitted Yes.

Held domestically Yes. Exchange earners’ foreign currency (EEFC) account – Foreign exchange earners may open EEFC accounts and credit these accounts with up to 100% of their foreign exchange earnings. EEFC accounts do not earn interest.

Exporters may credit 100% of their foreign exchange earnings to an EEFC account; total accruals in the account during a calendar month must be converted to rupees on or before the last day of the...
subsequent calendar month after adjusting for approved purposes and forward commitments.

Credit may not be made available against the balances in these accounts. Balances may be used for trade-related loans to foreign importers.

Resident foreign currency (RFC) (domestic) account – Residents and their close relatives may hold RFC domestic accounts with an AD. These accounts do not earn interest and may be credited with foreign exchange from the following sources: (1) exports of goods or services, (2) gifts or honoraria while abroad, (3) legal transactions with nonresidents in India, (4) remaining balances from travel abroad, and (5) proceeds of life insurance claims settled in foreign currency. As long as the foreign exchange is acquired by one of these means, there is no limit on the account balance.

RFC account – A person resident in India may open RFC accounts with foreign exchange from pensions and other payments from overseas employers or with other receipts, such as gifts or inheritances, permitted under the regulations. The balance may be used for any permissible purpose and freely abroad.

An AD in India may, subject to the directions as may be issued by the RBI, allow ship-manning/crew managing agencies in India and reinsurance and composite insurance brokers registered with Insurance Regulatory and Development Authority of India (IRDAI) to open and maintain non-interest-bearing foreign currency accounts in India for the purpose of undertaking transactions in the ordinary course of their business.

Diamond dollar account (DDA) – Firms and companies which comply with the eligibility criteria stipulated in the FTP of the GOI may open DDA accounts subject to terms and conditions of DDA scheme laid down in Schedule II of FEMA 10(R).

Indian agent of shipping or airline companies incorporated outside India can maintain foreign currency account in India for meeting the local expenses of the overseas company. The credits permitted to such accounts are freight or passage fare collections in India or from his principal outside India.

Project Offices of foreign companies can open non-interest bearing one or more foreign currency accounts in India for the project to be executed in India subject to certain conditions.

Organizers of international Seminars, Conferences, Conventions, etc., can open temporary foreign currency accounts in India subject to certain conditions.

An exporter who has undertaken a construction contract or a turnkey project outside India or who is exporting services or engineering goods from India on deferred payment terms may open, hold, and maintain a foreign currency account with a bank in India, provided approval as required under the FEM (Export of Goods and Services) Regulations, 2015, as amended from time to time has been obtained for undertaking the contract/project/export of goods or services, and the terms and conditions stipulated in the letter of approval have been duly complied with.

A unit located in a Special Economic Zone (SEZ) may open hold and maintain a foreign currency account with an AD in India to credit all foreign exchange funds received by the unit subject to certain conditions.

An Indian company receiving foreign investment under FDI route in terms of FEM (Non-debt Instruments (NDI)) Rules, 2019, of October 17, 2019, as amended from time to time, may open and maintain a foreign currency account with an AD in India, provided the Indian investee company has impending foreign currency expenditure and
the account is closed immediately after the requirements are completed or within six months from the date of opening of such account, whichever is earlier.

**Approval required**

Yes. RBI approval is required for foreign exchange accounts, held either domestically or abroad, except for those covered by general permission granted by the RBI.

**Held abroad**

Yes. Resident individuals may open and maintain foreign exchange accounts abroad, which may be used to remit up to the equivalent of US$250,000 a financial year for all permissible current and capital account transactions or a combination of both under the liberalized remittance scheme (LRS) of 2015–2016. Specific approval is required for remittances in excess of this limit and for other transactions. In case of Project Exports, AD Bank/Export–Import Bank of India (EXIM) Bank (Approving Authority) may permit exporters to open, maintain, and operate one or more foreign exchange accounts in the currency of their choice with interproject transferability of funds in any currency or country. The transfer of funds between projects is monitored by those issuing the permit/approving the project.

An Indian party (IP) (as defined for overseas direct investment (ODI)) may have a foreign currency account abroad for the purpose of ODI, subject to certain conditions – for example, if the host-country law stipulates that investment must be routed through a designated account. External commercial borrowing (ECB) proceeds meant only for foreign currency expenditure to be kept abroad pending utilization in deposits with overseas branches/subsidiaries of Indian banks abroad.

The following persons can open a foreign currency account with a bank outside India for carrying on normal business and incidental transactions.

- An AD in India with its branch/head office/correspondent outside India.
- A branch outside India of a bank incorporated in India.
- An Indian shipping or airline company.
- Insurance/reinsurance companies registered with IRDAI to carry out insurance/reinsurance business.
- An India firm/company/body corporate in the name of its foreign office/branch or its representative posted outside India.
- An exporter who is exporting services and engineering goods on deferred payment terms or executing a turnkey project or a construction contract abroad.
- A person resident in India who has gone abroad for studies may open a foreign currency account with a bank outside India during his stay abroad subject to certain conditions.
- A person resident in India who is on a visit to a foreign country may open a foreign currency account with a bank outside India during his stay abroad. The balance in the account should be repatriated to India on return of the account holder to India.
- A person going abroad to participate in an exhibition/trade fair may open a foreign currency account with a bank outside India for crediting the sale proceeds of goods. The balance should be repatriated to India within one month from the date of closure of the exhibition/trade fair.

The following persons can open a foreign currency account outside India for remitting/receiving their entire salary payable to him in India.

- A foreign citizen resident in India, being an employee of a foreign company, on deputation to the office/branch/subsidiary/joint venture (JV)/group company in India;
An Indian citizen, being an employee of a foreign company, on
deputation to the office/branch/subsidiary/JV/group company in
India.
A foreign citizen resident in India employed with an Indian company;
Indian start-up, having an overseas subsidiary, may open a foreign
currency account with a bank outside India for the purpose of
crediting to the account the foreign exchange earnings out of
exports/sales made by the said start-up or its overseas subsidiary. The
balances held in such accounts, to the extent they represent exports
from India, must be repatriated to India within the period prescribed
for realization of exports, in FEM (Export of Goods and Services)
Regulations, 2015, of January 12, 2016, as amended from time to
time.

Approval required
Yes.
Certain transactions as well as remittances in excess of specified
limits require approval.

Accounts in domestic currency held
abroad
No.

Accounts in domestic currency
convertible into foreign currency
No.

Nonresident Accounts

Foreign exchange accounts permitted
Yes.
Foreign currency nonresident (FCNR) accounts (Banks-Scheme B)
in freely convertible foreign currency are permitted for nonresident
Indians (NRIs) and people of Indian origin (PIOs). These must be in
the form of term deposits of one- to five-year maturity in any foreign
currency that is freely convertible.
Diplomatic missions and their staff and nondiplomatic staff with
official passports may open foreign exchange accounts with ADs
without RBI approval, subject to certain conditions. Accounts related
to countries other than Bhutan and Nepal are treated as nonresident
accounts. NRIs in Nepal and Bhutan may open foreign exchange
accounts, provided they are funded with permitted foreign exchange.
FDI proceeds may be credited to an FCNR (B) account, provided the
original acquisition was from inward remittance or funds in a
nonresident external (NRE)/FCNR (B) account. Balances may be
repatriated at any time without RBI approval. NRIs may use new
remittances or funds in FCNR accounts for (1) portfolio investment
with repatriation benefits of up to 5% of the paid-up capital, provided
total holdings of shares and convertible debentures under the
Portfolio Investment Scheme (PIS) do not exceed 10% (24% with a
special board resolution passed at a general meeting of the company)
of the paid-up capital of the company or of the total paid-in value of
each series of its convertible debentures; (2) existing JV companies
to raise the ratio of foreign equity shares to prescribed percentages of
their capital through expansion of their capital base or through
preferential allocation of shares to foreign investors; and (3)
investment (only NRIs) on a non-repatriation basis in money market
MFs.
The interest rate ceiling on FCNR (B) deposits of maturities between
one and three years is Overnight Alternative Reference Rate (ARR)
for the respective currency/Swap plus 250 bps, and for maturities
between three and five years, is Overnight ARR for the respective
currency/Swap plus 350 bps.
Banks may grant loans, in rupees and foreign exchange, against
FCNR (B) fixed deposits to the depositors or to third parties without
limit, subject to margin requirements.
Residents may be joint holders in FCNR accounts. NRIs and PIOs
may open FCNR (B) accounts with a resident close relative(s) as
joint holder(s) on a “former or survivor” basis.
Borrowing not exceeding US$250,000 or its equivalent by residents from close relatives outside India of the borrower is permitted by the RBI, provided the loan is interest-free and the minimum maturity is one year, subject to certain conditions. AD Category-I banks may allow repayment of such loans to the NRE/FCNR (B) account of the lender concerned, subject to conditions.

Approval required  
No.

Domestic currency accounts  
Yes.

Convertible into foreign currency  
Yes.

Diplomatic missions and their personnel and family members may open rupee accounts with ADs. Foreign companies may not open new NRE accounts. NRIs and PIOs may maintain NRE rupee accounts with a resident close relative(s) as joint holder(s) on a “former or survivor” basis.

The interest rates offered by banks on NRE deposits may not exceed those offered by them on comparable domestic rupee deposits. FDI proceeds may be credited to an NRE account, provided the original acquisition was from inward remittance or funds held in an NRE/FCNR (B) account. Balances may be repatriated at any time without RBI approval. NRIs may use funds from new remittances or in their NRE accounts for (1) portfolio investments with repatriation benefits of up to 5% of the paid-up capital, provided their total holdings of shares and convertible debentures under the PIS do not exceed 10% (24% with a special board resolution passed at a general meeting of the company) of the paid-up capital of the company or of the total paid-in value of each series of its convertible debentures; (2) existing JV companies to raise the ratio of foreign equity shares to prescribed percentages of their capital through expansion of their capital base or preferential allocation of shares to foreign investors; and (3) investment on a non-repatriation basis in money market MFs (only NRIs).

Balances in such accounts are freely convertible. Banks may freely set their interest rates on savings deposits and term deposits with maturities of one year or more. However, interest rates may not exceed those offered on comparable domestic rupee deposits. Gifts to NRIs may be credited to nonresident ordinary (NRO) accounts in rupees. Residents may make rupee gifts up to US$250,000 a financial year, as permitted under the LRS to an NRI or PIO who is a close relative through a cross-checked/electronic transfer to an NRO account. NRIs may transfer funds from NRO accounts within the overall ceiling of US$1 million a financial year subject to payment of applicable taxes (that is, when the funds are remitted abroad).

Any person resident outside India, having a business interest in India, may open a special nonresident rupee account (SNRR account) with an AD for the purpose of putting through bona fide transactions in rupees, not involving any violation of the provisions of the Act, rules and regulations made thereunder. Scope of “SNRR” has been enhanced by allowing persons residing outside India to open such accounts for purposes like ECBs in INR; Trade Credits (TCs) in INR; Trade (Export/Import) Invoicing in INR; and Business-related transactions outside International Financial Service Centre by International Financial Service Centre units at GIFT city.

Approval required  
No.

These accounts require RBI approval if they are in the name of Pakistan or Bangladesh nationals – even those of Indian origin.

Blocked accounts  
No.
## Imports and Import Payments

</tbody>
</table>
Import licenses and other nontariff measures: Yes.

These are decided by the GOI from time to time.

Positive list: No.

Under FTP, 2015–2020, there is no term as Positive list.

Negative list: Yes.

Under FTP, 2015–2020, there is no term as Negative list. However, goods whose import policy is “Restricted” require an authorization/license from DGFT for import. Goods whose import policy is “Prohibited” are not permitted to be imported.

Open general licenses: No.

As per Indian Trade Clarification based on Harmonized System of Coding classification, there is no terminology called OGL. There are some items which are “free” for import/export, but subject to conditions stipulated in other Acts or in law for the time being in force.

Licenses with quotas: No.

The license/authorization are issued to an importer indicating the quantity of the item with unit of measurement (UOM) which may vary from the quantity indicated by the importer in its application.

Other nontariff measures: Yes.

Import taxes and/or tariffs: Yes.

Import tariffs:

To provide a level playing field for increased domestic value addition, keep cost of manufacturing under check, and ensure that as far as possible there are no duty inversions in the structure, customs rate structure has built in progression, with basic raw materials at the low rates, intermediates at medium rates, and final consumption goods at peak rate or higher rates.

Effective February 1, 2021, the important duty changes made in the 2021–2022 budget include:

(1) Customs duty has been reduced uniformly to 7.5% on semis, flat, and long products of non-alloy, alloy, and stainless steels. Customs duty on steel scrap is being exempted for a period up to March 31, 2022. Customs duty on copper scrap is being reduced from 5% to 2.5%; steel screws and plastic builder wares duty increases from 10% to 15%.

(2) Basic customs duty rates on caprolactam, nylon chips, and nylon fiber and yarn are being reduced uniformly to 5%.

(3) Customs duty on naphtha has been reduced from 4% to 2.5% and increased to 7.5% on bisphenol A and epichlorohydrin.

(4) Custom duty on gold and silver is being rationalized to bring it closer to previous levels.

(5) Customs duty is being raised from 5% to 20% on solar invertors and 5% to 15% on solar lanterns.

(6) Customs duty on certain auto parts is also being raised to 15%.

(7) Exemption on tunnel boring machine has been withdrawn. It attracts customs duty of 7.5%. Its parts will attract a duty of 2.5%.

(8) Customs duty on prawn feed increased from 5% to 15%.

(9) Customs duty on raw cotton and cotton waste increased from nil to 10%.

(10) Customs duty on raw silk and silk yarn increased from 10% to 15%.

(11) Rates have been calibrated on items such as maize bran, rice bran oil cake, and animal feed additives uniformly to 15%.

In line with this, over the years, duty on:

(1) basic raw materials such as crude petroleum oil, man-made
fibers, filament yarns, purified terephthalic acid, monoethylene glycol, dimethyltryptamine (DMT), iron or steel melting scrap, aluminum scrap, and other metal scraps have been kept at the lower slabs of customs duty, that is, nil, 2.5%, or 5%.

(2) intermediate goods such as chemicals, major plastics, and refractories primary polymers and capital goods have been kept at 7.5%.

(3) specified iron and steel products attract 7.5% (effective February 1, 2021, decreased from 10% and 12.5%).

(4) final consumption goods and all other non-agricultural goods in general have been kept at peak rate of 10%.

There are certain exceptions to the peak rate of 10% with certain manufactured goods attracting customs duty on the higher side, including:

1. Cosmetics [20%],
2. Truck and bus radial tires [15%],
3. Footwear [35%],
4. Precious metal jewelry [20%],
5. LCD/LED TVs [20%],
6. Panels for LCD/LED TVs [15%],
7. Mobile phones [20%],
8. Specified automobile parts [15%],
9. Motor vehicle in completely-built-up form [60%/100%],
10. Smart watches and similar wearable devices [20%],
11. Furniture [25%],
12. Wristwatches, pocket watches, alarm clocks, clocks [20%],
13. Toys [60%],
14. Man-made fiber fabrics, apparels, and made-ups [20%],
15. Industrial freezers and refrigerators, water coolers, etc. [15%],
16. Glassware, tableware, and kitchenware of steel, copper, aluminum, and ceramic [20%],
17. Padlocks and locks of base metals [20%],
18. Household appliances such as ceiling fans, food grinders, shavers, hair dryers, water heaters, toasters, and coffee and tea makers [20%],
19. Office stationary and furniture such as filing cabinets, paper trays, paper rests, letter clips, and name plate [20%].

Effective February 2, 2022, other important changes made in the 2022–2023 budget include:

1. Customs duty on fisheries product such as Atlantic Salmon and Live Black tiger shrimp has been reduced to 10%, whereas, on Frozen Krill, Frozen Mussels, and Frozen Squids customs duty has been reduced to 15%.
2. Customs duty on fuel oil, straight run fuel oil, low sulfur wax residue, vacuum residue, slurry, and vacuum gas oil reduced to 2.5%.
3. Customs duty on sodium cyanide has been increased to 10%.
4. Customs duty on methyl alcohol and acetic acid has been reduced to 2.5% and 5%, respectively.
5. Customs duty on recovered (waste and scrap) paper or paperboard imported for manufacture of paper, paperboard, or newsprint has been increased to 2.5%.
6. Customs duty on umbrellas and sun umbrellas has been increased to 20%.
(7) Customs duty on cut and polished diamonds and cut and polished natural gemstones has been decreased to 5%.
(8) Customs duty on S. G ingot castings for use in the manufacture of plastic processing machineries has been reduced to 7.5%.
(9) Customs duty on linear motion guides and ball screws for use in the manufacture of plastic processing machineries has been reduced to 5%.
(10) Customs duty on camera lens for use in manufacture of camera module of cellular mobile phone has been reduced to 2.5%.
(11) Customs duty on specified parts of transformers for use in manufacture of chargers/adapters has been reduced to 5%.
(12) Customs duty on specified parts of X-ray machines for medical, surgical, dental, or veterinary use has been increased to 10%.
(13) Customs duty on X-ray machines for medical, surgical, dental, or veterinary use has been increased to 10%.
(14) Customs duty on parts of electronic toys used in the manufacture of electronic toys has been increased to 25%.

Taxes collected through the exchange system
State import monopoly
Yes. Import policy of certain items is canalized through the state trading enterprises. DGFT may, however, grant an authorization to any other person to import or export any of the goods notified for exclusive trading through state trading enterprises.

Exports and Export Proceeds

Repatriation requirements
Yes. The period of realization and repatriation of export proceeds is nine months from the date of export, and it includes all exporters, including units in SEZs, status holder exporters, Export Oriented Units (EOUs), units in electronic hardware technology parks (EHTPs), software technology parks (STPs), and biotechnology parks (BTPs). Exporters must obtain permission from an AD if the export proceeds are not collected within the prescribed period. ADs may extend the period of realization of export proceeds beyond the stipulated period of realization from the date of export up to six months at a time, regardless of the invoice value of the export, subject to conditions. In case of goods exported to Indian-owned warehouses established outside India, the proceeds must be realized within 15 months from the date of shipment of goods. The RBI also administers a program referred to as “Project Exports” under which engineering goods may be exported under deferred payment terms. Project Export also includes execution of turnkey projects and civil construction contracts aboard. Indian exporters are required to obtain the approval of AD Category-I banks/EXIM Bank at post-award stage before undertaking execution of such contracts.

On May 22, 2020, the extension of the repatriation period from nine to fifteen months for exports made up to or on July 31, 2020, has expired.

Surrender requirements
Yes.

Surrender to the central bank
No.

Surrender to authorized dealers
Yes. Exporters may credit 100% of their foreign exchange earnings to an EEFC account; total accruals in the account during a calendar month must be converted to rupees on or before the last day of the subsequent calendar month after adjusting for approved purposes and forward commitments. Status holder exporters may write off outstanding export proceeds up
ADs may allow reduction in the export invoice value in case of normal exporters, provided the reduction does not exceed 25% of the invoice value, subject to regulatory conditions. In case of exporters who have been in the export business or more than three years, reduction in invoice value may be allowed, without any percentage ceiling, subject to regulatory conditions.

**Financing requirements**
No.

**Documentation requirements**
Yes.

Under the Export Data Processing and Monitoring System, exports of goods and services must be declared, irrespective of the invoice value. To facilitate e-commerce, guidelines for facilitating export receivables and import payables are made through online payment gateway service providers.

For third-party payments, with a view to further liberalizing the procedure relating to payments for exports/imports and taking into account evolving international trade practices, according to A.P. (DIR Series) Circular No. 70 of November 8, 2013, AD banks may allow payments for export of goods/software to be received from a third party (a party other than the buyer) subject to the following conditions: (1) The firm irrevocable order must be backed by a tripartite agreement. (2) Third-party payment must be through the banking channel after taking into consideration the FATF statement of the country. (3) The exporter must declare the third-party remittance on the export declaration form. (4) It is the responsibility of the exporter to realize and repatriate the export proceeds from the third party named in the export declaration form. (5) Reported outstanding amounts, if any, in the export outstanding statement must continue to be shown in the name of the exporter. However, instead of the name of the overseas buyer, the name of the declared third party must appear in the export outstanding statement. (6) Payments for shipments to a country in Group II of restricted cover countries (for example, Somalia, Sudan) may be received from an open cover country.

AD Category-I banks may allow exporters with at least a three-year satisfactory track record to receive long-term export advances up to a tenor of 10 years for execution of long-term supply contracts for exports of goods, subject to certain conditions mentioned therein. Further, the condition that exporters and importers must have a “firm irrevocable order backed by a tripartite agreement” is not applicable if there is documentary evidence of third-party payments/name of the third party mentioned in the irrevocable order/invoice. The following conditions apply: (1) The AD bank must be satisfied with the bona fides of the transaction and export documents, such as invoice/foreign inward remittance certificate (FIRC), and (2) the AD bank must consider the FATF statements while handling such a transaction.

**Export licenses**
Yes. These are subject to the FTP.
Without quotas: Yes.
With quotas: Yes.

**Export taxes**
Yes. These are decided by the GOI from time to time.

Collected through the exchange system: No.

Other export taxes: Yes.

Ad valorem export duties (%) apply as follows:
1. Snakeskin, raw fur, and lambskin, 10%.
2. Cycle saddle, hydraulic/packing, belting/washer, picking band, and strap/combing leather, 15%.
3. Leather for luggage, cases, and handbags, 25%.
4. Other hides, skins, and leathers, tanned and untanned, excluding manufactures, 40%.
5. Iron ores and concentrates (having Fe content more than 58%), 30%.
6. Chrome and concentrates, 30%.
7. Iron ore pellets, 45%.
8. Pig iron and spiegeleisen in pigs, blocks or other primary forms, 15%.
9. Flat-rolled products of iron or non-alloy steel, hot-rolled, not clad, plated or coated, 15%.
10. Flat-rolled products of iron or non-alloy steel, cold-rolled (cold reduced), not clad, plated or coated, 15%.
11. Flat-rolled products of iron or non-alloy steel, of a width of 600 mm or more, clad, plated or coated, 15%.
12. Bars and rods, hot-rolled, in irregularly wound coils, of iron or non-alloy steel, 15%.
13. Other bars and rods of iron or non-alloy steel, not further worked than forged, hot-rolled, hot-drawn or hot-extruded, but including those twisted after rolling, 15%.

import of goods and services by credit to ACU dollar account and/or ACU euro account and/or ACU yen account in India of a bank of the member country in which the other party to the transaction is resident or by debit to the ACU dollar account and/or ACU euro account and/or ACU yen account of the AD maintained with the correspondent bank in that member country; payment in any freely convertible currency in all other cases; payment may be in freely convertible currency or through ACU mechanism for imports from Myanmar; in case of Nepal and Bhutan, payment may be in rupees. In case of Iran, payment for import in any freely convertible currency and/or in accordance with RBI directions; in all other cases as per RBI directions. Further, effective July 11, 2022, an additional arrangement has been put in place for international trade transactions for invoicing, payment, and settlement in INR. Before putting in place this mechanism, AD banks shall require prior approval from the Foreign Exchange Department of RBI, Central Office at Mumbai. Mechanisms are (1) invoicing: all exports and imports under this arrangement may be denominated and invoiced in rupee (INR); (2) exchange rate: exchange rate between the currencies of the two trading partner countries may be market determined; and (3) settlement: the settlement of trade transactions under this arrangement shall take place in INR. (b) For all other countries (other than ACU countries), payment in rupees from account of a bank situated in any country other than a member country of the ACU or payment in any freely convertible currency. In addition to the above, effective July 8, 2022, all eligible CAT including trade transactions with Sri Lanka have been allowed to be settled in any permitted currency outside the ACU mechanism until further notice. (c) Payment for import to be made to third party is permitted as per RBI guidelines as per A.P. (DIR Series) Circular No. 70 of November 8, 2013. (d) Payment for import may be made through international card in rupees from international credit card (ICC)/debit card through the credit/debit card servicing bank in India against the charge slip signed by the importer as prescribed by Reserve Bank from time to time subject to regulatory conditions. Payment for import may also be made by credit to SNRR account maintained by the overseas seller in India. These guidelines are specified under Notification No. FEMA 14(R)/2016-RB of May 2, 2016. (4) Settlement of export and import transactions where the invoicing is in a freely convertible currency and the settlement takes place in the currency of the beneficiary, which though convertible does not have a direct exchange rate, is permitted subject to regulatory requirements. These guidelines are specified in A.P. (DIR Series) Circular No. 42 of February 4, 2016.

Prior approval

No.

Quantitative limits

No.

Indicative limits/bona fide test

Yes. Remittances by persons other than individuals must require prior approval of the RBI if remittances exceed US$10,000,000 a project for any consultancy services in respect of infrastructure projects and US$1,000,000 a project for other consultancy services procured from outside India. In case of import payment through online payment gateway service providers, the facility is available for import of goods and software if the value is not exceeding US$2,000.

Investment-related payments

Yes.

Prior approval

No.
Quantitative limits | No.
---|---
Indicative limits/bona fide test | Yes.

Remittances are allowed, subject to certain conditions, provided all current taxes and other liabilities have been cleared. Branches of foreign companies operating in India may remit profits to their head offices without RBI approval, subject to payment of applicable taxes and other liabilities.

Payments for travel | Yes.
Prior approval | No.
Quantitative limits | Yes.

An overall LRS limit of US$250,000 a financial year applies to individuals for permitted current and capital account transactions. The LRS includes all exchange and remittance facilities, including private/business visits for CAT available to resident individuals. No such limits apply to payments made with an ICC issued by overseas banks and other reputed agencies. Foreign exchange is not made available for travel to Bhutan or Nepal or for transactions with residents of these countries. ADs and Full Fledged Money Changers may release the full amount of the basic travel quota entitlement in cash or up to the cash limit specified by the Hajj Committee of India, to Hajj/Umrah pilgrims.

Indicative limits/bona fide test | Yes.

ADs may release foreign exchange beyond indicative limits, where applicable, with RBI approval, on verification of purpose.

Personal payments | Yes.

Resident individuals may remit up to US$250,000 a financial year for any permitted current or capital account transaction or a combination of both under the LRS. Application cum Declaration for purchase of foreign exchange under the LRS of US$250,000 is clubbed with Form A2 to reduce multiplicity of forms to be filled in by the customers.

Prior approval | No.
Quantitative limits | Yes.

The LRS limit available to individuals is US$250,000 for permitted current and capital account transactions. LRS exchange/remittance facilities for CAT include remittance for private visits; business visits; gifts or donations; travel abroad for employment; emigration; maintenance of close relatives abroad; expenses in connection with medical treatment abroad; and studies abroad. However, for items such as emigration, expenses in connection with medical treatment abroad and studies abroad, individuals may obtain exchange facility for an amount exceeding the overall limit prescribed under the LRS, if required by the country involved, medical institute offering treatment or the university, respectively. Gifts in Indian rupees by resident individuals to NRI relatives as defined in the Companies Act, 2013, are also subsumed under the LRS limit.

A person who is resident but not permanently resident in India and is a citizen of a foreign country other than Pakistan or a citizen of India who is on deputation to the office or branch of a foreign company or subsidiary or JV in India of such foreign company may remit funds up to the net salary (after taxes, contribution to provident fund, and other deductions).

A resident individual may also carry out other permissible CAT (transactions not explicitly prohibited under Schedule I, or are restricted under Schedules II and III, to FEM CAT Rules, 2000, as amended) without any limits through an AD bank in India subject to verification of the bona fide of the transaction.

Indicative limits/bona fide test | No.

A person other than an individual may also obtain foreign exchange for gifts and donations, within the limit prescribed under the LRS.

Foreign workers' wages | No.

Restrictions on use of funds: Yes. EEFC accounts do not earn interest.

Capital Transactions

Controls on capital transactions: Yes. The FEM (NDI) Rules, 2019, of October 17, 2019, issued by the Central Government, regulate investments in India by person resident outside India. FEM (Mode of Payment and Reporting of NDI) Regulations, 2019, of October 17, 2019, issued by the RBI regulates mode of payment and reporting requirements for investment in India by a person resident outside India. The FEM (Debt Instruments) Regulations, 2019, regulate investments in India by a person resident outside India, with respect to debt instruments. On October 17, 2019, the FEM (transfer or issue of security by a person resident outside India) Regulations, 2017, has been superseded by the FEM (NDI) Rules, 2019, and FEM (Debt Instruments) Regulations, 2019.

Repatriation requirements: Yes. Investments made under the NDI Rules by persons resident outside India are in general repatriable, except those made by NRIs/OCIs under Schedule IV.

Surrender requirements: Yes.

Surrender to the central bank: No.

Surrender to authorized dealers: Yes.

Controls on capital and money market instruments: Yes.

On capital market securities: Yes.

Shares or other securities of a participating nature: Yes.

Purchase locally by nonresidents: Yes.

A person resident outside India may purchase equity instruments (equity shares; compulsory convertible debentures (CCDs); compulsorily convertible preference shares; share warrants; and partly paid-up shares) issued by an Indian company in permitted sectors subject to entry route, sectoral cap/regulatory limits, and other attendant conditionalities. (The term “capital instruments” have been replaced with “equity instruments” in NDI Rules, 2019.) Foreign Portfolio Investors (FPIs) must register with the Securities and Exchange Board of India (SEBI) before they invest in the Indian capital market. (All categories of foreign institutional investors (FIIs) and subaccounts are merged into a single investor type, FPI.) Registered FPIs may invest in permissible equity and/or debt securities issued by an Indian company whose equity and/or debt is listed on recognized stock exchanges in India. Details of securities in which FPIs can invest are also provided in the SEBI (Foreign Portfolio Regulations), 2019. (NDI Rules and Debt Instruments Regulations are issued separately.)

The holdings of a single FPI or FPI group in an Indian company must be less than 10% of total paid-up capital on fully diluted basis. The
aggregate limit for foreign investment by FPIs is the sectoral cap applicable to the investee company as laid out in paragraph 3(a)(iii) of Schedule I of the Non-debt Rules. However, the aggregate limit could be decreased by the Indian company to a lower threshold limit of 24% or 49% or 74% as deemed fit, with the approval of its Board of Directors and its General Body through a resolution and a special resolution, respectively, before March 31, 2020. The Indian company which has decreased its aggregate limit to 24% or 49% or 74% may increase such aggregate limit to 49% or 74% or the sectoral cap or statutory ceiling, respectively, as deemed fit, with the approval of its Board of Directors or its General Body through a resolution and a special resolution, respectively.

NRIs and OCIs may invest in equity instruments. Individual NRIs and OCIs may purchase equity instruments of Indian companies listed on the stock exchange, up to 5% of the paid-up capital on fully diluted basis of the Indian company. The aggregate limit for investment by all NRIs and OCIs may not exceed 10% of the paid-up capital on fully convertible basis of the Indian company. This limit may be raised to 24% through a special resolution passed by the Board of Directors followed by an extraordinary general meeting. Nonresidents, including NRIs and OCIs, may invest in equity instruments of a listed Indian company on the stock exchange through a registered broker under the FDI scheme, provided they have already acquired and continue to hold control in accordance with SEBI (Substantial Acquisition of Shares and Takeover) regulations. Pricing norms for transfer of equity instruments between residents and nonresidents for listed companies must comply with SEBI’s guidelines and for unlisted companies internationally accepted pricing methodology for valuation of shares done on arm’s length basis.

A person resident outside India (other than a citizen of Pakistan or Bangladesh) or an entity incorporated outside India (other than an entity in Pakistan or Bangladesh), not being a FPI or Foreign Venture Capital Investor registered in accordance with SEBI guidelines, may contribute foreign capital either by way of capital contribution or by way of acquisition/transfer of profit shares in the capital structure of a Limited Liability Partnership, subject to the terms and conditions as specified in Schedule VI of the FEM (NDI) Rules, 2019.

Equity instruments of Indian companies held by nonresidents under an FDI arrangement may be sold on the stock exchange. Transfers to residents under private arrangements (off market) do not require RBI permission and may be handled by authorized banks in accordance with the requirements in the regulations, including pricing and reporting requirements. Transfers of sale proceeds are permitted, subject to payment of applicable tax, provided no controls were imposed on the repatriation of sale proceeds at the time of the original investment. Transfers between two nonresidents generally do not require any approval, except for the sector where the investment is under Government route.

Sale or issue locally by nonresidents: Yes.

NDI Rules permit disinvestment by persons resident outside India subject to pricing guidelines and reporting requirements. However, there is no provision for issue of stocks by nonresidents under the said Rules.

Purchase abroad by residents: Yes.

Resident individuals may remit abroad up to the equivalent of US$250,000 a financial year for any permissible capital transaction under LRS.

General permission has been granted by the RBI to residents to hold, own, transfer, or invest in foreign currency or foreign securities.
outside India, if the currency or security was acquired or held by the person while residing outside India or received through inheritance from a person residing outside India.

SEBI-registered venture capital funds and AIFs may invest in equity and equity-linked instruments of foreign venture capital undertaking, subject to an overall limit of US$1,500 million (increased from US$750 million, effective May 21, 2021) and SEBI regulations. Individual venture capital fund/AIF limits are set by the SEBI, subject to its terms and conditions. Residents may invest in companies listed or otherwise abroad on recognized stock exchanges up to an overall limit of US$250,000 in a financial year under the LRS. A listed Indian company may invest in (1) shares of an overseas company listed on a recognized stock exchange and (2) rated bonds/fixed-income securities issued by companies in up to 50% of its net worth on the date of its latest audited balance sheet.

ADs may allow remittances by resident employees of foreign companies and their JVs or wholly owned subsidiaries (WOS) in which the foreign company holds equity, either directly or indirectly, for acquisition of shares of the foreign company under an employee stock option plan, subject to certain conditions. ADs may also allow remittances from resident individuals for acquisition of qualified shares for the position of director in the overseas company according to the laws of the host country. The limit of these remittances is within the overall ceiling prescribed for resident individuals under the LRS in effect at the time of acquisition. Resident individuals may acquire shares of a foreign entity in part/full consideration of professional services rendered to the foreign company or in lieu of director’s remuneration within the overall ceiling under the LRS in effect at the time of acquisition.

**Sale or issue abroad by residents**

Yes.

An Indian company may raise capital by issue of depository receipts including global depositary receipts (GDRs) with the underlying of an eligible instrument under Schedule IX of FEM (NDI) Rules, 2019, notified on October 17, 2019.

**Bonds or other debt securities**

Yes.

RBI introduced measures to further diversify and expand the sources of foreign exchange funding so as to mitigate volatility and dampen global spillovers, to enhance foreign exchange inflows while ensuring overall macroeconomic and financial stability. Effective July 6, 2022, nonresidents registered as FPIs and NRIs/OCI are allowed to participate in Indian debt markets.

(1) FPI Investment:

FPIs are permitted to invest in the Indian debt market through the following routes:

(a) Medium-Term Framework:

FPIs are permitted to invest in Central Government Securities (up to 6% of outstanding stock), State Development securities (referred to as State Development Loans (SDLs); 2% of the outstanding stock) and corporate bonds (15% of the outstanding stock), subject to certain macroprudential restrictions. Investment by FPIs in financial instruments involving companies facing financial distress have been exempted.

(b) Voluntary Retention Route (VRR):

To facilitate long-term investment in the debt market, FPIs are also permitted to invest in government securities (including treasury bills) and corporate debt (including commercial paper (CP)) without any macroprudential restrictions, provided they commit to retain at least 75% of their committed funds in India for a period of more than three years. Effective April 1, 2022, the investment limit under the VRR for investment in government and corporate debt securities by FPIs is...
increased by Rs 100,000 crore to Rs 250,000 crore.
(c) Fully Accessible Route (FAR):
FPIs have, since April 2020, been allowed to invest in certain
specified central government securities without any limits or
restrictions. All new issuances of Government securities of 5-year,
10-year and 30-year tenors from the financial year 2020–2021 will
be eligible for investment under the FAR. Effective July 7, 2022, the
able central government securities under FAR has been
augmented to include central government securities of 7-year and 14-
year issuances.

(2) Investment by NRI/OCI:
NRIs/OCIs, subject to criteria, are permitted to purchase debt
securities, viz., Government Securities, units of domestic MFs or
ETFs which invest less than or equal to 50% in equity, National
Plan/Saving Certificates, bonds issued by Public Sector Undertaking
in India and infrastructure debt funds, bonds issued by banks which
are eligible for inclusion in regulatory capital and listed
bonds/debentures/redeemable preference shares issued pursuant to
merger/demerger/amalgamation of Indian companies.

Sale or issue locally by nonresidents
Yes. Nonresidents are generally not permitted to issue their debt securities
in India. Only few Multilateral Financial Institutions such as
International Finance Corporation (IFC) and Asian Development
Bank (ADB) have been permitted to issue debt securities in India.

Purchase abroad by residents
Yes. Resident individuals may remit abroad up to the limit equivalent of
US$250,000 a financial year for any permissible capital transaction
under the LRS.

Sale or issue abroad by residents
Yes. Debt Securities can be issued abroad under the ECBs framework
subject to the following guidelines:
(1) Currency of borrowing: Foreign-currency-denominated (freely
convertible) ECB and rupee-denominated ECB.
(2) Amount: effective July 6, 2022, eligible borrowers can raise up to
US$1.5 billion (temporarily increased from US$750 million) or
equivalent a financial year under the automatic route for ECBs to be
raised until December 31, 2022, and any higher amounts under
approval route. The same has been enabled vide A.P. (DIR Series)
Circular No. 11 dated August 1, 2022.
(3) Eligible Borrowers: All entities eligible to receive FDI.
Additionally, Port Trusts, Units in SEZ, SIDBI, EXIM Bank,
registered entities engaged in micro-finance activities can also
borrow under this framework.
(4) Recognized Lender: The lender should be resident of FATF or
IOSCO compliant country. Multilateral and Regional Financial
Institutions, Individuals (if they are foreign equity holders), and
foreign branches/subsidiaries of Indian banks can also be lenders.
(5) End-use: Negative end-use list which includes real estate
activities, investment in capital market, equity investment, working
capital purposes, general corporate purposes, repayment of rupee
loans, and on-lending for the above activities.
(6) All-in-Cost ceiling:
For Foreign currency ECB:
Benchmark Rate plus 550 bps spread: For existing ECBs linked to
LIBOR whose benchmarks are changed to ARR.
Benchmark rate plus 500 bps spread: For new ECBs.

For INR ECB:
Benchmark rate plus 450 bps spread.
(All-in-cost ceiling has been temporarily increased by 100 bps for
ECBs raised until December 31, 2022. The enhanced all-in-cost ceiling shall be available only to eligible borrowers of investment-grade rating from Indian Credit Rating Agencies. Other eligible borrowers may raise ECB within the existing all-in-cost ceiling as hitherto.

Benchmark rate: Benchmark rate in case of Foreign currency ECB/TC refers to any widely accepted interbank rate or ARR of 6-month tenor, applicable to the currency of borrowing. Benchmark rate in case of Rupee denominated ECB/TC will be prevailing yield of the GOI securities of corresponding maturity.

(7) Minimum average Maturity and Corresponding end-use: Under the extant ECB framework ECB can be raised for a minimum average maturity period (MAMP) of three years. However, the following exceptions are provided to the above end-use and MAMP requirements as given below:

1. Manufacturing sector companies can raise ECBs with MAMP of one year for ECB up to US$50 million or its equivalent a financial year.
2. ECB with MAMP five years can be raised from foreign equity holder for working capital purposes, general corporate purposes, or repayment of rupee loans.
3. ECBs for repayment of rupee loans, working capital purposes, and general corporate purposes from all eligible ECB lenders (except foreign branches/overseas subsidiaries of Indian banks) with a higher MAMP of 7/10 years.
4. ECBs for repayment of rupee loans availed domestically for capital expenditure in manufacturing and infrastructure sector if classified as Special Mention Account – 2 or Non-performing assets, under any one-time settlement and selling of such loans through assignment to ECB lenders. Such ECBs can be availed from all recognized lenders except foreign branches/overseas subsidiaries of Indian banks.

On money market instruments

Yes.

Purchase locally by nonresidents

Yes. Nonresidents registered as FPIs and NRIs/OCIs are allowed to participate in Indian debt markets.

FPIs are permitted to invest in short-term treasury bills (91 days, 182 days, and 364 days) under the MTF and VRR route. FPIs are generally not permitted to invest in corporate money market instruments. FPIs have been permitted to invest in CP under the VRR.

NRIs/OCIs, subject to criteria, are permitted to purchase (1) short-term treasury bills (91 days, 182 days, and 364 days) and (2) units of domestic MFs or ETFs that invest less than or equal to 50% in equity.

Sale or issue locally by nonresidents

Yes. Nonresidents are generally not permitted to issue their money market securities in India.

Purchase abroad by residents

Yes. AD Category-I banks can invest in prescribed money market instruments in overseas markets up to the limits approved by their board. Such investments may be made in overseas money market instruments and/or debt instruments issued by a foreign state with a residual maturity of less than one year and rated at least as AA (-) by Standard & Poor/FITCH IBCA or Aa3 by Moody’s. The Reserve Bank has not prescribed any separate limits for the residents to invest in money market instruments. However, as per Notification No. FEMA.120/RB-2004 of July 7, 2004, as amended from time to time, a person resident in India, being a listed Indian
company, may invest in (1) the shares of an overseas company which is listed on a recognized stock exchange and (2) the rated bonds/fixed-income securities issued by companies at Point (1) above, provided investment by a listed Indian company may not exceed 50% of its net worth as on the date of its last audited balance sheet.

Further, MFs and AIFs registered with SEBI may invest within the specified limits, subject to the terms and conditions prescribed by SEBI. Approvals are given by SEBI, within the overall limits decided from time to time in consultation with the RBI.

Further, under LRS, a resident individual can remit funds overseas to invest in money market securities up to the overall limit specified under LRS of US$250,000 in a financial year. For remittance beyond this amount, RBI permission is required.

Effective June 3, 2021, MFs registered with SEBI are permitted per MF to invest abroad up to a maximum of US$1 billion (previously US$300 million a MF), within the overall industry limit of US$7 billion. Investments are permitted in: (1) American depository receipts (ADRs)/GDRs of Indian and foreign companies; (2) equities of overseas companies listed on recognized overseas stock exchanges, including initial and follow-up public; (3) foreign investment-grade debt securities in countries with fully convertible currencies; (4) money market investment-grade investments, including repos with investment-grade counterparties; (5) G-Secs of countries rated at investment grade; (6) derivatives traded on recognized overseas stock exchanges, but only for hedging and portfolio balancing purposes; (7) short-term deposits with overseas investment-grade banks; and (8) units/securities issued by overseas MFs or unit trusts registered with overseas regulators.

| Sale or issue abroad by residents | Yes. | These transactions are not permitted. |
| On collective investment securities | Yes. | Resident companies require general or specific permission from the RBI to issue securities to NRIs. |
| Purchase locally by nonresidents | No. | These transactions by FPIs do not require RBI approval. |
| Sale or issue locally by nonresidents | Yes. | The issuance of collective investment securities by nonresidents on local markets in India is permitted subject to certain conditions. |
| Purchase abroad by residents | Yes. | Resident individuals may remit abroad up to the limit equivalent of US$250,000 a financial year for any permissible capital transaction under the LRS. |
| Sale or issue abroad by residents | Yes. | Resident companies require general or specific permission from the RBI to issue securities to NRIs. |
| Controls on derivatives and other instruments | Yes. | |
| Purchase locally by nonresidents | Yes. | (1) Foreign Exchange Derivatives: Nonresident entities can deal with exchange-traded and deliverable foreign exchange derivatives involving INR for the purpose of hedging only. Nonresidents can deal with non-deliverable foreign exchange derivatives without any restriction in terms of purpose. |
| | | (2) Interest Rate Derivatives: Nonresidents can deal with interest rate derivatives (OTC and exchange traded) for the purpose of hedging exposure to rupee interest rate risk. FPIs are also permitted to take long position in Interest Rate Futures (IRFs), subject to limits (Rs 5,000 crore or US$625 million approximately). Additionally, they are permitted to participate in the Rupee Overnight Indexed Swap (OIS) market without any restriction in terms of purpose. |
(3) Credit Derivatives: In terms of the regulatory framework revised in 2022, FPIs can deal with credit derivative swaps as both buyers and sellers.

(4) FPIs are allowed to invest in stock derivatives, stock index derivatives, IRF, and currency derivatives traded on exchanges subject to position limits as prescribed by SEBI from time to time.

Effective February 15, 2021, exchange of margin between a resident and a nonresident for permitted derivative contracts is enabled under FEMA, 1999.

Sale or issue locally by nonresidents: Yes. These transactions are not allowed.

Purchase abroad by residents: Yes. Resident entities can purchase commodity and freight derivatives in the overseas markets for hedging their commodity and freight price risk. However, they are not allowed to deal with derivatives on gold, gems, and precious stones.

Sale or issue abroad by residents: No.

Controls on credit operations: Yes.

Commercial credits: Yes. Save as otherwise provided in the Act, Rules, or Regulations made thereunder, no person resident in India must borrow or lend in foreign exchange from or to a person resident in or outside India and no person resident in India must borrow in rupees from, or lend in rupees to, a person resident outside India:

Provided the Reserve Bank may, for sufficient reasons, permit a person resident in India to borrow or lend in foreign exchange from or to a person resident in or outside India and/or permit a person resident in India to borrow in rupees from, or lend in rupees to, a person resident outside India.

By residents to nonresidents: Yes. A commercial credit of up to six months is allowed for exports on documents-against-acceptance terms. Contracts for exports involving payments to be realized beyond the usual period of six months or one year are treated as deferred payment exports. Such exports are permitted, depending on the credit terms offered, the commodity to be exported, and other related considerations. This applies to turnkey, construction, and service contracts by Indian exporters on credit terms. Under the Buyer Credit Scheme, the EXIM Bank offers credit to foreign buyers in connection with the exportation of capital goods and turnkey projects in India in participation with commercial banks in India. An Indian exporter may lend without restriction from the funds held in an EEFC account for trade-related purposes to an overseas importing customer against a bank guarantee. Other transactions require RBI permission.

To residents from nonresidents: Yes. TC can be availed subject to following guidelines:

Currency of borrowing: INR or any freely convertible foreign currency.

Amount under Automatic Route: TC can be availed up to US$50 million an import transaction under the automatic route. Additionally, the limit for certain sectors (oil/gas refining and marketing, airline, and shipping companies) will be up to US$150 million or equivalent an import transaction.

Eligible borrower: An importer resident is India can raise TC for import of goods in the form of buyers’ credit or suppliers’ credit.

Recognized lender: Suppliers’ credit can be extended by the overseas supplier of goods. Buyers’ credit can be extended by Banks, financial institutions, foreign equity holder(s) located outside India and financial institutions in International Financial Services Centres located in India.
The period of TC and corresponding end-use: The period of TC, from
the date of shipment, must be up to three years for import of capital
goods and up to one year or the operating cycle, whichever is less,
for non-capital goods. For shipyards/shipbuilders, the period of TC
for import of non-capital goods can be up to three years.

All-in-Cost ceiling: Benchmark Rate plus 250 bps.

Bank guarantees may be given by the ADs, on behalf of the importer,
in favor of overseas lender of TCs not exceeding the amount of TC.

Period of such guarantee cannot be beyond the maximum permissible
period for TC. TC may also be secured by overseas guarantee issued
by foreign banks/overseas branches of Indian banks.

TCs may be raised by entities in SEZs, free trade warehousing zones,
and domestic tariff area.

These guidelines are issued under FEM (Borrowing and Lending)

Financial credits

Save as otherwise provided in the Act, Rules, or Regulations made
thereunder, no person resident in India must borrow or lend in
foreign exchange from or to a person resident in or outside India and
no person resident in India must borrow in rupees from, or lend in
rupees to, a person resident outside India. The Reserve Bank may, for
sufficient reasons, permit a person resident in India to borrow or lend
in foreign exchange from or to a person resident in or outside India
and/or permit a person resident in India to borrow in rupees from, or
lend in rupees to, a person resident outside India.

By residents to nonresidents

Under FEMA 3R of December 17, 2018:
(1) An AD in India or its branch outside India or any other eligible
entity may extend foreign-currency-denominated External
Commercial Lending to a borrower outside India in accordance with
the provisions contained in Schedule III.
(2) An AD may grant loans to its constituents in India for meeting
their foreign exchange requirements or for their rupee working
capital requirements or capital expenditure subject to compliance
with prudential norms, interest rate directives, and guidelines, if any,
issued by Reserve Bank in this regard.
(3) Branches outside India of AD banks may extend foreign
exchange loans against the security of funds held in NRE/FCNR
deposit accounts or any other account as specified by the Reserve
Bank from time to time, maintained in accordance with the FEM
(Deposit) Regulations, 2016, notified vide Notification No. FEMA
5(R)/2016-RB of April 1, 2016, as amended from time to time.
(4) An AD in India may grant loan to a NRI/OCI Cardholder for
meeting the borrower’s personal requirements/own business
purposes/acquisition of a residential accommodation in
India/acquisition of motor vehicle in India/or for any purpose as per
the loan policy laid down by the Board of Directors of the AD and in
compliance with prudential guidelines of RBI. The AD bank should
ensure that the borrowed funds are not used for restricted end-uses.
(5) Overdraft in rupee account maintained with AD in India by a
bank outside India: An AD may permit a temporary overdraft, for
value not exceeding Rs 5 billion or any other amount as prescribed
by the Reserve Bank from time to time, in rupee accounts maintained
with it by its overseas branch or correspondent or Head Office
outside India, subject to such terms and conditions as the Reserve
Bank may direct from time to time.
(6) A registered nonbanking financial company in India or a
registered housing finance institution in India or any other financial
institution as may be specified by the Reserve Bank from time to
time, may provide housing loan or vehicle loan, as the case may be,
to a NRI/OCI Cardholder subject to such terms and conditions as
prescribed by the Reserve Bank from time to time. The borrower
To residents from nonresidents  Yes.

Borrowing from outside India in foreign exchange by a person resident in India:
(1) An AD may borrow from its Head Office or branch or correspondent outside India or any other entity up to limit specified and subject to terms and conditions as specified by the Reserve Bank from time to time, in consultation with GOI.
(2) A branch outside India of an AD being a bank incorporated or constituted in India may borrow in foreign exchange in the normal course of its banking business from outside India, subject to the directions or guidelines issued by the Reserve Bank from time to time, and the Regulatory Authority of the country where the branch is located.
(3) Financial Institutions, set up under an Act of the Indian Parliament, may raise foreign exchange borrowings with the prior approval of the GOI for the purpose of onward lending.
(4) An AD may raise ECB from outside India in accordance with the provisions contained in Schedule I of Notification No. FEMA.3(R)/2018-RB (as amended from time to time).
(5) Eligible resident entities (other than ADs) may raise ECB from outside India in accordance with the provisions contained in Schedule I of Notification No. FEMA.3(R)/2018-RB (as amended from time to time).

Borrowing in Indian rupees by a person resident in India:
(1) An AD may raise rupee-denominated ECB from outside India in accordance with the provisions contained in Schedule I of Notification No. FEMA.3(R)/2018-RB (as amended from time to time).
(2) Borrowing by persons other than AD:
(a) Eligible resident entities may raise rupee-denominated ECB from outside India in accordance with the provisions contained in Schedule I of Notification No. FEMA.3(R)/2018-RB (as amended from time to time).
(b) Eligible resident entities, as defined by the GOI, may borrow from overseas Multilateral Financial Institutions/International Development Financial Institutions, where the source of funds of such institutions is rupee-denominated bonds issued overseas or resources raised domestically, or any other source as approved by the GOI.
(c) Any foreign investment in the nature of debt arising out of transfer or issue of security, not covered under the above sub-regulations, should be in compliance with FEM (Transfer or Issue of Security by a Person Resident Outside India) Regulations, 2017, notified vide Notification No. FEMA 20(R)/2017-RB of November 7, 2017, as amended from time to time.
(d) Any person resident in India accepting any deposit from, or making any deposit with, a person resident outside India, including loans/overdrafts against security of funds held in such accounts, should be in compliance with FEM (Deposit) Regulations, 2016, notified vide Notification No. FEMA 5(R)/2016-RB of April 1, 2016, as amended from time to time.
(e) Financial Institutions, set up under an Act of the Indian Parliament, may raise rupee-denominated borrowings from outside India with the prior approval of the GOI for the purpose of onward lending.
lending.

Under the ECB framework, ECBs may be availed as per the guidelines given under:

1. Currency of borrowing: Foreign-currency-denominated (freely convertible) ECB and rupee-denominated ECB.
2. Amount: effective July 6, 2022, eligible borrowers can raise up to US$1.5 billion (temporarily increased from US$750 million) or equivalent a financial year under the automatic route for ECBs to be raised until December 31, 2022. The same has been enabled vide A.P. (DIR Series) Circular No. 11 dated August 1, 2022.)
3. Eligible Borrowers: All entities eligible to receive FDI. Additionally, Port Trusts, Units in SEZ, SIDBI, EXIM Bank, registered entities engaged in micro-finance activities can also borrow under this framework.
4. Recognized Lender: The lender should be resident of FATF or IOSCO compliant country. Multilateral and Regional Financial Institutions, Individuals (if they are foreign equity holders) and foreign branches/subsidiaries of Indian banks can also be lenders.
5. End-use: Negative end-use list which includes real estate activities, investment in capital market, equity investment, working capital purposes, general corporate purposes, repayment of rupee loans and on-lending for the above activities.
6. All-in-Cost ceiling:
   For Foreign currency ECB:
   Benchmark Rate plus 550 bps spread: For existing ECBs linked to LIBOR whose benchmarks are changed to ARR.
   Benchmark rate plus 500 bps spread: For new ECBs.

   For INR ECB:
   Benchmark rate plus 450 bps spread.
   (All-in-cost ceiling has been temporarily increased by 100 bps for ECBs raised until December 31, 2022. The enhanced all-in-cost ceiling shall be available only to eligible borrowers of investment-grade rating from Indian Credit Rating Agencies. Other eligible borrowers may raise ECB within the existing all-in-cost ceiling as hitherto.)

   Benchmark rate: Benchmark rate in case of Foreign currency ECB/TC refers to any widely accepted interbank rate or ARR of 6-month tenor, applicable to the currency of borrowing. Benchmark rate in case of rupee-denominated ECB/TC will be prevailing yield of the GOI securities of corresponding maturity.

7. Minimum average Maturity and Corresponding end-use: Under the extant ECB framework ECB can be raised for a MAMP of three years. However, the following exceptions are provided to the above end-use and MAMP requirements as given below:
   Manufacturing sector companies can raise ECBs with MAMP of one year for ECB up to US$50 million or its equivalent a financial year.
   ECB with MAMP five years can be raised from foreign equity holder can be utilized for working capital purposes, general corporate purposes, or repayment of rupee loans.
   ECBs for repayment of rupee loans, working capital purposes and general corporate purposes from all eligible ECB lenders (except foreign branches/overseas subsidiaries of Indian banks) with a higher MAMP of 7/10 years.
   ECBs for repayment of rupee loans availed domestically for capital expenditure in manufacturing and infrastructure sector if classified as...
Special Mention Account – 2 or Non-performing assets, under any one-time settlement and selling of such loans through assignment to ECB lenders. Such ECBs can be availed from all recognized lenders except foreign branches/overseas subsidiaries of Indian banks.

Banks can issue guarantees/SBLCs for TCs. However, they cannot issue the same for ECBs availed by residents.

The RBI allows ADs to grant rupee loans to residents against guarantees from nonresidents under the general permission. Borrowing and lending between two residents are not affected by any provisions of the FEMA, 1999. If a rupee loan is granted against a guarantee by a nonresident, there is no transaction involving foreign exchange until the guarantee is invoked and the nonresident guarantor is required to meet the liability under the guarantee.

Nonresident guarantees under the general permission are allowed for non-fund-based facilities (such as LCs and guarantees) between two residents.

Credit enhancement by eligible nonresident entities has been extended to domestic debt raised through issues of capital market instruments, such as debentures and bonds, by Indian companies in all sectors.

Controls on direct investment

Yes.

Outward direct investment

Yes.

ODI means investment by way of acquisition of unlisted equity capital of a foreign entity, or subscription as a part of the memorandum of association of a foreign entity, or investment in 10%, or more of the paid-up equity capital of a listed foreign entity or investment with control where investment is less than 10% of the paid-up equity capital of a listed foreign entity. For the purposes of this clause, where an investment by a person resident in India in the equity capital of a foreign entity is classified as ODI, such investment shall continue to be treated as ODI even if the investment falls to a level below 10% of the paid-up equity capital or such person loses control in the foreign entity.

An Indian Entity (a company defined under the Companies Act, 2013 (18 of 2013); a body corporate incorporated by any law for the time being in force; a Limited Liability Partnership duly formed and incorporated under the Limited Liability Partnership Act, 2008 (6 of 2009); and a partnership firm registered under the Indian Partnership Act, 1932 (9 of 1932) may make ODI by undertaking financial commitment in the form of equity.

Financial commitment by Indian entity by modes other than equity capital:

The Indian Entity may lend or invest in any debt instrument issued by a foreign entity or extend non-fund-based commitment to or on behalf of a foreign entity including overseas step down subsidiaries of such Indian entity within prescribed financial commitment limit.

A person resident in India making Overseas Investment may make payment by remittance made through banking channels; from funds held in an account maintained in accordance with the provisions of the Act; by swap of securities; and by using the proceeds of ADRs or GDRs or stock-swap of such receipts or ECBs raised in accordance with the Act.
with the provisions of the Act and the rules and regulations made thereunder for making ODI or financial commitment by way of debt by an Indian entity.

Where a person resident in India acquires equity capital by way of subscription to an issue or by way of purchase from a person resident outside India or where a person resident outside India acquires equity capital by way of purchase from a person resident in India, and where such equity capital is reckoned as ODI, the payment of amount of consideration for the equity capital acquired may be deferred for such definite period from the date of the agreement.

Any person resident in India who has an account appearing as a non-performing asset; or is classified as a willful defaulter by any bank; or is under investigation by a financial service regulator or by investigative agencies in India, namely, the Central Bureau of Investigation or Directorate of Enforcement or Serious Frauds Investigation Office, shall, before making any financial commitment or undertaking disinvestment, obtain a No Objection Certificate from the lender bank or regulatory body or investigative agency by making an application in writing to such bank or regulatory body or investigative agency concerned.

A person resident in India holding equity capital may transfer such investment to a person resident inside/outside India. The transferor, in case of full disinvestment other than by way of liquidation, shall not have any dues outstanding for receipt, which such transferor is entitled to receive from the foreign entity as an investor in equity capital and debt and the transferor, in case of any disinvestment must have stayed invested for at least one year from the date of making ODI.

In case the transfer of investment is on account of merger, amalgamation or demerger or on account of buyback of foreign securities, such transfer or liquidation in case of liquidation of the foreign entity, shall have the approval of the competent authority as per the applicable laws in India or the laws of the host country or host jurisdiction.

A person resident in India who has made ODI in a foreign entity may permit restructuring of the balance sheet by such foreign entity, which has been incurring losses for the previous two years as evidenced by its last audited balance sheets, subject to ensuring compliance with reporting, documentation requirements and subject to the diminution in the total value of the outstanding dues toward such person resident in India on account of investment in equity and debt, after such restructuring not exceeding the proportionate amount of the accumulated losses.

No person resident in India shall make ODI in a foreign entity engaged in real estate activity; gambling in any form; and dealing with financial products linked to the Indian rupee without specific approval of the Reserve Bank.

An Indian entity may make ODI by way of investment in equity capital for the purpose of undertaking bona fide business activity in the manner and subject to the limits and conditions provided. The ODI may be made or held by way of subscription as part of memorandum of association or purchase of equity capital, listed or unlisted; acquisition through bidding or tender procedure; acquisition
of equity capital by way of rights issue or allotment of bonus shares; capitalization, within the time period, if any, specified for realization under the Act, of any amount due toward the Indian entity from the foreign entity, the remittance of which is permitted under the Act or does not require prior permission of the Central Government or the Reserve Bank under the Act or any rules or regulations made or directions issued thereunder; the swap of securities; and merger, demerger, amalgamation or any scheme of arrangement as per the applicable laws in India or laws of the host country or the host jurisdiction.

An Indian entity engaged in financial services activity in India may make ODI in a foreign entity, which is directly or indirectly engaged in financial services activity, subject to prescribed conditions.

An Indian entity not engaged in financial services activity in India may make ODI in a foreign entity, which is directly or indirectly engaged in financial services activity, except banking or insurance, subject to prescribed conditions.

The total financial commitment made by an Indian entity in all the foreign entities taken together at the time of undertaking such commitment may not exceed 400% of its net worth as on the date of the last audited balance sheet or as directed by the Reserve Bank, in consultation with Central Government from time to time.

Any resident individual may make ODI by way of investment in equity capital subject to the overall ceiling under the LRS of the Reserve Bank and in the manner prescribed under the ODI Rules.

A resident individual may make or hold Overseas Investment by way of ODI in an operating foreign entity not engaged in financial services activity and which does not have subsidiary or step down subsidiary where the resident individual has control in the foreign entity. ODI by a resident individual may be by way of capitalization, within the time period, if any, specified for realization under the Act, of any amount due from the foreign entity the remittance of which is permitted under the Act or does not require prior permission of the Central Government or the Reserve Bank; swap of securities on account of a merger, demerger, amalgamation or liquidation; acquisition of equity capital through rights issue or allotment of bonus shares; gift as per the conditions prescribed; inheritance; acquisition of sweat equity shares; acquisition of minimum qualification shares issued for holding a management post in a foreign entity; acquisition of shares or interest under Employee Stock Ownership Plan or Employee Benefits Scheme.

Any person being a registered Trust or a registered Society engaged in the educational sector or which has set up hospitals in India may make ODI in a foreign entity with the prior approval of the Reserve Bank, subject to the prescribed conditions.

A MF or venture capital fund or AIF may acquire or transfer foreign securities as stipulated by SEBI from time to time in accordance with the provisions of the ODI rules.
Any person, being a SEBI-approved clearing corporation of a stock exchange and its clearing members, may acquire, hold and transfer foreign securities, offered as collateral by FPIs and, subject to the guidelines issued by the SEBI from time to time.

A domestic depository may acquire, hold and transfer foreign securities of a foreign entity, being the underlying security to issue Indian Depository Receipts as may be authorized by such foreign entity or its overseas custodian bank and the person investing in Indian Depository Receipts may either sell or continue to hold foreign securities in accordance with the prescribed conditions.

An AD bank including its overseas branch may acquire or transfer foreign securities in accordance with the terms of the host country or host jurisdiction, as the case may be, in the normal course of its banking business.

A person resident in India may make Overseas Investment in an international financial services center in India within the limits provided and conditions prescribed.

A person resident in India who does not submit the evidence of investment within the time specified or does not make any filing within the time specified may make such submission or filing, as the case may be, along with Late Submission Fee within such period, provided such facility can be availed within a maximum period of three years from the due date of such submission or filing.

A person resident in India who has made a financial commitment in a foreign entity in accordance with the Act or rules or regulations made thereunder, shall not make any further financial commitment, whether fund-based or non-fund-based, directly or indirectly, toward such foreign entity or transfer such investment till any delay in reporting is regularized.

The FDI in India is subject to policy guidelines framed by the GOI from time to time and implemented through FEM (NDI) Rules, 2019, as amended.

Persons resident outside India are permitted to invest in India, subject to the FDI Policy except in those sectors/activities which are prohibited. However, government approval is required for investment by an entity of a country which shares land border with India or where the beneficial owner of an investment into India is situated in or is a citizen of any such country. Further, an Indian company receiving FDI from Pakistan may not engage in sectors or activities pertaining to defense, space, and atomic energy or sectors or activities prohibited for foreign investment.

Foreign investment is permitted under two routes: the government route and the automatic route, subject to sector-specific caps and guidelines, except for prohibited activities, viz. (1) lottery business; (2) gambling and betting; (3) chit funds; (4) nidhi companies; (5) trading in transferable development rights; (6) real estate business or construction of farmhouses; (7) manufacturing of cigars, cheroots, cigarillos, and cigarettes of tobacco or tobacco substitutes; (8) activities/sectors not open to private sector investment, for example, (a) atomic energy and (b) railway operations (other than permitted activities mentioned in paragraph (3) of Schedule I of NDI Rules, 2019); and (9) foreign technology collaboration in any form including licensing for franchise, trademark, brand name, and management contract is also prohibited for lottery business and

Inward direct investment Yes.
gambling and betting activities. Further, there are other sectors where foreign investment is permitted with certain terms and conditions as stated in paragraph (3) of Schedule I of NDI Rules, 2019. If the activity is not stated in paragraph (3) of Schedule I and not under financial services specifically indicated in the Rules, foreign investment up to 100% is permitted under the automatic route. Foreign investment in financial services not specifically indicated in the Rules requires prior approval of GOI.

FDI is permitted in the following sectors with prior approval of the government:

1. defense, air transport service (scheduled and regional air transport), telecom services, up to 49% under automatic route;
2. brownfield pharmaceuticals up to 74% under automatic route and beyond 74% under government route;
3. private sector banking up to 49% under automatic route and beyond 49% and up to 74% under government route;
4. private security agencies up to 49% under government route;
5. mining and mineral separation of titanium-bearing minerals and ores, food product retail trading, publishing and printing of scientific and technical magazines, publication of facsimile edition of foreign newspapers, and establishment and operation of satellite, capped at 100%;
6. multi-brand retail trading, capped at 51% under government route;
7. investment by foreign airlines and broadcasting content service, capped at 49% under government route;
8. publication of newspapers and periodicals dealing with news and current affairs and publication of Indian editions of foreign magazines dealing with news and current affairs, capped at 26% under government route;
9. public sector banking, capped at 20% under government route; and
10. insurance companies, up to 74% under automatic route and up to 100% under government approval route.

Under the automatic route, there are only five sectors in which investments are subject to a cap of 49%: petroleum refining by public sector companies, infrastructure company in the securities market, commodity spot exchanges, pension sector, and power exchanges. Foreign investment is allowed up to 100% through the automatic route in the following sectors:

1. agricultural activities such as floriculture and horticulture;
2. pisciculture;
3. plantation sector;
4. mining of metals and non-metal ores, coal, and lignite;
5. manufacturing; (6) broadcasting carriage and content service;
7. airports (greenfield and brownfield), airport transport service (non-scheduled flights and helicopter services), ground handling services and maintenance and repair and flying training organizations;
8. construction development;
9. new and existing industrial parks;
10. wholesale and B2B e-commerce trading, and duty-free shops;
11. railway infrastructure (though proposals involving FDI beyond 49% may be considered on a case-to-case basis);
12. asset reconstruction companies, credit information companies, other financial services regulated by financial sector regulators;
13. pharmaceuticals (greenfield); (14) exploration activities of oil and natural gas fields;
15. single-brand product retail trading; (16) real estate broking service; and
17. investing companies if it is registered with the RBI and accordingly regulated.

The following criteria are mentioned under the automatic route subject to certain terms and conditions:

1. creation of charge over shares of JV/WOS/SDS in favor of domestic/overseas lenders;
2. creation of charge over the domestic assets in favor of overseas lenders to the JV/WOS/SDS; and
3. creation of charge over overseas assets in favor of domestic lenders.
NRIs and OCIs may use funds derived from new remittances or held in their NRE or FCNR accounts (1) to make portfolio investments with repatriation benefits of up to 5% of the paid-up capital, provided their total holdings of shares and convertible debentures held under the PIS do not exceed 10% (extendable to 24% if the general meeting of the investing company passes a special board resolution) of the paid-up capital of the company or of the total paid-in value of each series of its convertible debentures issued by the company; (2) for existing JV companies to raise the ratio of foreign equity shares to prescribed percentages of their capital through expansion of their capital base or through preferential allocation of shares to foreign investors; and (3) to invest on a non-repatriation basis in money market MFs (only NRIs).

Any funds payable by the Indian company to a person resident outside India, the remittance of which is permitted under the Act or the rules and regulations framed or directions issued thereunder or does not require prior permission of the Central Government or the Reserve Bank under the Act or the rules and regulations framed or directions issued thereunder or has been permitted by the Reserve Bank under the Act or the rules and regulations framed or directions issued thereunder, may be converted to equity subject to specified conditions (Res. No. 3. Notification No. FEMA 315/2014-RB of July 10, 2014). Indian companies may issue capital instruments against swap of capital instruments; imports of capital goods, machinery, equipment (excluding second-hand machinery), and preoperative/pre-incorporation expenses up to a limit of 5% of its authorized capital or US$500,000 whichever is less (including payments of rent, etc.), subject to specified conditions.

Controls on liquidation of direct investment

Yes.

Shares may be sold freely on the stock exchange and the sale proceeds may be repatriated. Other sales of shares, securities, and immovable property may be allowed by authorized banks after complying with conditions prescribed by the RBI. RBI approval is required only for sales of shares when preconditions and norms have not been fulfilled. Repatriation of after-tax sales proceeds is generally permitted. Investment on a non-repatriation basis is permitted only for NRIs and OCIs where for investment on non-repatriation basis, the sale proceeds cannot be repatriated outside and have to be credited only to the NRO account of the investor.

Controls on real estate transactions

Yes.

These transactions require RBI permission.

Purchase abroad by residents

Yes.

Residents may hold, own, or transfer immovable property outside India, in terms of Rule 21 of FEM (Overseas Investment) Rules, 2022, dated August 22, 2022, and paragraph 25 of the FEM (Overseas Investment) Directions, 2022 dated August 22, 2022, Residents may buy immovable property abroad using RFC accounts. A resident individual may make remittances for the acquisition of immovable property within the LRS limit of US$250,000, subject to verification of the transactions by the AD bank. General permission has been granted to Indian companies with established offices abroad to acquire immovable property abroad for their business use and for staff residences.

Purchase locally by nonresidents

Yes.

Acquisition and transfer of property in India by a NRI or an OCI – A NRI or an OCI may:
acquire by way of purchase immovable property in India other than an agricultural land or farm house or plantation property subject to certain conditions;
acquire any immovable property in India other than agricultural land or farm house or plantation property by way of gift from a person resident in India or from an NRI or from an OCI, who in any case is a relative as defined in clause (77) of Section 2 of the Companies

2022 ANNUAL REPORT ON EXCHANGE ARRANGEMENTS AND EXCHANGE RESTRICTIONS

INTERNATIONAL MONETARY FUND

1831

©International Monetary Fund. Not for Redistribution
acquire any immovable property in India by way of inheritance from a person resident outside India subject to certain conditions;

transfer any immovable property in India to a person resident in India;

transfer any immovable property other than agricultural land or farm house or plantation property to an NRI or an OCI.

Joint acquisition by the spouse of a NRI or an OCI – A person resident outside India, not being an NRI or an OCI, who is a spouse of an NRI or an OCI may acquire one immovable property (other than agricultural land or farm house or plantation property), jointly with his or her NRI or OCI spouse subject to certain conditions.

Acquisition of immovable property for carrying on a permitted activity – A person resident outside India who has established in India in accordance with the FEM (Establishment in India of a Branch office or a liaison office or a project office or any other place of business) Regulations, 2016, as amended from time to time, a branch, office, or other place of business for carrying on in India any activity, excluding a liaison office, may:

acquire any immovable property in India, which is necessary for or incidental to carrying on such activity subject to certain conditions;

transfer by way of mortgage to an AD as a security for any borrowing, the immovable property acquired in pursuance of clause (a) above:

Provided no person of Pakistan or Bangladesh or Sri Lanka or Afghanistan or China or Iran or Hong Kong or Macau or Nepal or Bhutan or Democratic People’s Republic of Korea must acquire immovable property, other than on lease not exceeding five years, without prior approval of the Reserve Bank.

Purchase or sale of immovable property by Foreign Embassies or Diplomats or Consulate Generals – A Foreign Embassy or Diplomat or Consulate General may purchase or sell immovable property in India other than agricultural land or plantation property or farm house, provided clearance from GOI, Ministry of External Affairs is obtained for such purchase or sale, and the consideration for acquisition of immovable property in India is paid out of funds remitted from abroad through banking channels.

Acquisition by a long-term visa holder – a person being a citizen of Afghanistan, Bangladesh, or Pakistan belonging to minority communities in those countries, namely Hindus, Sikhs, Buddhists, Jains, Parsis, and Christians, who is residing in India and has been granted a long-term visa by the Central Government may purchase only one residential immovable property in India as dwelling unit for self-occupation and only one immovable property for carrying out self-employment subject certain conditions.

As regards persons other that OCI/NRI or person who has not opened any liaison, branch, or project office in India, no such person resident outside India must transfer any immovable property in India, provided the Reserve Bank may, for sufficient reasons, permit the transfer, subject to such conditions as may be considered necessary.

In terms of FEM (NDI) Rules, 2019, of October 17, 2019, which supersede FEMA 21(R) 2018-RB of March 26, 2018,

From March 26, 2018: In the event of sale of immovable property other than agricultural land or farm house or plantation property in India by an NRI or an OCI, the AD may allow repatriation of the sale proceeds outside India, provided the following conditions are satisfied, namely:

the immovable property was acquired by the seller in accordance with the provisions of the foreign exchange law in force at the time.
of acquisition or the provisions of these rules; the amount for acquisition of the immovable property was paid in foreign exchange received through banking channels or out of funds held in FCNR account or out of funds held in NRE account; in the case of residential property, the repatriation of sale proceeds is restricted to not more than two such properties. Prohibition: Citizens of Pakistan, Bangladesh, Sri Lanka, Afghanistan, China, Iran, Nepal, Bhutan, Macau, Hong Kong, and Democratic People’s Republic of Korea cannot, without prior permission of the Reserve Bank, acquire or transfer immovable property in India, other than on lease, not exceeding five years. For this purpose, the term “citizen” must include natural persons and legal entities. This prohibition may not apply to an OCI.

Remittance of assets is permitted under FEMA 13(R) 2016-RB of April 1, 2016.

(1) A citizen of foreign state, not being a PIO or a citizen of Nepal or Bhutan, who has retired from an employment in India or has inherited the assets from a person referred to in Subsection (5) of Section 6 of FEMA or is a widow/widower resident outside India and has inherited assets of the deceased spouse who was an Indian citizen resident in India, may remit through an AD an amount, not exceeding US$1,000,000 (US dollar one million only) a financial year on production of documentary evidence in support of acquisition, inheritance or legacy of assets by the remitter subject to certain conditions.

(2) A NRI or a PIO may remit through an AD an amount, not exceeding US$1,000,000 (US dollar one million only) a financial year, out of the balances held in the nonresident (ordinary) accounts (NRO accounts)/sale proceeds of assets/the assets acquired by him by way of inheritance/legacy on production of documentary evidence in support of acquisition, inheritance or legacy of assets by the remitter;

Under a deed of settlement made by either of his parents or a relative (relative as defined in Section 2(77) of the Companies Act, 2013) and the settlement taking effect on the death of the settler, on production of the original deed of settlement.

Controls on personal capital transactions  Yes.

Loans

By residents to nonresidents  Yes. A resident individual may grant rupee loan to a NRI/OCI cardholder relative within the overall limit under the LRS subject to such terms and conditions as prescribed by the Reserve Bank from time to time. The borrower should ensure that the borrowed funds are not used for restricted end-uses.

To residents from nonresidents  Yes. An individual resident in India may borrow a sum not exceeding US$250,000 or its equivalent, or any other amount as decided by the Reserve Bank from time to time, from his or her relatives outside India and subject to such terms and conditions as specified by the Reserve Bank from time to time in consultation with the GOI. An individual resident in India studying abroad may raise loan outside India not exceeding US$250,000 or its equivalent, or any other amount as decided by the Reserve Bank from time to time, for the purposes of payment of education fees abroad and maintenance subject to terms and conditions as specified by the Reserve Bank from time to time in consultation with the GOI. A person resident in India, not being a company incorporated in India, may borrow in Indian rupees from a NRI/relatives who are OCI cardholders outside India, subject to such terms and conditions.
as specified by the Reserve Bank from time to time in consultation with the GOI. The borrower should ensure that the borrowed funds are not used for restricted end-uses.

There is an overall LRS limit of US$250,000 a financial year for exchange/remittance facilities of resident individuals for CAT, such as remittance for private visits; business visits; gifts or donations; travel abroad for employment; emigration; maintenance of close relatives abroad; and expenses in connection with medical treatment abroad and studies abroad. Gifts in Indian rupees by resident individuals to NRI relatives as defined in the Companies Act, 2013, are also subsumed under the LRS limit. A person other than an individual may obtain foreign exchange for gifts and donations, within the limit prescribed under the LRS. RBI approval is required for remittances by persons other than individuals for donations exceeding 1% of their foreign exchange earnings during the previous three financial years or US$5 million, whichever is less, for (1) creation of chair positions in reputable education institutions; (2) contributions to funds (other than investment funds) promoted by education institutions; and (3) contributions to technical institutions, agencies, or associations in the field of the donor company. A person resident in India, except earlier overseas corporate bodies (OCBs), may transfer securities as a gift to a person abroad, subject to certain conditions. The value of the securities transferred by the donor together with any other securities transferred to any person outside India during the financial year may not exceed the rupee equivalent of US$50,000. Deposits of multilateral organizations to which India belongs and their subsidiaries/affiliates and officials in India are exempt from nonresident account restrictions.

Rule 9 (4) of FEM (NDI) Rules, 2019, permits a person resident in India holding equity instruments or units of an Indian company to transfer the same to a person resident outside India by way of gift with the prior approval of the Reserve Bank, in the manner prescribed, and subject to certain conditions.

Provisions Specific to the Financial Sector

Provisions specific to commercial banks and other credit institutions

| Provisions specific to commercial banks and other credit institutions | Yes. |

Legal Entity Identifier system for all borrowers of banks having total (fund-based and non-fund-based) exposure of 500 million rupees and
above has been introduced in a phased manner vide RBI circular of November 2, 2017.

ECB is subject to the policy framed by the RBI in consultation with the MOF. Financial institutions which are eligible to receive FDI are permitted borrow ECB. Further, All India Financial Institutions – EXIM Bank and SIDBI – are also permitted to borrow ECB. All such borrowings by financial institutions are subject to the prudential guidelines issued by the sectoral regulator. All ECBs have to be availed under the ECB framework as summarized under Section XIA.4.b.2. Further, the following borrowing from abroad is also enabled for financial institutions under FEMA 3R:

1. An AD may borrow from its Head Office or branch or correspondent outside India or any other entity up to limit specified and subject to terms and conditions as specified by the Reserve Bank from time to time, in consultation with GOI.
2. A branch outside India of an AD being a bank incorporated or constituted in India may borrow in foreign exchange in the normal course of its banking business from outside India, subject to the directions or guidelines issued by the Reserve Bank from time to time, and the Regulatory Authority of the country where the branch is located.
3. Financial institutions, set up under an Act of the Indian Parliament, may raise foreign exchange borrowings with the prior approval of the GOI for the purpose of onward lending.

Maintenance of accounts abroad

No.

There are no restrictions on AD accounts abroad.

Lending to nonresidents (financial or commercial credits)

Yes.

Lending in foreign exchange or in Indian rupees by a person resident in India to nonresident is prohibited unless in cases specified by the RBI or on RBI approval.

ADs may manage surplus balances in their exchange accounts through overnight placement and investment with their overseas branches or correspondent banks, subject to limits imposed by RBI. Stand-alone primary dealers (SPDs) are allowed to offer foreign exchange products to their FPI clients under certain conditions, as permitted by the RBI from time to time. Such activities must be part of their non-core activities.

An AD in India may extend foreign-currency-denominated External Commercial Lending to a borrower outside India in accordance with the provisions contained in Schedule III of Notification No. FEMA.3(R)/2018-RB (as amended from time to time).

An AD in India may lend in Indian rupees to a NRI/OCI cardholder for meeting the borrower’s personal requirements/own business purposes/acquisition of a residential accommodation in India/acquisition of motor vehicle in India or for any purpose as per the loan policy laid down by the Board of Directors of the AD and in compliance with prudential guidelines of RBI. The AD bank should ensure that the borrowed funds are not used for restricted end-uses.

Overdraft in rupee account maintained with AD in India by a bank outside India: An AD may permit a temporary overdraft, for value not exceeding Rs 5 billion or any other amount as prescribed by the RBI from time to time, in rupee accounts maintained with it by its overseas branch or correspondent or Head Office outside India, subject to such terms and conditions as the RBI may direct from time to time.

Under the revised ECB framework, lending and borrowing by Indian banks and their branches/subsidiaries outside India will be subject to prudential guidelines issued by the Department of Banking Regulation of the Reserve Bank. Further, other entities raising ECB

<td>ADs may grant loans to clients in India for meeting their foreign exchange requirements, for their rupee working capital requirements, or for capital expenditure subject to compliance with prudential norms, interest rate directives, and guidelines, if any, issued by RBI in this regard. ADs can also extend loans to clients maintaining RFC account, against the security of funds held in such account; and to other ADs subject to the directions or guidelines issued by the RBI from time to time. ADs can also borrow from financial institutions outside India for the purpose of granting pre-shipment or post-shipment credit to their exporter clients in India. Select institutions, other than ADs, may extend loans to their clients in India for the purpose of onward lending, on the condition that these loans are out of the foreign currency borrowings raised by these institutions and subject to the approval of the Central Government.</td>

| **Purchase of locally issued securities denominated in foreign exchange** | **n.a.** |
| Differential treatment of deposit accounts in foreign exchange | **Yes.** |
| **Reserve requirements** | **No.** |
| The banks, vide circular dated and effective July 6, 2022, have been advised that with effect from the reporting fortnight beginning July 30, 2022, incremental FCNR (B) deposits as also NRE Term deposits with reference to base date of July 1, 2022, mobilized by banks will be exempt from maintenance of cash reserve ratio (CRR) and statutory liquidity ratio (SLR). The exemptions are valid for deposits raised until November 4, 2022. The CRR, set at 4.5%, effective May 21, 2022, of the net demand and time liabilities (NDTL) of all banks, was lowered to 3% during the COVID-19 pandemic. Previously, the CRR was increased to 3.50%, effective March 27, 2021, and to 4.00%, effective May 22, 2021. Credit balances in ACU dollar accounts, net interbank liabilities, and liabilities of banks' offshore banking units are exempt. The daily minimum CRR maintenance is 90% of requirement, with effect from September 26, 2020. However, this was reduced to 80% during the COVID-19 pandemic. Deduction of an amount equivalent to the incremental loans extended in specific sectors (that is, retail loans to automobiles, residential housing, and loans to micro, small, and medium enterprises (MSME)) during February 2020 to July 2020 has been allowed. This dispensation for the reservable liabilities (NDTL) is available for a maximum period of five years, that is, up to the fortnight ending January 24, 2025, or the tenure of the loan, whichever is earlier. Banks can claim the first such deduction from the NDTL of February 14, 2020, for the amount equivalent to the incremental credit extended to the sectors indicated above over the outstanding level of credit as at the end of the fortnight ended January 31, 2020. Effective February 5, 2021, scheduled Commercial Banks have been allowed to deduct the amount equivalent to credit disbursed to “New MSME borrowers” from their NDTL for calculation of the CRR. For the purpose of this exemption, “New MSME borrowers” are defined as those MSME borrowers who have not availed any credit facilities from the banking system as on January 1, 2021. This exemption will be available only up to Rs 25 lakh a borrower disbursed up to the fortnight ending October 1, 2021 (extended till December 31, 2021), |
for a period of one year from the date of origination of the loan or the

tenure of the loan, whichever is earlier.

“Scheduled bank” is defined as a bank included in the Second

Schedule of the RBI Act, 1934. Scheduled banks must keep a CRR

with the RBI under Section 42 of that law. Other banks must

maintain a prescribed CRR under the Banking Regulation Act, 1949,

Equity investments by banks are governed by Prudential Regulations.
issued under Para 5 of Master Direction on Financial Services
Provided by Banks of May 26, 2016, as updated from time to time.

An overseas JV or WOS, with direct or indirect equity participation
by an Indian bank, cannot offer any rupee-linked financial products
without specific approval from the RBI.

In banks by nonresidents
No.

FIIIs registered with SEBI and NRIs are allowed to subscribe to
rupee-denominated instruments issued by Indian banks, including
perpetual debt instruments (PDI) (Tier 1 capital) and debt capital
instruments (upper Tier 2 capital), subject to the following
conditions: (1) aggregate FII investments in PDI should not exceed a
ceiling of 49% of each issue, and investment by an individual FII
should not exceed the limit of 10% of each issue; (2) aggregate NRI
investments in PDI should not exceed a ceiling of 24% of each issue,
and investments by a single NRI should not exceed 5% of each issue;
(3) investment by FIIIs in debt capital instruments should be within
SEBI-determined limits for FII investment in corporate debt
instruments; and (4) investment by NRIs in debt capital instruments
should be in accordance with the policy for investment by NRIs in
other debt instruments. The issuing banks should meet these
conditions at the time of issue and comply with new RBI guidelines
from time to time.

Open foreign exchange position limits
Yes.

Banks must apply a capital charge of 9% (that is, a risk weight of
100%) on the open foreign exchange position limit or the actual
position, whichever is higher.

On resident assets and liabilities
Yes.

On nonresident assets and liabilities
Yes.

Provisions specific to institutional
investors
Yes.

Insurance companies
Yes.

Limits (max.) on securities issued by
nonresidents
Yes.

Section 27E of the Insurance Act, 1938, prohibits insurers investing
directly or indirectly outside India the funds of the policyholders.
Hence, insurers are not permitted to subscribe to securities issued by
nonresidents.

Limits (max.) on investment portfolio
held abroad
Yes.

Insurance companies are free to invest any of the funds generated
from the business promoted outside India. However, any investment
from Indian operations requires IRDAI approval. Further, such
investments are only to be made from shareholder’s fund beyond
solvency margin. These provisions have been applied since the
inception of IRDAI.

Limits (min.) on investment portfolio
held locally
Yes.

Life insurance companies must invest (other than funds relating to
pension, annuity, and group business and unit-linked business) not
less than 50% of total investments in Central, State, and Other
Approved Securities, with at least 25% of investments in Central G-
Secs.

Insurance companies must invest 40% of pension, annuity, and group
fund in Central G-Secs, State G-Secs, or Other Approved Securities,
with at least 20% in Central G-Secs.

Not more than 50% of life fund must be invested in “approved
investments,” including corporate bonds or debentures rated AA or
above; short-term corporate securities rated A1 or above; all-India
financial institutions rated at least AA (or at least A+, subject to lack
of available higher-rated investments and Investment Committee’s
approval). Instruments must be rated with Rating Agency, registered
with SEBI. Housing and infrastructure investments across all
securities must be a minimum of 15% of life fund for life insurers.
Not less than 75% of investment in debt instruments (including Central G-Secs, State G-Secs, or Other Approved Securities) in case of life insurer and not less than 65% of investment in debt instruments (including Central G-Secs, State G-Secs, or Other Approved Securities) in case of general insurer must be in sovereign debt, AAA or equivalent rating for long-term and A1+ or equivalent for short-term instruments.

General insurance companies must invest not less than 30% of total investments in Central G-Secs, State G-Secs, or Other Approved Securities, with at least 20% in Central G-Secs. Not more than 70% of total investments must be in “approved investments.” Housing and infrastructure investments across all securities must be a minimum of 15% of total investments for general insurers.

Not more than 5% of life fund and unit-linked fund in debt instruments (including Central G-Secs, State G-Secs, or Other Approved Securities) in case of life insurer and not more than 8% of investment in debt instruments (including Central G-Secs, State G-Secs, or Other Approved Securities) in case of general insurers must have a rating of A or below or equivalent rating for long-term instruments.

Currency-matching regulations on assets/liabilities composition

Yes.

Insurers are allowed to issue foreign-currency-denominated policies to nonresidents or to resident persons of Indian nationality or origin who have returned to India after being nonresidents through their offices (in India or abroad), provided the premia are collected in foreign currency from abroad or out of NRE/FCNR accounts of the insured or his relatives held in India.

Insurance companies can make investments abroad only out of funds held abroad.

Pension funds

Yes.

Investments in securities issued by nonresidents are not allowed.

Limits (max.) on securities issued by nonresidents

Yes.

Overseas investments are not allowed for pension funds. As per Section 25 of Pension Fund Regulatory and Development Authority Act, 2013, there is prohibition on offshore investments by pension funds.

Pension Fund Regulatory and Development Authority regulates National Pension System (NPS) and also administers Atal Pension Yojana; accordingly, the comments pertain only to the pension products handled by the Authority.

Limits (max.) on investment portfolio held abroad

Yes.

The investment caps under the contributory pension scheme (NPS) for Government sector employees, that is, for those under Central Government Scheme and State Government Scheme (under default scheme) Corporate Central Government Scheme, NPS Lite Schemes, and Atal Pension Yojana, are as follows:

For assets class: (1) G-Secs and related investments, up to 55%; (2) debt instruments and related investments, up to 45%; (3) equity and related investments, up to 15%; (4) asset backed, trust structured, etc., up to 5%; and (5) short-term debt instrument and related investment, up to 10%.

The Central Government sector employees who wish to choose other than default scheme, may choose following options:

1. Scheme G – 100% of funds invested in G-Secs;
2. Equity: Life Cycle Funds with following options to choose from (a) LC-25: A conservative Life Cycle Fund with equity capped at 25%;
   (b) LC-50: A moderate Life Cycle Fund with equity capped at 50%.

In Life Cycle Fund, the equity exposure gradually decreases with
increase in the age of subscribers.

For scheme Tier-II Tax Saver scheme (only applicable for Central Government employees), the following limits apply:

- **Equity:** 10% to 25%;
- **Debt:** up to 90%;
- **Cash/money market/liquid MFs:** up to 10%;

The caps on investments under the NPS, implemented in India for non-government sector employees, are (1) equity, up to 75%; (2) corporate debt, up to 100%; (3) G-Secs, up to 100%; (4) short-term debt instruments and related instruments, up to 10%; and (5) asset class A – alternative investment class (for Tier 1 only), up to 5%.

The cap on equity investment has maximum limit of 75% in active choice for private sector subscribers.

| Currency-matching regulations on assets/liabilities composition | No |
| Investment firms and collective investment funds | Yes |
| **Limits (max.) on securities issued by nonresidents** | Yes |

Investments are permitted in: (1) ADRs/GDRs of Indian and foreign companies; (2) equities of overseas companies listed on recognized overseas stock exchanges, including initial and follow-up public; (3) foreign investment-grade debt securities in countries with fully convertible currencies; (4) money market investment-grade investments, including repos with investment-grade counterparties; (5) G-Secs of countries rated at investment grade; (6) derivatives traded on recognized overseas stock exchanges, but only for hedging and portfolio balancing purposes; (7) short-term deposits with overseas investment-grade banks; and (8) units/securities issued by overseas MFs or unit trusts registered with overseas regulators.

| Limits (max.) on investment portfolio held abroad | Yes |

Effective June 3, 2021, MFs registered with SEBI are permitted per MF to invest abroad up to a maximum of US$1 billion (previously US$300 million a MF), within the overall industry limit of US$7 billion.

Investments are permitted in: (1) ADRs/GDRs of Indian and foreign companies; (2) equities of overseas companies listed on recognized overseas stock exchanges, including initial and follow-up public; (3) foreign investment-grade debt securities in countries with fully convertible currencies; (4) money market investment-grade investments, including repos with investment-grade counterparties; (5) G-Secs of countries rated at investment grade; (6) derivatives traded on recognized overseas stock exchanges, but only for hedging and portfolio balancing purposes; (7) short-term deposits with overseas investment-grade banks; and (8) units/securities issued by overseas MFs or unit trusts registered with overseas regulators. MFs are also subject to an aggregate investment ceiling on exposures to overseas ETF(s) that invest in securities of US$1 billion, subject to a maximum of US$300 million a MF.

| Limits (min.) on investment portfolio held locally | Yes |

MFs are subject to investment concentration limits as provided in the SEBI (MFs) Regulations, 1996, and circulars issued thereunder.

Excerpts of the broad provisions in this regard are as under:

A MF scheme may not invest in unlisted debt instruments including...
CPs, except G-Secs, other money market instruments, and derivative products such as interest rate swaps, IRF, etc., which are used by MFs for hedging. However, MF schemes may invest in unlisted non-convertible debentures up to a maximum of 10% of the debt portfolio of the scheme subject to certain conditions.

All investments by a MF scheme in equity shares and equity-related instruments must only be made, provided such securities are listed or to be listed.

Investment in unrated debt and money market instruments, other than G-Secs, treasury bills, and derivative products such as interest rate swaps and IRF by MF schemes is capped at 5%.

Restrictions have been specified on Investment in debt instruments having Structured Obligations/Credit Enhancements.

Restrictions have been specified on Investment in debt instruments with special features like subordination to equity (loss absorption before equity) and/or convertible to equity on trigger of a pre-specified event for loss absorption. Effective April 1, 2021, prudential limits have been updated so that a MF under all its schemes should not own more than 10% of such instruments issued by a single issuer and having special features as mentioned above, and an individual MF scheme may not invest more than 10% of its NAV in such instruments with special features as mentioned above and more than 5% of its NAV in such instruments issued by a single issuer.

A MF scheme may not invest more than 10% of its NAV in debt instruments comprising money market instruments and non-money market instruments issued by a single issuer which are rated not below investment grade by a credit rating agency authorized to carry out such activity. The limit may be raised to 12%, subject to prior approval by the Board of Trustees and the Board of Directors of the asset management company (AMC).

A MF under all its schemes should not own more than 10% of units issued by a single issuer of Real Estate Investment Trust (REIT) and Infrastructure Investment Trust (InvIT), and an individual MF scheme may not invest more than 10% of its NAV in the units of REIT and InvIT, and more than 5% of its NAV in the units of REIT and InvIT issued by a single issuer.

MF schemes are also subject to a limit on exposures to a single sector in debt-oriented MF schemes (excluding investments in bank CDs, collateralized borrowing and lending obligation (CBLO), G-Secs, T-Bills, and AAA-rated securities issued by Public Financial Institutions, Public Sector Banks, and short-term deposits of scheduled commercial banks) set at 20% of NAV. A further exposure to the financial services sector (over the 20% limit), but not exceeding 10% of the scheme’s NAV, is allowed only via an increase in exposure to Housing Finance Companies (HFCs), provided the HFCs are rated at AA or above and are registered under Section 29A of the National Housing Bank, 1987. Further, an additional exposure of 5% of the net assets of the scheme has been allowed for investments in securitized debt instruments (SDI) based on retail housing loan portfolio and/or affordable housing loan portfolio, and the aggregate investment exposure to HFCs cannot exceed 20%. The additional exposure limits provided for HFCs in financial services sector have been capped at 10%.
A MF scheme should not park more than 10% of NAV in short-term deposits at a single scheduled commercial bank including its subsidiaries. No MF scheme must park more than 15% of their net assets in short-term deposits of all scheduled commercial banks put together. This limit, however, may be raised to 20% with prior approval of the Trustees.

No MF under all its schemes should own more than 10% of any company’s paid-up capital carrying voting rights.

No MF scheme must make any investment in:
(1) any unlisted security of an associate or group company of the sponsor or
(2) any security issued by way of private placement by an associate or group company of the sponsor or
(3) the listed securities of group companies of the sponsor which is in excess of 25% of the net assets.

No MF scheme must invest more than 10% of its NAV in the equity shares or equity-related instruments of any company.

MFs/AMCs must ensure that total exposure of debt schemes of MFs in a group (excluding investments in securities issued by Public Sector Units, Public Financial Institutions, and Public Sector Banks) do not exceed 20% of the net assets of the scheme. Such investment limit may be extended to 25% of the net assets of the scheme with the prior approval of the Board of Trustees.

However, the investments by debt MF schemes in debt and money market instruments of group companies of both the sponsor and the AMC may not exceed 10% of the net assets of the scheme. Such investment limit may be extended to 15% of the net assets of the scheme with the prior approval of the Board of Trustees.

A MF scheme’s exposure to repo transactions in corporate debt securities is capped at 10% of the scheme’s NAV. The cumulative exposure through repo transactions in corporate debt securities, equity, debt, and derivatives should not exceed 100% of the scheme’s NAV.

MF schemes may participate in exchange-traded currency derivatives (ETCDs) of a particular goods (single), not exceeding 10% of NAV of the scheme. However, the limit of 10% is not applicable for investments through gold ETFs in ETCDs having gold as underlying. In case of multi-assets allocation schemes, the exposure to ETCDs may not be more than 30% of the NAV of the scheme. In case of other hybrid schemes excluding multi-assets allocation scheme, the participation in ETCDs may not exceed 10% of NAV of the scheme.

**Changes during 2021 and 2022**

**Arrangements for Payments and Receipts**

| Prescription of currency requirements | 07/08/2022 | All eligible current account transactions including trade transactions with Sri Lanka have been allowed to be settled in any permitted currency outside the ACU mechanism until further notice. |

Currency-matching regulations on assets/liabilities composition: n.a.
currency

For current transactions and payments 07/11/2022

There is an additional arrangement for invoicing, payment, and settlement of exports/imports in INR. Before putting in place this mechanism, AD banks shall require prior approval from the Foreign Exchange Department of Reserve Bank of India, Central Office at Mumbai. Mechanisms are (1) invoicing: all exports and imports under this arrangement may be denominated and invoiced in rupee (INR); (2) exchange rate: exchange rate between the currencies of the two trading partner countries may be market determined; and (3) settlement: the settlement of trade transactions under this arrangement shall take place in INR.

Controls on trade in gold (coins and/or bullion)

On domestic ownership and/or trade 12/09/2021

Mutual funds (MFs), namely silver exchange-traded funds, may invest in silver and silver-related instruments. Specified categories of MF schemes are also allowed to participate in Exchange-Traded Commodity Derivatives having silver as underlying.

Controls on exports and imports of banknotes

On exports

Domestic currency 12/15/2021

Indian passport holders as well as persons of Indian origin carrying the Overseas Citizen of India Card along with their passports traveling to Gurdwara Darbar Sahib, Kartarpur, Narowal, Pakistan through the Sri Kartarpur Sahib Corridor, shall be allowed to carry outside and bring into India at the time of his/her return, only Indian currency notes and/or foreign currency in USD, the total value of which may not exceed Rs 11,000.

On imports

Domestic currency 12/15/2021

Indian passport holders as well as persons of Indian origin carrying the Overseas Citizen of India Card along with their passports traveling to Gurdwara Darbar Sahib, Kartarpur, Narowal, Pakistan, through the Sri Kartarpur Sahib Corridor, shall be allowed to carry outside and bring into India at the time of his/her return, only Indian currency notes and/or foreign currency in USD, the total value of which may not exceed Rs 11,000.

Imports and Import Payments

Import taxes and/or tariffs 02/01/2021

The important duty changes made in the 2021–2022 budget include:

1. Customs duty has been reduced uniformly to 7.5% on semis, flat, and long products of non-alloy, alloy, and stainless steels. Customs duty on steel scrap is being exempted for a period up to March 31, 2022. Customs duty on copper scrap is being reduced from 5% to 2.5%; steel screws and plastic builder wares duty increases from 10% to 15%.

2. Basic customs duty rates on caprolactam, nylon chips, and nylon fiber and yarn are being reduced uniformly to 5%.

3. Customs duty on naphtha has been reduced from 4% to 2.5% and increased to 7.5% on bisphenol A and epichlorohydrin.

4. Custom duty on gold and silver is being rationalized to bring it closer to previous levels.

5. Customs duty is being raised from 5% to 20% on solar invertors and 5% to 15% on solar lanterns.

6. Customs duty on certain auto parts is also being raised to 15%.

7. Exemption on tunnel boring machine has been withdrawn. It attracts customs duty of 7.5%. Its parts will attract a duty of 2.5%.

8. Customs duty on prawn feed increased from 5% to 15%.

9. Customs duty on raw cotton and cotton waste increased from nil to 10%.

10. Customs duty on raw silk and silk yarn increased from 10% to
15%.
(11) Rates have been calibrated on items such as maize bran, rice bran oil cake, and animal feed additives uniformly to 15%.

02/01/2021 The duty on specified iron and steel products was decreased to 7.5% from 10% and 12.5%.

02/02/2022 The important duty changes made in the 2022–2023 budget include:
(1) Customs duty on fisheries product such as Atlantic Salmon and Live Black tiger shrimp has been reduced to 10%, whereas, on Frozen Krill, Frozen Mussels, and Frozen Squids customs duty has been reduced to 15%.
(2) Customs duty on fuel oil, straight run fuel oil, low sulfur wax residue, vacuum residue, slurry, and vacuum gas oil reduced to 2.5%.
(3) Customs duty on sodium cyanide has been increased to 10%.
(4) Customs duty on methyl alcohol and acetic acid has been reduced to 2.5% and 5%, respectively.
(5) Customs duty on recovered (waste and scrap) paper or paperboard imported for manufacture of paper, paperboard, or newsprint has been increased to 2.5%.
(6) Customs duty on umbrellas and sun umbrellas has been increased to 20%.
(7) Customs duty on cut and polished diamonds and cut and polished natural gemstones has been decreased to 5%.
(8) Customs duty on S. G ingot castings for use in the manufacture of plastic processing machineries has been reduced to 7.5%.
(9) Customs duty on linear motion guides and ball screws for use in the manufacture of plastic processing machineries has been reduced to 5%.
(10) Customs duty on camera lens for use in manufacture of camera module of cellular mobile phone has been reduced to 2.5%.
(11) Customs duty on specified parts of transformers for use in manufacture of chargers/adapters has been reduced to 5%.
(12) Customs duty on specified parts of X-ray machines for medical, surgical, dental, or veterinary use has been increased to 10%.
(13) Customs duty on X-ray machines for medical, surgical, dental, or veterinary use has been increased to 10%.
(14) Customs duty on parts of electronic toys used in the manufacture of electronic toys has been increased to 25%.

Payments for Invisible Transactions and Current Transfers

Controls on these transfers

Trade-related payments 07/08/2022 All eligible current account transactions including trade transactions with Sri Lanka have been allowed to be settled in any permitted currency outside the ACU mechanism until further notice.

07/11/2022 There is an additional arrangement for invoicing, payment, and settlement of exports/imports in INR. Before putting in place this mechanism, AD banks shall require prior approval from the Foreign Exchange Department of Reserve Bank of India, Central Office at Mumbai. Mechanisms are (1) invoicing: all exports and imports under this arrangement may be denominated and invoiced in rupee (INR); (2) exchange rate: exchange rate between the currencies of the two trading partner countries may be market determined; and (3) settlement: the settlement of trade transactions under this arrangement shall take place in INR.

Capital Transactions

Controls on capital transactions

Controls on capital and money market instruments
### On capital market securities

**Shares or other securities of a participating nature**

- **Purchase abroad by residents**
  - 05/21/2021: Securities and Exchange Board of India-registered venture capital funds and AIFs may invest in equity and equity-linked instruments of foreign venture capital undertaking, subject to an overall limit of US $1,500 million (increased from US$750 million).

**Bonds or other debt securities**

- **Purchase locally by nonresidents**
  - 04/01/2022: The investment limit under the Voluntary Retention Route for investment in government and corporate debt securities by Foreign Portfolio Investors is increased by Rs 100,000 crore to Rs 250,000 crore.
  - 07/06/2022: Nonresidents registered as Foreign Portfolio Investors and Nonresident Indians/Overseas Citizen of India are allowed to participate in Indian debt markets, to encourage foreign portfolio investment. This is part of the measures introduced to further diversify and expand the sources of foreign exchange funding to mitigate volatility and dampen global spillovers, to enhance foreign exchange inflows while ensuring overall macroeconomic and financial stability.

- **Sale or issue abroad by residents**
  - 07/06/2022: Temporarily increase the limit under the automatic route of External Commercial Borrowings from US$750 million or its equivalent per financial year to US$1.5 billion. This is part of measures to further diversify and expand the sources of foreign exchange funding so as to mitigate volatility and dampen global spillovers, to enhance foreign exchange inflows while ensuring overall macroeconomic and financial stability.

### On money market instruments

- **Purchase abroad by residents**
  - 06/03/2021: Mutual funds (MFs) registered with Securities and Exchange Board of India are permitted per MF to invest abroad up to a maximum of US$1 billion (previously US$300 million a MF), within the overall industry limit of US$7 billion.

### Controls on derivatives and other instruments

- **Purchase locally by nonresidents**
  - 02/15/2021: Exchange of margin between a resident and a nonresident for permitted derivative contracts is enabled under Foreign Exchange Management Act, 1999.

### Controls on credit operations

- **Financial credits**
  - To residents from nonresidents
    - 07/06/2022: Temporarily increase the limit under the automatic route of External Commercial Borrowings from US$750 million or its equivalent per financial year to US$1.5 billion. This is part of measures to further diversify and expand the sources of foreign exchange funding so as to mitigate volatility and dampen global spillovers, to enhance foreign exchange inflows while ensuring overall macroeconomic and financial stability.

### Provisions Specific to the Financial Sector

- **Differential treatment of deposit accounts in foreign exchange reserve requirements**
  - 02/05/2021: Scheduled Commercial Banks have been allowed to deduct the
amount equivalent to credit disbursed to “New micro, small, and medium enterprises (MSME) borrowers” from their net demand and time liabilities for calculation of the cash reserve ratio. For the purpose of this exemption, “New MSME borrowers” are defined as those MSME borrowers who have not availed any credit facilities from the banking system as on January 1, 2021. This exemption will be available only up to Rs 25 lakh a borrower disbursed up to the fortnight ending October 1, 2021 (extended till December 31, 2021), for a period of one year from the date of origination of the loan or the tenure of the loan, whichever is earlier.

<table>

<table>
<thead>
<tr>
<th>Floating</th>
<th>Yes.</th>
</tr>
</thead>
</table>

- The de jure exchange rate arrangement is free floating (adopted August 14, 1997). The exchange rate is determined by supply and demand in the foreign exchange market. Bank Indonesia (BI),
however, may intervene—as part of a policy mix—whenever necessary to achieve the inflation target and to maintain macroeconomic stability.

Global economic improvement continued in 2021 despite divergence across regions. At the same time, global financial market uncertainty persisted in response to emerging risks, including transmission of the Delta variant; market anticipation of tapering by the Fed; and concerns stoked by lingering inflationary pressures. The economic recovery divergence had resulted in unsynchronized exit policy, both monetary and fiscal, between advanced economies, particularly USA, and emerging economies. However, a transparent policy communication on the exit policy plan from the Fed was able to ease the global financial market uncertainty and reduced the intensity of capital outflows from developing economies, that in turn resulted on milder pressures on exchange rates in emerging market economies, including Indonesia.

In 2021, the Indonesian balance of payments (BOPs) recorded a US$13.5 billion surplus, continuing from a US$2.6 billion surplus in the previous year. The BOP surplus originated from a current account surplus coupled with capital and financial account surplus. In 2021, the current account booked a US$3.5 billion surplus (0.3% GDP), after recording US$4.4 billion deficit (0.4% GDP) in 2020. The surplus was mainly supported by rapid export performance in line with increasing demand from trading partner countries and high global commodity prices, amidst increasing imports as the domestic economic recovery progressed. In addition, the capital and financial account in 2021 also booked a US$12.1 billion, higher than a US$7.9 billion surplus achieved in the previous year, mainly supported by direct investment and portfolio investment. Congruently, the position of reserve assets increased to US$144.9 billion at the end of December 2021, equivalent to finance 8.0 months of imports or 7.8 months of imports and servicing Government’s external debt, which is well above the international adequacy standard. The strong performance of Indonesia’s external sector continued until the second quarter of 2022 as the BOP remains solid despite a build-up of pressure on capital flows. The current account is expected to maintain a surplus in the second quarter of 2022, thus extending the surplus recorded in the previous period, primarily supported by a larger non-oil and gas trade surplus given persistently high international commodity prices. The capital and financial account also remains solid supported primarily by inflows in the form of FDI. The position of reserve assets in Indonesia at the end of June 2022 stood at US$136.4 billion, equivalent to 6.6 months of imports or 6.4 months of imports and servicing government external debt, which is well above the 3-month international adequacy standard. Overall, a solid BOP performance in 2022 will be maintained in line with a current account surplus projected at surplus 0.3%–deficit 0.5% of GDP because of high international commodity prices. In addition, BOP performance in 2022 will also be supported by the capital and financial account, primarily in the form of FDI because of the conducive domestic investment climate.

The de facto exchange rate arrangement is classified as floating. The BI does not disclose data on its interventions.

Official exchange rate  Yes. Rates are as follows: The official foreign exchange reference rate is the Jakarta interbank spot dollar rate (JISDOR) for US dollars. The
JISDOR represents the weighted average of US dollar–rupiah spot transactions in the interbank market within a specific window, captured in real time through the BI monitoring system. The JISDOR has been published since May 20, 2013, and is intended to be a market reference for US dollar–rupiah spot transactions in the domestic market. The JISDOR is published on every Indonesian business day. The official foreign exchange reference rate for non–US dollar currencies is the midrate of other BI foreign exchange transaction rates. The JISDOR and other foreign exchange midrates are used for BI accounting purposes. The BI foreign exchange transaction rates represent the bid-ask prices of foreign exchange rates against rupiah used for BI transactions with the government and other parties. The BI announces these rates every Indonesian business day. Since May 20, 2013, the calculation of BI foreign exchange transaction rates has been based on the JISDOR. The BI does not publish banknote rates because banknote transactions with third parties are no longer provided.

Monetary aggregate target

**Inflation-targeting framework**  Yes. The BI’s monetary policy framework continues to adhere to an inflation target as the overriding objective (inflation-targeting framework (ITF)). The ITF is implemented by applying policy interest rates as the monetary policy stance and interbank money market (PUAB) rates as operational targets. The experience of the 2008–2009 global financial crisis made the CB require sufficient flexibility to respond to the complexities of economic development and the strengthening role of the financial sector in influencing macroeconomic stability. Considering the lesson learned from the global financial crisis, the BI strengthened the ITF framework to the Flexible ITF, which continued to be based on important ITF elements such as public announcement of the inflation target and forward-looking monetary policy. The essence of the Flexible ITF is the flexibility to integrate monetary and financial system stability frameworks through a policy mix including monetary and macroprudential instruments, exchange rates, capital flows, and institutional strengthening, as well as optimal policy coordination and communication. This enhanced version is known as Central Bank Policy Mix, or Integrated Policy Framework.

The government, in coordination with the BI, set the annual inflation target for 2022 at 3.0% ± 1%, same as the 2020–2021 target and lower than the 2018–2019 target of 3.5% ± 1%. The inflation target is year-over-year headline CPI inflation at the end of the year. The BI announces inflation target accomplishment through the BI Annual Report, which is publicly accessible. If the inflation target is not met, the BI must issue an explanation to the government as material for open explanations presented jointly by the government and the BI to the Indonesian Parliament and the public.
Inflation-targeting framework

The BI's monetary policy framework continues to adhere to an inflation target as the overriding objective (inflation-targeting framework (ITF)). The ITF is implemented by applying policy interest rates as the monetary policy stance and interbank money market (PUAB) rates as operational targets. The experience of the 2008–2009 global financial crisis made the CB require sufficient flexibility to respond to the complexities of economic development and the strengthening role of the financial sector in influencing macroeconomic stability. Considering the lesson learned from the global financial crisis, the BI strengthened the ITF framework to the Flexible ITF, which continued to be based on important ITF elements such as public announcement of the inflation target and forward-looking monetary policy. The essence of the Flexible ITF is the flexibility to integrate monetary and financial system stability frameworks through a policy mix including monetary and macroprudential instruments, exchange rates, capital flows, and institutional strengthening, as well as optimal policy coordination and communication. This enhanced version is known as Central Bank Policy Mix, or Integrated Policy Framework.

The government, in coordination with the BI, set the annual inflation target for 2022 at 3.0% ± 1%, same as the 2020–2021 target and lower than the 2018–2019 target of 3.5% ± 1%. The inflation target is year-over-year headline CPI inflation at the end of the year. The BI announces inflation target accomplishment through the BI Annual Report, which is publicly accessible. If the inflation target is not met, the BI must issue an explanation to the government as material for open explanations presented jointly by the government and the BI to the Indonesian Parliament and the public.

Target setting body

Yes.

Government

Central Bank

Monetary Policy Committee

Central Bank Board

Other

Government and Central Bank

Yes.

The inflation target is set by the government (MOF) in coordination with the BI. The inflation target is preceded by a discussion at the high-level meeting, attended by the BI governor and the government, represented by the MOF, the coordinating minister for economic affairs, and other relevant ministries and institutions. The target is based on consensus at the high-level meeting forum discussing current inflation conditions, the risk of inflation pressure in future, and the long-term inflation target. Furthermore, the BI addressed an official letter to the MOF for the issuance of regulations for setting the inflation target. If the inflation target is not achieved during any given year, the BI must issue an explanation to the government as material for open explanations presented jointly by the government and the BI to the Indonesian Parliament and the public. There is no operational freedom to decide the target, but under extraordinary conditions that render the inflation target unrealistic, the government may change it after coordinating with the BI.

Inflation target

Yes.

Target number

Yes.

Point target

Target with tolerance band

Yes.

The annual inflation target for 2021 is 3.0% ± 1%. As stipulated in Regulation of the Minister of Finance No. 101/PMK.010/2021 of July 28, 2021, on the Inflation Target of Year 2022, Year 2023, and Year 2024, the government, in coordination with the BI, set the annual inflation target for 2022–2023 at 3.0% ± 1% and for 2024 at 2.5% ± 1%.

Band/Range

Target measure

Yes.

CPI

Yes.

Inflation is measured in the CPI and expressed in terms of year-over-year inflation at the end of the year. The CPI is officially released monthly by the Indonesia Statistics Agency (Statistics Indonesia, Badan Pusat Statistik). It is calculated based on the Cost of Living Survey conducted in 90 major cities across Indonesia.

Core inflation

Target horizon

No.

Operating target (policy rate)

Yes.

To achieve the overriding monetary policy objective, the BI has implemented an interest-based monetary policy framework. The monetary policy stance is reflected by setting the policy interest rate (BI seven-day reverse repo rate (BI7DRR)). At the operational level, BI7DRR is reflected in short-term money market interest rates, which are the operational targets of monetary policy. As of June 9, 2008, the BI uses the overnight interbank money market (PUAB O/N) interest rate as the operational target of monetary policy.
The policy rate is the BI7DRR.

The BI communicates its monetary policy through various channels and publications, including press releases and press conferences after board meetings; the Monetary Policy Review/Report presenting the background for decisions made; Economic Report on Indonesia; and explanations provided directly to the public, the media, economic actors, market analysts, and academics.

The BI submits the Policy Accountability Report on a quarterly basis to the House of Representatives (DPR) as a form of accountability for carrying out the duties and authorities set out in the law. Accountability for monetary policy is carried out through written submissions and verbal explanations of the implementation of monetary policy each quarter and of specific aspects of monetary policy as may be deemed necessary. The Policy Accountability Report was also submitted to the government and made available to the public for the purposes of transparency and coordination. Moreover, the BI also conducts a hearing with the Parliament regarding the BI’s annual budget.

BI policy communications use several channels of communication; that is, press releases of decisions of the board meeting; a press conference after the board meeting; publication of policy reports—that is, the Monetary Policy Review/Report, Financial Stability Report, Economic Report on Indonesia, and so forth; a quarterly report to the Parliament as part of accountability based on the Central Bank Act; and policy dialogue with the Parliament. Monetary policy communications provide information about recent economic developments, policy decisions pursued by the BI, and the outlook for the economy. Such information is provided to the public, parliament, the media, business actors, market analysts, and academics.

Votes are not published. After board meetings, monetary policy decisions appear in the first paragraph of the press release. The paragraph outlines decisions made at the board meeting and reveals the policy direction that will be taken by the BI. There is no information published regarding voting of board members, whether on individual votes or on votes in favor or against a decision.

Minutes are not published. The BI does not publish minutes for board meetings. All information regarding the meeting is published in a press release. Comprehensive information regarding economic development and prospects, as well as policy decisions, including background based on board meeting materials, is provided in monetary policy reviews and reports.

Inflation forecasts are published in the Monetary Policy Report every quarter, or four times a year. Inflation forecasts are also published in the Economic Report on Indonesia (annual publication) presenting forecasts of CPI inflation and its components and on some risk factors. In the Monetary Policy Report, forecasts are presented in a
fan chart. In the Economic Report on Indonesia, inflation forecasts are presented for the short term (current year) and medium term. A summary of inflation forecasts is also included in press releases and press conferences after board meetings. Both the report and press releases are available to the public on the bank’s website.

Commercial banks may freely set their exchange rates and commissions for transactions with clients. The BI regulates foreign exchange transactions against rupiah between commercial banks and domestic and foreign parties to strengthen and increase the governance of the foreign exchange market without restricting the use of the acquired foreign currency. Foreign exchange transactions above a certain threshold must be supported by documents on the underlying trade or investment transactions, with certain exemptions. Spot transactions must be settled in full on delivery. Derivative transactions may be settled in full or by netting. Derivative transactions can also be settled through rollover, early termination, or unwinding of the initial derivative transaction.

**Spot exchange market** | Yes. |

As of the end of December 2021, there were 69 commercial banks licensed for foreign exchange activity. Through BI Regulation No. 24/7/PBI/2022, the purchases of foreign currency against rupiah by residents and nonresidents through spot transactions exceeding a certain threshold are subject to verification of supporting documents on the underlying transaction. Spot transactions must be settled in full.

The number of money changers as of December 2021 was 1,057 for nonbank money exchange activities.

**Operated by the central bank** | No. |

The BI revoked the facility for foreign exchange liquidity to domestic companies by conducting spot transactions through commercial banks in connection with economic activities in Indonesia.

**Foreign exchange standing facility** | No. |

**Allocation** | No. |

**Auction** | No. |

**Fixing** | No. |

**Interbank market** | Yes. |

As of December 31, 2021, there were 107 commercial banks with foreign exchange activity licenses. Interbank spot transactions against rupiah can be done without underlying transactions.

The foreign exchange market operates directly among market participants (interbank) or indirectly through brokers in the OTC market. Effective June 30, 2021, interbank spot market transactions can be done through electronic trading platform multimatching.

**Over the counter** | Yes. |

As of June 2021, interbank spot market can be done through electronic trading platform multimatching.

**Brokerage** | Yes. |

There are eight money brokers available in the foreign exchange market, with a total share of 40% from the total interbank spot
Market making Yes. The foreign exchange market operates based on a market-making mechanism.

Forward exchange market Yes. The domestic forward exchange market is regulated by BI Regulation No. 24/7/PBI/2022. Forward transactions (buying and selling) above a certain threshold must be supported by underlying documents. To promote foreign exchange supply through forward transactions, the threshold amount for forward sell is the equivalent of US$5 million a transaction without an underlying transaction. Above US$5 million a transaction of forward sell must be supported by underlying documents.

Official cover of forward operations No.

Arrangements for Payments and Receipts

Prescription of currency requirements Yes. Rupiah may not be used by or transferred to any party outside Indonesia.

Controls on the use of domestic currency Yes. According to BI Regulation No. 24/6/PBI/2022 concerning Policy the Use of Rupiah on International Activities, the policy on the use of Rupiah in international activities is based on the following main principles: (1) the use of Rupiah can only be carried out within the Territory of the Republic of Indonesia and (2) in the event that Rupiah is used outside the Territory of the Republic of Indonesia, its use may be limited as long as it has a positive impact and benefit on the Indonesian economy by taking into account: (a) the condition, size, and level of openness of the national economy, (b) conditions, openness, and depth of financial markets, and (c) institutional and infrastructure readiness.

According to BI Regulation No. 24/7/PBI/2022, transfer rupiah outside Indonesia jurisdiction is prohibited. Hence, rupiah could be used for the settlement of bilateral transaction under local currency settlement (LCS) mechanism. The threshold for rupiah transfers to accounts of foreign parties as stated in Article 18 is as follows: Bank receiving Rupiah transfer must ensure Rupiah transfer to (1) accounts owned by nonresident or (2) joint accounts owned by nonresident and resident have underlying transactions with nominal value greater than US$1 million.

Pursuant to Article 44 and Article 50 of BI Regulation concerning Payment Service Provider, Payment Service Provider is required to meet general principles in Payment System including implementation of mandatory use of rupiah.

Pursuant to Article 201 of BI Regulation concerning Payment Service Provider, Payment Service Provider is prohibited from having and/or managing the value which may be equated to the value of money or value other than rupiah which may be widely used for the payment purpose.

Pursuant to Article 4 (1) of BI Regulation concerning Non-Bank Foreign Exchange Business, the purchase of foreign banknotes from money changers may not exceed the nominal value of the underlying transaction.

For current transactions and payments Yes.

For capital transactions Yes.

Transactions in capital and money market Yes.
The use of foreign exchange among residents is not allowed in Indonesian territory, as stated in Article 21 of Act No. 7, 2011, concerning the Indonesian currency and Article 2 and Article 4 of BI Regulation No. 17/3/PBI/2015 on the obligation to use rupiah in Indonesia. However, certain transactions are exempt: (1) certain transactions within the framework of budget revenue and expenditure implementation, (2) disbursement of grants from/to overseas entities, (3) international trade transactions, (4) bank deposits in foreign currency, and (5) international financing transactions.

Pursuant to Article 2 of BI Regulation concerning Non-Bank Foreign Exchange Business Activities, Non-Bank Foreign Exchange Business Activities include:
(1) exchange in the mechanism of selling and buying foreign banknotes and
(2) buying traveler’s checks.

Pursuant to Article 11 of BI Regulation concerning Non-Bank Foreign Exchange Business Activities, any nonbank entities, which intend to conduct business activities as money changers, must obtain a license from BI.

Effective August 17, 2021, BI and Bank of Thailand have launched cross-border quick response (QR) payment linkage.
Effective January 27, 2022, BI and Bank Negara Malaysia launched a cross-border QR payment linkage. It will enable instant, secure, and efficient cross-border payments between Indonesia and Malaysia.

BI has established the framework of LCS based on appointed cross-currency dealers (ACCD) to promote the use of local currency for the settlement of current account transactions and direct investment between Indonesia and other counterpart countries. The framework is designed to enable businesses to settle their transactions with their partner in overseas using local currencies. Currently, BI has implemented maintains bilateral cooperation of LCS ACCD with Bank of Thailand (2018), Bank Negara Malaysia (2018), Japan MOF (2020), and People’s Bank of China (2021). In the LCS framework, BI and monetary authorities of partner countries will appoint some banks in each country, as ACCD banks, to facilitate direct trading of local currencies and obtain foreign exchange administration (FEA) flexibilities. Furthermore, the implementation of LCS using local currency to settle such transactions is not obligatory, mandatory but remains as an option.

Indonesia is a member of ASEAN.
Indonesia has already connected with five other Asian Payment Network (APN) members including Thailand, Philippines, South Korea, and Vietnam for cross-border automated teller machine (ATM) cash withdrawals and inquiry service.
Barter agreements and open accounts  Yes. There are barter arrangements as part of bids for government-sponsored construction and procurement projects whose import components are valued at more than Rp 500 million.

Administration of control  Yes. Under Act No. 24 of 1999 on the Foreign Exchange Activities and Exchange Rate System, residents must submit information and data on foreign exchange activities, directly or through another party stipulated by the BI. The implementation of the provision is prescribed in BI regulations:

BI Regulation No. 21/15/PBI/2019 concerning the Monitoring of Foreign Exchange Flow of Banks and Customers stipulates that banks must submit complete, accurate, and timely information and data on foreign exchange flows to the BI. The regulation also states that bank customers must submit supporting documents to the bank for outgoing foreign currency transfers exceeding US$100,000 or its equivalent.

BI Regulation No. 21/15/PBI/2019 replaces BI Regulation No. 18/10/PBI/2016 to encourage transparency and improve the availability of information on foreign exchange activities through rearrangement of provisions concerning data submission and information, including information related to foreign exchange expenditures for import payments.

BI Regulation No. 16/22/PBI/2014 requires banks and nonbank corporate entities (reporters) to provide complete, accurate, and timely reports to the BI. This regulation updated BI Regulation No. 14/21/PBI/2012, which was adopted as the legal basis for integration of the reporting system for activity in foreign exchange flows with the reporting system for external debt to improve effectiveness and efficiency in monitoring activity in foreign exchange flows by residents. The regulation requires reporters (including state-owned and private enterprises) to report all offshore commercial borrowing, and individuals must report commercial offshore borrowing equivalent to US$200,000 or more. The regulation also requires nonbank corporations that have external debt in foreign currency to implement prudential principles in addition to their reports on foreign exchange flows.

BI Regulation No. 21/2/PBI/2019 concerning the Reporting of Foreign Exchange Activities revokes and replaces BI Regulation No. 16/22/PBI/2014, specifically regarding reporting of foreign exchange activities. The new regulation also aims to strengthen the implementation of offshore loans and banks’ other foreign exchange obligations.

Pursuant to Article 31 of BI Regulation concerning Non-Bank Foreign Exchange Business Activities, a money changer must submit the following reports to BI:

1. periodic reports (among others include monthly reports of Non-Bank Foreign Exchange business operation) and
2. incidental reports (among others are report of change of Board of Directors, Board of Commissioners, and/or shareholders, report of office address change, and other reports which may be requested at any time by BI, such as report on foreign exchange rate and certain financial transactions).

Payments arrears  No.

Official  No.
Controls on trade in gold (coins and/or bullion)
On domestic ownership and/or trade No.
On external trade Yes. Travelers may take out freely up to Rp 65,000 a person in Indonesian commemorative gold and silver coins issued in August 1970 and up to Rp 130,000 a person in gold and silver coins issued in October 1974; amounts in excess of these limits require BI approval. Gold may be imported freely. Imports are subject to a levy of Rp 25 per US dollar.

Controls on exports and imports of banknotes
On exports Yes.
Domestic currency Yes. Travelers are free to take out Indonesian notes and coins up to Rp 100 million a person. Larger amounts require BI approval and must be declared to customs.
Foreign currency Yes. According to Act No. 8/2010 on Money Laundering, travelers are free to take out foreign currency notes and coins up to the equivalent of Rp 100 million a person. Amounts in excess of this limit must be declared to customs.
As of March 5, 2018, according to BI Regulation No. 19/7/PBI/2017, concerning Exportation and Importation of Foreign Banknotes, any party carrying foreign currency notes equivalent to at least Rp 1 billion must obtain a license and approval from the BI.

On imports Yes.
Domestic currency Yes. Travelers are free to bring in Indonesian notes and coins up to Rp 100 million a person. Larger amounts must be declared to customs; the authenticity of the rupiah is checked by customs.
Foreign currency Yes. According to Act No. 8/2010 on Money Laundering, travelers are free to take out foreign currency notes and coins up to the equivalent of Rp 100 million a person. Larger amounts must be declared to customs.
As of March 5, 2018, according to BI Regulation No. 19/7/PBI/2017, concerning Exportation and Importation of Foreign Banknotes, any party carrying foreign currency notes equivalent to at least Rp 1 billion must obtain a license and approval from the BI.

Resident Accounts
Foreign exchange accounts permitted Yes.
Held domestically Yes. In accordance with the Currency Act, all transactions in Indonesia must use rupiah. Therefore, no checks may be drawn on foreign exchange accounts, as this is considered a means of payment. Nevertheless, funds in foreign exchange accounts may still be transferred abroad freely, with the terms mentioned in IV.

According to BI Regulation No. 24/7/PBI/2022, as of 30 June, 2022, the threshold for rupiah transfers to accounts of foreign parties as stated in Article 18 is as follows: Bank receiving rupiah transfer must ensure rupiah transfer to (1) accounts owned by nonresident or (2) joint accounts owned by nonresident and resident have underlying transactions with nominal value greater than US$1 million.

Article 2 (3) of BI Regulation concerning Non-Foreign Exchange
Business Activities states that the mechanism of selling and buying foreign banknotes is stipulated as follows:
(1) foreign banknotes must be transferred physically;
(2) rupiah must be transferred physically or through intra-bank or interbank transfers;
(3) buying foreign banknotes above a certain threshold per month per customer of money changers must have underlying transactions or its equivalent as specified in the customer’s foreign currency purchase from a bank through spot transactions; and
(4) if foreign banknotes are bought by a money changer, the obligation set forth in Point (3) will not be applicable.

Article 4 (1) of BI Regulation concerning Non-Bank Foreign Exchange Business states that the purchase of foreign banknotes from money changers may not exceed the nominal value of the underlying transaction.

Approval required | No.
--- | ---
Held abroad | Yes.
Balances may be freely transferred to the home country.
Approval required | No.
Accounts in domestic currency held abroad | No.
These accounts are prohibited because the rupiah is not an internationalized currency.
Accounts in domestic currency convertible into foreign currency | Yes.

### Nonresident Accounts

Foreign exchange accounts permitted | Yes.
Approval required | No.
Checking, savings, and time deposit accounts are permitted. No checks may be drawn on foreign exchange accounts.
Domestic currency accounts | Yes.
According to BI Regulation No. 24/7/PBI/2022, as of 30 June, 2022, the threshold for rupiah transfers to accounts of foreign parties as stated in Article 18 is as follows:
Bank receiving rupiah transfer must ensure rupiah transfer to (1) accounts owned by nonresident or (2) joint accounts owned by nonresident and resident have underlying transactions with nominal value greater than US$1 million.
Convertible into foreign currency | Yes.
Approval required | No.
Blocked accounts | No.

### Imports and Import Payments

Foreign exchange budget | No.
Financing requirements for imports | No. Requirements generally are set by commercial banks on the basis of their assessment.
Minimum financing requirements | No.
Advance payment requirements | No.
Advance import deposits | No.
Documentation requirements for release of foreign exchange for imports | Yes.

Domiciliation is not required. Instead, BI regulations stipulate that release of foreign exchange is subject to underlying documentation of import transactions.

Import payments may be made on either an LC or a non-LC basis depending on the agreement between exporters and importers.

Cement and asbestos sheets, dry batteries, steel slabs, low-voltage electric cords, and electric light bulbs are subject to quality control. BI regulations stipulate that release of foreign exchange is subject to underlying documentation of import transactions.

Imports from countries against which the UN has imposed a trade embargo are prohibited, as are imports from all sources of most secondhand goods and of certain other products. However, secondhand engines, their parts, and other capital goods may be imported by industrial firms for their own use or for reconditioning, in accordance with the guidelines of the Ministry of Trade (MOT). Certain categories of agricultural imports, including foodstuffs, beverages, and fruits, may be imported only by registered importers designated by the MOT. The procurement policies of companies approved for the importation of fruit, alcoholic beverages, and chicken are evaluated annually by the government, although explicit quantitative restrictions are not placed on these products. There is an import ban on rice. The MOT defines the requirements for importers. Companies that meet the requirements must apply and are designated registered importers. These requirements aim to make import administration more orderly. Only the government-owned Bulog (Indonesian Bureau of Logistics, Badan Urusan Logistik/Bulog) may import medium-grade rice. Premium rice may be imported by licensed importers.

There is a registry of authorized importers that includes only Indonesian nationals, although foreign investors are permitted to import the items required for their own projects. Although imports are subject to licensing requirements, most of them are classified under the general importer license.

In April 2022, Indonesia has implemented harmonized system 2022 based on World Customs Organization (WCO) amendment, so that all Minister of Finance Regulations related to tariffs are re-stipulated by Minister of Finance Regulation based on harmonized system 2022, including MFN and preferential import duty rates. Generally, MFN import duties range from 0% to 5% except for some sensitive products such as automotive or alcohol. Certain products are given preferential duty within the framework of (1) free trade areas (FTA) such as AFTA (ASEAN Trade in Goods Agreement - ATIGA), ASEAN-Australia-New Zealand Free Trade Area (AANZFTA), ASEAN-China Free Trade Area (ACFTA), ASEAN-India Free Trade Area (AIFTA), and ASEAN-Hong Kong, China Free Trade Agreement (AHKFTA); (2) Economic Partnership Agreement (CEP) such as ASEAN-Japan Comprehensive Economic
The government has lowered the limit on the value of imported goods subject to import duties from US$75 a shipment to US$3 a shipment according to Minister of Finance Regulation No. 199 of 2020.

The government enterprise Pertamina imports lubricating oil and lubricating grease, and the Indonesian state-owned company Dahana imports ammunition and gel explosives. Licensed importers are permitted to import lubricating grease (as stated in the joint agreement between the Ministry of Energy and Mineral Resources, MOF, and MOT Republic of Indonesia Nos. 1905 K/34/MEM/2001, 426/KMK.01/2001, and 233/MPP/Kep/7/2001). Imports of ammunition and gel explosives are not limited to Dahana. Other companies have been appointed to import ammunition and gel explosives in the interest of national security.

**Exports and Export Proceeds**

**Repatriation requirements**

Yes. All export proceeds must be received through the Indonesian banking system. Export proceeds derived from natural resource exports must be received in a special account (Reksus DHE SDA -Export Proceeds from Natural Resources Export Goods). These funds need not be kept in a domestic bank, and there are no restrictions on subsequent transfers abroad. There is also no obligation to convert the foreign exchange to domestic currency.

**Surrender requirements**

No.

**Surrender to the central bank**

No.

**Surrender to authorized dealers**

No.

**Financing requirements**

No.

**Documentation requirements**

Yes. MOT Regulation No. 04/M-DAG/PER/1/2015 as revised to MOT Regulation No. 67/M-DAG/PER/8/2015 (revision on the regulation attachment specifically on the scope of commodities) requires LCs for export payments for certain products from natural resources. Export payments must be made through an LC for exports of minerals, coal, crude palm oil, crude palm kernel oil, oil, and gas. Exports of other products that are not regulated in MOT Regulation No. 67/M-DAG/PER/8/2015 may be made on either an LC or a non-LC basis depending on the agreement between exporters and importers.

**Letters of credit**

No. Export payments may be made on either an LC or a non-LC basis depending on the agreement between exporters and importers.

**Guarantees**

No.

**Domiciliation**

Yes.
### Preshipment inspection
Yes. Exports of goods containing imported material that is exempt from import taxes must be inspected before shipment. The government makes exceptions for industries that have the “ease of imports for export purposes” (KITE) facility for inspection before shipment.

### Export licenses
Yes. Exports are prohibited to countries against which the UN has imposed a trade embargo, as are exports to all countries of certain categories of unprocessed or low-quality rubber, brass, and copper scrap (except from the island of Irian Jaya), iron scrap, steel scrap, and antiques of cultural value. Exporters are required to obtain trade permits issued by the MOT.

### Without quotas
Yes. To meet domestic demand and encourage domestic processing of certain raw materials, exports of certain domestically produced commodities must have MOT authorization. Items affected by such controls include clove seeds, logs, fertilizer, cement, iron for construction reinforcement, automobile tires, paper, asphalt, stearin, cattle, salt, wheat flour, maize, soybeans, rice, copra, olein, raw rattan, meat, and all goods produced from subsidized raw materials. Concern about domestic price stability sometimes leads to the suspension of exports of various items in this category.

### With quotas
Yes. Manioc may be exported only by approved exporters. Textiles and textile products subject to import quotas in the consumer countries may be exported only by approved textile exporters, who may transfer their allocated quotas to other approved exporters through the Indonesian Commodity Exchange Board (ICEB, Bursa Komoditi Indonesia).

### Export taxes
Yes.

#### Collected through the exchange system
Yes. Taxes are collected through designated banks authorized by the MOF.

#### Other export taxes
Yes. Export taxes are imposed on skins (bovine/buffalo, goat/sheep), timber, cocoa, mineral concentrates, palm and crude palm oil and its derivatives, and used cooking oil.

Proceeds from Invisible Transactions and Current Transfers

Repatriation requirements No.
Surrender requirements No.
Surrender to the central bank No.
Surrender to authorized dealers No.
Restrictions on use of funds No.

Capital Transactions

Controls on capital transactions Yes. As of July 4, 2022, according to BI Regulation No. 24/7/PBI/2022, banks are prohibited from (1) overdraft/lending/credit for foreign exchange transaction against rupiah, (2) overdraft/lending/credit in rupiah or foreign exchange to nonresident, except for noncash loans or guarantees with certain requirements, syndicated loans led by offshore banks with certain criteria, credit cards, local currency transaction scheme, and personal loans used domestically, (3) buying securities in rupiah issued by nonresident, except for related trade activities with Indonesia and domestic trade activities, overseas bank draft for the benefit of Indonesian migrant workers, and the rupiah funds received in Indonesia by residents, (4) investment in rupiah to nonresident, and (5) rupiah transfer outside Indonesia jurisdiction (overseas).
Repatriation requirements: Yes. BI Regulation No. 16/10/PBI/2014, concerning Receipt of Export Proceeds and Withdrawal of Foreign Exchange from External Debt, has been replaced by BI Regulation No. 17/23/PBI/2015. BI Circular Letter No. 16/9/DSta of May 26, 2014, as provisions of BI Regulation No. 16/10/PBI/2014, remains the guideline for technical processes—for example, requirements for receipt of export proceeds, supporting documents and information submission, and sanction procedures. The purpose of the regulation is to ensure receipt of export proceeds through the Indonesian banking system. These funds need not be kept in a domestic bank, and there is no restriction on subsequent transfers abroad. There is also no obligation to convert the foreign exchange to domestic currency.

Surrender requirements: No.

Surrender to the central bank: No.

Surrender to authorized dealers: No.

Controls on capital and money market instruments: Yes.

On capital market securities: Yes.

Shares or other securities of a participating nature: Yes. Foreign investors are allowed to purchase without limit shares issued by Indonesian companies in the Indonesian capital market. There is a limit on the ownership of joint securities companies that are also finance companies.

Purchase locally by nonresidents: Yes. Foreign investors are allowed to purchase without limit shares issued by Indonesian companies in the Indonesian capital market. There is a limit on the ownership of joint securities companies that are also finance companies.

Sale or issue locally by nonresidents: Yes. Foreign companies are permitted to issue Indonesian depository receipts (IDRs) through custodian banks in Indonesia. IDRs are instruments that facilitate the trading of shares of foreign companies in the Indonesian capital market. Custodian banks, in turn, issue IDRs based on the shares that the foreign companies have in the custodian bank. Clarification of Article 1, Paragraph 15, of Law No. 8 of 1995 concerning the Capital Market states that “An ‘Offering’ within the territory of the Republic of Indonesia includes both domestic and foreign issuers, as well as offerings to both domestic and foreign investors, in compliance with the disclosure principle.” Accordingly, a public offering must be handled by professionals registered in the capital market as regulated in Article 64 of the Capital Market Law and other provisions in the capital market regulations—among others: Rule No. IX.A.1 concerning General Provisions of Registration Statement, Rule No. IX.A.2 concerning Registration Procedures for Public Offering, Otoritas Jasa Keuangan (OJK—Financial Services Authority (FSA)) Regulation No. 7/Peraturan Otoritas Jasa Keuangan (POJK).04/2017 concerning Registration Statement Documents for Public Offering of Equity and Debt Securities, and/or Sukuk and OJK Regulation No. 8/POJK.04/2017 concerning Form and Content of a Prospectus and Brief Prospectus for Public Offering of Equity Securities. An alternative to a direct public offering is of IDRs as stipulated in Rule No. IX.A.10 of Public Offerings of IDRs.

Purchase abroad by residents: Yes. Pension funds may not invest in securities abroad, and collective investment scheme (CIS) mutual funds may invest abroad only up to 15% of their NAV. Protected mutual funds and guaranteed mutual funds may invest up to 30% of their NAV abroad.

Sale or issue abroad by residents: Yes. No controls apply as long as the shares are not listed on the Indonesia Stock Exchange. Securities listed on the Indonesia Stock Exchange must comply with the Capital Market Law and with the requirement concerning the maximum percentage of foreign ownership of shares.
<table>
<thead>
<tr>
<th>Bonds or other debt securities</th>
<th>Yes.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Purchase locally by nonresidents</td>
<td>Yes.</td>
</tr>
</tbody>
</table>

In general, government bonds are issued in the primary market only through predetermined primary dealers. Nonresidents may purchase government bonds issued in the primary market through local primary dealers without limitation.

In the secondary market, both resident and nonresident investors may purchase government bonds freely. However, government bonds issued specifically for individual and retail investors, called Indonesian retail bonds (in Indonesian, Obligasi Negara Ritel) and retail sukuk (in Indonesian, Sukuk Ritel), may be purchased in the primary market only by Indonesian investors through a predetermined selling agent. Since 2018, those retail instruments may only be purchased by resident investors, both individual and institutional, in the secondary market. [OJK]

No regulation explicitly limits the purchase of corporate bonds locally by nonresidents. Investment in other domestic bond markets and debt securities (that is, corporate bonds, commercial paper (CP), and CDs) is not clearly regulated in the context of nonresident transactions—thus, such transactions are carried out in practice and are considered free of capital controls.

| Sale or issue locally by nonresidents | No. |

There are no regulations concerning the sale of bonds and other debt securities locally by nonresidents, and thus this type of activity is considered to be free of capital controls. The regulations on the issuance of bonds do not differentiate between residents and nonresidents and, therefore, this type of activity is also considered to be free of capital controls. Clarification of Article 1 Paragraph 15 of Law No. 8 of 1995 concerning the Capital Market states that “An ‘offering’ within the territory of the Republic of Indonesia includes both domestic and foreign issuers, as well as offerings to both domestic and foreign investors, in compliance with the disclosure principle.” According to this condition, the public offering must be handled by professionals registered in the capital market as regulated in Article 64 of the Capital Market Law and other provisions in the capital market regulations, among others: Rule No. IX.A.1 concerning General Provisions of Registration Statement, Rule No. IX.A.2 concerning Registration Procedures for Public Offering, OJK Regulation No. 7/POJK.04/2017 concerning Registration Statement Documents for Public Offering of Equity and Debt Securities and/or Sukuk, and OJK Regulation No. 8/POJK.04/2017 concerning Form and Content of a Prospectus and Brief Prospectus for Public Offering of Equity Securities.
Documents for Public Offering of Equity and Debt Securities and/or Sukuk, and OJK Regulation No. 9/POJK.04/2017 concerning Form and Content of a Prospectus and Brief Prospectus for Public Offering of Debt Securities. An alternative to direct public offering is publication of IDRs as stipulated in Rule No. IX.A.10 of Public Offerings of IDRs.

**Purchase abroad by residents**

Yes. Purchases of bonds and other debt securities abroad are regulated only for pension funds, which may not invest in securities abroad, and domestic mutual fund companies as follows: CIS mutual funds may invest abroad up to 15% of their NAV, and protected mutual funds and guaranteed mutual funds may invest up to 30% of their NAV abroad, for prudential purposes. No regulations explicitly limit purchases abroad by other resident investors.

**Sale or issue abroad by residents**

Yes. The sale of bonds or other debt securities abroad by residents is not clearly regulated and is considered free of capital controls. The issuance of bonds or other debt securities abroad is subject to the same regulations that apply to resident investors who issue these securities locally, and in this respect, this activity is considered to be free of capital controls, with the exception of issuance of securities with maturities of more than one year, which is subject to BI approval. However, the issuer under the supervision of Indonesia’s FSA must fulfill the principles of disclosure, which are regulated by the FSA, among others, giving notice of a public offering abroad as stipulated in OJK Regulation No. 31/POJK.04/2015 concerning Disclosure of Information or Material Facts by Issuer or Public Company. Furthermore, if the issuance of securities is in the form of a public offering, the issuer must follow the provisions of the public offering as set forth in, among others, Rule No. IX.A.1 concerning General Provisions of Registration Statement, Rule No. IX.A.2 concerning Registration Procedures for Public Offering, OJK Regulation No. 7/POJK.04/2017 concerning Registration Statement Documents for Public Offering of Equity and Debt Securities and/or Sukuk, and OJK Regulation No. 9/POJK.04/2017 concerning Form and Content of a Prospectus and Brief Prospectus for Public Offering of Debt Securities.

The government is able to issue the global bonds in any currency and/or repurchase the global bonds. Global bond issuance and/or repurchase is based on international market standards.

The government is able to sell the global bonds to individuals who are Indonesian citizens (residents) as well as foreign nationals (nonresidents) wherever they are domiciled, companies, joint ventures, associations, or organized groups, either Indonesian or foreigners, wherever they are located.

**On money market instruments**

Yes.

**Purchase locally by nonresidents**

Yes. BI Regulation No. 23/10/PBI/2021 Article 27 states that nonresidents may engage in money market transactions domestically including sales and purchases of money market transaction and/or doing foreign exchange money market transactions that must be done through Money Market Supporting Institution.

However, regarding negotiable certificate of deposits (NCDs), BI Regulation No. 19/7/PADG/2017 Article 15 implies that while nonresidents may buy NCDs in the primary market, nonresidents may buy NCDs from other nonresidents only in the secondary market.

Regarding money market instruments denominated in rupiah, nonresidents may purchase BI certificates (tradable BI certificates,
sertifikat Bank Indonesia (SBIs)) in the secondary market. However, the minimum holding period for all investors (domestic and foreign) for purchases of SBIs in the primary and secondary markets is one week (Press Release No. 17/71/DKom of September 30, 2015). In addition, according to Article 6 of BI Regulation No. 24/10/PADG/2022, purchases of rupiah against foreign currency exceeding $100,000 a month and transfers of rupiah to nonresident exceeding $1,000,000 a transaction must have underlying trade or investment documentation, current accounts activities, and financial account activities.

Sale or issue locally by nonresidents: Yes. Regarding issuance of domestic market instruments, BI Regulation No. 18/11/PBI/2016 Article 8 states that only residents can issue domestic money market instruments. Residents as issuers must be registered with the BI to issue domestic money market instruments. However, for lending and borrowing transactions such as unsecured call money and repurchase agreement transactions, nonresidents may make transactions domestically.

Purchase abroad by residents: Yes. Based on Article 4 of BI Regulation No. 18/18/PBI/2016, residents may not purchase foreign currency against rupiah above a certain threshold for investment in offshore money market instruments; that is, current accounts, savings accounts, time deposits, and NCDs. Pension funds may not invest in securities abroad, and mutual funds may invest abroad only up to 15% of their NAV.

Sale or issue abroad by residents: Yes. The absence of regulations concerning the sale or issuance of money market instruments abroad indicates that the activity is free of capital controls, with the exception of those issued by nonbank corporate entities, which must fulfill prudential requirements and must report the activity to the BI.

On collective investment securities: Yes.

Purchase locally by nonresidents: Yes. No person may purchase more than 1% of any fund.

Sale or issue locally by nonresidents: No.

Purchase abroad by residents: No.

Sale or issue abroad by residents: No.

Controls on derivatives and other instruments: Yes. According to BI Regulation No. 24/7/PBI/2022, foreign exchange transaction above a certain threshold must be supported by underlying documents. Derivatives against rupiah transaction limited to forward, domestic non-deliverable forward (DNDF), swap, option, cross-currency swap, call spread option, and structured products. According to BI Regulation No. 12/10/PBI/2010, banks may not incur losses from derivative transactions exceeding 20% of their capital.

Purchase locally by nonresidents: Yes. Effective July 4, 2022, underlying documents are required for derivatives transactions over US$100,000 a month a customer (previously, the limit was US$1 million a transaction a foreign party or a position). Based on BI Regulation No. 24/7/PBI/2022, effective July 4, 2022, structured derivative products are allowed to be transacted.

Sale or issue locally by nonresidents: Yes. Underlying documents are required for derivative transactions exceeding US$1 million a month a customer. Foreign exchange forwards and DNDFs exceeding US$5 million a month a customer must have underlying documents. As of June 26, 2018, BI Regulation No. 20/13/PBI/2018 allows nonresidents to engage in interest rate derivative transactions (in rupiah) locally with banks without underlying documents.

Controls on direct investment
Yes.

Outward direct investment
No.

Inward direct investment
Yes.

Effective March 4, 2021, as part of the implementing regulations to the Omnibus Law (Law No. 11 of 2020), the government introduced investment business activities, under Presidential Regulation No. 10 of 2021 on Investment Business Activities Junto Presidential Regulation No. 49 of 2021, to replace the negative investment list (Daftar Negatif Investasi—DNI) under Presidential Regulation No. 44 of 2016 and Presidential Regulation No. 76 of 2007. Permitted and restricted sectors have been simplified, and instead of navigating a long list of businesses that foreign investors cannot invest in, they can now target the desired business and comply with the necessary conditions. All business sectors on the investment business activities list are open to foreign investment unless expressly prohibited; can be carried out only by the central government; or are allocated to, or require partnership with, cooperatives and micro-, small-, and medium-sized enterprises (MSMEs). As on the previous DNI, the list of business sectors in investment business activities refers to the classification of sectors set out in the Indonesian business sector classifications.

President Regulation No. 10 of 2021 on Investment Business Activities Junto Presidential Regulation No. 49 of 2021 includes three appendixes. Appendix I, List of Priority Business Activities, lists business activities that satisfy the following criteria: (1) nationally strategic project/program; (2) capital-intensive; (3) labor-intensive; (4) advanced technology; (5) pioneer industry; (6) export oriented; and/or (7) oriented toward research, development, and innovation activities. This list includes 246 (groups of) business activities in important sectors (transportation, energy, distribution, construction services, media, telecommunications) eligible for fiscal incentives of tax allowance, tax holiday, or investment allowance. Appendix I is not an exhaustive list; there are still available fiscal incentives in accordance with the provisions of laws and regulations—among them, super tax deduction for vocational expenses, super tax deduction for research and development expenses, import duty exemption for the importation of capital goods for the power plant industry, import duty exemption for the importation of machinery and raw and auxiliary materials for manufacturing and selected service industries, import duty exemption/reduction and/or VAT exemption for the importation of goods for contract of work/coal contract of work, as well as more generous tax allowance and tax holiday programs in special economic zones.

Appendix II, List of 106 (Group of) Business Activities Allocated to, or Requiring Partnership with, Cooperatives and MSMEs, lists business activities allocated to cooperatives and MSMEs, namely, those (1) not using technology or using simple technology; (2) with specific processes that are labor-intensive in nature and that have special and cultural significance; and (3) requiring capital not exceeding Rp 10 billion, excluding the value of land and buildings. Business activities requiring partnership with cooperatives and MSMEs are those undertaken mostly by cooperatives and MSMEs and/or encouraged to enter the large-scale enterprise supply chain.
Ministry of Investment/Indonesia Investment Coordinating Board (BKPM), the minister of cooperatives and small and medium micro enterprises, and the coordinating minister for economic affairs strive to make the law fair for large enterprises and MSMEs. Large enterprises are expected to collaborate with local MSMEs where their projects are located to promote equitable economic growth across regions in Indonesia. In addition, partnership is a requirement of application for BKPM fiscal incentives.

Appendix III, List of Business Activities with Certain Requirements, includes 37 (groups of) business activities reserved for domestic investors, with foreign ownership maximums or special license requirements, as well as three strictly limited business activities supervised under specific regulations.

Less restriction of business activities through Presidential Regulation No. 10 of 2021 on Investment Business Activities Junto Presidential Regulation No. 49 of 2021 is expected to promote Indonesia as a preferred location for businesses engaged in labor-intensive manufacturing, export-oriented manufacturing, the pharmaceutical and medical devices industry, renewable energy, infrastructure, and mining industry with added value. These industries will receive strong support and beneficial incentives from the government. There will be more opportunities to enter into new business and to restructure or expand current investment business activities.

Previously, several sectors were on the DNI and were subject to controls: (1) Foreign companies investing in infrastructure projects, such as seaports and airports, land transportation facilities, small capacity electricity generation, shipping, airlines, potable water supply, and nuclear electricity power generation, did not have to be established as public–private partnerships; however, public–private partnerships were permitted higher foreign shareholding. (2) Maximum foreign shareholding, varying from 30% to 95%, was also imposed on other sectors, such as agriculture, telecommunications, distribution and storage, finance, mining, education, and health. (3) In all sectors not listed on the DNI, a foreign investment company could be established as a straight investment; that is, 100% of the shares could be owned by a foreign citizen and/or entity. However, some shares had to be sold to Indonesian citizens and/or entities through direct placement and/or indirectly through the domestic capital market no later than 15 years after the start of commercial operations. Divestment of foreign ownership of direct investments had to begin within the time stipulated by Law No. 25 of 2007.

Foreign enterprises were eligible for the following:
(1) Facility for exemption from import duty on imports of machines, goods, and materials: Enterprises were eligible to receive preferential customs duty treatment for imports of required raw materials and machines subject to certain conditions as prescribed in various government regulations. The procedures and mechanism for exemption from import duty on imports of machines, goods, and materials were stipulated in BKPM Regulation No. 6 of 2018 on Guidelines and Procedures for Investment Licensing and Facilities.
(2) Tax allowance: Enterprises were also eligible to receive an income tax facility, stipulated in the regulations.
(3) Tax holiday: Income tax waivers could be granted to newly established corporations pursuant to the requirements set within government regulations. BKPM Regulation No. 5 of 2018 contains details of business fields and pioneer industry products that can be
granted corporate income tax reduction and procedures for granting the reduction. According to Minister of Finance Regulation (Peraturan Menteri Keuangan - PMK) 35, reduction of corporate income tax (tax holiday) may be granted to newly established corporations for no less than 5 years and for up to 20 years, depending on its investment value.

(4) Foreign workers: Hiring of foreign workers must comply with Presidential Regulation No. 20 of 2018 on the Use of Foreign Workers, which stipulates the procedure for use of foreign workers. Moreover, it also stipulates certain positions that foreign workers may not fill, as stipulated by the minister of manpower.

(5) Divestment provisions: Some shares must be sold to Indonesian citizens and/or entities through direct placement within the time stipulated by prevailing laws and regulations depending on the sector.

Controls on liquidation of direct investment

No. According to Law No. 25 of 2007 on Investment Junto Law No. 11 of 2020 on Job Creation, investors may repatriate capital, transfer profits (after settlement of taxes and financial obligations in Indonesia, such as corporate/personal income tax and withholding tax for dividends and interest) and make transfers for depreciation expenses and employment of foreign nationals in Indonesia.

Controls on real estate transactions

Yes. According to Law No. 11 of 2020 on Job Creation, Government Regulation No. 18 of 2021 on Right to Manage, Right over Land, Strata Titles and Land Registration, and Government Regulation No. 20 of 2021 on the Implementing Regulation of Control of Abandoned Area and Land, there are various types of land titles in Indonesia. Not all of them may be acquired by foreign entities and individuals, even if they reside in Indonesia or have a presence or do business in Indonesia.

The following are the types of land titles and the parties that may acquire them:

(1) right of ownership: Indonesian individuals and specific Indonesian institutions;
(2) right to build: Indonesian individuals and Indonesian companies;
(3) right to cultivate: Indonesian individuals and Indonesian companies;
(4) right to use: Indonesian individuals, Indonesian companies, government institutions, religious and social agencies, diplomatic offices, international agencies, foreign representative offices, and foreign citizens;
(5) right to manage: government institutions (including regional governments, state-owned business entities, regional government-owned business entities, PT Persero, authority bodies, and other government legal entities designated by the government);
(6) right of ownership over apartment units: parties who are permitted to hold title for the land on which the building is built; and
(7) lease: Indonesian individuals, Indonesian companies, foreign companies, and foreign individuals.

Purchase abroad by residents

No.

Purchase locally by nonresidents

Yes. Effective March 4, 2021, Government Regulation No. 18 of 2021 on Right to Manage, Right over Land, Strata Titles and Land Registration allows (1) foreign citizens with the relevant permit, (2) foreign legal entities with a representative office in Indonesia, (3) representatives of foreign countries, and (4) international institutions to own strata title right of ownership of apartment units, or sertifikat hak milik atas satuan rumah susun (SHMSRS).

Previously, nonresidents could not buy real estate; however, they
could engage in inward direct investment in local real estate.

| Borrowing abroad                                                        | Yes     | According to BI Regulation No. 7/1/PBI/2005, banks’ long-term foreign debt (maturities of more than one year) requires BI approval. Banks’ short-term foreign debt balance is limited to 30% of capital with some exemptions. BI Regulation(PBI)No. 15/6/PBI/2013 and PBI No. 16/7/PBI/2014 extend exemptions for short-term foreign debt to include rupiah demand deposits for nonresident holdings of SBIs for minority shareholders for real sector and infrastructure financing, supranational bodies holding proceeds from global bond issuance for real sector and infrastructure financing, and banks’ liabilities to nonresidents arising from hedging activities. Banks’ foreign debt is regulated by PBI No. 21/1/PBI/2019, whose scope of includes the Master Risk Participation Agreement. This ruling also expands the scope of exempt short-term debt, which includes shareholder loans drawn to solve banks’ problems as well as intermediation in the real sector.
| Maintenance of accounts abroad                                          | No      |
| Lending to nonresidents (financial or commercial credits)               | Yes     | Under the FSA, OJK has amended OJK Regulation No. 29/POJK.05/2014 with OJK Regulation No. 35/POJK.05/2018 regarding Business Operations of Multifinance Companies. The new regulation governs hedging on foreign currency loans received by multifinance companies. The following types of loans are permitted: regular loans, subordinated loans, securities issued through public offerings, and debt securities not issued through public offerings. Multifinance companies must apply a full hedge for principal debt, loan interest rate, and/or period of payment.
|
in rupiah and/or foreign currencies, except (a) noncash credit or financing or guarantees related to investment activities in Indonesia with a counter guarantee from a bank or a security deposit of 100% of the value of guarantees given; (b) credit or financing in the form of syndication; (c) credit cards; (d) domestic consumer credit or financing; (e) intraday overdrafts in rupiah and foreign currencies supported by authenticated documents confirming inflow of funds to the relevant account on the same day; (f) overdrafts in rupiah and foreign currencies for administrative costs; (g) certain local currency transaction scheme; and (h) assumption of bills from a government-appointed body designated to manage the concerned bank’s assets in the context of restructuring Indonesia’s banking by foreign parties whose payments are guaranteed by prime banks; (2) overdraft or lending for foreign exchange/IDR transactions; (3) buying securities in rupiah issued by nonresident, except for related trade activities with Indonesia and domestic trade activities, overseas bank draft for the benefit of Indonesian migrant workers and the rupiah funds are received in Indonesia by Residents; (4) overdraft for nonresidents; and (5) investments for nonresidents.

Banks must take into account the regulation on the net open position (NOP, posisi devisa netto (PDN)) aimed at prudential control, which states that banks must take into account every exposure in foreign exchange when calculating the NOP.

Banks may purchase locally issued bonds denominated in foreign exchange subject to BI approval for foreign exchange transactions. Banks must also take into account the regulation on the NOP aimed at prudential control, which states that banks must include every exposure in foreign exchange in calculating the NOP. Specifically, the CP must have an investment grade and may not be issued by a bank’s own group. Banks may not purchase any CP issued by firms with nonperforming loans classified as “doubtful” or “loss.”

Effective June 30, 2021, the targeted incentive in the form of a relaxation of the fulfillment obligation of daily rupiah minimum statutory reserves by 50 basis points for banks conducting import-export financing, financing for small and medium enterprises, and
financing for other priority sectors as part of macroprudential policy, ended.

BI Regulation No. 23/16/PBI/2021 concerning the Third Amendment of BI Regulation No. 20/3/PBI/2018, starting from December 21, 2021, with the following conditions:
(1) Exceptions from imposition of Reserves for Bank Indonesia Fast Payment (BI-FAST) participants who have provided BI-FAST Funds are valid from December 21, 2021, until January 2, 2022.
(2) The calculation of the fulfillment of the Rupiah Reserves based on the balance of the rupiah demand deposit account at Bank Indonesia-Real-Time Gross Settlement (BI-RTGS) and BI-FAST funds is effective January 3, 2022.

BI Regulation No. 24/4/PBI/2022 concerning the Third Amendment of BI Regulation No. 20/3/PBI/2018, starting from March 1, 2022, with the following changes:
(1) Amend the provisions of Article 3A and Article 12A which stipulate that relaxation of the obligation to fulfill the Reserves in rupiah may be granted to BUK (conventional commercial banks), BUS (Sharia commercial banks), and UUS (Sharia business units) for meeting the Reserves in rupiah on a daily basis and/or on an average basis based on macroprudential policy considerations of BI.
(2) The regulation regarding the easing of the obligation to fulfill the Reserves in rupiah for macroprudential policies is implemented in accordance with a separate BI Regulation concerning incentives for banks that provide funds for certain and inclusive economic activities.

Member of the Board of Governors Regulation No. 24/3/PADG/2022 concerning the Eighth Amendment to Regulation of Members of the Board of Governors No. 20/10/PADG/2018:

The gradual adjustment of the Rupiah Reserves for BUK which is currently at 3.0% with average fulfillment and 0.5% daily to be as follows:
Effective March 1, 2022, the reserves requirement will be increased by 1.5%, so that it becomes 5.0% with average fulfillment. Banks that fulfill the reserve requirement will receive a remuneration of 1.5% of the reserve requirement, with the portion calculated to obtain a remuneration of 4.0% of third-party funds (TPF);
Effective June 1, 2022, the Reserves is increased by 1%, so that it becomes 6.0% with full compliance on average. Banks that fulfill the reserve requirement will receive a remuneration of 1.5% of the reserve requirement, with the portion calculated to obtain a remuneration of 5.0% of TPF;

Gradually increase the Rupiah Reserves for BUS and UUS which is currently 3.0% with average fulfillment and 0.5% daily to be as follows:
Effective March 1, 2022, the Reserves will be increased by 0.5%, so that it becomes 4.0% with full compliance on average. Banks that fulfill the reserve requirement will receive a grant (‘athaya) of 1.5% of the fulfillment of the reserve requirement, with the portion calculated for obtaining a grant (‘athaya) of 3% of the TPF;
Effective June 1, 2022, the Reserves will be increased by 0.5%, so that it becomes 4.5% with average fulfillment. Banks that fulfill the reserve requirement will receive a gift (‘athaya) of 1.5% of the fulfillment of the statutory reserve requirement, with the portion
calculated for obtaining a grant ('athaya) of 3.5% of the deposit;

Adjusting the provisions for providing Statutory Reserve Requirement (Giro Wajib Minimum - GWM) incentives for macroprudential policies from the previous form of relaxation on the obligation to fulfill the Reserves in rupiah which must be fulfilled on a daily basis to an easing of the obligation to fulfill the Reserves in rupiah which must be fulfilled on a daily basis and/or on an average basis. The regulation regarding these incentives is regulated in a separate PBI regarding incentives for banks that provide funds for certain and inclusive economic activities.

Members of the Board of Governors Regulation No. 24/8/PADG/2022, in effect starting from July 1, 2022:
The minimum reserve requirement in rupiah for BUK, which stood at 6.0%, has increased to 7.5% effective July 1, 2022. Effective September 1, 2022, this increased to 9.0%.
The minimum reserve requirement in rupiah for BUS and UUS, which stood at 4.5%, has increased to 6.0% effective July 1, 2022. Effective September 1, 2022, this increased to and 7.5%.

 Provision of remuneration of 1.5% for meeting the Reserves obligation after taking into account incentives for banks in lending/financing to priority sectors and MSMEs and/or meeting the target of the macroprudential inclusive financing ratio (RPIM).

 This PADG GWM also consolidates all changes to PADG No. 20/10/PADG/2018 concerning Statutory Reserves in Rupiah and Foreign Exchange for BUK, BUS, and UUS, without changing the substance of the arrangement other than changes in the amount of Reserves and the portion calculated for remuneration. Furthermore, when PADG GWM No. 24/8/PADG/2022 comes into force July 1, 2022, PADG No. 20/10/PADG/2018 and its amendments are revoked and declared invalid.

**Liquid asset requirements**

No. There is no difference in treatment of deposit accounts in foreign currency and deposit accounts in local currency as stipulated in (1) POJK No. 42/POJK.03/2015 regarding Obligation of LCR fulfillment for Commercial Banks (POJK—Regulation on the FSA) and (2) POJK No. 50/POJK.03/2017 regarding Obligation of Net Stable Funding Ratio fulfillment for Commercial Banks. POJK No. 42/POJK.03/2015 also stipulates that the maximum value of bonds issued by the Indonesian government and the BI, as well as by foreign governments and foreign CBs, in a foreign currency with a risk weight of more than 0% that can be considered a level 1 high-quality liquid asset is equal to the bank’s net cash outflow needs in such foreign currency.

**Interest rate controls**

No. There is no difference in the treatment of deposit accounts in foreign and domestic currency.

**Credit controls**

No.

Differential treatment of deposit accounts held by nonresidents

No.

**Reserve requirements**

No.

**Liquid asset requirements**

No.

**Interest rate controls**

No.

**Credit controls**

No.

**Investment regulations**

Yes.
Effective October 31, 2021, capital limitations on foreign equity participation were eased as long as a bank is assessed by the OJK as capable of carrying out such activities. On July 30, 2021, the OJK issued POJK No. 13/POJK.03/2021 regarding Product Establishment of Commercial Banks, revoking the previous regulation, POJK No. 6/POJK.03/2016, and the limitation it sets forth. This POJK will be effectively implemented three months after its issuance on October 31, 2021.

Previously, according to POJK No. 36/POJK.03/2017, banks could undertake equity participation only in financial institutions, including leasing, venture capital, securities companies, insurance, and clearinghouse settlement institutions. Equity participation activities should be conducted on the basis of prudential principles. Banks had to obtain approval from the OJK for each equity participation in either domestic or overseas financial institutions. According to POJK No. 6/POJK.03/2016, only banks under the BUKU (Commercial Bank for Business Activities) 3 (Tier 1 capital between Rp 5 trillion and Rp 30 trillion) and BUKU 4 categories (Tier 1 capital of Rp 30 trillion or more) were permitted equity participation in foreign financial institutions. This should be done in foreign currency. BUKU 3 banks were allowed to conduct equity participation only with financial institutions in Asia; BUKU 4 banks were not subject to any geographical limitation on equity participation and could inject a higher amount of equity than BUKU 3 banks.

BI Regulation No. 24/7/PBI/2022 prohibits banks from performing transactions with foreign parties, including (1) lending or financing in rupiah and/or foreign currencies, except (a) noncash credit or financing or guarantees related to investment activities in Indonesia with a counter guarantee from a bank or a security deposit of 100% of the value of guarantees given; (b) credit or financing in the form of syndication; (c) credit cards; (d) domestic consumer credit or financing; (e) intraday overdrafts in rupiah and foreign currencies supported by authenticated documents confirming inflow of funds to the relevant account on the same day; (f) overdrafts in rupiah and foreign currencies for administrative costs; (g) certain local currency transaction scheme; and (h) assumption of bills from a government-appointed body designated to manage the concerned bank’s assets in the context of restructuring Indonesia’s banking by foreign parties whose payments are guaranteed by prime banks; (2) overdraft or lending for foreign exchange/IDR transactions; (3) buying securities in rupiah issued by nonresident, except for related trade activities with Indonesia and domestic trade activities, overseas bank draft for the benefit of Indonesian migrant workers and the rupiah funds are received in Indonesia by residents; (4) overdraft for nonresidents; and (5) investments for nonresidents.

Equity participation of a foreign shareholder in a commercial bank may reach 99%. Foreign bank branches are not allowed to conduct temporary equity participation. In addition, foreign and domestic shareholders are subject to a cap on their ownership shares in an Indonesian bank based on their category (banks, nonbank financial institutions, nonfinancial institutions, individuals). All prospective controlling shareholders must pass the fit and proper requirement. To support this requirement, foreign legal entities must obtain a recommendation from the monetary authorities and/or bank supervisor of their country of origin. The recommendation must state at a minimum that the foreign legal entity has a good reputation and sound financial ability and has never committed an unethical act in

---

**Abroad by banks**

*Yes.*

**In banks by nonresidents**

*Yes.*
the banking business. In addition, foreign shareholders must commit to necessary measures if the bank faces capital or liquidity difficulties.

**Open foreign exchange position limits**

Yes.

Banks must maintain a maximum overall (on- and off-balance-sheet) NOP of 20% of capital at the end of the working day. The capital charge to incorporate foreign exchange risk (under the market risk capital requirement) is based on 8% of the overall NOP. The NOP regulation is applied only for domestic banks.

**On resident assets and liabilities**

Yes.

There is a limit on the NOP of 20% of capital, based on BI Regulation No. 17/5/PBI/2015 concerning the fourth amendment to BI Regulation No. 5/13/PBI/2003 on NOP for Commercial Banks. Per Article 2, banks should manage and maintain the overall NOP at the end of the working day with a provisions maximum of 20% of capital.

**On nonresident assets and liabilities**

Yes.

Banks should manage and maintain the overall NOP at the end of the working day with a provisions maximum of 20% of capital, which applies to assets and liabilities whether from residents or nonresidents.

In accordance with BI Regulation No. 7/37/PBI/2005 Article 2 Paragraphs (4) and (5), calculation of the NOP includes the difference between net assets and liabilities, taking into account the assets and liabilities of residents and nonresidents, so the restriction on the NOP also applies to the assets and liabilities of nonresidents. Article 2 (4): Assets in foreign currencies as referred to in Paragraph (2) Letter (a) and Paragraph (3) consist of cash, gold, demand deposits (including current accounts in the BI), deposits on call, time deposits, CDs, margin deposits, securities, loans, net value of negotiated export drafts, interoffice accounts of assets and other receivables, and foreign currency both of residents and of nonresidents. Article 2 (5): Liabilities in foreign currencies as referred to in Paragraph (2) Letter (a) and Paragraph (3) consist of demand deposits, deposits on call, time deposits, CDs, margin deposits, loans, import guarantees, interoffice account liabilities, income from other comprehensive securities of foreign currencies other than shares, and other liabilities in foreign currency to both residents and nonresidents.

**Provisions specific to institutional investors**

Yes.

**Insurance companies**

Yes.

**Limits (max.) on securities issued by nonresidents**

Yes.

Insurance and re-insurance companies may hold securities issued by nonresidents. In Article 9 OJK Regulation No. 71/POJK.05/2016, investment that is issued by nonresidents is considered to be investment allocated overseas. Article 10 of the regulation states that the sum of investments allocated overseas may not exceed 20% of total investments.

**Limits (max.) on investment portfolio held abroad**

Yes.

Insurance and re-insurance companies may hold investments abroad. Permitted investments are shares listed on the stock exchange, corporate bonds listed on the stock exchange, securities issued by countries other than Indonesia, securities issued by multinational organizations of which Indonesia is a member or shareholder, mutual funds, and/or private placements/direct investments (not listed on the stock exchange). For solvency measures, the prudential limits on investments held abroad are as follows: (1) For shares listed on the stock exchange, investments in a single issuer may not exceed 10% of total investments, and the sum of investments in all issuers may not exceed 40% of total investments. (2) For corporate bonds listed on the stock exchange and securities (issued by multinational organizations of which Indonesia is a member or shareholder),
investments in a single issuer may not exceed 20% of total investments, and the sum of investments in all issuers may not exceed 50% of total investments. (3) For securities issued by countries other than Indonesia, investments in a single issuer may not exceed 10% of total investments. (4) For general mutual funds, investments with a single investment manager may not exceed 10% of total investments, and the sum of investments with all investment managers may not exceed 50% of total investments. For mutual funds in the form of a collective investment contract in a limited participation or private equity fund, investments with a single investment manager may not exceed 10% of total investments, and the sum of investments with all investment managers may not exceed 20% of total investments. (5) For private placements/direct investments (not listed on the stock exchange), the sum of all investments may not exceed 10% of total investments. (6) The sum of investments allocated overseas may not exceed 20% of total investments.

**Limits (min.) on investment portfolio held locally**

No. Although not explicit in the regulations, because the total of investments allocated overseas is limited to 20%, the investment portfolio held locally must be at least 80%.

**Currency-matching regulations on assets/liabilities composition**

Yes. For solvency measures, insurance and re-insurance companies must provide additional funds to cover currency mismatches. The amounts required to cover foreign currency mismatch risk for a single foreign currency are (1) 30% of the sum of foreign currency liabilities minus admitted assets if the sum of admitted assets minus foreign currency liabilities is less than or equal to 0; (2) 0 if the sum of admitted assets minus foreign currency liabilities is between 0% and 20% of total liabilities; and (3) 10% of the sum of admitted assets minus foreign currency liabilities if the sum of admitted assets minus foreign currency liabilities is more than 20% of total liabilities (OJK Circular Letter No. 24/SEOJK.05/2017, July 1, 2017).

**Pension funds**

Yes.

**Limits (max.) on securities issued by nonresidents**

Yes. Pension funds in Indonesia are not allowed to invest in securities issued by nonresidents (OJK Regulation No. 3/POJK.05/2015) and its revision OJK Regulation No. 29/POJK.05/2018).

**Limits (max.) on investment portfolio held abroad**

Yes. Based on OJK Regulation No. 29/POJK.05/2018, OJK no longer allows pension funds in Indonesia to invest abroad for private placement investments.

**Limits (min.) on investment portfolio held locally**

Yes. OJK Regulation No. 29/POJK.05/2018 not only prohibits pension funds from private placements abroad, but also places percentage limitations on private placement investments, limited investment mutual funds, medium-term notes, and repurchase agreements.

**Currency-matching regulations on assets/liabilities composition**

No.

**Investment firms and collective investment funds**

Yes.

**Limits (max.) on securities issued by nonresidents**

No.

**Limits (max.) on investment portfolio held abroad**

Yes. The maximum on investment portfolios held abroad includes the following: (1) CIS mutual funds may invest abroad up to 15% of NAV (OJK Regulation No. 23/POJK.04/2016) and (2) protected mutual funds and guaranteed mutual funds may invest abroad up to 30% of NAV (OJK Regulation No. 48/POJK.04/2015).

**Limits (min.) on investment portfolio held locally**

Yes. The minimum on investment portfolios held locally includes the following: (1) At least 85% of CIS mutual fund NAV must be invested in locally issued, offered, or traded securities or debt securities issued abroad by the Indonesian government or an
(1) Interbank spot market transactions can be done through electronic trading platform multimatching.

**Reserve requirements**

06/30/2021 The targeted incentive in the form of a relaxation of the fulfillment obligation of daily rupiah minimum statutory reserves by 50 basis points for banks conducting import-export financing, financing for small and medium enterprises, and financing for other priority sectors as part of macroprudential policy, ended.

01/03/2022 The calculation of the fulfillment of the Rupiah Reserves based on the balance of the rupiah demand deposit account at Bank Indonesia-Real-Time Gross Settlement and Bank Indonesia Fast Payment funds became effective.

03/01/2022 For BUK, the reserves requirement increased by 1.5%, so that it becomes 5.0% with average fulfillment. Banks that fulfill the reserve requirement will receive a remuneration of 1.5% of the reserve requirement, with the portion calculated to obtain a remuneration of 4.0% of TPF.

03/01/2022 For BUS and UUS, the reserves increased by 0.5%, so that it becomes 4.0% with full compliance on average. Banks that fulfill the reserve requirement will receive a grant (‘athaya) of 1.5% of the fulfillment of the reserve requirement, with the portion calculated for obtaining a grant (‘athaya) of 3% of the TPF.

06/01/2022 For BUK, the Reserves is increased by 1%, so that it becomes 6.0% with full compliance on average. Banks that fulfill the reserve requirement will receive a remuneration of 1.5% of the reserve requirement, with the portion calculated to obtain a remuneration of 5.0% of TPF.

06/01/2022 For BUS and UUS, the Reserves will be increased by 0.5%, so that it becomes 4.5% with average fulfillment. Banks that fulfill the reserve requirement will receive a gift (‘athaya) of 1.5% of the fulfillment of the statutory reserve requirement, with the portion calculated for obtaining a grant (‘athaya) of 3.5% of the deposit.

07/01/2022 For BUK, the minimum reserve requirement in rupiah, which stood at 6.0%, has increased to 7.5%.

07/01/2022 For BUS and UUS, the minimum reserve requirement in rupiah, which stood at 4.5%, has increased to 6.0%.

09/01/2022 For BUK, the minimum reserve requirement in rupiah, which stood at 7.5%, has increased to 9.0%.

09/01/2022 For BUS and UUS, the minimum reserve requirement in rupiah for BUS and UUS, which stood at 6.0% has increased to 7.5%.

**Investment regulations**

**Abroad by banks**

10/31/2021 Capital limitations on foreign equity participation were eased as long as a bank is assessed by the Otoritas Jasa Keuangan (OJK) capable of carrying out such activities. Previously, banks could undertake equity participation only in financial institutions, including leasing, venture capital, securities company, insurance, and clearinghouse settlement institutions. Equity participation activities should be conducted on the basis of prudential principles. Banks had to obtain approval from the OJK for each equity participation in either a domestic or overseas financial institution. Only banks under the BUKU 3 (Tier 1 capital between Rp 5 trillion and Rp 30 trillion) and BUKU 4 categories (Tier 1 capital of Rp 30 trillion or more) were allowed equity participation in foreign financial institutions. This should be done in foreign currency. BUKU 3 banks were allowed equity participation only in financial institutions in Asia; BUKU 4 banks were not subject to any geographical limitations on equity participation and could inject a higher amount of equity than BUKU 3 banks.
ISLAMIC REPUBLIC OF IRAN  
(Position as of December 31, 2022)

Status under IMF Articles of Agreement

Date of membership
December 28, 1945.

Article VIII
Yes.  Date of acceptance: September 6, 2004.

Article XIV

Exchange Measures

Restrictions and/or multiple currency practices
Yes.  

The IMF staff report for the 2018 Article IV Consultation with Islamic Republic of Iran states that, as of March 7, 2018, Iran maintained MCPs and an exchange restriction subject to IMF jurisdiction under Article VIII, Sections 2(a) and 3: (1) An MCP and an exchange restriction arise from the establishment of an official exchange rate for use in some exchange transactions, which in practice differs by more than 2% from the rate used by foreign exchange bureaus. (2) An MCP arises from the differences of more than 2% between the current official and exchange bureaus rates and the preferential rates for certain imports for which foreign exchange commitments were made through LCs opened prior to March 21, 2002, under the previous multiple exchange rate system. (3) An MCP arises from the differences of more than 2% between the current official and exchange bureaus rates and the preferential rates for certain imports for which foreign exchange payment commitments were made through LCs or bank drafts prior to July 24, 2012. (Country Report No. 18/93)

Exchange measures imposed for security reasons
Yes.  

In accordance with IMF Executive Board Decision No. 144-(52/51)

Yes.  Credit and financial institutions and banks have been instructed by the Bank Markazi Jomhouri Islami Iran (Central Bank of Iran—CBI) to freeze suspected accounts, based on an official list. These measures were taken in accordance with UNSC resolutions.

Other security restrictions
No.

Exchange Arrangement

Currency
Yes.  The currency of the Islamic Republic of Iran is the Iranian rial.

Other legal tender
No.

Exchange rate structure

Unitary

Dual
Yes.  The official rate is used for the settlement of oil product exports and for imports of priority goods. In addition, a depreciated parallel rate is offered at the free market. This rate is used for exports of all goods, except oil, for imports of non-priority goods and services, and for settlement for goods and services to be financed from non-oil revenues.

Multiple

Classification
No separate legal tender

Currency board

Conventional peg

Stabilized arrangement  Yes.  

The de jure exchange rate arrangement has been a managed floating arrangement against a basket of currencies since 2002. All foreign exchange transactions are to be conducted via banks and money exchanges (bureaus) using CBI’s electronic trading system. Transactions occurring at rates other than the unified rate will be subject to penalties under the Anti-Smuggling Law.

CBI’s Forex Management Integrated System (NIMA) platform operates to regulate foreign exchange transactions by enabling exporters to sell foreign currencies to exchange houses who must then on-sell the currency to importers of goods and services with a valid import/services registration order in place. The price of each transaction is agreed between importer and exporter as well as banks and bureaus. The de facto exchange rate arrangement is classified as a stabilized arrangement.

Crawling peg

Crawl-like arrangement

Pegged exchange rate within horizontal bands

Other managed arrangement

Floating

Free floating

Official exchange rate  Yes.  

Effective May 12, 2022, the daily rate announcement is based on the transactions done in the NIMA market and the foreign exchange market and is published to the public. The CBI also quotes market exchange rate on daily basis for the transactions on the secondary market (NIMA) for trade and projects finance other than priority goods and services. Previously, the official exchange rate was used in transactions on priority goods operated by the banking system. It was also used to buy the revenue from oil and gas exports from the government and for imports of priority goods and services. The importing oil proceeds and priority goods and services, including medical goods were financed at a fixed rate of 42,000 IRR.

Monetary policy framework

Exchange rate anchor  Yes.  

The monetary policy framework uses an exchange rate anchor vis-à-vis the US dollar. Under Iran’s Five-Year Development Plan, Article 81, the CBI bases the exchange rate on relevant economic variables directly connected to the implementation of monetary policy—that is, the difference between internal and international inflation, the internal demand for and supply of foreign exchange, and the exchange value of major foreign currencies against each other, particularly in the SDR portfolio. However, 4 years after the 6th National Development Plan started, many policy directives are not yet implemented. Policy orientations may vary from the National Development Plan. In addition to the exchange rate anchor, the CBI objective is to maintain inflation in single digits by trying to control...
base money growth. Legally, the CBI does not have an inflation objective or target (see Article 10 of the CBI law).

This requirement applies to all commodities. On April 12, 2020, for the purpose of facilitating international trade between Iran and target countries during COVID-19 pandemic crisis, the deadline to submit the shipping documents by importers to banks was extended from 9 months to 11 for productive units and from 6 months to 8 for trade companies. These procedures were reversed back to the original deadlines effective August 1, 2022.
On April 12, 2020, for the purpose of facilitating international trade between Iran and target countries during COVID-19 pandemic crisis, the deadline to submit the shipping documents by importers to banks was extended from 9 months to 11 for productive units and from 6 months to 8 for trade companies. These procedures were reversed back to the original deadlines effective August 1, 2022.

In some cases, insurance documents and a Uniform Customs and Practices (UCP) for Documentary LC are required. On April 12, 2020, for the purpose of facilitating international trade between Iran and target countries during COVID-19 pandemic crisis, the deadline to submit the shipping documents by importers to banks was extended from 9 months to 11 for productive units and from 6 months to 8 for trade companies. These procedures were reversed back to the original deadlines effective August 1, 2022.

Importers must obtain import licenses from the relevant ministries (mainly the Ministry of Industry, Mines and Commerce). Customs clearance is authorized on presentation of shipping documents endorsed by an authorized bank and Ministry of Industry, Mines and Commerce permit. Certain goods, such as pharmaceuticals, must have a permit from the Ministry of Health, Treatment, and Medical Education. Telecommunication devices require a permit issued by the Ministry of Communication and Information Technology.

Some goods on the negative list may be imported under certain conditions with special permits. Imports from Israel are prohibited. In 2012, the negative list was expanded to include some luxury goods.

Imports are subject to import tariffs of at least 4% and to a commercial benefit tax that varies by product category.

Export proceeds must be repatriated to the economy by the Export proceeds must be repatriated within 4 months after the issuance of the export permission pursuant to the CBI terms and Instructions. Exporters should take measures to return the currency to the economic cycle and eliminate the foreign exchange obligation based on the value of the exports made through these methods: Import vs. export, transfer to others, sale of currency in SANA and NIMA systems, debt repayment and sale to banks and exchanges. Exporter who repatriates export revenues may qualify for incentives, such as tax exemptions, pursuant to the aforementioned regulations and Regulation No. 446323 of March 4, 2019.
Effective December 6, 2022, the exporters of petrochemical products, refineries, steel, nonferrous base metals and petroleum are obliged to convert all their exchange revenues on NIMA, other exporters are obliged to convert 90 percent of their exchange revenues in the secondary market (NIMA) or deliver their cash to Bank Melli Iran. Previously, the repatriation rules were as follows: (1) Exporters repatriating less than €1 million (or equivalent in other currencies) could convert by cash or money order to exchange agents or use the proceeds for imports for the same amount. (2) Exporters repatriating between €1 and €3 million (or equivalent in other currencies) could sell up to €1.5 million by cash or money order to exchange agents if the converted amount accounts for more than 30% of the foreign transaction, and up to €1 million if the converted amount accounts for less than 30% of the foreign transaction. They could convert 40% on NIMA if the converted amount accounts for more than 60% of the foreign transaction, and 45% on NIMA if the converted amount accounts for between 30% and 60% of the foreign transaction. The rest of the transaction amount could be settled in imports of an equivalent amount. (3) Exporters repatriating between €3 and €10 million (or equivalent in other currencies) could sell by cash or money order to exchange agents up to €2 million if the converted amount accounts for more than 60% of the foreign transaction, up to €1.5 million if the converted amount accounts for between 30% and 60% of the foreign transaction, and up to €1 million if the converted amount accounts for less than 30% of the foreign transaction. They could convert 40% on NIMA if the converted amount accounts for more than 60% of the foreign transaction, 55% on NIMA if the converted amount accounts for between 30% and 60% of the foreign transaction, and 70% on NIMA if the converted amount accounts for less than 30% of the transaction. The rest of the transaction amount could be settled in imports of an equivalent amount. (4) Exporters repatriating more than €10 million (or equivalent in other currencies) could sell by cash or money order to exchange agents up to €4 million if the converted amount accounts for more than 60% of the foreign transaction, up to €2 million if the converted amount accounts for between 30% and 60% of the foreign transaction, and up to €1 million if the converted amount accounts for less than 30% of the foreign transaction. They could convert 70% on NIMA if the converted amount accounts for more than 60% of the foreign transaction, 80% on NIMA if the converted amount accounts for between 30% and 60% of the foreign transaction, and 90% on NIMA if the converted amount accounts for less than 30% of the foreign transaction. The rest of the transaction amount could be settled in imports of an equivalent amount.

Payments for invisibles may be made in excess of limits established by the CBI from externally financed foreign-currency-denominated accounts on presentation of supporting documents.

Freight charges may be transferred through LCs and bills of exchange without limit, but for cash (full advance payment in relation to freight changes via LCs and bills of exchange), there is a US$10,000 maximum. Only Iranian insurance companies may issue insurance policies for imports of goods.

Approval for payment of unloading and administrative charges is granted on a case-by-case basis.

Travelers’ foreign exchange is paid to passengers via Bank Melli Iran, and Mellat, Saman, Tejarat, and Parsian banks in cash (subject to rules and regulations) once a year. Effective January 8, 2022, the maximum amount of travelers’ foreign exchange which is paid to air passengers traveling to visa-needed countries is €500 at Electronic Currency Transaction System rate (ETS) and €300 at the same rate to air travelers who make their trips to other countries. Previously, the maximum amount of foreign exchange travelers (Iranian nationals) could buy from the banking system for trips to the neighboring countries was €500 or the equivalent a person a year except when traveling to Iraq in which case the amount was 250,000 Iraqi dinars. Travelers to other countries could buy €1000 or the equivalent a person a year.

Amounts in excess of the limit may be approved by the CBI on presentation of satisfactory supporting documents.

Applications for payment of registration fees for participation in
research projects must be submitted to the relevant ministry for approval.

Prior approval  No.
Quantitative limits  Yes. Monthly allowances are provided to students on scholarships abroad approved by the Ministry of Science, Research and Technology or Ministry of Health and Medical Education. Other students abroad may purchase the needed amount of foreign exchange for tuition fees and living costs on submission of supporting documentation. Individuals who seek medical treatment abroad may obtain a foreign exchange allowance of up to US$10,000 on presentation of a written diagnosis by an Iranian doctor of medicine which indicates that further treatment abroad is necessary to be given. A confirmation signed by the Medical High Council is required for amounts exceeding US$10,000.

Indicative limits/bona fide test  Yes. Amounts in excess of the limit may be approved by the CBI on presentation of satisfactory supporting documents.

Foreign workers' wages  Yes.

Prior approval  No.
Quantitative limits  No.
Indicative limits/bona fide test  Yes. Foreign workers with work permits may transfer their salaries without limitation, on confirmation by their employers.

### Exchange Arrangement

**Official Exchange Rate**

<table>
<thead>
<tr>
<th>Date</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>05/12/2022</td>
<td>The daily rate announcement is based on the transactions done in the NIMA market and the foreign exchange market and is published to the public. The CBI also quotes market exchange rate on daily basis for the transactions on the secondary market (NIMA) for trade and projects finance other than priority goods and services. Previously, the official exchange rate was used in transactions on priority goods operated by the banking system. It was also used to buy the revenue from oil and gas exports from the government and for imports of priority goods and services. The importing oil proceeds and priority goods and services, including medical goods were financed at a fixed rate of 42,000 IRR.</td>

6 to 8 months for trade companies, for the purpose of facilitating international trade between Iran and target countries during COVID-19 pandemic crisis, was abolished.

**Exports and Export Proceeds**

The exporters of petrochemical products, refineries, steel, nonferrous base metals, and petroleum are obliged to convert all their exchange revenues on NIMA, other exporters are obliged to convert 90 percent of their exchange revenues in the secondary market (NIMA) or deliver their cash to Bank Melli Iran. Previously, the repatriation rules were as follows: (1) Exporters repatriating less than €1 million (or equivalent in other currencies) could convert by cash or money order to exchange agents or use the proceeds for imports for the same amount. (2) Exporters repatriating between €1 and €3 million (or equivalent in other currencies) could sell up to €1.5 million by cash or money order to exchange agents if the converted amount accounts for more than 30% of the foreign transaction, and up to €1 million if the converted amount accounts for less than 30% of the foreign transaction. They could convert 40% on NIMA if the converted amount accounts for more than 60% of the foreign transaction, and 45% on NIMA if the converted amount accounts for between 30% and 60% of the foreign transaction. The rest of the transaction amount could be settled in imports of an equivalent amount. (3) Exporters repatriating between €3 and €10 million (or equivalent in other currencies) could sell by cash or money order to exchange agents up to €2 million if the converted amount accounts for more than 60% of the foreign transaction, up to €1.5 million if the converted amount accounts for between 30% and 60% of the foreign transaction, and up to €1 million if the converted amount accounts for less than 30% of the foreign transaction. They could convert 40% on NIMA if the converted amount accounts for more than 60% of the foreign transaction, 55% on NIMA if the converted amount accounts for between 30% and 60% of the foreign transaction, and 70% on NIMA if the converted amount accounts for less than 30% of the transaction. The rest of the transaction amount could be settled in imports of an equivalent amount. (4) Exporters repatriating more than €10 million (or equivalent in other currencies) could sell by cash or money order to exchange agents up to €4 million if the converted amount accounts for more than 60% of the foreign transaction, up to €2 million if the converted amount accounts for between 30% and 60% of the foreign transaction, and up to €1 million if the converted amount accounts for less than 30% of the foreign transaction. They could convert 70% on NIMA if the converted amount accounts for more than 60% of the foreign transaction, 80% on NIMA if the converted amount accounts for between 30% and 60% of the foreign transaction, and 90% on NIMA if the converted amount accounts for less than 30% of the foreign transaction. The rest of the transaction amount could be settled in imports of an equivalent amount.

**Payments for Invisible Transactions and Current Transfers**

The maximum amount of travelers’ foreign exchange which is paid to air passengers traveling to visa-needed countries is €500 at Electronic Currency Transaction System rate (ETS) and €300 at the same rate to air travelers who make their trips to other countries. Previously, the maximum amount of foreign exchange travelers (Iranian nationals) could buy from the banking system for trips to the neighboring...
countries was €500 or the equivalent a person a year except when traveling to Iraq in which case the amount was 250,000 Iraqi dinars. Travelers to other countries could buy €1000 or the equivalent a person a year.
IRAQ

(Position as of June 30, 2022)

**Status under IMF Articles of Agreement**

Date of membership

December 27, 1945.

Article VIII

Yes.

Article XIV

Yes.

**Exchange Measures**

Restrictions and/or multiple currency practices

Yes.

The IMF staff report for the 2020 Article IV Consultation with Iraq states that, as of January 22, 2021, Iraq continues to avail itself of the transitional arrangements under Article XIV, Section 2 but no longer maintains any exchange restrictions or MCPs subject to Article XIV, Section 2, and currently maintains one MCP subject to IMF approval under Article VIII, Section 3. The MCP arises from the lack of a mechanism to ensure that the exchange rate at the Central Bank of Iraq (CBI) foreign exchange window and the market rates (retail exchange rates of commercial banks and exchange bureaus for the sale of foreign currency from sources other than the CBI foreign exchange window) do not deviate from each other by more than 2%. (Country Report No. 21/38)

Exchange measures imposed for security reasons

No.

In accordance with IMF Executive Board Decision No. 144-(52/51)

No.

Other security restrictions

No.

**Exchange Arrangement**

Currency

Yes. The currency of Iraq is the Iraqi dinar.

Other legal tender

No.

Exchange rate structure

Unitary

Dual

Yes. The exchange rate system comprises two rates: the exchange rate at the CBI foreign exchange window and the market rates (retail exchange rates of commercial banks and exchange bureaus).

Multiple

Classification

No separate legal tender

Currency board

Conventional peg

Yes. The exchange rate arrangement is a conventional peg arrangement. The Central Bank Law gives the Board of the CBI the authority to formulate exchange rate policy. The official pegged exchange rate was set at ID 1,460 per US dollar including the CBI commission (ID 1,450 plus ID 10 (fees)). Banks are allowed to deal at a maximum...
The CBI determines the official exchange rate for revaluation purposes in the accounting system. The CBI uses the official selling rate of the day minus 0.001% to purchase foreign currency and the government’s foreign exchange receipts. The Central Bank Law gives the Board of the CBI the authority to formulate exchange rate policy. The official exchange rate was set at ID 1,460 per US dollar including the CBI commission (consisting of two components: the official rate of ID 1,450 plus ID 10 (fees)), which represents the cash and transfer selling price in the window for buying and selling foreign currency. Banks are allowed to deal at a maximum exchange rate of ID 1,470.

Monetary policy framework

- Exchange rate anchor: Yes.
  - U.S. dollar: Yes. The monetary policy framework is an exchange rate anchor vis-à-vis the US dollar.

Exchange tax No.

Exchange subsidy No.

Foreign exchange market Yes.

Spot exchange market Yes. The number of banks that participate on average in the currency window is 40, foreign exchange companies Type A–76, Type B–50, and Type C–815.

Operated by the central bank Yes.

Foreign exchange standing facility No.

Allocation Yes. Currency selling window is held daily; eligible bidders may buy and sell foreign exchange at the official exchange rate including a commission determined by the CBI (cash and transfer exchange rates). Banks may buy foreign exchange on their behalf and on behalf of their clients but have to ensure that foreign exchange purchase requests they intermediate are for legitimate purposes (to finance legally permitted transactions in foreign currency) by checking clients’ documents. Banks are subject to an advance deposit requirement which requires depositing the local currency unit (LCU) equivalent of their cash and noncash purchase requests 7 days before the auction. There are no limits on the bids. In case of default, the
Auction participant may not participate in future auctions and fines are imposed. The CBI monitors these transactions for anti-money-laundering purposes and sells foreign currency for transactions that are not considered suspect. Because the CBI has been pursuing a policy of fulfilling every bid at a single settlement price, bids are submitted without indication of price. Volume is not preannounced. There are no limits for noncash sales.

The weekly limits on the amount banks and foreign exchange companies may buy in cash foreign exchange from the CBI currency sales window are as follows. Effective February 20, 2022: US$200,000 for a bank, US$1,800,000 for foreign exchange Type A, US$700,000 for foreign exchange Type B, and US$60,000 for foreign exchange Type C. (Previously, they were US$250,000 for a bank, US$200,000 for foreign exchange Type A, US$750,000 for foreign exchange Type B, and US$70,000 for foreign exchange Type C.)

Effective March 19, 2022: US$150,000 for a bank, US$1,500,000 for foreign exchange Type A, US$500,000 for foreign exchange Type B, and US$50,000 for foreign exchange Type C.

</tr>
</tbody>
</table>

**Resident Accounts**
| Foreign exchange accounts permitted | Yes. | Banking Law No. 94 of 2004 does not distinguish between residents and nonresidents in terms of opening accounts or performing transfers except when it relates to money laundering. A home address is required to open an account.

Held domestically | Yes. | Resident Iraqis, resident nationals of other Arab countries, and domestic and foreign companies are allowed to open foreign exchange accounts at commercial banks and to use the balances in these accounts for domestic and foreign payments and transfers in accordance with banking procedures, provided documents are submitted proving that the accounts were credited with foreign currency.

Approval required | No. |

Held abroad | Yes. |

Approval required | No. |

Accounts in domestic currency held abroad | No. |

Accounts in domestic currency convertible into foreign currency | Yes. |

**Nonresident Accounts**

| Foreign exchange accounts permitted | Yes. | Nonresidents are allowed to open foreign exchange accounts at commercial banks and to use the balances in these accounts without restriction, provided the accounts were credited with foreign currency.

Approval required | No. |

Domestic currency accounts | Yes. |

Convertible into foreign currency | Yes. | Transfers abroad exceeding ID 15 million require a tax clearance certificate.

Approval required | No. |

Blocked accounts | No. |

**Imports and Import Payments**

| Foreign exchange budget | No. |

Financing requirements for imports | No. |

Minimum financing requirements | No. |

Advance payment requirements | No. |

Advance import deposits | No. |

Documentation requirements for release of foreign exchange for imports | Yes. |

Domiciliation requirements | Yes. |

Preshipment inspection | No. |

Letters of credit | Yes. | Banks may open and accept LCs for importation and exportation of permitted goods. The relevant amount may be transferred as follows: (1) Banks must be in compliance with the terms of payment described in the LC. (2) The goods must be insured in Iraq to the extent possible. (3) The bill of lading must be in the name of an Iraqi
bank. Banks may purchase foreign exchange for LCs at the currency selling window, provided total LCs do not exceed 100% of the bank capital. Banks must notify the CBI when an LC is fully or partially paid, so that the amount can be deducted from this limit. In cases exceeding the limit, the CBI will consider a bank’s request, provided it commits to return the LC amount transferred to it. If the bank does not submit documents proving the entry of goods in Iraq by the expiration date of the credit, the bank must return the amount of credit at the CBI selling price minus ID 1; this also applies to the unexecuted portion of the LC (in addition to the principal commission for opening the LC). Banks must submit a statement indicating amounts the bank transferred to its customers 15 days after the transfer date. Banks must send monthly statements with details of the transferred amounts in foreign currency to the Credit and Banking Supervision Department, using a form designed for this purpose.

Payments for Invisible Transactions and Current Transfers

Controls on these transfers  Yes.
Trade-related payments  Yes.
Prior approval  Yes.
Quantitative limits  No.
Indicative limits/bona fide test  Yes.  Procedures related to the anti-money-laundering law ensure the soundness of transferred funds.
Investment-related payments  Yes.
Prior approval  No.
Quantitative limits  No.
Indicative limits/bona fide test  Yes.  Obligations and debts to the government must be settled before the transfer of investment proceeds. Payments due on external investments in Iraq that were licensed by the valid investment law may be made on submission to the bank of documents confirming profits accrued, the investment license, financial statements audited by a licensed comptroller confirming the profits accrued in the investment project, and the payment of taxes and fees on distributed profits as verified by the project’s board.
Payments for travel  Yes.
Prior approval  No.
Quantitative limits  Yes.  There is a US$10,000 limit on the amount in banknotes a traveler may take out of Iraq. Expenditures of government agency delegates are allowed as per defined entitlement.
Indicative limits/bona fide test  Yes.  The CBI allows individuals to buy foreign exchange banknotes up to US$3,000 a month for travel purpose on proof of airline ticket with a passport. The CBI provides additional amounts when required by Iraqi citizens. Indicative limits are imposed in accordance with the anti-money-laundering law.
Personal payments  Yes.
Prior approval  No.
Quantitative limits  Yes.
Indicative limits/bona fide test  Yes.  Transfers of tuition fees require proof of current enrollment.
Transfers for medical treatment require a medical report certified by a competent medical authority. Transfers to cover the household living expenses of Iraqis residing permanently abroad, on submission of a statement verifying their residency status, the relationship, and the source of the funds, not to exceed US$5,000 a month are allowed. The CBI addresses the additional requests of Iraqi citizens for lawful purposes, as they arise.

Transfers of funds in connection with securities or shares owned by an Iraqi residing abroad or a foreign seller, including profits, require presentation of an ownership certificate in the seller’s name. Also required are the contract with the date of the sale and documenting the sale by the Iraq Securities Market as well as proof that the funds entered through the Iraqi banking system.

Foreign exchange may not be purchased for capital transactions in the foreign exchange auctions.

**Provisions Specific to the Financial Sector**

| Provisions specific to commercial banks and other credit institutions | Yes | 
| Borrowing abroad | No | 
| Maintenance of accounts abroad | No | 
| Lending to nonresidents (financial or commercial credits) | No | 
| Lending locally in foreign exchange | No | 
| Purchase of locally issued securities denominated in foreign exchange | No | 
| Differential treatment of deposit accounts in foreign exchange | Yes | 
| Reserve requirements | No | 
| Liquid asset requirements | Yes | 
| Interest rate controls | No | 
| Credit controls | Yes | 
| Differential treatment of deposit accounts held by nonresidents | Yes | 
| Reserve requirements | Yes | 
| Liquid asset requirements | No | 

Foreign exchange may not be purchased for capital transactions in the foreign exchange auctions.

Commercial banks may borrow from foreign financial markets and may obtain overdraft facilities from correspondent banks if it is reflected in their monthly balance sheets.

Banks may enter into agreements with correspondent banks abroad and must comply with disclosure and transparency requirements. Banks are allowed to maintain 20% of its capital for investment purposes according to Article 33 of Banking Law.

The banking law does not distinguish between residents’ and nonresidents’ financial operations.

Local lending in foreign currency is not regulated; banks may lend in foreign currency subject to lending instructions in Iraqi and foreign currency.

The differential treatment concerns the kinds of deposits, which are categorized as current deposits, savings deposits, and fixed deposits—each with a different interest rate.

Exchange Measures

| Restrictions and/or multiple currency practices | No.           |
| Exchange measures imposed for security reasons | Yes.         |
| In accordance with IMF Executive Board Decision No. 144-(52/51) | Yes.         |

In accordance with EC regulations, Ireland maintains certain restrictions solely for the preservation of national or international security with respect to Afghanistan (restrictive measures imposed with respect to the Taliban); restrictive measures in view of the situation in Belarus and the involvement of Belarus in the Russian aggression against Ukraine; restrictive measures in view of the situation in Bosnia and Herzegovina; restrictive measures in view of the situation in Burundi; restrictive measures against the Central African Republic; restrictive measures against the Democratic Republic of the Congo; restrictive measures against the Republic of Guinea; restrictive measures against those threatening the peace, security, or stability of the Republic of Guinea-Bissau; Iran (restrictive measures in relation to serious human rights violations in Iran, and restrictive measures in relation to the non-proliferation of weapons of mass destruction); restrictive measures on Iraq; Lebanon (restrictive measures in view of the situation in Lebanon, and restrictive measures in relation to the February 14, 2005, terrorist bombing in Beirut, Lebanon); restrictive measures in view of the situation in Libya; restrictive measures in view of the situation in Mali; restrictive measures in view of the situation in Montenegro; restrictive measures in view of the situation in Myanmar/Burma; restrictive measures in view of the situation in the Republic of Nicaragua; Democratic People’s Republic of Korea (restrictive measures in relation to the non-proliferation of the weapons of mass destruction); restrictive measures in view of Russia’s actions destabilizing the situation in Ukraine; restrictive measures in view of the situation in Serbia; restrictive measures against Somalia; restrictive measures in view of the situation in South Sudan; restrictive measures in view of the situation in Sudan; Syria (restrictive measures against Syria, and restrictive measures in relation to the February 14, 2005, terrorist bombing in Beirut, Lebanon); restrictive measures against the misappropriation of state funds of Tunisia; restrictive measures in view of Turkey’s unauthorized drilling activities in the Eastern Mediterranean; Ukraine (restrictive measures against the misappropriation of state funds of Ukraine, and restrictive measures in respect of actions undermining or threatening the territorial integrity, sovereignty, and independence of Ukraine); restrictive measures in view of the situation in Yemen; restrictive measures in respect of Zimbabwe; restrictive
measures against the proliferation and use of chemical weapons; restrictive measures against serious human rights violations and abuses; restrictive measures against cyberattacks threatening the EU or its Member States; and restrictive measures against terrorism (specific measures to combat terrorism, and restrictive measures with respect to ISIL (Da’esh) and Al-Qaida (ISIL/Daesh and Al-Qaida)).

In accordance with EC regulations, Ireland has restrictions solely for the preservation of national or international security with respect to the countries listed on the Irish Department of Finance’s financial sanctions page. This resource lists instruments issued by the minister of finance to implement in Ireland various EU regulations, which implement the UN’s international sanctions regime.

Floating

**Official exchange rate**

Yes. The exchange rate arrangement of the euro area is free floating. Ireland participates in a currency union (EMU) with 18 other members of the EU and has no separate legal tender. The euro, the common currency, floats freely and independently against other currencies. The ECB publishes information regarding its interventions; it last intervened in March 2011. When it intervenes, the ECB intervenes at the quotes of the market makers.

The ECB publishes a reference rate based on the daily concertation procedure between CBs within and outside the European System of Central Banks. The publication time of the euro foreign exchange reference rates is around 14:30 to around 16:00 Central European Time. The reference rate against the euro is the average of the buying

To maintain price stability is the primary objective of the Eurosystem and of the single monetary policy for which it is responsible. This is stated in Article 127(1) of Treaty on the Functioning of the EU and Article 2 of the Statute of the European System of Central Banks and of the ECB. Section 6A of the Central Bank Act 1942 notes that in discharging its functions and exercising its powers as part of the European System of Central Banks, the primary objective of the Central Bank of Ireland (CBI) is to maintain price stability. “Without prejudice to the objective of price stability,” the Eurosystem will also “support the general economic policies in the Union with a view to contributing to the achievement of the objectives of the Union as laid down in Article 3 of the Treaty on EU.” Effective July 7, 2021, price stability is defined as a symmetric 2% inflation target over the medium term. Previously, it was defined as inflation below but close to 2% over the medium term.

Exchange tax No.

Exchange subsidy No.

Foreign exchange market Yes.

Credit institutions are free to provide spot and forward exchange rate facilities. ADs may freely determine their exchange rates and foreign exchange commissions in transactions with their clients. Certain foreign-exchange-related operations may be subject to a regulatory authorization regime or certain restrictions reflecting obligations in European legislation. For example, with regard to investment firms for the purposes of Directive 2014/65/EU (Markets in Financial Instruments Directive, or MiFID II), “spots” which meet the requirements in Article 10(2) of Commission Delegated Regulation (EU) No. 2017/56 are not considered “financial instruments under MiFID II, and accordingly, the performance of certain activities/services in relation to these “spots” may not require a firm to be authorized in Ireland in accordance with the regime provided for in MiFID II. Investment firms for the purposes of MiFID II may require an authorization in Ireland to perform activities or services in relation to foreign exchange forwards. UCITS management companies authorized in Ireland are permitted to use foreign exchange derivatives on behalf of UCITS funds in line with Directive 2009/65/EU, subject to certain restrictions. Alternative investment fund managers (AIFM) authorized in Ireland are also permitted to use foreign exchange derivatives on behalf of AIFs under management.

Spot exchange market Yes.

Euro foreign exchange policy is the responsibility of the ECB. There were 22 credit institutions authorized by the CBI as of December 31, 2021, all of which may deal in foreign exchange. Credit institutions are authorized and supervised under the provisions of, inter alia, the Central Bank Act 1971, Directive 2013/36/EU/Regulation (EU) No. 575/2013 (CRDIV/CRR), and Council Regulation (EU) No. 1024/2013 (the Single Supervisory Mechanism Regulation). As of December 31, 2021, 7 firms were authorized as exchange bureaus by the CBI under Part V of the Central Bank Act 1997.
These firms do not have a counterparty relationship with the CBI. Most firms authorized as exchange bureaus only provide OTC services to the public.

A payment institution or an electronic money institution authorized to provide payment services or issue electronic money may, in addition, provide foreign exchange services. There were 20 payment institutions and 18 electronic money institutions authorized in Ireland as of December 31, 2021. Please note that these figures do not include registered Account Information Service Providers which, although treated as payment institutions, are not permitted to provide foreign exchange services.

The provision of foreign exchange services, in addition to the provision of payment services, by a payment institution is recognized in Regulation No. 29(1) of the EU (Payment Services) Regulations 2018, which transposed Directive 2015/2366/EU (Payment Services Directive 2) into the domestic legislative framework.

The provision of foreign exchange services, in addition to the issuance of electronic money or provision of payment services, by an electronic money institution is recognized in Regulation No. 28(1)(c) of the EU (Electronic Money) Regulations 2011, which transposed Directive 2009/110/EC (as amended by Payment Services Directive 2) into the domestic legislative framework.

Under MiFID, spots which meet the requirements as set out in Article 10(2) of Commission Delegated Regulation (EU) No. 2017/565 are not considered financial instruments for the purposes of Section C(4) of Annex 1 to Directive 2014/65/EU.

Operated by the central bank: No.
Foreign exchange standing facility: No.
Allocation: No.
Auction: No.
Fixing: No.
Interbank market: Yes.
Over the counter: Yes.
Brokerage: Yes.
Market making: No.
Forward exchange market: Yes.

Official cover of forward operations: No.

Foreign exchange swaps and forwards are used by credit institutions to facilitate client-driven transactions and to manage internal foreign exchange asset exposures. Institutional investors use outright forwards and foreign exchange swaps owing to their needs to hedge international asset portfolios and future foreign exchange cash flows. The CBI participates in the forward exchange market to hedge investment activities and the swaps market to hedge certain foreign exchange exposures.

Foreign exchange balances may generally be freely transferred: all exchange control legislation in Ireland expired December 31, 1992. Since January 1, 1993, no laws or restrictions prevent the free movement of capital or current payments to or from Ireland by
individuals or corporate entities for any purpose whatsoever. This liberalization applies equally to EU and non-EU countries. However, in any such foreign exchange transactions, the Irish resident parties, including financial institutions, must ensure conformity with (1) financial sanctions under various EU Council regulations enforced under domestic law, which affect transfers, including economic resources, to and from jurisdictions, entities, and individuals that are subject to sanctions, and (2) anti-money-laundering legislation to ensure that effective measures are taken to combat the laundering of the proceeds of criminal activity or the financing of terrorism. In accordance with the Criminal Justice (Money Laundering and Terrorism Financing) Act 2010 (the “Act”), all credit and financial institutions providing services (including foreign-exchange-related services) must adopt policies and procedures to prevent money laundering and terrorism financing. The procedures must specify "measures to be taken (by them in their businesses) to prevent the use, for money laundering or terrorism financing, of transactions or products that could favor or facilitate anonymity." The “CBI” is specified in the Act as the appropriate authority for credit and financial institutions. CBI, pursuant to Section 63 of the Act, is responsible for monitoring credit and financial institutions’ compliance with the AML/CFT obligations contained in the Act. If a credit or financial institution fails to establish procedures to guard against the use of its foreign exchange services for money laundering or the financing of terrorism, it commits an offence under Section 54(15) of the Act, and may also subject to regulatory action by the CBI, including an administrative sanction.

Approval required: No.

Held abroad: Yes. Foreign exchange balances may generally be freely transferred: all exchange control legislation in Ireland expired December 31, 1992. However, in any such foreign exchange transactions, the Irish resident parties, including financial institutions, must ensure conformity with (1) financial sanctions under various EU Council regulations enforced under domestic law, which affect transfers, including economic resources, to and from jurisdictions, entities, and individuals that are subject to sanctions, and (2) anti-money-laundering legislation to ensure that effective measures are taken to combat the laundering of the proceeds of criminal activity or the financing of terrorism.

Approval required: No.

Accounts in domestic currency held abroad: Yes.

Accounts in domestic currency convertible into foreign currency: Yes.

Nonresident Accounts

Foreign exchange accounts permitted: Yes. Foreign exchange balances may be freely transferred: all exchange control legislation in Ireland expired December 31, 1992. However, the parties, including financial institutions, must ensure conformity with (1) financial sanctions under various EU Council regulations enforced under domestic law, which affect transfers, including economic resources, to and from jurisdictions, entities, and individuals that are subject to sanctions, and (2) anti-money-laundering legislation to ensure that effective measures are taken to combat the laundering of the proceeds of criminal activity or the financing of terrorism.
Since February 25, 2022, and subject to certain exemptions, EU credit institutions cannot accept deposits exceeding €100,000 from Russian or Belarusian persons or entities under the specific case laid down in Article 5(b)(1) of Council Regulation No. 833/2014 and Article 1u of Council Regulation No. 765/2006 of May 18, 2006, respectively: “it shall be prohibited to accept any deposits from Russian/Belarusian nationals or natural persons residing in Russia/Belarus, or legal persons, entities or bodies established in Russia/Belarus, if the total value of deposits of the natural or legal person, entity or body per credit institution exceeds 100 000 EUR.”

Capital Transactions
### Controls on capital transactions

Yes. Controls on capital transactions apply in accordance with EU regulations. In accordance with Article 63 of the Treaty on the Functioning of the EU, all restrictions on the movement of capital between EU member states and between EU member states and third countries are prohibited.

Controls apply to (1) investment in airlines, which must be majority owned and effectively controlled by EU countries and/or nationals of EU countries, unless otherwise provided for through an international agreement to which the EU is a signatory; (2) the acquisition by non-EU nationals of land for agricultural purposes, except with authorization; (3) the acquisition of Irish-registered shipping vessels, except through an enterprise incorporated in Ireland; (4) the acquisition by non-EU nationals of sea-fishing vessels registered in Ireland; (5) investment by residents of non-EU countries in flour milling activities; (6) the establishment of branches of third-country insurance enterprises as set out in the Solvency II Framework and supplemented with a CBI Handbook consistent with Solvency II for Branches of Third-Country Insurance Undertakings authorized by the CBI; (7) the extent that, under Directive 2009/65/EU, a depository of a UCITS must either have its registered office in the same EEA member state as that of the UCITS or be established in the EEA member state of the UCITS if its registered office is in another EEA member state; (8) the extent that, under AIFMD (2011/61/EU), the depositary for an EU AIF must be established in the EEA member state of the AIF and the depositary for a non-EU AIF must be established in the third country where the AIF is established or in the EEA member state of the AIFM managing the AIF or in the EEA member state of reference of the AIFM managing the AIF; and (9) investment by foreign-controlled enterprises does not require authorization, except for a very limited number of sectors that are subject to special conditions.

Regulation (EU) No. 2019/452 of March 19, 2019, established an EU-wide framework for FDI screening and for the European Commission and the Member States to coordinate their actions on foreign investments. In July 2020, the Government agreed to draft legislation which will give effect to this EU regulation to screen FDI coming into Ireland. The Investment Screening Bill 2020 will give
full effect to Regulation (EU) No. 2019/452. Once enacted, the Investment Screening Bill 2020 will also empower the Minister for Enterprise, Trade, and Employment to respond to threats to Ireland’s security and public order posed by particular types of foreign investment, and to prevent or mitigate such threats. Under the proposed legislation, the Minister will be able to assess, investigate, authorize, condition, prohibit, or unwind foreign investments from outside of the EU, based on a range of security and public order criteria.

| 07/07/2021 | Price stability is defined as a symmetric 2% inflation target over the medium term. Previously, it was defined as inflation below but close to 2%. |
ISRAEL

(Position as of June 30, 2022)

Status under IMF Articles of Agreement

Date of membership
July 12, 1954.

Article VIII
Yes. Date of acceptance: September 21, 1993.

Article XIV

Exchange Measures

Restrictions and/or multiple currency practices
No.

Exchange measures imposed for security reasons
Yes. No restrictions as reported in the latest IMF staff report as of December 31, 2021.

In accordance with IMF Executive Board Decision No. 144-(52/51)
Yes. Under Prevention of Terrorism Ordinance No. 33, 5708-1948, money and other assets may not benefit an organization associated with terrorism. The Prohibition on Terrorism Financing Law, No. 5765-2004, prohibits transactions in property for purposes of terrorism and prohibits transactions in terrorists’ property. Israel maintains a licensing mechanism on imports from eight non-WTO members that have no diplomatic relations with Israel or prohibit imports from Israel—namely, Afghanistan, Algeria, Iraq, the Democratic People's Republic of Korea, Libya, Saudi Arabia, Sudan, and Yemen. Licenses are granted for imports from these countries on an ad hoc basis, under exceptional circumstances (for example, economic necessity) and with authorization from the Ministry of Industry, Trade and Labor. Imports and exports of rough diamonds are controlled to avoid trade with countries that do not participate in the Kimberley Process Certification Scheme. Imports of goods that are clearly identified with organizations associated with terrorism (for example, flags) are prohibited. Trading is prohibited with the Islamic Republic of Iran, Iraq, Lebanon, and Syria; however, because of the US presence in Iraq, trade in Iraqi dinars was authorized temporarily. Economic activity is prohibited with a foreign entity that has been identified by a ministerial committee as assisting Iran in the advancement of its nuclear program or in obtaining weapons of mass destruction or the means of delivery of weapons of mass destruction, unless the ministerial committee has permitted economic activity with that foreign entity. In addition, financial institutions are prohibited from investing in a corporation that has been identified by a ministerial committee as maintaining a substantial business relationship with Iran, unless the ministerial committee has permitted it.

Other security restrictions
No.

Exchange Arrangement

Currency
Yes. The currency of Israel is the new Israeli shekel.

Other legal tender
No.

Exchange rate structure
Unitary Yes.
The de jure exchange rate arrangement is free floating. However, the Bank of Israel (BOI) may intervene in the foreign exchange market in the event of unusual movements in the exchange rate that are inconsistent with underlying economic conditions or when conditions in the foreign exchange market are disorderly. The BOI purchased US$34.8 billion in the foreign exchange market during 2021 (US $21.2 billion in 2020). The de facto exchange rate arrangement is classified as a floating arrangement. The BOI publishes monthly purchase information.

The representative rate of the new shekel against the US dollar for a specific day is the average rate of new shekels in bilateral interbank quotes during a predetermined sampling period. Deviations from the sample average of more than 2 standard deviations are excluded from the calculation. In exceptional cases, if the calculated exchange rate does not reflect actual rates in the market, discretion may be exercised in determining the representative rate. The representative rates of the new shekel against other currencies are based on the representative rate of the US dollar, and the exchange rates of the relevant currencies in the international money markets at the time the rates are determined. Therefore, the representative rate of any currency against the new shekel is an indicator of the exchange rate in the foreign exchange market, is based on an average of banks’ published buying and selling prices, and does not necessarily reflect actual transaction rates. The rates have no official or legal standing and are not published in the Official Gazette. They are used mainly for valuations and in contracts. Parties to a foreign-currency-indexed business transaction may use any mutually acceptable rate. The representative rate is binding on such transactions only if explicitly stipulated in advance.

Israel’s government, in consultation with the governor of the BOI, sets a price stability target—an annual rate of increase in the CPI. The current target is between 1% and 3% a year, and the BOI is obliged to strive to achieve that goal.

| Inflation target | Yes. |
| Target number | Yes. |
| Point target | |
| Target with tolerance band | |
| Band/Range | Yes. |
| Target measure | Yes. |
| CPI | Yes. |

The government sets an inflation target (currently 1%–3%) as part of its economic policy.

Core inflation

| Target horizon | Yes. |
| Operating target (policy rate) | Yes. |

The target is set in terms of the headline CPI and is evaluated continuously referring to the CPI inflation rate in the past 12 months.

Policy rate

The BOI is independent in setting the short-term rate of interest and in using the monetary instruments to achieve its goals. The BOI’s interest rate serves as the basis according to which a range of interest rates is set in the economy, including the rates of interest that the public (households and businesses) pays the banks on short-term loans and the rates of interest that it receives from the banks on its short-term deposits.

**Transparency**

Yes.

**Publication of votes**

n.a.

**Publication of minutes**

Yes. The BOI publishes the minutes of the discussions regarding the determination of the interest rate. The minutes are published about two weeks after the announcement of the interest rate. The publication of the minutes of the interest-rate discussions, in the format adopted by the CBs of the advanced economies throughout the world, is intended to increase the transparency of the BOI’s interest-rate policy, and together with other of the BOI’s publications will enable the public, the Knesset (Israel’s unicameral parliament), and the government to deepen their understanding of that policy.

**Publication of inflation forecasts**

Yes. The Monetary Committee presents the government and the Knesset Finance Committee no less than twice annually a report on the monetary policy. The report includes a survey of developments in the field of price stability and economic developments in the time period covered by the report, and the policy that the Committee believes necessary for the maintenance of price stability within the range determined by the government and for the attainment of the BOI’s other objectives. The reports are issued about a month after the end of each half-year. Appendices to the report contain tables with updated figures, which are used by policymakers. The BOI generally published this report before the Committee’s appointment as well.

**Other monetary framework**

**Exchange tax**

No.

**Exchange subsidy**

No.

**Foreign exchange market**

Yes. Commercial banks may freely set the exchange rate in transactions with their clients. The spot exchange market is unregulated and operates in an identical manner to developed country markets. Foreign exchange bureaus are licensed by the MOF; their activities are generally unrestricted, and several hundred bureaus are in operation. Foreign exchange bureaus may not make foreign exchange transactions directly with the BOI. They may maintain accounts abroad and make foreign currency transfers on behalf of their clients. They are subject to the Money-Laundering and Terrorism Financing Prohibition.

**Operated by the central bank**

No.

**Foreign exchange standing facility**

No.

**Allocation**

No.

**Auction**

No.

**Fixing**

No.

**Interbank market**

Yes. The interbank market operates freely with no formal framework. As of December 31, 2022, there were between 5 and 7 local market-maker banks and between 30 and 40 foreign financial institutions that were also active at times, as well as a few brokers. The BOI monitors the foreign exchange market (daily volume, volatility, bid-offer spreads, and so on) to ensure its orderly functioning.
Over the counter Yes. The interbank market operates freely; there is no formal framework.

Brokerage Yes. The interbank market operates freely; there is no formal framework.

Market making Yes. The interbank market operates freely; there is no formal framework.

Forward exchange market Yes. The BOI does not participate in the foreign exchange derivatives market. There are reporting requirements for transactions in spots, swaps, and new shekel–foreign currency forwards. The BOI had previously introduced US$/NIS swaps in 2020 to confront high dollar liquidity pressures. However, there were no new swap auctions during the second half of 2020 or in 2021.

Official cover of forward operations No.

Arrangements for Payments and Receipts

Minimum financing requirements  No.
Advance payment requirements  No.
Advance import deposits  No.

Documentation requirements for release of foreign exchange for imports  No.
Domiciliation requirements  No.
Preshipment inspection  No.
Letters of credit No.
Import licenses used as exchange licenses No.
Other No.
Import licenses and other nontariff measures Yes. Generally, a license is not required for importing goods, except goods which are prohibited for import or specifically require a license or an import permit according to the free import order 2014.
Positive list No.
Negative list Yes. There is a list of products that are prohibited for import. Government policy is to encourage free trade including imports. However, there are products whose import the state has banned as a result of unwanted use or danger to the public. The prohibited items for import are defined in the Customs Order (Prohibition of Importation) 2005, under the authority of the Minister of Finance. The order lists the prohibited goods for import at several levels, in some cases it defines the detail of the customs and the prohibited goods and in other cases it defines the designation of the prohibited goods for import.
In addition, there are prohibited products that are not included in the order: Law for the Prevention of Asbestos and Harmful Dust Hazards 2011; Import and Export Order (Prohibition of Importing Fireworks Di Nur) 2015; and, effective October 25, 2021, Import and Export Order (Airsoft Import Prohibition) (Temporary Order) 2021.
Open general licenses Yes. According to the provisions of the Free Import Order 2014, an exemption from proof of compliance of the import legality can be requested, depending on the government office in question, the type of goods and the purpose of the goods. These are exemptions from proving compliance with the conditions set out in the law, but the essential obligation remains unchanged.
In this area, there are exemptions in the field of standards, in the field of sensitive food or exemptions set forth in the Licensing of Services and Professions Law in the Automotive Industry and more.
Licenses with quotas Yes. There are quantitative restrictions on imports from countries with which Israel does not have diplomatic relations, mainly on fabrics and bedding from Pakistan and Bangladesh and polyethylene from the Gulf countries.
Other nontariff measures Yes. Israel has taken steps to reduce tariffs and nontariff barriers. With the exception of agricultural products, imports are free of quantitative restrictions. A special regime applies to imports from countries that restrict or prohibit imports from Israel. Most of Israel’s trade is covered by bilateral FTAs; additional FTAs with neighboring countries are under consideration.
Import taxes and/or tariffs No.
Taxes collected through the exchange system No.
State import monopoly No.

| Reserve requirements | Yes. | The same reserve requirement ratios apply to bank accounts held by residents and nonresidents. The reserve ratio depends on the type of deposit: 6% on current accounts, 3% on a deposit with a term of one week to one year, and no reserve is required on deposits of more than one year. However, reserve requirements against resident foreign exchange accounts are denominated in local currency, whereas reserve requirements against nonresident foreign exchange accounts are denominated in foreign currency. |
| Liquid asset requirements | Yes. | The ratio of foreign currency liquid assets to foreign currency net cash outflow for a repayment period of up to one month may not be less than 1. Banks are subject to the Basel III LCR requirement. |
| Interest rate controls | No. | |
| Credit controls | No. | |
| Differential treatment of deposit accounts held by nonresidents | Yes. | The same reserve requirement ratios apply to bank accounts of residents and nonresidents. The reserve ratio depends on the type of deposit: 6% on current accounts, 3% on a deposit with a term of one week to one year, and no reserve is required on deposits of more than one year. However, reserve requirements against resident foreign exchange accounts are denominated in local currency, whereas reserve requirements against nonresident foreign exchange accounts are denominated in foreign currency. |
| Reserve requirements | Yes. | Banks must have an overall liquidity management policy. The ratio of liquid assets to net cash outflow (including accounts held by residents and nonresidents) for a repayment period of up to one month may not be less than 1. Banks are subject to the Basel III LCR requirement. |
| Liquid asset requirements | Yes. | |
| Interest rate controls | No. | |

2022 ANNUAL REPORT ON EXCHANGE ARRANGEMENTS AND EXCHANGE RESTRICTIONS
INTERNATIONAL MONETARY FUND 1935

©International Monetary Fund. Not for Redistribution
### Credit controls
- No.

### Investment regulations
- Yes. There are limits on banks’ investments in nonfinancial companies (including insurance companies).

### Abroad by banks
- Yes.

### In banks by nonresidents
- Yes. No person may have control of more than 5% of a particular category of means of control of a banking corporation or bank holding corporation, except with a permit from the governor of the BOI after consultation with the Licenses Committee.

Italy has not adopted autonomous sanctions regimes. In accordance with EU regulations and the relevant UNSC resolutions, certain restrictions are maintained with respect to:

1. Belarus (since September 24, 2004) in the form of freezing of funds and economic resources of certain individuals and entities, and an embargo on arms and on goods intended for internal repression; since June 4, 2021, in the form of (a) flight ban for Belarusian airlines over the EU airspace; (b) further freezing of funds and economic resources of certain individuals and entities; (c) export ban on dual-use goods; (d) restrictions on tobacco export; (e) trading restrictions on oil and potassium products; and (f) financial restrictions; since March 2, 2022, restrictions to the trade of tobacco products, mineral products, potash, wood products, cement products, iron and steel products and rubber products; limitation to dual-use goods and technology, export of goods and technology that might contribute to Belarus’s military, technological, defense and security development, and exports to machinery, together with restrictions on the provision of related services; measures targeting the financial sector, banning a range of financial interactions and transactions with Belarus, and prohibiting the acceptance of deposits from Belarusian nationals (natural or legal persons) exceeding EUR100,000.

2. Bosnia and Herzegovina (since March 21, 2011) in the form of freezing of funds and economic resources of certain individuals and entities, and prohibition for EU persons and entities to make funds available to those listed;

3. Burundi (since October 1, 2015) in the form of freezing of funds and economic resources of certain individuals and entities, and prohibition for EU persons and entities to make funds available to those listed;

4. Central African Republic (since December 23, 2013) in the form of (a) freezing of funds and economic resources of certain individuals and entities; (b) prohibition for EU persons and entities to make funds available to those listed; and (c) an embargo on arms;

5. Democratic Republic of the Congo (DRC) (since April 7, 1993) in the form of (a) freezing of funds and economic resources of certain individuals and entities; (b) prohibition for EU persons and entities to make funds available to those listed; and (c) an embargo on arms;

6. Guinea (Conakry) (since October 27, 2009) in the form of freezing of funds and economic resources of certain individuals and...
entities, and prohibition for EU persons and entities to make funds available to those listed;

(7) Guinea Bissau (since May 31, 2012) in the form of freezing of funds and economic resources of certain individuals and entities, and prohibition for EU persons and entities to make funds available to those listed;

(8) Iran (since July 26, 2010, and April 12, 2011) in the form of (a) freezing of funds and economic resources of certain individuals and entities; (b) prohibition for EU persons and entities to make funds available to those listed; (c) an embargo on the export of arms, equipment used for internal repression, certain telecommunications equipment, goods and services related to missile technology and nuclear proliferation, and certain metals and software; and (d) an embargo on dual-use goods;

(9) Iraq in the form of (a) freezing of funds and economic resources of certain individuals and entities; (b) prohibition for EU persons and entities to make funds available to those listed; (c) prohibition in trading cultural goods;

(10) Democratic People’s Republic of Korea (DPRK) (since 2006) in the form of (a) freezing of funds and economic resources of certain individuals and entities; (b) prohibition for EU persons and entities to make funds available to those listed; (c) an embargo on arms, goods, dual-use goods, luxury goods, crude oil, and services related to missile technology and nuclear proliferation;

(11) Lebanon (since August 11, 2006) in the form of an arms embargo; and (since July 30, 2021) in the form of (a) freezing of funds and economic resources of certain individuals and entities; (b) prohibition for EU persons and entities to make funds available to those listed; and (c) an arms embargo;

(12) Libya (since February 26, 2011) in the form of (a) freezing of funds and economic resources of certain individuals and entities; (b) prohibition for EU persons and entities to make funds available to those listed; (c) an embargo on exports of arms and equipment used for internal repression; and (d) restrictions on trading of oil and oil-derived products;

(13) Mali (effective December 13, 2021) in the form of freezing of funds and economic resources of certain individuals and entities, and prohibition for EU persons and entities to make funds available to those listed;

(14) Myanmar (since October 28, 1996) in the form of (a) freezing of funds and economic resources of certain individuals and entities; (b) prohibition for EU persons and entities to make funds available to those listed; and (c) an embargo on arms, dual-use goods, equipment used for internal repression, and certain telecommunications equipment;

(15) Nicaragua (since October 14, 2019) in the form of (a) freezing of funds and economic resources of certain individuals and entities; and (b) prohibition for EU persons and entities to make funds available to those listed;

(16) Russia (since July 31, 2014) in the form of (a) limited access to EU primary and secondary capital markets for certain Russian banks and companies; (b) an export and import ban on trade in arms; (c) an export ban for dual-use goods for military use or military end users in Russia; (d) restrictions on trading of sensitive technologies and services that can be used for certain types of oil production and exploration; since February 22, 2022, further sectoral restrictive measures in the form of (a) broad financial limitations; (b) a ban on dual-use goods export; (c) trade limitations on oil, gold, coal, solid fossil fuels, iron, steel, gold and luxury goods; (d) restrictions in the aviation, maritime navigation and road transport sectors;
(17) Somalia (since January 23, 1992) in the form of freezing of (a) funds and economic resources of certain individuals and entities; (b) an arms embargo; and (c) a ban on charcoal imports;
(18) South Sudan (since May 7, 2015) in the form of freezing of funds and economic resources of certain individuals and entities, and an arms embargo;
(19) Sudan (since March 15, 1994) in the form of freezing of funds and economic resources of certain individuals and entities, and an arms embargo;
(20) Syria (since May 27, 2013) in the form of (a) freezing of funds and economic resources of certain individuals and entities; (b) an embargo on arms and equipment used for internal repression; (c) restrictions on financing and financial assistance related to certain telecommunications systems or for construction of new power plants; (d) restrictions on trading of oil and oil-derived products, precious minerals, and precious metals; (e) and restrictions on investments related to oil exploration and production and to power plant construction;
(21) Tunisia (since January 31, 2011) in the form of freezing of funds and economic resources of certain individuals and entities;
(22) Turkey (since October 14, 2019) in the form of freezing of funds and economic resources of certain individuals and entities;
(23) Ukraine (since March 5, 2014; March 17, 2014; June 23, 2014, with the addition of further measures since February 23, 2022) in the form of (a) freezing of funds and economic resources of certain individuals and entities; and (b) an import ban on goods from Crimea and Sevastopol, restrictions on trade and investment related to certain economic sectors and infrastructure projects in Crimea and Sevastopol, and prohibition against the supply of tourism services in Crimea or Sevastopol; (c) since February 23, 2022, an import ban on goods originating in the non-government controlled areas of the Donetsk and Luhansk oblasts of Ukraine;
(24) Venezuela (since November 13, 2017) in the form of (a) freezing of funds and economic resources of certain individuals and entities and (b) an embargo on exports of arms, equipment used for internal repression, and certain telecommunications equipment;
(25) Yemen (since December 18, 2014) in the form of (a) freezing of funds and economic resources of certain individuals and entities; (b) prohibition for EU persons and entities to make funds available to those listed; and (c) arms embargo.
(26) Zimbabwe (since February 18, 2002) in the form of (a) arms embargo; (b) freezing of funds and economic resources of certain individuals and entities; and (c) prohibition for EU persons and entities to make funds available to those listed. Individual measures are currently in force only towards one entity;
(27) Individuals and entities connected with the proliferation of chemical weapons (since October 15, 2018) in the form of freezing of funds and economic resources; and prohibitions for EU persons and entities to make funds available to those listed;
(28) Individuals and entities responsible for cyberattacks (since May 17, 2019) threatening the EU or its member states in the form of freezing of funds and economic resources; and prohibitions for EU persons and entities to make funds available to those listed;
(29) Terrorist groups in the form of (a) freezing of funds and economic resources and (b) prohibitions for EU persons and entities to make funds available to persons and entities associated with Osama bin Laden, Al-Qaida, and the Taliban, and to certain individuals, groups, and entities, with a view to combating terrorism; and
(30) Individuals, entities, and bodies—including state and non-state
actors—responsible for, involved in, or associated with serious human rights violations and abuses worldwide, no matter where they occurred in the form of (a) freezing of funds and economic resources; and (b) prohibition for EU persons and entities to make funds available to those listed. Effective March 16, 2021, Council Regulation (EU) 2021/445 of March 12, 2021, repealed Regulation (EU) No. 270/2011 concerning restrictive measures directed against certain persons, entities, and bodies in view of the situation in Egypt.

The exchange rate arrangement of the euro area is free floating. Italy participates in a currency union (EMU) with 18 other members of the EU and has no separate legal tender. The ECB publishes information regarding its interventions; it last intervened in March 2011. When it intervenes, the ECB intervenes at the quotes of the market makers.

| **Official exchange rate**                     | Yes.   |

The ECB publishes euro foreign exchange reference rates on every working day, except on TARGET closing days. The reference rates are based on a regular daily concertation procedure between CBs across Europe, which normally takes place at 14:15 Central European Time, and are usually updated around 16:00 Central European Time. The reference rates are broadly used by the Italian public administration for administrative and fiscal purposes.

Other monetary framework | Yes. | Price stability is the primary objective of the Eurosystem and of the single monetary policy for which it is responsible. This is stated in the Treaty on the Functioning of the EU, Article 127(1). “Without prejudice to the objective of price stability,” the Eurosystem will also “support the general economic policies in the Community with a view to contributing to the achievement of the objectives of the Community.” These include a “high level of employment” and “sustainable and non-inflationary growth.” Effective July 7, 2021, price stability is defined as a symmetric 2% inflation target over the medium term. (Previously, it was defined as inflation rate below but close to 2% over the medium term.)

Exchange tax | No. |
Exchange subsidy | No. |

Foreign exchange market | Yes. | ADs may freely determine their exchange rates and foreign exchange commissions in transactions with their clients.
Spot exchange market | Yes. | Italian banks deal freely in the foreign exchange market. Banks are authorized by the CB to perform their general activities. Their operations are not limited to the purchase and sale of banknotes; they may also make foreign currency payments and transfers on behalf of their clients.

Operated by the central bank | No. |
Foreign exchange standing facility | No. |
Allocation | No. |
Auction | No. |
Fixing | No. |

Interbank market | Yes. | Dealers may freely determine their exchange rates. No data are available on the number of banks that deal on the OTC foreign exchange market.
Over the counter | Yes. | The interbank foreign exchange market operates over the counter.
Brokerage | Yes. |
Market making | Yes. |
Forward exchange market | Yes. | Premiums and discounts in the forward exchange market are determined by the interplay of market forces.

Official cover of forward operations | No. |

Arrangements for Payments and Receipts

Prescription of currency requirements | No. |
Controls on the use of domestic currency | No. | Transfers in cash or bearer instruments of €2,000 or more may be made only through banks, electronic money institutions, or payment institutions, provided they do not perform money remittance services, and the Poste Italiane S.p.A. For money remittance services, the applicable threshold is €1,000.

For current transactions and payments | No. |
For capital transactions

Transactions in capital and money market instruments No.
Transactions in derivatives and other instruments No.
Credit operations No.

Use of foreign exchange among residents No.

Payments arrangements Yes.
Bilateral payments arrangements No.
Operative No.
Inoperative No.

Regional arrangements No.
Clearing agreements Yes. Italy maintains clearing accounts with Croatia and Slovenia. These accounts are used for trade in cross-border areas. The balances in these accounts may be used only to finance trade between certain districts of Croatia and Slovenia and the Italian province of Trieste. The balances are not transferable. There is no automatic mechanism by which outstanding balances are settled within 90 days. Only Italy is allowed to maintain a debit balance on these accounts.

Barter agreements and open accounts No.

Administration of control No. Residents are allowed to conduct foreign exchange transactions freely, with settlements effected either indirectly—through the Bank of Italy (BOI), other financial intermediaries, or the Poste Italiane S.p.A.—or directly by drawing on external accounts or by offsetting debits and credits vis-à-vis other residents or nonresidents. Data on all transactions exceeding the equivalent of €15,000 must be registered and reported for fiscal purposes. Payments in cash or bearer instruments, when the amount exceeds €2,000, may be made only through authorized financial institutions.

Payments arrears No.
Official No.
Private No.

Controls on trade in gold (coins and/or bullion) Yes. Domestic purchases and sales of gold exceeding the equivalent of €12,500 must be declared to the BOI’s financial information unit (FIU) (Unità di Informazione Finanziaria) for anti-money-laundering purposes. On external trade Yes. Purchases and sales of gold exceeding the equivalent of €12,500 must be declared to the Unità di Informazione Finanziaria.

Controls on exports and imports of banknotes No. Residents and nonresidents may take into or out of the country unlimited amounts of cash and securities in euros and/or foreign currency. For fiscal and anti-money-laundering purposes, the physical transfer of cash and/or securities exceeding the equivalent of €10,000 must be declared in writing on entry or departure, and the declaration must be submitted to the customs agency (Agenzia delle Dogane). For transfers by mail, the declaration must be submitted to the Poste Italiane S.p.A. or other postal service providers, which in
Controls on exports and imports of banknotes turn transmit the information to the customs agency.

### On exports

**Domestic currency**

No. Residents and nonresidents may take into or out of the country unlimited amounts of cash and securities in euros and/or foreign currency. For fiscal and anti-money-laundering purposes, the physical transfer of cash and/or securities exceeding the equivalent of €10,000 must be declared in writing on entry or departure and the declaration submitted to the customs agency.

**Foreign currency**

No. Residents and nonresidents may take into or out of the country unlimited amounts of cash and securities in euros and/or foreign currency. For fiscal and anti-money-laundering purposes, the physical transfer of cash and/or securities exceeding the equivalent of €10,000 must be declared in writing on entry or departure and the declaration submitted to the customs agency.

### On imports

**Domestic currency**

No. Residents and nonresidents may take into or out of the country unlimited amounts of cash and securities in euros and/or foreign currency. For fiscal and anti-money-laundering purposes, the physical transfer of cash and/or securities exceeding the equivalent of €10,000 must be declared in writing on entry or departure and the declaration submitted to the customs agency.

**Foreign currency**

No. Residents and nonresidents may take into or out of the country unlimited amounts of cash and securities in euros and/or foreign currency. For fiscal and anti-money-laundering purposes, the physical transfer of cash and/or securities exceeding the equivalent of €10,000 must be declared in writing on entry or departure and the declaration submitted to the customs agency.

### Resident Accounts

- **Foreign exchange accounts permitted**: Yes.
- **Held domestically**: Yes.
- **Approval required**: No.
- **Held abroad**: Yes.
- **Approval required**: No.
- **Accounts in domestic currency held abroad**: Yes.
- **Accounts in domestic currency convertible into foreign currency**: Yes.

### Nonresident Accounts

- **Foreign exchange accounts permitted**: Yes.
- **Approval required**: No.
- **Domestic currency accounts**: Yes.
- **Convertible into foreign currency**: Yes.
- **Approval required**: No.
- **Blocked accounts**: No.

Controls on direct investment
Yes.

Outward direct investment
No.

Inward direct investment
Yes.

With respect to nonresidents, controls apply to (1) majority participation or controlling interest in companies that publish daily newspapers and periodicals; (2) licenses for audiovisual communications firms headquartered in a non-EU country; (3) majority participation by non-EU residents in companies licensed for television and sound-radio broadcasting and participation by non-EU residents in companies that are not legal persons and are licensed for television and sound-radio broadcasting; (4) acquisition of aircraft in Italy by foreigners and foreign ownership exceeding one-third of the capital of companies possessing such aircraft; (5) airlines established in the country, which must be majority owned and effectively controlled by EU states and/or nationals of EU states, unless otherwise indicated through an international agreement to which the EU is a signatory; (6) purchases by foreigners other than EU residents of a majority interest in Italian flag vessels or of a controlling interest in ship-owning companies headquartered in Italy; (7) purchases of Italian flag vessels used to fish in Italian territorial waters; and (8) establishment of branches, agencies, etc., of securities investment companies. In accordance with EU legislation, whatever the potential acquirer’s nationality (resident or nonresident), acquisition of holdings in the financial sector requires prior authorization by the relevant supervisor (for banks, by the ECB, with a preliminary investigation by the BOI; for investment firms and asset management companies, the BOI; for insurance companies, the Institute for the Supervision of Insurance Companies) if the holding (a) equals or exceeds 10%, 20%, 30%, or 50% of the target entity’s capital or voting rights or (b) confers the power to exert significant influence over the target entity. Authorization is also needed if control is gained as a result of acquisition of holdings or contracts or through other bylaw provisions.

Regulation (EU) 2019/452 of March 19, 2019, established an EU-wide framework for FDI screening and for the European Commission and the Member States to coordinate their actions on foreign investments.

The Italian government enacted Law Decree No. 23 as of April 8, 2020, setting forth new provisions impacting the Golden Power and in general the FDI screening mechanisms in light of COVID-19. The Decree has expanded the obligation to communicate to the government any acquisition (or share deal) and asset deal, by EU and extra-EU entities, of shareholdings in companies operating assets falling in the sectors defined in accordance with the Article 4 of the Regulation (EU) 2019/452, which include critical technologies and dual-use items, including artificial intelligence, robotics, semiconductors, cybersecurity, aerospace, energy storage, quantum and nuclear technologies as well as nanotechnologies and biotechnologies, food security, access to sensitive information,
including personal data, freedom and pluralism of the media and financial, credit and insurance sectors. The Decree now allows the Italian government to initiate Golden Power reviews independently and in the absence of a notification.

The Decree has provisionally extended the scope of the existing filing requirements for transactions concerning sectors of energy, transportation, communications, as well as the European sectors mentioned above, also to EU entities. In particular, until December 31, 2020, any acquisition of shares, resolution, and transaction adopted by any EU or extra-EU entity holding strategic assets in the sectors of energy, transportation and communications, as well as high tech is subject to a foreign investment filing if: (1) resulting in change of control, ownership, or destination of use of assets above and (2) for extra-EU investments, the acquisition is at least 10% of share capital or voting rights and the total investment value is equal to or higher than one million euros, while for European entities, the investment results in control of the targeted company. Decree No. 23 was extended by Law No. 176/2020 until June 30, 2021 (effective January 1, 2021), by Decree No. 56/2021 until December 31, 2021 (effective July 1, 2021), and by Decree No. 228/2021 until December 31, 2022 (effective January 1, 2022).

Provisions Specific to the Financial Sector

Provisions specific to commercial banks and other credit institutions
Yes. Commercial banks and other credit institutions are subject to EU and national prudential regulations in accordance with the Basel Committee on Banking Supervision core principles for effective
banking supervision and the Basel Accord (International Convergence of Capital Measurement and Capital Standards). The Consolidated Law on Banking (Legislative Decree No. 385/1993, Testo Unico Bancario (TUB)), as well as BOI Circular No. 285 of December 17, 2013 (as amended), and Circular No. 286 on prudential reporting transpose into the national regulatory framework the provisions in CRD IV—Directive 2013/36/EU concerning authorization of credit institutions, acquisition of qualified holdings in a credit institution, cross-border activities, internal capital and liquidity adequacy assessment processes, corporate governance, risk management and control, remuneration policies and practices, capital buffers, prudential supervision, supervisory review and evaluation processes, and sanctions. The present framework has been recently reviewed to implement the new CRD V requirements (Directive (EU) No. 2019/878 of the European Parliament and of the Council of May 20, 2019, Amending Directive 2013/36/EU as regards Exempted Entities, Financial Holding Companies, Mixed Financial Holding Companies, Remuneration, Supervisory Measures and Powers, and Capital Conservation Measures). The CRD V requirements regarding the financial holding companies, the mixed financial holding companies, and Intermediate EU parent company (Articles 21a and 21b of the Directive (EU) No. 2019/878 of the European Parliament and of the Council of May 20, 2019) were transposed into the Italian legislation by means of the Legislative Decree No. 182/2021, effective November 29, 2021. The national framework was completed with BOI’s implementing provisions (Circular No. 285, Part I, Chapters 2 and 4, as updated in July 2022). Moreover, provisions concerning own funds, own funds requirements, liquidity requirements, leverage, large exposures, and public disclosure obligations are laid out in the CRR — EU Capital Requirements Regulation No. 575/2013.

(1) A reform of “Banche Popolari” (a particular form of nonprevalent mutual cooperative bank) was approved by the parliament (Decree-Law No. 3/2015 converted to Law No. 33/2015); in December 2016, in particular, the reform introduced an obligation for Banche Popolari with consolidated assets exceeding €8 billion to become joint-stock companies. Following the enactment of primary legislation, the BOI’s implementing provisions went into effect, completing the legal framework by providing the necessary prudential rules and guidelines for the banks concerned.

(2) Decree-Law No. 18 of February 14, 2016, converted by Law No. 49 of April 8, 2016, introduced significant innovations in the Italian cooperative banking sector fostering the consolidation of the “Banche di Credito Cooperativo” (BCCs) and providing for the establishment of cooperative banking groups. According to the regulatory framework, each Italian BCC must either join a cooperative banking group to hold a banking license, become a joint-stock company, or liquidate. The parent company of the cooperative banking group must be a joint-stock company, with a banking license and net capital not less than €1 billion. The provisions of BOI Circular No. 285, as amended, aligned the rules applicable to cooperative banks on an individual basis to the reform of cooperative banking groups. Decree-Law No. 119 of October 23, 2018, amended the reform and allowed BCCs established in the Italian Region of Trentino Alto-Adige to create an institutional protection scheme (IPS) instead of joining a cooperative banking group to take into account particular features of the mutual banks located in that region.

(3) Directive 2014/92/EU on the comparability of fees related to payment accounts, payment account switching, and access to payment accounts with basic features (Payment Accounts
Directive (EU) 2015/2366 on payment services in the internal market (Revised Payment Service Directive—PSD2), complemented by Regulation (EU) 2015/751, was transposed into Legislative Decree No. 218 of December 15, 2017. In particular, the regime (a) regulates the new payment services set out in the Directive; (b) aligns the electronic money distribution regime applicable to banks with those already applicable to electronic money institutions; (c) imposes EU payment institutions operating on an EU member state territory through agents under the right of establishment to appoint a central contact point, under certain conditions, to ensure adequate communication and information reporting; (d) strengthens customer protection in the event of unilateral changes to contract terms; and (e) prohibits additional fees for specified payment methods. In March 2019, the BOI adopted implementing provisions (amending its provisions for banks and financial intermediaries on transparency and correct relations with customers, originally issued July 29, 2009) to ensure that adequate information is delivered to consumers on payment account fees.

In July 2019, the BOI issued a regulation amending supervisory provisions for payment institutions and electronic money institutions and updated Circular No. 285 on supervisory provisions for banks to implement the PSD2 provisions applicable to banks.

(5) The Banking Recovery and Resolution Directive (BRRD) was transposed (Legislative Decree Nos. 180 and 181). In particular, Decree No. 180/2015 (a) requires banks to meet at all times a prudential requirement on their own funds and liabilities to ensure resolution actions’ effectiveness; (b) empowers resolution authorities to assess banks’ resolvability and impose a wide range of measures to remove any impediment to their resolvability (for example, requirement to divest specific assets; restrict or prevent the development of business lines or products; require changes to legal or operational structures); and (c) provides that banks must contribute annually to the National Resolution Fund. The Deposit Guarantee Scheme Directive (DGSD) (Legislative Decree No. 30) requires banks to contribute annually to a deposit guarantee scheme; if a bank fails to do so, the ECB may, as a last resort, withdraw its banking license.

Directive (EU) 2017/2399 of the European Parliament and of the Council of December 12, 2017, amended Directive 2014/59/EU as regards the ranking of unsecured debt instruments in the insolvency hierarchy. The directive promotes the harmonization of the creditors’ hierarchy across national insolvency laws, introducing a new layer of unsecured debt instruments that ranks senior to subordinated debt and junior to senior preferred notes and any claims benefiting from...
Article 12-bis of the TUB by Law No. 205 of December 27, 2017, which created a new class of nonpreferred senior debt ("strumenti di debito chirografario di secondo livello") ranked in insolvency proceedings above own funds instruments and subordinated liabilities that do not qualify as own funds instruments, but below other senior liabilities. Directive (EU) 2019/879 amended Directive 2014/59/EU as regards the minimum requirement of own funds and eligible liabilities that banks should fulfill to have enough loss-absorbing and recapitalization capacity in the event of resolution. This Directive was transposed into the Italian framework effective November 11, 2021, by Legislative Decree No. 193, which, inter alia, (a) required banks subject to resolution strategy to build-up a minimum requirement of own funds and eligible liabilities (this requirement will enter into force in 2024, but an intermediate requirement applies as of 2022), (b) introduced some amendments to certain provisions implementing Directive BRRD, relating, notably, to liabilities governed by non-EU law and moratorium, and (c) introduced a minimum denomination amount of €150,000 and €200,000 for, respectively, senior non-preferred debt and subordinated debt instruments issued by banks.

(6) Following the transposition of the Mortgage Credit Directive (MCD) relating to residential immovable property (Legislative Decree No. 72), an updated version of the regulation on transparency in banking services and conduct rules between intermediaries and clients entered into force. In particular, such amendments enhanced consumer protection by requiring banks to provide consumers with personalized information about mortgage credit agreements by means of a standardized document (according to the template attached to the MCD) and granting the consumer a seven-day reflection period before the conclusion of the agreement. Also, BOI Circular No. 285/2013 (Supervisory Provisions for Banks) and Circular No. 288/2015 (Supervisory Provisions for Financial Institutions) were updated and provide for the MCD rules on creditworthiness assessment and on the valuation of immovable property for mortgage lending purposes.

(7) Regarding the provision of investment services, the Markets in Financial Instruments and Amending Regulation /Markets in Financial Instruments and Amending Directive package on market in financial instruments (Regulation (EU) No. 600/2014 and Directive 2014/65/EU) was transposed into national law by Legislative Decree No. 129 of August 3, 2017, which amended the TUF and entered into force on January 3, 2018. In December 2019, a BOI implementing regulation, which introduces organizational rules for intermediaries providing investment services (banks included) was issued. Circular No. 285 on supervisory provisions for banks was also updated. Such regulation is currently under revision to complete the transposition of the Investment Firm Directive (IFD) (Directive 2019/2034/EU) on the prudential supervision of investment firms, with specific regard to rules on internal governance and remuneration systems applicable to investment firms.

(8) Directive (EU) 2018/843 on anti-money laundering and counter-terrorism financing was transposed into AML Law No. 231/2007, as amended by Legislative Decree No. 125 of October 4, 2019. The implementation process of the previous directive (Directive EU 2015/849)—with regard to sanctioning procedures, customer due diligence, internal controls, and record-keeping—is finalized. The BOI has adopted the following implementing provisions: (a) Regulation of the BOI of March 26, 2019, on organization,
procedures and internal control in the field of anti-money laundering, which introduces organizational rules for obligated entities and (b) BOI regulation of January 15, 2019, on sanctions and administrative sanctioning procedures; (c) BOI regulation of July 30, 2019, on customer due diligence; and (d) BOI regulation of March 24, 2020, on record-keeping.

(9) In November 2019, the European Parliament adopted a regulatory package for the (minimum) harmonization of European Covered Bond Framework in EU Member States (Directive (EU) 2019/2162 and Regulation (EU) 2019/2160). The Directive was transposed into national law with the adoption of Legislative Decree No. 190/2021 of November 5, 2021, which amended Law No. 130/1999, effective December 1, 2021. The new framework will be complemented with level two implementing provisions to be issued by the BOI (Circular No. 285, Part III, Chapter 3), currently under update.

<td>The BOI issued a regulation on collective asset management (Regolamento sulla gestione collettiva del risparmio (RGCR)) that is consistent with the EU regulatory framework (as amended). Among other things, the Italian Consolidated Law on Finance specifies that Italian credit funds, which have been permitted to originate loans since 2015, cannot lend to retail consumers and that their lending activity is subject to rules on transparency. It also extends permission to EU AIFs to grant loans in Italy under conditions set out in the law and specified by the above-mentioned RGCR issued by the BOI. Ministry of Economy and Finance Decree No. 30 of March 5, 2015 (Regulations implementing Article 39 of the Consolidated Law on Finance on the General Criteria that Italian collective investment schemes have to comply—DM 30/2015), was amended effective March 30, 2022, by Ministry of Economy and Finance Decree No. 22 of January 13, 2022, with reference to the access of certain categories of retail investors to investments in collective investment schemes marketed to professional investors to increase the possibility of investments by well-informed and high- and medium-net worth retail investors.</td>

Other managed arrangement

Floating
Yes.  The de jure and de facto exchange rate arrangements are floating.
The rate of the Jamaican dollar is determined in the domestic foreign exchange market, in which the Bank of Jamaica (BOJ) intervenes occasionally with sales and purchases of foreign currency. The BOJ intervenes occasionally via market auctions. Intervention may be done on both sides of the market. The BOJ announces the auction on the day of the auction by 9:30 a.m., and the results are published on the day by 10:45 a.m. The results are also published in its Annual Report and Quarterly Monetary Policy Report, with a two-month lag. The Bank also publishes, on each intervention date, a list of the foreign exchange intermediaries that participated in the auction, the amounts that each was allotted, and the settlement prices. To improve the transparency of the market, the BOJ, since mid-2019, has published all transactions over US$100,000 and the rate at which these transactions were consummated.

For the period July 2021 to June 2022, the foreign exchange market reflected a gradual but steady recovery from the impact of the COVID-19 pandemic. This recovery was manifested in a year-over-year increase in foreign exchange inflows which was underpinned by strong recovery in some key sectors such as Tourism and Business Process Outsourcing (BPO). However, the impact of the higher Tourism inflows was partially offset by increased demand since the second half of 2021 as well as a slowdown in inflows from remittances since the beginning of 2022. The increased demand, which climaxed in the first quarter of 2022, was influenced by an increase in global commodity prices. It was in this context that the BOJ provided USD liquidity to the market via its foreign exchange intervention sale auctions, to maintain orderly functioning of the financial markets in general and the foreign exchange market in particular.

In this regard, the Bank sold US$190.0 million to the market between July and December of 2021, which was followed by additional intervention sales totaling US$411.9 million over the first six months of 2022. In addition to the intervention sales, a further US$745.6 million was sold to public sector entities (PSEs) and the energy sector between July 2021 and June 2022 to satisfy their demand in a context of increased global commodity prices. During the review period, the Bank also injected US$168.08 million into the financial system via a net redemption of its USD CDs. The Bank also issued a total of US$17.5 million in foreign exchange swaps between July 2021 and June 2022. In addition to the foregoing, to reduce market cornering and improve liquidity in the foreign exchange market, the Bank adjusted the NOP limits of ADs by reintroducing absolute Jamaica dollar foreign exchange net open position (NOP) limits along with the existing foreign exchange NOP limits as percentage of regulatory capital. More specifically, in December 2021, the Bank imposed an absolute limit of JS4.5 billion and JS7.5 billion for long positions and short positions, respectively. These limits complemented the existing foreign exchange NOP limits of 15% and 25% of regulatory capital for long and short positions of ADs. These measures were complemented by increases in the monetary policy rate and a tightening of Jamaica dollar liquidity conditions, which prompted increased sales of USD to the market by some foreign-currency holders in an effort to procure JMD liquidity to meet their local-currency obligations. The aforementioned operations supported a general improvement in supply conditions in the foreign exchange market in the second half of 2021 and over the first six months of 2022.
### Official exchange rate

Yes. The weighted average selling rate of ADs and cambios is the official rate for customs duty valuation and tax purposes, legal transactions, accounting and foreign exchange transactions with the government. The official rate is calculated daily for use the following business day or until the day after the next calculation and publication of an exchange rate by the BOJ. This information is published via various media and on the BOJ website.

### Monetary policy framework

#### Exchange rate anchor

- **U.S. dollar**
- **Euro**
- **Composite**
- **Other**

#### Monetary aggregate target

**Inflation-targeting framework**

Yes. The mandate of monetary policy is the maintenance of price stability or low inflation. The BOJ conducts monetary policy with the aim of achieving a continuous medium-term inflation target of 4%–6% an annum for the next three years. The Bank uses monetary policy tools to meet this target objective. Jamaica’s monetary policy framework moved from Inflation Targeting Lite to a full-fledged inflation-targeting regime with the passing of the BOJ (Amendment) Act, 2020, effective April 16, 2021. The BOJ (Amendment) Act, 2020, also established the MPC which has the responsibility of making monetary policy decisions to achieve the Government of Jamaica’s (GOJ’s) inflation target.

#### Target setting body

- **Government** Yes. The inflation target was established by the Minister of Finance and the Public Service (MOFP) in consultation with the BOJ effective April 16, 2021. The target is a continuous medium-term inflation target.
- **Central Bank**
  - **Monetary Policy Committee**
  - **Central Bank Board**

- **Target number** Yes.
- **Point target** Yes.
- **Target with tolerance band**

- **Band/Range** Yes. The Bank’s medium-term inflation target range is 4%–6%.
- **Target measure** Yes.
- **CPI** Yes. This inflation rate is measured as the 12-month point-to-point change.
in the CPI published by the Statistical Institute of Jamaica.

**Core inflation**

**Target horizon**

| Yes. | The target horizon is three fiscal years (fiscal years 2021/2022–2023/2024). |

**Operating target (policy rate)**

| Yes. | The BOJ uses a variety of tools to achieve its inflation target. Since March 1, 2019, the main one is the interest rate on the overnight balances in the current accounts of deposit-taking institutions (DTIs) at the BOJ. Changes in the Bank’s policy rate signal the Bank’s policy stance toward achieving its inflation objective. |

**Policy rate**

| Yes. | Interest is paid on overnight balances in the current accounts of DTIs at the BOJ. The applicable interest rate is the BOJ policy rate. At end-August 2022, the policy rate was 6.00%. |

**Target corridor band**

| Yes. | The floor of the corridor is set as the Bank’s policy rate while the ceiling, the interest rate on the overnight standing lending facility, is determined as a spread over the policy rate. The ceiling of the interest rate corridor is 200 basis points (bps) over the policy rate. |

**Other**

| No. | |

**Accountability**

| Yes. | |

**Open letter**

| Yes. | Effective April 16, 2021, if inflation either falls below the lower end of the target (below 4%) or increases above the upper end of the target (above 6%), the Bank is required to explain to the MOFP and the Jamaican public why the inflation target was missed and the corrective policy actions that will be taken to restore inflation to the target. The Bank is required to notify the MOFP within 60 days of missing the target. |

**Parliamentary hearings**

| Yes. | Effective April 16, 2021, the MPC must publish statements on the performance of the Bank with respect to its monetary policy and achievements in relation to the inflation target, and issue monetary policy updates which are to be submitted to the MOFP every six months, at a minimum, or as may be directed by Parliament. The law guides that the MOFP must, on receipt of the Monetary Policy Statement prepared by the MPC, table a copy in the House of Representatives, following which, in keeping with the statutory provision, the MOFP must refer to the Standing Finance Committee of the House of Representatives. |

| No. | |

**Transparency**

| Yes. | |

**Publication of votes**

| No. | |

**Publication of minutes**

| Yes. | Effective April 16, 2021, the MPC must at the end of each meeting, or as soon as practical thereafter, publish on the Bank’s website, a summary of the decisions made at the meeting and the reasons, and must further within four weeks of the conclusion of the meeting publish on the Bank’s website the Minutes of the meeting. |

| Yes. | The monetary policy report, published quarterly, describes the Bank’s most recent policy decision and outlines the Bank’s projections for inflation in Jamaica and the main macroeconomic variables that affect it. |

**Other monetary framework**

**Exchange tax**

| No. | |

**Exchange subsidy**

| No. | |
**Foreign exchange market**
Yes.
Commercial banks and other ADs and cambios freely set the exchange rate in transactions with their clients. ADs and cambios are free to determine their foreign exchange commissions and margins with their clients.

With regard to the resale of intervention funds, the BOJ reserves the right to determine the spread above the settlement price at which the funds must be resold.

**Spot exchange market**
Yes.
The market is operated by ADs, cambios, exchange bureaus (bureaux de change), and the BOJ. As of December 31, 2021, there were 10 ADs and 50 cambios. ADs include all commercial banks, merchant banks, and building societies. ADs are authorized to buy, sell, borrow, or lend foreign currency or foreign currency instruments.

Cambios are licensed to buy and sell foreign currency. Starting in September 2015, commercial banks have stopped accepting as deposits or purchasing cash from cambios as a result of de-risking by overseas correspondent banks. Proceeds from official loans, divestment of government assets, and taxes on the bauxite sector payable in foreign currency are sold or payable directly to the BOJ. Exchange bureau operations are limited to the exchange of foreign currency notes (for Jamaican dollars) held by hotel guests. As of December 31, 2021, there were 131 exchange bureaus, whose purpose is to facilitate foreign exchange transactions with hotel guests. Exchange bureaus which operate in hotels may purchase only up to US$8,000 or its equivalent in other currencies, in any one transaction. The sale of foreign exchange is limited to reconversion of unused Jamaican dollars from guests. BOJ operates a foreign exchange facility for PSEs where foreign exchange is sold to meet their demand, thereby minimizing volatility in the market.

The surrender requirement for ADs under the PSE facility is 15% of ADs’ US dollar purchases from commercial clients, and the surrender requirement for cambios under the PSE facility is 10% of their daily foreign exchange purchases from commercial clients. The regular surrender arrangement for both ADs and cambios is 5%. The total minimum surrender obligation for ADs to the BOJ therefore is 20% of daily foreign currency purchases from commercial clients and 15% for cambios.

Under the surrender arrangement, the BOJ purchases US dollars, Canadian dollars, pounds sterling, and euros at the applicable mid-day rates.

As of April 2019, cambios’ foreign exchange purchases’ holdings cannot exceed 30% of their five days’ gross purchases for all currencies or US$9 million, whichever is less.

**Changes in response to COVID-19:**
(1) US dollar repurchase operations to financial institutions—one-time measure in May 2020 and (2) reduction of foreign currency cash reserve requirement for DTIs by 2% (to 13%) from May 15, 2020.

**Operated by the central bank**
Yes.

**Foreign exchange standing facility**
No.

**Allocation**
No.

**Auction**
Yes.
The BOJ purchases from and sells foreign exchange to ADs and cambios under the specified terms. The BOJ launched the BOJ Foreign Exchange Intervention Trading Tool (B-FXITT) in July 2017. Transactions are done via an auction mechanism that...
determines the price, while the BOJ only determines the volume. The rules of the B-FXITT stipulate, inter alia, that each entity is allowed no more than three bids and each bid must be no more than 10% of the auction size and no entity’s total bid-volume may exceed 20% of the auction size. The BOJ stopped conducting auctions on a weekly basis on October 17, 2019. The BOJ conducts auctions at short notice, in the event of abnormal or disorderly market conditions. The intermediaries may submit bids to buy or sell foreign exchange from or to the BOJ at a rate determined by the participants. While the framework allows for both the sale and purchase of foreign exchange to and from the market, in the initial stages, the BOJ used the framework for the sale of foreign exchange only. The BOJ started using the framework for the purchase of foreign exchange in April 2018. The BOJ has not used the framework for the purchase of foreign exchange since December 2018. The BOJ introduced a reserve price in the B-FXITT auction to eliminate extreme pricing/bidding, aiming to maintain a rules-based, competitive, multiple price intervention system while eliminating outliers. The reserve price is calculated as a reference rate ± a predetermined spread where bids/offers above and below the highest and lowest reserve price, respectively, are not accepted. In the case of the sell auction, bids are allocated starting with the highest bid price to the lowest bid price, subject to a calculated reserve price, until the operation amount is fully allotted or all bids are fully allocated. All allocated bids are settled at a uniform price which is the lowest allocated bid price (cut-off price).

Fixing  No.

Interbank market  Yes. There are no limits on the bid-ask spread and commission of market participants. All 10 ADs and 50 cambios as of December 31, 2021, can participate in the interbank market. The trading platform was introduced in December 2020.

Over the counter  Yes. Institutions may transact with each other directly.

Brokerage  No.

Market making  No.

Forward exchange market  Yes. Forward transactions are very sparse.

Official cover of forward operations  No.

Arrangements for Payments and Receipts

Prescription of currency requirements  No. Transactions may take place in all currencies, but the principal currencies accepted in the exchange market are the US dollar, Canadian dollar, pound sterling, and euro. There are no restrictions on the use of foreign currency among residents.

Controls on the use of domestic currency  No. Economic agents are free to settle all transactions with domestic currency. The Jamaican dollar may be used to conduct and settle all current and capital transactions.

For current transactions and payments  No.

For capital transactions  No.

Transactions in capital and money market instruments  No.

Transactions in derivatives and other instruments  No.

Credit operations  No.
Use of foreign exchange among residents | No. | There are no restrictions on residents’ use of foreign currency to settle their foreign-currency-denominated debts or any other obligation.

Clearing agreements | Yes. | The BOJ operates the Systemically Important Payment Systems in Jamaica, including the JamClear systems—Real-Time Gross Settlement (RTGS) and Central Securities Depository. The BOJ provides operational support to the Automated Clearing House (ACH)—another Systemically Important Payment System owned and operated by Automated Payments Limited, a company owned by participating commercial banks. The JamClear RTGS is specifically designed to clear large-value, time-critical payments by financial market participants on accounts held at the BOJ in real time throughout the business day. Payments settled in JamClear RTGS are final and irrevocable. The JamClear systems are fully integrated, facilitating settlement on a delivery versus payment basis of all securities traded in the domestic market. With regard to the ACH, the BOJ acts as (1) participant—negotiating checks drawn on commercial banks, sending and receiving electronic files with check data, and handling direct debits and credits to and from the ACH operator; (2) settlement bank—effecting the settlement of clearing balances on the accounts of commercial banks; (3) overseer—providing oversight to ensure the efficient operations of the clearing system; and (4) supervisor of the manual clearing process—facilitating processing of items that do not qualify for the ACH and for foreign currency checks that qualify for domestic clearing—that is, checks drawn on local commercial banks or their correspondent overseas banks in the four major currencies: US dollars, Canadian dollars, pounds sterling, and euros.

There is no restriction on the amount of JMD (Jamaican dollar) that can be taken out of the country, but there are strict reporting and declaration obligations which are implemented through the border control mechanisms, for example, customs.

There is no restriction on the amount of foreign currency that can be taken out of the country, but there are strict reporting and declaration obligations which are implemented through the border control mechanisms, for example, customs.

These are subject to the ordinary tax laws of Jamaica and the foreign country.

Residents may maintain foreign exchange accounts abroad, subject to the tax laws of the foreign country. Operations of these accounts are subject to the foreign country’s laws and regulations.

Residents may hold domestic currency deposits abroad. Residents are free to transfer bank balances held abroad to accounts held domestically. The Jamaican dollar is not traded internationally.

The residents may use Jamaican dollar balances in their account to purchase foreign currency at any time with an AD (including the
Nonresident Accounts

Foreign exchange accounts permitted Yes. Nonresidents may hold foreign exchange accounts in Jamaica. Funds from these accounts may be transferred freely between residents and nonresidents as well as between domestically held accounts and those held abroad.

Approval required No.

Domestic currency accounts Yes. The regulations governing accounts held by residents apply. Nonresidents may hold domestic currency accounts. Institutions must fulfill the necessary KYC requirements before accepting foreign currency deposits (Regulation 6(1)(a)(i) The Proceeds of Crime (Money-Laundering Prevention) Regulations, 2007, and (Section V of the BOJ AML/CFT/PF Guidance Notes—KYC Know the Transaction Counterparty Policy and Procedures). The BOJ AML/CFT/PF Guidance Notes were substantially updated, to, inter alia, incorporate discussions on a risk-based approach and risk assessments and regulatory expectations and licensees' obligations in these regards, and provide guidance on PF, KYC, and CDD requirements, AML/CFT obligations of the Boards of Licensees, Politically Exposed Persons, correspondent banking and virtual assets, and nominated officer regime.

In addition, minimum operational standards are determined by the institutions’ internal policy. The Jamaican dollar is not traded internationally.

Convertible into foreign currency Yes. Jamaican dollar assets may be freely converted to foreign currency assets. The regulations apply equally to nonresidents under the principle of national treatment.

Approval required No.

Blocked accounts No.

Imports and Import Payments

Foreign exchange budget No.

Financing requirements for imports No.

Minimum financing requirements No.

Advance payment requirements No.

Advance import deposits No.

Documentation requirements for release of foreign exchange for imports No.

Domiciliation requirements No.

Preshipment inspection No.

Letters of credit No.

Import licenses used as exchange licenses No.

Other No.

Import licenses and other nontariff measures Yes. Import licenses are required for pharmaceutical products and for...
items that endanger public health or security; otherwise, goods may be imported freely without a license. Import licenses are issued by the Trade Board, under the direction of the Ministry of Industry, Commerce, Agriculture, and Fisheries. Imports of motor vehicles require a permit for government statistical purposes. Payments for imports may be made by commercial banks without reference to the BOJ.

Positive list
No.

Negative list
Yes. Prohibited items include indecent and obscene prints and base or counterfeit coins of any country. Restricted items, which require a permit prior to importation, include meat, fruits, vegetables, pharmaceuticals, chemicals, herbal teas, firearms, used tires, radios (two-way), coconut derivatives, oil-producing seeds, edible oils, detergent (solid or liquid), motor vehicles, explosives, alcohol in bulk, sugar, human remains, pesticides, and live animals. Imports of bone marrow, brains, and cows older than two and a half years are banned.

Open general licenses
No.

Licenses with quotas
No.

Other nontariff measures
No.

**Import taxes and/or tariffs**
Yes. The Customs Act, as amended by the Customs Tariff (Revision) (Amendment) Resolution of 2013, applies. Tariff rates are capped at 20% in most cases.

Effective March 31, 2021, the customs processing fee was eliminated for goods for outright export not exceeding US$500.00 in value.

Effective April 1, 2021, the $5.00 stamp duty from the value of goods exported was removed.

Taxes collected through the exchange system
No.

State import monopoly
No.

### Exports and Export Proceeds

**Repatriation requirements**
No.

Surrender requirements
Yes.

**Surrender to the central bank**
Yes. The surrender requirement for ADs under the PSE facility is 15% of ADs’ US dollar purchases from commercial clients, and the surrender requirement for cambios is 10% of their daily foreign exchange purchases from commercial clients. The regular surrender arrangement for ADs and cambios is 5%. The total minimum surrender obligation for ADs to the BOJ therefore is 20% of daily foreign currency purchases from commercial clients and 15% for cambios.

**Surrender to authorized dealers**
No.

**Financing requirements**
No.

**Documentation requirements**
No.

Letters of credit
No.

Guarantees
No.
Most goods may be exported without restriction and there are no export quotas. However, specific licenses are required for exports of certain agricultural products, ammunition, explosives, firearms, antique furniture, motor vehicles, mineral and metal ores, paintings, gold bullion, jewelry, ores (minerals and metals including bauxite, alumina, and gypsum), and petroleum products.

BOJ consulted with the boards of Financial Holding Companies and DTIs in 2020 and obtained their agreement to suspend the distribution of dividend to relatively large shareholders and limit these distributions to shareholders owning 1% or less of issued shares. This was in a context where financial institutions had been experiencing extraordinary demand for liquidity to facilitate the needs of their customers and to build buffers against growing uncertainty associated with COVID-19 in Jamaica. The BOJ, the Financial Holding Companies, and the DTIs agreed to revisit this arrangement at the end of March 2021. Effective April 1, 2021, the distribution of dividends to shareholders owning more than 1% of issued shares could resume.

Directions effective April 30, 2021. Foreign assets may not exceed, effective April 1, 2021, 10% of the total assets of insurance companies and pension funds. SDs and CISs are allowed to invest in securities issued by the GOJ and securities issued or guaranteed by the governments of Canada, the United Kingdom, and the United States investment grade sovereign obligations, investment grade corporate obligations of entities incorporated outside Jamaica, and shares of such corporations. Effective April 30, 2021, the permissible investments for SDs and CISs were expanded to include investment grade corporate obligations of entities incorporated in Jamaica and which are foreign exchange earners; publicly traded shares of entities incorporated in Jamaica with shares issued in United States dollars, Great Britain pounds, euros, or Canada dollars that are earners of foreign exchange and whose debts are rated by credit rating agencies as investment grade; BOJ CDs denominated in foreign currency; GOJ guaranteed corporate foreign currency debt instruments issued by corporate entities incorporated in Jamaica, publicly traded shares of corporate entities incorporated outside of Jamaica with shares issued in United States dollars, Great Britain pounds, euros, or Canada dollars, with market capitalization of US$10 billion or greater. The cap on these investment activities for SDs and CISs is 25%. From April 30, 2021, the permissible investments for insurance companies, pensions funds, CISs, and SDs are the same. No directives have been issued to authorize the acquisition of foreign assets by credit unions. Parties not in these categories are not limited in their acquisition of foreign assets but may otherwise be subject to the exemption requirements to proceed with a contemplated transaction once the activity fits the description of an activity under Section 22A(2) and (3) of the BOJ Act.

There are limits on investments by the DTI that apply to equity investments. Aggregate shareholdings by the DTI may not exceed 50% of the DTI’s capital base, and in any one company or enterprise may not exceed 10% of the DTI’s capital base.

These transactions are subject to the Securities laws. Residents and nonresidents who intend to make a public offering of securities in Jamaica must register with the FSC. Issuers must provide detailed information about themselves to the FSC and to the public. Persons dealing in such instruments should comply with the Securities Act, unless exempt. Deposit-taking financial institutions are prohibited from investing on behalf of clients. This business is conducted by separate corporate entities.

In the case of bonds issued via exempt distribution, both residents and nonresidents must meet the criteria to be eligible to purchase the bonds or debt securities. Otherwise, the Securities Act and the attendant regulations do not impose any restrictions on the purchase of local bonds or debt securities by nonresidents. There is no minimum holding period. Issuance of debt in foreign currency is subject to the foreign exchange regime under the BOJ Act. Effective February 22, 2022, there was a ban on foreign exchange debt issuance in Jamaica. Effective March 4, 2022, the ban was lifted. Effective March 5, 2022, the BOJ requires the issuer of foreign exchange debt in Jamaica to submit: (1) an attestation that the distribution strategy would not create a demand for foreign exchange; (2) a list of the intended sources of subscription across the dealers’ client buckets; and (3) following the closure of the transaction, verification of the sources of subscription.

As in the case of residents, nonresidents have to comply with the
laws applicable to the sale or issue of bonds or debt securities. For example, the Securities Act requires the issuer to be registered with the FSC and the Disclosure of Interest Regulations mandates the filing of information and the periodicity of such filings, and that the issuer provides an information memorandum.

Where the sale or issue of debt instruments involves debt denominated in foreign currency, such issues are subject to the foreign currency dealings framework under the BOJ Act. Payments must occur through ADs; instruments must be issued with or by persons licensed under the Securities Act as a SD and must comprise instruments in respect of which SDs have obtained the requisite exemption to deal in. Effective February 22, 2022, there was a ban on foreign exchange debt issuance in Jamaica. Effective March 4, 2022, the ban was lifted. Effective March 5, 2022, the BOJ requires the issuer of foreign exchange debt in Jamaica to submit: (1) an attestation that the distribution strategy would not create a demand for foreign exchange; (2) a list of the intended sources of subscription across the dealers’ client buckets; and (3) following the closure of the transaction, verification of the sources of subscription.

In the case of individuals and non-financial firms, there are no restrictions on the purchase of bonds and other debt securities abroad. ADs, insurance companies, SDs, credit unions, cambios, exchange bureaus, CISs, and pension fund managers may not acquire foreign assets, except in accordance with directives from the MOFP. Commercial banks, merchant banks, and building societies are ADs and have the widest remit to undertake dealings in relation to foreign currency and foreign currency instruments. According to Ministerial directives from the MOF, insurance companies and pension funds may acquire securities issued by the GOJ and securities issued or guaranteed by the governments of Canada, the United Kingdom, and the United States, as well as the foreign assets set out in the BOJ (Dealings In Foreign Currency) (Foreign Asset Limit) (Insurance Companies) Directions effective April 30, 2021, and the BOJ (Dealings In Foreign Currency) (Foreign Asset Limit) (Pensions Funds) Directions effective April 30, 2021. Foreign assets may not exceed, effective April 1, 2021, 10% of the total assets of insurance companies and pension funds. of corporate entities incorporated outside of Jamaica with shares issued in United States dollars, Great Britain pounds, euros, or Canada dollars, with market capitalization of US$10 billion or greater. The cap on these investment activities for SDs and CISs is 25%. From April 30, 2021, the permissible investments for insurance companies, pensions funds, CISs, and SDs are the same. No directives have been issued to authorize the acquisition of foreign assets by credit unions. Parties not in these categories are not limited in their acquisition of foreign assets but may otherwise be subject to the exemption requirements to proceed with a contemplated transaction once the activity fits the description of an activity under Section 22A(2) and (3) of the BOJ Act.

Sale or issue abroad by residents
Yes. The Securities Act and its attendant regulations apply. The residents must comply with Sections 7 and 26, unless except exempt under subsection 7(2)(a).

On collective investment securities
Yes. Unit trusts, mutual funds, and other forms of CISs are governed by regulations under the Securities Act. The Securities Act has established a comprehensive legal framework for the regulation of CISs facilitating various forms of CISs by removing obstacles that impede the growth and diversity of the CIS industry, while granting greater protection for users of these products. The investments are managed by an investment company, whereas trust assets are held by a trustee independent of the management company. The law seeks to ensure full disclosure to investors and proper licensing of sellers. The law requires (1) registration of CIS with the FSC; (2) fit and proper requirements of trustees and managers; and (3) proper record keeping and accounting. The law also prohibits (1) failure to file returns with the FSC; (2) false statements or falsification or destruction of documents required under the law; (3) fraudulent or misleading inducements to acquire units; (4) distribution of circulars pertaining to unregistered unit trusts; and (5) failure to keep records required by law. Authorization from the Minister of Finance in relation to the foreign currency component of collective investment securities is required. Banks and other licensed DTIs cannot directly undertake investment activities on behalf of third parties (or customers), but such activities may be accommodated through separate legal entities (that is, subsidiaries) with appropriate authorization. ADs have the broadest authorization to acquire foreign assets on their own behalf subject their respective prudential requirements.

Purchase locally by nonresidents
No. There are no limitations.

Sale or issue locally by nonresidents
Yes. Part III of the CIS Regulations states the requirements for overseas CIS to be registered to issue its securities in Jamaica. An example of the requirements is the submission of information and documents (including but not limited to financial statements, organizational documents, and a profile of directors and officers) to satisfy the FSC, including: (1) the overseas CIS which is from a jurisdiction where the laws and regulatory oversight for CIS are sufficient to ensure investor protection and market integrity and (2) the CIS which is in good standing in the foreign jurisdiction. The FSC has the power to request any other information to assess the application of the overseas CIS.

Purchase abroad by residents
Yes. In the case of individuals and non-financial firms, there are no restrictions on the purchase of bonds and other debt securities abroad. ADs, insurance companies, SDs, credit unions, cambios, exchange bureaus, CISs, and pension fund managers may not acquire foreign assets, except in accordance with directives from the MOFP. Commercial banks, merchant banks, and building societies are ADs and have the widest remit to undertake dealings in relation to foreign
currency and foreign currency instruments. According to Ministerial directives from the MOF, insurance companies and pension funds may acquire securities issued by the GOJ and securities issued or guaranteed by the governments of Canada, the United Kingdom, and the United States, as well as the foreign assets set out in the BOJ (Dealings In Foreign Currency) (Foreign Asset Limit) (Insurance Companies) Directions effective April 30, 2021, and the BOJ (Dealings In Foreign Currency) (Foreign Asset Limit) (Pensions Funds) Directions effective April 30, 2021. Foreign assets may not exceed, effective April 1, 2021, 10% of the total assets of insurance companies and pension funds. SDs and CISs are allowed to invest in securities issued by the GOJ and securities issued or guaranteed by the governments of Canada, the United Kingdom, and the United States investment grade sovereign obligations, investment grade corporate obligations of entities incorporated outside Jamaica, and shares of such corporations. Effective April 30, 2021, the permissible investments for SDs and CISs were expanded to include investment grade corporate obligations of entities incorporated in Jamaica and which are foreign exchange earners; publicly traded shares of entities incorporated in Jamaica with shares issued in United States dollars, Great Britain pounds, euros, or Canada dollars that are earners of foreign exchange and whose debts are rated by credit rating agencies as investment grade; BOJ CDs denominated in foreign currency; GOJ guaranteed corporate foreign currency debt instruments issued by corporate entities incorporated in Jamaica, publicly traded shares of corporate entities incorporated outside of Jamaica with shares issued in United States dollars, Great Britain pounds, euros, or Canada dollars, with market capitalization of US$10 billion or greater. The cap on these investment activities for SDs and CISs is 25%. From April 30, 2021, the permissible investments for insurance companies, pensions funds, CISs, and SDs are the same. No directives have been issued to authorize the acquisition of foreign assets by credit unions. Parties not in these categories are not limited in their acquisition of foreign assets but may otherwise be subject to the exemption requirements to proceed with a contemplated transaction once the activity fits the description of an activity under Section 22A(2) and (3) of the BOJ Act.

Sale or issue abroad by residents
Yes. The Securities Act and the CISs Regulations, 2013, apply to residents.

Controls on derivatives and other instruments
Yes. These are governed by securities under the Securities Act. The definition does not contemplate any financial commodity, contract, or instrument that may be gazetted from time to time. There is none gazetted at this time.

Purchase locally by nonresidents
No. There are no limitations.

Sale or issue locally by nonresidents
Yes. These transactions are subject to the Securities Act and the attendant requirements apply to nonresidents.

Purchase abroad by residents
Yes. In the case of individuals and non-financial firms, there are no restrictions on the purchase of bonds and other debt securities abroad. ADs, insurance companies, SDs, credit unions, cambios, exchange bureaus, CISs, and pension fund managers may not acquire foreign assets, except in accordance with directives from the MOFP. Commercial banks, merchant banks, and building societies are ADs and have the widest remit to undertake dealings in relation to foreign currency and foreign currency instruments. According to Ministerial directives from the MOF, insurance companies and pension funds may acquire securities issued by the GOJ and securities issued or guaranteed by the governments of Canada, the United Kingdom, and the United States, as well as the foreign assets set out in the BOJ.
(Dealings In Foreign Currency) (Foreign Asset Limit) (Insurance Companies) Directions effective April 30, 2021, and the BOJ (Dealings In Foreign Currency) (Foreign Asset Limit) (Pensions Funds) Directions effective April 30, 2021. Foreign assets may not exceed, effective April 1, 2021, 10% of the total assets of insurance companies and pension funds. SDs and CISs are allowed to invest in securities issued by the GOJ and securities issued or guaranteed by the governments of Canada, the United Kingdom, and the United States investment grade sovereign obligations, investment grade corporate obligations of entities incorporated outside Jamaica, and shares of such corporations. Effective April 30, 2021, the permissible investments for SDs and CISs were expanded to include investment grade corporate obligations of entities incorporated in Jamaica and which are foreign exchange earners; publicly traded shares of entities incorporated in Jamaica with shares issued in United States dollars, Great Britain pounds, euros, or Canada dollars that are earners of foreign exchange and whose debts are rated by credit rating agencies as investment grade; BOJ CDs denominated in foreign currency; GOJ guaranteed corporate foreign currency debt instruments issued by corporate entities incorporated in Jamaica, publicly traded shares of corporate entities incorporated outside of Jamaica with shares issued in United States dollars, Great Britain pounds, euros, or Canada dollars, with market capitalization of US$10 billion or greater. The cap on these investment activities for SDs and CISs is 25%. From April 30, 2021, the permissible investments for insurance companies, pension funds, CISs, and SDs are the same. No directives have been issued to authorize the acquisition of foreign assets by credit unions. Parties not in these categories are not limited in their acquisition of foreign assets but may otherwise be subject to the exemption requirements to proceed with a contemplated transaction once the activity fits the description of an activity under Section 22A(2) and (3) of the BOJ Act.

Sale or issue abroad by residents Yes. The Securities Act and the CIS Regulations, 2013, apply to residents.

Controls on credit operations Yes. The Money Lending framework imposes certain requirements on non-financial institutions wishing to undertake lending activities in Jamaican dollars. The law sets forth, among other things, the prescribed maximum rate of interest (that is, rate beyond which interest cannot be charged and is periodically prescribed by the Ministerial order), the form of the lending agreement, and how money lenders may advertise. Commercial banks, merchant banks, and building societies, nonbank financial institutions governed by the Insurance Act, and Securities Act, Industrial and Provident Societies and Friendly Societies; and statutory bodies incorporated for the purposes of lending money are exempt from the requirements of this law. The business of money lending in foreign currency is subject to the provisions of the BOJ Act. Licensed deposit takers under the BSA (that is, commercial banks, merchant banks, and building societies) are subject to statutory lending limits and other prudential requirements applicable to the extension of credit as follows: (1) Facilities to any one person (not another bank) may not exceed in the aggregate 20% of a DTI’s capital base; for any portion of such credit facilities that is unsecured, that portion may not exceed 5% of the DTI’s capital base (10% for a building society). (2) Facilities to a group may not exceed in the aggregate 40% of the bank’s capital base; for any portion of such credit facilities that is unsecured, that portion may not exceed 10% of the DTI’s capital base. There are also prudential provisioning requirements applicable to the extension of credit. In January 2021 the Microcredit Act was passed and became effective July 30, 2021. This Act governs the business of lending to
individuals and to micro, small, and medium enterprises (MSMEs). The Act speaks to licensing and governance requirements, reflects BOJ is the regulator for these service providers, incorporates consumer related provisions on lending practices, which regime is overseen by the Consumer Affairs Commission, and includes penalties for non-compliance with the Act. Lending in foreign currency remains subject to the requirements of the BOJ Act and commercial banks, merchant banks, and building societies, nonbank financial institutions governed by the Insurance Act, and Securities Act, Industrial and Provident Societies, and Friendly Societies; and statutory bodies incorporated for the purposes of lending money are exempt from the requirements of this law. Existing microfinanciers and persons wishing to offer the service have 12 months within which to apply for a license under this Act and transactions entered into prior to the passage of this Act will remain enforceable.

There are also prudential provisioning requirements applicable to the extension of credit. |
| By residents to nonresidents | Yes. | The provisions of the Microcredit Act, Money Lending Act, and the BOJ Act apply, if the financing is offered and/or executed in Jamaica. Money lending in foreign currency to persons resident in Jamaica is subject to the provisions of the BOJ Act, and this extends to cases in which an overseas-based person conducts financing activities in foreign currency, or through foreign currency instruments, with a Jamaica-based person, regardless of whether negotiations take place and related contracts are executed outside Jamaica. |
| To residents from nonresidents | Yes. | The provisions of the Microcredit Act, Money Lending Act, and the BOJ Act apply, if the financing is offered and/or executed in Jamaica. Money lending in foreign currency to persons resident in Jamaica is subject to the provisions of the BOJ Act, and this extends to cases in which an overseas-based person conducts financing activities in foreign currency, or through foreign currency instruments, with a Jamaica-based person, regardless of whether negotiations take place and related contracts are executed outside Jamaica. |
Guarantees, sureties, and financial backup facilities

Yes.

By residents to nonresidents

Yes. In the case of individuals and non-financial firms, there are no restrictions. Licensed deposit takers under the BSA (that is, commercial banks, merchant banks, and building societies) are subject to statutory lending limits and other prudential requirements applicable to the extension of credit as follows: (1) Facilities to any one person (not another bank) may not exceed in the aggregate 20% of a DTI’s capital base; for any portion of such credit facilities that is unsecured, that portion may not exceed 5% of the DTI’s capital base. (2) Facilities to a group may not exceed in the aggregate 40% of the bank’s capital base; for any portion of such credit facilities that is unsecured, that portion may not exceed 10% of the DTI’s capital base. There are also prudential provisioning requirements applicable to the extension of credit.

To residents from nonresidents

Yes. The provisions of the Microcredit Act, Money Lending Act, and possibly the BOJ Act apply, if the financing is offered and/or executed in Jamaica. The business of money lending in foreign currency to persons resident in Jamaica is subject to the provisions of the BOJ Act, and this extends to cases in which an overseas-based person conducts financing activities in foreign currency or through foreign currency instruments with a Jamaica-based person, regardless of whether negotiations take place and related contracts are executed outside Jamaica.

Controls on direct investment

Yes.

Outward direct investment

Yes. The Exchange Control (Removal of Restrictions) Order of 1991 eliminated controls on outward direct investment. There are limits on investments by DTI that apply to equity investments. Aggregate shareholdings by a DTI may not exceed 50% of the DTI’s capital base, and in any one company or enterprise may not exceed 10% of the DTI’s capital base.

Inward direct investment

Yes. There are no limitations on the acquisition of shares in a company by nonresidents, except shares in locally incorporated licensed DTIs under the BSA, no more than 5% of which may be held by a foreign government or an agency of a foreign government without the written approval of the Supervisory Committee. The Supervisory Committee is the supervisory decision-making authority.

Controls on liquidation of direct investment

No. To the extent that the liquidation of direct investment in locally incorporated licensed DTIs under the BSA amounts to divestment/transfers or disposal of shares, these are subject to the approval of the Supervisory Committee where the disposal involves 20% or more of the voting shares of the DTI. If the liquidation equates to a voluntary liquidation, this requires the approval of the supervisor of banks. To the extent that the liquidation of direct investment in a corporate SD amounts to a divestment/transfer or a disposal of shares that amounts to a change in ownership, the Securities Act mandates that corporate SDS and advisers be owned, controlled, or supervised by persons who are citizens of and habitually resident in Jamaica or a CARICOM member.

Controls on real estate transactions

No. No controls are in place in relation to transactions between private persons. However, persons in the real estate business (that is, valuers, dealers, developers) are subject to the Real Estate Dealers and Developers Act and oversight by the Real Estate Board. Under the BOJ Act, foreign assets include real estate situated outside of Jamaica and the foreign asset acquisition restriction that applies to certain local financial firms includes real estate located outside of Jamaica.

Purchase abroad by residents

No. No restrictions are in place in relation to transactions between private
persons. However, persons listed in Section 22B(1) of the BOJ Act are subject to restrictions, because this activity amounts to the acquisition of a foreign asset. Although licensed deposit takers under the BSA, who are also ADs, have the broadest permit to acquire foreign assets, they are also subject to prudential and statutory limits regarding the nature and quality of investments and fixed asset holdings, which may not exceed an amount equivalent to their capital base without the approval of the supervisor.

No restrictions are in place in relation to transactions between private persons. However, transactions involving commercial enterprises in the real estate business are subject to the requirements of the Real Estate Dealers and Developers Act and the Real Estate Board. These persons are also designated non-financial institutions under the POCA and are reporting entities under the Terrorism Prevention Act (TPA) and therefore have similar CDD obligations as banks and other financial institutions, when dealing with customers.

Controls on personal capital transactions Yes.

Loans Yes. The Money Lending Act is applicable to transactions undertaken by persons who are not involved in the business of extending credit. Otherwise, if such transactions involve commercial enterprises, the BOJ Act may apply. In addition, the Companies Act specifically prohibits private companies from soliciting capital from the public. Any activities indicative of deposit-taking or securities business are expressly prohibited under the BSA and the Securities Act.

By residents to nonresidents No.

To residents from nonresidents Yes. The laws of the overseas jurisdiction apply. In addition, the provisions of the Money Lending Act and possibly the BOJ Act apply, if the financing is offered and/or executed in Jamaica.

Gifts, endowments, inheritances, and legacies Yes. Depending on the circumstances, these matters may be subject to the existing succession laws (that is, the Probate of Deeds Act, the Inheritance (Provision for Family and Dependents) Act, the Intestate Estates and Property Charges Act, the Companies Act, the Proceeds of Crime Act), and applicable tax laws.

By residents to nonresidents No. The laws of the overseas jurisdiction apply.

To residents from nonresidents Yes. The laws of the overseas jurisdiction apply. In addition, the provisions of the Money Lending Act and possibly the BOJ Act apply, if the financing is offered and/or executed in Jamaica.

Settlement of debts abroad by immigrants No. The laws of the overseas jurisdiction apply.

Transfer of assets No. The laws of the overseas jurisdiction apply.

Transfer abroad by emigrants No. The laws of the overseas jurisdiction apply.

Transfer into the country by immigrants No. The laws of the overseas jurisdiction apply.

Transfer of gambling and prize earnings Yes. These transfers are generally authorized, subject to the presentation of supporting documents and compliance with the relevant provisions under customs laws, income tax laws, and AML/CFT laws (where applicable in relation to financial institutions that facilitate the transfers), and the Betting, Gaming, and Lotteries Act.

Provisions Specific to the Financial Sector

Provisions specific to commercial banks and other credit institutions Yes. Deposit-taking financial institutions may not invest on behalf of clients. This business is conducted by separate corporate entities.
BOJ operates a foreign exchange facility for PSEs. The foreign exchange demand of PSEs is consolidated and met through this facility thereby minimizing volatility in the market. The surrender requirement for ADs is 20% of their daily foreign exchange purchases from commercial clients, of which 15% is directed to the PSE facility and the additional 5% comprises the regular surrender arrangement for ADs.

The surrender requirement for cambios is 15% of their daily foreign exchange purchases from commercial clients, of which 10% is directed to the PSE facility and 5% comprises the regular surrender arrangements for cambios.

Borrowing abroad
Yes.
Licensed deposit takers are not prohibited from borrowing overseas, but the extent to which such activities may be undertaken is subject to these persons continuing to meet the prudential and statutory limits regarding the nature and quality of investments. SDs, which are subject to margin and capital requirements, may not engage in credit operations that would result in a breach of margin and/or capital requirements.

Maintenance of accounts abroad
No.
No restrictions apply, but institutions must be guided by local and overseas income tax laws in relation to any interest accrued and remitted to Jamaica as well as the AML/CFT/PF laws in this regard as well as the respective AML/CFT/PF guidance issued by functional regulators.

Lending to nonresidents (financial or commercial credits)
Yes.
Licensed deposit takers under the BSA are not prohibited from lending overseas, but the extent to which such activities may be undertaken is subject to these persons continuing to meet the prudential and statutory limits regarding the nature and quality of such facilities as well as any financial regulations operating in that jurisdiction. The following limits apply: financial institutions (operating under the BSA, that is, commercial banks, merchant banks, and building societies) and financial institutions (operating under Insurance Act and Securities Act) are exempt from the requirements of the Money Lending Act and the Microcredit Act. The business of money lending in foreign currency is subject to the provisions of the BOJ Act. Licensed deposit takers under the BSA (that is, commercial banks, merchant banks, and building societies) are subject to statutory lending limits and other prudential requirements applicable to the extension of credit as follows: (1) Facilities to any one person (not another bank) may not exceed in the aggregate 20% of a DTI’s capital base; for any portion of such credit facilities that is unsecured, that portion may not exceed 5% of the DTI’s capital base. (2) Facilities to a group may not exceed in the aggregate 40% of the DTI’s capital base; for any portion of such credit facilities that is unsecured, that portion may not exceed 10% of the DTI’s capital base. There are also prudential provisioning requirements applicable to the extension of credit. In relation to the DTIs, the BSA 2014 repealed Banking Act (BA) and Financial Institutions Act (FIA), which governed these entities and substantially amended the Building Societies Act. The BSA came into force September 30, 2015, by Appointed Day Notice signed by the Minister of Finance. However, notwithstanding the repeal of the BA and FIA and amendment of the Building Societies Act, regulations (including notices and notifications) under the repealed enactments remain in effect with such changes as may be necessary, as if made under the BSA (Section 139). SDs are subject to margin and capital requirements and may not engage in credit operations that would result in a breach of margin and/or capital requirements.

Lending locally in foreign exchange
Yes.
Currently, lending in foreign currency may be carried out only by ADs. Other commercial lenders may apply for exemptions issued by
Purchase of locally issued securities denominated in foreign exchange

Yes.

Any person may purchase instruments denominated in foreign currency. ADs have the broadest permit to carry out transactions with securities issued in foreign currency. Other specific categories of companies are allowed to acquire foreign securities only in accordance with the directives issued by the MOF. Deposit takers must hold capital on a risk-weighted basis that depends on the classes of assets held.

Differential treatment of deposit accounts

Yes.

Commercial banks and other licensed DTIs under the BSA may be required to match their Jamaican dollar liabilities to their clients with Jamaican dollar assets.

Reserve requirements

Yes.

The minimum cash reserve requirement for domestic-currency-denominated liabilities is 5% (before it was 7%). The requirement on foreign currency liabilities is 13% (before 15%). The cash reserve and liquid assets requirements are differentially applied to building societies not meeting a prescribed threshold of qualifying assets (residential mortgage lending) in relation to savings funds. For building societies, domestic and foreign currency reserve requirements are based on building societies meeting the 40% threshold for domestic-currency-denominated qualifying assets in relation to domestic currency deposits and withdrawable shares and for foreign-currency-denominated qualifying assets in relation to foreign currency deposits and withdrawable shares. Societies that meet the qualifying assets threshold have lower requirements of 1% and 5% for the cash reserve and liquid assets ratios (LARs), respectively. Higher requirements apply to societies that fail to meet the prescribed thresholds. The BSA came into effect September 30, 2015, by Appointed Day Notice signed by the Minister of Finance. The BSA repealed and replaced the BA and FIA and substantially amended the Building Societies Act. However, notwithstanding the repeal of the BA and FIA and amendment of the Building Societies Act, regulations (including notices and notifications) under the repealed enactments remain in effect with such changes as may be necessary, as if made under the BSA (Section 139), unless expressly revoked.

Liquid asset requirements

Yes.

Effective April 1, 2022, the LAR for domestic currency and foreign liabilities of commercial banks, merchant banks, and building societies was reduced to 14% (previously 19%) and 22% (previously 29%), respectively. Effective July 1, 2022, the LAR for domestic currency and foreign liabilities was reduced to 9% and 17%, respectively.

Effective October 1, 2022, the LAR for domestic currency and foreign liabilities of commercial banks, merchant banks, and building societies was reduced to 5% and 13%, respectively.

The cash reserve and liquid assets requirements are differentially applied to building societies not meeting a prescribed threshold of qualifying assets (residential mortgage lending) in relation to savings funds. For building societies, domestic and foreign currency reserve requirements are based on building societies meeting the 40% threshold for domestic-currency-denominated qualifying assets in relation to domestic currency deposits and withdrawable shares and for foreign-currency-denominated qualifying assets in relation to foreign currency deposits and withdrawable shares. Societies that meet the qualifying assets threshold have lower requirements of 1% and 5% for the cash reserve and LARs, respectively. Higher requirements apply to societies that fail to meet the prescribed thresholds. Debt securities and instruments issued by the GOJ, whether denominated in Jamaican dollars or in foreign currency and regardless of original maturity, are designated liquid assets within
nine months of maturity. The BSA came into force September 30, 2015, by Appointed Day Notice signed by the minister of finance. The BSA repealed and replaced the BA and FIA and substantially amended the Building Societies Act. However, notwithstanding the repeal of the BA and FIA and amendment of the Building Societies Act, regulations (including notices and notifications) under the repealed enactments remain in effect with such changes as may be necessary, as if made under the BSA (Section 139) unless expressly revoked.

**Interest rate controls**
No.

**Credit controls**
No.

**Differential treatment of deposit accounts held by nonresidents**
No. Deposit accounts, whether held by residents or nonresidents, are treated alike, except for the tax treatment of A accounts.

**Reserve requirements**
No.

**Liquid asset requirements**
No.

**Interest rate controls**
No.

**Credit controls**
No.

**Investment regulations**
Yes. Banks may not engage in managed funds activities on behalf of customers or other third parties.

**Abroad by banks**
Yes. There are limits on investments by DTIs that apply to equity investments. Aggregate shareholding may not exceed 50% of the capital base, and in any one company may not exceed 10% of the capital base.

**In banks by nonresidents**
Yes. Substantial ownership (that is, holdings of 20% or more) in banks is subject to the Supervisory Committee. Foreign governments and their agents may not hold more than 5% of the shares in locally incorporated commercial banks and licensed DTIs, unless the Supervisory Committee approves. Pursuant to the BSA, the Supervisory Committee replaces the Minister of Finance as the supervisory decision-making authority.

**Open foreign exchange position limits**
Yes.

**On resident assets and liabilities**
Yes. Since March 1, 2018, ADs are subject to NOP limits. Effective December 6, 2021, the BOJ imposed an absolute limit of J$4.5 billion and J$7.5 billion for long positions and short positions, respectively. These limits complemented the existing foreign exchange NOP limits of 15% and 25% of regulatory capital for long and short positions of ADs. Therefore, ADs’ NOP limits for long positions are 15% of capital or J$4.5 billion (whichever is lower) and for short positions 25% or J$7.5 billion (whichever is higher).

**On nonresident assets and liabilities**
Yes. Since March 1, 2018, ADs are subject to NOP limits. Effective December 6, 2021, the BOJ imposed an absolute limit of J$4.5 billion and J$7.5 billion for long positions and short positions, respectively. These limits complemented the existing foreign exchange NOP limits of 15% and 25% of regulatory capital for long and short positions of ADs. Therefore, ADs’ NOP limits for long positions are 15% of capital or J$4.5 billion (whichever is lower) and for short positions 25% or J$7.5 billion (whichever is higher).

**Provisions specific to institutional investors**
Yes. As of 2017, GOJ foreign currency exposures were 100% risk-weighted. Foreign currency bonds issued by the GOJ adhere to the global standard as set out in the Basel Accord. ADs, insurance companies, credit unions, building societies, cambios and exchange bureaus, CISs, and pension fund managers may not acquire foreign
Insurance companies **Yes.** Insurance companies are subject to the requirements of the Insurance Act and its regulations and to all other regulatory requirements issued by the FSC. Insurance companies may acquire securities issued by the GOJ and securities issued or guaranteed by the governments of Canada, the United Kingdom, or the United States as well as the foreign assets set out in the BOJ (Dealings In Foreign Currency) (Foreign Asset Limit) (Insurance Companies) Directions issued October 2020 and April 2021 (see definition of “Allowable Foreign Assets”). Foreign assets may not exceed 10% of total assets. These permissions apply in relation to permissible insurance business which is defined as including General insurance business as defined under the Insurance Act; Ordinary Long Term Insurance Business as defined under the Insurance Act, excluding Equity Linked Insurance Products; and Sickness and Health Insurance Business. These requirements are the standard minimum requirements. Insurance regulations 38–72 govern the investments that an insurance company may make, specifying, for example, eligible investments, portfolio limits, and prohibited investments. Since 2020, insurance companies have been communicated by the BOJ through statutory directions issued under the BOJ Act.

**Limits (max.) on securities issued by nonresidents** **Yes.** Insurance companies may acquire only securities issued or guaranteed by the governments of Canada, the United Kingdom, and the United States and foreign assets set out in the BOJ (Dealings In Foreign Currency) (Foreign Asset Limit) (Insurance Companies) Directions effective April 30, 2021 (see definition of “Allowable Foreign Assets”). Foreign assets may not exceed, effective April 1, 2021, 10% of the total assets of insurance companies. Pursuant to Regulation No. 59 of the Insurance Regulations, an insurer that is authorized to transact business on a branch basis in a foreign country may hold foreign securities of that country not exceeding its deposit and reserve obligations incurred in that country.

**Limits (max.) on investment portfolio held abroad** **Yes.** Insurance companies may acquire only securities issued or guaranteed by the governments of Canada, the United Kingdom, and the United States and foreign assets set out in BOJ (Dealings In Foreign Currency) (Foreign Asset Limit) (Insurance Companies) Directions effective April 30, 2021 (see definition of “Allowable Foreign Assets”). Foreign assets may not exceed, effective April 1, 2021, 10% of the total assets of insurance companies. Matching assets must be held in relation to liabilities.

**Limits (min.) on investment portfolio held locally** **Yes.** No specific regulation requires a minimum on local portfolio holdings. However, directives include maximums for institutions’ foreign investment (that is, no more than 10% of total assets in foreign assets).

**Currency-matching regulations on assets/liabilities composition** **Yes.** Insurance companies must ensure that matching assets are held against liabilities incurred. Insurance companies are expected to apply an asset liability management program that is appropriate to the nature, scale, and complexity of the risk and its business. The insurance act was amended to expand the powers of the FSC to prescribe regulations for insurers to establish risk management procedures based on international standards, allowing the Commission to introduce new regulations which will require insurers to carry out annual stress testing and implement asset liability.

<tr>
<td>Currency-matching regulations on assets/liabilities composition</td>
<td>No.</td>
<td>While pension legislation does not explicitly require currency matching, it is a criterion considered in evaluating the maturity profile of the assets and liabilities of a pension plan.</td>
</tr>
<tr>
<td>Investment firms and collective investment funds</td>
<td>Yes.</td>
<td>SDs (investment firms) must be incorporated in Jamaica or CARICOM member countries. For CIS, the CIS Regulations—Parts II and III provide for the registration for both local and overseas CIS, respectively. Part III of the CIS Regulations states the requirements for overseas CIS to be registered to issue its securities in Jamaica. An example of the requirements is the submission of information and documents (including but is not limited to financial statements, organizational documents, and a profile of directors and officers) to satisfy the FSC, including: (1) the overseas CIS which is from a jurisdiction where the laws and regulatory oversight for CIS are sufficient to ensure investor protection and market integrity and (2) the CIS which is in good standing in the foreign jurisdiction.</td>
</tr>
<tr>
<td>Limits (max.) on securities issued by nonresidents</td>
<td>Yes.</td>
<td>CIS Regulation 33 mandates investment restrictions for CIS. For example, (1) no more than 15% of the scheme’s net assets may be invested in illiquid assets and (2) no more than 10% of the scheme’s net assets may consist of securities from one issuer, except in the case of securities that are issued or guaranteed by the GOJ and the BOJ and issued by any government where those securities have</td>
</tr>
</tbody>
</table>
received an investment grade credit rating. For the SDs, there are concentration limits and large exposure limits. For the purchase of foreign securities, the cap on foreign assets for SDs and CISs’ investments is 25%. The permissible investment activities also include investment grade sovereign obligations, investment grade corporate obligations of entities incorporated outside of Jamaica, and shares of such corporations. Effective April 30, 2021, the permissible investment activities were expanded to include investment grade corporate obligations of entities incorporated in Jamaica and which are foreign exchange earners; publicly traded shares of entities incorporated in Jamaica with shares issued in United States dollars, Great Britain pounds, euros, or Canada dollars that are earners of foreign exchange and whose debts are rated by credit rating agencies as investment grade; BOJ CDs denominated in foreign currency; GOJ guaranteed corporate foreign currency debt instruments issued by corporate entities incorporated in Jamaica, publicly traded shares of corporate entities incorporated outside of Jamaica with shares issued in United States dollars, Great Britain pounds, euros, or Canada dollars, with market capitalization of US$10 billion or greater.

Limits (max.) on investment portfolio held abroad

Yes.

CIS Regulation 33 mandates investment restrictions for CIS. For example, (1) no more than 15% of the scheme’s net assets may be invested in illiquid assets and (2) no more than 10% of the scheme’s net assets may consist of securities from one issuer, except in the case of securities that are issued or guaranteed by the GOJ and the BOJ and issued by any government where those securities have received an investment grade credit rating. For the SDs, there are concentration limits and large exposure limits. For the purchase of foreign securities, the cap on foreign assets for SDs and CISs’ investments is 25%. The permissible investment activities also include investment grade sovereign obligations, investment grade corporate obligations of entities incorporated outside of Jamaica, and shares of such corporations. Effective April 30, 2021, the permissible investment activities were expanded to include investment grade corporate obligations of entities incorporated in Jamaica and which are foreign exchange earners; publicly traded shares of entities incorporated in Jamaica with shares issued in United States dollars, Great Britain pounds, euros, or Canada dollars that are earners of foreign exchange and whose debts are rated by credit rating agencies as investment grade; BOJ CDs denominated in foreign currency; GOJ guaranteed corporate foreign currency debt instruments issued by corporate entities incorporated in Jamaica, publicly traded shares of corporate entities incorporated outside of Jamaica with shares issued in United States dollars, Great Britain pounds, euros, or Canada dollars, with market capitalization of US$10 billion or greater.

Limits (min.) on investment portfolio held locally

Yes.

No regulation specifies a minimum on local portfolio holdings. However, directives include maximums for institutions’ foreign investment (that is, no more than 25% of total assets in foreign assets).

Currency-matching regulations on assets/liabilities composition

No.

Although securities legislation does not explicitly state that a SD must match the currency composition of assets against liabilities, in calculating the capital adequacy ratio, a dealer must measure its exposure in each foreign currency position by deducting all liability amounts from all asset amounts in each currency. The overall net position is added to the total of the dealer’s risk-weighted assets in determining the capital adequacy ratio. Implicitly, it is in a dealer’s best interest to match the foreign currency asset and liability positions or to hold additional capital against this specific exposure.
**Changes during 2021 and 2022**

**Exchange Arrangement**

### Monetary policy framework

**Inflation-targeting framework**

Jamaica’s monetary policy framework moved from Inflation Targeting Lite to a full-fledged inflation-targeting regime with the passing of the Bank of Jamaica (BOJ) (Amendment) Act, 2020. The BOJ (Amendment) Act, 2020, also established the MPC which has the responsibility of making monetary policy decisions to achieve the Government of Jamaica’s inflation target.

### Target setting body

**Government**

04/16/2021

The inflation target was established by the Minister of Finance and the Public Service in consultation with the Bank of Jamaica.

### Accountability

**Open letter**

04/16/2021

If inflation either falls below the lower end of the target (below 4%) or increases above the upper-end of the target (above 6%), the Bank is required to explain to the Minister of Finance and the Public Service (MOFP) and the Jamaican public why the inflation target was missed and the corrective policy actions that will be taken to restore inflation to the target. The Bank is required to notify the MOFP within 60 days of missing the target.

**Parliamentary hearings**

04/16/2021

The MPC must publish statements on the performance of the Bank with respect to its monetary policy and achievements in relation to the inflation target, and issue monetary policy updates which are to be submitted to the Minister of Finance and the Public Service (MOFP) every six months, at a minimum, or as may be directed by Parliament.

The law guides that the MOFP must, on receipt of the Monetary Policy Statement prepared by the MPC, table a copy in the House of Representatives, following which, in keeping with the statutory provision, the MOFP must refer to the Standing Finance Committee of the House of Representatives.

### Transparency

**Publication of minutes**

04/16/2021

The MPC must at the end of each meeting, or as soon as practical thereafter, publish on the Bank’s website, a summary of the decisions made at the meeting and the reasons, and must further within four weeks of the conclusion of the meeting publish on the Bank’s website the Minutes of the meeting.

### Imports and Import Payments

**Import taxes and/or tariffs**

03/31/2021

The customs processing fee was eliminated for goods for outright export not exceeding US$500.00 in value.

04/01/2021

The $5.00 stamp duty from the value of goods exported was removed.

### Payments for Invisible Transactions and Current Transfers

**Controls on these transfers**

**Investment-related payments**

04/01/2021

The distribution of dividends to shareholders owning more than 1% of issued shares could resume.

### Capital Transactions
Controls on capital and money market instruments

**On capital market securities**

**Shares or other securities of a participating nature**

Controls on credit operations

07/30/2021 The Microcredit Act, which was passed in January 2021, entered into force. This Act governs the business of lending to individuals and to MSMEs. The Act speaks to licensing and governance requirements, reflects Bank of Jamaica (BOJ) is the regulator for these service providers, incorporates consumer-related provisions on lending practices, which regime is overseen by the Consumer Affairs Commission, and includes penalties for non-compliance with the Act. Lending in foreign currency remains subject to the requirements of the BOJ Act and commercial banks, merchant banks, and building societies, nonbank financial institutions governed by the Insurance
Act, and Securities Act, Industrial and Provident Societies, and Friendly Societies; and statutory bodies incorporated for the purposes of lending money are exempt from the requirements of this law. Existing microfinanciers and persons wishing to offer the service have 12 months within which to apply for a license under this Act and transactions entered into prior to the passage of this Act will remain enforceable.

#### Open foreign exchange position limits

- **On resident assets and liabilities**
  - **12/06/2021** Absolute limits of J$4.5 billion and J$7.5 billion for long positions and short positions, respectively, were imposed. These limits complemented the existing foreign exchange NOP limits of 15% and 25% of regulatory capital for long and short positions of ADs. Therefore, ADs’ NOP limits for long positions are 15% of capital or J$4.5 billion (whichever is lower) and for short positions 25% or J$7.5 billion (whichever is higher).

- **On nonresident assets and liabilities**
  - **12/06/2021** Absolute limits of J$4.5 billion and J$7.5 billion for long positions and short positions, respectively, were imposed. These limits complemented the existing foreign exchange NOP limits of 15% and 25% of regulatory capital for long and short positions of ADs. Therefore, ADs’ NOP limits for long positions are 15% of capital or J$4.5 billion (whichever is lower) and for short positions 25% or J$7.5 billion (whichever is higher).

### Provisions specific to institutional investors

#### Insurance companies

### Monetary policy framework

Exchange rate anchor

- **U.S. dollar**
- **Euro**
- **Composite**
- **Other**

Monetary aggregate target

- **Inflation-targeting framework** Yes. |
| In 2013, the BOJ set the “price stability target” at 2% in terms of the year-on-year rate of change in the CPI and has made a commitment to achieving this target at the earliest possible time. |

Target setting body

- **Government** Yes. |
| Central Bank | Yes. |

**Monetary Policy Committee**

- **Central Bank Board** Yes. |
| In January 2013, the BOJ decided to set the “price stability target” under the framework for the conduct of monetary policy by majority vote. The “price stability target” is also stated in the joint statement of the government and the BOJ on Overcoming Deflation and Achieving Sustainable Economic Growth, released at the same time. The “price stability target” is set by the Board of the BOJ. |

Other

- **Government and Central Bank**

**Inflation target** Yes. |

**Target number** Yes. |

**Point target** Yes. |
| The BOJ set the target at 2% in terms of the year-on-year rate of change in the CPI. In 2016, the BOJ introduced an inflation-overshooting commitment, under which it continues expanding the monetary base until the year-on-year rate of increase in the observed CPI (all items less fresh food) exceeds 2% and stays above the target in a stable manner. |

**Target with tolerance band**

**Band/Range**

**Target measure** Yes. |
| CPI headline inflation, year-on-year rate of change, is used for the target measure. |

**CPI** Yes. |
| The headline inflation is CPI based. |

**Core inflation**

**Target horizon** Yes. |
| The BOJ aims to achieve the price stability target of 2% at the earliest possible time (Joint Statement of the Government and the
BOJ on Overcoming Deflation and Achieving Sustainable Economic Growth of January 2013).

<table>
<thead>
<tr>
<th>Operating target (policy rate)</th>

</tbody>
</table>
|                               | A negative interest rate of minus 0.1% to the policy rate balances in current accounts held by financial institutions at the BOJ is the short-term policy interest rate. The BOJ also targets the 10-year Japanese Government Bond (JGB) yield at around 0%. In 2018, with a view to persistently continuing with powerful monetary easing, the BOJ decided to strengthen its commitment to achieving the price stability target by introducing forward guidance for policy rates. The BOJ has lifted the quantitative target for the annual JGB purchases of ¥80 trillion and will purchase a necessary amount of JGBs without setting an upper limit on its guidance on JGB purchases to maintain 10-year JGB yields at around 0%.
| Target corridor band           | Yes. |
|                               | Effective March 19, 2021, the BOJ explicitly clarified the band around the 10-year JGB yield target of +/- 25 bps. In addition, it also introduced “fixed-rate purchase operations for consecutive days” to set an upper limit on interest rates when necessary.
| Other                         | No.  |
| Accountability                | Yes. |
|                               | The BOJ prepares and submits the Semiannual Report on Currency and Monetary Control to the Diet, twice a year.
| Other                         | No.  |
| Transparency                  | Yes. |
|                               | The BOJ releases the Outlook for Economic Activity and Prices (Outlook Report) quarterly (usually January, April, July, and October). The Outlook Report presents the BOJ’s outlook for developments in economic activity and prices, assesses upside and downside risks, and outlines its views on the future course of monetary policy. The Monetary Policy Meetings are held eight times a year, and the Statement on Monetary Policy is released immediately after the meeting. The Summary of Opinions is published about a week after the meeting.
| Publication of votes           | Yes. |
|                               | Votes are published in the Statement on Monetary Policy.
| Publication of minutes         | Yes. |
|                               | The minutes of each Monetary Policy Meeting are published after the following meeting. The transcript of each Monetary Policy Meeting is published ten years after the Monetary Policy Meeting (available only in Japanese).
| Publication of inflation forecasts | Yes. |
|                               | Each Board member’s forecasts for the economy and prices are released in the Outlook Report quarterly.
| Other monetary framework       |     |
| Exchange tax                   | No.  |
| Exchange subsidy               | No.  |
| Foreign exchange market        | Yes. |
|                               | Participation in the foreign exchange market in Japan does not require a license. Dealers are allowed to freely determine their bid-ask spreads and foreign exchange commissions with their clients. The participants in the wholesale foreign exchange market must adhere to the FX Global Code and the Local Standards in Tokyo FX Market: Supplementary provisions to the FX Global Code (2021 edition).

Participation in the foreign exchange market in Japan does not require a license, and there are no limits on the bid-ask spreads and commissions of market participants. Financial institutions also transact directly with each other. Brokers play a major role in the market. There are market makers in the market.

There are no officially set rates in the forward exchange market, and forward exchange transactions are based on free-market rates. The BOJ does not participate in the foreign exchange derivatives market. To support the smooth functioning of US dollar funding markets, the BOJ, in coordination with the Bank of Canada, the Bank of England, the ECB, the Federal Reserve, and the Swiss National Bank enhanced the provision of US dollar liquidity from March 16, 2020, by lowering the pricing on the standing US dollar liquidity swap arrangements by 25 basis points, and offering an 84-day maturity in addition to the one-week maturity that was already in place. Effective July 1, 2021, in view of the sustained improvements in US dollar funding conditions and the low demand at US dollar liquidity-providing operations, these CBs, including the BOJ, discontinued offering dollar liquidity at the 84-day maturity. The CBs, including the BOJ, conduct 7-day operations once per week.

Official cover of forward operations No.

The exchange and trade control system is administered mainly by the MOF, the Ministry of Economy, Trade and Industry (METI), and the BOJ, which acts as the government’s agent.

Export and import of gold (not less than 90% purity) exceeding one kilogram in total weight must be declared to the MOF through the customs authorities. (1) A permission from the authorities is required for import from or export to the DPRK. (2) A permission from the authorities is required for export to Russian Federation effective April 5, 2022. (3) A permission from the authorities is required for importing gold of Russian origin effective August 1, 2022.

Export of means of payment (including banknotes, checks, traveler’s checks, and promissory notes) and securities in domestic currency exceeding the equivalent of ¥1 million must be declared to the MOF through the customs authorities. The declaration threshold regarding export of cash and other means of payment/cash courier to the DPRK is ¥0.1 million or its equivalent. (1) A permission from the authorities is required for exports of means of payment and securities that contribute to activities related to the DPRK’s nuclear-related, ballistic-missile-related, or weapons of mass destruction-related programs, in accordance with a UNSCR. (2) A permission from the authorities is required for exports of means of payment to the Russian Federation effective April 5, 2022.

Certain goods are subject to import restrictions under the Import Trade Control Order for reasons of national security, public health, and environmental and moral protection. Imports of these goods require METI approval. For the importation of restricted items, METI authorization and an import quota certificate are required. The importation of certain other goods from specific countries or shipping areas requires individual METI authorization. Import settlements effected under special methods require METI authorization.

Imports of certain illicit goods, including drugs, guns, and counterfeit goods, are prohibited under the Customs Law.

The Japanese tariff system is stipulated by the Customs Law, Customs Tariff Law, and Temporary Tariff Measures Law. The harmonized classification schedule annexed in the Customs Tariff Law sets out both the classification and the corresponding customs duty rate (called the general rate) of particular products. The rate actually applied, however, is not necessarily the general rate. The Temporary Tariff Measures Law sets out the temporary rate for certain products, which in these cases prevails over the general rate. In addition, when the customs duty rate in the WTO Concession Schedule (so-called WTO rate) is lower than the general rate (or the temporary rate, if applicable), the WTO rate is applied. For designated developing countries and areas, the Temporary Tariff Measures Law also provides a preferential rate, which is applicable to certain products and lower than the above rates. The Economic Partnership Agreement (EPA) rate is applicable to the originating goods of the party.

Customers must present identification, such as a driver’s license, health insurance certificate, or passport, at the teller counter of a financial institution to transfer funds in cash exceeding ¥0.1 million.
Controls apply to the extent that the purchase of shares is affected by laws on inward direct investment. Pursuant to the Foreign Exchange and Foreign Trade Act (FEFTA) passed in November 2019 and its subsequent regulations, there is an exemption scheme for prior notification for stock purchases and the threshold for inward direct investment in designated industries that requires prior notification is 1%. The prior notification of stock purchases is exempted for investors that comply with the following conditions: (1) Investors or their closely related persons do not become board members of the investee company; (2) investors do not propose to the general shareholders’ meeting transfer or disposition of investee company’s business activities in the designated business sectors; and (3) investors do not access non-public information about the investee company’s technology in relation to business activities in the designated business sectors. Moreover, since June 7, 2020, sovereign wealth funds may be exempt from “prior notification” requirements, and foreign financial institutions (foreign banks, insurance companies, high-frequency traders, etc.) are automatically exempt. On the other hand, foreign state-owned enterprises cannot be exempt.

A permission from the authorities is required for the issuance or offering of new securities having a fixed maturity of, effective February 26, 2022, more than 30 days (previously more than 90 days since September 26, 2014) in Japan by specific banks of the Russian Federation. Under the Foreign Exchange and Foreign Trade Law (FEFTA), “securities” covers shares and other securities of participating nature.

A permission from the authorities is required for the acquisition from nonresidents or the transfer to nonresidents by residents of securities newly issued by the Government of the Russian Federation and other government agencies anywhere in the world effective February 26, 2022.

A permission from the authorities is required for the acquisition from nonresidents or the transfer to nonresidents by residents of securities newly issued by the Government of the Russian Federation and other government agencies anywhere in the world effective February 26, 2022.

To residents from nonresidents No.
Controls on direct investment Yes.
Outward direct investment Yes. Outward direct investment by residents in the following industries requires prior notification: (1) fisheries of gathering or catching aquatic animals and plants and (2) manufacture of (a) leather or leather products, (b) weapons, (c) equipment related to weapons manufacturing, and (d) narcotics. Effective May 12, 2022, controls apply to outward direct investment by residents which pertains to a business conducted in the Russian Federation or a business conducted in a foreign state by a corporation established based on the laws and regulations of the Russian Federation or a corporation beneficially controlled by the corporation.
Inward direct investment Yes. Inward direct investment by foreign investors in the following industries requires prior notification: (1) aircraft, armaments, nuclear power, space technology, and explosives production, cyber security, for national security; (2) electricity, gas, heat supply, telecommunications, broadcasting, water, railroad, and passenger transport, for public order; (3) biological and security industries, for public safety; (4) oil, leather and leather products, agriculture, forestry and fisheries, air transport, and maritime industries, to ensure smooth operation of the economy; and (5) investment by investors from countries with which Japan does not have a treaty or other international agreement on inward direct investment, for reciprocity reasons. The amended FEFTA passed in November 2019.
and its subsequent regulations introduced the exemption scheme for 
prior notification for stock purchases. The FEFTA threshold for 
inward direct investment in designated industries that requires prior 
notification is 1%. Since July 15, 2020, certain pharmaceutical 
products and medical devices are designated as industries that require 
prior notification. Effective November 4, 2021, some types of 
business sectors relating to the supply of critical minerals were 
designated as industries that require prior notification.

Under the Act on Nippon Telegraph and Telephone Corporation, etc., 
direct and indirect foreign capital participation in the Nippon 
Telegraph and Telephone Corporation must be less than one-third. 
Under the Radio Act and Broadcasting Act, foreigners and foreign-
controlled firms, etc., may not hold licenses to operate broadcasting 
stations nor be approved as broadcasters. Firms are considered 
foreign controlled if any of their executive directors are foreigners or 
if foreigners hold at least one-fifth (for territorial broadcasters, 
including indirect investment) or one-third (for facility-supplying 
broadcasters) of voting rights. Under the Civil Aeronautics Law, only 
firms with less than one-third of voting rights held by foreigners and 
in which none of the representatives and less than one-third of the 
board of directors are foreigners may hold a license to operate an air 
transport business.

Changes during 2021 and 2022

Exchange Measures

Exchange measures imposed for security reasons
In accordance with IMF Executive Board Decision No. 144-(52/51) 03/01/2022
A permission from the authorities is required for capital transactions and payments to individuals and entities of the Russian Federation.
03/03/2022
A permission from the authorities is required for capital transactions and payments to individuals and entities of the Republic of Belarus.

Monetary policy framework
Inflation-targeting framework
Operating target (policy rate)
Target corridor band 03/19/2021
The Bank of Japan explicitly clarified the band around the 10-year Japanese Government Bond yield target of +/- 25 bps. In addition, it also introduced “fixed-rate purchase operations for consecutive days” to set an upper limit on interest rates when necessary.

Foreign exchange market
Forward exchange market 07/01/2021
In view of the sustained improvements in US dollar funding conditions and the low demand at US dollar liquidity-providing operations, the Bank of Japan, in coordination with the Bank of England, the ECB, the Federal Reserve, and the Swiss National Bank, discontinued offering dollar liquidity at the 84-day maturity.

Arrangements for Payments and Receipts

Controls on trade in gold (coins and/or bullion)
On external trade 04/05/2022
A permission from the authorities is required for export to Russian Federation.
08/01/2022
A permission from the authorities is required for importing gold of Russian origin.

Controls on exports and imports of banknotes
On exports
Domestic currency 04/05/2022
A permission from the authorities is required for exports of means of payment to Russian Federation.
Foreign currency 04/05/2022
A permission from the authorities is required for exports of means of payment to Russian Federation.
Capital Transactions

Controls on capital transactions

Controls on capital and money market instruments

On capital market securities

Shares or other securities of a participating nature
Sale or issue locally by nonresidents

A permission from the authorities is required for the issuance or offering of new securities having a fixed maturity of more than 30 days (previously more than 90 days since September 26, 2014) in Japan by specific banks of the Russian Federation.

Bonds or other debt securities
Sale or issue locally by nonresidents

A permission from the authorities is required for the issuance or offering of new securities in Japan by the Government of the Russian Federation and other government agencies.

Purchase abroad by residents

A permission from the authorities is required for the acquisition from nonresidents or the transfer to nonresidents by residents of securities newly issued by the Government of the Russian Federation and other government agencies anywhere in the world.

Controls on direct investment

Outward direct investment

Controls apply to outward direct investment by residents which pertains to a business conducted in the Russian Federation or a business conducted in a foreign state by a corporation established based on the laws and regulations of the Russian Federation or a corporation beneficially controlled by the corporation.

Some types of business sectors relating to the supply of critical minerals were designated as industries that require prior notification.

Inward direct investment

Some types of business sectors relating to the supply of critical minerals were designated as industries that require prior notification.
JORDAN
(Position as of June 30, 2022)

Status under IMF Articles of Agreement

Date of membership
August 29, 1952.

Article VIII
Yes. Date of acceptance: February 20, 1995.

Article XIV

Exchange Measures

Restrictions and/or multiple currency practices
No. No restrictions as reported in the latest IMF staff report as of December 31, 2021.

Exchange measures imposed for security reasons
Yes.

In accordance with IMF Executive Board Decision No. 144-(52/51)
No.

Other security restrictions
Yes. The Central Bank of Jordan (CBJ) has instructed banks to comply with all UNSC resolutions regarding the freezing of funds. Banks are required to inform the CBJ of financial transactions by natural or legal persons listed by the UN in accordance with UNSC resolutions.

Exchange Arrangement

Currency
Yes. The currency of Jordan is the Jordanian dinar. The CBJ issues commemorative gold coins, which are legal tender but do not circulate and are available to residents and nonresidents.

Other legal tender
No.

Exchange rate structure

Unitary
Yes.

Dual

Multiple

Classification

No separate legal tender

Currency board

Conventional peg
Yes. The exchange rate arrangement is a conventional pegged arrangement. The dinar is officially pegged to the SDR, but in practice, it has been pegged to the US dollar since late 1995. The CBJ is responsible for maintaining the stability of the dinar exchange rate.

Stabilized arrangement

Crawling peg

Crawl-like arrangement

Pegged exchange rate within horizontal bands
Other managed arrangement
Floating
Free floating

</tbody>
</table>

The monetary policy framework is an exchange rate anchor vis-à-vis the US dollar.
The rates on foreign currencies (especially the rates for the US dollar) are monitored by the CBJ on a daily basis, to ensure that they are within the range of buying and selling boundaries announced by the CBJ. Foreign exchange bureaus (including those jointly owned by Jordanians and foreigners) may operate in Jordan and must be licensed by the CBJ. There are 19 foreign exchange bureaus. As of July 31, 2022, the number of licensed bureaus that are jointly owned by Jordanians and foreigners was 17. Pursuant to Article 16 of Money Exchange Business Law No. 44 of 2015, they may practice buying, selling, and exchanging foreign currency notes and coins, and any of the following activities according to the license granted by the Board: (1) buying and selling checks denominated in foreign currency; (2) buying and selling precious metals; (3) importing and exporting foreign banknotes, coins, and precious metals; (4) sending and receiving of financial transfers; and (5) carrying out any other activities or services approved by the Board. Foreign exchange bureaus cannot make foreign exchange transactions directly with the CB.

The CBJ buys and sells foreign exchange at the official rate. The difference between the CBJ’s buying and selling rates is JD 0.002.

Money changers operate according to supply and demand for foreign currency in the local market, and the buying and selling prices of foreign currency are quoted by the international market; therefore, money changers do not operate either as brokers or as market makers.
Market making  No.
Forward exchange market  Yes. Licensed banks may buy an unlimited amount of foreign currency forward contracts against dinars from their customers, and they may sell foreign currency forward contracts against dinars to their customers to pay for imports into Jordan.
Official cover of forward operations  No.

Arrangements for Payments and Receipts

Prescription of currency requirements  No. No restrictions apply to transactions in domestic or foreign currency.

Controls on the use of domestic currency  No.
For current transactions and payments  No.
For capital transactions  No.

Transactions in capital and money market instruments  No.
Transactions in derivatives and other instruments  No.
Credit operations  No.

Use of foreign exchange among residents  No. Residents may use foreign exchange for transactions.

Payments arrangements  Yes.
Bilateral payments arrangements  Yes.
Operative  No.
Inoperative  Yes. There is an inoperative arrangement with Syria.

Regional arrangements  No.
Clearing agreements  No.
Barter agreements and open accounts  No.

The reserve requirement is 7% for current and call accounts, 5% for saving accounts, notice accounts, term deposits, and certificates of deposit accounts (applicable to commercial banks), 6% for current and call accounts, and 4% for saving accounts, notice accounts, term deposits, and certificates of deposit (applicable to Islamic banks) in dinars and foreign exchange.

According to CBJ Instructions for Legal Liquidity No. 37/2007 of 2007, banks must keep liquid assets equal to at least 100% of their weighted liabilities in all currencies (including dinars) and at least 70% of their weighted liabilities in dinars. LCR Regulations No. 5/2020, effective January 1, 2021, requires banks to have an adequate stock of unencumbered liquid assets that can be converted immediately to cash to meet its liquidity needs for the next 30 days under specific stress scenarios. At a minimum, these liquid assets should enable the bank to continue performing its activities until day 30 of the specified stress scenario, by which time it is assumed that the bank management had acted appropriately to solve the liquidity crisis. Banks must maintain at all times an LCR in the minimum of 100% of its weighted liabilities on both levels (consolidated and branches in Jordan). Limits stated in the instructions are the minimum limits for applying the LCR standard and become binding for banks as of January 1, 2021.

Pursuant to Instructions No. 2/2021, effective March 3, 2021, the granting of direct facilities in foreign currencies is prohibited. However, there are exceptions allowing funding activities or services that can generate foreign currencies not less than the periodic prepayment plus interest, which includes export and reexport purposes, tourism, transportation, and hotels. Funding building construction in foreign currencies is prohibited in all cases. These instructions aim to put the determinants of granting direct credit facilities in foreign currency in addition to providing the determinants of granting credit facilities to persons who do not conduct an activity inside the Kingdom and/or finance activities outside the Kingdom. Previously, licensed banks could lend locally in foreign exchange for export and reexport purposes, in addition to certain sectors such as tourism, transportation, and hotels.

No controls apply, except foreign exchange exposure limits.
On resident assets and liabilities  Yes.  The open foreign exchange position in individual foreign currency (excluding US dollars) is limited to 5% of bank equity. The aggregate open position (and that in US dollars) is limited to 15% of bank capital.

On nonresident assets and liabilities  Yes.  The open foreign exchange position in individual foreign currency (excluding US dollars) is limited to 5% of bank equity. The aggregate open position (and that in US dollars) is limited to 15% of bank capital.

The de jure exchange rate arrangement is free floating. The NBK publishes monthly data on foreign exchange interventions on a regular basis, with time series available beginning in January 1996. Data are usually published within two weeks of the end of the reporting period. The de facto exchange rate arrangement is classified as floating.

The NBK sets the official exchange rate of the domestic currency with respect to foreign currencies on a daily basis on business days on which the stock exchange holds foreign currency trading. The weighted average market exchange rate of the domestic currency against the US dollar as of 3:30 p.m. Nur-Sultan time, based on the results of the stock exchange session, is set as the official exchange rate of the domestic currency against the US dollar for the business day following the trading day. For other foreign currencies, the market exchange rate of the domestic currency with respect to a foreign currency is calculated by the NBK using the cross-rate against the US dollar, arrived at in accordance with the demand quotes received through news agency channels as of 4:00 p.m. Nur-Sultan time on a stock exchange trading day, and it is set as the official exchange rate for the next business day.

On nonbusiness days, the NBK exchange rates on the business day preceding the nonbusiness day are in effect. The NBK publishes daily exchange rates of certain currencies against the tenge for accounting and computation of customs and other mandatory payments to the budget.

The monetary policy framework

Exchange rate anchor

U.S. dollar

Euro

Composite

Other
**Monetary aggregate target**

Inflation-targeting framework | Yes. | Since August 20, 2015, the monetary policy has been based on an inflation-targeting framework. The annual inflation rate at the end of the year is compared with the target inflation range. There are no provisions addressing the consequences of a failure to meet the inflation target. The consequences if inflation misses its target have not been specified.

**Target setting body** | Yes. | Government

Central Bank | Yes. | The MPC of the NBK is a decision-making body on monetary policy issues. It (1) sets the base rate; (2) sets the interest rates on the main operations of monetary policy; and (3) makes decisions on other issues of monetary policy that are not within the exclusive purview of the NBK Board. The MPC issues decrees on matters within its purview.

Central Bank Board | Yes. | The inflation target is set by the NBK Executive Board, which consists of five representatives of the NBK, a representative from the Presidential Administration of the Republic of Kazakhstan, the first deputy prime minister of Kazakhstan, the minister of national economy, and the chair of the Agency of the Republic of Kazakhstan for Regulation and Development of the Financial Market. The NBK Executive Board approves the government’s monetary policy, within whose framework targets are set. Decisions at meetings of the Executive Board are adopted by a majority vote of the Executive Board members present. In the event of a tie, the NBK chair casts the deciding vote. Meetings of the Executive Board are legally valid if the members present constitute a quorum, defined as at least two-thirds of Executive Board members, which must include the NBK chair or a person serving in the chair’s place. There are no legal provisions regarding adjustment of the target; however, the NBK’s position is that a target already set is not subject to change.

**Other**

**Government and Central Bank**

**Inflation target** | Yes. | The NBK set a target band for inflation in 2021–2022 at 4%–6%. Beginning in 2023, there will be an intermediate target of 4%–5%, which will allow for a smoother slowdown in inflation. The 3%–4% target is expected to be achieved beginning in 2025.

**Target number** | Yes. | Target inflation is expressed in terms of year-end inflation (December over December of the previous year).

**Point target** | Yes. | Target inflation is expressed in terms of year-end inflation (December over December of the previous year).

**Target with tolerance band** | Yes. | The CPI is used. The CPI is calculated by the Bureau of National Statistics of the Agency for Strategic Planning and Reforms. The CPI describes the change over time in average prices for a fixed basket of goods and services purchased by the public for personal consumption.
Core inflation

Target horizon
Yes. Effective March 5, 2021, the horizon for reaching the inflation target is over the medium term (previously one year).

Operating target (policy rate)
Yes.

Policy rate
Yes. The NBK targets the short-term money market rate TONIA (tenge overnight index average), which is the weighted average interest rate on overnight repo transactions on the Kazakhstan Stock Exchange (KASE) in the automatic repo sector. For the purpose of greater representativeness and to establish a money market interest rate benchmark, TONIA is calculated at the end of each working day as a weighted average value of the profitability of one-day repo operations with a cutoff of 5% of transactions with the lowest and highest profitability. The threshold volume of transactions for the calculation of TONIA is set at T 100 billion. If the threshold value of the volume of transactions per day is not reached, TONIA is defined as the sum of the value of the base rate set by the NBK effective that day and the average spread of TONIA to the base rate for the previous five days.

Target corridor band
Yes. The NBK sets a base rate with a corridor of ±100 basis points. The NBK has standing deposit and liquidity provision facilities.

Other
No.

Accountability
Yes.

Open letter
No.

Parliamentary hearings
No.

Other
Yes. Reporting takes place as part of a memorandum approved by the chief of the Republic of Kazakhstan Presidential Administration, as well as presentation of the annual report of the NBK.

Transparency
Yes.

Publication of votes
No. Votes are not published. There are press releases regarding the base rate.

Publication of minutes
No.

Publication of inflation forecasts
Yes. Inflation forecasts are published quarterly in “Inflation Forecast” press releases and in quarterly “Inflation Surveys.”

Other monetary framework

Exchange tax
No.

Exchange subsidy
No.

Foreign exchange market
Yes. The foreign exchange market includes the KASE, which conducts daily trading online using an electronic trading system; an OTC interbank market; and a network of exchange bureaus handling foreign exchange cash transactions.

Spot exchange market
Yes. Authorized banks conduct spot transactions on the KASE and in the interbank market. Residents and nonresidents purchase and sell foreign currency in the Republic of Kazakhstan exclusively with banks authorized to engage in exchange operations with foreign currency, through foreign exchange bureaus of such authorized banks, and through foreign exchange bureaus of authorized institutions following the procedure established by the NBK. Licenses to conduct foreign exchange transactions (as part of a
general banking license) are issued to authorized banks by the NBK. Banks authorized to conduct transactions in foreign currency in accordance with their licenses or under the law may freely purchase and sell foreign currency both in the Republic of Kazakhstan and abroad. As of January 1, 2021, there were 26 institutions that held licenses to perform banking and other operations. The NBK issues licenses for exchange operations with foreign currency in cash, which authorizes the exclusive activity of foreign currency exchange operations in cash and the purchase and sale of refined gold bullion with individuals. Nonbank exchange bureaus do not have the right to conduct foreign exchange operations directly with the NBK. Nonbank exchange bureaus may not make payments and transfers in foreign currency on behalf of their customers. They may open accounts abroad and may purchase foreign currency from and sell foreign currency to authorized banks and the public. As of January 1, 2021, there were 2,247 bank and nonbank foreign exchange bureaus performing operations with foreign exchange cash. Banks, authorized institutions, and nonbank foreign exchange bureaus set their exchange rates independently. Pursuant to NBK Resolution No. 296 of November 29, 2018, the limits (T 6 and T 7 for the US dollar and the euro, respectively) on the margin between the buying and selling rates of cash in US dollars and euros for tenge cash transactions conducted with the public through exchange bureaus were eliminated. However, by Resolution No. 33 of March 19, 2020, the NBK reestablished the limits on the margin between the buying and selling rates on cash foreign exchange transactions against tenge conducted by individuals through exchange offices of authorized banks and authorized nonbanking organizations as follows: T 6 for the US dollar and T 7 for the euro. The resolution was adopted in the context of COVID-19. Given the lack of consensus with regard to the outlook for an end to the negative impact of external economic factors related to COVID-19 on the country’s economy and the domestic foreign exchange market, under NBK Executive Board Resolution No. 86 of July 14, 2020, on the Establishment of Limits on the Margin between Buying and Selling Rates for Foreign Exchange Transactions against the Tenge Performed through Exchange Offices (taking into account the changes made on December 21, 2020), the decision was made to extend the margin limits of T 6 for US dollars and T 7 for euros until January 1, 2022. There are no provisions with regard to commissions on the sale and purchase of foreign exchange cash through exchange bureaus.

Operated by the central bank  No.

Foreign exchange standing facility  No.

Allocation  No.

Auction  No.

Fixing  No.

Interbank market  Yes.  Banks conduct transactions in the KASE and in the OTC interbank market at freely negotiated rates. Daily online trading is carried out using an electronic trading system, through which participants submit their bids. The NBK monitors the trading sessions and if necessary participates in trading. The NBK participates in trading sessions via a remote terminal or sends a trader to the trading floor if the remote connection is not available. Internal regulations of the KASE govern trade execution and settlement. Banks set their own exchange rates.
There are no limits on the commissions charged by market participants. As of January 1, 2021, there were 26 banks licensed to perform banking and other operations and to operate in the securities market.

The NBK intervenes directly with market participants at their quoted rates and proposes its own quotes.

Over the counter: Yes.

Brokerage: Yes.

As of January 1, 2021, the number of organizations with a brokerage and (or) dealer license was 38 (including second-tier banks).

Market making: Yes.

As of August 26, 2021, 19 organizations were market makers for financial instruments.

Forward exchange market: Yes.

Foreign exchange futures are quoted in the KASE. Swap transactions are allowed in the KASE. The NBK participates in foreign exchange swap transactions in the KASE. Forward exchange operations are conducted in the interbank market. Forward transactions are not conducted in the KASE.

Official cover of forward operations: No.

**Arrangements for Payments and Receipts**

**Prescription of currency requirements**: Yes.

Payments and transfers between residents take place in domestic currency, except in cases specified by the Law on Foreign Exchange Regulation and Foreign Exchange Control. Payments and transfers of funds in transactions with nonresidents may be performed in any currency. A payment and/or transfer of funds in domestic currency between a resident and a nonresident is treated as a foreign exchange transaction.

Controls on the use of domestic currency: No.

For current transactions and payments: No.

For capital transactions: No.

Transactions in capital and money market instruments: No.

Transactions in derivatives and other instruments: No.

Credit operations: No.

Use of foreign exchange among residents: Yes.

Foreign exchange transactions among residents are prohibited, except:

1. transactions in which one of the parties is the NBK, the Republic of Kazakhstan MOF, or institutions of the Republic of Kazakhstan abroad;
2. transactions in which one party is a resident authorized to perform foreign exchange transactions with residents pursuant to the laws of the Republic of Kazakhstan or acts of the president adopted before the law went into effect;
3. transactions with foreign exchange assets that are considered banking and other transactions, which authorized banks and authorized institutions may perform under a license issued to them by the NBK, the Republic of Kazakhstan Agency for the Regulation and Development of the Financial Market, or under the laws of the Republic of Kazakhstan;
4. payment for banking services involving foreign exchange transactions;
5. transactions involving the purchase, sale, payment of interest on, and/or redemption of securities whose nominal value is in foreign currency;
(6) transactions between brokers and consigners involving the provision of brokerage services related to the conclusion and execution of import or export contracts with nonresidents, including transactions involving the return of foreign exchange assets to a consigner;
(7) transactions involving the purchase and/or sale of refined gold bullion for domestic currency;
(8) transfers of bills of exchange denominated in foreign currency as fulfillment of monetary obligations;
(9) settlement transactions for goods sold in duty-free shops or for goods sold and services provided to passengers traveling internationally;
(10) transactions between branch offices (representative offices) of foreign organizations. The regulation applies only to branch offices (representative offices) of foreign organizations that constitute a permanent institution for tax purposes in the Republic of Kazakhstan;
(11) transactions involving business travel expenses of individuals for travel abroad, including hospitality expenses, and transactions involving repayment of unused advances for business travel abroad;
(12) gifts or donations of money or foreign exchange assets by individuals to individuals and to legal entities that are charitable organizations;
(13) bank deposits by individuals in favor of other individuals;
(14) transactions between securities market professionals who perform foreign exchange transactions on instructions from clients, and between individuals or legal entities, related to the transfer of money and financial instruments from (to) accounts for the recording and safekeeping of money and financial instruments belonging to clients within the context of the execution and termination of brokerage service agreements;
(15) transactions involving the payment of taxes and other mandatory payments to the budget as provided by the tax code;
(16) transactions of a party serving as a recipient of minerals on behalf of the government that are transferred to said party in accordance with the tax code for in-kind fulfillment by a mineral resources operator of its tax obligations related to the transport, storage, and sale of such minerals; and
(17) payments by individuals for goods, work, and services under transactions concluded and executed within a special economic zone whose boundaries coincide fully or partially with sections of the customs border of the Eurasian Economic Union (EAEU)—set to be included on the list of permitted foreign exchange transactions on January 1, 2020.

Branch offices (representative offices) of foreign organizations that constitute a permanent institution for tax purposes in the Republic of Kazakhstan are classified as residents and may not conduct transactions with other residents in foreign currency.

Administration of control

Yes. Foreign exchange control is administered by the government, the NBK, and other foreign exchange control bodies and agents in accordance with the Law on Foreign Exchange Regulation and Foreign Exchange Control and legislation of the Republic of Kazakhstan. The NBK and other government bodies (the MOF, the Public Revenue Committee under the MOF) serve as foreign exchange control agents in accordance with the scope of authority established by legislation. Authorized banks, nonbank exchange bureaus, and professional participants in the securities market who perform foreign exchange transactions for their clients serve as foreign exchange control agents.

The NBK monitors compliance by residents and nonresidents with the requirements of foreign exchange legislation and performance of the functions of foreign exchange control agents by authorized banks and nonbank exchange bureaus.

The Agency of the Republic of Kazakhstan for the Regulation and Development of the Financial Market licenses banks and financial institutions to engage in banking operations in foreign exchange and supervises the activities of banks and other financial institutions. The NBK also licenses nonbank exchange bureaus and supervises their activities.

The MOF monitors and supervises government loans and government-guaranteed loans. Public revenue authorities (the Public Revenue Committee of the MOF) participate in foreign exchange control related to exports and imports. At the time of customs clearance of goods, an authorized official of a territorial subdivision of the public revenue body—when there is an export or import foreign exchange contract that requires the assignment of a record number in accordance with the Rules for Export-Import Foreign Exchange Control in the Republic of Kazakhstan—checks the record number of the export or import foreign exchange contract entered in the declaration of the goods against the information received regarding the export or import foreign exchange contract with a record number.

If there is a discrepancy between the declaration and the actual information, the exporter or importer must make the relevant corrections to the declaration of goods following the procedure established by the customs legislation of Kazakhstan. Government agencies that issue export and import licenses also monitor compliance with eligibility criteria and licensing rules.

Controls on trade in gold (coins and/or bullion)

Yes. Public (trade) relations arising in the production of precious metals and the turnover of precious metals and precious stones, raw materials containing precious metals, and jewelry and other products made of precious metals and precious stones are regulated by currency legislation and the legislation of Kazakhstan on precious metals and by international treaties.

In accordance with currency legislation, authorized banks and authorized organizations may carry out, through their exchange offices, transactions for the purchase and (or) sale of refined gold bullion, as issued by the NBK.

Revised gold bullion is classified as a foreign exchange asset, and transactions with it for domestic currency are classified as foreign exchange transactions and are subject to the same regulation as other foreign exchange transactions.
Refined gold and gold for minting coins are classified as commodities subject to export restrictions under Decision No. 30 of the Board of the Eurasian Economic Commission (EAEC) of April 21, 2015, on Nontariff Regulatory Measures. (This restriction does not extend to the CBs of EAEU member states.)

**On domestic ownership and/or trade**

No.  
According to the AML/CFT law, a transaction, purchase, or sale of precious metals and precious stones and jewelry, including in cash form, is subject to financial monitoring if the transaction amount is equal to or exceeds T 5 million or the equivalent in foreign currency. Data and information on transactions subject to financial monitoring are sent to the Agency of the Republic of Kazakhstan for Financial Monitoring.

**On external trade**

Yes.  
The Ministry of Industry and Infrastructure Development administers government control of imports and exports of precious metals and commodities containing precious metals.  
EAEU member states apply identical controls on external trade in gold.  
Refined gold bullion is classified as a foreign exchange asset, and transactions with it are classified as foreign exchange transactions and are subject to the same regulation as other foreign exchange transactions. Refined gold and gold for minting coins are classified as commodities subject to export restrictions under Decision No. 30 of the Board of the EAEC of April 21, 2015, on Nontariff Regulatory Measures; specifically, a license is issued in accordance with the Instruction on the Preparation of an Application for a License to Export and/or Import Certain Types of Goods and on the Preparation of Such a License, approved by Decision No. 199 of the Board of the EAEC of November 6, 2014, along with a government control document. (This restriction does not extend to CBs of EAEU member states.) Exports of precious metals, including refined gold bullion, from the EAEU require a license from the pertinent EAEU government authority where the exporter is registered. Exports of precious metal coins from the EAEU require a government control document. Exports from the EAEU of precious metal coins that are the legal tender of an EAEU member are handled by that country’s CB and commercial banks.

**Controls on exports and imports of banknotes**

No.  
Within the EAEU, individuals may move cash and/or monetary instruments in an unlimited amount and without declaration. A declaration is required in the case of imports by individuals from third countries (countries that are not EAEU members) or exports by individuals to third countries of cash and/or traveler’s checks exceeding the equivalent of US$10,000 and of monetary instruments denominated in domestic and foreign currency (for example, bills of exchange, bank checks, certified bearer securities). Banks are permitted to freely import and export domestic and foreign currency, provided they comply with the requirements of the customs legislation.

**On exports**

No.

**Domestic currency**

No.  
For individuals, cash and/or traveler’s checks are subject to customs declaration if the total amount imported into or exported from the customs territory of the EAEU at one time exceeds the equivalent of US$10,000 at the exchange rate in effect on the day the passenger customs declaration is presented to a customs authority. For legal entities, domestic currency banknotes are subject to customs declaration as goods.

**Foreign currency**

No.  
For individuals, cash and/or traveler’s checks are subject to customs declaration if the total amount imported into or exported from the customs territory of the EAEU at one time exceeds the equivalent of US$10,000 at the exchange rate in effect on the day the passenger customs declaration is presented to a customs authority. For legal entities, foreign currency banknotes are subject to customs declaration as goods.
US$10,000 at the exchange rate in effect on the day the passenger customs declaration is presented to a customs authority. For legal entities, domestic currency banknotes are subject to customs declaration as goods.

**On imports**

**Domestic currency**  No. For individuals, cash and/or traveler’s checks are subject to customs declaration if the total amount imported into or exported from the customs territory of the EAEU at one time exceeds the equivalent of US$10,000 at the exchange rate in effect on the day the passenger customs declaration is presented to a customs authority. For legal entities, domestic currency banknotes are subject to customs declaration as goods.

**Foreign currency**  No. For individuals, cash and/or traveler’s checks are subject to customs declaration if the total amount imported into or exported from the customs territory of the EAEU at one time exceeds the equivalent of US$10,000 at the exchange rate in effect on the day the passenger customs declaration is presented to a customs authority. For legal entities, domestic currency banknotes are subject to customs declaration as goods.

### Resident Accounts

**Foreign exchange accounts permitted**  Yes. Residents may open accounts in foreign currency with authorized banks without restriction.

**Held domestically**  Yes. There are no restrictions on the use of funds from such accounts.

**Approval required**  No.

**Held abroad**  Yes. A resident legal entity (with the exception of banks and branch offices (representative offices) of a foreign organization, participants of the Astana International Financial Centre) must notify the NBK of accounts opened with a foreign bank by applying for a record number for the account before making transactions with the account. Resident individuals are not required to notify the NBK of accounts held at foreign banks.

**Approval required**  No.

**Accounts in domestic currency held abroad**  Yes. The regulations are the same as those for accounts in foreign currency.

**Accounts in domestic currency convertible into foreign currency**  Yes. All accounts in domestic currency are convertible. The purchase of noncash foreign currency by resident legal entities (other than banks) on the same business day through a single bank for purposes not related to the fulfillment of foreign currency obligations is limited to the equivalent of US$50,000 (previously US$100,000). The requirement to submit a foreign exchange contract and/or other documents concerning a foreign exchange operation does not extend to individuals purchasing foreign currency. Any document denominated in foreign currency may be used as a “foreign exchange contract.” The amounts, types, and purpose for the purchase of foreign currency are not limited in any way.

### Nonresident Accounts

**Foreign exchange accounts permitted**  Yes. Nonresidents may open foreign exchange accounts with authorized banks without restriction.

**Held domestically**  Yes. There are no restrictions on the use of funds from such accounts.

**Approval required**  No.

**Held abroad**  Yes. There are no restrictions on the use of funds from such accounts.

There are no restrictions on the use of funds from such accounts.

Residents and nonresidents may purchase foreign currency in the domestic market. When requesting to purchase noncash foreign currency for domestic currency for purposes not related to the fulfillment of obligations—in amounts exceeding the equivalent of US$50,000 on the same day through a single bank (previously US $100,000)—resident legal entities must state the purpose and amount of the foreign currency being purchased by submission of a copy of the relevant foreign exchange contract.

EAEU member states apply uniform nontariff regulatory measures with respect to third countries. There is a Uniform List of Goods Subject to Nontariff Regulatory Measures in Trade with Third Countries, as established by EAEC Board Decision No. 134 of August 16, 2012, and No. 30 of April 21, 2015. In accordance with this list, there are prohibitions on imports and exports of goods into and from the EAEU customs territory. Exports of goods from the EAEU customs territory require an authorizing document. Licenses to import ozone-depleting substances and products containing ozone-depleting substances and hazardous waste are issued by the Ministry of Energy; licenses to import means of plant protection (pesticides), poisonous substances that are not precursors of narcotics and psychotropic substances, special technical devices, and encryption (cryptographic) means for secret information acquisition are issued
by the Ministry of Industry and Infrastructure Development; licenses
to import radioelectronic equipment and high-frequency devices for
civilian use, including those built into or part of other goods, are
issued by the Ministry of Information and Communications; licenses
to import human organs, tissue, blood, and blood components are
issued by the Ministry of Health; licenses to import certain kinds of
meat, raw unflavored cane sugar, and aromatic or dye additives are
issued by the Ministry of Trade and Integration; licenses to import
narcotics, psychotropic substances, and their precursors are issued by
the Ministry of Internal Affairs.

| Positive list | No. |
| Negative list | Yes. |
|              |     | The Uniform List of Goods Subject to Nontariff Regulatory
|              |     | Measures, as established by EAEC Board Decision No. 134 of
|              |     | August 21, 2012, and No. 30 of April 21, 2015 (Section I of the
|              |     | Uniform List of Goods), applies within the framework of the EAEU.
| Open general licenses | No. |
| Licenses with quotas | Yes. |
| Other nontariff measures | Yes. |
| Import taxes and/or tariffs | Yes. |

Imports of goods are subject to (1) VAT of 12% and customs duties
(some exemptions); (2) excise taxes, where applicable; and (3)
antidumping protective and compensatory duties, if applicable.
Imports from EAEU member countries are exempt from customs
duties. There is a uniform customs tariff within the EAEU, along
with other uniform measures for regulating trade in goods with third
countries, in accordance with the Treaty on the EAEU of May 29,
2014 (EAEC Council Decision No. 54 of July 16, 2012, on Approval
of the Uniform Foreign Economic Activity Commodity
Nomenclature of the EAEU and the Uniform Customs Tariff of the
EAEU).

To meet tariff obligations of the Russia and the Republic of
Kazakhstan with the WTO for 2018, in accordance with EAEC
Council Decision No. 66 of July 13, 2018, and EAEC Board
Decision No. 94 of June 5, 2018, import customs duty rates were
lowered for 179 tariff subheadings beginning September 1, 2018.
To meet the Republic of Kazakhstan’s tariff obligations for
2017–2018 that differ from those of the Russia, on December 1,
2017, Kazakhstan’s import tariffs for 2,475 tariff lines were lowered
by an average of 1.4 percentage points.
Import duty rates are also in effect pursuant to Order No. 105 of the
Republic of Kazakhstan Minister of the National Economy of
December 19, 2018, on an Amendment to Order No. 58 of the
Republic of Kazakhstan Minister of the National Economy of
February 9, 2017, on Approval of a List of Goods Subject to Import
Customs Duties, Their Rates, and Effective Dates.

Taxes collected through the exchange system | No. |
State import monopoly | No. |

**Exports and Export Proceeds**

**Repatriation requirements** | Yes. |
Residents (with the exception of a branch office (representative
office) of a foreign organization) must ensure that domestic and
foreign currency received in payment for exports of goods (work,
services) is credited to accounts at authorized banks within the time period stipulated by the terms of the contract. The repatriation requirement is considered to have been met in full or in part if

1. proceeds in domestic and/or foreign currency are credited to a resident’s accounts at foreign banks in fulfillment of the resident’s liabilities under the terms of a financial loan from a nonresident or for the use of the resident’s overseas branches (representative offices);
2. foreign currency received by residents from holding exhibitions or sporting, cultural, and other similar events outside Kazakhstan is used to cover expenses during the time that the events are underway;
3. foreign exchange earnings are posted to accounts at foreign banks held by resident transportation organizations for the purpose of covering expenses related to the payment of port and other fees in foreign states and the servicing of transportation equipment owned by such transportation organizations and their passengers while they are located outside the Republic of Kazakhstan, and expenses to support the operations of branch offices (representative offices) of such transportation organizations located outside the Republic of Kazakhstan;
4. a nonresident’s obligation is offset by a counterclaim under foreign exchange export or import contracts;
5. a nonresident’s obligation is met by replacing the original obligation between a resident and nonresident with a different obligation between the same parties that provides for a different object or means of fulfillment; or
6. an insurance payment is received when an insured event occurs, under insurance contracts covering the risk of default on obligations by a nonresident.

Transactions exceeding the equivalent of US$50,000 are subject to repatriation compliance monitoring.

Surrender requirements Yes. The Republic of Kazakhstan Government Resolution on the Surrender by Quasi-Public Sector Entities of a Portion of their Foreign Currency Proceeds in the domestic market was adopted. It requires the sale of 50% of the foreign currency export proceeds of the quasi-public sector entities in the domestic market. The resolution’s validity was extended until January 1, 2022. This measure is temporary in nature and applies only to legal entities in which the government’s stake exceeds 50%.

Surrender to the central bank No.

Surrender to authorized dealers Yes.

Financing requirements No.

Documentation requirements No. When making payments and/or money transfers under foreign exchange contracts in an amount greater than the equivalent of US$50,000, exporters must submit an original or copy of a foreign exchange agreement for export or import.

Letters of credit No.

Guarantees No.

Domiciliation No.

Preshipment inspection No.

Other No. Deferrals of export payments and advance export payments are no longer classified as commercial credits.
Export licenses: Yes.

EAEU member states apply uniform nontariff regulatory measures with respect to third countries. There is a Uniform List of Goods Subject to Nontariff Regulatory Measures in Trade with Third Countries, as established by EAEC Board Decision No. 134 of August 16, 2012, and No. 30 of April 21, 2015. In accordance with this list, imports and exports of goods into and from the customs territory of the EAEU require a license or authorizing document. Exports of ozone-depleting substances and products containing ozone-depleting substances and exports of hazardous waste are licensed by the Ministry of Energy. Exports of collectible mineralogy and paleontology materials and animal fossils are licensed by the Ministry of Education and Science. Exports of live wild animals, certain wild plants, and medicinal raw materials growing in the wild and of rare and endangered wild animal and wild plant species listed in the Red Book of the Republic of Kazakhstan, in accordance with Republic of Kazakhstan Government Resolution No. 1034 of October 31, 2006, are licensed by the Ministry of Agriculture. Exports of precious metals and raw materials containing precious metals, mineral raw materials, special technical devices intended for the secret acquisition of information, encryption (cryptographic) equipment, and information on mineral resources indicating areas and deposits of fuel and energy and mineral resources are licensed by the Ministry of Industry and Infrastructure Development.

Without quotas: Yes.

EAEU member states apply uniform nontariff regulatory measures with respect to third countries. There is a Uniform List of Goods Subject to Nontariff Regulatory Measures in Trade with Third Countries, approved by EAEC Board Decision No. 134 of August 16, 2012, and No. 30 of April 21, 2015. In accordance with this list, imports and exports of goods into and from the customs territory of the EAEU require a license or authorizing document.

With quotas: No.

Export taxes: Yes.

Collected through the exchange system: No.

Other export taxes: Yes.

Customs duties apply to exports of petroleum and petroleum products; scrap and waste of ferrous and nonferrous metals; ferrous metal products used for railway or streetcar tracks; aluminum and aluminum products; parts for railway locomotives, streetcars, and rolling stock; and skins and wool of domesticated animals.

Payments for Invisible Transactions and Current Transfers

Controls on these transfers: Yes.

Article 9 of the Law on Currency Regulation and Currency Control of March 30, 2019, requires a record number for contracts involving the export/import of work (services). When making payments and/or money transfers, residents of Kazakhstan must submit an original or copy of a foreign exchange agreement for exports or imports or other supporting documentation.

Trade-related payments: Yes.

Prior approval: No.

Quantitative limits: No.

Indicative limits/bona fide test: Yes.

Supporting documentation is required if the amount of a foreign exchange contract for exports or imports is greater than the equivalent of US$50,000.

**Capital Transactions**

As of July 1, 2019, a unified procedure for registration of agreements on the movement of capital and accounts with foreign banks is in effect. When making payments and (or) transfers of money under an agreement requiring a registration number, or using an account in a foreign bank with a registration number, the authorized bank (or its branch) verifies the registration number.

The registration procedure does not constitute a permitting process. A resident party to a foreign exchange agreement applies to the NBK for a registration number before commencement of fulfillment of obligations under the foreign exchange agreement by either of its parties.

Authorized banks must submit to the NBK a report on all foreign exchange transactions, including on behalf of clients, equal to or exceeding US$50,000 indicating the account number, if any.

The repatriation requirement is applicable only to foreign trade activity of residents (exports and imports of goods, works, and services), not to capital transactions.

There is a single procedure for the registration of contracts on the movement of capital and settlements at foreign banks. When a payment is made and/or money is transferred under a contract requiring an account number—or when an account at a foreign bank to which an account number has been assigned is used—an authorized bank (or its branch) checks for the presence of an account number and for details of the foreign exchange contract in the payment document.

The registration requirement applies to agreements on the movement of capital, the parties to which are residents (other than authorized banks and branches (representative offices) of foreign organizations).

The resident party to an agreement asks the NBK to assign an account number before obligations under the contract are fulfilled by any of the parties. The registration procedure does not constitute a permitting process.

Authorized banks must present to the NBK a report on all foreign exchange operations, including those on behalf of customers, that are equal to or exceed the equivalent of US$50,000, indicating the account number, if any.

**Purchase locally by nonresidents**

Yes. As of July 1, 2019, for statistical purposes, residents (except authorized banks and branches (representative offices) of foreign organizations) must apply to the NBK for registration of agreements on the sale of equity securities exceeding US$500,000 or equivalent issued by residents or nonresidents to nonresidents before obligations under the contract may be fulfilled by any of the parties.

Authorized banks must present to the NBK a report on all foreign exchange operations, including on behalf of customers, equal to or exceeding the equivalent of US$50,000, indicating the account number, if any.

**Sale or issue locally by nonresidents**

Yes. Issuance of securities locally by nonresidents must be registered with the Agency for the Regulation and Development of the Financial Market for trade in the organized securities market.

The state registration of corporate issue-grade securities issues is performed by the authorized body as part of state regulation, oversight, and supervision of the activities of entities operating in the market for securities and other financial instruments.

As of July 1, 2019, for statistical purposes, residents (with the exception of authorized banks and branches (representative offices) of foreign organizations) must apply to the NBK for registration of agreements on the acquisition of equity securities exceeding US$500,000 or equivalent from nonresidents issued by residents or nonresidents before obligations under the contract are fulfilled by any of the parties.

Authorized banks must present to the NBK a report on all foreign exchange operations, including on behalf of customers, equal to or exceeding the equivalent of US$50,000, indicating the account number, if any.

**Purchase abroad by residents**

Yes. As of July 1, 2019, for statistical purposes, residents (with the exception of authorized banks and branches (representative offices) of foreign organizations) must apply to the NBK for registration of agreements on the acquisition of equity securities exceeding US$500,000 or equivalent from nonresidents issued by residents or nonresidents before obligations under the contract are fulfilled by any of the parties.

If the agreement does not specify an amount, the contract is considered subject to registration.

Authorized banks must present to the NBK a report on all foreign exchange operations, including those on behalf of customers, equal to or exceeding the equivalent of US$50,000, indicating the account number, if any.

**Sale or issue abroad by residents**

Yes. As of July 1, 2019, for statistical purposes, residents (except authorized banks and branches (representative offices) of foreign organizations) must apply to the NBK for registration of agreements on the sale of equity securities exceeding US$500,000 or equivalent to nonresidents issued by residents or nonresidents before obligations under the contract are fulfilled by any of the parties.

If the contract does not specify an amount, it is considered subject to registration.

Authorized banks must present to the NBK a report on all foreign exchange operations, including on behalf of customers, equal to or exceeding the equivalent of US$50,000, indicating the account number, if any.

**Bonds or other debt securities**

Yes. **Purchase locally by nonresidents**

Yes. As of July 1, 2019, for statistical purposes, residents (except authorized banks and branches (representative offices) of foreign organizations) must apply to the NBK for registration of agreements on the sale of debt securities exceeding US$500,000 or equivalent to nonresidents issued by residents or nonresidents before obligations under the contract are fulfilled by any of the parties.

Authorized banks must present to the NBK a report on all foreign exchange operations, including those on behalf of customers, equal to or exceeding the equivalent of US$50,000, indicating the account number, if any.
nonresidents issued by residents before obligations under the contract are fulfilled by any of the parties.
If the agreement does not specify an amount, the agreement is considered subject to registration.
Authorized banks must present to the NBK a report on all foreign exchange operations, including those on behalf of customers, equal to or exceeding the equivalent of US$50,000, indicating the account number, if any.

Issuance of securities locally by nonresidents must be registered with the Agency for the Regulation and Development of the Financial Market for trade in the organized securities market.
The state registration of a bond issue (bond program) of a nonresident issuer is conditional on the following requirements:
(1) a minimum credit rating of at least B under the Standard & Poor’s international scale or an equivalent rating assigned by one of the other rating agencies;
(2) signature by a foreign supervisory body of the given legal entity’s country of origin of the Multilateral MoU Concerning Consultation and Cooperation and the Exchange of Information of the International Organization of Securities Commissions;
(3) meeting the requirements for the official listing of the debt securities of a nonresident issuer by a stock exchange and for trading on a stock exchange;
(4) permission from the relevant foreign supervisory body for the issuance of bonds in accordance with the legislation of the Republic of Kazakhstan or a letter stating that such permission is not required under the laws of the nonresident issuer’s country;
(5) compliance with prudential ratios and other standards and limits of the relevant supervisory body for the three months before application for state registration of the bond issue (bond program) is filed (if the nonresident issuer is a financial institution).
State registration of a nonresident issuer’s bond issue, in which the bonds are denominated in foreign currency, is performed, provided the prospectus for the nonresident issuer’s bonds has a mandatory provision that interest and principal will be paid in the currency in which the bonds are issued.
As of July 1, 2019, for statistical purposes, residents (except authorized banks and branches (representative offices) of foreign organizations) must apply to the NBK for registration of agreements on the purchase of debt securities exceeding US$500,000 or equivalent from nonresidents issued by nonresidents before obligations under the contract are fulfilled by any of the parties.
If the agreement does not specify an amount, the contract is considered subject to registration.
Authorized banks must present to the NBK a report on all foreign exchange operations, including on behalf of customers, equal to or exceeding US$50,000 or equivalent, indicating the account number, if any.
The state registration of corporate issue-grade securities issues is performed by the authorized body as part of the state regulation, oversight, and supervision of the activities of entities operating in the market for securities and other financial instruments. A resident organization of the Republic of Kazakhstan has the right to perform the issue and/or placement of issue-grade securities within the territory of a foreign state only with the relevant permission from the authorized body.

When shares are placed by a resident organization of the Republic of Kazakhstan, the following conditions must be met:

1. The issue-grade securities of one or more issues of issue-grade securities previously issued by the given resident organization of the Republic of Kazakhstan are listed on a stock exchange within the territory of the Republic of Kazakhstan.
2. In the placement of shares of a resident organization of the Republic of Kazakhstan, or depository receipts, the shares or depository receipts must be included in stock exchange listing categories or consent must be obtained from a stock exchange for their inclusion in stock exchange listing categories established by a regulatory legal act of the authorized body.
3. A decision by the authorized body of the issuer of the shares must contain a condition that at least 20% of the total number of shares must be offered for purchase through the organized securities market of the Republic of Kazakhstan.

As of July 1, 2019, for statistical purposes, residents (except authorized banks and branches (representative offices) of foreign organizations) must apply to the NBK for registration of agreements on the sale of debt securities exceeding US$500,000 or equivalent to nonresidents issued by residents before obligations under the contract are fulfilled by any of the parties. If the agreement does not specify an amount, the contract is considered subject to registration.

Authorized banks must present to the NBK a report on all foreign exchange operations, including on behalf of customers, equal to or greater than the equivalent of US$50,000, indicating the account number, if any.

As of July 1, 2019, for statistical purposes, residents (with the exception of authorized banks and branches (representative offices) of foreign organizations) must apply to the NBK for registration of agreements on the sale of money market instruments exceeding US$500,000 or equivalent to nonresidents issued by residents before obligations under the contract are fulfilled by any of the parties. If the agreement does not specify an amount, the contract is considered subject to registration.

Authorized banks must present to the NBK a report on all foreign exchange operations, including on behalf of customers, equal to or exceeding the equivalent of US$50,000, indicating the account number, if any.

Issuance of securities locally by nonresidents must be registered with the Agency for the Regulation and Development of the Financial Market for trade in the organized securities market.

As of July 1, 2019, for statistical purposes, residents (except authorized banks and branches (representative offices) of foreign organizations) must apply to the NBK for registration of agreements on the purchase of money market instruments exceeding US$500,000 or equivalent from nonresidents issued by nonresidents before obligations under the contract are fulfilled by any of the parties. equivalent before obligations under the contract are fulfilled by any of the parties. If the agreement does not specify an amount, the contract is considered subject to registration.

Authorized banks must present to the NBK a report on all foreign exchange operations, including on behalf of customers, equal to or exceeding the equivalent of US$50,000, indicating the account number, if any.

Sale or issue abroad by residents Yes.

A resident organization of the Republic of Kazakhstan may issue and/or place derivative securities whose underlying asset is shares of the given resident organization, with permission from the authorized body.

A decision by an authorized body of an issuer of shares that is a resident organization of the Republic of Kazakhstan, or by the relevant shareholder selling the shares of the given issuer that is performing the initial placement of derivative securities, must contain a condition that at least 20% of the total number of the given shares must be offered for purchase through the organized securities market of the Republic of Kazakhstan.

As of July 1, 2019, for statistical purposes, residents (except authorized banks and branches (representative offices) of foreign organizations) must apply to the NBK for registration of transactions with derivatives if the amount of the agreement exceeds US$500,000 or equivalent before obligations under the contract are fulfilled by any of the parties. If the agreement does not specify an amount, the contract is considered subject to registration.

Authorized banks must present to the NBK a report on all foreign exchange operations, including on behalf of customers, equal to or exceeding the equivalent of US$50,000, indicating the account number, if any.

Controls on credit operations Yes.

Commercial credits No.

By residents to nonresidents No. The registration requirements for capital flow agreements do not apply to commercial loans.

To residents from nonresidents No. The registration requirements for capital flow agreements do not apply to commercial loans.

Financial credits Yes.

By residents to nonresidents Yes. As of July 1, 2019, for statistical purposes, residents (with the exception of authorized banks and branches (representative offices) of foreign organizations) must apply to the NBK for the registration of financial credits (financial loans) exceeding US$500,000 or equivalent extended by residents to nonresidents, regardless of the term, before obligations under the contract are fulfilled by any of the parties.

In cases where an amount is not specified, the agreement is considered subject to registration.

Authorized banks must present to the NBK a report on all foreign exchange operations, including on behalf of customers, equal to or exceeding the equivalent of US$50,000, indicating the account number, if any.

To residents from nonresidents Yes. As of July 1, 2019, for statistical purposes, residents (except authorized banks and branches (representative offices) of foreign organizations) must apply to the NBK for the registration of financial credits (financial loans) in amounts exceeding US$500,000 or equivalent, extended by nonresidents to residents, before obligations under the contract are fulfilled by any of the parties.

If the agreement does not specify an amount, the contract is
considered subject to registration. Authorized banks must present to the NBK a report on all foreign exchange operations, including on behalf of customers, equal to or exceeding the equivalent of US$50,000, indicating the account number, if any.

Before and after July 1, 2019, resident banks have been required to submit reports on loans from nonresidents with a term of more than 180 days in amounts exceeding US$500,000 or equivalent.

Guarantees, sureties, and financial backup facilities

- By residents to nonresidents: No.
- To residents from nonresidents: No.

Controls on direct investment

Outward direct investment: Yes.

As of July 1, 2019, for statistical purposes, direct investments of residents (except authorized banks and branches (representative offices) of foreign organizations) abroad exceeding US$500,000 must be registered with the NBK before obligations under the contract are fulfilled by any of the parties.

If the agreement does not specify an amount, the contract is considered subject to registration.

Authorized banks must present to the NBK a report on all foreign exchange operations, including on behalf of customers, equal to or exceeding the equivalent of US$50,000, indicating the registration number, if any.

Inward direct investment: Yes.

As of July 1, 2019, for statistical purposes, direct investments of nonresidents (except authorized banks and branches (representative offices) of foreign organizations) exceeding US$500,000 are subject to registration with the NBK before obligations under the contract are fulfilled by any of the parties.

If the agreement does not specify an amount, the contract is considered subject to registration.

Authorized banks must present to the NBK a report on all foreign exchange operations, including on behalf of customers, equal to or exceeding the equivalent of US$50,000, indicating the registration number, if any.

No restrictions have been introduced with regard to the COVID-19 pandemic.

Controls on liquidation of direct investment: No.

Controls on real estate transactions: Yes.

Purchase abroad by residents: Yes.

There are no restrictions on the purchase of real estate outside the country by residents.

As of July 1, 2019, for statistical purposes, resident legal entities (with the exception of authorized banks and branches (representative offices)) must apply to the NBK to register transactions, with residents and nonresidents in amounts exceeding US$500,000 that provide for the acquisition by residents of ownership of real estate abroad, before obligations under the contract are fulfilled by any of the parties.

If the agreement does not specify an amount, the contract is considered subject to registration.

Purchase locally by nonresidents: Yes.

There are no restrictions on the purchase of real estate by nonresidents in the domestic real estate market.

As of July 1, 2019, for statistical purposes, resident legal entities (except authorized banks and branches (representative offices)) must...
apply to the NBK to register transactions with nonresidents, in amounts exceeding US$500,000 that provide for the acquisition by nonresidents of real estate in the Republic of Kazakhstan before obligations under the contract are fulfilled by any of the parties. If the agreement does not specify an amount, the contract is considered subject to registration.

**Sale locally by nonresidents**  Yes.

There are no restrictions on transactions by nonresidents in the domestic real estate market. As of July 1, 2019, for statistical purposes, resident legal entities (except authorized banks and branches (representative offices)) must apply to the NBK to register transactions with nonresidents, in amounts exceeding US$500,000 that provide for the sale by nonresidents of real estate in the Republic of Kazakhstan before obligations under the contract are fulfilled by any of the parties. If the agreement does not specify the amount of the agreement, the contract is considered subject to registration.

**Controls on personal capital transactions**  Yes.

**Loans**

**By residents to nonresidents**  Yes. For statistical purposes financial loans extended by residents (except of authorized banks and branches (representative offices)) to nonresidents in amounts exceeding US$500,000 or equivalent are subject to registration with the NBK, regardless of the terms, before obligations under the contract are fulfilled by any of the parties. If the agreement does not specify an amount, the contract is considered subject to registration.

**To residents from nonresidents**  Yes. As of July 1, 2019, a unified procedure for registration of agreements on the movement of capital and accounts with foreign banks is in effect. When making a payment and (or) transfer of money under an agreement for which it is necessary to obtain a registration number, or using an account in a foreign bank that has been assigned a registration number, the authorized bank (or its branch) checks for the presence of the registration number, and in the payment document for details of the currency agreement. The registration procedure does not constitute a permitting process.

For statistical purposes financial loans extended by nonresidents (except authorized banks and branches (representative offices)) to residents in amounts exceeding US$500,000 are subject to registration with the NBK before obligations under the contract are fulfilled by any of the parties. If the agreement does not specify an amount, the contract is considered subject to registration.

**Gifts, endowments, inheritances, and legacies**

**By residents to nonresidents**  Yes. As of July 1, 2019, for statistical purposes, residents (except authorized banks and branches (representative offices)) must apply to the NBK for the registration of transactions on compensation-free transfers of money and other currency from residents to nonresidents in amounts exceeding US$500,000 or equivalent before obligations under the contract are fulfilled by any of the parties. If the agreement does not specify an amount, the contract is considered subject to registration.

**To residents from nonresidents**  Yes. As of July 1, 2019, for statistical purposes, residents (except authorized banks and branches (representative offices)) must apply to the NBK for the registration of transactions on compensation-free transfers of money and other currency from nonresidents to residents in amounts exceeding US$500,000 or equivalent before obligations under the contract are fulfilled by any of the parties.
If the contract does not specify an amount, the contract is considered subject to registration.

### Provisions Specific to the Financial Sector

**Provisions specific to commercial banks and other credit institutions**

| Borrowing abroad | Yes. |

Banks must comply with the following ratio of liabilities to nonresidents to equity capital: The ratio of total short-term liabilities to nonresidents to the bank’s equity capital (coefficient k-7) may not exceed 1. Obligations to nonresidents include (1) demand liabilities to nonresidents, including liabilities for which no settlement period has been set; (2) term liabilities to nonresidents with initial maturity up to one year inclusive; and (3) term obligations to nonresidents with the unconditional right of the creditor to demand early repayment, including term and conditional deposits of banks, except term and conditional deposits of individuals and legal entities.

| Maintenance of accounts abroad | No. |
| Lending to nonresidents (financial or commercial credits) | No. |
| Lending locally in foreign exchange | Yes. |

Mortgage loans not related to entrepreneurial activity in foreign currency are prohibited to individuals who do not have income in this currency for six consecutive months preceding the date of the application.

| Purchase of locally issued securities denominated in foreign exchange | Yes. |

The securities banks may purchase are specified in paragraph 8 of Article 8 of the Law on Banks and Banking. Specifically, there is a requirement that banks be allowed to perform transactions with debt securities with a minimum required rating. The rating for bonds of foreign issuers and issuers of the Republic of Kazakhstan must be at least B (based on the classification of the Standard & Poor’s and/or Fitch rating agencies) or at least B2 (based on the Moody’s Investors Service classification). The rating for foreign government bonds must be at least BBB– (based on the Standard & Poor’s and/or Fitch classification) or at least Baa3 (based on the Moody’s Investors Service classification). There are no restrictions regarding the currency in which a debt security is issued.

| Differential treatment of deposit accounts in foreign exchange | Yes. |
| Reserve requirements | Yes. |

Foreign exchange deposits are included in the liability base for banks’ minimum reserve requirements (MRRs). For the purpose of calculating MRRs, liabilities in domestic and foreign currencies are differentiated according to maturity (short term and long term). The ratios for liabilities in foreign currency are 3% for short-term and 1% for long-term liabilities; in tenge, they are 2% for short-term and 0% for long-term liabilities.

| Liquid asset requirements | Yes. |

For monitoring liquidity of commercial banks, the relevant agency sets limits (minimum values) for coefficients of banks’ current, quick, and quick foreign exchange liquidity. The liquidity coefficients are calculated as the ratio of the average monthly amount
of a bank’s assets to its average monthly liabilities, taking into account accrued fees, types of assets and liabilities, and other factors. The limit for the current liquidity ratio (k-4), calculated as the ratio of a bank’s average monthly highly liquid assets to its average monthly demand liabilities, including accrued fees, is 0.3. The quick liquidity ratio k4-1, calculated as the ratio of a bank’s average monthly highly liquid assets to average monthly term liabilities with remaining maturity up to and including seven days, may not be less than 1. Limits are set at 0.9 and 0.8, respectively, for quick liquidity ratios k4-2 and k4-3, which are calculated as the ratio of a bank’s average monthly liquid assets to average monthly demand liabilities, including accrued fees.

The foreign exchange liquidity ratio k4-4, calculated as the ratio of average monthly highly liquid foreign currency assets to average monthly term liabilities in the same foreign currency with remaining maturity up to and including seven days, may not be less than 1. When calculating the foreign exchange liquidity ratio k4-4, a bank’s term liabilities with a remaining maturity up to seven days, multiplied by a conversion coefficient equal to 100%, are included in the amount of liabilities in foreign currency with a remaining maturity up to seven days.

Accordingly, there are limits of 0.9 and 0.8 for foreign exchange liquidity ratios k4-5 and k4-6, which are calculated similarly for term liabilities with maturities up to one month and three months. When calculating the foreign exchange liquidity ratio k4-5, a bank’s term liabilities with a remaining maturity up to one month, multiplied by a conversion coefficient equal to 90%, are included in the amount of liabilities in foreign currency with a remaining maturity up to one month; when calculating the foreign exchange liquidity ratio k4-6, a bank’s term liabilities with a remaining maturity up to three months, multiplied by a conversion coefficient equal to 80%, are included in the amount of liabilities in foreign currency with a remaining maturity up to three months.

**Interest rate controls**

No. The Kazakhstan Deposit Guarantee Fund (KDGF) determines the amount and procedure for the payment of banks’ contributions, which are calculated through a methodology developed by the KDGF, taking into account the compliance of interest rates on new personal deposits with those recommended by the KDGF for deposits in foreign currency and deposits in domestic currency.

**Credit controls**

No.

**Differential treatment of deposit accounts held by nonresidents**

No.

**Reserve requirements**

No. Deposits in foreign currency are included in the liability base for which banks must comply with MRRs. For the purpose of calculating the MRRs, liabilities in domestic and foreign currencies are differentiated according to the principle of maturity (short term and long term).

The ratios for liabilities in foreign currency are 3% for short-term liabilities and 1% for long-term liabilities, while the ratios for liabilities in domestic currency are 2% for short-term liabilities and 0% for long-term liabilities.

**Liquid asset requirements**

No. The calculation of liquid assets includes all financial assets, including highly liquid assets, minus (1) specially formed provisions and (2) claims on nonresidents that are legal entities registered abroad or their citizens or legal entities registered in countries on the list of countries that have not accepted OECD information exchange obligations or their citizens or organizations that are subsidiaries of...
legal entities registered in the aforementioned countries. Loans are included on the redemption schedule in accordance with loan agreements.

The following securities, which are not included in the calculation of highly liquid assets, are included in the calculation of liquid assets, provided the given securities are serving as collateral for liabilities that are included in the calculation of liabilities: (1) government securities of the Republic of Kazakhstan issued by the government and the NBK; (2) securities issued by the Samruk-Kazyna National Welfare Fund and the Baiterek Management Holding Company Joint-Stock companies; (3) government securities of countries with a sovereign debt rating in foreign currency no lower than the level established by the NBK; and (4) bonds of foreign issuers with a minimum required rating assigned by one of the rating agencies and conforming to the requirements of the agency. When calculating liquid assets, the time remaining to maturity for securities is considered to be the time remaining to maturity for the liabilities for which the given securities are serving as collateral.

There is no difference in the liquid asset requirement for deposits of liabilities to nonresidents and residents.

Interest rate controls No. The KDGF determines the amount and procedure for the payment of banks' contributions, which are calculated through a methodology developed by the KDGF, taking into account the compliance of interest rates on new personal deposits with those recommended by the KDGF for deposits in foreign currency and deposits in domestic currency.

Credit controls No.

Investment regulations Yes.

Abroad by banks Yes. Investments of resident banks abroad are restricted by limits on the placement of equity and borrowed funds in domestic assets. For commercial banks (with the exception of banks founded by the Republic of Kazakhstan Government), average monthly internal assets must be equal to at least the average monthly amount of equity capital, subordinated debt, perpetual financial instruments, debt securities issued by the bank—except securities issued by the bank in foreign currency—and internal liabilities. In addition to the average monthly indicator, banks must adhere to a daily limit, which is equal to 95% of internal assets for each day based on the average monthly volume of internal liabilities for the previous month. Relevant credit risk weights are established for banks' assets placed with nonresident institutions when calculating capital adequacy coefficients (k1, k1-2, and k-2), which are calculated as follows: k1 is calculated as the ratio of core capital to the sum of assets and contingent liabilities, weighted by the degree of credit risk, and assets and contingent claims and liabilities calculated taking into account market risk and operational risk. The minimum level is 0.055.

k1-2 is calculated as the ratio of Tier 1 capital to the sum of assets and contingent liabilities, weighted by the degree of credit risk, and assets and contingent claims and liabilities calculated taking into account market risk and operational risk. The minimum level is 0.065.

k-2 is calculated as the ratio of equity capital to assets and contingent liabilities, weighted by the degree of credit risk, and assets and contingent claims and liabilities calculated taking into account market risk and operational risk. The minimum level is 0.08.

In banks by nonresidents Yes. A nonresident bank from WTO member countries may apply to the authorized body to obtain permission to open a branch in the
Republic of Kazakhstan if certain conditions are met. Previously, opening of branches of nonresident banks were not permitted. The conditions include the following:

1. The total assets of the nonresident bank must not be less than the equivalent of US$20 billion.

2. The nonresident bank’s country of residence cooperates internationally in preventing and combating the legalization (laundering) of criminal proceeds and the financing of terrorism and cooperates with the Financial Action Task Force (FATF) on Money Laundering.

3. There is an agreement between the authorized body and the financial supervision body of the nonresident bank’s home country.

4. There is written notification from the financial supervisory authority of the nonresident bank’s home country stating that it does not object to the opening of a branch in the Republic of Kazakhstan, or a statement from that country’s financial supervisory authority that permission is not required.

5. There is written confirmation from the financial supervisory authority of the nonresident bank’s home country that it is licensed to carry out banking activities.

The founders and shareholders of the bank may be legal entities and individuals, residents, and nonresidents of the Republic of Kazakhstan.

Legal entities registered in offshore zones listed by the authorized body may not directly or indirectly own and (or) use and (or) dispose of voting shares of banks resident in the Republic of Kazakhstan.

A nonresident legal entity may obtain approval from the Agency of the Republic of Kazakhstan for Regulation and Development of the Financial Market to be a bank holding company or major stakeholder in a bank if it has the minimum required rating from one of the major rating agencies. A nonresident bank with the required rating may be a parent bank of a subsidiary bank. A list of the major rating agencies and the minimum required rating are established by the Agency of the Republic of Kazakhstan for Regulation and Development of the Financial Market. Legal entities registered in offshore zones, or with affiliates registered in offshore zones, and participants in (founders or shareholders of) legal entities registered in offshore zones, listed by the authorized agency, may not directly or indirectly hold, use, and/or determine the disposition of voting shares in resident banks. This restriction does not apply to banks that are subsidiaries of nonresident banks with a minimum required rating from one of the rating agencies.

A minimum long-term credit rating in foreign currency of at least BBB on the Standard & Poor’s international scale or equivalent ratings assigned by another established rating agency is established for the following nonresident legal entities:

- legal entities that are acquiring (or have) the status of a bank holding company or holding company;
- legal entities that are acquiring (or have) the status of a major stakeholder in a bank;
- banks that are establishing (or that have) subsidiary banks in the Republic of Kazakhstan.

This requirement does not apply to

1. nonresident legal entities that meet all of the following conditions:

   a) It has a minimum long-term credit rating in foreign currency of at least BB– on the Standard & Poor’s international scale or equivalent ratings assigned by another established rating agency.
   b) It is a resident of a foreign country with a minimum sovereign rating in foreign currency of at least BB– according to Standard &
Poor’s or equivalent ratings assigned by another established rating agency.
(c) There is an information-sharing agreement between the authorized body for the regulation, oversight, and supervision of the financial market and financial institutions and the authorized body for banking regulation of the legal entity’s home country.
(2) Nonresident bank holding companies that acquired the relevant status before January 1, 2013, and that meet the following requirements as of the date indicated:
(a) It has a long-term credit rating in foreign currency of at least AAA on the national scale of the Japanese Credit Rating Agency or an affiliate rating agency.
(b) Its home country has a sovereign rating in foreign currency of at least BB – according to Standard & Poor’s or equivalent ratings from another established rating agency.
(c) There is an information-sharing agreement between the Republic of Kazakhstan authorized body for the regulation, oversight, and supervision of the financial market and financial institutions and the authorized body for banking regulation of the bank holding company’s home country.
A nonresident founder of a bank must have written notification from the authorized agency (for banks not located in the Republic of Kazakhstan, the banking supervision agency) of the relevant country indicating that the person may hold shares in a bank in the Republic of Kazakhstan, or must have a statement from the authorized agency (for nonresident banks, the banking supervision body) of the relevant country indicating that such permission is not required.
A nonresident bank holding company that directly holds 25% or more of the bank’s placed shares (excluding preferred shares and those repurchased by the bank) or that is able to directly cast votes based on 25% or more of the bank’s voting shares may only be a nonresident financial institution that is subject to consolidated supervision in its home country.

Open foreign exchange position limits Yes.

On resident assets and liabilities Yes. The open foreign exchange position is calculated separately for each foreign currency and for each refined precious metal.
The following limits apply: (1) The limit on the open foreign exchange position (long and short) for euros and currencies of countries whose sovereign rating is not below A from Standard & Poor’s or an equivalent rating by one of the other rating agencies, and for bank metals, is not more than 12.5% of the bank’s own capital. (2) The limit on the open foreign exchange position (long and short) for currencies of countries whose sovereign rating is below A from Standard & Poor’s or an equivalent rating by one of the other rating agencies is 5% of the bank’s own capital. (3) The limit for the overall net foreign exchange position is not more than 25% of the bank’s own capital. (4) A bank’s open long and/or short foreign exchange position for derivatives in the currency of an individual foreign state (or group of foreign states) opened on contingent claim accounts and contingent liability accounts may not exceed 50% of the bank’s own capital.
The same open foreign exchange position limits apply to resident and nonresident assets and liabilities.

On nonresident assets and liabilities Yes. The open foreign exchange position is calculated separately for each foreign currency and for each refined precious metal.
The following limits apply: (1) The limit on the open foreign exchange position (long and short) for euros and currencies of countries whose sovereign rating is not below A from Standard & Poor’s or an equivalent rating by one of the other rating agencies,
and for bank metals, is not more than 12.5% of the bank’s own capital. (2) The limit on the open foreign exchange position (long and short) for currencies of countries whose sovereign rating is below A from Standard & Poor’s or an equivalent rating by one of the other rating agencies is 5% of the bank’s own capital. (3) The limit for the overall net foreign exchange position is not more than 25% of the bank’s own capital. (4) A bank’s open long and/or short foreign exchange position for derivatives in the currency of an individual foreign state (or group of foreign states) opened on contingent claim accounts and contingent liability accounts may not exceed 50% of the bank’s own capital.

The same open foreign exchange position limits apply to resident and nonresident assets and liabilities.

**Provisions specific to institutional investors**

- **Insurance companies**: Yes.

  Nonresident insurance companies and brokers may not establish branches in Kazakhstan, with the exception of WTO members. Nonresident insurance companies and brokers from WTO member countries may open branches of an insurance (reinsurance) company and an insurance broker in the Republic of Kazakhstan within the framework of the Law of the Republic of Kazakhstan dated November 24, 2015, No. 422-V. Legal entities registered in offshore zones listed by the relevant agency may not directly or indirectly control, use, or dispose of the voting shares of resident insurance (reinsurance) companies. This restriction does not apply to insurance (reinsurance) companies that are subsidiaries of insurance (reinsurance) companies that are not residents of the Republic of Kazakhstan with a minimum required rating from one of the rating agencies. Only a nonresident financial institution under consolidated supervision in its home country may be a nonresident insurance holding company that directly controls 25% or more of the outstanding shares of an insurance (reinsurance) company (net of preferred shares and those repurchased by the insurance/reinsurance company) or with 25% or more of the voting shares.

**Limits (max.) on securities issued by nonresidents**

- **Yes.**

  An insurance (reinsurance) company may not acquire stakes in the authorized capital or shares of nonresident legal entities, with the exception of the acquisition of stakes or shares of nonresident legal entities that have the status of a bank, insurance (reinsurance) company, pension fund, or professional participant in the securities market, or shares of nonresident legal entities on a list established in accordance with a regulatory legal act of the authorized body. The acquisition by an insurance (reinsurance) company of stakes in the authorized capital or shares of legal entities must not exceed 10% of the insurance (reinsurance) company’s equity capital for each legal entity. This restriction applies to an insurance (reinsurance) company’s ownership of stakes in the authorized capital or shares of said legal entities, including cases in which they participate in the establishment of the legal entities. The aggregate value of an insurance (reinsurance) company’s stakes in the authorized capital of legal entities or shares must not exceed 50% of the insurance (reinsurance) company’s equity capital. Insurance (reinsurance) companies are prohibited from performing transactions with financial derivatives, with the exception of transactions performed for the purposes of hedging risks. Insurance (reinsurance) companies are permitted to acquire the following financial instruments issued by nonresidents of the Republic of Kazakhstan:
(1) shares of legal entities that are nonresidents of the Republic of Kazakhstan, with price quotes on the active market that are necessary for measuring fair value, and depository receipts for which these shares serve as underlying assets;
(2) shares of foreign issuers, included in the main stock indices, and depository receipts whose underlying asset is these shares:
CAC 40 (Compagnie des Agents de Change 40 Index); DAX (Deutscher Aktienindex); DJIA (Dow Jones Industrial Average); EURO STOXX 50 (EURO STOXX 50 Price Index); FTSE 100 (Financial Times Stock Exchange 100 Index); HSI (Hang Seng Index); MSCI World Index (Morgan Stanley Capital International World Index); MOEX Russia (Moscow Exchange Russia Index); NIKKEI 225 (Nikkei-225 Stock Average); S&P 500 (Standard and Poor’s 500 Index); TOPIX 100 (Tokyo Stock Price 100 Index); NASDAQ-100 (Nasdaq-100 Index);
(3) debt securities issued by the following international financial institutions (IFIs):
(4) government debt securities issued by the central governments of foreign countries that have a sovereign rating of at least B– on the international scale of Standard & Poor’s or an equivalent rating from another rating agency;
(5) nongovernment debt securities of foreign issuers with a rating of at least B– on the international scale of Standard & Poor’s or an equivalent rating from another rating agency;
(6) shares of exchange-traded funds (ETF), exchange-traded commodities (ETC), and exchange-traded notes (ETN) rated at least three stars by the Morningstar rating agency;
(7) Islamic finance instruments with a security and/or issuer rating not lower than B– according to the international scale of Standard & Poor’s or an equivalent rating from another rating agency.

An insurance (reinsurance) company must comply with the following standards for the diversification of its assets abroad:
(1) the total book value of investments in securities (including reverse repo transactions), deposits, and money in one second-tier bank with a long-term credit rating of at least BB– according to the international scale of Standard & Poor’s or an equivalent rating from another rating agency, or a subsidiary bank resident of the Republic of Kazakhstan, parent bank nonresident of the Republic of Kazakhstan with a long-term credit rating in foreign currency not lower than A– by Standard & Poor’s or an equivalent rating from another rating agency, and affiliates of this bank—no more than 20% of the assets calculated in accordance with paragraph 34 of the regulations;
(2) the total book value of investments in securities (including reverse repo transactions) having the status of government securities issued by the central government of a foreign country—no more than 10% of the assets calculated in accordance with paragraph 34 of the regulations;
(3) the total book value of investments in securities (including
reverse repo transactions) of an international financial organization on the list established by paragraph 39 of the regulations—no more than 10% of the assets calculated in accordance with paragraph 34 of the regulations;
(4) the total book value of investments in shares that meet the requirements of subparagraphs (23) and (24) of paragraph 38 of the regulations, minus impairment allowance—no more than 10% of the assets calculated in accordance with paragraph 34 of the regulations.

| Limits (min.) on investment portfolio held locally | No. |
| Limits (max.) on securities issued by nonresidents | Yes. |

The only organization permitted to attract mandatory pension contributions, mandatory professional pension contributions, and voluntary pension contributions operating in Kazakhstan is the UAPF Joint-Stock Company.

In accordance with Article 35 of the Law of the Republic of Kazakhstan “On Pension Provision in the Republic of Kazakhstan,” the NBK is one of the trustees of the UAPF’s pension assets. The pension assets of the UAPF managed by the NBK are invested in instruments determined by the Council for the Management of the National Fund of the Republic of Kazakhstan.

The NBK invests the UAPF’s pension assets in accordance with the list of financial instruments approved by the Decree of the Government of the Republic of Kazakhstan, as well as the requirements and restrictions of the UAPF Investment Declarerion, which was approved by the Decree of the NBK Board and drawn up taking into account this list.

With regard to investments in securities issued by nonresidents, the following provisions apply to the UAPF.

Foreign issuers—not more than 50% of pension assets, including
(1) government and agency securities and securities of IFIs—no more than 30%;
(2) municipal securities within the framework of investment in government and agency securities—no more than 10% of pension assets;
(3) corporate debt securities with a rating of the security and/or the issuer not lower than BB–, no more than 20% of pension assets;
(4) mortgage-backed securities (MBS) and asset-backed securities (ABS) with a rating of the security and/or issuer not lower than BBB–, no more than 10% of pension assets;
(5) convertible securities within the framework of investment in corporate securities with a rating of the security and/or the issuer not lower than BB–, no more than 10% of pension assets;
(6) shares, depository receipts—no more than 20% of pension assets;
(7) deposits in foreign banks with a rating of at least A–, no more than 20% of pension assets;
(8) structured products issued by organizations with a rating of at least BBB–, no more than 5% of pension assets;
(9) Islamic financing instruments with a rating of at least BB–, no more than 2% of pension assets.

The share of debt securities of one issue of a nonresident issuer of the Republic of Kazakhstan should not exceed 25% of the total volume of this issue with a rating of at least BBB– and 10% of the total volume of this issue with a rating of at least BB–.

The share of debt securities of one issue of a nonresident IFI issuer should not exceed the following values:
(1) 50% for IFIs with a rating AAA;
(2) 25% for IFIs with a rating from AA+ to BBB–;

| Crawl-like arrangement                      | Yes.             |

The de jure exchange rate arrangement is free floating. Kenya pursues a floating exchange rate regime where the value of the Kenya shilling is determined by forces of demand and supply in the foreign exchange market. Intervention in the foreign exchange market by the Central Bank of Kenya (CBK) is only to moderate volatility and is meant to facilitate smooth functioning of the foreign exchange market. The CBK has no preferable path for the exchange rate and therefore CBK does not aim at influencing movements in the exchange rate. Foreign exchange market interventions therefore serve only to prevent undue fluctuations in the exchange rate.
From December 2020, the exchange rate increased its flexibility, and then followed a depreciating trend within a 2% band against the US dollar since May 2021. Accordingly, the de facto exchange rate arrangement was reclassified twice: (1) retroactively to floating from other managed, effective December 23, 2020, and (2) to crawl-like from floating, effective May 11, 2021.

| Band/Range | Yes. |

The inflation target is specified as a range. The inflation target in the FY2021/22 is 5.0% with a margin on either side of 2.5%.

| Target measure | Yes. |

| CPI | Yes. |

The inflation target is measured by the 12-month change in the CPI as published by the Kenya National Bureau of Statistics.
Core inflation: No.

Target horizon: No.

Operating target (policy rate): No.

Policy rate: No.

Target corridor band: No.

Other: No.

Accountability: Yes.

Open letter: Yes. The CBK is required to send a letter to the Cabinet Secretary when the inflation rate published by the Kenya National Bureau of Statistics breaches the target range.

Parliamentary hearings: No. The MPC is required to send the Bi-Annual Monetary Policy Report to the Cabinet Secretary and National Assembly every 6 months. The Report is published publicly by the CBK. The MPC also sends the Monetary Policy Statement every 6 months, which is also published by the CBK.

Other: Yes. The Cabinet Secretary for the National Treasury receives two reports from the MPC every 6 months.

Transparency: No.

Publication of votes: No.

Publication of minutes: No. The CBK does not publish the minutes of the MPC meetings but publishes a press release, and holds press, banking sector and private sector briefings after every MPC meeting.

Publication of inflation forecasts: No.

Other monetary framework

Exchange tax: No.

Exchange subsidy: No.

Foreign exchange market: Yes. Authorized commercial and microfinance banks are licensed to buy, sell, borrow, and lend in foreign currency and transact any other business involving foreign currency. Foreign exchange bureaus licensed by CBK are authorized to engage in the following:
- deal in spot foreign currency transactions involving cash and other instruments approved by CBK;
- conduct money transfers as agents of mobile phone companies and as sub-agents of international money transfer agencies subject to prior approval of CBK (such money transfer business should be conducted through a bank licensed by CBK);
- transact telegraphic transfers through a licensed bank in amounts not exceeding an equivalent of US$100,000 a customer a day subject to conditions that CBK may prescribe;
- sell and purchase foreign currency drafts; purchases should not exceed US$1,000 or its equivalent in any other currency;
- engage in any other business as may be approved by CBK.

Market participants set their bid-ask spreads and foreign exchange commissions freely. Money remittance providers are also authorized to effect money transfers within and outside Kenya.
As of June 30, 2022, there were 38 commercial banks, 14 microfinance banks, 69 foreign exchange bureaus, and 18 money remittance providers licensed by CBK to deal in foreign exchange.

Operated by the central bank No.

Foreign exchange standing facility No.

Allocation No.

Auction No.

Fixing No.

Interbank market Yes.

The interbank market is based on a market-making arrangement. Bid-ask spreads and foreign exchange commissions are set freely.

Over the counter Yes.

Commercial banks and foreign exchange bureaus deal in foreign exchange with their customers on an OTC basis.

Brokerage Yes.

ADs may carry out interbank transactions via approved brokers.

Market making Yes.

The interbank market is based on a market-making arrangement.

Forward exchange market Yes.

Commercial banks are permitted to transact forward foreign exchange with their customers at market-determined exchange rates.

Official cover of forward operations No.

Arrangements for Payments and Receipts

Prescription of currency requirements No.

Controls on the use of domestic currency No.

For current transactions and payments No.

For capital transactions No.

Transactions in capital and money market instruments No.

Transactions in derivatives and other instruments No.

Credit operations No.

Use of foreign exchange among residents No.

Payments arrangements Yes.

Bilateral payments arrangements No.

Operative No.

Inoperative No.

Regional arrangements Yes.

Kenya is currently a member of the following regional payments and clearing initiatives:
(1) The East African Payment System (EAPS) under the EAC regional integration initiative;
(2) Regional Payment and Settlement System under the COMESA Clearing House;
(3) The Payment System Integration Working Group (PSIWG) under the Association of African Central Banks.

Clearing agreements No.
Barter agreements and open accounts

No.

Administration of control

Yes. The CBK Act gives the CBK power to license and regulate foreign exchange dealers. With effect from August 2017, the Capital Markets Authority (CMA) has the mandate to license and regulate Non-dealing Online Foreign Exchange Brokers in Kenya for currencies other than the Kenyan shilling.

Payments arrears

No.

Official

No.

Private

No. Private sector external obligations are always paid with foreign exchange reserves held by commercial banks, over which the CBK has no control.

Controls on trade in gold (coins and/or bullion)

No.

On domestic ownership and/or trade

No.

On external trade

No.

Controls on exports and imports of banknotes

No. For Anti-Money Laundering and Combating the Financing of Terrorism (AML/CFT) and statistical purposes, people leaving or entering Kenya must declare amounts exceeding US$10,000 in foreign currency or the equivalent amount in domestic currency. This is in line with FATF recommendations.

On exports

No.

Domestic currency

No.

Foreign currency

No.

On imports

No.

Domestic currency

No.

Foreign currency

No.

Resident Accounts

Foreign exchange accounts permitted

Yes.

Held domestically

Yes. Residents and nonresidents may hold foreign exchange accounts domestically and may freely transfer funds abroad. Banks must document and report to the CBK the purpose of account inflows and outflows. This is in line with Know-Your-Customer (KYC) regulations.

Approval required

No.

Held abroad

Yes. Residents and nonresidents may hold foreign exchange accounts abroad and may freely transfer funds back to Kenya. Banks must document and report to the CBK the purpose of inflows and outflows. This is in line with KYC regulations.

Approval required

No.

Accounts in domestic currency held abroad

Yes. Kenyan residents may open domestic currency accounts abroad particularly in the East African region.

Accounts in domestic currency convertible into foreign currency

Yes. There are no limitations for residents to convert their balances in domestic currency accounts to foreign currency.

On capital market securities

Shares or other securities of a participating nature

Purchase locally by nonresidents

Yes.

Yes.

Yes.

East African investors are treated as local investors; domestic investors must hold 10% of the share capital of a listed company.

The caps to foreign investors’ shareholding of listed companies were removed in 2015 via amendments to the capital markets foreign investors’ regulations. This allowed foreign investors to hold up to 100% equity in any listed company. However, from a policy point of view, some companies were deemed strategic or of public interest; hence, another provision was added (in the same amended regulations) indicating that the Cabinet Secretary for the National Treasury could at his discretion prescribe limits on foreign caps as deemed fit and the conditions were provided.

More specifically, the Capital Markets (Foreign Investors) Regulations with 2015 Amendments stipulates that:

3(1) Any proportion of the voting shares of an issuer after an initial public offering shall be available for investment by foreign investors without any restrictions in the level of holdings except as provided under the Capital Markets (Takeovers and Mergers) Regulations, 2002.

(2) Notwithstanding Regulation 3(1), the Cabinet Secretary may by notice in the gazette, prescribe a maximum foreign shareholding in an issuer or listed company.

(3) The Cabinet Secretary may only exercise the power under Paragraph 3(2) where (a) in a privatization transaction, the government or its agency is divesting its shares to the public; (b) some level of local ownership in a strategic industry or sector in the country is to be maintained; or (c) it is in national interest.

Sale or issue locally by nonresidents

Yes. No controls apply to the sale of securities locally by nonresidents. However, local issuance of securities by nonresidents requires CMA approval in accordance with the Capital Markets Act.

Purchase abroad by residents

Yes. Pension funds may invest abroad up to 15% of the aggregate market value of their total assets or pooled funds.

Sale or issue abroad by residents

Yes. The sale or issuance of securities abroad by residents requires CMA approval.

Bonds or other debt securities

Yes. There are no restrictions on purchases and sales of securities by nonresidents. However, nonresidents must invest through nominee accounts.

Purchase locally by nonresidents

No.

Sale or issue locally by nonresidents

Yes. The regulations governing securities of a participating nature apply.

Purchase abroad by residents

Yes. Pension funds may invest abroad up to 15% of the aggregate market value of their total assets or pooled funds.

Sale or issue abroad by residents

Yes. The sale or issuance of securities abroad by residents requires CMA approval.

On money market instruments

Yes.

Purchase locally by nonresidents

No.

Sale or issue locally by nonresidents

Yes. No controls apply to sales, but money market instruments may not be issued without CBK approval.

Purchase abroad by residents

Yes. Pension funds may invest abroad up to 15% of the aggregate market value of their total assets or pooled funds.

Sale or issue abroad by residents

Yes. The sale or issuance of money market instruments abroad by
residents requires CBK approval.

Provisions Specific to the Financial Sector

- **Provisions specific to commercial banks and other credit institutions**: Yes.
- **Borrowing abroad**: No.
- **Maintenance of accounts abroad**: Yes.
  - Only banks may open correspondent relations accounts abroad. Foreign exchange bureaus are prohibited from opening accounts abroad. The opening and maintenance of foreign bank accounts by civil servants and State Officers is subject to approval by the Government through the Ethics and Anti-Corruption Commission (EACC).
- **Lending to nonresidents (financial or commercial credits)**: Yes.
  - Lending to nonresidents by banks and other credit institutions is allowed, subject to the applicable legal and regulatory framework in each financial sub-sector.
- **Lending locally in foreign exchange**: Yes.
  - Lending locally in foreign exchange is allowed, subject to prudential lending regulations.
- **Purchase of locally issued securities denominated in foreign exchange**: No.
- **Differential treatment of deposit accounts in foreign exchange**: No.
- **Reserve requirements**: No.
  - Banks are required to maintain a proportion of total deposit liabilities at CBK in cash reserve ratio (CRR). Currently, the CRR is 4.25% of the total of a bank’s domestic and foreign currency deposit liabilities, with banks required to maintain their CRR based on a daily average level from the 15th of the previous month to the 14th of the current month, and not to fall below a CRR of 3% on any day.
- **Liquid asset requirements**: No.
  - Under CBK’s prudential guidelines, commercial and microfinance banks are required to maintain a minimum 20% of all their deposit liabilities, matured and short-term liabilities in liquid assets.
- **Interest rate controls**: No.
- **Credit controls**: No.
- **Differential treatment of deposit accounts held by nonresidents**: No.
- **Reserve requirements**: No.
- **Liquid asset requirements**: No.

The exchange rate arrangement is an exchange arrangement with no separate legal tender. There is no central monetary institution, and the authorities do not buy or sell foreign exchange. The Australia and New Zealand (ANZ) Bank (Kiribati) Limited, the only commercial bank, quotes daily rates for 15 currencies on the basis of their respective rates against the Australian dollar.
Free floating

**Official exchange rate** No.

**Monetary policy framework**

**Changes during 2021 and 2022**

No significant changes occurred in the exchange and trade system.
KOREA
(Position as of October 31, 2022)

Status under IMF Articles of Agreement

Date of membership
August 26, 1955.

Article VIII
Yes. Date of acceptance: November 1, 1988.

Article XIV

Exchange Measures

Restrictions and/or multiple currency practices
No.

Exchange measures imposed for security reasons
Yes. No restrictions as reported in the latest IMF staff report as of December 31, 2021.

In accordance with IMF Executive Board Decision No. 144-(52/51)
Yes.

In accordance with UNSC resolutions, Korea maintains certain exchange restrictions against the following individuals and entities: certain individuals and entities associated with the Taliban, the Al-Qaida network, terrorists in general, and the former regime of Saddam Hussein; certain individuals and entities posing a threat to international peace and security in the Democratic Republic of the Congo, Côte d’Ivoire, and Sudan; certain individuals and entities threatening peace and security in Eritrea and Somalia; certain individuals and entities involved in Iranian nuclear and/or ballistic missile programs; certain individuals and entities involved in the Democratic People’s Republic of Korea’s nuclear, ballistic missile, or other weapons of mass destruction (WMD) and related programs; certain individuals and entities threatening peace and security in Liberia; certain individuals and entities associated with Muammar Qadhafi’s regime; and certain individuals and entities threatening peace and security in Central African Republic, Republic of South Sudan, and Yemen.

Korea maintains certain exchange restrictions against certain individuals named by the Guidance of the Ministry of Economy and Finance (MOEF).

Also, certain individuals and entities related to the Islamic Republic of Iran (Iranian residents or groups located in Iran) were eliminated from certain exchange restrictions list because of the MOEF revised notice.

Other security restrictions
No.

Exchange Arrangement

Currency
Yes. The currency of Korea is the Korean won.

Other legal tender
No.

Exchange rate structure

Unitary
Yes.

Dual

Multiple
The de jure exchange rate arrangement is free floating. The exchange rate of the won is freely determined on the basis of supply and demand in the foreign exchange market. As such, the system is managed in accordance with the principles defined by the free floating system, and the government’s role is very limited to remain within the range allowed by the free floating system. However, because of the lack of information on the authorities’ interventions, the de facto exchange rate arrangement is classified as floating. The Bank of Korea (BOK) may intervene in the market with the funds of the BOK and the Foreign Exchange Equalization Fund when it is deemed necessary for the stability of the market. Interventions in the spot market or through derivatives in the forward market are not announced, but quarterly aggregate intervention data in net terms are published, no later than three months after the end of the respective quarter.

**Official exchange rate**

No.

**Monetary policy framework**

Exchange rate anchor

- **U.S. dollar**
- **Euro**
- **Composite**
- **Other**

Monetary aggregate target

**Inflation-targeting framework**

Yes. Inflation targeting was officially adopted in accordance with the revised BOK Act, which came into effect April 1, 1998.

**Target setting body**

Yes.

- Government
- Central Bank
  - Monetary Policy Committee
  - Central Bank Board
The BOK sets the operational framework of the inflation targeting in consultation with the government (MOEF). The operational framework includes the numerical inflation target, the inflation target measure, and the target horizon.

The inflation target for 2019 onward has been set at 2%. The BOK will review the inflation targeting framework in consultation with the government every two years and explain the review to the public. If adjustment of the inflation target becomes inevitable, due for instance to unexpected domestic or global economic shocks or to changes in economic conditions, the BOK will adjust the target in consultation with the government.

The target measure is the monthly year-on-year (y-o-y) CPI inflation published by the Statistics Korea.

The BOK conducts monetary policy to maintain the annual rate of CPI inflation near the target over a midterm horizon.

The Monetary Policy Board of the BOK meets eight times a year to determine the base rate. As of June 30, 2022, the policy rate was 1.75%. On July 13, 2022, the policy rate was increased from 1.75% to 2.25%.

The BOK uses the base rate as a fixed bid rate for its sales of seven-day repurchase agreements and as the minimum bid rate for its purchases of seven-day repurchase agreements. The interest rates of liquidity adjustment deposits and loans are 100 basis points (bps) below and above the base rate, respectively. If the base rate falls below 1%, then the interest rate of liquidity adjustment loans is equal to two times the base rate, and the rate for liquidity adjustment deposit is 0%.

If there is a request from the national assembly, the governor will attend the meeting and answer questions.

The BOK publishes its “Monetary Policy Report” four times a year to explain how it is implementing the inflation target monetary policy. The BOK publishes twice a year an inflation assessment, which includes price developments, future inflation forecasts and risks, and the monetary policy stance for achieving price stability, and provides explanations of the assessment to the public through various means (or channels), such as by holding governor’s press conferences.
Transparency

Publication of votes
Yes. Right after a committee meeting, the governor holds a press conference to announce the policy decision. In the press conference, the governor also informs who were minor voters.

Publication of minutes
Yes. The committee meeting minutes are published on the first Tuesday falling after two weeks from the meeting by posting it in the website of the BOK. The names of committee members are concealed in the minutes.

Publication of inflation forecasts
Yes. The inflation forecast is published through a quarterly economic forecast (Economic Outlook) by the BOK with two-year horizon.

Other monetary framework

Exchange tax
No.

Exchange subsidy
No.

Foreign exchange market
Yes. The Korean foreign exchange market consists of OTC markets and exchanges. The OTC markets comprise a customer market in which foreign exchange banks deal with customers, including importers, exporters, travelers, and nonresidents, and an interbank market, in which foreign exchange banks deal among themselves. Standardized products are traded on the exchanges. Residents may buy and sell financial futures on internationally recognized futures exchanges or on the domestic exchange, the Korea Exchange. Commercial banks may set exchange rates and commissions freely in transactions with their clients.

Spot exchange market
Yes. Financial institutions trade foreign exchange either via brokers or directly among themselves. As of June 30, 2022, 63 institutions, including 50 foreign exchange banks, participated in the spot foreign exchange market through brokers. Financial institutions are required to register with the MOEF to deal in foreign exchange. Money exchangers, such as hotels, department stores, and travel agencies, need to register with Korea Customs Service. As of June 30, 2022, 2021, there were 1,497 money exchangers. They may not enter into foreign exchange transactions directly with the BOK and are limited to purchasing and selling banknotes denominated in foreign currency and purchasing traveler’s checks issued in a foreign country. Money exchangers can pay by domestic payment means to buy foreign currency or traveler’s check from residents or nonresidents. They are responsible for preparing exchange books, which contain exchange date, name of buyer (seller), personal information such as ID card number, exchange amount, applied exchange rate, and other transaction information and report the exchange books to Korea Customs Service. Spot foreign exchange transactions are allowed between security brokerages. The won–yuan spot foreign exchange market operates based on a market-making agreement with 11 designated market makers as of June 30, 2022, 2021.

Operated by the central bank
No.

Foreign exchange standing facility
No.

Allocation
No.

Auction
No.

Fixing
No.

Interbank market
Yes. Foreign exchange banks participate in the interbank market mainly to dispose of open foreign exchange positions arising from transactions.
with nonfinancial customers such as companies and nonresidents. There are no limits on the bid-ask spreads and commissions of market participants. Financial institutions participating in the interbank foreign exchange market have formed an autonomous committee, the Seoul Foreign Exchange Market Committee. Foreign exchange brokers, the BOK, and the government also participate in this committee. Nine institutions have been licensed as foreign exchange brokers, with licenses granted by the MOEF.

Over the counter: Yes. Financial institutions transact directly among themselves.

Brokerage: Yes. Most interbank transactions are handled through brokers who intervene between foreign exchange banks without holding a position. MOEF authorization is required to operate a foreign exchange brokerage business.

Market making: Yes. Eleven foreign exchange banks are designated as market makers in the won–yuan spot foreign exchange market.

Forward exchange market: Yes. Foreign exchange banks may freely carry out forward transactions between foreign currencies, as well as between won and foreign currencies in the interbank and customer markets. The limits on banks’ foreign exchange derivatives contracts were set at 50% of bank capital for domestic banks and 250% for foreign bank branches, to prepare for a sudden volatility in the foreign exchange swap market as part of the COVID-19 pandemic response effort and the measure is still valid.

Official cover of forward operations: No.

Arrangements for Payments and Receipts

Prescription of currency requirements: Yes. All settlements with other countries may be made in any currency. Nonresidents may carry out current transactions and limited capital transactions denominated in won.

Controls on the use of domestic currency: Yes.

For current transactions and payments: Yes. Nonresidents may effect won-denominated current transactions only through nonresident free won accounts.

For capital transactions: Yes. Nonresidents may effect limited capital transactions denominated in won only through nonresident free won accounts.

Transactions in capital and money market instruments: Yes.

Transactions in derivatives and other instruments: Yes.

Credit operations: No.

Use of foreign exchange among residents: No. Residents may conduct transactions denominated in foreign currency, provided the payments are made through foreign exchange banks.

Payments arrangements: No.

Bilateral payments arrangements: No.

Operative: No.

Inoperative: No.

Regional arrangements: No.

Clearing agreements: No.

Barter agreements and open accounts: No.
Administration of control

Yes. The MOEF may require authorization for residents and nonresidents to make payments from Korea to a foreign country or to nonresidents or receive payments from nonresidents, if these payments are necessary to fulfill obligations under treaties concluded by Korea and generally recognized international laws and regulations or when necessary for international peace and security.

Payments arrears

No.

Official

No.

Private

No.

Controls on trade in gold (coins and/or bullion)

No.

On domestic ownership and/or trade

No.

On external trade

No.

Controls on exports and imports of banknotes

No.

On exports

No.

Domestic currency

No. Exports of domestic banknotes in excess of the equivalent of US $10,000 by residents and nonresidents must be declared to customs.

Foreign currency

No. Exports of foreign banknotes in excess of the equivalent of US $10,000 by residents and nonresidents must be declared to customs. Nonresidents may in addition export the amounts they hand-carried into Korea or exchanged during their stay.

On imports

No.

Domestic currency

No. Residents and nonresidents must make a declaration to customs if the amount of domestic currency they bring into Korea exceeds the equivalent of US$10,000.

Foreign currency

No. Residents and nonresidents must make a declaration to customs if the amount of foreign currency they bring into Korea exceeds the equivalent of US$10,000.

Resident Accounts

Foreign exchange accounts permitted

Yes. All residents may hold foreign exchange accounts and transfer balances freely.

Held domestically

Yes.

Approval required

No.

Held abroad

Yes. Prior BOK notification is required for transfers abroad by individuals if the amount exceeds US$50,000 a person for each transfer. Balances in the foreign exchange accounts held abroad can be freely transferred to home country.

Approval required

No.

Accounts in domestic currency held abroad

Yes.

Accounts in domestic currency convertible into foreign currency

Yes.

Nonresident Accounts

Foreign exchange accounts permitted

Yes. Remittances from these accounts and withdrawals in foreign currency may be made freely. The approval of the bank is not
required when the account is held for remittances abroad or transfers to other foreign exchange accounts, for purchases and withdrawals of foreign means of payment, or for payments relating to approved transactions.

| Approval required | No. |
| Domestic currency accounts | Yes. | Nonresidents may open three kinds of domestic currency accounts with domestic foreign exchange banks: (1) nonresident domestic currency accounts; (2) nonresident free won accounts; and (3) exclusive domestic currency accounts for investment. A nonresident domestic currency account is for domestic settlement, whereas a nonresident free won account is for international settlement. An exclusive domestic currency account, a special form of nonresident free won account, is for settlement of investments in shares, bonds, or money-market instruments. |

| Convertible into foreign currency | Yes. | Remittances from nonresident free won accounts and exclusive domestic currency accounts for investment may be made freely, but remittances abroad from nonresident domestic currency accounts require notification to BOK in advance of the transfer. (BOK does not have a right to stop remittance from nonresidents’ won accounts, but remittance cannot be proceeded without such declaration.) |

| Approval required | No. |
| Blocked accounts | No. | Transfers are blocked between nonresident domestic currency accounts and nonresident free won accounts, between nonresident domestic currency accounts and domestic currency accounts exclusively for investment, and between nonresident free won accounts. (See above for description of the types of nonresident accounts.) |

### Imports and Import Payments

| Foreign exchange budget | No. |
| Financing requirements for imports | No. |
| Minimum financing requirements | No. |
| Advance payment requirements | No. |
| Advance import deposits | No. |
| Documentation requirements for release of foreign exchange for imports | No. |
| Domiciliation requirements | No. |
| Preshipment inspection | No. |
| Letters of credit | No. |
| Import licenses used as exchange licenses | No. |
| Other | No. |
| Import licenses and other nontariff measures | Yes. |
| Positive list | No. |
| Negative list | Yes. |
| Open general licenses | No. |
Effective June 22, 2022, adjustable-rate tariffs were imposed on 14 products (overall coverage decreased from 15 products in the past submission, resulting in easing of overall tariff measures). Effective October 25, 2022, antidumping duties were imposed on 20 products (increased from 17 products in the past submission, resulting in tightening of the antidumping duties).

Exports and Export Proceeds

Repatriation requirements No.

| Shares or other securities of a participating nature                   | Yes.    | Nonresidents may purchase shares issued by Korean companies freely, but purchases that are not made through an account exclusively for investment must be reported to a designated foreign exchange bank or BOK. In addition, purchases of shares of unlisted or unregistered corporations may be subject to laws on inward direct investment and establishment. Controls apply to purchases of listed shares issued by designated resident public sector utilities undergoing privatization if the investment would bring individual or aggregate holdings of foreign investors above the percentages allowed by law and to purchases of securities not quoted on a recognized securities market that may be subject to laws on inward direct investment and establishment. |  |
| Purchase locally by nonresidents                                       | Yes.    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |  |
| Sale or issue locally by nonresidents                                  | No.     | Nonresidents are eligible to list their shares on the Korea Exchange in the form of depository receipts. However, the issuer must notify the MOEF.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |  |
| Purchase abroad by residents                                           | No.     | Residents may freely purchase shares abroad, but purchases that are not made through an account exclusively for investment must be reported to BOK.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |  |
| Sale or issue abroad by residents                                      | No.     | Sale or issuance of foreign-currency-denominated shares abroad by residents requires notification to a designated foreign exchange bank. Sale or issuance of foreign-currency-denominated shares exceeding the equivalent of US$30 million or of won-denominated shares abroad by residents requires notification to the MOEF.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |  |
| Bonds or other debt securities                                         | No.     |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |  |
| Purchase locally by nonresidents                                       | No.     | Nonresidents may freely purchase bonds and other debt securities issued by residents, but purchases that are not made through an account exclusively for investment must be reported to a designated foreign exchange bank or BOK.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |  |
| Sale or issue locally by nonresidents                                  | No.     | Nonresidents may issue bonds in the domestic capital market; however, the issuer must notify the MOEF.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |  |
| Purchase abroad by residents                                           | No.     | Residents may freely purchase bonds abroad, but purchases that are not made through an account exclusively for investment must be reported to BOK.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |  |
| Sale or issue abroad by residents                                      | No.     | Sale or issuance of foreign-currency-denominated bonds abroad by residents requires notification to a designated foreign exchange bank. Sale or issuance of foreign-currency-denominated bonds exceeding the equivalent of US$30 million or of won-denominated bonds abroad by residents requires notification to the MOEF.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |  |

### Controls on Derivatives and Other Instruments
There are no controls on the trading of OTC-related derivatives if the transactions are made through domestic foreign exchange banks. However, direct transactions between residents or between residents and nonresidents require BOK notification. The maximum derivatives trading limit, including forward transactions, for corporate clients is 100% of real transactions (imports and exports) hedged.

### Purchase Locally by Nonresidents
No.

### Sale or Issue Locally by Nonresidents
No.

### Purchase Abroad by Residents
Yes.
The limits on banks’ foreign exchange derivatives contracts were set at 50% of bank capital for domestic banks and 250% for foreign bank branches, to prepare for a sudden volatility in the foreign exchange swap market as part of the COVID-19 pandemic response effort, and the measure is still valid.

### Sale or Issue Abroad by Residents
Yes.
The limits on banks’ foreign exchange derivatives contracts were set at 50% of bank capital for domestic banks and 250% for foreign bank branches, to prepare for a sudden volatility in the foreign exchange swap market as part of the COVID-19 pandemic response effort, and the measure is still valid.

### Controls on Credit Operations
No.

### Commercial Credits
No.
Commercial credits other than deferred receipts and advance payments in domestic currency and in foreign currency require BOK notification, except for credits in domestic currency up to W 1 billion or in foreign currency granted by authorized foreign exchange banks.

Inward direct investment

Commercial credits other than trade credits (including deferred payments, installment payments, export advances, and export down payments) up to US$30 million require notification to foreign exchange banks. Other credits exceeding US$30 million require notification to the MOEF.

Credits and loans denominated in domestic currency require BOK notification, except for credits and loans granted to authorized resident foreign exchange banks up to W 30 billion.

Financial credits up to the equivalent of US$30 million require notification to an authorized foreign exchange bank. Other credits exceeding US$30 million require MOEF notification.

Guarantees and sureties by residents to nonresidents require BOK or a foreign exchange bank notification.

Residents are free to invest abroad on notification to designated foreign exchange banks. Overseas investment by financial institutions and insurance companies requires notification to and acceptance by the FSC. Certain examination requirements, such as financing and appropriateness, are applicable only for investments in the financial and insurance businesses.

Nonresidents may invest in Korea as long as they meet the requirements specified by relevant laws. Controls apply to (1) investment in primary sectors, as follows: (a) rice and barley cultivation; (b) cattle husbandry and wholesale meat sales unless foreign investors hold less than 50% of the share capital; (c) fishing in internal waters, the territorial sea, and the Exclusive Economic Zone if foreign investors hold 50% or more of the share capital; and (d) nuclear power generation and electric power transmission, distribution, and supply via state enterprises if foreign investors hold 50% or more of the share capital or a foreign investor would become the single largest shareholder; (2) establishment of financial institutions, as follows: (a) branches of mutual savings and finance companies, short-term investment and finance companies, credit information companies, and merchant banks; (b) subsidiaries or joint ventures providing credit information services, if foreign investors other than foreign financial institutions own 50% or more of the shares, and acquisitions that cause foreign ownership by investors other than foreign financial institutions to reach or exceed 50% of the share capital; (3) investment in the transportation sector, as follows: (a) airline companies if foreign investors hold 50% or more of the share capital; (b) shipping companies engaged in cabotage, except those transporting passengers and/or cargo between Korea and the Democratic People’s Republic of Korea if foreign investors hold less than 50% of the share capital; (4) investment in the communications sector, as follows: (a) news agencies if foreign investors hold 25% or more of the share capital; (b) newspaper publishing if foreign investors hold 30% or more of the share capital; (c) periodicals publishing if foreign investors hold 50% or more of the share capital; (d) broadcasting, except if foreign investors hold 49% or less of the share capital of a satellite broadcasting operator and in a program provider not engaged in multigenre programming or news reporting; (e) a signal transmission network business operator, if foreign.
investors hold 20% or less in a program provider engaged in multigener programming or a cable system operator and if foreign investors hold 10% or less in a news reporting program provider; and (f) facilities-based telecommunications, if foreign investors hold more than 49% of the share capital; and (5) investment in designated resident public sector utilities undergoing privatization, if the investment would bring individual or aggregate holdings of foreign investors above the respective percentages of a firm’s outstanding shares allowed by the relevant laws. Certain examination requirements prior to direct investment, including financing and appropriateness, are applicable only in the case of investment in the banking and insurance businesses.

Controls on liquidation of direct investment No.

Controls on real estate transactions No.

Purchase abroad by residents No. Residents are free to purchase foreign real estate and its associated rights for any purpose since June 2008. Overseas purchases of real estate require notification to a foreign exchange bank. Amounts within 10% of the estimated acquisition amount of the property, may be transferred in advance of a real estate settlement, provided documents are available as a preliminary report before the contract is submitted.

Purchase locally by nonresidents No. Nonresidents are free to purchase local real estate and its associated rights. The acquisition of real estate with imported funds requires notification to a designated foreign exchange bank. Otherwise, BOK notification is required.

Sale locally by nonresidents No. No controls apply if the real estate was acquired in compliance with foreign exchange regulations.

Controls on personal capital transactions No.

Loans No.

By residents to nonresidents No. BOK notification is required for all lending by residents to nonresidents.

To residents from nonresidents No. BOK notification is required for borrowing from nonresidents by personal residents.

Gifts, endowments, inheritances, and legacies No.

By residents to nonresidents No. There is no limit, but residents intending to make endowments exceeding the equivalent of US$50,000 a year must notify BOK and submit payment certificates to foreign exchange banks.

To residents from nonresidents No.

Settlement of debts abroad by immigrants No.

Transfer of assets No.

Transfer abroad by emigrants No.

Transfer into the country by immigrants No.

Transfer of gambling and prize earnings No.

Provisions Specific to the Financial Sector

Provisions specific to commercial banks and other credit institutions Yes.

Borrowing abroad No. Foreign exchange banks are required to notify the MOEF of funding
with maturities exceeding one year and amounts exceeding US$50 million.

Lending to nonresidents (financial or commercial credits) Yes. Lending in foreign currency by a foreign exchange bank to nonresidents does not require notification. However, credits and loans in domestic currency of more than W 30 billion granted by foreign exchange banks require BOK notification.

Lending locally in foreign exchange Yes. Foreign-currency-denominated loans to residents are restricted to funding overseas transactions. An exception is applied to small and medium manufacturers for the purposes of purchasing domestic facilities.

Purchase of locally issued securities denominated in foreign exchange Yes. Foreign exchange agencies are prohibited from investing in foreign-currency-denominated bonds issued domestically by residents with the intention of converting foreign currency to Korean won.

Differential treatment of deposit accounts held by nonresidents No. There is no difference in treatment of deposit accounts (in either foreign currencies or domestic currency) held by nonresidents and those held by residents.

Reserve requirements No. The reserve requirement on nonresident foreign currency deposit accounts is 1%. The reserve requirements on nonresident domestic currency deposit accounts are (1) 0% for long-term savings for purchasing a house and worker’s asset building savings; (2) 2% for time deposits, installment savings deposits, mutual installments, housing installments, and certificates of deposit; and (3) 7% for other deposits, including demand deposits.

Liquid asset requirements No.

Interest rate controls No.

Credit controls No.

Investment regulations Yes.
Abroad by banks No.

In banks by nonresidents Yes. Nonfinancial business operators may acquire up to 4% of a bank’s total stock that have voting rights without restriction; acquisitions exceeding 4% require FSC approval.

Open foreign exchange position limits Yes.

On resident assets and liabilities Yes. A foreign exchange bank’s overall net open position, sum of overall net short positions, or sum of overall net long positions in each currency is limited to 50% of its total equity capital at the end of the previous month. The limits on banks’ foreign exchange derivatives contracts were set at 50% of bank capital for domestic banks and 250% for foreign bank branches, to prepare for a sudden volatility in the foreign exchange swap market as part of the COVID-19 pandemic response effort.

On nonresident assets and liabilities No.

Provisions specific to institutional investors Yes.

Insurance companies Yes. Controls apply to foreign-currency-denominated deposit accounts held (abroad and locally) by insurance companies whose assets denominated in foreign currency exceed 50% of total assets (increased from 30% since May 19, 2020).

Limits (max.) on securities issued by nonresidents Yes. Insurance companies can invest in securities issued by nonresidents that (1) received investment grade (BBB- or higher by S&P or equivalent ratings by other credit rating agency), (2) specified guarantee by financial institution with investment grade or nonfinancial institution with high credit rating (A- or above by S&P or equivalent ratings by other credit rating agency), and (3) received investment grade from eligible credit rating agency designated by financial supervisory authority of issuing country in accordance with Basel standard (or equivalent standard adopted by issuing country).

Limits (max.) on investment portfolio held abroad No.

Limits (min.) on investment portfolio held locally No.

Currency-matching regulations on assets/liabilities composition Yes. Insurance companies are required to observe both of the following rules: (1) An insurance company’s assets denominated in foreign currency may not exceed 50% of its total assets (increased from 30% since May 19, 2020) and (2) their net position of foreign currency must be lower than 30% (increased from 20%) of solvency margin at the end of previous quarter effective June 9, 2021. Net position of foreign currency is the absolute value of difference between foreign-currency-denominated asset and liability.

Pension funds No. There are no restrictions imposed by the relevant laws on the composition of foreign currency assets. For example, according to the National Pension Fund Act, there are no restrictions on the composition of the National Pension Fund’s foreign currency assets.

Limits (max.) on securities issued by nonresidents No.

Limits (max.) on investment portfolio held abroad No.
Limits (min.) on investment portfolio held locally  
No.

Currency-matching regulations on assets/liabilities composition  
No.

Investment firms and collective investment funds  
No.  
According to the Financial Investment Services and Capital Markets Act, there are no restrictions on the investment composition of investment firms and collective investment funds.

Limits (max.) on securities issued by nonresidents  
No.

Limits (max.) on investment portfolio held abroad  
No.

Limits (min.) on investment portfolio held locally  
No.

Currency-matching regulations on assets/liabilities composition  
No.

Changes during 2021 and 2022

Imports and Import Payments

Import taxes and/or tariffs  
06/22/2022  
Adjustable-rate tariffs were imposed on 14 products (overall coverage decreased from 15 products in the past submission, resulting in easing of overall tariff measures).

10/25/2022  
Antidumping duties were imposed on 20 products (increased from 17 products in the past submission, resulting in tightening of the antidumping duties).

Provisions Specific to the Financial Sector

Provisions specific to institutional investors  
Insurance companies

Currency-matching regulations on assets/liabilities composition  
06/09/2021  
The limit of net position of foreign currency for insurance companies was increased from 20% to 30% of solvency margin at the end of previous quarter.

(Status as of June 30, 2022)

Status under IMF Articles of Agreement

Date of membership: June 29, 2009.

Article VIII

Yes. Date of acceptance: January 11, 2018.

Article XIV

Restrictions and/or multiple currency practices
No.

Exchange measures imposed for security reasons
Yes.

In accordance with IMF Executive Board Decision No. 144-(52/51)
Yes.

Kosovo implements certain restrictive measures, such as freezing of funds, other financial assets, and economic resources. Kosovo maintains restrictions in accordance with UNSC resolutions, sanctions issued by institutions of the EU and the Government of the USA. Those restrictions are imposed purely for the preservation of national and international security.

The Government of Kosovo Decision No. 09/196 of September 17, 2014, endorsed sanctions issued by institutions of the EU and the Government of the USA against legal entities and the authorities of Russia. An Administrative Directive on Prevention and Detection of Terrorism Financing is in place. Article 4 of the Directive provides for lists of persons and entities suspected of terrorism as follows: Consolidated Lists of Individuals and Entities belonging to or associated with the Taliban and Al-Qaida Organization as established and maintained by the UNSC (UNSC Resolution No. 1267); the list established by the EU (EU Council Resolution No. 2580/2001); and the list established by the Secretary State of the USA (Section 219 of the Immigration and Nationality Act of the USA).

Other security restrictions
No.

Exchange Arrangement

Currency
Yes. The euro is legal tender in Kosovo.

Other legal tender
No.

Exchange rate structure

Unitary
Yes.

Dual

Multiple

Classification

No separate legal tender
Yes.

The exchange rate arrangement is an exchange arrangement with no separate legal tender. Since January 2002, when Kosovo unilaterally adopted the euro, this currency is a legal tender in the Territory and circulates freely.

currency permitted to be used in Kosovo” specifies in Section 1 that “Parties to a contract or any voluntary transaction may denominate such transaction in any currency agreed on by the parties. Unless proven otherwise, such an agreement must be deemed to exist with regard to any foreign currency that is widely accepted in the Territory of Kosovo.” Administrative Direction No. 1999/2 of October 4, 1999, “Implementing UNMIK Regulation No. 1999/4 of 2 September 1999, On the Currency Permitted to be used in Kosovo” designated Deutschmark (DEM) as the only currency to formulate accounts and to perform compulsory payments. Later, because of the changeover of DEM into euro, Administrative Direction No. 2001/24 of December 21, 2001, “Amending Administrative Direction No. 1999/2 implementing UNMIK Regulation No. 1999/4 on the currency permitted to be used in Kosovo” replaced DEM by euro (1 euro = 1.95583 DEM).

**Exchange tax** No.

**Exchange subsidy** No.

**Foreign exchange market** Yes. Banks and other financial institutions may trade in foreign exchange among themselves at freely determined exchange rates.

**Spot exchange market** Yes. Commercial banks and other financial institutions in Kosovo may purchase and sell euros for other currencies. There were 11 commercial banks and 57 foreign exchange bureaus participating in the foreign exchange market as of June 30, 2022. The foreign exchange market in Kosovo is limited because most international payments and transfers are done in euro. Foreign exchange bureaus must be licensed and operate under the Central Bank of the Republic of Kosovo (CBK) regulation. The number of authorized foreign exchange bureaus is not limited. Foreign exchange bureaus may not
do business directly with the CBK, and their operations are limited to
the purchase and sale of foreign exchange banknotes.

Operated by the central bank No.
Foreign exchange standing facility No.
Allocation No.
Auction No.
Fixing No.

Interbank market Yes. There were 11 commercial banks participating in the foreign
exchange market as of June 30, 2022. The euro foreign exchange
market operates according to a market-making agreement.
The volume of interbank market is low as Kosovo does not have its
own currency, and the euro is treated as a local currency.

Over the counter Yes. Foreign exchange transactions continue to take place over the
counter.

Brokerage No.

Market making Yes. Banks are free to set their bid-ask rates in the interbank foreign
exchange market. Eleven banks and 57 foreign exchange bureaus are
market participants who continuously quote buy and sell prices.

Forward exchange market No. There is no forward exchange market in Kosovo, but there are no
restrictions on forward deals by residents abroad. Some banks may
offer a forward exchange rate contract, but there is no demand for
such contracts.

Official cover of forward operations No.

Arrangements for Payments and Receipts

Prescription of currency requirements No.

Controls on the use of domestic currency No. Controls are applied only for the prevention of money laundering
based on Law No. 05/L-096 of the Republic of Kosovo of May 25,
2016, on the Prevention of Money Laundering and Combating
Terrorism Financing.

For current transactions and payments No.

For capital transactions No.

Transactions in capital and money market
instruments No.

Transactions in derivatives and other
instruments No.

Credit operations No.

Use of foreign exchange among residents No.

Payments arrangements No.

Bilateral payments arrangements No.

Operative No.

Inoperative No.

Regional arrangements No.
KOSOVO

Clearing agreements  No.

Barter agreements and open accounts  No.

Administration of control  No.

Payments arrears  No.

Official  No.

Private  No.

Controls on trade in gold (coins and/or bullion)  No.

On domestic ownership and/or trade  No.

On external trade  No.

Controls on exports and imports of banknotes  No.

On exports  No. There are no limits on the amount of euros or other foreign currency that may be exported. However, anyone leaving Kosovo and carrying cash worth €10,000 or more must declare it and its source in writing. The authorities record and report this information.

Domestic currency  No. The euro is legal tender. Exports of cash worth €10,000 or more in any currency must be reported to customs authorities. Banks and other financial institutions are allowed to export banknotes. The rules are the same for individuals and any legal entity.

Foreign currency  No. Exports of cash worth €10,000 or more in any currency must be reported to customs authorities. Banks and other financial institutions are allowed to export banknotes. The rules are the same for individuals and any legal entity.

On imports  No. Imports of cash worth €10,000 or more in any currency must be reported to customs authorities.

Domestic currency  No. The euro is legal tender. Imports of cash worth €10,000 or more must be reported to customs authorities. Banks and other financial institutions are allowed to export banknotes. The rules are the same for individuals and any legal entity.

Foreign currency  No. Imports of cash exceeding €10,000 in any currency must be reported to customs authorities. Banks and other financial institutions are allowed to export banknotes. The rules are the same for individuals and any legal entity.

Resident Accounts

Foreign exchange accounts permitted  Yes. There is no restriction on any foreign exchange account.

Held domestically  Yes. Residents may open and maintain foreign exchange accounts without restriction, on proof of identity. There are no restrictions on the amounts that can be transferred abroad.

Approval required  No.

Held abroad  Yes. Residents may open and maintain foreign exchange accounts abroad, but controls are applied for prudential reasons such as prevention of money laundering and terrorism financing. There are no restrictions on the amounts that can be transferred from abroad to home country.

Approval required  No. Residents may open and maintain foreign exchange accounts abroad, and there is no approval requirement.

Accounts in domestic currency held abroad  Yes. The euro is used as domestic currency, and residents may have accounts in euros abroad.
Accounts in domestic currency convertible into foreign currency: Yes. Balances may be converted from euros to other foreign currency without restriction.

Nonresident Accounts

Foreign exchange accounts permitted: Yes. Nonresidents may open and maintain foreign exchange accounts in Kosovo without restriction.

Approval required: No.

Domestic currency accounts: Yes. Nonresidents may open and maintain euro accounts in Kosovo without restriction.

Convertible into foreign currency: Yes. Nonresidents may open and maintain, without restriction, euro accounts. The balances of such accounts may be freely converted to foreign currency and transferred abroad.

Approval required: No.

Blocked accounts: No.

Imports and Import Payments

Foreign exchange budget: No.

Financing requirements for imports: No.

Minimum financing requirements: No.

Advance payment requirements: No.

Advance import deposits: No.

Documentation requirements for release of foreign exchange for imports: No. Companies wishing to engage in foreign trade must register with the relevant ministry. (However, this is not for the purpose for release of foreign exchange.) Commercial banks may require documents verifying the purpose of the transaction before payment.

Domiciliation requirements: No.

Preshipment inspection: No.

Letters of credit: No.

Import licenses used as exchange licenses: No.

Other: No.

Import licenses and other nontariff measures: Yes. Imports are free of licensing requirements, except for certain products, consistent with international conventions (for example, arms, gold, diamonds, drugs, narcotics, and hazardous waste). Some products, such as pharmaceuticals, fuel, and some agricultural products, require licenses, which are issued on a case-by-case basis. Imports are not limited according to quantity or value. There are statistical and security reporting requirements for residents' external payments. Imports require only a commercial invoice, import customs declaration, and certificate of origin. From January 1, 2012, through December 31, 2015, Kosovo benefited from a preferential trade agreement with the EU. The Stabilisation and Association Agreement in force since April 1, 2016, extended the preferential trade agreement with the EU.

Positive list: Yes.

Negative list: Yes. The importation of narcotic drugs or raw materials for the production
or processing of narcotic drugs is prohibited. The importation of weapons, ammunition, or explosive is also prohibited. The importation of certain chemicals and pharmaceuticals is restricted.

Open general licenses No.

License with quotas No. Licenses for importation of goods are not issued with any value or volume quotas.

Other nontariff measures Yes. Rules apply to the quality of imported petroleum. Imported cars may be no more than 13 years old.

Import taxes and/or tariffs Yes. Commodity imports are subject to customs tariffs at 10% of the value of goods. Excise taxes are applied to certain products such as fuel, cars, alcoholic beverages, and tobacco; no customs tax is applied to a number of agricultural and food products. VAT is collected at customs clearance for many imported goods. Kosovo belongs to the Regional FTA known as CEFTA signed December 19, 2006, and applies tariffs on trade with members in accordance with the agreement. All products imported from Serbia and Bosnia and Herzegovina are subject to a 100% tariff.

Taxes collected through the exchange system No.

State import monopoly No.

Exports and Export Proceeds

Repatriation requirements No.

Surrender requirements No.

Surrender to the central bank No.

Surrender to authorized dealers No.

Financing requirements No.

Documentation requirements Yes.

Letters of credit No.

Guarantees No.

Domiciliation No.

Preshipment inspection No.

Other Yes. During the arrangement of the export transaction’s financing by a bank, the bank conducts the normal credit risk assessment of the exporter and the latter is required to submit the commercial invoice and customs declaration to the bank providing financing.

Export licenses Yes. Exports are free of restrictions, except for certain products that are licensed for security or health reasons in accordance with international conventions and codes. From January 1, 2012, through December 31, 2015, Kosovo benefited from a preferential agreement with the EU. The Stabilisation and Association Agreement in force since April 1, 2016, extended the preferential trade agreement with the EU. Preferential rates allow exportation of all goods without customs duties or quantity limits (except for wine and some foods). Kosovo is also a beneficiary country in the GSP, which means that selected products may be exported duty-free to the US market.

Without quotas Yes. Licenses for exportation of goods are not issued with any value or volume quotas.
With quotas No.

Export taxes No.

Collected through the exchange system No.

Other export taxes No.

Payments for Invisible Transactions and Current Transfers

Controls on these transfers No. Documentation is required for transactions of €10,000 and above, including the reason for the transfer and the source of the funds based on Regulation on Balance of Payments Statistics and International Investment Position. This is also required for the purpose of preventing anti-money laundering/terrorism financing and is not a mean of control on these transfers. The bona fide test is mainly for Know-Your-Customer (KYC) test and not a test for transaction, so the documentation required is ID of the client.

**Abroad by banks**

Banks may invest freely abroad. However, these investments are subject to the CBK regulations on large exposures and capital adequacy. There is no limitation on the overall amount that can be invested abroad. The limitation is only for reducing credit risk concentration on a single party. There is limitation for foreign branches as Article 17 of the Law on Banks requires branches of foreign banks to maintain claims on residents of Kosovo in excess of its liabilities to residents of Kosovo.

**In banks by nonresidents**

| Open foreign exchange position limits | Yes. |
| On resident assets and liabilities | Yes. |
| On nonresident assets and liabilities | Yes. |

The CBK sets limits on foreign exchange (non-euro) positions of banks. Banks may not have a net open position in any one foreign currency exceeding 15% or an aggregate net open foreign currency position exceeding 30% of its Tier 1 capital. These limits are applied to both resident and nonresident assets and liabilities.

**Provisions specific to institutional investors**

**Insurance companies**

Insurance companies are regulated by Law No. 05/L-045 on Insurances, the Regulation of December 29, 2016, on Investment of Assets Covering Technical and Mathematical Provisions and Investment of Charter Capital for Insurers, and the Regulation on calculation of the minimum solvency margins, capital adequacy and guarantee fund for non-life insurers.

**Limits (max.) on securities issued by nonresidents**

The maximum limit is 20% of the total gross technical and mathematical provisions invested in assets issued and guaranteed by the CBs of governments of EU member states, which need to have a credit rating not lower than BBB from Standard & Poor’s or its equivalent of this category from Fitch and Moody’s, or their equivalents ranked by other agencies of credit ranking recognized by the CBK.

**Limits (max.) on investment portfolio held abroad**

There are no limits on maximum portfolio held abroad. There are limits applicable only for the credit rating of the issuer but not the country of the issuer. Limits on investment covering technical provisions apply: No more than 20% of gross technical and mathematical provisions may be invested in treasury bonds, securities, and other capital market financial instruments issued and guaranteed by the CBs of governments of EU member states, which need to have a credit ranking no lower than BBB from Standard & Poor’s or its equivalent of this category from Fitch and Moody’s, or their equivalents ranked by other credit ranking agencies recognized.
by the CBK. With prior approval from the CBK, insurers may invest in other securities, traded in a regulated market, where their issuers are ranked no lower than BBB by Standard & Poor’s or its equivalent from Fitch and Moody’s, or their equivalents ranked by other credit ranking agencies recognized by the CBK, no more than 20% in total and no more than 5% of technical and mathematical provision in single issuer.

**Changes during 2021 and 2022**

No significant changes occurred in the exchange and trade system.
KUWAIT
(Position as of August 31, 2022)

Status under IMF Articles of Agreement

Date of membership
September 13, 1962.

Article VIII
Yes. Date of acceptance: April 5, 1963.

Article XIV

Exchange Measures

Restrictions and/or multiple currency practices
No. No restrictions as reported in the latest IMF staff report as of December 31, 2021.

Exchange measures imposed for security reasons
Yes. Measures have been taken to implement relevant UNSC resolutions against terrorism, with regard to anti-money-laundering operations through financial transfers involving charitable organizations, suspect accounts, and sanctioned countries.

Exchange Arrangement

Currency
Yes. The currency of Kuwait is the Kuwaiti dinar.

Other legal tender
No.

Unitary
Yes.

Dual

Multiple

Classification

No separate legal tender

Currency board

Conventional peg

Stabilized arrangement

Crawling peg

Crawl-like arrangement

Pegged exchange rate within horizontal bands

Other managed arrangement Yes. The de jure exchange rate arrangement is a conventional peg vis-à-vis a currency composite. According to the law of the Central Bank of Kuwait (CBK), the exchange rate arrangement is specified by an “amiri” decree in consultation with the governor of the CBK (see CBK Law, Chapter I, Article II). Because the composite weights
cannot be confirmed, the de facto exchange rate arrangement is
classified as other managed. Intervention data are not disclosed to the
public.

Floating

Free floating

**Official exchange rate**

<table>
<thead>
<tr>
<th></th>
<th>Yes.</th>

</table>

Since May 20, 2007, the de jure exchange rate arrangement of the
dinar has been a peg against an undisclosed basket of currencies,
composed of Kuwait’s major trading and financial partner countries
(Decree No. 147/2007), whereby the CBK declares on a daily basis
the exchange rate of the dinar against the US dollar. The official
exchange rate is used for accounting and valuation. The official
exchange rate is disclosed to the market through the CBK website.

### Import licenses and other nontariff measures

<table>
<thead>
<tr>
<th>Requirement</th>
<th>Status</th>
</tr>
</thead>
<tbody>
<tr>
<td>Import licenses and other nontariff measures</td>
<td>Yes.</td>
</tr>
</tbody>
</table>

Import licenses are required for all commercial imports other than fresh fruits and vegetables, wheat, and flour. Licenses are issued freely to registered Kuwaiti merchants and companies. To be registered, the importer must be either a Kuwaiti citizen, a firm in which all partners are Kuwaiti citizens, or a shareholding or limited liability company in which Kuwaiti citizens own at least 51% of the stock.

### Positive list

Effective June 1, 2021, individuals are allowed to import construction materials for personal use, provided (1) materials are consistent with the Gulf standards and (2) individuals have a building permit issued by the Kuwait Municipality.

### Negative list

Imports of all kinds of live birds, hatching eggs and one-day-old chicks for broilers and egg-laying hens from Kingdom of Saudi Arabia, are banned because of the emergence of H5N8 Avian Influenza.

Imports of all kinds of live birds from Spain are banned because of the emergence of West Nile Fever.

Imports of all kinds of live birds, hatching eggs and one-day-old chicks for broilers and egg-laying hens from Germany, are banned because of the emergence of Avian Influenza.

Imports of all equine species from Turkey are temporarily banned because of the emergence of Glanders.

Imports of all kinds of live birds, hatching eggs and one-day-old chicks for broilers and egg-laying hens from India (except for imports from Bona City, Frinches Company), are banned because of the emergence of Avian Influenza.

Imports of all kinds of live birds, hatching eggs and one-day-old chicks for broilers and egg-laying hens from the United Kingdom, are banned because of the emergence of Avian Influenza.

Imports of all kinds of live birds, hatching eggs and one-day-old chicks for broilers and egg-laying hens from the Republic of Ghana, are banned because of the emergence of H9N2 Avian Influenza.

Imports of all kinds of live birds, hatching eggs and one-day-old chicks for broilers and egg-laying hens from Mexico, are banned because of the emergence of Avian Influenza.

Imports of all kinds of live birds, hatching eggs and one-day-old chicks for broilers and egg-laying hens from the State of Texas, USA, are banned because of the emergence of Avian Influenza.

Imports of melons from Australia are temporarily banned because of Listeriosis, until further notice.

Imports of beef, sheep, and goat meat (fresh, chilled, frozen, and processed) of all types and by-products from Kazakhstan are banned because of the emergence of Anthrax.

There is a temporary ban of imports of crustaceans such as shrimp (fresh, chilled, frozen, and processed) from Vietnam, because of the detection of White Spot Syndrome Virus and Acute Hepatopancreatic Necrosis Disease except for the following:

(1) Frozen products with removed heads and shells (except for shrimp’s tails), provided all packages are being visually examined...
and lab tested. (2) Thermally treated products, to ensure the elimination of the virus, by one of the following procedures as prescribed in the Aquatic Animal Health Code: Tightly sealed products treated with heat sterilization at 1210 °C for at least 3.6 minutes (or the equivalent temperature and time sufficient to inactivate the virus). Cooked products thermally treated at 600 °C for at least 1 minute (or the equivalent temperature and time sufficient to inactivate the virus). Products prepared for direct human consumption such as those marinated or prepared for grilling, frying, or any other method of cooking. Pasteurized products thermally treated at 900 °C for at least 10 minutes–20 minutes (or the equivalent temperature and time sufficient to inactivate the virus).

Imports of all kinds of oysters from Canada are banned, because of the detection of Norovirus, until further notice.
Imports of poultry meat (fresh, chilled, frozen, and processed) of all types, and by-products and table eggs, except those thermally treated at 70 °C from Nepal, are banned because of the emergences of highly pathogenic H5N1 Avian Influenza.
Imports of beef, sheep, and goat meat (fresh, chilled, frozen, and processed) of all types and by-products from Uganda are banned because of the emergences of Anthrax.
Imports of all kinds of live birds, hatching eggs and one-day-old chicks for broilers and egg-laying hens from Malaysia, are temporary banned because of the emergence of Avian Influenza.
Imports of poultry meat (fresh, chilled, frozen, and processed) of all types and by-products and table eggs, except those thermally treated at 70 °C from Vietnam, are banned because of the emergences of highly pathogenic Avian Influenza.
Imports of poultry meat (fresh, chilled, frozen, and processed) of all types and by-products and table eggs, except those thermally treated at 70 °C from Malaysia, are banned because of the emergences of highly pathogenic Avian Influenza.
Imports of beef, sheep, and goat meat (fresh, chilled, frozen, and processed) of all types and by-products from France are banned because of the emergences of Anthrax.
Imports of poultry meat of all types and by-products and table eggs, except those thermally treated at 70 °C from the Republic of China, known as Chinese Taipei of Taiwan, are banned because of the emergences of highly pathogenic Avian Influenza.
Imports of all kinds of live birds from Germany are banned because of the emergence of West Nile Fever.
Imports of all kinds of live birds, one-day-old chicks for broilers and egg-laying hens and hatching eggs, from the State of California, USA, are temporary banned because of the emergence of Avian Influenza.
Imports of all kinds of live birds from Croatia are banned because of the emergence of West Nile Fever.
Imports of all kinds of live birds from Brazil are banned because of the emergence of West Nile Fever.
Imports of all kinds of live birds from Romania are banned because of the emergence of West Nile Fever. Imports of American roman lettuce from the United States are banned because of the outbreak of E. coli O157:H7.
Imports of beef, sheep, and goat meat (fresh, chilled, frozen, and processed) of all types and by-products from Namibia are banned because of the emergences of Anthrax.
Imports of all kinds of live birds, hatching eggs and one-day-old chicks for broilers and egg-laying hens from Pakistan, were temporarily banned because of the emergence of Avian Influenza.
Imports of dark chocolate chunks from the United Kingdom of...
Imported products were banned: Snickers protein bars, Mars protein bars, Bounty protein bars, and Milky way protein bars.

Imports of all kinds of live birds, one-day-old chicks for broilers and egg-laying hens from France, were temporarily banned because of the emergence of Avian Influenza.

Imports of all kinds of live ruminants and camels from Sudan were banned, because of the detection of Rift Valley Fever.

Imports of ruminants’ meat (fresh, chilled, frozen, and processed) of all types and by-products from the Republic of Botswana were banned, because of an Anthrax outbreak.

The ban on the import of “Ice Breakers” of various flavors and types was lifted, while imports of “Ice Breakers gum” of various flavors and types continue to be banned, because of the presence of pig gelatin.

Imports of all types of unmanned aerial vehicles (drones) of all sizes, which are operated by remote control system and equipped with cameras, communication or reception equipment, were banned except after obtaining a license from the Ministry of Interior. Companies and shops which are licensed by the Ministry of the Interior to sell drones need to record name of the buyer, civil ID number, and phone number.

Imports of all kinds of live birds, one-day-old chicks for broilers and egg-laying hens from France, were temporarily banned because of the emergence of Avian Influenza.

Imports of all kinds of live ruminants and camels from Sudan were banned, because of the detection of Rift Valley Fever.

Imports of ruminants’ meat (fresh, chilled, frozen, and processed) of all types and by-products from the Republic of Botswana were banned, because of an Anthrax outbreak.

Open general licenses
Yes.

Imports of industrial equipment and machinery and their spare parts require industrial licenses, which are valid for one-time use. Licenses are issued to registered and licensed industrial establishments with the approval of the Industrial Development Commission at the MCI. Private imports of personal objects may be permitted under individual or specific licenses. Registered importers handling a variety of commodities may obtain a general license valid for one year. Other importers must obtain specific licenses for individual commodities, which are also valid for one year.

Licenses with quotas
No.

Other nontariff measures
Yes.

Government procurement policies give preference to Kuwaiti-produced goods up to a price margin of 5% over goods produced in other GCC countries and 10% over goods produced in non-GCC
Import taxes and/or tariffs: Yes. In accordance with the GCC Customs Union, a minimum tariff of 5% applies to non-GCC imports; there are no tariffs on imports from other GCC members with at least 40% local value added. Imports of foodstuffs and some machinery and equipment, spare parts, and raw materials are exempt from import duties. Kuwait applies higher tariffs in industries with domestic producers that supply at least 40% of the local market. Tariff rates differ depending on the domestic-value-added content of the products in question. If domestically produced goods contain at least 20%, 30%, or 40% of domestic value added, protective duties of 15%, 20%, and 25%, respectively, may be applied to competing imports. The degree of protection is reduced by 5% in the case of consumer goods. The maximum duty imposed on products that compete with locally manufactured goods is 100%. Duties on goods imported from GAFTA member countries are being gradually reduced.

Taxes collected through the exchange system: No.
State import monopoly: No.

Exports of live sheep and poultry, sugar, fats, rice, meat, eggs, milk, cheese, butter, olive oil, fresh fruits, vegetables in any form, beans, lentils, chickpeas, jams, and cement may be prohibited in times of emergency or shortages in Kuwait. At such times, these items may be exported in limited quantities only under a special license issued by the MCI. Exports of arms and ammunition also require licenses. Exports of scrap iron are temporarily prohibited. Exports of all fish and crustaceans caught in Kuwaiti regional waters or farms, whether fresh, chilled, frozen, or processed, are prohibited, except those from the Kuwaiti United Fisheries Company and the National Fisheries Company, which may export in frozen form 35% of their total prawn production, and those of other companies licensed to operate fish farms, which may export in chilled or frozen form 50% of their...
annual fish and crustacean production. Exports and re-exports of fish and crustaceans (fresh, chilled, frozen, or manufactured) caught or farmed by licensed companies or individuals are subject to Public Authority of Agriculture Affairs and Fish Resources (PAAF) approval during seasonal no-fishing periods, and marketing of all kinds of fish (chilled, trophy, dried, sliced, with additives, or canned) in free zones is subject to free zone regulation, except fish produced locally (from sea or farms), which is subject to PAAF regulation. The MCI determines in advance how much may be exported on an exceptional basis during the specified period, according to local market conditions.

Exports of female lambs are prohibited. The Al-Muttahida Poultry Company may export 8,100 kg of frozen poultry products, and the Kuwait Agriculture Company may export 3,600 kg of frozen chicken. Companies, firms, and individuals licensed to export domestic and imported eggs require approval by the MCI, according to the PAAF local market surplus survey. Exports of locally manufactured bottled water are prohibited. Export of crushed/ground copper and non-insulated copper cables of all types (new/scrap) was prohibited, unless in its original form and after obtaining a written approval from the Ministry of Electricity and Water.

A temporary ban on the exportation and re-exportation of the following products of all kinds was instituted: (1) disinfectant and sterilizing agents: for body and surfaces containing chlorohexidine (\( \geq 0.5\% \)), ethanol (70%–95%); (2) medical gloves; (3) protective clothing (body suit and shoes cover); and (4) certain corona virus test kits.

Producers of eggs from companies and individuals in the State of Kuwait are authorized to export the surplus of their production after satisfying the need of the local market and in accordance with a written approval of the MCI.

Export and re-export of domestic and imported live sheep and goats of all kinds were banned for a period of three months effective February 7, 2021. The ban was lifted effective May 7, 2021. Export and re-export of domestic and imported live sheep and goats were banned again effective May 17, 2021. The ban was lifted effective September 15, 2021. Effective July 4, 2021, sheep designated for show and of a rare species are excluded from the ban, provided a certificate from the Public Authority of Agriculture Affairs and Fish is obtained to prove the exemption. Export and re-export of domestic and imported live sheep and goats were banned effective March 1, 2022. The ban was lifted effective August 1, 2022.

Effective January 27, 2021, companies, commercial institutions, and individuals are prohibited from exporting all kinds and forms of locally logged timber. It is prohibited to display, sell, or promote locally logged timber to individuals, companies, factories, or mobile vehicles unless prior approval is obtained from the competent official authorities.

Effective February 4, 2021, pursuant to MCI’s Decision No. 20/2021 and Customs Instruction No. 7/2021: (1) Exports of the following are permitted: (a) used and recyclable pumps, (b) used and recyclable iron pipes (reusable pipes), (c) reusable electric machines, and (d) all high-density iron reusable products (reusable steel rods, reusable steel plates, reusable steel beams, reusable bricks). (2) Exports of the following are banned: (a) cupper, (b), used oil, (c) used paper, (d)
used batteries, (e) plastic and glass, (f) electronic waste, (g) scrap and crushed iron, and (h) aluminum, unless prior approval is obtained from the relevant competent authorities (for example, Kuwait Environment Public Authority, Public Authority for Industry, Ministry of Electricity and Water). (3) The prices of scrap and used paper stipulated in the Decision must be determined according to what is agreed on or in accordance with the regional or international prices and must include the rights and obligations of the contractors. Monopolistic practices are prohibited. The exporter must submit a letter showing the quantity of the items to be exported. The letter also must include the approved international prices which can be obtained from an approved website, provided these prices should be valid for 15 days from the date of receiving the letter. (4) The exporter is obligated to submit to the Public Authority for Industry proof illustrating offers concerning selling available quantities of recyclable waste to local factories at a price 5% lower than the international prices. In the event of providing incorrect data, the applicant will be deprived for one year of exporting any materials. (5) Local factories are allowed to store less than 50% of the permitted quantity, which is stated in the feasibility study, of scrap needed for the production, subject to certain requirements. It is allowed to export more than that while adhering to Article 4 of the Decision.

Export and re-export of domestic and imported eggs of all sizes were temporarily banned for one month effective March 22, 2021. Export and re-export of domestic and imported eggs of all sizes were temporarily banned until further notice effective April 22, 2021.

Export and re-export of cement, rebar reinforcing steel, and timber were banned effective May 31, 2021.

Effective July 4, 2021, pursuant to Decision No. 20/2021, Article 2, concerning regulating the export of recyclable waste, export of the following items is prohibited unless a prior approval is obtained from the relevant authority (for example, Ministry of Electricity and Water, Kuwait Environment Public Authority): copper, scrap and crushed iron, aluminum, used oil, used paper, plastic and glass, electronic waste, and used batteries. Pursuant to Article 4, exporters are obligated to submit to the Kuwait Environment Public Authority proof illustrating offer concerning selling available quantities of recyclable waste to local factories at a price 5% lower than the international prices. In the event of providing incorrect data, the applicant will be deprived for one year of exporting any materials.

Export and re-export of iron scrap were banned effective March 17, 2022. Effective June 17, 2022, the ban was extended until December 31, 2022.

Export and re-export of vegetable oils were banned effective April 1, 2022. The ban was lifted effective July 31, 2022.

Export and re-export of frozen chicken and chicken parts were banned effective April 1, 2022. The ban was lifted effective July 31, 2022.

Export or re-export of locally manufactured goods and products of kerosene, such as dyes, detergents, organic solvents, and others outside the country, whenever the percentage of subsidized kerosene used in production exceeds 10% of its components, are prohibited. The percentage of subsidized kerosene is determined by the Kuwait
National Petroleum Company. As an exception, effective March 28, 2022, pursuant to Decision No. 35/2022 of the MCI, it is permissible for institutions, commercial companies, and companies with industrial licenses that have obtained prior approval to export the final products of these goods under the following conditions: (1) The Kuwait Environment Public Authority examines the products to be exported, matches the result with the submitted documents, and issues a certificate including the amount of kerosene used by the exporter; (2) the General Administration of Customs impose an export restriction on products manufactured from subsidized kerosene based on the lists approved by the Public Authority for Industry and prohibit the exporting of these products unless after obtaining the following: (a) the certificate specifying the percentage of subsidized kerosene required to recover the value of its subsidy and (b) a collection receipt from the competent authorities for the value of the subsidy required to be recovered after coordination between the General Administration of Customs, the Ministry of Oil, and the MOF to set the accounting mechanisms for settlement of the amount of subsidy refunded from these products.

Effective May 31, 2022, Decision No. 35/2022 of the MCI, concerning the exception to the ban on exports or re-export of locally manufactured goods and products of kerosene whenever the percentage of subsidized kerosene used in production exceeds 10% of its components, was suspended for three months.

The listing of foreign stocks and bonds on the Boursa Kuwait is subject to the approval of the Capital Market Authority.

Controls apply to banks and financial institutions subject to CBK supervision. Banks are subject to approval requirement set by CBK.

The listing of foreign stocks and bonds on the Boursa Kuwait is subject to the approval of the Exchange Committee.

According to CBK’s Capital Adequacy Framework:

- Islamic banks are not permitted to undertake derivative transactions for speculative purposes and should only use these to hedge their exposures.
- All positions by Islamic banks should also be compliant with Shariah principles and approved by the respective Shariah Supervisory Board (SSB). The CBK has discretion to impose additional capital charges on such positions on case-by-case basis.
- Islamic banks to use the applicable market-accepted standard agreements such as the International Swaps and Derivatives Association, Inc. (ISDA)/International Islamic Financial Market (IIFM) Tahawwut Master Agreement (TMA).

Credit facilities local banks may extend in dinars to nonresidents must be limited to those that finance dinar-denominated contracts awarded by government entities in Kuwait, while observing the terms and controls included in the CB instructions of May 2, 1995. The following are relevant in this regard: (1) Credit must be extended...
on a sound basis, particularly regarding the purpose of the credit; the consistency of the credit type, size, and currency with the actual needs of the customer and within the limits of the financed contract; and use of the credit for the purpose for which it was extended. In general, an integrated credit study must be conducted on the feasibility of the requested credit, taking into account the soundness of the customer’s financial position, the availability of repayment sources, the collateral submitted, and other considerations. (2) Banks should minimize their exposure to credit risk by distributing credit risk across a wide customer base, diversifying their credit facilities portfolio and distributing it across various sectors of the economy, and establishing maximum limits for risk associated with foreign credit, taking into account the nature of country risks. Banks must periodically review their credit policies and introduce appropriate amendments, particularly in regard to applied limits and delegated authority, all within the strategic direction of the bank and current developments.

Local banks are allowed to extend credit facilities in KD to nonresidents, without the need of seeking the CBK’s prior consent, for financing contracts whose value may not exceed KD 40 million, provided such facilities do not exceed 70% of the total value of each contract. As for other contracts or credit facilities exceeding such limits, they must require the prior consent of the CBK.

The following conditions must be satisfied in respect of all KD credit facilities extended by the local banks to their nonresident customers:

1. The credit facilities extended in KD to nonresidents must be limited to financing the contracts denominated in KD and awarded by government bodies in the State of Kuwait.
2. The financing bank must verify that the contracts to be financed are in fact real contracts, and must retain copies thereof.
3. Finance extended for such cases must be limited for each separate contract and may not be concluded through general credit lines extended to the borrowing customers.
4. A Letter of Assignment over all the financed contract payments must be signed in favor of the lending bank. Such payments must be utilized for repayment of the granted credit facilities in compliance with such facilities’ conditions.

Credit facilities that local banks may extend in dinars to nonresidents must be limited to those that finance dinar-denominated contracts awarded by government entities in Kuwait, while observing the terms and controls included in the CB instructions of May 2, 1995.

The CBK must allow the coverage of forward foreign exchange contracts, as well as the conversion of KD cash facilities to foreign currencies, up to a maximum of 50% of the contract value, where the bank must be responsible for financing the remaining portion of the contract value from its own resources.

Controls on direct investment | Yes.
---|---
*Outward direct investment* | No.
*Inward direct investment* | Yes. Foreigners may own up to 49% of Kuwaiti companies and may establish 100% owned subsidiaries subject to the Kuwait Foreign Investment Law (Foreign Investment Bureau) and the conditions determined by the council of ministers. The Companies Law No. 1 of 2016 maintained the requirement that a Kuwaiti national own at least 51% of all local companies, unless foreign investors apply through the Kuwait Direct Investment Promotion Authority. The Council of Ministers Decision No. 75 of 2015 directed Kuwait Direct Investment Promotion Authority to exclude foreign firms from investment in the following sectors: extraction of crude petroleum, extraction of natural gas, manufacture of coke oven products, manufacture of fertilizers and nitrogen compounds, manufacture of gas, distribution of gaseous fuels through mains, real estate (excluding privately operated building development projects), security and investigation activities, public administration and defense, compulsory social security, activities of membership organizations, and labor hiring activities including domestic labor.

Controls on liquidation of direct investment | No.
Controls on real estate transactions | Yes.
*Purchase abroad by residents* | No.
*Purchase locally by nonresidents* | Yes. Only GCC nationals may purchase real estate of up to 3,000 square meters for private residence purposes.
*Sale locally by nonresidents* | Yes.
Controls on personal capital transactions | No.
*Loans* | No.
By residents to nonresidents | No.
To residents from nonresidents | No.
*Gifts, endowments, inheritances, and legacies* | No.
By residents to nonresidents | No.
To residents from nonresidents | No.
*Settlement of debts abroad by immigrants* | No.
*Transfer of assets* | No.
Transfer abroad by emigrants | No.
Transfer into the country by immigrants | No.
*Transfer of gambling and prize earnings* | No.

**Provisions Specific to the Financial Sector**
