1 These chapters are available on AREAER Online (www.elibrary-areaer.imf.org/). The term “country,” as used in this publication, does not in all cases refer to a territorial entity that is a state as understood by international law and practice; the term also covers some territorial entities that are not states but for which statistical data are maintained and provided internationally on a separate and independent basis.

Preface

The Annual Report on Exchange Arrangements and Exchange Restrictions has been published by the IMF since 1950. It draws on information available to the IMF from a number of sources, including that provided in the course of official staff visits to member countries, and has been prepared in close consultation with national authorities.

This project was coordinated in the Monetary and Capital Markets Department under the guidance of Annamaria Kokenyne by a staff team led by Salim M. Darbar and comprising Pamela Cardozo, Ricardo Cervantes, Pornpinun Chantapacdepong, Gergana Gencheva, Michael Gottschalk, Jerzy Jiang, Tiffany Lacroux, Isabella Perez, Svetlana Popova, Felipe Rojas, Markus Specht, Ashvik Viswanathan, and Hanqing Ye and Viktoriya Zotova (both external consultants). It draws on the specialized contributions of that department (for specific countries), with assistance from staff members of the IMF’s five area departments, together with staff of other departments. The report was edited and produced by Wala’a El Barasse and Rumit Pancholi of the Communications Department.
**Abbreviations**

ACU Asian Clearing Union (Bangladesh, Bhutan, India, Islamic Republic of Iran, Myanmar, Nepal, Pakistan, Sri Lanka)

AD Authorized dealer

AFTA ASEAN Free Trade Area (see ASEAN, below)

AGOA African Growth and Opportunity Act (United States)

AIFMD Alternative Investment Fund Managers Directive

AIFs Alternative investment funds

AML Anti-money laundering

AMU Asian monetary unit

ASEAN Association of Southeast Asian Nations (Brunei Darussalam, Indonesia, Malaysia, Philippines, Singapore, Thailand)

BCEAO Central Bank of West African States (Benin, Burkina Faso, Côte d’Ivoire, Guinea-Bissau, Mali, Niger, Senegal, Togo)

BEAC Bank of Central African States (Cameroon, Central African Republic, Chad, Republic of Congo, Equatorial Guinea, Gabon)

CACM Central American Common Market (Costa Rica, El Salvador, Guatemala, Honduras, Nicaragua)

CAMU Central African Monetary Union

CAFTA Central American Free Trade Agreement

CAP Common agricultural policy (of the EU)

CARICOM Caribbean Community and Common Market (Antigua and Barbuda, Barbados, Belize, Dominica, Grenada, Guyana, Haiti, Jamaica, Montserrat, St. Kitts and Nevis, St. Lucia, St. Vincent and the Grenadines, Suriname, Trinidad and Tobago); The Bahamas is also a member of CARICOM, but it does not participate in the Common Market

CB Central bank

CD Certificate of deposit

CFT Combating the financing of terrorism

CEFTA Central European Free Trade Area (Bulgaria, Hungary, Poland, Romania, Slovak Republic, Slovenia)

CEMAC Central African Economic and Monetary Community (members of the BEAC)

CEPGL Economic Community of the Great Lakes Countries (Burundi, Democratic Republic of the Congo, Rwanda)

CET Common external tariff

CFA Communauté financière d’Afrique (administered by the BCEAO) and Coopération financière en Afrique centrale (administered by the BEAC)

CIMA Code Chartered Institute of Management Accountants Code of Ethics for Professional Accountants

CIS Commonwealth of Independent States (Armenia, Azerbaijan, Belarus, Georgia, Kazakhstan, Kyrgyz Republic, Moldova, Russian Federation, Tajikistan, Turkmenistan, Ukraine, Uzbekistan)

CITES Convention on International Trade in Endangered Species of Wild Fauna and Flora

1 Note: This list does not include acronyms of purely national institutions mentioned in the country chapters.
CMA Common Monetary Area (a single exchange control territory comprising Eswatini, Lesotho, Namibia, and South Africa)

CMEA Council for Mutual Economic Assistance (dissolved; formerly Bulgaria, Cuba, Czechoslovakia, German Democratic Republic, Hungary, Mongolia, Poland, Romania, U.S.S.R., Vietnam)

CRD Capital Requirements Directive

CRR Capital Requirements Regulation

COMESA Common Market for Eastern and Southern Africa (Burundi, Comoros, Democratic Republic of Congo, Djibouti, Egypt, Eritrea, Eswatini, Ethiopia, Kenya, Madagascar, Malawi, Mauritius, Namibia, Rwanda, Seychelles, Sudan, Uganda, Zambia, Zimbabwe)

CPI Consumer price index

DSTI Debt-service-to-income

EAC East African Community

EBRD European Bank for Reconstruction and Development

EC European Council (Council of the European Union)

ECB European Central Bank

ECCB Eastern Caribbean Central Bank (Anguilla, Antigua and Barbuda, Dominica, Grenada, Montserrat, St. Kitts and Nevis, St. Lucia, St. Vincent and the Grenadines)

ECCU Eastern Caribbean Currency Union

ECOWAS Economic Community of West African States (Benin, Burkina Faso, Cape Verde, Côte d’Ivoire, The Gambia, Ghana, Guinea, Guinea-Bissau, Liberia, Mali, Niger, Nigeria, Senegal, Sierra Leone, Togo)

ECSC European Coal and Steel Community

EEA European Economic Area

EFSF European Financial Stability Facility

EFSM European Financial Stability Mechanism

EFTA European Free Trade Association (Iceland, Liechtenstein, Norway, Switzerland)

EIB European Investment Bank

EMU European Economic and Monetary Union (Austria, Belgium, Cyprus, Estonia, Finland, France, Germany, Greece, Ireland, Italy, Latvia, Luxembourg, Malta, Netherlands, Portugal, Slovak Republic, Slovenia, Spain)

EPZ Export processing zone

ERM Exchange rate mechanism (of the European monetary system)

EU European Union (formerly European Community); Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, the Netherlands, Poland, Portugal, Romania, Slovak Republic, Slovenia, Spain, Sweden

FATF Financial Action Task Force on Money Laundering (of the OECD)

FDI Foreign direct investment

FEC Foreign exchange certificate

FIU Financial intelligence unit

FSU Former Soviet Union

FTA Free trade agreement

G7 Group of Seven advanced economies (Canada, France, Germany, Italy, Japan, United Kingdom, United States)

Overview

This is the 73rd issue of the Annual Report on Exchange Arrangements and Exchange Restrictions (AREAER), which provides a yearly description of the foreign exchange arrangements, exchange and trade systems, and capital controls of all IMF member countries.1 The AREAER reports on restrictions in effect under Article XIV, Section 2, of the IMF’s Articles of Agreement in accordance with Section 3 of Article XIV, which mandates annual reporting on such restrictions.2 It also provides information relating to paragraph 25 of the 2012 Integrated Surveillance Decision, which restates the obligation of each member country under the IMF’s Articles of Agreement to notify the IMF of the exchange arrangement it intends to apply and any changes in that arrangement.3

The AREAER provides a description of global exchange and trade systems. It covers restrictions on current international payments and transfers and multiple currency practices (MCPs) subject to the IMF’s jurisdiction in accordance with Article VIII, Sections 2(a) and 3, in addition to those maintained under Article XIV of the IMF’s Articles of Agreement.4 The report also provides information on the operation of foreign exchange markets, controls on international trade, controls on capital transactions, and measures implemented in the financial sector, including prudential measures. In addition, the AREAER reports on exchange measures imposed by member countries solely for national and/or international security reasons, including those reported to the IMF in accordance with relevant decisions by the IMF Executive Board.5

The AREAER provides information, relating to paragraph 25 of the 2012 Integrated Surveillance Decision, on exchange rate arrangements of member countries: the de jure arrangements as described by the countries and the de facto arrangements, which are classified into 10 categories (Table 1). This classification is based on the information available on members’ de facto arrangements, as analyzed by IMF staff, which may differ from countries’ officially announced (de jure) arrangements. The methodology and the characteristics of the categories are described in the Compilation Guide included in this report.

Note: This methodology became effective February 2, 2009, and reflects an attempt to provide greater consistency and objectivity of exchange rate classifications across countries and to improve the transparency of the IMF’s bilateral and multilateral surveillance in this area. For further details, see IMF Working Paper 09/211.

1 In addition to the 190 IMF member countries, the report includes information on Hong Kong SAR and with this issue also for Macao SAR (both in the People’s Republic of China) as well as Aruba, Curaçao, and Sint Maarten (all in the Kingdom of the Netherlands).
4 The information on exchange restrictions and MCPs consists of verbatim quotes from each country’s most recent published IMF staff report as of December 31, 2021. In cases in which the information is drawn from IMF staff reports that have not been made public, the quotes have been included with the express consent of the member country. In the absence of such consent, the relevant information is reported as “not publicly available.” Any changes to these restrictions and MCPs implemented after the relevant IMF report has been issued will be reflected in the subsequent issue of the AREAER that covers the year during which the IMF staff report with information on such changes is issued.
5 The information on exchange measures imposed for security reasons is based solely on information provided by country authorities.
Several tools help navigate and interpret the findings of this report. A single table compares the characteristics of the exchange and trade systems of all IMF member countries: Summary Features of Exchange Arrangements and Regulatory Frameworks for Current and Capital Transactions in Member Countries. The Country Table Matrix lists the categories of data reported for each country, and the Compilation Guide includes definitions and explanations used to report the data.

The AREAER is available online. As of January 1, 2020, access to AREAER Online is freely available to all; previously a subscription was required. The AREAER Online database includes the overview and detailed information for each of its 190 member countries and separately for a few members’ territories, which increased by one in this issue with the inclusion of information from Macao SAR. In addition, AREAER Online contains data published in previous issues of the AREAER and is searchable by year, country, and category of measure; it also allows cross-country comparisons for time series.6

In general, previous vintages of the AREAER published in a particular year included a description of exchange and trade systems as of the end of December of the previous year, with some reporting data through part of the publication year and de facto exchange rate arrangements as of the end of April of the publication year. The 2022 AREAER, similarly to the previous year’s publication, includes a description of exchange and trade systems as of June 30, 2022, for virtually all members; some report developments through September 30, 2022. Nevertheless, in keeping with past AREAERs, information on member countries’ de facto exchange rate arrangements in this report are as of April 30, 2022, while information on exchange restrictions and MCPs is indicated as reported in the latest IMF staff reports as of December 31, 2021.

**Overall Developments**

Global growth recovered in 2021 compared to the historic low of 2020. World GDP grew at 6.2 percent in 2021 (January 2023 World Economic Outlook [WEO]) compared to –3 percent in 2020 (October 2022 WEO). Emerging market and developing economies experienced more growth in 2021 than advanced economies (6.7 percent versus 5.4 percent, respectively). The revival in economic activity in 2021 was accompanied by rising inflation in part because of rising commodity and energy prices, surge in shipping costs reflecting pandemic-related supply constraints, and pick-up in demand. These trends prompted monetary policy tightening in several emerging markets to counter inflationary pressures while financial conditions eased in advanced economies through most of the year, even though some advanced central banks took steps toward policy normalization. Capital flows to emerging market and developing economies recovered in 2021 from the sharp fall in 2020. Compared to 2020, countries introduced more easing and less tightening actions in the areas covered in the AREAER in part reflecting gradual reversal of some measures taken in response to the pandemic. At the same time a large number of measures taken in response to the pandemic were extended.

In 2022 global economic activity was heavily impacted by the adverse shock of Russia’s invasion of Ukraine and the worldwide cost-of-living crisis caused by persistent and broad-based inflationary pressures. In addition, economic activity was adversely impacted by the COVID-19–related slowdown in China. As a result, overall world GDP growth is estimated at 3.4 percent with advanced economies experiencing 2.7 percent and emerging market and developing economies 4 percent (April 2023 WEO). Central banks in advanced economies

---

6 Aruba, Curacao, and Sint Maarten (all in the Kingdom of the Netherlands; information for Curacao and Sint Maarten is reported together as they have a common central bank) and Hong Kong SAR and Macao SAR (both in the People’s Republic of China). Hence, detailed information is available for 194 jurisdictions.
7 For further information on these resources, see https://www.bookstore.imf.org/areaer-and-macroprudential-statistics-gateway or https://www.imf.org/en/Publications/Search?sort=relevancy&fseries=[ANNREPEAER]
8 The number of yearly changes reported by each country can be compared directly with those of the previous five reporting periods but not with those of years before that because of the update to the format of the yearly changes table, which was introduced with the 2017 publication (see the 2017 AREAER).
9 The date of the latest reported development is indicated as the position date for each country in the country chapters in the AREAER Online database. A few countries reported developments beyond September 2022. Data for Syria are as of the end of 2017 and Afghanistan and Venezuela as of the end of June 2021. Updates to the Myanmar country chapter was based solely on publicly available information.
economies responded by sharply raising interest rates to counter rising inflation. Global headline inflation may have peaked, notably in the United States, the euro area, and Latin America (January 2023 WEO), and there are indications that inflation may have peaked in some emerging market economies, but both headline and core inflation remain above target in most emerging markets (April 2023 Global Financial Stability Report). The tightening of global financial conditions has led to capital outflows from many emerging and frontier market economies. The trend in easing measures observed in 2021 slowed reflecting that the reversal to pre-pandemic regulations in some cases was completed.

The 2022 AREAER documents the following major trends and significant developments:

- There was no significant shift in de facto exchange rate arrangements during this reporting period compared with the end of April 2021; about the same number of economies moved toward more flexibility as moved toward reduced flexibility. However, the number of reclassifications was reduced by half, reflecting global economic improvement and less influence of the COVID-19 pandemic on countries’ exchange rate policy. The impact of the Russian war on exchange rates is limited in this year’s AREAER since the cutoff date for the classifications is April 30, 2022.

- Monetary policy frameworks remained unchanged compared with the previous period. While the number of countries with an exchange rate anchor increased this was the result of adding Macao SAR to this year’s AREAER, which reported having an exchange rate anchor vis-à-vis the Hong Kong dollar.

- A number of central banks reported taking extraordinary measures in the foreign exchange market in early 2021 through interventions to reduce the pace of depreciation of their currencies in response to the high uncertainty associated with the increase of COVID-19 cases and concerns regarding progress with vaccination. However, some of these measures were discontinued later in 2021 as the impact of the pandemic abated.

- The pace of foreign exchange market liberalization has moderated over the course of 2021 and 2022 from the upsurge of easing experienced in 2020. Overall changes in foreign exchange markets saw a sharp decline in 2021 relative to 2020, but 2022 has reversed year-over-year this trend, particularly due to an acute increase in tightening measures, with Türkiye and Ukraine accounting for more than a third of all measures. For a number of countries, the scale up of tightening measures in 2022 reflect their response to economic fallout following the Russian invasion of Ukraine and greater global financial uncertainty. While tightening is the predominant theme in most market categories in 2022, further liberalization occurred in the forward markets in 2021 and 2022, allowing banks to contract more foreign exchange derivative operations and customers to better hedge their foreign exchange exposures using foreign exchange swaps.

- The number of IMF member countries accepting the obligations of Article VIII, Sections 2(a), 3, and 4, and those members who make use of the transitional arrangement under Article XIV remained unchanged at the end of 2021: 174 and 16, respectively, after Andorra and Myanmar accepted Article VIII obligations in 2020. The number of countries maintaining restrictive exchange measures declined from 47 in 2020 to 45 at the end of 2021. Overall, the number of restrictive exchange measures increased by one in 2021 and the composition changed: the number of such measures decreased by 2 in Article XIV countries and increased by 3 in Article VIII countries.

- Liberalizing actions dominated the current account in 2021, amid a decreased number of measures. Trade-related measures fell in 2021, with both liberalizing and tightening reflecting actions taken in response to the pandemic and reversals of these temporary measures as the pandemic abated. The liberalizing trend in payments and proceeds for invisible transactions and current transfers also regained some traction in 2021 but reversed in 2022 as members once again introduced relatively more tightening measures than easing measures. Liberalizing measures in account transactions rose in 2021, since many countries lifted regulations related to the COVID-19 pandemic, such as limits on foreign exchange transfers. In contrast, available data for 2022 show a sharp increase in tightening measures largely attributed to actions taken in response to the invasion of Ukraine by Russia.

- The number of actions on international capital flows in 2021 rose significantly from the previous year, mainly on account of easing both outflow and inflow controls. This may reflect the relaxation of pandemic-related measures, and more importantly by other factors, indicating that the liberalization trend, interrupted by the pandemic, may have begun to gather momentum. Tightening actions were markedly lower
in part because of the smaller number of new COVID-19–related tightening measures as the intensity of the pandemic waned. As a result, changes in capital transactions in 2021 were no longer dominated by COVID-19–related measures. In addition, many tourism-dependent emerging market and developing economies and low-income developing countries, which were severely affected by the pandemic, gradually relaxed their temporary outflow controls and eventually removed them in 2022. The majority of actions on capital transactions were taken by emerging market and developing economies. Tightening actions increased in 2022 based on partial year data and could largely be attributed to restrictions implemented by Russia and Ukraine to prevent capital outflows following the invasion by Russia into Ukraine.

• Policy action in 2020, in response to the pandemic, focused on easing prudential measures on banks, while 2021–22 saw many of these actions being reversed to pre-pandemic state resulting in a high number of tightening measures. In addition, some pandemic related measures were extended in 2021–22. Most changes in prudential measures on commercial banks were tightening and the majority increased reserve requirements, as countries reversed reductions implemented during the pandemic and began a tightening cycle to fight inflationary pressures. In contrast, capital outflow controls imposed in 2020 by a few countries in response to the pandemic were gradually lifted in 2021 particularly on institutional investors.

Developments in Exchange Arrangements

This section documents major changes and trends in the following related areas: exchange rate arrangements, intervention, monetary anchors, and the operation and structure of foreign exchange markets. It also reports on significant developments with respect to exchange taxes, exchange rate structures, and national currencies. There are five tables in this section. Table 2 highlights changes in the reclassification of the de facto exchange rate arrangements between May 1, 2021, and April 30, 2022. Table 3 breaks down countries’ de facto exchange rate arrangements for 2014–22. Table 4 summarizes the detailed descriptions in the country chapters by reporting each IMF member country’s monetary policy framework as indicated by country officials and the classification of their de facto exchange rate arrangements. Table 5 outlines IMF member countries’ monetary policy frameworks as reported by country authorities and exchange rate anchors for 2014–22, and Table 6 reports the foreign exchange market structure among the membership for 2018–22.

Exchange Rate Arrangements

Global economic improvement continued in 2021 despite divergence across regions. At the same time, global financial market uncertainty persisted in response to emerging risks, including transmission of the Delta variant, market anticipation of tapering by the Federal Reserve, and concerns about inflationary pressures. The policy responses, particularly in advanced economies, eased global financial market uncertainty and reduced the intensity of capital outflows from emerging market and developing economies, dampening pressure on their exchange rates.

During the first half of 2022, the US dollar strengthened against most of the currencies of developed countries and some currencies of emerging market economies. This strengthening was associated with increased demand for safe-haven assets and with expectations and materialization of a tighter monetary policy by the Federal Reserve.

For the period May 2021 to April 2022, the number of reclassifications in de facto exchange rate arrangements reached only half of those in the previous period (15), with nearly equal number of countries moving from less to more flexible exchange rate arrangements and vice versa (Table 2). Of the 15 countries whose
exchange rate arrangement was reclassified as of April 2022, 8 countries (53 percent) were reclassified to a more flexible arrangement (compared with 14 of 30 countries, or 47 percent, during the previous reporting period), and 7 countries (47 percent) were classified to a more managed arrangement (compared with 16 of 30 countries, or 53 percent, during the previous reporting period).

Source: AREAER database.

1 This column refers to the arrangements as reported in the 2021 AREAER, except when a reclassification took place during January 1–April 30, 2021, in which case it refers to the arrangement preceding such a reclassification.

2 The exchange rate arrangement was reclassified retroactively, overriding a previously published classification for the entire reporting period or part of the period.

3 Cells in the column “Previous arrangement” are blank if there was a subsequent reclassification during the reporting period.

During this AREAER’s reporting period, the share of countries among the total number of reclassifications whose exchange rate arrangement was reclassified (as of April 30, 2022) to floating rose by 10 percentage points, from 23 percent in the previous period (Figure 1). Since 2020 the share of floating arrangements among total number of reclassifications has increased in each reporting period reaching 33 percent in 2022, while the share of “other managed” arrangements has declined to 7 percent during the same period. Generally, at least two-thirds of the reclassifications reported each year took place in soft peg arrangements. The share of countries among total reclassifications whose exchange rate arrangement was reclassified to a soft peg decreased by 7 percentage points, from 67 percent in the previous AREAER. The residual category (other managed arrangement) usually increases during heightened uncertainty in the economic environment.

12 For a list of soft peg classifications, see Table 1.
The changes in individual categories are as follows:

• **Soft pegs**—Although the total number of countries with soft pegs hardly changed (a net decrease of 1, to 91), compared with the previous reporting period, the majority of reclassifications took place in this group, with most of the changes in crawl-like and stabilized arrangements. Countries adopting stabilized and crawl-like arrangements often adjust their exchange rates in response to external events, including differences in inflation across countries, capital flow pressures, and new trends in world trade. As a result, they are often reclassified to other categories within the soft peg group. Soft pegs continue to make up the single largest type of exchange rate arrangement, accounting for 46.9 percent of members (Table 3).

  • **Crawl-like arrangements**—The number of countries with crawl-like arrangements remained at 24, following a steady increase since 2017 (Figure 2; Table 4). However, this category registered most of the changes in this reporting period (12). Six countries were added: two were reclassified from floating (Mauritius, Sri Lanka), one from “other managed” (Kenya13), and three from stabilized (Algeria, Bangladesh, The Gambia). Six countries exited this classification: two moved to stabilized arrangement (Malawi, Mozambique14), one to “other managed” (South Sudan), and three to floating (Costa Rica, Philippines, Zambia).

  • **Stabilized arrangements**—The number of countries with stabilized arrangements decreased by 1, to 23. Within soft pegs, following crawl-like arrangements, this category registered the second largest number of changes (7). Three countries joined the group: two from crawl-like arrangement (Malawi, Mozambique) and one from “other managed” (Kyrgyz Republic). Four countries left this group: one to floating (Suriname), and three to crawl-like (Algeria, Bangladesh, The Gambia). One country was reclassified twice during this reporting period, reverting to stabilized arrangement (Sudan16).

  • **Conventional pegs**—The number of countries in this category remains at 40 with no changes during this AREAER period. The conventional peg arrangement holds the largest share among soft pegs, with 44 percent, although it has been decreasing gradually since April 2016 from its peak of 58 percent.

  • **Crawling pegs**—The number of countries in this group remained at three (Botswana, Honduras, Nicaragua).

---

13 Mauritius was reclassified retroactively twice—to “stabilized” in May 2020 and to “crawl-like” in December 2020. Retroactive changes are reflected as of January 1, 2021, corresponding to the first day of the period covered in this year’s AREAER.

14 Kenya was reclassified twice—retroactively to “floating” in December 2020 and to “crawl-like” in May 2021. Retroactive changes are reflected as of January 1, 2021, corresponding to the first day of the period covered in this year’s AREAER.

15 Mozambique was reclassified twice—to “other managed” in January 2021 and to “stabilized” in June 2021.

16 Sudan was reclassified twice—to “other managed” in April 2021 and to “stabilized” in July 2021.
Pegged exchange rates within horizontal bands—There was no change in this category that contains one country (Morocco). Three other countries have de jure pegged exchange rates within horizontal bands, but two of them have de facto “other managed” exchange rate (Syria, Tonga), and one has a de facto stabilized arrangement (Maldives).

- Other managed arrangements—The number of countries in this residual category decreased by 1, to 11. There were three changes from May 2021 through April 2022. Two countries were removed from this category: one was reclassified to crawl-like (Kenya17) and the second one to stabilized (Kyrgyz Republic). In contrast, one country was added from crawl-like (South Sudan).

- Floating arrangement—The number of countries classified as floating increased by 3 to 35, with 7 changes in the group’s composition. Five countries were added: one from free-floating (Czech Republic), three from crawl-like (Costa Rica, Philippines, Zambia), and one from stabilized (Suriname). Two abandoned this category and were reclassified to crawl-like (Mauritius, Sri Lanka).

- Free floating—The number of countries with free-floating arrangements decreased by 1, to 31, as Czech Republic was reclassified to floating in January 2022, when the Czech National Bank (CNB) resumed its program of foreign exchange sales as part of its management of international reserves.

- Hard pegs (no separate legal tender and currency boards)—The number of countries in this category increased by 1, to 26, as the AREAER started to report on Macao SAR with the classification “currency board.” Changes in this category are rare, because countries with such arrangements tend to maintain their exchange rate policies unless their economies undergo large structural changes that result in an exit.

Sources: AREAER database; and IMF staff calculations.

1 Currently 190 member countries and the following territories: Aruba, Curaçao, and Sint Maarten (all in the Kingdom of the Netherlands; information for Curaçao and Sint Maarten is reported together as they have a common central bank) and Hong Kong SAR and Macao SAR (both in the People’s Republic of China).

2 Includes Nauru, which became an IMF member on April 12, 2016.

3 Includes Andorra, which became an IMF member on October 16, 2020.

4 Includes Macao SAR, which was added to this year’s AREAER.

17 Kenya was reclassified twice—retroactively to “floating” in December 2020 and to “crawl-like” in May 2021. Retroactive changes are reflected as of January 1, 2021, corresponding to the first day of the period covered in this year’s AREAER.
The exchange rate remained the anchor for monetary policy for fewer than half of the member countries—41.8 percent (Table 5). In contrast to the five changes during the previous period, there were no changes in official monetary anchors in this year’s AREAER, except Macao SAR, which reported having an exchange rate anchor vis-à-vis the Hong Kong dollar, was added this year to the AREAER (see Table 4).

An officially announced fixed exchange rate policy—either as a hard peg or soft peg—implies the use of the exchange rate as the unique monetary anchor. Seventy-nine member countries report having such an arrangement with seven exceptions. Although the official (de jure) exchange rate regime of these seven countries is a soft peg, five countries reported the use of a mix of monetary policy tools, including exchange rate anchor under an “other monetary framework” (Argentina, Solomon Islands, Tonga, Vanuatu, Venezuela), and two countries reported targeting monetary aggregates (Bolivia, Samoa). Among the 66 countries with de facto floating exchange rate arrangements—floating or free floating—the monetary anchor varies among monetary aggregates (5), inflation targeting (37), and “other” (24, including the 19 European Economic and Monetary Union [EMU] countries). In the group of countries targeting monetary aggregates (25) there are 16 countries implementing soft pegs, 4 countries having other managed, and 5 countries floating arrangements. Countries with either stabilized or crawl-like arrangements (47) report reliance on a variety of monetary frameworks, including monetary aggregates and inflation-targeting frameworks. Other managed arrangements (11) are split among exchange rate anchors (2), monetary aggregate targets (4), and other monetary policy frameworks (5).

- The share of IMF members with the exchange rate as the main policy target increased slightly, by 0.3 percentage point, to 41.8 percent. Countries with hard pegs and soft pegs make up 97.5 percent of this group. Three currency unions—the Central African Economic and Monetary Community, Eastern Caribbean Currency Union, and West African Economic and Monetary Union—have exchange rate anchors for their respective common currency.

- The US dollar maintained its position as the dominant exchange rate anchor, at 19.1 percent. Following a steady decrease from 26.5 percent since 2010, the number of countries using this anchor stabilized from April 2018 to April 2020 but continued decreasing during this reporting period by 0.1 percent, to 19.1 percent.

---

Monetary anchors are defined as the main intermediate target the authorities pursue to achieve their policy goal (which, overwhelmingly, is price stability). The inventory of monetary anchors is based mainly on members’ declarations in the context of the yearly AREAER update or Article IV consultations and is not necessarily consistent with the de facto exchange rate arrangement.
• The euro is the second dominant exchange rate anchor, at 13.4 percent. Countries with currencies anchored to the euro generally have historical ties with European countries—for example, the Communauté Financière d’Afrique (CFA) franc area countries; are part of the European Union; or have strong trade relations with western Europe, including central and eastern European countries—for example, Bulgaria (currency board with the euro), North Macedonia (de jure floating arrangement), and Montenegro (uses the euro as its legal tender).

• The share or composition of countries using an exchange rate anchored to another currency increased by 0.5 percentage points to 5.2 percent, which reflects the addition of Macao SAR’s monetary policy framework targeting an exchange rate anchor to the Hong Kong dollar. Ten countries maintain an exchange rate anchored to another single currency. Three of these countries (Kiribati, Nauru, Tuvalu) use the Australian dollar as their legal tender, one (Brunei Darussalam) has a currency board arrangement with the Singapore dollar, and one (Macao SAR) has a currency board to the Hong Kong dollar. The remaining five have conventional pegged arrangements: three (Eswatini, Lesotho, Namibia) are pegged to the South African rand and two (Bhutan, Nepal) to the Indian rupee. Half the countries in this group are landlocked, bordering partially or exclusively the country whose currency they use as their exchange rate anchor. The anchor currency is typically freely usable in the country and is often legal tender.

• Eight countries reported having a monetary policy framework with the exchange rate anchored to a currency composite. Two countries track special drawing rights (SDRs) as their sole currency basket (Libya, Syria) and one the SDR and the rand (Botswana). Vietnam anchors to a broader reference basket and additionally specified that the dong may fluctuate within a daily transaction band of ±3 percent against the US dollar. Singapore is anchored to its nominal effective exchange rate. Morocco tracks a euro and US dollar basket. The Fiji dollar is anchored to a basket of five currencies (US dollar, Australian dollar, New Zealand dollar, Japanese yen, euro). Kuwait does not disclose the composition of its reference currency basket.

Most IMF member countries, representing the overwhelming share of global output, are split among monetary aggregate targeting, inflation-targeting, and “other” (which includes monetary policy not committed to a specific target).

• The number of countries targeting a monetary aggregate remained at 25, as in the previous reporting period. This category does not include any country with a free-floating exchange rate arrangement. In fact, monetary aggregates are often the choice of economies with less developed financial markets and managed exchange rates. The objective of the arrangement is to influence consumer prices and, eventually, asset prices through the control of monetary aggregates. Reserve money is often used as the operational target to control credit growth through the credit multiplier.

• The number of countries that reported targeting inflation remained at 45. The countries in this group are mostly middle income but include some advanced economies as well. Of these, 37 have either a de facto floating or free-floating exchange rate arrangement. The central bank is responsible for setting the inflation target for 22 of the 45 countries in this category, and in 18 countries the central bank and the government jointly set the targets. About half of the countries (24) have a target with a tolerance band, with only two countries targeting core inflation. Most of the countries (42) report having inflation-targeting regime commitments to transparency and accountability.

• The “other monetary policy framework” category remained at 43. A few countries in this category are in transition to an inflation-targeting framework (Egypt, Mongolia, Mozambique, Pakistan, Tunisia). This category includes many of the largest economies, such as the euro area and the United States. It is also used as a residual classification for countries for which no relevant information is available and for those with alternative monetary policy frameworks not categorized in this report.

19 Inflation-targeting aims to address the problem of monetary aggregates that do not have a stable relationship with prices, making intermediate monetary targets less suitable for inflation control.
Foreign Exchange Interventions

IMF staff regularly assess whether the frequency of foreign exchange intervention is consistent with the de facto free-floating arrangements or whether classification as a soft peg is appropriate (see the Compilation Guide). These assessments draw on information that is publicly available, information reported to the IMF by member countries, market reports, and other sources, including information obtained during official staff visits to member countries.

Intervention purpose

In general, central banks intervene to build reserves or to dampen excessive market volatility, but they may also intervene in the foreign exchange market to fight appreciation/depreciation pressure on the country’s currency. In the case of pegged arrangements, countries intervene in the foreign exchange market to maintain the exchange rate at a certain target level or range, or within a fluctuation band with respect to a central rate.

In 2021, pandemic-related restrictions started to ease globally, but uncertainty around the increasing COVID-19 cases and concerns on the vaccination progress affected global financial markets, particularly in the second half of 2021, in addition to higher inflation due to rising energy prices and supply disruptions. This heightened economic uncertainty, alongside domestic factors in some cases, led to rapid depreciation in the currencies of many emerging market and developing economies and low-income developing countries. Rapid depreciation occurred most notably in Chile, Ethiopia, Haiti, Lao P.D.R, Pakistan, Türkiye, and Zimbabwe. Of these, four (Haiti, Pakistan, Türkiye, Zimbabwe) continued to depreciate during the first quarter of 2022, while two depreciated at a reduced pace (Ethiopia and Lao P.D.R), and Chile experienced a trend reversal and saw its currency appreciate. Some other countries’ currency depreciated sharply during the first quarter of 2022 (Egypt, Ghana, Sri Lanka).

Intervention techniques

IMF members typically conduct foreign exchange interventions in the spot foreign exchange market, either by directly contacting market participants (all or only a selection—for example, market makers) or through foreign exchange auctions (for more information on auctions, see the Foreign Exchange Markets section of this report). However, foreign exchange interventions occasionally also take place in the forward or options markets or through verbal intervention.

Preannounced programs of future purchases and sales of foreign exchange typically are counted as one intervention in the foreign exchange market for the purpose of the de facto classification, with the assumption that the market prices the new information on the day the program is announced. To avoid influencing market expectations about the exchange rate at the time when the actual interventions take place, the program of interventions should indicate in advance the nature, frequency, and size of the central bank’s foreign exchange transactions. Among the mechanisms currently used in preannounced intervention programs, countries accumulate reserves following a preannounced calendar of auctions (Albania) or conduct purchases and sales of foreign exchange for the government pension fund (Norway). Similarly, a preannounced program that based its volume and direction of intervention on the difference in the projected and actual amount of oil and gas revenue was in use in Russia. In this case, an excess in the actual oil and gas revenue compared to the amount projected would produce a purchase of foreign currency, while a shortfall would result in a sale of foreign currency in the foreign exchange market. The size of these operations was announced at the beginning of every month, and purchases were evenly distributed throughout the month.

Some countries use derivatives as an alternative to spot interventions in the foreign exchange market. The National Bank of Georgia used to sell foreign exchange put options via auctions to accumulate reserves but has not done so since April 2019. The Central Bank of Chile implemented a program of interventions in the foreign exchange spot market and through non-deliverable forwards (NDFs) to address risks of disorderly conditions in the foreign exchange market. The Central Bank of Mexico uses NDFs for interventions with maturities of up to 12 months and settled in pesos. Similarly, the Central Bank of Colombia can intervene in the foreign exchange market through

---

20 Very small, retail-type transactions are disregarded.
(1) direct uniform price auction sales of put or call options, (2) direct uniform price auctions (with three minutes of bids) or discriminatory price auction sales of foreign exchange (with three minutes of bids), (3) spot sales of foreign exchange by means of foreign exchange swap contracts at rates set by the central bank in auctions or over the counter, and (4) forward dollar sales through forward contracts. The Bank of Korea can also intervene in the market with its funds and funds from the Foreign Exchange Equalization Fund when it is deemed necessary for market stability. The Central Reserve Bank of Peru can use dollar-indexed bonds, foreign exchange swaps, and repurchase agreements for interventions. The Central Bank of Brazil intervenes mainly in the derivatives market using foreign exchange swaps. Since March 2020, it has provided extra foreign exchange liquidity with the use of Brazilian Global dollar-denominated bond repurchase agreements, open only to foreign exchange dealers.

Additional measures in response to COVID-19

At the beginning of 2021, a number of central banks reported having taken extraordinary measures in the foreign exchange market through interventions to reduce the pace of depreciation of their currency in response to the high uncertainty associated with the increase of COVID-19 cases and concerns regarding the vaccination progress. However, some of these measures were discontinued throughout 2021.

Among the extraordinary measures the central bank of Colombia took in response to the crisis caused by COVID-19, the board of directors decided to renew the maturities of NDF contracts for the sale of dollars through the auction mechanism on the maturity dates. Accordingly, US$90.9 million, corresponding to the renewal of the maturities of the remaining balance of these operations, was offered at auction on March 20, 2021; however, no bids were submitted. Subsequently, the bank did not carry out any further intervention operations in the foreign exchange market.

Mexico’s Foreign Exchange Commission (FEC) operates an intervention mechanism through a foreign exchange hedging program. The foreign exchange hedging is auctioned through NDFs. As a response to the surge in global financial market volatility because of the spread of COVID-19, the FEC announced (1) an increase in the foreign exchange hedging program up to US$30 billion in NDFs, which must be rolled over under a rollover auction until the FEC instructs otherwise, and (2) a US dollar liquidity swap line established with the Federal Reserve valid through September 30, 2021, for up to US$60 billion (extended through December 2021). The FEC decided to conclude the dollar-denominated financing auction mechanism at its expiration on December 31, 2021.

The Bank of Mauritius (BOM) conducts a single price foreign exchange auction at its initiative. Banks and foreign exchange dealers may participate in the auction. In October 2021, the BOM stopped allowing foreign exchange dealers at the auctions. Previously, since October 6, 2020, the BOM had resumed intervention with foreign exchange dealers after a long hiatus in response to the effect of the COVID-19 pandemic on the domestic market.

Official Exchange Rates

The vast majority (168) of IMF member countries report that they publish official exchange rates. This includes not only countries that have officially determined exchange rates, but by definition, also those countries that report a reference or indicative exchange rate computed and/or published by the central bank (see the Compilation Guide). The calculation of these exchange rates is often based on market exchange rates, such as those used in interbank market transactions or in a combination of interbank and bank-client transactions during a specified observation period. The published exchange rate is used as a guide for market participants in their foreign exchange transactions, for accounting and customs valuation purposes, in exchange transactions with the government, and sometimes are prescribed for specific exchange transactions.

During the 2021–22 reporting period, several countries adopted new methods for calculating their official exchange rates (Armenia, Cambodia, Honduras, Myanmar, Rwanda, Sudan, South Sudan, Ukraine, Uzbekistan). Countries from all income levels and various geographic regions are represented among the 26 members that report no official or reference exchange rates; about half (13) are countries with no separate legal tender, 5 are soft pegs, 7 are floating or free floating, and 1 has the residual other managed de facto exchange rate arrangement. Among the countries that do not compute an official exchange rate, some, including Peru and Singapore, publish the market-determined rates on their monetary authority’s website to promote information transparency.
Table 4. De Facto Classification of Exchange Rate Arrangements, as of April 30, 2022, and Monetary Policy Frameworks

The classification system is based on the members’ actual, de facto arrangements as identified by IMF staff, which may differ from their officially announced, de jure arrangements. The system classifies exchange rate arrangements primarily on the basis of the degree to which the exchange rate is determined by the market rather than by official action, with market-determined rates being on the whole more flexible. The system distinguishes among four major categories: hard pegs (such as exchange arrangements with no separate legal tender and currency board arrangements) soft pegs (including conventional pegged arrangements, pegged exchange rates within horizontal bands, crawling pegs, stabilized arrangements, and crawl-like arrangements) floating regimes (such as floating and free floating) and a residual category, other managed. This table presents members’ exchange rate arrangements against alternative monetary policy frameworks to highlight the role of the exchange rate in broad economic policy and illustrate that different exchange rate regimes can be consistent with similar monetary frameworks. The monetary policy frameworks are as follows:

**Exchange rate anchor**

The monetary authority buys or sells foreign exchange to maintain the exchange rate at its predetermined level or within a range. The exchange rate thus serves as the nominal anchor or intermediate target of monetary policy. These frameworks are associated with exchange rate arrangements with no separate legal tender, currency board arrangements, pegs (or stabilized arrangements) with or without bands, crawling pegs (or crawl-like arrangements), and other managed arrangements.

**Monetary aggregate target**

The monetary authority uses its instruments to achieve a target growth rate for a monetary aggregate, such as reserve money, M1, or M2, and the targeted aggregate becomes the nominal anchor or intermediate target of monetary policy.

**Inflation-targeting framework**

This involves the public announcement of numerical targets for inflation, with an institutional commitment by the monetary authority to achieve these targets, typically over a medium-term horizon. Additional key features normally include increased communication with the public and the markets about the plans and objectives of monetary policymakers and increased accountability of the central bank for achieving its inflation objectives. Monetary policy decisions are often guided by the deviation of forecasts of future inflation from the announced inflation target, with the inflation forecast acting (implicitly or explicitly) as the intermediate target of monetary policy.

**Other**

The country has no explicitly stated nominal anchor, but rather monitors various indicators in conducting monetary policy. This category is also used when no relevant information on the country is available.

**Note:** If the member country’s de facto exchange rate arrangement has been reclassified during the reporting period, the date of change is indicated in parentheses (month, year).

- CEMAC = Central African Economic and Monetary Community; ECCU = Eastern Caribbean Currency Union; EMU = European Economic and Monetary Union; WAEMU = West African Economic and Monetary Union.

- 1 Includes countries that have no explicitly stated nominal anchor, but rather monitor various indicators in conducting monetary policy.
- 2 Country chapter for Macao SAR was added to this year’s AREAER.
- 3 The member participates in the European Exchange Rate Mechanism (ERM II).
- 4 The country maintains a de facto exchange rate anchor to a composite.
- 5 The country maintains a de facto exchange rate anchor to the US dollar.
- 6 The country maintains a de facto exchange rate anchor to the euro.
- 7 The central bank is in transition toward inflation-targeting.
- 8 The authorities reported that their monetary policy framework is referred to as “flexible inflation-targeting.”
- 9 The exchange rate arrangement or monetary policy framework was reclassified retroactively, overriding a previously published classification.
- 10 The exchange rate arrangement was reclassified twice during this reporting period.
- 11 Currently the Central Bank of Somalia does not have a monetary policy framework.
- 12 Within the framework of an exchange rate fixed to a currency composite, the Bank Al-Maghrib adopted a monetary policy framework in 2006 based on various inflation indicators, with the overnight interest rate as its operational target to pursue its main objective of price stability.

\(^1\) Includes 190 member countries and the following territories: Aruba, Curaçao, and Sint Maarten (all in the Kingdom of the Netherlands; information for Curaçao and Sint Maarten is reported together as they have a common central bank) and Hong Kong SAR and Macao SAR (both in the People’s Republic of China).

\(^2\) Includes countries that have no explicitly stated nominal anchor but instead monitor various indicators in conducting monetary policy.

\(^3\) Includes Nauru, which became an IMF member on April 12, 2016.

\(^4\) Includes Andorra, which became an IMF member on October 16, 2020.

\(^5\) Includes Macao SAR, which was added to this year’s AREAER.

**Foreign Exchange Markets**

The liberalization of foreign exchange markets slowed during 2021 through September 2022, in contrast with the upsurge of easing experienced in 2020. The upward swing in tightening measures in 2021 and 2022 is partially due to the unwinding of COVID-19–related easing measures introduced in 2020. While tightening measures exceed easing measures in almost every market structure, the forward exchange market saw further liberalization with easing measures comprising more than 50 percent of changes reported.

Member countries reported 58 changes in 2021 affecting foreign exchange markets, a sharp decline (about 57 percent) relative to 2020, but the trend appears to have reversed in 2022 with members reporting 87 changes for the partial year (Figure 3). Measures easing constraints on the operation of foreign exchange markets sharply declined in 2021 compared with 2020. Tightening changes were slightly less than in 2020. The countries with more than one easing or tightening change in 2021 include Sudan and Vietnam (three each) and Colombia, Nigeria, Sri Lanka, and Thailand (two each).

**Figure 3. Measures Adopted in Foreign Exchange Markets, 2018–22**

Sources: AREAER database; and IMF staff calculations.

Note: The position date for 2022 varies by country but is at least the end of June 2022 for most countries with some reporting data through September 2022.
Easing measures in 2021 aimed to facilitate the operation of the foreign exchange market. Belarus permitted bank clients to buy and sell foreign currency through the currency and stock exchange without the involvement of the bank. Colombia expanded the foreign exchange market by allowing several specialized credit institutions to intermediate in the market, and the involvement of the central counterparty clearinghouse in the clearing and settlement of transactions in the foreign exchange market became operational. The Central Bank of Sudan took steps to unify the official exchange rate with the market rate and permitted commercial banks and foreign exchange bureaus to determine their rate in a ±5 percent around the Central Bank of Sudan's indicative rate and increased the allowed maximum profit margin to 0.75 percent from 0.5 percent. In contrast, in 2021, Myanmar tightened foreign exchange trading rules by reintroducing a trading band of ±0.5 percent around a reference rate, which it reduced further in 2022 to ±0.3 percent.

Of the 87 changes reported for 2022, 25 were reported as easing, a slight increase compared to 2021, while the number and share of tightening measures increased significantly from 2021, to 41 changes and about 55 percent, respectively. Türkiye reported the most easing or tightening actions (16) followed by Ukraine (11), Russia (10), and Ecuador and Kyrgyz Republic (4 each).

In 2022, Russia temporarily prohibited sales of foreign currency cash after the onset of the war and prohibited the purchase of foreign currency in the domestic market by nonresident legal entities from unfriendly countries. Subsequently, Russia relaxed the sale of foreign currency but only if obtained after April 9, 2022. It also permitted banks to sell foreign currency to citizens except US dollars and euros, unless the banks acquired these notes after April 9, 2022. In addition, it imposed price constraints on the purchase and sale of foreign currency by nonresident banks from unfriendly countries. Kyrgyz Republic tightened operations involving the Kazakhstani tenge by temporarily limiting the volume of transactions and reducing the purchase rate for financial institutions. Kyrgyz Republic introduced these tightening measures on March 18, 2022, to prevent Russians from using tenge to convert to Kyrgyz som and then to US dollars and thereby protect its international reserves. To further stabilize the situation in the domestic foreign exchange market, the Kyrgyz authorities limited the volume of transactions with foreign currency in cash between exchange offices and commercial banks in July 2022. To curb volatility, Sri Lanka began providing daily guidance on the degree of volatility (with an allowable two-sided variation margin) to all licensed commercial banks based on the exchange rate determined in the interbank market on the preceding day. Following years of gradual liberalization, several tightening measures were introduced in Ukraine's foreign exchange market following Russia's invasion of the country in February 2022. Measures included pegging the hryvnia to the US dollar and restricting transactions involving the purchase of foreign currency by banks, nonbank financial institutions, and postal providers, only permitting the purchase of foreign currency from clients (selling foreign currency in cash to clients was prohibited). The NBU did ease this foreign exchange cash restriction (within certain limits) in the spot exchange market in April 2022 and allowed financial institutions to sell foreign currency to individual clients within limits.

Further changes are discussed below under the different market segments.21 Changes in the structure and operation of members’ foreign exchange markets are summarized in Table 6. The increase in the number of economies reporting the existence of a spot exchange market, because of a foreign exchange standing facility and over the counter interbank market is due to the introduction of Macao SAR to the AREAER survey.

21 There were 27 and 21 changes that were labelled as neutral in 2021 and 2022, respectively. These were either extensions of earlier easing or tightening measures or those that did not clearly tighten or ease regulation.
Foreign exchange standing facility, allocations, auctions, and fixing

With the introduction of Macao SAR to the AREAER database, alongside the Central Bank of Suriname’s introduction of foreign exchange auction rules in December 2021, the number of countries that reported some type of official central bank facility increased by two, to 117, compared with the previous reporting period. Central banks may provide access to foreign exchange to market participants through a standing facility, allocation to certain market participants, or the purchase and sale of foreign exchange through auctions or fixing sessions.

• **Foreign exchange standing facilities**—67 countries reported standing facilities in their jurisdictions. When a country has a foreign exchange standing facility it means that the central bank typically stands ready to buy or sell foreign exchange to banks, thus providing a maximum and minimum exchange rate for their currency for a given day. Such facilities help regulate both money supply and liquidity and are usually instrumental in maintaining a hard or soft peg arrangement. All 12 countries with currency boards (such as the six countries that use the Eastern Caribbean dollar); 37 of 40 conventional pegs (Denmark, Iraq, and São Tomé and Príncipe are exceptions), and two of three crawling pegs (except Honduras) utilize standing facilities. The credibility of such arrangements depends largely on the availability of foreign exchange reserves backing the facility. Like the past couple of AREAER cycles, the two countries with flexible exchange rates that have foreign exchange facilities are Türkiye (floating) and Russia (free floating). Türkiye introduced the most measures between 2021 and 2022, 19 in total. All these measures were introduced in their foreign exchange standing facility (one easing and two neutral in 2021, 16 tightening in 2022). Türkiye accounts for two-thirds of all changes in standing facilities for 2021 and 2022. While 2021 saw the central bank lowering the rate for foreign exchange deposit facilities, starting in March 2022, against the backdrop of rapidly tightening global financial conditions, both the selling and buying rates for foreign exchange deposits across various maturity periods experienced incremental tightening measures to ease depreciation pressure on the lira while stemming the increasing trend of dollarization of its financial system by encouraging lenders to convert foreign exchange deposits into lira. The central bank increased both the selling and buying rates of foreign exchange deposits at various maturities.

Additionally, with the lira severely depreciating in recent years, the Central Bank of Türkiye also started selling gold against the lira in February 2022 to try to support the currency. Outside of Türkiye, Samoa was the only country to report a tightening while Russia was the only country to report an easing in their standing facility, both in the first quarter of 2022.

• **Foreign exchange auctions**—The number of countries reporting official foreign exchange auctions increased by two, to 41, since the previous reporting period. Of the countries with auctions, more than 80 percent of them (34 of 41), report foreign exchange auctions as the only mechanism operated by the central bank. About 40 percent (16 countries) have de facto exchange rate regimes that are floating, including one that is free floating (Mexico). Foreign exchange auctions can be used to intervene in the foreign exchange market and influence the exchange rate, support price discovery, and manage foreign exchange reserves. In times of market turbulence, foreign exchange auctions also enable central banks to mitigate volatility via mechanisms such as swap lines that provide liquidity to their respective local markets. For example, the Banco de México utilized a temporary US dollar liquidity swap line for up to $60 billion to mitigate the financial

1. Includes 190 member countries and the following territories: Aruba, Curaçao, and Sint Maarten (all in the Kingdom of the Netherlands; information for Curaçao and Sint Maarten is reported together as they have a common central bank) and Hong Kong SAR and Macao SAR (both in the People’s Republic of China).
2. The years in this table represent the year of the AREAER and cover development during the previous year and through part of the publication year (for example, the 2022 report has full-year data for 2021 and data at least until June 2022 for all countries).
shock of the pandemic, which has expired as of December 31, 2021. A pandemic-related auction measure was reversed also in Mauritius by excluding foreign exchange dealers from auctions in October 2021, after having allowed them to participate for a year in response to the pandemic’s effect on the domestic market.

Beyond changes stemming from COVID-19, South Sudan allowed foreign exchange bureaus to participate directly in auctions rather than through banks. The Central Bank of Yemen introduced a weekly single-price foreign exchange auction in November 2021, where participation was restricted solely to banks, which are allowed to bid on behalf of themselves and their clients. The auction initially started with a weekly amount of $15 million; however, the Central Bank of Yemen gradually scaled it up, as the weekly amount was increased to $20 million in February 2022, and finally, to $30 million in May 2022. As mentioned briefly before, the Central Bank of Suriname introduced auction rules in December 2021. These auctions are limited to cases of disorderly market conditions, defined as an intraday depreciation in the USD/SRD exchange rate of more than 2 percent.

- **Foreign exchange allocation systems**—Foreign exchange allocation is often used to provide foreign exchange for strategic imports, such as oil or food, when foreign exchange reserves are scarce. For instance, it has at times been used to finance priority sector projects (Ethiopia) and strategic imports (Sudan). In addition, it may also be used to bolster exports through facilitating financing in foreign currency for input procurements by manufacturer-exporters (Bangladesh). Twenty countries reported having a foreign exchange allocation system: one less than in the previous reporting period. Yemen, where the central bank occasionally allocated foreign exchange to food importers through letters of credit at nonmarket exchange rates, reported that it no longer utilizes an allocation system. Iraq and Mauritius both introduced three changes to their respective allocation systems. The Central Bank of Iraq made some adjustments to the weekly limits on the amount banks and foreign exchange companies may buy in the central bank’s foreign exchange currency sales window. Mauritius unwound a couple of pandemic-era measures, first discontinuing bilateral sales to the State Trading Corporation in June 2021, then letting the USD/MUR swap arrangement between the Bank of Mauritius and commercial banks expire in June 2022. As allocation systems are frequently utilized when foreign reserves are scarce, they are found typically in countries with shallower financial depth. Of the 20 countries, only four are in the top half of the IMF Financial Development Index (Islamic Republic of Iran, Mauritius, Trinidad and Tobago, and Venezuela), two in the top quartile (Islamic Republic of Iran, Mauritius), with the average ranking of the 20 countries at 128 (out of 192 countries in the index). Sixty percent of countries (12) with allocation systems also rely on other mechanisms, mainly standing facilities or fixing sessions. None of the 20 are classified as floating with virtually all of them having a de facto soft peg arrangement (lone exception is Venezuela, classified as Other managed arrangement, a residual category, see Table 1).

- **Fixing sessions**—This arrangement is characteristic of the early stage of foreign exchange market development when price discovery may be difficult. Fixing sessions allow the central bank to organize sessions in which market participants can submit buying and selling bids. The central bank uses these bids to find the market clearing exchange rate. The number of countries that reported operating fixing sessions has remained constant at four (Islamic Republic of Iran, Mauritania, Mozambique, and Syria) compared with the previous period. For Mauritania and Syria, fixing sessions are the only mechanism operated by the central bank (the central banks of Islamic Republic of Iran and Mozambique also operate allocation systems). As the central bank monitors the market closely and often actively participates in the price formation by selling or buying during the session to achieve a certain exchange rate target, this mechanism is also utilized in countries with exchange rates that are not largely market determined. As such, in this current cycle of the AREAER, three of the four have a de facto soft peg arrangement (Syria is classified as having Other managed arrangement).

**Interbank and retail foreign exchange markets**

The number of countries that reported having a foreign exchange interbank market stands at 175. The 19 jurisdictions that do not have an interbank market are typically countries where either security concerns made the operation of a foreign exchange market difficult in recent years, such as Somalia, South Sudan, and Yemen; where the legal framework does not allow the trading of foreign exchange among banks, such as Venezuela; in countries where the central bank maintains a conventional peg or currency board; or in jurisdictions where
there is no separate legal tender. The latter two groups of countries consist of Aruba, Belize, Bhutan, Dominica, Eritrea, Kiribati, Lesotho, Libya, the Marshall Islands, Micronesia, Montenegro, Nauru, Palau, Timor-Leste, and Tuvalu. In most cases, these countries are small, and the size of the territory naturally limits the number of potential participants in the foreign exchange market. Honduras reported the most changes this reporting period with four changes (one tightening and one neutral in 2021; two neutral in 2022), comprising almost one-third of all changes between 2021 and 2022 (4 of 14). Three of the four measures dealt with modifying the calculation of both the exchange band and reference exchange rate of the country’s foreign exchange interbank market.

For countries that have an interbank market, the form of operations may include over-the-counter markets, brokerage arrangements, and market-making arrangements. Thirty-four members allow all three types of systems. This group of 34 typically has market-based exchange arrangements and greater financial depth. About three-quarters of them (25) are classified as having de facto floating arrangements. Twenty-two of the 34 are in the top quartile of the Financial Development Index, while 31 of 34 are in top half (Kenya, Pakistan, and Papua New Guinea do not fall in the top 50th percentile of the index), with an average ranking of 39 out of the 192 countries in the index.

- **Over-the-counter operations**—These account for most of the world’s interbank markets. The number of countries in this group has grown nearly every year since 2009, when it comprised 127 countries to 150 as of 2022. Despite no formal interbank foreign exchange market in St. Kitts and Nevis and St. Vincent and the Grenadines, banks in these countries can trade freely with one another. Although this type of foreign exchange market appears to be gaining popularity among IMF members, 25 jurisdictions with interbank markets still report that they do not engage in over-the-counter operations. These countries do not share any particular characteristic in terms of size, income level, or financial market sophistication.

- **Brokerage arrangements**—51 countries reported having a brokerage system, same as in the previous reporting period. These arrangements are typically found in countries with deeper financial markets. Forty-three of 49 countries score higher than the world average on the Financial Development Index (El Salvador, Kenya, Pakistan, Papua New Guinea, Sri Lanka, and Uruguay fall below the world average; Andorra and San Marino are not listed in index).

- **Market-making agreements**—72 countries reported having market-making agreements. Compared with the previous reporting period, this is a decrease of one due to Mozambique no longer reporting a market-making mechanism. As of February 2021, Morocco tightened this mechanism by raising the requirement for banks with market-maker status to provide quotes at a minimum of US$1 million. Previously, the requirement was US$500,000. China adjusted their market-making system to better utilize the potential of existing market makers. China’s State Administration of Foreign Exchange no longer assigns market-makers to specific products, but rather, encourages market-makers to expand their capacity for trading and market-making across all product categories.

Most member countries report a framework for the operation of foreign exchange bureaus; the majority impose some type of licensing requirement. The current reporting period saw a mix of tightening and easing measures. Among tightening changes, the Central Bank of Nigeria suspended foreign exchange sales by the central bank to the bureau de change segment in July 2021, while the National Bank of Ethiopia increased their fee on foreign exchange transactions from 1.5 percent to 2.5 percent. Pakistan imposed a couple of tightening measures, first setting a daily/annual limit of $10,000/$100,000 on exchange companies’ foreign currency sales to individuals in December 2021, and second, as of February 2022, requiring exchange companies to surrender 100 percent of foreign currency received on account of inward home remittances in the interbank market on the same day. Honduras reduced the exchange commission that foreign exchange agents may charge their clients to a maximum of 0.5 percent compared with 0.7 percent previously. With the imposition of martial law following Russia’s invasion of Ukraine in February 2022, the National Bank of Ukraine (NBU) temporarily changed its approach to foreign exchange interventions, whereby the NBU now engages in US dollars and euro sale and purchase transactions with banks and international financial institutions on a daily basis. The NBU stopped sales and purchases of euros and now conducts operation solely in US dollars as of May 2022. Among easing changes, Barbados where previously no foreign exchange bureaus operated authorized one such bureau. In November 2021, Mauritius increased the daily foreign exchange limit for foreign exchange dealers from 40 percent to 75 percent of their specific net owned funds for a period of six months. In May 2022, this revised limit was extended for another six months. Lao P.D.R. balanced both easing and tightening measures.
by widening the band around the daily reference rate set by the central bank for commercial banks and foreign exchange agents their buying and selling rates for kip against US dollars to within ±1.5 percent (previously ±0.25 percent) while reducing the limit for selling foreign exchange to individuals by these institutions to 15 million kip (~$1,000) a person a day. Sudan further liberalized its foreign exchange market in March 2022, as commercial banks and foreign exchange bureaus may freely determine their rate on both a daily basis and without any restrictions and increased the maximum profit margin to 1 percent for foreign exchange bureaus.

**Other Measures**

Most of the changes in other measures during the reporting period refer to forward operations, exchange rate structure, other legal tender, and taxes on foreign exchange transactions.

- **Forwards**—A total of 18 measures were reported across 2021 and 2022: 11 in 2021 (six easing, two neutral, and three tightening) and 7 in 2022 (five easing, two tightening). Vietnam and Ukraine were the primarily drivers of further liberalization in the forward exchange market; Vietnam reported three in 2021, while Ukraine accounted for four in 2022. On May 17, 2021, Vietnam eased regulations on forward and swap transactions to allow more flexibility in hedging foreign exchange risks. Ukraine, once again responding to the fallout from the Russian invasion, initially tightened foreign exchange market measures by prohibiting banks from trading in foreign currency except for certain transactions. Over the following months, Ukraine permitted swap transactions with resident clients if the first part of the transaction was a purchase of foreign currency from a resident client. This was subsequently extended to foreign banks/depositors that have a securities account at the NBU. Beyond Vietnam and Ukraine, during the reporting period, in Mozambique, banks and their customers were permitted to trade financial derivatives, including forward foreign exchange operations, foreign exchange swaps, interest rate swaps, and forward rate agreements. Among tightening measures, Nepal decreased the limit on proprietary forwards for banks from 30 percent of core capital to 15 percent. In Sri Lanka, commercial banks were directed to refrain from entering into foreign exchange forward contracts for a period of three months starting January 2021. Subsequently, Sri Lanka did provide exemptions on restrictions on licensed commercial banks to enter foreign exchange forward contracts that have a value date beyond the spot date for certain transactions in April 2021. Moreover, in March 2022, the Central Bank of Sri Lanka abolished its ban on forward foreign exchange transactions, lifting all restrictions introduced in April 2021. Thailand established a nonresident qualified company (NRQC) scheme and relaxed conditions under which it could manage its currency risk while at the same time tightened conditions on the use of derivatives for those nonresident companies that are not part of the NRQC scheme.

- **Exchange rate structure**—There were several changes in the number of countries maintaining a dual or multiple exchange rate structure. Currently, 22 countries are classified as having more than one exchange rate, of which 12 are dual and 10 are multiple. This is mainly a result of specific exchange rates applied to certain transactions or because of actual or potential deviations of more than 2 percent between official and other exchange rates and hence resulting in multiple currency practices under Article VIII (see next section).23 During this reporting period, the exchange rate structure of Myanmar was reclassified from multiple to unitary due to the elimination of an MCP resulting from the discontinuation of the multiple price foreign currency auction. While in practice the exchange rate structure is still classified as multiple, Sudan has worked toward reducing the gap between the official rate and the parallel market rate following the adoption of floating exchange rate policy.

- **Other legal tender**—16 countries officially allow the use of another legal tender in their territory, the same as the previous reporting period. El Salvador passed the Bitcoin Law in June 2021; its intent is to regulate Bitcoin as unrestricted legal tender that may be used freely in any transaction for any purpose by individuals and legal entities, public or private.

- **Taxes and subsidies on foreign exchange transactions**—Overall, 34 countries report taxing or subsidizing foreign exchange transactions during the reporting period, a net decline by one compared with the previous reporting period. Angola and Libya removed taxes, while Yemen and Lebanon eliminated subsidies. At the

---

23 At the time of publication of the 2022 AREAER, the IMF’s Policy on Multiple Currency Practices (MCPs) reflected the fixed two-percent rule to identify MCPs for spot transactions. The revised policy on MCPs will replace the fixed two-percent rule with a country-specific market-based norm and tolerance margin. For more information on the new methodology for assessment of MCPs please see: https://www.imf.org/-/media/Files/Publications/PP/2022/English/PPEA2022036.pdf.
beginning of the reporting period in January 2021, Angola eliminated a stamp duty of 0.1 percent applied on foreign exchange operations, while Libya eliminated the surtax on sales of foreign currency for commercial or personal purposes (excluding family allowance). Effective March 2021, Yemen discontinued the exchange subsidy for private food importers. Lebanon canceled the following two existing subsidies: (1) an exchange rate subsidy for basic foodstuffs, raw materials intended for sales to farmers in May 2021 and (2) in September 2022, the “Sayrafa” platform, which is a platform rate for oil derivative imports (for example, gasoline and diesel gas), while maintaining subsidies on imports of certain essential food and medical supplies. On the other hand, Ecuador gradually reduced in four steps its capital outflow tax from 5 percent in January 2022 to 4 percent by October 2022. Russia, which initially introduced a 30 percent commission on the purchase of foreign currencies by individuals through brokers on March 3, 2022, reduced this commission to 12 percent the following day, and finally removed the requirement to charge a commission on April 11, 2022.

**Member Countries’ Obligations and Status under Articles VIII and XIV**

This section provides an overview of the status of IMF members’ acceptance of the obligations of Article VIII, Sections 2(a), 3, and 4, of the IMF’s Articles of Agreement and of the use of the transitional arrangements of Article XIV. It also describes recent developments in restrictive exchange measures—namely, exchange restrictions and MCPs subject to IMF jurisdiction under Articles VIII and XIV and measures imposed by members solely for national and/or international security reasons.

In accepting the obligations of Article VIII, Sections 2(a), 3, and 4, members agree not to impose restrictions on payments and transfers for current international transactions or engage in discriminatory currency arrangements or MCPs, except with IMF approval.24 If Article XIV members introduce exchange restrictions or MCPs after joining the IMF, these restrictive measures are considered to have been imposed under Article VIII.

**Status under Articles VIII and XIV**

The number of countries that have accepted Article VIII remained unchanged at 174 members in 2021 (Figure 4), after Andorra and Myanmar accepted Article VIII obligations in 2020. In the 21st century, 25 members accepted Article VIII obligations, including some of them at the time of their joining the IMF, and, accordingly, the number of Article VIII members has increased by 16.8 percent, reaching 91.6 percent at the end of 2021. Since 2000, there has been some progress in Article VIII acceptance among countries that have availed themselves of the transitional provisions of Article XIV. Their number had dropped from 34 in 2000 to 16 by the end of 2021. Progress was most notable during 2000–05, when 15 Article XIV countries accepted Article VIII obligations. Since 2000, four countries have joined the IMF, simultaneously accepting Article VIII obligations (Andorra, Montenegro, Nauru, Timor-Leste), while four other countries (Kosovo, Serbia, South Sudan, Tuvalu) joined the IMF availing themselves of the temporary provisions of Article XIV. Three of these four countries (Kosovo, Serbia, Tuvalu) subsequently accepted Article VIII obligations. Other countries that accepted Article VIII starting from 2000 are Albania, Azerbaijan, Belarus, Cambodia, Cape Verde, Colombia, Democratic Republic of Congo, Egypt, Iran, Lao PDR, Libya, Mozambique, Myanmar, Sudan, Tajikistan, Uzbekistan, Vietnam, Zambia.

As of December 31, 2021, many members in Article XIV status continued to maintain restrictions subject to IMF jurisdiction under Article VIII. Among the 16 members25 in Article XIV status, three do not maintain restrictions but have not yet decided to accept the obligations under Article VIII. Four countries maintain both original or adapted Article XIV exchange measures and Article VIII restrictions. The remaining nine Article XIV countries maintain exchange measures under Article VIII only.

---

24 Countries that have accepted the obligations under Article VIII are referred to as “Article VIII members” or “Article VIII countries”; in contrast, those that continue to avail themselves of the transitional provisions of Article XIV are referred to as “Article XIV members” or “Article XIV countries” in this report.

25 As of December 31, 2021, the members that make use of the transitional arrangements under Article XIV are Afghanistan, Angola, Bhutan, Bosnia and Herzegovina, Burundi, Eritrea, Ethiopia, Iraq, Liberia, Maldives, Nigeria, São Tomé and Príncipe, Somalia, South Sudan, Syria, and Turkmenistan.
Restrictive Exchange Measures

The first section below describes recent developments in exchange restrictions—measures that limit the availability and use of foreign currency for payments and transfers for current international transactions—and MCPs subject to IMF jurisdiction under Articles VIII and XIV. In particular, changes in 2021 to exchange restrictions and MCPs are indicated as reported in the latest IMF staff reports as of December 31, 2021. The subsequent section describes developments in measures imposed by members solely for national or international security reasons during 2021.

Exchange restrictions and multiple currency practices

The number of countries maintaining restrictive exchange measures decreased by 2 in 2021, and the composition of countries maintaining such measures changed (Table 7). Article VIII members maintained more restrictive exchange measures in 2021 (79 measures) than Article XIV members (61 measures).

In 2021, two Article VIII members removed all previously identified restrictive measures: Egypt (exchange restriction) and Tunisia (MCP). Also, two other Article XIV members eliminated exchange restrictions but not all of them, including Angola. On the other hand, exchange restrictions were identified in territories of an Article VIII member (Aruba, Curaçao, and Sint Maarten, Kingdom of the Netherlands), where previously one of the territories (Aruba) already maintained an exchange restriction. As a result, the overall number of members that maintain restrictive exchange measures decreased by two, to 45 members in 2021.

The overall number of restrictive exchange measures increased by one in 2021 (Table 7). The number of such measures in Article VIII countries increased by three and decreased by two in Article XIV members. In 2021,

---

26 Countries maintaining exchange restrictions or MCPs whose IMF staff reports are unpublished are not mentioned in this section unless the authorities have consented to publication. However, their restrictive measures are included in the numbers.

27 The AREAER does not indicate whether the Executive Board of the IMF has approved such measures.

28 Information for Curaçao and Sint Maarten is reported together as they have a common central bank.

29 Aruba, Curaçao, and Sint Maarten (all territories of Kingdom of Netherlands) maintain exchange restrictions and are counted as one member.

30 Where the description of an exchange restriction or an MCP in the staff report suggests that it applies to more than one type of transactions, the exchange measure is reflected in all the relevant types of transactions reported in the Table 7. This is the first report in which the count of exchange restrictions and MCPs are based on including them in all relevant types of transactions. Hence the numbers for 2019 and 2020 are not comparable to those reported in Table 7 of past AREAERs.
four restrictive measures (three exchange restrictions and one MCP) were reported to have been eliminated, while five measures (all exchange restrictions) were newly identified. Article VIII members account for all five newly identified measures and two of the four removals (one exchange restriction and one MCP).

New restrictive measures were identified in the territories of one member in 2021: Kingdom of the Netherlands–Aruba (exchange restrictions that affected four types of transactions) and Kingdom of the Netherlands–Curaçao and Sint Maarten (one exchange restriction). In contrast, two countries removed all their restrictive measures (see above), while another two countries eliminated some restrictive measures, but not all, including Angola (one exchange restriction).

The overall average number of restrictive measures increased to 3.1 from 3.0 per country in 2021. The average number of measures per country decreased to 4.7 from 4.8 for Article XIV countries and increased to 2.5 from 2.2 for Article VIII countries. Although the overall number of restrictive measures maintained by Article XIV countries was lower than in Article VIII members in 2021, they continued to maintain significantly more restrictions and MCPs per country than Article VIII countries given the relatively small number of Article XIV members.

The types of newly identified exchange restrictions vary in nature. Exchange restrictions arising from prohibition on payment and/or transfer of dividends to nonresidents was identified in Kingdom of the Netherlands–Curaçao and Sint Maarten as well as in the Kingdom of the Netherlands–Aruba. In addition, in the Kingdom of the Netherlands–Aruba restrictions on repayment and interest payments of loans below the relevant thresholds obtained after March 17, 2020, and prohibition on payment of management fees to affiliated companies were identified.

The elimination of exchange restrictions also affected different types of transactions. Angola removed a restriction arising from the special tax of 10 percent on transfers to nonresidents under contracts of foreign technical assistance or management services. Egypt eliminated the exchange restriction arising from a net debtor position under the inoperative bilateral payment arrangement (BPA) with Bulgaria.

In Tunisia, the previously maintained MCP which resulted from honoring exchange rate guarantees extended prior to August 1988 to cover external loans contracted by development banks, was reported as eliminated. No new MCP was identified in 2021.

Table 8 provides the description of restrictive exchange measures as indicated in the latest IMF staff reports as of December 31, 2021.

### Exchange measures maintained for security reasons

Several member countries maintain measures solely for national and/or international security reasons, which could give rise to exchange restrictions under IMF jurisdiction if applied to payments and transfers for current international transactions. These restrictions, like others, require prior IMF approval under Article VIII, Section 2(a). However, because the IMF does not provide a suitable forum to discuss the political and military considerations that lead to measures of this kind, it established a special procedure for such measures to be notified to and approved by the IMF. In total, 119 member countries and their territories reported in 2021 to the IMF that they maintained measures solely for security reasons, including 21 that reported changes in such measures in 2021. The majority of the restrictions are financial sanctions to combat the financing of terrorism or financial sanctions against certain governments, entities, and individuals in accordance with United Nations Security Council resolutions, EU regulations, or decisions adopted by members on their own initiative.

---

31 This section does not reflect changes in members’ restrictive measures eliminated in 2021 but whose removal is reflected in the IMF staff reports issued after December 31, 2021.
32 The measures were introduced in March of 2020 and were reflected in the IMF staff report as of December 31, 2021.
33 The measure was introduced in March of 2020 and was reflected in the IMF staff report as of December 31, 2021.
34 The measure was lifted in January 2018 (when the Egypt authorities settled the outstanding balances under the BPA with Bulgaria) and was reflected in the IMF staff report as of December 31, 2021.

Sources: AREAER database; IMF staff reports; and IMF staff calculations.

1 Information is based on IMF staff reports issued as of December 31, 2021, for member countries and their territories. The number of restrictions and/or multiple currency practices (MCPs) may have changed subsequent to the date they were reported. The table includes data on exchange restrictions and MCPs maintained by countries whose IMF staff reports are unpublished.

2 When the description of an exchange restriction or an MCP in the staff report suggests that it applies to more than one type of transaction, the exchange measure is reflected in all the relevant types of transactions reported in this table.

3 Restrictions in a member's territory are included in the total for the member country.

<tr>
<td>Albania</td>
<td>The IMF staff report for the 2021 Article IV Consultation with Albania states that, as of November 17, 2021, Albania continues to maintain an exchange restriction in the form of outstanding debit balances on inoperative bilateral payment agreements with two IMF member countries. Those debit balances were in place before Albania became an IMF member in 1991 and relate to debt in nonconvertible and formerly nonconvertible currencies. Despite repeated efforts from the Albanian authorities, no agreement has been reached with the counterparties. (Country Report No. 21/259)</td>
</tr>
<tr>
<td>Angola</td>
<td>The IMF staff report for the 2021 Article IV Consultation and Sixth Review under the Extended Arrangement included a request for a waiver of nonobservance of a performance criterion with Angola that, as of December 7, 2021, Angola maintained two MCPs that are subject to approval under Article VIII, Section 3, that arise from the lack of a mechanism to prevent potential spreads in excess of 2% emerging (1) between successful bids within the National Bank of Angola’s (Banco Nacional de Angola – BNA’s) foreign exchange auction and (2) for transactions that take place at the reference rate in place and the rate at which transactions take place in the foreign exchange auction on that day remain. Angola maintains restrictions on the making of payments and transfers for international transactions under the transitional arrangements of Article XIV, Section 2. The measures maintained pursuant to Article XIV are (1) limits on the availability of foreign exchange for invisible transactions, that is, travel expenses and (2) limits on unredeemed advances to foreign-based individuals and institutions. Exchange restrictions subject to IMF jurisdiction under Article VIII, Section 2(a) were removed, specifically (1) the discriminatory application of the 0.1% stamp tax on foreign exchange operations by natural persons, (2) the operation of the priority list for access to US dollars at the official exchange rate, and (3) a special tax of 10% on transfers to nonresidents under contracts of foreign technical assistance or management services. The MCP subject to approval under Article VIII, Section 3, arising from the discriminatory application of the 0.1% stamp tax on foreign exchange operations by natural persons was also removed. (Country Report No. 22/11)</td>

<tr>
<td>Argentina</td>
<td>The IMF staff report for the Fourth Review under the Stand-By Arrangement, Request for Waivers of Applicability and Modification of Performance Criteria, and Financing Assurance Review with Argentina states that, as of July 3, 2019, the retention of the MCP auction put in place in June 2018 that staff has assessed gives rise to the MCP. (Country Report No. 19/232)</td>
</tr>
<tr>
<td>Armenia</td>
<td>The IMF staff report for the 2021 Article IV Consultation, Fourth and Fifth Reviews under the Stand-By Arrangement, and Request for Waiver of Nonobservance of Performance Criterion and Monetary Policy Consultation Clause with Armenia states that, as of December 3, 2021, Armenia maintains one MCP, which arises from a 2007 agreement between the MOF and the Central Bank of Armenia (CBA) to settle some budgetary transactions at an agreed accounting exchange rate throughout the fiscal year. (Country Report No. 21/273)</td>
</tr>
<tr>
<td>Aruba–Kingdom of the Netherlands</td>
<td>The IMF staff report for the 2021 Article IV Consultation Discussions with Aruba states that as of March 31, 2021, Aruba maintains an unapproved exchange restriction arising from the foreign exchange tax on payments by residents to nonresidents (1.3% of the transaction value). In March 2020, the Central Bank of Aruba (CBA) halted the issuance of new foreign exchange licenses, limiting most of the outgoing capital and also some current transactions. The following measures constitute new exchange restrictions: (1) prohibition on actual payment and/or transfer of dividends to nonresident shareholders, and of net income from other investment; (2) restriction on repayment and interest payments of loans below the relevant thresholds (that is, All 300,000 for natural persons and All 750,000 for legal entities) obtained after March 17, 2020; and (3) prohibition on payment of management fees to affiliated companies. (Country Report No. 21/81)</td>
</tr>
<tr>
<td>Bangladesh</td>
<td>The IMF staff report for the 2019 Article IV Consultation with Bangladesh states that, as of August 5, 2019, Bangladesh maintained one restriction subject to IMF approval under Article VIII, Section 2(a), on the convertibility and transferability of proceeds of current international transactions in nonresident taka accounts (NRTAs). (Country Report No. 19/299)</td>

<tr>
<td>Bhutan</td>
<td>The IMF staff report for the 2018 Article IV Consultation with Bhutan states that, as of August 7, 2018, Bhutan continues to avail itself of transitional arrangements under Article XIV, Section 2, pursuant to which it maintains exchange restrictions in connection with: (1) the availability of foreign exchange for travel, except for medical travel abroad by Bhutanese citizens, invisibles, and private transfers; (2) foreign exchange balancing requirement on remittances of income in convertible currencies or other foreign currencies from FDI; and (3) on the availability of foreign exchange for imports that have not provided evidence that goods for which payments have been made were actually imported. Bhutan also maintains exchange restrictions subject to IMF approval arising from the IMF's Articles of Agreement. (Country Report No. 21/257)</td>
</tr>
<tr>
<td>Bosnia and Herzegovina</td>
<td>The IMF staff report for the 2020 Article IV Consultation with Bosnia and Herzegovina states that, as of February 8, 2021, Bosnia and Herzegovina (BiH) maintains restrictions on the transferability of balances and interest accrued on frozen foreign-currency deposits, subject to IMF jurisdiction under Article VIII. (Country Report No. 21/43)</td>
</tr>
<tr>
<td>Brazil</td>
<td>The IMF staff report for the 2021 Article IV Consultation with Brazil states that, as of August 20, 2021, the tax on financial transactions (Imposto sobre Operações Financeiras–IOF) of 6.38% on exchange transactions carried out through credit card, debit card, and traveler's checks (including cash withdrawals) by companies to fulfill their payment obligations for purchases of goods and services abroad by their customers gives rise to a MCP subject to IMF jurisdiction under Article VIII, Sections 2(a) and 3. In January 2008, the IOF for these exchange transactions was raised to 2.38% and then further increased to 6.30% in March 2011. The scope of operations was expanded to other foreign exchange transactions in addition to credit cards in December 2013. (Country Report No. 21/217)</td>
</tr>
<tr>
<td>Burundi</td>
<td>The IMF staff report for the Request for Disbursement under the Rapid Credit Facility states that, as of October 6, 2021, Burundi maintained one multiple currency practice (MCP). The MCP arises from the use of an official rate for government transactions, which deviates from market rates by more than 2%. (Country Report No. 21/242)</td>
</tr>
<tr>
<td>Congo, Democratic Republic of the Netherlands</td>
<td>The IMF staff report for the Request for a Three-Year Arrangement under the Extended Credit Facility and Review of Performance states that, as of June 29, 2021, the Democratic Republic of the Congo (DRC) maintained one exchange rate restriction subject to IMF approval arising from an outstanding net debt position against other contracting members under the inoperative regional payments' agreement with the CEPGL. (Country Report No. 21/168)</td>
</tr>
<tr>
<td>Ecuador</td>
<td>The IMF staff report for the 2021 Article IV Consultation, Second and Third Reviews under the Extended Arrangement states that, as of September 20, 2021, Brazil maintained an exchange restriction subject to IMF approval arising from a 5% tax on transfers for the making of payments and transfers abroad on current international transactions. There are a number of exemptions from this tax. In September 2021, the government enacted an Executive Decree lowering the tax rate to zero for foreign airline companies operating in Brazil, which will enter into force on its publication in the official gazette. In addition, the SUCRE (Sistema Unitario de Compensacion Regional de Pagos) regional payments arrangement also gives rise to an exchange restriction subject to IMF approval since the period for settlement under the bilateral payment arrangement exceeds three months. (Country Report No. 21/228)</td>
</tr>
<tr>
<td>Ethiopia</td>
<td>The IMF staff report for the 2019 Article IV Consultation with Ethiopia states that, as of December 11, 2019, Ethiopia maintained four restrictions on payments and transfers for current international transactions, which relate to (1) the tax certification requirement for repatriation of dividend and other investment income; (2) restrictions on repayment of legal foreign exchange for travel, except for medical travel abroad by Ethiopian citizens, invisibles, and private transfers; (3) foreign exchange balancing requirement on remittances of income in convertible currencies or other foreign currencies from FDI; and (4) on the availability of foreign exchange for imports that have not provided evidence that goods for which payments have been made were actually imported. Bhutan also maintains exchange restrictions subject to Article VIII, Section 2(a), of the IMF's Articles of Agreement. (Country Report No. 20/29)</td>
</tr>
<tr>
<td>Fiji</td>
<td>The IMF staff report for the 2021 Article IV Consultation with Fiji states that, as of November 8, 2021, exchange restrictions subject to Article VIII arise from the Fiji Revenue and Customs Authority's tax certification requirements on the transfer abroad of profits and dividends, on the proceeds of airline ticket sales, and on the making of external debt and maintenance payments and from limits on large payments (for example, oil imports and dividends repatriation of foreign banks). The authorities further tightened the controls for payments of international transactions in April 2020, at the onset of the COVID-19 pandemic by either reducing the delegated limits to commercial banks or replacing these limits with the Reserve Bank of Fiji (RBF) discretion approval requirement on large payments. (Country Report No. 21/257)</td>

<tr>
<td>Gabon</td>
<td>The IMF staff report for 2019 Article IV Consultation Fourth and Fifth Reviews under the Extended Arrangement under the Extended Fund Facility, and Request for Waiver of Nonobservance of Performance Criteria, and Rephasing of the Remaining Purchases with Gabon states that, as of December 4, 2019, Gabon maintained a 1.5% tax on wire transfers abroad that is not consistent with Gabon's obligations under Article VIII, Section 2(a) of the Articles of Agreement. The proceeds of this tax are used to fund Gabon's health insurance scheme. (Country Report No. 19/389)</td>
</tr>
<tr>
<td>Ghana</td>
<td>The IMF staff report for the 2021 Article IV Consultation with Ghana states that as of July 1, 2021, Ghana maintained one exchange restriction and a MCP subject to IMF approval. The exchange restriction arises from the limitation/prohibition on purchasing and transferring foreign exchange for import transactions by importers that have not submitted to the commercial bank customs entry forms for past foreign exchange transactions related to imports and that are unrelated to the underlying transaction. An MCP also arises, because the Bank of Ghana (BOG) requires the use of its internal rate (that is, the previous day's weighted average interbank exchange rate) for government transactions and the surrender of foreign exchange proceeds from cocoa exports funded through the cocoa syndicated loan without having a mechanism in place to ensure that, at the time of the transaction, this exchange rate does not differ from the rate prevailing in the market rate (that is, the interbank exchange rate) and the rates used by banks in their transactions with their customers by more than 2%. (Country Report No. 21/165)</td>
</tr>
<tr>
<td>Honduras</td>
<td>The IMF staff report for the Fourth Reviews under the Stand-by Arrangement and the Arrangement under the Standby Credit Facility, Requests for Augmentation of Access, Extension and Rephasing of the Arrangements, and Waivers of Nonobservance of Performance Criteria with Honduras states that, as of August 30, 2021, Honduras maintained two MCPs. The MCPs relate to the use of the previous days' official exchange rates in certain foreign exchange transactions (which could differ by more than 2% from the official rate in force and the interbank rate on a given day), and the fact that there is no mechanism to prevent a spread of more than 2% between the official exchange rate and the exchange rates resulting from a CB foreign exchange auction. (Country Report No. 21/207)</td>
</tr>
<tr>
<td>India</td>
<td>The IMF staff report for the 2021 Article IV Consultation with India states that, as of August 31, 2021, India maintained the following restrictions on the making of payments and transfers for current international transactions, which are subject to IMF approval under Article VIII, Section 2(a): restrictions related to the non-transferability of funds between the Indo-Russia debt agreement; restrictions arising from unilateral limitations/prohibitions on purchasing and transferring foreign exchange for import transactions by importers that have not submitted to the commercial bank customs entry forms; restrictions arising from unilateral limitations/prohibitions on purchasing and transferring foreign exchange for import transactions by importers that have not submitted to the commercial bank customs entry forms; restrictions arising from bilateral payments arrangements with two Eastern European countries; and a restriction on the transfer of amortization payments on loans by nonresident relatives. (Country Report No. 21/230)</td>
</tr>
<tr>
<td>Iran</td>
<td>The IMF staff report for the 2018 Article IV Consultation with Islamic Republic of Iran states that, as of March 7, 2018, Iran maintained MCPs and an exchange restriction subject to IMF jurisdiction under Article VIII, Sections 2(a) and 3: (1) An MCP and an exchange restriction arise from the establishment of an official exchange rate for use in some exchange transactions, which in practice differs by more than 2% from the rate used by foreign exchange bureaus. (2) An MCP arises from the differences of more than 2% between the current official and exchange bureaus rates and the preferential rates for certain imports for which foreign exchange commitments were made through LCs opened prior to March 21, 2002, under the previous multiple exchange rate system. (3) An MCP arises from the differences of more than 2% between the current official and exchange bureaus rates and the preferential rates for certain imports for which foreign exchange payment commitments were made through LCs or bank drafts prior to July 24, 2012. (Country Report No. 18/93)</td>
</tr>
<tr>
<td>Iraq</td>
<td>The IMF staff report for the 2020 Article IV Consultation with Iraq states that, as of January 22, 2021, Iraq continues to avail itself of the transitional arrangements under Article XIV, Section 2 but no longer maintains any exchange restrictions or MCPs subject to Article XIV, Section 2, and currently maintains one MCP subject to IMF approval under Article VIII, Section 3. The MCP arises from the lack of a mechanism to ensure that the exchange rate at the Central Bank of Iraq (CBI) foreign exchange window and the market rates (retail exchange rates of commercial banks and exchange bureaus for the sale of foreign currency from sources other than the CBI foreign exchange window) do not deviate from each other by more than 2%. (Country Report No. 21/38)</td>
</tr>
<tr>
<td>Jamaica</td>
<td>The IMF staff report for the Sixth Review under the Stand-by Arrangement with Jamaica states that, as of October 16, 2019, Jamaica continues to implement a multiple price foreign exchange auction system that gives rise to MCPs. (Country Report No. 19/338)</td>
</tr>
<tr>
<td>Kyrgyz Republic</td>
<td>The IMF staff report for the 2021 Article IV Consultation with the Kyrgyz Republic states that, as of May 18, 2021, the Kyrgyz Republic maintained a MCP arising from the use of the official exchange rate for government transactions. The official rate may differ by more than 2% from market rates because it is based on the average transaction weighted rate of the preceding day. (Country Report No. 21/174)</td>
</tr>
<tr>
<td>Lesotho</td>
<td>The IMF staff report for the 2019 Article IV Consultation with Lesotho states that as of April 8, 2019, Lesotho maintained one exchange restriction arising from single discretionary allowances of M 1 million an individual a calendar year, for residents over 18, and of M 200,000 on the same basis for residents under 18. The availability of foreign exchange beyond these limits is subject to a discretionary approval on a case-by-case basis. (Country Report No. 19/113)</td>

</thead>
<tbody>
<tr>
<td>Maldives</td>
<td>The IMF staff report for the 2021 Article IV Consultation with Maldives states that, as of August 6, 2021, Maldives continues to avail itself of the transitional provisions of Article XIV but no longer maintains any measures under this provision, and has not yet accepted the obligations of Article VIII, Sections 2, 3, and 4. It maintains an exchange restriction subject to IMF approval under Article VIII, Section 2(a) of the IMF's Articles of Agreement arising from a shortage of foreign exchange (FX) at the official rate which leads to the Maldives Monetary Authority (MMA) rationing its supply of FX to commercial banks. This results in a channeling of FX transactions for current international transactions to the parallel market where transactions take place at an exchange rate that deviates by more than 2% from the prevailing market exchange rate. The greater than 2% spread gives rise to multiple currency practice subject to IMF approval under Article VIII, Section 3, and also to an exchange restriction, given the additional cost involved for obtaining foreign exchange. Since April 2020, the MMA has continued to increase the amount of US dollar sales to commercial banks. The official exchange rate used by the MMA for government transactions is calculated based on the mid-point of the weighted average of the buying and selling rates of FX transactions conducted by commercial banks one day earlier. The lack of a mechanism to prevent the spread between this official exchange rate used by the MMA for government transactions and the prevailing market exchange rate from deviating by more than 2% gives rise to a multiple currency practice subject to IMF approval under Article VIII, Section 3. (SM/21/150, Sup. 1)</td>
</tr>
<tr>
<td>Mongolia</td>
<td>The IMF staff report for the 2021 Article IV Consultation with Mongolia states that, as of November 3, 2021, Mongolia maintained two MCPs subject to IMF jurisdiction. First, the modalities of the multi-price auction system give rise to an MCP because there is no mechanism in place that ensures that exchange rates of accepted bids at the multi-price auction do not deviate by more than 2%. In addition, Mongolia has an official exchange rate (reference rate) that is mandatorily used for government transactions (as opposed to the commercial market rate). Therefore, by way of official action, the authorities have created market segmentation. While Order #699 of the Bank of Mongolia (BOM) issued on December 3, 2010, sets forth that the reference rate is determined based on the weighted average of market rates used from 4 p.m. of the previous day to 4 p.m. of the current day, staff are of the view that this Order does not eliminate the market segmentation and the multiplicity of effective rates arising from it. Accordingly, in the absence of a mechanism to ensure that the commercial rates and the reference rate do not deviate by more than 2%, the way the reference rate is used in government transactions gives rise to an MCP subject to IMF approval. (Country Report No. 21/251)</td>
</tr>
<tr>
<td>Nepal</td>
<td>The IMF staff report for the 2020 Article IV Consultation with Nepal states that as of February 27, 2020, the Industrial Enterprises Act places a 75% limit on the conversion and transfer to foreign currency of salaries of nonresidents from countries where convertible currency is in circulation. Since the limit applies to amounts that may be less than net salaries, it gives rise to an exchange restriction under Article VIII. (Country Report No. 20/96)</td>
</tr>
<tr>
<td>Nicaragua</td>
<td>The IMF Staff Report for the 2019 Article IV Consultation with Nicaragua states that, as of January 30, 2020, staff identified an exchange restriction arising from Nicaragua's participation in the SUCRE (Sistema Unitario de Compensación Regional de Pagos) regional payments arrangement. SUCRE gives rise to an exchange restriction because the period for settlement under this regional payment arrangement exceeds three months. See Decision No. 10749-94/67. Under the SUCRE, Nicaragua made four commercial transactions between 2013 and 2015, and since 2015 no transactions have been made. (Country Report No. 20/59).</td>
</tr>
<tr>
<td>Nigeria</td>
<td>The IMF staff report for the 2021 Article IV Consultation with Nigeria states that, as of December 14, 2021, Nigeria maintained the following exchange restrictions subject to IMF approval under Article VIII, Section 2(a) of the IMF's Articles of Agreement: (1) an exchange restriction arising from the Nigerian foreign exchange markets for the payment of imports of 42 categories of items; (2) an exchange restriction arising from the rationing of foreign exchange by the Central Bank of Nigeria (CBN) in different foreign exchange windows, and its allocation based on the CBN's determination of priority categories of transactions; and (3) an exchange restriction arising from existing limits on the amounts of foreign exchange available when traveling abroad (business travel allowance [BTA]/personal travel allowances [PTAs]), which cannot be exceeded even on verification of the bona fide nature of the transaction. In addition, Nigeria maintains the following MCPs subject to IMF approval under Article VIII, Section 3 of the IMF's Articles of Agreement: (1) an MCP arising from the practice of the CBN that results in the establishment of an exchange rate for use in official (government) transactions and some other transactions, which may differ by more than 2% from the rate used by commercial banks in other CBN foreign exchange windows (Secondary Market Intervention Sale [SMIS], small and medium enterprise [SME], Investors' and Exporters' Foreign Exchange [IEFX], and Invisibles); (2) an MCP arising from the large spread between exchange rates used by the CBN in its foreign exchange windows and the rates in the parallel market, caused by the CBN's limitation on the availability of foreign exchange which channels current international transactions to such market; and (3) an MCP arising from the potential spread of more than 2% in the exchange rates at which the CBN sells foreign exchange to successful auction bidders in the SMM window. (Country Report No. 2022/035)</td>
</tr>
<tr>
<td>Pakistan</td>
<td>The IMF staff report for the Second, Third, Fourth, and Fifth Reviews under the Extended Arrangement under the Extended Fund Facility and Request for Rephasing of Access with Pakistan states that, as of March 9, 2021, Pakistan maintained: (1) an exchange restriction and MCP arising from the imposition of a 100% cash margin requirement on imports of certain goods (imposed in 2017) and (2) an exchange restriction resulting from the limitation on advance payments for imports against LCs and advance payments up to the certain amount per invoice (without LCs) for the import of eligible items (imposed in 2018). (Country Report No. 21/73)</td>
</tr>

<tr>
<td>Papua New Guinea</td>
<td>The IMF staff report for the 2019 Article IV Consultation and Request for Staff Monitored Program with Papua New Guinea states that, as of February 24, 2020, Papua New Guinea maintained the following exchange restrictions subject to IMF approval under Article VIII, Section 2(a) of the IMF’s Articles of Agreement arising from (1) the requirement to obtain a tax clearance certificate evidencing the payment of all taxes prior to making payments or transfers for certain current international transactions and (2) the rationing of foreign exchange, which results in undue delays and arrears in current international payments. Papua New Guinea also maintains the following MCPs subject to IMF approval under Article VIII, Section 3: (1) a MCP arising from the spread of more than 2% between the rates set by the Bank of Papua New Guinea (BPNG) for its foreign exchange allocations to authorized foreign exchange dealers (AFEDs) and the rates used by AFEDs in transactions with their clients and (2) an MCP arising from the potential spread deviation of more than 2% between the rates set by the BPNG for its foreign exchange transactions with the government and embassies and the rates used by AFEDs in transactions with their clients. (Country Report No. 20/95)</td>
</tr>
<tr>
<td>São Tomé and Príncipe</td>
<td>The IMF staff report for the 2019 Article IV Consultation and Request for Staff Monitored Program with São Tomé and Príncipe states that, as of August 10, 2021, São Tomé and Príncipe maintained measures that give rise to exchange restrictions and a MCP under Article VIII. (Country Report No. 21/128)</td>
</tr>
<tr>
<td>Serbia</td>
<td>The IMF staff report for the 2021 Article IV Consultation and Request for a 30-Month Policy Coordination Instrument with Serbia states that, as of June 3, 2021, Serbia maintained a system free of restrictions on payments and transfers for current international transactions, except with respect to blocked pre-1991 foreign currency savings deposits (IMF Country Report No. 21/122).</td>
</tr>
<tr>
<td>South Sudan</td>
<td>The IMF staff report for the 2019 Article IV Consultation with South Sudan states that, as of May 15, 2019, South Sudan maintained exchange restrictions and an MCP under the transitional arrangements of Article XIV. The exchange restrictions arise from: imposing absolute ceilings on the availability of foreign exchange for certain invisible transactions (travel, remittances for living expenses of students and families residing abroad, transfers of salaries by foreign workers). The MCP, which also gives rise to an exchange restriction because of extra burden, arises from the spread of more than 2% between the parallel market exchange rate and the formal commercial exchange market rate. South Sudan also maintains the MCPs and exchange restriction subject to IMF’s approval under Article VIII. The MCPs arise from the spread larger than 2% between (1) the official (indicative) rate and commercial banks’ (market) rate and (2) between the official (indicative) rate and the parallel market rate. The exchange restriction arises because of prioritization of foreign exchange allocation by the Bank of South Sudan (BSS) for external government payments and payments for certain essential commodities. (Country Report No. 19/153)</td>
</tr>
<tr>
<td>Sudan</td>
<td>The IMF staff report for the 2019 Article IV Consultation with Sudan states that, as of February 5, 2020, Sudan maintained the following measures subject to IMF jurisdiction under Article VIII, Sections 2 (a) and 3: (1) An exchange restriction arising from the government’s limitations on the availability of foreign exchange and the allocation of foreign exchange to certain priority items; (2) an MCP and exchange restriction arising from the establishment of an official exchange rate (the Central Bank of Sudan (CBS) rate) for use in all government exchange transactions which in practice differ by more than 2% from the rate used by commercial banks; (3) an MCP and exchange restriction arising from large spreads between the CBS rate and the parallel market exchange rate because of the CBS’s limitation on the availability of foreign exchange which channels current international transactions to the parallel market; and (4) an exchange restriction and an MCP arising from the imposition by the government of a cash margin requirement for most imports. (Country Report No. 20/72)</td>
</tr>
<tr>
<td>Syria</td>
<td>The IMF staff report for the 2009 Article IV Consultation with Syria states that, as of February 12, 2010, Syria continued to maintain, under Article XIV, restrictions on payments and transfers for current international transactions, including administrative allocation of foreign exchange. Syria also maintained exchange measures that are subject to IMF approval under Article VIII: (1) prohibition against purchases by private parties of foreign exchange not on the interbank market; (2) a MCP resulting from divergences of more than 2% between the official exchange rate and officially recognized market exchange rates; (3) a non-interest-bearing advance import deposit requirement of 75%–100% for public sector imports; and (4) an exchange restriction arising from the net debt in inoperative bilateral payments arrangements with the Islamic Republic of Iran and Sri Lanka. (Country Report No. 10/86)</td>
</tr>
<tr>
<td>Tajikistan</td>
<td>The IMF staff report for the Request for Disbursement under the Rapid Credit Facility with Tajikistan states that, as of April 29, 2020, the Republic of Tajikistan maintained one exchange restriction and two multiple currency practices subject to IMF approval under Article VIII, Section 2(a) and Section 3 of the IMF’s Articles of Agreement. Foreign exchange shortages, evidenced by market participants’ reports of undue delays in obtaining foreign exchange and external payment arrears, persist in the commercial foreign exchange market as a result of the setting of exchange rates by commercial banks used in foreign exchange transactions, because of informal guidance by the National Bank of Tajikistan (NBT), which do not reflect market conditions. As a consequence of this, not all demand for bona fide foreign exchange for current international transactions is satisfied, giving rise to an exchange restriction. One multiple currency practice arises because of the absence of a mechanism to prevent a potential deviation of more than 2% between: (1) the prevailing market exchange rate and the official exchange rate, which is required to be used for converting foreign currency (somoni) to foreign currency, and vice versa, between accounts of individuals and legal entities opened within the same commercial bank. The second multiple currency practice arises because of the absence of a mechanism to prevent a potential deviation of more than 2% between: (1) the somoni–Russian ruble exchange rate (calculated as a cross-rate using the official exchange rate of the US dollar to somoni), which is required to be used for mandatory ruble surrender transactions and (with a maximum variation of 0.5%) for the purchase/sale in the interbank market of rubles derived from the mandatory surrender, and (2) the market exchange rate banks may use for purchase/sale of Russian rubles derived from other sources. (Country Report No. 20/151)</td>
</tr>

<td>Country</td>
<td>Exchange Restrictions and/or Multiple Currency Practices</td>
</tr>
<tr>
<td>---------</td>
<td>----------------------------------------------------------</td>
</tr>
<tr>
<td>Trinidad and Tobago</td>
<td>The IMF staff report for the 2018 Article IV Consultation with Trinidad and Tobago states that, as of August 6, 2018, Trinidad and Tobago maintained an exchange restriction and two MCPs subject to IMF approval under Article VIII, Section 2(a) and Section 3. The exchange restriction arises from the authorities' restriction of the exchange rate (that is, by restricting the maximum market buying and selling rates, and prohibiting foreign exchange transactions beyond the maximum rates), while not providing enough foreign exchange (that is, through the Central Bank of Trinidad and Tobago (CBTT)'s foreign exchange interventions) to meet all demand for current transactions at that rate. The CBTT also limits sales of its foreign exchange intervention funds to meeting only “trade-related” demand, which do not include non-trade transactions that are, however, current international transactions as defined under Article XXX(d) of the IMF's Articles of Agreement and encourages ADs to similarly prioritize sales of foreign exchange obtained from other sources. Further, the authorities prioritize provision of foreign exchange to certain manufacturers through a special foreign exchange facility using the Export–Import Bank of Trinidad and Tobago (EximBank). These actions result in undue delays in access to foreign exchange to make payments or transfers for current international transactions and external payment arrears. The two MCPs arise from the absence of a mechanism to prevent the potential deviation of more than 2% at any given time among several effective exchange rates regulated by the authorities, for spot exchange transactions, namely: (1) the potential 2% deviation between: (a) on the one hand, the CBTT’s intervention rate and the ADs’ selling rates (the maximum of which is anchored on the intervention rate plus fixed margins), and (b) on the other hand, the ADs’ buying rates (the maximum of which is limited at the previous day's mid-rate); (2) the potential 2% deviation between: (a) on the one hand, the buying and selling rates for foreign exchange transactions between the CBTT and the government, and (b) on the other hand, the ADs’ selling rates. (Country Report No. 18/285)</td>
</tr>
<tr>
<td>Ukraine</td>
<td>The IMF staff report for the First Review under the Stand-By Arrangement, Requests for Extension and Rephasing of Access of the Arrangement, Waivers of Nonobservance of a Performance Criterion, Financing Assurances Review, and Monetary Policy Consultation with Ukraine states that, as of November 8, 2021, Ukraine continues to maintain one exchange restriction and two MCPs, but a roadmap is in place to gradually phase them out. The exchange restriction arises from limits on the availability of foreign exchange for certain non-trade current international transactions (the limit on individuals’ and corporates’ investments abroad may capture some current transactions). The MCPs arise from: (1) the use of multiple price foreign exchange auctions conducted by the National Bank of Ukraine (NBU) without a mechanism to prevent a spread deviation of more than 2% between the auction and market exchange rates and (2) the use of the official exchange rate for exchange transactions with the government without a mechanism to prevent a spread deviation of more than 2% between the official exchange rate and market exchange rates. (Country Report No. 21/250)</td>
</tr>
<tr>
<td>Zambia</td>
<td>The IMF staff report for the 2019 Article IV Consultation with Zambia, states that as of July 11, 2019, Zambia maintained an exchange restriction, which is subject to IMF approval under Article VIII, arising from limitations imposed by the government on access to foreign exchange for the making of payments and transfers for current international transactions, which is evidenced by the existence of external payments arrears accumulated prior to October 4, 1985. (Country Report No. 19/263)</td>
</tr>
<tr>
<td>Zimbabwe</td>
<td>The IMF staff report for the 2019 Article IV Consultation with Zimbabwe states that, as of December 12, 2020, Zimbabwe continues to maintain a series of measures that give rise to several exchange restrictions and MCPs, inconsistent with Article VIII, Section 2(a) and Section 3, in particular: (1) Under the official guidance issued by the Reserve Bank of Zimbabwe (RBZ), commercial banks are required to prioritize their foreign exchange sale to finance specific categories of international transactions which constitutes an exchange restriction as it limits the availability of foreign exchange for payments and transfers for current international transactions, in particular in the non-priority or low-priority categories. Further, the prioritization also results in an MCP as it channels some of the non-priority or low-priority transactions to the bureau market which has an exchange rate of more than 2% in excess of that in the interbank market. (2) The RBZ also allocates foreign exchange to finance certain necessity imports, and purchases repatriated foreign exchange proceeds that exporters are required to sell (surrender) to the RBZ, at the prior business date's interbank rate. These allocation and purchase transactions at the prior business date's interbank rate constitute an MCP as this rate has recently deviated and may continue to deviate by more than 2% from the prevailing foreign exchange rate for other foreign exchange transactions taking place on the same date. The foreign exchange allocation here also gives rise to an exchange restriction as it limits the availability of foreign exchange for payments and transfers for other current international transactions not eligible to receive such allocation. (3) Zimbabwe has also a longstanding exchange restriction subject to IMF jurisdiction arising from unsettled balances under an inoperative bilateral payment agreement with Malaysia. **Regulatory Framework for Foreign Exchange Transactions**

This section surveys the measures reported by members with respect to the regulatory framework for foreign exchange transactions from January 2021 through September 2022. The measures are divided into five major...
categories: trade-related measures, current invisible transactions and transfers, account transactions, capital controls, and provisions specific to commercial banks and institutional investors.

**Trade-Related Measures**

Members reported a record overall number of trade-related changes from January 2021 to September 2022, with 444 actions recorded in 2021–22 compared with an average of 196 measures in the previous three reporting periods. Almost half were easing measures (208), most likely taken by member countries to continue efforts in containing the economic fallout due to the COVID-19 pandemic. However, tightening measures also increased in 2021–22, in part due to reversals of temporary easing related to the COVID-19 pandemic and tightening global economic and financial conditions.

In 2021, the total number of changes in import- and export-related exchange and trade controls decreased to 235, of which 108 were easing (down from 172 in 2020—and almost half the number of all trade-related changes reported that year) (Figure 5, panel 1). The remaining measures included 97 tightening and 30 neutral measures. In the first months of 2022, however, easing and tightening measures reached similar proportions, with trade liberalization measures just marginally more numerous than restrictive ones.

Although the number of countries implementing restrictive measures continued to rise, to 97 in 2021, that number was eclipsed by the increase in countries taking easing measures (108) (Figure 5, panel 2). In 2021–22, emerging market and developing economies reported an average of 8.3 measures per member, followed by low-income developing countries with 4.0 measures per member, and advanced economies with just 2.6 measures per member. Both emerging market and developing economies and low-income developing countries saw a significant increase in average measures per-member from previous years, while advanced economies saw a slight decrease.

**Imports and import payments**

Forty economies reported a total of 145 measures related to imports and import payments in 2021, down sharply from sixty economies reporting 221 measures in 2020 (Figure 6, panel 1). This decrease can be explained by a decline in both easing (to 73 in 2021 from 138 in 2020) and tightening measures (to 53 in 2021 from 63 in 2020). Easing measures dropped more in contrast to the spike in such measures in 2020. Following an increase in previous years there has been a slight drop in both tightening and neutral measures in 2021–22. Emerging market and developing countries implemented the largest number of easing actions, but they also reported the highest proportion of tightening measures—compared to advanced economies, which tightened much more sparingly.

**Figure 5. Trade-Related Measures**

1. In 2021, members reported a decrease of easing measures, while data from the first half of 2022 present similar proportions of easing and tightening measures.
2. The number of countries implementing measures rose dramatically in 2021, and this trend appears to have stayed in 2022, with emerging market and developing economies dominating.

Sources: AREAER database; and IMF staff calculations.
Note: The position date for 2022 varies by country but is at least the end of June 2022 for most countries with some reporting data through September 2022.
Panel 2: AEs = advanced economies; EMDEs = emerging market and developing economies; LIDCs = low-income developing countries.

Figure 6. Import and Import Payments

1. Easing measures in 2021–22 have dropped following a spike in 2020; however, they are higher than in previous years. Tightening measures have also slightly dropped compared to previous years.
2. Emerging market and developing economies dominated in both easing and tightening measures in 2021–22, while advanced economies tightened more sparingly.

Thirty of the 40 countries enacting import-related measures took at least one liberalizing action in 2021, with a total of 73 easing measures reported. Among these countries, Argentina implemented the largest number of liberalization measures (12), followed by Sri Lanka (8), Pakistan (5), Zambia and Belarus (4). Argentina gradually relaxed measures during 2021, with almost all related to foreign exchange market access; whereby under certain conditions, importers no longer required prior approval from the Central Bank of Argentina to make import payments. These relaxations by Argentina in part reflect the reversal of earlier tightening measures taken to deal with their weak balance of payments situations and pressures on its currency. Facing similar issues in 2021, Sri Lanka fluctuated between tightening and easing measures in an attempt to counter the pressures on its balance of payments. Their easing and tightening measures related mainly to advance payment and documentary requirements. Many of the easing measures related to reduction or elimination of import tariffs. Some of these were a result of bilateral or multilateral trade agreements (Australia, Canada, El Salvador, Moldova, Peru). Bolivia and El Salvador reduced tariffs to encourage assembly of electric vehicles and importation of hybrid and electric vehicles, respectively. Tonga reduced import tariffs on petrol and Zambia temporarily on petrol and diesel. Some countries reduced tariffs as preventive and reactive measures aimed at mitigating the economic impact of the COVID-19 pandemic. For instance, tariffs were waived for items such as vaccines, oxygen, and related medical supplies (Bolivia, Mexico, New Zealand, Pakistan). Advance payments requirements were eased such that under certain conditions no prior approval was required to access the foreign exchange market (Argentina), deadline to complete import transaction based on advance payment date was removed (Belarus), cash margin requirement was waived for certain products (Pakistan) and was eliminated (Uzbekistan). Easing documentary requirements included those related to prior approval requirements (Argentina) and on imports of certain goods (Sri Lanka).

Twenty-three countries implemented 53 tightening measures in 2021, which is a slight decrease from 2020 (63). Ten of these measures were put into place by Sri Lanka, with the second highest coming from Türkiye (6), and Argentina and Zambia each implementing 5 measures. Almost half of the tightening measures involved adjustments in tariffs. Some of these included reversal of reductions in tariff rates taken in response to the pandemic on items such as essential food items and medical supplies (Somalia, Türkiye, Zambia). Other measures related to banning imports of certain goods by adding to the negative list (for example, El Salvador, Pakistan, Sri Lanka, Tonga); documentation requirements for releasing foreign exchange for imports (Argentina); tightening conditions on advance payment requirements to limit imports of nonessential goods (Sri Lanka) and luxury goods (Argentina).

---

Sources: AREAER database; and IMF staff calculations.
Note: The position date for 2022 varies by country but is at least the end of June 2022 for most countries with some reporting data through September 2022.
Panel 2: AEs = advanced economies; EMDEs = emerging market and developing economies; LIDCs = low-income developing countries.
Partial data for 2022 suggest that the trend appears to be similar for both liberalization and tightening measures as in 2021. Compared to 2021, there was a slight decrease in easing and tightening measures, at 66 and 52 measures, respectively. Easing measures concerned a reduction in tariffs (Australia, Pakistan, El Salvador, India, Spain, Romania), while restrictive measures related to tariffs and minimum financing requirements for imports (Argentina, Bangladesh, Belarus, Pakistan, Sri Lanka). These measures likely signal the return of barriers that were eased during the pandemic.

Exports and export proceeds

There were 168 changes related to exports and export proceeds from January 2021 through September 2022, with tightening measures (85) outnumbering easing measures (69) and only a small number of neutral changes (14). Measures on repatriation requirements were most numerous (38), followed by those on export licenses (36) and measures on export taxes (13). However, the share of easing and tightening measures is quite different in 2021 and 2022 than in previous years: tightening measures (44) dominated liberalizing measures (35) in 2021. Partial year data suggest that the trend continued in 2022: there were 34 changes liberalizing exports and export payments; tightening measures were slightly less than 2021 at 41 measures but were still more numerous than in 2020 and previous years (Figure 7, panel 1).

In 2021, regulations on exports and export proceeds were eased and tightened in equal number of countries (19). This includes countries that simultaneously implemented easing and tightening measures in 2021. While easing measures remained high in 2021 as in previous years, there was also a spike in restrictive measures (Figure 7, panel 2). Argentina led with the most liberalizing measures (5), followed by Russia (4) and Kuwait (4), as well as Sri Lanka (3) and Malaysia (3). Argentina lifted a 50 percent surrender requirement for proceeds from exports other than hydrocarbons and mineral products and relaxed both repatriation requirements and export taxes. Russia continued its liberalization trend with four measures aimed at easing repatriation requirements. Malaysia, similarly, as part of a broader liberalization of the country's foreign exchange policy, entirely removed a requirement to surrender export proceeds to authorized dealers, following an earlier suspension of the measure below a threshold in response to pandemic-related economic pressure. Kuwait lifted several bans on certain exports. At the same time, however, Kuwait also had 12 tightening measures in this period, mostly implementing a ban on certain exports. Low-income developing countries also eased regulations on exports and export proceeds. For example, Sierra Leone, removed the repatriation requirement for commodities that are not agricultural or fishery products. Most easing measures relaxed repatriation requirements (Argentina, Russia, Uzbekistan), granted exemptions or reductions from surrender requirements (Ethiopia, Honduras, Malaysia, Sri Lanka, Suriname,) and reduced or exempted from export taxes (Argentina, Brazil, Pakistan, Zambia).

Most tightening measures introduced in 2021 were aimed at containing the economic repercussions of the COVID-19 pandemic, which would disproportionately affect emerging market and developing economies and low-income developing countries. Kuwait led with the most restrictions (12) followed by Sri Lanka (7). Almost all of the tightening actions by Sri Lanka were related to surrender/repatriation requirements to bolster their international reserve position. For example, it introduced a 25 percent surrender requirement to licensed banks on all proceeds from exports of goods, as well as a requirement for banks to sell 50 percent of the proceeds in various currencies purchased from exporters of goods to the central bank. During the year, Sri Lanka somewhat eased these restrictions (see above) and then tightened them again as economic conditions worsened. Malawi reintroduced a surrender requirement temporarily to manage shortages of foreign exchange and lowered the time allowed for repatriation of profits under an existing repatriation requirement. Ethiopia and Zimbabwe increased or implemented surrender requirements to address likely balance of payments needs. Other pandemic-related tightening measures in 2021 included transparency and authorization requirements and mechanisms related to exports of COVID-19 vaccines (Belgium, Bulgaria, Czech Republic, Hungary, Spain). Non-pandemic–related tightening measures have also risen, with increased repatriation requirements (Angola, Myanmar, Sierra Leone) and imposition of export taxes (Pakistan, Zambia).

---

36 Romania and Spain reported EU-wide temporary tariff reductions related to imports originating from Ukraine.
Figure 7. Export and Export Proceeds

1. 2021 showed a significant increase in tightening measures, and the trend appears to have carried over to 2022.

![Graph showing number of changes by type of measure over years.

2. Emerging market and developing economies gave the strongest signal of tightening but also easing in 2021, while the trend to tighten maintained its course in 2022.

![Graph showing number of countries reporting changes.

Based on partial data for 2022, members continued implementing more tightening measures in exports and export proceeds, as in previous years. Partial data for 2022 show fewer tightening measures than in 2021, but the trend may change once data for the entire year data become available. Countries with the most tightening measures are Belarus (7), Kuwait (5), and Russia (5). For example, Belarus and Kuwait introduced bans on the exports of certain types of goods. Russia imposed temporary restrictions on the export of certain types of sulfur, certain types of fertilizers, and recyclable paper and cardboard, in addition to documentation requirements and a mandatory sale of 80 percent of foreign exchange earnings by exporters in the domestic market to increase the supply of foreign currency. In terms of easing measures, members with the most easing measures are Russia (9), Uzbekistan (8), and Kuwait (4). Russia, despite imposing some restrictions, also continued liberalizing by suspending or lifting repatriation requirements and discontinuing or reducing surrender requirements. Similarly in a liberalizing trend, Uzbekistan reduced fines for failing to meet repatriation requirements and Kuwait lifted previously imposed bans.
Current Invisible Transactions and Current Transfers

This section discusses exchange controls on invisible transactions and transfers that are included in the current account of the balance of payments. This category includes income from investment (for example, profits, dividends, and interest); payments for travel, education, medical expenses, and subscription and membership fees; unrequited transfers (for example, remittance of nonresidents’ salaries and wages); and payments related to services. The section also covers the repatriation and surrender requirements for proceeds from current invisible transactions and current transfers.

Liberalization in this category picked up noticeably in the reporting period, reversing the slowdown observed in 2020 and approaching the average proportions of 2016–18 (Figure 8, panel 1). In 2021 members reported significantly more easing measures (81) than restrictive ones (15), with the trend continuing into 2022.

Payment for current invisibles and current transfers

During 2021, more than half of the 80 measures related to payments for current invisibles and current transfers, reported by 22 countries, were easing measures (66), while only 8 were tightening and 6 neutral (Figure 8, panel 2). Of the 66 liberalizing measures, Argentina reported 16 actions across a range of current payments, including easing of prior approval of controls on transfers for trade-, and investment-related payments, payments for travel, and personal payments. Tajikistan (7) introduced various indicative limits or bona fide tests, where the values of these limits were increased from 60 Tajikistani Somoni to 64 Tajikistani Somoni. In 2021, the Philippines (6) relaxed how foreign exchange purchases from authorized dealers for various non-trade current account transactions could either be remitted directly to the intended nonresident beneficiary’s account or credited to the resident purchaser’s foreign currency deposit unit account for eventual remittance to beneficiaries.

Among the eight tightening measures reported in 2021, three were introduced by Pakistan. Remittances of profits or dividends by the Real Estate Investment Trusts became subject to a tax of 15 percent, outward remittance transactions by exchange companies were reduced to $10,000 from $50,000 per day, and quantitative limits were reduced on amounts travelers could take to Afghanistan. Sri Lanka imposed two measures relating to limiting credit card use abroad for foreign exchange payments to nonresidents.

The trend towards liberalization continued into 2022, albeit not at such a high pace as in 2021. Of the 68 measures reported, the vast majority (39) were easing, 27 were tightening measures, and only 2 were neutral measures (Figure 8, panel 2). Ecuador gradually reduced the capital outflow tax from 5 percent to 4 percent in a year, in four steps that affected three categories (trade-related payments, investment-related payments, and credit card use abroad) resulting in 12 total easing measures. Ukraine implemented eight easing measures to facilitate transferring currency in and out of the country. Ukraine also tightened (eight measures) rules on specific uses of foreign currency in commercial and noncommercial situations. Russia (seven measures) restricted payments and investment-related activities in rubles.

Proceeds from current invisibles and current transfers

In 2021–22, easing regulations outnumbered tightening regulations (23 and 14, respectively), with one neutral measure being reported. Twenty-five out of 38 total changes concerned surrender requirements, and 13 targeted repatriation requirements.

Twelve countries reported 23 changes in 2021, composed of 15 easing measures, 7 tightening measures, and 1 neutral change (Figure 8, panel 2). Many of the measures mirrored the changes to regulations on exports and export-related payments indicating a close link between these transactions. Among the nine countries liberalizing restrictions on proceeds from current and invisible transfers, Russia accounted for 4 out of the 14 easing measures, reflecting the previously mentioned reforms of repatriation requirements. Other easing measures included decreasing surrender requirements to authorized dealers (Bangladesh) or to the central bank (Honduras, Suriname). Five countries tightened in 2021: Ethiopia, Malawi, Zimbabwe, Suriname (which suspended the measure later in the year), and Sri Lanka set or increased surrender requirements to the central bank, while Ethiopia additionally set surrender requirements to authorized dealers.
In 2022, members reported 8 easing measures and 7 tightening measures, in a total of 15 changes in regulations (Figure 8, panel 3). On the easing side, Russia once again led with three measures aimed at liberalizing regulations regarding proceeds from current invisibles and current transfers, followed by Ukraine (2). With the imposition of martial law Ukraine initially tightened repatriation requirements by shortening the deadline to 90 days and then relaxing it in two steps to 180 days. South Africa allowed resident individuals to receive and retain gifts from nonresidents offshore. Argentina, Bangladesh, and Myanmar relaxed surrender requirements to authorized dealers. Other tightening measures include surrender requirements to central banks. Sri Lanka introduced a measure that all banks are required to sell 25 percent of remittances on a weekly basis to the Central Bank of Sri Lanka, and Ethiopia required commercial banks (except for the Development Bank of Ethiopia) to send 70 percent of their foreign exchange inflow from export of goods, services, private transfers, and nongovernmental organization transfers to the National Bank of Ethiopia. Other tightening measures in the form of surrenders to authorized dealers were introduced in Suriname mandating exporters to sell 35 percent of the export proceeds to commercial banks and, Myanmar requiring that foreign exchange earnings entering bank account be surrendered within one working day. Ethiopia reduced the share of export proceeds that exporters and inward remittances beneficiaries may retain in foreign exchange for an indefinite period in domestic banks from 40 percent to 20 percent.

Figure 8. Current Invisibles and Current Transfers

1. 2021 saw more easing measures than the previous years, but these dropped in 2022. Tightening measures in 2021 reached only half of those in 2020 and generally remained lower than in previous years. However, tightening measures increased in 2022.

2. Payment for current invisibles and current transfers saw an increase of easing measures and a decrease of tightening measures compared to previous years. With current 2022 data, that trend appears to have reversed.
3. Proceeds from current invisibles and current transfers had a slight increase of easing measures and a slight increase of tightening measures compared to previous years. With current 2022 data, tightening measures have stayed the same, but easing measures have dropped.

Source: AREAER database; and IMF staff calculations.
Note: The position date for 2022 varies by country but is at least the end of June 2022 for most countries with some reporting data through September 2022.

**Account Transactions**

Liberalization measures dominated regulatory changes on account transactions in the reporting period. From January 2021 through September 2022, 113 of the 212 changes in resident and nonresident account regulations were easing measures, followed by 54 neutral and 45 tightening measures. These regulations were made by 36 countries, mainly emerging market and developing economies taking liberalization measures (Figure 9, panel 1).

The number of changes in regulations in this category increased in 2021, compared with 2020, from 89 to 124. Among the 124 changes reported in 2021, 68 were liberalization efforts, while 38 were neutral measures and 18 tightening. This shows an increase in easing measures and a drop in tightening regulations compared with 2020, in part driven by the reversal of COVID-19 pandemic related measures. In contrast, partial 2022 data show a sharp increase in tightening measures mostly related to the war between Russia and Ukraine (Figure 9, panel 2).

**Resident accounts**

Twenty-three members reported 72 measures concerning resident accounts in 2021, of which liberalization actions (43) outnumbered neutral (20) and tightening (9) measures (Figure 10, panel 1). While easing measures strongly increased and neutral ones almost tripled compared with 2020, tightening actions declined from their previous levels.

Among the 43 easing measures, Sri Lanka dominated with 9 measures, followed by Aruba with 5 measures. The former allowed the receipt of the proceeds of loans and investments (of certain companies) from nonresidents and permitted eligible companies and individuals to open accounts abroad without approval. Aruba eliminated the COVID-19 measures that had limited transfers to foreign exchange accounts and allowed again transfers by resident legal entities to their own bank accounts held abroad. Similarly, Curaçao and Sint Maarten partially lifted temporary measures, taken in response to the pandemic, on limits to transfers to foreign exchange accounts. The rest of the easing measures were implemented by 19 countries, with roughly two measures made by each one of them. Among these countries, Argentina stood out by permitting transactions in convertible accounts

37 Note that the number of countries in Figure 9, panel 1, may not add up in the text because certain countries introduced tightening measures at the same time as neutral or easing measures.

38 Sri Lanka is responsible for 17 of them, mainly by extending temporary regulations as well as the restructuring of regulations regarding different types of accounts.
without approval for eligible customers. Similarly, Malaysia eased convertibility of accounts in domestic currency into foreign currency by allowing sales of domestic currency by residents freely for any amount with licensed onshore banks (excluding international Islamic banks). Also, four members of the Central African Economic and Monetary Community—CEMAC: Cameroon, Chad, Republic of Congo, and Equatorial Guinea, granted a special provision to companies in the extractive sector by allowing them to hold foreign currency accounts abroad as part of their ordinary operations.

The nine tightening measures in 2021 were introduced by four countries, with Sri Lanka dominating again (6). Sri Lanka imposed restrictions on transfers between certain foreign exchange accounts. For example, Business Foreign Exchange Accounts were allowed to transfer funds to accounts in the Offshore Banking Units only if they were of the same account holder, while previously they were permitted irrespective of the account holder. Overall, Sri Lanka introduced and extended both easing and tightening regulations to recover from the foreign exchange shortage arising from the balance of payment crisis aggravated by the COVID-19 pandemic. North Macedonia enacted, in April, new limits for transfers to accounts with payment institutions or e-money institutions abroad.

In early 2022, 54 measures were imposed. The tightening regulations were on the rise, with 15 measures (almost doubled the number in 2021). Because of the war, Russia and Ukraine dominated with five and three measures, respectively. The former by imposing several limits on the transfer and withdrawal of foreign currency, as well as restrictions on the exchange rate used to convert funds received as a transfer from a bank outside Russia. Ukraine prohibited any exchange transaction using Russian rubles or Belarusian rubles, as well as banned most cross-border transfers from the country with some exceptions. On the other hand, 32 liberalization actions and 7 neutral ones have taken place. Again, Russia dominated with 10 easing measures. Most of them were progressive liberalizations after the strict limits on foreign exchange accounts mentioned above had been introduced. Ecuador stood out with eight measures, but all of them related to a progressive reduction (one per quarter) of the capital outflow tax. Since this tax affects both domestic and foreign currency accounts held abroad, these four reductions are counted as eight measures.

**Nonresident accounts**

Thirteen members reported 52 changes in 2021, a much higher number than in 2020 (34). The changes continued to be predominantly in the easing direction (25), a slightly higher number than in 2020 (Figure 10, panel 2). However, the tightening measures (9) experienced a rapid growth, almost doubling the number of 2020 (5). Neutral measures39 (18) also doubled compared to 2020.

While some pandemic-related actions were extended in 2021 (being recorded as neutral measures), the increase in easing measures did not seem to be driven by COVID-19 dynamics. Rather, several low-income developing countries and emerging market and developing economies continued broader liberalization: The Philippines (6 measures) eased regulations regarding nonresident domestic currency accounts by expanding the ways in which these accounts may be funded; Vietnam, as part of reforms emanating from the new Law on Securities, eased regulations on domestic currency accounts; and Bangladesh, seeking to increase inward investment, liberalized regulations by allowing temporary foreign exchange accounts in the name of proposed companies of foreign investors contemplating investment in the country. Sri Lanka, again, stood out with five easing measures expanding the scope of eligible nonresidents that can open accounts in foreign and domestic currency. Argentina had four easing measures related to the removal of the prior approval of transactions in convertible accounts under certain conditions.

Only three countries reported tightening regulations (9 in total) in this category in 2021. Sri Lanka enacted 7 of them, by limiting the holders of joint accounts and by imposing temporary COVID-19 measures such as limiting the repatriation of funds. Also, Belgium reported that it blocked accounts held by certain entities from Belarus, and Myanmar imposed daily and weekly withdrawal restrictions to local currency accounts.

39 These neutral measures account for extensions of the COVID-19 pandemic and some measures that involved changes in regulations that cannot be classified as tightening nor easing. Sri Lanka, for instance, is responsible of 14 measures mainly by extending temporary regulations as well as the restructuring of regulations regarding different types of accounts.
The changes reported for the first months of 2022 also show an increase in tightening measures, with tightening measures (12) already higher than the total for 2021. In contrast, easing measures seem to grow at a slower path than before, with only 13 measures in the available data. Russia is responsible for eight easing measures and seven tightening ones. Regarding the tightening regulations, they include transfer limits and withdrawal restrictions on accounts held by residents from sanctioning countries, but also by limiting the number of operations performed from accounts that have debt obligations to creditors from sanctioning countries. Among the easing measures, those that stand out are progressive removal and relaxation of the aforementioned limits on nonresidents from such countries. Argentina and Lebanon enacted easing regulations, the former by lifting the obligation of banks to sell back the purchased foreign currencies to the Banque Du Liban, and the latter by facilitating the access of Social Security Agencies to the foreign exchange market.

**Figure 9. Account Transactions**

1. Emerging market and developing economies show a greater predisposition to take easing measures, followed by low-income developing economies in 2021.

2. Changes in regulations in Account Transactions increased in 2021 compared with 2020. Available data for 2022 show the same increasing trend.

Sources: AREAER database; and IMF staff calculations.

Note: The position date for 2022 varies by country but is at least the end of June 2022 for most countries with some reporting data through September 2022.

Panel 1: AEs = advanced economies; EMDEs = emerging market and developing economies; LIDCs = low-income developing countries.
Figure 10. Resident and Nonresident Accounts

1. **Resident accounts**: While 2021 showed an increase in liberalization measures and a drop in tightening ones, the available data for 2022 indicate an increase in tightening measures.

---

**Capital Controls**

The major challenges the global economy faced during 2021 and 2022 had significant implications for capital flows (January 2022, April 2022, and October 2022 *World Economic Outlook*). Uncertainty regarding access to vaccines, emergence of virus mutations, and delays in reopening economic sectors contributed to a slowdown of international capital flows. With the spread of the new Omicron COVID-19 variant, countries reimposed mobility restrictions. The frequent lockdowns under its zero COVID policy and the weakening property sector resulted in the slowdown in China. Given the size
of China’s economy and its importance for global supply chains, this weighed heavily on global trade and activity. Rising energy prices and supply disruptions resulted in higher and more broad-based inflation than anticipated in many countries. Persistent and broadening inflation pressures triggered a rapid and synchronized tightening of monetary conditions in 2022. The Russian invasion of Ukraine in 2022 had a significant destabilizing effect on the global economy, including by contributing to sharply higher energy and food prices globally that resulted in persistent increase in costs of living worldwide and hampered economic activity. Immediately after the invasion of Ukraine by Russia, capital outflows increased markedly from emerging market and developing economies, tightening financial conditions for vulnerable borrowers and net importers of commodities, and putting downward pressure on the currencies of the most exposed countries. The pace of global monetary tightening accelerated in 2022, especially in the United States. The resulting sharp appreciation of the US dollar added significantly to domestic price pressures, to the cost-of-living crisis and to aggravate debt distress in many low-income developing countries. Tighter financial conditions and fear of global recession influenced global capital flows, often with negative consequences for emerging market and developing economies.

Advanced economies experienced net capital outflows in 2021, but inflows recovered in 2022. Net capital inflows sharply reversed in emerging market and developing economies and low-income developing countries during 2021–22 (Figure 11, panel 1), which was largely explained by more volatile portfolio flows and other investment (such as loans, deposits, trade credits), and a resulting drawdown of foreign reserve assets (Figure 11, panel 2). FDI flows to emerging market and developing economies recovered, consistent with a recovery of the global flow of foreign direct investment to pre-pandemic level. Capital flows related to cross-border deals and international project finance were particularly strong; however, the recovery of greenfield investments in industry remained fragile, and well below pre-pandemic level especially in developing economies and low-income developing countries. In contrast, advanced economies experienced stronger FDI flows (both inflows and outflows) and portfolio investment flows in 2021–22 (Figure 11, panel 3).

This section discusses measures that affect international capital flows. These measures are also considered to be capital flow management measures (CFMs) as defined by the IMF’s institutional view on the liberalization and management of capital flows. In addition to the capital controls included in this section, prudential-type measures discussed in the next section may also be CFMs if they were designed to limit capital flows. However, the AREAER does not use this terminology because classifying a measure as a CFM requires substantial background information and considerable judgment, which is beyond the scope of the analysis conducted in compiling the AREAER database.

---

41 CFMs encompass a broad spectrum of measures. For the purposes of the IMF’s institutional view, the term “capital flow management measures” refers to measures designed to limit capital flows. CFMs comprise residency-based CFMs, which encompass a variety of measures (including taxes and regulations) affecting cross-border financial activity that discriminate on the basis of residency—also generally referred to as capital controls—and other CFMs, which do not discriminate on the basis of residency but are nonetheless designed to limit capital flows. These other CFMs typically include measures, such as some prudential measures, that differentiate transactions on the basis of currency, as well as other measures that typically apply to the nonfinancial sector. The concept of capital controls in the AREAER is residency-based: it includes various measures that regulate the conclusion or execution of transactions and transfers and the holding of assets at home by nonresidents and abroad by residents. See International Monetary Fund. 2022. *Review of The Institutional View on The Liberalization and Management of Capital Flows*, Washington, DC.
1. EMDEs and LIDCs experienced a sharp reversal in net capital inflows during 2021–22.

2. EMDEs and LIDCs in 2021–22 experienced volatile capital flows: net portfolio outflows accompanied by higher inflow into direct investment and other investment.

3. AEs in 2021–22 saw higher inflows into portfolio and direct investments.

Sources: IMF, October 2021 World Economic Outlook (WEO) database; and IMF staff calculations.

Note: In 2018, AEs experienced negative gross FDI inflows and outflows and are thus reflected in the outflows and inflows bars, respectively. AEs = advanced economies; EMDEs = emerging market and developing economies; FDI = foreign direct investment; LIDCs = low-income developing countries.

*Data for 2022 are WEO projections.

The number of measures implemented in 2021 rose significantly from the previous year—434 measures compared with 380 measures (Figure 12, panel 1).

Partial data for 2022 suggests that the pace of changes in capital controls continues to remain high. Of the 434 changes in 2021, there were 51 tightening actions, 325 easing actions, and 58 actions that were neutral or of an indeterminate nature.

Tightening actions were markedly

The AREAER records the imposition/removal of restrictions across all affected categories of transactions, thereby showing a large number of measures taken by some countries. The total number of measures in 2021 and 2022 includes a relatively large number of changes reported by a few countries such as Argentina, Aruba, Curacao and Sint Maarten, and Sri Lanka mainly because of wide-ranging restrictions imposed in response to an economic crisis and/or the pandemic. In some instances, these measures were gradually reversed as the economic situation improved. In addition, Ecuador gradually reduced its tax on capital outflows in 2022, which is recorded in the AREAER over many categories and hence reports a large number of changes.

The 58 neutral changes during 2021 and 31 in 2022 cannot be classified as easing or tightening of restrictions. Most either did not discriminate by residence or currency or involved changes in regulations that were not clearly either easing or tightening. To avoid counting the same measure more than once, as far as possible, pandemic-related measures that were extended were labeled neutral.

In this section, restrictions on nonresidents’ acquisition of domestic assets (including restrictions on repatriation of these assets) are referred to as “inflow controls”; restrictions on residents’ acquisition of assets abroad (including repatriation restrictions on these assets) are referred to as “outflow controls.”
lower on both inflows and outflows, by more than three times in each category in 2021, largely on account of the smaller number of COVID-19 pandemic–related tightening measures, reflecting in part the need for lesser actions as the intensity of the pandemic waned. Hence, in 2021, changes in capital transactions were no longer dominated by COVID-19–related measures: 11 of 51 total tightening actions (111 of 325 total easing actions) were measures introduced in response to the pandemic, while the rest were for other reasons (Figure 12, panel 3). There was an increasing number of neutral changes in 2021 due to an extension of pandemic-related measures.

Concurrently, the significantly higher number of actions easing controls, which was only partly due to the relaxation of pandemic-related measures, may have reflected that the liberalization trend interrupted by the pandemic may have begun to gather momentum. Tightening actions increased in 2022 based on partial-year data, dominated by measures implemented by Russia and Ukraine following Russia’s invasion of Ukraine to prevent capital outflows.

**Figure 12. Overview of Controls on Capital Transactions, 2018–22**

1. 2021 saw a sharp fall in tightening measures as the impact of the pandemic waned and a corresponding sharp rise in easing measures reflecting the reversal of pandemic-induced tightening.

2. In 2021, tightening inflows and outflows measures decreased dramatically, while they rose slightly in 2022.

3. Countries reported fewer COVID-19–related measures in 2021 than in 2020 with a larger share of easing measures reflecting the reversal of pandemic-related measures.

4. Measures easing inflows and outflows increased significantly in 2021, and the trend continued in 2022.

Sources: AREAER database; and IMF staff calculations.

Note: The position date for 2022 varies by country but is at least the end of June 2022 for most countries with some reporting data through September 2022. Tightening (Easing) I/O refers to measures that affected both inflow and outflow of capital. COVID-19 refers to changes that are explicitly reported as measures in response to the COVID-19 pandemic. “Other” refers to changes that are not related to the COVID-19 pandemic.

Although there were more actions taken in 2021 than in the preceding year, the number of countries reporting changes decreased dramatically with the majority of actions on capital transactions taken by emerging market and developing economies (Figure 13).

---

45 Figure 12, panel 3 may not list full range of COVID-19–related measures because some countries may not explicitly identify the measures as COVID-19–related measures.
Actions taken by advanced economies in 2021–22 reached their lowest level since 2018 driven mainly by the dramatic decline in the number of tightening measures. In 2021, the total number of changes in the controls on capital transactions in advanced economies amounted to 34, of which 14 were tightening (by 7 countries), 15 easing (by 4 countries), and 5 neutral (by 3 countries) (Figure 14, panels 1 and 2).

Most of the actions in 2021 and 2022 were reported by emerging market and developing economies. In 2021, the total number of changes in the controls on capital transactions in emerging market and developing economies amounted to 382, of which 300 were easing (by 24 countries), 34 tightening (by 7 countries), and 48 neutral (by 7 countries) (Figure 14, panels 3 and 4). In contrast to advanced economies, the number of changes, especially measures easing controls by emerging market and developing economies in 2021 increased significantly from the previous three years, and the trend continued in the partial year 2022. The number of measures tightening controls on capital transactions by emerging market and developing economies decreased dramatically in 2021–22, suggesting relief from COVID-19–related pressures.

**Figure 13. Controls on Capital Transactions by Income Groups—Overview, 2018–22**

On average, controls on capital transactions were implemented mostly by emerging market and developing economies, followed by advanced economies and low-income developing countries.

Low-income developing countries reported more actions during 2021–22. Reported measures were largely dominated by easing controls on capital transactions (Figure 14, panels 5 and 6).

The nature of new measures differed significantly among country income groups. The majority of the measures adopted in advanced economies remain FDI-, derivatives- and real estate-investment–related measures, while for emerging market and developing economies, most changes continue to relate to capital and money market instruments, followed by credit operations and derivative transactions. The majority of actions introduced in low-income developing countries related to capital and money market instruments, followed by credit operations and repatriation requirements.
Figure 14. Controls on Capital Transactions by Income Groups, 2018–22

1. There was a large drop in the number of tightening measures in 2021–22, while the number of easing measures remained low.

2. The number of countries taking tightening actions reduced significantly in 2021–22.

Emerging market and developing economies

3. Easing measures reached their highest level in 2021, while the number of tightening measures dropped sharply reflecting in part the reversal of pandemic-related tightening in 2020. The trend continued in 2022.

4. The number of countries taking tightening actions reduced significantly in 2021–22 compared with 2020, while the number of countries easing controls remained roughly the same in 2021.

Low-income developing countries

5. Measures easing controls on capital transactions continued to dominate in LIDCs during 2021–22.

6. Similarly to the past, only a few LIDCs implemented changes in 2021–22.

Sources: AREAER database; and IMF staff calculations.

Note: The position date for 2022 varies by country but is at least the end of June 2022 for most countries with some reporting data through September 2022. Some countries may have taken both tightening and easing actions. AEs = advanced economies; EMDEs = emerging market and developing economies; LIDCs = low-income developing countries.

Advanced economies

In advanced economies, FDI-related measures continued to outnumber actions related to capital and money market instruments in 2021–22 (Figure 15, panel 1). These FDI-related measures were due to adjustment of FDI screening frameworks and an extension of existing measures in some advanced economies.

Of the 14 tightening actions by advanced economies in 2021, eight restricted inward direct investment (Australia, Canada, Germany, Japan, and Sweden). More stringent rules and stronger enforcement were
introduced with respect to the screening of foreign direct investment in Australia (as parts of its reform on foreign investment review framework) and Sweden, while Canada lowered trigger thresholds for particular types of investment. In addition, Australia broadened the scope of its foreign investment screening program to include collective investment vehicles by adopting an approval requirement on foreign investment in collective investment vehicles. Iceland at first removed controls on derivative transactions but later imposed limits on the foreign exchange derivative positions of Icelandic banks, specifically on transactions in which the Icelandic króna is specified in the contract against a foreign currency, replacing the previous ban on such activities Singapore increased Additional Buyer's Stamp Duty (ABSD) on certain categories of residential property.

Among the five neutral measures in 2021, Spain extended the duration of the existing investment screening measures for FDI and foreign acquisition of shares, Italy extended the measure relating to stronger enforcement and expanded the scope of activities, and Canada issued updated Guidelines on the National Security Review of Investments, supporting continued transparency in the review process.46

There were 15 easing actions reported in 2021, by Iceland (5), Australia (4), New Zealand (4), and Canada (2). Australia and New Zealand gradually relaxed screening measures on FDI and real estate investment by nonresidents. The reform of the foreign investment review framework in Australia resulted in abovementioned tighter screening restrictions. However, it also removed the temporary zero-dollar monetary threshold and reverted to thresholds that are adjusted on an annual basis (except for sensitive national security businesses) and set higher thresholds than in the past. Canada continued to relax the screening threshold for certain countries under particular trade and investment agreements.

Figure 15. Controls on Capital Transactions By Type and Region, 2018–22

1. Actions related to FDI continued to dominate in AEs in 2021–22, but the number of changes decreased compared to past years.

2. Number of actions in EMDEs increased in 2021 with most changes continuing to be related to capital and money market instruments.

---

46 This update specifically addresses national security concerns relating to investments involving potentially sensitive technologies, sensitive personal data, and the security of critical mineral supply chains.
3. Of 41 economies that took action in 2021, 11 (all EMDEs) had 10 or more actions.

4. Actions introduced by LIDCs in 2021 increased from the previous year dominated by measures in capital and money market instruments.

There were seven tightening measures in 2022, by Canada (3) and one measure each in France, Singapore, Slovak Republic, and the United Kingdom, which are measures related to restrictions on inward FDI and investment in property. France adopted an FDI-screening mechanism to ongoing developments in the renewable energy sector and added foreign investment in technologies involved in the production of renewable energy to the list of critical technologies to the list of sectors that required additional screening. The Slovak Republic amended general rules against the fragmentation of agricultural land by modifying their prohibition of creating new land or new co-owner’s deal agricultural land to include smaller size of land. The United Kingdom adopted the National Security and Investment Act which established UK’s national security screening system for foreign acquisitions of control over qualifying entities (such as businesses) and qualifying assets (land, physical assets, and intellectual property). Canada imposed a nonresident deed transfer tax and increased the nonresident speculation tax on the purchase of residential property in certain provinces. Singapore levied the Additional Buyer’s Stamp Duty on any transfer of residential property into a living trust.

There were 11 easing measures in 2022, by Iceland (4), Canada (4), and Australia (3). Iceland exempted transactions between Icelandic commercial banks from the restriction that apply to derivative positions in which the Icelandic króna is specified in a contract against a foreign currency. Canada continued increasing the review threshold for certain direct acquisition of control in enterprises. In addition, a voluntary filing mechanism was introduced to allow certain non-Canadian investors (for example, minority investors) to get certainty under the Investment Canada Act. However, it also tightened the screening mechanism by extending the time it could take to complete the national security review for these investments absent a filing. Australia increased the monetary thresholds within the scope of the foreign investment screening framework for direct investment and investment in developed commercial land. In addition, Australia’s Foreign Acquisitions and Takeovers Amendment Regulations 2022 came into force, which clarify certain aspects of the foreign investment screening framework.
investment review framework and streamline the process for certain less sensitive types of investment, to reduce the regulatory burden for foreign investors that engage in money lending, invest in unlisted land entities or Australian media businesses, acquire shares or units under certain conditions, transact on behalf of institutional investors as part of a custodian service, and raise thresholds and provide broader exemptions from foreign investment screening.

There were 3 neutral measures in 2022, by Spain (2) and Italy (1). Spain further extended the duration of the existing investment screening measures for FDI and foreign acquisition of shares. Similarly, Italy further extended the duration of the existing measure relating to stronger enforcement and expanding scope of activities.

**Emerging market and developing economies**

The majority of actions in 2021 and 2022 taken by emerging market and developing economies remained largely related to capital and money market instruments (191 and 148), followed by credit operations (54 and 31), derivatives (40 and 28), personal capital transactions (37 and 40), and direct investment (30 and 17)—almost all of which have increased from the previous three years (Figure 15, panel 2). There were 34 tightening measures in 2021, by Argentina (8), Bolivia (8), Sri Lanka (7), Belarus (6), Hungary (2), Thailand (2), and China (1) (Figure 15, panel 3). Argentina tightened regulations on securities purchase and sale transactions with settlement in foreign currency, consistent with its balance of payment fragilities accentuated by the COVID-19 pandemic. Bolivia further reduced the maximum limit on investments abroad by insurance companies, and on investments and demand deposits abroad by financial intermediation entities. To stabilize the exchange rate and preserve scarce international reserves, Sri Lanka reduced the limit for an additional investment or infusion of funds to be made by eligible resident companies in already established subsidiaries or branch offices overseas, and tightened regulations on investments made by an emigrant while being a resident in Sri Lanka through an Outward Investment Account. In addition, proceeds received from the sale of real estate acquired through inward remittances may not be credited to an account maintained outside Sri Lanka. Belarus tightened regulations on credit operations and personal capital transactions by introducing registration requirement by residents for transaction with amount exceeding certain thresholds. Hungary expanded the scope of companies and sectors of strategic importance for FDI screening under transitional emergency rules. Thailand reduced the outstanding limit on Thai baht liquidity that domestic financial institutions may provide to a nonresident group without proof of underlying trade or investment. China tightened its macroprudential adjustment parameter for enterprises.

There were 300 easing measures in 2021. The majority of easing measures related to the relaxation of restrictions previously introduced in 2020 by many tourism-dependent economies, which were severely affected by the COVID-19 pandemic previously—namely, Aruba (53), Curacao and Sint Maarten (40), Sri Lanka (20), and The Bahamas (7). These countries initially tightened measures on capital outflows, mostly in capital and money market instruments and credit operations. With improving economic conditions these countries gradually eased existing controls. Aruba gradually eased and eventually eliminated all temporary controls on capital outflows imposed in response to the COVID-19 pandemic. The Bahamas no longer suspended approval of applications to purchase foreign exchange for transactions in international capital markets, direct investments, and real estate investments. Curacao and Sint Maarten allowed outward capital transactions by residents and nonresidents up to certain limits in several categories of outflows—namely, granting loans to nonresidents, making investment abroad (direct, portfolio investments, derivative transactions), liquidation of direct investment, real estate transactions, and personal capital transactions. The temporary limits were relaxed in 2021 and eliminated in 2022, reverting to pre-pandemic regulatory environment. Sri Lanka relaxed selected capital outflow restrictions imposed earlier by allowing some transactions (related to capital money market instruments, personal capital transactions, direct investment, and credit operations) under certain thresholds, as well as relaxed restrictions on residents receiving external loans from abroad. However, it also extended the duration of previous measures (32) introduced in 2020 in response to the COVID-19 pandemic, such as suspending outward remittances on capital transactions by residents, imposing restrictions on purchases of Sri Lanka’s international sovereign bonds by local banks, and on outward transfers of funds for emigrants.

---

47 At the same time Thailand established a NRQC scheme through which these companies could more easily manage their currency risks.
Other easing measures were led by Argentina (69), Jamaica (20), Angola (11), China (10), Ukraine (9), the Philippines (8), and The Bahamas (7). The relaxation of controls covers all categories but was dominated by capital and money market instruments. This, in part, reflects the continued trend toward liberalization of emerging markets’ domestic financial and corporate sectors, as both residents and nonresidents were allowed to participate in cross-border investment under more liberalized conditions. Some examples include:

- Argentina continued to gradually ease controls imposed initially to deal with the 2018–19 balance of payment crisis. The easing measures mostly affected capital and money market instruments, credit operations, direct investment and liquidation of direct investment, real estate, and personal capital transactions, consistent with the plan to return to international capital markets beginning in 2025.
- Angola eased the regulation on purchase of foreign currency or use of own foreign currency funds, for any purposes abroad, including investments, up to certain limits.
- Jamaica continued relaxing restrictions on resident outward investment in derivatives and capital and money market instruments by further increasing permissible limits and expanding coverage of foreign assets in which pension funds and insurance companies may invest.
- Belarus replaced a central bank approval requirement with a registration requirement for residents' outward investment in capital money market instruments, derivatives, credit operations, direct investment, real estate, and personal capital transactions.
- Ukraine, as part of its capital flow liberalization plan, increased the maximum limit allowed for resident individuals purchase and transfer foreign currency for investments abroad (in several categories, namely, personal capital transactions, real estate, direct investment, derivatives, and capital and money market instruments).
- China eased restrictions on capital and money market instruments and derivatives (enabling domestic institutions to invest in Hong Kong SAR and global bond markets, allowing residents of Hong Kong and Macao to participate in palm oil and crude oil options trading on certain commodity exchanges) and credit operations (relaxed and simplified the regulation of renminbi-denominated overseas loans and borrowing by domestic enterprises).
- The Philippines lifted the prior approval requirement for all foreign exchange derivatives transactions to be entered into by nonbank government entities, and further relaxed certain restrictions on derivative transactions. There were also amendments to the regulations relating to securities to simplify the licensing process and expand eligible investor bases.
- Bolivia eased regulations for pension funds to invest in debt securities issued abroad and Colombia eliminated a previous restriction for nonresident individuals providing financing relating to credit operation and personal capital transactions in certain cases. Hungary relaxed national security measures, imposing certain controls on foreign investments regarding both direct investments and portfolio investments.

Among the 55 tightening measures in 2022, 25 and 18 were introduced by Russia and Ukraine, respectively, as a consequence of Russia’s war on Ukraine. Russia prohibited resident and nonresident outward capital transactions in several categories, introduced a ban on the payment of dividends to nonresidents and of sale proceeds from securities, tightened certain conditions on debt repayment (foreign currency debt could be paid only in rubles, introduced certain limits and periods for debt repayment to creditors who are residents of Russia and creditors from countries that have not joined sanctions against Russia, and introduced special accounts opened with Russian and foreign credit institutions for ruble repayments on debt obligations to creditors from the countries that have imposed sanctions against Russia). In Ukraine, banks were prohibited from carrying out transfers of individuals related to current noncommercial transactions. There is also a temporary ban on transfers of funds from Ukraine including transactions involving the return of foreign investments to correspondent accounts of nonresident banks.

Among the 204 easing measures in 2022, 116 were implemented by Ecuador, which involved the gradual reduction (in four steps) of capital outflow tax,48 and 34 by Curaçao and Sint Maarten, related to the...
elimination of the temporary maximum limits on residents’ and nonresidents’ outward capital transactions including on investments abroad by pension funds and insurance companies, bringing the regulations back to pre-pandemic state. Other major contributors to changes were South Africa (14) and China (11). South Africa eased regulations on both inward FDI (by increasing the limit on the transfer of foreign exchange from the parent company to its Domestic Treasury Management Company per year) and outward direct investment (by raising the permitted threshold for investments without the need for approval). In addition, resident individuals were allowed to use their single discretionary allowance and/or foreign capital allowance to participate in online foreign exchange trading activities (including trading global currencies against each other, trading in foreign stocks, trading commodities including cryptocurrencies and trading foreign indices using the online trading platform of the broker concerned) but may not use credit or debit cards to do so. Resident individuals no longer had to repatriate gifts received from nonresidents and could retain them offshore. China further eased certain regulations regarding nonresidents’ participation in credit operations and capital money market instruments. In addition, China continued to open its economy to FDI by improving management of the negative lists for investment and market access and increasing openness in the manufacturing sector for instance by eliminating the foreign ownership limits on manufacturing passenger vehicles.

**Low-income developing countries**

In low-income developing countries, there was a shift in the composition of changes in controls in 2021–22 toward capital and money market instruments, which has increased, and outnumbered actions related to repatriation requirements and credit operations (Figure 15, panel 4).

The liberalization trend seen in low-income developing countries in the previous three years continued in 2021–22. Easing of controls on capital transactions dominated during the period, while the number of tightening actions continued to be very marginal (3 and 2 tightening measure in 2021 and partial year of 2022, respectively) (Figure 14, panel 6).

In 2021, there were 10 easing (mainly on capital inflows and some on capital outflows) and 3 tightening actions (mainly on capital outflows). Vietnam relaxed restrictions on foreign ownership limits on FDI and inward portfolio investment, and tightened the repatriation requirement by specifying a timeline to repatriate all profits and other incomes earned from overseas investment to Vietnam. Honduras lowered and eventually eliminated the requirement to surrender foreign currency to the central bank. Ethiopia tightened restrictions by increasing surrender requirement to the central bank for all commercial banks’ foreign exchange inflow, except for the Development Bank of Ethiopia.

**Provisions Specific to Commercial Banks and Institutional Investors**

This section reviews developments in provisions specific to the financial sector, that is, commercial banks and institutional investors, with a focus on prudential measures that are also capital controls.\(^{49}\) This category covers some monetary and prudential measures in addition to capital controls.\(^{50}\) It includes, among other categories of financial institution transactions, borrowing abroad, lending to nonresidents, purchasing locally issued securities denominated in foreign exchange, and establishing regulations pertaining to banks’ and institutional investors’ investments. These provisions may be similar or identical to the measures described in the respective categories of controls on accounts, capital and money market instruments, credit operations, and direct investment if the same regulations apply to banks and institutional investors as to other residents. In such cases, the measure also appears in the relevant category in the sections on accounts and capital transactions.

---

\(^{49}\) Capital controls and prudential measures are highly intertwined because of their overlapping application. For example, some prudential measures (such as different reserve requirements for deposit accounts held by residents and nonresidents) could also be regarded as capital controls because they distinguish between transactions with residents and nonresidents and hence influence capital flows.

\(^{50}\) Inclusion of an entry in this category does not necessarily indicate that the aim of the measure is to control the flow of capital.
Policy actions in 2020, in response to the pandemic, focused on easing prudential measures on banks, while 2021 saw the reversal of some of these actions to pre-pandemic state resulting in a high number of tightening measures. In contrast, capital outflow controls imposed in 2020 by a few countries in response to the pandemic were gradually lifted in 2021 resulting in an increase in easing capital outflow measures particularly on institutional investors. Reported measures in the financial sector in 2021 (220) were lower than in 2020 (288), a year with strong policy action. The number of changes in capital controls in 2021 (116) was higher than in any of the last five years (Figure 16, panel 1), whereas changes in prudential measures (104) remained broadly in line with those observed in the pre-pandemic years. Most capital controls affected institutional investors (89; Figure 17), reaching a new high in 2021. The surge in capital controls in 2021 was driven by a high number of outflow-easing measures (56)—a similar pattern as before the pandemic followed by the higher than usual neutral changes on outflows (37; Figure 16, panel 2). Some of the outflow easing measures in 2021 reversed the tightening implemented during the pandemic. Most of the neutral changes on outflows are from Sri Lanka (28), which extended the duration of capital controls on outflows taken during the pandemic, as the country was experiencing an economic crisis.

**Figure 16. Capital Controls and Prudential Measures in the Financial Sector, 2018–22**

1. The number of capital controls in 2021 was the highest in the last five years, whereas prudential measures remained broadly in line with those in pre-pandemic years.

2. The high number of capital controls in 2021 was driven by outflow easing measures followed by the higher than usual neutral changes on outflows.

3. The number of easing measures was similar to the number of tightening measures in both 2021 and 2022.

4. The number of measures tightening prudential rules was higher in 2021 and 2022 than in previous years, as countries were reversing the easing implemented during the pandemic. Easing reached a minimum in 2021.

Sources: AREAER database; and IMF staff calculations.
Note: The position date for 2022 varies by country but is at least the end of June 2022 for most countries with some reporting data through September 2022.

---

51 Since 2020 all neutral changes have been on outflows.
52 Extensions of the duration of measures are counted as neutral.
While not covering the whole year, the number of reported measures in 2022 (172; Figure 16, panel 1) was similar to what was observed in the pre-pandemic years, although the number of capital controls (59) was lower than usual. The number of easing measures was similar to the number of tightening measures in both 2021 and 2022 (about 80 in 2021 and about 70 in 2022; Figure 16, panel 3), which differs from previous three years, where the number of easing measures exceeded the number of tightening measures. In addition, 2021 and 2022 stand out for the high number of measures tightening prudential regulations (62 in 2021 and 60 in 2022; Figure 16, panel 4), due to changes affecting banks and other credit institutions. Since 2018 measures easing prudential regulations were at their lowest in 2021.

Looking at countries that implemented capital controls during 2021 and 2022, Sri Lanka, by far, exceeded all other countries (67; Figure 18, panel 1). Even though most of the changes were introduced in 2021 (51), it had also the highest number in 2022 (16), as the country was going through an economic crisis. Curaçao and Sint Maarten (7 each year), Jamaica (12 and 0 in 2021 and 2022, respectively) and Ecuador (0 and 12, respectively) also made considerable use of capital controls. Iceland was the only advanced economy that implemented capital controls during 2021 and 2022.

With respect to the number of changes in prudential measures in 2021 and 2022, Russia took the highest number of measures (0 and 22, respectively; Figure 18, panel 2), followed by Peru (8 and 7, respectively), Türkiye (10 and 3, respectively), Aruba (6 and 6, respectively), and Indonesia (1 and 9, respectively). Advanced economies implemented 15 percent of the changes in prudential measures during 2021 and 2022.

Commercial banks and other credit institutions

The number of measures affecting banks and other credit institutions in 2021 (108; Figure 17) was similar to 2019 and much lower than the pandemic induced actions taken in 2020. The breakdown between capital controls and prudential measures in 2021 (27 and 81, respectively; Figure 17) was also similar to 2019, with a sharp decline in prudential measures from those taken in 2020 in response to the pandemic. While not covering the whole year, reported prudential measures in 2022 (105) were higher than in 2021, with capital controls staying constant (27) thus far. During the last five years, the number of measures easing capital controls has been higher than those that tightened capital controls, with the latter moving between 7 and 10.
The number of measures easing capital controls in 2021 (12) was the same as in 2020, with an increase in 2022 (18). Easing of outflows picked up in 2021 and 2022 from its lowest point in 2020 (Figure 19, panel 1).

The number of measures tightening prudential regulations was higher in 2021 (48) and 2022 (57; Figure 19, panel 3) than in previous years. In contrast to previous years, they also exceeded the number of easing measures. Most of the tightening measures were changes in reserves requirements (33 and 42 in 2021 and 2022, respectively).
1. Easing capital controls in 2021 was as low as in 2020 but picked up in 2022.

2. Easing of outflows picked up in 2021 and 2022 from its lowest point in 2020.

3. The number of tightening prudential measures in 2021 and 2022 was higher than previous years. Easing reached a minimum in 2021.

Source: AREAER database; and IMF staff calculations.

Note: The position date for 2022 varies by country but is at least the end of June 2022 for most countries with some reporting data through September 2022. I/O refers to measures that affected both inflow and outflow of capital.
respectively), as countries were reversing reductions in the rate of required reserves implemented during the pandemic and starting a tightening cycle fighting inflationary pressures. Easing measures reached a minimum in 2021 but strongly rebounded in partial year 2022.

Some notable country examples of changes to capital controls on banks in 2021 and 2022 are the following:

• **Controls on capital inflows:** Brazil reduced the tax on financial transactions (IOF) on external loans with maturity less than 180 days to 0 percent (previously 6 percent), in line with its accession plan to join the OECD. Colombia removed restrictions on residents’ (including banks’) borrowing from abroad. Hungary relaxed asymmetrically its foreign exchange coverage ratio by increasing the limit of short positions (foreign exchange liabilities higher than foreign exchange assets) from 15 percent to 30 percent of capital.\(^{53}\) Thailand allowed corporates under the NRQC scheme to engage with onshore financial institutions to more freely manage Thai baht liquidity without having to provide proof of underlying transaction and without being subject to the end-of-day outstanding limit of B200 million imposed on nonresident baht accounts.

• **Controls on capital outflows:** On the easing side, China eliminated the approval requirement for domestic banks to conduct domestic and foreign currency cross-border financing within the established limits. Curaçao and Sint Maarten allowed outward transactions up to NA f.300,000 and eliminated the limit after some months, removing all temporary controls introduced in response to the pandemic. Ecuador reduced gradually the capital outflow tax from 5 percent to 4 percent, in subsequent changes of 25 basis points. Indonesia relaxed capital limitations on foreign equity participation for certain banks. On the tightening side, Russia restricted loans in foreign currency to any nonresident by requiring a permit granted by the Government Commission on Monitoring Foreign Investment. Sri Lanka suspended banks’ purchases of Sri Lankan sovereign bonds, but subsequently eased the restriction by allowing these transactions to the extent that they are funded by new foreign currency inflows. Thailand tightened limits on Thai baht liquidity that domestic financial institutions may provide to a nonresident group without proof of underlying trade or investment. And, Ukraine, in an attempt to stem capital outflows due to the war, banned several transactions for banks including (1) prepayments of foreign loans;\(^{54}\) (2) exchange transactions with legal entities or individuals located in Russia and the Republic of Belarus;\(^{55}\) (3) credits to nonresidents, except to foreign financial institutions; and (4) transactions involving trade in foreign currency.

• **Controls on capital inflows and outflows:** Iceland replaced the ban on banks’ derivative positions involving the Icelandic currency with limits on such activities. Jamaica introduced absolute limits of J$4.5 billion and J$7.5 billion for long positions and short positions, respectively, on top of the existing relative limits to capital, to control volatility in the foreign exchange market.

Most of the measures introduced in prudential regulations in the reporting period adjusted reserve and liquidity requirements.

• **Reserve requirements:** As noted above, increases in reserve requirements were a common policy in 2021 and 2022. Countries that tightened reserve requirements in 2021 on overall liabilities were: Aruba, Ghana, India, Indonesia, Uzbekistan, and Venezuela;\(^{56}\) on domestic currency liabilities: Armenia, Brazil, and Maldives, on foreign currency liabilities: China, and on both: Mongolia, Peru, and Türkiye. In 2022, countries that tightened reserve requirements on overall liabilities were: Aruba, Costa Rica, India, Indonesia, Seychelles, and Uganda, on domestic currency liabilities: Bahrain, on foreign currency liabilities: Georgia, Haiti, Republic of North Macedonia, and Moldova, on both: Mongolia, Peru, Russia, Suriname, and Türkiye. Aruba (10), Indonesia (9), Peru (14), and Türkiye (10) tightened their reserve requirements more than five times during 2021–22. Aruba increased reserve requirements up to pre-pandemic levels but continued increasing them to protect international reserves as it relaxed capital controls it had imposed at the

---

\(^{53}\) Asymmetric open foreign exchange position limits are often considered capital controls since they have the effect of influencing capital flows.

\(^{54}\) The measure restricts outflows, but because the measure is on borrowing from abroad, in the statistics it is counted as an “inflow control.”

\(^{55}\) This restriction also applies to inflows.

\(^{56}\) Aruba, Costa Rica, Ghana, India, Indonesia, Seychelles, Uganda, Uzbekistan, and Venezuela do not differentiate reserve requirements between domestic and foreign currency liabilities.
start of the pandemic. In addition, the measure aimed at fighting inflationary pressures and excess liquidity in the banking system. Peru complemented its hikes in the monetary policy rate with increases in reserve requirements for local currency liabilities. It also restored the additional reserve requirement for foreign currency liabilities based on the stock of foreign currency loans in comparison to December 2018, which was suspended during the pandemic, and tightened the conditions later. Türkiye increased reserve requirements for foreign currency liabilities and tightened reserve requirements for local currency liabilities by first decreasing the upper limit of the facility for holding foreign currency and gold and then terminating the facility for holding foreign currency. Indonesia tightened reserve requirements in 2022 to fight inflationary pressures. Its only change in 2021 corresponds to the ending of the targeted incentive in the form of a relaxation of the fulfillment obligation of daily rupiah minimum statutory reserves by 50 basis points for banks conducting import–export financing, financing for small and medium enterprises, and financing for other priority sectors, implemented at the onset of the pandemic.

**Liquid asset requirements:** in 2021 and 2022 the number of tightening (9) and easing (10) measures was similar. Six countries tightened liquid asset requirements. Of these, the measures of Aruba (2), Belarus (2), Cyprus (1), and Peru (1) reversed the easing during the pandemic. Jordan (1) and Mexico (1) established liquidity coverage measures (not differentiating by currency), and Türkiye increased the requirement for foreign liabilities. Regarding countries that differentiate requirements between liabilities in foreign and local currency, Croatia decreased the requirement for foreign liabilities once and reported that the requirement would cease at the end of 2022, while Jamaica did so (as well as for local liabilities) in three occasions.

**Open foreign exchange position limits:** Bangladesh and the Philippines tightened the limit on net open foreign exchange positions. Seychelles tightened the limit for short positions and set it at the same level as long positions. Before the war, Ukraine raised the limits, and reduced them following the onset of war. Russia temporarily did not apply measures to credit institutions if they failed to comply with the fixed limits relative to open currency positions. Oman eased the cumulative gap threshold in domestic and foreign currencies for liabilities.

**Other measures:** To discourage dollarization, Georgia introduced a currency-induced credit risk buffer based on the level of loan dollarization instead of the previous flat 75 percent risk weight.

### Institutional investors

2021 stands out as the year with the highest number of capital controls (89) and prudential (23) measures for institutional investors in the past five years. In contrast, while not covering the entire year, 2022 registers the lowest number of prudential measures on institutional investors (8) and capital controls (32) up till now, the former being similar to pre-pandemic years (Figure 17).

In 2021, the high number of capital controls affecting institutional investors was driven by the many neutral changes (mostly related to pandemic measures) to outflows (32), while the number of measures easing capital controls on outflows, although high, was similar to pre-pandemic years (49; Figure 20, panel 1). An important number of easing capital controls on outflows (18) corresponded to the reversal of tightening measures taken during the pandemic by Aruba, Curaçao, and Sint Maarten and Sri Lanka. Most of the neutral changes on outflows were from Sri Lanka (27), on account of extending the duration of capital controls on outflows implemented during the pandemic. In contrast to 2020, easing of outflows surpassed the tightening of outflows in the current reporting period, similar to pre-pandemic years. Most of the changes in institutional investors’ capital controls relate to investment limits on assets abroad (68, excluding neutral changes, with 58 being easing).

With respect to prudential measures affecting institutional investors, tightening measures (14) dominated in 2021, followed by neutral (6) and easing measures (3; Figure 20, panel 2). Tightening reached a

---

57 Symmetrical open foreign exchange position limits are considered prudential measures.

58 Extensions of the duration of measures are counted as neutral.

59 A change in investments limits of foreign assets of a type of institutional investor may be counted as two changes if they affect both “Limits (max.) on investment portfolio held abroad” and “Limits (max.) on securities issued by nonresidents.”
maximum, while easing measures stayed similar to previous years. Except for one tightening change, they were unrelated to policies established during the pandemic. Some of the countries that tightened prudential measures on institutional investors in 2021 were Croatia, where the limit on investments in covered bonds for open-ended collective investments schemes was reduced. In India, the limits on mutual funds’ exposure to single issuers were tightened. Malta introduced risk factors—known as K-factors—for investment firms to determine their funds requirements. Limits on insurance companies’ exposure to investment funds managed by the same manager were tightened in Montenegro. In contrast, Albania, Estonia, Italy, Korea, and Latvia eased prudential measures in 2021–22. Albania removed restrictions on insurance companies’ dividend distribution, in place since the pandemic. Estonia allowed pension funds to invest in financial assets related with commodities. Italy eliminated the concentration limit on portfolio held locally. Korea increased insurance companies’ net open position and Latvia removed currency-matching rules.

Source: AREAER database; and IMF staff calculations.

Note: The position date for 2022 varies by country but is at least the end of June 2022 for most countries with some reporting data through September 2022.
Some notable country examples of changes to controls on capital outflows on institutional investors in 2021 and 2022 are the following:

- **Easing of controls on capital outflows:** Aruba eliminated the suspension of licensing outward transactions imposed during the pandemic. Brazil allowed insurance companies and pension funds to enter into derivative transactions with financial institutions or stock exchanges abroad with non-hedging purposes. Curacao and Sint Maarten eliminated previously imposed pandemic-related limit on institutional investors’ outward transactions and replaced it with the pre-pandemic requirement of a license per transaction if the amount is NA f150,000 or more. India increased the limit for investments abroad per mutual fund, within the overall industry limit. Estonia removed the limit on investments in securities denominated in foreign exchange of mandatory funds other than conservative pension funds. Jamaica increased insurance companies and pension funds’ limit for foreign assets and expanded the allowed foreign assets of all institutional investors. Moldova replaced the general limit of 5 percent for voluntary pensions’ investments abroad with different limits depending on the type of assets. Oman increased the limit on foreign investment of insurance companies, and South Africa did the same for all institutional investors. Sri Lanka increased the limit of investments and remittances abroad for institutional investors, the latter from the reduced level imposed during the pandemic.

- **Tightening of controls on capital outflows:** Bolivia reduced insurance companies’ limit on investments abroad. Due to the war, Ukraine established a temporary prohibition on transborder transfers of funds from Ukraine to correspondent accounts.

---

60 The section on controls on institutional investors in the AREAER focuses mostly on capital outflows. In 2021 and 2022 there were no changes on capital inflows.
Compilation Guide

Status Under IMF Articles of Agreement

**Article VIII**
The member country has accepted the obligations of Article VIII, Sections 2, 3, and 4, of the IMF's Articles of Agreement.

**Article XIV**
The member country continues to avail itself of the transitional arrangements of Article XIV, Section 2.

## Exchange Measures

### Restrictions and/or multiple currency practices
Exchange restrictions and multiple currency practices (MCPs) maintained by a member country under Article VIII, Sections 2, 3, and 4, or under Article XIV, Section 2, of the IMF’s Articles of Agreement, as specified in the latest IMF staff reports issued as of December 31, 2021. Information on exchange restrictions and MCPs or on the nonexistence of exchange restrictions and MCPs for countries with unpublished IMF staff reports are published only with the consent of the authorities. If no consent has been received, the AREAER indicates that “Information is not publicly available.” Hence, “Information is not publicly available” does not necessarily imply that the country maintains exchange restrictions or MCPs. It indicates only that the country's relevant IMF staff report has not been published and that the authorities have not consented to the publication of the information on the existence of exchange restrictions and MCPs. Because the relevant IMF staff report may refer to years before the reporting period for this volume of the AREAER; therefore, more recent changes in the exchange system may not be included here. Changes in the category “Restrictions and/or multiple currency practices” are reflected in the edition of the AREAER that covers the calendar year during which the IMF staff report including information on such changes is issued. Changes in these measures which give rise to exchange restrictions or MCPs and that affect other categories of the country tables are reported under the relevant categories in the AREAER, in accordance with the normal reporting periods.

### Exchange measures imposed for security reasons

- **In accordance with IMF Executive Board Decision No. 144-(52/51)**
  Security restrictions on current international payments and transfers on the basis of IMF Executive Board Decision No. 144-(52/51), which establishes the obligation of members to notify the IMF before imposing such restrictions, or, if circumstances preclude advance notification, as promptly as possible.

- **Other security restrictions**
  Other restrictions imposed for security reasons (e.g., in accordance with UN or EU regulations) but not notified to the IMF under Board Decision 144-(52/51).

## Exchange Arrangement

**Currency**
The official legal tender of the country.

**Other legal tender**
The existence of another currency that is officially allowed to be used in the country.

**Exchange rate structure**
If there is one exchange rate, the system is called unitary. If there is more than one exchange rate that may be used simultaneously for different purposes and/or by different entities, and if these exchange rates give rise to MCPs or differing rates for current and capital transactions, the system is called dual or multiple. Different effective exchange rates resulting from exchange taxes or subsidies, excessive exchange

---

1 Specific references to the underlying legal materials and hyperlinks to the legal texts are included in a separate column (References to legal instruments and hyperlinks) at each category level in each section of the country chapters.
rate spreads between buying and selling rates, bilateral payments agreements, and broken cross rates are not included in this category. Changes in measures within this category are reported in accordance with the normal reporting periods. Reclassification in cases related to changes in MCPs occurs in the edition of the AREAER, that covers the calendar year during which the IMF staff report that includes information on such changes is issued.

**Classification**

Describes and classifies the de jure and the de facto exchange rate arrangements.

**De jure**

The description and effective dates of the de jure exchange rate arrangements are provided by the authorities. By Article IV, Section 2(a) of the Fund's Articles of Agreement and Paragraph 16 of the 2007 Surveillance Decision No. 13919-(07/51), each member is required to notify the Fund of the exchange arrangements it intends to apply and to notify the Fund promptly of any changes in its exchange arrangements. Country authorities are also requested to identify, whenever possible, which of the existing categories of exchange rate arrangements below most closely corresponds to the de jure arrangement in effect. Country authorities may also wish to briefly describe their official exchange rate policy. The description includes officially announced or estimated parameters of the exchange arrangement (e.g., parity, bands, weights, rate of crawl, and other indicators used to manage the exchange rate). It also provides information on the computation of the exchange rate.

**De facto**

IMF staff classifies the de facto exchange rate arrangements according to the categories below. The name and the definition of the categories describing the de facto exchange rate arrangements have been modified in accordance with the revised classification methodology, as of February 1, 2009. Where the description of the de jure arrangement can be empirically confirmed by the IMF staff over at least the previous six months, the exchange rate arrangement will be classified in the same way on a de facto basis.

Because the de facto methodology for classification of exchange rate regimes is based on a backward-looking approach that relies on past exchange rate movement and historical data, some countries are reclassified retroactively to a date when the behavior of the exchange rates changed and matched the criteria for reclassification to the appropriate category. For these countries, if the retroactive date of reclassification is prior to the period covered in this report, then the effective date of change to be entered in the country chapter and the changes section is deemed to be the first day of the year in which the decision of reclassification took place.

**No separate legal tender**

Classification as an *exchange rate arrangement with no separate legal tender* involves the confirmation of the country authorities’ de jure exchange rate arrangement. The currency of another country circulates as the sole legal tender (formal dollarization).

Adopting such an arrangement implies the complete surrender by the monetary authorities of control over domestic monetary policy.

Exchange arrangements of countries that belong to a monetary or currency union in which the same legal tender is shared by the members of the union are classified under the arrangement governing the joint currency. This classification is based on the behavior of the common currency, whereas the previous classification was based on the lack of a separate legal tender. The classification thus reflects only a definitional change and is not based on a judgment that there has been a substantive change in the exchange arrangement or in other policies of the currency union or its members.

---

2 For further details see IMF Working Paper 09/211.
Currency board Classification as a currency board involves the confirmation of the country authorities’ de jure exchange rate arrangement. A currency board arrangement is a monetary arrangement based on an explicit legislative commitment to exchange domestic currency for a specified foreign currency at a fixed exchange rate, combined with restrictions on the issuing authority to ensure the fulfillment of its legal obligation. This implies that domestic currency is usually fully backed by foreign assets, eliminating traditional central bank functions such as monetary control and lender-of-last-resort and leaving little scope for discretionary monetary policy. Some flexibility may still be afforded, depending on the strictness of the banking rules of the currency board arrangement.

Conventional peg Classification as a conventional peg involves the confirmation of the country authorities’ de jure exchange rate arrangement. For this category the country formally (de jure) pegs its currency at a fixed rate to another currency or basket of currencies, where the basket is formed, for example, from the currencies of major trading or financial partners and weights reflect the geographic distribution of trade, services, or capital flows. The anchor currency or basket weights are public or notified to the IMF. The country authorities stand ready to maintain the fixed parity through direct intervention (i.e., via sale or purchase of foreign exchange in the market) or indirect intervention (e.g., via exchange rate related use of interest rate policy, imposition of foreign exchange regulations, exercise of moral suasion that constrains foreign exchange activity, or intervention by other public institutions). There is no commitment to irrevocably keep the parity, but the formal arrangement must be confirmed empirically: the exchange rate may fluctuate within narrow margins of less than ±1% around a central rate or the maximum and minimum value of the spot market exchange rate must remain within a narrow margin of 2% for at least six months.

Stabilized arrangement Classification as a stabilized arrangement entails a spot market exchange rate that remains within a margin of 2% for six months or more (with the exception of a specified number of outliers or step adjustments) and is not floating. The required margin of stability can be met either with respect to a single currency or a basket of currencies, where the anchor currency or the basket is ascertained or confirmed using statistical techniques. Classification as a stabilized arrangement requires that the statistical criteria are met and that the exchange rate remains stable as a result of official action (including structural market rigidities). The classification does not imply a policy commitment on the part of the country authorities.

Crawling peg Classification as a crawling peg involves the confirmation of the country authorities’ de jure exchange rate arrangement. The currency is adjusted in small amounts at a fixed rate or in response to changes in selected quantitative indicators, such as past inflation differentials vis-à-vis major trading partners or differentials between the inflation target and expected inflation in major trading partners. The rate of crawl can be set to generate inflation-adjusted changes in the exchange rate (backward looking) or set at a predetermined fixed rate and/or below the projected inflation differentials (forward looking). The rules and parameters of the arrangement are public or notified to the IMF.

Crawl-like arrangement For classification as a crawl-like arrangement, the exchange rate must remain within a narrow margin of 2% relative to a statistically identified trend for six months or more (with the exception of a specified number of outliers) and the exchange rate arrangement cannot be considered as floating. Normally, a minimum rate of change greater than allowed under a stabilized (peg-like) arrangement is required. However, an arrangement will be considered crawl-like with an annualized rate of change of at least 1%, provided that the exchange rate appreciates or depreciates in a sufficiently monotonic and continuous manner.
Pegged exchange rate within horizontal bands: Classification as a *pegged exchange rate within horizontal bands* involves the confirmation of the country authorities’ de jure exchange rate arrangement. The value of the currency is maintained within certain margins of fluctuation of at least ±1% around a fixed central rate, or the margin between the maximum and minimum value of the exchange rate exceeds 2%. It includes arrangements of countries in the ERM of the European Monetary System (EMS), which was replaced with the ERM II on January 1, 1999, for those countries with margins of fluctuation wider than ±1%. The central rate and width of the band are public or notified to the IMF.

Other managed arrangement: This category is a residual and is used when the exchange rate arrangement does not meet the criteria for any of the other categories. Arrangements characterized by frequent shifts in policies may fall into this category.

Floating: A *floating* exchange rate is largely market determined, without an ascertainable or predictable path for the rate. In particular, an exchange rate that satisfies the statistical criteria for a stabilized or a crawl-like arrangement will be classified as such unless it is clear that the stability of the exchange rate is not the result of official actions. Foreign exchange market intervention may be either direct or indirect, and such intervention serves to moderate the rate of change and prevent undue fluctuations in the exchange rate, but policies targeting a specific level of the exchange rate are incompatible with floating. Indicators for managing the rate are broadly judgmental (e.g., balance of payments position, international reserves, parallel market developments). Floating arrangements may exhibit more or less exchange rate volatility, depending on the size of the shocks affecting the economy.

Free floating: A floating exchange rate can be classified as *free floating* if intervention occurs only exceptionally and aims to address disorderly market conditions and if the authorities have provided information or data confirming that intervention has been limited to at most three instances in the previous six months, each lasting no more than three business days. If the information or data required are not available to the IMF staff, the arrangement will be classified as floating. Detailed data on intervention or official foreign exchange transactions will not be requested routinely from member countries, but only when other information available to IMF staff is insufficient to resolve uncertainties about the appropriate classification.

Official exchange rate: Provides information on the computation of the exchange rate and the use of the official exchange rate (accounting, customs valuation purposes, foreign exchange transactions with the government).

Monetary policy framework: The category includes a brief description of the monetary policy framework in effect according to the following subcategories:

- **Exchange rate anchor**: The monetary authority buys or sell foreign exchange to maintain the exchange rate at its predetermined level or within a range. The exchange rate thus serves as the nominal anchor or intermediate target of monetary policy. These frameworks are associated with exchange rate arrangements with no separate legal tender, currency board arrangements, pegs (or stabilized arrangements) with or without bands, crawling pegs (or crawl-like arrangements), and other managed arrangements.

  - **U.S. dollar**: The U.S dollar is the nominal anchor or the only legal tender.
  - **Euro**: The euro is the nominal anchor or the only legal tender.
  - **Composite**: A currency composite consisting of two or more currencies is the nominal anchor.
  - **Other**: A currency other than the U.S dollar and the euro is the nominal anchor or the only legal tender.
  - **Monetary aggregate target**: The intermediate target of monetary policy is a monetary aggregate such as M0, M1, or M2, although the country may also set targets for inflation. The central bank may use a quantity (central bank reserves or base money) or price variable (policy rate) as operational target.
Inflation-targeting framework

This involves the public announcement of numerical targets for inflation, with an institutional commitment by the monetary authority to achieve these targets, typically over a medium-term horizon. Additional key features normally include increased communication with the public and the markets about the plans and objectives of monetary policymakers and increased accountability of the central bank for achieving its inflation objectives. Monetary policy decisions are often guided by the deviation of forecasts of future inflation from the announced inflation target, with the inflation forecast acting (implicitly or explicitly) as the intermediate target of monetary policy.

Target setting body

The official body or organizational unit responsible for setting and/or adjusting the inflation targets.

Inflation target

The numerical targets for inflation which have been publicly announced by the Central Bank. Inflation targets are generally expressed as i) a point target, ii) targets with plus minus a certain numerical limit, and iii) as a band or range. The target measure is defined in terms of end-year inflation or as average annual inflation. CPI and core CPI are based on national definitions, which may vary from country to country. Target horizon is the term in years of inflation targets as publicly announced by the Central Bank.

Operating target (policy rate)

Policy rate is used as the operating target of the monetary policy to achieve the inflation target. Short-term policy interest rate target (for example, overnight, one week, two weeks, etc.) is generally expressed as i) a point target, ii) target with a certain numerical limit above and below the target, and iii) as a band or range (upper and lower limits).

Accountability

Accountability framework that requires the central bank to explain its conduct of monetary policy in the pursuit of achieving its inflation target. For example, the governor or representatives of the central bank are required to appear before Parliament or one of its committees to explain actions and views on monetary policy and economic developments. It may also require reporting inflation targets through Open letters on monetary policy. Usually written by the Governor on behalf of the Monetary Policy Committee to the government in the event that inflation misses the inflation target by a pre-specified amount.

Transparency

The manner and level of detail how monetary policy decisions are communicated to the public. Institutional transparency is gauged by the communication vehicles employed by the central bank, including the release of inflation reports and the frequency and detail of these reports, the announcement of changes in the stance of monetary policy via press release, reviews of inflation performance and changes in monetary policy, the publication of inflation forecasting models, and the use of media and other public presentations.

Other monetary framework

The country has no explicitly stated nominal anchor, but rather monitors various indicators in conducting monetary policy. This category is also used when no relevant information on the country is available.

Exchange tax

Foreign exchange transactions are subject to a special tax. Bank commissions charged on foreign exchange transactions are not included in this category; rather, they are listed under the exchange arrangement classification.

Exchange subsidy

Foreign exchange transactions are subsidized by using separate, nonmarket exchange rates.

Foreign exchange market

The existence of a foreign exchange market.

Spot exchange market

Institutional setting of the foreign exchange market for spot transactions and market participants. Existence and significance of the parallel market.
Operated by the central bank

The role of the central bank in providing access to foreign exchange to market participants through a foreign exchange standing facility, allocation of foreign exchange to authorized dealers, or other legal and private persons, and the management of buy or sell auctions or fixing sessions. Price determination and frequency of central bank operations.

A foreign exchange standing facility allows market participants to buy foreign exchange from or sell it to the central bank at predetermined exchange rates at their own initiative and is usually instrumental in maintaining a hard or soft peg arrangement. The credibility of the facility depends to a large extent on the availability of foreign exchange reserves to back the facility.

Allocation involves redistribution of foreign exchange inflows by the central bank to market participants for specific international transactions or in specific amounts (rationing). Foreign exchange allocation is often used to provide foreign exchange for strategic imports such as oil or food when foreign exchange reserves are scarce.

In an allocation system, companies and individuals often transact directly with the central bank, and commercial banks may buy foreign exchange only for their clients’ underlying international transactions. Purchases of foreign exchange for the banks’ own books typically are not permitted.

Auctions are organized by the central bank, usually for market participants to buy and/or sell foreign exchange. They can take the form of multiple-price auctions (all successful bidders pay the price they offer) or single-price auctions (all successful bidders pay the same price, which is the market-clearing/cut-off price). The authorities may exercise discretion in accepting or rejecting offers, and sometimes a floor price is determined in advance, below which offers are not accepted. The frequency of auctions depends mainly on the amount or availability of foreign exchange to be auctioned and on the role the auction plays in the foreign exchange market.

Fixing sessions are often organized by the central bank at the early stage of market development to establish a market-clearing exchange rate. The central bank monitors the market closely and often actively participates in price formation by selling or buying during the session to achieve a certain exchange rate target. The price determined at the fixing session is often used for foreign exchange transactions outside the session and/or for accounting and valuation purposes.

Interbank market

The organization and operation of the interbank market or interventions. Existence of brokerage, over the counter, and market-making arrangements.

Forward exchange market

The existence of a forward exchange market and the institutional arrangement and market participants.

Official cover of forward operations

An official entity (the central bank or the government) assumes the exchange risk of certain foreign exchange transactions.

Arrangements for Payments and Receipts

Prescription of currency requirements

The official requirements affecting the selection of currency and the method of settlement for transactions with other countries. When a country has payments agreements with other countries, the terms of these agreements often lead to a prescription of currency for specified categories of payments to, and receipts from, the countries concerned. This category includes information on the use of domestic currency in transactions between residents and nonresidents, both domestically and abroad; it also indicates any restrictions on the use of foreign currency among residents.

Payments arrangements

Bilateral payments arrangements

Two countries have an agreement to prescribe specific rules for payments to each other, including cases in which private parties are also obligated to use specific currencies. These agreements can be either operative or inoperative.
<table>
<thead>
<tr>
<th>Topic</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Regional arrangements</td>
<td>More than two parties participate in a payments agreement.</td>
</tr>
<tr>
<td>Clearing agreements</td>
<td>The official bodies of two or more countries agree to offset with some regularity the balances that arise from payments to each other as a result of the exchange of goods, services, or—less often—capital.</td>
</tr>
<tr>
<td>Barter agreements and open accounts</td>
<td>The official bodies of two or more countries agree to offset exports of goods and services to one country with imports of goods and services from the same country, without payment.</td>
</tr>
<tr>
<td>Administration of control</td>
<td>The authorities’ division of responsibility for monitoring policy, administering exchange controls, and determining the extent of delegation of powers to outside agencies (banks are often authorized to effect foreign exchange transactions).</td>
</tr>
<tr>
<td>Payments arrears</td>
<td>Official or private residents of a member country default on their payments or transfers in foreign exchange to nonresidents. This category includes only the situation in which domestic currency is available for residents to settle their debts but they are unable to obtain foreign exchange—for example, because of the presence of an officially announced or unofficial queuing system; it does not cover nonpayment by private parties owing to bankruptcy.</td>
</tr>
<tr>
<td>Controls on trade in gold (coins and/or bullion)</td>
<td>Separate rules for trading in gold domestically and with foreign countries.</td>
</tr>
<tr>
<td>Controls on exports and imports of banknotes</td>
<td>Regulations governing the physical movement of means of payment between countries. Where information is available, the category distinguishes between separate limits for the (1) export and import of banknotes by travelers and (2) export and import of banknotes by banks and other authorized financial institutions.</td>
</tr>
</tbody>
</table>

**Resident Accounts**

Indicates whether resident accounts that are maintained in the national currency or in foreign currency, locally or abroad, are allowed and describes how they are treated and the facilities and limitations attached to such accounts. When there is more than one type of resident account, the nature and operation of the various types of accounts are also described; for example, whether residents are allowed to open foreign exchange accounts with or without approval from the exchange control authority, whether these accounts may be held domestically or abroad, and whether the balances on accounts held by residents in domestic currency may be converted into foreign currency.

**Nonresident Accounts**

Indicates whether local nonresident accounts maintained in the national currency or in foreign currency are allowed and describes how they are treated and the facilities and limitations attached to such accounts. When there is more than one type of nonresident account, the nature and operation of the various types of accounts are described.

**Blocked accounts**

Accounts of nonresidents, usually in domestic currency. Regulations prohibit or limit the conversion and/or transfer of the balances of such accounts.

**Imports and Import Payments**

Describes the nature and extent of exchange and trade restrictions on imports.

**Foreign exchange budget**

Information on the existence of a foreign exchange plan, i.e., prior allocation of a certain amount of foreign exchange, usually on an annual basis, for the importation of specific types of goods and/or services. In some cases, also covers differentiations among individual importers.

**Financing requirements for imports**

Information on specific import-financing regulations limiting the rights of residents to enter into private contracts in which the financing options differ from those in the official regulations.
Documentation requirements for release of foreign exchange for imports

- **Domiciliation requirements**: The obligation to domicile the transactions with a specified (usually domestic) financial institution.
- **Preshipment inspection**: Most often a compulsory government measure aimed at establishing the veracity of the import contract in terms of volume, quality, and price.
- **Letters of credit**: Parties are obligated to use letters of credit (LCs) as a form of payment for their imports.
- **Import licenses used as exchange licenses**: Import licenses are used not for trade purposes but instead to restrict the availability of foreign exchange for legitimate trade.

Import licenses and other nontariff measures

- **Positive list**: A list of goods that may be imported.
- **Negative list**: A list of goods that may not be imported.
- **Open general licenses**: Indicates arrangements whereby certain imports or other international transactions are exempt from the restrictive application of licensing requirements.
- **Licenses with quotas**: Refers to situations in which a license for the importation of a certain good is granted, but a specific limit is imposed on the amount to be imported.
- **Other nontariff measures**: May include prohibitions on imports of certain goods from all countries or of all goods from a certain country. Several other nontariff measures are used by countries (e.g., phytosanitary examinations, setting of standards), but these are not covered fully in the report.

**Import taxes and/or tariffs**

- **A brief description of the import tax and tariff system, including taxes levied on the foreign exchange made available for imports.**
- **Taxes collected through the exchange system**: Indicates if any taxes apply to the exchange side of an import transaction.

**State import monopoly**

Private parties are not allowed to engage in the importation of certain products, or they are limited in their activity.

**Exports and Export Proceeds**

Describes restrictions on the use of export proceeds, as well as regulations on exports.

**Repatriation requirements**

- **Surrender requirements**: The obligation of exporters to repatriate export proceeds.
  - **Surrender to the central bank**: Regulations requiring the recipient of repatriated export proceeds to sell, sometimes at a specified exchange rate, any foreign exchange proceeds in return for local currency to the central bank.
  - **Surrender to authorized dealers**: Regulations requiring the recipient of repatriated export proceeds to sell, sometimes at a specified exchange rate, any foreign exchange proceeds in return for local currency to commercial banks or exchange dealers authorized for this purpose or on a foreign exchange market.

**Financing requirements**

Information on specific export-financing regulations limiting the rights of residents to enter into private contracts in which the financing options differ from those in the official regulations.
### Documentation requirements

The same categories as in the case of imports are used.

### Export licenses

Restrictions on the right of residents to export goods. These restrictions may take the form of quotas (where a certain quantity of shipment abroad is allowed) or the absence of quotas (where the licenses are issued at the discretion of the foreign trade control authority).

### Export taxes

A brief description of the export tax system, including any taxes that are levied on foreign exchange earned by exporters.

---

#### Payments for Invisible Transactions and Current Transfers

Describes the procedures for effecting payments abroad in connection with current transactions in invisibles, with reference to prior approval requirements, the existence of quantitative and indicative limits, and/or bona fide tests. Detailed information on the most common categories of transactions is provided only when regulations differ for the various categories. Indicative limits establish maximum amounts up to which the purchase of foreign exchange is allowed upon declaration of the nature of the transaction, mainly for statistical purposes. Amounts above those limits are granted if the bona fide nature of the transaction is established by the presentation of appropriate documentation. Bona fide tests also may be applied to transactions for which quantitative limits have not been established.

- **Trade-related payments**: Includes freight and insurance (including possible regulations on non-trade-related insurance payments and transfers), unloading and storage costs, administrative expenses, commissions, and customs duties and fees.
- **Investment-related payments**: Includes profits and dividends, interest payments (including interest on debentures, mortgages, etc.), amortization of loans or depreciation of foreign direct investments, and payments and transfers of rent.
- **Payments for travel**: Includes international travel for business, tourism, etc.
- **Personal payments**: Includes medical expenditures abroad, study expenses abroad, pensions (including regulations on payments and transfers of pensions by both state and private pension providers on behalf of nonresidents, as well as the transfer of pensions due to residents living abroad), and family maintenance and alimony (including regulations on payments and transfers abroad of family maintenance and alimony by residents).
- **Foreign workers’ wages**: Transfer abroad of earnings by nonresidents working in the country.
- **Credit card use abroad**: Use of credit and debit cards to pay for invisible transactions.
- **Other payments**: Includes subscription and membership fees, authors’ royalties, consulting and legal fees, etc.

---

#### Proceeds from Invisible Transactions and Current Transfers

Describes regulations governing exchange receipts derived from transactions in invisibles—including descriptions of any limitations on their conversion into domestic currency—and the use of those receipts.

### Repatriation requirements

The definitions of repatriation and surrender requirements are similar to those applied to export proceeds.

Surrender requirements

*Surrender to the central bank*
Surrender to authorized dealers

Restrictions on use of funds
Refers mainly to the limitations imposed on the use of receipts previously deposited in certain types of bank accounts.

Capital Transactions
Describes regulations influencing both inward and outward capital flows. The concept of controls on capital transactions is interpreted broadly. Thus, controls on capital transactions include prohibitions; need for prior approval, authorization, and notification; dual and multiple exchange rates; discriminatory taxes; and reserve requirements or interest penalties imposed by the authorities that regulate the conclusion or execution of transactions or transfers; or the holding of assets at home by nonresidents and abroad by residents. The coverage of the regulations applies to receipts as well as to payments and to actions initiated by nonresidents and residents. In addition, because of the close association with capital transactions, information is also provided on local financial operations conducted in foreign currency, describing specific regulations in force that limit residents’ and nonresidents’ issuing of securities denominated in foreign currency or, generally, limitations on contract agreements expressed in foreign exchange.

Repatriation requirements
The definitions of repatriation and surrender requirements are similar to those applied to export proceeds.

Controls on capital and money market instruments

On capital market securities
Refers to shares and other securities of a participating nature and to bonds and other securities with an original maturity of more than one year.

Shares or other securities of a participating nature
Includes transactions involving shares and other securities of a participating nature if they are not effected for the purpose of acquiring a lasting economic interest in the management of the enterprise concerned. Investments for the purpose of acquiring a lasting economic interest are addressed under foreign direct investments.

Bonds or other debt securities
Refers to bonds and other securities with an original maturity of more than one year. The term “other securities” includes notes and debentures.

On money market instruments
Refers to securities with an original maturity of one year or less and includes short-term instruments such as certificates of deposit and bills of exchange. The category also includes treasury bills and other short-term government paper, bankers’ acceptances, commercial papers, interbank deposits, and repurchase agreements.

On collective investment securities
Includes share certificates and registry entries or other evidence of investor interest in an institution for collective investment such as mutual funds, and unit and investment trusts.

Controls on derivatives and other instruments
Refers to operations in other negotiable instruments and nonsecured claims not covered under the above subsections. These may include operations in rights; warrants; financial options and futures; secondary market operations in other financial claims (including sovereign loans, mortgage loans, commercial credits, negotiable instruments originating as loans, receivables, and discounted bills of trade);
forward operations (including those in foreign exchange); swaps of bonds and other
debt securities; credits and loans; and other swaps (e.g., interest rate, debt/equity,
equity/debt, foreign currency, as well as swaps of any of the instruments listed above).
Also included are controls on operations in foreign exchange without any other
underlying transaction (e.g., spot or forward trading on the foreign exchange markets,
forward cover operations, etc.).

Controls on credit
operations
Commercial credits
Covers operations directly linked with international trade transactions or with the
rendering of international services.

Financial credits
Includes credits other than commercial credits granted by all residents, including
banks, to nonresidents or vice versa.

Guarantees,
sureties, and
financial backup
facilities
Includes guarantees, sureties, and financial backup facilities provided by residents
to nonresidents and vice versa. Also includes securities pledged for payment or
performance of a contract—such as warrants, performance bonds, and standby letters
of credit—and financial backup facilities that are credit facilities used as a guarantee
for independent financial operations.

Controls on direct
investment
Refers to investments for the purpose of establishing lasting economic relations
both abroad by residents and domestically by nonresidents. These investments
are essentially for the purpose of producing goods and services, in particular,
investments that allow investor participation in the management of the enterprise.
The category includes the creation or extension of a wholly owned enterprise,
subsidiary, or branch and the acquisition of full or partial ownership of a new
or existing enterprise that results in effective influence over the operations of the
enterprise.

Controls on liquidation of
direct investment
Refers to the transfer of principal, including the initial capital and capital gains, of
a foreign direct investment as defined above.

Controls on real
estate transactions
Refers to the acquisition of real estate not associated with direct investment,
including, for example, investments of a purely financial nature in real estate or the
acquisition of real estate for personal use.

Controls on personal capital
transactions
Covers transfers initiated on behalf of private persons and intended to benefit other
private persons. Includes transactions involving property to which the promise of a
return to the owner with payments of interest is attached (e.g., loans or settlements
of debt in their country of origin by immigrants), and transfers effected free of charge
to the beneficiary (e.g., gifts and endowments, loans, inheritances and legacies, or
emigrants' assets).

Provisions Specific to the Financial Sector

Provisions specific
to commercial
banks and other
credit institutions
Describes regulations specific to these institutions, such as monetary, prudential,
and foreign exchange controls. Inclusion of an entry in this category does not
necessarily signify that the aim of the measure is to control the flow of capital.
Some of these items (e.g., borrowing abroad, lending to nonresidents, purchase
of locally issued securities denominated in foreign exchange, investment
regulations) may be repetitions of the entries under respective categories of
controls on capital and money market instruments, credit operations, or direct
investments when the same regulations apply to commercial banks as well as to
other residents.

Open foreign
exchange position
limits
Describes regulations on certain commercial bank balance sheet items (including
capital) and on limits covering commercial banks' positions in foreign currencies
(including gold).
Provisions specific to institutional investors

Describes controls specific to institutions, such as insurance companies, pension funds, investment firms (including brokers, dealers, or advisory firms), and other securities firms (including collective investment funds). Incorporates measures that impose limitations on the composition of the institutional investors’ foreign or foreign currency assets (reserves, accounts) and liabilities (e.g., investments in equity capital of institutional investors or borrowing from nonresidents) and/or that differentiate between residents and nonresidents. Examples of such controls are restrictions on investments because of rules regarding the technical, mathematical, security, or mandatory reserves; solvency margins; premium reserve stocks; or guarantee funds of nonbank financial institutions. Inclusion of an entry in this category does not necessarily signify that the aim of the measure is to control the flow of capital.

Insurance companies
Pension funds
Investment firms and collective investment funds

Listing conventions used in the report are as follows:

- When it is unclear whether a particular category or measure exists—because pertinent information is not available at the time of publication—the category is displayed with the notation “n.a.”
- If a measure is known to exist but specific information on it is not available, the category is displayed with the notation “yes.”
- If no measure exists on any item within a category, the category is displayed with the notation “no.”
- If members have provided the IMF staff with information indicating that a category or an item is not regulated, these are marked by “n.r.”
- When relevant documents have not been published and the authorities have not consented to the publication of the information as included in the IMF staff report, the text reads “Information is not publicly available.”

**Key**

- Indicates that the specified practice is a feature of the exchange system.
- Indicates that data were not available at the time of publication.
- Indicates that the specified practice is not regulated.
- Indicates that the country participates in the euro area.
- Indicates that the country participates in the European Exchange Rate Mechanism (ERM II).
- Indicates that flexibility is limited vis-à-vis the U.S. dollar.
- Indicates that flexibility is limited vis-à-vis the euro.
- Indicates that flexibility is limited vis-à-vis another single currency.
- Indicates that flexibility is limited vis-à-vis the SDR.
- Indicates that flexibility is limited vis-à-vis another basket of currencies.
## Country Table Matrix

*(Position as of "DATE")*

### I. Status under IMF Articles of Agreement

#### A. Date of membership
- Article VIII
- Article XIV

### II. Exchange Measures

#### A. Restrictions and/or multiple currency practices

#### B. Exchange measures imposed for security reasons
- In accordance with IMF Executive Board Decision No. 144-(52/51)
- Other security restrictions

### III. Exchange Arrangement

#### A. Currency
- Other legal tender

#### B. Exchange rate structure
- Unitary
- Dual
- Multiple

#### C. Classification
- No separate legal tender
- Currency board
- Conventional peg
- Stabilized arrangement
- Crawling peg
- Crawl-like arrangement
- Pegged exchange rate within horizontal bands
- Other managed arrangement
- Floating
- Free floating

#### D. Official exchange rate

#### E. Monetary policy framework
- Exchange rate anchor
  - US dollar
  - Euro
  - Composite
  - Other
- Monetary aggregate target
3. Inflation-targeting framework
   a. Target setting body
      1. Government
      2. Central Bank
         i. Monetary Policy Committee
         ii. Central Bank Board
         iii. Other
      3. Government and Central Bank
   b. Inflation target
      1. Target number
         i. Point target
         ii. Target with tolerance band
         iii. Band/Range
      2. Target measure
         i. CPI
         ii. Core inflation
      3. Target horizon
   c. Operating target (policy rate)
      1. Policy rate
      2. Target corridor band
      3. Other
   d. Accountability
      1. Open letter
      2. Parliamentary hearings
      3. Other
   e. Transparency
      1. Publication of votes
      2. Publication of minutes
      3. Publication of inflation forecasts
   4. Other monetary framework

F. Exchange tax

G. Exchange subsidy

H. Foreign exchange market
   1. Spot exchange market
      a. Operated by the central bank
         1. Foreign exchange standing facility
         2. Allocation
         3. Auction
         4. Fixing
      b. Interbank market
         1. Over the counter
         2. Brokerage
         3. Market making
2. Forward exchange market
   a. Official cover of forward operations

IV. Arrangements for Payments and Receipts

A. Prescription of currency requirements
1. Controls on the use of domestic currency
   a. For current transactions and payments
   b. For capital transactions
      1. Transactions in capital and money market instruments
      2. Transactions in derivatives and other instruments
      3. Credit operations
2. Use of foreign exchange among residents

B. Payments arrangements
1. Bilateral payments arrangements
   a. Operative
   b. Inoperative
2. Regional arrangements
3. Clearing agreements
4. Barter agreements and open accounts

C. Administration of control

D. Payments arrears
1. Official
2. Private

E. Controls on trade in gold (coins and/or bullion)
1. On domestic ownership and/or trade
2. On external trade

F. Controls on exports and imports of banknotes
1. On exports
   a. Domestic currency
   b. Foreign currency
2. On imports
   a. Domestic currency
   b. Foreign currency

V. Resident Accounts

A. Foreign exchange accounts permitted
1. Held domestically
   a. Approval required
2. Held abroad
   a. Approval required

B. Accounts in domestic currency held abroad

C. Accounts in domestic currency convertible into foreign currency
VI. Nonresident Accounts

A. Foreign exchange accounts permitted
   1. Approval required

B. Domestic currency accounts
   1. Convertible into foreign currency
   2. Approval required

C. Blocked accounts

VII. Imports and Import Payments

A. Foreign exchange budget

B. Financing requirements for imports
   1. Minimum financing requirements
   2. Advance payment requirements
   3. Advance import deposits

C. Documentation requirements for release of foreign exchange for imports
   1. Domiciliation requirements
   2. Preshipment inspection
   3. Letters of credit
   4. Import licenses used as exchange licenses
   5. Other

D. Import licenses and other nontariff measures
   1. Positive list
   2. Negative list
   3. Open general licenses
   4. Licenses with quotas
   5. Other nontariff measures

E. Import taxes and/or tariffs
   1. Taxes collected through the exchange system

F. State import monopoly

VIII. Exports and Export Proceeds

A. Repatriation requirements
   1. Surrender requirements
      a. Surrender to the central bank
      b. Surrender to authorized dealers

B. Financing requirements

C. Documentation requirements
   1. Letters of credit
   2. Guarantees
3. Domiciliation
4. Preshipment inspection
5. Other

D. Export licenses
1. Without quotas
2. With quotas

E. Export taxes
1. Collected through the exchange system
2. Other export taxes

IX. Payments for Invisible Transactions and Current Transfers

A. Controls on these transfers
1. Trade-related payments
   a. Prior approval
   b. Quantitative limits
   c. Indicative limits/bona fide test
2. Investment-related payments
   a. Prior approval
   b. Quantitative limits
   c. Indicative limits/bona fide test
3. Payments for travel
   a. Prior approval
   b. Quantitative limits
   c. Indicative limits/bona fide test
4. Personal payments
   a. Prior approval
   b. Quantitative limits
   c. Indicative limits/bona fide test
5. Foreign workers’ wages
   a. Prior approval
   b. Quantitative limits
   c. Indicative limits/bona fide test
6. Credit card use abroad
   a. Prior approval
   b. Quantitative limits
   c. Indicative limits/bona fide test
7. Other payments
   a. Prior approval
   b. Quantitative limits
   c. Indicative limits/bona fide test
X. Proceeds from Invisible Transactions and Current Transfers

A. Repatriation requirements
   1. Surrender requirements
      a. Surrender to the central bank
      b. Surrender to authorized dealers

B. Restrictions on use of funds

XI. Capital Transactions

A. Controls on capital transactions
   1. Repatriation requirements
      a. Surrender requirements
         1. Surrender to the central bank
         2. Surrender to authorized dealers
   2. Controls on capital and money market instruments
      a. On capital market securities
         1. Shares or other securities of a participating nature
            i. Purchase locally by nonresidents
            ii. Sale or issue locally by nonresidents
            iii. Purchase abroad by residents
            iv. Sale or issue abroad by residents
      2. Bonds or other debt securities
         i. Purchase locally by nonresidents
         ii. Sale or issue locally by nonresidents
         iii. Purchase abroad by residents
         iv. Sale or issue abroad by residents
      b. On money market instruments
         1. Purchase locally by nonresidents
         2. Sale or issue locally by nonresidents
         3. Purchase abroad by residents
         4. Sale or issue abroad by residents
      c. On collective investment securities
         1. Purchase locally by nonresidents
         2. Sale or issue locally by nonresidents
         3. Purchase abroad by residents
         4. Sale or issue abroad by residents
   3. Controls on derivatives and other instruments
      a. Purchase locally by nonresidents
      b. Sale or issue locally by nonresidents
      c. Purchase abroad by residents
      d. Sale or issue abroad by residents
4. Controls on credit operations
   a. Commercial credits
      1. By residents to nonresidents
      2. To residents from nonresidents
   b. Financial credits
      1. By residents to nonresidents
      2. To residents from nonresidents
   c. Guarantees, sureties, and financial backup facilities
      1. By residents to nonresidents
      2. To residents from nonresidents
5. Controls on direct investment
   a. Outward direct investment
   b. Inward direct investment
6. Controls on liquidation of direct investment
7. Controls on real estate transactions
   a. Purchase abroad by residents
   b. Purchase locally by nonresidents
   c. Sale locally by nonresidents
8. Controls on personal capital transactions
   a. Loans
      1. By residents to nonresidents
      2. To residents from nonresidents
   b. Gifts, endowments, inheritances, and legacies
      1. By residents to nonresidents
      2. To residents from nonresidents
   c. Settlement of debts abroad by immigrants
   d. Transfer of assets
      1. Transfer abroad by emigrants
      2. Transfer into the country by immigrants
   e. Transfer of gambling and prize earnings

XII. Provisions Specific to the Financial Sector

A. Provisions specific to commercial banks and other credit institutions
   1. Borrowing abroad
   2. Maintenance of accounts abroad
   3. Lending to nonresidents (financial or commercial credits)
   4. Lending locally in foreign exchange
   5. Purchase of locally issued securities denominated in foreign exchange
   6. Differential treatment of deposit accounts in foreign exchange
      a. Reserve requirements
      b. Liquid asset requirements
      c. Interest rate controls
      d. Credit controls
7. Differential treatment of deposit accounts held by nonresidents
   a. Reserve requirements
   b. Liquid asset requirements
   c. Interest rate controls
   d. Credit controls

8. Investment regulations
   a. Abroad by banks
   b. In banks by nonresidents

9. Open foreign exchange position limits
   a. On resident assets and liabilities
   b. On nonresident assets and liabilities

B. Provisions specific to institutional investors

1. Insurance companies
   a. Limits (max.) on securities issued by nonresidents
   b. Limits (max.) on investment portfolio held abroad
   c. Limits (min.) on investment portfolio held locally
   d. Currency-matching regulations on assets/liabilities composition

2. Pension funds
   a. Limits (max.) on securities issued by nonresidents
   b. Limits (max.) on investment portfolio held abroad
   c. Limits (min.) on investment portfolio held locally
   d. Currency-matching regulations on assets/liabilities composition

3. Investment firms and collective investment funds
   a. Limits (max.) on securities issued by nonresidents
   b. Limits (max.) on investment portfolio held abroad
   c. Limits (min.) on investment portfolio held locally
   d. Currency-matching regulations on assets/liabilities composition
AFGHANISTAN

(Position as of June 30, 2021)

Status under IMF Articles of Agreement

Date of membership
July 14, 1955.

Article VIII
Yes.

Article XIV
Yes.

Exchange Measures

Restrictions and/or multiple currency practices
No.

Exchange measures imposed for security reasons
No.

In accordance with IMF Executive Board Decision No. 144-(52/51)
No.

Other security restrictions
No.

Exchange Arrangement

Currency
Yes. The currency of Afghanistan is the Afghani.

Other legal tender
No.

Exchange rate structure

Unitary
Yes.

Dual

Multiple

Classification

No separate legal tender

Currency board

Conventional peg

Stabilized arrangement

Crawling peg

Crawl-like arrangement
Yes. The de jure exchange rate arrangement is managed floating. The Da Afghanistan Bank (DAB) intervenes regularly in the foreign exchange market through three-times-weekly selling auctions. The results are published on the DAB website. The DAB deals with ADs only through the auction. The primary goal of these auctions is to regulate the growth of reserve money and/or currency in circulation. Subject to meeting this goal, the DAB also seeks to minimize intra-auction exchange rate volatility. From March 2020, the exchange rate followed a depreciating trend within a 2% band against the US dollar. Accordingly, the de facto exchange rate arrangement is classified as crawl-like. The DAB publishes intervention data on its
The DAB reports official exchange rates of the Afghani vis-à-vis ten major currencies. The DAB staff conducts an online foreign exchange rate survey of between 40 and 50 licensed exchange dealers in Kabul at the start of each business day and acquires data on buying and selling rates for the nine currencies. The DAB’s official reference rates are then determined as the average of the market rates for each currency. The official exchange rate is provided as a daily benchmark or reference point for commercial banks, private sector entities, and government agencies to use in their transactions.

The foreign exchange market consists of commercial banks and foreign exchange dealers. Commercial banks and bureaus are free to set their exchange rates and commissions in transactions with their clients and with each other.

According to the Foreign Exchange Dealers and Money Service Providers Regulation, 2017, both foreign exchange dealers and money service providers licensed by the DAB may operate in the foreign exchange market. In addition, commercial banks and licensed foreign exchange dealers must register and pay a fee to participate in DAB auctions. There were 1,630 foreign exchange dealers and 1,567 licensed money service providers overall, as of December 2019. Money service providers, including Hawaladars, provide remittances and related services including transfer of payments, while foreign exchange dealers are only allowed to exchange currency.

The DAB conducts online foreign currency auction three times a week on a first-price basis with same-day settlement. The amount of foreign exchange offered at the auction is announced in the local press and magazines one working day in advance, and the results are published on the DAB website immediately after each auction. All bidders are required to submit their bids before 9:20 a.m. of the auction day. The Foreign Currency Auction Regulations allow
bidders to set their maximum bid amounts at 3% of the total announced amount of the auction day, respectively. Bids are awarded based on the bidding prices. The auction includes commercial banks and foreign exchange dealers. There is no requirement for auction participants to finance specific international transactions with the foreign currency obtained at the auctions. Successful bidders who fail to settle their accounts within the same day of the auction are fined the total cash collateral of Af 500,000. The DAB may elect to revoke the auction privileges or license of a bidder if it fails to settle.

The DAB does not impose restrictions on the interbank foreign exchange market, but it is not active. Most foreign exchange transactions are made between commercial banks/exchange dealers and their clients. There are 12 licensed commercial banks. Commercial banks and bureaus are free to set their exchange rates and commissions in transactions with their clients and with each other.

### Arrangements for Payments and Receipts

**Prescription of currency requirements** Yes.

Controls on the use of domestic currency No.

- For current transactions and payments No.
- For capital transactions No.

Transactions in capital and money market instruments No.

Transactions in derivatives and other instruments No.

Credit operations No.

Use of foreign exchange among residents Yes.

Article 46 of the DAB Law provides for freedom of currency—that is, residents may use any mutually agreed currency in their transactions. In the absence of an agreed currency, Article 45 of the DAB Law stipulates that contracts should be deemed to be denominated in Afghanis. There are some incentives to promote use of national currency, but no formal restrictions apply.

**Payments arrangements** Yes.

Bilateral payments arrangements Yes.

Operative No.

Inoperative Yes.

An agreement with Russia has been superseded, following the Paris Club rescheduling agreement of July 31, 2006, and the authorities are in the process of concluding agreements with the Paris Club members.
Regional arrangements: No.
Clearing agreements: No.
Barter agreements and open accounts: No.
Administration of control: No.
Payments arrears: No.
Official: No.
Private: No.

Controls on trade in gold (coins and/or bullion):
On domestic ownership and/or trade: No.
On external trade: Yes. Imports and exports of gold are permitted; however, procedures under the Minerals Law and Customs Law may be applicable. Gold may be exported for a limited period by certain traders registered with Afghanistan Central Business Registry and Intellectual Property (previously called AISA), Afghanistan International Chamber of Commerce (AICC), and Ministry of Commerce (MOC). According to the customs policy, the sender must bring the gold back to Afghanistan.

Controls on exports and imports of banknotes: Yes. There is no restriction on the inflow of banknotes. Based on a Cabinet decision (Council of Ministers Resolution No. 47), the amount of cash a person may take out of the country is limited to US $20,000 or its equivalent to a trip. Cash transfers above US$20,000 must take place through the banking system. In addition, under Article 6 of the Anti-Money Laundering and Proceeds of Crime Law, anyone who (1) leaves or enters Afghanistan with or (2) imports or exports by mail, courier, or otherwise more than Af 1 million in cash or negotiable bearer instruments, without first reporting it to the relevant authority, will be fined an amount equal to the cash involved, or the difference between the actual amount and the amount declared, as the case may be.

On exports: Yes. Based on a Cabinet decision (Council of Ministers Resolution No. 47), the amount of cash a person may take out of the country is limited to US$20,000 or its equivalent to a trip. Cash transfers above US$20,000 must take place through the banking system. In addition, under Article 6 of the Anti-Money Laundering and Proceeds of Crime Law, anyone who (1) leaves or enters Afghanistan with or (2) imports or exports by mail, courier, or otherwise more than Af 1 million in cash or negotiable bearer instruments, without first reporting it to the relevant authority, will be fined an amount equal to the cash involved, or the difference between the actual amount and the amount declared, as the case may be.

Domestic currency: Yes. Based on a Cabinet decision (Council of Ministers Resolution No. 47), the amount of cash a person may take out of the country is limited to US$20,000 or its equivalent to a trip. Cash transfers above US$20,000 must take place through the banking system. In addition, under Article 6 of the Anti-Money Laundering and Proceeds of Crime Law, anyone who (1) leaves or enters Afghanistan with or (2) imports or exports by mail, courier, or otherwise more than Af 1 million in cash or negotiable bearer instruments, without first reporting it to the relevant authority, will be fined an amount equal to the cash involved, or the difference between the actual amount and the amount declared, as the case may be.

The Related Person Regulation includes requirements when entering into related person transactions that prohibit doing business with the related person on certain terms, limitations on maximum size of related party exposures, and roles of Board of Supervisors. The Assets Classification and Provisioning Regulation was revised and came into force January 1, 2018. The major changes include addition of Repossessed Assets, changes in the maturity dates of Standard, Watch, Doubtful, and Loss categories, 1% reserve for losses (Optional) on Standards category of loans, addition of limitations to Micro, Small, and Medium credits, and changes in the definition of “past due.”

Floating  Yes.

The de jure exchange rate arrangement is free floating. The Bank of Albania (BOA) does not target any level or band for the exchange rate. The BOA interventions in the foreign exchange market are limited to the following situations: (1) maintaining adequate levels of foreign reserves; (2) avoiding harmful short-term fluctuations in the market; and (3) meeting monetary policy or financial stability objective when such interventions are deemed crucial. Excess volatility in the domestic foreign exchange market is considered on a case-by-case basis by the Committee for Implementing and Advising the Monetary Policy. The BOA uses auctions only for the purpose of accumulating foreign exchange reserves in small amount and based on a pre-announced schedule.

When the BOA intervenes in the domestic foreign exchange market, its counterparties are the commercial banks; if necessary, it may carry out its intervention with foreign exchange bureaus. The BOA intervenes through (1) verbal intervention, in the form of press releases in the print or electronic media and/or press conferences and (2) transactional intervention. The latter can take two forms, direct intervention and intervention via pre-announced auctions. In the case of direct intervention, the exchange rate is determined by commercial banks’ quotes and the BOA Monetary Operations Department’s quotes. When the intervention exchange rate is uniform for all counterparties, the BOA publishes that rate on its Reuters page and simultaneously communicates the rate to commercial banks that do not participate in the Reuters system and to foreign exchange bureaus with which it has contact. When different exchange rates are used, the BOA announces only the fact that it has intervened. It publishes with a three-month lag the amount of the intervention in a quarterly bulletin that summarizes its foreign exchange operations with banks and the public sector. The regulation regarding foreign exchange interventions includes the option to carry out transactional interventions via auctions announced in advance with the aim of increasing/decreasing the reserves. The BOA announces the date, amount, and currency it wants to buy at least one month before the auction, and the banks submit at least 3 bids with no limitation of the amount. The BOA decides how much to buy based on the rates offered and its target amount. Following the auction, the BOA publishes the amount offered by commercial banks, the amount accepted by the BOA, the range of offered bids, the range of accepted bids, and the prorate at the maximum accepted bid. The BOA aims to avoid disruptions from large and irregular demand of foreign exchange by MOF, to better manage liquidity. The Ministry of Finance and Economy has not conducted outright purchases of foreign exchange in the market via auctions since 2014. The BOA offers a euro/Albanian lek (EUR/ALL) swap facility for the Ministry of Finance and Economy to be able to use foreign exchange cash balances for lek payments. The swap is priced on the basis of the interest rate differential between the foreign currency and ALL. In the last years, the BOA’s interventions to manage the level of foreign reserves are guided by a framework incorporating also an optimization model, which accounts for the macroeconomic and financial conditions and the opportunity cost of holding reserves. At the end of each year, the BOA publishes a calendar of the interventions for the upcoming year, announcing the dates and the volumes of such interventions.

During 2021, the exchange rate volatility has been very low. By the
end of the year euro fell to 120.50 ALL, its lowest levels since 2008, compared to 123.40 ALL a year ago, an appreciation of approximately 2.35%. The strengthening pressures because of the increase of inflow from tourism have been amortized by high purchases of OSHEE (Electricity Distribution Operators) as well as the purchases via auctions of the BOA (with the aim of increasing the foreign exchange reserve).

After a calm and stable first quarter of the year (2022), Lek has been appreciating against euro in the months that followed. Eur/lek averaged 121.9 lek/euro in the first quarter 2022, being close to the average of the second half of the previous year. The appreciation began in late April and peaked in July and August, with eur/lek averaging, respectively, 117.5 lek/euro and 116.9 lek/euro (until August 16). This pattern is overall in line with the seasonal behavior of eur/lek in the second and the third quarters of the year.

Lek appreciation during this period of the year is mostly related to tourism inflows. Balance of Payments data, which are available only for the first quarter of the year, show a yoy reduction of the current account deficit on account of higher net exports of services (mainly tourism), as well as a yoy increase in FDIs. Tourism inflows are assessed to have continued strongly also in the second quarter, as suggested by the high number of visitors entering the country, with figures even better than in the pre-pandemic years.

After the war news of February 2022, domestic currency depreciated by almost 6% in an abrupt move and with widening bid/ask spread, pushing BOA to intervene. BOA managed to stabilize the market with limited foreign currency offers (direct intervention) and the cancelation of its pre-announced auctions of March and April. In only 1 week, the euro/ALL exchange rate has been appreciated fast at 123.00 ALL. Despite the war, during Q1 2022 improving goods trade deficit and relatively stable tourism inflows are the main drivers of slightly appreciation trend that have continued. Government support in hard currency for energy imports, seasonal inflows during Easter and the perception of higher domestic interest rates in the months ahead have been new factors to favor the appreciation of domestic currency. In the following months, the appreciation has been slow but steady and the euro/all has reached its lowest levels since 2001.

The BOA briefly intervened a small amount (10.7 million euro ) in the foreign exchange market on March 8, 2022, in response to disorderly market conditions on the onset of the war in Ukraine.

During 2022, 15 interventions through auctions were scheduled to be held. After the turmoil in the markets related to the war in Ukraine, 3 pre-announced interventions were cancelled (respectively, March 17, April 13, and April 27, 2022). Starting from May 2022, the interventions through auctions return as previously scheduled. As of August 2022, 7 foreign exchange purchase auctions have been organized and 5 auctions are yet to follow.

This year is approved the agreement No. 12574 (protocol of Ministry of Finance and Economy), dated June 27, 2022 (No. 2778 protocol of BOA, dated June 30, 2022) “For some changes in the agreement on the instruments offered by the Bank of Albania for liquidity management of the Ministry of Finance and Economy, dated January 20, 2015, amended” between BOA and MFE, which offers a
Albanian LEK/Euro (ALL/EUR) swap facility for the Ministry of Finance and Economy to be able to use LEK exchange cash balances for foreign currency payments [which are covered during 2022 from the EUROBOND issues on November 2021 (637 million EUR in TSA)].

The maximum amount of unpaid LEK/Euro SWAP contracts cannot be more than 200 (two hundred) million Euros, calculated at the BOA’s official exchange rate on the day of conclusion of each contract. The maximum duration of the LEK/Euro SWAP contract is 6 months.

The de facto exchange rate arrangement is classified as floating.

**Official exchange rate**

Yes. The BOA sets the official rate of the lek against the US dollar and the euro every day, based on rates quoted by the 10 most active commercial banks. Rates for other currencies are based on US dollar cross-rates observed in international foreign exchange markets. The official rate of the lek vis-à-vis the principal foreign currencies is the rate used to settle customs obligations and reevaluate the foreign exchange positions of the BOA. Participants in the domestic foreign exchange market are not required to use the official rate in their transactions; however, the BOA requires commercial banks to use the official rate to convert foreign currency positions reported in their monthly balance sheet data.

Monetary aggregate target

Inflation-targeting framework

Yes. BOA Supervisory Council is the highest decision-making and supervisory body of the BOA. By law, the BOA is independent in formulating and implementing the monetary policy, including setting a numerical target for inflation. The Supervisory Council has decided that the inflation target is 3.0% over the medium term. Only the Supervisory Council can change the target. The decisions are taken by a majority vote. This degree of independence is outweighed through increased transparency and accountability of its actions. The Supervisory Council meets on a regular schedule published in the beginning of every year. It conducts eight regular meetings for monetary policy decision-making. The monetary policy decisions of the BOA are guided by the deviation of the medium-term inflation forecast from the target. The inflation analysis is broadly based on the assessment of current and expected economic, monetary, and financial conditions.

Target setting body

Yes. The Supervisory Council is the highest decision-making and supervisory body of the BOA. Government

Central Bank

Yes.

Monetary Policy Committee
BOA Supervisory Council is the highest decision-making and supervisory body of the BOA. The council meets on a regular schedule. The BOA is independent in formulating and implementing the monetary policy, including setting a numerical target for inflation. This degree of independence is outweighed through increased transparency and accountability of its actions. The monetary policy decisions of the BOA are guided by the deviation of the medium-term inflation forecast from the target. The inflation analysis is broadly based on the assessment of current and expected economic, monetary, and financial conditions.

In quantitative terms, the BOA defines price stability as keeping the annual change in consumer prices at 3%, on average terms, and for long time periods. To achieve its objective, the BOA employs the following market-based monetary policy instruments: open-market operations, standing facilities, and reserve requirements. The main policy instrument is a repo (reverse repo) transaction with a seven-day maturity. (The credit for liquidity support is not classified as a monetary policy instrument; it is intended to address financial stability.) Since June 2010, the objective of monetary operations has been to steer and keep short-term interest rates in the interbank market near the base rate set by the BOA Governing Council and minimize their volatility.

The primary objective of the BOA is to achieve and maintain price stability. The annual inflation rate is calculated as the annual change in the CPI, measured and published by the Institute of Statistics, the public institution in charge of compiling statistics. Average year-over-year is used. The CPI is computed by the Institute of Statistics.

The monetary policy relevant horizon is estimated at around 1–3 years. The BOA aims at achieving its target over this horizon.

Repurchase Agreement rate is the policy rate. The rate is implicitly bounded by the overnight deposit window rate and the overnight credit window rate. Both rates are set by the BOA Supervisory Council.

The rate is implicitly bounded by the overnight deposit window rate and the overnight credit window rate. Both rates are set by the BOA Supervisory Council.
### Accountability

**Yes.** The BOA is accountable to the parliament for its decisions, via submission of regular quarterly monetary policy reports and yearly hearings.

<table>
<thead>
<tr>

The medium-term inflation forecasts are performed quarterly. BOA publishes the description of inflation trajectory over the medium term as the baseline scenario as well as the balance of risks in the quarterly monetary policy reports.

### Other monetary framework

#### Exchange tax

**No.**

#### Exchange subsidy

**No.**

#### Foreign exchange market

**Yes.**

ADs are allowed to freely determine their bid-ask spreads and foreign exchange commissions with their clients.

#### Spot exchange market

**Yes.**

In addition to banks, exchange bureaus are allowed to deal in foreign exchange with the public. As of December 31, 2021, 547 foreign exchange bureaus were licensed as foreign exchange operators. The BOA is the only institution that grants such licenses. The exchange bureaus may engage in the following activities: currency trading, trading of traveler’s checks, and acting as an agent for nonbank financial institutions licensed by the BOA to conduct payment services and money transfers. Exchange bureaus are allowed to engage in operations within Albania and are subject to BOA’s supervision and regulatory framework. Their accounts are held within the country only, and there are no restrictions on the volume of their transactions. The BOA deals with exchange bureaus under its intervention policies only in exceptional circumstances, which last occurred in 1998.

#### Operated by the central bank

**Yes.**

#### Foreign exchange standing facility

**No.**

### Auction

**Yes.**

The regulation regarding foreign exchange interventions includes the option to carry out transactional interventions via auctions announced in advance. The BOA uses pre-announced auctions for the purpose of accumulating foreign exchange reserves. The BOA announces the date, amount, and currency it wants to buy at least one month before the auction, and the banks submit one bid each (in an amount equal to the limit it has provided the BOA). The BOA decides how much to buy based on the rates offered and its target amount. Following the auction, the BOA publishes the amount offered by commercial banks, the amount accepted by the BOA, the range of offered bids, the range of accepted bids, and the prorate at
the maximum accepted bid. The frequency of the auctions is slightly over 1 auction per month. There were 14 auctions scheduled for 2021, and half of them were scheduled in the May–August period. There are no penalties foreseen for banks that do not match their bid settlement.

Fixing No.

Interbank market Yes. Banks operate mainly through bilateral payments arrangements and use their own Reuters pages to announce some indicative rates, which usually apply to amounts of at least €50,000. According to the intervention regulation, the BOA may call on each bank to buy/sell up to a limit (trading lot) predetermined by each bank at the price the bank quotes on its Reuters page. Currently, the sum of four largest trading lots is €12 million and all other nine banks have a total limit of €3 million. There were 12 banks participating in the interbank foreign exchange market as of December 31, 2021.

Over the counter Yes. The domestic foreign exchange market operates over the counter.

Brokerage No.

Market making No.

Forward exchange market No.

Official cover of forward operations No.

Arrangements for Payments and Receipts

Prescription of currency requirements No. Payment for all traded merchandise is made in convertible currencies. All contracts denominated and payable in foreign currency are valid.

Controls on the use of domestic currency No. There are no local restrictions on using domestic currency to settle international transactions.

For current transactions and payments No. There are no local restrictions on using domestic currency for current transactions and payments.

For capital transactions No. There are no local restrictions on using domestic currency for capital transactions.

Transactions in capital and money market instruments No. There are no local restrictions on using domestic currency for capital transactions.

Transactions in derivatives and other instruments No. There are no local restrictions on using domestic currency for capital transactions.

Credit operations No. There are no local restrictions on using domestic currency for capital transactions.

Use of foreign exchange among residents No. There are no restrictions on the use of foreign exchange among residents.

Payments arrangements Yes. All transactions under bilateral payments agreements were suspended in 1992, and the settlement of remaining clearing accounts is awaiting the outcome of reconciliation process.

Bilateral payments arrangements No.

Operative No.

Inoperative No.

Regional arrangements No.

Clearing agreements Yes. Albania maintains outstanding balances under inoperative bilateral payments agreements in nonconvertible currencies with Cuba, the
Democratic People’s Republic of Korea, and Vietnam. Albania also maintains outstanding balances under inoperative bilateral clearing agreements in convertible currencies with Algeria, Cuba, the Democratic People’s Republic of Korea, and Vietnam.

<table>

**Administration of control**

Yes. The BOA is vested with the power to administer exchange controls. The BOA is the only authority with the right to (1) license, authorize, regulate, supervise, and revoke the licenses of foreign exchange market participants, as well as those of commercial banks; (2) define the limits of their activities; and (3) regulate and supervise foreign exchange operations and international payments to prevent any participants from dominating the market and undermining the value of the lek through speculation. In accordance with anti-money-laundering legislation, banks are required to maintain records of all cash transactions in excess of the equivalent of lek 1 million and to report these to the authority in the MOF responsible for the prevention of money laundering.

**Payments arrears**

No.

**Official**

No. There are no official external arrears. The outstanding balance from bilateral agreements of payments—dating from the communist regime, with Algeria, Cuba, and Vietnam, can be recognized as liabilities only on signing of the respective debt rescheduling agreements and their ratification by the parliament of the Republic of Albania. Under Albanian law, the outstanding balances were only considered liabilities if they entered into an agreement by 2009. On official communication to the respective governments, no request or response is provided.

**Private**

No.

**Controls on trade in gold (coins and/or bullion)**

Yes.

**On domestic ownership and/or trade**

No. There are no restrictions on domestic ownership of gold, and trading activity is allowed under the license granted by the appropriate authorities.

**On external trade**

Yes. In accordance with Article 12.1 of the regulation on foreign exchange activities, residents and nonresidents may transfer standardized gold and precious metals to and from Albania only through entities licensed by the BOA. In accordance with Article 12.2 of the regulation on foreign exchange activities, residents and nonresidents may transfer nonstandardized gold and precious metals to and from Albania in accordance with documentary requirements regarding the source, the purpose of the transfer, the quantity, and whether the transfer involves the return of the precious metals and, if so, the form in which they must be returned. The requirement does not apply to transfers of jewelry for personal use.

**Controls on exports and imports of banknotes**

Yes.

**On exports**

Yes.

**Domestic currency**

Yes. Natural and juridical persons are allowed to export up to lek 50,000 in domestic banknotes and coins.

**Foreign currency**

Yes. In accordance with Article 11.1 of the regulation on foreign exchange activities, residents and nonresidents must declare to customs authorities the source and purpose of funds in amounts exceeding €10,000 or its equivalent in foreign currency. In accordance with Article 11.2 of the regulation on foreign exchange activities, nonresidents visiting Albania may take out foreign currency in cash.
and traveler’s checks in the amount declared to customs authorities on entry. This amount must be supported by (1) a declaration made at the time of entry and (2) exchange documents, if available.

| Import licenses and other nontariff measures | Yes. |

The BOA is the licensing authority in the country that grants the license for performing foreign exchange activity, respectively, for banks, nonbank financial institutions, and foreign exchange offices. This license is a separate one and in no case can the import license be used as a license for performing the foreign exchange transactions in the country.

Appendix No. 1 of Regulation of BOA No. 70 on Foreign Exchange Activities, as amended, stipulates the following: Advance payment in lek or the equivalent in foreign currency calculated at the daily exchange rate must be accompanied by the following documentation: (1) an application describing the nature and purpose of the transaction, signed by the applicant and including a declaration that the submitted documentation was not previously used for other transfers for the same goods and value; and (2) a pro forma invoice and/or a contract with the terms of payment. For transfers related to commercial services, as stipulated in Article 7, Paragraph 1, of the regulation, license holders must obtain from each customer the following documentation: (1) the application stipulated in Paragraph 1a (Part I) of the appendix and (2) the invoice or a document certifying the purpose of the transfer and/or the respective contract or agreement. For transfers related to noncommercial transactions, the following documents are required: (1) the application stipulated in Paragraph 1a (Part I of the appendix) and (2) a declaration of the source of income for the transfer.

Currently, there are approximately 147 types of legal fees and charges for certificates, licenses, and permits (and for controls in international trade) issued by various government agencies involved in the Albanian customs process. Sixty-six types are charged with a fee.

In compliance with Law No. 10081 of February 23, 2009, on Licenses, Authorizations, and Permits in the Republic of Albania, anyone meeting the criteria specified in this law and other pertinent legislation is licensed to exercise a specific activity. Once the license to exercise the activity is granted, the importer may import any product without an additional import license, including for products such as narcotic and psychotropic drugs, live animals, biological materials on animal insemination, veterinary drugs and vaccines, medicinal products, plant protection products, military goods.

In compliance with Law No. 10081 on Licenses, Authorizations, and Permits in the Republic of Albania, anyone meeting the criteria specified in this law and other pertinent legislation is licensed to exercise a specific activity. Once the license to exercise the activity is granted, the importer may import any product without an additional import license, except for specific products that require a nonautomatic license, such as ozone depleting substances.

The only import prohibitions relate to products considered to be hazardous or to threaten public health. The importation of dangerous waste is prohibited, unless it can be used, processed, or recycled, in which case an import license is required. Import prohibitions also apply to imports of strong poisons, chemical weapons, narcotics, and animal products from certain countries. Import prohibitions apply to bioproducts and veterinary drugs recognized as dangerous to human or animal health by relevant international organizations; imports from countries or areas within a country infected by a contagious disease; live microorganisms pathogenic to animals and plants; and infected plant products and other objects.

Excise taxes on domestic and imported goods are unified. Customs tariffs are applied to the c.i.f. value at rates of 0%, 2%, 5%, 6%, 10%, and 15%.

Exports and Export Proceeds

All private and public companies or individuals operating in the export sector are required to repatriate their foreign exchange receipts.
Guarantees No.
Domiciliation No.
Preshipment inspection No.
Other No.

Export licenses Yes.

Export licenses must be obtained only for a handful of mostly sensitive products. These include firearms, ammunition, dual-use goods and technologies, military goods, explosive materials, and radioactive materials. Licenses and special export permits are required for medicines, ozone layer depletion, precious metals, antiques, national clothing of artistic or folkloric value, and books and works of art that form part of Albania’s national heritage and culture.

Without quotas Yes.
With quotas No.

Export taxes No.

Collected through the exchange system No.
Other export taxes No.

Payments for Invisible Transactions and Current Transfers

Controls on these transfers No.

Supporting documents are required. According to the Regulation on Foreign Exchange Activities approved by Decision No. 70 of September 30, 2009, of the Supervisory Council of the BOA (as amended), there are no specific provisions regarding invisible transactions. Article 7 of the regulation applies to “current transactions.” Article 7, Paragraph 3, stipulates that “current transfers and transactions between residents and nonresidents are conducted freely in line with the documentation stipulated in Appendix No. 1 of this Regulation.”

Trade-related payments No.

Prior approval No.

Quantitative limits No.

Indicative limits/bona fide test No.

Investment-related payments No.

Because of COVID-19, BOA approved 4 decisions “On the suspension of the distribution of profits by banks”: (1) Decision No. 24 of April 8, 2020, which provisioned the suspension until June 30, 2020, of the distribution by banks of profits carried over from previous periods and the profit realized during the first half of 2020; (2) Decision No. 40 of July 1, 2020, which provisioned the suspension until December 31, 2020, of the distribution of the profits carried over from previous periods and of the profit realized during 2020; (3) Decision No. 4 effective January 13, 2021, which provisioned the suspension until December 31, 2021, of the distribution by banks of profits carried over the year 2020 and the profit that will be realized during the year 2021; and (4) Decision No. 6 effective February 2, 2022, which provisioned the suspension until December 31, 2022, of the distribution by banks of profits carried over the year 2021 and the profit that will be realized during the year 2022.
To protect consumers and to maintain the insurance market financial stability in light of COVID-19, the Board of the Albanian Financial Supervisory Authority (AFSA) with its Decision No. 56 of April 10, 2020, required insurance companies to temporary suspend any procedure for dividend distribution, as well as to have a careful approach regarding variable remuneration policies, and postpone them in time. This Decision was replaced with Decision No. 68, effective April 28, 2021, which required the insurance market to temporary suspend any procedure for dividend distribution of 2020, as well as to have a careful approach regarding variable remuneration policies, and postpone them in time. This Decision was repealed with Decision No. 31, effective February 28, 2022, and no more restrictions regarding dividend distribution are in force.

**Proceeds from Invisible Transactions and Current Transfers**

| Repatriation requirements | No. |
Surrender requirements  No.
Surrender to the central bank  No.
Surrender to authorized dealers  No.
Restrictions on use of funds  No.

**Capital Transactions**

**Controls on capital transactions**  Yes.  In accordance with the regulation on foreign exchange activities, the transfer of capital from abroad by residents and/or nonresidents may be carried out freely and without restrictions. Capital transfers outside Albania for account holders licensed by the BOA may be performed on the authority of their respective institutions and in accordance with the regulatory and supervisory requirements of the BOA. License holders may make transfers outside Albania for their customers with the requisite documentation in the BOA’s regulation on foreign exchange activities.

Repatriation requirements  No.
Surrender requirements  No.
Surrender to the central bank  No.
Surrender to authorized dealers  No.

**Controls on capital and money market instruments**  Yes.  Transactions with securities and other similar instruments, and the exercise of rights arising from the latter, may be carried out only through banks and/or other institutions authorized by law, on the basis of a contract. For prudential reasons and money-laundering prevention, the FIU and the BOA monitor and review these transactions.

**On capital market securities**  Yes.  Law No. 62/2020 “On Capital Markets” does not restrict transactions between residents and nonresidents.

Shares or other securities of a participating nature  Yes.
Purchase locally by nonresidents  No.
Sale or issue locally by nonresidents  Yes.

No person may make a securities offer to the public in the Republic of Albania, without the publication and prior approval by AFSA of a prospectus or without the registration of the offering memorandum in case of exemption from prospectus obligation. The prospectus or any such other document prepared by a person making an offer, whether it is made to the public prior to a listing on an exchange, or by way of private placement, must comply with the regulations of the AFSA. Pursuant to Article 247 of Law No. 62/2020 “On Capital Markets,” (1) An issuer outside of the Republic of Albania may offer securities in the Republic of Albania by issuing a prospectus, which is first approved by the competent authority of the home country in accordance with its legal framework, under the condition that the competent authority of the home country has signed a cooperation agreement on information exchange with AFSA in the frame of International Organization of Securities Commissions’ (IOSCO’s) Multilateral Memorandum of Understanding (MMoU).

(2) If it is not one of the countries signatory to the IOSCO MMoU, an issuer outside of the Republic of Albania may issue securities in the Republic of Albania only through an investment firm in the Republic of Albania, which is responsible and guarantees the
Purchase abroad by residents

Yes.

The Law on Capital Markets does not restrict purchases abroad by residents.

Pursuant to the Law on Banks, No. 9662 of December 18, 2006, as amended, banks may invest in the purchase of shares of commercial companies which are not banks or financial institutions or may be a partner of a commercial company, for an amount not exceeding 10% of the capital of that company, but the investment at any time may not exceed 15% of the regulatory capital of the bank. The maximum allowed investment of a bank in several commercial companies which are not banks or financial institutions or the maximum holdings as a partner in such commercial companies may not exceed 60% of the regulatory capital of a bank.

Pursuant to Regulation No. 1 of January 28, 2010, as amended, the assets of a pension fund may not be invested more than (1) 30% in shares or units in investment funds licensed in an EU Member State, and (a) the assets of which are invested in the following indices: CAC 40, DAX, FTSE 100, S&P 500, Dow Jones Industrial Average, Nikkei 225 (Japan), Sensex (India), All Ordinaries (Australia), and Hang Seng Index (Hong Kong); or (b) the assets of which are invested in bonds, treasury bills, and other securities issued or guaranteed by EU Member States; (2) 100% in bonds, treasury bills, or other securities issued or guaranteed by the ECB, the EIB, and the World Bank; (3) 100% in bonds, treasury bills, and other securities issued or guaranteed by EU Member States or OECD countries or by the relevant CBs, but (a) no more than 30% in a single issuer. The ceiling may be increased to 100% in a single issuer, after receiving approval by the Financial Supervisory Authority (FSA), based on the arguments provided for such an investment policy.

Sale or issue abroad by residents

The rules on shares transactions apply.

No person may make a securities offer to the public in the Republic of Albania, without the publication and prior approval by AFSA of a prospectus or without the registration of the offering memorandum, in case of exemption from prospectus obligation. The prospectus or any such other document prepared by a person making an offer, whether it is made to the public prior to a listing on an exchange, or by way of private placement, must comply with the regulations of the AFSA.

Pursuant to Article 247 of Law No. 62/2020 “On Capital Markets,”
(1) An issuer outside of the Republic of Albania may offer securities in the Republic of Albania by issuing a prospectus which is first approved by the competent authority of the home country in accordance with its legal framework, under the condition that the competent authority of the home country has signed a cooperation agreement on information exchange with AFSA in the frame of IOSCO’s MMoU.
(2) If it is not one of the countries signatory to the IOSCO MMoU, an issuer outside of the Republic of Albania may issue securities in the Republic of Albania only through an investment firm in the Republic of Albania, which is responsible and guarantees the accuracy and the authenticity of the information given in the prospectus, and is subject to administrative penalties in the case of

accuracy and the authenticity of the information given in the prospectus, and is subject to administrative penalties in the case of noncompliance.
noncompliance.

Pursuant to Regulation No. 1 of January 28, 2010, as amended, the assets of a pension fund may not be invested more than (1) 30% in shares or units in investment funds licensed in an EU Member State, and (a) the assets of which are invested in the following indices: CAC 40, DAX, FTSE 100, S&P 500, Dow Jones Industrial Average, Nikkei 225 (Japan), Sensex (India), All Ordinaries (Australia), and Hang Seng Index (Hong Kong); or (b) the assets of which are invested in bonds, treasury bills, and other securities issued or guaranteed by EU Member States; (2) 100% in bonds, treasury bills, or other securities issued or guaranteed by the ECB, the EIB, and the World Bank; (3) 100% in bonds, treasury bills, and other securities issued or guaranteed by EU Member States or OECD countries or by the relevant CBs, but (a) no more than 30% in a single issuer. The ceiling may be increased to 100% in a single issuer, after receiving approval by the FSA, based on the arguments provided for such an investment policy.

There is no restriction for residents to sell or issue abroad.

Local sales or issue of securities, including money market instruments by nonresidents, should be performed in accordance with Article 247 of the Law on Capital Markets. No person may make a securities offer to the public in the Republic of Albania, without the publication and prior approval by AFSA of a prospectus or without the registration of the offering memorandum, in case of exemption from prospectus obligation. The prospectus or any such other document prepared by a person making an offer, whether it is made to the public prior to a listing on an exchange, or by way of private placement, must comply with the regulations of the AFSA.

Pursuant to Article 247 of Law No. 62/2020 “On Capital Markets,” (1) An issuer outside of the Republic of Albania may offer securities in the Republic of Albania by issuing a prospectus which is first approved by the competent authority of the home country in accordance with its legal framework, under the condition that the competent authority of the home country has signed a cooperation agreement on information exchange with AFSA in the frame of IOSCO’s MMoU.

(2) If it is not one of the countries signatory to the IOSCO MMoU, an issuer outside of the Republic of Albania may issue securities in the Republic of Albania only through an investment firm in the Republic of Albania, which is responsible and guarantees the accuracy and the authenticity of the information given in the prospectus, and is subject to administrative penalties in the case of noncompliance.

The Law on Capital Markets does not restrict purchases abroad by residents. The residents may buy financial instruments in the international markets by accessing such markets by themselves (no license is required when they deal on their own account), or they may buy financial instruments abroad through a licensed investment firm. Foreign investment firms may provide investment services to residents only through the establishment of a branch, or through a representative office or agent, which has to be registered and recognized by the AFSA. However, transactions must conform to BOA Regulation No. 70 on Foreign Exchange Activities.
Pursuant to Regulation No. 1 of January 28, 2010, as amended, the assets of a pension fund may not be invested more than (1) 30% in shares or units in investment funds licensed in an EU Member State, and (a) the assets of which are invested in the following indices: CAC 40, DAX, FTSE 100, S&P 500, Dow Jones Industrial Average, Nikkei 225 (Japan), Sensex (India), All Ordinaries (Australia), and Hang Seng Index (Hong Kong); or (b) the assets of which are invested in bonds, treasury bills, and other securities issued or guaranteed by EU Member States; (2) 100% in bonds, treasury bills, or other securities issued or guaranteed by the ECB, the EIB, and the World Bank; (3) 100% in bonds, treasury bills, and other securities issued or guaranteed by EU Member States or OECD countries or by the relevant CBs, but (a) no more than 30% in a single issuer. The ceiling may be increased to 100% in a single issuer, after receiving approval by the FSA, based on the arguments provided for such an investment policy.

Sale or issue abroad by residents No.

On collective investment securities Yes.

Purchase locally by nonresidents No. The Law on Collective Investment Undertakings (CIUs) does not restrict local purchases of units by nonresidents.

Sale or issue locally by nonresidents Yes. CIUs licensed by the appropriate authority in an EU country and/or a country that is specifically approved by the FSA may issue units/shares in Albania, with FSA approval.

Purchase abroad by residents Yes. The Law on CIUs does not restrict purchases of units abroad by residents.

The law and Regulation No. 106 specify the investments limits that a licensed CIU scheme with public offer may invest in any investment type but do not restrict purchases abroad by a CIU scheme.

Regulation No. 1 of January 28, 2010, as amended, specifies the restrictions on investment of the assets of pension funds in securities issued abroad, including limits based on debt securities ratings, issuing financial institutions, issuing countries, such as EU or OECD countries, concentration on single issuers, etc.

The assets of a pension fund may not be invested more than (1) 30% in shares or units in investment funds licensed in an EU Member State, and (a) the assets of which are invested in the following indices: CAC 40, DAX, FTSE 100, S&P 500, Dow Jones Industrial Average, Nikkei 225 (Japan), Sensex (India), All Ordinaries (Australia), and Hang Seng Index (Hong Kong); or (b) the assets of which are invested in bonds, treasury bills, and other securities issued or guaranteed by EU Member States; (2) 100% in bonds, treasury bills, or other securities issued or guaranteed by the ECB, the EIB, and the World Bank; (3) 100% in bonds, treasury bills, and other securities issued or guaranteed by EU Member States or OECD countries or by the relevant CBs, but (a) no more than 30% in a single issuer. The ceiling may be increased to 100% in a single issuer, after receiving approval by the FSA, based on the arguments provided for such an investment policy.

Sale or issue abroad by residents Yes. A management company wishing to establish a branch in an EU country, or another country outside the EU if specifically permitted by the FSA, must notify the FSA, indicating the EU country or another permitted country in which it intends to establish a branch.

Controls on derivatives and other instruments Yes. Controls on derivatives and other instruments are the same as on capital market securities.

Purchase locally by nonresidents No. The rules on shares transactions apply.
No person may make a securities offer to the public in the Republic of Albania, without the publication and prior approval by AFSA of a prospectus or without the registration of the offering memorandum, in case of exemption from prospectus obligation. The prospectus or any such other document prepared by a person making an offer, whether it is made to the public prior to a listing on an exchange, or by way of private placement, must comply with the regulations of the AFSA.

Pursuant to Article 247 of Law No. 62/2020 “On Capital Markets,”

1) An issuer outside of the Republic of Albania may offer securities in the Republic of Albania by issuing a prospectus which is first approved by the competent authority of the home country in accordance with its legal framework, under the condition that the competent authority of the home country has signed a cooperation agreement on information exchange with AFSA in the frame of IOSCO’s MMoU.

2) If it is not one of the countries signatory to the IOSCO MMoU, an issuer outside of the Republic of Albania may issue securities in the Republic of Albania only through an investment firm in the Republic of Albania, which is responsible and guarantees the accuracy and the authenticity of the information given in the prospectus, and is subject to administrative penalties in the case of noncompliance.

to increase the use of domestic currency in the financial system. The following are applied to the liabilities included in the reserve base to which a 0 reserve ratio is not applied: The reserve ratio in lek is 7.5% for liabilities with a maturity up to 12 months, and 5% for those with an initial maturity between 12 months and two years. The reserve ratio in foreign currency is 12.5% when the bank’s ratio of liabilities in the relevant currency included in the reserve base to which a 0 reserve ratio is not applied to the total of liabilities is up to 50%, and 20% if the ratio is higher than 50%.

Reserves in lek are remunerated at the repo rate. The euro required reserves are remunerated at the ECB overnight deposit rate, and the US dollar required reserves are remunerated at 0%.

The maintenance period of the required reserve is one month. It starts on the 24th day of the month succeeding the base period and ends on the 23rd day of the following month. The BOA applies the averaging system of maintaining reserves over the maintenance period. Banks are allowed to use every day up to 70% of the reserve requirements’ amount in lek.

* ***Abroad by banks***

Pursuant to the Law on Banks, No. 9662 of December 18, 2006, as amended, bank exposures may not be higher than 20% of their regulatory capital with a single counterparty or a group of connected clients. If the counterparty is the parent bank or one or more subsidiaries of a parent bank, banks may not invest more than 25% of their regulatory capital. The bank may not undertake large exposures, which together exceed 700% of regulatory capital. Pursuant to the Law on Banks, No. 9662 of December 18, 2006, as amended, banks may invest in the purchase of shares of commercial companies which are not banks or financial institutions or may be a partner of a commercial company, for an amount not exceeding 10% of the capital of that company, but the investment at any time may not exceed 15% of the regulatory capital of the bank. The maximum allowed investment of a bank in several commercial companies which are not banks or financial institutions or the maximum holdings as a partner in such commercial companies may not exceed 60% of the regulatory capital of a bank.

The limit is 20% of the bank’s regulatory capital for a single currency and 30% for all currencies. No different treatment is provisioned for resident or nonresident assets and liabilities.
On nonresident assets and liabilities
Yes.
The limit is 20% of the bank’s regulatory capital for a single currency and 30% for all currencies. No different treatment is provisioned for resident or nonresident assets and liabilities.

Provisions specific to institutional investors
Yes.

Insurance companies
Yes.
AFSA issued Guideline No. 94 of July 29, 2020, “On regulatory expectations towards the entities under supervision, due to the situation caused by COVID-19.” It is still in force.

To protect consumers and to maintain the insurance market financial stability, the Board of the Authority with its Decision No. 56 of April 10, 2020, required insurance companies to temporary suspend any procedure for dividend distribution, as well as to have a careful approach regarding variable remuneration policies, and postpone them in time. This Decision was replaced with Decision No. 68, effective April 28, 2021, which required the insurance market to temporary suspend any procedure for dividend distribution of 2020, as well as to have a careful approach regarding variable remuneration policies, and postpone them in time. This Decision was repealed with Decision No. 31, effective February 28, 2022, and no more restrictions regarding dividend distribution are in force.

During 2021, a number of laws and regulations relating to the insurance sector were enacted. These include Law No. 32/2021 of March 16, 2021, “On compulsory insurance in the transport sector”;
European Accident Report Form via AFSA Decision No. 85 of May 31, 2021; Regulation on reporting and oversight standards of the Albanian Security Bureau via AFSA Decision No. 104 of June 30, 2021; For the electronic claims register of the Albanian Security Bureau via AFSA Decision No. 105 of June 30, 2021; Regulation on the manner of administration and payment of damages Compensation Fund with the date of the accident before the entry into force of Law No. 32/2021 via AFSA Decision No. 103 of June 30, 2021; Regulation on rules, methodology for calculating the indemnity covered by the compulsory insurance contract via AFSA Decision No. 125 of July 28, 2021; Regulation on the calculation of the compensation fund as well as the cases of touching, interfering and restoring the minimum value of the compensation fund, via AFSA Decision No. 126 of July 28, 2021.

Limits (max.) on securities issued by nonresidents
Yes.
The Insurance Law, No. 52 (Articles 97 and 103), specifies permissible investments and limits for investment of assets covering technical or mathematical provisions. Assets covering technical provisions, or mathematical provisions, may, with FSA approval, be invested in (1) long-term bonds and long-term securities issued by an EU member country or an OECD member country; (2) long-term bonds and long-term securities issued by a nongovernmental entity in an EU member country or an OECD member country; (3) shares issued by a foreign joint-stock company that are traded on a regulated capital market in an EU member country or an OECD member country; and (4) units/shares of CIUs that are traded in an EU member country or an OECD member country. Before acquiring a qualified holding in another foreign (member or nonmember country) insurance company or financial institution, an insurance company must inform the FSA in writing. Insurance companies must also inform the FSA in writing of subsequent holdings equal to or exceeding 20%, 33%, 50%, or 75% of the voting rights or participation in the capital of a foreign financial institution (Article 50, Law No. 52). Regulation No. 19 (Article 4, Point 2) of April 28, 2015, “On the Assets Covering Technical Provisions and the Types of the Permitted Investments of These Assets” stipulates additional requirements, other than limits, regarding the permissible
investments of assets covering technical provisions. On Albania’s accession to the EU, insurance companies will be allowed to invest their assets covering technical provisions and mathematical provisions in an EU or an OECD member country, as specified in the insurance law (Article 263, Law No. 52).

**Limits (max.) on investment portfolio held abroad**

Yes. The Insurance Law, No. 52 (Articles 97 and 103), specifies permissible investments and limits for investment of assets covering technical or mathematical provisions. Assets covering technical provisions, or mathematical provisions, may, with FSA approval, be invested in (1) long-term bonds and long-term securities issued by an EU member country or an OECD member country; (2) long-term bonds and long-term securities issued by a nongovernmental entity in an EU member country or an OECD member country; (3) shares issued by a foreign joint-stock company that are traded on a regulated capital market in an EU member country or an OECD member country; and (4) units/shares of CIUs that are traded in an EU member country or an OECD member country. Before acquiring a qualified holding in another foreign (member or nonmember country) insurance company or financial institution, an insurance company must inform the FSA in writing. Insurance companies must also inform the FSA in writing of subsequent holdings equal to or exceeding 20%, 33%, 50%, or 75% of the voting rights or participation in the capital of a foreign financial institution (Article 50, Law No. 52). Regulation No. 19 (Article 4, Point 2) stipulates additional requirements, other than limits, regarding the permissible investments of assets covering technical provisions. On Albania’s accession to the EU, insurance companies will be allowed to invest their assets covering technical provisions and mathematical provisions in an EU or an OECD member country, as specified in the insurance law (Article 263, Law No. 52).

**Limits (min.) on investment portfolio held locally**

No. There is no limit on investments held locally. Insurance companies may invest 100% of their technical and mathematical provisions in Albania as long as the restrictions regarding investment type and diversification are met. Insurance companies may invest their technical and mathematical provisions in treasury bills and notes, as well as in other market instruments issued by the central government of Albania.

**Currency-matching regulations on assets/liabilities composition**

Yes. The Insurance Law, No. 52 (Article 98), requires insurance companies to appropriately match the amount of investment of assets covering technical and mathematical provisions which are exposed to risk of potential losses because of changes in interest rates, exchange rates, and other market risks with its liabilities from insurance contracts dependent on the same changes. When investing assets covering technical and mathematical provisions, insurance companies must take into consideration the maturity of the liabilities under individual insurance contracts. Insurance companies must match no less than 80% of the assets covering mathematical provisions with the liabilities under insurance contracts dependent on changes in foreign exchange rates.

**Pension funds**

Yes. Regulation No. 1 of January 28, 2010, as amended, specifies the restrictions on investment of assets of pension funds in securities issued abroad. This regulation specifies limits based on debt securities ratings, issuing financial institutions, issuing countries, such as EU or OECD countries, concentration on single issuers, etc.

**Limits (max.) on securities issued by nonresidents**

Yes. Regulation No. 1 of January 28, 2010, as amended, specifies the restrictions on investment of the assets of pension funds in securities issued abroad, including limits based on debt securities ratings,
The assets of a pension fund may not be invested more than (1) 30% in shares or units in investment funds licensed in an EU Member State, and (a) the assets of which are invested in the following indices: CAC 40, DAX, FTSE 100, S&P 500, Dow Jones Industrial Average, Nikkei 225 (Japan), Sensex (India), All Ordinaries (Australia), and Hang Seng Index (Hong Kong); or (b) the assets of which are invested in bonds, treasury bills, and other securities issued or guaranteed by EU Member States; (2) 100% in bonds, treasury bills, or other securities issued or guaranteed by the ECB, the EIB, and the World Bank; (3) 100% in bonds, treasury bills, and other securities issued or guaranteed by EU Member States or OECD countries or by the relevant CBs, but (a) no more than 30% in a single issuer. The ceiling may be increased to 100% in a single issuer, after receiving approval by the FSA, based on the arguments provided for such an investment policy.

Regulation No. 1 of January 28, 2010, as amended, stipulates that 100% of assets of pension funds may be invested in notes, treasury bills, and other government papers issued and backed by the Republic of Albania. However, there are limits regarding bank deposits and concentration of investment in a single issuer. The assets of a pension fund may not be invested more than: 100% in Treasury Bills, bonds, and other securities issued or guaranteed by the Republic of Albania; 20% in bank deposits in the same bank; 30% in debt securities with a rating of BBB or higher as rated by Standard & Poor’s or Fitch, a rating of Baa3 or higher as rated by Moody’s, a rating of BBB (low) or higher as rated by DBRS (Dominion Bond Rating Service), but no more than 10% in a single issuer.

There is no currency-matching regulation.

Other legal tender
No.

Exchange rate structure
Unitary
Yes.

Dual

Multiple

Classification
No separate legal tender
Currency board
Conventional peg
Stabilized arrangement
Crawling peg
Crawl-like arrangement
Yes. The de jure exchange rate arrangement is managed floating. The Bank of Algeria (BA) does not announce the path of the exchange rate. The external value of the dinar is determined in the interbank foreign exchange market, in which the BA is the main seller. This is because of inflows related to commodity exports, including hydrocarbons, which, under current law, must be surrendered to the BA. The BA manages the dinar with reference to a basket of currencies, and the rate of the dinar relative to the currencies in the basket is based on balance of payments data. The BA has not set a target range for fluctuation of the dinar outside or within any particular band, and the observed exchange rate movements do not...
confirm any constant weights of the currency composite. Since December 2020, the exchange rate of the dinar has followed a depreciating trend within a 2% band against the US dollar. Accordingly, the de facto exchange rate arrangement was reclassified retroactively to crawl-like from stabilized, effective December 4, 2020.

<table>

</tbody>
</table>

There is no official exchange rate determined outside the market. The exchange rate used by the customs administration is the market-determined rate of the dinar against the respective currency on the customs clearance date.

**Monetary policy framework**

**Exchange rate anchor**

- **U.S. dollar**
- **Euro**
- **Composite**
- **Other**

**Monetary aggregate target**

Yes. The monetary policy framework adjusts to reflect the developments of the economic environment caused by oil price fluctuations. Since 2003, base money has been the main intermediate instrument of monetary policy, and liquidity management tools dominated the monetary policy toolkit. In March 2017, the BA introduced open market operations for the first time. Until November 2017, open market lending operations served as the main policy tool. With the introduction of monetary financing in October 2017, excess liquidity reappeared, and the BA reintroduced liquidity absorption facilities in January 2018. At present, the decline in liquidity has led to greater use of bank refinancing instruments, particularly through open market operations. The exchange rate policy targets a real effective exchange rate in line with its fundamental value but has occasionally been used to contain price pressures.

</tbody>
</table>
December 31, 2021, the BA had granted licenses to 46 exchange bureaus, but only 3 bureaus were active. Exchange bureaus may only buy and sell banknotes and traveler’s checks denominated in freely convertible foreign currencies against dinars. Exchange bureaus may sell foreign currency to authorized banks and financial institutions or to the BA, but they may not buy foreign currency from the BA, and they may not hold accounts abroad. They may not make payments or transfers in foreign currency for the accounts of their customers.

Operated by the central bank: Yes.

Foreign exchange standing facility: Yes. The BA intervenes in the foreign exchange market directly by proposing its own rates and by making foreign exchange available to banks at their request. The BA sets the buying and selling rates of the dinar against the US dollar in this market within a margin of 0.015 dinar. The BA sells foreign exchange only to authorized banks and financial institutions. The government and other public institutions do not deal directly with the BA. They deal with financial institutions operating in the interbank foreign exchange market.

Allocation: No.

Auction: No. The BA allocates foreign exchange at the request of authorized banks and financial institutions.

Fixing: No.

Interbank market: Yes. No margin limits are imposed on the buying and selling exchange rates in the interbank foreign exchange market. As of December 31, 2021, 19 banks had been licensed to engage in banking operations, including foreign exchange transactions; they therefore participate in the interbank foreign exchange market. The governor of the BA issues the licenses, which are conditional on authorization from the CMC.

Over the counter: Yes. The exchange rates applicable to OTC trades are set on the basis of the interbank market exchange rate.

Brokerage: No.

Market making: Yes. Transactions take place between traders (market makers), all of which are authorized banks and financial institutions that are directly and exclusively authorized to operate in the system, and negotiations take place by mutual agreement. The BA continuously quotes buying and selling prices to the other market participants. These transactions are conducted under a BA instruction organizing the foreign exchange market.

Forward exchange market: Yes. Authorized banks and financial institutions may provide forward cover to clients. Banks are authorized to carry out interbank borrowing and lending operations in freely convertible foreign currency and make deposits in freely convertible foreign currency at the BA. These borrowing and lending operations in foreign currency must be performed exclusively on the forward exchange market (Instruction No. 04-2011 of October 19, 2011). However, foreign exchange forward hedging transactions are still rarely performed. Regulation No. 17-01 of July 10, 2017, concerning the interbank forward exchange market and instruments for hedging foreign exchange risks, and Instruction No. 06-2017 of November 26, 2017, concerning the functioning of the market, apply.

Official cover of forward operations: No.

Arrangements for Payments and Receipts

Prescription of currency requirements: Yes.

The foreign exchange accounts of natural persons do not require authorization. They may be used freely by their holders.

Effective June 29, 2021, merchants and non-trading professionals may open foreign exchange accounts designated as a “merchant foreign exchange account” or a “nontrading professional foreign exchange account,” respectively, without authorization. The use of these accounts is subject to a specific regulation, specified in the BA Instruction No. 06-2021 of June 29, 2021, which specifies the transactions allowed to be credited and debited from these accounts. The balance of the foreign exchange account for merchants and non-merchants may only be transferred abroad to pay for the import of goods and services or to pay expenses related to the account holder’s activity.

Effective January 2, 2022, assets in merchant and exporter foreign currency accounts may not be the subject of a term deposit, and do not give rise to any remuneration. The foreign currency deposits of individuals are remunerated at the investment rate set by the BA. Effective January 2, 2022, the maximum duration of a term deposit is set to 12 months.

Asset building abroad by residents from their activities in Algeria, particularly in the form of bank deposits, is prohibited.

There are no exceptions to the prohibition against opening bank accounts abroad.

Asset building abroad by residents from their activities in Algeria, particularly in the form of bank deposits, is prohibited.

Foreign exchange accounts in convertible dinars may be opened only
convertible into foreign currency by nonresidents.

Nonresident Accounts

Foreign exchange accounts permitted Yes. Foreign exchange accounts of nonresident natural and legal persons do not require authorization. They may be used freely by their holders.

Approval required No.

Domestic currency accounts Yes. The accounts of nonresident natural and legal persons in convertible dinars do not require authorization. They may be used freely by their holders.

Convertible into foreign currency Yes. The accounts of nonresident natural and legal persons in convertible dinars do not require authorization. They may be used freely by their holders.

Approval required No.

Blocked accounts No.

Imports and Import Payments

Foreign exchange budget No.

Financing requirements for imports Yes.

Minimum financing requirements No.

Advance payment requirements Yes. Advance payments are limited to 15% of the value of the import. Authorization must be obtained from the BA if this ceiling is exceeded.

Advance import deposits No. Effective July 28, 2022, an advance deposit of at least 120% of the value of imports of goods for resale in an unaltered state is no longer required. Previously, such a deposit was required at least 30 days before the merchandise was shipped.

Documentation requirements for release of foreign exchange for imports Yes.

Domiciliation requirements Yes. Except as indicated in Article 33 of Regulation No. 07-01 of February 3, 2007, as amended and supplemented, imports are subject to obligatory domiciliation at an authorized intermediary bank, which an importer must establish by submitting to an authorized bank a commercial contract or pro forma invoice.

Preshipment inspection Yes.

Letters of credit No. All universal methods of payment are permitted.

Import licenses used as exchange licenses No.

Other No. An insurance certificate is not required for import operations. However, a resident importer wishing to take out insurance for the importation of goods may do so only from an authorized company in Algeria.

Import licenses and other nontariff measures No.
Licenses with quotas No.

Other nontariff measures No.

Import taxes and/or tariffs Yes. Bank domiciliation tax and customs duties on import operations apply. As of January 1, 2020, the fiscal taxes applicable to the direct debit of import operations are as follows: 0.5% of the amount of the import for goods or merchandise intended for resale in the state; 1% for complete knocked down (CKD)/semi knocked down (SKD) imports; and 4% for imports of services.

Taxes collected through the exchange system No.

State import monopoly No.

Exports and Export Proceeds

Repatriation requirements Yes. For proceeds from exports of hydrocarbons and mineral products, the repatriation period is 30 days, which may be exceptionally extended to 90 days. For proceeds from other exports, the repatriation period is 180 days, with the possibility of an extension to 360 days if the exporter takes out export credit insurance.

Surrender requirements Yes.

Surrender to the central bank Yes. All export proceeds from hydrocarbons and mineral products must be surrendered to the BA.

Surrender to authorized dealers No. Exporters may keep all foreign exchange generated by their exports of products other than hydrocarbons and mineral products. Surrender to ADs is optional effective June 29, 2021. Previously, 50% of revenues from exports of products other than hydrocarbons and mineral products had to be surrendered to authorized intermediary banks at the time of repatriation.

Financing requirements No.

Documentation requirements Yes. All universal methods of payment are permitted.

Letters of credit No.

Guarantees No.

Domiciliation Yes. Apart from the exceptions specified in Articles 33 and 58 of the CMC Regulation No. 07-01 of February 3, 2007, as amended and supplemented, as well as Article 2 of the CMC Regulation No. 2021-01 of March 28, 2021, amending and supplementing CMC Regulation No. 07-01, domiciliation of an export transaction must be done with an authorized intermediary bank prior to the shipment of the merchandise and the repatriation of the export proceeds. Effective June 29, 2021, domiciliation of export operations of fresh products, perishable, and dangerous products may be done within 15 working days (previously 5 days) following the date of customs clearance and shipment of the goods.

Preshipment inspection Yes. Inspection is carried out by customs staff.

Other No.

Export licenses No.

Without quotas No.

With quotas No.
Export taxes  Yes.
Collected through the exchange system  No.
Other export taxes  Yes.  There are customs duties.

Payments for Invisible Transactions and Current Transfers

Controls on these transfers  Yes.
Trade-related payments  No.
Prior approval  No.
Quantitative limits  No.
Indicative limits/bona fide test  No.
Investment-related payments  Yes.
Prior approval  Yes.  Prior authorization from the CMC is required for foreign investments to be made by resident economic operators. For other investment-related payments, no authorization is required.
Quantitative limits  No.
Payments for travel  Yes.
Prior approval  Yes.  Bona fide requests for amounts in excess of all established limits are authorized by the BA on a case-by-case basis.
Quantitative limits  No.
Indicative limits/bona fide test  Yes.  The indicative limit for tourism travel is DA 15,000 a person a year. For business travel, the per diem and flat travel allowances, respectively, are as follows: (1) DA 16,000 and DA 10,000 for senior executives; (2) DA 12,000 and DA 8,000 for middle managers; and (3) DA 10,000 and DA 6,000 for technical staff. Bona fide requests for amounts in excess of established limits are authorized by the BA on a case-by-case basis.
Personal payments  Yes.
Prior approval  Yes.  Transfers of alimony payments are permitted, provided the arrangement was authorized by an Algerian court and is enforceable in Algeria.
Quantitative limits  No.
Indicative limits/bona fide test  Yes.  The allocation for medical expenses is limited to the equivalent of DA 120,000 per calendar year in accordance with Article 3 of Instruction No. 10-96 of December 19, 1996. The allocation for studies abroad is DA 9,000 a month from September 1 to June 30 of the school year.
Foreign workers' wages  Yes.

**Proceeds from Invisible Transactions and Current Transfers**

**Repatriation requirements**

Yes. The repatriation requirement applies to proceeds from exports of services. This period is identical to that of goods other than hydrocarbons, that is, 180 days with the possibility of an extension to 360 days if the exporter takes out export credit insurance.

Surrender requirements

No.

**Surrender to the central bank**

No.

**Surrender to authorized dealers**

No. Exporters may keep all foreign exchange generated by their exports. Surrender to ADs is optional effective June 29, 2021. Previously, 50% of revenues from exports of services had to be surrendered to authorized intermediary banks at the time of repatriation.

**Restrictions on use of funds**

No.

**Capital Transactions**

**Controls on capital transactions**

Yes.

**Repatriation requirements**

Yes. The proceeds from capital transactions must be repatriated to Algeria as soon as the transactions are carried out.

**Surrender requirements**

Yes.

**Surrender to the central bank**

Yes. Residents are required to surrender to the BA all foreign exchange proceeds from capital transactions abroad. Bilateral, multilateral, or official borrowings to finance the balance of payments must be surrendered to the BA. The surrender occurs on the repatriation of funds.

**Surrender to authorized dealers**

No.

**Controls on capital and money market instruments**

Yes.

**On capital market securities**

Yes.

**Shares or other securities of a participating nature**

Yes.

**Purchase locally by nonresidents**

No. Nonresidents may invest in shares or other investment securities.
Transfers abroad of proceeds from the sale of these investments on the stock exchange or of the revenue generated by these investments are allowed, as long as they are conducted through an authorized intermediary.

**Sale or issue locally by nonresidents** Yes. Nonresidents are not authorized to issue securities on the domestic market.

**Purchase abroad by residents** Yes. Authorization from the CMC is required, and the purchase must involve more than 10% of the voting shares (Regulation No. 14-04 of September 29, 2014).

**Sale or issue abroad by residents** Yes. The sale or issuance of securities abroad by residents is not permitted.

**Bonds or other debt securities** Yes.

**Purchase locally by nonresidents** No. Nonresidents may invest in securities. Transfers abroad of proceeds from the sale of these investments on the stock exchange or of the revenue generated by these investments are allowed, as long as they are conducted through an authorized intermediary. There is no minimum holding period for such bonds.

**Sale or issue locally by nonresidents** Yes. Nonresidents are not authorized to issue securities on the domestic market.

**Purchase abroad by residents** Yes. Investment abroad by residents in debt securities is not authorized.

**Sale or issue abroad by residents** Yes. These transactions are prohibited.

**On money market instruments** Yes.

**Purchase locally by nonresidents** Yes. Purchases of money market instruments by nonresidents are not regulated; these transactions are not authorized.

**Sale or issue locally by nonresidents** Yes. Nonresidents are not authorized to issue or sell securities on the domestic market.

**Purchase abroad by residents** Yes. Investment abroad by residents in money market instruments is not authorized.

**Sale or issue abroad by residents** Yes. The sale or issuance of debt securities abroad by residents is prohibited.

**On collective investment securities** Yes.

**Purchase locally by nonresidents** Yes. There are no exchange controls on collective investment securities and other collective saving instruments. Institutions providing these types of securities do not exist in Algeria.

In addition to the fact that collective investment securities do not exist in Algeria, the investment of foreigners’ portfolios in Algeria is not authorized.

**Sale or issue locally by nonresidents** Yes. Nonresidents are not authorized to issue securities on the domestic market.

**Purchase abroad by residents** Yes. These transactions are prohibited.

**Sale or issue abroad by residents** Yes. These transactions are not authorized.

**Controls on derivatives and other instruments** Yes. There is no market for derivatives. Purchases and sales of these products by residents and nonresidents domestically or abroad are not subject to exchange controls.

There is one exception pertaining to foreign exchange risk hedging instruments (swap, forward contracts, etc.) traded on the Algerian foreign exchange interbank market.

**Purchase locally by nonresidents** No.

Gifts, endowments, inheritances, and legacies

- By residents to nonresidents: Yes. Authorization is required for transfers of inheritances. Gifts and endowments may be transferred without authorization.
- To residents from nonresidents: Yes. These transactions require authorization by the relevant government agency for grants.

Settlement of debts abroad by immigrants

- Yes. These operations are not authorized.

Transfer of assets

- Yes. The use of foreign currency assets by emigrants is unrestricted. Transfers of assets in dinars are subject to authorization.

Transfer abroad by emigrants

- Yes. There are no limits or restrictions on these operations.

Transfer into the country by immigrants

- No. There are no limits or restrictions on these operations.

Transfer of gambling and prize earnings

- Yes. These operations are not authorized.

Provisions Specific to the Financial Sector

Provisions specific to commercial banks and other credit institutions

- Yes. Borrowing abroad is not permitted.

Borrowing abroad

- Yes. Only reciprocal accounts are permitted.

Maintenance of accounts abroad

- Yes. Banks and financial institutions are not authorized to lend to nonresidents.

Lending to nonresidents (financial or commercial credits)

- Yes. This type of transaction is not authorized.

Lending locally in foreign exchange

- Yes. The issuance of securities denominated in foreign exchange is not authorized.

Purchase of locally issued securities denominated in foreign exchange

- Yes. Foreign exchange accounts may be opened freely with authorized intermediary banks.

Differential treatment of deposit accounts in foreign exchange

- Yes. Reserve requirements apply only to dinar deposits.

Reserve requirements

- No.

Interest rate controls

- Yes. The BA determines the interest rates, and commercial banks manage these accounts on its behalf.

Credit controls

- No.

Differential treatment of deposit accounts held by nonresidents

- No.

Reserve requirements

- No.

Liquid asset requirements

- No.

Interest rate controls

- No.

Credit controls

- No.

Investment regulations

- Yes.

Abroad by banks

- Yes. Banks and financial institutions may transfer capital abroad to finance foreign activities that are complementary to those undertaken in Algeria, subject to authorization from the CMC.

In banks by nonresidents

- Yes. Investments by nonresidents in local banks are permitted under the investment law, provided they are authorized by the CMC.

Open foreign exchange position limits

- Yes.
**On resident assets and liabilities**

Yes. Authorized financial institutions may have open foreign exchange positions up to (1) 10% of their regulatory capital for any individual currency (short or long positions, whichever is higher) and (2) 30% of regulatory capital for all currencies combined (short or long positions, whichever is higher).

**On nonresident assets and liabilities**

Yes. Authorized financial institutions may have open foreign exchange positions up to (1) 10% of their regulatory capital for any individual currency (short or long positions, whichever is higher) and (2) 30% of regulatory capital for all currencies combined (short or long positions, whichever is higher).

**Provisions specific to institutional investors**

Yes. There are no specific exchange control provisions applicable to institutional investors. Reinsurance operations, which are equated with purchases of services, are authorized, provided a minimum number of these services are purchased from local reinsurance agencies. Investments by nonresidents in insurance activities are subject to authorization by the Insurance Supervision Commission, the regulatory authority for the insurance sector.

**Limits (max.) on securities issued by nonresidents**

Yes.

**Limits (max.) on investment portfolio held abroad**

Yes. FDI by insurance companies is governed by the same rules that apply to other companies: outward transfers of capital are authorized for financing activities abroad that are complementary to the company’s production of goods and services in Algeria. The CMC determines the applicable conditions and grants authorization under these conditions (Article 126 of the Law on Money and Credit). Under Article 8 of Regulation No. 07-01, residents are not allowed to hold monetary, financial, or real estate assets abroad, except with the approval of the CMC.

**Limits (min.) on investment portfolio held locally**

No.

**Currency-matching regulations on assets/liabilities composition**

No.

**Pension funds**

Yes. There are no private pension funds in Algeria. Public pension funds may invest only in domestic securities. Outward transfers of capital to finance the investment of pension funds abroad are authorized only if these investments are supplementary to the pension fund’s activities in Algeria and approved by the currency board.

**Limits (max.) on securities issued by nonresidents**

Yes. There are no private pension funds in Algeria. Public pension funds may invest only in domestic securities. Outward transfers of capital to finance the investment of pension funds abroad are authorized only if these investments are supplementary to the pension fund’s activities in Algeria and approved by the currency board.

**Limits (max.) on investment portfolio held abroad**

Yes. There are no private pension funds in Algeria. Public pension funds may invest only in domestic securities. Outward transfers of capital to finance the investment of pension funds abroad are authorized only if these investments are supplementary to the pension fund’s activities in Algeria and approved by the currency board.

**Limits (min.) on investment portfolio held locally**

Yes. There are no private pension funds in Algeria. Public pension funds may invest only in domestic securities. Outward transfers of capital to finance the investment of pension funds abroad are authorized only if these investments are supplementary to the pension fund’s activities in Algeria and approved by the currency board.

**Currency-matching regulations on assets/liabilities composition**

Yes. These funds have no foreign currency liabilities or assets.

**Investment firms and collective investment funds**

Yes. There are no exchange control provisions specific to investment firms and collective investment funds. Collective investment funds...
are not yet subject to exchange controls in Algeria.

There are no exchange control provisions specific to investment firms and collective investment funds. Collective investment funds are not yet subject to exchange controls in Algeria.

Crawl-like arrangement

01/01/2021
The de facto exchange rate arrangement was reclassified to crawl-like from stabilized, effective December 4, 2020. The change is reflected as of January 1, 2021, corresponding to the first day of the period covered in this year’s Annual Report on Exchange Arrangements and Exchange Restrictions.

Resident Accounts

Foreign exchange accounts permitted
Held domestically

06/29/2021
Merchants and non-trading professionals may open foreign exchange accounts designated as a “merchant foreign exchange account” or a “nontrading professional foreign exchange account,” respectively, without authorization. The use of these accounts is subject to a specific regulation, specified in the Bank of Algeria Instruction No. 06-2021 of June 29, 2021, which specifies the transactions allowed to be credited and debited from these accounts. The balance of the foreign exchange account for merchants and non-merchants may only be transferred abroad to pay for the import of goods and services or to pay expenses related to the account holder’s activity.

01/02/2022
Assets in merchant and exporter foreign currency accounts may not be the subject of a term deposit, and do not give rise to any remuneration. The foreign currency deposits of individuals are remunerated at the investment rate set by the Bank of Algeria.

01/02/2022
The maximum duration of a term deposit is set to 12 months.

Imports and Import Payments

Financing requirements for imports
Advance import deposits

07/28/2022
An advance deposit of at least 120% of the value of imports of goods for resale in an unaltered state is no longer required. Previously, such a deposit was required at least 30 days before the merchandise was shipped.

Exports and Export Proceeds

Repatriation requirements
Surrender requirements

Surrender to authorized dealers
06/29/2021
Surrender to ADs of foreign exchange generated by exports of products other than hydrocarbons and mineral products is optional. Previously, 50% of revenues from exports of services had to be surrendered to authorized intermediary banks at the time of
repatriation.

Domiciliation of export operations of fresh products, perishable, and dangerous products may be done within 15 working days (previously 5 days) following the date of customs clearance and shipment of the goods.

**Proceeds from Invisible Transactions and Current Transfers**

**Repatriation requirements**

Surrender requirements

*Surrender to authorized dealers* 06/29/2021

Surrender of foreign exchange to ADs is optional. Previously, 50% of revenues from exports of services had to be surrendered to authorized intermediary banks at the time of repatriation.

**Capital Transactions**

**Controls on capital transactions**

Controls on direct investment

*Inward direct investment* 01/01/2022

FDI in the production of goods and services is authorized without the obligation of association with a local partner.

**Classification**

| No separate legal tender                     | Yes. |

The exchange rate arrangement is an exchange arrangement with no separate legal tender. The euro is legal tender.

On June 30, 2011, the Principality of Andorra signed a Monetary Agreement with the EU which was deposited with the European Commission in Brussels on February 23, 2012, and came into force April 1, 2012.

The Monetary Agreement between the Principality of Andorra and the EU recognizes the euro as the official legal tender of the Principality and grants the right to coinage.

The Regulation developing Law No. 17/2013 of October 10, 2013, on the introduction of the euro within the framework of the Monetary Agreement signed between Principality of Andorra and the EU, was approved on December 17, 2014, and came into force January 28, 2015.

To carry out activities related to the foreign exchange market derived from certain banking and financial activities, Law No. 17/2013 requires to obtain a banking license. As of December 31, 2021, there were 5 commercial banks in Andorra. In addition, Article 21(d) of Law No. 17/2013 establishes that other financial entities, such as financial investment companies and financial investment agencies, may carry out ancillary services, including currency exchange services, when related to the supply of investment services.

No foreign exchange bureaus are authorized.

The system is broker based, that is, any bank or financial entity authorized for exchange intermediation may trade currencies for its own account or on behalf of its clients. The main source of foreign exchange for banks and their customers is the interbank market.

As of December 31, 2021, 5 commercial banks participate in the interbank market. The Andorran Financial Authority (AFA) has the competence to grant licenses to banking entities. There are neither rules nor limitations imposed by the authorities for banks and financial entities concerning exchange rates, bid/ask.
spreads, fees/commissions that banks may set and apply in their foreign exchange transactions with customers and other counterparties.

Over the counter: No.

Brokerage: Yes. The system is broker based, that is, any bank or financial entity authorized for exchange intermediation may trade currencies for its own account or on behalf of its clients.

Market making: No.

Resident Accounts

Foreign exchange accounts permitted  Yes.

Held domestically  Yes. Residents of Andorra can freely open foreign exchange accounts with local banks, and there are no limitations on the use of such accounts/their transactions, including transfers abroad. However, limitations are established by the anti-money laundering (AML) national regulations, as well as by the internal AML policies and procedures of each particular bank regarding what is considered or not an acceptable customer/transaction, as well as other established internal requirements and controls, such as prior authorizations from Senior Management or the Internal Control and Communication Body to be able to accept a specific client or carry out a transaction, always subject to the level of risk assigned the profile and knowledge of the customer and/or the transaction, as well as the origin of the funds.

Approval required  No.

Held abroad  Yes. Residents are allowed to open accounts abroad in both domestic and foreign currency without it being subject to governmental approval.

Approval required  No.

Accounts in domestic currency held abroad  Yes.

Accounts in domestic currency convertible into foreign currency  Yes.
Nonresident Accounts

Foreign exchange accounts permitted Yes. Nonresidents are permitted to open accounts in domestic and foreign currency without governmental approval being required. Nonresident accounts can be freely credited with the proceeds from current international transactions, and such amounts may be freely transferred abroad.

Nonresident accounts are considered high-risk accounts, which are subject to enhanced diligence measures, based on the provisions of current AML regulations. Examples of specific requirements for nonresidents are the following:

- Limitations linked to jurisdiction (both residence and nationality or development of its activity, for example), in accordance with the provisions of international lists such as the FATF or the EU, as well as the particular lists of each bank, consistent with the declared risk appetite; documentary requirements related to the traceability of the funds and their tax compliance; application of enhanced diligence measures and greater requirement and volume of supporting documentation for a better knowledge of the customer, beneficial owner, and operational profile; specific risk assessment of each entity (which may limit business relationships with certain nonresident clients, such as foreign Politically Exposed Persons (PEPs)).

Approval required No.

Domestic currency accounts Yes.

Convertible into foreign currency Yes.

Approval required No.

Blocked accounts Yes. Taking into account Andorra’s AML legal framework abides with the UN sanction program, there could be frozen or blocked bank accounts.

Imports and Import Payments

Foreign exchange budget No.

Financing requirements for imports No.

Minimum financing requirements No.

Advance payment requirements No.

Advance import deposits No.

**Changes during 2021 and 2022**

No significant changes occurred in the exchange and trade system.
ANGOLA

(Position as of July 31, 2022)

Status under IMF Articles of Agreement

Date of membership
September 19, 1989.

Article VIII
Yes.

Article XIV
Yes.

Exchange Measures

Restrictions and/or multiple currency practices
Yes.

The IMF staff report for the 2021 Article IV Consultation and Sixth Review under the Extended Arrangement of the Extended Fund Facility and Request for a Waiver of Nonobservance of a Performance Criterion with Angola states that, as of December 7, 2021, Angola maintained two MCPs that are subject to approval under Article VIII, Section 3, that arise from the lack of a mechanism to prevent potential spreads in excess of 2% emerging (1) between successful bids within the National Bank of Angola’s (Banco Nacional de Angola – BNA’s) foreign exchange auction and (2) for transactions that take place at the reference rate in place and the rate at which transactions take place in the foreign exchange auction on that day remain. Angola maintains restrictions on the making of payments and transfers for current international transactions under the transitional arrangements of Article XIV, Section 2. The measures maintained pursuant to Article XIV are (1) limits on the availability of foreign exchange for invisible transactions, that is travel expenses and (2) limits on unrequited transfers to foreign-based individuals and institutions. Exchange restrictions subject to IMF jurisdiction under Article VIII, Section 2(a) were removed, specifically (1) the discriminatory application of the 0.1% stamp tax on foreign exchange operations by natural persons, (2) the operation of the priority list for access to US dollars at the official exchange rate, and (3) a special tax of 10% on transfers to nonresidents under contracts of foreign technical assistance or management services. The MCP subject to approval under Article VIII, Section 3, arising from the discriminatory application of the 0.1% stamp tax on foreign exchange operations by natural persons was also removed. (Country Report No. 22/11)

Exchange measures imposed for security reasons
No.

In accordance with IMF Executive Board Decision No. 144-(52/51)
No.

Other security restrictions
No.

Exchange Arrangement

Currency
Yes. The currency of Angola is the Angolan kwanza.

Other legal tender
No.

Exchange rate structure
Unitary
The exchange rate structure is considered multiple owing to the lack of a mechanism to prevent potential spreads in excess of 2% emerging (1) between successful bids within the BNA foreign exchange auction; and (2) for transactions that take place at the prevailing reference rate and the rate at which transactions take place in the foreign exchange auction on that day. The BNA publishes a reference exchange rate daily; and, since April 1, 2020, its portal has displayed the market exchange rates of the euro and the US dollar in relation to the kwanza. These exchange rates are calculated as the arithmetic mean of the bid and ask rates published on Bloomberg.

Classification

No separate legal tender
Currency board
Conventional peg
Stabilized arrangement
Crawling peg
Crawl-like arrangement
Pegged exchange rate within horizontal bands
Other managed arrangement

Floating

The de jure exchange rate arrangement is floating. However, the BNA closely monitors exchange rate variation with the aim of maintaining price stability in the economy; and it intervenes in the foreign exchange market by conducting currency auctions. The BNA sells foreign currency to the commercial banks. Companies and banks wishing to trade in foreign currency must transact through Bloomberg’s “FXGO” trading platform. The BNA may also limit the daily variations of the exchange rate by arbitrarily classifying certain bids. The BNA publishes the results of the auctions and the respective reference exchange rates on its website. In the Extraordinary Session of the MPC, the BNA decided to implement a floating exchange rate regime in which the exchange rate is freely defined by the market, that is, according to the demand and supply of foreign currency.

Owing to the rise in the price of oil and increased exports of liquefied natural gas (LNG), the trade balance improved substantially in 2021, thereby boosting foreign exchange inflows. This led to an increased supply of foreign exchange to the market by major players, such as the National Treasury and firms in the oil and diamond sectors. The exchange rate was thus determined by the demand for and supply of foreign currency, thereby playing its true role in correcting distortions and cushioning external shocks. The BNA has been largely out of the foreign exchange spot market in 2021. The de facto exchange rate arrangement is classified as floating.

Free floating

Official exchange rate

Yes. The BNA publishes a reference exchange rate daily; and, since April 1, 2020, its portal has displayed the market exchange rates of the euro and the US dollar in relation to the kwanza. These exchange rates are calculated as the arithmetic mean of the bid and ask rates published on Bloomberg.

Monetary policy framework

Exchange rate anchor

*U.S. dollar*

*Euro*

*Composite*

*Other*

Monetary aggregate target Yes. The BNA uses base money as its monetary policy anchor. The BNA’s operational target is reserve money, and its intermediate target is the money supply (M2). Under the operational framework, the BNA mainly uses the following instruments: open market operations and the reserve ratio, and the marginal lending; and liquidity absorption facilities. Although the regime remains focused on monetary aggregates, the use of the key interest rate (taxa diretora) serves as a complement to the signaling effect. The BNA does not use interest rate targets. The monetary policy interest rate was implemented at the first MPC meeting held on October 28, 2011.

**Exchange tax**  No.  Effective January 1, 2021, foreign exchange operations subject to a stamp duty of 0.1% was eliminated.

**Exchange subsidy**  No.

**Foreign exchange market**  Yes.

Spot exchange market  Yes.  Banks may trade freely in foreign exchange at rates established among themselves, with the public, and in secondary market operations. The market is liberalized. Foreign exchange bureaus must be licensed by the BNA and may deal in banknotes and traveler’s checks, at freely negotiable rates and provide remittance and cash collection services, with individuals, with institutions and nonfinancial entities authorized to engage in foreign exchange activities. As of December 31, 2021, about 67 licensed currency exchange bureaus were in operation; 47 of them are authorized to deal in banknotes and travelers checks, as well as to provide money remittance and acceptance services, while the other 20 are authorized to deal only in banknotes and travelers checks. Besides the exchange bureaus, there are also money transfer bureaus, which may send money abroad. These are mostly attached to commercial banks. There are currently about 13 such authorized money transfer bureaus in operation.

**Operated by the central bank**  Yes.

Foreign exchange standing facility  No.

Allocation  No.

Auction  Yes.  Free auctions are held on Bloomberg’s FXGO platform. The commission is set freely.

Fixing  No.

**Interbank market**  Yes.  Banks and exchange bureaus may deal in foreign exchange among themselves and with their customers at freely negotiated rates. All exchange bureaus may participate in the interbank market, but the volume is small because banks generally deal with their customers and/or with the BNA through buying and selling, as well as buying from oil and diamond companies.

Over the counter  Yes.  The interbank market is still in the early stages of development and
ANGOLA

Brokerage No. This does not currently take place.

Market making No. This does not currently take place.

Forward exchange market Yes. Commercial banks may contract forward exchange operations with their clients, legal entities, importers, exporters, oil and diamond companies and state entities for the hedging of the exchange risk related to specific and identified transactions for the import or export of goods. Forward exchange transactions must have a maximum term of 1 (one) year.

Official cover of forward operations No.

Arrangements for Payments and Receipts

Prescription of currency requirements Yes. Payments under contracts concluded with foreign exchange nonresidents may be made in any currency freely agreed on between the parties. However, the amount payable should be equivalent to the amount specified in the contract. Domestic payments are restricted to kwanza according to Law No. 2/12 of January 13.

Controls on the use of domestic currency Yes. The kwanza is not used in international payments.

For current transactions and payments Yes. The kwanza is not used in international payments.

For capital transactions Yes. The kwanza is not used in international payments.

Transactions in capital and money market instruments Yes. The kwanza is not used in international payments.

Transactions in derivatives and other instruments Yes. The kwanza is not used in international payments.

Credit operations Yes. The kwanza is not used in international payments.

Use of foreign exchange among residents Yes. The kwanza is currency of legal tender in Angola, and transactions in foreign exchange among residents are only permitted when not used for making any kind of payment.

Payments arrangements Yes.

Bilateral payments arrangements Yes.

Operative Yes. The arrangement in effect with China and Israel is based on oil as collateral. The arrangement with Brazil has been extinguished since February 14, 2020. There is a reciprocal acceptance agreement with Namibia, whereby commercial transactions at the border could be undertaken in domestic currency. This arrangement is currently under review.

Inoperative No. The Agreement with Namibia was terminated with the settlement of the debt that Angola had with Namibia, so there are no inoperative arrangements.

Regional arrangements No.

Clearing agreements No.

Barter agreements and open accounts No.

Administration of control Yes. The BNA is the exchange authority of the Republic of Angola.

Payments arrears Yes. Guidelines were defined to regularize arrears up to December 31, 2017.
Official

Yes. As part of the program with the IMF, the holders of public debt were circularized. This made it possible to clarify the status of amounts registered in the system as liabilities, from the 1980s and 1990s, owed to countries such as Portugal and others from Eastern Europe. In the latter case, the creditor has been identified and the debt regularization agreement has been initiated and is in the payment phase.

Private

Yes. Guidelines were defined to regularize arrears up to December 31, 2017.

**Controls on trade in gold (coins and/or bullion)**

Yes. Under the Foreign Exchange Law, the BNA has exclusive responsibility for controlling trade in monetary gold.

On domestic ownership and/or trade

Yes. Residents are permitted to hold and trade gold only in the form of jewelry. In 2014, the Gold Agency was created to execute, monitor, control, and manage gold sales and pricing policies. The Agency is also responsible for guaranteeing the purchase of gold on the artisanal market and reselling it on the domestic and international markets.

On external trade

Yes. Imports and exports of gold in the form of coins and bullion are subject to a BNA monopoly.

**Controls on exports and imports of banknotes**

Yes. Banks are permitted to import/export banknotes without authorization from the BNA.

On exports

Yes. Banks are authorized to export banknotes without authorization from the BNA.

**Domestic currency**

Yes. The BNA has exclusive authority for the issuance, storage, destruction, and putative export of domestic currency. Effective March 3, 2022, resident individuals may leave the country carrying national currency of a total amount equivalent to USD 10,000, except individuals under 18 years of age traveling unaccompanied may carry national currency equivalent to USD 1,000. Previously, resident travelers could carry up to Kz 50,000. Nonetheless, within the scope of their authority, the border authorities may prevent national currency from being taken out of the country, whenever the traveler carrying the currency is suspected of a criminal offense.

**Foreign currency**

Yes. Banks are authorized to import/export banknotes without authorization from the BNA. Effective March 3, 2022, residents may leave the country carrying foreign currency of a total amount equivalent to USD 10,000, except individuals under 18 years of age traveling unaccompanied may carry foreign currency equivalent to USD 1,000. Nonresidents may carry foreign currency on their way out of the country in a value equal to the currency with which they entered the country. Nonresidents carrying foreign currency equal to or greater than the equivalent of USD 10,000, is subject to proof of entry of that value in the country, by delivering a duplicate of the currency entry declaration to the customs services on exit.

**On imports**

Yes. Banks are permitted to import/export banknotes without authorization from the BNA.

**Domestic currency**

Yes. Domestic currency may be imported by the BNA, or by a bank with BNA authorization, resulting from the export of domestic currency by individuals traveling abroad. Effective March 3, 2022, residents and nonresidents, who carry national currency on entry into the country in a total value equal to or greater than the equivalent of USD 10,000 must mandatorily declare these amounts on entry by filling in a declaration form provided by the customs services.

**Foreign currency**

Yes. Commercial banks may import foreign currency in accordance with Notice No. 1/15 of January 29. Effective March 3, 2022, residents and nonresidents, who carry foreign currency on entry into the country in a total value equal to or greater than the equivalent of USD 10,000 must mandatorily declare these amounts on entry by
filling in a declaration form provided by the customs services.

**Resident Accounts**

These accounts may be credited with foreign currency imported from abroad and with the accrued interest. They may be debited for sales of foreign currency, payments to residents in domestic currency, foreign currency expenditures abroad, interbank transfers to resident entities belonging to the same group, the use of international credit and debit cards, and/or the repatriation of amounts authorized by the BNA.

Before 2009, nonresidents could open two types of domestic currency accounts: type A and type B. Type A accounts were credited with the proceeds from the sale of resources from foreign exchange accounts and, with BNA authorization, with receipts from nonresidents’ activities in Angola. These accounts were debited for payments of local expenses and against the purchase of foreign currency to be deposited in a foreign exchange account held by the same entity. Type B accounts were credited only with receipts from...
nonresidents’ activities in Angola (when authorized by the BNA) and were debited for payments of local expenses. These types of accounts were canceled pursuant to Notice No. 03/09 of June 5. The balance on type A accounts was converted and transferred to the foreign exchange accounts of nonresidents. Type B accounts were reclassified as domestic currency accounts for nonresidents.

Convertible into foreign currency: No.
Approval required: Yes. For nonresidents, BNA approval is not required to open an account in domestic currency.
Blocked accounts: No. The terms and conditions are defined in Notice No. 02/17 of February 3.

Imports and Import Payments

Foreign exchange budget: No. There are no regulations in this area.
Financing requirements for imports: No. There are no regulations in this area.
Minimum financing requirements: No.
Advance payment requirements: No.
Advance import deposits: No.
Documentation requirements for release of foreign exchange for imports: Yes. Prior to any foreign exchange operation involving an import, export, or reexport, banks must verify the nature, economic rationale, and legitimacy of the resident importer or exporter for foreign exchange purposes, in accordance with the obligations of identification and due diligence set out in the tax legislation and in the Anti-Money Laundering/Combating the Financing of Terrorism (AML/CFT) legislation. Banks must also verify that the foreign exchange operation complies with the applicable legislation and should request all the necessary documentation to confirm this. The documentation required will also depend on the type of payment. Under the terms of the Notice, there are four payment mechanisms: documentary credit, advance payment, remittance, and documentary collection. To improve the competitiveness of the economy and expedite the import process, a “Simplified Regime” was approved, in which companies do not have to submit the documentation supporting import operations to the banks, but instead are required to submit to the BNA, through commercial banks, certain documents such as audited financial statements for the last three fiscal years and letters of engagement from the management administration/body.

Domiciliation requirements: No.
Preshipment inspection: No. Preshipment inspection is optional, pursuant to Presidential Decree No. 63/13 of June 11, which repeals Articles 10, 11, and 12 of Council of Ministers Decree No. 41/06 of June 17.
Letters of credit: Yes. This is one of the payment methods allowed by the law and can take the form of advance payment or post-payment.
Import licenses used as exchange licenses: No.
Other: No.
Import licenses and other nontariff measures: Yes. Only three types of transactions do not require import licenses: Imported goods valued at US$5,000 or less. Goods imported as luggage. Other goods as specified in Presidential Decree No. 126-20 of May 5. Import licensing restrictions on a basket of 54 basic goods have been
in place since 2019 to discourage imports, with the aim of fostering domestic production of the goods that Angola is capable of producing.

</table>
companies in the oil sector may retain export proceeds in foreign accounts for the deposit of balances after payment of current expenses, profits and dividends, incentives and other capital remuneration, and the amortization of investments. The BNA issued a regulation (No. 7/2014) reversing the previous decision that allowed foreign companies in the oil sector to retain export proceeds in foreign accounts for deposit of balances after payment of current expenses, profits and dividends, incentives and other capital remuneration, and the amount of investment amortization.

*Surrender to the central bank* Yes. Tax payments by oil companies must be surrendered to the BNA from deposits on account with banks in Angola. The BNA issued a regulation (No. 7/2014) reversing the previous decision that allowed foreign companies in the oil sector to retain export proceeds in foreign accounts for the deposit of balances after payment of current expenses, profits and dividends, incentives and other capital remuneration, and the amount of investment amortization.

*Surrender to authorized dealers* Yes. Foreign exchange earnings deriving from each export operation must be deposited in full in a foreign currency bank account held by the exporter. In addition, the funds must be converted to kwanzas to make payments to resident entities. Diamond enterprises may retain export revenue in local bank accounts to make payments for imports of goods and services. With authorization from the BNA, they may also retain some of their earnings abroad in escrow accounts to guarantee loans obtained abroad.

**Financing requirements** No.

**Documentation requirements** Yes.

Letters of credit Yes. This is one of the payment mechanisms provided in the regulatory texts.

*Guarantees* No.

*Domiciliation* Yes. Banks must create an individual file for each merchandise import and export operation, containing all of the relevant documents. These must be kept on file pursuant to the provisions of the Basic Law of Financial Institutions.

*Preshipment inspection* No.

*Other* No.

**Export licenses** Yes.

*Without quotas* Yes. Goods exports must be licensed by the Ministry of Commerce through the Integrated Foreign Trade System. Exports of cultural artifacts are prohibited. Special export regimes apply to aircraft, animals and animal products, works of art, and petroleum. According to the preliminary instruction of the customs tariff currently in force, the items listed in cultural artifacts may not be exported; it should be noted that exports of the other products (aircraft, weapons and ammunition, live animals) are governed by a special export regime that requires authorization from the competent bodies.

*With quotas* No.

**Export taxes** Yes.

*Collected through the exchange system* No.

*Other export taxes* Yes. The tax system comprises six rates: 1%, 2%, 3%, 4%, 5%, and 10%.

©International Monetary Fund. Not for Redistribution
Effective April 14, 2021, foreign exchange resident individuals over the age of 18 may purchase foreign currency or use their own foreign currency funds, for any purposes abroad, including investments, and personal and family expenses, up to a cumulative amount equivalent to USD 250,000.00 a calendar year, irrespective of the payment instrument used.

The BNA may authorize, on an exceptional basis, duly justified requests for transfers of amounts exceeding the limit of USD 250,000. For this purpose, the interested parties should justify the request through a bank for prior review and subsequent submission to the BNA for decision.

Previously, for persons over 18 years of age, the annual limit for their travel operations was Kz 25 million and it was Kz 6 million for those under 18 years of age. For transfers related to individual maintenance, the annual limit was Kz 12 million.

Operations in connection with health and education are not subject to any limits when carried out directly with health or education institutions.

Effective April 14, 2021, the operations covered by Notice 05/21 are exempt from licensing by the BNA, but they must be registered. As per Notice 05/21, non-foreign currency resident workers who engage in a paid activity in the country must open a nonresident currency account in a bank based in Angola, in which their income should be domiciled. In the foreign currency purchase operations related to non-foreign currency resident workers’ wages the bank in question must check that the amounts the employee intends to transfer are consistent with the income earned under the employment contract.

Previously, under Notice No. 13/13 of August 6, 2013, prior approval was required for transfers in connection with agreements having an annual value of Kz 300 million or more, or the equivalent in another currency, when the principals were enterprises that provide services to the oil sector, as well as service agreements exceeding Kz 100 million or the equivalent in another currency.

The limits apply to each customer and to all cards belonging to the same cardholder. In defining the credit card limit and its use, domestic commercial banks must also ensure compliance with the annual cumulative limit, effective April 14, 2021, USD 250,000, set for foreign exchange transactions for individuals. Moreover, the decision to issue a credit card and the definition of its limit must be based on the customer’s credit risk assessment.

Previously, the annual limits on the use of payment cards abroad, per type of card and in kwanzas, are as follows: Kz 10 million for credit cards, Kz 6 million for debit cards, and Kz 6 million for prepaid cards.
### Indicative limits/bona fide test

|                  | No. | It is the responsibility of the issuing financial institutions, according to their risk analysis, to define and enforce credit limits for individual cardholders. |

### Other payments

|                  | Yes. |

### Prior approval

|                  | No. |

### Quantitative limits

|                  | Yes. | Effective April 14, 2021, foreign exchange resident individuals over the age of 18 may purchase foreign currency or use their own foreign currency funds, for any purposes abroad, including investments, and personal and family expenses, up to a cumulative amount equivalent to USD 250,000.00 a calendar year, irrespective of the payment instrument used. The BNA may authorize, on an exceptional basis, duly justified requests for transfers of amounts exceeding the limit of USD 250,000. For this purpose, the interested parties should justify the request through a bank for prior review and subsequent submission to the BNA for decision. |

### Indicative limits/bona fide test

|                  | No. |

## Proceeds from Invisible Transactions and Current Transfers

### Repatriation requirements

|                  | Yes. | All foreign currency income resulting from services rendered by foreign exchange residents to foreign exchange nonresidents, even if received by their representatives abroad in the case of revenue from hotel, tourism or any other activities, must be deposited in a foreign currency bank account, held by the foreign exchange resident entity, at a bank domiciled in the country. |

### Surrender requirements

|                  | n.r. |

### Surrender to the central bank

|                  | n.r. |

### Surrender to authorized dealers

|                  | n.r. |

### Restrictions on use of funds

|                  | No. |

## Capital Transactions

### Controls on capital transactions

|                  | Yes. | Only the purchase of public debt securities by nonresidents and capital transactions of USD 250,000.00 or more by individuals require prior licensing by the BNA. Previously, all capital transactions were subject to prior licensing by the BNA, except those related to transfers of profits and dividends, incentives and other types of return on capital, and the amount of investment amortization of foreign corporate investors in the oil sector. Capital transactions must be conducted through banks, which must submit them to the BNA for approval and issuance of a capital import (LIC) or export (LEC) license. |

### Repatriation requirements

|                  | Yes. | Effective July 5, 2022, distributed profits or dividends, as well as the amount of disinvestment arising from investments made abroad by foreign resident legal entities, must be repatriated to an account domiciled in a commercial bank headquartered in the country, within 60 days from the date of payment thereof. |

### Surrender requirements

|                  | n.r. |

### Surrender to the central bank

|                  | n.r. |

### Surrender to authorized dealers

|                  | n.r. |

Derivative instruments are supervised by the Capital Markets Commission (CMC), under the terms of Article 2(e) and Article 17 (b), both of Law 22/15 of August 31 – Approving the Securities Code (CódVM). Currently, two types of derivatives are traded: foreign currency swaps and foreign exchange forwards. Pursuant to Article 18.1 of Regulation 3/15, counterparties must report the details of all derivative contracts they have entered into, as well as any modification or termination of such contracts, to a transaction repository registered with the CMC. In the absence of a repository they must be reported to the CMC.

Investments in derivative instruments, by foreign exchange nonresidents, require prior licensing by the BNA, with exceptions.

Effective April 14, 2021, foreign exchange resident individuals over the age of 18 may purchase foreign currency or use their own foreign currency funds, for any purposes abroad, including investments, up to a cumulative amount equivalent to USD 250,000.00 a calendar year, irrespective of the payment instrument used. Amounts greater than USD 250,000 require prior approval from the BNA.

These operations do not require prior BNA licensing but must be registered. There is no foreign exchange commitment on the part of the BNA.

Supplier credits must be reported to the BNA for statistical purposes.

Supplier credits do not require licensing, but must be reported to the BNA for statistical purposes.

Financial credit operations are subject to prior BNA licensing.

BNA approval and authorization are required.

BNA approval and authorization are required.

Pursuant to Article 63 of Law No. 14/15 of August 11, Private Investment Law, the government must regulate outward investment by residents.

Effective April 14, 2021, foreign exchange resident individuals over the age of 18 may purchase foreign currency or use their own foreign currency funds, for any purposes abroad, including investments, up to a cumulative amount equivalent to USD 250,000.00 a calendar year, irrespective of the payment instrument used. Amounts greater than USD 250,000 require prior approval from the BNA.

Foreign investment is subject to the provisions of the Private Investment Law. Pursuant to Article 63 of Law No. 14/15 of August 11, Private Investment Law, the government must regulate outward investment by residents.
Investment Law as well as to foreign exchange laws and regulations, implemented by APIEX (Angolan Agency for the Promotion of Investment and Exports). Special laws regulate investment in certain areas, including (1) oil and mineral exploration and (2) financial institutions. Foreign investment is prohibited in the following sectors: (1) defense, domestic public order, and state security; (2) central banking and currency issuance; and (3) other areas reserved for the government.

**Controls on liquidation of direct investment**

No. Foreign investors are guaranteed the right to transfer abroad the proceeds of the sale of investments, including capital gains and amounts owed to them after the payment of taxes due.

**Transfer of assets**

Yes.

**Transfer abroad by emigrants**

Yes.

**Transfer into the country by immigrants**

No.

**Transfer of gambling and prize earnings**

Yes.
## Provisions Specific to the Financial Sector

<table>
<thead>
<tr>
<th>Provisions specific to commercial banks and other credit institutions</th>
<th>Yes.</th>
<th>Strict requirement of mandatory compliance with the Law of the BNA, the Foreign Exchange Law, and the Law on the Basis of Financial Institutions has to be adhered to by commercial banks and other credit institutions. Law No. 16/10 of June 15, Law No. 05/97 of June 27, and Law No. 12/15 of June 17.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Borrowing abroad</td>
<td>Yes.</td>
<td>Not all transactions are subject to licensing.</td>
</tr>
<tr>
<td>Maintenance of accounts abroad</td>
<td>Yes.</td>
<td></td>
</tr>
<tr>
<td>Lending to nonresidents (financial or commercial credits)</td>
<td>No.</td>
<td></td>
</tr>
<tr>
<td>Lending locally in foreign exchange</td>
<td>Yes.</td>
<td>Since January 1, 2015, institutions have been prohibited from engaging in credit operations in the country for disbursement in foreign exchange with any terms and for any purposes, except for credit operations transferred to the Angolan government, to exporters, and to exporters holding revenue in foreign exchange. Loans cannot be issued with capital indexed to a foreign currency. For reasons of de-dollarization of the economy and the elimination of exchange rate risk in operations where the source of income is in local currency.</td>
</tr>
<tr>
<td>Purchase of locally issued securities denominated in foreign exchange</td>
<td>Yes.</td>
<td></td>
</tr>
<tr>
<td>Differential treatment of deposit accounts in foreign exchange</td>
<td>Yes.</td>
<td></td>
</tr>
<tr>
<td><strong>Reserve requirements</strong></td>
<td>Yes.</td>
<td>Effective May 31, 2022, the reserve ratio on deposits by private individuals and municipal administrations (local governments) in kwanzas was lowered from 22% to 19%. A specific reserve account has been set up for central government balances in the SPTR, to which all balances under this heading are deposited. The reserve ratio on deposits by private individuals and municipal administrations (local governments) in foreign exchange is 22%, and the reserve requirement on deposits of central governments in foreign exchange is set at 100%. The instruments eligible to comply with national currency required reserve are only balances relating to the daily closing of the deposit account open in the BNA on behalf of each bank financial institution. Instruments eligible to comply with required reserves in foreign currency are the following assets: • The balances of the foreign currency deposit account opened in the BNA on behalf of each financial institution and • 50% with obligations of the treasury in foreign currency belonging to the own portfolio registered in the SIGMA issued from 2015.</td>
</tr>
<tr>
<td><strong>Liquid asset requirements</strong></td>
<td>Yes.</td>
<td>Securities having shorter maturities are the most liquid.</td>
</tr>
<tr>
<td><strong>Interest rate controls</strong></td>
<td>Yes.</td>
<td>The following interest rate controls were implemented: (1) The total cost of credit granted by international payment cards at the annual nominal rate of interest and fees cannot exceed 7.5%. (2) Banks may apply fixed or variable interest rates, and the latter must be indexed to the Luibor less a margin, although it should be ensured at all times that the total cost of credit granted does not exceed 7.5% an annum. The Luibor rate to be applied should correspond to the periodicity of the interest payments. Instruction No. 4/2019 on the Granting of Credit defines the following rules for credits unrelated to international payment cards: (1) Banks must apply differentiated interest rates to their customers, defined to reflect the specific risk rating of each operation,</td>
</tr>
</tbody>
</table>
determined based, inter alia, on the level of risk attributed to each customer, the features of the instrument, and the collateral provided.

(2) In the cases of loans with variable interest rates, banks should preferably use the indexing factor that is generally used for credit agreements in the currency in question, and a margin may be added to or subtracted from this factor to reflect the level of risk associated with each operation determined based on the factors referred to in Item 1.1 (a) of Instruction No. 4/2019.

(3) For credits denominated in domestic currency with variable interest rates, banks should preferably apply the Luibor as an indexing factor.

(4) The term of the indexing factor should correspond to the interest payment period.

### Differential treatment of deposit accounts held by nonresidents

No.

### Reserve requirements

No.

### Liquid asset requirements

No.

### Interest rate controls

No.

### Credit controls

No.

### Investment regulations

No.

Does not require approval from the BNA.

### Abroad by banks

No.

### In banks by nonresidents

No.

### Open foreign exchange position limits

Yes. There is a limit on the liquidity position in foreign exchange. The liquidity position is calculated taking into consideration only liquid foreign exchange assets and liabilities, excluding among others foreign exchange-indexed government bonds. The calculation must be carried in euros or euro equivalents. The commercial banks must submit daily reports on their foreign exchange liquidity position to the BNA and the net open position cannot exceed 10% of their capital. Banks have been required to sell their surplus foreign exchange positions pursuant to Notice No. 12/2018 of December 3, 2018.

### On resident assets and liabilities

Yes. Since May 18, 2009:

Article 1 (Foreign exchange residence):
(1) In accordance with Article 4 of Law No. 05/97 of June 27, the Foreign Exchange Law, and for purposes of this Notice, the following are considered residents of the national territory:
(a) Individuals having normal residence in the country. (b) Legal entities having headquarters in the country. (c) Branches, subsidiaries, offices, or any types of representation in the country of legal entities having headquarters abroad. (d) Administratively and financially autonomous funds, institutes, and public organizations with headquarters on the national territory. (e) National diplomatic citizens, consular representatives, or similar persons posted abroad as well as members of their families. (f) Individual nationals who spend periods exceeding 90 days and less than one year abroad to undertake studies or to serve in public office.

Since January 16, 2017:

Article 2 (General provisions):
(2) Individuals or legal entities resident for foreign exchange...
purposes intending to transfer into the country funds deposited with banks domiciled abroad may open and operate accounts in foreign exchange with banks domiciled in Angola as provided under Article 4 of this Notice.

(3) Individuals or legal entities resident for foreign exchange purposes may simultaneously maintain separate accounts denominated in foreign exchange under the terms defined in Article 4 of this Notice and in accordance with Notice No. 3/09 of June 5.

Since May 18, 2009:

Article 1 (Foreign exchange residence):

The following are considered nonresidents: (1) Individuals having normal residence abroad. (2) Legal entities having headquarters abroad. (3) Individuals who have emigrated. (4) Individuals who have been out of the country for more than one year. (5) Branches, subsidiaries, offices, or any type of representation abroad of legal entities having headquarters in Angola. (6) Diplomats, consular representatives, or similar persons operating on Angolan territory and members of their families.

Since January 16, 2017:

Article 2 (General provisions):

(1) Individuals and legal entities nonresident for foreign exchange purposes may hold and operate accounts in domestic and foreign currencies with banks domiciled in Angola, as provided under Articles 3 and 4 of this Notice.

Institutional investors are defined by Law No. 22/15 – Securities Code – of August 31, 2015, and by the CMC Rules, No. 1/15 of May 15.

Changes during 2021 and 2022

Exchange Arrangement

Exchange tax

Foreign exchange operations subject to a stamp duty of 0.1% was eliminated.

Arrangements for Payments and Receipts

Controls on exports and imports of banknotes

On exports

Domestic currency

03/03/2022

Resident individuals may leave the country carrying national currency of a total amount equivalent to USD 10,000, except individuals under 18 years of age traveling unaccompanied may carry national currency equivalent to USD 1,000. Previously, resident travelers could carry up to Kz 50,000. Nonetheless, within the scope of their authority, the border authorities may prevent national currency from being taken out of the country, whenever the traveler carrying the currency is suspected of a criminal offense.

Foreign currency

03/03/2022

Residents may leave the country carrying foreign currency of a total amount equivalent to USD 10,000, except individuals under 18 years of age traveling unaccompanied may carry foreign currency equivalent to USD 1,000. Nonresidents may carry foreign currency on their way out of the country in a value equal to the currency with which they entered the country. Nonresidents carrying foreign currency equal to or greater than the equivalent of USD 10,000, is subject to proof of entry of that value in the country, by delivering a duplicate of the currency entry declaration to the customs services on exit.

On imports

Domestic currency

03/03/2022

Residents and nonresidents, who carry national currency on entry into the country in a total value equal to or greater than the equivalent of USD 10,000 must mandatorily declare these amounts on entry by filling in a declaration form provided by the customs services.

Foreign currency

03/03/2022

Residents and nonresidents, who carry foreign currency on entry into the country in a total value equal to or greater than the equivalent of USD 10,000 must mandatorily declare these amounts on entry by filling in a declaration form provided by the customs services.

Exports and Export Proceeds

Repatriation requirements

04/14/2021

Foreign exchange earnings deriving from each export operation must be deposited in full (previously 50%) in a foreign currency bank account held by the exporter.

Payments for Invisible Transactions and Current Transfers

Controls on these transfers

Payments for travel

Quantitative limits

04/14/2021

Foreign exchange resident individuals over the age of 18 may purchase foreign currency or use their own foreign currency funds, for any purposes abroad, including investments, and personal and family expenses, up to a cumulative amount equivalent to USD 250,000.00 a calendar year, irrespective of the payment instrument used.

The National Bank of Angola (BNA) may authorize, on an exceptional basis, duly justified requests for transfers of amounts
exceeding the limit of USD 250,000. For this purpose, the interested parties should justify the request through a bank for prior review and subsequent submission to the BNA for decision.

Previously, the cumulative amount of operations for travel in a calendar year by resident individuals 18 and older could not exceed Kz 25 million when originated or made on behalf of the same person, regardless of the payment instrument used (credit card, bank transfer, cash, and foreign check). The cumulative amount of operations for personal travel expenses for resident individuals under 18 could not exceed Kz 6 million a calendar year.

### Personal payments

**Quantitative limits**  
04/14/2021

Foreign exchange resident individuals over the age of 18 may purchase foreign currency or use their own foreign currency funds, for any purposes abroad, including investments, and personal and family expenses, up to a cumulative amount equivalent to USD 250,000.00 a calendar year, irrespective of the payment instrument used.

The National Bank of Angola (BNA) may authorize, on an exceptional basis, duly justified requests for transfers of amounts exceeding the limit of USD 250,000. For this purpose, the interested parties should justify the request through a bank for prior review and subsequent submission to the BNA for decision.

Previously, for persons over 18 years of age, the annual limit for their travel operations was Kz 25 million and it was Kz 6 million for those under 18 years of age. For transfers related to individual maintenance, the annual limit was Kz 12 million.

### Foreign workers’ wages

**Prior approval**  
04/14/2021

The operations covered by Notice 05/21 are exempt from licensing by the National Bank of Angola, but they must be registered. As per Notice 05/21, non-foreign currency resident workers who engage in a paid activity in the country must open a nonresident currency account in a bank based in Angola, in which their income should be domiciled. In the foreign currency purchase operations related to non-foreign currency resident workers’ wages the bank in question must check that the amounts the employee intends to transfer are consistent with the income earned under the employment contract.

Previously, under Notice No. 13/13 of August 6, 2013, prior approval was required for transfers in connection with agreements having an annual value of Kz 300 million or more, or the equivalent in another currency, when the principals were enterprises that provide services to the oil sector, as well as service agreements exceeding Kz 100 million or the equivalent in another currency.

### Credit card use abroad

**Quantitative limits**  
04/14/2021

The annual cumulative limit was set equivalent to USD 250,000.00 for credit cards. Previously, the annual limits on the use of payment cards abroad, per type of card and in kwanzas, are as follows: Kz 10 million for credit cards, Kz 6 million for debit cards, and Kz 6 million for prepaid cards.

### Other payments

**Quantitative limits**  
04/14/2021

Foreign exchange resident individuals over the age of 18 may purchase foreign currency or use their own foreign currency funds, for any purposes abroad, including investments, and personal and family expenses, up to a cumulative amount equivalent to USD 250,000.00 a calendar year, irrespective of the payment instrument used.
The National Bank of Angola (BNA) may authorize, on an exceptional basis, duly justified requests for transfers of amounts exceeding the limit of USD 250,000. For this purpose, the interested parties should justify the request through a bank for prior review and subsequent submission to the BNA for decision.

ANTIGUA AND BARBUDA
(Position as of June 30, 2022)

Status under IMF Articles of Agreement

Date of membership
February 25, 1982.

Article VIII
Yes.  Date of acceptance: November 22, 1983.

Article XIV

Exchange Measures

Restrictions and/or multiple currency practices
No.  No restrictions as reported in the latest IMF staff report as of December 31, 2021.

Exchange measures imposed for security reasons
Yes.
In accordance with UNSC resolutions, measures have been taken to freeze the assets of terrorists and organizations associated with terrorism.

In accordance with IMF Executive Board Decision No. 144-(52/51)
Yes.

Other security restrictions
No.

Exchange Arrangement

Currency
Yes.  The currency of Antigua and Barbuda is the Eastern Caribbean dollar, issued by the ECCB.

Other legal tender
No.

Exchange rate structure

Unitary
Yes.

Dual

Multiple

Classification

No separate legal tender

Currency board
Yes.  The de jure and de facto exchange rate arrangements are classified as a currency board. Antigua and Barbuda participates in a currency union with seven other members of the ECCU and has no separate legal tender. The Eastern Caribbean dollar, the common currency, is pegged to the US dollar at EC$2.70 per US dollar. The ECCB officially covers at least 60% of base money with its foreign reserves. The operational guideline is set at 80%, although in practice the coverage has been maintained at 95%–100%

Conventional peg

Stabilized arrangement

Crawling peg

Crawl-like arrangement

Pegged exchange rate within horizontal bands
The Eastern Caribbean dollar is pegged to the US dollar under a currency board arrangement at EC$2.70 per US dollar. This rate applies to the ECCB transactions as well as accounting and valuation.

The monetary policy framework is an exchange rate anchor vis-à-vis the US dollar.
Target corridor band
Other

Accountability

Publication of inflation forecasts

Other monetary framework

Exchange tax  No.
Exchange subsidy  No.
Foreign exchange market  Yes. The ECCB sets an indicative rate for commercial banks to follow. This rate has been ECS$2.6882–ECS$2.7169 per US dollar for a long time. Commercial banks may freely set their commissions in transactions with their clients.
Spot exchange market  Yes. The ECCB participates in the foreign exchange market mainly trading US currency with Bank of America.
Operated by the central bank  Yes.
Foreign exchange standing facility  Yes. The ECCB is committed to selling and buying US dollars at a fixed exchange rate of ECS$2.7 per US dollar. Actual rates may differ slightly so that the ECCB can cover its administrative expenses. There is no bid-ask spread. The ECCB deals directly with the government and other public entities.
Allocation  No.
Auction  No.
Fixing  No.
Interbank market  Yes. Banks may trade with each other, but there is no formal interbank foreign exchange market. Foreign exchange bureaus are subject to licensing by the ECCB. These bureaus may deal in foreign exchange transactions directly with the ECCB; conduct spot, forward, and swap transactions; maintain accounts abroad; and make foreign payments and transfers on behalf of clients.
Over the counter  Yes.
Brokerage  No.
Market making  No.
Forward exchange market  No.
Official cover of forward operations  No.

- **Advance import deposits**: No.
- **Documentation requirements for release of foreign exchange for imports**: Yes. Payments for authorized imports are permitted on application and submission of documentary evidence. All bona fide import payments are approved.
- **Domiciliation requirements**: Yes.
- **Preshipment inspection**: No.
- **Letters of credit**: Yes.
- **Import licenses used as exchange**: No.
Import licenses and other nontariff measures

Yes. Certain goods require individual licenses, unless imported from the CARICOM countries. Antigua and Barbuda complies with the CARICOM rules of origin.

Positive list

No.

Negative list

No.

Open general licenses

Yes. Most goods may be freely imported under OGLs granted by the MOFE. Nonautomatic licensing is applied to products subject to quantitative restrictions.

Licenses with quotas

Yes. Quantitative restrictions are applied to carbonated beverages, beer, stout, ale, and porter. In agriculture, quantitative restrictions are applied if there is domestic supply.

Other nontariff measures

No.

Import taxes and/or tariffs

Yes. Customs duty rates range from 0% to 35% for nearly all items. The CARICOM CET is applied. As a result, tariffs on imports from the CARICOM countries range from 0% to 20%. There are no customs duties on a number of items, including milk and poultry. Some goods, including basic foods and agricultural goods, are exempt from customs duties. Other exemptions for machinery, equipment, and raw materials are granted on a case-by-case basis. There is a customs service charge with a maximum rate of 10%.

Taxes collected through the exchange system

No.

State import monopoly

Yes. There is a monopoly on imports of petroleum products.

No.

Export taxes

Yes.
Collected through the exchange system: n.a.

Other export taxes: Yes. Reexports are not subject to tax if transactions take place within the bonded area.

**Payments for Invisible Transactions and Current Transfers**

| Controls on these transfers | Yes. | Payments for certain categories of invisible transactions (related to authorized imports) do not require MOFE approval. Approval is granted for all bona fide payments for invisible transactions. No controls apply to payments for freight, insurance, unloading, and storage costs; administrative expenses; commissions; profits; and dividends. |
| Trade-related payments | No. |
| Prior approval | No. |
| Quantitative limits | No. |
| Indicative limits/bona fide test | No. |
| Investment-related payments | Yes. |
| Prior approval | Yes. |
| Quantitative limits | Yes. |
| Indicative limits/bona fide test | Yes. | Profits may be remitted in full after payment of taxes. Verification is not applied in practice; the authorities, however, may decide to undertake such verification. |
| Payments for travel | No. |
| Prior approval | No. |
| Quantitative limits | No. |
| Indicative limits/bona fide test | No. |
| Personal payments | Yes. |
| Prior approval | Yes. | Payments related to family maintenance are permitted. Payments for alimony are allowed, if provided for by contract. |
| Quantitative limits | Yes. | Payments related to medical expenses and studies abroad are permitted. |
| Indicative limits/bona fide test | Yes. |
| Foreign workers' wages | Yes. | These remittances are allowed, if provided for by contract. |
| Prior approval | Yes. |
| Quantitative limits | Yes. |
| Indicative limits/bona fide test | Yes. |
| Credit card use abroad | n.a. |
| Prior approval | n.a. |
| Quantitative limits | n.a. |
| Indicative limits/bona fide test | n.a. |
Other payments

- **Prior approval**: Yes. Payments for consulting and legal fees are allowed, if provided for by contract.
- **Quantitative limits**: Yes. The limit for subscriptions and membership fees is ECS$10,000 a year.
- **Indicative limits/bona fide test**: Yes.

**Proceeds from Invisible Transactions and Current Transfers**

- **Repatriation requirements**: No.
- **Surrender requirements**: No.
  - **Surrender to the central bank**: No.
  - **Surrender to authorized dealers**: No.
- **Restrictions on use of funds**: No.

**Capital Transactions**

- **Controls on capital transactions**: Yes.
  - **Repatriation requirements**: No.
    - **Surrender requirements**: No.
      - **Surrender to the central bank**: No.
      - **Surrender to authorized dealers**: No.
  - **Controls on capital and money market instruments**: Yes.
    - **On capital market securities**: Yes.
      - **Shares or other securities of a participating nature**: Yes.
        - **Purchase locally by nonresidents**: No.
        - **Sale or issue locally by nonresidents**: No.
      - **Purchase abroad by residents**: Yes. Under the Banking Act, investment of a licensed financial institution in another (single) financial institution (including a subsidiary) may not exceed 10% of the capital base. The aggregate amount of such investment, which a licensed financial institution may undertake in other financial institutions (including subsidiaries), may not exceed 25% of its capital base. As per Section 10 of the Banking Act, financial institutions can no longer acquire or hold shares or ownership interest in a nonfinancial firm (for example, in commercial, agricultural, or industrial company or unincorporated entity).
    - **Sale or issue abroad by residents**: No.
  - **Bonds or other debt securities**: No.
  - **Purchase locally by nonresidents**: No.
  - **Sale or issue locally by nonresidents**: No.

ARGENTINA

(Position as of October 31, 2022)

Status under IMF Articles of Agreement

Date of membership: September 20, 1956.

Article VIII: Yes. Date of acceptance: May 14, 1968.

Article XIV: Exchange Measures

Restrictions and/or multiple currency practices: Yes.

Exchange measures imposed for security reasons: Yes. In accordance with IMF Executive Board Decision No. 144-(52/51)

Other security restrictions: Yes.

The IMF staff report for the Fourth Review under the Stand-By Arrangement, Request for Waivers of Applicability and Modification of Performance Criteria, and Financing Assurances Review with Argentina states that, as of July 3, 2019, the retention of the MCP auction put in place in June 2018 that staff has assessed gives rise to the MCP. (Country Report No. 19/232)

Exchange Arrangement

Currency: Yes. The currency of Argentina is the Argentine peso.

Other legal tender: No.

Exchange rate structure
Effective March 15, 2022, the BCRA reclassified the de jure exchange rate arrangement to crawling peg from floating. In 2022, the exchange rate policy carried out by the BCRA was aimed at maintaining the levels of external competitiveness, gradually readjusting the crawl rate to the pace of inflation. In this way, an effort was made to strengthen the international reserves position, based on real foreign currency inflows from the external sector. On the contrary, the BCRA has carried out prudent management of the current regulatory framework, adapting it to the needs of the economic environment, to preserve monetary and exchange rate stability. As macroeconomic conditions allow, regulations will be relaxed, with the objective of maintaining in the medium and long term a set of macroprudential standards compatible with the stimulation of capital flows directed to the real economy.

The foreign exchange intervention data can be consulted in the Daily Monetary Report, which is available on the CB’s webpage. This report publishes intervention data on net purchases from the private sector and the National Treasury on a daily basis with a 3-day lag (business days) because of the time required for appropriate processing of the information prior to its dissemination. The de facto exchange rate arrangement is classified as crawl-like.

Foreign exchange operations are carried out at the exchange rate that is freely agreed between the parties (Paragraph 1.3 of the TO de EyC).

The reference exchange rate (TCR) is not an official exchange rate. It is calculated as specified in Communication “A” 3500, used for information purposes only, and is intended to reflect the wholesale market price based on average buying and selling rates.

Having reached pre-pandemic activity levels and without neglecting the ongoing growth process, the BCRA proposed returning to the policy guidelines set forth at the beginning of 2020, which combine the consolidation of domestic market and export growth with monetary and macro-financial stability. In this scenario, the BCRA defined and published in December 2021 its Objectives and Plans for the year 2022.

(1) The BCRA will calibrate interest rates in such a way as to tend toward positive real returns in pesos on savings instruments in domestic currency.
(2) The BCRA will manage liquidity to avoid imbalances that directly or indirectly threaten the disinflation process.

In January 2022, the BCRA announced a set of measures that reconfigure its monetary policy instruments. These changes are aimed at achieving better liquidity management for financial institutions, increasing the average term of sterilization instruments, and refocusing the policy rate signal on the Liquidity Bill (LELIQ) rate. On the one hand, effective January 17, 2022, the interest rate on 7-day repo liabilities was gradually reduced to match that of 1-day repo liabilities, in an attempt to eliminate incentives for financial institutions to use this instrument. In addition, the maximum holding limit of 28-day term LELIQs was increased up to an amount equivalent to the stock of term deposits of the private sector of each financial institution, focusing the policy interest rate signal on this instrument. Two new instruments were also created, 180-day term LELIQs (effective January 6, 2022) and, effective February 17, 2022, 190-day term Liquidity Notes (NOTALIQs), which will have a variable rate defined as the monetary policy rate plus a spread. The new instruments are auctioned once a week.

Not only were policy instruments readjusted, but benchmark interest rates were adjusted upward month by month during the first eight months of the year. To ensure that the new rates are passed on to depositors, the minimum guaranteed rates for peso savings instruments were also modified to encourage positive returns for savings in domestic currency.

The BCRA currently conducts its monetary policy through changes in the interest rates of the 28-day LELIQs, the instrument through which it defines the benchmark interest rate for monetary policy. Likewise, in order for financial institutions to calibrate their short-term liquidity, they have at their disposal a window for repo liabilities and assets, which is regulated using the LELIQ rate as a reference. Also, in the current environment of high levels of savings in the financial system and reduced credit depth, the BCRA manages structural bank liquidity through the periodic auctioning of its instruments (LELIQ and NOTALIQ).

In this way, all financial institutions can place excess liquidity that is not used to make up their reserve requirements or for lending in CB instruments, while the CB can harden or relax its monetary policy through changes in the interest rates on those instruments.
Open market operations in treasury securities are an additional tool. In the medium term, the BCRA seeks to gradually converge toward liquidity management of the economy through open market operations with Treasury bills and other short-term securities denominated in local currency, as is the case in other countries and in line with the Memorandum of Economic and Financial Policies under the current program with the IMF, where such reform is considered a good alternative to reduce the quasi-fiscal cost of monetary policy. Pursuing this objective requires greater liquidity, depth, and transparency of sovereign debt markets.

Both the levels of reserve requirements and the balances of the BCRA’s interest-bearing liabilities comply with prudential requirements and allow for the implementation of monetary policy measures. All reserve requirements corresponding to fixed-term deposits were allowed to be incorporated into LELIQs or Public Securities (going from a non-interest-bearing reserve to an interest-bearing one to strengthen the transmission of rates).

A line of credit for financing the productive investments of micro, small, and medium-sized enterprises (MSMEs) was approved in 2020, under which Group A financial institutions must grant preferential interest rates; at the end of June, the maximum interest rates were set at a nominal annual fixed rate of up to 42% to finance investment projects and up to 52.5% to finance working capital. The institutions covered must maintain a balance of such financing equivalent, as a minimum, to 7.5% of their nonfinancial private sector deposits in pesos until September 30, 2022.

In 2021, a new 2021/2022 quota was approved, under which financial institutions included in Group A must grant financing at a nominal annual fixed rate up to 35% to finance investment projects and up to 43% to finance working capital and discounting of deferred payment checks and other documents and special items. The institutions covered must maintain a balance of such financing equivalent, as a minimum, to 7.5% of their nonfinancial private sector deposits in pesos until March 30, 2022.

In 2022, the 2022 quota was approved with the same provisions as the 2021/2022 quota, under which financial institutions included in Group A must grant financing at nominal annual fixed rates of up to 42% to finance investment projects and up to 52.50% to finance working capital and discounting of deferred payment checks and other documents and special items, and from April 1, 2022, until September 30, 2022, the institutions must maintain a balance of such financing that is at least equivalent to 7.5% of their deposits from the nonfinancial private sector in pesos.

On the contrary, and to address the financial situation of individuals and companies affected by the COVID-19 pandemic, it was decided that for the rest of the financing (not credit cards) financial institutions must incorporate the unpaid installments corresponding to the maturities occurring between April 1, 2020, and March 31, 2021, as of the month following the end of the life of the loan, considering the accrual of the compensatory interest rate.

In the case of mortgage loans on single-family homes and mortgages updated by Purchasing Value Unit (Unidad de Valor Adquisitivo–UVA), the customer may opt for this scheme or for the one
Finally, for customers who are REPRO II Program employers, the institutions must include the unpaid installments as of May 14, 2021, in the month following the end of the loan term, taking into consideration the compensatory interest. Furthermore, it only includes the outstanding installments of financing disbursed up to April 28, 2022, excluding the installments that have already been subject to this treatment since June 1, 2022.

In addition, it was established that financial institutions must grant interest-free financing in pesos to individuals and in amounts indicated by the National Executive Branch (Decrees Nos. 332/2020 and 512/2021) and loans at subsidized rates to companies indicated by the National Executive Branch (Decree No. 332/2020).

Exchange tax  Yes.  Article 35 of Law No. 27541 on Social Solidarity and Productive Recovery as of December 23, 2019, established the Tax for an Inclusive and Caring Argentina (PAIS), regulated by Decree No. 99/19 and AFIP General Resolution for 659/20. Subsequently, AFIP General Resolution No. 4815/2020 established a collection regime that applied to transactions covered by the PAIS.

In addition to the PAIS (30%), an advance payment of income tax/capital gains tax is paid for certain operations. This advance was initially set at 35% and covered the purchase of foreign currency intended for hoarding and payment of foreign travel and tourism services (these taxes began on September 16, 2020. General Resolution No. 4815/2020). Subsequently, effective July 14, 2022, the rate corresponding to the payment of foreign travel and tourism services was raised to 45% (General Resolution No. 5232/2022).

Exchange subsidy  No.

Foreign exchange market  Yes.  Under the provisions of Article 132 of Law No. 27444 (repealing Article 188 of Decree No. 27/18), which replaced Article 1 of Decree No. 260/2002 and Paragraph 1.1 of the TO de EyC, all foreign exchange operations must be carried out in the MLC. The exchange rate is determined by market forces.

ADs freely set their bid-ask spreads and the commissions on foreign exchange transactions with their customers.

Since September 1, 2019, Decree No. 609/2019, amended by Article 1 of Decree No. 91/2019 (Official Bulletin – Boletín Oficial (B.O.) of December 28, 2019), establishes:

Article 1 – The equivalent value of the exports of goods and services must be repatriated in foreign exchange and/or traded on the foreign exchange market under the conditions and terms established by the BCRA.

Article replaced by Article 1 of Decree No. 91/2019 B.O. December 28, 2019. Effective as of the date of its publication in the Official Gazette (B.O.).

Article 2 – The BCRA, in accordance with its Charter, will establish the circumstances in which access to the foreign exchange market for the purchase of foreign exchange and minted precious metals and transfers abroad will require prior approval, based on objectives and
guidelines established in accordance with prevailing conditions on the foreign exchange market and distinguishing between the situations of individuals and legal entities.

Article 3 – The BCRA is authorized to establish regulations to prevent practices and operations that are intended to circumvent, through the use of public securities or other instruments, the provisions of this measure.

The indicated provision was regulated by Com “A” 6770 and supplementary provisions, which are now found in the TO de EyC.

Paragraph 1.1 of the TO de EyC establishes that financial institutions or exchange dealers authorized to deal in foreign exchange by the BCRA may intervene in all foreign exchange operations, swaps, and/or arbitrage on the foreign exchange market.

The MLC operates on a spot basis and transactions are settled within 48 hours (Paragraph 6.3 of the TO de EyC).

It is the only formal mechanism for foreign exchange transactions (Paragraph 1.1 of the TO de EyC).

As of June 30, 2022, 79 financial institutions were licensed to operate and 127 exchange dealers were registered. By law, the BCRA is responsible for authorizing the operation of these institutions and for establishing their operating powers and reporting requirements.

Foreign exchange institutions (foreign exchange bureaus and agencies) may operate on the foreign exchange market.

Foreign exchange bureaus may carry out all the operations provided for in the rules on “External Affairs and Foreign Exchange.” Exchange bureaus may simultaneously carry out only activities related to tourism and sales of travel tickets. Exchange offices may buy and sell foreign coins and banknotes; buy, sell, and exchange traveler’s checks; buy and sell gold coins and “good delivery” bars and deal in the instruments in which they are permitted to operate. They may use only local foreign exchange funds received through transactions with their customers, ADs, and exchange bureaus or agencies for their operations. Exchange bureaus and offices may simultaneously perform activities related to tourism and sales of travel tickets.

The retail exchange rates offered in Buenos Aires by institutions in the system may be consulted at the BCRA’s website. The information includes “reference retail exchange rates” calculated on the basis of the rates announced by institutions. These rates are intended to provide information regarding quotations in the MLC (Communication “B” 9791).

Communication “A” 3500 established the mechanisms for calculating the TCR on each bank business day for wholesale operations that can be settled in pesos and US dollars on the quotation date.
The BCRA may conduct foreign exchange auctions in accordance with the following guidelines: (1) announcement of the auction: by BCRA press release and through the electronic trading platform (SIOPEL) press release; (2) total amount of the auction: will be established by the BCRA in each case; (3) time of auction: variable (the BCRA will establish the time and duration); (4) number of bids: up to a maximum of three bids per dealer; (5) amount of each bid: minimum of 1 million and no maximum; (6) award system: bids may be awarded at multiple prices or a single price; in both cases, an apportionment system will be used if necessary; and (7) settlement: spot.

The most recent auction was conducted on October 25, 2019. Auctions are currently not being held, but the regulation remains in effect.

As of June 30, 2022, a total of 64 banks were operating on the interbank market. To operate as a financial institution, institutions must have the prior authorization of the BCRA.

Foreign exchange market transactions comprise the transactions of ADs with their customers, with each other, and with the BCRA. Customer foreign exchange transactions must involve an authorized institution. Foreign exchange transactions between authorized institutions must be conducted through the electronic trading platform (SIOPEL).

Purchases and sales of foreign exchange outside this system are allowed between authorized institutions when one or both parties are not authorized to operate in the SIOPEL and provided the transactions do not involve exchange brokers and do not exceed the equivalent of US$800,000 a day, calculated as the sum of each institution’s purchases and sales (Paragraph 5.11 of the TO de EyC).

The BCRA conducts its foreign exchange transactions with authorized institutions through the SIOPEL.

The CB does not use market makers and intervenes directly with market participants at their quoted rates, or through auctions on the market (Communication “A” 6527).

Foreign exchange transactions between authorized institutions must be conducted using SIOPEL when agreed to directly between the parties.

Buying and selling of foreign exchange is also permitted between authorized institutions outside of the SIOPEL, when one or both parties is/are not authorized to operate within this system, in a daily amount not to exceed the equivalent of US$8,00,000, considering the total of both items in each institution (Paragraph 5.11 of the TO de EyC).

The Central Bank operates in the forward markets as a policy instrument for exchange/currency regulation purposes.

At the end of 2021, the most important forward market was the
Matba Rofex (Argentina’s Futures and Options Exchange), which had a participation rate of 83%.

Transactions are settled by daily netting in domestic currency. The foreign exchange futures market uses the TCR published by the BCRA.

Official cover of forward operations No.

### Arrangements for Payments and Receipts

**Prescription of currency requirements** Yes.

Controls on the use of domestic currency Yes.

There are no restrictions on the use of the domestic currency in transactions not subject to repatriation and sale on the foreign exchange market. By custom, international payments are not normally settled in domestic currency.

Resident customers are allowed to channel certain transactions through the Local Monetary System (Sistema de Monedas Locales) implemented by the BCRA with the CBs of the Federative Republic of Brazil (as of October 3, 2008, according to Communication “A” 4847), the Eastern Republic of Uruguay (as of April 3, 2017, according to Communication “A” 6213), and the Republic of Paraguay (effective June 22, 2021, according to Communication “A” 7308).

**For current transactions and payments** No.

Foreign transactions are settled in freely usable currencies.

**For capital transactions** Yes.

Foreign transactions are settled in freely usable currencies.

**Transactions in capital and money market instruments** No.

Foreign transactions are settled in freely usable currencies.

**Transactions in derivatives and other instruments** Yes.

All domestic settlements of futures operations on regulated markets, forwards, options and any other type of derivative contracted in Argentina by institutions as of September 11, 2019, must take place in domestic currency (Paragraph 4.3.1. of the TO de EyC).

**Credit operations** No.

**Use of foreign exchange among residents** Yes.

Foreign exchange purchased by residents in accordance with the foreign exchange regulations is freely available as long as they do not have a specific subsequent application.

Paragraph 9 of Com “A” 6770, now Paragraph 3.6.1 of the TO de EyC, prohibits access to the foreign exchange market for the payment of debt and other foreign currency obligations between residents originated as from September 1, 2019, with the following exceptions:

- foreign currency financing granted by local financial institutions, including payments for foreign currency consumer purchases via credit or charge cards (Paragraph 3.6.1.1);

- issues of debt securities that are performed from September 1, 2019, onward and are intended to refinance debt included in Paragraph 3.6.2 and involve an increase in the average term of the obligations (Paragraph 3.6.1.2);

- issues as from November 29, 2019, denominated and subscribed in foreign currencies, the servicing of which is payable in Argentina in foreign currencies, as long as all of the funds obtained have been sold on the foreign exchange market (Paragraph 3.6.1.3);
-from October 9, 2020, issues of debt securities publicly registered in Argentina and denominated in foreign exchange, the servicing of which is payable abroad or in foreign currencies in Argentina, as long as their average term is not less than 2 years and their delivery to the creditors has made it possible to achieve the refinancing parameters set out in Paragraph 3.17 (Paragraph 3.6.1.4);

-effective January 7, 2021, issues of debt securities publicly registered in Argentina and denominated in foreign exchange, the servicing of which is payable in foreign exchange in Argentina, as long as they were delivered to the creditors for refinancing of pre-existing debt with an extension of the average term, when it corresponds to the amount of the refinanced principal, the interest accrued to the date of refinancing and the new debt securities do not involve a principal maturity date in the first two years, the amount equivalent to the interest that would accrue in the first two years for the debt subject to early refinancing and/or the extension of the refinanced principal and/or interest accrued on the amounts thus refinanced (Paragraph 3.6.1.5).

Access to the exchange market is allowed to settle obligations in foreign currency between residents taking the form of public instruments or entries in registries as of August 30, 2019 (Paragraph 3.6.2) and financing in foreign currency granted by local financial institutions outstanding as of August 30, 2019 (Paragraph 3.6.3).

In accordance with Paragraph 3.6.4, access to the foreign exchange market prior to maturity requires the prior approval of the BCRA, except if the transaction is included in any of the exceptions indicated.

The amount of foreign currency purchases made by individuals for the purpose of paying debts between residents, including the repayment of financing granted by local financial institutions for consumption in foreign currency made through credit or debit cards, as from the following calendar month and for the subsequent months necessary to complete the amount acquired as from September 1, 2020, will be deducted from the limit established in Paragraph 3.8 for the purchase of foreign currency by individuals for the formation of foreign assets, the remittance of family assistance, and for transactions with derivatives. Regardless of the above, as long as the conditions provided for are met, the individual may continue to access the foreign exchange market for the repayment of foreign currency financing granted by other residents. (Paragraph 3.6.5, which incorporates Paragraph 1 of Communication “A” 7106.)

Issues of debt securities with public registration in Argentina, denominated in foreign currency and whose servicing is payable abroad or in foreign currency in Argentina, may be used to make principal and interest payments on their maturity through the application of proceeds from exports of goods and services, provided the requirements set forth in Communication “A” 7123 are met.

In the event that a debtor has scheduled principal maturities up to December 31, 2022, for issues of debt securities with public registration in Argentina that are denominated in foreign currency, it must comply with the provisions of Paragraph 3.17. (Paragraph 3.6.7, which incorporates Paragraph 7 of Communication “A” 7106.)
As well, Paragraph 3.16 of the TO de EyC establishes additional requirements applicable to transactions involving flows of funds abroad via the foreign exchange market that customers must, if relevant, meet for purposes of access to the foreign exchange market without the prior approval of the BCRA:

1. submission of an affidavit linked to their holdings of external assets in Argentina and abroad (Paragraph 3.16.2, incorporating Paragraph 1 of Communication “A” 7030 of May 28, 2020, as amended and/or supplemented by Communications “A” 7042 of June 11, 2020, 7094 of August 27, 2020, and 7327 of July 10, 2021);

2. submission of an affidavit indicating that on the day on which the request for access to the market is submitted and during the previous 90 days they have not sold securities in Argentina with settlement in foreign exchange or transferred securities to depositary agencies abroad, and indicating their commitment not to conduct such operations in the following 90 days (Paragraph 3.16.3, which incorporates Paragraph 3 of Communication “A” 7001 of April 30, 2020, replaced by Paragraph 4 of Communication “A” 7030 of May 28, 2020, which extended the time period indicated from 30 days to 90 days, supplemented by Communication “A” 7042 of June 11, 2020).

Effective July 12, 2021, Communication “A” 7327 included that BCRA’s prior authorization must be required except the customer submits an affidavit declaring that during the last 90 days as of the date of the transfer request, and also during the following 90 days, the customer had/will not arrange sales or exchanges of securities settled in foreign currency in Argentina or transfer of same to foreign depositary entities. Effective October 29, 2021, the same applies for transactions for the acquisition of foreign securities in Argentina with settlement in pesos (Communication “A” 7385); (3) the customer is not an individual or legal entity included by the AFIP in the database of invoices or equivalent documents deemed to be fictional (Paragraph 3.16.4, which incorporates Paragraph 5 of Communication “A” 7193 of December 30, 2020);

4. individuals or legal entities that are considered regulated entities having complied with the “Registry of Foreign Exchange Information of Exporters and Importers of Goods” and that are not indicated as “NOT REGISTERED” (Paragraph 3.16.5, which incorporates Communication “A” 7200 effective January 6, 2021, amended by Communication “A” 7273 of April 29, 2021);

5. verification, before proceeding with transactions involving the outflow of funds abroad, whether the customer is included in the list of Unique Taxpayer Identification Codes (CUITs) with inconsistent transactions in the online system implemented by the BCRA for such purpose and, if this is the case, it must strengthen the control measures to determine the reasonableness and genuineness of the transactions (Paragraph 3.16.6 introduced by Communication “A” 7422 of December 16, 2021, taking into account the provisions of Communication “B” 12082 of October 28, 2020).

**Payments arrangements**

Yes.

**Bilateral payments arrangements**

Yes.

**Operative**

Yes. The domestic currency payments system (–) is voluntary and intended for trade-related transactions between Argentina and Brazil (as of October 3, 2008, according to Communication “A” 4847), Paraguay (effective June 22, 2021, according to Communication “A” 7308) or Uruguay (as of April 3, 2017, according to Communication “A” 6213). It allows importers and exporters in the three countries to make and collect payments in their respective currencies. In the case
of the agreement with Paraguay, they are also permitted to receive
payments in the currency of the counterparty, including service and
remittance transactions. These transactions are channeled through the
financial system, and the CBs clear the balances on a daily basis
through correspondents.

_Inoperative_ Yes. The BCRA has a reciprocal payments and credit arrangement with
the National Bank of Cuba.

In accordance with BCRA Communication “A” 2284, collections for
any purpose must be made in freely available foreign exchange,
while payments for any purpose must on a mandatory basis be made
through the arrangement.

Although the arrangement is in force, it is inactive as it has not been
used to carry out any transactions for at least two decades.

_Regional arrangements_ Yes. Within the framework of the multilateral clearing system of the
LAIA or in Spanish: ALADI (Asociación Latinoamericana de
Integración), payments between Argentina and other LAIA countries
are settled voluntarily under payments agreements and a reciprocal
credit mechanism.

_Clearing agreements_ No.

_Barter agreements and open accounts_ No.

_Administration of control_ Yes. Exchange regulations are established by the BCRA in accordance
with the applicable laws. Exchange transactions must be carried out
through authorized institutions, including banks, exchange agencies,
and exchange bureaus, which are subject to separate regulations
(Paragraph 1.1 of the TO de EyC).

In all cases, intervening institutions are subject to all applicable rules
for the identification and recording of transactions and verification of
compliance with the general provisions and, if appropriate, any
specific provisions on the topic in question in the consolidated text,
verification of the authenticity of the transaction to be conducted, its
proper categorization in the foreign exchange regulations and
compliance with the rules on the prevention of money laundering,
terrorism financing, and other unlawful activities (Paragraphs 1.6, 1.2
, and 1.7 of the TO de EyC, respectively).

Transactions that do not have access under the foreign exchange
regulations may request prior approval from the BCRA via a
financial institution (Paragraph 1.8 of the TO de EyC).

In general, institutions must also exercise due diligence in the
identification of customers.

_Payments arrears_ Yes.

_Official_ No.

_Private_ Yes. The foreign exchange regulations allow access to the foreign
exchange market for payment of financial debts on maturity as long
as all applicable requirements are met (Paragraph 3.5. of the TO
EyC, which incorporates Communication “A” 6770 of January 1,
2019, as of September 1, 2019).

Access is also allowed for payment on maturity of commercial debts
for imports of goods and services that are covered by Paragraph
10.2.4 of the TO de EyC and meet all applicable requirements
(Communication “A” 6818 of October 28, 2019, as of November 1,
2019, and Communication “A” 6770 of January 1, 2019, as of
September 1, 2019, respectively).
Paragraph 10.11 as of May 27, 2020 (which incorporates Paragraph 2 of Communication “A” 7030 and supplementary provisions) establishes that until December 31, 2022, access to the foreign exchange market for payments for imports of goods or principal payments on debts originating from imports of goods are subject to prior approval of the BCRA, unless the requirements set out in Paragraphs 10.11.1 to 10.11.12 are met.

Item 10.12 increases by 50% the amount (since October 2, 2020) provided for in Item 10.11 from the payment of advances and prefinancing of exports from abroad.

Paragraph 3.18 (Communication “A” 7301 effective June 14, 2021, and related Communication “A” 7416 of December 9, 2021) allows access with a “Certificate of Increase in Exports of Goods” without the requirement of prior approval from the BCRA to access the foreign exchange market, when it is required by Paragraph 10.11.

Effective August 26, 2021, Paragraph 3.19 (Communication “A” 7348) allows access with certification of entry of new foreign financial debt without prior approval of import payments that do not comply with Paragraph 10.11 under the conditions.

Paragraph 1.9 of the TO de EyC requires completion of the “Survey of External Assets and Liabilities,” even when no inflow of funds to the foreign exchange market has taken place and/or no future access to this market is planned.

### Controls on trade in gold (coins and/or bullion)

- **Yes.**
  - On domestic ownership and/or trade: Yes. Sales of gold coins and good delivery gold bars are subject to the foreign exchange regulations as they are instruments transacted on the foreign exchange market pursuant to Paragraphs 6.1.3 and 6.1.4 of the TO de EyC.
  - On external trade: Yes. There are no restrictions on imports of gold bars.

- **Yes.**
  - On exports: Exports of coins and minted precious metals exceeding US$10,000 must be made through institutions subject to supervision by the Superintendency of Financial and Exchange Institutions.

- **Yes.**
  - Domestic currency: Article 133 of Law No. 27.444 (repealing Article 189 of Decree No. 27/18), which replaced Article 7 of Decree No. 1570/01, eliminated the prior approval of the BCRA for the export of foreign currency banknotes and coins and minted precious metals, in accordance with the regulatory provisions issued by the BCRA.

### Controls on exports and imports of banknotes

- **Yes.**
  - On exports: Paragraph 5.13 of the TO de EyC provides that institutions may conduct transactions that involve exporting domestic currency provided the counterparties are listed in Paragraph 5.13 (foreign branch or agency of an official local bank or a foreign financial institution that is wholly or majority owned by a foreign government; or a foreign financial institution or exchange agency not established in countries or territories that do not apply or insufficiently apply the Recommendations of the FATF; or a foreign company that is dedicated to the purchase and sale of banknotes from specific countries and/or minted precious metals or good delivery bars, whose
head office is located in a member country of the Basel Banking Supervision Committee).

As well, it is established that the sale of foreign exchange remitted to the local institution by the counterparty for the purchase of domestic currency banknotes is exempt from the provisions of the first paragraph of Paragraph 2.8 (credit of the proceeds of the sale of the foreign exchange to a local account) as long as there is a commitment from the counterparty that said funds will be used to meet tourism and travel demand and export will take place no more than 30 calendar days following the date of foreign exchange contract.

exchange market and are not funds provided as guarantees for commercial or financial transactions (with unconnected counterparties) in accordance with Paragraph 3.11 of the TO de EyC.

Under the provisions of Paragraph 3.16.2 (which incorporates Paragraph 1 of Communication “A” 7030 of May 28, 2020), access to the foreign exchange market for transactions involving flows of funds abroad requires the customer to submit an affidavit, indicating that they do not have liquid foreign assets abroad or outside the Argentine financial system, except in the situations specifically contemplated.

In the event that the resident decides to repatriate these funds, for amounts exceeding US$2 million a month, the transactions are covered by Decree No. 616/05, Article 3, with the requirement to credit the proceeds from the sale of the foreign exchange to a local account (Paragraph 2.8 of the TO de EyC).

Regarding the remaining provisions of Article 4 of the aforementioned decree, Resolution No. 3/15 of the former Ministry of the Treasury and Public Finance, which reduced the percentage of the deposit indicated in Paragraph (c) of said article to 0, and Resolution No. 1/17 of the MOF, which reduced the term indicated in Articles 2 and 4(a) of Decree No. 616, as amended, to 0 days, are applicable (Paragraph 2.8 of the TO de EyC).

In the case of transactions not subject to the obligation of settlement in the foreign exchange market, in accordance with Paragraph 2.7 of the TO de EyC, institutions may conduct swaps and exchanges with customers in the event of foreign currency inflows from abroad and allow the crediting of these transactions to foreign currency accounts opened by the customer.

There are no Argentine peso accounts held with institutions abroad. However, they are not prohibited under the foreign exchange regulations.

Communication “A” 6770 and supplementary provisions added various regulations to the previously existing regulations. Currently, Paragraph 3.10 of the TO de EyC (which incorporates Paragraph 5 of Com “A” 6770) establishes prior approval of the BCRA for access to the foreign exchange market by legal entities, local governments, mutual funds, and certain trusts and other estates established in Argentina for the formation of external assets (purpose codes A01, A02, A03, A04, A06, A07, A08, A09, A14, A16, and A17) and for operations involving derivatives, with the exception of those indicated in Paragraph 3.12.1.

Paragraph 3.8 of the TO de EyC (which incorporates Paragraph 6 of Communication “A” 6770, as amended by Paragraph 1 of Communication “A” 6815) establishes that resident individuals may access the market for the purchase of foreign currency banknotes for the purposes indicated without the prior approval of the BCRA under certain conditions, among them, Paragraph 3.8.1 provides that they must not exceed the equivalent of US$200 (since October 28, 2019; Com “A” 6815) in a calendar month for all institutions and for all the purposes indicated, net of the following deductions:

- the settlement of obligations between residents within the
framework of the provisions of Paragraph 3.6, including financing granted by local financial institutions for foreign currency purchases made by means of credit or debit cards (Item 3.8.1.1, which incorporates Paragraph 1 of Communication “A” 7106 of September 15, 2020).

-the purchase of foreign currency to be applied simultaneously to the purchase of real estate in Argentina with mortgage loans under the terms of Paragraph 3.9. (Paragraph 3.8.1.2, which incorporates Paragraph 1.iv of Communication “A” 6787 of September 19, 2019).

-cash withdrawals with debit cards made abroad with debit to local peso accounts of the customer as provided for in Paragraph 4.1.1 (Paragraph 3.8.1.3, which incorporates Paragraph 4 of Communication “A” 6948 of March 28, 2020).

-purchases made with a debit card abroad with debit to a local account in pesos as provided for in Paragraph 4.1.2 (Paragraph 3.8.1.4, which incorporates Paragraph 1 of Communication “A” 7106 dated September 15, 2020).

Paragraph 3.8.2 establishes that the transaction must be made by debit to the customer’s accounts at local financial institutions, allowing the use of cash in local currency in transactions up to the equivalent of US$100 in a calendar month at all institutions.

Paragraph 3.8.4 provides for the customer’s commitment not to enter into securities transactions with settlement in foreign currency in Argentina from the moment access is requested and for 90 days thereafter, and Paragraphs 3.8.5 and 3.8.6 provide that the customer does not have certain financing pending repayment and that the customer is not a beneficiary of the quota value update under the provisions of Article 2 of Decree No. 319/2020 and supplementary and regulatory rules, respectively.

Paragraph 3.8.11 provides that the institution must deliver the banknotes or traveler’s checks in foreign currency or credit the funds to a foreign currency account held by the customer in local financial institutions or to a bank account held by the customer abroad, as the case may be.

In all cases, the institution must verify that the applicable requirements for the crediting of funds to a foreign currency account held by the customer at local financial institutions are met (Paragraph 3 of Communication “A” 7401 effective November 18, 2021).

In addition, Paragraph 3.16 of the TO de EyC establishes additional requirements applicable to transactions involving flows of funds abroad via the foreign exchange market that customers must, if relevant, meet for purposes of access to the foreign exchange market without the prior approval of the BCRA:

(1) submission of an affidavit linked to their holdings of external assets in Argentina and abroad (Paragraph 3.16.2, incorporating Paragraph 1 of Communication “A” 7030 of May 28, 2020, as amended and/or supplemented by Communications “A” 7042 of June 11, 2020, 7094 of August 27, 2020, and 7327 of July 10, 2021);

(2) submission of an affidavit indicating that on the day on which the request for access to the market is submitted and during the previous 90 days they have not sold securities in Argentina with settlement in foreign exchange or transferred securities to depositary agencies abroad, and indicating their commitment not to conduct such operations in the following 90 days (Paragraph 3.16.3, which incorporates Paragraph 3 of Communication “A” 7001 of April 30,
2020, replaced by Paragraph 4 of Communication “A” 7030 of May 28, 2020, which extended the time period indicated from 30 days to 90 days, supplemented by Communication “A” 7042 of June 11, 2020).

Effective July 12, 2021, Communication “A” 7327 included that BCRA’s prior authorization must be required except the customer submits an affidavit declaring that during the last 90 days as of the date of the transfer request, and also during the following 90 days, the customer had/will not arrange sales or exchanges of securities settled in foreign currency in Argentina or transfer of same to foreign depositary entities. Effective October 29, 2021, the same applies for transactions for the acquisition of foreign securities in Argentina with settlement in pesos (Communication “A” 7385); (3) the customer is not an individual or legal entity included by the AFIP in the database of invoices or equivalent documents deemed to be fictional (Paragraph 3.16.4, which incorporates Paragraph 5 of Communication “A” 7193 of December 30, 2020); (4) individuals or legal entities that are considered regulated entities having complied with the “Registry of Foreign Exchange Information of Exporters and Importers of Goods” and that are not indicated as “NOT REGISTERED” (Paragraph 3.16.5, which incorporates Communication “A” 7200 effective January 6, 2021, amended by Communication “A” 7273 of April 29, 2021); (5) verification, before proceeding with transactions involving the outflow of funds abroad, whether the customer is included in the list of CUITs with inconsistent transactions in the online system implemented by the BCRA for such purpose and, if this is the case, it must strengthen the control measures to determine the reasonableness and genuineness of the transactions (Paragraph 3.16.6 introduced by Communication “A” 7422 of December 16, 2021, taking into account the provisions of Communication “B” 12082 of October 28, 2020).

and private securities and term investments. In addition, they may open special investment accounts and special current accounts for legal entities, exclusively for the acquisition of public and private securities and BCRA monetary regulation instruments. Appropriate identification is required to prevent money laundering, the financing of terrorism, and other unlawful activities. Accounts opened with temporary documentation require final documentation by the established deadline for further operations. Bank current accounts require a special domicile in Argentina, which is taken into consideration for legal and regulatory purposes associated with the operation of the account, including check-related disputes.

Currently, according to the provisions of Paragraph 3.13 of the TO de EyC (which incorporates Paragraph 7 of Communication “A” 6770 as amended by Communications “A” 6815 and 6855), access to the foreign exchange market by nonresident customers is subject to prior approval from the BCRA for the purchase of foreign currency, except for, among others, international organizations and institutions that perform the functions of official export credit agencies, diplomatic and consular offices, and diplomatic personnel accredited in Argentina for transfers made in the exercise of their functions, and representative offices in Argentina of tribunals, authorities, or offices, special missions, bilateral agencies, or commissions established by international treaties or agreements to which Argentina is a party, as long as the transfers are conducted in the performance of their functions, transfers abroad on behalf of individuals who receive retirement benefits and/or pensions from the National Social Security Administration (Administración Nacional de la Seguridad Social) or other social security agencies and/or social security annuities provided for under Article 101 of Law No. 24241, up to the amount received under such items in the last 30 calendar days and provided the transfer is made to a bank account owned by the beneficiary in his or her registered country of residence (Paragraph 4 of Communication “A” 7528 effective June 16, 2022).

In addition, Paragraph 3.16 of the TO de EyC establishes additional requirements applicable to transactions involving flows of funds abroad via the foreign exchange market that customers must, if relevant, meet for purposes of access to the foreign exchange market without the prior approval of the BCRA:
(1) submission of an affidavit linked to their holdings of external assets in Argentina and abroad (Paragraph 3.16.2, incorporating paragraph 1 of Communication “A” 7030 of May 28, 2020, as amended and/or supplemented by Communications “A” 7042 of June 11, 2020, 7094 of August 27, 2020, and 7327 of July 10, 2021);
(2) submission of an affidavit indicating that on the day on which the request for access to the market is submitted and during the previous 90 days they have not sold securities in Argentina with settlement in foreign exchange or transferred securities to depositary agencies abroad, and indicating their commitment not to conduct such operations in the following 90 days (Paragraph 3.16.3, which incorporates Paragraph 3 of Communication “A” 7001 of April 30, 2020, replaced by Paragraph 4 of Communication “A” 7030 of May 28, 2020, which extended the time period indicated from 30 days to 90 days, supplemented by Communication “A” 7042 of June 11, 2020).

Effective July 12, 2021, Communication “A” 7327 included that BCRA’s prior authorization must be required except the customer submits an affidavit declaring that during the last 90 days as of the date of the transfer request, and also during the following 90 days, the customer had/will not arrange sales or exchanges of securities.
settled in foreign currency in Argentina or transfer of same to foreign depositary entities. Effective October 29, 2021, the same applies for transactions for the acquisition of foreign securities in Argentina with settlement in pesos (Communication “A” 7385); (3) the customer is not an individual or legal entity included by the AFIP in the database of invoices or equivalent documents deemed to be fictional (Paragraph 3.16.4, which incorporates Paragraph 5 of Communication “A” 7193 of December 30, 2020); (4) individuals or legal entities that are considered regulated entities having complied with the “Registry of Foreign Exchange Information of Exporters and Importers of Goods” and that are not indicated as “NOT REGISTERED” (Paragraph 3.16.5, which incorporates Communication “A” 7200 effective January 6, 2021, amended by Communication “A” 7273 of April 29, 2021); (5) verification, before proceeding with transactions involving the outflow of funds abroad, whether the customer is included in the list of CUITs with inconsistent transactions in the online system implemented by the BCRA for such purpose and, if this is the case, it must strengthen the control measures to determine the reasonableness and genuineness of the transactions (Paragraph 3.16.6 introduced by Communication “A” 7422 of December 16, 2021, taking into account the provisions of Communication “B” 12082 of October 28, 2020).

Approval required Yes. Paragraph 3.13 of the TO de EyC establishes that access to the foreign exchange market by nonresident customers for the purchase of foreign exchange will require the prior approval of the BCRA, with the exceptions indicated in the said paragraph.

Blocked accounts No.

Imports and Import Payments

Foreign exchange budget No.

Financing requirements for imports Yes. For purposes of access to the foreign exchange market, commercial debts for the financing of imports of goods should be considered among the debts indicated in Paragraph 10.2.4 of the TO de EyC (Communication “A” 6818 dated October 28, 2019, in place since November 1, 2019).

Minimum financing requirements Yes. Effective January 6, 2021, as per Paragraphs 10.3.2.5 and 10.3.2.6, which incorporate the rules set out in Communication “A” 7201 of January 6, 2021, establish that for goods with tariff positions indicated in Paragraphs 10.10.1 and 10.10.2 (luxury consumer goods or sumptuous goods), access to the foreign exchange market must take place as of 90 and 365 calendar days, respectively, of the date of registration of clearance through customs of the said goods. The time periods indicated are not applicable if the merchandise was loaded on or before January 6, 2021, or the exclusion conditions for the position are met.

Effective March 4, 2022, the 90-day time period was extended to 180 days by Communication “A” 7466 of March 3, 2022, for goods shipped on or after March 4, 2022.

Effective March 4, 2022, paragraph 5 of Communication “A” 7466 dated March 3, 2022, issued requirements for cases in which the imported goods are not included in the time periods set forth in Paragraphs 10.3.2.5 or 10.3.2.6 and declaration in the SIMI is a requirement for registration of the customs entry of the goods.

In this regard, it was established, within the framework of the SIMI,
how the BCRA assigns the categories to each one that is officially registered in the SIMI as from March 4, 2022, once the latter has obtained the “EXITED” status based on the intervention of the competent agencies in the matter, and how the said category will define the minimum time periods for access to the foreign exchange market to make payments for the goods included in the SIMI.

A Category A, which maintains the same regulatory treatment for the associated transactions, and a Category B, which means that the associated imports of goods must be financed at least 180 days from the date of registration of the customs entry of the goods into Argentina.

The BCRA assigns to each importer for the year 2022 a limit for SIMI Category A, for goods not included in the exceptions provided for, which will be equivalent to the lesser of the following two amounts:

1. The Free on Board (FOB) value of its imports for the year 2021 plus 5% of the said value.
2. The FOB value of its imports for the year 2020 plus 70% of the said value.

In the calculation of the FOB value of imports for the years 2020 and 2021, imports registered in the importer’s name in the Import Payments Tracking System (SEPAIMPO) system that granted access to the foreign exchange market will be taken into account, except those corresponding to temporary imports or goods included in the exceptions provided for.

The amount of Category A assigned by the BCRA will be the equivalent of US$50,000 when the customer has not registered imports in the last two years or when the amount resulting from the indicated calculation is lower.

The limit for SIMI Category A at each point will be equivalent to the proportional part of the annual limit of each category accumulated up to and including the current month. The equivalent of 20% of the corresponding annual limit will be added to the said amount, provided this does not mean that said limit will be exceeded. In the event that the amount indicated for a category is less than US$250,000, the latter amount or the corresponding annual limit, whichever is lower, will be adopted.

Among the exceptions provided for, the following are contemplated: payments for imports with SIMI Category B declaration and the goods paid for are capital goods or consist of kits for the detection of the COVID-19 coronavirus or other goods whose tariff positions are included in the list published by Decree No. 333/2020 and its supplementary provisions or concern goods subject to non-automatic import licenses.

Later, considering the particularities of certain goods to be imported, exceptions to the 180-day period were included (Communications “A” 7469 effective March 11, 2022: petroleum or bituminous mineral oils, their preparations and their waste or petroleum gases and other gaseous hydrocarbons, exceptions to the 180-day period were included and “A” 7471 effective March 18, 2022: non-agglomerated bituminous coal).
Communication “A” 7472 effective March 22, 2022, reduced the time period for a group of goods (import of fertilizers and/or phytosanitary products and/or inputs that are necessary for the local elaboration of the same) to 90 calendar days.

Subsequently, pursuant to Communication “A” 7488, effective April 7, 2022, SIMI Category C was introduced, whereby, for certain tariff positions of raw materials and standardized inputs and under certain conditions, a treatment similar to Category A was established.

The annual limit of SIMI Category C to be assigned by the BCRA will be the difference between the limit assigned by the BCRA to Category A and the higher of the two amounts considered for the purposes of establishing the said limit. It was also established that the limit for SIMI Category C at each point in time will be equivalent to the proportional part of the annual limit accumulated up to and including the current month. The equivalent of 20% of the annual limit will be added to the said amount, provided this does not mean that said limit will be exceeded. In the event that the amount indicated is less than US$250,000, the latter amount or the annual limit, whichever is lower, will be adopted.

Later, as indicated in Communication “A” 7490 of April 12, 2022, the TO de Eyc was updated and these rules were included in Paragraph 10.14.

Communications “A” 7507 effective May 5, 2022, “A” 7516 of May 19, 2022, and “A” 7528 of June 16, 2022, included transactions related with pharmaceutical products, its production inputs and other items related with health exempted (under the conditions specifically provided for in each case) from compliance with the minimum financing period.

Then, by means of Paragraph 1 of Communication “A” 7532 effective June 27, 2022, certain modifications were announced, among them:

(1) It was established that up to September 30, 2022, the limit of SIMI Category A or C at each point in time will be equivalent to the proportional part of the annual limit of each category accumulated up to and including the current month. In the event that the amount indicated for a category is less than US$250,000, the latter amount or the corresponding annual limit, whichever is lower, will be adopted. Meaning that up to September 30, 2022, the equivalent of 20% of the annual limit will NOT be added to the said amount. Effective October 1, 2022, the 20% was added again.

(2) The exception foreseen for goods subject to non-automatic import licenses was suspended until September 30, 2022, establishing that while such suspension lasts, imports of such goods for the years 2020 and 2021 will be taken into consideration for the computation of the limits for Categories A and C.

(3) Effective July 1, 2022, it was established that the annual limit of Category A for an importer must be, at a minimum, equivalent to 115% of the computable FOB value of its imports for the year 2021, when the amount imported in the said year was less than or equal to the equivalent of US$1,000,000.

Advance payment requirements  Yes.

Advance payments for imports of goods are allowed on condition that the importer submits an affidavit committing to demonstrate
entry of the goods into the country within 270 days for advance payments on capital goods and 90 days for other goods.

In the event that the foreign supplier is a counterparty connected with the importer or longer time periods are needed for formalization of the clearance of the imports, the prior approval of the BCRA is required for access to the foreign exchange market (Paragraph 10.4.2.4).

These periods may be extended by the institutions for reasons of force majeure (Paragraph 10.5.5).

Importers that have made sight and/or advance payments and have not demonstrated the entry of the goods within the required period, nor have they requested an extension or repatriation of the foreign exchange via the foreign exchange market, may not make further advance payments until the pending operations have been regularized. The public sector and trusts established with national public sector contributions, as well as legal entities responsible for the supply of critical medicines that are brought in by Specific Request are exempt from this provision (Paragraph 10.4.2.6).

The importer must have a declaration made via the SIMI with status “EXITED” for the goods involved in all cases in which the declaration is required for registration of the “import for home use application” (Paragraph 10.4.2.8, which incorporates Communication “A” 7138). Effective March 4, 2022, Paragraph 10.4.2.8 establishes that in those cases in which a declaration made through the SIMI is required for the registration of the customs entry of goods, any of the conditions set forth in Paragraph 10.14.2 are met (see Paragraph 5 of Communication “A” 7466).

Effective January 6, 2021, if the intended advance payment corresponds to goods whose tariff positions are included in Paragraphs 10.10.1 (luxury consumer goods) and 10.10.2 (sumptuous goods) and the conditions for exclusion provided for the position are not met, access to the foreign exchange market is subject to the prior approval of the BCRA (Paragraph 10.4.2.9, which incorporates Communication “A” 7201).

Paragraph 10.11.7 incorporates advance payment for imports intended for the purchase of capital goods for situations that do not require prior approval of the BCRA to access the foreign exchange market. Communication “A” 7375 effective October 6, 2021, suspended the application of this paragraph until October 31, 2021. Communication “A” 7385 extended the suspension until November 30, 2021, and effective December 1, 2021, stated that advance payments for the acquisition of capital goods with pending customs entry registration were allowed, provided that the following conditions were met: (1) the sum of advance payments made under this paragraph does not exceed 30% of the total amount of the goods to be imported; and (2) the sum of advance payments, on demand and on commercial debt without customs entry registration, made under this item does not exceed 80% of the total amount of the goods to be imported.

Communication “A” 7408 effective December 1, 2021, provided that the institution must have an affidavit from the customer stating that the amount pending settlement for payments made under this
paragraph as of December 1, 2021, including the payment whose execution is being requested, does not exceed the equivalent of US$1,000,000. In the event that this amount is exceeded, the institution must verify that the payment complies with the established conditions (30% and 80%). Subsequently, pursuant to Paragraph 2.3. of Communication “A” 7532 effective June 27, 2022, Paragraph 10.11.7 mentioned above was replaced allowing payments on demand or on commercial debt intended for the acquisition of capital goods without customs entry registration, and there is verification that the sum of the advance payments, on demand and on commercial debt without customs entry registration made under this paragraph, when they were included does not exceed 80% of the total amount of the goods to be imported.

Advance import deposits No. There are no foreign exchange regulations covering this topic.

Documentation requirements for release of foreign exchange for imports Yes. Under Paragraph 1.2 of the TO de EyC, the institution must have all of the documentation needed to demonstrate the authenticity of the import operation and its appropriate classification under the declared purpose.

Sections 10 and 11 establish the specific provisions for operations for the import of goods.

Section 10 establishes the requirements for access to the foreign exchange market, including documentation for: (1) payment of the import formalizations included in SEPAIMPO (Paragraph 10.3.2); (2) payments for imports of goods brought in under an Specific Request or by Courier that are not shown in SEPAIMPO (Paragraph 10.3.3); (3) additional requirements for payments for imports of secret military supplies (Paragraph 10.3.4); (4) payments for imports of goods entering from free zones with customs transfer of ownership from the exporter to the importer (Paragraph 10.3.5); (5) payments for imports using LCs or guaranteed drafts issued or granted by local financial institutions (Paragraph 10.3.6); (6) advance payment for imports (Paragraph 10.4.2); (7) payments for commercial debts or debts payable on demand against the presentation of the shipping documents (Paragraph 10.4.4); (8) payment of commercial guarantees for imports of goods granted by local financial institutions (Paragraph 10.4.4); (9) domestic sales prior to customs registration (Paragraph 10.4.4); (10) goods donated to the Ministry of Health (Paragraph 10.6.5); and (11) other purchases of goods abroad as set out in Paragraph 10.9.

Domiciliation requirements No. There are no foreign exchange regulations covering this topic.

Preshipment inspection No.

Letters of credit Yes. Payments for imports by LCs or guaranteed drafts issued or granted by local financial institutions are also authorized under Paragraph 10.3.6 of the TO de EyC, and the institution may access the foreign exchange market as long as they demonstrate customs registration of the goods, regardless of whether the remaining requirements established in the regulation are met. LCs are not required for the release of foreign exchange for imports.

Effective March 4, 2022 (date of Paragraph 5 of Communication “A” 7466), institutions must have documentation proving that, at the time of opening or issuance by the institution, any of the conditions set forth in Paragraph 10.14.2 were met (minimum period).

In accordance with Paragraph 2 of Communication “A” 7472
effective March 22, 2022, the institution may consider that the provisions of Paragraph 10.14.2.5 have been met (minimum financing term of 180 or 90 calendar days) provided, at the time of opening or issuance, the following conditions were met: (1) the maturity date established was equal to or greater than the date that arose from the sum of the term applicable to the goods in the aforementioned paragraph plus the estimated transportation time from the country of origin plus 15 calendar days; (2) the institution had an affidavit from the importer stating that he undertook, except in situations of force majeure beyond his control, to register the customs entry of the goods within 15 calendar days of their arrival in Argentina.

Import licenses used as exchange licenses

No prior import license is required for access to the foreign exchange market; only the customs documentation giving access for the transaction is required.

Paragraph 10.3 of Section 10 of the TO de EyC indicates the transactions that are considered Import Payments for Goods with registration of customs entry, establishing the requirements for access to the foreign exchange market, which include, among the documents required, evidence of registration of the customs entry into Argentina of the goods for which the payment is to be made for: (1) payment of the import formalizations included in the SEPAIMPO (Paragraph 10.3.2); (2) payments for imports of goods under Specific Requests or by Courier not included in the SEPAIMPO (Paragraph 10.3.3); (3) additional requirements for payments for imports of secret military supplies (Paragraph 10.3.4); (4) payments for imports of goods entering from free zones with customs transfer of ownership from the exporter to the importer (Paragraph 10.3.5); and (5) payments for imports using LCs or guaranteed drafts issued or granted by local financial institutions (Paragraph 10.3.6).

Other

Yes.

Paragraph 10.11.1 allows access as long as, among other conditions, the institution has an affidavit from the customer indicating that the total amount of the payments associated with their imports of goods transacted via the foreign exchange market as of January 1, 2020, including the payment requested, does not exceed, by more than the equivalent of US$1 million, the amount resulting from considering imports in their name in the Import Payments Tracking System (SEPAIMPO) as of the date indicated, payments under the provisions of Paragraphs 10.11.2 to 10.11.8 not associated with imports already showing in SEPAIMPO, and the amount of the payments made via the foreign exchange market as from July 6, 2020, that correspond to imports of goods brought in by individual request or courier or operations that are not included in Paragraphs 10.9.1 through 10.9.3, which were loaded as from July 1, 2020, or were loaded prior to this but have not arrived in Argentina prior to this date and the payments associated with goods donated to the National Ministry of Health to improve the nation’s medical or health capacity, as provided in
Paragraph 10.6.5. As well, the amount of access is reduced by the amount pending settlement of the sum of the payments with outstanding customs registration carried out between September 2, 2019, and December 31, 2019. Communication “A” 7375 effective October 6, 2021, reduced the exemption from US$1 million to US$250,000 and also eliminated from the quota calculation payments made under Paragraph 10.11.2 until October 31, 2021. Communication “A” 7385 from November 1, 2021, introduced the reduction without any ending date. Effective November 1, 2021, payments made under Paragraph 10.11.2 were included again in the quota calculation.

Paragraph 10.11.2 provides for deferred payments or payments on demand for imports of goods shipped on or after July 1, 2020, or goods that were previously shipped, but had not arrived in the country prior to that date. Communication “A” 7375, effective October 6, 2021, eliminated payments on demand for imports until October 31, 2021. Communication “A” 7385 included the elimination without an ending date. Effective March 4, 2022, a requirement was added that such payments must comply with one of the conditions set forth in Paragraph 10.14.2 (see Paragraph 12 of Communication “A” 7466).

Paragraph 10.11.3 provides for settlements of commercial debts for imports of goods with an export credit agency or foreign financial institution or that have a guarantee granted by such institutions, as long as the portion of such imports being paid has not been previously counted for purposes of payments under the threshold set in Paragraph 10.11.1. Pursuant to Paragraph 9 of Communication “A” 7416 effective December 9, 2021, import debts covered by guarantees issued by private insurers on behalf and by order of national governments of other countries were included in Paragraph 10.11.3.

Paragraphs 10.11.4 through 10.11.6 contemplate payments by the public sector, business organizations in which the federal government has a majority shareholding or a majority voice in corporate decisions, or trusts established with contributions from the national public sector, payments of imports of goods by a legal entity responsible for the provision of critical medicines to be brought in under a Specific Request by the beneficiary of the said medical coverage, and payments of imports with registration of customs clearance pending intended for the purchase of COVID-19 detection kits or other goods whose tariff positions are included in the list in Decree No. 333/2020 and its supplementary provisions.

Paragraph 10.11.8 allows principal payments on commercial debts for imports of goods, in accordance with Paragraph 10.2.4, when the customer has a “Certificate of Increase in Exports of Goods in 2021” issued in accordance with Paragraph 3.18 (according to Communication “A” 7301 effective June 14, 2021) for the equivalent of the value of the amount to be paid. This mechanism was extended under the same conditions for the year 2022 by Paragraph 6 of Communication “A” 7416 dated December 9, 2021. Paragraph 10.11.9 (according to Communication “A” 7348 dated August 26, 2021, and Paragraph 7 of Communication “A” 7416 dated December 9, 2021) allows access to the foreign exchange market for those customers who comply with the mechanism set forth in Paragraph 3.19 (Certificate of Entry of Financial Debt from Abroad). It should be noted that Paragraph 3.19 mentioned above...
states that customers who register settlements on new financial debt abroad and who have a certificate issued by an institution regarding compliance with the requirements set forth in Paragraph 3.19.2 may access the foreign exchange market to, among other things, make payments for the import of goods without the prior approval required in Paragraph 10.11.

Paragraph 10.11.10 allows the surplus of US$250,000 established for the threshold in Paragraph 10.11.1 to be increased up to US$3 million as long as advance payments for the import of products related to the provision of medicines or other goods related to the medical treatment and/or health care of the population or inputs necessary for the local production of the same are involved.

Under Paragraph 10.11.11 (included pursuant to Paragraph 1.1. of Communication “A” 7385 effective October 28, 2021), payments on demand or commercial debts without customs entry registration are allowed provided the following conditions are met: Paragraph 10.11.11.1: the operation involves the importation of inputs to be used for the production of goods in Argentina; and Paragraph 10.11.11.2: the payments made under this paragraph do not exceed, in the current calendar month and for the institutions as a whole, the amount obtained by considering the average of the total amount of imports of goods eligible for the purposes of Paragraph 10.11.1 in the last twelve calendar months, net of the amount pending settlement for payments with customs entry registration pending when there is a delay recorded by the importer.

Then, pursuant to Paragraph 1 of Communication “A” 7433 effective January 6, 2022, Paragraph 10.11.11.2 was modified, replacing the average amount of total imports eligible for the purposes of Paragraph 10.11.1 with the average amount of imports of inputs eligible for the purposes of Paragraph 10.11.1.

As of the dates of the rules set forth in Paragraph 5 of Communication “A” 7466 effective March 4, 2022, the following requirement was introduced: In those cases in which a declaration made through the SIMI is a requirement for the registration of the customs entry of goods, any of the conditions set forth in Paragraph 10.14.2, which are compatible with the operations referred to in this paragraph (10.11.11), must be met.

Paragraph 10.11.12 (introduced by Paragraph 3 of Communication “A” 7507 effective May 5, 2022) provides for payments with pending customs entry registration made with funds originating from financing for imports of goods granted by a local financial institution from a commercial credit line from abroad, provided the maturity date of the financing granted is equal to or later than the estimated date of arrival of the goods in Argentina plus 15 calendar days. The institution must have an affidavit from the importer in which he undertakes, except in situations of force majeure beyond his control, to register the goods for customs entry within 15 days of their arrival in Argentina.

From October 2, 2020, the amount of funds that importers may access on the foreign exchange market under the conditions established in Paragraph 10.11 was increased by the equivalent of 50% of the amounts that the importer repatriates and sells on the foreign exchange market from advance payments from exports or prefinancing of exports from abroad with a minimum term of 180 days (Paragraph 10.12).
Effective January 4, 2021 (Communication “A” 7193), access to the foreign exchange market is also allowed for the remaining 50% of the increase to the extent that the additional portion corresponds to payments for imports of capital goods. Effective March 19, 2021 (Communication “A” 7239), goods deemed to be necessary inputs for the production of exportable goods were added to the remaining 50% of the increase, with the institution being required to have an affidavit from the customer on the type of good involved and its status as an input in the production of goods for export.

Before making payments for imports of goods under the terms of Paragraphs 10.11.1, 10.11.10, and 10.11.11, the institution must, in addition to requesting an affidavit from the customer, establish that the said affidavit is consistent with the data in the online system implemented for that purpose in the BCRA.

Effective June 28, 2022, until September 30, 2022 (Communication “A” 7532), the client must submit an affidavit statement in which they record that by adding the amount of the payment whose course is being requested to the total payments made as of January 1, 2022, that do not correspond to some operations (Paragraph 2.2 of Communication “A” 7532, for example, temporary imports, imports paid with funds originated in the financing of imports of goods granted by a local financial entity from a foreign commercial line of credit), the equivalent to the proportional part of the annual limit of SIMI Category A that has accrued up to and including the current month is not exceeded. Effective October 1, 2022, the client’s affidavit, in which they record that by adding the amount of the payment whose course was being requested to the total payments made as of January 1, 2022, that do not correspond to some operations (Paragraph 2.2 of Communication “A” 7532, for example, temporary imports, imports paid with funds originated in the financing of imports of goods granted by a local financial entity from a foreign commercial line of credit), the equivalent to the proportional part of the annual limit of SIMI Category A that has accrued up to and including the current month was not exceeded, was eliminated.

Paragraph 3.19 (according to Communication “A” 7348 effective August 26, 2021) allowed access to the foreign exchange market for the cancellation of commercial debts with debt from abroad for the import of goods and services without prior approval by the BCRA. Communication “A” 7416 (Paragraph 7) effective January 3, 2022, allowed access to the foreign exchange market for the cancellation of debts (not just commercial) with debt from abroad for the import of goods and services without prior approval by the BCRA.

In addition, Paragraph 3.16 of the TO de EyC establishes additional requirements applicable to transactions involving flows of funds abroad via the foreign exchange market that customers must, if relevant, meet for purposes of access to the foreign exchange market without the prior approval of the BCRA:
(1) submission of an affidavit linked to their holdings of external assets in Argentina and abroad (Paragraph 3.16.2, incorporating Paragraph 1 of Communication “A” 7030 of May 28, 2020, as amended and/or supplemented by Communications “A” 7042 of June 11, 2020, 7094 of August 27, 2020, and 7327 of July 10, 2021);
(2) submission of an affidavit indicating that on the day on which the request for access to the market is submitted and during the previous...
90 days they have not sold securities in Argentina with settlement in foreign exchange or transferred securities to depositary agencies abroad, and indicating their commitment not to conduct such operations in the following 90 days (Paragraph 3.16.3, which incorporates Paragraph 3 of Communication “A” 7001 of April 30, 2020, replaced by Paragraph 4 of Communication “A” 7030 of May 28, 2020, which extended the time period indicated from 30 days to 90 days, supplemented by Communication “A” 7042 of June 11, 2020).

Effective July 12, 2021, Communication “A” 7327 included that BCRA’s prior authorization must be required except the customer submits an affidavit declaring that during the last 90 days as of the date of the transfer request, and also during the following 90 days, the customer had/will not arrange sales or exchanges of securities settled in foreign currency in Argentina or transfer of same to foreign depositary entities. Effective October 29, 2021, the same applies for transactions for the acquisition of foreign securities in Argentina with settlement in pesos (Communication “A” 7385); (3) the customer is not an individual or legal entity included by the AFIP in the database of invoices or equivalent documents deemed to be fictional (Paragraph 3.16.4, which incorporates Paragraph 5 of Communication “A” 7193 of December 30, 2020); (4) individuals or legal entities that are considered regulated entities having complied with the “Registry of Foreign Exchange Information of Exporters and Importers of Goods” and that are not indicated as “NOT REGISTERED” (Paragraph 3.16.5, which incorporates Communication “A” 7200 effective January 6, 2021, amended by Communication “A” 7273 of April 29, 2021); (5) verification, before proceeding with transactions involving the outflow of funds abroad, whether the customer is included in the list of CUITs with inconsistent transactions in the online system implemented by the BCRA for such purpose and, if this is the case, it must strengthen the control measures to determine the reasonableness and genuineness of the transactions (Paragraph 3.16.6 introduced by Communication “A” 7422 of December 16, 2021, taking into account the provisions of Communication “B” 12082 of October 28, 2020).

Import licenses and other nontariff measures

Yes.

By Resolution of the AFIP No. 3823/2015, the SIMI is intended to facilitate information-sharing and monitoring of the import process from its start through to customs clearance. Resolution No. 523/2017 of the Ministry of Commerce established a system of automatic and non-automatic import licenses. After December 31, 2017, Resolution AFIP No. 3823/2015 was superseded by Joint AFIP and Commerce Department Resolution No. 4185/2018, which redesigned the SIMI system in terms of specific operational factors for importers.

Communication “A” 7466 and supplementary provisions (Paragraph 10.14, amended by Communication “A” 7532 and supplementary provisions) provides that within the framework of the SIMI, the BCRA must assign a category (A, B, or C) to each one that is officially registered in the SIMI effective March 4, 2022, once the latter has obtained the “EXITED” status as of the intervention of the relevant competent agencies. The category assigned by the BCRA, considering the limits set for Categories A and C based on the values imported in 2020 and 2021, defines the minimum terms for access to the foreign exchange market to make payments for goods included in the SIMI.

In particular, it is established that up to September 30, 2022, the limit of SIMI Category A or C at each point in time will be equivalent to
the proportional part of the annual limit of each category accumulated up to and including the current month. In the event that the amount indicated for a category is less than US$250,000, the latter amount or the corresponding annual limit, whichever is lower, will be adopted.

In addition, the goods included in a SIMI Category A or in a SIMI Category C, provided the additional conditions are met, or that fall under the exceptions specified in Paragraph 10.14.2, may access the foreign exchange market to make advance, on demand, or deferred payments provided they meet the requirements established in each case.

The remaining goods included in a SIMI Category B or C, unless they have prior approval from the BCRA, may only access the foreign exchange market, provided the other applicable requirements are met, once the minimum term has elapsed from the date of customs entry registration, which is established in general at 180 calendar days and in particular at 60 calendar days for fertilizers, phytosanitary products, or inputs for processing in Argentina and 90 days for the tariff positions listed in Paragraph 10.14.8 (Paragraph 10.14.2.5).

Positive list No.

Negative list Yes. Restrictions are in effect for security, hygiene, environmental protection, and public health reasons.

The list of prohibited imports is included in the regulations issued by the competent bodies in each case (Ministry of Health, AFIP, National Administration of Drugs, Foods and Medical Devices, Ministry of Agriculture, Livestock and Fisheries, National Food Safety and Quality Service, Ministry of the Environment and Sustainable Development).

Open general licenses No. OGLs are not used.

Licenses with quotas Yes. Trade with Brazil in the automobile sector is subject to an administered trade regime. Under bilateral agreements, there are quotas with preferential tariffs for automobile sector products.

Other nontariff measures Yes. Argentina applies a special regime to sugar imports pending agreement on a common regime for this sector. Imports of used and retreaded tires, some used capital goods, and secondhand clothing are prohibited, except by nonprofit organizations.

Import taxes and/or tariffs Yes. As a member of MERCOSUR, Argentina applies CET to imports from the rest of the world for almost all products (except automobiles and sugar). The CET rates range from 0% to 35%. The national list of CET exceptions under Decision No. 11/2021 of the Common Market Council (CMC) allows Argentina to increase or decrease import duties from outside the zone on up to 100 tariff items, until December 31, 2028. On the contrary, CMC Decision No. 8/2021 authorizes the States Parties to apply a different rate of the CET for imports of capital goods and information technology and telecommunications goods until December 31, 2028. Both texts were incorporated into the Consolidated National Legislation, and the current lists are provided in the annexes to Decree No. 910/2021. In addition, CMC Decision 9/2021 extends until December 31, 2028, the term provided for in Article 11 of CMC Decision No. 27/15, which authorizes a temporary increase in import duties from outside the zone above the CET for 100 tariff positions. The list of tariff positions with import duty levels higher than the CET are contained in Decree No. 541/2019.
The current Statistical Rate (for the entire universe of goods, with a few exceptions linked to FTAs, including imports from MERCOSUR, and capital goods used for the hydrocarbon industry) is at a level of 3% (Decree No. 99/2019; by Decree 37/1998 it was 0.5%. Decree 332/2019 changed it to 2.5%). This rate will be in force, according to the successive extensions established by Decrees No. 1057/2020 and No. 901/2021, at least until December 31, 2024.

The 3% tax rate is applied as long as the operations do not exceed certain amounts. That is, there are specific limits that can be charged as a fee, according to the amount of the import operation, these being updated for the last time through the aforementioned Decree No. 99/2019, which are the following:

- For amounts lower than US$10,000 in imports, the maximum amount to be paid as tariff is the lower of 3% and US$180;
- For amounts between US$10,000 and US$100,000, the maximum amount to be paid as tariff is the lower of 3% and US$3,000;
- For amounts between US$100,000 and US$1,000,000, the maximum amount to be paid as tariff is the lower of 3% and US$30,000;
- For amounts higher than US$1,000,000, the maximum amount to be paid as tariff is the lower of 3% and US$150,000.

Taxes collected through the exchange system

No. There are no foreign exchange regulations covering this topic.

State import monopoly

No. There are no foreign exchange regulations covering this topic.

Exports and Export Proceeds

Repatriation requirements

Yes. Under Decree No. 609/2019, governed by Communication “A” 6770, the equivalent in foreign currency of exports with shipping licenses formalized on or after September 2, 2019, up to the invoiced value, depending on the agreed terms of sale, must be repatriated and sold on the foreign exchange market within the periods established in Paragraph 7.1.1 of the TO de EyC (incorporating Paragraph 1 of Communication “A” 6770).

In accordance with the provisions of Paragraph 7.1.1 of the TO de EyC, the time periods for compliance with the repatriation and sale requirements are:

- 15 calendar days for exports of goods under the following tariff positions: 1001.19.00, 1001.99.00, 1005.90.10 (except hominy corn), 1201.90.00, 1208.10.00, 1507.10.00, 1507.90.19, 1517.90.90 (except those that do not contain soy), 2304.00.10, and 2304.00.90.

- 30 calendar days for exports of goods under tariff positions 1003.90.10, 1003.90.80, 1007.90.00, and those under Chapter 27 (except position 2716.00.00).

- 60 calendar days for transactions with related counterparties that do not involve goods referred to under Paragraphs 7.1.1.1 and 7.1.1.2 and exports under Chapters 26 (except positions 2601.11.00, 2603.00.90, 2607.00.00, 2608.00.10, 2613.90.90, 2616.10.00, 2616.90.00, and 2621.10.00) and 71 (except positions 7106.91.00, 7108.12.10, and 7112.99.00).

Exporters who carried out transactions with related counterparties involving goods included in Item 7.1.1.4, in which the importer is a company controlled by the Argentine exporter, may request an extension of the time period up to:
-the period provided for in the said paragraph when the exporter has not registered exports with a total value of more than the equivalent of US$50,000,000 in the calendar year immediately preceding the official recording of the destination;

-a period of 120 calendar days when the exporter has exceeded the amount indicated in the preceding paragraph and the exported goods fall under the positions listed below: 0202.30.00.111D, 0202.30.00.115M, 0202.30.00.117R, 0202.30.00.118U, 0202.30.00.121G, 0202.30.00.124N, 0202.30.00.126T, 0202.30.00.131K, 0202.30.00.133P, 0202.30.00.136W, 0202.30.00.137Y, 0202.30.00.141N, 0202.30.00.142Q, 0202.30.00.146Z, 0202.30.00.147B, 0202.30.00.151R, 0202.30.00.943L, 0202.30.00.991Y, 0202.30.00.992A, 0202.30.00.995G, 0203.21.00.000J, 0206.29.90.300P, 0207.14.00.100K, 1901.90.20 (in ready-to-ship packaging with a net content of 1 kg or less);

7.1.1.4. 180 (one hundred and eighty) calendar days for the rest of the goods.

7.1.1.5. 365 (three hundred and sixty-five) calendar days for transactions carried out under the “SIMPLE EXPORT” system, regardless of the type of goods exported.

Regardless of these maximum periods, export proceeds must be repatriated and sold on the foreign exchange market within 5 business days of the date of receipt or collection abroad.

Exports formalized prior to September 2, 2019, that are pending payment as of that date must be repatriated and sold on the foreign exchange market within 5 business days of the date of receipt or payment abroad or in Argentina (Paragraph 7.1.2).

Advance payments, prefinancing, and post-financing abroad must be repatriated and sold on the foreign exchange market within 5 business days of the date of receipt or disbursement abroad (Paragraph 7.1.3). Paragraph 8 of Communication “A” 7532 effective June 27, 2022, established an additional period of 10 calendar days for their settlement in the foreign exchange market.

Prefinancing, post-financing, and financing for foreign importers granted by local financial institutions must be sold on the foreign exchange market at the time of disbursement (Paragraph 7.1.4).

Extensions may be granted to the period for the repatriation and sale of the foreign exchange when the oversight entities note specific situations (cases that do not meet these requirements must have the prior approval of the BCRA):

(1) when there is a minimum period for the financing of the import in the destination country (Paragraph 7.5.1);
(2) exports entirely prefinanced locally or abroad through the term of the financing (Paragraph 7.5.2);

Effective February 25, 2021, Com “A” 7229 replaced Paragraph 7.5.2, incorporating local or foreign post-financing, establishing that if the exporter demonstrates sale on the foreign exchange market prior to the end of the term, post-financing of exports that cover the entire amount pending payment on the license, without verification of the conditions provided in Paragraphs 9.3.4 and 9.3.5 for the
issuance of the corresponding application of funds certificate, the time period for the sale of the foreign exchange may be extended from shipment until the date of maturity of the longer-term loan discounted and/or assigned by the exporter. The latter will also apply when the exporter has partially prefinanced the transaction and provides evidence that it has settled post-financing of exports covering the remaining amount pending payment in the foreign exchange market prior to maturity;

(3) licenses for which the funds are held in accounts associated with the financial debts (Paragraph 7.5.3);

(4) operations with related counterparties eligible for an extension, defaults in collection management or delinquent debtors (Paragraph 7.5.4);

(5) lack of determination of the definitive price in exports under the adjustable price or mineral concentrate regimes (Paragraph 7.5.5 included pursuant to Paragraph 3 of Communication “A” 7374 of September 30, 2021).

Broadly speaking, the provisions regulating operations for exports of goods and their tracking are found in Sections 7, 8, and 9 of the TO de EyC.

Sale on the foreign exchange market of the foreign exchange from exports will not be required when the funds repatriated within the period provided for the operation are credited to foreign exchange accounts held by the customer with local financial institutions and are simultaneously applied to operations regarding which the foreign exchange regulations allow access to the foreign exchange market in exchange for domestic currency, bearing in mind the limits established for each purpose and the tax neutral use of this mechanism (Paragraph 2.6, TO de EyC).

**Surrender requirements** Yes.

**Surrender to the central bank** No.

**Surrender to authorized dealers** Yes.

Under Decree No. 609/2019, regulated by Com “A” 6770, the equivalent in foreign exchange of exports with shipping licenses formalized since September 2, 2019, up to the invoiced value, depending on the agreed terms of sale, must be repatriated and sold on the foreign exchange market within the periods established in Paragraph 7.1.1 (incorporating Paragraph 1 of Com “A” 6770).

Communications “A” 6770, “A” 6776, “A” 6780, and “A” 6882 established the time periods for compliance with the aforementioned obligation; they were incorporated in Paragraph 7.1.1 of the TO de EyC.

The time periods for compliance with the repatriation and sale requirements are 15, 30, 60, 120, 180, and 365 calendar days, depending on the type of good exported, whether operations between related companies are involved (in the case of operations between related companies it also depends on the type of merchandise exported), the volume of exports recorded by the exporter in the previous year, and the export regime.

Under Paragraphs 1.1, 1.2, and 7.1 of the TO de EyC, local financial institutions intervene when sale of the foreign exchange is required.

**Financing requirements** No.

**Documentation requirements** No.

<table>
<thead>
<tr>
<th>Collected through the exchange system</th>
<th>No.</th>
<th>Decree No. 793/2018 established the application of an export duty to all Common Nomenclature of MERCOSUR goods until December 12, 2020. The duty to apply was 12% up to a maximum of 4 pesos on each dollar of the taxable value including the amount resulting from the application of the tax rate stipulated therein, or the official f.o.b. price, as applicable. Likewise, if the goods were included in Annex 1 of the aforementioned Decree, the maximum limit to be applied was 3 pesos on each dollar of the taxable value. In the case of goods whose export had already been taxed, the new export duty must be added. In addition, Decree No. 1201/2018 applied an export duty to the provision of services covered by Article 10(2)(c) of Law No. 22.415 (Customs Code) until December 31, 2020. The duty to apply was 12% up to a maximum of 4 pesos on each dollar of the taxable value. Micro- and small-sized enterprises that export less than US$600,000 annually are exempt from the payment, as long as they are registered with the small- and medium-sized enterprises Registry of the Ministry of Productive Development.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Other export taxes</td>
<td>Yes.</td>
<td>Decree No. 27.541 on “Solidarity and the Reactivation of Production” eliminated the export duty ceilings of 4 pesos and 3 pesos per dollar exported, while a general tax rate of 12% remained in effect for all goods, with the exception of certain products such as soy-based products (33%), biodiesel (30%), peanuts, wheat flour and sunflower (7%), and peas, beans, chickpeas, lentils, sunflower oil, and sunflower seeds for human consumption (5%). As well, Law No. 27.541 on “Solidarity and the Reactivation of Production” established a universal export duty of 5% until December 31, 2021, on exports of services, repealing Article 2 of Decree No. 1.201 of December 28, 2018, which established the limit of 4 pesos per dollar, but maintaining the exemption for small- and medium-sized enterprises exporting less than US$600,000. AFIP Resolution No. 4.666/20 establishes that the amount of the duty is calculated on the amount resulting from the class “E” electronic invoice issued for the operation for the export of services. Effective January 1, 2022, the universal export duty of 5%, on exports of services, with the exemption for small- and medium-sized enterprises exporting less than US$600,000, established by Law No. 27.541 expired.</td>
</tr>
</tbody>
</table>
Decree Nos. 785/2020, 789/2020, and 790/2020 established discounts for mineral products, certain industrial goods and inputs produced, as well as agricultural (soybeans) and agroindustrial (soybean oil and biodiesel) goods. Decree No. 1034/2020 reduced duties to 0% for exports of knowledge-based services (software, nanotechnology, biotechnology, audiovisual, aerospace, satellite industries, etc.).

Effective January 1, 2021, Decree No. 1060/2020 provides for the expansion of the set of industrial goods subject to lower duties by means of rates inversely proportional to the value added of the product. Given that implementation of Decree No. 793/2018 expired on December 31, 2020, the export duty arrangement was standardized via a rate based on the value-added of the product. As well, export duties were eliminated for certain regional products (aquaculture, beekeeping, horticulture, olive-growing, vegetables, potatoes, cassava, etc.).

Effective March 10, 2021, subsequently, Decree No. 150/2021 set the duty at 0% on incremental exports of automobiles, based on their FOB value, by each exporter until December 31, 2021, considering 2020 as the base period.

Effective June 28, 2021, Decree No. 410/2021 reduced the duty on certain regional products, such as bees, eggs, aromatic plants, potato seeds, sunflowers, and rice, to 0%.

Decree No. 851/2021, effective December 15, 2021, set the export duty rate at 0% for certain agricultural products, such as wheat, soybeans, sorghum, and corn. In addition, Decree No. 852/2021, effective January 15, 2022, set at 0% the rate for products that are environmentally friendly, biological, or organic and that present the certificate of the certifying company authorized by the National Food Safety and Quality Service.

Finally, Decree No. 908/2021 extends, until December 31, 2023, the 8% rate in effect for certain goods covered by Decree No. 785/2020 (peat, bitumen and natural asphalts, and gold).

### Payments for Invisible Transactions and Current Transfers

| Controls on these transfers | Yes. | Payments for services provided by nonresidents unconnected with the customer may be made as long as documentation demonstrating the existence of the service is provided. |

Under Paragraph 1.2 of the TO de EyC, the institution must have all of the documentation needed to demonstrate the authenticity of the operation and its appropriate classification under the declared purpose.

For debts, Paragraph 1.9 of the TO de EyC requires completion of the “Survey of External Assets and Liabilities,” even when no funds have been repatriated on the foreign exchange market and/or future access to this market is not planned.
Paragraph 3.2 of the TO de EyC allows access for service payments to counterparties unconnected with the customer as long as documentation is provided to verify the existence of the service.

Effective January 7, 2022, Communication “A” 7433 established that institutions must verify that a customer has a declaration made through the Integrated System for Monitoring Payments for Services Abroad (SIMPES) with “APPROVED” status, except for transactions involving services provided under codes S02 (Freight services), S03 (Passenger transportation services), S06 (Travel and other card payments), S25 (Government services), S26 (Health services by travel assistance companies), and S27 (Other health services).

The preceding requirement will not apply in the event of payment by: (1) the public sector; (2) all business organizations, regardless of their corporate form, in which the national government has a majority stake in the capital or in the adoption of corporate decisions; (3) trusts constituted with contributions from the national public sector; (4) financial institutions for their own imports of services performed by the same institution; or (5) institutions for the cancellation of LCs or guarantee letters issued or granted up through January 6, 2022.

In the case of LCs or guarantee letters issued or granted on or after January 7, 2022, the institution must have documentation proving that, at the time of opening or issuance by the institution, the customer had the declaration made through the SIMPES with “APPROVED” status, with the exceptions indicated above.

Paragraph 3 of Communication “A” 7532 effective June 27, 2022, introduced as an additional requirement for customer transactions covered by the SIMPES or the institution’s own transactions involving items for which a declaration in the said system is required for customers, that the institution may only grant access to the foreign exchange market if one of the following conditions is met:

- the institution has an affidavit from the customer stating that the accumulated amount, including the payment to be made, of the payments made by the customer through the foreign exchange market for the services items covered by the SIMPES, in the current calendar year and among the institutions as a whole, does not exceed the amount resulting from the following elements:

  - the proportional part, accumulated through the current month, of the total amount of payments made by the importer during the year 2021 for all the items included.

In the event that the latter amount is less than US$50,000, the latter amount or the annual limit, whichever is lower, will be adopted, minus the amount outstanding to date under LCs or guarantee letters issued in its name by local financial institutions for the importation of services.

For the purpose of calculating payments made through the foreign exchange market in the current year and those made in the previous
year, no account should be taken of those transactions that have been included in the mechanisms set forth in Paragraphs 3.18 and 3.19, or those corresponding to Items “S08. Insurance premiums” and “S09. Payment of claims.”

If the customer has not made payments for the items covered through the foreign exchange market in the previous calendar year, or the payments made were less than the equivalent of US$20,000, the latter value is taken as the annual limit for the purposes of the provisions of this paragraph. The payment falls under the mechanisms provided for in Paragraphs 3.18. (Certificate of Increase in Exports) and 3.19 (Certificate of Entry of New Financial Debt from Abroad). The payment pertains to Items “S08. Insurance premiums” and “S09. Payment of claims.” Payment is made 180 calendar days after the date of the effective delivery of the service.

The customer has access simultaneously with the settlement of a new financial debt abroad for which the total principal amount comes due after the date of effective delivery of the service plus the time period specified in Paragraph (d).

The customer has access with funds arising from financing of imports of services granted by a local financial institution from a commercial line of credit from abroad and the total principal amount under the financing has a maturity date subsequent to the date of effective delivery of the service plus the time period specified in Paragraph (d).

To access the foreign exchange market to make their own payments under LCs or guarantee letters issued or granted as of June 27, 2022, in connection with the importation of services, financial institutions must have an affidavit from the customer, made at the time of opening or issuance, stating that this date falls within any of the situations set forth in Paragraphs (a) to (d) of the preceding paragraph.

Access is also allowed for payment on maturity of debts for services, conditional on verification that the operation was declared, if appropriate, in the most recent required submission of the “Survey of External Assets and Liabilities.”

The BCRA’s prior approval is required for access to the foreign exchange market to prepay debts for services (unless the transaction falls under Paragraph 3.19.1.3 as established by Paragraph 3 of Communication “A” 7516 dated May 19, 2022) and to make payments for services to related foreign counterparties, except for:
- Credit card issuers by transfers for tourism and travel as long as they do not correspond to operations that require the prior approval of the BCRA, such as participation in gambling and betting and/or the transfer of funds to accounts with Payment Services Providers (PSPs) and/or to investment accounts with investment managers established abroad and/or for foreign exchange operations abroad and/or the purchase of cryptoassets, as set out in Paragraph 4.1.4;
- Local agents collecting funds in Argentina for services provided by nonresidents to residents;
- Expenditures paid by entities to entities abroad for regular operations;
- Payments of reinsurance premiums abroad, with the transfer abroad having to take place in the name of the foreign beneficiary approved by the National Superintendency of Insurance;
- Transfers by traveler assistance companies for payments of health
coverage claims originating in services provided abroad by third parties to their resident customers; 
- Payments of services related to the operational leasing of ships, subject to conditions, added as Paragraph 3.2.6 by Com “A” 6972 of April 16, 2020;  
- Effective June 4, 2021, payments of debt principal on maturity, when the customer has a “Certificate of Increase in Exports of Goods” issued in accordance with Paragraph 3.18 for the equivalent of the amount being paid, incorporated as Paragraph 3.2.7 by Communication “A” 7301 of June 4, 2021; mechanism extended to the year 2022 by Paragraph 6 of Communication “A” 7416 of December 9, 2021. 
- Payment on maturity of the outstanding debt principal as of June 30, 2021, when the customer has a certificate from an institution issued in accordance with the provisions of Paragraph 3.19, for the equivalent of the amount to be paid (Paragraph 3.2.8, incorporated by Communication “A” 7348 effective August 26, 2021). Then, Communication “A” 7416 dated December 9, 2021, effective January 3, 2022, payments on maturity of an obligation for a service rendered at least 180 calendar days prior to access or derived from a contract that has been signed a similar period in advance.

Under Paragraph 3.3 of the TO de EyC, access to the foreign exchange market is allowed on maturity to make interest payments on debts for imports of goods and services to the extent that it is verified that the operation has been declared, where appropriate, in the most recent required submission of the “Survey of External Assets and Liabilities,” and prior approval of the BCRA is required to access the foreign exchange market for the prepayment of interest on commercial debts for imports of goods and services.

In addition, Paragraph 3.16 of the TO de EyC establishes additional requirements applicable to transactions involving flows of funds abroad via the foreign exchange market that customers must, if relevant, meet for purposes of access to the foreign exchange market without the prior approval of the BCRA: 
(1) submission of an affidavit linked to their holdings of external assets in Argentina and abroad (Paragraph 3.16.2, incorporating Paragraph 1 of Communication “A” 7030 of May 28, 2020, as amended and/or supplemented by Communications “A” 7042 of June 11, 2020, 7094 of August 27, 2020, and 7327 of July 10, 2021); 
(2) submission of an affidavit indicating that on the day on which the request for access to the market is submitted and during the previous 90 days they have not sold securities in Argentina with settlement in foreign exchange or transferred securities to depositary agencies abroad, and indicating their commitment not to conduct such operations in the following 90 days (Paragraph 3.16.3, which incorporates Paragraph 3 of Communication “A” 7001 of April 30, 2020, replaced by Paragraph 4 of Communication “A” 7030 of May 28, 2020, which extended the time period indicated from 30 days to 90 days, supplemented by Communication “A” 7042 of June 11, 2020).

Effective July 12, 2021, Communication “A” 7327 included that BCRA’s prior authorization must be required except the customer submits an affidavit declaring that during the last 90 days as of the date of the transfer request, and also during the following 90 days, the customer had/will not arrange sales or exchanges of securities settled in foreign currency in Argentina or transfer of same to foreign depositary entities. Effective October 29, 2021, the same applies for transactions for the acquisition of foreign securities in Argentina with
settlement in pesos (Communication “A” 7385); (3) the customer is not an individual or legal entity included by the AFIP in the database of invoices or equivalent documents deemed to be fictional (Paragraph 3.16.4, which incorporates Paragraph 5 of Communication “A” 7193 of December 30, 2020); (4) individuals or legal entities that are considered regulated entities having complied with the “Registry of Foreign Exchange Information of Exporters and Importers of Goods” and that are not indicated as “NOT REGISTERED” (Paragraph 3.16.5, which incorporates Communication “A” 7200 effective January 6, 2021, amended by Communication “A” 7273 of April 29, 2021); (5) verification, before proceeding with transactions involving the outflow of funds abroad, whether the customer is included in the list of CUITs with inconsistent transactions in the online system implemented by the BCRA for such purpose and, if this is the case, it must strengthen the control measures to determine the reasonableness and genuineness of the transactions (Paragraph 3.16.6 introduced by Communication “A” 7422 of December 16, 2021, taking into account the provisions of Communication “B” 12082 of October 28, 2020).

For debts, Paragraph 1.9 of the TO de EyC requires completion of the “Survey of External Assets and Liabilities,” even when no funds have been repatriated on the foreign exchange market and/or future access to this market is not planned.

Paragraph 3 of Communication “A” 7532 effective June 27, 2022, introduced as an additional requirement for customer transactions covered by the SIMPES with “APPROVED” status or the institution’s own transactions involving items for which a declaration in the said system is required for customers, that the institution may only grant access to the foreign exchange market if one of the following conditions is met:

- the institution has an affidavit from the customer stating that the accumulated amount, including the payment to be made, of the payments made by the customer through the foreign exchange market for the services items covered by the SIMPES, in the current calendar year and among the institutions as a whole, does not exceed the amount resulting from the following elements:

- the proportional part, accumulated through the current month, of the total amount of payments made by the importer during the year 2021 for all the items included.

In the event that the latter amount is less than US$50,000, the latter amount or the annual limit, whichever is lower, will be adopted, minus the amount outstanding to date under LCs or guarantee letters issued in its name by local financial institutions for the importation of services.

If the customer has not made payments for the items covered through the foreign exchange market in the previous calendar year, or the payments made were less than the equivalent of US$20,000, the latter value is taken as the annual limit for the purposes of the provisions of this paragraph.

The payment falls under any of the exceptions provided for in the said regulation, such as, for example, that the payment is made more than 180 calendar days from the date of the effective delivery of the
service or is financed with foreign debt whose principal matures after the date of the effective delivery of the service plus the term indicated.

Indicative limits/bona fide test

Yes. Under Paragraph 1.2 of the TO de EyC, the institution must have all of the documentation needed to demonstrate the genuine nature of the operation and its appropriate classification under the declared purpose.

Investment-related payments

Yes.

Prior approval

Yes. Paragraph 3.4 of the TO de EyC authorizes access for transfers of foreign exchange abroad to nonresident shareholders for profits and dividends under the conditions set out in 3.4.1 through 3.4.6 of Paragraph 3.4 of the TO de EyC. Other cases require the prior approval of the BCRA to access the foreign exchange market for transfers abroad for these purposes, as long as: they correspond to closed and audited balances (Paragraph 3.4.1), the total amount paid for this purpose to nonresident shareholders including the payment requested does not exceed the corresponding amount in domestic currency according to the distribution determined by the Meeting of Shareholders (Paragraph 3.4.2); if appropriate, the most recent required submission of the “Survey of External Assets and Liabilities” has been made for the transactions involved (Paragraph 3.4.3) and the institution meets the following criteria:
- it records direct investment contributions paid as of January 17, 2020 (Paragraph 3.4.4.1), allowing the transfer abroad of profits and dividends up to 30% of the amount paid as of that date;
- it involves profits generated by projects included in the “Plan Gas” corresponding to direct foreign investment contributions repatriated and sold on the foreign exchange market as of November 16, 2020 (Paragraph 3.4.4.2, which incorporates Com “A” 7168 of November 19, 2020);

Paragraph 3.18 allows access with a “Certificate of Increase in Exports of Goods” without prior approval of the BCRA for payments of profits and dividends under certain conditions (according to Communication “A” 7301 effective June 14, 2021, mechanism extended under the same conditions for the year 2022 by Paragraph 6 of Communication “A” 7416 of December 9, 2021).

Access to the foreign exchange market is allowed for the payment of principal and interest on foreign financial debts as long as compliance with the conditions indicated in Paragraph 3.5 of the TO de EyC is verified.

Prepayment more than 3 days before the due date requires prior approval except when such prepayment is made simultaneously with the settlement of funds under a new financial debt and compliance with the other conditions indicated in Paragraph 3.5.3 is verified.

Foreign financial debts disbursed as from September 1, 2019, must be repatriated and sold on the foreign exchange market as a requirement for later access to that market for principal and interest payments. In the case of institutions, the provisions of the previous paragraph are considered to be met when the funds are included in the General Exchange Position (PGC) (Paragraph 2.4 of the TO de EyC).
In addition, Paragraph 3.16 of the TO de EyC establishes additional requirements applicable to transactions involving flows of funds abroad via the foreign exchange market that customers must, if relevant, meet for purposes of access to the foreign exchange market without the prior approval of the BCRA:

(1) submission of an affidavit linked to their holdings of external assets in Argentina and abroad (Paragraph 3.16.2, incorporating Paragraph 1 of Communication “A” 7030 of May 28, 2020, as amended and/or supplemented by Communications “A” 7042 of June 11, 2020, 7094 of August 27, 2020, and 7327 of July 10, 2021);

(2) submission of an affidavit indicating that on the day on which the request for access to the market is submitted and during the previous 90 days they have not sold securities in Argentina with settlement in foreign exchange or transferred securities to depositary agencies abroad, and indicating their commitment not to conduct such operations in the following 90 days (Paragraph 3.16.3, which incorporates Paragraph 3 of Communication “A” 7001 of April 30, 2020, replaced by Paragraph 4 of Communication “A” 7030 of May 28, 2020, which extended the time period indicated from 30 days to 90 days, supplemented by Communication “A” 7042 of June 11, 2020).

Effective July 12, 2021, Communication “A” 7327 included that BCRA’s prior authorization must be required except the customer submits an affidavit declaring that during the last 90 days as of the date of the transfer request, and also during the following 90 days, the customer had/will not arrange sales or exchanges of securities settled in foreign currency in Argentina or transfer of same to foreign depositary entities. Effective October 29, 2021, the same applies for transactions for the acquisition of foreign securities in Argentina with settlement in pesos (Communication “A” 7385); (3) the customer is not an individual or legal entity included by the AFIP in the database of invoices or equivalent documents deemed to be fictional (Paragraph 3.16.4, which incorporates Paragraph 5 of Communication “A” 7193 of December 30, 2020);

(4) individuals or legal entities that are considered regulated entities having complied with the “Registry of Foreign Exchange Information of Exporters and Importers of Goods” and that are not indicated as “NOT REGISTERED” (Paragraph 3.16.5, which incorporates Communication “A” 7200 effective January 6, 2021, amended by Communication “A” 7273 of April 29, 2021);

(5) verification, before proceeding with transactions involving the outflow of funds abroad, whether the customer is included in the list of CUITs with inconsistent transactions in the online system implemented by the BCRA for such purpose and, if this is the case, it must strengthen the control measures to determine the reasonableness and genuineness of the transactions (Paragraph 3.16.6 introduced by Communication “A” 7422 of December 16, 2021, taking into account the provisions of Communication “B” 12082 of October 28, 2020).

For debts, Paragraph 1.9 of the TO de EyC requires completion of the “Survey of External Assets and Liabilities,” even when no funds have been repatriated on the foreign exchange market and/or future access to this market is not planned.

Under Paragraph 7 of Communication “A” 7106 (as of September 16, 2020), which is incorporated in Paragraph 3.17 of the TO de EyC, debtors of the nonfinancial private sector and financial institutions with maturities up to a date that was extended to

Quantitative limits: Yes.
December 31, 2022, because of transactions completed, were requested to submit a refinancing plan based on the following criteria: (1) the net amount of access to the foreign exchange market may not exceed 40% of the principal coming due; and (2) the remaining principal has been, at a minimum, refinanced with new external debt with an average maturity of 2 years. Exceptions are provided for.

Paragraph 3.18 of the TO de EyC allows access with a “Certificate of Increase in Exports of Goods” without prior approval of the BCRA for principal payments on financial debts as of their maturity under certain conditions.

It also considers that the refinancing scheme provided for in Paragraph 7 of Communication “A” 7106 (Paragraph 3.17 of the TO de EyC) complies with the said Certification.

Under Paragraph 1.2 of the TO de EyC, the entity must have all of the documentation needed to demonstrate the genuine nature of the operation and its appropriate classification under the declared purpose.

Paragraph 3.2 of the TO de EyC allows access to the foreign exchange market for service payments to counterparties unconnected with the customer as long as documentation is provided to verify the existence of the service.

Effective January 7, 2022, Communication “A” 7433 established that institutions must verify that a customer has a declaration made through the SIMPES with “APPROVED” status, except for transactions involving services provided under codes S02 (Freight services), S03 (Passenger transportation services), S06 (Travel and other card payments), S25 (Government services), S26 (Health services by travel assistance companies), and S27 (Other health services).

The preceding requirement will not apply in the event of payment by: (1) the public sector; (2) all business organizations, regardless of their corporate form, in which the national government has a majority stake in the capital or in the adoption of corporate decisions; (3) trusts constituted with contributions from the national public sector; (4) financial institutions for their own imports of services performed by the same institution; or (5) institutions for the cancellation of LCs or guarantee letters issued or granted up through January 6, 2022.

In the case of LCs or guarantee letters issued or granted on or after January 7, 2022, the institution must have documentation proving that, at the time of opening or issuance by the institution, the customer had a declaration made through the SIMPES with “APPROVED” status, with the exceptions indicated above.

Effective June 27, 2022, paragraph 3 of Communication “A” 7532 dated June 27, 2022, introduced as an additional requirement for customer transactions covered by the SIMPES or the institution’s own transactions involving items for which a declaration in the said system is required for customers, that the institution may only grant access to the foreign exchange market if one of the following conditions is met:

- the institution has an affidavit from the customer stating that the
accumulated amount, including the payment to be made, of the payments made by the customer through the foreign exchange market for the services items covered by the SIMPES, in the current calendar year and among the institutions as a whole, does not exceed the amount resulting from the following elements:

-the proportional part, accumulated through the current month, of the total amount of payments made by the importer during the year 2021 for all the items included.

In the event that the latter amount is less than US$50,000, the latter amount or the annual limit, whichever is lower, will be adopted, minus the amount outstanding to date under LCs or guarantee letters issued in its name by local financial institutions for the importation of services.

For the purpose of calculating payments made through the foreign exchange market in the current year and those made in the previous year, no account should be taken of those transactions that have been included in the mechanisms set forth in Paragraphs 3.18 and 3.19, or those corresponding to Items “S08. Insurance premiums” and “S09. Payment of claims.”

If the customer has not made payments for the items covered through the foreign exchange market in the previous calendar year, or the payments made were less than the equivalent of US$20,000, the latter value is taken as the annual limit for the purposes of the provisions of this paragraph.

The payment falls under the mechanisms provided for in Paragraphs 3.18 (Certificate of Increase in Exports) and 3.19 (Certificate of Entry of New Financial Debt from Abroad). The payment pertains to Items “S08. Insurance premiums” and “S09. Payment of claims.”

payment is made 180 calendar days after the date of the effective delivery of the service. The customer has access simultaneously with the settlement of a new financial debt abroad for which the total principal amount comes due after the date of effective delivery of the service plus the time period specified in Paragraph (d);

-the customer has access with funds arising from financing of imports of services granted by a local financial institution from a commercial line of credit from abroad and the total principal amount under the financing has a maturity date subsequent to the date of effective delivery of the service plus the time period specified in Paragraph (d).

To access the foreign exchange market to make their own payments under LCs or guarantee letters issued or granted as of June 27, 2022, in connection with the importation of services, financial institutions must have an affidavit from the customer, made at the time of opening or issuance, stating that this date falls within any of the situations set forth in Paragraphs (a) to (d) of the preceding paragraph.

Access is also allowed for payment of debts for services, conditional on verification that the operation was declared, where appropriate, in the most recent required submission of the “Survey of External Assets and Liabilities.”
The BCRA’s prior approval is required for access to the foreign exchange market for early repayment of debts for services (unless the transaction falls under Paragraph 3.19.1.3 as established by Paragraph 3 of Communication “A” 7516 dated May 19, 2022) and to make payments for services to related foreign counterparties, except for, among others:
- Credit card issuers by transfers for tourism and travel as long as they do not correspond to operations that require the prior approval of the BCRA, such as participation in gambling and betting and/or the transfer of funds to accounts with PSPs and/or to investment accounts with investment managers established abroad and/or for foreign exchange operations abroad and/or the purchase of cryptoassets, as set out in Paragraph 4.1.4;
- Local agents collecting funds in Argentina for services provided by nonresidents to residents;
- Transfers by traveler assistance companies for payments of health coverage claims originating in services provided abroad by third parties to their resident customers.

In addition, Paragraph 3.16 of the TO de EyC establishes additional requirements applicable to transactions involving flows of funds abroad via the foreign exchange market that customers must, if relevant, meet for purposes of access to the foreign exchange market without the prior approval of the BCRA:
(1) submission of an affidavit linked to their holdings of external assets in Argentina and abroad (Paragraph 3.16.2, incorporating Paragraph 1 of Communication “A” 7030 of May 28, 2020, as amended and/or supplemented by Communications “A” 7042 of June 11, 2020, 7094 of August 27, 2020, and 7327 of July 10, 2021);
(2) submission of an affidavit indicating that on the day on which the request for access to the market is submitted and during the previous 90 days they have not sold securities in Argentina with settlement in foreign exchange or transferred securities to depositary agencies abroad, and indicating their commitment not to conduct such operations in the following 90 days (Paragraph 3.16.3, which incorporates Paragraph 3 of Communication “A” 7001 of April 30, 2020, replaced by Paragraph 4 of Communication “A” 7030 of May 28, 2020, which extended the time period indicated from 30 days to 90 days, supplemented by Communication “A” 7042 of June 11, 2020).
Effective July 12, 2021, Communication “A” 7327 included that BCRA’s prior authorization must be required except the customer submits an affidavit declaring that during the last 90 days as of the date of the transfer request, and also during the following 90 days, the customer had/will not arrange sales or exchanges of securities settled in foreign currency in Argentina or transfer of same to foreign depositary entities. Effective October 29, 2021, the same applies for transactions for the acquisition of foreign securities in Argentina with settlement in pesos (Communication “A” 7385); (3) the customer is not an individual or legal entity included by the AFIP in the database of invoices or equivalent documents deemed to be fictional (Paragraph 3.16.4, which incorporates Paragraph 5 of Communication “A” 7193 of December 30, 2020); (4) individuals or legal entities that are considered regulated entities having complied with the “Registry of Foreign Exchange Information of Exporters and Importers of Goods” and that are not indicated as “NOT REGISTERED” (Paragraph 3.16.5, which incorporates Communication “A” 7200 effective January 6, 2021,
amended by Communication “A” 7273 of April 29, 2021); (5) verification, before proceeding with transactions involving the outflow of funds abroad, whether the customer is included in the list of CUITs with inconsistent transactions in the online system implemented by the BCRA for such purpose and, if this is the case, it must strengthen the control measures to determine the reasonableness and genuineness of the transactions (Paragraph 3.16.6 introduced by Communication “A” 7422 of December 16, 2021, taking into account the provisions of Communication “B” 12082 of October 28, 2020).

Quantitative limits Yes. Paragraph 3 of Communication “A” 7532 effective June 27, 2022, introduced as an additional requirement for customer transactions covered by the SIMPES with “APPROVED” status or the institution’s own transactions involving items for which a declaration in the said system is required for customers, that the institution may only grant access to the foreign exchange market if one of the following conditions is met:

-the institution has an affidavit from the customer stating that the accumulated amount, including the payment to be made, of the payments made by the customer through the foreign exchange market for the services items covered by the SIMPES, in the current calendar year and among the institutions as a whole, does not exceed the amount resulting from the following elements:

-the proportional part, accumulated through the current month, of the total amount of payments made by the importer during the year 2021 for all the items included.

In the event that the latter amount is less than US$50,000, the latter amount or the annual limit, whichever is lower, will be adopted, minus the amount outstanding to date under LCs or guarantee letters issued in its name by local financial institutions for the importation of services.

If the customer has not made payments for the items covered through the foreign exchange market in the previous calendar year, or the payments made were less than the equivalent of US$20,000, the latter value is taken as the annual limit for the purposes of the provisions of this paragraph.

The payment falls under any of the exceptions provided for in said regulation, such as, for example, that the payment is made more than 180 calendar days from the date of the effective delivery of the service or is financed with foreign debt whose principal matures after the date of the effective delivery of the service plus the term indicated.

Indicative limits/bona fide test Yes. Under Paragraph 1.2 of the TO de EyC, the entity must have all of the documentation needed to demonstrate the genuine nature of the operation and its appropriate classification under the declared purpose.

Personal payments Yes. These transactions are regulated by Paragraph 3.8 of the TO de EyC).

Prior approval Yes. In addition, Paragraph 3.16 of the TO de EyC establishes additional requirements applicable to transactions involving flows of funds abroad via the foreign exchange market that customers must, if relevant, meet for purposes of access to the foreign exchange market.
without the prior approval of the BCRA:
(1) submission of an affidavit linked to their holdings of external assets in Argentina and abroad (Paragraph 3.16.2, incorporating Paragraph 1 of Communication “A” 7030 of May 28, 2020, as amended and/or supplemented by Communications “A” 7042 of June 11, 2020, 7094 of August 27, 2020, and 7327 of July 10, 2021);
(2) submission of an affidavit indicating that on the day on which the request for access to the market is submitted and during the previous 90 days they have not sold securities in Argentina with settlement in foreign exchange or transferred securities to depositary agencies abroad, and indicating their commitment not to conduct such operations in the following 90 days (Paragraph 3.16.3, which incorporates Paragraph 3 of Communication “A” 7001 of April 30, 2020, replaced by Paragraph 4 of Communication “A” 7030 of May 28, 2020, which extended the time period indicated from 30 days to 90 days, supplemented by Communication “A” 7042 of June 11, 2020).
Effective July 12, 2021, Communication “A” 7327 included that BCRA’s prior authorization must be required except the customer submits an affidavit declaring that during the last 90 days as of the date of the transfer request, and also during the following 90 days, the customer had/will not arrange sales or exchanges of securities settled in foreign currency in Argentina or transfer of same to foreign depositary entities. Effective October 29, 2021, the same applies for transactions for the acquisition of foreign securities in Argentina with settlement in pesos (Communication “A” 7385); (3) the customer is not an individual or legal entity included by the AFIP in the database of invoices or equivalent documents deemed to be fictional (Paragraph 3.16.4, which incorporates Paragraph 5 of Communication “A” 7193 of December 30, 2020);
(4) individuals or legal entities that are considered regulated entities having complied with the “Registry of Foreign Exchange Information of Exporters and Importers of Goods” and that are not indicated as “NOT REGISTERED” (Paragraph 3.16.5, which incorporates Communication “A” 7200 effective January 6, 2021, amended by Communication “A” 7273 of April 29, 2021);
(5) verification, before proceeding with transactions involving the outflow of funds abroad, whether the customer is included in the list of CUITs with inconsistent transactions in the online system implemented by the BCRA for such purpose and, if this is the case, it must strengthen the control measures to determine the reasonableness and genuineness of the transactions (Paragraph 3.16.6 introduced by Communication “A” 7422 of December 16, 2021, taking into account the provisions of Communication “B” 12082 of October 28, 2020).

Paragraph 3.8 of the TO de EyC regulates access to the foreign exchange market for resident individuals for the formation of external assets, family support, and operations in derivatives without the prior approval of the BCRA under certain conditions:
- the equivalent of US$200 is not exceeded in the calendar month for all the institutions and for all the items mentioned above, net of the deductions applicable for the following transactions (Paragraph 3.8.1 of the TO de EyC);
- the settlement of obligations between residents under the provisions of Paragraph 3.6, including financing granted by local financial institutions for foreign currency purchases made by means of credit or debit cards (Paragraph 3.8.1.1, which incorporates Communication “A” 7106 of September 15, 2020);
- the purchase of foreign currency to be applied simultaneously to the purchase of real estate in Argentina with mortgage loans under the provisions of Paragraph 3.9 (Paragraph 3.8.1.2, which incorporates Communication “A” 6787 of September 19, 2019);
- cash withdrawals with debit cards made abroad debited to the customer’s local accounts in pesos as provided in Item 4.1.1 (Paragraph 3.8.1.3, which incorporates Communication “A” 6948 of March 28, 2020);
- purchases made with a debit card abroad debited to a local account in pesos in accordance with the provisions of Paragraph 4.1.2. (Paragraph 3.8.1.4, which incorporates Communication “A” 7006 of September 15, 2020);
- the transaction is made by debiting the customer’s accounts with local financial institutions, allowing the use of cash in local currency in transactions up to the equivalent of US$100 in a calendar month at all institutions (Paragraph 3.8.2);
- in the previous calendar month the customer has not exceeded the limits mentioned above (Paragraph 3.8.3);
- the customer undertakes not to enter into securities transactions with settlement in foreign currency in Argentina from the moment the access is requested and for the following 90 (ninety) calendar days (Paragraph 3.8.4, which incorporates Communication “A” 7106 of September 15, 2020);
- the customer does not have any financing pending repayment that corresponds to (Paragraph 3.8.5):
  (1) that provided for in Paragraph 2.1.1 of the rules on “Financial services within the framework of the public health emergency provided for by Decree No. 260/2020 Coronavirus (COVID-19)” (Paragraph 3.8.5.1, which incorporates Communication “A” 7106 of September 15, 2020);
  (2) “Zero Rate Loans,” “Zero Rate Cultural Loans,” or “Subsidized Rate Loans for Companies,” provided for in Paragraphs 2.1.2 and 2.1.3 of the rules on “Financial services within the framework of the public health emergency provided for by Decree No. 260/2020 Coronavirus (COVID-19)” (Paragraph 3.8.5.2, which incorporates Communications “A” 6993 of April 24, 2020, and “A” 7082 of August 6, 2020, respectively);
  (3) financing in pesos included in Paragraph 2 of Communication “A” 6937, in Paragraphs 2 and 3 of Communication “A” 7006 and supplementary provisions (Paragraph 3.8.5.3, which incorporates Communications “A” 7001 of April 30, 2020, and “A” 7001 of May 8, 2020, respectively).
- the customer is not a beneficiary of indexing of the amount of the installment payment under the terms of Article 2 of Decree No. 319/2020 and related provisions and regulations (Paragraph 3.8.6, which incorporates Communication “A” 7106 of September 15, 2020);
- the customer is not a national public civil servant with the rank of Deputy Secretary of State (or equivalent rank) or above, nor is a member of the boards of directors of national public banks or the BCRA (Paragraph 3.8.7, which incorporates Communication “A” 7126 of October of 2020);
- the customer is not covered by Joint Resolution of the President of the Honorable Senate of the Nation and the President of the Honorable Chamber of Deputies of the Nation No. 12/2020 of October 1, 2020 (Paragraph 3.8.8, which incorporates Communication “A” 7126 of October of 2020);

- the institution has an affidavit from the customer indicating that the customer complies with the previously mentioned requirements (Paragraph 3.8.9);

- the institution has verified in the online system implemented for that purpose that the affidavit of the customer is consistent with the data held by the BCRA (Paragraph 3.8.10);

- In the event that the transaction corresponds to items included in the formation of the customer’s external assets, the selling authorized institution must deliver the banknotes or traveler’s checks in foreign currency or credit the funds to a foreign currency account held by the customer in local financial institutions or a bank account held by the customer abroad, as appropriate (Paragraph 3.8.11). In any case, the institution must verify that the applicable requirements for the crediting of funds to a foreign currency account held by the customer at local financial institutions are complied with requirement included in Paragraph 3.8.11 pursuant to Paragraph 3 of Communication “A” 7401 of November 18, 2021.

Quantitative limits Yes.

Paragraph 3.8 of the TO de EyC establishes that resident individuals may access the market for the purchase of foreign banknotes and foreign exchange for the purposes indicated without the prior approval of the BCRA under certain conditions, including that they do not exceed the equivalent of US$200 in a calendar month at all institutions and for all of the purposes indicated (Paragraph 3.8.1 of the TO de EyC) and that the operation takes place by debiting the accounts of the customer with local financial institutions, with the use of domestic currency cash allowed for operations up to the equivalent of US$100 a calendar month at all institutions (Paragraph 3.8.2).

Paragraph 3.14.3 allows transfers abroad by individuals from their local foreign currency accounts to their own bank accounts abroad (Paragraph 3.14.1) and the accounts of money remittance agencies abroad up to the equivalent of US$500 a calendar month with all institutions, for the purpose of support for Argentine residents who have had to remain abroad owing to the measures adopted in the context of the COVID-19 pandemic (Paragraph 3.14.3, which incorporates Communication “A” 6948 of March 28, 2020).

Indicative limits/bona fide test Yes.

No.
Yes.

The use of credit cards abroad is allowed, with some conditions set by Paragraphs 4.1.1 and 4.1.4 (which incorporate Communications “A” 6948 and “A” 6823, respectively).

Paragraph 4 of Com “A” 6815 establishes that, since October 28, 2019, cash withdrawals abroad using local debit cards had to be debited from the local foreign currency accounts of the customer. Subsequently, Paragraph 4 of Com “A” 6948 of March 28, 2020, allows cash withdrawals abroad using local debit cards with debit from local peso accounts of customers, said withdrawal being considered a formation of foreign assets by the resident and included in the limits set in Paragraph 3.8, with the institution being required to first verify in the online system indicated in Paragraph 3.8.4 and record the operation as a purchase of foreign currency banknotes (code A09). These provisions are found in Paragraph 4.1.1 of the TO de EyC.

No.

Paragraph 1 of Communication “A” 6823 provides that financial institutions and other local card issuers must have the prior approval of the BCRA to access the foreign exchange market to make payments abroad relating to the use of credit, debit, or prepaid cards issued in Argentina, resulting directly or indirectly from the use of international payment networks in the following transactions: participation in specific types of gambling and betting and/or transfers of funds to PSPs and/or transfers of funds to investment accounts with investment managers established abroad and/or foreign exchange operations abroad and/or the purchase of various types of cryptoassets and/or purchases of jewels, precious stones, and precious metals – gold, silver, platinum, etc. (incorporated by Communication “A” 7001 of April 30, 2020).

These provisions are found in Paragraph 4.1.4 of the TO de EyC and supplementary provisions.

Indicative limits/bona fide test

Yes.

Under Paragraph 1.2 of the TO de EyC, the entity must have all of the documentation needed to demonstrate the genuine nature of the operation and its appropriate classification under the declared purpose.
Proceeds from Invisible Transactions and Current Transfers

**Repatriation requirements** Yes. In accordance with Decree No. 690/1029 (amended by Article 1 of Decree No. 91/2019 B.O. of December 28, 2019), Paragraph 4 of Com “A” 6770 establishes that proceeds from the provision of services by residents to nonresidents must be repatriated and sold on the foreign exchange market within a maximum of 5 (five) business days following their receipt abroad or in Argentina or their credit to accounts abroad; these provisions are found in paragraph 2.2 of the TO de EyC.

The foreign exchange amounts resulting from the payments of claims under contracted coverage, to the extent that they cover the value of the exported goods, are covered by this obligation.

**Surrender requirements** Yes.

**Surrender to the central bank** No.

**Surrender to authorized dealers** Yes. In accordance with Decree No. 690/1029 (amended by Article 1 of Decree No. 91/2019 B.O. December 28, 2019), Paragraph 4 of Com “A” 6770 establishes that proceeds from the provision of services by residents to nonresidents must be repatriated and sold on the foreign exchange market within a maximum of 5 business days following their receipt abroad or in Argentina or their credit to accounts abroad; these provisions are found in paragraph 2.2 of the TO de EyC. Paragraph 2.6 establishes exemptions to sale on the foreign exchange market under specific conditions.

Provided the conditions set forth in Paragraphs 2 or 3 of Communication “A” 7518 effective June 2, 2022, are met, payments for exports of services that are received within the regulatory time periods established for the items will be exempted from the requirement calling for sale in the foreign exchange market:

- S01 Maintenance and repair.
- S07 Construction services.
- S12 Telecommunications services.
- S13 Computer services.
- S14 Information services
- S15 Charges for use of intellectual property.
- S16 Research and development services.
- S17 Legal, accounting, and management services.
- S18 Advertising, market research, and public opinion polling services.
- S19 Architectural, engineering, and other technical services.
- S21 Trade-related services.
- S22 Other business services.
- S23 Audiovisual and related services.
- S24 Other personal, cultural, and recreational services (includes educational classes).
- S27 Other health services.

The funds should be credited to foreign currency accounts held by the customer at local financial institutions and the use of this mechanism should be tax neutral.

If the exporter is an individual, Paragraph 2 provides that he may use this mechanism up to the equivalent of US$12,000 in a calendar year, for all the institutions and for all the items included; he must sell in the market any income in excess of the said amount and submit an affidavit stating that he has not exceeded the annual limit and with
respect to the performance of certain transactions with securities.

If the exporter is a legal entity, Paragraph 3 provides that it must have a “Certificate of Increase in Proceeds from Exports of Services in 2022,” which is issued by a local financial institution when it verifies, among other conditions, that:
(1) the value of the proceeds from exports of services for the projected items entering the foreign exchange market in the year 2022 is greater than the value of its export proceeds for the same set of items received in all of 2021;
(2) the amount of the certificates issued, including the one requested, does not exceed the equivalent in foreign currency of the lesser of the following two values:
   (a) 50% of the amount by which the income entering the foreign exchange market from the proceeds of exports of services under the items mentioned in Paragraph 1 in the year 2022 exceeds the amount received for such items during the entire previous year;
   (b) the amount in foreign currency equivalent to 20% of the gross wages paid to workers in the previous calendar month multiplied by the number of months remaining until the end of the year including the current month.
(3) the institution has an affidavit from the exporter stating its commitment to ensure that the funds not sold through this mechanism will be used to pay net wages of workers in foreign currency within the limit of 20% provided for in Article 107 of the Labor Contract Law, and it does not have any record of non-compliance with respect to the entry and sale of proceeds from exports of services and with respect to the performance of certain transactions with securities.

Under Paragraphs 1.1, 1.2, and 2.2 of the TO de EyC, local financial institutions intervene in cases in which sale of the foreign exchange on the foreign exchange market is required.

Restrictions on use of funds No.

Capital Transactions

Controls on capital transactions Yes.

Broadly speaking, as indicated in Article 1 of Decree No. 616/05, regardless of whether there is repatriation on the foreign exchange market or not, any borrowing operation by residents that implies a future payment in foreign exchange to nonresidents must be registered with the BCRA, and, in accordance with Paragraph 1.9 of the TO de EyC, the “Survey of External Assets and Liabilities” must be completed, even when no funds have been repatriated on the foreign exchange market and/or future access to this market is not planned.

In the case of the operations covered by Article 3 of Decree No. 616/05, the proceeds from the sale of the foreign exchange must be credited to a local account (Paragraph 2.8 of the TO de EyC).

For the remaining requirements set out in Article 4 of the aforementioned decree, the provisions of Resolution No. 3/15 of the former Ministry of the Treasury and Public Finance, which reduced the percentage of the deposit indicated in Paragraph (c) of this article to 0, and the provisions of Resolution No. 1/17 of the MOF, which reduced the term indicated in Articles 2 and 4(a) of Decree No. 616
Repatriation requirements Yes.

Since September 1, 2019, Paragraph 1.7 of Com “A” 6780 establishes that the receipt by residents of foreign currency amounts from sales to nonresidents of nonproduced nonfinancial assets must be repatriated and sold on the foreign exchange market within 5 business days of the date of receipt of the funds abroad or in Argentina or their credit to accounts abroad (found in Paragraph 2.3 of the TO de EyC). Foreign financial debts disbursed as from September 1, 2019, must be repatriated and sold on the foreign exchange market as a prerequisite for subsequent access to the market for principal and interest payments. Com “A” 6776 of September 5, 2019, provides that, in the case of institutions, this requirement is deemed to be met when the funds are included in the PGC. These provisions are found in Paragraph 2.4 of the TO de EyC and supplementary provisions.

Paragraph 1 of Com “A” 6838 establishes that issues of debt securities by residents that are registered in Argentina as from November 29, 2019, denominated and subscribed in foreign currencies and the capital and interest of which are payable in Argentina in foreign currency, must be sold on the foreign exchange market as a requirement for subsequent access to the market for principal and interest payments. In the case of legal entities, the requirement is deemed to be met when the funds are included in the PGC (Paragraph 2.5 of the TO de EyC).

Paragraph 2.6 allows exceptions to sale on the foreign exchange market under certain conditions.

Paragraph 1.9 of the TO de EyC requires completion of the “Survey of External Assets and Liabilities,” even when no funds have been repatriated on the foreign exchange market and/or future access to this market is not planned.

In the case of the operations covered by Article 3 of Decree No. 616/05, the proceeds from the sale of foreign exchange must be credited to a local account. For the remaining requirements set out in Article 4 of the said decree, the provisions of Resolution No. 3/15 of the former Ministry of the Treasury and Public Finance, which reduced the percentage of the deposit indicated in Paragraph (c) of this article to 0, and the provisions of Resolution No. 1/17 of the MOF, which reduced the term indicated in Articles 2 and 4(a) of Decree No. 616, as amended, to 0 days, are applicable (now Paragraph 2.8 of the TO de EyC).

Surrender requirements Yes.

Surrender to the central bank No.

Surrender to authorized dealers Yes.

Since September 1, 2019, Paragraph 1.7 of Communication “A” 6780 establishes that the receipt by residents of foreign currency amounts from sales to nonresidents of nonproduced nonfinancial assets must be repatriated and sold on the foreign exchange market within 5 business days of the date of receipt of the funds abroad or in Argentina or their credit to accounts abroad (incorporated in Paragraph 2.3 of the TO de EyC). Foreign financial debts disbursed as from September 1, 2019, must be repatriated and sold on the foreign exchange market as a prerequisite for subsequent access to the market for principal and interest payments. Com “A” 6776 of September 5, 2019, provides that, in the case of institutions, this requirement is deemed to be met when the funds are included in the
PGC. These provisions are found in Paragraph 2.4 of the TO de EyC and supplementary provisions.

Paragraph 1 of Com “A” 6838 establishes that issues of debt securities by residents that are registered in Argentina as from November 29, 2019, denominated and subscribed in foreign currencies and the capital and interest of which are payable in Argentina in foreign currency, must be sold on the foreign exchange market as a requirement for subsequent access to the market for principal and interest payments. In the case of legal entities, the requirement is deemed to be met when the funds are included in the PGC (Paragraph 2.5 of the TO de EyC).

Paragraph 2.6 allows exceptions to sale on the foreign exchange market under certain conditions.

Paragraph 1.9 of the TO de EyC requires completion of the “Survey of External Assets and Liabilities,” even when no funds have been repatriated on the foreign exchange market and/or future access to this market is not planned.

In the case of the operations covered by Article 3 of Decree No. 616/05, the proceeds from the sale of foreign exchange must be credited to a local account. For the remaining requirements set out in Article 4 of the said decree, the provisions of Resolution No. 3/15 of the former Ministry of the Treasury and Public Finance, which reduced the percentage of the deposit indicated in Paragraph (c) of this article to 0, and the provisions of Resolution No. 1/17 of the MOF, which reduced the term indicated in Articles 2 and 4(a) of Decree No. 616, as amended, to 0 days, are applicable (now Paragraph 2.8 of the TO de EyC).

Under Paragraphs 1.1 and 1.2 of the TO de EyC, local financial institutions intervene in cases in which sale of the foreign exchange on the foreign exchange market is required.

There are no limitations on purchase by nonresidents of shares or other securities of a participating nature in the local market.

For direct investment or portfolio investment by a nonresident, the foreign exchange regulations do not establish a requirement for the sale of the foreign exchange.

Under Paragraph 2.7 of the TO de EyC, entities may conduct swaps and arbitrage with customers in the case of the repatriation of foreign exchange from abroad and allow these operations to be credited to accounts opened by the customer in foreign exchange, as long as these are not operations covered by the requirement for sale on the foreign exchange market.

Under Paragraph 1.9 of the TO de EyC, the “Survey of External Assets and Liabilities” must be completed.

Portfolio investments are operations covered by Article 3 of Decree No. 616/05, under which the proceeds from the sale of the foreign exchange must be credited to a local account. For the remaining requirements set out in Article 4 of the said decree, the provisions of
Resolution No. 3/15 of the former Ministry of the Treasury and Public Finance, which reduced the percentage of the deposit indicated in Paragraph (c) of this article to 0, and the provisions of Resolution No. 1/17 of the MOF, which reduced the term indicated in Articles 2 and 4(a) of Decree No. 616, as amended, to 0 days, are applicable (Paragraph 2.8 of the TO de EyC).

Paragraph 4.3. of the TO de EyC introduced by Communication “A” 7340 effective August 13, 2021, establishes that securities purchase and sale transactions with settlement in foreign currency must be paid through one of the following mechanisms:

- by transferring funds to and from demand accounts in the customer’s name at local financial institutions;
- by wire transfer to bank accounts in the customer’s name at a foreign institution that is not incorporated in countries or territories where the FATF Recommendations are not applied or not sufficiently applied.

Under no circumstances may these transactions be settled through payment in foreign currency banknotes or through their deposit in custodial accounts or in accounts of third parties.

Securities transactions with settlement in foreign currency are carried out in the capital market and allow the entry and exit of cross-border capital transactions through securities transactions at an exchange rate arising from the purchase and sale of securities in that market.

Residents and nonresidents can do transactions known as “Contado Con Liquidación” (CCL). These transactions are carried out exclusively in the capital market and consist of the purchase of negotiable instruments (notes or securities) traded in pesos in the local market (markets regulated by the CNV) and then sold in foreign markets where such negotiable instruments are also traded, and there they are settled in foreign currency.

Under the CNV regulations, foreign and Argentine issuers must meet the same requirements for public offerings of securities in Argentina. Foreign issuers must establish a permanent representative office and a domicile in Argentina to receive notices. Foreign issuers must state whether the securities are also being offered to the public in their country of origin and indicate all initial and periodic reporting requirements applicable to them. If the CNV determines that the regulations in the country of origin properly protect local investors and ensure an adequate flow of information, it may relax the requirements for those issuers. The CNV may authorize foreign issuers on a case-by-case basis to submit only such information as they would periodically submit to the corresponding authority in their jurisdiction of origin. Issuers of securities offered publicly in Argentina and abroad must submit all information required by the entities authorizing the foreign public offering and listing to the CNV in Spanish.

The financial statements at the close of the fiscal year, in all cases, must be presented to include supplementary information to reconcile the effects on net equity and net earnings of accounting mechanisms other than those current in the Republic of Argentina, stating the exchange rate used to convert the items mentioned to Argentine pesos. Where the annual financial information is concerned, and for intermediate periods, publications may be issued without the indicated reconciliation. In such case, it should be clearly stated that the information was prepared in accordance with the current accounting standards in the country of origin, and that they are
presented without being reconciled with Argentina's accounting standards.
Nonresidents are subject to the same conditions as residents with regard to the sale or issue of shares or other equity securities.

Paragraph 3.13 (which incorporates Paragraph 7 of Com “A” 6770, as amended by Communications “A” 6815 and 6855) establishes that access to the foreign exchange market by nonresident customers for the purchase of foreign exchange for the repatriation of portfolio investments requires the prior approval of the BCRA, with various exceptions including international organizations, official export credit agencies, and diplomatic and consular offices. Residents and nonresidents can do transactions known as CCL. These transactions are carried out exclusively in the capital market and consist of the purchase of negotiable instruments (notes or securities) traded in pesos in the local market (markets regulated by the CNV) and then sold in foreign markets where such negotiable instruments are also traded, and there they are settled in foreign currency.

Paragraph 3.14.1 of the TO de EyC allows the transfer of foreign exchange abroad by individuals from their local foreign currency accounts to their own bank accounts abroad.

In addition, Paragraph 3.16 of the TO de EyC establishes additional requirements applicable to transactions involving flows of funds abroad via the foreign exchange market that customers must, if relevant, meet for purposes of access to the foreign exchange market without the prior approval of the BCRA:
(1) submission of an affidavit linked to their holdings of external assets in Argentina and abroad (Paragraph 3.16.2, incorporating Paragraph 1 of Communication “A” 7030 of May 28, 2020, as amended and/or supplemented by Communications “A” 7042 of June 11, 2020, 7094 of August 27, 2020, and 7327 of July 10, 2021);
(2) submission of an affidavit indicating that on the day on which the request for access to the market is submitted and during the previous 90 days they have not sold securities in Argentina with settlement in foreign exchange or transferred securities to depositary agencies abroad, and indicating their commitment not to conduct such operations in the following 90 days (Paragraph 3.16.3, which incorporates Paragraph 3 of Communication “A” 7001 of April 30, 2020, replaced by Paragraph 4 of Communication “A” 7030 of May 28, 2020, which extended the time period indicated from 30 days to 90 days, supplemented by Communication “A” 7042 of June 11, 2020).
Effective July 12, 2021, Communication “A” 7327 included that BCRA’s prior authorization must be required except the customer submits an affidavit declaring that during the last 90 days as of the date of the transfer request, and also during the following 90 days, the customer had/will not arrange sales or exchanges of securities settled in foreign currency in Argentina or transfer of same to foreign depositary entities. Effective October 29, 2021, the same applies for transactions for the acquisition of foreign securities in Argentina with settlement in pesos (Communication “A” 7385); (3) the customer is not an individual or legal entity included by the AFIP in the database of invoices or equivalent documents deemed to be fictional (Paragraph 3.16.4, which incorporates Paragraph 5 of...
Communication “A” 7193 of December 30, 2020); (4) verification, before proceeding with transactions involving the outflow of funds abroad, whether the customer is included in the list of CUITs with inconsistent transactions in the online system implemented by the BCRA for such purpose and, if this is the case, it must strengthen the control measures to determine the reasonableness and genuineness of the transactions (Paragraph 3.16.6 introduced by Communication “A” 7422 of December 16, 2021, taking into account the provisions of Communication “B” 12082 of October 28, 2020).

Paragraph 4.3. of the TO de EyC introduced by Communication “A” 7340 effective August 13, 2021, establishes that securities purchase and sale transactions with settlement in foreign currency must be paid through one of the following mechanisms:
- by transferring funds to and from demand accounts in the customer’s name at local financial institutions;
- by wire transfer to bank accounts in the customer’s name at a foreign institution that is not incorporated in countries or territories where the FATF Recommendations are not applied or not sufficiently applied.
Under no circumstances may these transactions be settled through payment in foreign currency banknotes or through their deposit in custodial accounts or in accounts of third parties.

Portfolio investments by residents abroad are subject to the provisions of Paragraphs 3.8 (individuals) and 3.10 (legal entities). This means that for individuals there is a limit of US$200 a month with all institutions, the remaining requirements established in the aforementioned paragraph must be met, and amounts above this limit are subject to prior approval. Legal entities require prior approval. However, residents can do transactions known as CCL. These transactions are carried out exclusively in the capital market and consist of the purchase of negotiable instruments (notes or securities) traded in pesos in the local market (markets regulated by the CNV) and then sold in foreign markets where such negotiable instruments are also traded, and there they are settled in foreign currency.

Paragraph 3.14.1 authorizes the transfer of foreign exchange abroad by individuals from their local foreign currency accounts to their own bank accounts abroad.

Under Paragraph 4.3.1 of the TO de EyC (incorporates Paragraph 6 of Communication “A” 7106 from September 16, 2020), transactions in securities contracted abroad may not be paid in pesos in Argentina; only operations contracted in Argentina may be paid in pesos in Argentina.

In addition, Paragraph 3.16 of the TO de EyC establishes additional requirements applicable to transactions involving flows of funds abroad via the foreign exchange market that customers must, if relevant, meet for purposes of access to the foreign exchange market without the prior approval of the BCRA:
(1) submission of an affidavit linked to their holdings of external assets in Argentina and abroad (Paragraph 3.16.2, incorporating Paragraph 1 of Communication “A” 7030 of May 28, 2020, as
amended and/or supplemented by Communications “A” 7042 of June 11, 2020, 7094 of August 27, 2020, and 7327 of July 10, 2021; (2) submission of an affidavit indicating that on the day on which the request for access to the market is submitted and during the previous 90 days they have not sold securities in Argentina with settlement in foreign exchange or transferred securities to depository agencies abroad, and indicating their commitment not to conduct such operations in the following 90 days (Paragraph 3.16.3, which incorporates Paragraph 3 of Communication “A” 7001 of April 30, 2020, replaced by Paragraph 4 of Communication “A” 7030 of May 28, 2020, which extended the time period indicated from 30 days to 90 days, supplemented by Communication “A” 7042 of June 11, 2020).

Effective July 12, 2021, Communication “A” 7327 included that BCRA’s prior authorization must be required except the customer submits an affidavit declaring that during the last 90 days as of the date of the transfer request, and also during the following 90 days, the customer had/will not arrange sales or exchanges of securities settled in foreign currency in Argentina or transfer of same to foreign depositary entities. Effective October 29, 2021, the same applies for transactions for the acquisition of foreign securities in Argentina with settlement in pesos (Communication “A” 7385); (3) the customer is not an individual or legal entity included by the AFIP in the database of invoices or equivalent documents deemed to be fictional (Paragraph 3.16.4, which incorporates Paragraph 5 of Communication “A” 7193 of December 30, 2020); (4) individuals or legal entities that are considered regulated entities having complied with the “Registry of Foreign Exchange Information of Exporters and Importers of Goods” and that are not indicated as “NOT REGISTERED” (Paragraph 3.16.5, which incorporates Communication “A” 7200 effective January 6, 2021, amended by Communication “A” 7273 of April 29, 2021); (5) verification, before proceeding with transactions involving the outflow of funds abroad, whether the customer is included in the list of CUITs with inconsistent transactions in the online system implemented by the BCRA for such purpose and, if this is the case, it must strengthen the control measures to determine the reasonableness and genuineness of the transactions (Paragraph 3.16.6 introduced by Communication “A” 7422 of December 16, 2021, taking into account the provisions of Communication “B” 12082 of October 28, 2020).

Sale or issue abroad by residents: Yes.

The foreign exchange regulations do not establish a repatriation requirement for direct and portfolio investment sales operations abroad by residents.

If the funds are repatriated, under Paragraph 2.7 of the TO de EyC, entities may conduct swaps and arbitrage with customers and allow credit of the proceeds of these operations to the foreign currency accounts of the customer, as long as these are not operations covered by the requirement for sale on the foreign exchange market.

Under Paragraph 4.3.1 of the TO de EyC (incorporates Paragraph 6 of Communication “A” 7106 of September 15, 2020, in force as of September 16, 2020), transactions in securities contracted abroad may not be paid in pesos in Argentina; only operations contracted in Argentina may be paid in pesos in Argentina.

In the case of operations covered by Article 3 of Decree No. 616/05 (operations exceeding US$2 million by residents), the proceeds of the sale of the foreign exchange must be credited to a local account.

Sale or issue abroad by residents: Yes.
For the remaining requirements set out in Article 4 of the said decree, the provisions of Resolution No. 3/15 of the former Ministry of the Treasury and Public Finance, which reduced the percentage of the deposit indicated in Paragraph (c) of this article to 0, and the provisions of Resolution No. 1/17 of the MOF, which reduced the term indicated in Articles 2 and 4(a) of Decree No. 616, as amended, to 0 days, are applicable (Paragraph 2.8 of the TO de EyC).

**Bonds or other debt securities**
Yes.

**Purchase locally by nonresidents**
Yes.

The foreign exchange regulations do not establish a requirement for the sale of the foreign exchange for portfolio investments by nonresidents.

Under Paragraph 2.7 of the TO de EyC, entities may conduct swaps and arbitrage with customers in the case of the repatriation of foreign exchange and allow credit of the proceeds of these operations to the foreign currency accounts of the customer, as long as these are not operations covered by the requirement for sale on the foreign exchange market.

Paragraph 1.9 of the TO de EyC requires completion of the “Survey of External Assets and Liabilities.”

Portfolio investments are operations covered by Article 3 of Decree No. 616/05, that is, the proceeds of the sale of the foreign exchange must be credited to a local account. For the remaining requirements set out in Article 4 of the said decree, the provisions of Resolution No. 3/15 of the former Ministry of the Treasury and Public Finance, which reduced the percentage of the deposit indicated in Paragraph (c) of this article to 0, and the provisions of Resolution No. 1/17 of the MOF, which reduced the term indicated in Articles 2 and 4(a) of Decree No. 616 to 0 days, are applicable (Paragraph 2.8 of the TO de EyC).

Paragraph 4.3. of the TO de EyC introduced by Communication “A” 7340 effective August 13, 2021, establishes that securities purchase and sale transactions with settlement in foreign currency must be paid through one of the following mechanisms:
- by transferring funds to and from demand accounts in the customer’s name at local financial institutions;
- by wire transfer to bank accounts in the customer’s name at a foreign institution that is not incorporated in countries or territories where the FATF Recommendations are not applied or not sufficiently applied.

Under no circumstances may these transactions be settled through payment in foreign currency banknotes or through their deposit in custodial accounts or in accounts of third parties.

Residents and nonresidents can do transactions known as CCL. These transactions are carried out exclusively in the capital market and consist of the purchase of negotiable instruments (notes or securities) traded in pesos in the local market (markets regulated by the CNV) and then sold in foreign markets where such negotiable instruments are also traded, and there they are settled in foreign currency.

**Sale or issue locally by nonresidents**
Yes.

Under the CNV regulations, foreign and Argentine issuers must meet the same requirements for public offerings of securities in Argentina. Foreign issuers must establish a permanent representative office and a domicile in Argentina to receive notices. Foreign issuers must state whether the securities are also being offered to the public in their
country of origin and indicate all initial and periodic reporting
requirements applicable to them. If the CNV determines that the
regulations in the country of origin properly protect local investors
and ensure an adequate flow of information, it may relax the
requirements for those issuers. The CNV may authorize foreign
issuers on a case-by-case basis to submit only such information as
they would periodically submit to the corresponding authority in
their jurisdiction of origin. Issuers of securities offered publicly in
Argentina and abroad must submit all information required by the
entities authorizing the foreign public offering and listing to the CNV
in Spanish.

The financial statements at the close of the fiscal year, in all cases,
must be presented to include supplementary information to reconcile
the effects on net equity and net earnings of accounting mechanisms
other than those current in the Republic of Argentina, stating the
exchange rate used to convert the items mentioned to Argentine
pesos. Where the annual financial information is concerned, and for
intermediate periods, publications may be issued without the
indicated reconciliation. In such case, it should be clearly stated that
the information was prepared in accordance with the current
accounting standards in the country of origin, and that they are
presented without being reconciled with Argentina’s accounting
standards.

Nonresidents are subject to the same conditions as residents with
regard to the sale or issue of bonds or other debt securities.

Paragraph 3.13 (which incorporates Paragraph 7 of Com “A” 6770,
as amended by Communications “A” 6815 and “A” 6855) establishes
that access to the foreign exchange market by nonresident for the
purchase of foreign exchange requires the prior approval of the
BCRA, with various exceptions including international
organizations, official export credit agencies, and diplomatic and
consular offices, and transfers to individuals’ bank accounts abroad
of funds received in Argentina associated with the benefits granted
by the National Government under Laws Nos. 24043, 24411, and
25914 and related provisions.

Paragraph 3.14.1 of the TO de EyC allows transfers of foreign
exchange abroad by individuals from their local foreign currency
accounts to their own bank accounts abroad and Paragraph 3.14.2
allows transfers abroad by local depositary agencies of foreign
currency funds received for principal and interest payments on
National Treasury securities, the operation of which forms part of the
payment process at the request of depositaries abroad. Same as
above.

Paragraph 4.3 of the TO EyC introduced by Communication “A”
7340 effective August 13, 2021, establishes that securities purchase
and sale transactions with settlement in foreign currency must be
paid through one of the following mechanisms:
-by transferring funds to and from demand accounts in the
customer’s name at local financial institutions;
-by wire transfer to bank accounts in the customer’s name at a
foreign institution that is not incorporated in countries or territories
where the FATF Recommendations are not applied or not sufficiently
applied.
Under no circumstances may these transactions be settled through
Residents and nonresidents can do transactions known as CCL. These transactions are carried out exclusively in the capital market and consist of the purchase of negotiable instruments (notes or securities) traded in pesos in the local market (markets regulated by the CNV) and then sold in foreign markets where such negotiable instruments are also traded, and there they are settled in foreign currency.

Paragraph 3.14.1 authorizes the transfer of foreign exchange abroad by individuals from their local foreign currency accounts to their own bank accounts abroad.

In addition, Paragraph 3.16 of the TO de EyC establishes additional requirements applicable to transactions involving flows of funds abroad via the foreign exchange market that customers must, if relevant, meet for purposes of access to the foreign exchange market without the prior approval of the BCRA:

(1) submission of an affidavit linked to their holdings of external assets in Argentina and abroad (Paragraph 3.16.2, incorporating Paragraph 1 of Communication “A” 7030 of May 28, 2020, as amended and/or supplemented by Communications “A” 7042 of June 11, 2020, 7094 of August 27, 2020, and 7327 of July 10, 2021);
(2) submission of an affidavit indicating that on the day on which the request for access to the market is submitted and during the previous 90 days they have not sold securities in Argentina with settlement in foreign exchange or transferred securities to depositary agencies abroad, and indicating their commitment not to conduct such operations in the following 90 days (Paragraph 3.16.3, which incorporates Paragraph 3 of Communication “A” 7001 of April 30, 2020, replaced by Paragraph 4 of Communication “A” 7030 of May 28, 2020, which extended the time period indicated from 30 days to 90 days, supplemented by Communication “A” 7042 of June 11, 2020).

Effective July 12, 2021, Communication “A” 7327 included that BCRA’s prior authorization must be required except the customer submits an affidavit declaring that during the last 90 days as of the date of the transfer request, and also during the following 90 days, the customer had/will not arrange sales or exchanges of securities settled in foreign currency in Argentina or transfer of same to foreign depositary entities. Effective October 29, 2021, the same applies for transactions for the acquisition of foreign securities in Argentina with settlement in pesos (Communication “A” 7385); (3) the customer is not an individual or legal entity included by the AFIP in the database of invoices or equivalent documents deemed to be fictional (Paragraph 3.16.4, which incorporates Paragraph 5 of
Communication “A” 7193 of December 30, 2020);
(4) individuals or legal entities that are considered regulated entities having complied with the “Registry of Foreign Exchange Information of Exporters and Importers of Goods” and that are not indicated as “NOT REGISTERED” (Paragraph 3.16.5, which incorporates Communication “A” 7200 effective January 6, 2021, amended by Communication “A” 7273 of April 29, 2021);
(5) verification, before proceeding with transactions involving the outflow of funds abroad, whether the customer is included in the list of CUITs with inconsistent transactions in the online system implemented by the BCRA for such purpose and, if this is the case, it must strengthen the control measures to determine the reasonableness and genuineness of the transactions (Paragraph 3.16.6 introduced by Communication “A” 7422 of December 16, 2021, taking into account the provisions of Communication “B” 12082 of October 28, 2020).
Transactions in securities contracted abroad may not be paid in pesos in Argentina; only operations contracted in Argentina may be paid in pesos in Argentina (Paragraph 4.3.1, which incorporates Communication “A” 7106 of September 15, 2020, in force as of September 16, 2020).

Sale or issue abroad by residents

Yes.

Portfolio investment sales abroad by residents are not subject to a repatriation requirement. If the funds are repatriated, under Paragraph 2.7 of the TO de EyC, institutions may conduct swaps and arbitrage with customers and allow credit of the funds from these operations to the foreign currency accounts of the customer.

In the case of issues of debt securities, Com “A” 6770 establishes that foreign financial debts disbursed as from September 1, 2019, must be repatriated and the funds sold on the foreign exchange market as a requirement for later access to that market for purposes of principal and interest payments. Com “A” 6776 of September 5, 2019, provides that, in the case of institutions, this requirement is deemed to be met when the funds are included in the PGC. These provisions are found in Paragraph 2.4 of the TO de EyC and supplementary provisions.

Paragraph 1 of Com “A” 6838 establishes that issues of debt securities by residents that are registered in Argentina as from November 29, 2019, denominated and subscribed in foreign currencies and the capital and interest of which are payable in Argentina in foreign currency, must be sold on the foreign exchange market as a requirement for subsequent access to the market for principal and interest payments. In the case of legal entities, the requirement is deemed to be met when the funds are included in the PGC (Paragraph 2.5 of the TO de EyC).

Paragraph 2.6 allows exceptions to sale on the foreign exchange market under certain conditions. Paragraph 3.5 of the TO de EyC establishes that entities may have access to the foreign exchange market for principal and interest payments on foreign financial debt as long as the following conditions are met:
(1) the debtor demonstrates the repatriation and sale of foreign exchange on the foreign exchange market in an amount equivalent to the nominal value of the financial debt abroad. It is considered to be met:
- for funds disbursed as from September 1, 2019;
- foreign debts originating as from September 1, 2019, that do not generate disbursements as they consist of refinancing of foreign
financial debts that would have had access under the applicable regulations, as long as the refinancing does not occur prior to the maturity of the original debt;
- for the amount of the applicable issuance expenses and other expenses debited abroad for the bank transactions involved;
- for the difference between the actual issue value and the nominal value of issues of debt securities publicly registered abroad that are placed below par;
- for the portion corresponding to a capitalization of interest provided in the debt contract;
- for the portion of issues of debt securities registered publicly abroad as from October 9, 2020, with an average term of not less than two years that were delivered to financial creditors abroad and/or debt securities publicly registered in Argentina denominated in foreign exchange with maturities between October 15, 2020, and December 31, 2021, which made it possible to reach the refinancing parameters provided in Paragraph 3.17 (incorporating Com “A” 7133 of October 9, 2020, and 7230 of February 25, 2021);
- effective January 6, 2021, for the portion of issues of debt securities publicly registered abroad as from January 7, 2021, that were delivered to creditors for the refinancing of pre-existing financial debts with an extension of the average term, when this corresponds to the amount of refinanced principal, interest accrued until the date of refinancing and, provided the principal of the new debt securities does not fall due during the first two years, the amount equivalent to the interest that would accrue in the first two years on the debt refinanced in advance and/or for the extension of the refinanced principal and/or for interest that would accrue on the amounts thus refinanced (incorporating Communication “A” 7196 of January 6, 2021, and Communication “A” 7416 of December 9, 2021);
- effective February 4, 2021, for the portion subscribed in foreign currencies in Argentina of issues of debt securities publicly registered abroad as from February 5, 2021, as long as all of the conditions established are met (incorporating Com “A” 7218 of February 4, 2021).

(2) The operation is declared, if appropriate, on the most recent required “Survey of External Assets and Liabilities.”

(3) Access to the foreign exchange market by residents, including entities, for prepayments of principal and interest more than three business days prior to their due date will require the prior approval of the BCRA, unless all of the conditions provided in each case are met:

- prepayment is made simultaneously with the settlement of the funds from a new financial debt disbursed as from October 17, 2019;
- prepayment of interest in the context of a debt instrument swap (incorporates Com “A” 7133 of October 9, 2020);
- prepayment in the context of a refinancing process as provided by Paragraph 3.17 (incorporating Com “A” 7133 of October 9, 2020, and “A” 7196 of January 6, 2021).

(4) if the requirement for the prior approval of the BCRA is in effect for access to the foreign exchange market for payments at maturity of the principal of foreign financial debts of the nonfinancial private sector when the creditor is a counterparty connected with the debtor, this requirement will not be applicable as long as the funds have been repatriated and sold on the foreign exchange market as of October 2, 2020, and the debt has an average term of no less than two years (Paragraph 3.5.4, which incorporates Com “A” 7123 of October 1,
(5) if the requirement for prior approval of the BCRA is in effect for access to the foreign exchange market for payments at maturity of the principal and interest of foreign financial debts, this requirement will not be applicable as long as the purpose of the funds has been the financing of projects included in the “Plan for the Promotion of the Production of Argentine Natural Gas – 2020–2024 Supply and Demand Scheme” established in Article 2 of Decree No. 892/20, the funds have been repatriated and sold on the foreign exchange market as from November 16, 2020, and the debt has an average life of no less than two years (Paragraph 3.5.5, which incorporates Communication “A” 7168 of November 19, 2020).

(6) Effective January 6, 2021, principal and interest payments may be made on foreign financial debts as from their due date through the application of proceeds from exports of goods and services, as long as the requirements set out in Paragraph 7.9 (financial operations authorized for application of proceeds from exports of goods and services) are met (Paragraph 3.5.6, which incorporates Communication “A” 7196 of January 6, 2021).

(7) up to December 31, 2022, access to the foreign exchange market for principal payments on foreign financial debts when the creditor is a counterparty connected with the debtor. This requirement is not applicable to local financial institutions for their own transactions (Paragraph 3.5.7, which incorporates Communication “A” 7030 and supplementary provisions, extended by Paragraph 1 of Communication “A” 7416 of December 9, 2021, and Paragraph 1 of Communication “A” 7466 of March 3, 2022).

Effective June 4, 2021, Communication “A” 7301 of June 4, 2021, established that this requirement would also not be applicable when the customer has a “Certificate of Increase in Exports of Goods in 2021” issued under Paragraph 3.18 for the equivalent of the principal amount being paid. Pursuant to Paragraph 6 of Communication “A” 7416 of December 9, 2021, the mechanism provided for under Paragraph 3.18 was extended to 2022.

(8) In the event that the debtor records scheduled principal due dates up to December 31, 2022 (extended by Paragraph 3 of Communication “A” 7416 of December 9, 2021, and Paragraph 3 of Communication “A” 7466 of March 3, 2022) on financial debts included in Paragraph 3.5 of the TO de EyC, they must comply with the provisions of Paragraph 3.17.

The provisions of Paragraph 3.17 (which incorporates Communication “A” 7106 of September 15, 2020, and supplementary provisions) established that nonfinancial private sector debtors and financial institutions that have maturities through to December 31, 2022, for the indicated operations must present a refinancing plan based on the criteria set out in Paragraph 3.17.3 (provisions extended by Paragraph 3 of Communication “A” 7416 of December 9, 2021, and Paragraph 3 of Communication “A” 7466 of March 3, 2022).

Institutions may provide access to the foreign exchange market for the payment of principal and/or interest to trusts established in Argentina by a resident to guarantee principal and interest payments on their liability, as long as it is verified that the debtor had had
access for payments in their name through compliance with the applicable regulatory provisions (Paragraph 3.7 of the TO de EyC).

In addition, Paragraph 3.16 of the TO de EyC establishes additional requirements applicable to transactions involving flows of funds abroad via the foreign exchange market that customers must, if relevant, meet for purposes of access to the foreign exchange market without the prior approval of the BCRA:

(1) submission of an affidavit linked to their holdings of external assets in Argentina and abroad (Paragraph 3.16.2, incorporating Paragraph 1 of Communication “A” 7030 of May 28, 2020, as amended and/or supplemented by Communications “A” 7042 of June 11, 2020, 7094 of August 27, 2020, and 7327 of July 10, 2021); (2) submission of an affidavit indicating that on the day on which the request for access to the market is submitted and during the previous 90 days they have not sold securities in Argentina with settlement in foreign exchange or transferred securities to depositary agencies abroad, and indicating their commitment not to conduct such operations in the following 90 days (Paragraph 3.16.3, which incorporates Paragraph 3 of Communication “A” 7001 of April 30, 2020, replaced by Paragraph 4 of Communication “A” 7030 of May 28, 2020, which extended the time period indicated from 30 days to 90 days, supplemented by Communication “A” 7042 of June 11, 2020).

Effective July 12, 2021, Communication “A” 7327 included that BCRA’s prior authorization must be required except the customer submits an affidavit declaring that during the last 90 days as of the date of the transfer request, and also during the following 90 days, the customer had/will not arrange sales or exchanges of securities settled in foreign currency in Argentina or transfer of same to foreign depositary entities. Effective October 29, 2021, the same applies for transactions for the acquisition of foreign securities in Argentina with settlement in pesos (Communication “A” 7385); (3) the customer is not an individual or legal entity included by the AFIP in the database of invoices or equivalent documents deemed to be fictional (Paragraph 3.16.4, which incorporates Paragraph 5 of Communication “A” 7193 of December 30, 2020); (4) individuals or legal entities that are considered regulated entities having complied with the “Registry of Foreign Exchange Information of Exporters and Importers of Goods” and that are not indicated as “NOT REGISTERED” (Paragraph 3.16.5, which incorporates Communication “A” 7200 effective January 6, 2021, amended by Communication “A” 7273 of April 29, 2021); (5) verification, before proceeding with transactions involving the outflow of funds abroad, whether the customer is included in the list of CUITs with inconsistent transactions in the online system implemented by the BCRA for such purpose and, if this is the case, it must strengthen the control measures to determine the reasonableness and genuineness of the transactions (Paragraph 3.16.6 introduced by Communication “A” 7422 of December 16, 2021, taking into account the provisions of Communication “B” 12082 of October 28, 2020).

Transactions in securities contracted abroad may not be paid in pesos in Argentina; only operations contracted in Argentina may be paid in pesos in Argentina (Paragraph 4.3.1).

Paragraph 1.9 of the TO de EyC requires completion of the “Survey of External Assets and Liabilities,” even when no funds have been repatriated on the foreign exchange market and/or future access to
this market is not planned.

In the case of the operations covered by Article 3 of Decree No. 616/05, the proceeds from the sale of foreign exchange must be credited to a local account. For the remaining requirements set out in Article 4 of the said decree, the provisions of Resolution No. 3/15 of the former Ministry of the Treasury and Public Finance, which reduced the percentage of the deposit indicated in Paragraph (c) of this article to 0, and the provisions of Resolution No. 1/17 of the MOF, which reduced the term indicated in Articles 2 and 4(a) of Decree No. 616, as amended, to 0 days, are applicable (now Paragraph 2.8 of the TO de EyC).

On money market instruments | Yes.  
Purchase locally by nonresidents | Yes.  
The foreign exchange regulations do not establish a requirement for the sale of the foreign exchange for portfolio investments by nonresidents. Under Paragraph 2.7 of the TO de EyC, institutions may conduct swaps and arbitrage with customers in the case of the repatriation of foreign exchange and allow crediting of the proceeds of these operations to the foreign currency accounts of the customer.

Paragraph 1.9 of the TO de EyC requires completion of the “Survey of External Assets and Liabilities.”

Portfolio investments are operations covered by Article 3 of Decree No. 616/05, that is, the proceeds of the sale of the foreign exchange must be credited to a local account. For the remaining requirements set out in Article 4 of the said decree, the provisions of Resolution No. 3/15 of the former Ministry of the Treasury and Public Finance, which reduced the percentage of the deposit indicated in Paragraph (c) of this article to 0, and the provisions of Resolution No. 1/17 of the MOF, which reduced the term indicated in Articles 2 and 4(a) of Decree No. 616 to 0 days, are applicable (Paragraph 2.8 of the TO de EyC).

Paragraph 4.3. of the TO de EyC introduced by Communication “A” 7340 effective August 13, 2021, establishes that securities purchase and sale transactions with settlement in foreign currency must be paid through one of the following mechanisms:
- by transferring funds to and from demand accounts in the customer’s name at local financial institutions;
- by wire transfer to bank accounts in the customer’s name at a foreign institution that is not incorporated in countries or territories where the FATF Recommendations are not applied or not sufficiently applied.
Under no circumstances may these transactions be settled through payment in foreign currency banknotes or through their deposit in custodial accounts or in accounts of third parties.

Residents and nonresidents can do transactions known as CCL. These transactions are carried out exclusively in the capital market and consist of the purchase of negotiable instruments (notes or securities) traded in pesos in the local market (markets regulated by the CNV) and then sold in foreign markets where such negotiable instruments are also traded, and there they are settled in foreign currency. CNV approval is required for public offerings, including both the issuance and sale of securities (CNV 2013 Consolidated Regulations, Title II, Chapter V, Section I). Issues of commercial paper must have
a minimum maturity of seven business days.
In addition to what is described in the previous items in connection
with stocks and bonds or other debt securities (as applicable in this
case), branches of stock companies established abroad pursuant to
Article 118 of Law No. 19.550 may apply to the Commission to be
listed in a special register to establish global programs for the issue
of debt securities having amortization terms of up to one year, to be
offered publicly, exclusively for qualified investors.
The same requirements are applicable to nonresidents as for issuers
that are resident in Argentina with respect to the sale or issuance of
money market instruments.
Nonresidents are authorized to issue debt instruments denominated
both in foreign currency and in pesos, with the same scope and under
the same rules to which residents are subject to.

Paragraph 3.13 (which incorporates Paragraph 7 of Com “A” 6770,
as amended by Communications “A” 6814 and “A” 6855) establishes
that access to the foreign exchange market by nonresident customers
for the purchase of foreign exchange requires the prior approval of
the BCRA, with various exceptions including international
organizations, official export credit agencies, and diplomatic and
consular offices.

Paragraph 3.14.1 of the TO de EyC allows the transfer of foreign
exchange abroad by individuals from their local foreign currency
accounts to their own bank accounts abroad.

In addition, Paragraph 3.16 of the TO de EyC establishes additional
requirements applicable to transactions involving flows of funds
abroad via the foreign exchange market that customers must, if
relevant, meet for purposes of access to the foreign exchange market
without the prior approval of the BCRA:
(1) submission of an affidavit linked to their holdings of external
assets in Argentina and abroad (Paragraph 3.16.2, incorporating
Paragraph 1 of Communication “A” 7030 of May 28, 2020, as
amended and/or supplemented by Communications “A” 7042 of June
11, 2020, 7094 of August 27, 2020, and 7327 of July 10, 2021);
(2) submission of an affidavit indicating that on the day on which the
request for access to the market is submitted and during the previous
90 days they have not sold securities in Argentina with settlement in
foreign exchange or transferred securities to depositary agencies
abroad, and indicating their commitment not to conduct such
operations in the following 90 days (Paragraph 3.16.3, which
incorporates Paragraph 3 of Communication “A” 7001 of April 30,
2020, replaced by Paragraph 4 of Communication “A” 7030 of May
28, 2020, which extended the time period indicated from 30 days to
90 days, supplemented by Communication “A” 7042 of June 11,
2020).
Effective July 12, 2021, Communication “A” 7327 included that
BCRA’s prior authorization must be required except the customer
submits an affidavit declaring that during the last 90 days as of the
date of the transfer request, and also during the following 90 days,
the customer had/will not arrange sales or exchanges of securities
settled in foreign currency in Argentina or transfer of same to foreign
depository entities. Effective October 29, 2021, the same applies for
transactions for the acquisition of foreign securities in Argentina with
settlement in pesos (Communication “A” 7385); (3) the customer is
not an individual or legal entity included by the AFIP in the database
of invoices or equivalent documents deemed to be fictional (Paragraph 3.16.4, which incorporates Paragraph 5 of Communication “A” 7193 of December 30, 2020); (4) verification, before proceeding with transactions involving the outflow of funds abroad, whether the customer is included in the list of CUITs with inconsistent transactions in the online system implemented by the BCRA for such purpose and, if this is the case, it must strengthen the control measures to determine the reasonableness and genuineness of the transactions (Paragraph 3.16.6 introduced by Communication “A” 7422 of December 16, 2021, taking into account the provisions of Communication “B” 12082 of October 28, 2020).

Paragraph 4.3. of the TO de EyC introduced by Communication “A” 7340 effective August 13, 2021, establishes that securities purchase and sale transactions with settlement in foreign currency must be paid through one of the following mechanisms:
- by transferring funds to and from demand accounts in the customer’s name at local financial institutions;
- by wire transfer to bank accounts in the customer’s name at a foreign institution that is not incorporated in countries or territories where the FATF Recommendations are not applied or not sufficiently applied.
Under no circumstances may these transactions be settled through payment in foreign currency banknotes or through their deposit in custodial accounts or in accounts of third parties.

Residents and nonresidents can do transactions known as CCL. These transactions are carried out exclusively in the capital market and consist of the purchase of negotiable instruments (notes or securities) traded in pesos in the local market (markets regulated by the CNV) and then sold in foreign markets where such negotiable instruments are also traded, and there they are settled in foreign currency.

Portfolio investments abroad by residents are subject to the provisions of Paragraphs 3.8 (individuals) and 3.10 (legal entities). This means that for individuals there is a limit of US$200 a month with all institutions, the remaining requirements established in the aforementioned paragraph must be met, and amounts above this limit are subject to prior approval. Legal entities require prior approval. However, residents can do transactions known as CCL. These transactions are carried out exclusively in the capital market and consist of the purchase of negotiable instruments (notes or securities) traded in pesos in the local market (markets regulated by the CNV) and then sold in foreign markets where such negotiable instruments are also traded, and there they are settled in foreign currency.

Paragraph 3.14.1 authorizes the transfer of foreign exchange abroad by individuals from their local foreign currency accounts to their own bank accounts abroad.

In addition, Paragraph 3.16 of the TO de EyC establishes additional requirements applicable to transactions involving flows of funds abroad via the foreign exchange market that customers must, if relevant, meet for purposes of access to the foreign exchange market without the prior approval of the BCRA:
(1) submission of an affidavit linked to their holdings of external assets in Argentina and abroad (Paragraph 3.16.2, incorporating Paragraph 1 of Communication “A” 7030 of May 28, 2020, as amended and/or supplemented by Communications “A” 7042 of June
Transactions in securities contracted abroad may not be paid in pesos in Argentina; only operations contracted in Argentina may be paid in pesos in Argentina (Paragraph 4.3.1, which incorporates Paragraph 6 of Communication “A” 7106 from September 16, 2020).

The foreign exchange regulations do not establish a repatriation requirement for sales abroad of portfolio investments by residents. If the funds are repatriated, under Paragraph 2.7 of the TO de EyC entities may conduct swaps and arbitrage with customers and allow credit of the proceeds of these operations to the foreign currency accounts of the customer.

In the case of issues, Com “A” 6770 establishes that foreign financial debts disbursed as from September 1, 2019, must be repatriated and the funds sold on the foreign exchange market as a requirement for later access to that market for principal and interest payments. Com “A” 6776 of September 5, 2019, provides that, in the case of institutions, this requirement is deemed to be met when the funds are included in the PGC. These provisions are collected in Paragraph 2.4 of the TO de EyC.
Paragraph 2.6 allows exceptions to sale on the foreign exchange market under certain conditions.

Paragraph 3.5 of the TO de EyC establishes that entities may have access to the foreign exchange market for principal and interest payments on foreign financial debt as long as the conditions set out therein are met.

Paragraph 1.9 of the TO de EyC requires completion of the “Survey of External Assets and Liabilities,” even when no funds have been repatriated on the foreign exchange market and/or future access to this market is not planned.

In addition, Paragraph 3.16 of the TO de EyC establishes additional requirements applicable to transactions involving flows of funds abroad via the foreign exchange market that customers must, if relevant, meet for purposes of access to the foreign exchange market without the prior approval of the BCRA:

1. submission of an affidavit linked to their holdings of external assets in Argentina and abroad (Paragraph 3.16.2, incorporating Paragraph 1 of Communication “A” 7030 of May 28, 2020, as amended and/or supplemented by Communications “A” 7042 of June 11, 2020, 7094 of August 27, 2020, and 7327 of July 10, 2021);
2. submission of an affidavit indicating that on the day on which the request for access to the market is submitted and during the previous 90 days they have not sold securities in Argentina with settlement in foreign exchange or transferred securities to depositary agencies abroad, and indicating their commitment not to conduct such operations in the following 90 days (Paragraph 3.16.3, which incorporates Paragraph 3 of Communication “A” 7001 of April 30, 2020, replaced by Paragraph 4 of Communication “A” 7030 of May 28, 2020, which extended the time period indicated from 30 days to 90 days, supplemented by Communication “A” 7042 of June 11, 2020).

Effective July 12, 2021, Communication “A” 7327 included that BCRA’s prior authorization must be required except the customer submits an affidavit declaring that during the last 90 days as of the date of the transfer request, and also during the following 90 days, the customer had/will not arrange sales or exchanges of securities settled in foreign currency in Argentina or transfer of same to foreign depositary entities. Effective October 29, 2021, the same applies for transactions for the acquisition of foreign securities in Argentina with settlement in pesos (Communication “A” 7385); (3) the customer is not an individual or legal entity included by the AFIP in the database of invoices or equivalent documents deemed to be fictional (Paragraph 3.16.4, which incorporates Paragraph 5 of Communication “A” 7193 of December 30, 2020); (4) individuals or legal entities that are considered regulated entities having complied with the “Registry of Foreign Exchange Information of Exporters and Importers of Goods” and that are not indicated as “NOT REGISTERED” (Paragraph 3.16.5, which incorporates Communication “A” 7200 effective January 6, 2021, amended by Communication “A” 7273 of April 29, 2021); (5) verification, before proceeding with transactions involving the outflow of funds abroad, whether the customer is included in the list of CUITs with inconsistent transactions in the online system implemented by the BCRA for such purpose and, if this is the case, it must strengthen the control measures to determine the reasonableness and genuineness of the transactions (Paragraph 3.16.6...
Transactions in securities contracted abroad may not be paid in pesos in Argentina; only operations contracted in Argentina may be paid in pesos in Argentina (Paragraph 4.3.1).

In the case of the operations covered by Article 3 of Decree No. 616/05, the proceeds from the sale of foreign exchange must be credited to a local account. For the remaining requirements set out in Article 4 of the said decree, the provisions of Resolution No. 3/15 of the former Ministry of the Treasury and Public Finance, which reduced the percentage of the deposit indicated in Paragraph (c) of this article to 0, and the provisions of Resolution No. 1/17 of the MOF, which reduced the term indicated in Articles 2 and 4(a) of Decree No. 616, as amended, to 0 days, are applicable (now Paragraph 2.8 of the TO de EyC).

On collective investment securities

Yes.

Purchase locally by nonresidents

Yes.

The foreign exchange regulations do not establish a requirement for the sale of the foreign exchange for portfolio investments by nonresidents.

Under Paragraph 2.7 of the TO de EyC, institutions may conduct swaps and arbitrage with customers in the case of the repatriation of foreign exchange and allow crediting of the proceeds of these operations to the foreign currency accounts of the customer.

Paragraph 1.9 of the TO de EyC requires completion of the “Survey of External Assets and Liabilities.”

Portfolio investments are operations covered by Article 3 of Decree No. 616/05, that is, the proceeds of the sale of the foreign exchange must be credited to a local account. For the remaining requirements set out in Article 4 of the said decree, the provisions of Resolution No. 3/15 of the former Ministry of the Treasury and Public Finance, which reduced the percentage of the deposit indicated in Paragraph (c) of this article to 0, and the provisions of Resolution No. 1/17 of the MOF, which reduced the term indicated in Articles 2 and 4(a) of Decree No. 616 to 0 days, are applicable (Paragraph 2.8 of the TO de EyC).

Paragraph 4.3. of the TO de EyC introduced by Communication “A” 7340 effective August 13, 2021, establishes that securities purchase and sale transactions with settlement in foreign currency must be paid through one of the following mechanisms:

- by transferring funds to and from demand accounts in the customer’s name at local financial institutions;
- by wire transfer to bank accounts in the customer’s name at a foreign institution that is not incorporated in countries or territories where the FATF Recommendations are not applied or not sufficiently applied.

Under no circumstances may these transactions be settled through payment in foreign currency banknotes or through their deposit in custodial accounts or in accounts of third parties.

Sale or issue locally by nonresidents

Yes.

CNV approval is required for public offerings of the following securities, including current issues and previous issues to be offered for sale: (1) negotiable instruments (CNV Consolidated Regulations, Title II, Chapter VIII); (2) financial trusts (Title V, Chapter IV); and (3) mutual funds (Title V, Chapters I, II, and III).
Collective investment securities that wish to be issued from outside Argentina must follow the following provisions set out in Chapter VIII of Title II, Sections I and II of the CNV Regulations. If they wish to be incorporated in the country, they are not subject to conditions different from those required of residents (Title V of the CNV Regulations for Mutual Funds and Financial Trusts).

The provisions of Paragraph 3.13 (which incorporates Paragraph 7 of Communication “A” 6770, as amended by Communications “A” 6815 and “A” 6855) establish that access to the foreign exchange market by nonresident customers for the purchase of foreign exchange requires the prior approval of the BCRA, with various exceptions including international organizations, official export credit agencies, and diplomatic and consular offices.

Paragraph 3.14.1 of the TO de EyC authorizes the transfer of foreign exchange abroad by individuals from their local foreign currency accounts to their own bank accounts abroad, and Paragraph 3.14.2 allows the transfer abroad of foreign currency by local securities depositaries of foreign currency funds received for principal and interest payments on National Treasury securities, the operation of which forms part of the payment process at the request of the securities depositaries abroad.

In addition, Paragraph 3.16 of the TO de EyC establishes additional requirements applicable to transactions involving flows of funds abroad via the foreign exchange market that customers must, if relevant, meet for purposes of access to the foreign exchange market without the prior approval of the BCRA:

(1) submission of an affidavit linked to their holdings of external assets in Argentina and abroad (Paragraph 3.16.2, incorporating Paragraph 1 of Communication “A” 7030 of May 28, 2020, as amended and/or supplemented by Communications “A” 7042 of June 11, 2020, 7094 of August 27, 2020, and 7327 of July 10, 2021);

(2) submission of an affidavit indicating that on the day on which the request for access to the market is submitted and during the previous 90 days they have not sold securities in Argentina with settlement in foreign exchange or transferred securities to depositary agencies abroad, and indicating their commitment not to conduct such operations in the following 90 days (Paragraph 3.16.3, which incorporates Paragraph 3 of Communication “A” 7001 of April 30, 2020, replaced by Paragraph 4 of Communication “A” 7030 of May 28, 2020, which extended the time period indicated from 30 days to 90 days, supplemented by Communication “A” 7042 of June 11, 2020).

Effective July 12, 2021, Communication “A” 7327 included that BCRA’s prior authorization must be required except the customer submits an affidavit declaring that during the last 90 days as of the date of the transfer request, and also during the following 90 days, the customer had/will not arrange sales or exchanges of securities settled in foreign currency in Argentina or transfer of same to foreign depositary entities. Effective October 29, 2021, the same applies for transactions for the acquisition of foreign securities in Argentina with settlement in pesos (Communication “A” 7385); (3) the customer is not an individual or legal entity included by the AFIP in the database of invoices or equivalent documents deemed to be fictional (Paragraph 3.16.4, which incorporates Paragraph 5 of Communication “A” 7193 of December 30, 2020);

(4) verification, before proceeding with transactions involving the
outflow of funds abroad, whether the customer is included in the list of CUITs with inconsistent transactions in the online system implemented by the BCRA for such purpose and, if this is the case, it must strengthen the control measures to determine the reasonableness and genuineness of the transactions (Paragraph 3.16.6 introduced by Communication “A” 7422 of December 16, 2021, taking into account the provisions of Communication “B” 12082 of October 28, 2020.

Paragraph 4.3 of the TO de EyC introduced by Communication “A” 7340 effective August 13, 2021, establishes that securities purchase and sale transactions with settlement in foreign currency must be paid through one of the following mechanisms:
- by transferring funds to and from demand accounts in the customer’s name at local financial institutions;
- by wire transfer to bank accounts in the customer’s name at a foreign institution that is not incorporated in countries or territories where the FATF Recommendations are not applied or not sufficiently applied.

Under no circumstances may these transactions be settled through payment in foreign currency banknotes or through their deposit in custodial accounts or in accounts of third parties.

Foreign exchange for these transactions can be accessed through the CCL market.

Portfolio investments by residents abroad are subject to the provisions of Paragraphs 3.8 (individuals) and 3.10 (legal entities). This means that for individuals there is a limit of US$200 a month with all entities, the remaining requirements established in the aforementioned paragraph must be met, and amounts above this limit are subject to prior approval. Legal entities require prior approval.

Foreign exchange for these transactions can be accessed through the CCL market.

Paragraph 3.14.1 (incorporating Paragraph 1.6.1 of Communication “A” 6776 of September 5, 2019) authorizes the transfer of foreign exchange abroad by individuals from their local foreign currency accounts to their own bank accounts abroad.

In addition, Paragraph 3.16 of the TO de EyC establishes additional requirements applicable to transactions involving flows of funds abroad via the foreign exchange market that customers must, if relevant, meet for purposes of access to the foreign exchange market without the prior approval of the BCRA:
(1) submission of an affidavit linked to their holdings of external assets in Argentina and abroad (Paragraph 3.16.2, incorporating Paragraph 1 of Communication “A” 7030 of May 28, 2020, as amended and/or supplemented by Communications “A” 7042 of June 11, 2020, 7094 of August 27, 2020, and 7327 of July 10, 2021);
(2) submission of an affidavit indicating that on the day on which the request for access to the market is submitted and during the previous 90 days they have not sold securities in Argentina with settlement in foreign exchange or transferred securities to depositary agencies abroad, and indicating their commitment not to conduct such operations in the following 90 days (Paragraph 3.16.3, which incorporates Paragraph 3 of Communication “A” 7001 of April 30, 2020, replaced by Paragraph 4 of Communication “A” 7030 of May 28, 2020, which extended the time period indicated from 30 days to 90 days, supplemented by Communication “A” 7042 of June 11, 2020).
Effective July 12, 2021, Communication “A” 7327 included that BCRA’s prior authorization must be required except the customer submits an affidavit declaring that during the last 90 days as of the date of the transfer request, and also during the following 90 days, the customer had/will not arrange sales or exchanges of securities settled in foreign currency in Argentina or transfer of same to foreign depositary entities. Effective October 29, 2021, the same applies for transactions for the acquisition of foreign securities in Argentina with settlement in pesos (Communication “A” 7385); (3) the customer is not an individual or legal entity included by the AFIP in the database of invoices or equivalent documents deemed to be fictional (Paragraph 3.16.4, which incorporates Paragraph 5 of Communication “A” 7193 of December 30, 2020); (4) individuals or legal entities that are considered regulated entities having complied with the “Registry of Foreign Exchange Information of Exporters and Importers of Goods” and that are not indicated as “NOT REGISTERED” (Paragraph 3.16.5, which incorporates Communication “A” 7200 effective January 6, 2021, amended by Communication “A” 7273 of April 29, 2021); (5) verification, before proceeding with transactions involving the outflow of funds abroad, whether the customer is included in the list of CUITs with inconsistent transactions in the online system implemented by the BCRA for such purpose and, if this is the case, it must strengthen the control measures to determine the reasonableness and genuineness of the transactions (Paragraph 3.16.6 introduced by Communication “A” 7422 of December 16, 2021, taking into account the provisions of Communication “B” 12082 of October 28, 2020).

Under Paragraph 4.3.1 of the TO de EyC (incorporates Paragraph 6 of Communication “A” 7106 from September 16, 2020), transactions in securities contracted abroad may not be paid in pesos in Argentina; only operations contracted in Argentina may be paid in pesos in Argentina. The foreign exchange regulations do not establish repatriation requirement sales operations for portfolio investments abroad by residents.

If the funds are repatriated, under Paragraph 2.7 of the TO de EyC (incorporates Paragraph 1.6.2 of Communication “A” 6776 of September 5, 2019), institutions may conduct swaps and arbitrage with customers and allow crediting of the proceeds of these operations to the foreign currency accounts of the customer.

In the case of issues, Com “A” 6770 establishes that foreign financial debts disbursed as from September 1, 2019, must be repatriated and the funds sold on the foreign exchange market as a requirement for later access to that market for principal and interest payments. Com “A” 6776 of September 5, 2019, provides that, in the case of institutions, this requirement is deemed to be met when the funds are included in the PGC. These provisions are found in Paragraph 2.4 of the TO de EyC and supplementary provisions.

Paragraph 2.6 allows exceptions to sale on the foreign exchange market under certain conditions.

Paragraph 3.5 of the TO de EyC establishes that entities may have access to the foreign exchange market for principal and interest payments on foreign financial debt as long as the conditions set out therein are met.
Paragraph 1.9 of the TO de EyC requires completion of the “Survey of External Assets and Liabilities,” even when no funds have been repatriated on the foreign exchange market and/or future access to this market is not planned.

In addition to the requirements specifically established for transactions involving flows of funds abroad, the customer must comply with the additional requirements set out in Paragraph 3.16 of the TO de EyC mentioned previously.

Under Paragraph 4.3.1 of the TO de EyC (incorporates Paragraph 6 of Communication “A” 7106 from September 16, 2020), transactions in securities contracted abroad may not be paid in pesos in Argentina; only operations contracted in Argentina may be paid in pesos in Argentina.

In the case of the operations covered by Article 3 of Decree No. 616/05, the proceeds from the sale of foreign exchange must be credited to a local account. For the remaining requirements set out in Article 4 of the said decree, the provisions of Resolution No. 3/15 of the former Ministry of the Treasury and Public Finance, which reduced the percentage of the deposit indicated in Paragraph (c) of this article to 0, and the provisions of Resolution No. 1/17 of the MOF, which reduced the term indicated in Articles 2 and 4(a) of Decree No. 616, as amended, to 0 days, are applicable (now Paragraph 2.8 of the TO de EyC).

| Controls on derivatives and other instruments | Yes. |
| Purchase locally by nonresidents | Yes. |
| Sale or issue locally by nonresidents | Yes. |

Under Paragraph 3.12.3 of the TO de EyC (incorporates Paragraph 1.4 of Communication “A” 6780 of September 11, 2019), all settlements of futures, forwards, options, and any other type of derivative contracted in Argentina by institutions as from September 11, 2019, must take place in domestic currency.

In the case of the operations covered by Article 3 of Decree No. 616/05, the proceeds from the sale of foreign exchange must be credited to a local account. For the remaining requirements set out in Article 4 of the said decree, the provisions of Resolution No. 3/15 of the former Ministry of the Treasury and Public Finance, which reduced the percentage of the deposit indicated in Paragraph (c) of this article to 0, and the provisions of Resolution No. 1/17 of the MOF, which reduced the term indicated in Articles 2 and 4(a) of Decree No. 616, as amended, to 0 days, are applicable (now Paragraph 2.8 of the TO de EyC).

Paragraph 1.9 of the TO de EyC requires completion of the “Survey of External Assets and Liabilities,” even when no funds have been repatriated on the foreign exchange market and/or future access to this market is not planned.

Foreign exchange for these transactions can be accessed through the CCL market.

Derivatives may be traded for hedging, speculation, or arbitrage purposes. In the case of speculation and arbitrage, exposure of the underlying assets is not necessary. CNV approval is required. Specifically, in the case of futures and options contracts (standardized derivatives), the requirements set out
in Article 22, Section IX, Chapter V, Title VI of the consolidated text of the CNV Regulations (N.T. 2013, as amended) must be met for CNV approval and subsequent trading on the authorized markets. In the case of derivatives between national and/or foreign counterparties not traded in markets authorized by the CNV, Article 189 of Law No. 27.440 established that the CNV will require registration, indicating that the contracts in question will be enforceable against third parties and will have a specific date as from the date of their registration. Article 10 bis of Section V, Chapter V, Title VI of the CNV Regulations (N.T. 2013 as amended) establishes that institutions for the registration of derivative operations or, in their absence, markets and/or clearinghouses must register bilateral derivative contracts entered into outside the authorized markets. It provides that the parties required to register are entities under the jurisdiction of the Commission and agents registered with the Commission. Registration is voluntary for third parties, that is, for any individual or legal entity not under the jurisdiction of the Commission, which may register the contract, final settlement, and cancellation of bilateral derivative contracts outside the markets authorized by the CNV.

Under Paragraph 3.12.3 of the TO de EyC, all settlements of futures, forwards, options, and any other type of derivative contracted in Argentina by institutions as from September 11, 2019, must take place in domestic currency.

Paragraph 3.13 (which incorporates Paragraph 7 of Communication “A” 6770, as amended by Communications “A” 6815 and “A” 6855) establishes that access to the foreign exchange market by nonresident customers for any reason, including repatriation, requires the prior approval of the BCRA for the purchase of foreign currency, with various exceptions including international organizations, official export credit agencies, and diplomatic and consular offices.

Foreign exchange for these transactions can be accessed through the CCL market.

Paragraph 3.12.1 (which incorporates Paragraph 3 of Com “A” 6814) allows access to the foreign exchange market for the payment of premiums, constitution of guarantees, and settlements corresponding to interest rate hedging contracts on foreign obligations of residents that have been declared and validated, if appropriate, in the “Survey of External Assets and Liabilities,” as they do not cover risks exceeding the foreign liabilities registered by the debtor at the interest rate for which the risk is covered in the said contracts. A customer accessing the foreign exchange market using this mechanism must appoint an entity to track the operation and sign an affidavit in which they commit to repatriating and selling the funds payable to the local customer as a result of the said operation or as a result of the release of the guarantee funds, within 5 business days.

The remaining financial derivatives operations that are to be conducted by means of access to the foreign exchange market by residents that are not entities authorized to deal in foreign exchange must comply with the conditions set out in Paragraphs 3.8 (Individuals) and 3.10 (Legal Entities) or, failing this, have the prior approval of the BCRA.

Foreign exchange for these transactions can be accessed through the CCL market by residents.

**Purchase abroad by residents** Yes.

**Sale or issue abroad by residents** Yes.
allows access to the foreign exchange market for the payment of premiums, constitution of guarantees, and settlements corresponding to interest rate hedging contracts on foreign obligations of residents that have been declared and validated, if appropriate, in the “Survey of External Assets and Liabilities,” as they do not cover risks exceeding the foreign liabilities registered by the debtor at the interest rate for which the risk is covered in the said contracts. The foreign exchange regulations allow exporters to grant credits within the period of receipt of the proceeds.

The foreign exchange regulations allow importers to be financed under the conditions set out in Paragraph 10.2.4.

Access to the foreign exchange market for the payment of interest on debts for imports of goods and services when due is authorized as long as the institution verifies that the operation has been declared, if appropriate, in the most recent “Survey of External Assets and Liabilities.” The prior approval of the BCRA is required for the prepayment of interest on commercial debts for imports of goods and services (Paragraph 3.3 of the TO de EyC).

In addition, Paragraph 3.16 of the TO de EyC establishes additional requirements applicable to transactions involving flows of funds abroad via the foreign exchange market that customers must, if relevant, meet for purposes of access to the foreign exchange market without the prior approval of the BCRA:

1. submission of an affidavit linked to their holdings of external assets in Argentina and abroad (Paragraph 3.16.2, incorporating Paragraph 1 of Communication “A” 7030 of May 28, 2020, as amended and/or supplemented by Communications “A” 7042 of June 11, 2020, 7094 of August 27, 2020, and 7327 of July 10, 2021);
2. submission of an affidavit indicating that on the day on which the request for access to the market is submitted and during the previous 90 days they have not sold securities in Argentina with settlement in foreign exchange or transferred securities to depositary agencies abroad, and indicating their commitment not to conduct such operations in the following 90 days (Paragraph 3.16.3, which incorporates Paragraph 3 of Communication “A” 7001 of April 30, 2020, replaced by Paragraph 4 of Communication “A” 7030 of May 28, 2020, which extended the time period indicated from 30 days to 90 days, supplemented by Communication “A” 7042 of June 11, 2020).

Effective July 12, 2021, Communication “A” 7327 included that BCRA’s prior authorization must be required except the customer submits an affidavit declaring that during the last 90 days as of the
date of the transfer request, and also during the following 90 days, the customer had/will not arrange sales or exchanges of securities settled in foreign currency in Argentina or transfer of same to foreign depositary entities. Effective October 29, 2021, the same applies for transactions for the acquisition of foreign securities in Argentina with settlement in pesos (Communication “A” 7385); (3) the customer is not an individual or legal entity included by the AFIP in the database of invoices or equivalent documents deemed to be fictional (Paragraph 3.16.4, which incorporates Paragraph 5 of Communication “A” 7193 of December 30, 2020); (4) individuals or legal entities that are considered regulated entities having complied with the “Registry of Foreign Exchange Information of Exporters and Importers of Goods” and that are not indicated as “NOT REGISTERED” (Paragraph 3.16.5, which incorporates Communication “A” 7200 effective January 6, 2021, amended by Communication “A” 7273 of April 29, 2021); (5) verification, before proceeding with transactions involving the outflow of funds abroad, whether the customer is included in the list of CUITs with inconsistent transactions in the online system implemented by the BCRA for such purpose and, if this is the case, it must strengthen the control measures to determine the reasonableness and genuineness of the transactions (Paragraph 3.16.6 introduced by Communication “A” 7422 of December 16, 2021, taking into account the provisions of Communication “B” 12082 of October 28, 2020).

Paragraph 1.9 of the TO de EyC requires completion of the “Survey of External Assets and Liabilities,” even when no funds have been repatriated on the foreign exchange market and/or future access to this market is not planned.

Foreign exchange for these transactions can be accessed through the CCL market.

**Financial credits**

These operations are governed by the regulations on the formation of assets, specifically the provisions in Paragraphs 3.8 (individuals, which incorporates Paragraph 6 of Communication “A” 6770 of September 1, 2019, and Paragraph 1 of Communication “A” 6815 of October 28, 2019) and 3.10 (legal entities, which incorporates Paragraph 5 of Communication “A” 6770 of September 1, 2019). This means that individuals are subject to a limit of US$200 a month from all entities, are subject to the remaining requirements established in the aforementioned paragraph, and amounts above this limit are subject to prior approval. Legal entities require prior approval.

Paragraph 3.14.11 (incorporates Paragraph 1.6.1 of Communication “A” 6776 of September 5, 2019) authorizes the transfer of foreign exchange abroad by individuals from their local foreign currency accounts to their own bank accounts abroad.

In addition, Paragraph 3.16 of the TO de EyC establishes additional requirements applicable to transactions involving flows of funds abroad via the foreign exchange market that customers must, if relevant, meet for purposes of access to the foreign exchange market without the prior approval of the BCRA: 
(1) submission of an affidavit linked to their holdings of external assets in Argentina and abroad (Paragraph 3.16.2, incorporating Paragraph 1 of Communication “A” 7030 of May 28, 2020, as
amended and/or supplemented by Communications “A” 7042 of June 11, 2020, 7094 of August 27, 2020, and 7327 of July 10, 2021;
(2) submission of an affidavit indicating that on the day on which the request for access to the market is submitted and during the previous 90 days they have not sold securities in Argentina with settlement in foreign exchange or transferred securities to depositary agencies abroad, and indicating their commitment not to conduct such operations in the following 90 days (Paragraph 3.16.3, which incorporates Paragraph 3 of Communication “A” 7001 of April 30, 2020, replaced by Paragraph 4 of Communication “A” 7030 of May 28, 2020, which extended the time period indicated from 30 days to 90 days, supplemented by Communication “A” 7042 of June 11, 2020).

Effective July 12, 2021, Communication “A” 7327 included that BCRA’s prior authorization must be required except the customer submits an affidavit declaring that during the last 90 days as of the date of the transfer request, and also during the following 90 days, the customer had/will not arrange sales or exchanges of securities settled in foreign currency in Argentina or transfer of same to foreign depositary entities. Effective October 29, 2021, the same applies for transactions for the acquisition of foreign securities in Argentina with settlement in pesos (Communication “A” 7385); (3) the customer is not an individual or legal entity included by the AFIP in the database of invoices or equivalent documents deemed to be fictional (Paragraph 3.16.4, which incorporates Paragraph 5 of Communication “A” 7193 of December 30, 2020); (4) individuals or legal entities that are considered regulated entities having complied with the “Registry of Foreign Exchange Information of Exporters and Importers of Goods” and that are not indicated as “NOT REGISTERED” (Paragraph 3.16.5, which incorporates Communication “A” 7200 effective January 6, 2021, amended by Communication “A” 7273 of April 29, 2021); (5) verification, before proceeding with transactions involving the outflow of funds abroad, whether the customer is included in the list of CUITs with inconsistent transactions in the online system implemented by the BCRA for such purpose and, if this is the case, it must strengthen the control measures to determine the reasonableness and genuineness of the transactions (Paragraph 3.16.6 introduced by Communication “A” 7422 of December 16, 2021, taking into account the provisions of Communication “B” 12082 of October 28, 2020).

To residents from nonresidents Yes.

Com “A” 6770 establishes that foreign financial debts disbursed as from September 1, 2019, must be repatriated and sold on the foreign exchange market as a requirement for subsequent access to the market for principal and interest payments. Com “A” 6776 of September 5, 2019, provides that, in the case of institutions, this requirement is deemed to be met when the funds are included in the PGC. These provisions are found in Paragraph 2.4 of the TO de EyC and supplementary provisions.

Paragraph 2.6 allows exceptions to sale on the foreign exchange market under certain conditions.

Paragraph 3.5 of the TO de EyC establishes that entities may provide access to the foreign exchange market for principal and interest payments on foreign financial debt as long as the following conditions are met.

(1) the debtor demonstrates the repatriation and sale of foreign exchange on the foreign exchange market in an amount equivalent to the nominal value of the financial debt abroad. It is considered to be
met:
- for funds disbursed as from September 1, 2019;
- foreign debts originating as from September 1, 2019, that do not generate disbursements as they consist of refinancing of foreign financial debts that would have had access under the applicable regulations, as long as the refinancing does not occur prior to the maturity of the original debt;
- for the amount of the applicable issuance expenses and other expenses debited abroad for the bank transactions involved;
- for the difference between the actual issue value and the nominal value of issues of debt securities publicly registered abroad that are placed below par;
- for the portion corresponding to a capitalization of interest provided in the debt contract;
- for the portion of issues of debt securities registered publicly abroad as from October 9, 2020, with an average term of not less than two years that were delivered to financial creditors abroad and/or debt securities publicly registered in Argentina denominated in foreign exchange with maturities between October 15, 2020, and December 31, 2021, which made it possible to reach the refinancing parameters provided in Paragraph 3.17 (incorporating Communications “A” 7133 of October 9, 2020, and 7230 of February 25, 2021);
- effective January 6, 2021, for the portion of issues of debt securities publicly registered abroad as from January 7, 2021, that were delivered to creditors for the refinancing of pre-existing financial debts with an extension of the average term, when this corresponds to the amount of refinanced principal, interest accrued until the date of refinancing and, provided the principal of the new debt securities does not fall due during the first two years, the amount equivalent to the interest that would accrue in the first two years on the debt refinanced in advance and/or for the extension of the refinanced principal and/or for interest that would accrue on the amounts thus refinanced (incorporating Communication “A” 7196 of January 6, 2021, and Communication “A” 7416 of December 9, 2021);
- effective February 4, 2021, for the portion subscribed in foreign currencies in Argentina of issues of debt securities publicly registered abroad as from February 5, 2021, as long as all of the conditions established are met (incorporating Com “A” 7218 of February 4, 2021).

(2) The operation is declared, if appropriate, on the most recent required “Survey of External Assets and Liabilities.”

(3) Access to the foreign exchange market by residents, including entities, for prepayments of principal and interest more than 3 business days prior to their due date will require the prior approval of the BCRA, unless all of the conditions provided in each case are met:

- prepayment is made simultaneously with the settlement of the funds from a new financial debt disbursed as from October 17, 2019;
- prepayment of interest in the context of a debt instrument swap (incorporates Com “A” 7133 of October 9, 2020);
- prepayment in the context of a refinancing process as provided by Paragraph 3.17 (incorporating Com “A” 7133 of October 9, 2020, and “A” 7196 of January 6, 2021).

(4) if the requirement for the prior approval of the BCRA is in effect for access to the foreign exchange market for payments at maturity of the principal of foreign financial debts of the nonfinancial private sector when the creditor is a counterparty connected with the debtor,
this requirement will not be applicable as long as the funds have been repatriated and sold on the foreign exchange market as of October 2, 2020, and the debt has an average term of no less than two years (Paragraph 3.5.4, which incorporates Com “A” 7123 of October 1, 2020).

(5) if the requirement for prior approval of the BCRA is in effect for access to the foreign exchange market for payments at maturity of the principal and interest of foreign financial debts, this requirement will not be applicable as long as the purpose of the funds has been the financing of projects included in the “Plan for the Promotion of the Production of Argentine Natural Gas – 2020–2024 Supply and Demand Scheme” established in Article 2 of Decree No. 892/20, the funds have been repatriated and sold on the foreign exchange market as from November 16, 2020, and the debt has an average life of no less than two years (Paragraph 3.5.5, which incorporates Com “A” 7168 of November 19, 2020).

(6) Effective January 6, 2021, principal and interest payments may be made on foreign financial debts as from their due date through the application of proceeds from exports of goods and services, as long as the requirements set out in Paragraph 7.9 (financial operations authorized for application of proceeds from exports of goods and services) are met (Paragraph 3.5.6, which incorporates Communication “A” 7196 of January 6, 2021).

(7) Up to December 31, 2022, access to the foreign exchange market for principal payments on foreign financial debts when the creditor is a counterparty connected with the debtor. This requirement is not applicable to local financial institutions for their own transactions (Paragraph 3.5.7, which incorporates Communication “A” 7030 and supplementary provisions), extended by Paragraph 1 of Communication “A” 7416 of December 9, 2021, and Paragraph 1 of Communication 7466 of March 3, 2022).

Effective June 4, 2021, Communication “A” 7301 of June 4, 2021, established that this requirement would also not be applicable when the customer has a “Certificate of Increase in Exports of Goods in 2021” issued under Paragraph 3.18 for the equivalent of the principal amount being paid. Pursuant to Paragraph 6 of Communication “A” 7416 of December 9, 2021, the mechanism provided for under Paragraph 3.18 was extended to 2022.

(8) In the event that the debtor records scheduled principal due dates up to December 31, 2022 (extended by Paragraph 3 of Communication “A” 7416 of December 9, 2021, and Paragraph 3 of Communication 7466 of March 3, 2022), on financial debts included in Paragraph 3.5 of the TO de EyC, they must comply with the provisions of Paragraph 3.17.

The provisions of Paragraph 3.17 (which incorporates Communication “A” 7106 of September 15, 2020, and supplementary provisions) established that nonfinancial private sector debtors and financial institutions that have maturities through to December 31, 2022, for the indicated operations must present a refinancing plan based on the criteria set out in Paragraph 3.17.3 (provisions extended by Paragraph 3 of Communication “A” 7416 of December 9, 2021, and Paragraph 3 of Communication “A” 7466 of March 3, 2022).
Institutions may provide access to the foreign exchange market for the payment of principal and/or interest to trusts established in Argentina by a resident to guarantee principal and interest payments on their liability, as long as it is verified that the debtor had had access for payments in their name through compliance with the applicable regulatory provisions (Paragraph 3.7 of the TO de EyC).

In addition, Paragraph 3.16 of the TO de EyC establishes additional requirements applicable to transactions involving flows of funds abroad via the foreign exchange market that customers must, if relevant, meet for purposes of access to the foreign exchange market without the prior approval of the BCRA:

1. submission of an affidavit linked to their holdings of external assets in Argentina and abroad (Paragraph 3.16.2, incorporating Paragraph 1 of Communication “A” 7030 of May 28, 2020, as amended and/or supplemented by Communications “A” 7042 of June 11, 2020, 7094 of August 27, 2020, and 7327 of July 10, 2021);
2. submission of an affidavit indicating that on the day on which the request for access to the market is submitted and during the previous 90 days they have not sold securities in Argentina with settlement in foreign exchange or transferred securities to depositary agencies abroad, and indicating their commitment not to conduct such operations in the following 90 days (Paragraph 3.16.3, which incorporates Paragraph 3 of Communication “A” 7001 of April 30, 2020, replaced by Paragraph 4 of Communication “A” 7030 of May 28, 2020, which extended the time period indicated from 30 days to 90 days, supplemented by Communication “A” 7042 of June 11, 2020).

Effective July 12, 2021, Communication “A” 7327 included that BCRA’s prior authorization must be required except the customer submits an affidavit declaring that during the last 90 days as of the date of the transfer request, and also during the following 90 days, the customer had/will not arrange sales or exchanges of securities settled in foreign currency in Argentina or transfer of same to foreign depositary entities. Effective October 29, 2021, the same applies for transactions for the acquisition of foreign securities in Argentina with settlement in pesos (Communication “A” 7385); (3) the customer is not an individual or legal entity included by the AFIP in the database of invoices or equivalent documents deemed to be fictional (Paragraph 3.16.4, which incorporates Paragraph 5 of Communication “A” 7193 of December 30, 2020);
4. individuals or legal entities that are considered regulated entities having complied with the “Registry of Foreign Exchange Information of Exporters and Importers of Goods” and that are not indicated as “NOT REGISTERED” (Paragraph 3.16.5, which incorporates Communication “A” 7200 effective January 6, 2021, amended by Communication “A” 7273 of April 29, 2021).
5. verification, before proceeding with transactions involving the outflow of funds abroad, whether the customer is included in the list of CUITs with inconsistent transactions in the online system implemented by the BCRA for such purpose and, if this is the case, it must strengthen the control measures to determine the reasonableness and genuineness of the transactions (Paragraph 3.16.6 introduced by Communication “A” 7422 of December 16, 2021, taking into account the provisions of Communication “B” 12082 of October 28, 2020).

Paragraph 1.9 of the TO de EyC requires completion of the “Survey...
of External Assets and Liabilities,” even when no funds have been repatriated on the foreign exchange market and/or future access to this market is not planned.

In the case of the operations covered by Article 3 of Decree No. 616/05, the proceeds from the sale of foreign exchange must be credited to a local account. For the remaining requirements set out in Article 4 of said decree, the provisions of Resolution No. 3/15 of the former Ministry of the Treasury and Public Finance, which reduced the percentage of the deposit indicated in Paragraph (c) of this article to 0, and the provisions of Resolution No. 1/17 of the MOF, which reduced the term indicated in Articles 2 and 4(a) of Decree No. 616, as amended, to 0 days, are applicable (now Paragraph 2.8 of the TO de EyC).

Entities may give access to the foreign exchange market for principal and/or interest payments to trusts established in Argentina by a resident to ensure the capital and interest payments on its liability, as long as it verifies that the debtor had access for payments in its name to comply with the applicable regulatory provisions (Paragraph 3.7 of the TO de EyC).

Under Paragraph 3.11.1 of the aforementioned TO de EyC, entities may give access to the foreign exchange market to residents with foreign debts or trusts established in Argentina to ensure capital and interest payments on such debt, for the purchase of foreign exchange to establish guarantees for the amounts owed under debt contracts when: (1) it involves commercial debts for the import of goods and/or services to a foreign financial institution or official export credit agency or foreign financial debts to unrelated creditors that under the regulations have access to the foreign exchange market for their repayment, the contracts of which provide for the crediting of the funds to guarantee accounts for future debt service on foreign debts; (2) the funds purchased will be deposited in accounts opened with local financial institutions under the conditions established in the contracts. The establishment of guarantees in accounts opened with foreign financial institutions will only be allowed when it is the only and exclusive option provided in the debt contracts entered into prior to August 31, 2019; (3) cumulative guarantees in foreign currencies that will be used for service payments do not exceed the amount to be paid on the next service payment due; (4) the daily excess amount does not exceed 20% of the amount indicated in (3); (5) the intervening entity has verified the foreign debt documentation of the debtor and has the information needed to ensure that access is taking place under the conditions established in these provisions. The foreign currency funds not used for the settlement of contracted debt service payments must be sold on the foreign exchange market within 5 business days following the due date (Paragraph 3.11.4 of the TO de EyC).

Effective January 6, 2021, Communication “A” 7196 incorporated the following conditions: Institutions may provide access to the foreign exchange markets to residents with debts originating as from January 7, 2021, that are covered by Paragraph 7.9 or to trusts established in Argentina to guarantee the payment of principal and interest on such debt for the purchase of foreign exchange for the establishment of guarantees in foreign currency accounts opened with local financial institutions or foreign financial institutions (in the case of a foreign debt) for the amounts owing on the debt.
agreements under the following conditions: the purchases take place simultaneously with the settlement of the foreign exchange and/or funds deposited in the name of the exporter in a correspondent account abroad of a local institution are used; and the guarantees established in foreign currencies do not exceed the equivalent of 125% of the principal and interest to be paid in the current month and the following six calendar months, in accordance with the schedule of service due dates agreed with the creditors (Paragraph 3.11.3 of the TO de EyC).

In addition, Paragraph 3.16 of the TO de EyC establishes additional requirements applicable to transactions involving flows of funds abroad via the foreign exchange market that customers must, if relevant, meet for purposes of access to the foreign exchange market without the prior approval of the BCRA:

(1) submission of an affidavit linked to their holdings of external assets in Argentina and abroad (Paragraph 3.16.2, incorporating Paragraph 1 of Communication “A” 7030 of May 28, 2020, as amended and/or supplemented by Communications “A” 7042 of June 11, 2020, 7094 of August 27, 2020, and 7327 of July 10, 2021);

(2) submission of an affidavit indicating that on the day on which the request for access to the market is submitted and during the previous 90 days they have not sold securities in Argentina with settlement in foreign exchange or transferred securities to depositary agencies abroad, and indicating their commitment not to conduct such operations in the following 90 days (Paragraph 3.16.3, which incorporates Paragraph 3 of Communication “A” 7001 of April 30, 2020, replaced by Paragraph 4 of Communication “A” 7030 of May 28, 2020, which extended the time period indicated from 30 days to 90 days, supplemented by Communication “A” 7042 of June 11, 2020).

Effective July 12, 2021, Communication “A” 7327 included that BCRA’s prior authorization must be required except the customer submits an affidavit declaring that during the last 90 days as of the date of the transfer request, and also during the following 90 days, the customer had/will not arrange sales or exchanges of securities settled in foreign currency in Argentina or transfer of same to foreign depositary entities. Effective October 29, 2021, the same applies for transactions for the acquisition of foreign securities in Argentina with settlement in pesos (Communication “A” 7385); (3) the customer is not an individual or legal entity included by the AFIP in the database of invoices or equivalent documents deemed to be fictional (Paragraph 3.16.4, which incorporates Paragraph 5 of Communication “A” 7193 of December 30, 2020);

(4) individuals or legal entities that are considered regulated entities having complied with the “Registry of Foreign Exchange Information of Exporters and Importers of Goods” and that are not indicated as “NOT REGISTERED” (Paragraph 3.16.5, which incorporates Communication “A” 7200 effective January 6, 2021, amended by Communication “A” 7273 of April 29, 2021).

(5) verification, before proceeding with transactions involving the outflow of funds abroad, whether the customer is included in the list of CUITs with inconsistent transactions in the online system implemented by the BCRA for such purpose and, if this is the case, it must strengthen the control measures to determine the reasonableness and genuineness of the transactions (Paragraph 3.16.6 introduced by Communication “A” 7422 of December 16, 2021, taking into account the provisions of Communication “B” 12082 of October 28, 2020).
Communication “A” 7374 effective October 1, 2021, introduced Paragraph 3.20, whereby local financial institutions may access the foreign exchange market to meet their obligations to nonresidents under financial guarantees granted on or after October 1, 2021, provided all of the following conditions are met:

1. The granting of the guarantee was a requirement for the execution of a contract for the performance of work or delivery of goods and/or services that entailed, directly or indirectly, the export of goods and/or services of Argentine residents;
2. The guarantee is issued at the request of the resident that will provide the goods or services and is associated with the performance of the contracts for work or delivery of goods and/or services by the resident or by a nonresident company under its control that will be responsible for execution of the contract;
3. The counterparty to the aforementioned contract is a nonresident not related to the resident that will export the goods and/or services;
4. The beneficiary of the payment is the nonresident counterparty or a foreign financial institution that has granted guarantees for the proper performance of contracts for work or delivery of goods and/or services by the exporter or a nonresident company that it controls;
5. The amount of the guarantee granted by the local financial institution does not exceed the value of the exports of goods and/or services to be performed by the resident based on the execution of the contract for work or the delivery of goods and/or services;
6. The term of the guarantee does not exceed 180 calendar days from the date of shipment of local goods or completion of the performance of services related to the contract covered by the guarantee.

To residents from nonresidents

No. If appropriate, the provisions of Paragraph 2.8 of the TO de EyC applicable to certain foreign debts and repatriations by nonresidents must be met.

In the case of the operations covered by Article 3 of Decree No. 616/05, the proceeds from the sale of foreign exchange must be credited to a local account. For the remaining requirements set out in Article 4 of the said decree, the provisions of Resolution No. 3/15 of the former Ministry of the Treasury and Public Finance, which reduced the percentage of the deposit indicated in Paragraph (c) of this article to 0, and the provisions of Resolution No. 1/17 of the MOF, which reduced the term indicated in Articles 2 and 4(a) of Decree No. 616, as amended, to 0 days, are applicable (now Paragraph 2.8 of the TO de EyC).

Controls on direct investment

Yes. Direct investments are exempt from the provisions of Articles 2 through 4 of Decree No. 616/05 and supplementary provisions (the amendments in Resolution No. 3/15 of the former Ministry of the Treasury and Public Finance and Resolution No. 1/17 of the former MOF are currently applicable) and are not subject to the repatriation requirement.

Paragraph 1.9 of the TO de EyC requires completion of the “Survey of External Assets and Liabilities,” even when no funds have been repatriated on the foreign exchange market and/or future access to this market is not planned.

Outward direct investment

Yes. These operations are governed by the regulations on the formation of assets, specifically the provisions in Paragraphs 3.8 (individuals) and 3.10 (legal entities). This means that individuals are subject to a limit of US$200 a month from all entities, are subject to the remaining requirements established in the aforementioned paragraph, and
amounts above this limit are subject to prior approval. Legal entities require prior approval. However, for outward direct investment, foreign exchange can be accessed through the CCL market by residents.

Paragraph 3.8 of the TO de EyC regulates access to the foreign exchange market for resident individuals for the formation of external assets, family support, and operations in derivatives without the prior approval of the BCRA under certain conditions:
- it does not exceed the equivalent of US$200 a calendar month with all institutions and for all of the purposes indicated, net of the appropriate deductions for the subsequent operations (Paragraph 3.8.1 of the TO de EyC);
- payment of debts between residents under the terms of Paragraph 3.6, including consumer financing granted by local financial institutions in foreign currency by means of credit or charge cards (Paragraph 3.8.1.1, which incorporates Communication “A” 7106 of September 15, 2020);
- the purchase of foreign exchange for application simultaneously to the purchase of real property in Argentina with mortgage financing under the terms of Paragraph 3.9 (Paragraph 3.8.1.2, which incorporates Communication “A” 6787 of September 19, 2019);
- withdrawals of cash abroad using debit cards with debit to the customer’s local account in pesos under the terms of Paragraph 4.1.1 (Paragraph 3.8.1.3, which incorporates Communication “A” 6948 of March 28, 2020);
- consumer payments made with debit cards abroad with debit to the local account in pesos under the terms of Paragraph 4.1.2 (Paragraph 3.8.1.4, which incorporates Communication “A” 7106 of September 15, 2020);
- the operation takes place by debiting the customer’s accounts in local financial institutions, with the use of domestic currency cash allowed for operations up to the equivalent of US$100 a calendar month with all institutions (Paragraph 3.8.2);
- the customer did not exceed the limits indicated in the previous calendar month (Paragraph 3.8.3);
- the customer undertakes not to conduct operations in securities with payment in foreign currency in Argentina from the time access is requested and for the subsequent 90 (ninety) calendar days (Paragraph 3.8.4, which incorporates Communication “A” 7106 of September 15, 2020);
- the customer does not have outstanding financing corresponding to (Paragraph 3.8.5):
  (1) that provided in Paragraph 2.1.1 of the regulations on “Financial Services in the Context of the Health Emergency set out in Decree No. 260/2020 Coronavirus (COVID-19)” (Paragraph 3.8.5.1, which incorporates Com “A” 7106 of September 15, 2020); 
  (2) “zero-rate loans,” “zero-rate cultural loans,” or “subsidized-rate loans for Businesses,” as set out in Paragraphs 2.1.2 and 2.1.3 of the regulations on “Financial Services in the Context of the Health Emergency set out in Decree No. 260/2020 Coronavirus (COVID-19)” (Paragraph 3.8.5.2, which incorporates
Communications “A” 6993 of April 24, 2020, and “A” 7082 of August 6, 2020, respectively); (3) financing in pesos included in Paragraph 2 of Communication “A” 6937, Paragraphs 2 and 3 of Communication “A” 7006 and supplementary provisions (Paragraph 3.8.5.3, which incorporates Communications “A” 7001 of April 30, 2020, and “A” 7001 of May 8, 2020, respectively).

- the customer is not a beneficiary of indexing of the amount of the installment payment under the terms of Article 2 of Decree No. 319/2020 and related provisions and regulations (Paragraph 3.8.6, which incorporates Communication “A” 7106 of September 15, 2020);

- the customer is not a national public civil servant with the rank of Deputy Secretary of State (or equivalent rank) or above, nor is a member of the boards of directors of national public banks or the BCRA (Paragraph 3.8.7, which incorporates Communication “A” 7126 of October of 2020);

- the customer is not covered by Joint Resolution of the President of the Honorable Senate of the Nation and the President of the Honorable Chamber of Deputies of the Nation No. 12/2020 of October 1, 2020 (Paragraph 3.8.8, which incorporates Communication “A” 7126 of October of 2020);

- the institution has an affidavit from the customer indicating that the customer complies with the previously mentioned requirements (Paragraph 3.8.9);

- the institution has verified in the online system implemented for that purpose that the affidavit of the customer is consistent with the data held by the BCRA (Paragraph 3.8.10);

- if the operation corresponds to the purposes included in the formation of external assets by the customer, the authorized selling institution must deposit the foreign currency banknotes or traveler's checks in foreign currencies to a foreign currency account held by the customer in a local financial institution or a bank account held by the customer abroad, as appropriate (Paragraph 3.8.11). In any case, the institution must verify that the applicable requirements for the crediting of funds to a foreign currency account held by the customer at local financial institutions are complied with (requirement included in Paragraph 3.8.11. pursuant to Paragraph 3 of Communication “A” 7401 of November 18, 2021).

Paragraph 3.14.1 authorizes the transfer of foreign exchange abroad by individuals from their local foreign currency accounts to their own bank accounts abroad.

In addition, Paragraph 3.16 of the TO de EyC establishes additional requirements applicable to transactions involving flows of funds abroad via the foreign exchange market that customers must, if relevant, meet for purposes of access to the foreign exchange market without the prior approval of the BCRA: (1) submission of an affidavit linked to their holdings of external assets in Argentina and abroad (Paragraph 3.16.2, incorporating Paragraph 1 of Communication “A” 7030 of May 28, 2020, as amended and/or supplemented by Communications “A” 7042 of June 11, 2020, 7094 of August 27, 2020, and 7327 of July 10, 2021);
(2) submission of an affidavit indicating that on the day on which the request for access to the market is submitted and during the previous 90 days they have not sold securities in Argentina with settlement in foreign exchange or transferred securities to depositary agencies abroad, and indicating their commitment not to conduct such operations in the following 90 days (Paragraph 3.16.3, which incorporates Paragraph 3 of Communication “A” 7001 of April 30, 2020, replaced by Paragraph 4 of Communication “A” 7030 of May 28, 2020, which extended the time period indicated from 30 days to 90 days, supplemented by Communication “A” 7042 of June 11, 2020).

Effective July 12, 2021, Communication “A” 7327 included that BCRA’s prior authorization must be required except the customer submits an affidavit declaring that during the last 90 days as of the date of the transfer request, and also during the following 90 days, the customer had/will not arrange sales or exchanges of securities settled in foreign currency in Argentina or transfer of same to foreign depositary entities. Effective October 29, 2021, the same applies for transactions for the acquisition of foreign securities in Argentina with settlement in pesos (Communication “A” 7385); (3) the customer is not an individual or legal entity included by the AFIP in the database of invoices or equivalent documents deemed to be fictional (Paragraph 3.16.4, which incorporates Paragraph 5 of Communication “A” 7193 of December 30, 2020); (4) individuals or legal entities that are considered regulated entities having complied with the “Registry of Foreign Exchange Information of Exporters and Importers of Goods” and that are not indicated as “NOT REGISTERED” (Paragraph 3.16.5, which incorporates Communication “A” 7200 effective January 6, 2021, amended by Communication “A” 7273 of April 29, 2021); (5) verification, before proceeding with transactions involving the outflow of funds abroad, whether the customer is included in the list of CUITs with inconsistent transactions in the online system implemented by the BCRA for such purpose and, if this is the case, it must strengthen the control measures to determine the reasonableness and genuineness of the transactions (Paragraph 3.16.6 introduced by Communication “A” 7422 of December 16, 2021, taking into account the provisions of Communication “B” 12082 of October 28, 2020).

**Inward direct investment**

Yes.

The foreign exchange regulations do not establish a requirement for sale on the foreign exchange market for direct investments by nonresidents.

Under Paragraph 2.7 of the TO de EyC, entities may conduct swaps and arbitrage with customers in the case of the repatriation of foreign exchange from abroad and allow the credit of these operations to accounts opened by the customer in foreign exchange.

Paragraph 1.9 of the TO de EyC requires completion of the “Survey of External Assets and Liabilities.”

The liquidation of direct investments of nonresidents: Paragraph 3.13.1 of the TO de EyC establishes that access to the foreign exchange market by nonresident customers for the purchase of foreign exchange will require the prior approval of the BCRA, with certain exceptions such as repatriations of direct investments of nonresidents in businesses that do not control local financial institutions, as long as the capital contribution has been repatriated and sold on the foreign exchange market as of October 2, 2020, and the repatriation takes place at least 2 (two) years following entry (Paragraph 3.13.1.7).
The repatriation of direct investments of nonresidents is allowed up to the amount of the investment contributions repatriated and sold on the foreign exchange market as of November 16, 2020, as long as the purpose of the funds was the financing of projects included in the “Plan for the Promotion of the Production of Argentine Natural Gas—2020–2024 Supply and Demand Scheme” established in Article 2 of Decree No. 892/20; access must not take place until two years following the date of settlement on the foreign exchange market of the operation that meets the condition in this paragraph, among other conditions (Paragraph 3.13.2, which incorporates Com “A” 7168 of November 19, 2020).

The repatriation of direct investment contributions through the application of foreign exchange from collections on exports of goods and services will also be allowed as long as the requirements set out in Paragraph 7.9 (Paragraph 3.13.3, which incorporates Com “A” 7123 of October 1, 2020) are met.

In addition, Paragraph 3.16 of the TO de EyC establishes additional requirements applicable to transactions involving flows of funds abroad via the foreign exchange market that customers must, if relevant, meet for purposes of access to the foreign exchange market without the prior approval of the BCRA:

1. Submission of an affidavit linked to their holdings of external assets in Argentina and abroad (Paragraph 3.16.2, incorporating Paragraph 1 of Communication “A” 7030 of May 28, 2020, as amended and/or supplemented by Communications “A” 7042 of June 11, 2020, 7094 of August 27, 2020, and 7327 of July 10, 2021);

2. Submission of an affidavit indicating that on the day on which the request for access to the market is submitted and during the previous 90 days they have not sold securities in Argentina with settlement in foreign exchange or transferred securities to depositary agencies abroad, and indicating their commitment not to conduct such operations in the following 90 days (Paragraph 3.16.3, which incorporates Paragraph 3 of Communication “A” 7001 of April 30, 2020, replaced by Paragraph 4 of Communication “A” 7030 of May 28, 2020, which extended the time period indicated from 30 days to 90 days, supplemented by Communication “A” 7042 of June 11, 2020).

Effective July 12, 2021, Communication “A” 7327 included that BCRA’s prior authorization must be required except the customer submits an affidavit declaring that during the last 90 days as of the date of the transfer request, and also during the following 90 days, the customer had/will not arrange sales or exchanges of securities settled in foreign currency in Argentina or transfer of same to foreign depositary entities.

Effective October 29, 2021, the same applies for transactions for the acquisition of foreign securities in Argentina with settlement in pesos (Communication “A” 7385); (3) the customer is not an individual or legal entity included by the AFIP in the database of invoices or equivalent documents deemed to be fictional (Paragraph 3.16.4, which incorporates Paragraph 5 of Communication “A” 7193 of December 30, 2020);

(4) verification, before proceeding with transactions involving the outflow of funds abroad, whether the customer is included in the list of CUITs with inconsistent transactions in the online system implemented by the BCRA for such purpose and, if this is the case, it must strengthen the control measures to determine the

Paragraph 1.9 of the TO de EyC requires completion of the “Survey of External Assets and Liabilities,” even when no funds have been repatriated on the foreign exchange market and/or future access to this market is not planned.

Paragraph 3.13 (which incorporates Paragraph 7 of Communication “A” 6770, as amended by Communications “A” 6815 and 6855) allows access to the foreign exchange market for the repatriation of direct investments of nonresidents in the following cases:
- The repatriation of direct investments of nonresidents in companies that are not controlling companies of local financial institutions, provided the capital contribution has been repatriated and sold through the foreign exchange market as of October 2, 2020, and the repatriation takes place at least two years after its entry (Paragraph 3.13.1.7, which incorporates Communication “A” 7123, as of October 2, 2020);
- The repatriation of direct investments of nonresidents up to the amount of the investment contributions repatriated and sold on the foreign exchange market as of November 16, 2020, as long as the purpose of the funds was the financing of projects included in the Plan for the Promotion of the Production of Argentine Natural Gas established in Article 2 of Decree No. 892/20; access must take place no sooner than two calendar years following the date of sale on the foreign exchange market (Paragraph 3.13.2, which incorporates Communication “A” 7168 of November 19, 2020);
- The repatriation of direct investment contributions through the use of foreign currency proceeds from exports of goods and services will also be allowed as long as the requirements set out in Paragraph 7.9 (Paragraph 3.13.3, which incorporates Communication “A” 7123 of October 1, 2020) are met.

However, foreign exchange for the liquidation of direct investments can be accessed through the CCL market by nonresidents.

The rules governing direct investment apply. Direct investment encompasses real estate investments.

These operations are governed by the regulations on the formation of assets, specifically the provisions in Paragraphs 3.8 (individuals) and 3.10 (legal entities). This means that individuals are subject to a limit of US$200 a month from all entities, are subject to the remaining requirements established in the aforementioned paragraph, and amounts above this limit are subject to prior approval. Legal entities require prior approval.

Paragraph 3.14.1 authorizes the transfer of foreign exchange abroad by individuals from their local foreign currency accounts to their own bank accounts abroad.

In addition, Paragraph 3.16 of the TO de EyC establishes additional requirements applicable to transactions involving flows of funds abroad via the foreign exchange market that customers must, if relevant, meet for purposes of access to the foreign exchange market without the prior approval of the BCRA:
(1) submission of an affidavit linked to their holdings of external

Controls on real estate transactions  Yes.

assets in Argentina and abroad (Paragraph 3.16.2, incorporating Paragraph 1 of Communication “A” 7030 of May 28, 2020, as amended and/or supplemented by Communications “A” 7042 of June 11, 2020, 7094 of August 27, 2020, and 7327 of July 10, 2021); (2) submission of an affidavit indicating that on the day on which the request for access to the market is submitted and during the previous 90 days they have not sold securities in Argentina with settlement in foreign exchange or transferred securities to depositary agencies abroad, and indicating their commitment not to conduct such operations in the following 90 days (Paragraph 3.16.3, which incorporates Paragraph 3 of Communication “A” 7001 of April 30, 2020, replaced by Paragraph 4 of Communication “A” 7030 of May 28, 2020, which extended the time period indicated from 30 days to 90 days, supplemented by Communication “A” 7042 of June 11, 2020).

Effective July 12, 2021, Communication “A” 7327 included that BCRA’s prior authorization must be required except the customer submits an affidavit declaring that during the last 90 days as of the date of the transfer request, and also during the following 90 days, the customer had/will not arrange sales or exchanges of securities settled in foreign currency in Argentina or transfer of same to foreign depositary entities. Effective October 29, 2021, the same applies for transactions for the acquisition of foreign securities in Argentina with settlement in pesos (Communication “A” 7385); (3) the customer is not an individual or legal entity included by the AFIP in the database of invoices or equivalent documents deemed to be fictional (Paragraph 3.16.4, which incorporates Paragraph 5 of Communication “A” 7193 of December 30, 2020); (4) individuals or legal entities that are considered regulated entities having complied with the “Registry of Foreign Exchange Information of Exporters and Importers of Goods” and that are not indicated as “NOT REGISTERED” (Paragraph 3.16.5, which incorporates Communication “A” 7200 effective January 6, 2021, amended by Communication “A” 7273 of April 29, 2021); (5) verification, before proceeding with transactions involving the outflow of funds abroad, whether the customer is included in the list of CUITs with inconsistent transactions in the online system implemented by the BCRA for such purpose and, if this is the case, it must strengthen the control measures to determine the reasonableness and genuineness of the transactions (Paragraph 3.16.6 introduced by Communication “A” 7422 of December 16, 2021, taking into account the provisions of Communication “B” 12082 of October 28, 2020).

However, foreign exchange for the purchase of real estate abroad can be accessed through the CCL market by residents.

Direct investments are exempt from the provisions of Articles 2 through 4 of Decree No. 616/05 and supplementary provisions (the amendments in Resolution No. 3/15 of the former Ministry of the Treasury and Public Finance and Resolution No. 1/17 of the former MOF are currently applicable) and are not subject to the repatriation requirement.

Paragraph 1.9 of the TO de EyC requires completion of the “Survey of External Assets and Liabilities,” even when no funds have been repatriated on the foreign exchange market and/or future access to this market is not planned.

Paragraph 3.13 (which incorporates Paragraph 7 of Communication “A” 6770, amended by Communications “A” 6815 and “A” 6835)
establishes that the liquidation of direct investments by nonresidents for the purchase of foreign exchange requires the prior approval of the BCRA, with various exceptions such as repatriations of direct investments of nonresidents in businesses that do not control local financial institutions, as long as the capital contribution has been repatriated and sold on the foreign exchange market as of October 2, 2020, and the repatriation takes place at least 2 years following entry (Paragraph 3.13.1.7).

The repatriation of direct investments of nonresidents is allowed up to the amount of the investment contributions repatriated and sold on the foreign exchange market as of November 16, 2020, as long as the purpose of the funds was the financing of projects included in the “Plan for the Promotion of the Production of Argentine Natural Gas—2020–2024 Supply and Demand Scheme” established in Article 2 of Decree No. 892/20; access must not take place until two years following the date of settlement on the foreign exchange market of the operation that meets the condition in this paragraph, among other conditions (Paragraph 3.13.2, which incorporates Com “A” 7168 of November 19, 2020).

The repatriation of direct investment contributions through the application of foreign exchange from collections on exports of goods and services will also be allowed as long as the requirements set out in Paragraph 7.9 (Paragraph 3.13.3, which incorporates Com “A” 7123 of October 1, 2020) are met.

In addition, Paragraph 3.16 of the TO de EyC establishes additional requirements applicable to transactions involving flows of funds abroad via the foreign exchange market that customers must, if relevant, meet for purposes of access to the foreign exchange market without the prior approval of the BCRA:

(1) submission of an affidavit linked to their holdings of external assets in Argentina and abroad (Paragraph 3.16.2, incorporating Paragraph 1 of Communication “A” 7030 of May 28, 2020, as amended and/or supplemented by Communications “A” 7042 of June 11, 2020, 7094 of August 27, 2020, and 7327 of July 10, 2021);

(2) submission of an affidavit indicating that on the day on which the request for access to the market is submitted and during the previous 90 days they have not sold securities in Argentina with settlement in foreign exchange or transferred securities to depositary agencies abroad, and indicating their commitment not to conduct such operations in the following 90 days (Paragraph 3.16.3, which incorporates Paragraph 3 of Communication “A” 7001 of April 30, 2020, replaced by Paragraph 4 of Communication “A” 7030 of May 28, 2020, which extended the time period indicated from 30 days to 90 days, supplemented by Communication “A” 7042 of June 11, 2020).

Effective July 12, 2021, Communication “A” 7327 included that BCRA’s prior authorization must be required except the customer submits an affidavit declaring that during the last 90 days as of the date of the transfer request, and also during the following 90 days, the customer had/will not arrange sales or exchanges of securities settled in foreign currency in Argentina or transfer of same to foreign depositary entities. Effective October 29, 2021, the same applies for transactions for the acquisition of foreign securities in Argentina with settlement in pesos (Communication “A” 7385); (3) the customer is not an individual or legal entity included by the AFIP in the database of invoices or equivalent documents deemed to be fictional (Paragraph 3.16.4, which incorporates Paragraph 5 of...
Communication “A” 7193 of December 30, 2020);

(4) verification, before proceeding with transactions involving the outflow of funds abroad, whether the customer is included in the list of CUITs with inconsistent transactions in the online system implemented by the BCRA for such purpose and, if this is the case, it must strengthen the control measures to determine the reasonableness and genuineness of the transactions (Paragraph 3.16.6 introduced by Communication “A” 7422 of December 16, 2021, taking into account the provisions of Communication “B” 12082 of October 28, 2020).

Paragraph 1.9 of the TO de EyC requires completion of the “Survey of External Assets and Liabilities,” even when no funds have been repatriated on the foreign exchange market and/or future access to this market is not planned.

Controls on personal capital transactions | Yes.
---|---
Loans | Yes.
By residents to nonresidents | Yes.

These operations are governed by the regulations on the formation of assets, specifically the provisions in Paragraphs 3.8 (individuals) and 3.10 (legal entities). This means that individuals are subject to a limit of US$200 a month from all entities, are subject to the remaining requirements established in the aforementioned paragraph, and amounts above this limit are subject to prior approval. Legal entities require prior approval.

Paragraph 3.14.1 authorizes the transfer of foreign exchange abroad by individuals from their local foreign currency accounts to their own bank accounts abroad.

In addition, Paragraph 3.16 of the TO de EyC establishes additional requirements applicable to transactions involving flows of funds abroad via the foreign exchange market that customers must, if relevant, meet for purposes of access to the foreign exchange market without the prior approval of the BCRA:

(1) submission of an affidavit linked to their holdings of external assets in Argentina and abroad (Paragraph 3.16.2, incorporating Paragraph 1 of Communication “A” 7030 of May 28, 2020, as amended and/or supplemented by Communications “A” 7042 of June 11, 2020, 7094 of August 27, 2020, and 7327 of July 10, 2021);
(2) submission of an affidavit indicating that on the day on which the request for access to the market is submitted and during the previous 90 days they have not sold securities in Argentina with settlement in foreign exchange or transferred securities to depositary agencies abroad, and indicating their commitment not to conduct such operations in the following 90 days (Paragraph 3.16.3, which incorporates Paragraph 3 of Communication “A” 7001 of April 30, 2020, replaced by Paragraph 4 of Communication “A” 7030 of May 28, 2020, which extended the time period indicated from 30 days to 90 days, supplemented by Communication “A” 7042 of June 11, 2020).

Effective July 12, 2021, Communication “A” 7327 included that BCRA’s prior authorization must be required except the customer submits an affidavit declaring that during the last 90 days as of the date of the transfer request, and also during the following 90 days, the customer had/will not arrange sales or exchanges of securities settled in foreign currency in Argentina or transfer of same to foreign
depositary entities. Effective October 29, 2021, the same applies for transactions for the acquisition of foreign securities in Argentina with settlement in pesos (Communication “A” 7385); (3) the customer is not an individual or legal entity included by the AFIP in the database of invoices or equivalent documents deemed to be fictional (Paragraph 3.16.4, which incorporates Paragraph 5 of Communication “A” 7193 of December 30, 2020); (4) individuals or legal entities that are considered regulated entities having complied with the “Registry of Foreign Exchange Information of Exporters and Importers of Goods” and that are not indicated as “NOT REGISTERED” (Paragraph 3.16.5, which incorporates Communication “A” 7200 effective January 6, 2021, amended by Communication “A” 7273 of April 29, 2021); (5) verification, before proceeding with transactions involving the outflow of funds abroad, whether the customer is included in the list of CUITs with inconsistent transactions in the online system implemented by the BCRA for such purpose and, if this is the case, it must strengthen the control measures to determine the reasonableness and genuineness of the transactions (Paragraph 3.16.6 introduced by Communication “A” 7422 of December 16, 2021, taking into account the provisions of Communication “B” 12082 of October 28, 2020).

To residents from nonresidents Yes.

Com “A” 6770 establishes that foreign financial debts disbursed as from September 1, 2019, must be repatriated and sold on the foreign exchange market as a requirement for subsequent access to the market for principal and interest payments. Com “A” 6776 of September 5, 2019, provides that, in the case of institutions, this requirement is deemed to be met when the funds are included in the PGC. These provisions are found in Paragraph 2.4 of the TO de EyC.

Paragraph 2.6 allows exceptions to the said sale under specific conditions.

Paragraph 3.5 of the TO de EyC establishes that entities may provide access to the foreign exchange market for principal and interest payments on foreign financial debt as long as the following conditions are met:
(1) the debtor demonstrates the repatriation and sale of foreign exchange on the foreign exchange market in an amount equivalent to the nominal value of the financial debt abroad. It is considered to be met:
- for funds disbursed as from September 1, 2019;
- foreign debts originating as from September 1, 2019, that do not generate disbursements as they consist of refinancing of foreign financial debts that would have had access under the applicable regulations, as long as the refinancing does not occur prior to the maturity of the original debt;
- for the amount of the applicable issuance expenses and other expenses debited abroad for the bank transactions involved;
- for the difference between the actual issue value and the nominal value of issues of debt securities publicly registered abroad that are placed below par;
- for the portion corresponding to a capitalization of interest provided in the debt contract;
- for the portion of issues of debt securities registered publicly abroad as from October 9, 2020, with an average term of not less than two years that were delivered to financial creditors abroad and/or debt securities publicly registered in Argentina denominated in foreign exchange with maturities between October 15, 2020, and December 31, 2021, which made it possible to reach the refinancing parameters
provided in Paragraph 3.17 (incorporating Com “A” 7133 of October 9, 2020, and 7230 of February 25, 2021):
- effective January 6, 2021, for the portion of issues of debt securities publicly registered abroad as from January 7, 2021, that were delivered to creditors for the refinancing of pre-existing financial debts with an extension of the average term, when this corresponds to the amount of refinanced principal, interest accrued until the date of refinancing and, provided the principal of the new debt securities does not fall due during the first two years, the amount equivalent to the interest that would accrue in the first two years on the debt refinanced in advance and/or for the extension of the refinanced principal and/or for interest that would accrue on the amounts thus refinanced (incorporating Communication “A” 7196 of January 6, 2021, and Communication “A” 7416 of December 9, 2021);
- effective February 4, 2021, for the portion subscribed in foreign currencies in Argentina of issues of debt securities publicly registered abroad as from February 5, 2021, as long as all of the conditions established are met (incorporating Com “A” 7218 of February 4, 2021);

(2) The operation is declared, if appropriate, on the most recent required “Survey of External Assets and Liabilities;”

(3) Access to the foreign exchange market by residents, including entities, for prepayments of principal and interest more than 3 business days prior to their due date will require the prior approval of the BCRA, unless all of the conditions provided in each case are met:
- prepayment is made simultaneously with the settlement of the funds from a new financial debt disbursed as from October 17, 2019;
- prepayment of interest in the context of a debt instrument swap (incorporates Com “A” 7133 of October 9, 2020);
- prepayment in the context of a refinancing process as provided by Paragraph 3.17 (incorporating Com “A” 7133 of October 9, 2020, and “A” 7196 of January 6, 2021);

(4) if the requirement for the prior approval of the BCRA is in effect for access to the foreign exchange market for payments at maturity of the principal of foreign financial debts of the nonfinancial private sector when the creditor is a counterparty connected with the debtor, this requirement will not be applicable as long as the funds have been repatriated and sold on the foreign exchange market as of October 2, 2020, and the debt has an average term of no less than two years (Paragraph 3.5.4, which incorporates Com “A” 7123 of October 1, 2020);

(5) if the requirement for prior approval of the BCRA is in effect for access to the foreign exchange market for payments at maturity of the principal and interest of foreign financial debts, this requirement will not be applicable as long as the purpose of the funds has been the financing of projects included in the “Plan for the Promotion of the Production of Argentine Natural Gas – 2020–2024 Supply and Demand Scheme” established in Article 2 of Decree No. 892/20, the funds have been repatriated and sold on the foreign exchange market as from November 16, 2020, and the debt has an average life of no less than two years (Paragraph 3.5.5, which incorporates Com “A” 7168 of November 19, 2020);

(6) Effective January 6, 2021, principal and interest payments may be made on foreign financial debts as from their due date through the
application of proceeds from exports of goods and services, as long as the requirements set out in paragraph 7.9 (financial operations authorized for application of proceeds from exports of goods and services) are met. (Paragraph 3.5.6, which incorporates Communication “A” 7196 of January 6, 2021);

(7) up to December 31, 2022, access to the foreign exchange market for principal payments on foreign financial debts when the creditor is a counterparty connected with the debtor. This requirement is not applicable to local financial institutions for their own transactions (Paragraph 3.5.7, which incorporates Communication “A” 7030 and supplementary provisions, extended by Paragraph 1 of Communication “A” 7416 of December 9, 2021, and Paragraph 1 of Communication “A” 7466 of March 3, 2022).

Effective June 4, 2021, Communication “A” 7301 of June 4, 2021, established that this requirement would also not be applicable when the customer has a “Certificate of Increase in Exports of Goods in 2021” issued under Paragraph 3.18 for the equivalent of the principal amount being paid. Pursuant to Paragraph 6 of Communication “A” 7416 of December 9, 2021, the mechanism provided for under Paragraph 3.18 was extended to 2022;

(8) In the event that the debtor records scheduled principal due dates up to December 31, 2022 (extended by Paragraph 3 of Communication “A” 7416 of December 9, 2021, and Paragraph 3 of Communication “A” 7466 of March 3, 2022) on financial debts included in Paragraph 3.5 of the TO de EyC, they must comply with the provisions of Paragraph 3.17.

The provisions of Paragraph 3.17 (which incorporates Com “A” 7106 of September 15, 2020, and supplementary provisions) established that nonfinancial private sector debtors and financial institutions that have maturities through to December 31, 2022, for the indicated operations must present a refinancing plan based on the criteria set out in Paragraph 3.17.3 (provisions extended by Paragraph 3 of Communication “A” 7416 of December 9, 2021, and Paragraph 3 of Communication “A” 7466 of March 3, 2022).

Institutions may provide access to the foreign exchange market for the payment of principal and/or interest to trusts established in Argentina by a resident to guarantee principal and interest payments on their liability, as long as it is verified that the debtor had had access for payments in their name through compliance with the applicable regulatory provisions (Paragraph 3.7 of the TO de EyC).

In addition, Paragraph 3.16 of the TO de EyC establishes additional requirements applicable to transactions involving flows of funds abroad via the foreign exchange market that customers must, if relevant, meet for purposes of access to the foreign exchange market without the prior approval of the BCRA:

(1) submission of an affidavit linked to their holdings of external assets in Argentina and abroad (Paragraph 3.16.2, incorporating Paragraph 1 of Communication “A” 7030 of May 28, 2020, as amended and/or supplemented by Communications “A” 7042 of June 11, 2020, 7094 of August 27, 2020, and 7327 of July 10, 2021);

(2) submission of an affidavit indicating that on the day on which the request for access to the market is submitted and during the previous 90 days they have not sold securities in Argentina with settlement in foreign exchange or transferred securities to depositary agencies abroad, and indicating their commitment not to conduct such
operations in the following 90 days (Paragraph 3.16.3, which incorporates Paragraph 3 of Communication “A” 7001 of April 30, 2020, replaced by Paragraph 4 of Communication “A” 7030 of May 28, 2020, which extended the time period indicated from 30 days to 90 days, supplemented by Communication “A” 7042 of June 11, 2020).

Effective July 12, 2021, Communication “A” 7327 included that BCRA’s prior authorization must be required except the customer submits an affidavit declaring that during the last 90 days as of the date of the transfer request, and also during the following 90 days, the customer had/will not arrange sales or exchanges of securities settled in foreign currency in Argentina or transfer of same to foreign depositary entities. Effective October 29, 2021, the same applies for transactions for the acquisition of foreign securities in Argentina with settlement in pesos (Communication “A” 7385); (3) the customer is not an individual or legal entity included by the AFIP in the database of invoices or equivalent documents deemed to be fictional (Paragraph 3.16.4, which incorporates Paragraph 5 of Communication “A” 7193 of December 30, 2020); (4) individuals or legal entities that are considered regulated entities having complied with the “Registry of Foreign Exchange Information of Exporters and Importers of Goods” and that are not indicated as “NOT REGISTERED” (Paragraph 3.16.5, which incorporates Communication “A” 7200 effective January 6, 2021, amended by Communication “A” 7273 of April 29, 2021); (5) verification, before proceeding with transactions involving the outflow of funds abroad, whether the customer is included in the list of CUITs with inconsistent transactions in the online system implemented by the BCRA for such purpose and, if this is the case, it must strengthen the control measures to determine the reasonableness and genuineness of the transactions (Paragraph 3.16.6 introduced by Communication “A” 7422 of December 16, 2021, taking into account the provisions of Communication “B” 12082 of October 28, 2020).

Paragraph 1.9 of the TO de EyC requires completion of the “Survey of External Assets and Liabilities,” even when no funds have been repatriated on the foreign exchange market and/or future access to this market is not planned.

In the case of the operations covered by Article 3 of Decree No. 616/05, the proceeds from the sale of foreign exchange must be credited to a local account. For the remaining requirements set out in Article 4 of the said decree, the provisions of Resolution No. 3/15 of the former Ministry of the Treasury and Public Finance, which reduced the percentage of the deposit indicated in Paragraph (c) of this article to 0, and the provisions of Resolution No. 1/17 of the MOF, which reduced the term indicated in Articles 2 and 4(a) of Decree No. 616, as amended, to 0 days, are applicable (now Paragraph 2.8 of the TO de EyC).

Gifts, endowments, inheritances, and legacies

Yes.

By residents to nonresidents

Yes.

Paragraph 3.16 of the TO de EyC establishes requirements applicable to transactions involving flows of funds abroad via the foreign exchange market that customers must, if relevant, meet for purposes of access to the foreign exchange market without the prior approval of the BCRA:

(1) submission of an affidavit linked to their holdings of external assets in Argentina and abroad (Paragraph 3.16.2, incorporating Paragraph 1 of Communication “A” 7030 of May 28, 2020, as
amended and/or supplemented by Communications “A” 7042 of June 11, 2020, 7094 of August 27, 2020, and 7327 of July 10, 2021; (2) submission of an affidavit indicating that on the day on which the request for access to the market is submitted and during the previous 90 days they have not sold securities in Argentina with settlement in foreign exchange or transferred securities to depository agencies abroad, and indicating their commitment not to conduct such operations in the following 90 days (Paragraph 3.16.3, which incorporates Paragraph 3 of Communication “A” 7001 of April 30, 2020, replaced by Paragraph 4 of Communication “A” 7030 of May 28, 2020, which extended the time period indicated from 30 days to 90 days, supplemented by Communication “A” 7042 of June 11, 2020).

Effective July 12, 2021, Communication “A” 7327 included that BCRA’s prior authorization must be required except the customer submits an affidavit declaring that during the last 90 days as of the date of the transfer request, and also during the following 90 days, the customer had/will not arrange sales or exchanges of securities settled in foreign currency in Argentina or transfer of same to foreign depository entities. Effective October 29, 2021, the same applies for transactions for the acquisition of foreign securities in Argentina with settlement in pesos (Communication “A” 7385); (3) the customer is not an individual or legal entity included by the AFIP in the database of invoices or equivalent documents deemed to be fictional (Paragraph 3.16.4, which incorporates Paragraph 5 of Communication “A” 7193 of December 30, 2020); (4) individuals or legal entities that are considered regulated entities having complied with the “Registry of Foreign Exchange Information of Exporters and Importers of Goods” and that are not indicated as “NOT REGISTERED” (Paragraph 3.16.5, which incorporates Communication “A” 7200 effective January 6, 2021, amended by Communication “A” 7273 of April 29, 2021); (5) verification, before proceeding with transactions involving the outflow of funds abroad, whether the customer is included in the list of CUITs with inconsistent transactions in the online system implemented by the BCRA for such purpose and, if this is the case, it must strengthen the control measures to determine the reasonableness and genuineness of the transactions (Paragraph 3.16.6 introduced by Communication “A” 7422 of December 16, 2021, taking into account the provisions of Communication “B” 12082 of October 28, 2020).

restrictions or specific foreign exchange requirements for these transactions. There is no repatriation obligation, but if the funds are repatriated under Paragraph 2.7 of the TO de EyC, entities may conduct swaps and arbitrage with customers and allow the credit of these operations to foreign currency accounts opened by the customer.

Transfer of gambling and prize earnings  No. There are no restrictions or specific foreign exchange requirements for these transactions. There is no repatriation obligation, but if the funds are repatriated under Paragraph 2.7 of the TO de EyC, entities may conduct swaps and arbitrage with customers and allow the credit of these operations to foreign currency accounts opened by the customer.

Provisions Specific to the Financial Sector

Provisions specific to commercial banks and other credit institutions  Yes. Financial institutions may obtain lines of credit from abroad. The use of the funds must comply with the provisions of the general rules in force regarding “Credit Policy” and “Credit Management.” The TO de EyC does not regulate borrowing abroad.

Borrowing abroad  Yes. On foreign exchange aspects, Com “A” 6770 establishes that foreign financial debts disbursed as from September 1, 2019, must be repatriated and the funds sold on the foreign exchange market as a requirement for later access to that market for principal and interest payments. Communication “A” 6776 of September 5, 2019, provides that, in the case of institutions, this requirement is deemed to be met when the funds are included in the PGC. These provisions are collected in Paragraph 2.4 of the TO de EyC.

Maintenance of accounts abroad  No.

Lending to nonresidents (financial or commercial credits)  Yes. Only financial intermediaries are permitted to grant credit assistance to residents in the country to finance investment, production, marketing, or consumption of goods and services for domestic consumption or export, or outward FDI by enterprises resident in the country. Financial assistance will only be granted to residents abroad if this general criterion is met and in certain specific cases (credit facilities to foreign banks, whether or not they are correspondents, for the purpose of facilitating local exports, credits to residents abroad corresponding to lags in the payment of operations involving quoted foreign currencies or securities, inter alia).

Lending locally in foreign exchange  Yes. Lending capacity based on foreign exchange deposits and other liabilities through financial intermediation in foreign exchange (with the exception of inward commercial credit facilities) may be applied to the following: (1) prefinancing and financing of exports directly or through principals, trustees, or other brokers; (2) other financing for exporters expecting future foreign currency income streams and demonstrating, in the year prior to when the financing is granted, invoices reasonably comparable to the amount of financing; (3) financing of investment projects, working capital, or goods that increase the value of or are related to the production of goods to be exported; (4) financing for the producers of goods to be exported, whether as is or as part of other goods, by third-party purchasers, provided they have total assurances or guarantees in foreign currency from those third parties and/or firm sales contracts in foreign currency and/or in exportable goods; (5) financing for providers of goods and/or services that are part of the production process for fungible goods regularly and customarily quoted in foreign currency in domestic or foreign markets and widely disseminated and easily...
known to the public, provided they have firm sales contracts for those goods and/or services in foreign currency and/or in those goods; (6) commercial financing for commercial portfolio customers that is treated as consumer or housing loans – in accordance with the provisions established in the regulations on “Borrower Classification” – for the purpose of importing capital goods (“BK” in accordance with the MERCOSUR Common Nomenclatures as indicated in Annex I to Decree No. 690/02 and other supplementary provisions) that increase the production of goods intended for the domestic market; (7) loans made from one financial institution to another; (8) foreign currency debt securities or financial trust investment certificates publicly quoted with CNV authorization whose underlying assets are securities acquired by the trust and guaranteed by reciprocal guarantee companies, to finance export transactions; (9) financing of producers, processors, or storage operators, provided they have contracts for the outright sale of the goods to an exporter at a price set or to be set in foreign currency that is customary in local or foreign markets and is widely published and easily accessible to the public; (10) other financing included in the credit program referred to in Inter-American Development Bank (IADB) Loan No. 1192/OC-AR, not to exceed 10% of borrowing capacity; (11) letters and notes of the BCRA denominated in US dollars; (12) direct investments abroad by companies resident in Argentina, the purpose of which is to develop productive activities in goods and/or nonfinancial services, whether through contributions or through purchases of shares in companies, provided they are established in countries or territories considered cooperative for purposes of fiscal transparency based on the provisions of Article 1 of Decree No. 589/13 and supplementary provisions; (13) financing of investment projects, including working capital, that allow increased production in the energy sector and have firm sales contracts and/or total assurances or guarantees in foreign currency; (14) primary subscription of foreign currency debt instruments of the National Treasury, up to an amount equal to one-third of the applications made; (15) financing of investment projects focusing on cattle ranching, including working capital, not to exceed 5% of the institution’s deposits in foreign exchange; (16) financing of foreign importers for the acquisition of goods and/or services produced in the country, directly or through credit facilities to external banks; and (17) financing to residents in the country guaranteed with standby LCs issued by foreign banks or multilateral development banks having investment grade international risk ratings, provided these credit portfolios are unrestricted and that the funds are credited immediately on the simple request of the beneficiary.

For purposes of such financing, whatever the source of the funds, financial institutions must verify that customers have sufficient payment capacity. To that end, they must consider at least two scenarios involving significant fluctuations in the exchange rate of different magnitudes within up to one year.

There are currently no limits on bank holdings of securities from a particular issuer.

Financial institutions may freely determine the level of their PGC (Paragraph 5.9.1) while foreign exchange bureaus and agencies may not increase their holdings in foreign currencies from the higher of the average of their holdings in August 2019 or the stock at the close of the day before September 2, 2019, without the prior approval of the BCRA (Paragraph 5.9.2).

Under Paragraph 5.9.3 of the TO de EyC, entities may not purchase

Yes.

Purchase of locally issued securities denominated in foreign exchange

©International Monetary Fund. Not for Redistribution
securities on the secondary market with settlement in foreign exchange and may not use funds from their PGC to make payments to local suppliers (Paragraph 5.9.4 of said TO de EyC).

Differential treatment of deposit accounts in foreign exchange

Yes.

Reserve requirements

Yes.

Saving deposits including payroll/social security and special deposits are subject to a minimum cash requirement of 45% or 20% (based on the category of financial institution) if denominated in pesos, or 25% if denominated in foreign currency.

Fixed-term deposits are subject to a requirement that differs for pesos and foreign currencies (and based on the type of institution) and decreases according to the residual term.

For fixed-term deposits with maturities of up to 29 days, the minimum cash requirement is 32% or 11% for peso deposits depending on the type of institutions and 23% for foreign currency deposits.

For fixed-term deposits with maturities from 30 to 59 days, the minimum cash requirement is 22% or 7% for peso deposits depending on the type of institutions and 17% for foreign currency deposits.

For fixed-term deposits with maturities from 60 to 89 days, the minimum cash requirement is 4% or 2% for peso deposits depending on the type of institutions and 11% for foreign currency deposits.

For fixed-term deposits in pesos with maturities of 90 days or more, the minimum cash requirement is 0%.

For fixed-term deposits in foreign exchange with maturities from 90 to 179 days, the minimum cash requirement is 5%.

For fixed-term deposits in foreign exchange with maturities from 180 to 365 days, the minimum cash requirement is 2%.

For fixed-term deposits in foreign exchange with maturities more than 365 days, the minimum cash requirement is 0%.

Communication “A” 6616 amended the method for calculating the reserve requirements, which until then were based on the category of the financial entity according to the municipality, replacing it with a method based on the group to which the financial institutions belong, according to their assets compared to the total assets in the financial system and their status as branches or subsidiaries of a foreign bank deemed to be systemically important (global systemically important bank).

Communication “A” 6334: the limit on the deduction of the minimum cash requirement based on financing granted under the “AHORA 12” program is 8% of the items subject to the requirement.

As per Communication “A” 6901: a new deduction from the minimum cash requirement was established for entities in Group “A,” equivalent to 30% of the sum of peso financing to MSMEs granted at a maximum nominal annual fixed interest rate of 40% through February 16, 2020 (which may be computed until its repayment) and a 35% nominal annual fixed rate as of February 17, 2020, with a limit of 2% of the items in pesos subject to the requirement.

Communication “A” 6871 specifies, the way in which the residual term of deposits with a prepayment option in UVAs indexable on the basis of the Coeficiente de Estabilización de Referencia should be calculated – Law No. 25.827 (“UVA”).
Communication “A” 6884: the minimum cash requirement was reduced based on the special treatment provided for financing in UVAs indexable on the basis of the Coeficiente de Estabilización de Referencia—Law No. 25.827 ("UVA"), to which a limit on the increase in the value of the installments to be paid is applied.

Classification of institutions:
(1) institutions in Group A (made up of institutions with assets whose value is equal to or greater than 1% of the total assets of the financial system);
(2) institutions in Group “B” (made up of institutions with assets whose value is less than 1% and equal to or greater than 0.25% of the total assets of the financial system);
(3) institutions in Group “C” (made up of institutions with assets whose value is less than or equal to 0.25% of the total assets of the financial system).

The indicator is the average of the assets corresponding to the months of July, August, and September of the previous year.

Transactions are prohibited by general policies on lending.

The net global foreign exchange position comprises total assets and liabilities, commitments and other instruments and financial intermediation operations in foreign currencies or linked to changes in the exchange rate, including spot and forward transactions and other derivatives contracts, the position in gold, deposits in the said currency in accounts at the BCRA, as well as BCRA bills in US dollars, BCRA monetary regulation instruments in foreign currency, subordinate debt in foreign currency and instruments representing foreign currency debt. Also included are forward operations entered into under framework agreements within authorized markets in Argentina in which settlement is by netting, without physical delivery of the underlying asset.

In addition, equity certificates or debt securities issued by financial trusts and credit rights in respect of ordinary trusts when their underlying asset consists of assets in foreign currency, and the amount of transactions with raw materials or commodities (Paragraphs 3.6. and 6.1.3. of the rules on “Spot and forward transactions, repos, guarantees, other derivatives, and transactions with mutual funds”) will be computed.

The position in currencies other than US dollars is expressed in the currency in question by applying the exchange rate published by the
BCRA. Assets deductible for purposes of determining regulatory capital (RPC) and items recorded by financial institutions in their branches abroad are not included.

The positive net global foreign exchange position may not exceed 5% of regulatory capital but may reach up to 30% of regulatory capital if under certain conditions National Treasury Notes denominated in US dollars (Paragraphs 7 and 8 of Communication “A” 6526 and Communications “A” 6699, 6735, and 7093) are included. Any variation resulting from swaps by the National Executive Branch may only be covered by one of the applications provided in Section 2 of the Regulations on Credit Policy or by foreign currency forward transactions payable in pesos. The positive net global foreign exchange position must be measured on a daily basis instead of as the monthly average of daily balances.

There is also a limit on the positive spot position, which, measured daily, may not exceed an amount equivalent to 0% of the regulatory capital of the month prior to the month to which it corresponds.

The negative net global foreign exchange position, expressed as a monthly average of the daily balances, should not exceed 30% of the financial institution’s regulatory capital for the previous month.

Overruns are subject to a charge equivalent to 1.5 times the average rate resulting from auctions of BCRA instruments in Argentine pesos for shorter terms.

Financial institutions may freely determine the level and use of their PGC, under Paragraph 5.9.1 of the TO de EyC while foreign exchange bureaus and agencies may not increase their foreign currency holdings from the higher of their average holdings in August 2019 or the stock as of the close of the day before September 2, 2019 (Paragraph 5.9.2 of the TO de EyC).

The PGC includes all of the institution’s liquid external assets, net of debit balances of correspondents deriving from foreign exchange market transactions. It also includes buying and selling arranged on the foreign exchange market and pending settlement. The following, inter alia, are considered institutions’ liquid external assets: banknotes and coins in foreign exchange, good delivery holdings in monetary gold or gold bars, correspondents’ credit balances (including transfers to third parties without arranged settlement), other demand deposits with foreign financial institutions, investments in external public securities, and time CDs. PGCs do not include FDI, third-party external assets under custodianship, forward buying and selling of foreign exchange or foreign assets, deposits with the BCRA in foreign exchange in accounts in the name of the institution, and other local assets in foreign exchange, under Paragraph 6.7 of the TO de EyC.

The net global foreign exchange position comprises total assets and liabilities, commitments and other instruments and financial intermediation operations in foreign currencies or linked to changes in the exchange rate, including spot and forward transactions and other derivatives contracts, the position in gold, deposits in the said currency in accounts at the BCRA, as well as BCRA bills in US dollars, BCRA monetary regulation instruments in foreign currency, subordinate debt in foreign currency and instruments representing foreign currency debt. Also included are forward operations entered into under framework agreements within authorized markets in Argentina in which settlement is by netting, without physical delivery of the underlying asset. In addition, equity certificates or debt securities issued by financial trusts and credit rights in respect of ordinary trusts when their underlying asset consists of assets in foreign currency, and the amount of transactions with raw materials...
or commodities (Paragraphs 3.6 and 6.1.3 of the rules on “Spot and forward transactions, repos, guarantees, other derivatives, and transactions with mutual funds”) [will be computed]. The position in currencies other than US dollars is expressed in the currency in question by applying the exchange rate published by the BCRA. RPC and items recorded by financial institutions in their branches abroad are not included.

The positive net global foreign exchange position may not exceed 5% of regulatory capital but may reach up to 30% of regulatory capital if under certain conditions National Treasury Notes denominated in US dollars (Paragraphs 6 and 8 of Communication “A” 6526 and Communications “A” 6699, 6735, and 7093) are included. Any variation resulting from swaps by the National Executive Branch may only be covered by one of the applications provided in Section 2 of the Regulations on Credit Policy or by forward transactions in foreign currency payable in pesos. The positive net global foreign exchange position must be measured on a daily basis instead of as the monthly average of daily balances.

There is also a limit on the positive spot position, which, measured daily, may not exceed an amount equivalent to 0% of the regulatory capital of the month prior to the month to which it corresponds.

The negative net global foreign exchange position, expressed as a monthly average of the daily balances, should not exceed 30% of the financial institution’s regulatory capital for the previous month.

Overruns are subject to a charge equivalent to 1.5 times the average rate resulting from auctions of BCRA instruments in Argentine pesos for shorter terms.

Financial institutions may freely determine the level and use of their PGC, under Paragraph 5.9.1 of the TO de EyC while foreign exchange bureaus and agencies may not increase their foreign currency holdings from the higher of their average holdings in August 2019 or the stock as of the close of the day before September 2, 2019 (Paragraph 5.9.2 of the TO de EyC).

The PGC includes all of the institution’s liquid external assets, net of debit balances of correspondents deriving from foreign exchange market transactions. It also includes buying and selling arranged on the foreign exchange market and pending settlement. The following, inter alia, are considered institutions’ liquid external assets: banknotes and coins in foreign exchange, good delivery holdings in monetary gold or gold bars, correspondents’ credit balances (including transfers to third parties without arranged settlement), other demand deposits with foreign financial institutions, investments in external public securities, and time CDs. PGCs do not include FDI, third-party external assets under custodianship, forward buying and selling of foreign exchange or foreign assets, deposits with the BCRA in foreign exchange in accounts in the name of the institution, and other local assets in foreign exchange, under Paragraph 6.7 of the TO de EyC.

The net global foreign exchange position comprises total assets and liabilities, commitments and other instruments and financial intermediation operations in foreign currencies or linked to changes in the exchange rate, including spot and forward transactions and other derivatives contracts, the position in gold, deposits in the said currency in accounts at the BCRA, as well as BCRA bills in US dollars, BCRA monetary regulation instruments in foreign currency, subordinate debt in foreign currency and instruments representing foreign currency debt. Also included are forward operations entered into under framework agreements within authorized markets in Argentina in which settlement is by netting, without physical

On nonresident assets and liabilities Yes.
delivery of the underlying asset. In addition, equity certificates or
debt securities issued by financial trusts and credit rights in respect
of ordinary trusts when their underlying asset consists of assets in
foreign currency, and the amount of transactions with raw materials
or commodities (Paragraphs 3.6. and 6.1.3. of the rules on “Spot and
forward transactions, repos, guarantees, other derivatives, and
transactions with mutual funds”) will be computed. The position in
currencies other than US dollars is expressed in the currency in
question by applying the exchange rate published by the BCRA. RPC
and items recorded by financial institutions in their branches abroad
are not included.

The positive net global foreign exchange position may not exceed
5% of regulatory capital but may reach up to 30% of regulatory
capital if under certain conditions National Treasury Notes
denominated in US dollars (Paragraphs 6 and 7 of Communication
“A” 6526 and Communications “A” 6699, 6735, and 7093) are
included. Any variation resulting from swaps by the National
Executive Branch may only be covered by one of the applications
provided in Section 2 of the Regulations on Credit Policy or by
forward transactions in foreign currency payable in pesos. The
positive net global foreign exchange position must be measured on a
daily basis instead of as the monthly average of daily balances.
There is also a limit on the positive spot position, which, measured
daily, may not exceed an amount equivalent to 0% of the regulatory
capital of the month prior to the month to which it corresponds.
The negative net global foreign exchange position, expressed as a
monthly average of the daily balances, should not exceed 30% of the
financial institution’s regulatory capital for the previous month.
Overruns are subject to a charge equivalent to 1.5 times the average
rate resulting from auctions of BCRA instruments in Argentine pesos
for shorter terms.

Financial institutions may freely determine the level and use of their
PGC, under Paragraph 5.9.1 of the TO de EyC while foreign
exchange bureaus and agencies may not increase their foreign
currency holdings from the higher of their average holdings in
August 2019 or the stock as of the close of the day before September
2, 2019 (Paragraph 5.9.2 of the TO de EyC).

The PGC includes all of the institution’s liquid external assets, net of
debit balances of correspondents deriving from foreign exchange
market transactions. It also includes buying and selling arranged on
the foreign exchange market and pending settlement. The following,
inter alia, are considered institutions’ liquid external assets:
banknotes and coins in foreign exchange, good delivery holdings in
monetary gold or gold bars, correspondents’ credit balances
(including transfers to third parties without arranged settlement),
other demand deposits with foreign financial institutions,
investments in external public securities, and time CDs. PGCs do not
include FDI, third-party external assets under custodianship, forward
buying and selling of foreign exchange or foreign assets, deposits
with the BCRA in foreign exchange in accounts in the name of the
institution, and other local assets in foreign exchange, under
Paragraph 6.7 of the TO de EyC.

In foreign exchange aspects, the regulations governing resident legal
entities in Paragraph 3.10 of the TO de EyC apply.

All investments and funds of insurance companies must be located in Argentina.

For this purpose, local investments are defined as those issued and transacted domestically as detailed in Item 35.5 of the General Insurance Regulations implementing Law No. 20.091, for each particular instrument.

The Superintendency of Insurance may grant its authorization for the maintenance of an operating account abroad for the sole purpose of expediting business operations. This account may not hold more than the minimum amount required for operational purposes, nor may it be operated to make any form of profit.

Specialist reinsurers and branches of foreign reinsurance companies established in Argentina may hold investments and funds abroad not exceeding 50% of the capital to be credited.

The minimum for reinsurance companies is determined by the parameters in the previous Item.

The nature of the liabilities and the currency in which they were assumed: Insurers and reinsurers must maintain the investments portfolio based on the currency of the commitments assumed.

There is a single public pension regime, the Argentine Integrated Pension System (“SIPA”), established by Law No. 26.425 of December 4, 2008.

Law No. 27.260, Article 30 supersedes Article 74 of Law No. 24.241. Authorized investments of the Sustainability Guarantee Fund (“FGS” or the “Fund”): Article 30. Article 74 of Law No. 24.241 as amended must be superseded with the following text:

Article 74: The assets of the FGS of the SIPA must be invested according to the criteria of adequate returns and security in compliance with the limits established under this law and the regulatory texts. The FGS must be permitted to invest in:

1. Public credit operations as a result of which Argentina becomes a debtor via the Finance Secretariat of the Ministry of Economy are permitted, whether they involve public securities, treasury bills, or loans, up to 50% of the Fund’s total assets. This may be raised to 100% net of the ceilings, provided in this Article, as long as the surplus funds involve either resources intended specifically to enable their fulfillment of collateral or guarantees granted by international organizations or entities of which Argentina is a member. Holdings of securities representing Argentina’s public debt that were received in swaps by retirement and pension fund administrators in the context of the restructuring of public debt under the terms of Article 65 of Law No. 24.156 as amended and Article 62 of Law No. 25.827 as amended are excluded from the ceiling established in this paragraph, independently of their not having the guarantees indicated.
therein.
Transitionally, until December 31, 2023, up to 70% of the portfolio of the FGS of the SIPA may be held in public securities, with or without guarantees, and at the end of this period, the holdings of these assets must be regularized to comply with the limits set in the previous paragraph (Text amended by Article 57 of Law No. 27.541);
(2) Securities issued by provinces, the Autonomous City of Buenos Aires, municipalities, the BCRA, other autonomous national and municipal government bodies, and national, provincial, and municipal government-owned companies are permitted up to 30% of the Fund’s total assets;
(3) Corporate bonds, debentures, and other debt securities issued by domestic stock companies, financial institutions, cooperatives and civil associations, and branches of foreign companies, if authorized for public offering by the CNV, are authorized up to 40% of the Fund’s total assets;
(4) Fixed-term deposits with financial institutions governed by Law No. 21.526 as amended, up to 30% of the Fund’s total assets;
(5) Shares and/or negotiable bonds that can be converted to shares in domestic quasi-governmental or private stock companies, if authorized for public listing by the CNV and that are listed in markets authorized by the CNV, the purpose of which is to organize operations with negotiable instruments that are offered publicly, for a minimum of 7% and up to a maximum of 50% of the Fund’s total assets.
Operations in shares include futures and options on these securities, subject to the limits stipulated in the regulations.
Transfers and/or any other act or action that limits, alters, eliminates, or changes the purpose, interest, ownership, or nature of the assets indicated in this paragraph are prohibited, provided the result is Fund holdings lower than established in the first paragraph of the present section, without the express prior approval of the National Congress, with the following exceptions:
(1) START Tender offers directed to all those holding such assets at a fair price authorized by the CNV, under the terms of Chapters II, III, and IV of Title III of Law No. 26.831;
(2) Swaps of shares for other shares in the same or another corporation within the context of corporate mergers, splits, or reorganizations;
(3) Shares of government-held corporations and stock companies with majority government participation up to 20% of the Fund’s total shares;
(4) Shares of open or closed capital mutual funds authorized by the CNV for up to 20% of the Fund’s total assets;
(5) Contracts traded on futures and options markets as determined by the Executive Committee of the SIPA FGS, up to 10% of the Fund’s total assets;
(6) Mortgage-backed securities, mortgage-covered bonds, and other securities secured by a mortgage or those whose service is guaranteed through holdings in mortgage loans and authorized for public offering by the CNV, up to 25% of the Fund’s total assets;
(7) Securities representing participation shares in direct investment funds of a fiduciary and singular nature, whose public offering is authorized by the CNV, up to 10% of the Fund’s total assets;
(8) Securities issued by financial trusts not included in Paragraphs (9) or (j), up to 30% of the Fund’s total assets;
(9) Debt securities, certificates of participation, shares, assets, or other securities and loans intended to finance medium- and long-term production, real estate, or infrastructure projects in Argentina are authorized. “A” minimum of 5% and a maximum of 50% of the
Fund’s total assets should be allocated to these investments;
(10) Financing to recipients of the SIPA up to 20% of the Fund’s total assets, subject to the terms and conditions established by the National Social Security Administration (Administración Nacional de la Seguridad Social).

Prohibitions:
Law No. 27.260, Article 31: Article 75 of Law No. 24.241 as amended must be superseded with the following text:
Article 75: Assets of the FGS of the SIPA (FGS) may not be invested in shares of investment fund management companies, whether mutual or direct funds, trusts, or special funds, nor may they invest in shares in risk rating companies.

Limits:
Law No. 27.260, Article 32: Article 76 of Law No. 24.241 as amended must be superseded with the following text:

| Limits (max.) on securities issued by nonresidents | Yes. |
| Limits (max.) on investment portfolio held abroad | Yes. |
| Limits (min.) on investment portfolio held locally | No. |
| Currency-matching regulations on assets/liabilities composition | No. |
| Investment firms and collective investment funds | Yes. |

The following limitations apply to stock exchange transactions by local market intermediaries involving foreign exchange operations:
Sale of negotiable securities with settlement in foreign exchange.
Transfers of securities to depositories abroad. Minimum holding period.
Article 2. – To conduct operations for the sale of negotiable securities with settlement in foreign exchange in foreign jurisdictions, the said negotiable securities must be held in the portfolio for a minimum period of effective July 12, 2021, two (previously five) business days from the time of their credit to the depositary agent. This minimum holding period will not be applicable in the case of purchases of negotiable securities with settlement in foreign exchange in a foreign jurisdiction.

In the case of sales of negotiable securities with settlement in foreign exchange in the local jurisdiction, the minimum holding period in the portfolio will be one business day calculated in the same way. This minimum holding period will not be applicable in the case of purchases of negotiable securities with settlement in foreign exchange.

To conduct transfers of negotiable securities purchased with settlement in domestic currency to depositary agencies abroad, the said negotiable securities must be held in the portfolio for a minimum period of two business days from the time of their credit to the depositary agent, except in cases in which the credit to the said depositary agent is the result of the primary placement of negotiable securities issued by the National Treasury or the transfers involve shares and/or Argentine CDs traded on markets regulated by the National Securities Commission (CNV).

Settlement and Clearing Agents and Trading Agents must demonstrate compliance with the aforementioned minimum holding period for negotiable securities.

Transfers of securities from depositaries abroad. Minimum period. Article 3 – Effective July 12, 2021, negotiable securities credited to the Central Depositary Agent for Negotiable Securities (ADCVN) by depositary agencies abroad may not be applied to the settlement of transactions in foreign exchange in foreign jurisdictions until two business days have passed following credit to a subaccount or subaccounts with the aforementioned local custodian.

In the event that the said negotiable securities are applied to the settlement of operations in foreign currencies in the local jurisdiction, the minimum holding period will be one (previously five) business day calculated in the same manner.

Contracting and settlement of transactions in domestic currency. Article 4 – The contracting and settlement of transactions in domestic currency with negotiable securities accepted for listing and/or trading in the Argentine Republic by subaccounts in the own portfolio of the registered agents and other parties subject to the oversight of the CNV, may only take place on authorized markets and/or clearinghouses registered with the CNV.

Registered agents. Own portfolio. Article 5 – In competing offers using price/time priority in transactions for the purchase and sale of fixed-income negotiable securities denominated and payable in US dollars issued by the Argentine Republic under local laws by the subaccounts covered by the provisions of Article 6 of Chapter V of Title VI, which also constitute qualified investors in accordance with the provisions of Article 12 of Chapter VI of Title II, the following must be observed: (1) for all of these negotiable securities, the amount of nominal securities purchased with settlement in pesos may not exceed the amount of nominal securities sold with settlement in said currency on the same day and for each client subaccount;
(2) for all of these negotiable securities, the amount of nominal securities sold with settlement in foreign exchange in the local jurisdiction may not exceed the amount of nominal securities purchased with settlement in the said currency and jurisdiction on the same day and for each client subaccount; and
(3) for all of the securities, the amount of nominal securities sold with settlement in foreign exchange in foreign jurisdictions may not exceed the amount of nominal securities purchased with settlement in those currencies and jurisdictions on the same day for each client subaccount.

Transactions with settlement in foreign exchange in foreign jurisdictions.
Article 6 – In competing offers using price/time priority in transactions for the purchase and sale of fixed-income negotiable securities denominated and payable in US dollars issued by the Argentine Republic under local laws by client subaccounts not covered by the provisions of Article 5 of this Chapter, and for all of these negotiable securities, the amount of negotiable securities sold with settlement in foreign exchange in foreign jurisdictions may not exceed the following amounts at the close of each calendar week:
(1) fifty thousand (50,000) nominal for the amount of negotiable securities issued under local laws, purchased with settlement in said currency and jurisdiction; and
(2) fifty thousand (50,000) nominal for the amount of negotiable securities issued under foreign laws purchased with settlement in said currency and jurisdictions.
These limits are applicable to every client subaccount and for all client subaccounts held or co-held by a single party.
Settlement and Clearing Agents and Trading Agents must demonstrate compliance with the client subaccount limit.
The CNV will verify compliance with the said limit for all client subaccounts held or co-held by a single party.

Interpretational criterion CNV No. 75: In light of the provisions of Chapter V of Title XVIII of the CNV Regulations (N.T. 2013, as amended) and considering that the limit in Article 5 is applicable to fixed-income negotiable securities denominated and payable in US dollars issued by the Argentine Republic under local laws, the client subaccounts covered by the provisions of this article must comply with the limits established by Article 6(ii) of the said Chapter.

Title XI. Payment methods and control procedures for the receipt and delivery of funds from and to customers.
Article 3 – Settlement and Clearing Agents and individuals and/or legal entities registered with the Commission that act in the placement of mutual funds and other collective investment products authorized by the Commission will abide by the following for the receipt of funds from and delivery of funds to customers:
(1) Cash:
(a) Received from customers. Only the value in pesos or its equivalent in foreign exchange established in Article 1 of Law No. 25.345 may be received per customer and per day in cash;
(b) Paid to customers. Only the value in pesos or its equivalent in foreign exchange established in Article 1 of Law No. 25.345 may be paid per customer and per day in cash.
When the funds received or paid, per customer and per day, for these items exceed the amount established in the above-mentioned law, delivery by the customer or payment to the customer must be take
one of the forms indicated below:

(2) Checks:
(a) Received from customers. Must be paid from current accounts opened with financial institutions in Argentina authorized by the BCRA, held or jointly held by the customer. As well, as long as irrefutable documentation is provided by the customer, the checks may be paid in favor of the customer, with full endorsement;
(b) Payments to customers. Checks used to pay customers must be crossed checks paid to the order of the customer for deposit in the account or include the words “not to order.” For (a) and (b) together, the regulated parties indicated may make no more than two payments of funds per customer per day.

(3) Transfers in Argentina:
(a) Received from customers. These must be made from sight bank accounts held or jointly held by the customer, opened with institutions in Argentina authorized by the BCRA or using the Uniform Virtual Key of the Unique Tax Identification Code of the customer as long as it allows identification and traceability of the transfers of funds from sight accounts opened with institutions in Argentina authorized by the BCRA belonging to a PSP;
(b) Payments to customers. These must be made to sight bank accounts held or jointly held by the customer, opened with institutions in Argentina authorized by the BCRA or to the Uniform Virtual Key of the Unique Tax Identification Code of the customer as long as it allows identification and traceability of the transfers of funds to sight accounts opened with institutions in Argentina authorized by the BCRA belonging to a PSP.

As well, Settlement and Clearing Agents and individuals or legal entities registered with the Commission that act in the placement of Mutual Funds or other collective investment products authorized by the Commission, may make transfers, on the account and by order of their customers, to sight bank accounts held by one of the aforementioned regulated parties for credit to the subaccount that the same issuer has opened with the regulated party receiving the funds. Similarly, the receiver of the funds may credit the transfer to the customer’s account when it comes from sight bank account held by another of the regulated parties mentioned in this article and is transferred on account and by order of the same customer.

Without prejudice to the above, foreign investors subject to special due diligence, in accordance with provisions established by the FIU in the special regulations on this topic, may:

(4) Receive and send bank transfers to and from institutions regulated by the BCRA that act as local custodian for the said investors. For this purpose, the said foreign investors must provide the Settlement and Clearing Agents with a special or permanent instruction containing the data on the account opened with a local custodian.

(5) Receive and send bank transfers from and to institutions regulated by the BCRA that act as local custodian for a foreign institution that participates as a “Financial Institution/Foreign Bank” for such investors, as defined in the specific FIU Resolution on this topic. For this purpose, the said foreign investors must provide the Settlement and Clearing Agents with a special or permanent instruction containing the data on the account opened with a local custodian – entity regulated by the BCRA – in the name of the foreign institution that participates as a “Foreign Banks/Financial Institution” for such investors, as defined in the specific FIU Resolution on this topic.

Section III:
Transactions conducted by foreign investors.
**Article 4** – The regulated parties contemplated in Article 20(4), (5), and (22) of Law No. 25.246, as amended, may only conduct transactions under public offerings of negotiable securities, term contracts, futures or options of any kind and other financial products and instruments when they are made or ordered by regulated parties constituted, domiciled or residing in associated dominions, jurisdictions, territories or states that are not considered Non-Cooperative or High Risk by the FATF. The regulated parties contemplated in Article 20(4) and (5) of Law No. 25.246, as amended, may apply special due diligence measures for identification to foreign investors in the Argentine Republic at the time of the remote opening of special investment accounts, in accordance with the provisions of the specific Resolution on this topic issued by the FIU.

**Article 32. FIU Resolution No. 21/2018 – Customers supervised abroad.**

Customers that carry out financial activities that are authorized, regulated and supervised adequately from an Anti-Money-Laundering and Terrorism Financing standpoint in accordance with the FATF recommendations in the home country jurisdiction, as long as this jurisdiction is not considered to be non-cooperative or high risk by FATF, are subject to authorization and/prudential oversight by their respective specific oversight authorities, and have Cooperation Agreements or MoU in effect signed with the CNV and/or with the BCRA, may be subject to a special identification procedure as follows:

1. They must obtain documentation from the customer or reliable sources to:
   a. Identify the customer under the terms of Articles 23 and 24 of the said law, indicating in an affidavit their primary activity for purposes of identifying the lawful origin of the funds;
   b. Determine their respective authorization and registration by the supervisory authorities, specific authorization and/or oversight abroad, as well as their due oversight from an anti-money-laundering and terrorism financing standpoint;
2. Determine the existence of Cooperation Agreements or MoUs in effect, signed between the authorization agency and/or prudential oversight authority of the customer and the CNV or with the BCRA. Regulated Entities must, in these cases, monitor and track the operations throughout the relationship with their customer with a risk-based focus, in accordance with the terms of Article 33(d). The documentation indicated in the above paragraphs may be sent electronically or by courier.

 Limits (max.) on securities issued by nonresidents

---

**Open-Ended Mutual Funds:**

There is a 25% limit on mutual fund portfolio investments in securities issued by nonresidents. Exceptions to this limit include negotiable securities issued pursuant to authorization in a MERCOSUR member country or Chile. The aforementioned exception does not apply in the case of Mutual Funds whose currency is legal tender in the Argentine Republic.

**Closed-Ended Mutual Funds:**

Closed-Ended Mutual Funds must invest directly and/or indirectly in assets located, established, originating, issued and/or based in Argentina, not resulting from the application of the provisions of the final part of the fifth paragraph of Article 6 of Law No. 24.083 as amended. This requirement will not be applied in the case of Closed-Ended Mutual Funds intended for financing technological innovation projects developed by companies established in Argentina with the...
potential for regional or international expansion by virtue of their activity.

When at least 75% of a Fund’s investment portfolio consists of assets authorized for open-ended mutual funds, it will be exempt from the requirement in the previous paragraph regarding their investments in these assets.

Open-Ended Mutual Funds:
There is a 25% limit on mutual fund portfolio investments in securities issued abroad. Exceptions to this limit include negotiable securities issued pursuant to authorization in a MERCOSUR member country or Chile. The aforementioned exception does not apply in the case of Mutual Funds whose currency is legal tender in the Argentine Republic.

Closed-Ended Mutual Funds:
Closed-Ended Mutual Funds must invest directly and/or indirectly in assets located, established, originating, issued and/or based in Argentina, not resulting from the application of the provisions of the final part of the fifth paragraph of Article 6 of Law No. 24.083 as amended. This requirement will not be applied in the case of Closed-Ended Mutual Funds intended for financing technological innovation projects developed by companies established in Argentina with the potential for regional or international expansion by virtue of their activity.

When at least 75% of a Fund’s investment portfolio consists of assets authorized for open-ended mutual funds, it will be exempt from the requirement in the previous paragraph regarding their investments in these assets.

Closed-Ended Mutual Funds:
Closed-Ended Mutual Funds must invest directly and/or indirectly in assets located, established, originating, issued and/or based in Argentina, not resulting from the application of the provisions of the final part of the fifth paragraph of Article 6 of Law No. 24.083 as amended. This requirement will not be applied in the case of Closed-Ended Mutual Funds intended for financing technological innovation projects developed by companies established in Argentina with the potential for regional or international expansion by virtue of their activity.

When at least 75% of a Fund’s investment portfolio consists of assets authorized for open-ended mutual funds, it will be exempt from the requirement in the previous paragraph regarding their investments in these assets.

Closed-Ended Mutual Funds:
Closed-Ended Mutual Funds must invest directly and/or indirectly in assets located, established, originating, issued and/or based in Argentina, not resulting from the application of the provisions of the final part of the fifth paragraph of Article 6 of Law No. 24.083 as amended. This requirement will not be applied in the case of Closed-Ended Mutual Funds intended for financing technological innovation projects developed by companies established in Argentina with the potential for regional or international expansion by virtue of their activity.

When at least 75% of a Fund’s investment portfolio consists of assets authorized for open-ended mutual funds, it will be exempt from the requirement in the previous paragraph regarding their investments in these assets.

#### Payments arrangements
Bilateral payments arrangements

Operative

06/22/2021 Resident customers are allowed to channel certain transactions through the Local Monetary System (Sistema de Monedas Locales) implemented by the Central Bank of the Argentine Republic with the CB of the Republic of Paraguay.

Payments arrears

Private

06/14/2021 Paragraph 3.18 (Communication “A” 7301, and related Communication “A” 7416 of December 9, 2021) allows access with a “Certificate of Increase in Exports of Goods” without the requirement of prior approval from the Central Bank of the Argentine Republic to access the foreign exchange market, when it is required by Paragraph 10.11.

08/26/2021 Paragraph 3.19 (Communication “A” 7348) allows access with certification of entry of new foreign financial debt without prior approval of import payments that do not comply with Paragraph 10.11 under the conditions.

Resident Accounts

Accounts in domestic currency convertible into foreign currency

01/06/2021 Individuals or legal entities that are considered regulated entities having complied with the “Registry of Foreign Exchange Information of Exporters and Importers of Goods” and that are not indicated as “NOT REGISTERED” can access the foreign exchange market without the prior approval of the Central Bank of the Argentine Republic.

07/12/2021 Central Bank of the Argentine Republic’s prior authorization must be required except the customer submits an affidavit declaring that during the last 90 days as of the date of the transfer request, and also during the following 90 days, the customer had/will not arrange sales or exchanges of securities settled in foreign currency in Argentina or transfer of same to foreign depositary entities.

10/29/2021 Central Bank of the Argentine Republic’s prior authorization must be required except the customer submits an affidavit declaring that during the last 90 days as of the date of the transfer request, and also during the following 90 days, the interested party had/will not arrange transactions for the acquisition of foreign securities in Argentina with settlement in pesos.

11/18/2021 The institution must verify that the applicable requirements for the crediting of funds to a foreign currency account held by the customer at local financial institutions are met.

Nonresident Accounts

Foreign exchange accounts permitted

Approval required

11/18/2021 Pursuant to Paragraph 1 of Communication “A” 7401 Paragraph 3.14 of the TO de EyC included as an operation exempted from the Central Bank of the Argentine Republic’s prior approval, swaps and trades of nonresident individuals as long as the resulting funds are credited to a “Tourist Savings Bank” provided for in the rules on “Saving deposits, salary account, and special deposits.” Pursuant to the provisions of Paragraph 2 of the said regulation, such transactions were also exempted from the filing of the affidavit provided for in Paragraph 3.16.3 regarding transactions with securities, duly established by Communication “A” 7001 and supplementary provisions.

Domestic currency accounts

Convertible into foreign currency

01/06/2021 Individuals or legal entities that are considered regulated entities having complied with the “Registry of Foreign Exchange Information
of Exporters and Importers of Goods” and that are not indicated as “NOT REGISTERED” can access the foreign exchange market without the prior approval of the Central Bank of the Argentine Republic.

07/12/2021 Central Bank of the Argentine Republic’s prior authorization must be required except the customer submits an affidavit declaring that during the last 90 days as of the date of the transfer request, and also during the following 90 days, the customer had/will not arrange sales or exchanges of securities settled in foreign currency in Argentina or transfer of same to foreign depositary entities.

10/29/2021 Central Bank of the Argentine Republic prior authorization must be required except the customer submits an affidavit declaring that during the last 90 days as of the date of the transfer request, and also during the following 90 days, the interested party had/will not arrange transactions for the acquisition of foreign securities in Argentina with settlement in pesos.

06/16/2022 Social security agencies (besides the National Social Security Administration (Administración Nacional de la Seguridad Social) which had access to the foreign exchange market) and/or social security annuities provided for under Article 101 of Law No. 24241, were authorized to access the foreign exchange market up to the amount received under such items in the last 30 calendar days and provided the transfer is made to a bank account owned by the beneficiary in his or her registered country of residence.

**Imports and Import Payments**

### Financing requirements for imports

<table>
<thead>
<tr>
<th>Date</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>01/06/2021</td>
<td>Goods with tariff positions indicated in Paragraphs 10.10.1 and 10.10.2 (luxury consumer goods or sumptuous goods) access to the foreign exchange market must take place as of 90 and 365 calendar days, respectively, of the date of registration of clearance through customs of the said goods.</td>
</tr>
<tr>
<td>03/04/2022</td>
<td>Goods with tariff positions indicated in Paragraphs 10.10.1 (luxury consumer goods) access to the foreign exchange market must take place as of 180 (previously 90) calendar days of the date of registration of clearance through customs of the said goods.</td>
</tr>
<tr>
<td>03/04/2022</td>
<td>Paragraph 5 of Communication “A” 7466 dated March 3, 2022, issued requirements for cases in which the imported goods are not included in the time periods set forth in Paragraphs 10.3.2.5 or 10.3.2.6 and declaration in the Integrated Import Monitoring System (SIMI) is a requirement for registration of the customs entry of the goods.</td>
</tr>
</tbody>
</table>

In this regard, it was established, within the framework of the SIMI, how the Central Bank of the Argentine Republic (BCRA) assigns the categories to each one that is officially registered in the SIMI as from March 4, 2022, once the latter has obtained the “EXITED” status based on the intervention of the competent agencies in the matter, and how the said category will define the minimum time periods for access to the foreign exchange market to make payments for the goods included in the SIMI.

A Category A, which maintains the same regulatory treatment for the associated transactions, and a Category B, which means that the associated imports of goods must be financed at least 180 days from the date of registration of the customs entry of the goods into Argentina.

The BCRA assigns to each importer for the year 2022 a limit for
SIMI Category A, for goods not included in the exceptions provided for, which will be equivalent to the lesser of the following two amounts:

1. The free on board (FOB) value of its imports for the year 2021 plus 5% of the said value.
2. The FOB value of its imports for the year 2020 plus 70% of the said value.

In the calculation of the FOB value of imports for the years 2020 and 2021, imports registered in the importer’s name in the SEPAIMPO system that granted access to the foreign exchange market will be taken into account, except those corresponding to temporary imports or goods included in the exceptions provided for.

The amount of Category A assigned by the BCRA will be the equivalent of US$50,000 when the customer has not registered imports in the last two years or when the amount resulting from the indicated calculation is lower.

The limit for SIMI Category A at each point will be equivalent to the proportional part of the annual limit of each category accumulated up to and including the current month. The equivalent of 20% of the corresponding annual limit will be added to the said amount, provided this does not mean that said limit will be exceeded. In the event that the amount indicated for a category is less than US$250,000, the latter amount or the corresponding annual limit, whichever is lower, will be adopted.

Among the exceptions provided for, the following are contemplated: payments for imports with SIMI Category B declaration and the goods paid for are capital goods or consist of kits for the detection of the COVID-19 coronavirus or other goods whose tariff positions are included in the list published by Decree No. 333/2020 and its supplementary provisions or concern goods subject to non-automatic import licenses.

03/11/2022 Considering the particularities of certain goods to be imported: petroleum or bituminous mineral oils, their preparations and their waste or petroleum gases and other gaseous hydrocarbons, exceptions to the 180-day period were included.

03/18/2022 Considering the particularities of certain goods to be imported: non-agglomerated bituminous coal, exceptions to the 180-day period were included.

03/22/2022 The time period for a group of goods (import of fertilizers and/or phytosanitary products and/or inputs that are necessary for the local elaboration of the same) was reduced to 90 calendar days.

04/07/2022 Integrated Import Monitoring System (SIMI) Category C was introduced, whereby, for certain tariff positions of raw materials and standardized inputs and under certain conditions, a treatment similar to Category A was established.

The annual limit of SIMI Category C to be assigned by the Central Bank of the Argentine Republic (BCRA) will be the difference between the limit assigned by the BCRA to Category A and the higher of the two amounts considered for the purposes of establishing the said limit. It was also established that the limit for SIMI Category C at each point in time will be equivalent to the proportional part of the annual limit accumulated up to and including the current month. The equivalent of 20% of the annual limit will be added to the said amount, provided this does not mean that the said limit will be
exceeded. In the event that the amount indicated is less than 
US$250,000, the latter amount or the annual limit, whichever is 
lower, will be adopted.

Later, as indicated in Communication “A” 7490 of April 12, 2022, 
the TO de EyC was updated and these rules were included in 

05/05/2022 Communications “A” 7507 of May 5, 2022, “A” 7516 of May 19, 
2022, and “A” 7528 of June 16, 2022, included transactions 
exempted related with pharmaceutical products, its production inputs 
and other items related with health (under the conditions specifically 
provided for in each case) from compliance with the minimum 
financing period.

06/27/2022 (1) It was established that up to September 30, 2022, the limit of 
Integrated Import Monitoring System (SIMI) Category A or C at each 
point in time will be equivalent to the proportional part of the annual 
limit of each category accumulated up to and including the current 
month. In the event that the amount indicated for a category is less 
than US$250,000, the latter amount or the corresponding annual 
limit, whichever is lower, will be adopted. Meaning that up to 
September 30, 2022, the equivalent of 20% of the annual limit will 
NOT be added to the said amount.

(2) The exception foreseen for goods subject to non-automatic import 
licenses was suspended until September 30, 2022, establishing that 
while such suspension lasts, imports of such goods for the years 2020 
and 2021 will be taken into consideration for the computation of the 
limits for Categories A and C.

07/01/2022 The annual limit of Category A for an importer must be, at a 
minimum, equivalent to 115% of the computable FOB value of its 
imports for the year 2021, when the amount imported in the said year 
was less than or equal to the equivalent of US$1,000,000. The new 
calculation form is more flexible.

10/01/2022 The conditions that were set up until September 30, 2022, expired. 
Therefore, the equivalent of 20% of the annual limit is added to the 
limit of Integrated Import Monitoring System Category A or C, and 
the exception for goods subject to non-automatic import licenses 
became effective again.

Advance payment requirements 01/06/2021 If the intended advance payment corresponds to goods whose tariff 
positions are included in Paragraphs 10.10.1 (luxury consumer 
goods) and 10.10.2 (sumptuous goods) and the conditions for 
exclusion provided for the position are not met, access to the foreign 
exchange market is subject to the prior approval of the Central Bank 
of the Argentine Republic.

10/06/2021 Communication “A” 7375 suspended, until October 31, 2021, 
advance payment for imports intended for the purchase of capital 
goods from the access to the foreign exchange market without the 
prior approval of the Central Bank of the Argentine Republic. 
Communication “A” 7385 extended the suspension until November 
30, 2021.

12/01/2021 Advance payments for the acquisition of capital goods with pending 
customs entry registration were allowed to access the foreign 
exchange without the prior approval of the Central Bank of the 
Argentine Republic, provided the following conditions were met: (1) 
the sum of advance payments made under this paragraph does not 
exceed 30% of the total amount of the goods to be imported; and (2) 
the sum of advance payments, on demand and on commercial debt 
without customs entry registration, made under this item does not 
exceed 80% of the total amount of the goods to be imported.

12/01/2021 For advance payments to be able to access the foreign exchange 
market without the prior approval of the Central Bank of the
Argentina, the institution must have an affidavit from the customer stating that the amount pending settlement for payments made under Paragraph 11.7 including the payment whose execution is being requested, does not exceed the equivalent of US$1,000,000. In the event that this amount is exceeded, the institution must verify that the payment complies with the established conditions (30% and 80%).

03/04/2022 Paragraph 10.4.2.8 establishes that in those cases in which a declaration made through the Integrated Import Monitoring System is required for the registration of the customs entry of goods, any of the conditions set forth in Paragraph 10.14.2 are met of.

06/27/2022 For the access of the foreign exchange market without the prior approval of the Central Bank of the Argentine Republic, payments on demand or on commercial debt intended for the acquisition of capital goods without customs entry registration, and there is verification that the sum of the advance payments, on demand and on commercial debt without customs entry registration made under this paragraph, when they were included does not exceed 80% of the total amount of the goods to be imported, were allowed.

Documentation requirements
for release of foreign exchange
for imports
Letters of credit

03/04/2022 Institutions must have documentation proving that, at the time of opening or issuance by the institution, any of the conditions set forth in Paragraph 10.14.2 were met (minimum period).

03/22/2022 The institution may consider that the provisions of Paragraph 10.14.2.5 have been met (minimum financing term of 180 or 90 calendar days) provided, at the time of opening or issuance, the following conditions were met: (1) the maturity date established was equal to or greater than the date that arose from the sum of the term applicable to the goods in the aforementioned paragraph plus the estimated transportation time from the country of origin plus 15 calendar days; (2) the institution had an affidavit from the importer stating that he undertook, except in situations of force majeure beyond his control, to register the customs entry of the goods within 15 calendar days of their arrival in Argentina.

Other

01/04/2021 Access to the foreign exchange market without the requirement of prior approval from the Central Bank of the Argentine Republic to access the foreign exchange market is also allowed for the remaining 50% of the increase to the extent that the additional portion corresponds to payments for imports of capital goods.

01/06/2021 Individuals or legal entities that are considered regulated entities having complied with the “Registry of Foreign Exchange Information of Exporters and Importers of Goods” and that are not indicated as “NOT REGISTERED” can access the foreign exchange market without the prior approval of the Central Bank of the Argentine Republic.

03/19/2021 Goods deemed to be necessary inputs for the production of exportable goods were added to the remaining 50% of the increase for access to the foreign exchange market without the requirement of prior approval from the Central Bank of the Argentine Republic to access the foreign exchange market, with the institution being required to have an affidavit from the customer on the type of good involved and its status as an input in the production of goods for export.

06/14/2021 Access to the foreign exchange market without the prior approval of the Central Bank of the Argentine Republic was allowed for principal payments on commercial debts for imports of goods, in accordance with Paragraph 10.2.4, when the customer has a “Certificate of Increase in Exports of Goods in 2021” issued in accordance with
Paragraph 3.18 for the equivalent of the value of the amount to be paid.

07/12/2021 Central Bank of the Argentine Republic’s prior authorization must be required except the customer submits an affidavit declaring that during the last 90 days as of the date of the transfer request, and also during the following 90 days, the customer had/will not arrange sales or exchanges of securities settled in foreign currency in Argentina or transfer of same to foreign depositary entities.

08/26/2021 Communication “A” 7348 allowed access to the foreign exchange market without Central Bank of the Argentine Republic prior approval for the cancellation of commercial debts with debt from abroad for the import of goods and services.

10/06/2021 Communication “A” 7375 reduced the exemption from US$1 million to US$250,000 and also eliminated from the quota calculation payments made under Paragraph 10.11.2 until October 31, 2021, for access the foreign exchange market without the requirement of prior approval from the Central Bank of the Argentine Republic. Communication “A” 7385 from November 1, 2021 introduced the reduction without any ending date.

10/06/2021 Communication “A” 7375 eliminated payments on demand for imports until October 31, 2021 from access the foreign exchange market without the requirement of prior approval from the Central Bank of the Argentine Republic. Communication “A” 7385 included the elimination without an ending date.

10/28/2021 Under Paragraph 10.11.11 payments on demand or commercial debts without customs entry registration are allowed to access the foreign exchange market without the prior approval from the Central Bank of the Argentine Republic provided the following conditions are met: Paragraph 10.11.11.1: the operation involves the importation of inputs to be used for the production of goods in Argentina; and Paragraph 10.11.11.2: the payments made under this paragraph do not exceed, in the current calendar month and for the institutions as a whole, the amount obtained by considering the average of the total amount of imports of goods eligible for the purposes of Paragraph 10.11.1 in the last twelve calendar months, net of the amount pending settlement for payments with customs entry registration pending when there is a delay recorded by the importer.

10/29/2021 Central Bank of the Argentine Republic prior authorization must be required except the customer submits an affidavit declaring that during the last 90 days as of the date of the transfer request, and also during the following 90 days, the interested party had/will not arrange transactions for the acquisition of foreign securities in Argentina with settlement in pesos.

11/01/2021 Payments made under Paragraph 10.11.2 were included again in the quota calculation for access the foreign exchange market without the requirement of prior approval from the Central Bank of the Argentine Republic.

12/09/2021 Import debts covered by guarantees issued by private insurers on behalf and by order of national governments of other countries were included in Paragraph 10.11.3. Paragraph 10.11.3 provides access to the foreign exchange market without the prior approval of the Central Bank of the Argentine Republic for settlements of commercial debts for imports of goods with an export credit agency or foreign financial institution or that have a guarantee granted by such institutions, as long as the portion of such imports being paid has not been previously counted for purposes of payments under the threshold set in Paragraph 10.11.1.

01/03/2022 Access to the foreign exchange market was allowed without Central Bank of the Argentine Republic prior approval for the cancellation of debts (not just commercial) with debt from abroad for the import of
goods and services.

01/06/2022 The limit for access to the foreign exchange market without Central Bank of the Argentine Republic prior approval for payments on demand or commercial debts without customs entry registration was modified by eliminating the subtraction of the amount pending settlement for payments with customs entry registration pending when there is a delay recorded by the importer.

03/04/2022 For the access to the foreign exchange market without Central Bank of the Argentine Republic prior approval, the following requirement was introduced: in those cases in which a declaration made through the SIMI is a requirement for the registration of the customs entry of goods, any of the conditions set forth in Paragraph 10.14.2, which are compatible with the operations referred to in Paragraph 10.11.11, must be met.

03/04/2022 Payments on demand were allowed for access the foreign exchange market without the requirement of prior approval from the Central Bank of the Argentine Republic if they comply with one of the conditions set forth in Paragraph 10.14.2.

05/05/2022 Access to the foreign exchange market without the requirement of prior approval from the Central Bank of the Argentine Republic was allowed for payments with pending customs entry registration made with funds originating from financing for imports of goods granted by a local financial institution from a commercial credit line from abroad, provided the maturity date of the financing granted is equal to or later than the estimated date of arrival of the goods in Argentina plus 15 calendar days. The institution must have an affidavit from the importer in which he undertakes, except in situations of force majeure beyond his control, to register the goods for customs entry within 15 days of their arrival in Argentina.

06/28/2022 The client must submit an affidavit in which they record that by adding the amount of the payment whose course is being requested to the total payments made as of January 1, 2022, that do not correspond to some operations (Paragraph 2.2 of Communication “A” 7532, for example, temporary imports, imports paid with funds originated in the financing of imports of goods granted by a local financial entity from a foreign commercial line of credit), the equivalent to the proportional part of the annual limit of Integrated Import Monitoring System Category A that has accrued up to and including the current month is not exceeded.

10/01/2022 The client’s affidavit, in which they record that by adding the amount of the payment whose course was being requested to the total payments made as of January 1, 2022, that do not correspond to some operations (Paragraph 2.2 of Communication “A” 7532, for example, temporary imports, imports paid with funds originated in the financing of imports of goods granted by a local financial entity from a foreign commercial line of credit), the equivalent to the proportional part of the annual limit of Integrated Import Monitoring System Category A that has accrued up to and including the current month was not exceeded, was eliminated.

Communication “A” 7466 and supplementary provisions (Paragraph 10.14, amended by Communication “A” 7532 and supplementary provisions) provides that within the framework of the Integrated Import Monitoring System (SIMI), the Central Bank of the Argentine Republic (BCRA) must assign a category (A, B, or C) to each one that is officially registered in the SIMI, once the latter has obtained the “EXITED” status as of the intervention of the relevant competent agencies. The category assigned by the BCRA, considering the limits set for Categories A and C based on the values imported in 2020 and 2021, defines the minimum terms for access to the foreign exchange market to make payments for goods included in the SIMI.
In particular, it is established that up to September 30, 2022, the limit of SIMI Category A or C at each point in time will be equivalent to the proportional part of the annual limit of each category accumulated up to and including the current month. In the event that the amount indicated for a category is less than US$250,000, the latter amount or the corresponding annual limit, whichever is lower, will be adopted.

In addition, the goods included in a SIMI Category A or in a SIMI Category C, provided the additional conditions are met, or that fall under the exceptions specified in Paragraph 10.14.2, may access the foreign exchange market to make advance, on demand, or deferred payments provided they meet the requirements established in each case.

The remaining goods included in a SIMI Category B or C, unless they have prior approval from the BCRA, may only access the foreign exchange market, provided the other applicable requirements are met, once the minimum term has elapsed from the date of customs entry registration, which is established in general at 180 calendar days and in particular at 60 calendar days for fertilizers, phytosanitary products, or inputs for processing in Argentina and 90 days for the tariff positions listed in Paragraph 10.14.8 (Paragraph 10.14.2.5).

Payments for Invisible Transactions and Current Transfers

Controls on these transfers

Trade-related payments

Prior approval

01/06/2021 Individuals or legal entities that are considered regulated entities having complied with the “Registry of Foreign Exchange Information of Exporters and Importers of Goods” and that are not indicated as “NOT REGISTERED” can access the foreign exchange market without the prior approval of the Central Bank of the Argentine Republic.

06/04/2021 The following is an exception from the Central Bank of the Argentine Republic approval requirement for access to the foreign exchange market for the prepayment of debts for services and for service payments to related counterparties abroad: Principal payments on debt on maturity, when the customer has a “Certificate of Increase of Exports of Goods in 2021” issued under Paragraph 3.18 for the equivalent of the amount being paid, incorporated as Paragraph 3.2.7 by Com “A” 7301.

07/12/2021 Central Bank of the Argentine Republic’s prior authorization must be required except the customer submits an affidavit declaring that during the last 90 days as of the date of the transfer request, and also during the following 90 days, the customer had/will not arrange sales or exchanges of securities settled in foreign currency in Argentina or transfer of same to foreign depositary entities.

08/26/2021 The following is an exception from the Central Bank of the Argentine Republic approval requirement for access to the foreign exchange market for the prepayment of debts for services and for service payments to related counterparties abroad: payment on maturity of the outstanding debt principal as of June 30, 2021, when the customer has a certificate from an institution issued in accordance with the provisions of Paragraph 3.19, for the equivalent of the amount to be paid.

10/29/2021 Central Bank of the Argentine Republic’s prior authorization must be required except the customer submits an affidavit declaring that during the last 90 days as of the date of the transfer request, and also during the following 90 days, the interested party had/will not arrange transactions for the acquisition of foreign securities in Argentina with settlement in pesos.

01/03/2022 The following is an exception from the Central Bank of the Argentine Republic approval requirement for access to the foreign exchange market for the prepayment of debts for services and for service payments to related counterparties abroad: payments on maturity of an obligation for a service rendered at least 180 calendar days prior to access or derived from a contract that has been signed a similar period in advance.

01/07/2022 Communication “A” 7433 established that institutions must verify that a customer has a declaration made through the Integrated System for Monitoring Payments for Services Abroad (SIMPES) with “APPROVED” status, except for transactions involving services provided under codes S02 (Freight services), S03 (Passenger transportation services), S06 (Travel and other card payments), S25 (Government services), S26 (Health services by travel assistance companies), and S27 (Other health services).
The preceding requirement will not apply in the event of payment by: (1) the public sector; (2) all business organizations, regardless of their corporate form, in which the national government has a majority stake in the capital or in the adoption of corporate decisions; (3) trusts constituted with contributions from the national public sector; (4) financial institutions for their own imports of services performed by the same institution; or (5) institutions for the cancellation of LCs or guarantee letters issued or granted up through January 6, 2022.

In the case of LCs or guarantee letters issued or granted on or after January 7, 2022, the institution must have documentation proving that, at the time of opening or issuance by the institution, the customer had a declaration made through the SIMPES with “APPROVED” status, with the exceptions indicated above.

Paragraph 3 of Communication “A” 7532 introduced as an additional requirement for customer transactions covered by the Integrated System for Monitoring Payments for Services Abroad (SIMPES) or the institution’s own transactions involving items for which a declaration in the said system is required for customers, that the institution may only grant access to the foreign exchange market if one of the following conditions is met:

- the institution has an affidavit from the customer stating that the accumulated amount, including the payment to be made, of the payments made by the customer through the foreign exchange market for the services items covered by the SIMPES, in the current calendar year and among the institutions as a whole, does not exceed the amount resulting from the following elements:

- the proportional part, accumulated through the current month, of the total amount of payments made by the importer during the year 2021 for all the items included.

In the event that the latter amount is less than US$50,000, the latter amount or the annual limit, whichever is lower, will be adopted, minus the amount outstanding to date under LCs or guarantee letters issued in its name by local financial institutions for the importation of services.

For the purpose of calculating payments made through the foreign exchange market in the current year and those made in the previous year, no account should be taken of those transactions that have been included in the mechanisms set forth in Paragraphs 3.18 and 3.19, or those corresponding to Items “S08. Insurance premiums” and “S09. Payment of claims.”

If the customer has not made payments for the items covered through the foreign exchange market in the previous calendar year, or the payments made were less than the equivalent of US$20,000, the latter value is taken as the annual limit for the purposes of the provisions of this paragraph.

- the payment falls under the mechanisms provided for in Paragraphs 3.18 (Certificate of Increase in Exports) and 3.19 (Certificate of Entry of New Financial Debt from Abroad);
- the payment pertains to Items “S08. Insurance premiums” and “S09. Payment of claims;”
- payment is made 180 calendar days after the date of the effective delivery of the service;
-the customer has access simultaneously with the settlement of a new financial debt abroad for which the total principal amount comes due after the date of effective delivery of the service plus the time period specified in Paragraph (d);

-the customer has access with funds arising from financing of imports of services granted by a local financial institution from a commercial line of credit from abroad and the total principal amount under the financing has a maturity date subsequent to the date of effective delivery of the service plus the time period specified in Paragraph (d).

To access the foreign exchange market to make their own payments under LCs or guarantee letters issued or granted as of June 27, 2022, in connection with the importation of services, financial institutions must have an affidavit from the customer, made at the time of opening or issuance, stating that this date falls within any of the situations set forth in Paragraphs (a) to (d) of the preceding paragraph.

Paragraph 3 of Communication “A” 7532, introduced as an additional requirement for customer transactions covered by the Integrated System for Monitoring Payments for Services Abroad (SIMPES) with “APPROVED” status or the institution’s own transactions involving items for which a declaration in the said system is required for customers, that the institution may only grant access to the foreign exchange market if one of the following conditions is met:

-the institution has an affidavit from the customer stating that the accumulated amount, including the payment to be made, of the payments made by the customer through the foreign exchange market for the services items covered by the SIMPES, in the current calendar year and among the institutions as a whole, does not exceed the amount resulting from the following elements:

-the proportional part, accumulated through the current month, of the total amount of payments made by the importer during the year 2021 for all the items included.

In the event that the latter amount is less than US$50,000, the latter amount or the annual limit, whichever is lower, will be adopted, minus the amount outstanding to date under LCs or guarantee letters issued in its name by local financial institutions for the importation of services.

If the customer has not made payments for the items covered through the foreign exchange market in the previous calendar year, or the payments made were less than the equivalent of US$20,000, the latter value is taken as the annual limit for the purposes of the provisions of this paragraph.

The payment falls under any of the exceptions provided for in the said regulation, such as, for example, that the payment is made more than 180 calendar days from the date of the effective delivery of the service or is financed with foreign debt whose principal matures after the date of the effective delivery of the service plus the term indicated.

Quantitative limits 06/27/2022

Investment-related payments

Prior approval 01/06/2021 Individuals or legal entities that are considered regulated entities
having complied with the “Registry of Foreign Exchange Information of Exporters and Importers of Goods” and that are not indicated as “NOT REGISTERED” can access the foreign exchange market without the prior approval of the Central Bank of the Argentine Republic.

06/04/2021 Transfers of foreign exchange abroad to nonresident shareholders for profits and dividends for cases that require the prior approval of the Central Bank of the Argentine Republic under certain condition include that the institution meet the following criteria: it has a certificate of increase of exports of goods (Paragraph 3.4.4.3, which incorporates Com “A” 7301).

06/14/2021 Paragraph 3.18 allows access with a “Certificate of Increase in Exports of Goods” without prior approval of the Central Bank of the Argentine Republic for payments of profits and dividends under certain conditions (according to Communication “A” 7301, mechanism extended under the same conditions for the year 2022 by Paragraph 6 of Communication “A” 7416 of December 9, 2021.

07/12/2021 Central Bank of the Argentine Republic’s prior authorization must be required except the customer submits an affidavit declaring that during the last 90 days as of the date of the transfer request, and also during the following 90 days, the customer had/will not arrange sales or exchanges of securities settled in foreign currency in Argentina or transfer of same to foreign depositary entities.

10/29/2021 Central Bank of the Argentine Republic’s prior authorization must be required except the customer submits an affidavit declaring that during the last 90 days as of the date of the transfer request, and also during the following 90 days, the interested party had/will not arrange transactions for the acquisition of foreign securities in Argentina with settlement in pesos.

Payments for travel

Prior approval

01/06/2021 Individuals or legal entities that are considered regulated entities having complied with the “Registry of Foreign Exchange Information of Exporters and Importers of Goods” and that are not indicated as “NOT REGISTERED” can access the foreign exchange market without the prior approval of the Central Bank of the Argentine Republic.

07/12/2021 Central Bank of the Argentine Republic’s prior authorization must be required except the customer submits an affidavit declaring that during the last 90 days as of the date of the transfer request, and also during the following 90 days, the customer had/will not arrange sales or exchanges of securities settled in foreign currency in Argentina or transfer of same to foreign depositary entities.

10/29/2021 Central Bank of the Argentine Republic’s prior authorization must be required except the customer submits an affidavit declaring that during the last 90 days as of the date of the transfer request, and also during the following 90 days, the interested party had/will not arrange transactions for the acquisition of foreign securities in Argentina with settlement in pesos.

01/07/2022 Communication “A” 7433 established that institutions must verify that a customer has a declaration made through the Integrated System for Monitoring Payments for Services Abroad (SIMPES) with “APPROVED” status, except for transactions involving services provided under codes S02 (Freight services), S03 (Passenger transportation services), S06 (Travel and other card payments), S25 (Government services), S26 (Health services by travel assistance companies), and S27 (Other health services).

The preceding requirement will not apply in the event of payment by:
(1) the public sector; (2) all business organizations, regardless of their corporate form, in which the national government has a majority stake in the capital or in the adoption of corporate decisions; (3) trusts constituted with contributions from the national public sector; (4) financial institutions for their own imports of services performed by the same institution; or (5) institutions for the cancellation of LCs or guarantee letters issued or granted up through January 6, 2022.

In the case of LCs or guarantee letters issued or granted on or after January 7, 2022, the institution must have documentation proving that, at the time of opening or issuance by the institution, the customer had a declaration made through the SIMPES with “APPROVED” status, with the exceptions indicated above.

Paragraph 3 of Communication “A” 7532, introduced as an additional requirement for customer transactions covered by the Integrated System for Monitoring Payments for Services Abroad (SIMPES) or the institution’s own transactions involving items for which a declaration in the said system is required for customers, that the institution may only grant access to the foreign exchange market if one of the following conditions is met:

-the institution has an affidavit from the customer stating that the accumulated amount, including the payment to be made, of the payments made by the customer through the foreign exchange market for the services items covered by the SIMPES, in the current calendar year and among the institutions as a whole, does not exceed the amount resulting from the following elements:

-the proportional part, accumulated through the current month, of the total amount of payments made by the importer during the year 2021 for all the items included.

In the event that the latter amount is less than US$50,000, the latter amount or the annual limit, whichever is lower, will be adopted, minus the amount outstanding to date under LCs or guarantee letters issued in its name by local financial institutions for the importation of services.

For the purpose of calculating payments made through the foreign exchange market in the current year and those made in the previous year, no account should be taken of those transactions that have been included in the mechanisms set forth in Paragraphs 3.18 and 3.19, or those corresponding to Items “S08. Insurance premiums” and “S09. Payment of claims.

If the customer has not made payments for the items covered through the foreign exchange market in the previous calendar year, or the payments made were less than the equivalent of US$20,000, the latter value is taken as the annual limit for the purposes of the provisions of this paragraph.

The payment falls under the mechanisms provided for in Paragraphs 3.18 (Certificate of Increase in Exports) and 3.19 (Certificate of Entry of New Financial Debt from Abroad).

The payment pertains to Items “S08. Insurance premiums” and “S09. Payment of claims.” Payment is made 180 calendar days after the date of the effective delivery of the service;

-the customer has access simultaneously with the settlement of a new
financial debt abroad for which the total principal amount comes due after the date of effective delivery of the service plus the time period specified in Paragraph (d),
-the customer has access with funds arising from financing of imports of services granted by a local financial institution from a commercial line of credit from abroad and the total principal amount under the financing has a maturity date subsequent to the date of effective delivery of the service plus the time period specified in Paragraph (d).

To access the foreign exchange market to make their own payments under LCs or guarantee letters issued or granted as of June 27, 2022, in connection with the importation of services, financial institutions must have an affidavit from the customer, made at the time of opening or issuance, stating that this date falls within any of the situations set forth in Paragraphs (a) to (d) of the preceding paragraph.

Paragraph 3 of Communication “A” 7532 introduced as an additional requirement for customer transactions covered by the Integrated System for Monitoring Payments for Services Abroad (SIMPES) with “APPROVED” status or the institution’s own transactions involving items for which a declaration in the said system is required for customers, that the institution may only grant access to the foreign exchange market if one of the following conditions is met:

-the institution has an affidavit from the customer stating that the accumulated amount, including the payment to be made, of the payments made by the customer through the foreign exchange market for the services items covered by the SIMPES, in the current calendar year and among the institutions as a whole, does not exceed the amount resulting from the following elements:

-the proportional part, accumulated through the current month, of the total amount of payments made by the importer during the year 2021 for all the items included.

In the event that the latter amount is less than US$50,000, the latter amount or the annual limit, whichever is lower, will be adopted, minus the amount outstanding to date under LCs or guarantee letters issued in its name by local financial institutions for the importation of services.

If the customer has not made payments for the items covered through the foreign exchange market in the previous calendar year, or the payments made were less than the equivalent of US$20,000, the latter value is taken as the annual limit for the purposes of the provisions of this paragraph.

The payment falls under any of the exceptions provided for in said regulation, such as, for example, that the payment is made more than 180 calendar days from the date of the effective delivery of the service or is financed with foreign debt whose principal matures after the date of the effective delivery of the service plus the term indicated.

Individuals or legal entities that are considered regulated entities having complied with the “Registry of Foreign Exchange Information of Exporters and Importers of Goods” and that are not indicated as
“NOT REGISTERED” can access the foreign exchange market without the prior approval of the Central Bank of the Argentine Republic.

07/12/2021 Central Bank of the Argentine Republic’s prior authorization must be required except the customer submits an affidavit declaring that during the last 90 days as of the date of the transfer request, and also during the following 90 days, the customer had/will not arrange sales or exchanges of securities settled in foreign currency in Argentina or transfer of same to foreign depositary entities.

10/29/2021 Central Bank of the Argentine Republic’s prior authorization must be required except the customer submits an affidavit declaring that during the last 90 days as of the date of the transfer request, and also during the following 90 days, the interested party had/will not arrange transactions for the acquisition of foreign securities in Argentina with settlement in pesos.

Proceeds from Invisible Transactions and Current Transfers

Repatriation requirements

Surrender requirements

Surrender to authorized dealers 06/02/2022 Provided the conditions set forth in Paragraphs 2 or 3 of Communication “A” 7518 are met, payments for exports of services that are received within the regulatory time periods established for the items will be exempted from the requirement calling for sale in the foreign exchange market:

S01 Maintenance and repair.
S07 Construction services.
S12 Telecommunications services.
S13 Computer services.
S14 Information services
S15 Charges for use of intellectual property.
S16 Research and development services.
S17 Legal, accounting, and management services.
S18 Advertising, market research, and public opinion polling services.
S19 Architectural, engineering, and other technical services.
S21 Trade-related services.
S22 Other business services.
S23 Audiovisual and related services.
S24 Other personal, cultural, and recreational services (includes educational classes).
S27 Other health services.

The funds should be credited to foreign currency accounts held by the customer at local financial institutions and the use of this mechanism should be tax neutral.

If the exporter is an individual, Paragraph 2 provides that he may use this mechanism up to the equivalent of US$12,000 in a calendar year, for all the institutions and for all the items included; he must sell in the market any income in excess of the said amount and submit an affidavit stating that he has not exceeded the annual limit and with respect to the performance of certain transactions with securities.

If the exporter is a legal entity, Paragraph 3 provides that it must have a “Certificate of Increase in Proceeds from Exports of Services in 2022,” which is issued by a local financial institution when it verifies, among other conditions, that:
(1) the value of the proceeds from exports of services for the
projected items entering the foreign exchange market in the year 2022 is greater than the value of its export proceeds for the same set of items received in all of 2021;
(2) the amount of the certificates issued, including the one requested, does not exceed the equivalent in foreign currency of the lesser of the following two values:
(a) 50% of the amount by which the income entering the foreign exchange market from the proceeds from exports of services under the items mentioned in Paragraph 1 in the year 2022 exceeds the amount received for such items during the entire previous year;
(b) the amount in foreign currency equivalent to 20% of the gross wages paid to workers in the previous calendar month multiplied by the number of months remaining until the end of the year including the current month.
(3) the institution has an affidavit from the exporter stating its commitment to ensure that the funds not sold through this mechanism will be used to pay net wages of workers in foreign currency within the limit of 20% provided for in Article 107 of the Labor Contract Law, and it does not have any record of non-compliance with respect to the entry and sale of proceeds from exports of services and with respect to the performance of certain transactions with securities.

10/01/2021 Communication “A” 7374 of September 30, 2021, introduced Paragraph 3.20, whereby local financial institutions may access the foreign exchange market to meet their obligations to nonresidents under financial guarantees granted, provided all of the following conditions are met:

1. The granting of the guarantee was a requirement for the execution of a contract for the performance of work or delivery of goods and/or services that entailed, directly or indirectly, the export of goods and/or services of Argentine residents;
2. The guarantee is issued at the request of the resident that will provide the goods or services and is associated with the performance of the contracts for work or delivery of goods and/or services by the resident or by a nonresident company under its control that will be responsible for execution of the contract;
3. The counterparty to the aforementioned contract is a nonresident not related to the resident that will export the goods and/or services;
4. The beneficiary of the payment is the nonresident counterparty or a foreign financial institution that has granted guarantees for the proper performance of contracts for work or delivery of goods and/or services by the exporter or a nonresident company that it controls;
5. The amount of the guarantee granted by the local financial institution does not exceed the value of the exports of goods and/or services to be performed by the resident based on the execution of the contract for work or the delivery of goods and/or services;
6. The term of the guarantee does not exceed 180 calendar days from the date of shipment of local goods or completion of the performance of services related to the contract covered by the guarantee.

10/29/2021 Central Bank of the Argentine Republic’s prior authorization must be required except the customer submits an affidavit declaring that during the last 90 days as of the date of the transfer request, and also during the following 90 days, the interested party had/will not arrange transactions for the acquisition of foreign securities in Argentina with settlement in pesos.

Provisions Specific to the Financial Sector

Provisions specific to institutional investors
Investment firms and collective investment funds

07/12/2021 Negotiable securities credited to the Central Depositary Agent for Negotiable Securities by depositary agencies abroad may not be applied to the settlement of transactions in foreign exchange in foreign jurisdictions until two business days have passed following credit to a subaccount or subaccounts with the aforementioned local custodian.

In the event that the said negotiable securities are applied to the settlement of operations in foreign currencies in the local jurisdiction, the minimum holding period will be one (previously five) business day calculated in the same manner.

07/12/2021 To conduct operations for the sale of negotiable securities with settlement in foreign exchange in foreign jurisdictions, the said negotiable securities must be held in the portfolio for a minimum period of two (previously five) business days from the time of their credit to the depositary agent.

Exchange Measures

- **Restrictions and/or multiple currency practices**: Yes.
  
  The IMF staff report for the 2021 Article IV Consultation, Fourth and Fifth Reviews under the Stand-By Arrangement, and Request for Waiver of Nonobservance of Performance Criterion and Monetary Policy Consultation Clause with Armenia states that, as of December 3, 2021, Armenia maintains one MCP, which arises from a 2007 agreement between the MOF and the Central Bank of Armenia (CBA) to settle some budgetary transactions at an agreed accounting exchange rate throughout the fiscal year. (Country Report No. 21/273)

- **Exchange measures imposed for security reasons**: Yes.
  
  Under Article 28 of the AML/CFT Law, reporting entities and customs authorities are required to freeze the assets of persons designated under respective UNSC Resolutions or under lists established by the CBA. It is prohibited to make any property, economic resources, or financial or other related services available, directly or indirectly, wholly or jointly, to or for the benefit of terrorism-related or proliferation-related persons. Further specificities on applicable restrictions are provided under Guidance on Freezing of Property of Persons and Entities Related to Terrorism or Proliferation of Weapons of Mass Destruction, Providing Access to Frozen Property and Related Actions approved by the Decision of the Chairman of the CBA No. 1/435 – A of June 26, 2018. Decision of the Chairman of the CBA No. 1/434 – A of June 26, 2018, approved the Rules for Proposing Persons or Entities for Designation under the Lists published by or in accordance with the UNSC Resolutions and for Designating Persons or Entities under the Lists published by the CBA.

  In accordance with IMF Executive Board Decision No. 144-(52/51) Yes.

  Financial transactions are restricted and accounts are frozen if they involve persons or entities designated under the lists of persons and entities related to terrorism pursuant to (1) the UNSC Resolutions 1373 and 1267 and (2) the list of current organizations associated with terrorism designated by the US Secretary of State.

- **Other security restrictions**: No.
  
  There are no other security restrictions.

Exchange Arrangement

- **Currency**: Yes.
  
  The currency of Armenia is the Armenian dram.

- **Other legal tender**: No.

- **Exchange rate structure**: Unitary

- **Dual**: Yes.
  
  The exchange rate is classified as dual as a result of MCP that arises.
from the agreement between the MOF and CBA to settle some budgetary transactions at an agreed accounting exchange rate throughout the fiscal year. Effective January 1, 2021, the agreement between MOF and CBA was amended providing for the use of buying/selling exchange rates set by the CBA for budgetary transactions. The buying/selling rates are set by the CBA using the official exchange rate (determined based on the transactions of the previous day) +/- a margin (0.5% and 1%, depending on the foreign currency).

**Classification**

- No separate legal tender
- Currency board
- Conventional peg
- Stabilized arrangement
- Crawling peg
- Crawl-like arrangement
- Pegged exchange rate within horizontal bands
- Other managed arrangement

**Floating**

Yes. The de jure exchange rate arrangement is free floating. The CBA intervenes in the foreign exchange market only to smooth excessive exchange rate volatility, defined as short-term, high-frequency exchange rate movements caused by speculative or trend following elements rather than underlying macroeconomic fundamentals. The CBA intervenes anonymously mainly via auctions of foreign exchange, or openly in the interbank market, or through the stock exchange. The CBA publishes weekly intervention data through the stock exchange only on its website every Monday and publishes daily foreign exchange auction results on the local interbank platform.

During the first half of the 2021, foreign exchange market experienced some volatility amid economic and political uncertainties. Meantime, during the second half of the year under conditions of ease of uncertainties and robust growth of services export AMD/USD exchange rate stabilized and showed some appreciation trends. Over the course of the year, the CBA made infrequent interventions in the foreign exchange market only to counter disorderly market conditions. The de facto exchange rate arrangement is classified as floating.

**Official exchange rate**

Yes. Every day, the CB publishes official exchange rates. Effective March 1, 2022, the calculation methodology for the official exchange rates published by CBA was changed by the Republic of Armenia (RA) CBA Governor Resolution No. 1/6L, January 10, 2022. The average exchange rate of the Armenian dram relative to US dollar is calculated as an arithmetic average of volume-weighted average of USD bought, AMD sold transactions and volume-weighted average of USD sold, AMD bought transactions. Exchange rates of other currencies relative to US dollar are taken from reliable or widely used sources as of 15:00 Yerevan time. Prices of gold and
silver in AMD are calculated based on the prices published by the London Bullion Market Association (previously, the official exchange rate against the US dollar is set as the weighted average of the buying and selling rates in the foreign exchange market. For other currencies, except for the SDRs of IMF, the official average exchange rates of Armenian dram are set as cross-rates using US dollar’s official exchange rate against corresponding currencies and official exchange rate of Armenian dram against US dollar published by the CBA). The official exchange rate is used for accounting purposes and for treasury operations connected with external debt service or to create new external obligations. All economic agents use the official exchange rate for bookkeeping and revaluation purposes.

**Monetary policy framework**

**Exchange rate anchor**

- **U.S. dollar**
- **Euro**
- **Composite**
- **Other**

**Monetary aggregate target**

**Inflation-targeting framework**

- Yes. Since 2006, the CBA has been implementing inflation-targeting framework.

**Target setting body**

- Yes. The Republic of Armenia Law on Budgetary System states that inflation target is jointly set by the government and the CBA. The inflation target is published in the Inflation Report every quarter, in the Medium-term Expenditure Program and in the State Budget Law.

**Government**

- Yes.

**Central Bank**

- Yes.

**Monetary Policy Committee**

- Yes.

**Central Bank Board**

- Yes.

**Other**

- Yes.

**Government and Central Bank**

- Yes.

**Inflation target**

- Yes.

**Target number**

- Yes.

**Point target**

- Yes. The CPI inflation target is 4% with a ±1.5% tolerance band.

**Target with tolerance band**

- Yes.

**Band/Range**

- Yes.

**Target measure**

- Yes. The headline CPI is used as a target measure, which is calculated and published by the Statistical Committee of the Republic of Armenia. The inflation target is expressed in terms of 12-monthly inflation three years (12 quarters) ahead.
The CBA makes decisions regarding its monetary policy to meet the inflation target in the upcoming 12 quarters.

The policy rate of the CBA is the refinancing rate, which is the lower bound for 7-day repo agreement auctions by the CBA. During 2020–2021, the refinancing rate was first decreased from 5.5% to 4.25% in September 2020, after which it was gradually increased reaching 9.5% in August 2022 (effective December 15, 2021, refinancing rate was raised from 4.25% to 5.25%; effective February 2, 2022, from 5.25% to 5.50%; effective May 4, 2021, from 5.5% to 6%; effective June 15, 2021, from 6% to 6.5%; effective August 3, 2021, from 6.5% to 7%; effective September 14, 2021, from 7% to 7.25%; effective December 14, 2021, from 7.25% to 7.75%; effective February 1, 2022, from 7.75% to 8%; effective March 15, 2022, from 8% to 9.25%; effective August 2, 2022, from 9.25% to 9.5%). The operational target of the CBA under the inflation-targeting regime is the short-term (1–7 days) interbank repo rate.

The target corridor band was steadily following the main policy rate with ± 1.5% for upper and lower bands. The lower level of the band is the rate for deposit facility, and the upper level of the band is the rate for Lombard Repo agreement. As of August 3, 2022, the deposit facility rate was 8.0%, while the Lombard Repo rate was 11.5%. The rates for both deposit facility and Lombard Repo agreement are set as +1.5% and 1.5% from the policy rate, respectively. The short-term target of the CBA in IT framework is that short-term interest rates to be close to policy rate and not the target corridor band. The band is set only to limit excessive volatilities of interest rate in tail events.

According to the Law on the Central Bank, every year but no later than May 1, the CBA must present to the parliamentary hearings the yearly statement of the CBA’s activity, which includes the report about the monetary policy program of first quarter of the current year and the report about implementation of monetary policy during the previous year.

The CBA publishes the press release on the CBA Interest Rates that contains a brief summary of discussions at the CBA Board meeting covering interest rates and the refinancing rate (repo interest rate) eight times a year. The Summary Minutes of the CBA Board Meeting on CBA Interest Rates, which are published within the next nine working days, contain the following information: the main trends of economic development, inflation, and financial markets; a summary of discussions held at the CBA Board meeting relative to the setting of the CBA Interest Rates; a decision on the interest rates of the monetary policy instruments. The Governor of the CBA holds press conferences on the day of interest-rate decision explaining the main factors underlying the decision. The first press conference was held
June 30, 2020, where the Governor of the CBA presented monetary policy program of second quarter of 2020, whereas the first press conference on the day of the decision making was held July 28, 2020.

The CBA publishes quarterly inflation reports, where it monitors the actual quarterly inflation in comparison with the projected one, explains the main underlying factors of any possible deviations, and discusses policy implications of bringing the inflation back to its projected path.

Publication of inflation forecasts: Yes.

Other monetary framework:

Exchange tax: No.
Exchange subsidy: No.

Foreign exchange market: Yes.

Foreign exchange transactions take place in the interbank, intrabank, and stock exchange markets. The CBA participates mostly in the interbank market via quick tender; it may also participate in the stock exchange market. Commercial banks, foreign exchange dealers, and credit institutions may freely set the exchange rate (as well as any commissions) in transactions with their clients.

According to the amendment of March 25, 2020, 182-N on Law of the Republic of Armenia on Currency Regulation and Currency Control, the foreign exchange dealer trading is eliminated from the legislation of Armenia. (At the moment of the amendment, notwithstanding the existing legislation, there was no one licensed foreign exchange dealer.)

As of December 31, 2021, 17 commercial banks, 14 investment companies, 5 investment fund managers, 46 credit institutions, 7 insurance companies, 4 insurance brokers, 8 pension funds, and 215 foreign exchange bureaus were licensed by the CBA and were in operation. Foreign exchange entities carry out foreign exchange transactions by freely setting their own buying and selling rates for major currencies against the dram. The operations of foreign exchange bureaus are limited: They are authorized to purchase and sell foreign currency banknotes at freely determined rates only with individuals. They may not make foreign currency payments and transfers on behalf of their clients. Foreign exchange bureaus may have accounts abroad.

Spot exchange market: Yes.

Purchases and sales of foreign currency may take place through foreign exchange entities licensed by the CBA, including banks, foreign exchange dealers investment companies, credit institutions, and foreign exchange bureaus or, in the case of the government, through the CBA, which acts as the government’s financial agent. The CBA intervenes in the stock exchange only as a common market participant.

According to the amendment of March 25, 2020, 182-N on Law of the Republic of Armenia on Currency Regulation and Currency Control, the foreign exchange dealer trading is eliminated from the legislation of Armenia. (At the moment of the amendment, notwithstanding the existing legislation, there was no one licensed foreign exchange dealer.)

Operated by the central bank: Yes.

Foreign exchange standing facility: No.
Allocation: No.
Auction: Yes. The CBA conducts foreign exchange transactions in the interbank market via quick tender, announcing either the bid-ask rate or volume. The underlying regulation is the CBA Monetary Policy.
Indirect Instruments and Application Mechanisms – approved by CBA Board Decree No. 7A of January 24, 2014. A master agreement between the CBA and commercial banks governs sales and purchases of foreign exchange, currency swaps, and currency cash and noncash conversions. The auction has the following characteristics: (1) preannouncement of either the exchange rate or volume; (2) no predetermined frequency; (3) penalty of 0.5% of the transaction in drams for banks that default on a foreign exchange transaction; (4) no requirement to finance-specific international transactions with the foreign exchange proceeds (retail auction); (5) purchases and sales conducted with commercial banks that participate in the master agreement; and (6) foreign exchange auction results published on the local interbank platform.

Fixing

Interbank market: Yes. Interbank foreign exchange transactions take place both on the stock exchange and over the counter. All 17 banks licensed by the CBA as of December 31, 2021, may freely participate in the interbank market both over the counter and on the stock exchange. There are no limits on bid-ask spreads and commissions for market participants, and there are no market makers in the foreign exchange market. As of December 31, 2021, 16 banks were participating in the interbank market. The CBA does not intervene directly with market participants at their quoted rates. The CBA participates mostly in the interbank market via quick tender: announcing either fixed or variable tender. It may also participate in the stock exchange market.

Over the counter: Yes. The foreign exchange market operates both on the stock exchange and over the counter.

Brokerage: No.

Market making: No.

Forward exchange market: Yes. Residents and nonresidents may freely negotiate forward exchange contracts for both commercial and financial transactions in all leading convertible currencies in the domestic exchange market and in major international foreign exchange markets. However, the forward exchange market in Armenia remains undeveloped, although some banks sign forward contracts for small amounts. For monetary policy purposes, the CBA may enter into foreign exchange swaps.

Official cover of forward operations: No.

Arrangements for Payments and Receipts

Prescription of currency requirements: Yes. Under the Law on Payment and Settlement Systems and Payment and Settlement Organizations, payment organizations may transfer money in drams and foreign currencies. For transfers in a currency other than the currency of payment, the payable amount may be converted at the rate of the international payment system or at the payment organization’s internal rate.

Controls on the use of domestic currency: No.

For current transactions and payments: No.

For capital transactions: No.

Transactions in capital and money market instruments: No.

Transactions in derivatives and other instruments: No.

Credit operations: No.
Use of foreign exchange among residents  Yes.  
Under the Law on Currency Regulation and Currency Control, prices of and payments (between residents of Armenia) for goods, services, wages, consumer credits, and interest to be paid on financial operations and investments in statutory and share capital of legal entities are quoted and made in drams only; winnings are also advertised and paid in drams. However, the following may be denominated and transacted in foreign currency: (1) charity, donation, and inheritance operations between residents; (2) noncash payments for balance of payments non-trade-related transactions; (3) noncash payments for balance of payments current and capital account transactions – between legal entities, private entrepreneurs, and legal entities and private entrepreneurs; and (4) noncommercial current account operations and payments between residents and nonresidents, except for salary payments. Nonresident individuals and residents may not use foreign exchange as a means of payment in Armenia. According to the amendment of July 8, 2020, 359-N on the Law of the Republic of Armenia on Currency Regulation and Currency Control, the interest to be paid on loans and deposits denominated in foreign currency, as well as payments on foreign-currency-denominated bonds (including coupons), repo agreements, foreign-currency-denominated securities and payments associated with foreign currency or interest rate derivatives, can also be made in foreign currency.

Payments arrangements  Yes.

Bilateral payments arrangements  Yes.

Operative  No.

Inoperative  Yes.  
Armenia has bilateral payments agreements with Russia and Turkmenistan, which are inoperative.

Regional arrangements  Yes.  
Armenia is a signatory of the 1993 Treaty of Economic Union (with Azerbaijan, Belarus, Kazakhstan, Kyrgyz Republic, Moldova, Russia, Tajikistan, Uzbekistan), which includes eventual establishment of a customs and payments union and cooperation on investment, industrial development, and customs procedures. Armenia also signed the Agreement on the Establishment of a Payments Union of CIS Member Countries and belongs to the Black Sea Economic Cooperation pact, together with Albania, Azerbaijan, Bulgaria, Georgia, Greece, Moldova, Romania, Russia, Turkey, and Ukraine. Bilateral FTAs were signed with Georgia, the Kyrgyz Republic, Kazakhstan, Moldova, Russia, Tajikistan, Turkmenistan, and Ukraine, but only the agreement with Russia is operational. Armenia is a member of the Eurasian Economic Union (EEU) with Belarus, Kazakhstan, and Russia. The CBA participates in the payment system of the Interstate Bank, which handles settlements among CBs of member countries.

Clearing agreements  No.

Barter agreements and open accounts  No.

Administration of control  Yes.  
The CBA is the main entity that formulates and administers exchange rate policy and issues foreign exchange regulations within Armenia. The CBA also has the overall responsibility for currency control, in close collaboration with the MOF. The CBA is responsible for supervision and control over the entities it licenses, including banks, foreign exchange dealers, credit institutions, foreign exchange bureaus, and other financial entities. According to the amendment of March 25, 2020, 182-N on Law of
the Republic of Armenia on Currency Regulation and Currency Control, the foreign exchange dealer trading is eliminated from the legislation of Armenia. (At the moment of the amendment, notwithstanding the existing legislation, there was no one licensed foreign exchange dealer.) The MOF is responsible for supervision and control over the activities of other agents.

| Payments arrears | No. |
| Official         | No. |
| Private          | No. | There are no private arrears owing to regulations or other government actions.

**Controls on trade in gold (coins and/or bullion)**

- **On domestic ownership and/or trade** Yes. There are no restrictions on domestic ownership of gold. Export and import activities with gold to and from countries other than members of the EEU are allowed under a license granted by the Ministry of Economy. Residents may purchase, hold, and sell gold coins for numismatic purposes. Only the monetary authorities may acquire or hold gold domestically or abroad in any form other than numismatic coins and jewelry.
- **On external trade** Yes. Pursuant to Republic of Armenia Government Resolution No. 83-N, exports to and imports from countries other than members of the EEU are allowed under a license granted by the Ministry of Economy.

**Controls on exports and imports of banknotes**

- **No.** Within the Customs Union, individuals may move unlimited cash and/or monetary instruments without declaration. A declaration is required in the case of imports from third countries (countries that are not Customs Union members) or exports to third countries of cash and/or traveler’s checks exceeding the equivalent of US$10,000 and of monetary instruments denominated in domestic and foreign currency (for example, bills of exchange, bank checks, certified bearer securities) (CBA Resolution No. 106-N of April 29, 2014). Banks are permitted freely import and export domestic and foreign currency provided they comply with the requirements of the customs legislation.

**On exports**

- **No.** There are no restrictions on the amount of cash in domestic or foreign currency that may be exported by individuals. Within the Customs Union, individuals may move unlimited cash and/or monetary instruments without declaration. A declaration is required in the case of exports to third countries (countries that are not Customs Union members) of cash and/or traveler’s checks exceeding the equivalent of US$10,000 and of monetary instruments denominated in domestic and foreign currency (for example, bills of exchange, bank checks, certified bearer securities). Banks are permitted freely export domestic and foreign currency provided they comply with the requirements of the customs legislation.

**Domestic currency**

- **No.** There are no restrictions on the amount of cash in domestic currency that may be exported by individuals. Within the Customs Union, individuals may move unlimited cash and/or monetary instruments without declaration. A declaration is required in the case of exports to third countries (countries that are not Customs Union members) of cash and/or traveler’s checks exceeding the equivalent of US$10,000 and of monetary instruments denominated in domestic and foreign currency (for example, bills of exchange, bank checks, and certified bearer securities). Banks are permitted freely export domestic and foreign currency.

| Preshipment inspection | No. |
| Letters of credit | No. |
| Import licenses used as exchange licenses | No. |
| Other | No. |
| Import licenses and other nontariff measures | Yes. | Import license from the Ministry of Economy (Licensing Agency) is required for imports of white sugar (EEU Foreign Economic Activity Commodity Nomenclature 1701 99 100 1 and 1701 99 100 9) from |
third (non-EEU) countries. Import licenses from the Ministry of
Economy and Ministry of Health are required and are granted on a
case-by-case basis for imports of drugs and other pharmaceuticals
and pesticides. Imports of weapons, military equipment and parts,
and explosives require government authorization. An MOF license is
required for importation of firework materials and natural and
artificial diamonds unless they are mounted and set. A license from
an authorized government agency is required for importation,
exportation, and transport of strategic goods.

Armenia is a member of the EEU with Belarus, Kazakhstan, Kyrgyz
Republic, and Russia. There are no customs procedures within EEU
member countries. Products imported from CIS countries are exempt
from import tariffs. Imports from third countries are subject to import
tariffs in accordance with the EEU Decree No. 54 of July 16, 2012.
However, Armenia applies the tariffs that were used prior to joining
the EEU on imports for more than 800 products based on the agreed
schedule. Meanwhile, according to the Membership Agreement,
Armenia secured customs duty preferences for imports to Armenia
for a list of products.

Exports and Export Proceeds

Repatriation requirements No.

The CBA reserves the right to impose capital controls to maintain the stability of the financial system and prevent money laundering and financing of terrorism, and for statistical purposes.

Under the Republic of Armenia Law “On Securities Market,” the public sale of securities (including shares or other equity securities) of nonresidents must be handled by a local investment services provider (agent). This requirement refers only to nonresident issuers with the aim of local investor protection. In particular, considering the fact that local investment services providers are under the CBA supervision, this legal provision gives the CBA a tool of effective control over the sale or issue of a nonresident securities. The control measures over such sale or issue are implemented mostly through the prospectus and/or other sale (issue) documents, which are submitted to the CBA for approval prior to the sale or issue of such securities. Moreover, if the securities are admitted to trading on the regulated market, additional control measures are implemented.
The Law of the Republic of Armenia “On Securities Market” does not restrict the purchase of bonds or other debt securities by nonresidents (either from nonresidents or from residents).

Under the Law of the Republic of Armenia “On Securities Market,” the public sale of securities (including bonds or other securities) of nonresidents must be handled by a local investment services provider (agent).

This requirement refers only to nonresident issuers with the aim of local investor protection. In particular, considering the fact that local investment services providers are under the CBA supervision, this legal provision gives the CBA a tool of effective control over the sale or issue of a nonresident securities.

The control measures over such sale or issue are implemented mostly through the prospectus and/or other sale (issue) documents, which are submitted to the CBA for approval prior to the sale or issue of such securities. Moreover, if the securities are admitted to trading on the regulated market, additional control measures are implemented by both CBA and regulated market operator via the listing procedures, as well as periodic and ongoing reporting requirements.

Money market instruments are exempt from the requirement that the public sale of securities of nonresidents must be handled by a local investment services provider (agent). A lighter regulatory framework applies to money market instruments irrespective of the issuer residence (resident or nonresident) compared to the capital market instruments.

Under the Law of the Republic of Armenia “On Securities Market,” the public sale of securities (including collective investment securities) of nonresidents must be handled by a local investment services provider (agent).

This requirement refers only to nonresident issuers with the aim of local investor protection. In particular, considering the fact that local investment services providers are under the CBA supervision, this legal provision gives the CBA a tool of effective control over the sale or issue of a nonresident securities (including collective investment securities).

The control measures over such sale or issue are implemented mostly
through the prospectus and/or other sale (issue) documents (for example, fund rules), which are submitted to the CBA for approval prior to the sale or issue of such securities. Moreover, if the securities are admitted to trading on the regulated market, additional control measures are implemented by both CBA and regulated market operator via the listing procedures, as well as periodic and ongoing reporting requirements.

Transfer of gambling and prize earnings Yes.

Effective December 8, 2022, according to Article 6, Part 2 (e) of the RA Law “On Gambling, Internet Gambling and Casinos,” the organizer of gambling and casinos ensures the exchange of tokens in the gambling hall only in a non-cash way. Betting directly (through the casino) by players, except for nonresident identified players, or replenishing funds to individual playing cards issued to players by organizers is carried out in a non-cash manner.

According to the Parts (f1) and (f2) of the same article, the organizer: (f1) transfers (pays) the earnings in non-cash way in AMD; (f2) cannot transfer (pay) the earnings to the accounts from which non-cash payments for participation have not been made. Meanwhile, it is prohibited to directly (through the casino) accept fees for participation and provide winnings in cash in case of organization of internet gambling.

According to Article 6, non-cash transactions, defined by the Law “On Gambling, Internet Gambling and Casinos,” must be carried out only through bank accounts or cards. This requirement enters into force six months after June 8, 2022 (the publication date).

According to Article 5.2, Part 2 of the RA Law “On Lotteries,” it is forbidden to deposit and withdraw funds to the accounts of the participants of the totalizer in cash. The specified accounts are replenished, and money is withdrawn from the accounts only in a non-cash way. Bets placed by players directly (through the casino) or replenishment of funds to individual playing cards given to players by the organizers are carried out in a non-cash way.

According to Article 5.2, Part 4, non-cash transactions, defined by the Law “On Lotteries,” must be carried out only through bank accounts or cards. This requirement enters into force six months after June 8, 2022 (the publication date).

**Provisions Specific to the Financial Sector**

Provisions specific to commercial banks and other credit institutions Yes.

CBA Board Resolution No. 39 of February 9, 2007, on approval of Regulation No. 2 on regulation of prudential standards for banking and CBA Board Resolution No. 347-N of November 5, 2002, on approval of Regulation No. 14 on the regulation of the activities of credit organizations, the prudential standards of activities of credit organizations, set prudential standards, and ratios for banks and credit institutions.

Borrowing abroad No.

There are no restrictions for commercial banks, foreign banks’ branches, and credit institutions on borrowing abroad.

Maintenance of accounts abroad No.

Commercial banks including foreign banks’ branches and credit institutions may maintain correspondent accounts abroad.
Lending to nonresidents (financial or commercial credits) No. There are no restrictions for commercial banks, foreign banks’ branches, and credit institutions on lending to nonresidents.

Lending locally in foreign exchange Yes. Banks including foreign banks’ branches and credit institutions may not extend consumer loans in foreign exchange.

Purchase of locally issued securities denominated in foreign exchange No. There are no restrictions for commercial banks, foreign banks’ branches, and credit institutions on purchasing of locally issued securities denominated in foreign exchange.

Differential treatment of deposit accounts in foreign exchange Yes. The reserve requirement is, effective April 17, 2021, 4% (previously 2%) for funds attracted in AMD (CBA Board Resolution No. 46-N of April 16, 2021).

Reserve requirements Yes. Under the CBA Resolution No. 75-N of June 7, 2019, the minimum reserve requirement for foreign currency funds is 18%. Pursuant to CBA Resolution No. 96-N of June 14, 2022, effective July 13, 2022, 6% of the reserve requirement is held in AMD, whereas the other 12% for funds attracted in EUR is held in euros, for funds attracted in USD and other foreign currencies is held in USD. Previously, pursuant to CBA Resolution No. 183-N of December 7, 2021, 8% of the reserve requirement was held in AMD, while the other 10% for funds attracted in EUR was held in euros, for funds attracted in USD and other foreign currencies was held in USD. Previously, pursuant to CBA Resolution No. 133-N of August 18, 2020, 10% of the reserve requirement was held in AMD and the other 8% for funds attracted in EUR was held in euros, for funds attracted in USD and other foreign currencies was held in USD. Previously, under the CBA Resolution No. 142-N of October 7, 2019, 14% of reserve requirement was held in AMD and the other 4% for funds attracted in EUR was held in euros, for funds attracted in USD and other foreign currencies was held in USD. Under the CBA Resolution No. 75-N of June 7, 2019, 16% of reserve requirement was held in AMD and the other 2% for funds attracted in EUR was held in euros, for funds attracted in USD and other foreign currencies was held in USD.

The reserve requirement for residents’ and nonresidents’ deposits is not remunerated. If the funds come from bonds issued by the bank, meet certain requirements, and have a contractual maturity of at least two years, the minimum reserve requirement is 0% for funds in AMD (CBA Resolution No. 44-N of February 24, 2015) and, effective April 17, 2021, 10% for funds in foreign currency (CBA Board Resolution No. 46-N of April 16, 2021). Previously, if the funds came from bonds issued by the bank, met certain requirements, and had a contractual maturity of at least two years, the minimum reserve requirement was 0% for funds in AMD and 0% or 4.5% of funds in foreign currency (CBA Resolution No. 44-N of February 24, 2015). If the funds came from bonds issued by the bank, met certain requirements, and had a contractual maturity of at least two years, the minimum reserve requirement was 0% for funds in AMD and 0%, 2.25%, or 4.5% of funds in foreign currency (CBA Resolution No. 236-N of November 10, 2015). If the funds are attracted from certain international financial institutions and the period prior to repayment of attracted resource is not less than two years, the minimum reserve requirement is 0% for funds in AMD (CBA Resolution No. 44-N of February 24, 2015) and, effective April 17, 2021, 10% for funds in foreign currency (CBA Board Resolution No. 46-N of April 16, 2021). Previously, if the funds were attracted from certain international financial institutions and the period prior to repayment of attracted resource was not less than two years, the minimum reserve requirement was null.
0% for funds in AMD and 4.5% for funds in foreign currency (CBA Resolution No. 44-N of February 24, 2015). If the funds were attracted from certain international financial institutions and the period prior to repayment of attracted resource was not less than four years, the reserve requirement was 0% for funds in AMD and 2.25% for funds in foreign currency (CBA Resolution No. 236-N of November 10, 2015).

**Liquid asset requirements**
Yes.

CBA Resolution No. 168-N of June 26, 2012, specifies the foreign exchange liquidity ratio requirements. For the total liquidity ratio of highly liquid assets to total assets, the floor is 4% for assets in one of the following: SDRs, US dollars, euros, pounds sterling, Japanese yen, Swiss francs, Canadian dollars, Swedish kronor, Danish kroner, Australian dollars, and monetary gold. If liabilities in another currency exceed 5% of total liabilities on a monthly basis, a special general liquidity ratio applies, which includes assets in that particular currency and US dollars and euros. The floor of the special ratio is 4%. For the current liquidity ratio of highly liquid assets to demand liabilities, the floor is 10% for assets and liabilities in one of the following: SDRs, US dollars, euros, pounds sterling, Japanese yen, Swiss francs, Canadian dollars, Swedish kronor, Danish kroner, Australian dollars, and monetary gold. If liabilities in another currency exceed 5% of total liabilities on a monthly basis, a special current liquidity ratio applies, which includes assets and liabilities in that particular currency and US dollars and euros. The floor of the special ratio is 10%. The total liquidity ratio and current liquidity ratio are 15% and 60%, respectively, for all currencies; no special liquidity ratio is required for domestic currency.

**Interest rate controls**
No.

**Credit controls**
No.

**Differential treatment of deposit accounts held by nonresidents**
No.

**Reserve requirements**
No.

**Liquid asset requirements**
No.

**Interest rate controls**
No.

**Credit controls**
No.

**Investment regulations**
Yes.

**Abroad by banks**
Yes.

Investment transactions of banks operating in Armenia are regulated by Article 35 of the Law on Banks and Banking, which applies to transactions in Armenia and abroad. Under Article 35 of the Law on Banks and Banking, unless permitted by the CBA, bank operations may not lead to (1) acquisition of 4.99% or more participation in the statutory fund of any other person; (2) acquisition of equity interest in the statutory fund of one person exceeding 15% of the bank’s total capital; or (3) acquisition of equity interest in the statutory funds of other persons exceeding 35% of the bank’s total capital. CBA consent is required for transactions that result in a bank’s participation in the statutory fund of another or the same person exceeding 9%, 15%, 25%, 35%, 50%, or 70% or leading to 100%.

**In banks by nonresidents**
Yes.

Under Article 18 of the Law on Banks and Banking, significant ownership in banks by residents or nonresidents must be approved by the CBA. Under Article 9 of this law and other laws regulating banking activity, significant participation in a legal entity means (1) ownership of 10% or more of voting stocks (shares) of the legal
entity or (2) ownership of less than 10% of voting stocks (shares) or ownership with no voting power but in the opinion of the CB able to determine the decisions of management, exercise significant influence over decision making and application of decisions, or determine the targets and spheres of a legal entity’s activity through participation, directly or indirectly, business reputation, and standing.

According to this law and other laws regulating banking activities, significant interest means that a legal entity is able to determine the decisions of management, influence decision making or application, or determine the targets and spheres of a legal entity’s activity.

According to the point 5 of Article 18 of the Law on Banks and Banking, physical entities permanently residing or acting in offshore zones, as well as legal entities or entities with no legal status determined or incorporated there and parties related with them may acquire participation in the statutory capital of a bank (regardless of the extent of the participation) through one or a number of transactions only through the procedure outlined in this Article, after securing preliminary consent of the CB.

The legal entities determined with participation of parties listed in this article or parties related with them may acquire participation in the statutory capital of a bank (regardless of the extent of the participation) only through the procedure outlined in this Article, after securing preliminary consent of the CB.

The described regulations are of a prudential nature and not a form of a capital control.

Open foreign exchange position limits  Yes.

The limits on open foreign exchange positions are calculated with and without including derivatives. A limit of 7% of capital applies on open foreign exchange positions of individual currencies, and a limit of 10% of capital applies on aggregate gross foreign exchange positions of all currencies. For the purpose of calculation, currencies are grouped into two categories: (1) SDR, US dollar, euro, Japanese yen, pound sterling, Swiss franc, Swedish krona, Danish koruna, Australian dollar, Canadian dollar, and bank gold and (2) all other currencies. Derivatives contracts with international organizations (for example, ECB, IMF, and World Bank), multilateral development banks, sovereigns, CBs, and foreign commercial banks rated at least A+ (A1) are included in the calculation of limits on open foreign exchange positions, which exclude derivatives.

On resident assets and liabilities  Yes.

There is no differentiated approach between resident and nonresident assets and liabilities when calculating open foreign exchange position. The limits on open foreign exchange positions are calculated with and without including derivatives. A limit of 7% of capital applies on open foreign exchange positions of individual currencies, and a limit of 10% of capital applies on aggregate gross foreign exchange positions of all currencies. For the purpose of the calculation, currencies are grouped into two categories: (1) SDR, US dollar, euro, Japanese yen, pound sterling, Swiss franc, Swedish krona, Danish koruna, Australian dollar, Canadian dollar, and bank gold and (2) all other currencies. Derivatives contracts with international organizations (for example, ECB, IMF, and World Bank), multilateral development banks, sovereigns, CBs, and foreign commercial banks rated at least A+ (A1) are included in the calculation of limits on open foreign exchange positions, which exclude derivatives.

On nonresident assets and liabilities  Yes.

There is no differentiated approach between resident and nonresident assets and liabilities when calculating open foreign exchange position. The limits on open foreign exchange positions are calculated with and without including derivatives. A limit of 7% of capital applies on open foreign exchange positions of individual...
currencies, and a limit of 10% of capital applies on aggregate gross foreign exchange positions of all currencies. For the purpose of calculation, currencies are grouped into two categories: (1) SDR, US dollar, euro, Japanese yen, pound sterling, Swiss franc, Swedish krone, Danish koruna, Australian dollar, Canadian dollar, and bank gold and (2) all other currencies. Derivatives contracts with international organizations (for example, ECB, IMF, World Bank), multilateral development banks, sovereigns, CBs, and foreign commercial banks rated at least A+ (A1) are included in the calculation of limits on open foreign exchange positions, which exclude derivatives.

**Provisions specific to institutional investors**

Yes. The only institutional investors in Armenia are insurance companies, investment companies, and investment (pension) funds. As of December 31, 2021, there were seven insurance companies, 14 investment companies, 45 investment funds, and 8 pension funds in operation.

**Insurance companies**

Yes. The insurance companies are regulated according to the Law on Insurance and Insurance Activity and other legal acts.

**Limits (max.) on securities issued by nonresidents**

No. There are no limits specifically targeted toward securities issued by nonresidents.

**Limits (max.) on investment portfolio held abroad**

No. There are no limits specifically targeted toward investment portfolios held abroad.

However, under CBA Resolution No. 311-N of October 2, 2007, on approval of CBA Regulation No. 3/02 concerning prudential standards of insurance companies, there are limits regarding the asset composition of technical reserves. The maximums are (1) 3% on cash (including cash in transit), cash-equivalent payment documents with the consent of the Board of the CBA, banking gold (including banking gold in transit); (2) 100% on Securities issued by the Republic of Armenia and the CBA with their current (market) value, the balance of the account of insurance company in the CBA, deposits in the CBA, transfer notes issued by the Ministry of Finance of the Republic of Armenia with maturity up to 1 year, which are subject to be repaid by the CBA at the expense of the funds of the consolidated treasury account of the Republic of Armenia Government; (3) 5% for a single issuer and 40% for all issuers of Government treasury bills with their current (market) value of states rated as “A+” or higher by the rating agencies Standard and Poor’s/Fitch, or rated as “A1” or higher by Moody’s rating agency, or rated “A” or higher by the rating agency A.M. Best, corporate securities with their current (market) value, rated as “A+” or higher by the rating agencies Standard and Poor’s/Fitch, or rated as “A1” or higher by Moody’s rating agency, or rated “A” or higher by the rating agency A.M. Best, non-governmental bonds with their current (market) value issued by the EBRD, ECB, EIB, other international organizations (where Armenia has a membership), banking accounts, (as well as unallocated gold accounts) term deposits and deposits on demand (if the depositor’s right to receive the deposit on demand is not limited by the deposit agreement), invested in the foreign banks rated as “A+” or higher by the rating agencies Standard and Poor’s/Fitch, or rated as “A1” or higher by Moody’s rating agency, or rated “A” or higher by the rating agency A.M. Best; (4) 10% for a single issuer and 40% for all issuers of Securities, issued by financial organizations, operating on the territory of the Republic of Armenia, with their current (market) value, if they are allowed to the trade in the regulated market and have a market maker, securities of RA resident non-financial organizations with their current (market) value, the rating of which is equal or higher than the rating that is one level lower than the one given to the Republic of Armenia by the
rating agencies (“Standard and Poor’s or Fitch or Moody’s”); (5) 20% for a single issuer and 100% for all issuers banking accounts (as well as unallocated gold accounts), deposits on demand and term deposits (if the depositor’s right to receive the deposit on demand is not limited by the deposit agreement) in banks operating in the Republic of Armenia and branches of foreign banks providing services within the territory of the Republic of Armenia, as well as loans on demand and loans that do not have contractual maturity, provided to banks operating in the Republic of Armenia and branches of foreign banks, providing services within the territory of the Republic of Armenia, if the lender’s right to receive the sum of the loan on demand is not limited by the loan agreement; (6) 5% for a single issuer and 20% for all issuers for loans on demand and loans that do not have contractual maturity, provided to insurance companies, investment companies and those credit organizations, that according to their Charter, attract loans by public offer, operating in the Republic of Armenia, and branches of foreign insurance companies, investment companies and those credit organizations, that according to their Charter, attract loans by public offer, providing services within the territory of the Republic of Armenia, if the lender’s right to receive the sum of the loan on demand is not limited by the loan agreement; (7) 10% for a single issuer and 50% for all issuers the securities, which have been acquired by repo agreements, with their current (market) value; and (8) 5%, but not more than 100 million Armenian drams, on shares in investment funds with their current (market) value, which are registered by the CBA, implement their investment policy within the territory of the Republic of Armenia and there is no condition which may reject their further alienation.

There are no limits specifically targeted toward investment portfolios held locally.

However, under CBA Resolution No. 311-N of October 2, 2007, on approval of CBA Regulation No. 3/02 concerning prudential standards of insurance companies, there are limits regarding the asset composition of technical reserves. The maximums are (1) 3% on cash (including cash in transit), cash-equivalent payment documents with the consent of the Board of the CBA, banking gold (including banking gold in transit); (2) 100% on Securities issued by the Republic of Armenia and the CBA with their current (market) value, the balance of the account of insurance company in the CBA, deposits in the CBA, transfer notes issued by the Ministry of Finance of the Republic of Armenia with maturity up to 1 year, which are subject to be repaid by the CBA at the expense of the funds of the consolidated treasury account of the Republic of Armenia Government; (3) 5% for a single issuer and 40% for all issuers of Government treasury bills with their current (market) value of states rated as “A+” or higher by the rating agencies Standard and Poor’s/Fitch, or rated as “A1” or higher by Moody’s rating agency, or rated “A” or higher by the rating agency A.M. Best, corporate securities with their current (market) value, rated as “A+” or higher by the rating agencies Standard and Poor’s/Fitch, or rated as “A1” or higher by Moody’s rating agency, or rated “A” or higher by the rating agency A.M. Best, non-governmental bonds with their current (market) value issued by the EBRD, ECB, EIB, other international organizations (where Armenia has a membership), banking accounts (as well as unallocated gold accounts), term deposits and deposits on demand (if the depositor’s right to receive the deposit on demand is not limited by the deposit agreement), invested in the foreign banks rated as “A+” or higher by the rating agencies Standard and Poor’s/Fitch, or rated as “A1” or higher by Moody’s rating agency,
or rated “A” or higher by the rating agency A.M. Best; (4) 10% for a single issuer and 40% for all issuers of Securities, issued by financial organizations, operating on the territory of the Republic of Armenia, with their current (market) value, if they are allowed to the trade in the regulated market and have a market maker, securities of RA resident non-financial organizations with their current (market) value, the rating of which is equal or higher than the rating that is one level lower than the one given to the Republic of Armenia by the rating agencies (“Standard and Poor’s or Fitch or Moody’s”); (5) 20% for a single issuer and 100% for all issuers banking accounts (as well as unallocated gold accounts), deposits on demand and term deposits (if the depositor’s right to receive the deposit on demand is not limited by the deposit agreement) in banks operating in the Republic of Armenia and branches of foreign banks providing services within the territory of the Republic of Armenia, as well as loans on demand and loans that do not have contractual maturity, provided to banks operating in the Republic of Armenia and branches of foreign banks, providing services within the territory of the Republic of Armenia, if the lender’s right to receive the sum of the loan on demand is not limited by the loan agreement; (6) 5% for a single issuer and 20% for all issuers for loans on demand and loans that do not have contractual maturity, provided to insurance companies, investment companies and those credit organizations, that according to their Charter, attract loans by public offer, operating in the Republic of Armenia, and branches of foreign insurance companies, investment companies and those credit organizations, that according to their Charter, attract loans by public offer, providing services within the territory of the Republic of Armenia, if the lender’s right to receive the sum of the loan on demand is not limited by the loan agreement; (7) 10% for a single issuer and 50% for all issuers the securities, which have been acquired by repo agreements, with their current (market) value; and (8) 5%, but not more than 100 million Armenian drams, on shares in investment funds with their current (market) value, which are registered by the CBA, implement their investment policy within the territory of the Republic of Armenia and there is no condition which may reject their further alienation.

**Currency-matching regulations on assets/liabilities composition**

Yes. Limits on foreign exchange positions conform to CBA Resolution No. 368-N of December 20, 2011, and amendments, and the addition to CBA Regulation No. 3/02 concerning the prudential standards of insurance companies. The limits on open foreign exchange positions include inclusive and exclusive derivatives. A limit of 7% of capital applies on open foreign exchange positions of individual currencies, and a limit of 10% of capital applies on gross foreign exchange positions of all currencies. Derivatives contracts with international organizations (for example, ECB, IMF, and World Bank), multilateral development banks, sovereigns, CBs, and foreign financial companies rated at least A+ (A1/A); and currency; and foreign exchange swaps are included in the calculation of open foreign exchange positions, which exclude derivatives. Foreign exchange risk is captured in the calculations of the capital adequacy ratio. CBA Resolution No. 151-N of June 29, 2010, on approval of amendments and the addition to CBA Regulation No. 3/02, specifies the calculation method.

**Pension funds**

Yes. Pension funds are regulated according to the Republic of Armenia Law “On Funded Pensions.”

**Limits (max.) on securities issued by nonresidents**

Yes. According to the Republic of Armenia Law “On Funded Pensions,” the total investments in securities issued or fully guaranteed by a foreign state or its CB may not exceed 40% of the total assets of a
The total investment in one issue (tranche) may not exceed 20% of the total assets of the fund. According to CBA Board Resolution No. 161-N of July 15, 2014, on Approving Regulation No. 10/30 “On Quantitative and Foreign Currency Restrictions for Voluntary Pension Funds’ Investments,” the total investments in securities issued or fully guaranteed by a foreign state or its CB may not exceed 40% of the total assets of a voluntary pension fund. The total investment in one issue (tranche) may not exceed 20% of the total assets of the fund.

| Limits (max.) on investment portfolio held abroad | Yes. |
| Limits (min.) on investment portfolio held locally | No. |
| Currency-matching regulations on assets/liabilities composition | Yes. |
| Investment firms and collective investment funds | No. |
| Limits (max.) on securities issued by nonresidents | No. |
| Limits (max.) on investment portfolio held abroad | No. |
| Limits (min.) on investment portfolio held locally | No. |
| Currency-matching regulations on assets/liabilities composition | No. |

Though there are no direct limits on investment portfolios held abroad, however, an indirect limit is set by the Republic of Armenia Law “On Funded Pensions” for mandatory pension funds and by CBA Board Resolution No. 161-N of July 15, 2014, on Approving Regulation No. 10/30 “Quantitative and Foreign Currency Restrictions for Voluntary Pension Funds’ Investments” for voluntary pension funds.

The total foreign exchange investments of mandatory pension funds are limited at 40% of the total assets of the fund. For voluntary pension funds, the limit is set at 50%.

The total amount of non-convertible foreign exchange investments of mandatory and voluntary pension funds may not exceed 3% of total assets.

The credit ratings of foreign banks, in which the assets of mandatory pension funds may be invested, may not be lower than Standard & Poor’s “BBB,” Moody’s “Baa3,” or Fitch’s “BBB.”

The credit ratings of foreign banks, in which the assets of voluntary pension fund may be invested, may not be lower than Standard & Poor’s “BBB,” Moody’s “Baa3,” or Fitch’s “BBB-.”

The credit ratings of foreign issuers (if guaranteed by any third person, then of that guarantor), in debt securities of which the assets of voluntary pension funds may be invested, may not be lower than Standard & Poor’s “BBB,” Moody’s “Baa3,” or Fitch’s “BBB-” except for debt securities issued or fully guaranteed by the foreign state or its CB.

There are no limits (min.) on investment portfolios held locally.

According to the Republic of Armenia Law “On Funded pensions,” the total amount of foreign-exchange-denominated investments may not exceed 40% of the total assets of a mandatory pension fund. According to CBA Board Resolution No. 161-N of July 15, 2014, the total amount of foreign-exchange-denominated investments may not exceed 50% of the total assets of a voluntary pension fund.

Investment firms are regulated by the Republic of Armenia Law “On Securities Market.” Collective investment funds are regulated according to the Republic of Armenia Law “On Investment Funds.”

There are no limits (max.) on securities issued by nonresidents.

There are no limits (max.) on investment portfolios held abroad.

There are no limits (min.) on investment portfolios held locally.

There are no currency-matching regulations on the asset/liability composition of collective investment funds.

Foreign exchange risk of investment firms is captured in calculations of the capital adequacy ratio, as component of market risk.
Changes during 2021 and 2022

Exchange Arrangement

Exchange rate structure

Dual

01/01/2021 The agreement between MOF and CBA to settle some budgetary transactions at an agreed accounting exchange rate throughout the fiscal year was amended providing for the use of buying/selling exchange rates set by the CBA for budgetary transactions. The buying/selling rates are set by the CBA using the official exchange rate (determined based on the transactions of the previous day) +/- a margin (0.5% and 1%, depending on the foreign currency).

Official exchange rate

03/01/2022 The calculation methodology for the official exchange rates published by CBA was changed by RA CBA Governor Resolution No. 1/6L.

Controls on personal capital transactions

Transfer of gambling and prize earnings

12/08/2022 According to Article 6, Part 2 (e) of the RA Law “On Gambling, Internet Gambling and Casinos,” the organizer of gambling and casinos ensures the exchange of tokens in the gambling hall only in a non-cash way. Betting directly (through the casino) by players, except for nonresident identified players, or replenishing funds to individual playing cards issued to players by organizers is carried out in a non-cash manner. According to the Parts (f1) and (f2) of the same article, the organizer: (f1) transfers (pays) the earnings in non-cash way in AMD; (f2) cannot transfer (pay) the earnings to the accounts from which non-cash payments for participation have not been made. Meanwhile, it is prohibited to directly (through the casino) accept fees for participation and provide winnings in cash in case of organization of internet gambling. According to Article 6, non-cash transactions, defined by the Law “On Gambling, Internet Gambling and Casinos,” must be carried out only through bank accounts or cards. This requirement enters into
force six months after June 8, 2022 (the publication date).

According to Article 5.2, Part 2 of the RA Law “On Lotteries,” it is forbidden to deposit and withdraw funds to the accounts of the participants of the totalizer in cash. The specified accounts are replenished, and money is withdrawn from the accounts only in a non-cash way. Bets placed by players directly (through the casino) or replenishment of funds to individual playing cards given to players by the organizers are carried out in a non-cash way.

According to Article 5.2, Part 4, non-cash transactions, defined by the Law “On Lotteries,” must be carried out only through bank accounts or cards. This requirement enters into force six months after June 8, 2022 (the publication date).

Provisions Specific to the Financial Sector

Provisions specific to commercial banks and other credit institutions

Differential treatment of deposit accounts in foreign exchange

Reserve requirements

If the funds come from bonds issued by the bank, meet certain requirements, and have a contractual maturity of at least two years, the minimum reserve requirement is 0% for funds in AMD (CBA Resolution No. 44-N of February 24, 2015) and, effective this date, 10% for funds in foreign currency (CBA Board Resolution No. 46-N of April 16, 2021). Previously, if the funds came from bonds issued by the bank, met certain requirements, and had a contractual maturity of at least two years, the minimum reserve requirement was 0% for funds in AMD and 0% or 4.5% of funds in foreign currency (CBA Resolution No. 44-N of February 24, 2015). If the funds came from bonds issued by the bank, met certain requirements, and had a contractual maturity of at least four years, the minimum reserve requirement was 0% for funds in AMD and 0%, 2.25%, or 4.5% of funds in foreign currency (CBA Resolution No. 236-N of November 10, 2015).

The reserve requirement is 4% (previously 2%) for funds attracted in AMD.

If the funds are attracted from certain international financial institutions and the period prior to repayment of attracted resource is not less than two years, the minimum reserve requirement is 0% for funds in AMD (CBA Resolution No. 44-N of February 24, 2015) and, effective this date, 10% for funds in foreign currency (CBA Board Resolution No. 46-N of April 16, 2021). Previously, if the funds were attracted from certain international financial institutions and the period prior to repayment of attracted resource was not less than two years, the minimum reserve requirement was 0% for funds in AMD and 4.5% for funds in foreign currency (CBA Resolution No. 44-N of February 24, 2015). If the funds were attracted from certain international financial institutions and the period prior to repayment of attracted resource was not less than four years, the reserve requirement was 0% for funds in AMD and 2.25% for funds in foreign currency (CBA Resolution No. 236-N of November 10, 2015).

Pursuant to CBA Resolution No. 133-N of August 18, 2020, 10% of the reserve requirement on foreign currency funds is held in AMD and the other 8% for funds attracted in EUR is held in euros, for funds attracted in USD and other foreign currencies is held in USD. Previously, under the CBA Resolution No. 142-N of October 7, 2019, 14% of reserve requirement was held in AMD and the other 4% for funds attracted in EUR was held in euros, for funds attracted in USD.
and other foreign currencies was held in USD. Under the CBA Resolution No. 75-N of June 7, 2019, 16% of reserve requirement was held in AMD and the other 2% for funds attracted in EUR was held in euros, for funds attracted in USD and other foreign currencies was held in USD.

Pursuant to CBA Resolution No. 96-N of June 14, 2022, 6% of the reserve requirement is held in AMD, whereas the other 12% for funds attracted in EUR is held in euros, for funds attracted in USD and other foreign currencies is held in USD. Previously, pursuant to CBA Resolution No. 183-N of December 7, 2021, 8% of the reserve requirement was held in AMD, while the other 10% for funds attracted in EUR was held in euros, for funds attracted in USD and other foreign currencies was held in USD.
ARUBA
(Position as of June 30, 2022)

Status under IMF Articles of Agreement

Article VIII: Yes.

Article XIV:

Exchange Measures

The IMF staff report for the 2021 Article IV Consultation Discussions with Aruba states that as of March 31, 2021, Aruba maintains an unapproved exchange restriction arising from the foreign exchange tax on payments by residents to nonresidents (1.3% of the transaction value). In March 2020, the Central Bank of Aruba (CBA) halted the issuance of new foreign exchange licenses, limiting most of the outgoing capital and also some current transactions. The following measures constitute new exchange restrictions: (1) prohibition on actual payment and/or transfer of dividends to nonresident shareholders, and of net income from other investment; (2) restriction on repayment and interest payments of loans below the relevant thresholds (that is, Afl. 300,000 for natural persons and Afl. 750,000 for legal entities) obtained after March 17, 2020; and (3) prohibition on payment of management fees to affiliated companies. (Country Report No. 21/81)

Exchange measures imposed for security reasons: Yes.

In accordance with IMF Executive Board Decision No. 144-(52/51) No.

Other security restrictions: Yes.

In 2010, Aruba enacted a Sanctions State Decree to Combat Terrorism and Terrorist Financing (AB2010 No. 27), which is based on the Sanctions State Ordinance 2006 (AB 2007 No. 24). The Sanctions State Decree provides for the direct implementation of UNSC Resolution (UNSCR) 1267 (1999) and for the establishment of a domestic freezing mechanism as required in UNSCR 1373 (2001). The Interim-State Decree on Priority Sanction Regimes (AB 2019 No. 47) (September 6, 2019), containing the provisions for the implementation of Articles 2 and 2a of the Sanction State Ordinance 2006 (AB 2007 No. 24), requires the freezing of all funds and other assets of persons and organizations mentioned in the Annex of the State Decree. This Interim-State Decree was enacted for the purpose of implementing in short term a number of Regulations and Decisions adopted in the context of the Common Foreign and Security Policy of the EU. Sanctions State Decree Libya (AB 2011 No. 25) (April 18, 2011) provides for the freezing of all funds or other assets in Aruba that belong directly or indirectly to, are owned by, are in possession of, or are under the control of a natural person, legal entity, or other entity mentioned in Annex II of UNSCR 1970 (2011) and UNSCR 1973 (2011). Sanctions State Decree Ukraine (AB 2014 No. 26) (December 9, 2014) implements Regulation No. 208/2014 (March 5, 2014) adopted by the EC regarding the freezing of funds and economic resources of persons identified as responsible for the misappropriation of Ukrainian State funds, persons responsible for human rights violations in Ukraine, and natural or...
legal persons, entities, or bodies associated with them. Sanctions State Decree Sudan (AB 2014 No. 46) (on September 26, 2014) provides for the freezing of funds or other assets in Aruba that belong directly or indirectly to, are owned by, are in possession of, or are under the control of a natural person, legal entity, or other entity or body mentioned in Annex I of Regulation No. 747/2014 (July 10, 2014) of EC. Sanctions State Decree South Sudan (AB 2014 No. 47) (on September 26, 2014) provides for the freezing of funds or other assets in Aruba that belong directly or indirectly to, are owned by, are in possession of, or are under the control of a natural person, legal entity, or other entity or body mentioned in Annex I of Regulation No. 748/2014 (July 10, 2014) of EC. Sanctions State Decree Syria (AB 2016 No. 2) (on January 22, 2016) implements Regulation No. 36/2012 (January 18, 2012), as well as two subsequent Decisions (Decision No. 2011/782/CFSP and Decision No. 2013/255/CFSP), adopted by the EC regarding restrictive measures against Syria and certain persons, entities, and bodies from Syria. Sanctions Decree Central African Republic (AB 2016 No. 55) (on October 26, 2016) implements Regulation No. 224/2014 by the EC of March 10, 2014, regarding restrictive measures against certain persons, entities, and bodies from the Central African Republic; Decision No. 2013/798/CFSP by the EC of December 23, 2013, also concerning restrictive measures against the Central African Republic. Sanctions State Decree Yemen (AB 2017 No. 10) (on March 8, 2017) provides for the freezing of funds or other assets in Aruba that belong directly or indirectly to, are owned by, are in possession of, or are under the control of a natural person, legal entity, or other entity or body mentioned in Annex I of Regulation No. 1352/2014 (December 18, 2014) of the EC and in the Annex of the Decision No. 2014/932 (December 18, 2014) adopted by the EC. Sanctions State Decree Democratic People’s Republic of Korea (AB 2017 No. 42) (on July 18, 2017) implemented UN Resolution No. 1718 (2006), 1874 (2009), 2087 (2013), 2094 (2013), 2270 (2016), 2321 (2016), 2345 (2017), 2356 (2017), Annexes to the Regulation No. 329/2007 (March 27, 2007) of the EC and annexes of the Decision No. 2016/849 adopted by the EC. Sanctions State Decree Cyber-Attacks (AB 2020 No. 125) (on August 28, 2020) implements Regulation No. 2019/796 of the EC of May 17, 2019, and Decision No. 2019/797 of May 17, 2019, concerning restrictive measures against cyber-attacks threatening the EU or its Member States. This State Decree provides for the freezing of all funds or other assets in Aruba, directly or indirectly belonging to, owned, held, or controlled by a natural person, a legal person, entities, or bodies listed in Annex I of Regulation No. 2019/796 and the Annex to Decision No. 2019/797. Sanctions State Decree Human Rights Violations (effective February 19, 2021) (AB 2021 No. 30) implements Regulation No. 2020/1998 of the EC of December 7, 2020, and Decision No. 2020/1999 of December 7, 2020, concerning restrictive measures against serious human rights violations, and it provides for the freezing of all funds or other assets in Aruba, directly or indirectly belonging to, owned, held, or controlled by a natural person, a legal person, entities, or bodies listed in Annex I to Regulation No. 2020/1998 and the Annex to Decision No. 2020/1999.

Sanctions State Decree Chemical Weapons (effective February 19, 2021) (AB 2021 No. 31) implements Regulation No. 2018/1542 of the EC of October 15, 2018, and Decision No. 2018/1544 of October 15, 2018, concerning restrictive measures against the proliferation and use of chemical weapons, and it provides for the freezing of all funds or other assets in Aruba, directly or indirectly belonging to, owned, held, or controlled by a natural person, a legal person,

In response to the Russia’s continuing war of aggression against Ukraine, the Sanctions State Decree Territorial Integrity Ukraine I (AB 2022 No. 47) was adopted and entered into force April 13, 2022. This State Decree implements without delay Regulation (EU) No. 2022/334 and Decision (CFSP) 2022/335 of the EC of February 28, 2022, concerning restrictive measures in view of Russia’s actions destabilizing the situation in Ukraine. Furthermore, on April 13, 2022, the Sanctions State Decree Recognition Donetsk and Luhansk (AB 2022 No. 48) came into force to implement without delay Regulation (EU) No. 2022/263 and Decision (CFSP) 2022/266 of the EC of February 23, 2022, concerning restrictive measures in response to the non-government controlled areas of the Donetsk and Luhansk areas of Ukraine and the ordering of Russian armed forces into those areas.

Exchange tax Yes. A foreign exchange commission of 1.3% applies to all payments by residents to nonresidents, including those made through local banks and foreign accounts. Certain payments, such as those of certain government-related companies, are exempt.

Exchange subsidy No.

Foreign exchange market Yes. The CBA determines the daily foreign exchange rate for the officially quoted foreign currencies, which commercial banks must use when calculating foreign currency cross-rates among themselves and for transactions with residents and nonresidents. If there is a large exchange rate fluctuation of a foreign currency against the US dollar for transactions with a counter value of Afl. 100,000 or more, a commercial bank may request a new exchange rate. The spread between the foreign exchange buying and selling rates may not exceed 2%. The foreign exchange commission is not included in the
bid-ask spreads but is added afterward.

In September 2017, the State Ordinance on the Supervision of Money Transfer Companies (SOSMTC) was amended to extend its supervisory scope to money exchange offices. Money exchange offices may exchange coins or banknotes against other coins or banknotes, or pay out coins or banknotes on presentation of a credit card or payment card or on handing over checks, traveler’s checks, bills of exchange, or postal money orders. They may maintain accounts abroad; however, all resident companies that have a foreign bank account (FBA) or foreign intercompany account (FIA) must notify these to the CBA pursuant to Article 11 of the State Ordinance Foreign Exchange Transactions.

Currently, two money exchange offices and two money transfer companies are in the possession of a registration from the CBA. The register of supervised financial institutions can be found on the CBA’s website.

From April 1, 2015, the State Ordinance on Exchange Rate Margin Compensation CBA requires commercial banks to pay a fee to the CBA on all sales of foreign currency to the public, both cash and noncash, amounting to 3/8% of the florin equivalent of these sales. The CBA will pay a fee to the commercial banks on all purchases of foreign currency from the public, both cash and noncash, amounting to 1/8% of the florin equivalent of these purchases.

The 4 licensed domestic commercial banks and 2 money transfer companies that are in the possession of a registration to conduct money exchanges may conduct foreign exchange transactions with the public. Note that in September 2007, the SOSMTC was amended to extend the scope to money exchange offices. Money exchange offices may exchange coins or banknotes, or pay out coins or banknotes against other coins or banknotes, or pay out coins or banknotes on presentations of a credit card or payment card or on handing over checks, traveler’s checks, bills of exchanges, or portal money orders.

| Allocation | No. |
| Auction | No. |
| Fixing | No. |
| Interbank market | No. |

The CBA deals with local commercial banks within margins of 0.002795% on either side of parity. Depending on banks’ B-9 arrangement, which sets a maximum on the amount of foreign exchange commercial banks may hold (in net foreign assets), they may buy or sell foreign exchange from or to the CBA. The CBA deals directly with the government.

| Over the counter | No. |
| Brokerage | No. |
| Market making | No. |

Banks may trade among themselves; however, in practice, they deal directly with the CBA. The interbank market is not operational. There are no limits on the bid-ask spread and commission of the market participants.
Forward exchange market  No. There is no forward exchange market in Aruba. The CBA does not participate in the forward exchange market.

Official cover of forward operations  No.

### Arrangements for Payments and Receipts

**Prescription of currency requirements**  Yes.

Controls on the use of domestic currency  No.

*For current transactions and payments*  No.

*For capital transactions*  No.

Transactions in capital and money market instruments  No.

Transactions in derivatives and other instruments  No.

Credit operations  No.

Use of foreign exchange among residents  Yes. Legal entities that hold a hotel or a casino license are allowed by law to accept and return change in US dollars and Venezuelan Bolivar. In practice, Venezuelan Bolivar are not accepted.

**Payments arrangements**  No.

Bilateral payments arrangements  No.

*Operative*  No.

*Inoperable*  No.

Regional arrangements  No.

Clearing agreements  No.

Barter agreements and open accounts  No.

**Administration of control**  Yes. The CBA administers foreign exchange control.

**Payments arrears**  No.

Official  No.

Private  No.

**Controls on trade in gold (coins and/or bullion)**  Yes.

On domestic ownership and/or trade  No.

On external trade  Yes. It is prohibited to import and export gold from and to Venezuela.

**Controls on exports and imports of banknotes**  Yes.

On exports  Yes.

*Domestic currency*  Yes. Since March 2021, residents and nonresidents are allowed to export a maximum amount of Afl. 10,000 for travel purposes. Before said date, the export of banknotes and coins was prohibited.

*Foreign currency*  Yes. Exports of foreign banknotes require a license, except for travel purposes (see IV.F.1.a). Imports and exports of foreign currency cash exceeding Afl. 20,000 (approximately US$11,000) must be reported.
to the inspector of Customs and Excise (Paragraph 1, Article 2, of the State Ordinance on Reporting Imports and Exports of Cash).

| On imports | No. |
| Domestic currency | No. |
| Foreign currency | No. |

Imports and exports of foreign currency cash exceeding Afl. 20,000 (approximately US$11,000) must be reported to the inspector of Customs and Excise (Paragraph 1, Article 2, of the State Ordinance on Reporting Imports and Exports of Cash).

**Resident Accounts**

| Foreign exchange accounts permitted | Yes. |
| Held domestically | Yes. |

Residents may open accounts denominated in foreign currency with local banks, provided these accounts are funded with foreign currency. Effective September 1, 2021, all remaining foreign exchange restrictions temporarily imposed because of the COVID-19 pandemic were eliminated and transactions of less than Afl. 300,000 a year or its equivalent in foreign currency for natural persons and Afl. 750,000 a year or its equivalent in foreign currency for legal entities (excluding commercial banks and institutional investors) may be carried out without CBA authorization. These ceilings are applicable to all capital transactions with nonresidents; a special foreign exchange license from the CBA is required for capital transactions exceeding these ceilings. Previously, as part of the gradual easing of temporary foreign exchange restrictions imposed in response to the COVID-19 pandemic, effective August 1, 2021, resident legal entities could make outward intercompany transfers and effective June 1, 2021, resident legal entities could make management fees to nonresident parent company.

Legal entities that have a general foreign exchange license pursuant to the Decree concerning Foreign Exchange Transactions 2013/K.2 and that are included in the CBA’s Quarterly list can make transfers to and from their notified FBAs and/or FIAs without a special foreign exchange license, no matter the amount of the transfer.

Previously, in the context of the measures taken resulting from the impact of COVID-19 pandemic on the economy of Aruba, as of March 17, 2020, the CBA stopped granting any new foreign exchange licenses that relate to outgoing capital transactions. The Notice concerning Foreign Exchange Transactions 2002/K.1 (General Foreign Exchange License) was suspended for all outgoing capital transactions until further notice. Furthermore, the CBA also revoked the general license issued by Notice concerning Foreign Exchange Transaction 02/K.1 for all outgoing capital transactions. This means that the thresholds of Afl. 300,000 a year for resident natural persons and Afl. 750,000 a year for resident legal entities were no longer applicable for outgoing capital transactions. Consequently, no outgoing capital transactions, no matter the amount, were allowed until further notice. In addition, as of March 27, 2020, the general foreign exchange license pursuant to the Decree concerning Foreign Exchange Transactions 2013/K.2 was suspended for all outgoing capital transactions until further notice. Thus, legal entities with such licenses (listed in the CBA’s Quarterly list) could not make any outgoing capital transfers. However, if it was regarding an incoming transfer, then it was allowed no matter the amount, as long as the resident legal entity was included in the Quarterly list.
| Approval required | No. | The local banks must adhere to CBA instructions related to maintaining such accounts at all times. |
| Held abroad | Yes. | Effective August 1, 2021, the Decree concerning Foreign Exchange Transactions 2013/K.2 came into effect again and the temporary foreign exchange restrictions imposed in response to the pandemic were revoked and transfers by resident legal entities to their own bank accounts held abroad were again permitted. Effective June 1, 2021, resident natural persons may make transfers to their own FBAs up to a maximum amount of Afl. 50,000 a year. Accounts of resident companies abroad must be reported to the CBA. Approval is not required, but holders of such accounts must report them to the CBA if they wish to be exempted from the requirement that they collect foreign claims as soon as they fall due and transfer and sell them to a local foreign exchange bank. In the absence of an exemption, payments in foreign exchange to nonresidents must be made from a registered bank account or an account of a foreign bank in the country of the transaction or to a nonresident’s nostro account with the registered bank. Resident companies that have notified the CBA of their foreign accounts and comply with the conditions of the exemption as stipulated in the Decree concerning Foreign Exchange Transactions 2013-O.1 General Exemption may make transfers freely to and from these accounts, based on the Decree concerning Foreign Exchange Transactions 2013/K.2 (General Foreign Exchange License). A general exemption from the provisions of State Ordinance on Foreign Exchange Transactions (SOFET) Articles 11 and 12 applies to residents whose previous exemptions (pursuant to SOFET Articles 16 and 17) were revoked and who reported such bank accounts to the CBA again. Previously, as of March 27, 2020, the general foreign exchange license (pursuant to Decree concerning Foreign Exchange Transactions 2013/K.2) was suspended for all outgoing capital transactions until further notice. Thus, legal entities with such licenses (listed in the CBA’s Quarterly list) were not allowed to make any outgoing capital transfers. However, if it was regarding an incoming transfer, then it was allowed no matter the amount, as long as the resident legal entity was included in the Quarterly list. |
| Accounts in domestic currency held abroad | No. | These accounts are not allowed. |
| Accounts in domestic currency convertible into foreign currency | No. | |

**Nonresident Accounts**

| Foreign exchange accounts permitted | Yes. | Commercial banks are allowed to open, hold, and close foreign currency accounts for nonresidents. The balances may be transferred freely abroad and/or to other nonresident accounts. |
| Approval required | No. | |
| Domestic currency accounts | Yes. | Commercial banks are allowed to open, hold, and close florin accounts for nonresidents. Deposits into these accounts must be made from the proceeds of foreign currency sales or from florins obtained in transactions with residents. The balances may be transferred freely abroad and/or to other nonresident accounts. |
| Convertible into foreign currency | Yes. | Balances in these accounts are fully convertible. |
| Approval required | No. | |
| Blocked accounts | No. | |
Imports and Import Payments

- **Foreign exchange budget**: No.
- **Financing requirements for imports**: No.
- **Minimum financing requirements**: No.
- **Advance payment requirements**: No.
- **Advance import deposits**: No.
- **Documentation requirements for release of foreign exchange for imports**: No.
- **Domiciliation requirements**: No.
- **Preshipment inspection**: No.
- **Letters of credit**: No.
- **Import licenses used as exchange licenses**: No.
- **Other**: No.
- **Import licenses and other nontariff measures**: Yes.
  - **Positive list**: No.
  - **Negative list**: No.
  - **Open general licenses**: No.
  - **Licenses with quotas**: Yes. The import of eggs may be subject to quotas, depending on the domestic supply.
  - **Other nontariff measures**: No.
- **Import taxes and/or tariffs**: Yes. Import taxes range from 0% to 57%, depending on the product.
  - **Taxes collected through the exchange system**: No.
- **State import monopoly**: No.

Exports and Export Proceeds

- **Repatriation requirements**: Yes. Unless exempted, residents are required to surrender export proceeds either by selling them to a domestic commercial bank, against florins, within eight working days of receipt or by depositing them into a foreign exchange account with the CBA or a domestic commercial bank in the name of a resident.
- **Surrender requirements**: Yes.
  - **Surrender to the central bank**: Yes. Unless exempted, residents are required to surrender export proceeds either by selling them to one of the 4 commercial banks in Aruba, against florins, within eight working days of receipt or by depositing them into a foreign exchange account with the CBA or one of the 4 commercial banks in Aruba in the name of a resident.
  - **Surrender to authorized dealers**: Yes. Unless exempted, residents are required to surrender export proceeds either by selling them to a foreign exchange bank, against florins, within eight working days of receipt or by depositing them into a...
foreign exchange account with the CBA or a foreign exchange bank in the name of a resident.

Effective August 1, 2021, the transfer of dividends and profits, to nonresidents was permitted with prior approval from the CBA.

Previously, as of March 17, 2020, in connection with the COVID-19 pandemic, the CBA suspended the granting of new foreign exchange licenses that related to outgoing capital transactions, including dividend payments and profit transfers until further notice. During this period, a resident was not allowed to make a dividend payout or a profit transfer to its foreign shareholder, unless that company was already in the possession of a dividend/profit declaration of the CBA for this transfer prior to the date of the Public Announcement of March 17, 2020.

Effective September 1, 2021, all remaining foreign exchange restrictions temporarily imposed because of the COVID-19 pandemic were eliminated and the Notice concerning Foreign Exchange Transactions 2002/K.1 (General Foreign Exchange License) reinstated. Effective August 1, 2021, the transfer of dividends and
profits to nonresidents was permitted with prior approval from the CBA.

Interest payments may be made on foreign loans with a permit from the CBA. For profits and dividends, financial statements must be submitted to the CBA indicating the amount involved. In the case of depreciation of direct investment, a special foreign exchange license is required for amounts exceeding Afl. 750,000 or its equivalent in foreign currency authorized for legal entities (excluding commercial banks and institutional investors).

Previously, as of March 17, 2020, in connection with the COVID-19 pandemic, the CBA suspended the issuing of new foreign exchange licenses related to outgoing capital transactions, including dividend payments and profit transfers until further notice. This means that a resident is not allowed to make a dividend payout or a profit transfer to its foreign shareholder, unless that company is already in the possession of a dividend/profit declaration of the CBA for this transfer prior to the date of the Public Announcement of March 17, 2020. As a result of this restriction, the thresholds of Afl. 750,000 a year for resident legal entities were not applicable for outgoing capital transactions. Also, no repayments on new loans could be made until the mentioned restrictions were lifted by the CBA, unless the loan in question was granted before March 17, 2020, and the resident had a special foreign exchange license for the loan or made use of the general license applicable to transfers below the thresholds. Then, the repayments and interest payments were allowed.

### Proceeds from Invisible Transactions and Current Transfers

**Repatriation requirements**: Yes. Unless exempted, residents are required to surrender proceeds from invisible transactions either by selling them to one of the 4 commercial banks in Aruba, against florins, within eight working days of receipt or by depositing them into a foreign exchange account with the CBA or one of the 4 commercial banks in Aruba in the name of a resident.

**Surrender requirements**: Yes.

**Surrender to the central bank**: Yes. Unless exempted, residents are required to surrender proceeds from invisible transactions either by selling them to one of the 4 commercial banks in Aruba, against florins, within eight working days of receipt or by depositing them into a foreign exchange account with the CBA or one of the 4 commercial banks in Aruba in the name of a resident.

**Surrender to authorized dealers**: Yes. Unless exempted, residents are required to surrender proceeds from invisible transactions either by selling them to one of the 4 commercial banks in Aruba, against florins, within eight working days of receipt or by depositing them into a foreign exchange account with the CBA or one of the 4 commercial banks in Aruba in the name of a resident.

**Restrictions on use of funds**: No.

### Capital Transactions

**Controls on capital transactions**: Yes. Transactions of less than Afl. 300,000 a year or its equivalent in foreign currency for natural persons and Afl. 750,000 a year or its equivalent in foreign currency for legal entities (excluding commercial banks and institutional investors) may be carried out without CBA authorization. These ceilings are applicable to all capital transactions with nonresidents; a special foreign exchange license from the CBA is required for capital transactions exceeding these ceilings.

**Repatriation requirements**: Yes. The CBA may require the divestment, repatriation, and surrender to the CBA of proceeds from direct investment by residents abroad. Unless exempt, residents are required to surrender proceeds from capital transactions either by selling them to one of the 4 commercial banks in Aruba, against florins, within eight working days of receipt or by depositing them into a foreign exchange account with the CBA or one of the 4 commercial banks in Aruba in the name of a resident.

**Surrender requirements**: Yes. Unless exempt, residents are required to surrender proceeds from capital transactions either by selling them to one of the 4 commercial banks in Aruba, against florins, within eight working days of receipt or by depositing them into a foreign exchange account with the CBA or one of the 4 commercial banks in Aruba in the name of a resident.

**Surrender to the central bank**: Yes. Unless exempt, residents are required to surrender proceeds from capital transactions either by selling them to one of the 4 commercial banks in Aruba, against florins, within eight working days of receipt or by depositing them into a foreign exchange account with the CBA or one of the 4 commercial banks in Aruba in the name of a resident.
Surrender to authorized dealers  Yes.

Surrender to authorized dealers

Unless exempt, residents are required to surrender proceeds from capital transactions either by selling them to one of the 4 commercial banks in Aruba, against florins, within eight working days of receipt or by depositing them into a foreign exchange account with the CBA or one of the 4 commercial banks in Aruba in the name of a resident.

Controls on capital and money market instruments  Yes.

Controls on capital and money market instruments

There are controls on all these transactions. Residents must apply for a special foreign exchange license to effect capital transactions if the amount involved exceeds Afl. 300,000 a year or its equivalent in foreign currency for natural persons and Afl. 750,000 a year or its equivalent in foreign currency for legal entities (see subcategories below).

On capital market securities  Yes.

On capital market securities

Capital transactions with nonresidents by natural persons require a special foreign exchange license if the amount of the transaction exceeds Afl. 300,000 a year or its equivalent in foreign currency. For legal entities, a license is required if the amount involved exceeds Afl. 750,000 a year.

Shares or other securities of a participating nature  Yes.

Shares or other securities of a participating nature

Capital transactions with nonresidents by natural persons require a special foreign exchange license if the amount of the transaction exceeds Afl. 300,000 a year or its equivalent in foreign currency. For legal entities, a license is required if the amount involved exceeds Afl. 750,000 a year.

Purchase locally by nonresidents  Yes.

Purchase locally by nonresidents

Effective September 1, 2021, all remaining foreign exchange restrictions temporarily imposed because of the COVID-19 pandemic were eliminated and the Notice concerning Foreign Exchange Transactions 2002/K.1 (General Foreign Exchange License) reinstated. Capital transactions with nonresidents require a special foreign exchange license if the amount of the transaction exceeds Afl. 300,000 by natural persons and Afl. 750,000 by legal entities or its equivalent in foreign currency a year. Previously, as of March 17, 2020, in response to the COVID-19 pandemic, the CBA temporarily suspended the granting of any new foreign exchange licenses that relate to outgoing capital transactions and revoked the general license issued by Notice concerning Foreign Exchange Transaction 02/K.1 for all outgoing capital transactions. This means that the thresholds of Afl. 300,000 a year for resident natural persons and Afl. 750,000 a year for resident legal entities were no longer applicable for outgoing capital transactions. Consequently, no outgoing capital transactions, no matter the amount, were allowed until further notice. These restrictions applied to nonresidents and new nonresident investors who wanted to liquidate their investments in Aruba and repatriate their capital overseas if the investors sell these investments to residents. Such transfers would again be possible when the foreign exchange restrictions have been lifted by the CBA. However, if the nonresident investor sold its investment to another nonresident, the foreign exchange measures were not applicable. Also, nonresident investments into Aruba were not affected and permitted as before.

Sale or issue locally by nonresidents  Yes.

Sale or issue locally by nonresidents

Effective September 1, 2021, all remaining foreign exchange restrictions temporarily imposed because of the COVID-19 pandemic were eliminated and the Notice concerning Foreign Exchange Transactions 2002/K.1 (General Foreign Exchange License) reinstated. Based on a general foreign exchange license, natural persons and legal entities, respectively, may execute capital transactions with nonresidents up to a maximum of Afl. 300,000 and Afl. 750,000 or its equivalent in foreign currency a year. A special foreign exchange license is required for amounts above aforementioned limits.

Previously, as of March 17, 2020, in response to the COVID-19 pandemic, the CBA temporarily suspended the granting of any new foreign exchange licenses that relate to outgoing capital transactions.
and revoked the general license issued by Notice concerning Foreign Exchange Transaction 02/K.1 for all outgoing capital transactions. This means that the thresholds of Afl. 300,000 a year for resident natural persons and Afl. 750,000 a year for resident legal entities were no longer applicable for outgoing capital transactions. Consequently, no outgoing capital transactions, no matter the amount, were allowed until further notice.

Effective September 1, 2021, all remaining foreign exchange restrictions temporarily imposed because of the COVID-19 pandemic were eliminated and the Notice concerning Foreign Exchange Transactions 2002/K.1 (General Foreign Exchange License) reinstated. Based on a general foreign exchange license, natural persons and legal entities, respectively, may execute capital transactions with nonresidents up to a maximum of Afl. 300,000 and Afl. 750,000 or its equivalent in foreign currency a year. A special foreign exchange license is required for amounts above aforementioned limits.

Effective August 1, 2021, the public announcement of March 27, 2020, was revoked, and Decree 2013/K.2 reinstated, thereby permitting certain capital transfers abroad. Legal entities included in the CBA’s Quarterly list can make transfers to and from their notified FBAs and/or FIAS without a special foreign exchange license, no matter the amount of the transfer. Previously, from March 27, 2020, onwards, the general foreign exchange license pursuant to the Decree concerning Foreign Exchange Transactions 2013/K.2 was suspended for all outgoing capital transactions. Thus, legal entities with such licenses (listed in the CBA’s Quarterly list) could not make any outgoing capital transfers. Effective June 1, 2021, pension funds and insurance companies under the supervision of the CBA were allowed to make investments abroad up to a maximum amount of Afl. 5 million a calendar year.

Effective September 1, 2021, all remaining foreign exchange restrictions temporarily imposed because of the COVID-19 pandemic were eliminated and the Notice concerning Foreign Exchange Transactions 2002/K.1 (General Foreign Exchange License) reinstated. Based on a general foreign exchange license, natural persons and legal entities, respectively, may execute capital transactions with nonresidents up to a maximum of Afl. 300,000 and Afl. 750,000 or its equivalent in foreign currency a year. A special foreign exchange license is required for amounts above aforementioned limits. Previously, as of March 17, 2020, in response to the COVID-19 pandemic, the CBA temporarily suspended the granting of any new foreign exchange licenses that relate to outgoing capital transactions and revoked the general license issued by Notice concerning Foreign Exchange Transaction 02/K.1 for all outgoing capital transactions. This means that the thresholds of Afl. 300,000 a year for resident natural persons and Afl. 750,000 a year for resident legal entities were no longer applicable for outgoing capital transactions. Consequently, no outgoing capital transactions, no matter the amount, were allowed until further notice. Inward capital transactions were not affected and were permitted as before.

Effective September 1, 2021, all remaining foreign exchange restrictions temporarily imposed because of the COVID-19 pandemic were eliminated and the Notice concerning Foreign Exchange Transactions 2002/K.1 (General Foreign Exchange License) reinstated. Capital transactions with nonresidents require a special foreign exchange license if the amount of the transaction exceeds Afl. 300,000 by natural persons and Afl. 750,000 by legal entities or
its equivalent in foreign currency a year. There is no minimum holding period requirements for purchases of bonds. Previously, as of March 17, 2020, in response to the COVID-19 pandemic, the CBA temporarily suspended the granting of any new foreign exchange licenses that relate to outgoing capital transactions and revoked the general license issued by Notice concerning Foreign Exchange Transaction 02/K.1 for all outgoing capital transactions. This means that the thresholds of Afl. 300,000 a year for resident natural persons and Afl. 750,000 a year for resident legal entities were no longer applicable for outgoing capital transactions. Consequently, no outgoing capital transactions, no matter the amount, were allowed until further notice. These restrictions applied to nonresidents and new nonresident investors who wanted to liquidate their investments in Aruba and repatriate their capital overseas if the investors sell these investments to residents. Such transfers would again be possible when the foreign exchange restrictions have been lifted by the CBA. However, if the nonresident investor sold its investment to another nonresident, the foreign exchange measures were not applicable. Also, nonresident investments into Aruba were not affected and permitted as before.

**Sale or issue locally by nonresidents** Yes.

Effective September 1, 2021, all remaining foreign exchange restrictions temporarily imposed because of the COVID-19 pandemic were eliminated and the Notice concerning Foreign Exchange Transactions 2002/K.1 (General Foreign Exchange License) reinstated. Based on a general foreign exchange license, natural persons and legal entities, respectively, may execute capital transactions with nonresidents up to a maximum of Afl. 300,000 and Afl. 750,000 or its equivalent in foreign currency a year. A special foreign exchange license is required for amounts above aforementioned limits. Consequently, no outgoing capital transactions, no matter the amount, were allowed until further notice.

**Sale or issue abroad by residents** Yes. Effective September 1, 2021, all remaining foreign exchange restrictions temporarily imposed because of the COVID-19 pandemic were eliminated and the Notice concerning Foreign Exchange Transactions 2002/K.1 (General Foreign Exchange License) reinstated. Based on a general foreign exchange license, natural persons and legal entities, respectively, may execute capital transactions with nonresidents up to a maximum of Afl. 300,000 and Afl. 750,000 or its equivalent in foreign currency a year. A special foreign exchange license is required for amounts above aforementioned limits.

Previously, as of March 17, 2020, in response to the COVID-19 pandemic, the CBA temporarily suspended the granting of any new foreign exchange licenses that relate to outgoing capital transactions and revoked the general license issued by Notice concerning Foreign Exchange Transaction 02/K.1 for all outgoing capital transactions. This means that the thresholds of Afl. 300,000 a year for resident natural persons and Afl. 750,000 a year for resident legal entities were no longer applicable for outgoing capital transactions. Consequently, no outgoing capital transactions, no matter the amount, were allowed until further notice. Inward capital transactions were not affected and were permitted as before.

**On money market instruments** Yes. Effective September 1, 2021, all remaining foreign exchange restrictions temporarily imposed because of the COVID-19 pandemic were eliminated and the Notice concerning Foreign Exchange Transactions 2002/K.1 (General Foreign Exchange License) reinstated. Capital transactions with nonresidents require a special foreign exchange license if the amount of the transaction exceeds Afl. 300,000 by natural persons and Afl. 750,000 by legal entities or its equivalent in foreign currency a year. Previously, as of March 17, 2020, in response to the COVID-19 pandemic, the CBA temporarily suspended the granting of any new foreign exchange licenses that relate to outgoing capital transactions and revoked the general license issued by Notice concerning Foreign Exchange Transaction 02/K.1 for all outgoing capital transactions. This means that the thresholds of Afl. 300,000 a year for resident natural persons and Afl. 750,000 a year for resident legal entities were no longer applicable for outgoing capital transactions. Consequently, no outgoing capital transactions, no matter the amount, were allowed until further notice. These restrictions applied to nonresidents and new nonresident investors who wanted to liquidate their investments in Aruba and repatriate their capital overseas if the investors sell these investments to residents. Such transfers would again be possible when the foreign exchange restrictions have been lifted by the CBA. However, if the nonresident investor sold its investment to another nonresident, the foreign exchange measures were not applicable. Also, nonresident

**Purchase locally by nonresidents** Yes.
investments into Aruba were not affected and permitted as before. Effective September 1, 2021, all remaining foreign exchange restrictions temporarily imposed because of the COVID-19 pandemic were eliminated and the Notice concerning Foreign Exchange Transactions 2002/K.1 (General Foreign Exchange License) reinstated. Based on a general foreign exchange license, natural persons and legal entities, respectively, may execute capital transactions with nonresidents up to a maximum of Afl. 300,000 and Afl. 750,000 or its equivalent in foreign currency a year. A special foreign exchange license is required for amounts above aforementioned limits. Previously, as of March 17, 2020, in response to the COVID-19 pandemic, the CBA temporarily suspended the granting of any new foreign exchange licenses that relate to outgoing capital transactions and revoked the general license issued by Notice concerning Foreign Exchange Transaction 02/K.1 for all outgoing capital transactions. This means that the thresholds of Afl. 300,000 a year for resident natural persons and Afl. 750,000 a year for resident legal entities were no longer applicable for outgoing capital transactions. Consequently, no outgoing capital transactions, no matter the amount, were allowed until further notice.

Effective August 1, 2021, the public announcement of March 27, 2020, was revoked, and Decree 2013/K.2 reinstated thereby permitting certain capital transfers abroad. Legal entities included in the CBA’s Quarterly list can make transfers to and from their notified FBAs and/or FIAIs without a special foreign exchange license, no matter the amount of the transfer. Previously, as of March 27, 2020, the general foreign exchange license pursuant to the Decree concerning Foreign Exchange Transactions 2013/K.2 was suspended for all outgoing capital transactions. Thus, legal entities with such licenses (listed in the CBA’s Quarterly list) could not make any outgoing capital transfers. Effective June 1, 2021, pension funds and insurance companies under the supervision of the CBA were allowed to make investments abroad up to a maximum amount of Afl. 5 million a calendar year.

Previously, as of March 17, 2020, in response to the COVID-19 pandemic, the CBA temporarily suspended the granting of any new foreign exchange licenses that relate to outgoing capital transactions and revoked the general license issued by Notice concerning Foreign Exchange Transaction 02/K.1 for all outgoing capital transactions. Consequently, no outgoing capital transactions, no matter the amount, were allowed until further notice.

**Sale or issue abroad by residents**

Effective September 1, 2021, all remaining foreign exchange restrictions temporarily imposed because of the COVID-19 pandemic were eliminated and the Notice concerning Foreign Exchange Transactions 2002/K.1 (General Foreign Exchange License) reinstated. Based on a general foreign exchange license, natural persons and legal entities, respectively, may execute capital transactions with nonresidents up to a maximum of Afl. 300,000 and Afl. 750,000 or its equivalent in foreign currency a year. A special foreign exchange license is required for amounts above aforementioned limits. Previously, as of March 17, 2020, in response to the COVID-19 pandemic, the CBA temporarily suspended the granting of any new foreign exchange licenses that relate to outgoing capital transactions and revoked the general license issued by Notice concerning Foreign Exchange Transaction 02/K.1 for all outgoing capital transactions. This means that the thresholds of Afl. 300,000 a year for resident natural persons and Afl. 750,000 a year for resident legal entities were no longer applicable for outgoing capital transactions. Consequently, no outgoing capital transactions, no matter the amount, were allowed until further notice. Inward capital transactions were not affected and were permitted as before.

**Controls on credit operations**

Capital transactions with nonresidents by natural persons require a special foreign exchange license if the amount of the transaction exceeds Afl. 300,000 a year or its equivalent in foreign currency. For legal entities, a license is required if the amount involved exceeds Afl. 750,000 a year.

**Commercial credits**

Effective September 1, 2021, all remaining foreign exchange restrictions temporarily imposed because of the COVID-19 pandemic were eliminated and the Notice concerning Foreign Exchange Transactions 2002/K.1 (General Foreign Exchange License) reinstated. Based on a general foreign exchange license, natural persons and legal entities, respectively, may execute capital transactions with nonresidents up to a maximum of Afl. 300,000 and Afl. 750,000 or its equivalent in foreign currency a year. A special foreign exchange license is required for amounts above aforementioned limits.
Previously, as of March 17, 2020, in response to the COVID-19 pandemic the CBA temporarily suspended the granting of any new foreign exchange licenses that relate to outgoing capital transactions and revoked the general license issued by Notice concerning Foreign Exchange Transaction 02/K.1 for all outgoing capital transactions. This means that the thresholds of Afl. 300,000 a year for resident natural persons and Afl. 750,000 a year for resident legal entities were no longer applicable for outgoing capital transactions. Consequently, no outgoing capital transactions, no matter the amount, were allowed until further notice. Hence, commercial credits by residents to nonresidents were not allowed until further notice.

Effective August 1, 2021, the public announcement of March 27, 2020, was revoked, and Decree 2013/K.2 reinstated thereby permitting certain capital transfers abroad. Legal entities included in the CBA’s Quarterly list can make transfers to and from their notified FBAs and/or FIAs without a special foreign exchange license, no matter the amount of the transfer. Previously, as of March 27, 2020, the general foreign exchange license pursuant to the Decree concerning Foreign Exchange Transactions 2013/K.2 was suspended for all outgoing capital transactions. Thus, legal entities with such licenses (listed in the CBA’s Quarterly list) may not make any outgoing credit to notified FIAs.

Effective September 1, 2021, all remaining foreign exchange restrictions temporarily imposed because of the COVID-19 pandemic were eliminated and the Notice concerning Foreign Exchange Transactions 2002/K.1 (General Foreign Exchange License) reinstated. Based on a general foreign exchange license, natural persons and legal entities, respectively, may execute capital transactions with nonresidents up to a maximum of Afl. 300,000 and Afl. 750,000 or its equivalent in foreign currency a year. A special foreign exchange license is required for amounts above aforementioned limits. Previously, residents were allowed to receive loans from nonresidents; however, as of March 17, 2020, because of the foreign exchange restrictions in place, no repayments of the loan and interest payments could be made until the mentioned restrictions were lifted by the CBA, unless the loan in question was granted before March 17, 2020, and the resident had a special foreign exchange license for the loan or made use of the general license applicable to transfers below the thresholds. Then, the repayments and interest payments were allowed. The CBA did not want residents to default.
were no longer applicable for outgoing capital transactions. Consequently, no outgoing capital transactions, no matter the amount, were allowed until further notice. Hence, credits by residents to nonresidents were not allowed until further notice.

Effective August 1, 2021, the public announcement of March 27, 2020, was revoked, and Decree 2013/K.2 reinstated thereby permitting certain capital transfers abroad. Then, the repayments and interest payments are allowed. The CBA does not want residents to default.

Guarantees, sureties, and financial backup facilities

By residents to nonresidents

Yes. Effective September 1, 2021, all remaining foreign exchange restrictions temporarily imposed because of the COVID-19 pandemic were eliminated and the Notice concerning Foreign Exchange Transactions 2002/K.1 (General Foreign Exchange License) reinstated. Based on a general foreign exchange license, natural persons and legal entities, respectively, may execute capital transactions with nonresidents up to a maximum of Afl. 300,000 and Afl. 750,000 or its equivalent in foreign currency a year. A special foreign exchange license is required for amounts above aforementioned limits. Previously, as of March 17, 2020, in response to the COVID-19 pandemic, the CBA temporarily suspended the granting of any new foreign exchange licenses that relate to outgoing capital transactions and revoked the general license issued by Notice concerning Foreign Exchange Transaction 02/K.1 for all outgoing capital transactions. Consequently, under the temporary foreign exchange restrictions in place, the CBA would only grant a foreign exchange license for a guarantee if it was directly related to an inflow of foreign funds.

To residents from nonresidents

Yes. Effective September 1, 2021, all remaining foreign exchange restrictions temporarily imposed because of the COVID-19 pandemic were eliminated and the Notice concerning Foreign Exchange Transactions 2002/K.1 (General Foreign Exchange License) reinstated. Based on a general foreign exchange license, natural
persons and legal entities, respectively, may execute capital transactions with nonresidents up to a maximum of Afl. 300,000 and Afl. 750,000 or its equivalent in foreign currency a year. A special foreign exchange license is required for amounts above aforementioned limits. Previously, as of March 17, 2020, in response to the COVID-19 pandemic, the CBA temporarily suspended the granting of any new foreign exchange licenses that relate to outgoing capital transactions and revoked the general license issued by Notice concerning Foreign Exchange Transaction 02/K.1 for all outgoing capital transactions.

</tbody>
</table>

**Outward direct investment**

Effective September 1, 2021, all remaining foreign exchange restrictions temporarily imposed because of the COVID-19 pandemic were eliminated and the Notice concerning Foreign Exchange Transactions 2002/K.1 (General Foreign Exchange License) reinstated. Based on a general foreign exchange license, natural persons and legal entities, respectively, may execute capital transactions with nonresidents up to a maximum of Afl. 300,000 and Afl. 750,000 or its equivalent in foreign currency a year. A special foreign exchange license is required for amounts above aforementioned limits.

Effective August 1, 2021, participation of residents in a foreign company was permitted and required a license from the CBA above the threshold of Afl. 300,000 for natural persons and Afl. 750,000 for entities.

Effective June 1, 2021, pension funds and insurance companies under the supervision of the CBA were allowed to make investments abroad up to a maximum amount of Afl. 5 million a calendar year. Previously, as of March 17, 2020, in response to the COVID-19 pandemic, the CBA temporarily suspended the granting of any new foreign exchange licenses that relate to outgoing capital transactions and revoked the general license issued by Notice concerning Foreign Exchange Transaction 02/K.1 for all outgoing capital transactions. This means that the thresholds of Afl. 300,000 a year for resident natural persons and Afl. 750,000 a year for resident legal entities were no longer applicable for outgoing capital transactions. Consequently, no outgoing capital transactions, no matter the amount, were allowed.

**Inward direct investment**

Transactions by natural persons with nonresidents related to inward direct investment require a special foreign exchange license for amounts exceeding Afl. 300,000 a year or its equivalent in foreign currency. Legal entities must have a license if the amount involved exceeds Afl. 750,000 a year.

**Controls on liquidation of direct investment**

Effective September 1, 2021, all remaining foreign exchange restrictions temporarily imposed because of the COVID-19 pandemic were eliminated and the Notice concerning Foreign Exchange Transactions 2002/K.1 (General Foreign Exchange License) reinstated. Based on a general foreign exchange license, natural persons and legal entities, respectively, may execute capital transactions with nonresidents related to the liquidation of direct investment up to a maximum of Afl. 300,000 and Afl. 750,000 or its equivalent in foreign currency a year. A special foreign exchange license is required for amounts above aforementioned limits.

Previously, as of March 17, 2020, in response to the COVID-19 pandemic the CBA temporarily suspended the granting of any new foreign exchange licenses that relate to outgoing capital transactions and revoked the general license issued by Notice concerning Foreign Exchange Transaction 02/K.1 for all outgoing capital transactions. This means that the thresholds of Afl. 300,000 a year for resident
natural persons and Afl. 750,000 a year for resident legal entities were no longer applicable for outgoing capital transactions. Consequently, no outgoing capital transactions, no matter the amount, were allowed until further notice. These restrictions applied to nonresidents and new nonresident investors who wanted to liquidate their direct investments in Aruba and repatriate their capital overseas if the investors sell these investments to residents. Such transfers would again be possible when the foreign exchange restrictions have been lifted by the CBA. However, if the nonresident investor sold its investment to another nonresident, the foreign exchange measures were not applicable.

**Controls on real estate transactions**
Yes.

**Purchase abroad by residents**
Yes. Effective September 1, 2021, all remaining foreign exchange restrictions temporarily imposed because of the COVID-19 pandemic were eliminated and based on a general foreign exchange license (Notice concerning Foreign Exchange Transaction 02/K.1) natural persons are allowed to execute capital transactions up to a maximum of Afl. 300,000 a calendar year and legal entities up to a maximum amount Afl. 750,000 a calendar year without a special foreign exchange license. A special foreign exchange license is required for transactions above aforementioned thresholds. Legal entities that have a general foreign exchange license pursuant to the Decree concerning Foreign Exchange Transactions 2013/K.2 and that are included in the CBA’s Quarterly list can make transfers to and from their notified FBAs and/or FIAs without a special foreign exchange license, no matter the amount of the transfer.

Previously, effective June 1, 2021, transfers to nonresidents related to real estate transactions were allowed again, but a foreign exchange license was required. Prior to that, in response to the COVID-19 pandemic, temporary measures with respect to outgoing capital transfers were taken such that as of March 17, 2020, the CBA would not grant any new foreign exchange licenses that relate to outgoing capital transactions and revoked the general license issued by Notice concerning Foreign Exchange Transaction 02/K.1 for all outgoing capital transactions. This meant that the thresholds of Afl. 300,000 a year for resident natural persons and Afl. 750,000 a year for resident legal entities were no longer applicable for outgoing capital transactions. Consequently, no outgoing capital transactions, no matter the amount, were allowed until further notice.

In addition, previously, as of March 27, 2020, the general foreign exchange license (pursuant to Decree concerning Foreign Exchange Transactions 2013/K.2) was suspended for all outgoing capital transactions until further notice. Thus, legal entities with such licenses (listed in the CBA’s Quarterly list) may not make any outgoing capital transfers.

**Purchase locally by nonresidents**
Yes. Capital transactions with nonresidents by natural persons require a special foreign exchange license if the amount of the transaction exceeds Afl. 300,000 a year or its equivalent in foreign currency. For legal entities, a license is required if the amount involved exceeds Afl. 750,000 a year.

**Sale locally by nonresidents**
Yes. Effective September 1, 2021, all remaining foreign exchange restrictions temporarily imposed because of the COVID-19 pandemic were eliminated and based on a general foreign exchange license (Notice concerning Foreign Exchange Transaction 02/K.1), natural persons are allowed to execute capital transactions up to a maximum of Afl. 300,000 a calendar year and legal entities up to a maximum amount Afl. 750,000 a calendar year without a special foreign exchange license.
A special foreign exchange license is required for transactions above aforementioned thresholds. Previously, effective June 1, 2021, transfers to nonresidents related to real estate transactions were allowed again, but a foreign exchange license was required. Effective June 1, 2021, the monies parked by notaries in their third-party bank account related to the sale of real estate by nonresident to resident that took place after March 31, 2021, could be released to the nonresident sellers. Effective May 7, 2021, the monies parked by notaries in their third-party bank account related to the sale of real estate by nonresident to resident as per March 31, 2021, could be released to the nonresident sellers. Effective April 20, 2021, the monies parked by notaries in their third-party bank account related to the sale of real estate by nonresident to resident as per December 31, 2020, could be released to the nonresident sellers. Prior to that, in response to the COVID-19 pandemic, temporary measures with respect to outgoing capital transfers were taken such that as of March 17, 2020, the CBA would not grant any new foreign exchange licenses that relate to outgoing capital transactions and revoked the general license issued by Notice concerning Foreign Exchange Transaction 02/K.1 for all outgoing capital transactions. These restrictions applied to nonresidents investors who wanted to liquidate their investments in Aruba and repatriate their capital overseas if the investors sell these investments to residents. In the case that a nonresident agreed to sell his house to a resident under the condition that the proceeds of the sale would stay on the third-party bank account of the notary’s office in Aruba until the foreign exchange restrictions have been lifted by the CBA, the CBA would allow such transactions by granting a foreign exchange license. However, if the nonresident investor sold its investment to another nonresident, then the mentioned foreign exchange restrictions were not applicable.

**Controls on personal capital transactions**  Yes.

Certain personal capital transactions, such as loans to or settlement of debt with nonresidents by natural persons, require a special foreign exchange license if the amount of the transaction exceeds Afl. 300,000 a year or its equivalent in foreign currency.

**Loans**  Yes.

**By residents to nonresidents**  Yes.

Effective September 1, 2021, all remaining foreign exchange restrictions temporarily imposed because of the COVID-19 pandemic were eliminated and the Notice concerning Foreign Exchange Transactions 2002/K.1 (General Foreign Exchange License) reinstated. Based on a general foreign exchange license, natural person may execute capital transactions with nonresidents up to a maximum of Afl. 300,000 or its equivalent in foreign currency a year. A special foreign exchange license is required for amounts above the aforementioned limit. Previously, as of March 17, 2020, in response to the COVID-19 pandemic, the CBA temporarily suspended granting of any new foreign exchange licenses that relate to outgoing capital transactions; hence, loans by residents to nonresidents were not allowed until further notice.

**To residents from nonresidents**  Yes.

Effective September 1, 2021, all remaining foreign exchange restrictions temporarily imposed because of the COVID-19 pandemic were eliminated and the Notice concerning Foreign Exchange Transactions 2002/K.1 (General Foreign Exchange License) reinstated. Based on a general foreign exchange license, natural person may execute capital transactions with nonresidents up to a maximum of Afl. 300,000 or its equivalent in foreign currency a year. A special foreign exchange license is required for amounts above the aforementioned limit. Previously, residents were allowed to receive loans from nonresidents; however, as of March 17, 2020, because of the foreign exchange restrictions in place, no repayments of the loan

and interest payments could be made until the mentioned restrictions have been lifted by the CBA, unless the loan in question has been granted before March 17, 2020, and the resident has a special foreign exchange license for the loan or made use of the general license applicable to transfers below the thresholds. Then, the repayments and interest payments were allowed. The CBA did not want its residents to default.

Effective June 1, 2021, the temporary restrictions on gifts and donations were eliminated and a foreign exchange license is required for amounts above the thresholds of Afl. 300,000 for natural persons and Afl. 750,000 for legal entities. Inheritances are considered as capital transactions no matter the amount and therefore a foreign exchange license is always required.

Previously, as of March 17, 2020, in response to the COVID-19 pandemic, the CBA temporarily suspended the granting of any new foreign exchange licenses that relate to outgoing capital transactions and revoked the general license issued by Notice concerning Foreign Exchange Transaction 02/K.1 for all outgoing capital transactions. This means that the thresholds of Afl. 300,000 a year for resident natural persons and Afl. 750,000 a year for resident legal entities were no longer applicable for outgoing capital transactions. Consequently, no outgoing capital transactions, no matter the amount, were allowed.

| To residents from nonresidents | Yes. |

If the amount is below the thresholds of Afl. 300,000 for natural persons, then no foreign exchange license is required. However, if the incoming gift amount is above the mentioned threshold, then a foreign exchange license is required.

| Settlement of debts abroad by immigrants | Yes. |

Effective September 1, 2021, all remaining foreign exchange restrictions temporarily imposed because of the COVID-19 pandemic were eliminated and the Notice concerning Foreign Exchange Transactions 2002/K.1 (General Foreign Exchange License) reinstated. Based on a general foreign exchange license, natural person may execute capital transactions with nonresidents up to a maximum of Afl. 300,000 or its equivalent in foreign currency a year. A special foreign exchange license is required for amounts above the aforementioned limit.

Previously, as of March 17, 2020, because of the temporary foreign exchange restrictions in place, no repayments of the loan and interest payments could be made until the mentioned restrictions have been lifted by the CBA, unless the loan in question has been granted before March 17, 2020; then, the debt could be continued to be serviced according to the loan repayment schedule, thereby preventing a default situation vis-à-vis a foreign loan.

Investment-related payments

Prior approval
08/01/2021
The transfer of dividends and profits to nonresidents was permitted with prior approval from the Central Bank of Aruba.

Indicative limits/bona fide test
08/01/2021
The transfer of dividends and profits to nonresidents was permitted with prior approval from the Central Bank of Aruba (CBA). For profits and dividends, financial statements must be submitted to the CBA indicating the amount involved.

09/01/2021
All remaining foreign exchange restrictions temporarily imposed because of the COVID-19 pandemic were eliminated, and the Notice concerning Foreign Exchange Transactions 2002/K.1 (General Foreign Exchange License) reinstated.

Capital Transactions

Controls on capital transactions
Controls on capital and money market instruments
On capital market securities
Shares or other securities of a participating nature
Purchase locally by nonresidents
09/01/2021
All remaining foreign exchange restrictions temporarily imposed because of the COVID-19 pandemic were eliminated, and the Notice concerning Foreign Exchange Transactions 2002/K.1 (General Foreign Exchange License) reinstated. Capital transactions with nonresidents require a special foreign exchange license if the amount of the transaction exceeds Afl. 300,000 by natural persons and Afl. 750,000 by legal entities or its equivalent in foreign currency a year. Previously, as of March 17, 2020, in response to the COVID-19 pandemic, the Central Bank of Aruba (CBA) temporarily suspended the granting of any new foreign exchange licenses that relate to outgoing capital transactions and revoked the general license issued by Notice concerning Foreign Exchange Transaction 02/K.1 for all outgoing capital transactions. This means that the thresholds of Afl. 300,000 a year for resident natural persons and Afl. 750,000 a year for resident legal entities were no longer applicable for outgoing capital transactions. Consequently, no outgoing capital transactions, no matter the amount, were allowed until further notice. These restrictions applied to nonresidents and new nonresident investors who wanted to liquidate their investments in Aruba and repatriate their capital overseas if the investors sell these investments to
residents. Such transfers would again be possible when the foreign exchange restrictions have been lifted by the CBA. However, if the nonresident investor sold its investment to another nonresident, the foreign exchange measures were not applicable. Also, nonresident investments into Aruba were not affected and permitted as before.

Sale or issue locally by nonresidents

09/01/2021

All remaining foreign exchange restrictions temporarily imposed because of the COVID-19 pandemic were eliminated, and the Notice concerning Foreign Exchange Transactions 2002/K.1 (General Foreign Exchange License) reinstated. Based on a general foreign exchange license, natural persons and legal entities, respectively, may execute capital transactions with nonresidents up to a maximum of Afl. 300,000 and Afl. 750,000 or its equivalent in foreign currency a year. A special foreign exchange license is required for amounts above aforementioned limits.

Purchase abroad by residents

06/01/2021

Pension funds and insurance companies under the supervision of the Central Bank of Aruba were allowed to make investments abroad up to a maximum amount of Afl. 5 million a calendar year.

08/01/2021

The public announcement of March 27, 2020, was revoked, and Decree 2013/K.2 reinstated, thereby permitting certain capital transfers abroad.

09/01/2021

All remaining foreign exchange restrictions temporarily imposed because of the COVID-19 pandemic were eliminated, and the Notice concerning Foreign Exchange Transactions 2002/K.1 (General Foreign Exchange License) reinstated. Based on a general foreign exchange license, natural persons and legal entities, respectively, may execute capital transactions with nonresidents up to a maximum of Afl. 300,000 and Afl. 750,000 or its equivalent in foreign currency a year. A special foreign exchange license is required for amounts above aforementioned limits.

Sale or issue abroad by residents

09/01/2021

All remaining foreign exchange restrictions temporarily imposed because of the COVID-19 pandemic were eliminated, and the Notice concerning Foreign Exchange Transactions 2002/K.1 (General Foreign Exchange License) reinstated. The public announcement of March 27, 2020, was revoked, and Decree 2013/K.2 reinstated thereby permitting certain capital transfers abroad.

All remaining foreign exchange restrictions temporarily imposed because of the COVID-19 pandemic were eliminated and the Notice concerning Foreign Exchange Transactions 2002/K.1 (General Foreign Exchange License) reinstated. Based on a general foreign exchange license, natural persons and legal entities, respectively, may execute capital transactions with nonresidents up to a maximum of Afl. 300,000 and Afl. 750,000 or its equivalent in foreign currency a year. A special foreign exchange license is required for amounts above aforementioned limits.

All remaining foreign exchange restrictions temporarily imposed because of the COVID-19 pandemic were eliminated and the Notice concerning Foreign Exchange Transactions 2002/K.1 (General Foreign Exchange License) reinstated. Capital transactions with nonresidents require a special foreign exchange license if the amount of the transaction exceeds Afl. 300,000 by natural persons and Afl. 750,000 by legal entities or its equivalent in foreign currency a year. Previously, as of March 17, 2020, in response to the COVID-19 pandemic, the Central Bank of Aruba (CBA) temporarily suspended the granting of any new foreign exchange licenses that relate to outgoing capital transactions and revoked the general license issued by Notice concerning Foreign Exchange Transaction 02/K.1 for all outgoing capital transactions. This means that the thresholds of Afl. 300,000 a year for resident natural persons and Afl. 750,000 a year for resident legal entities were no longer applicable for outgoing capital transactions. Consequently, no outgoing capital transactions, no matter the amount, were allowed until further notice. These restrictions applied to nonresidents and new nonresident investors who wanted to liquidate their investments in Aruba and repatriate their capital overseas if the investors sell these investments to
residents. Such transfers would again be possible when the foreign exchange restrictions have been lifted by the CBA. However, if the nonresident investor sold its investment to another nonresident, the foreign exchange measures were not applicable. Also, nonresident investments into Aruba were not affected and permitted as before.

All remaining foreign exchange restrictions temporarily imposed because of the COVID-19 pandemic were eliminated and the Notice concerning Foreign Exchange Transactions 2002/K.1 (General Foreign Exchange License) reinstated. Based on a general foreign exchange license, natural persons and legal entities, respectively, may execute capital transactions with nonresidents up to a maximum of Afl. 300,000 and Afl. 750,000 or its equivalent in foreign currency a year. A special foreign exchange license is required for amounts above aforementioned limits.

Pension funds and insurance companies under the supervision of the Central Bank of Aruba were allowed to make investments abroad up to a maximum amount of Afl. 5 million a calendar year.

AUSTRALIA
(Position as of July 31, 2022)

Status under IMF Articles of Agreement

Date of membership August 5, 1947.

Article VIII Yes. Date of acceptance: July 1, 1965.

Article XIV

Exchange Measures

Restrictions and/or multiple currency practices No. No restrictions as reported in the latest IMF staff report as of December 31, 2021.

Exchange measures imposed for security reasons Yes. Australia maintains targeted financial sanctions on an autonomous basis under the Autonomous Sanctions Regulations 2011.

In accordance with IMF Executive Board Decision No. 144-(52/51) Yes. Australia implements counter-terrorism financing sanctions against individuals or entities pursuant to UNSC Resolutions concerning sanctions, including UNSC Resolution No. 1373 (2001). Pursuant to UNSC Resolution No. 1373 (2001) concerning international terrorism, Australia maintains counter-terrorism financing sanctions to freeze the assets of, and prohibit assets being made available to, persons or entities designated by the Minister for Foreign Affairs as associated with the commission of acts involved in terrorism.

Other security restrictions Yes. Australia implements counter-terrorism financing sanctions to freeze the assets of, and prohibit assets being made available to, persons or entities designated by the Minister for Foreign Affairs as associated with the commission of acts involved in terrorism.

Exchange Arrangement

Currency Yes. The currency of Australia is the Australian dollar, which also circulates in several other countries, including Kiribati, Nauru, and Tuvalu.

Other legal tender No.

Stabilized arrangement

Crawling peg

Crawl-like arrangement

Pegged exchange rate within horizontal bands
Official exchange rate

Yes.

Both the de jure and de facto exchange rate arrangements are classified as free floating. However, the Reserve Bank of Australia (RBA) retains discretionary authority to intervene in the foreign exchange market and has done so during periods of significant market disorder and/or gross misalignment of the exchange rate. Given the high level of development of the Australian foreign exchange market, interventions have been rare. The most recent period of intervention was in 2007–2008 and was in response to episodes of significant market disorder—that is, instances when market functioning was impaired to such a degree that it was clear that the observed volatility was excessive. The RBA may also vary the way intervention is conducted; it may enter the interbank foreign exchange market directly through voice or electronic brokerage platforms or use an agent bank. As a matter of government policy, most wholesale purchases of foreign currency by government agencies are made through the RBA. The RBA manages the flows from purchases on behalf of the government so as to minimize their market impact—for example, by executing these trades when the market is liquid and, if necessary, breaking up the required purchases into a series of smaller transactions. Monthly purchases and sales of foreign exchange are published on the RBA website. Daily data on foreign exchange market interventions are published on the RBA website annually, following the release of the RBA Annual Report.

Monetary aggregate target

Inflation-targeting framework

Yes.

Target setting body

Yes.

Government

Central Bank
The Reserve Bank Act 1959 provides for decisions of the Reserve Bank Board on monetary policy to be reached by a majority of the votes of the members present and voting, with the Chair having a casting vote, if necessary, in addition to a deliberative vote. Votes are not published. The Statement on the Conduct of Monetary Policy (the Statement) has recorded the common understanding of the Governor, as Chair of the Reserve Bank Board, and the government on key aspects of Australia’s monetary and central banking policy framework since 1996. The Statement seeks to foster a sound understanding of the nature of the relationship between the Reserve Bank and the government, the objectives of monetary policy, the mechanisms for ensuring transparency and accountability in the way policy is conducted, and the independence of the Reserve Bank. The inflation target is set as part of the agreement on the monetary policy framework, and the key features of the target cannot be changed by the Bank unilaterally.

Inflation target

Target number

Point target

Target with tolerance band

Band/Range

Both the RBA Governor and the government agree that a flexible medium-term inflation target is the appropriate framework for achieving medium-term price stability. They agree that an appropriate goal is to keep consumer price inflation between 2% and 3%, on average, over time. This formulation allows for the natural short-run variation in inflation over the economic cycle, and the medium-term focus provides the flexibility for the Reserve Bank to set its policy so as best to achieve its broad objectives, including financial stability. The 2%–3% medium-term goal provides a clearly identifiable performance benchmark over time.

Target measure

CPI

The target measure is end-year growth in the CPI. The CPI measures the changes in the price of a “basket” of goods and services, which account for a high proportion of expenditure by the CPI population group (that is, metropolitan households).

Core inflation

Target horizon

The inflation target is defined as a medium-term average rather than as a rate (or band of rates) that must be held at all times.

Operating target (policy rate)

Policy rate

The RBA’s monetary policy involves setting a target for the interest rate on unsecured overnight loans in the money market (“the cash rate”), with the interest rate on Exchange Settlement balances set at 10 bps below that target. The RBA’s target for the cash rate was 1.35% as of July 31, 2022.

Target corridor band

The RBA’s cash rate target is expressed as a point target. The RBA pays an interest rate on Exchange Settlement balances held in accounts with the RBA that is set at a margin below the cash rate.
target. Banks have an incentive to deposit as little as possible at this rate and instead prefer to earn the higher cash rate by lending out their balances overnight in the money market. The RBA is also willing to lend Exchange Settlement balances to banks if this is required. The interest rate on these loans is set at a margin above the cash rate target under its standing facilities. Banks have an incentive to borrow as little as possible at this rate, and instead prefer to borrow at the lower cash rate in the interbank market. The overnight deposit and lending rates form the lower and upper bounds of the policy interest rate corridor. Until March 2020, the lower and upper bounds of the corridor were set at 25 basis points below and above the target cash rate, respectively. As part of the package of policy measures announced by the RBA in March 2020, the cash rate was lowered to 25 basis points and the lower bound of the corridor (the interest rate on Exchange Settlement Accounts at the RBA) was set at 15 basis points below the cash rate target. In November 2020, the cash rate target was lowered to 10 basis points and the lower bound of the corridor was set at 10 basis points below the cash rate target. The lower bound of the corridor has continued to be set at 10 basis points below the cash rate target since then. There have been no changes to arrangements for the top of the corridor, which remains 25 basis points above the target cash rate.

Given the large amount of liquidity in the banking system as a result of the RBA’s package of policy measures implemented since 2020, the cash rate is trading at a margin above the bottom of the corridor but a little below the cash rate target.

Other

Yes.

The Reserve Bank Board introduced a target for the 3-year Australian government bond yield of around 25 basis points. This target was lowered to around 10 basis points. Effective July 7, 2021, the Reserve Bank Board announced the yield target of 10 basis points would continue to apply to the April 2024 bond (rather than extend the target to the next bond with a maturity date closest to 3 years, the November 2024 bond). Effective November 2, 2021, the Reserve Bank Board decided to discontinue the target of 10 basis points for the April 2024 Australian Government Bond.

Accountability

Yes.

Open letter

No.

Parliamentary hearings

Yes.

The Governor, Deputy Governor, and a small number of other senior officers of the Reserve Bank usually appear twice-yearly before the House of Representatives Standing Committee on Economics. Between January 1, 2021, and June 30, 2022, the RBA appeared at four public hearings of this committee. Three of these hearings were for general public accountability purposes, and one was in relation to an inquiry into a specific public policy issue. Senior staff are also periodically invited to give evidence at public hearings held as part of inquiries by other committees of both houses of parliament.

Other

No.

Transparency

Yes.

Publication of votes

No.

Publication of minutes

Yes.

Minutes of the monetary policy meetings of the Reserve Bank Board are published two weeks after each meeting. (The Reserve Bank Board usually meets 11 times each year, on the first Tuesday of each month, except January.) Minutes were first published in December 2007, when minutes for meetings from October 2006 onward were also released.

Corporations Act, persons make a market for a financial product if (1) they regularly state the prices at which they propose to acquire or dispose of financial products on their own behalf, (2) others have a reasonable expectation that they will be able to regularly effect transactions at the stated prices, and (3) the persons’ actions do not constitute a financial market under Section 767A.

Active trading takes place in forward and futures contracts, which under Corporations Act are regulated as derivatives (Corporations Act s761D and Corporations Regulation 7.1.04).

The RBA uses foreign exchange swaps in its domestic liquidity operations and foreign exchange reserves management. Foreign exchange swaps by the RBA for liquidity management are executed with market participants in the market and at market prices. Foreign exchange swaps have been used for many years to augment liquidity operations in domestic securities.

Controls on trade in gold (coins and/or bullion)

On domestic ownership and/or trade No.

On external trade Yes. With respect to the Democratic People’s Republic of Korea (DPRK), it is prohibited to transfer to another person gold (including through gold couriers) that could contribute to the DPRK’s nuclear, ballistic, or weapons-of-mass destruction (WMD) programs or to activities prohibited, or the evasion of measures imposed by UNSC resolutions relating to the DPRK. Australian law also prohibits the procurement of “import sanctions goods” (which includes gold), without a permit from the DPRK, or from a person or entity in the DPRK. A sanctions permit may be granted in very limited circumstances.

With respect to Syria, the following are prohibited: (1) the supply, sale, or transfer of gold (to the Government of Syria or their public bodies, corporations, or agencies, including persons, entities, or bodies acting on their behalf or at their direction and entities or bodies owned or controlled by them); (2) the importation, purchase, or transport of gold from the Government of Syria or their public bodies, corporations, or agencies, including persons, entities, or bodies acting on their behalf or at their direction and entities or bodies owned or controlled by them; and (3) the provision of related financial services or financial assistance or technical advice, assistance or training or another service to the Government of Syria, or their public bodies, corporations, or agencies, including persons, entities, or bodies acting on their behalf or at their direction and entities or bodies owned or controlled by them, if it assists with, or is provided in relation to an activity involving the supply, sale, transfer import, purchase, or transport of certain items including gold.

Exports and imports of $A 10,000 in cash or more, or the foreign currency equivalent must be reported to the Australian Transaction Reports and Analysis Centre chief executive officer (CEO), a police officer, or an Australian Border Force officer for transmission to the Australian Transaction Reports and Analysis Centre for anti-money-laundering and counter-terrorism financing (AML/CTF) purposes.

Controls on exports and imports of banknotes

On exports No.

Domestic currency No.

Foreign currency No. With respect to Syria, Australian law prohibits the direct or indirect supply, sale, or transfer to Syria, for use in Syria or for the benefit of Syria of “export sanctioned goods,” which include: newly printed or unissued Syrian-denominated banknotes and coinage, without a permit. Australian law also prohibits the provision to any person of technical advice, assistance, or training; financial assistance; a financial service; or another services if it assists with or is provided in relation to either: the direct or indirect supply, sale, or transfer to Syria, for use in Syria or for the benefit of Syria of “export sanctioned goods”; or the manufacture, maintenance, or use of an “export sanctioned good” for Syria, without a sanctions permit.

With respect to the DPRK, Australian law also prohibits the transfer to another person of any financial or other assets or resources (including bulk cash) which could contribute to the nuclear or ballistic missile programs, or other WMD programs, of the DPRK, or activities prohibited, or the evasion of measures imposed, by any relevant UNSC regarding the DPRK.

On imports No.

Australia’s customs legislation prohibits absolutely the import of some goods. These are certain types of dangerous dogs and documents and devices related to suicide. Some goods (restricted goods) are prohibited from import unless certain conditions are met, the goods are exempt, and/or written permission from a relevant authority is provided. These controls and prohibitions reflect mainly law enforcement, health, environmental and safety requirements; requirements for labeling, packaging, and technical specifications; autonomous sanctions; and obligations of international agreements or UNSC sanctions. Goods which are restricted are certain types of narcotic and psychotropic substances; drugs, medicines, and antibiotic substances; therapeutic substances; tablet presses, and encapsulators; drug paraphernalia; counterfeit credit, debit, and charge cards; tobacco products; firearms, weapons, and warfare goods; including chemical weapons, plastic explosives and ammonium nitrate, radioactive substances, and nuclear material; cloned human embryo material; goods with false trade descriptions; goods that infringe trademarks or copyright; images and indicia for major sporting events; goods representing the arms, flag, or seal of an Australian State or Territory or of the Commonwealth or the Royal Arms; ANZAC goods; wool packs; pronged dog collars; cat and dog fur; certain hazardous industrial and pesticide chemicals; asbestos and goods containing asbestos; specimens of CITES-listed endangered species; consumer safety goods such as glazed ceramic ware, toys and cosmetics that contain hazardous amounts of lead or other metals; rough diamonds; incandescent lightbulbs; lighters; signal jammers; cultural heritage items; objectionable material including child pornography and terrorism-related goods; tooth fish; ozone-depleting substances; and synthetic greenhouse gases. The Biosecurity Act 2015 and its subordinate legislation apply controls to the importation of all plants, parts of plants, and plant products, all animals (including birds, fish, and insects), animal products, soil, and other items of general quarantine concern. The importation of arms or related material is prohibited under the sanctions regimes for the DPRK, Iran, Libya, and Russia. Arms or related material is defined broadly and includes, but is not limited to, weapons, ammunition, military vehicles and equipment, and spare parts for any of those things, as well as paramilitary equipment.

In addition to these restrictions, there are other restrictions on imports which relate to each specific sanctions regime.

With respect to a specified Ukraine region (which currently includes Crimea, Donetsk, Luhansk, and Sevastopol), Australian law prohibits the import, purchase, or transport of any goods, without a sanctions permit, if the goods originate in, or are exported from, a specified Ukraine region (except certain goods, which have been made available to the Ukrainian authorities for examination and for which compliance with conditions conferring entitlement to preferential origin has been verified by Ukrainian officials).

With respect to the DPRK, under the UNSC sanctions, it is also prohibited to procure from the DPRK, or from a person or entity in the DPRK, any of the following "import sanctioned goods"; and a permit cannot be obtained to authorize their import: certain items relevant to nuclear, ballistic missiles, and other WMD-related programs; certain arms-related items listed in Resolution No. 1718 (2016) of the Security Council, subparagraph 8(a)(1) and (2) (such as battle tanks, combat vehicles, and aircraft); gold, titanium ore, vanadium ore, or rare earth minerals; goods mentioned in paragraph 5(1)(c) of the Charter of the UN (Sanctions – DPRK) Regulations 2008; copper, nickel, silver, or zinc; statues; coal, iron, or iron ore; lead or lead ore; seafood; textiles; or goods covered by Chapters 07,
08, 12, 25, 44, 84, 85, or 89 of the Harmonized Commodity Description and Coding Systems. The following “import sanctioned goods” cannot be procured, received, or transported from the DPRK, or from a person or entity in the DPRK, without a permit, which may be granted in certain circumstances: statues, textiles, coals; and any goods that are not “specified import sanctioned goods” and not food or medicine. Australian law also prohibits the receipt of “import sanctioned goods” from the DPRK, or a person or entity in the DPRK, if the goods are received for the purposes of repair, servicing, refurbishing, testing, reverse engineering, or marketing by the person or another person if it is not authorized by a sanctions permit.

With respect to Iraq, it is prohibited to hold, use, or deal with a “controlled asset” or allow or facilitate the use of it. A “controlled asset” is an asset: (1) of the government led by Saddam Hussein (including a state body, corporation, or other body or agency) that was located in Australia on May 22, 2003; and (2) that has been removed from Iraq, or acquired, by a person or entity designated for the purposes of the Iraq sanctions regime. It is also prohibited to deal with an item of Iraqi cultural property or of archeological, historical, cultural, rare scientific, or religious importance that has been illegally removed from Iraq on or after August 6, 1990.

With respect to Somalia, under UNSC sanctions, it is prohibited to import charcoal from Somalia or from a person or entity in Somalia.

With respect to Syria, it is prohibited to import, purchase, or transport certain crude oil, petroleum, and petrochemical products if they originate in or have been exported from Syria, without a sanctions permit. It is also prohibited to import or purchase gold, precious metals, or diamonds from the Government of Syria or an entity or body owned or controlled by it or acting on its behalf or direction, without a sanctions permit. It is also prohibited to give “illegally removed cultural property” to another person, to trade in it, or to transfer the ownership of it to another person. “Illegally removed cultural property” means an item of Syrian cultural property; or of archeological, historical, cultural, rare scientific, or religious importance that has been illegally removed from Syria on or after March 15, 2011.

The targeted financial sanctions outlined in category II “Exchange Measures” above prohibit providing assets to a proscribed or designated person or entity. This would effectively prohibit imports from any person or entity listed on the Consolidated List maintained by the Department of Foreign Affairs and Trade (DFAT).

Open general licenses No.

Licenses with quotas No.

Other nontariff measures No.

Import taxes and/or tariffs Yes.

Most agricultural products enter Australia duty-free. A maximum tariff of 5% applies to some manufactured goods, including household textile products. Tariffs on many goods have been eliminated.

Because of the final phase down of duty rates under the Expanded Information Technology Agreement, effective July 1, 2021, the general rate of customs duty is “free” for all goods for which Australia committed to providing duty-free access under the Expanded Information Technology Agreement. Tariff concessions are available under the Tariff Concession System for most goods subject to a tariff, if no domestic manufacturers produce substitutable goods. Other concessions are available for specific purposes, such as to accommodate split import consignments.
and for donations and bequests. A temporary concession in relation to COVID-19 was provided for medical and hygiene goods imported between February 1, 2020, and December 31, 2020. Effective January 1, 2021, it was extended until June 30, 2022. Effective July 1, 2022, a revised concession was implemented permanently and expanded in scope to also include medical and hygiene goods capable of limiting the spread of certain pathogens and viruses, ingredients used in the manufacture of medicaments, vaccines and other goods, and packaging used in the manufacture of medicaments, vaccines, and other goods. Australia currently has 16 multilateral or bilateral free trade agreements in force. All tariffs are eliminated under 15 out of the 16 of these FTAs:

Australia–New Zealand Closer Economic Relations Trade Agreement;
Singapore–Australia FTA;
Australia–United States FTA;
Thailand–Australia FTA;
Australia–Chile FTA;
Agreement Establishing the ASEAN–Australia–New Zealand FTA;
Malaysia–Australia FTA;
Korea–Australia FTA (tariff elimination effective January 1, 2021);
Japan–Australia Economic Partnership Agreement;
China–Australia FTA;
Comprehensive and Progressive Agreement for Trans-Pacific Partnership (CPTPP) (tariff elimination effective January 1, 2021);
FTA between Australia and Hong Kong, China;
Indonesia–Australia Comprehensive Economic Partnership Agreement;
PACER Plus;
Regional Comprehensive Economic Partnership.

The Peru–Australia FTA provides the following reduction in tariffs for originating goods: Australia has eliminated tariffs on 99% of tariff lines as of January 1, 2022, and 100% is to be eliminated by January 1, 2023.

The Regional Comprehensive Economic Partnership Agreement became effective January 1, 2022. Australia eliminated tariffs on 77% of tariff lines on entry into force and 98% are to be eliminated by January 1, 2041.

Australia provides duty-free, quota-free access for goods produced or manufactured in 50 least developed countries under the Australian System of Tariff Preferences, Australia’s GSP Scheme. In addition, Australia maintains a range of historic preferences for developing countries ranging from 11 countries and places where all but 101 tariff lines are 0; 106 countries and places with 877 tariff lines that are reduced or eliminated; 4 countries and places with 196 tariff lines that are reduced or eliminated.

Further Forum Island Countries are provided duty-free, quota-free access under the South Pacific Regional Trade and Economic Co-operation Agreement. Papua New Guinea, who is a member of South Pacific Regional Trade and Economic Co-operation Agreement, also has duty-free, quota-free access under the Agreement on Trade and Commercial Relations between the Government of Australia and the Government of Papua New Guinea (PATCRA II). Finally, Australia maintains a range of historic preferences for a limited number of goods from Canada and Malaysia.

Effective July 1, 2022, Australia provides a reduced rate of duty to goods produced or manufactured in Ukraine in accordance with Australian Customs Notice 2022-32.

Effective April 25, 2022, the MFN treatment previously accorded to
goods imported from the Russia was removed and a temporary additional customs duty of 35% applies in addition to the general rate of customs duty that applies to goods that are the produce or manufacture of Russia and Belarus, where these have left for direct shipment to Australia from a place of manufacture or warehouse in a country from which the goods were exported between April 25, 2022, and October 24, 2022, and are entered for home consumption in Australia within this period. Tariff quotas apply to certain types of cheese and curd that may be imported at a concessional rate of duty of $A 0.096/kg and is restricted to 11,500 tons a year. Imports may be made outside the 11,500 ton quota allocated each year, but a higher rate of duty of $A 1.220/kg applies. Reductions and elimination of tariffs exclude excise-equivalent customs duty such as on alcohol, fuel, and tobacco.

The Australian Government introduced a new export legislative framework to streamline regulation of exports effective March 28, 2021. The new framework makes the laws more relevant, responsive, and effective, but provides the same level of regulatory oversight. The new export legislation includes: the Export Control Act 2020 which sets out the overarching legal framework for the regulation of exported goods, including food and agricultural products, from Australia. It enables the Secretary of the Department of Agriculture, Fisheries and Forestry to make rules that detail the requirements and establish conditions for exporting certain goods from Australia. The Export Control Rules 2021 are legislative instruments made by the Secretary under Section 432 of the Act and set out the operational requirements that must be met to export specific goods from Australia. These conditions ensure any importing country requirements are satisfied, and that the export conforms with requirements and industry standards and meets Australia’s international obligations. In accordance with the requirements of the Export Control Act 2020 and its associated Rules and Orders, an exporter is required to
demonstrate, for the purpose of exporting prescribed agricultural goods, that the goods were produced and/or prepared at an exported registered establishment/accredited property for the purpose of supporting an application for export permits and other certification necessary to accompany prescribed agriculture export consignments. Documentation requirements also apply for the export of non-prescribed agricultural goods.

Export licenses

Yes.

Without quotas

Yes.

Export prohibitions and restrictions enforce quality control measures, administer UNSC and Australian autonomous sanctions, and meet obligations under international treaties and commitments under international arrangements. Australia’s export control policies reflect the government’s commitment to ensure that exports of defense and dual-use goods are consistent with Australia’s interests, international obligations, and commitments. Prohibitions also maintain adequate measures of control over designated cultural property, resources, protected flora; and fauna; secure conservation objectives; and respond to specific market distortions abroad.

Australia’s customs legislation prohibits absolutely the export of some goods, which are documents and devices relating to suicide. Some goods (restricted goods) are prohibited from export unless certain conditions are met, the goods are exempt, and/or written permission from a relevant authority is provided. Restricted goods are certain types of: objectionable goods; asbestos and goods containing asbestos; hazardous industrial and pesticide chemicals; toothfish; human embryo clone material; human body fluids, organs and other tissue; nuclear material; rough diamonds; cat and dog fur; ammonium nitrate; radioactive goods; drugs, narcotics and precursors; goods subject to autonomous sanctions; counterfeit debit, credit, and charge cards; weapons, defense, and strategic goods; ozone-depleting substances and synthetic greenhouse gases and radioactive waste; and liquefied natural gas.

Remaining controls on primary products apply mainly to food and agricultural products and are administered by the Department of Agriculture, Fisheries and Forestry. Controls administered by the Department of Agriculture, Fisheries and Forestry require an export license for exports of woodchips and unprocessed wood (for example, whole logs). These controls apply to wood sourced from areas outside Regional Forest Agreement regions and plantation forests within states and territories where Codes of Practice for plantation forestry are not approved by the Australian Government. Export registration and/or licensing procedures apply to agricultural products (meat, dairy products, eggs, live animals and their reproductive material, fish, vegetables, and fruit) to ensure that exporters meet other countries’ import conditions. These include sanitary and phytosanitary conditions. In the case of live animals, controls apply to exporters to ensure they meet international transport standards and for livestock, Australia’s animal welfare standards. Export controls are regulated by the Department of Agriculture, Fisheries and Forestry and the appropriate industry agencies. Exports of wine and brandy products in both bulk and bottled form require licenses from the Wine Australia Corporation. Only one entity has an export monopoly for selected agricultural products – the Rice Marketing Board for the State of New South Wales. This board appointed Ricegrowers Limited (trading as SunRice) as the sole and exclusive export license holder for exports of rice grown in New South Wales. (Ricegrowers Limited is also an authorized buyer.) There are no statutory restrictions on the exportation of rice in other Australian states.
Temporary export controls were applied to noncommercial exports of certain goods that contribute to the controlling and preventing the spread of the COVID-19 virus, including personal protective equipment, disinfectant wipes, and hand sanitizers. The measures were repealed.

DFAT coordinates the implementation, administration, and enforcement of UNSC sanctions and autonomous sanctions, working closely with a wide range of agencies, including the Department of Defense, the Department of Home Affairs, the Australian Transaction Reports and Analysis Centre, and the Australian Federal Police. The export of arms or related material is prohibited, without a permit, under sanctions regimes for the Central African Republic, the DPRK, the Democratic Republic of the Congo, Iran, Iraq, Lebanon, Libya, Myanmar, Russia, Somalia, South Sudan, Sudan, Syria, the Taliban, Yemen, and Zimbabwe. Australian law prohibits the export of arms or related material to a designated person or entity for the UNSC sanctions regime in relation to ISIL (Da’esh) and Al-Qaida, and it is not possible to obtain a permit for the export of such items. Arms or related material is defined broadly and includes, but is not limited to, weapons, ammunition, military vehicles and equipment, and spare parts for any of those things, as well as paramilitary equipment. In addition to these restrictions, there are other restrictions on exports which relate to each specific sanctions regime. For example, with respect to the DPRK, food and medicine are the only goods which may be exported, supplied, sold, or transferred to the DPRK without restriction. Likewise, significant restrictions apply to exports bound for Iran, Iraq, Syria, Russia, and the specified Ukraine region. The targeted financial sanctions outlined in category II “Exchange Measures” above prohibit dealing with the assets of a proscribed or designated person or entity. This would effectively prohibit exports from any person or entity listed on the Consolidated List maintained by the DFAT. The Consolidated List includes persons or entities designated under 17 UNSC sanctions regimes and Australia’s 12 autonomous sanctions regimes (including both country-based and thematic regimes). The autonomous country-specific regimes relate to the Former Federal Republic of Yugoslavia, Myanmar, Russia/Ukraine, the DPRK, Iran, Libya, and Syria. The autonomous thematic regimes relate to serious violations and abuses of human rights and serious corruption (Magnitsky-style sanctions), significant cyber incidents, and the proliferation of weapons of mass destruction.

Certain Autonomous Sanctions apply. With respect to the DPRK, Australian law prohibits, without a sanctions permit, acquiring or extending an interest in, or establishing or participating in a business with, or granting a financial loan or credit to (1) a person or entity (wherever located) that is engaged in an extractive or its related industry or associated infrastructure, in the DPRK (or persons or entities acting on their behalf, direction or control) and (2) a DPRK person or entity, or those acting on their behalf, direction or control, that is engaged in an extractive or related industry outside the DPRK. With respect to a specified Ukraine region, Australian law prohibits, without a sanctions permit: (1) the granting of any financial loan or credit, or the establishment of a joint venture, in relation to the following sectors and/or (2) the acquisition or extension of an interest in an enterprise that was established in a specified Ukraine region and is engaged in the following sectors: the creation, acquisition, or development of infrastructure in the transport, telecommunications, or energy sectors; or the exploitation of oil or gas, or of mineral resources specified in the Autonomous Sanctions (Russia, Crimea, and Sevastopol) Specification 2015.

With respect to Russia, Australian law generally prohibits, without a sanctions permit (with some exceptions): (1) the purchase or sale of, or any other dealing with, bonds, equity, transferable securities, money market instruments, or other similar financial instruments, if the financial instrument is issued by an entity specified by the Minister for Foreign Affairs and (2) making, or being part of any arrangement to make loans or credit if the loan or credit is made to an entity specified by the Minister for Foreign Affairs.

With respect to Syria, Australian law prohibits, without a sanctions permit, the acquisition or extension of an interest in: (1) the establishment of, or participation in, a joint venture with and/or (2) the granting of a financial loan or credit to an entity that is engaged in the petrochemical industry or the oil and gas industry, and connected to Syria.

On capital market securities                  | Yes            |

Shares or other securities of a participating nature | Yes            |

Purchase locally by nonresidents              | Yes            |

The acquisition of shares and other securities of a participating nature that may be affected by laws and policies on inward direct investment may require notification to the Australian authorities. Notification may be required under the foreign investment review framework subject to the percentage interest and monetary thresholds prescribed under the Foreign Acquisitions and Takeovers Act1975, associated regulations, and foreign investment policy. A temporary zero monetary screening threshold was introduced on March 29, 2020, because COVID-19 had increased the risk of foreign investment occurring in ways that were contrary to the national interest. Effective January 1, 2021, this temporary measure was removed. The monetary threshold that determines whether...
notification is required now depends on the type of investment and the foreign investor’s jurisdiction. However, investments that may raise national security concerns continue to be subject to the zero-dollar monetary threshold. Foreign Investment Review Board’s (FIRB’s) Guidance Note 8 provides more details on national security investments, including when mandatory notification is required. If a person acquires a substantial holding in a listed entity, or there is a change in their substantial holding, they are also subject to disclosure obligations under Chapter 6C of the Corporations Act. Chapter 6C applies to residents and nonresidents for acquisitions of securities in an entity listed on an Australian financial market. The acquisition of shares and other securities in listed companies or unlisted companies with over 50 shareholders is separately regulated by the takeover rules in Chapters 6 and 6A of the Corporations Act. The requirements in Chapters 6 and 6A apply to both residents and nonresidents but only for acquisitions of securities in companies incorporated in Australia. Disputes regarding control transactions are primarily resolved by the Takeovers Panel. The Panel has published a number of Guidance Notes explaining policy relevant to control transactions.

The policy underlying Chapter 6 is that a bid for an Australian target company should be made on the same terms to all holders: s619(1). However, if a bidder is offering scrip consideration, the securities do not need to be offered to foreign holders (holders with a registered address outside Australia) if the bidder appoints a nominee approved by ASIC to sell the scrip that would have been issued to the foreign holders and distribute the net proceeds of sale to the holders: Section 619(3). This nominee procedure should only be used where the bidder is constrained by foreign laws from offering scrip and the bidder risks a declaration of unacceptable circumstances from the Takeovers Panel if that is not the case: ASIC Regulatory Guide 9 Takeover bids at paragraphs 71–72.

A pro-rata offer of securities may exclude nonresidents (members with a registered address outside of Australia or New Zealand) but only if the company determines that it is unreasonable to extend the offer to nonresidents having regard to the number of holders in the place where the offer would be made, the number and value of securities the holders would be offered, and the cost of legal compliance: s9A(3)(a). If the pro-rata offer is renounceable, the entity must also appoint a nominee to arrange for the sale of entitlements of any excluded nonresident and distribution of the proceeds to them: s9A(3)(c). These requirements are relevant if the company wishes to rely on the disclosure exemption for rights issues in s708AA. Similar requirements are also imposed on all entities listed on the Australian Securities Exchange under Listing Rule 7.7.1 (regardless of whether a disclosure document is provided or not).

If any person, such as a member or underwriter, needs to rely on the takeovers’ exemption for rights issues in Item 10 of Section 611, the securities that would otherwise be issued to nonresidents who accept the offer (or the right to acquire those securities) must be transferred to a nominee approved by ASIC to sell and distribute the proceeds of sale to the foreign holders: Section 615. Both of these provisions are intended to facilitate control or capital transactions in circumstances where extending an offer of securities to nonresidents may be constrained by foreign law, or where the cost of compliance with foreign law may be disproportionate to the number of nonresident holders in a particular jurisdiction. ASIC’s policy on approval of a nominee for nonresidents is set out in Regulatory Guide – 6 Takeovers: Exceptions to the general prohibition at paragraphs 118–124. Ordinarily ASIC would not approve a nominee for the
purposes of s615 if the company was able to make offers to nonresidents. Australian companies which conduct a share buyback must follow the procedure set out in Part 2J.1 of the Act. For an equal-access scheme, all shareholders must be treated equally, including nonresident shareholders. However, ASIC can give individual relief from this legislative requirement to an Australian company to exclude nonresident shareholders from a buyback (which is, in essence, an equal-access scheme) where the company cannot make an offer to some shareholders because of the laws of the country in which they reside, pursuant to Regulatory Guide 110 – Share buybacks at Table 3.

The Treasurer’s approval is required to hold more than 20% of the voting shares of an Australian bank. The Treasurer may grant approval only if the shareholding is in the national interest or for recently established companies that are below a specified asset size threshold.

Sale or issue locally by nonresidents No.

While the Corporations Act usually requires a prospectus or other disclosure document for an offer of securities that is received in Australia, whether from a local or foreign issuer, ASIC has given conditional relief from the prospectus disclosure requirements where a foreign entity makes certain offers to Australian resident shareholders of the foreign entity. The conditional relief for rights issues by foreign companies, foreign scrip takeovers, and schemes of arrangement is subject to certain conditions, including listing of the foreign securities on an approved foreign market. We also give relief for offers that result in securities being issued to 20 or fewer investors in 12 months to Australian residents.

The provision of financial services, including the offers of financial products including shares in Australia, by residents and nonresidents, is subject to Chapter 7 of the Corporations Act. Chapter 7 imposes a requirement on the provider of the financial services to hold an AFSL, such as dealing and advising, and to meet certain requirements about the operation of the financial services business, for example capital requirements. There are limited exceptions to the AFSL requirement.

Foreign financial service providers (FFSPs) who hold a relevant authorization in a significantly equivalent overseas regulatory regime must apply for a foreign AFSL to provide financial services to wholesale clients in Australia. The sufficiently equivalent overseas regulatory regimes assessed by ASIC are set out in ASIC Corporations Instrument 2020/198. Foreign AFS licensees are exempt from certain provisions in Chapter 7 of the Corporations Act on the basis the FFSP is subject to sufficiently equivalent overseas regulatory requirements that would achieve similar regulatory outcomes to the Australian provisions that have been exempted. FFSPs have been granted a transition period, to March 31, 2024, to make arrangements to continue their operations in Australia.

Purchase abroad by residents No.

Sale or issue abroad by residents No.

Bonds or other debt securities No.

Purchase locally by nonresidents No.

Sale or issue locally by nonresidents No.

The offer of debentures usually requires a prospectus or other disclosure document for an offer that is received in Australia, whether from a local or from a nonresident issuer. This is subject to exemptions in s708 of the Corporations Act, including exemptions for persons who are sophisticated. An offer of debentures that
The offer of money market instruments may constitute the offer of debentures and requires a prospectus or other disclosure document for an offer that is received in Australia. The offer of debentures usually requires a prospectus or other disclosure document for an offer that is received in Australia, whether from a local or nonresident issuer. This is subject to exemptions in s708 of the Corporations Act, including exemptions for persons who are sophisticated. An offer of debentures that requires a disclosure document is also subject to Chapter 2L of the Corporations Act, which imposes certain obligations on the borrower and requirements as to the appointment of a trustee.

The offer of money market instruments may constitute the offer of a deposit-taking facility and require the provider of the facility to be an Authorized Deposit Institution (within the meaning of the Banking Act 1959) in the course of its banking business (within the meaning of that Act), other than an retirement savings account (RSA) (within the meaning of the RSA Act 1997).

The acquisition of a controlling interest in securities issues by a collective investment vehicle may be affected by laws and policies on inward direct investment and therefore may require notification to the Australian authorities. Notification may be required under the foreign investment review framework for acquisitions above the percentage interest and monetary thresholds prescribed under Foreign Acquisitions and Takeovers Act 1975, associated regulations, and foreign investment policy.

Effective January 1, 2021, new regulation (Foreign Acquisitions and Takeovers Regulation 2015) came into effect setting monetary thresholds for which FIRB approval is required for foreign entities proposing to obtain a significant interest in a collective investment vehicle.

Further, the acquisition of securities in listed collective investment schemes is regulated by the takeover rules in Chapter 6 of the Corporations Act, which prohibit the acquisition of more than a 20% voting interest subject to exceptions such as a regulated takeover. If Australian issuers have determined that it would not be reasonable to make an offer of securities to nonresidents required or permitted by Chapter 6, nonresidents may receive cash instead of securities. For rights issues, which is one of the exceptions to the 20% voting interest prohibition, Section 615 of the Act allows an issuer to sell securities for the benefit of foreign holders and to distribute the proceeds of sale to the holders provided the nominee of the sale facility is approved by ASIC.

The provision of financial services, including the offer or issue of securities, requires a disclosure document also subject to Chapter 2L of the Corporations Act, which imposes certain obligations on the borrower and requirements as to the appointment of a trustee.
financial products (including shares) in Australia, by residents and nonresidents, is subject to Chapter 7 of the Corporations Act. Chapter 7 imposes a requirement on the provider of the financial services to hold an AFSL, such as dealing and advising, and to meet certain requirements about the operation of the financial services business, for example, capital requirements. There are limited exceptions to the AFSL requirement.

Further, where the financial service is the operation of a registered collective investment scheme (such as a registered managed investment scheme (MIS) or a corporate collective investment vehicle (CCIV)), subject to some limited exceptions, the operator must be an Australian public company, must register the collective investment scheme with ASIC, and issue a compliant disclosure document.

FFSPs who hold a relevant authorization in a sufficiently equivalent overseas regulatory regime must apply for a foreign AFSL to provide financial services to wholesale clients in Australia. The sufficiently equivalent overseas regulatory regimes assessed by ASIC are set out in ASIC Corporations Instrument 2020/198. Foreign AFS licensees are exempt from certain provisions in Chapter 7 of the Corporations Act on the basis the FFSP is subject to sufficiently equivalent overseas regulatory requirements that would achieve similar regulatory outcomes to the Australian provisions that have been exempted.

FFSPs have been granted a transition period, to March 31, 2024, to make arrangements to continue their operations in Australia. If the financial service that the foreign provider is providing deals with the operation of, and issue of interests in, a foreign collective investment scheme (FCIS), ASIC may exempt the FCIS operator from the requirement to hold an AFSL in relation to that operation, to register the FCIS in Australia with ASIC, and to issue a compliant disclosure document. ASIC’s policy in relation to the FCIS is set out in Regulatory Guide 178 – FCISs. ASIC may grant relief from the legal provisions, if the applicant complies with ASIC requirements in relation to that relief. Broadly, the relief is based on (1) the regulation by the regulatory regime to which the FCIS is subject to is sufficiently equivalent to ASIC regulation (from a market integrity and systemic risk perspective); (2) there are effective cooperation arrangements between the overseas regulatory authority and the ASIC; and (3) adequate rights and remedies are practically available to Australian investors.

Other exemptions from regulatory requirements may apply in respect of FCISs under frameworks in the Corporations Act. This currently applies to New Zealand schemes under Chapter 8 of the Act and applies to schemes that seek to register as passport funds in a foreign member economy of the Asia Region Funds Passport (currently Japan, New Zealand, Thailand, and the Republic of Korea) and become notified foreign passport funds in Australia (also a member economy) under Chapter 8A of the Act.

| Purchase abroad by residents | No. |

Certain Autonomous Sanctions apply. With respect to the DPRK, Australian law prohibits without a sanctions permit, acquiring or extending an interest in, or establishing or participating in a business with, or granting a financial loan or credit to: (1) a person or entity (wherever located) that is engaged in an extractive or related industry, or its associated infrastructure, in the DPRK (or persons or entities acting on their behalf, direction, or control), and (2) a DPRK person or entity, or those acting on their behalf, direction, or control, that is engaged in an extractive or related industry outside the DPRK. With respect to a specified Ukraine region, Australian law prohibits, without a sanctions permit: (1) the granting of any financial loan or credit, or the establishment of a joint venture, in relation to the following sectors and/or (2) the acquisition or extension of an interest in an enterprise that was established in a specified Ukraine region and is engaged in the following sectors: the creation, acquisition, or development of infrastructure in the transport, telecommunications, or energy sectors; or the exploitation of oil or gas, or of mineral resources specified in the Autonomous Sanctions (Russia, Crimea and Sevastopol) Specification 2015.

With respect to Russia, Australian law generally prohibits, without a sanctions permit (with some exceptions): (1) the purchase or sale of, or any other dealing with, bonds, equity, transferable securities, money market instruments, or other similar financial instruments, if the financial instrument is issued by an entity specified by the Minister for Foreign Affairs and (2) making, or being part of any arrangement to make loans or credit if the loan or credit is made to an entity specified by the Minister for Foreign Affairs.

With respect to Syria, Australian law prohibits, without a sanctions permit, the acquisition or extension of an interest in: (1) the establishment of, or participation in, a joint venture with and/or (2) the granting of a financial loan or credit to an entity that is engaged in the petrochemical industry or the oil and gas industry, and connected to Syria.

Persons engaging in regulated credit activities need an Australian Credit License or an authorization from a credit licensee (before commencing business). Some credit activities may be exempt from
licensing requirements under the National Consumer Credit Protection Act 2009, the National Consumer Credit Protection Regulations 2010 or through a specific exemption from ASIC. Foreign entities may apply for a credit license but must meet additional requirements, which may include registering as a foreign company and appointing a local agent for legal processes (such as a local agent resident in the jurisdiction who is authorized to accept service of process and notices).

Controls on direct investment

Yes.

With respect to Crimea and Sevastopol, Australian law prohibits, without a sanctions permit: (1) the granting of any financial loan or credit, or the establishment of a joint venture, in relation to the following sectors and/or (2) the acquisition or extension of an interest in an enterprise that was established in a specified Ukraine region and is engaged in the following sectors: the creation, acquisition, or development of infrastructure in the transport, telecommunications, or energy sectors; or the exploitation of oil or gas, or of mineral resources specified in the Autonomous Sanctions (Russia, Crimea and Sevastopol) Specification 2015.

With respect to the DPRK, under the UNSC sanctions regime, Australian law prohibits a financial institution to (1) open a representative office, branch, or subsidiary in the DPRK; (2) establish a joint venture or correspondent banking relationship with, open a bank account with, or acquire, extend, sell, or make available an interest in a financial institution domiciled in the DPRK, a branch or subsidiary, wherever located, of a financial institution domiciled in the DPRK, or a financial institution wherever domiciled that is controlled by an entity or person in the DPRK. It is also prohibited, without a sanctions permit, to establish, maintain, or operate a joint venture or cooperative entity with a DPRK person or entity, an entity controlled by a DPRK person or entity, or a person or entity acting on behalf of or at the direction of a DPRK person or entity. Under Australia’s autonomous sanctions regime, it is prohibited, without a sanctions permit, to acquire or extend an interest in, establish or participate in a business relationship with, or grant a financial loan or credit to (1) a person or entity engaged in an extractive or related industry or associated infrastructure in the DPRK, or those acting on their behalf or (2) a DPRK person or entity, or those acting on their behalf, engaged in an extractive or related industry outside the DPRK. It is also prohibited, without a sanctions permit, to obtain, use, deal with, or make available any asset that is a tenement or permission in relation to an extractive or related industry or associated infrastructure in the DPRK. It is also prohibited, without a sanctions permit, to obtain any tenement or permission in relation to an extractive or related industry or associated infrastructure in the DPRK from a DPRK person or entity, or those acting on their behalf.

With respect to Iran, in accordance with the UNSC sanctions regime, Australian law prohibits, without a sanctions permit, the sale, or otherwise making an interest available to Iran; an Iranian national; an Iranian entity; or a person or entity acting on their behalf or under their control, in commercial activities involving uranium mining, production, or the use of certain nuclear-related and ballistic missile-related goods.

With respect to Russia, Australian law generally prohibits, without a
sanctions permit (with some exceptions): (1) the purchase or sale of, or any other dealing with, bonds, equity, transferable securities, money market instruments, or other similar financial instruments, if the financial instrument is issued by an entity specified in the Autonomous Sanctions (Russia, Crimea and Sevastopol) Specification 2015 and (2) making, or being part of any arrangement to make loans or credit if the loan or credit is made to an entity specified in the Autonomous Sanctions (Russia, Crimea, and Sevastopol) Specification 2015.

With respect to Syria: It is prohibited, without a sanctions permit, to acquire or extend an interest in, establish or participate in a joint venture with, and grant a financial loan or credit to an entity that is engaged in the petrochemical industry or the oil and gas industry, and connected to Syria. It is also prohibited, without a sanctions permit, for a financial institution to obtain a representative office, or a branch or subsidiary, in Syria.

Outward direct investment No.

Inward direct investment Yes.

Controls apply to interests including: (1) investment in media, telecommunications (including Telstra), the financial sector, transport (including Australian international airlines and shipping), defense and military-related industries, the development, manufacture, or supply of or services relating to encryption and security technologies and communication systems, and the extraction of uranium or plutonium or the operation of nuclear facilities, as well as other critical infrastructure; (2) foreign life insurers, who under the Life Insurance Act 1995 may not establish branches in Australia (except for those specified in the Life Insurance Regulations 1995: Chinese, Japanese, Korean, New Zealand, and US insurers); and (3) investment to the extent that constituent states or territories of Australia exercise legislative control over such investment. Controls do not apply to the acquisition of an interest in securities, assets, a trust, Australian land, or a tenement by foreign custodian companies acting at the direction of clients. Proposals of inward direct investment from foreign persons may be subject to approval if they fall within the scope of the foreign investment screening regime, which broadly covers the following and according to where the specified thresholds that were indexed on an annual basis effective January 1, 2021 (indexed most recently effective January 1, 2022): (1) to acquire interests in securities, assets, entities (being corporations and unit trusts), and businesses that have a connection to Australia valued at more than $A 289 million (previously $A 281 million); (2) if the private investor is from Chile, China, Hong Kong SAR, Japan, Republic of Korea, New Zealand, the USA, and any other country not otherwise listed (other than Australia) for which the CPTPP is in force, and is acquiring an interest in nonsensitive businesses exceeding $A 1,250 million (previously $A 1,216 million) and in sensitive business valued at more than $A 289 million (previously $A 281 million); (3) actions to acquire an interest in Agribusiness valued above $A 63 million (previously $A 61 million) unless the private investor is from Chile, New Zealand, and the USA in which case the acquired interest is valued above $A 1,250 million (previously $A 1,216 million); (4) direct investment by foreign government investors and proposals for new businesses in Australia and acquisition of land regardless of value; (5) direct interest in developed nonsensitive commercial land exceeding $A 289 million (previously $A 281 million) unless the interest is in developed sensitive–commercial land above $A 63 million (previously $A 61 million) or the direct interest is from a foreign investor from Chile, China, Hong Kong SAR, Japan, the Republic of Korea, New...
Zealand, the USA and any other country not otherwise listed (other than Australia) for which the CPTPP is in force, and interest acquired exceeds $A 1,250 million (previously $A 1,216 million); (6) actions to acquire an interest in vacant commercial land regardless of value; (7) approval is required for direct investment in agricultural land by private investors from Thailand, where the agricultural land is used wholly and exclusively for a primary production business, and where the consideration exceeds $A 50 million (not cumulative), by private investors from Chile, New Zealand, and the USA where the consideration exceeds $A 1,250 (not cumulative) (previously $A 1,216 million), or by private investors from other countries where the consideration exceeds $A 15 million (cumulative); (8) actions to start a national security business, to acquire a direct interest in a national security business or an entity that carries on a national security business, to acquire an interest in national security land, or to acquire a legal or equitable interest in an exploration tenement in respect of national security land regardless of value.

The Australian Government announced temporary changes to the foreign investment review framework as a COVID-19-related policy measure. From this date, all proposed foreign investments into Australia subject to the Foreign Acquisitions and Takeovers Act 1975 require approval, regardless of value or the nature of the foreign investor that is, a reduced zero-dollar threshold applies to all investment agreements entered into after 10:30 p.m. Australian Eastern Daylight Savings Time March 29, 2020. To ensure sufficient time for screening applications, the FIRB extended timeframes for reviewing applications from 30 days to up to six months. This temporary, zero-dollar monetary threshold was rewound effective January 1, 2021, and the monetary thresholds referred to in (1)–(7) took effect. However, mandatory screening of investments in sensitive national security businesses continue at the $0 monetary threshold. These monetary thresholds referred to in (1)–(7) are indexed annually January 1 each year, except the threshold for agricultural land exceeding $A15 million (cumulative) for private investors from Chile, New Zealand and the US, and $50 million threshold for private investors from Thailand where the agricultural land is used wholly and exclusively for a primary production business.

Effective January 1, 2021, comprehensive reforms to Australia’s foreign investment review framework came into force, including a new national security test, stronger enforcement and compliance powers, a new amalgamated register of foreign owned assets, a fairer and simpler foreign investment application fees, and streamlined approval for lower risk foreign investors.

Effective April 1, 2022, the Foreign Acquisitions and Takeovers Amendment Regulations 2022 came into force. They clarify certain aspects of the foreign investment review framework and streamline the process for certain less sensitive types of investment. Inter alia, they are intended to reduce the regulatory burden for foreign investors that engage in moneylending, invest in unlisted land entities or Australian media businesses, acquire shares or units under rights issues and other pro-rata offers, or transact on behalf of institutional investors as part of a custodian service (through amendments that refine the rules for the notification of these kinds of foreign investments, including raising thresholds and providing broader exemptions from foreign investment screening).

With respect to the DPRK, under Australia’s autonomous sanctions regime, it is prohibited, without a sanctions permit, to sell or make available (otherwise than by sale) an interest in a commercial activity in an extractive or related industry in Australia to a DPRK person or
entity, or those acting on their behalf. Under the UNSC sanctions regime, it is prohibited, without a sanctions permit, to (1) open a representative office in Australia of or (2) establish a branch or subsidiary in Australia of or (3) conclude an agreement related to (1) or (2) for or on behalf of: a financial institution domiciled in the DPRK; a branch or subsidiary, wherever located, of a financial institution domiciled in the DPRK; or a financial institution wherever domiciled that is controlled by an entity or person in the DPRK.

With respect to Syria, under Australia’s autonomous sanctions regime, there are prohibitions, without a sanctions permit, on the sale or making available of an interest in a commercial activity in Australia in the oil and gas industry (in the following sectors: refining of fuels, exploration or production of crude oil and natural gas or liquefaction of natural gas) to the Syrian Government, or any Syrian person or entity, or an entity or person acting on their behalf, at their direction or under their control. It is also prohibited, without a sanctions permit, for a Syrian financial institution (or a financial institution controlled by a Syrian person or entity) to open a representative office, branch, or subsidiary in Australia, and acquire an interest in an Australian financial institution. It is also prohibited, without a sanctions permit, to establish a joint venture or a correspondent banking relationship with a Syrian financial institution.

Controls on liquidation of direct investment

No.

Controls on real estate transactions

Yes.

Purchase abroad by residents

No.

Purchase locally by nonresidents

Yes.

Controls apply to the acquisition of real estate in Australia, except for acquisitions including (1) effective January 1, 2021, indexed annually and, most recently, indexed effective January 1, 2022, acquisitions by private investors of direct interest in developed commercial land valued at less than $A 289 million (developed, nonsensitive commercial land; previously $A 281 million) or less than $A 63 million (developed, sensitive commercial land; previously $A 61 million) except for acquisitions of direct interest in commercial land by private investors from Chile, China, Hong Kong, SAR, Japan, the Republic of Korea, New Zealand, Peru, the USA, and any other country not otherwise listed (other than Australia) for which the CPTPP is in force which are less than $A 1,250 million (previously $A 1,216 million); (2) interest in time-share plans whose foreign interest and that of any associates are less than four weeks a year; (3) residential real estate by approved migrants, special category visa holders, and other foreigners entitled to permanent residence in Australia, including Australian permanent residents and those ordinarily resident in Australia and special category visa holders buying through Australian companies; (4) nonresident Australians, directly or indirectly through Australian companies and trusts; (5) residential real estate by spouses or de facto partners of Australian citizens or Australian permanent residents; (6) offices and residences by foreign government missions for use as official missions or residences for staff, subject to sale to Australians or other eligible purchasers when no longer used for those purposes; (7) minority interests in public companies and trusts whose principal assets are real estate, as permitted by regulations under the Foreign Acquisitions and Takeovers Act 1975; (8) by general insurance companies operating in Australia, if the acquisition is made from the reserves of the companies and conforms to the company’s obligations under the Insurance Act 1973; (9) Australian land by

©International Monetary Fund. Not for Redistribution
foreign-controlled responsible entities acting on behalf of a MIS registered under Section 601EB of the Corporations Act 2001, when investing primarily for the benefit of members ordinarily resident in Australia; (10) interests in Australian land by foreign custodians acting at the direction of clients; hospitality facilities, such as hotels, motels, hostels, and guesthouses, are considered developed commercial land and are subject to the thresholds specified above at (1). Residential real estate purchased by temporary residents directly or through Australian companies or trusts, which is an established dwelling intended to be the buyer’s place of residence, constitutes single blocks of vacant land, or is a new dwelling that requires notification and approval under the Foreign Acquisitions and Takeovers Act 1975. The Commonwealth Government (1) applies an annual vacancy fee on foreign owners of underutilized residential property where the property is not occupied or is genuinely available on the rental market for at least six months in a 12-month period; (2) capped sales from property developers directly to foreign persons at 50% of dwellings in new residential housing developments under New Dwelling Exemption Certificates; and (3) eliminated the main residence capital gains tax exemption for foreign tax residents.

Tax arrangements:
Most states and territories of Australia impose either higher stamp duties on the purchase of real estate by nonresidents or land tax surcharges on the ownership of land by nonresidents or both. These taxes are levied by the state or territory governments, not the Commonwealth Government.

Foreign buyers of properties are subject to additional duty (stamp duty) of 7% in the states of Queensland, Western and South Australia. The surcharge purchaser duty (stamp duty) on residential property imposed on foreign buyers is 8% in Victoria (for contracts entered into after July 1, 2019) and New South Wales. In Tasmania, an 8% stamp duty with a 1.5% surcharge applies to foreign purchasers of primary production property (previously, 3% stamp duty with an additional 0.5% surcharge).

New South Wales imposes a land tax surcharge on foreign owners of 2%. In Victoria, the additional land tax surcharge on all land owned by absentee owners is 2%. Queensland has an “absentee” owner surcharge of 2% that can apply to absentee individuals, foreign corporations, and trustees of foreign trusts. The Australian Capital Territory (ACT) imposes a 0.75% surcharge on the unimproved land value of foreign investors.

Sale locally by nonresidents  No.
Controls on personal capital transactions  Yes.
Loans
By residents to nonresidents  No.
To residents from nonresidents  No.
Gifts, endowments, inheritances, and legacies  Yes.
By residents to nonresidents  Yes.

Transfers may be subject to approval of the authorities for gifts that involve acquisition of interests in securities, assets, or Australian land, and actions taken in relation to entities (being corporations and unit trusts) and businesses that have a connection to Australia if that transfer does not occur via devolution by operation of law, other than as a result of an arrangement under Part 5.1 or 5.3A of the Corporations Act 2001.
To residents from nonresidents  No.

*Settlement of debts abroad by immigrants*  No.

*Transfer of assets*  No.

Transfer abroad by emigrants  No.

Transfer into the country by immigrants  No.

*Transfer of gambling and prize earnings*  No.

### Provisions Specific to the Financial Sector

<table>
<thead>
<tr>
<th>Provisions specific to commercial banks and other credit institutions</th>
<th>Yes.</th>
</tr>
</thead>
</table>

Under the Banking Act 1959, a body corporate requires an authorization by the Australian Prudential Regulation Authority (APRA) to conduct banking business in Australia. Foreign banks may operate as locally incorporated subsidiaries or as branches. Branches of foreign banks are granted an authorized deposit-taking institution license subject to a condition specifically restricting the acceptance of retail deposits by their Australian branches. This is because depositors with branches of foreign banks do not have the same protections under the Banking Act as depositors with Australian authorized deposit-taking institutions. Branches of foreign banks do not have to maintain capital in Australia, as such foreign bank applicants must satisfy APRA that they are subject to adequate supervision in their home country and must have received consent from their home supervisor for establishing a banking operation in Australia.

Authorization for licensees providing financial services in emissions units is a requirement. Some new applicants also request authorization to deal in foreign exchange because emissions units’ authorizations also include eligible international emissions units. The financial requirements for licensees that issue OTC derivatives to retail clients, including contracts for difference and margin foreign exchange, were increased beginning January 31, 2013, through Class Order (CO) 12/752. These requirements are outlined in Regulatory Guide 166. The increases affected some licensees that have foreign exchange authorizations.

The Autonomous Sanctions Regulations of 2011 prohibit: a financial institution from establishing a joint venture, correspondent banking relationship, or a bank account with a Syrian financial institution, or setting up a representative office, branch, or subsidiary in Syria. Syrian financial institutions are prohibited, without a sanctions permit, from opening a representative office, branch, or subsidiary in Australia. They are also prohibited from acquiring interests in Australian financial institutions and establishing a joint venture or correspondent banking relationship with Australian financial institutions. They are also prohibited from the sale of an interest in an Australian financial institution to a Syrian financial institution. They are also prohibited from opening a representative office, branch, or subsidiary in Syria.

<td>in 2008 provide for limited exemptions to be made under the Insurance Regulations 2002; these enable general insurance business that cannot be appropriately placed in Australia to be provided by an unauthorized foreign insurer. The types of insurance business that can be provided by an unauthorized foreign insurer are insurance contracts for atypical risks, high-value insureds, and other risks that cannot reasonably be placed in Australia. There are also exceptions for large businesses and global companies headquartered in Australia. Foreign life insurers must generally operate through Australian-incorporated subsidiaries. The Life Insurance Regulations 1995 provide that only Chinese, Japanese, Korean, New Zealand, and US life insurers may operate through branches in Australia. Insurers are also subject to the licensing, conduct, and disclosure requirements in the Corporations Act 2001 in their dealings with retail clients.</td>
<td></td>
</tr>
</tbody>
</table>

The Treasurer’s approval is required to hold more than 20% of the voting shares of an Australian bank. The Treasurer may grant approval only if the shareholding is in the national interest or for recently established companies that are below a specified asset size threshold if the shareholders are deemed fit and proper.
Most pension (superannuation) funds, other than self-managed funds that are regulated by the Australian Taxation Office (ATO), require APRA licensing under the Registrable Superannuation Entity (RSE) licensing regime. The trustees of these funds must also hold an AFSL that is issued by ASIC and must satisfy conduct and disclosure obligations in the Corporations Act 2001.

Effective July 1, 2021, the licensing regime was expanded to require all APRA regulated trustees to hold an AFSL to operate a superannuation fund and removed previous exemptions for non-public offer trustees. This reform was implemented to ensure that all trustees are treated the same way and held to the same standards. Australian financial service (AFS) licensing exemptions in the Corporations Regulations for non-public offer trustees were removed, making them subject to the same legal obligations as trustees of public offer funds. These reforms also extended the scope of conduct obligations that apply to trustees under the Corporations Act 2001.

The Superannuation Industry (Supervision) Act 1993 restricts related party transactions (for example, lending to members, in-house assets), but there are limited restrictions on investment. Borrowing is generally prohibited. APRA sets prudential standards in relation to investment governance for RSE licensees (see SPS, SPG, and SRS 530), which includes a requirement for the Board of an RSE licensee to approve investment objectives for each investment option offered in each RSE.

MySuper (default superannuation) products must have a diversified investment strategy, which can be a single strategy, or a lifecycle strategy.

To be eligible for concessional taxation, control and management of a complying pension fund must usually be in Australia (or outside Australia for a period of not more than two years).

On November 11, 2021, the way that trustees of superannuation funds must organize portfolio holdings disclosures on fund websites was prescribed. Given these requirements were prescribed, ASIC did not remake longstanding relief in Section 5 of the CO 14/443 that expired effective December 31, 2021. This relief deferred the obligation on trustees in the Corporations Act 2001 to make publicly available portfolio holdings disclosures on fund websites. As a result, December 31, 2021, became the first “reporting day” for the biannual portfolio holdings disclosure requirement. This means that within 90 days of December 31 and June 30 each year, trustees of superannuation funds must now make information about the assets and derivatives of their investment options available on the fund website and maintain that information until it is replaced by the next period disclosure. The information must be organized in accordance with requirements specified in the Corporations Regulations 2001, including that disclosure is consistent with tables for disclosure in Schedule 8D of the Corporations Regulations 2001. There are some exemptions from the portfolio holdings disclosure requirement. For example, self-managed superannuation funds and small APRA funds are not subject to the requirements. Trustees of defined benefit funds and with investment options that have been closed to new members for at least 5 years also do not have to meet the requirement.

Effective July 1, 2022, trustees of superannuation funds are required...
to make publicly available a retirement income strategy for
beneficiaries who are retired or approaching retirement.
Effective January 31, 2022, all account balances held by a type of
superannuation fund known as an “eligible rollover fund” were
required to have been transferred to the ATO and eligible rollover
funds had to close.
As part of its COVID-19 economic response, the Government at the
time introduced measures to allow individuals facing particular
financial hardship because of the COVID-19 pandemic to access
money in their pension funds early – up to $10,000 in 2019–2020
and a further $10,000 in 2020–2021. This initiative lasted between
April 20, 2020, and December 31, 2020, and was regulated by the
ATO. The Government has also temporarily changed the minimum
pension drawdown rates by 50% for the 2019–2020, 2020–2021
ASIC put in place temporary measures to assist the provision of
affordable advice on early access to pension fund money: allowing
advice providers not to give a statement of advice (SOA) to clients
when providing advice about early access to their pension funds (in
force from April 15, 2020, and withdrawn effective April 15, 2021);
permitting registered tax agents to give advice to existing clients
about early access to their pension fund without needing to hold an
AFSL (in force from April 15, 2020, and withdrawn effective April
15, 2021); and issuing a temporary no-action position for trustees to
expand the scope of personal advice that may be provided by, or on
behalf of, the superannuation trustee as “intra-fund advice” (intra-
fund advice is provided free of charge to the recipient of the advice)
between April 14, 2020, and December 31, 2020.

| Limits (max.) on securities issued by nonresidents | No. |
| Limits (max.) on investment portfolio held abroad | No. |
| Limits (min.) on investment portfolio held locally | No. |
| Currency-matching regulations on assets/liabilities composition | No. |
| Investment firms and collective investment funds | Yes. |

The operation of investment firms is subject to strict legal
requirements under the Corporations Act 2001 (Act) that outline
operations, licensing and compliance obligations, including the
FFSPs regulatory framework.
The operation of collective investment vehicles that issue interests or
shares to retail clients are subject to registration, licensing, conduct,
and disclosure provisions under Chapter 5C of the Act for MISs and
the new Chapter 8B of the Act, which introduced a regime for CCIVs
effective July 1, 2022. A retail CCIV must have a compliance plan
which sets out adequate measures that the corporate director is to
apply in fulfilling its responsibilities in relation to the CCIV to
ensure compliance with this Act and the CCIV’s constitution.
Wholesale schemes and wholesale CCIVs are subject to certain
licensing and conduct requirements under the relevant provisions of
the Act. Under the new Chapter 8B, wholesale CCIVs must also be
registered, and operators licensed and subject to additional statutory
duties for investor protection. Operators may also be required to
obtain licenses under other legislation, depending on the nature of
their investments.
For taxation purposes, nonresidents investing through a MIS or
CCIV are treated differently to resident investors. Generally,
nonresidents are subject to Australia’s withholding tax rules, with
income arising from passive income investments (such as shares,
rent, or interest) subject to a form of withholding tax, while capital gains are taxed only in respect of nonportfolio interests in taxable Australian property. Australia only imposes taxes on Australian sourced income. Domestic (that is, resident) investors are taxed on all incomes at their marginal tax rate.

From a tax perspective, there are restrictions on the extent to which a trust can be “closely held” for the purposes of accessing concessional withholding tax rates. One such example is that a trust must not have one nonresident individual holding 10% or more of the participation interests. This restriction applies to both a registered MIS that is a retail trust and a MIS that is a wholesale trust. This is a tax measure and does not constitute a control on ownership.

| 04/25/2022 | The MFN treatment previously accorded to goods imported from the Russia was removed and a temporary additional customs duty of 35% applies in addition to the general rate of customs duty that applies to goods that are the produce or manufacture of Russia and Belarus, where these have left for direct shipment to Australia from a place of manufacture or warehouse in a country from which the goods were
exported between April 25, 2022, and October 24, 2022, and are entered for home consumption in Australia within this period.

07/01/2022 Australia provides a reduced rate of duty to goods produced or manufactured in Ukraine in accordance with Australian Customs Notice 2022-32.

07/01/2022 A revised concession was implemented permanently and expanded in scope to also include medical and hygiene goods capable of limiting the spread of certain pathogens and viruses, ingredients used in the manufacture of medicaments, vaccines and other goods, and packaging used in the manufacture of medicaments, vaccines, and other goods.

Exports and Export Proceeds

The Australian Government introduced a new export legislative framework to streamline regulation of exports. The new framework makes the laws more relevant, responsive, and effective, but provides the same level of regulatory oversight. The new export legislation includes the Export Control Act 2020, which sets out the overarching legal framework for the regulation of exported goods, including food and agricultural products, from Australia. It enables the Secretary of the Department of Agriculture, Water and the Environment to make rules that detail the requirements and establish conditions for exporting certain goods from Australian. The Export Control Rules 2021 are legislative instruments made by the Secretary under Section 432 of the Act and set out the operational requirements that must be met to export specific goods from Australia. These conditions ensure any importing country requirements are satisfied, and that the export conforms with requirements and industry standards and meets Australia’s international obligations.

Capital Transactions

The temporary reduction to zero of the monetary threshold of the notification requirement under the foreign investment review framework, introduced on March 29, 2020, was removed. The monetary threshold that determines whether approval is required now depends on the type of investment and the foreign investor’s jurisdiction. However, investments that may raise national security concerns continue to be subject to the zero monetary threshold. Guidance Note 8 provides more details on national security investments, including when mandatory notification is required.

New regulation (Foreign Acquisitions and Takeovers Regulation 2015) came into effect setting monetary thresholds for which Foreign Investment Review Board approval is required for foreign entities proposing to obtain a significant interest in a collective investment vehicle.

Comprehensive reforms to Australia’s foreign investment review framework came into force, including a new national security test,
stronger enforcement and compliance powers, a new amalgamated register of foreign owned assets, a fairer and simpler foreign investment application fees, and streamlined approval for lower risk foreign investors.

01/01/2021 All specified monetary thresholds that are indexed on an annual basis were increased within the scope of the foreign investment screening framework.

01/01/2021 The temporary, zero-dollar monetary threshold in force since March 29, 2020, was rewound, and the monetary thresholds that are indexed annually took effect. However, mandatory screening of investments in sensitive national security businesses continue at the $0 monetary threshold.

01/01/2022 All specified monetary thresholds that are indexed on an annual basis were increased within the scope of the foreign investment screening framework.

04/01/2022 The Foreign Acquisitions and Takeovers Amendment Regulations 2022 came into force. They clarify certain aspects of the foreign investment review framework and streamline the process for certain less sensitive types of investment. Inter alia, they are intended to reduce the regulatory burden for foreign investors that engage in moneylending, invest in unlisted land entities or Australian media businesses, acquire shares or units under rights issues and other pro-rata offers, or transact on behalf of institutional investors as part of a custodian service (through amendments that refine the rules for the notification of these kinds of foreign investments, including raising thresholds and providing broader exemptions from foreign investment screening).

Controls on real estate transactions

Purchase locally by nonresidents

01/01/2021 The thresholds for direct interest in developed commercial land that are indexed on an annual basis were increased.

01/01/2022 The thresholds for direct interest in developed commercial land that are indexed on an annual basis were increased.

Provisions Specific to the Financial Sector

Pensions specific to institutional investors

Pension funds

04/15/2021 During COVID-19, Australian Securities and Investments Commission put in place temporary measures to assist the provision of affordable advice on early access to pension fund money: allowing advice providers not to give a statement of advice to clients when providing advice about early access to their pension funds; permitting registered tax agents to give advice to existing clients about early access to their pension fund without needing to hold an Australian financial services license. These measures started on April 15, 2020, and were withdrawn on this date.

07/01/2021 The licensing regime was expanded to require all Australian Prudential Regulation Authority regulated trustees to hold an Australian financial services license to operate a superannuation fund and removed previous exemptions for non-public offer trustees. This reform was implemented to ensure that all trustees are treated the same way and held to the same standards. Australian financial service licensing exemptions in the Corporations Regulations for non-public offer trustees were removed, making them subject to the same legal obligations as trustees of public offer funds. These reforms also extended the scope of conduct obligations that apply to trustees under the Corporations Act 2001.

12/31/2021 On November 11, 2021, the way that trustees of superannuation funds must organize portfolio holdings disclosures on fund websites was prescribed. Given these requirements were prescribed, Australian...
Securities and Investments Commission did not remake longstanding relief in Section 5 of the Class Order 14/443 that expired on this date. This relief deferred the obligation on trustees in the Corporations Act 2001 to make publicly available portfolio holdings disclosures on fund websites. As a result, December 31, 2021, became the first “reporting day” for the biannual portfolio holdings disclosure requirement. This means that within 90 days of December 31 and June 30 each year, trustees of superannuation funds must now make information about the assets and derivatives of their investment options available on the fund website and maintain that information until it is replaced by the next period disclosure. The information must be organized in accordance with requirements specified in the Corporations Regulations 2001, including that disclosure is consistent with tables for disclosure in Schedule 8D of the Corporations Regulations 2001.

01/31/2022 All account balances held by a type of superannuation fund known as an “eligible rollover fund” were required to have been transferred to the Australian Taxation Office and eligible rollover funds had to close.

07/31/2022 Trustees of superannuation funds are required to make publicly available a retirement income strategy for beneficiaries who are retired or approaching retirement.

07/01/2022 A retail corporate collective investment vehicle (CCIV) must have a compliance plan which sets out adequate measures that the corporate director is to apply in fulfilling its responsibilities in relation to the CCIV to ensure compliance with this Act and the CCIV’s constitution. Wholesale CCIVs must also be registered, and operators licensed and subject to additional statutory duties for investor protection.
### AUSTRIA

**Position as of July 31, 2022**

#### Exchange Measures

- **Restrictions and/or multiple currency practices**: No.
- **Exchange measures imposed for security reasons**: Yes.  
  - In accordance with IMF Executive Board Decision No. 144-(52/51)
- **Other security restrictions**: Yes.  
  - With regard to EU internal terrorism, these restrictions are established by Oesterreichische Nationalbank, Austrian Central Bank (OeNB) regulations based either on the Austrian Exchange Control Act (Devisengesetz 2004), as amended, or on the Sanctions Act of 2010 (Sanktionsgesetz 2010), as amended.

#### Exchange Arrangement

- **Currency**: Yes.  
  - The currency of Austria is the euro.
- **Other legal tender**: No.
- **Exchange rate structure**: Yes.
  - Unitary
  - Dual
Multiple

**Classification**

- No separate legal tender
- Currency board
- Conventional peg
- Stabilized arrangement
- Crawling peg
- Crawl-like arrangement
- Pegged exchange rate within horizontal bands
- Other managed arrangement

**Floating**

- Free floating: Yes. The exchange rate arrangement of the euro area is free floating. Austria participates in a currency union (EMU) with 18 other members of the EU and has no separate legal tender. The ECB publishes information regarding its interventions; it last intervened in March 2011. When it intervenes, the ECB intervenes at the quotes of the market makers.

**Official exchange rate**

- Yes. The ECB publishes a reference rate based on the daily concertation procedure between CBs within and outside the European System of Central Banks, which normally takes place at 2:15 p.m. Central European Time. On July 1, 2016, the ECB changed the publication time of the euro foreign exchange reference rates (ECB reference rates) from around 2.30 p.m. Central European Time to around 4.00 p.m. Central European Time. The reference rate against the euro is the average of the buying and selling rates. The publication regime aims to reinforce the distinction between exchange rate fixings used as benchmarks for transaction purposes and the ECB reference rates that are published for information purposes only.

**Monetary policy framework**

- Exchange rate anchor
  - U.S. dollar
  - Euro
  - Composite
  - Other

- Monetary aggregate target

- Inflation-targeting framework
  - Target setting body
    - Government
    - Central Bank
Effective July 7, 2021, price stability is defined as a symmetric 2% inflation target over the medium term. (Previously, it was defined as inflation rate below but close to 2% over the medium term.)
### Exchange Subsidy

No.

### Foreign Exchange Market

<table>
<thead>
<tr>
<th>Market</th>
<th>Status</th>

<td>Yes.</td>
</tr>
<tr>
<td>Market making</td>
<td>Yes.</td>
</tr>
<tr>
<td>Forward exchange market</td>
<td>Yes.</td>
</tr>
</tbody>
</table>

**Interbank Market:**

Interventions are initiated by the ECB – for Austria, the OeNB handles these operations.

**Over the Counter:**

Interbank foreign exchange transactions may take place over the counter.

**Brokerage:**

The brokerage system may be used for interbank foreign exchange transactions.

**Market Making:**

The interbank foreign exchange market operates on the basis of a market-making agreement.

**Forward Exchange Market:**

Forward exchange transactions are permitted. The CB participates in the forward foreign exchange market.

### Arrangements for Payments and Receipts

#### Prescription of Currency Requirements

No. Settlements with all countries may be made either in foreign currency or through free euro accounts.

**For Current Transactions and Payments:**

No.

**For Capital Transactions:**

No.

**Transactions in Capital and Money Market Instruments:**

No.

**Transactions in Derivatives and Other Instruments:**

No.

**Credit Operations:**

No.

**Use of Foreign Exchange among Residents:**

No.

### Payments Arrangements

No.

**Bilateral Payments Arrangements:**

No.

**Operative:**

No. There are no bilateral payments agreements; however, several bilateral agreements exist for the promotion and protection of investments, which include provisions on transfers among the signatories.

**Inoperative:**

No.

**Regional Arrangements:**

No.
Clearing agreements No.

Barter agreements and open accounts No.

Administration of control Yes. Exchange transactions in the private economy take place through banks (credit institutions) licensed by the FMA. The OeNB and the Federal Ministry of the Interior are in charge of the administration of the control of financial sanctions (see Section II B).

Payments arrears No.

Official No.

Private No.

Controls on trade in gold (coins and/or bullion) No.

On domestic ownership and/or trade No.

On external trade No.

Controls on exports and imports of banknotes No.

In accordance with EC Regulation No. 1889/2005, cash controls have been implemented based on a mandatory declaration system for amounts of cash entering or leaving the EU with a value of €10,000 or more. Travelers entering or leaving the EU and carrying more than €10,000 are required to make a declaration to the relevant authorities of the member country through which they enter or leave the EU. The authorities must keep a record of such information and report it to their national FIU. The obligation to declare is not fulfilled if the traveler makes no declaration or if the information provided is incorrect or incomplete. To check compliance with the regulation, the national authorities have the right to search natural persons, their baggage, and their means of transportation. In the event of failure to comply with the declaration obligation, cash may be confiscated. The EU regulation requires member countries to impose penalties for failure to comply with the declaration obligation. If there are indications that cash is related to illegal activity, authorities of one member country may exchange information with authorities in other member countries. Under the framework of existing agreements on mutual administrative assistance, information obtained under the EU regulation may also be communicated to a third country in compliance with relevant national and EU provisions on the transfer of personal data to third countries. The EU regulation does not apply to physical cross-border transportation from one EU member country to another (that is, intra-EU transportation). Such transportation is not considered “cross-border” for the purposes of the EU regulation; the EU regulation only harmonizes the system for the EU’s external borders.

On exports No.

Domestic currency No. Travelers entering or leaving the EU and carrying more than €10,000 are required to make a declaration to the relevant authorities of the member country through which they enter or leave the EU.

Foreign currency No. Travelers entering or leaving the EU and carrying more than €10,000 are required to make a declaration to the relevant authorities of the member country through which they enter or leave the EU.

On imports No.

Domestic currency No. Travelers entering or leaving the EU and carrying more than €10,000 are required to make a declaration to the relevant authorities of the member country through which they enter or leave the EU.
Travelers entering or leaving the EU and carrying more than €10,000 are required to make a declaration to the relevant authorities of the member country through which they enter or leave the EU.

Resident Accounts

Foreign currency

Foreign exchange accounts permitted: Yes.
Held domestically: Yes. Balances may be freely transferred abroad.
Approval required: No.
Held abroad: Yes. For private pension funds, there are requirements for internal investment guidelines.
Approval required: No.
Accounts in domestic currency held abroad: Yes.
Accounts in domestic currency convertible into foreign currency: Yes.

Nonresident Accounts

Foreign exchange accounts permitted: Yes.
Approval required: No.
Domestic currency accounts: Yes.
Convertible into foreign currency: Yes.
Approval required: No.
Blocked accounts: Yes.

Imports and Import Payments

Foreign exchange budget: No.
Financing requirements for imports: No.
Minimum financing requirements: No.
Advance payment requirements: No.
Advance import deposits: No.
Documentation requirements for release of foreign exchange for imports: No.
Domiciliation requirements: No.
Preshipment inspection: No.
Letters of credit: No.
Import licenses used as exchange licenses: No.
Other: No.
Import licenses and other nontariff measures: Yes. Export and import licenses must be issued by the Federal Ministry of Economic Affairs and Energy for industrial products and by the
Federal Ministry of Agriculture, Forestry, Environment and Water Management for agricultural products. As a member of the EU, Austria applies import regulations based on the common commercial policy, that is, import restrictions for industrial products in the textile and clothing sectors and statistical surveillance for products under the scope of the ECSC Treaty. There are also regulations based on the current EU law with regard to China for imports of some consumer products.

Positive list: Yes. Refer to cross-border payments in euros.

Negative list: No.

Open general licenses: No.

Licenses with quotas: Yes.

Other nontariff measures: No.

Import taxes and/or tariffs: Yes. Austria applies the Common Import Regime of the EU.

Taxes collected through the exchange system: No.

State import monopoly: No.

Exports and Export Proceeds

Repatriation requirements: No.

Surrender requirements: No.

Surrender to the central bank: No.

Surrender to authorized dealers: No.

Financing requirements: No.

Documentation requirements: No.

Letters of credit: No.

Guarantees: No.

Domiciliation: No.

Preshipment inspection: No.

Other: No.

Export licenses: Yes. Licenses for exports must be obtained from the relevant ministry or, at the time of clearance, from the customs authorities. For most exports, licenses are not required. Export licenses are issued in accordance with the provisions of relevant EU trade agreements, the fulfillment of quotas under such agreements, and the needs of the Austrian economy.

Without quotas: Yes.

With quotas: Yes.

Export taxes: No.

Collected through the exchange system: No.
Other export taxes  No.

Transfer abroad by emigrants No.

Transfer into the country by immigrants No.

Transfer of gambling and prize earnings No.

Provisions Specific to the Financial Sector

Provisions specific to commercial banks and other credit institutions Yes.

In October 2021, the European Commission adopted legislative proposals to amend the CRR III and the CRD VI (EU banking package 2021). This package essentially served to complete the implementation of the globally agreed final Basel III reform package in the EU, which is aimed, above all, at strengthening the risk-based approach of banking regulation. As envisaged in the European Commission’s legislative proposals, the CRR III framework will start to apply from January 1, 2025. However, numerous exemptions and transitional provisions will postpone the full rollout in the EU until 2030 and 2033, respectively. The European Commission expects its legislative proposals for implementing the latest Basel III rules, which also reflect a number of EU-specific rules, to lead to an increase in EU banks’ minimum levels of capital requirements of between 0.7% and 2.7% by 2025 and of between 6.4% and 8.4% by 2030.

In Member states whose currency is the euro, the Single Supervisory Mechanism (SSM), the Single Resolution Mechanism (SRM), and the Common Deposit Guarantee Scheme (which is not yet in place) form the European Banking Union. Non-euro Member States may participate if close cooperation has been established. The legal basis for the SSM is Council Regulation (EU) No. 1024/2013; for the SRM, it is Regulation (EU) No. 806/2014.

Within the SSM, the ECB directly supervises all so-called significant institutions, while less significant institutions (LSI) remain within the remit of the national supervisory authorities under the ECB’s oversight. The Single Resolution Board mandate covers significant institutions and cross-border operating groups. The SRM differs in comparison with the SSM because the decisions of the Single Resolution Board need to be implemented by national resolution authorities to become legally effective.
The regulatory framework for credit institutions in Austria, the Federal Banking Act (Bankwesengesetz – BWG), and the national regulations based on this act were revised because of the new European framework. According to Article 69 (5) BWG, FMA follows the guidelines and recommendations and other measures passed by the European Banking Authority (EBA), as well as comply with the warnings and recommendations issued by the European Systemic Risk Board.

According to Article 9 (1) BWG, credit institutions (as defined in Article 4 (1) No. 1 CRR) that are authorized and established in an EU Member state may conduct activities listed in Annex I CRD IV by the establishment of a branch or under the freedom to provide services.

The Federal Act on the Recovery and Resolution of Banks (Bank Recovery and Resolution Act) transposed the Bank Recovery and Resolution Directive into Austrian law. The Federal Act on the Recovery and Resolution of Banks (Bank Recovery and Resolution Act) conveys far-reaching powers to FMA to deal with credit institutions in crisis. To this effect, institutions must submit recovery plans to FMA, while the FMA draws up resolution plans.

The Deposit Guarantee Schemes and Investor Compensation Act (Einlagensicherungs- und Anlegerentschädigungsgesetz – ESAEG) is in force, which transposes the Deposit Guarantee Schemes Directive (Directive 2014/49/EU). Additionally, laws exist concerning specific requirements for special credit institutions (for example, the Federal Act on Savings and Loan Associations).

Regulation (EU) No. 260/2012 establishing technical and business requirements for credit transfers and direct debits in euros is in force, which set up the single euro payments area (SEPA) that replaced national payment services with a common EU-wide payment service.

| Borrowing abroad | No. |
| Maintenance of accounts abroad | No. |
| Lending to nonresidents (financial or commercial credits) | No. |
| Lending locally in foreign exchange | Yes. |

Lending locally in foreign currency is governed by the FMA’s Minimum Standards for the Risk Management and Granting of Foreign Currency Loans and Loans with Repayment Vehicles (FMA-FXTT-MS). The minimum standards aim to impose strict criteria on new foreign currency loans (FCLs) to unhedged private consumers and to require banks to develop strategies to reduce the current high volume of outstanding FCLs. FMA minimum standards are not regulations in the legal sense, but are the supervisory authority’s recommendations on limiting risk. They are based on the FMA’s mandate to protect the national economic interest and the stability of the financial market (BWG Article 69, paragraph 1) and are linked to the due diligence requirements of managers as specified in BWG Article 39. The exposure of domestic private households to FCLs had been deemed unsustainable by the Austrian authorities. Accordingly, strict regulatory measures were taken (tough interpretation of the minimum standards that restrict FCLs to hedged households or the most creditworthy households).

| Purchase of locally issued securities | No. |
| Differential treatment of deposit accounts | Yes. |

| Reserve requirements | Yes. |

Reserve requirements apply to deposits and debt securities up to two...
years in all currencies. Liabilities from other credit institutions that are already required to hold minimum reserves and liabilities vis-à-vis the ECB are exempt. The current reserve requirement is 1% minus an allowance deduction of €100,000.

Effective July 27, 2022, the two-tier system, which was in place since 2019, was discontinued as the deposit facility rate (DFR) was set to 0%. Previously, pursuant to the Governing Council decision ECB/2019/31 published October 15, 2019, a part of the excess reserves holdings, up to a multiple of the required reserves, was exempt from the negative remuneration. On the basis of this decision, the interest rate of excess reserves holdings up to six times of the required reserves was 0%.

companies are regulated in the Versicherungsunternehmen Kapitalanlageverordnung (VU-KAV), subordinated to the Insurance Supervision Act 2016. While under Solvency II the prudent person principle applies to investments, the VU-KAV regulation specifies qualitative requirements for investments (for example, concentration risks, credit risk analysis, derivatives, securities lending, risk management, and specifically prudent requirements for funds covering technical provisions). For small mutual associations and small insurance companies outside the scope of Solvency II restrictions on eligible investments and quantitative limits (Article 7 and 90 VAG 2016, Article 3 Small Mutual Associations Investment Regulation – kV-KAV, Article 3 Small Insurance Undertakings Investment Regulation) continue to be in place.

For small mutual associations, the following thresholds apply: Individual investments may only be made up to the percentages stated below, based on the carrying amount of the total investment (“individual threshold”): up to 2% each: shares and other variable-yield participations of companies admitted to trading on a regulated market, up to 10% each: (1) debt securities of the same issuer, (2) shares and other variable-yield participations of the same company (eligible participations), (3) units in investment funds of the same fund, (4) loans of the same issuer; up to 30% each: bank balances; up to 35% each: real estate and immovable property rights. The following total investments may only be made up to the percentages stated below, based on the carrying amount of the total investment (“total threshold”): (1) up to 3% in total: cash balances; (2) up to 10% in total: debt securities (corporate bonds not admitted to trading on a regulated market); (3) up to 25% in total: shares and other variable-yield participations (excl. real estate companies) including any shares held indirectly via investment funds; (4) up to 30% in total: (a) real estate and immovable property rights, (b) shares and other variable-yield participations in real estate companies, (c) units in real estate funds, and (d) mortgage loans and immovable property rights; (5) up to 50% each in total: (a) debt securities (corporate bonds) and loans to regional or local authorities of an OECD member state. Similar regulations apply to Small Insurance Undertakings not subject to Solvency II (Article 4 Small Mutual Associations Investment Regulation – kV-KAV, Article 4 Small Insurance Undertakings Investment Regulation – kVU-KAV).

Controls apply to (1) the acquisition of real estate outside the EU, if the asset in question is to form part of the cover of the prescribed solvency margin for a local branch of a third country insurance company established in Austria with the solvency regime in the third country not considered equivalent by the European Commission (Article 13 paragraph 4 and Article 14 paragraph 1 No. 6 VAG 2016); (2) the acquisition of real estate abroad, if the asset in question is to form part of the guarantee funds of a local branch of a third country insurance company established in Austria with the solvency regime in the third country not considered equivalent by the European Commission (Article 13 paragraph 4 and Article 14 paragraph 1 No. 6 VAG 2016); (3) loans granted to nonresidents, or for which the designated collateral is located abroad, if the asset in question is to form part of the guarantee funds of a local branch of a third country insurance company established in Austria with the solvency regime in the third country not considered equivalent by the European Commission (Article 13 paragraph 4 and Article 14 paragraph 1 No. 6 VAG 2016); and (4) loans to residents outside the EU, or for which the designated collateral is located outside the EU, if the asset in question is to form part of the cover of the prescribed solvency margin for a local branch of a third country insurance company established in Austria with the solvency regime in the third country not considered equivalent by the European Commission (Article 13 paragraph 4 and Article 14 paragraph 1 No. 6 VAG 2016).
established in Austria with the solvency regime in the third country not considered equivalent by the European Commission (Article 13 paragraph 4 and Article 14 paragraph 1 No. 6 VAG 2016).

| Limits (min.) on investment portfolio held locally | No. |
| Currency-matching regulations on assets/liabilities composition | No. |
| Pension funds | No. |

The management board of the Pensionskasse (pension company) ensures that the investment of the assets allocated to an investment and risk-sharing group is performed by persons who are professionally qualified to do so and who have the relevant professional experience, in particular in the areas of portfolio management and risk management, as well as asset liability management and that appropriate technical resources are available for risk management. The investment of the assets allocated to an investment and risk-sharing group must be effected within prudent person rule and must take account of the other provisions of the current Federal Pensionskassen Act.

The Federal Pensionskassen Act has been amended within the course of the implementation of the IORP II Directive (EU) 2016/2341. There are requirements for internal investment guidelines. The Pensionskasse must draw up and implement guidance in writing about the investment of assets allocated to an investment and risk-sharing group, which where applicable must at least cover the following areas: (1) investment objectives taking into account the commitments arising from the Pensionskasse contracts; (2) criteria for the security, quality, liquidity, profitability, and availability of the entire assets allocated to the investment and risk-sharing group; (3) strategic asset allocation, suitable parameters for deviation from such an allocation, and the respective rules for determining such parameters; (4) definition of the investment universe according to the following investment categories: (a) cash at banks, (b) loans and credits, (c) securities representing money claims (from regional or local authorities, from credit institutions, from other undertakings), (d) shares and other equity securities, (e) real estate, (f) other assets. Investments in unit certificates in investment funds, real estate funds, and AIFs must be split up according to the investment categories; (5) investment procedures with regard to the selection, mixture, and diversification of assets; (6) determination of an appropriate limit system with quantitative investment thresholds with regard to paragraph 1 No. 7, at least with regard to the investment categories pursuant to No. 4 for both issuers and counterparties; (7) criteria for the computations of investments in unit certificates of investment funds, real estate funds, and AIFs for thresholds for issuers and counterparties pursuant to No. 6 including the general defining of materiality thresholds; (8) conditions for the investment in (a) assets pursuant to paragraph 1 No. 5, (b) derivative products pursuant to paragraph 1 No. 6, as well as (c) securities lending and securities repurchasing transactions; (9) description of the escalation processes in the event that the determined thresholds are exceeded; (10) criteria for the canceling of the dedication of securities as hold-to-maturity investments (Article 23 paragraph 1 No. 3a).

The FMA determines by regulation minimum risk management standards.

Limits (max.) on securities issued by nonresidents

There are requirements for internal investment guidelines. The Pensionskasse must draw up and implement guidance in writing that determines an appropriate limit system with quantitative investment thresholds.

Limits (max.) on investment portfolio

There are requirements for internal investment guidelines. The
Pensionskasse must draw up and implement guidance in writing that determines an appropriate limit system with quantitative investment thresholds.

| Limits (min.) on investment portfolio held locally | No. |
| Limits (max.) on securities issued by nonresidents | No. |

### Changes during 2021 and 2022

#### Exchange Measures

**Exchange measures imposed for security reasons**
- In accordance with IMF Executive Board Decision No. 144-(52/51)
  - 03/16/2021

#### Exchange Arrangement

**Monetary policy framework**
- 07/07/2021
- Price stability is defined as a symmetric 2% inflation target over the medium term. (Previously, it was defined as inflation rate below but close to 2% over the medium term.)

#### Provisions Specific to the Financial Sector

**Provisions specific to commercial banks and other credit institutions**
- 05/28/2021
- Directive (EU) 2019/878, amending Directive (EU) 2013/36 (CRD V), was passed by the Austrian Parliament and Federal Council, and was published in the Federal Gazette on this date. It aims to further improve and harmonize the European financial supervisory framework.

**Differential treatment of deposit accounts in foreign exchange Reserve requirements**
- 07/27/2022
- The two-tier system, which was in place since 2019, was discontinued as the deposit facility rate was set to 0%. Previously, pursuant to the Governing Council decision ECB/2019/31 published October 15, 2019, a part of the excess reserves holdings, up to a multiple of the required reserves, was exempt from the negative remuneration. On the basis of this decision, the interest rate of excess reserves holdings up to six times of the required reserves was 0%.

Exchange Measures

| Restrictions and/or multiple currency practices | No. |
| Exchange measures imposed for security reasons | Yes. |
| In accordance with IMF Executive Board Decision No. 144-(52/51) | No. |
| Other security restrictions | Yes. |

Restrictions have been imposed on financial transactions and accounts held by individuals and organizations associated or suspected of association with terrorism and terrorism financing or money or other property laundering, pursuant to UNSC resolutions and to the list of current organizations associated with terrorism maintained by the US Secretary of State and the Central Bank of the Republic of Azerbaijan (CBA), which is in charge of the supervision system over prevention of legalization of criminally obtained funds and other property and financing of terrorism. Moreover, the FIU, established on May 26, 2018, is an independent public legal entity that aims to improve the potential of relevant government agencies which are taking measures against legalization of criminally obtained funds or other property and financing of terrorism, to create a coordination mechanism for effective connection of activities, to increase the efficiency of cooperation and information exchange among them, and to widen international cooperation. The FIU is the authority that implements the powers identified by the legislation on the prevention of legalization of criminally obtained funds and other property and financing of terrorism and participates in policy formulation.

Stabilized arrangement: Yes. Azerbaijan’s de jure exchange rate arrangement is free floating. The exchange rate of manat is determined on the basis of the supply and demand in the interbank foreign exchange market. The sale of foreign currency is realized at auctions organized by the Central Bank to fulfill the transfer obligations of the State Oil Fund to the state budget. The amount of currency to be offered at the auction is announced in advance to the market participants. The results of currency auctions are published immediately. In addition, the Central Bank has the right to intervene in the interbank foreign exchange market, if necessary. Information on the Central Bank’s intervention in the foreign exchange market is regularly published. The de facto exchange rate arrangement is classified as a stabilized arrangement.

Crawling peg

Other managed arrangement
Floating
Free floating

Official exchange rate: Yes. The weighted average USD/AZN rate of both the auction transactions and interbank trades executed on Bloomberg is the official exchange rate for the next day. It is calculated on Bloomberg, and the CBA announces it at 5 p.m. each working day. Entities and banks use the official exchange rate as a reference point.

Other monetary framework Yes. According to the law on the CBA, the main goal of monetary policy is price stability. The inflation target for 2021 was 4 ± 2%. The Central Bank uses intermediate targets such as the exchange rate and the monetary base to keep inflation within the target.

Exchange tax No.

Exchange subsidy No.

Foreign exchange market Yes. Commercial banks freely determine their bid-ask spreads and commissions. There is no concrete legal framework for foreign exchange regulation. However, a definition of foreign exchange contracts is given in the “Rules on margin trading,” as follows: a financial instrument that provides the party to the contract to pay the difference between the initial and final prices of the underlying asset determined by the contract.

Spot exchange market Yes. The foreign exchange market consists of the interbank (between commercial banks) and the intrabank (between commercial banks and their clients) markets. All commercial banks (26) may participate
in both the interbank and intrabank markets.

Operated by the central bank: Yes.

Foreign exchange standing facility: No. The standing facility was eliminated when the CBA started holding foreign currency auctions through the Bloomberg Auction Platform.

Allocation: No.

Auction: Yes. On January 12, 2017, the CBA introduced one-sided, multiple-price, and competitive auction format, where banks can send up to three different bids with no price and amount restriction. Only banks are allowed to participate in the auctions. Banks are notified about the auction at least thirty minutes before the auction, specifying the time, the direction of operation, as well as the amount of offered currency. The auctions are held two times a week. At the end of the auction, the balance on the correspondent account of each bank is checked. A bank with insufficient funds compared to its order is excluded from the auction. The results of the auctions are published on the CBA website, and the amount sold is published on the website of the State Oil Fund of Azerbaijan. Banks are free to decide to make any transaction with the foreign exchange obtained at the auction. The weighted average rate of both the auction transactions and interbank trades executed on Bloomberg is the official exchange rate for the next day.

Fixing: No.

Interbank market: Yes. All commercial banks (26) are allowed to freely execute foreign exchange transactions among themselves in the interbank foreign exchange market. All trades are fulfilled on Bloomberg.

As of June 30, 2022, 24 commercial banks traded in interbank foreign exchange market on Bloomberg.

Over the counter: Yes. The interbank foreign exchange market operates over the counter.

Brokerage: No.

Market making: No.

Forward exchange market: Yes. All commercial banks may execute foreign exchange forward transactions. However, this market is in the initial stages of development.

Official cover of forward operations: No.

Arrangements for Payments and Receipts

Prescription of currency requirements: Yes. Resident and nonresident individuals and legal entities may transfer national currency abroad without limitations through assigned banks or the national operator of postal communication for current and capital transactions.

For current transactions and payments: No.

For capital transactions: No.

Transactions in capital and money market instruments: No.

Transactions in derivatives and other instruments: No.

Credit operations: No.

Use of foreign exchange among residents: Yes. There are no restrictions on the use of foreign currency (exchange,
possession, lending, bank accounts, and deposits, obtained from a bank or exchanged in a bank or currency exchange bureau) among residents. Legal entities and individuals must identify the source of foreign currency to place it in a bank account in accordance with the Law of the Republic of Azerbaijan on Combating the Legalization of Illicitly Gained Money or Other Property and Terrorism Financing of February 10, 2009. Under Article 19.2 of the Constitution, the manat is the only means of payment (settlement) for goods and services.

| Accounts in domestic currency held | No. | |
abroad

Accounts in domestic currency convertible into foreign currency

Yes. Funds in domestic currency accounts may be converted to foreign currency.

Nonresident Accounts

Foreign exchange accounts permitted

Yes. Foreign exchange in these accounts may be transferred abroad or sold to banks for manat. Nonresidents engaged in commercial activities must present duplicate certificate from tax authorities to open foreign currency accounts. Duplicate certificate is not required for nonresidents not engaged in business activities. The CBA establishes governing rules for foreign exchange operations and conducting operations with foreign currency accounts and issues rules for opening foreign currency accounts as well. Subjects, operating in financial markets are supervised (persons licensed in the securities market, credit institutions, professional participants of the insurance market, investment funds, and investment fund managers), may open foreign currency accounts outside the Republic of Azerbaijan in the cases and under the terms and conditions set by relevant legislation.

Export taxes

Exports of certain listed goods (such as narcotics, explosives, weapons, nuclear substances, and waste) require special approval.

Imports of under invoiced goods are subject to specific tariffs.

Residents are required to repatriate all proceeds from exports within 180 days and transfer them to a licensed bank in Azerbaijan within 10 days of receipt. Expenses, commissions, and taxes paid abroad relating to economic activities may be deducted from the proceeds prior to their transfer to a licensed bank.

Exports of scrap metal are prohibited.
Collected through the exchange system | No.
---|---
Other export taxes | Yes.

Export taxes apply to domestic producers’ exports of crude oil and petroleum products. For crude oil, the basis for the export tax is the difference between the export price (excluding export costs) and the fixed domestic price. For petroleum products, it is the difference between the export price (excluding export costs) and the ex-refinery price (also referred to as the intercompany price). The tax rate is 25%. A progressive export tax also applies.

The limit of participation of the foreign capital in the banking system of the Republic of Azerbaijan must be set by the financial markets supervisory authority. The limit on participation of foreigners and foreign legal entities in local banks, with the exception of foreign banks or foreign bank holding companies, must also be set by the financial markets supervisory authority. However, such limits have not been set by supervisory authority.

Acquisition of securities of resident issuers by foreign investors is not restricted, unless otherwise stipulated by law. Nevertheless, in the charter capital of the insurer, the share of one foreign natural person may not exceed 10% and the general size of the share of foreign
natural persons may not exceed 30% of shares. Except for international financial institutions to which Azerbaijan Republic is a member, foreign insurers and foreign institutional investors (banking and credit institutions, pension funds, and investment funds), the general share of other foreign legal persons in the charter capital of an insurer must be less than 50% of shares.

Sale or issue locally by nonresidents: Yes.

The rules for the issuance of securities of foreign issuers in circulation in the Republic of Azerbaijan are established by the financial market supervisory authority. At the same time, according to the “Rules for the issuance of securities of foreign issuers in circulation in the Republic of Azerbaijan,” a foreign issuer receives the right to put securities, including securities that have already been issued in foreign countries, into circulation in the Republic of Azerbaijan after receiving a certificate from the financial market supervisory authority.

In case of public offering of investment securities (stocks and bonds), the supervisory authority approves prospectus related to such securities. According to the Rules on “Issuance, registration and circulation of Depositary Receipts,” the CBA approves the issuance of depository receipts by registering these securities and approving the prospectus.

Purchase abroad by residents: No.

Sale or issue abroad by residents: Yes.

No more than 40% of the stock of a company incorporated in Azerbaijan may be issued outside Azerbaijan.

Bonds or other debt securities: Yes.

Purchase locally by nonresidents: Yes.

Acquisition of Azerbaijan securities issued by foreign investors is not restricted, unless otherwise stipulated by law.

Sale or issue locally by nonresidents: Yes.

The rules for the issuance of securities of foreign issuers in circulation in the Republic of Azerbaijan are established by the financial market supervisory authority. At the same time, according to the “Rules for the issuance of securities of foreign issuers in circulation in the Republic of Azerbaijan,” a foreign issuer receives the right to put securities into circulation in the Republic of Azerbaijan after receiving a certificate from the financial market supervisory authority.

Real estate transactions are subject to documentation requirements. These transactions are permitted, subject to documentary requirements. Residents are free to transfer abroad (1) for personal reasons, up to the equivalent of US$1,000 a day, and up to the equivalent of US$10,000 a month from accounts with banks on declaration of purpose; (2) to close relatives (that is, spouses, parents, adopters, grandchildren, children, adoptees, sisters, and brothers) up to the equivalent of US$10,000 a month from accounts with banks on the basis of documents confirming the relationship. Only nonresidents are permitted to transfer inheritances (funds received on heritage, or sale of inherited property) abroad. These operations are permitted under the procedure stipulated by the regulations of the CBA and subject to Anti-Money-Laundering and Counter-Terrorism Financing requirements.

Transfers directed at repayment of loans attracted from abroad, and other debt liabilities, interest, commissioning fees, fines, and penalties on the debt liabilities are made on delivery of a contract verifying obtaining of a loan or a document confirming creation of other debt liabilities by residents and nonresidents. These capital transactions are subject to Regulations on Currency Operations of Residents and Nonresidents in the Republic of Azerbaijan. These transfers are subject to documentation requirements. According to the Regulations on Currency Operations of Residents and Nonresidents in the Republic of Azerbaijan, transfers related to awards and other fees paid to nonresidents for results of sport...
competitions are classified as operations of foreign currency-denominated transfers from bank accounts from the Republic of Azerbaijan. Such transfers are made on delivery of a document confirming payment of relevant amounts to the bank. Organizers of gambling and sport-bets are monitored for the purposes of Anti-Money Laundering and Counter Financing of Terrorism (AML/CFT).

</table>
On resident assets and liabilities | Yes. | The limit on convertible currencies is 10% for each foreign currency, up to an aggregate limit of 20%. The limit on nonconvertible currencies is 7% for each currency, up to an aggregate limit of 14%. For bank metals, it is 3% up to an aggregate limit.

On nonresident assets and liabilities | Yes. | The limit on convertible currencies is 10% for each foreign currency, up to an aggregate limit of 20%. The limit on nonconvertible currencies is 7% for each currency, up to an aggregate limit of 14%. For bank metals, it is 3% up to an aggregate limit.

Provisions specific to institutional investors | Yes. | Investments of insurance companies are regulated. Diversification ratios and limitations on investments in government securities; funds in bank accounts; real estate; non-government securities, insurance and reinsurance premiums collected under insurance and reinsurance contracts; share of reinsurers in insurance technical provisions; funds lent to the policy holder or the insured under the endowment insurance apply.

---

Insurance companies | Yes. | The only pension fund is the government-run State Social Protection Fund.

Limits (max.) on securities issued by nonresidents | No. |  
Limits (max.) on investment portfolio held abroad | No. |  
Limits (min.) on investment portfolio held locally | Yes. |  
Currency-matching regulations on assets/liabilities composition | No. |  

Pension funds | No. | Current legislation allows the establishment of investment funds only in the form of open joint-stock companies. Open-end and closed-end investment funds may be established. A joint-stock investment fund is established by at least three legal entities and/or natural persons in the form of an open joint-stock company. It operates on the basis of license acquired by the Central Bank. An investment fund may have only one manager at a time, except when the assets of the investment fund are located outside the country. When the assets of an investment fund are located outside the country, their management may be entrusted only to a foreign manager with a relevant license or permit in that country, as well as at least 3 years of experience in this field. Management of investment funds may be entrusted to a foreign manager after obtaining the permission of the Central Bank. No investment funds operate in the country.

Limits (max.) on investment portfolio held abroad | No. |  
Limits (min.) on investment portfolio held locally | No. |  
Currency-matching regulations on assets/liabilities composition | No. |
AZERBAIJAN

Changes during 2021 and 2022

No significant changes occurred in the exchange and trade system.
THE BAHAMAS

(Position as of June 30, 2022)

Status under IMF Articles of Agreement

Date of membership

Article VIII
Yes. Date of acceptance: December 5, 1973.

Article XIV

Exchange Measures

Restrictions and/or multiple currency practices
No.

Exchange measures imposed for security reasons
Yes.

In accordance with IMF Executive Board Decision No. 144-(52/51)
No.

Other security restrictions
Yes.

The governor general may issue orders and regulations implementing the decisions, resolutions, and recommendations of international organizations and associations of countries of which The Bahamas is a member that requests their members to take economic measures against a foreign government. The economic measures may include but are not limited to (1) seizure, freezing, or sequestration of property owned by the foreign government in question and (2) prohibition or restriction of persons in The Bahamas or Bahamians outside The Bahamas from (a) dealing with property held by or on behalf of the foreign government; (b) selling or supplying arms to foreign governments, entities, or individuals; and (c) providing technical advice, financial assistance, or training to foreign governments, entities, or individuals. There are restrictions on Bahamas-licensed banks and financial institutions regarding transactions with (1) the Democratic Republic of the Congo; (2) the Islamic Republic of Iran; (3) the Democratic People’s Republic of Korea; and (4) Osama bin Laden, the Al-Qaida organization, and any associated individuals or entities as designated from time to time by the attorney general after consultation with the government of the CB and the director of the FIU.

Exchange Arrangement

Currency
Yes. The currency of The Bahamas is the Bahamian dollar.

Commemorative gold coins in denominations of B$10, B$20, B$50, B$100, B$150, B$200, B$250, B$1,000, and B$2,500 and silver coins in denominations of B$10 and B$25 are legal tender but do not circulate.

Other legal tender
No. The US dollar circulates concurrently with the Bahamian dollar.

Exchange rate structure

Unitary

Dual
Yes. In addition to the official foreign exchange market, there is a market in which investment currency may be negotiated among residents through the ADs. The use of investment currency is prescribed for the purchase of foreign currency securities from nonresidents and direct investments abroad. The current premium bid and offer rates...
are 5% and 2.5%, respectively. Similarly, a premium of 5% may be charged on approved purchases of securities and foreign real estate. In certain circumstances, the Central Bank of The Bahamas (CBB) may permit residents to retain and use foreign currency from other sources to make outward investments. Certain external investments (including investment in foreign stocks by company-based retirement funds) may take place at the official exchange rate without an investment currency premium.

| Currency board | Yes.

The exchange rate arrangement is a conventional peg arrangement. The Bahamian dollar is pegged to the US dollar at par. Central Bank Act 2010 2020 Section 16 establishes “a) that the Minister may, after in consultation with the Bank, by order alter the said parity whether in terms of gold or any other standard shall determine the exchange rate policy: and b) the Bank shall implement the exchange rate policy determined by the minister under paragraph (a).” The CB has fixed the Bahamian dollar parity to 1 US dollar since 1972.

Stabilized arrangement

| Crawling peg | |
| Crawl-like arrangement | |
| Pegged exchange rate within horizontal bands | |
| Other managed arrangement | |

Floating

| Free floating | |

Official exchange rate

| Yes. |

The Bahamian dollar is pegged to the US dollar, the intervention currency, at par. This rate is used for actual CBB foreign exchange transactions and for accounting and valuation.

Monetary policy framework

<table>

Exchange tax

Yes. A stamp tax of 1.5% is applied to the conversion of Bahamian dollars on all outward remittances. Section 4(b) 51 A of the Stamp (Amendment) Act, 2013, imposes a 5% tax on Bahamian dollar conversion amounts in excess of B$0.5 million a year for funds to be remitted or transferred outside The Bahamas to a related party in respect of dividends or profits and payment for services by third parties.

Exchange subsidy

No.
**The Bahamas**

| Foreign exchange market | Yes. | ADs are largely permitted to determine their bid-ask spread on foreign exchange transactions. Commercial bank fees and charges are set solely by the banks themselves. For transactions with the public, commercial banks are authorized to charge a commission of 0.50% per US dollar on the purchase and 0.75% per US dollar on the sale of US dollars and 0.50% per pound on the purchase or sale of pounds sterling. |
| Spot exchange market | Yes. | Along with commercial banks, stand-alone money transfer business operators are also included as participants. These operators are licensed by the CBB and make payments to correspondents abroad on behalf of clients. As of December 31, 2021, there are 214 licensed banks, 5 nonbank money transmission service providers, and 20 money transmission agents. Money transmission businesses must obtain Exchange Control approval to deal in foreign currency and operate foreign currency accounts with local commercial banks and abroad. Money transmission businesses do not make foreign exchange transactions directly with the CBB. |
| Operated by the central bank | Yes. | Buying and selling rates for pounds sterling are also officially quoted, with the buying rate based on the rate in the New York market; the selling rate is 0.5% above the buying rate. There is also a market in which investment currency may be negotiated among residents through the CBB. |
| Foreign exchange standing facility | Yes. | The CBB buys and sells US dollars at the official rate without a commission and deals only with commercial banks and the government. The CBB and commercial banks (when acting under delegated authority) verify the bona fide nature of each transaction before providing foreign exchange. For pound sterling sales, the CBB adds a commission of 0.5% to the midrate. The CBB deals with commercial banks for a range of transactions. |
| Allocation | No. | |
| Auction | No. | |
| Fixing | No. | |
| Interbank market | Yes. | Interbank transactions may be freely negotiated among banks but are not significant because of structural excess bank liquidity and relatively predictable liquidity needs. The CBB does not intervene directly with market participants at their quoted rates nor does the CBB propose its own quotes to market participants or intervene via market markers. The details (value and negotiated rate) of each transaction are required to be reported to the CBB for statistical purposes and to ensure adherence to open position limits. As of December 31, 2021, all nine licensed local banks participate in the interbank market. |
| Over the counter | Yes. | Interbank transactions are negotiated over the counter. |
| Brokerage | No. | |
| Market making | No. | |
| Forward exchange market | Yes. | Commercial banks may provide forward cover for residents who are due to receive or must pay in foreign currency under a contractual commitment. Commercial banks may not, however, sell foreign currency spot to be held on account to cover future requirements without the CBB’s permission. ADs may deal forward in foreign currency with nonresidents without prior approval from the CBB. |
Commercial banks may execute forward deals among themselves at market rates, but they must ensure when carrying out all forward cover arrangements that their open spot or forward position does not exceed 5% of the respective bank’s Tier 1 capital. While the CBB does not itself participate in the forward exchange market, it facilitates swap transactions on behalf of the government of The Bahamas.

Official cover of forward operations

No.

Arrangements for Payments and Receipts

Prescription of currency requirements

Yes.
The Exchange Control system of The Bahamas makes no distinction among foreign territories. Settlements with residents of foreign countries may be made in any foreign currency or in Bahamian dollars through an external account. Foreign currency is defined as all currencies other than the Bahamian dollar.

Controls on the use of domestic currency

Yes.
Nonresidents may not access domestic currency for capital purposes; however, they may access domestic currency up to a certain limit for working capital in local businesses they operate.

For current transactions and payments

Yes.
Exchange Control regulations apply. Generally, domestic currency may not be used for outward transactions between residents and nonresidents.

For capital transactions

Yes.

Transactions in capital and money market instruments

Yes.
Exchange Control approval is required. Generally, domestic currency may not be used for outward transactions between residents and nonresidents.

Transactions in derivatives and other instruments

Yes.
Exchange Control approval is required. Generally, domestic currency may not be used for outward transactions between residents and nonresidents.

Credit operations

Yes.
Generally, nonresidents may not obtain credit facilities in domestic currency, except for domestic currency overdraft facilities for local businesses owned by nonresidents. Otherwise, local businesses owned by nonresidents are required to obtain credit facilities in proportion to their ownership structure. Temporary residents may receive domestic currency loan facilities on a restricted basis. Resident individuals and wholly Bahamian-owned businesses require Exchange Control approval to obtain foreign currency credit and must demonstrate that efforts have been made, without success, to obtain local financing.

Use of foreign exchange among residents

Yes.
Officially, all settlements between residents must be made in domestic currency. Foreign currency received domestically from nonresidents (for example, tourism-related) must be surrendered to ADs, unless approved by the CBB.

Payments arrangements

Yes.

Bilateral payments arrangements

No.

Operative

No.

Inoperative

No.

Regional arrangements

Yes.
The Bahamas is a member of CARICOM, but it does not participate in the common market.

Clearing agreements

No.

Barter agreements and open accounts

No.

Administration of control

Yes.
Exchange Control is administered by the CBB, which authorizes
ADs to approve allocation of foreign exchange for certain current payments, including for imports up to the equivalent of B$1.0 million and cash gift transfers up to the equivalent of B$15,000 a transaction.

<table>

<td>No.</td>
</tr>
</tbody>
</table>

Residents, other than ADs, are not permitted to hold or deal in gold bullion. However, residents who are known users of gold for industrial purposes may, with CBB approval, meet their current industrial requirements. There are no restrictions on residents’ acquisition or retention of gold coins.

**Controls on exports and imports of banknotes**

<table>
<thead>
<tr>
<th>On exports</th>
<th>Yes.</th>
</tr>
</thead>
</table>

**Domestic currency**

Travelers may export banknotes up to a total of B$200. ADs may export Bahamian notes to nonresident banking correspondents against payment in Bahamian dollars from an external account or any foreign currency, Bahamian currency notes in any quantity, provided the AD concerned is satisfied that they are required for the purpose of providing notes for travelers to The Bahamas.

In other cases, the prior permission of the CBB is required for the export of Bahamian currency notes. Each application is considered on a case-by-case basis, within defined areas of usage, including, but not limited to, educational, promotional, and government sponsor initiatives.

**Foreign currency**

Bahamian travelers need CBB approval to export foreign banknotes. Providing the requisite documentation, Bahamian travelers may apply to ADs for foreign currency to travel abroad up to a specified amount, beyond which, application must be made to the CB. All foreign currency purchased by resident individuals may be exported. In addition, there are some de-risking protocols that prevent ADs from physically exporting foreign currency to corresponding banks. This facility is actioned through the CB.

**On imports**

<table>
<thead>
<tr>
<th>Domestic currency</th>
<th>Yes.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Foreign currency</td>
<td>No.</td>
</tr>
</tbody>
</table>

Importation is subject to CBB approval. There are no restrictions on the importation of domestic currency banknotes by ADs.

There is no restriction on the import of foreign currency notes and coins.

**Resident Accounts**

**Foreign exchange accounts permitted**

Yes.

Permission from the CBB is required to open and hold foreign exchange accounts. Permission is generally granted to residents.
earning substantial amounts of foreign exchange who make regular
payments abroad. Balances in excess of current requirements must
generally be converted to Bahamian dollars. Balances on these
accounts may not be transferred abroad without the prior permission
of the CBB.
Without prior approval from the CBB, resident businesses may open
and maintain foreign currency for operating transactions, from
revenues earned in foreign currency, with balances of up to
$100,000. The limit applies to accounts maintained in the aggregate,
if at multiple commercial banks. Prior CBB approval is required for
resident businesses to maintain accounts with balances exceeding
$100,000.

Approval required: Yes.

Held abroad: Yes. Residents may not establish accounts abroad without Exchange
Control approval. Such accounts must be maintained in foreign
currency, and balances in excess of current requirements must
generally be converted to Bahamian dollars.
On application to the CBB, approval will be granted to retain
existing foreign currency assets, without penalty, with the right to
repatriate the assets or to maintain the holdings outside The
Bahamas. Deposits and other assets repatriated to The Bahamas may
be retained in foreign currency.
Restrictions remain in place against funding of such foreign-
currency-denominated accounts with proceeds converted from
Bahamian dollars.

Approval required: Yes.

Accounts in domestic currency held
abroad: No.

Accounts in domestic currency
convertible into foreign currency: Yes. With the permission of the CBB (Exchange Control), balances on
accounts held by residents in domestic currency may be converted to
foreign currency.

Nonresident Accounts

Foreign exchange accounts permitted: Yes. These accounts may be credited with (1) payments in foreign
currency from residents of The Bahamas with CBB permission, (2)
payments in foreign currency from nonresidents, and (3) foreign
currency receipts arising from dealings between nonresidents and
ADs. These accounts may bear interest. Accounts may be debited for
(1) payments to residents or nonresidents, (2) payments to other
foreign exchange accounts, and (3) payment of foreign currency
costs involved in dealings between nonresidents and ADs.

Approval required: No.

Domestic currency accounts: Yes. With CBB approval, authorized banks may open external accounts in
Bahamian dollars for nonresident companies that have expenses in
The Bahamas and for nonresident investors. Authorized banks may
freely open external Bahamian dollar accounts for nonresident
entities and individual investors that have local expenses. Authorized
banks may freely open external accounts in Bahamian dollars for
winter residents and other such categories of non-Bahamians—for
example, certain temporary residents employed in the Bahamian
offshore sector. External accounts in Bahamian dollars must be
funded entirely from foreign currency originating abroad, but income
from registered investments may be credited to these accounts with
CBB approval. These accounts may not bear interest.
Balances on these accounts may be transferred abroad freely.

Convertible into foreign currency: Yes. These accounts are freely convertible to foreign currency.
With CBB approval, authorized banks may open external accounts in Bahamian dollars for nonresident companies that have expenses in The Bahamas and for nonresident investors. Authorized banks may freely open external Bahamian dollar accounts for nonresident entities and individual investors that have local expenses. Authorized banks may freely open external accounts in Bahamian dollars for winter residents and other such categories of non-Bahamians—for example, certain temporary residents employed in the Bahamian offshore sector. External accounts in Bahamian dollars must be funded entirely from foreign currency originating abroad, but income from registered investments may be credited to these accounts with CBB approval. These accounts may not bear interest.

CBB approval is required to make payments for non-oil imports exceeding the equivalent of B$1.0 million, regardless of origin. This approval is generally given automatically on submission of pro forma invoices, Customs Entry Form, or other relevant documents proving the existence of a purchase contract.

Transactions must be domiciled with a local AD.

Customs Department Entry Form is required together with pro forma invoice or other documentation proving the existence of a purchase contract.

The importation of certain commodities is prohibited or controlled for social, humanitarian, or health reasons. For all imports of agricultural products, a permit must be obtained from the Ministry of Agriculture. All other goods may be imported without a license. Customs entries are subject to a stamp tax of 7%.

OGLs must comply with the Agricultural Manufactories Act.

Sanitary or phytosanitary restrictions apply.

Import duties vary from 0% to 210%. The tariff rate on most goods is 35%, and the average tariff rate is 31%. Stamp duties on imports
range from 2% to 20%. There is no import duty on certain tourism-related goods, but these goods are subject to stamp duties ranging from 8% to 20%.

**Exports and Export Proceeds**

- **Repatriation requirements**: Yes. Export proceeds must be collected without delay, that is, it should not be delayed to an extent which is unreasonable having regard to the ordinary course of trade. Without permission by the controller to retain the foreign currency, the proceeds must be repatriated at the earliest opportunity.

- **Surrender requirements**: Yes.
  - **Surrender to the central bank**: No.
  - **Surrender to authorized dealers**: Yes. Export proceeds must be offered for sale to an AD as soon as the goods have reached their destination or within six months of shipment; alternatively, export proceeds may be used in any manner acceptable to the CBB. Exemption from surrender requires CBB approval.

- **Financing requirements**: No.
- **Documentation requirements**: No.
- **Letters of credit**: No.
- **Guarantees**: No.
- **Domiciliation**: No.
- **Preshipment inspection**: No.

Prior approval  Yes. Approval is required for residents to hold an international credit card. Cards may not be used to pay for life insurance premiums and capital items.

Quantitative limits  Yes. Use of credit cards is limited to the amount indicated on the current bill.

Indicative limits/bona fide test  Yes. Credit card transactions are subject to bona fide tests.

Other payments  Yes.

Prior approval  No. CBB approval is not required and AD may facilitate payment for services (that is, professional, subscription, membership fees, royalties, registration of patents, serial rights, and advertising) up to the amount indicated on the bill.

Quantitative limits  Yes. Use of credit cards is limited to the amount indicated on the current bill.

Indicative limits/bona fide test  Yes. AD may facilitate payment for services (that is, professional, subscription, membership fees, royalties, registration of patents, serial rights, and advertising) up to the amount indicated on the bill.

**Proceeds from Invisible Transactions and Current Transfers**

Repatriation requirements  Yes. Residents must collect all proceeds without delay, that is, it should not be delayed to an extent which is unreasonable having regard for ordinary course of trade. Without permission by the controller to retain the foreign currency, the proceeds must be repatriated at the earliest opportunity.

Surrender requirements  Yes.

Surrender to the central bank  No.

Surrender to authorized dealers  Yes. All foreign currency proceeds must be offered for sale to an AD on receipt. Foreign exchange obtained for travel and any unused balance must be surrendered within one week of issue or, if the traveler is still abroad, within one week of returning to The Bahamas.

Restrictions on use of funds  No.

**Capital Transactions**

Controls on capital transactions  Yes. The premium on approved purchases of securities and foreign real estate is 5%, while the premium on rates for investment currency sales by residents is 2.5%. However, certain categories of securities may be negotiated in the official market, with no premium. Cross-listing of Bahamian and foreign companies on CARICOM exchanges is allowed, and limited foreign investment by the National Insurance Board (the public pension fund) is authorized.

Repatriation requirements  Yes. Repatriation must occur at the time of liquidation of foreign assets.

Surrender requirements  Yes.

Surrender to the central bank  Yes. In the event of liquidation of the investment of funds that were initially purchased through the Investment Currency Market (ICM), the proceeds may be sold to the ICM and an element of the premium recovered, on the original capital invested, in line with the offer rate prevailing at the time of liquidation. The current premium on rate for sales is 2.5%.

Surrender to authorized dealers  Yes. Earnings on securities and money market instruments purchased abroad by residents must be surrendered to ADs, unless exemption is granted by the CBB. Foreign exchange loans by nonresidents to residents must be converted by an AD to Bahamian dollars, unless
exemption is granted by the CBB. All outward capital transfers require Exchange Control approval, and outflows of resident-owned capital are restricted. Inward transfers by nonresidents, which are encouraged, must be processed through the Exchange Control approval procedure, and the subsequent use of the funds in The Bahamas may also require authorization. Nonresidents may invest in obligations of companies listed on the Bahamas International Securities Exchange up to an aggregate of 10% of the respective issue or offering. They may also invest in public sector securities for which the CBB acts as registrar, subject to an overall limit of B$0.1 million a person or entity.

Operational guidelines apply to issuance of non-sponsored Bahamian depository receipts. Proposed product offerings must be established under the supervision of the Securities Commission (SC) before the CBB is approached for foreign exchange to fund external portfolios. Additional rules are as follows: (1) Mutual funds may retain foreign currency cash in their portfolios up to the maximum percentage of overall assets, as specified or disclosed in the investment policy statements or strategies of the funds. (2) Purchases and sales of foreign exchange against Bahamian dollar facilities must be executed through the CBB. (3) Individual brokers or dealers may pool the foreign exchange allotted to them each quarter, but the resources may not be traded in any commercial sense, because this would be seen as constituting a parallel market in foreign exchange. (4) The CBB prohibits the accumulation of unused quarterly allocations of brokers or dealers.

On capital market securities
Yes. The Mutual Funds Act and a regulation that provides for licensing of mutual fund administrators and the registration of mutual funds are enforced. The Securities Industry Act authorizes the SC to regulate the stock exchange and its operations.

Shares or other securities of a participating nature
Yes. Resident companies may invest in equities of Bahamas International Securities Exchange-listed companies, up to 10% of the issue or offering for each investing entity. Resident companies may invest in other private and public sector securities, without limit.

Purchase locally by nonresidents
Yes. In principle, inward investment by nonresidents is unrestricted. However, CBB approval is required for the issue or transfer of shares in a Bahamian company to a nonresident and for the transfer of control of a Bahamian company to a nonresident. The extent of such approvals generally reflects the government’s economic and investment policy guidelines.

Sale or issue locally by nonresidents
Yes. CBB approval is required for the issue and transfer of shares in a Bahamian entity to a nonresident. The extent of such activity is often a function of government economic and investment policy on nonresident ownership in sectors of the economy.

Purchase abroad by residents
Yes. Residents employed by offshore and foreign-based institutions in The Bahamas may invest in employee stock options or share purchase plans through the official exchange market up to the equivalent of B$10,000 a person a year, on a noncumulative basis for contributory plans. Otherwise, residents may not purchase foreign currency securities with official exchange, export proceeds, or other current earnings; payment must be made with investment currency. All purchases, sales, and swaps of foreign currency securities by residents require CBB permission and are normally effected through authorized agents, who are free to act on behalf of nonresidents in relation to such transactions without additional approval from the CBB at a 5% premium. Certificates relating to ownership of all foreign securities purchased by residents must be held by, or to the order of, an AD. Investment by pension funds of Bahamian dollar assets in securities...
issued by nonresidents or in an investment portfolio held abroad must receive CBB approval, and approved transactions must be conducted through the ICM. Limits are imposed by the CBB, in concert with primary regulators (for example, the SC), with respect to portfolios held abroad by investment firms and collective investment funds. In relation to the COVID-19 situation, as of May 4, 2020, the CBB suspended approvals of applications to purchase foreign currency for transactions via the ICM and the Bahamas Depositary/Depository Receipt programs, suspending access to foreign exchange for international capital market investments by Bahamians. Effective October 1, 2021, the ICM and the Bahamian Depositary Receipt programs were resumed.

**Sale or issue abroad by residents** Yes. Sale proceeds from resident-held foreign currency securities that were registered at the CBB before December 31, 1972, or that were acquired through the ICM are eligible for sale in the ICM. Unregistered securities may be offered for sale at the official rate of exchange.

**Bonds or other debt securities** Yes.

**Purchase locally by nonresidents** Yes. Nonresident buyers of Bahamian-dollar-denominated securities must fund the acquisition of such securities from foreign currency sources. Interest, dividends, and capital payments on these securities may not be remitted outside The Bahamas, unless the holdings have been properly acquired by nonresidents. There is no minimum holding period for such bonds.

**Sale or issue locally by nonresidents** Yes. CBB approval is required and is based on government economic and investment policy on nonresident ownership in sectors of the economy.

**Purchase abroad by residents** Yes. All purchases, sales, and swaps of foreign currency securities by residents require permission from the CBB and are generally effected through authorized agents, who are free to act on behalf of nonresidents in relation to such transactions without any additional approval from the CBB at a 5% premium. All foreign securities purchased by residents of The Bahamas must be held by, or drawn to the order of, an AD. Investment by pension funds of Bahamian dollar assets in securities issued by nonresidents or in an investment portfolio held abroad must receive CBB approval, and approved transactions must be conducted through the ICM. Limits are imposed by the CBB, in concert with primary regulators (for example, the SC), with respect to portfolios held abroad by investment firms and collective investment funds. In relation to the COVID-19 situation, as of May 4, 2020, the CBB suspended approvals of applications to purchase foreign currency for transactions via the ICM and the Bahamas Depositary/Depository Receipt programs, suspending access to foreign exchange for international capital market investments by Bahamians. Effective October 1, 2021, the ICM and the Bahamian Depositary Receipt programs were resumed.

**Sale or issue abroad by residents** Yes. Proceeds from the sale of residents’ foreign securities initially approved by the CBB and acquired via the ICM are eligible for sale in the market. Investors may recover a portion of the original premium paid equivalent to the premium offer rate prevailing at the time of the sale. Investment proceeds that are not premium worthy are recovered at the official market rate through commercial banks.

**On money market instruments** Yes.

**Purchase locally by nonresidents** Yes. Nonresident buyers of Bahamian-dollar-denominated securities must fund the acquisition of such securities from foreign currency sources. Interest, dividends, and capital payments on these securities may not

<td></td>
<td>For direct (that is, not portfolio) investments both in The Bahamas’ offshore sector and abroad, residents are permitted to purchase up to $2 million a person or entity via the official market (that is, from ADs), with the prior approval of CBB, subject to an overall limit of $10 million an investor group, a transaction. This facility may be accessed once every three years. These limits apply to investments from which the additional benefits that are expected to accrue to the balance of payments from export receipts, profits, or other earnings within 18 months of the investment will be at least equal to the total amount of the investment and will continue thereafter. Investments abroad that do not meet the above criteria may be financed by foreign currency borrowed on suitable terms, subject to individual approval from the CBB; by foreign currency purchased in the ICM; or by the retained profits of foreign subsidiary companies. Permission is not given for investments that are likely to have adverse effects on the balance of payments. In relation to the COVID-19 situation, as of May 4, 2020, the CBB suspended approvals of applications to purchase foreign currency for transactions via the ICM and the Bahamas Depositary/Depository Receipt programs, suspending access to foreign exchange for international capital market and real estate investments by Bahamians. Controls on real estate transactions Yes.

*Purchase abroad by residents* Yes. Residents require the specific approval of the CBB to buy property outside The Bahamas; such purchases, if for personal use, may be made only with investment currency, and approval is limited to one property a family. Incidental expenses connected with the purchase of property for personal use may generally be met with investment currency. Expenditures necessary for the maintenance of the property or arising directly from its ownership may, with permission, be met with foreign currency bought at the current market rate in the official foreign exchange market. The premium on approved purchases of foreign real estate through ICM is 5%.

The ICM property premium excludes the purchase of time share units abroad, which may be funded at the official rate up to B$25,000 a family unit, once every 10 years. On CBB approval, residential or time share purchases may be made at the official rate, up to a limit of $0.5 million. Payments in excess of this amount will require use of the ICM.

In relation to the COVID-19 situation, as of May 4, 2020, the CBB suspended approvals of applications to purchase foreign currency for transactions via the ICM and the Bahamas Depositary/Depository Receipt programs, suspending access to foreign exchange for international capital market and real estate investments by Bahamians. Effective October 1, 2021, the ICM and the Bahamian Depositary Receipt programs were resumed.

*Purchase locally by nonresidents* Yes. Foreigners intending to purchase land for commercial purposes or property larger than two acres in size must obtain a permit from the Investments Board. If such an application is approved, payment for the purchase may be made either in Bahamian dollars from an external source or in foreign currency. Nonresidents wishing to purchase property for residential purposes may do so without prior approval but are required to obtain a certificate of registration from the Investments Board on completion of the transaction.

*Sale locally by nonresidents* Yes. CBB approval is required.

Controls on personal capital transactions Yes.

*Loans* Yes.

By residents to nonresidents Yes. CBB approval is required.

To residents from nonresidents Yes. CBB approval is required.

*Gifts, endowments, inheritances, and legacies* Yes.

By residents to nonresidents Yes. Authorized banks may approve foreign exchange transactions for cash gift payments up to B$15,000 a transaction. Larger amounts require CBB approval. Endowments, inheritance, and legacies require CBB approval.

To residents from nonresidents No.

*Settlement of debts abroad by immigrants* Yes. Immigrants (that is, work visa and contract workers) are permitted to remit up to half of their wages and salaries annually for the length of their contract. They may also with CBB approval transfer accumulated savings abroad, if needed to meet commitments abroad. Immigrants are permitted to remit up to 100% of wages and salaries annually for the length of contract.

Transfer of assets Yes.
Transfer abroad by emigrants: Yes. An emigrant may transfer abroad a maximum of the equivalent of B$250,000 a family unit a year. Excess amounts may be approved by the CBB on an individual basis.

Transfer into the country by immigrants: No.

Transfer of gambling and prize earnings: Yes. Residents are not allowed to remit funds earned from gambling.

The activity of insurance companies is regulated by the Insurance Commission of The Bahamas.

### Limits (max.) on securities issued by nonresidents

The limits on securities issued by nonresidents are subject to the decision and discretion of the CBB and Office of the Registrar of Insurance Companies.

### Limits (max.) on investment portfolio held abroad

These limits on investment portfolio held abroad are subject to the decision and discretion of the CBB and Office of the Registrar of Insurance Companies.

### Limits (min.) on investment portfolio held locally

No.

### Currency-matching regulations on assets/liabilities composition

No.

### Pension funds

| Limits (max.) on securities issued by nonresidents | Yes. |
| Limits (max.) on investment portfolio held abroad | Yes. |
| Limits (min.) on investment portfolio held locally | No. |
| Currency-matching regulations on assets/liabilities composition | Yes. |

Investment of Bahamian dollar assets must receive CBB approval, and approved transactions must be conducted through the ICM.

### Limits (max.) on investment portfolio held abroad

Investment of Bahamian dollar assets must receive CBB approval, and approved transactions must be conducted through the ICM.

### Limits (min.) on investment portfolio held locally

No.

### Currency-matching regulations on assets/liabilities composition

Yes. The CBB requires that all employee/employer Bahamian dollar contributions to pension funds of domestic licensees be invested in Bahamian dollar assets.

### Investment firms and collective investment funds

| Limits (max.) on securities issued by nonresidents | No. |
| Limits (max.) on investment portfolio held abroad | Yes. |
| Limits (min.) on investment portfolio held locally | No. |
| Currency-matching regulations on assets/liabilities composition | No. |

Limits are imposed by the CBB, in concert with primary regulators (for example, the SC), with respect to portfolios held abroad.

ADs, which operate under the Law on the Bank of Bahrain and the Financial Institutions Law (2006), set their exchange rates and commissions freely. In addition to banks, foreign exchange dealers operate in the foreign exchange market.

The CBB has licensed 141 institutions (including 32 retail banks and 78 wholesale banks) to deal in foreign exchange as of December 31, 2021. The CBB has also licensed 19 money changers to sell, purchase, and exchange foreign currency directly and transfer currency from Bahrain on behalf of their clients.

The CBB buys US dollars at BD 0.375 per US dollar and sells US dollars at BD 0.377 per US dollar to ADs and the government. The CBB does not deal with the public. No documentation is required from banks to complete transactions with the CBB. Deals are executed and recorded in the automated dealing system, which is sufficient to verify the trade and prove the commitment of both parties.

The CBB had authorized 410 financial institutions as of December 31, 2021, 140 of which were conventional and Islamic banks.

Bahrain operates a brokerage system.

The CBB monitors the forward exchange transactions of commercial banks through the open position of banks’ monthly returns. The CBB does not participate in the foreign exchange derivatives market (forwards and swaps).

**Resident Accounts**

| Foreign exchange accounts permitted | Yes. |
| Held domestically | Yes. |
| Approval required | No. |
| Held abroad | Yes. |
| Approval required | No. |
| Accounts in domestic currency held abroad | No. |
| Accounts in domestic currency convertible into foreign currency | Yes. |

**Nonresident Accounts**

| Foreign exchange accounts permitted | Yes. |
| Approval required | No. |
| Domestic currency accounts | Yes. |
| Convertible into foreign currency | Yes. |
| Approval required | No. |
| Blocked accounts | No. |

**Imports and Import Payments**

| Foreign exchange budget | No. |
| Financing requirements for imports | No. |
| Minimum financing requirements | No. |
| Advance payment requirements | No. |
| Advance import deposits | No. |
| Documentation requirements for release of foreign exchange for imports | Yes. |
Domiciliation requirements | No.
Preshipment inspection | No.
Letters of credit | No.
Import licenses used as exchange licenses | No.
Other | Yes. Documentation requirements, such as invoices, bill of lading. Documents are also required to verify source of funding. If the required documents are not available, imported goods may be released with a written promise to submit the documents at a later date.

Import licenses and other nontariff measures | Yes.
Positive list | Yes. Licenses are required to import: medicines; devices and medical devices intended for human use; children’s toys; cement; cars; motorcycles; tires; cosmetics and cleaning supplies; chemicals and materials that pose a security risk such as weapons and ammunition; and mobile phones and wireless devices.
Negative list | Yes. It is prohibited to import narcotics (poppy and hemp), cultured pearl. As well as import of some commodities from all sources for health, public policy, and security reason is prohibited.
Open general licenses | No.
Licenses with quotas | No.
Other nontariff measures | Yes. There are no nontariff measures between the GCC members and Arab countries, but there are other nontariff measures for imports from non-GCC countries.
Import taxes and/or tariffs | Yes. All imported goods are treated in accordance with version 2022 of the tariff code. (1) Most imported goods are subject to a customs duty of 5%, with the exception of most vegetables, fruits, and fresh and chilled meat and fish, which are exempt from tax. (2) Tobacco products are subject to a customs duty of 100% ad valorem rates. However, evaluations based on quantity or weight, whichever is higher, apply if they result in higher duties. (3) Since December 2017, alcoholic beverages are no longer subject to a customs duty. (4) Books and magazines are also exempt from tax.
Taxes collected through the exchange system | No.
State import monopoly | No.

### Exports and Export Proceeds

Repatriation requirements | No.
Surrender requirements | No.

*Surrender to the central bank* | No.
*Surrender to authorized dealers* | No.
Financing requirements | No.
Documentation requirements | Yes.
Letters of credit | No.
Guarantees | No.
In accordance with the GCC Common Customs Law, exports of goods to the GCC countries are subject to documentation requirements, such as airway bills or bill of loadings, invoices.

Yes. Proceeds from invisible transactions from Israel are prohibited.

Capital Transactions

Controls on capital transactions

Repatriation requirements

Surrender requirements

Surrender to the central bank

Surrender to authorized dealers

Controls on capital and money market instruments

On capital market securities

Shares or other securities of a participating nature

Purchase locally by nonresidents

Sale or issue locally by nonresidents

Yes. The capital market is subject to anti-money-laundering legislation.

Yes. The CBB Law and its accompanying regulations provide for certain controls based on international best practices.

Yes. In line with Resolution No. 49 of 2016 issued by the Ministry of Industry, Commerce, and Tourism, foreign investors are allowed to have 100% ownership in most sectors. Investment in very few sectors is restricted at 49%. Purchases, sales, and ownership of shares are subject to the provision of anti-money-laundering legislation. The CBB Law and regulations do not specify any minimum holding period requirement. With regard to shareholding pattern of financial institutions licensed and regulated by the CBB, Article 345(a) of the Commercial Companies Law (as amended) allows for partial or full ownership of such financial institutions by non-Bahraini citizens.

Yes. The CBB Law regulates the sale and issuance of securities by
residents and nonresidents. These sales (transactions) are subject to the CBB approval under Article 81 of the CBB Law and the CBB Rulebook, in particular the Offering of Securities (OFS) Module in Volume 6 thereof.

**Purchase abroad by residents**

No. There are no restrictions on these transactions, provided the regulations of the foreign jurisdiction concerned are satisfied.

**Sale or issue abroad by residents**

Yes. The CBB may object to the issuance of securities. As per the CBB Rulebook requirement, in particular, the OFS Module in Volume 6, sale or issue abroad by residents must be subject to the CBB approval, provided the foreign regulator in respective jurisdiction has approved the sale of issue.

**Bonds or other debt securities**

Yes. The issuance of bonds and other debt securities is subject to the CBB Law and regulations, the CBB Rulebook, and the Commercial Companies Law. Sales of listed bonds and other debt securities are subject to the CBB Rulebook and the CBB Resolution No. 17 of 2012 in respect of Listing and Trading of Financial Instruments on the Bahrain Bourse and Bahrain Bourse’s rules.

**Purchase locally by nonresidents**

Yes. In line with the CBB Directive (Ref. EDBO/44/2011) issued to all retail banks within Bahrain on August 10, 2011, the participation of retail customers/investors in government securities’ issuance, in specific, was discussed. The Directive was issued with the objective of promoting greater participation of individuals in the issuance of governmental securities (which must mean treasury bills, government development bonds, and Islamic securities issued by the CBB on behalf of the Government of Bahrain). The Directive is general for all retail banks’ customers; therefore, nonresidents are eligible to participate only if they have an account with a retail bank. In summary, it requires any retail bank which is approached by a customer who wishes to acquire government securities to assist that customer by purchasing for him or her on a fiduciary basis and hold such government securities for him or her.

**Sale or issue locally by nonresidents**

No. The CBB Law and the OFS Module in Volume 6 of the CBB Rulebook apply.

**Purchase abroad by residents**

No. There are no restrictions on these transactions, provided the regulations of the foreign jurisdiction concerned are satisfied.

**Sale or issue abroad by residents**

Yes. No restriction applies, provided there is no objection by the CBB. As per the CBB Rulebook requirement, in particular, the OFS Module in Volume 6, sale or issue abroad by residents must be subject to the CBB approval, provided the foreign regulator in respective jurisdiction has approved the sale of issue.

**On money market instruments**

No. There are no restrictions on these transactions; however, they are regulated to prevent money laundering.

**Purchase locally by nonresidents**

No.

**Sale or issue locally by nonresidents**

No.

**Purchase abroad by residents**

No.

**Sale or issue abroad by residents**

No.

**On collective investment securities**

No.

**Purchase locally by nonresidents**

Derivatives trading must be conducted on a licensed exchange in Bahrain and is subject to the rules of the exchange and the CBB, which conform to International Organization of Securities Commissions’ recommendations and international practice.

The GCC citizens may own up to 100% of the shares of domestic enterprises. Non-GCC individuals may own up to 100% of the shares of domestic (locally incorporated) companies and branches of foreign incorporated companies, with the exception of a small number of activities on the negative list and in accordance with restrictions that apply to the ownership of publicly listed companies.

There are no restrictions on ownership of real estate by the GCC nationals (either natural or juridical persons). Nonresidents (both natural and juridical persons) may own buildings and property only in locations specified in Council of Ministers Regulation No. 5/2001, including most of the high-end and tourist areas. Commercial, tourism, and industrial companies, as well as banking and financial institutions licensed to operate in Bahrain, may own real estate without restriction.

BANGLADESH

(Position as of September 30, 2022)

Status under IMF Articles of Agreement

Date of membership	August 17, 1972.

Article VIII	Yes. Date of acceptance: April 11, 1994.

Article XIV

Exchange Measures

The IMF staff report for the 2019 Article IV Consultation with Bangladesh states that, as of August 5, 2019, Bangladesh maintained one restriction subject to IMF approval under Article VIII, Section 2 (a) on the convertibility and transferability of proceeds of current international transactions in nonresident taka accounts (NRTAs).

(Country Report No. 19/299)

Restrictions and/or multiple currency practices	Yes.

Exchange measures imposed for security reasons	Yes.

In accordance with IMF Executive Board Decision No. 144-(52/51)

Other security restrictions	Yes.

Banks and other financial institutions have been instructed to block all capital transfers and to freeze financial assets of individuals, groups, and organizations associated with terrorism, pursuant to the relevant UNSC resolutions. Banks have been instructed to follow the following provisions in case of international fund transfers:

No account may be opened or operated for a listed individual or entity suspected to be involved in terrorism and terrorism financing activities within the purview of different Resolutions of the UNSC. “Person or entities listed under various resolutions of the UNSC” refers to the listed persons or entities under the resolutions defined under Article 2(g) of Anti-Terrorism Rules, 2013.

If any account or transaction of any individual/entity directly or indirectly under their control/association is identified, banks must stop the transaction in that account or stop that transaction and inform the Bangladesh FIU (BFIU) with detailed information within the next working day.

As soon as any news on the Financing of Terrorism and Financing of Proliferation of Weapons of Mass Destruction is published in the media and if any account of any person or entity related to that activity is maintained with the bank, detailed information must be reported to the BFIU without any delay.

No correspondent banking relationship may be established or maintained with any Shell Bank.

Conduct and review transaction, when necessary, to identify if there is any account or any other relationship, under Resolution No. 1373 (2001) of UNSC, on request of foreign government or foreign FIU or any listed or proscribed individual or entity as per the list sent from the BFIU or as per the listed or proscribed individual/entity by the Bangladesh Government. As soon as any account is identified of any listed or proscribed individual or entity, the bank must stop the transaction in that account and inform the BFIU with detailed information within the next working day. As of February 2016, financial institutions and other reporting agencies identified under

</table>

The de jure exchange rate arrangement is floating since May 31, 2003. The BB intervenes in the foreign exchange market to contain undue fluctuations in the exchange rate. ADs in the foreign exchange market are supposed to set their own exchange rates for their customer and inter-bank transactions. Bangladesh Foreign Exchange Dealers’ Association (BAFEDA) has issued a notification for Authorized Dealers (AD banks) regarding policy for exchange rates in foreign exchange dealings – for settling import bills and other outward remittances, banks will charge maximum Tk. 1.00 over the weighted average buying rate of export proceeds and inward remittances from September 11, 2022.

The BB publishes information on its intervention on monthly (Major Economic Indicators), quarterly (BBQ), and annually (MPS & Annual Report). Publications lags are: 1 month for Major Economic Indicators, 2–3 months for BBQ, 3–4 weeks for MPS, and 5–7 months for Annual Report. Because of higher deficit in Balance of Payments, BDT faced an intense depreciation pressure against USD during the second half of FY22. On this backdrop, BB’s intervention through net sale of USD helped ensure exchange rate stability.

Since August 2021, the exchange rate has followed a depreciating trend within a 2% band against the US dollar. Accordingly, the de facto exchange rate arrangement was reclassified to crawl-like from stabilized, effective August 17, 2021.
Other managed arrangement

Floating

Free floating

**Official exchange rate** Yes. The BB, on the basis of the exchange rate prevailing in the interbank market, calculates the exchange rate of the US$/BDT against major foreign currencies (FCs) for the purpose of valuation adjustment of foreign exchange reserves, for carrying out transactions related to government’s external loans, grants, and aids (receipt/service) in terms of local currency and for market intervention (sale/purchase, when required). To determine the exchange rate of Bangladesh taka (BDT) for a particular date, the latest New York closing exchange rate of major currencies against the US dollar and the US$/BDT exchange rate of the preceding day, which prevailed in the local interbank foreign exchange market, are taken into account. The cross-rate is calculated using the US$/BDT exchange rate (low as bid and high as ask) of the local interbank foreign exchange market. The BB publishes exchange rates of the taka against major currencies through its website.

**Monetary policy framework**

Exchange rate anchor

*U.S. dollar*

*Euro*

*Composite*

*Other*

Monetary aggregate target Yes. Within the current monetary policy framework of BB, broad money (M2) is the intermediate target and reserve money is the operational target that is used to control broad money (M2) and, thereby, to achieve the ultimate goal of price stability and economic growth. BB uses its monetary policy instruments, such as reserve requirement, repo, reverse repo, government treasury bills and bonds, and BB bills to maintain M2 growth within the target ceiling by controlling its operational target. The BB publishes its MPS on annual basis, though monetary policy stance is being reviewed by the MPC on a monthly basis. If any policy changes are prescribed by the MPC during the review process, BB publishes those changes accordingly through circulars and press releases.

No.

Foreign exchange market

Yes.

Commercial banks participating in the local foreign exchange market may freely determine their exchange rate for interbank and customer transactions. Bangladesh Foreign Exchange Dealers’ Association issued a notification for AD banks regarding policy for exchange rates in foreign exchange dealings: effective September 11, 2022, for settling import bills and other outward remittances, banks may charge a maximum of Tk. 1 over the weighted average buying rate of export proceeds and inward remittances. Banks also set the exchange rate in the interbank market emerging from this policy.

The BB grants licenses to deal in foreign exchange. There are 1,041 branches of commercial banks (known as AD banks) licensed to deal in foreign exchange with bank and nonbank customers. There are 235

Spot exchange market

Yes.

ADs are allowed to freely determine their bid-ask spread with bank and nonbank clients.
money changers (MCs) and 114 limited MCs granted with licenses to buy FC from tourists and to sell up to US$1,000 a person as a travel allowance to Bangladesh nationals. MCs are not allowed to transact directly with the CB and are not allowed to maintain account abroad. However, MCs can maintain FC account with ADs in Bangladesh.

Operated by the central bank  Yes.

Foreign exchange standing facility  No. Currently, there is no foreign exchange standing facility for commercial banks. To ensure smooth functioning of the interbank market, the BB occasionally buys and sells foreign exchange from/to commercial banks considering the exchange position of the banks concerned, underlying transactions, market demand, and liquidity of the overall market.

Allocation  Yes. The BB provides a FC support to exporters to bolster exports through Export Development Fund (EDF). The current limit of the EDF is US$7 billion.

The Green Transformation Fund (GTF) established by the BB is a revolving fund of US$200 million and EUR200 million to accelerate sustainable growth in export-oriented textile and leather sectors conducive to transformation of green economy in the country. The fund allows AD banks to lend to their customers for importing capital machineries and accessories in foreign exchange and BB refines the fund to the AD banks.

Auction  No.

Fixing  No.

Interbank market  Yes. There is an effective interbank foreign exchange market where all 61 commercial banks participate to buy or sell foreign exchange on spot, swap, and forward basis.

Over the counter  Yes. These deals are made on a bilateral basis, and there is no broker or other market-making arrangement.

Brokerage  No. There is no broker arrangement.

Market making  No. There is no other market-making arrangement.

Forward exchange market  Yes.

Official cover of forward operations  No. There is no official cover of forward operations.

Arrangements for Payments and Receipts

Prescription of currency requirements  Yes. Settlements generally take place in convertible currencies and, in some cases, through NRTAs. The board of directors of the ACU allows the use of euros in addition to US dollars for the settlement of transactions among ACU member countries. Settlements with ACU member countries must be effected through the ACU and in units denominated in AMUs. (ACU dollars and ACU euros are equivalent in value to US$1 and €1, respectively.) The minimum threshold amount for transactions through ACU member CBs under ACU arrangement was set at 500 ACU dollars or ACU euros. As the payment channel for processing “ACU Euro” transactions had been suspended by some correspondents, ADs were advised to suspend operations in “ACU Euro” temporarily. Accordingly, all eligible current account transactions in “ACU Euro” were permitted to be settled outside the ACU mechanism until further notice. To facilitate transactions under ACU mechanism, along with “ACU Dollar,” ADs are advised to resume transactions in “ACU Euro” to settle current
**Account transactions among ACU member countries. In addition, Japanese yen is also a settlement currency in the ACU mechanism.**

**For current transactions and payments**
Payments for imports may be made to any country (with the exception of countries from which imports are prohibited). They may be made in (1) taka for credit in Bangladesh to a nonresident bank account of the country concerned, (2) the currency of the country concerned, or (3) any freely convertible currency. Export proceeds must be received in freely convertible foreign exchange or in taka from an NRTA.

**For capital transactions**
ADs may hedge the price risk of commodities (traded on exchanges or over the counter) of their customers through standard exchange-traded futures and options and OTC commodity derivatives, subject to the BB approval. The use of commodity derivatives is permitted when customers have genuine underlying commodity-price risk exposure. Speculation through the use of commodity derivative instruments is not permitted by the BB.

**Use of foreign exchange among residents**
The use of foreign exchange among residents is generally not allowed.

**Payments arrangements**
There is a bilateral payments arrangement with Myanmar. Under a MoU signed between Bangladesh and India, there are zones (markets) for border trade between the two countries. Both countries’ exchange regulations are suspended in these zones for trading of goods up to the equivalent of US$100 a day an individual.

**Regional arrangements**
The ACU was established at the initiative of the UN Economic and Social Commission for Asia and the Pacific (ESCAP). The Draft Agreement establishing the ACU was finalized in December 1974 after five CBs (India, Iran, Nepal, Pakistan, and Sri Lanka) signed the Agreement. In subsequent years, Bangladesh and Myanmar were the sixth and seventh signatories. Bhutan and Maldives signed the Agreement in 1999 and 2009, respectively, leading to a total of nine members in the ACU.

**Clearing agreements**
The ACU (Bangladesh, Bhutan, India, Iran, Maldives, Myanmar, Nepal, Pakistan, and Sri Lanka) is a payment arrangement whereby the participants settle payments for intra-regional transactions among the participating CBs on a net multilateral basis. The main objectives of the clearing union are to facilitate payments among member countries for eligible transactions, thereby economizing on the use of foreign exchange reserves and transfer costs, as well as promoting trade and banking relations among the participating countries.

**Administration of control**
Foreign exchange policy is administered by the BB in accordance with the Foreign Exchange Regulation Act (FERA) (1947). Banks may deal in foreign exchange. The chief controller of imports and
exports of the Ministry of Commerce is responsible for registering exporters and importers and for issuing import policy orders (IPOs). Registered importers may operate according to the terms of an IPO. LC authorization forms (LCAFs) are issued by ADs and do not require separate import licenses.

**Controls on trade in gold (coins and/or bullion)**

- On domestic ownership and/or trade: Yes.
- On external trade: Yes.

There are no restrictions on the internal sale, purchase, or possession of gold or silver ornaments (including coins) and jewelry.

The importation and exportation of gold and silver require special permission under the FERA, 1947, which was later amended September 9, 2015. However, women may bring in or take out any amount of personal jewelry they are wearing or carrying in their personal luggage, without approval. Exports of gold jewelry and imports of gold and silver for exports of jewelry manufacture are allowed under the Jewelry Export Scheme. Incoming passengers irrespective of their resident status may bring into Bangladesh gold or silver in bullion/ingot up to the prescribed limit in terms of relevant baggage rules in force issued under the Customs Act, 1969. The BB issues authorized gold dealer licenses for importation of gold bar and jewelry to AD banks and interested organizations.

**Controls on exports and imports of banknotes**

- On exports: Yes.

  - **Domestic currency**: Yes.
  - **Foreign currency**: Yes.

  Residents and nonresidents may take out up to Tk 10,000 in domestic currency.

  The amount that may be brought in without declaration when returning from a visit abroad is US$10,000 or equivalent in other FCs (in cash, bank draft, etc.). Resident Bangladeshi nationals may retain FC up to US$10,000 or equivalent brought in by them from abroad or may deposit it in Resident Foreign Currency Deposit Account (RFCDA) with AD banks and may take it out at the time of subsequent travel abroad. However, selling to AD/MC or depositing in RFCDA of foreign exchange in excess of US$10,000 or equivalent brought in with declaration in FMJ form, within 30 days of arrival is mandatory for resident Bangladeshi nationals.

  FCs brought in (and declared in FMJ form with customs authorities for amount exceeding US$10,000 or equivalent) by the nonresidents/foreigners may be encashed with AD bank/MC, retained, or deposited into FC accounts with AD banks. The unused portion of the FCs may be taken back at the time of departure from Bangladesh. However, a copy of the declaration form of FC in FMJ must be retained.

  FC account holders may withdraw their balances and take it out up to US$5,000 in notes/coins and for amounts above that the remaining is withdrawn in another currency.

  Foreign tourists may reconvert the unspent taka to FC from the same AD from which the FC was encashed earlier on presentation of the encashment certificate and take out at the time of departure from Bangladesh. Likewise, they may reconvert the unspent taka to FC from any licensed MC by submitting the encashment certificate.
However, in case of MC, the amount of reconversion may not exceed US$500 or equivalent. Bank booths situated in departure lounges of international airports in Bangladesh may provide reconversion facility up to US$100 or equivalent on presentation of encashment certificate.

On imports

Yes.

Domestic currency

Yes.

Residents and nonresidents may bring in up to Tk 10,000 in domestic currency.

Foreign currency

No.

The amount that may be brought in without declaration when returning from a visit abroad is US$10,000 or equivalent in other FCs (in cash, bank draft etc.). Amounts in excess of that must be declared to the customs authorities using the FMJ form.

Resident Accounts

Foreign exchange accounts permitted

Yes.

Held domestically

Yes.

Residents may open and maintain RFCDAs with foreign exchange brought in at the time of their return from travel abroad. However, proceeds of export of goods or services from Bangladesh or commission arising from business deals in Bangladesh may not be credited to such accounts. Balances in such accounts are repatriable abroad through banking channels and may also be used for travel. This account may be opened in US Dollars, Euros, Pound Sterling, or Japanese yen. Interest in foreign exchange is payable on balances in such accounts.

FC accounts may be opened in the names of (1) the Diplomatic Bonded Warehouse (duty-free shops) licensed by the Custom Authorities; (2) local and joint venture contracting firms employed to execute projects by foreign/international agencies; (3) resident Bangladesh nationals working with foreign/international bodies operating in Bangladesh provided their salary is paid in FC; (4) foreign nationals residing in Bangladesh for six months or more; (5) foreign nationals temporarily residing in Bangladesh holding a residential or working visa valid for not less than six months; (6) branch offices/liason offices of foreign companies operating under approval from Bangladesh Investment Development Authority (BIDA) or other competent authority.

Exporters of goods and services may deposit a certain percentage of the repatriated export proceeds in Exporters' Retention Quota (ERQ) accounts with the concerned ADs in USD, Pound Sterling, Euro, or Japanese Yen. Balances in these accounts may be used by the exporters for bona fide business purposes without prior approval of BB. Foreign exchange from the ERQ account cannot be used for investment abroad by the exporter. Transfer of unencumbered FC between the ERQ accounts of same exporter maintained out-of-export receipts with different ADs is permissible for bona fide transactions, settlement of import liability, and repayment of authorized foreign loan of their subsidiaries/sister concerns. ERQ account may be kept as interest-bearing renewable term deposits with the concerned ADs. ADs may effect advance payment not exceeding US$25,000 or its equivalent from the ERQ account against bona fide business purposes following certain terms and conditions.

Export-oriented shipbuilders in Bangladesh are allowed to open and maintain FC accounts in ADs for retaining advance remittances from abroad against ship exports. Balances of these accounts may be used
for payment of input procurements. Separate FC accounts may be opened for each ship for receiving and payment on per ship basis. Such account must be closed within one month of delivery of the ship to the foreign buyer by transferring the balance of the account in usual retention quota account or by converting the balance to Taka.

To facilitate the payments in FC for handling of free on board (FOB) imports from their receipts in FC against handling of FOB exports, shipping companies, airlines, and multimodal transport operators licensed as freight forwarders by Customs Authorities may open and maintain accounts in US dollars or other freely convertible currencies with ADs in Bangladesh.

Pursuant to Paragraph 30, Chapter 13, and Paragraph 4, Chapter 20 of the Guidelines for Foreign Exchange Transactions (GFET)-2018, Volume-1, ADs are allowed to credit foreign equity, authorized foreign loan, and export proceeds in FC accounts of enterprises (Types A, B, & C) operating in specialized economic zones (EZs) such as EPZs, EZs, and Hi-Tech Parks (HTPs). Eligible enterprises may also receive inward remittances, legitimate receipts against short weight claim, quality claim, freight charge of sample, insurance claims, reimbursement of expenses for samples from buyers or parents, etc. Prior permission of the BB is not required for issue of shares in favor of nonresidents against foreign investment in Bangladesh. Permissible income earned by expatriates may be credited. As a part of ongoing liberalization to bring uniformity between regulations for enterprises of specialized zones and those of non-specialized zones regarding remittances on account of dividends, ADs are no longer required to forward documents to BB. Concerned AD banks will retain the related documents.

Effective March 11, 2021, pursuant to Banking Regulation and Policy Department (BRPD) Circular Letter No. 16, of March 11, 2021, banks are allowed to open accounts through online application received via website/web portal/app of banks or Government service providing entities such as BIDA, Bangladesh EZ Authority, Bangladesh EPZ Authority, and Bangladesh HTP Authority under their one-stop service facilities.

Effective May 17, 2021, temporary NRTA and temporary FC accounts may be opened in the name of proposed companies of foreign investors contemplating to invest in Bangladesh. Designated banks must observe Simplified Due Diligence in opening these temporary accounts and the regular Customer Due Diligence procedures before transferring balances held in these temporary accounts to the regular accounts immediately after incorporation of the companies along with other relevant instructions. In terms of Section 18(2) of the FERA, 1947 (as amended), BB has accorded general authorization to banks and nonbank financial institutions (NBFIs), including resident individuals and institutions, for extending Taka loans to foreign owned/controlled companies. Because of COVID-19, banks and NBFIs were allowed to extend admissible Taka finance against overseas guarantees (preferable bank guarantee/standby LCs) to resident companies irrespective of ownership/controlling status subject to adherence to all applicable credit norms and prudential parameters. Effective June 30, 2021, the measure was extended until December 31, 2021. In case of lending by NBFIs, guarantees should be received from ADs issued in terms
Residents who opened an account abroad when residing abroad may retain it after returning to Bangladesh. To facilitate study abroad by Bangladeshi students in permissible courses, general permission was given to deposit FC to be blocked in designated bank accounts or student accounts abroad for visa/admission processing. Effective July 27, 2021, resident firms contracting to implement projects awarded by project implementing agencies abroad, may open bank accounts in the respective countries jointly with nonresident co-partners to credit payments received against the works and short-term loans proceeds from external sources. Balances held in these accounts are useable for settlement of project-related bona fide payments abroad. Foreign exchange may be held by Bangladesh nationals in accounts abroad opened and credited while the account holders were working abroad as resident outside Bangladesh.

ADs may open convertible taka accounts in the names of foreign organizations or nationals (that is, diplomatic missions, UN organizations, nonprofit international organizations, foreign contractors, and consultants) engaged in projects of the government or semi-government agencies and their expatriate personnel who are resident in Bangladesh. These accounts may be credited with FC brought in or remitted from abroad or transferred from a FC account or another convertible taka account and may be debited for payments in FC abroad, for local expenses, for transfers to FC accounts or other convertible Taka accounts or for credits to a nonconvertible Taka account.

Pursuant to Paragraph 30, Chapter 13, and Paragraph 4, Chapter 20 of the GFET-2018, Volume-1, ADs are allowed to credit inward remittance and encashments of funds from FC accounts, receipt from taka sales of factory refuses, and unusable portion of raw materials in taka accounts on behalf of enterprises (Types A, B, & C) operating in specialized EZs such as EPZs, EZs, and HTPs. Eligible enterprises may receive inward remittances, legitimate receipts against short-weight claim, quality claim, freight charge of sample, insurance claims, reimbursement of expenses for samples from buyers or parents, etc., received in FC or local currency accounts of the enterprises.

### Nonresident Accounts

ADs are permitted to open FC accounts in the names of: (1) Bangladesh nationals residing abroad; (2) foreign nationals residing abroad or in Bangladesh and also foreign firms registered abroad and operating in Bangladesh or abroad; and (3) foreign missions and their expatriate employees.

Effective January 1, 2021, the types of income earned by expatriates that may be credited to FC accounts was expanded.

Dividend payable to foreign shareholders may be credited to their FC accounts maintained in Bangladesh. Crediting these accounts is treated as outward remittance, while encashment of balances is treated as inward remittance. Purchase of shares with fund held in FC accounts is treated as foreign investment. Declared dividends may be
used with treatment as inward remittances for reinvestment in Bangladesh through purchase of shares in existing companies and/or other companies.

Bangladesh nationals working and earning abroad including self-employed Bangladesh migrants proceeding abroad on employment may open FC accounts in Pound Sterling, US Dollar, Euro, or Japanese Yen even without initial deposits. They may operate the accounts themselves or nominate other persons in Bangladesh and maintain them as long as the account holder desires. These accounts may be credited with remittances sent by the account holder or other wage earners. ADs may also credit proceeds of convertible foreign exchange (currency notes, travelers' checks, drafts, etc.) brought into Bangladesh by the account holders while on temporary visit to Bangladesh. Payments may be made freely abroad for import of goods and commodities and local disbursements may also be made freely in Taka.

Nonresident Bangladeshis (NRBs) maintain FC accounts and NRTA in Bangladesh. They are also allowed to make direct and portfolio investment in Bangladesh, including investment in savings instruments of Government in the form of time deposits.

ADs introduced deposit products in taka in the form of savings for a period of one year and above. Taka loans to such deposit product holders for meeting personal needs in Bangladesh may be granted keeping the deposit accounts as lien. In case of NRBs residing in Bangladesh permanently after their return, the proceeds may be made available to them either in one-time settlement or pension type monthly/quarterly settlement.

All NRB nationals and persons of Bangladesh origin including those having dual nationality and ordinarily residing abroad may maintain interest bearing time deposit accounts named “Nonresident Foreign Currency Deposit (NFCD) Account” with the ADs. Bangladesh nationals serving with Embassies/High Commissions of Bangladesh in foreign countries and also the officers/staff of the government/semi-government departments/nationalized banks and employees of body corporate posted abroad or deputed with international and regional agencies such as IMF, World Bank, IDB, ADB, etc., shore staff of the Bangladeshi shipping companies, during their assignments abroad may open such accounts denominated in US Dollar, Pound Sterling, Euro, or Japanese Yen; initially with a minimum amount of US$1,000 or Pound Sterling 500 or equivalent.

NRBs may, after their return to Bangladesh, open NFCD accounts with ADs to credit their retirement benefits, periodical pensions, superannuation benefits, etc., per employment agreement with employers while on service abroad and the balances may be used for settlement of legitimate payments abroad.

Effective August 1, 2022, interest rate is fixed for new deposits under NFCD accounts: Benchmark reference rate plus 2.25% for deposits off 1 year and up to 3 years, and Benchmark reference rate plus 3.25% for deposits above 3 years and up to 5 years.

Bank booths operating in airports under license with limited scope from BB may take deposits from NRBs in FC brought in by them for crediting their FC accounts or NRTA (by converting FC at prevailing exchange rate) maintained with concerned AD bank branches. If the
FC brought in by NRBs differs from the account type (that is, USD A/C and GBP A/C) of the account holders, bank booths convert the currency to relevant FC at the appropriate cross-currency exchange rate to effect the deposit.

Foreign nationals and companies registered and/or incorporated abroad, banks, other financial institutions including institutional investors and 100% foreign-owned (A-Type) industrial units in the EPZs/EZs in Bangladesh, are also allowed to open and maintain NFCD accounts with ADs with a minimum amount of time deposits of US$25,000 or its equivalent. Since July 21, 2020, submission of documents against dividend payable to foreign shareholders on behalf of enterprises operating in EZs/HTPs/EPZs (specialized zones) is waived pursuant to Paragraph 9, Chapter 20 of GFET.

All foreign payment obligations by industrial enterprises operating in EZs are met with balances held in their FC accounts. Industrial enterprises operating in Domestic Processing Areas (DPAs) of EZs do not have sources of income in FC. To facilitate transactions for meeting foreign payment obligations, ADs may, on behalf of industrial enterprises in DPAs of EZs, effect outward remittance on account of royalty, technical know-how, and technical assistance fees from taka account.

Effective May 17, 2021, temporary NRTA and temporary FC accounts may be opened in the name of proposed companies of foreign investors contemplating to invest in Bangladesh. Designated banks must observe Simplified Due Diligence in opening these temporary accounts and the regular Customer Due Diligence procedures before transferring balances held in these temporary accounts to the regular accounts immediately after incorporation of the companies along with other relevant instructions. Temporary FC accounts may also be opened by ADs and Offshore Banking Units (OBUs) (in case of Type A enterprises), for funds remitted from abroad as equity by foreign investors. The regulations to open Temporary NRTA and Temporary FC Accounts are equally applicable for proposed companies to be established in EPZs and EZs, subject to observance of the same instructions.

Industrial enterprises producing for the local markets and service sector industries are allowed to remit through their nominated ADs up to 1% of annual sales. This facility applies equally to industrial enterprises operating in DPAs of EZs having sales in Taka. However, in case of the availability of foreign exchange in the respective FC accounts, from legitimate sources, of concerned customers, ADs must first use such balances before utilization of their own sources by conversion of Taka funds.

To improve the ease of doing business and reduce the cost of compliance, ADs are no longer required to submit returns/statements in hardcopy to BB. However, ADs must continue reporting the same information in relevant online portals/modules of BB.

Foreigner working in Bangladesh with valid work permit may open private FC account.

<table>
<thead>
<tr>
<th>Approval required</th>
<th>No.</th>
</tr>
</thead>
</table>
| Domestic currency accounts | Yes. | For portfolio investment in Bangladeshi shares/securities listed on stock exchanges, the nonresident investor (nonresident person/institution including NRB nationals) may open a nonresident...
investor’s taka account (NITA) with any AD in Bangladesh, with freely convertible FC remitted from abroad through normal banking channels or by transfer of funds from the nonresident investor’s FC account, if any, in Bangladesh. These balances are also freely transferable to the FC Account (opened as per instructions at Chapter 13, Paragraphs 1 and 2) of the same person with the respective AD as well as remittable abroad in equivalent foreign exchange. The NITA may be operated by the account holder or by a nominee, including the AD. Purchase and sale of shares/securities listed on a stock exchange in Bangladesh is made only through a member/registered broker of the exchange. Purchase of new public issues not yet listed on a stock exchange may, however, be made directly from the company issuing the stock/security. Dividends/interest earnings and sale proceeds on the shares/securities bought through the NITA, after payment of taxes, may be credited to NITA and remitted abroad. No loan facilities are allowed by the ADs in the NITAs. Balances held in NITAs of nonresidents may be used to purchase units of open-end mutual funds as OTC products subject to compliance with the instructions.

**Convertible into foreign currency** Yes. Funds from NITAs and convertible taka accounts may be converted freely.

**Approval required** No.

**Blocked accounts** Yes. Funds in NRTAs from unapproved payments may be blocked by the BB.

**Imports and Import Payments**

**Foreign exchange budget** No.

**Financing requirements for imports** Yes. For private sector imports on usance terms, the interest rate may be LIBOR plus a markup, according to prevailing market conditions and subject to an overall interest maximum of 6% a year. Importers may also obtain buyer credit for import payments from abroad through ADs for a period not exceeding one year; the overall interest cost may not exceed 6% a year.

To facilitate short-term import finance, ADs, on behalf of industrial importers, may issue repayment bank guarantees without the BB approval favoring International Islamic Trade Finance Corporation extending short-term buyer’s credit up to 180 days for import of industrial raw materials for own use by importers, on sight basis. Effective January 1, 2022, until June 30, 2022, the usance period for imports of industrial raw materials including back-to-back imports, and imports of agricultural implements and chemical fertilizers under supplier/buyer credit may be extended up to 270 days. Previously, valid until December 31, 2021, for facilitation of trade transactions in the context of COVID-19, the usance period of back-to-back LCs opened under supplier/buyer credit could be extended on banker–customer relationship within the admissible rate of interest up to 180 days, as additional time from the permissible period of 180 days, for bona fide grounds required to settle the payments. With a view to facilitating export trade during COVID-19 without requiring permission of BB, input procurements under back-to-back LCs/usance LCs could be issued with realization clause on behalf of exporters operating outside specialized zones provided: (1) ADs verified the execution of the export orders; (2) there was a transparent arrangement under which suppliers were in agreement to accept the relevant LCs with realization clause; (3) LC liabilities would not be settled under “net-off” arrangement with export proceeds.
ADs may extend the usance periods of the import of life-saving drugs up to maximum of 180 days instead of 90 days depending on the actual needs of their concerned clients. This facility was no longer valid effective April 1, 2021.

ADs may open LCs on behalf of industrial units to import necessary spare parts of capital machineries for own industrial use up to 360 days usance basis. For such deferred payment imports, the prices must be internationally competitive and all in cost including usance interest must not exceed 6% a year. Since May 5, 2019, the all-in-cost ceiling per year for usance period against imports under supplier/buyer credit was set at 6-month LIBOR plus 3.5% spread (maximum). Effective June 21, 2021, alternative reference/benchmark rate in the currency of financing, declared by competent bodies, may be applied with prescribed markup of 3.5% a year for permissible usance import under supplier/buyer credit. Where forward looking reference/benchmark rate with tenure-link is absent, the relative rate applied as reference/benchmark rate for import finance may be compounded in arrears to calculate effective interest for the tenure of credit. In case of risk-free reference/benchmark rate to be applied for financing, adjustment for risk premium not exceeding 2.5% a year on markup of 3.5% may be added with reference/benchmark rate compounded in advance or in arrear as necessary, for the relative tenure.

Exporters are allowed to use the unencumbered balances held in the single pool within 30 days to meet the import payments of exporters’ subsidiaries/sister concerns.

Minimum financing requirements Yes. Generally, banks are allowed to decide on the cash margin of LCs for imports on the basis of banker–customer relationship. In light of the COVID-19 recovery and the Russia–Ukraine conflict, effective April 11, 2022, banks must ensure a minimum of 25% cash margin on imports except for certain essential products. Effective May 10, 2022, the margin for opening import LCs was increased to a minimum of 75% for luxury products and 50% for other products except for certain essential products. Effective July 4, 2022, these requirements were increased to 100% and 75%, respectively.

Advance payment requirements Yes. Advance payments up to the equivalent of US$10,000 for imports of any permissible items do not require a repayment guarantee. The limit of advance payment from ERQ accounts is US$25,000 or its equivalent. To facilitate urgent medical imports required for containment of COVID-19, ADs could effect, without repayment guarantee, advance payment up to US$500,000 or equivalent to other FC for import of coronavirus-related life-saving drugs, medical kits/equipment, and other essential medical items. This facility was valid until December 31, 2021, and is no longer in force effective January 1, 2022.

Advance import deposits Yes. Generally, banks are allowed to decide on the requirements for advance import deposits on the basis of banker–customer relationship. In light of the COVID-19 recovery and the Russia–Ukraine conflict, effective April 11, 2022, banks must ensure a minimum of 25% cash margin on imports except for certain essential products. Effective May 10, 2022, the margin for opening import LCs was increased to a minimum of 75% for luxury products and 50% for other products except for certain essential products. Effective July 4, 2022, these requirements were increased to 100% and 75%, respectively.

Documentation requirements for release of foreign exchange for imports Yes. ADs must observe the following procedures during importation through land ports: (1) Only one port of entry (land port) may be named in the LC. (2) A copy of the LC and subsequent amendments, if any, including other relevant information, must be sent to the land
port authority. (3) Sample signatures of the officials working at the import-export desks of the ADs concerned, along with their contact phone and fax numbers, must be supplied to all land ports. (4) ADs’ agents or representatives must obtain directly from the land port involved a list of goods entering Bangladesh, a certified invoice, and a bill of entry showing entry of the goods for inclusion in a database accessible to all ADs. (5) LCs must not contain any reimbursement or debit authority; rather, they must stipulate the following payment terms: “on receipt of documents complying with credit terms, we must effect payment as per instructions of the negotiating bank or collecting bank.” (6) LCs covering more than US$5,000 or its equivalent must be sent through the SWIFT system to the advising bank. Pursuant to Order No. 288/2017/Customs/529 of December 21, 2017, transactions between enterprises operating in DPA of EZs and in Tariff Area of Bangladesh may be settled in taka without observance of regulatory procedures such as EXP Form for export and IMP Form for import. To support the transactions by EZ enterprises, irrespective of their ownership status, their liabilities for imports and other permissible expenses may be settled out of the fund held in their taka accounts.

Domiciliation requirements: No.

Preshipment inspection: No.  
Preshipment inspection, except for those products prescribed in IPO, 2015–2018, is not mandatory.

Letters of credit: Yes.  
Payment against imports is generally permissible only under irrevocable LCs. However, consignment of quickly perishable food goods worth US$50,000 via Teknaf Customs Station, essential food goods and raw materials used in industry worth US$10,000, and capital machinery irrespective of price limit via other custom land stations may be imported against contract without LC as instructed in IPO, 2021–2024, Chapter 2, Paragraph 8 (2). Capital machinery and industrial raw materials may also be imported without LCs and without limit on value.

Recognized export-oriented units operating under the bonded warehouse system may import up to, effective May 1, 2022, six months’ (previously four months’) supply of their raw and packing materials by establishing import LCs without reference to an export LC. They may also effect such imports by opening back-to-back LCs (either on a sight basis under the EDF or for up to 180 days on a usage basis) against export LCs received by them.

ADs may establish LCs on a c.f.r., c.p.t., or f.o.b. basis without the BB approval. Imports may also be on a delivered at terminal (d.a.t.) or delivered at place (d.a.p.) basis. Importation on a c.i.f. or c.i.p. basis requires the permission of the Ministry of Commerce. Foreign exchange for authorized imports is provided automatically by ADs when payments are due. The maximum import value (through an LC or contract) for a mandatory credit report of foreign suppliers by ADs is US$10,000 if a pro forma invoice is issued directly by the foreign supplier and US$20,000 if orders are issued by the foreign supplier local agent.

Effective January 1, 2022, until June 30, 2022, the usance period for imports of industrial raw materials including back-to-back imports, and imports of agricultural implements and chemical fertilizers under supplier/buyer credit may be extended up to 270 days. Previously, valid until December 31, 2021, for facilitation of trade transactions in the context of COVID-19, the usance period of back-to-back LCs opened under supplier/buyer credit could be extended on banker-customer relationship within the admissible rate of interest up to 180 days, as additional time from the permissible period of 180 days, for bona fide grounds required to settle the payments. With a
view to facilitating export trade during COVID-19 without requiring permission of BB, input procurements under back-to-back LCs/usance LCs could be issued with realization clause on behalf of exporters operating outside specialized zones provided: (1) ADs verified the execution of the export orders; (2) there was a transparent arrangement under which suppliers were in agreement to accept the relevant LCs with realization clause; (3) LC liabilities would not be settled under “net-off” arrangement with export proceeds.

To facilitate the remittances for import payment against expired LCAF which are restricted without obtaining its revalidation, ADs may effect remittances within 30 months of LCAF issuance against import of capital machinery without obtaining its revalidation.

Revalidation of LCAF will not be required for remittances against import out of fund held in FC accounts of importers maintained under general or special authorization from the BB. LCAFs issued for the import of hot-rolled coil, scrap, pig iron, and sponge iron for manufacturing of flat and long steel for use in own factories of steel industries on a 360-day deferred payment basis are valid for remittances for 18 months following the month of issuance. LCAFs may also be signed by lawful representative(s) of the importer.

Import licenses used as exchange licenses

All importers (including all government departments, with the exception of the Ministry of Defense) are required to obtain LCAFs for imports. Under the authority of the IPO issued by the chief controller, importers may effect imports against LCAFs issued for imports under bilateral trade or payments agreements and for imports under tied-aid programs. LCAFs are otherwise valid worldwide, except for imports from Israel and imports transported on Israeli flag vessels, which are prohibited. Goods must be shipped within 30 months of the date of issuance of LCAFs in the case of machinery and spare parts, and 12 months in the case of all other items. ADs may effect import payment within 30 months of issuance of LCAF against import of capital machinery and spare parts. Revalidation of LCAF will not be required for such remittances against import out of fund held in importer’s FC accounts maintained under general or special authorization from the BB. LCAFs issued for import of capital machinery and spares are valid for remittances for 18 months from the month of issuance.

Incoming passengers irrespective of their resident status may bring into Bangladesh gold or silver in bullion/ingot up to the prescribed limit in terms of relevant baggage rules in force issued under the Customs Act, 1969.

Unless otherwise specified, no import license is required for imports. Importers with a valid Import Registration Certificate (IRC) may import any kind of goods against the ceiling value, except the goods specified in the prohibited lists.
Licenses with quotas  Yes. Unless otherwise specified in the IPO 2021–2024, industrial units approved on a regular basis are allowed to import up to 300% of their regular import entitlement of items whose import is banned for commercial purpose and that are importable by industrial consumers only. Industrial units approved on an ad hoc basis are allowed to import up to the maximum value limit, not exceeding 100% of their half-yearly import entitlement.

Other nontariff measures  No. As a member of the WTO and regional trade organizations, Bangladesh is liberalizing its trade policies gradually and is maintaining non-discriminating measures. The country is also not applying nontariff measures to restrict imports and exports, except the prohibited and restricted items of goods therein the Annexure-1 in line with the WTO Agreements.

Import taxes and/or tariffs  Yes. The tariff bands are 0%, 1%, 5%, 10%, 15%, and 25%. A number of goods are subject to supplementary duties.

Taxes collected through the exchange system  No.

State import monopoly  No.

Exports and Export Proceeds

Repatriation requirements  Yes. Proceeds from exports must be repatriated within four months of shipment, unless otherwise permitted by BB. On March 19, 2020, because of COVID-19, it was allowed to extend the tenure of realization of export proceeds up to 60 days, as additional time from the specified period of 4 months from the date of shipment, for bona fide grounds. On July 23, 2020, the facility to extend the tenure of realization was increased to 90 days until March 31, 2021. Effective April 1, 2021, the facility was extended until June 30, 2021. Effective July 1, 2021, the facility was extended until December 31, 2021.

Surrender requirements  Yes.

Surrender to the central bank  No.

Surrender to authorized dealers  Yes. Exporters are required to repatriate export proceeds within the statutory period and to sell the proceeds to ADs exceeding the eligible portion retainable in foreign exchange in single pool and ERQ. Industrial units located at specialized EZs may also retain their export proceeds in FC accounts up to the eligible portion.

ERQ: Merchandise exporters may retain 60% of repatriated FOB value of their exports in foreign exchange in ERQ accounts. For exports of goods having high import content (low domestic value-added), the retention quota is 15% of the repatriated FOB value. Exporters of Information and Communication Technology (ICT)-related services may retain 70% of net export earnings in ERQ accounts, and service exporters other than ICT-related services may maintain 60% of their export receipts in ERQ. Balances in these accounts may be used by the exporters for bona fide business purposes.

Effective July 14, 2022, the retention limits were decreased from 15%, 60%, and 70% to 7.5%, 30%, and 35%, respectively, until December 31, 2022.

Single Pool: Export proceeds may be retained in a single pool after encashment of value for settlement of back-to-back LCs. For import payments other than back-to-back LCs, proceeds may be retained in
single pool up to 30 days.

FC accounts for industrial units in zone areas: Type A industries operating in EPZs may retain 100% of their export earnings in FC accounts. Up to 80% of the repatriated export proceeds of Type B and Type C units other than those in the garments sector may be retained in FC Accounts; for a Type B or Type C unit in the garments sector, up to 75% of the repatriated export proceeds may be credited to FC accounts. The facilities are equally applicable for industries located at EZs and HTPs.

Financing requirements

Yes.

Effective June 21, 2021, it was allowed to apply, besides LIBOR, alternative reference/benchmark rate in the relevant currency of financing to set the interest rate.

The following apply to pre-shipment financing in foreign exchange:

(1) Back-to-back LCs: To procure input requirements for execution of export orders, exporters are allowed to open back-to-back import LCs/inland back-to-back LCs in foreign exchange against export LCs received by them. Settlement of back-to-back LCs must be made with export proceeds.

(2) Supplier/buyer credit: Exporters may obtain supplier/buyer credit from abroad at all-in-cost ceiling of, effective August 16, 2022, the applicable benchmark rate in the relevant currency of financing plus mark-up of 3% a year (previously, 6-month LIBOR plus 3.5% a year).

The following apply to post-shipment financing in foreign exchange:

(1) Bill discounting: To obtain immediate financing, beneficiaries of usance export bills are permitted to avail of bill discounting facilities at overall cost not exceeding, effective August 16, 2022, the benchmark rate applicable to the relevant currency of financing plus mark-up of 3% a year (previously, 6-month LIBOR plus 3.5% a year).

(2) Early payment against sales under open account: Export on sales contracts under open account credit terms is allowed against payment enterprise/payment risk coverage by designated institutions abroad with option for early payment arrangement on non-recourse basis. Expenses to exporters for guarantee commission against payment enterprise/payment risk coverage, and interest with relevant charges for early payment against export bills/receivables may not exceed, effective August 16, 2022, the benchmark rate applicable to the relevant currency of financing plus mark-up of 3% a year (previously, 6-month LIBOR plus 3.5% a year).

Documentation requirements

Yes.

Declaration of exports: Declaration on EXP Form must be submitted by exporters to the Customs Authority or another relevant authority, such as BB, which specifies that foreign exchange representing full export value of the goods has been or will be disposed of in a manner and within a period specified by the BB.

BB introduced an electronic option to submit EXP Form, with flexibility for amendments by exporters through BB online reporting portal for export of goods prior to customs formalities.

Drawing/Endorsement of shipping documents: Transport documents such as bills of lading and any other documents of title to cargo must be drawn only to the order of an AD designated by the respective exporter; airway bills and any other documents of title to cargo must be drawn to the order of a bank in the country of import nominated by the AD designated by the respective exporters for export of goods by land route or by sea or by air, with exception for exports from Type A industrial units located in the EPZs/EZs.

Transport documents may be issued to the order of importer or other designated parties against full export proceeds received in advance.
through normal banking channels. Such issuance is also permitted for export under open account credit terms against payment enterprise/payment risk coverage by designated institutions abroad. The ADs to whose order the relative transport documents are drawn must endorse the same to the order of their correspondents abroad. However, documents may be endorsed to importer or other designated parties before sending documents for collection provided export proceeds in full are received through banking channels. Submission of export documents: Exporters must submit a full set of export documents within 14 days of shipment to ADs.

Letters of credit Yes. In addition to LCs, exports under contract are allowed.

Guarantees No.

Domiciliation No.

Preshipment inspection No.

Other Yes. Exporters are allowed to export on ex-works (EXW); free carrier (FCA); FOB; free alongside ship (FAS); cost and freight (CFR), cost, insurance and freight (CIF); carriage paid to (CPT); and carriage and insurance paid to (CIP) basis provided the terms are stipulated in the relevant LCs or sales contracts.

Export licenses Yes. According to the Export Policy 2021–2024, effective March 23, 2022, exports of 15 (previously 16) products are prohibited. Exports of 17 (previously 15) products are allowed under certain conditions. Some of these items are restricted for ensuring adequate supply in the domestic market.

Without quotas Yes.

With quotas No.

Export taxes Yes.

Export licenses No.

Other export taxes Yes. Exports of rice bran, unmanufactured tobacco; tobacco refuse, cigars, cheroots, cigarillos, and cigarettes of tobacco or of tobacco substitutes, other manufactured tobacco, and manufactured tobacco substitutes; homogenized or reconstituted tobacco extracts and essences, cotton waste, and building bricks are taxed.

Payments for Invisible Transactions and Current Transfers

Controls on these transfers Yes. Payments for invisible transactions related to authorized trade transactions are generally not restricted.

Trade-related payments Yes. ADs may pay freight charges to foreign shipowners for ships chartered by importers in Bangladesh without the BB approval. Importers may make payments of freight charges for f.o.b. imports as declared in an LCAF to the shipping lines/airlines/licensed freight forwarders in FC. Shipping lines/airlines may also accept payment in FC from freight forwarders for handling of f.o.b. exports. FC deposited in FC accounts of shipping lines/airlines against freight charges on f.o.b. exports from licensed freight forwarders may be used for outward remittances on account of surplus earnings. Balances in FC accounts must first be used for outward remittances before use of local currency funds. AD banks must ensure the encashment of adequate FC by the shipping lines/airlines to meet local expenses in case of shortfall in local currency funds. In view of wider scope of fund sources in Bangladesh, the legitimate charges (charges of demurrage, detention, handling, or equivalent charges) in
addition to freight charges are also allowed to be considered for calculation of remittable surplus of foreign shipping lines/their agents working in Bangladesh subject to deduction of taxes and commission.

The list of permissible debits from NRTAs includes, subject to approval or reporting requirements, outward remittances in FC for the purposes of permissible procurement of goods and services from abroad for institutional account holders.

To facilitate smooth operations of branches of foreign banking companies in Bangladesh, ADs are allowed to remit head office expenses without prior approval from the BB subject to observance of some instructions which is allocated by the head office to their branches in accordance with standard practices. Funds from Personal FC accounts may be used for payment of admissible imports in terms of the IPO in force. Effective January 6, 2022, the usance period for imports of industrial raw materials including back-to-back imports, and imports of agricultural implements and chemical fertilizers under supplier/buyer credit pursuant to Paragraph 33(a)(ii) and 33(a)(iv), Chapter 7 of the GFET-2018, Vol.-1, may be extended up to 270 days (previously 180 days). Effective January 6, 2022, the EDF limit for individual member mills of Bangladesh Textile Mills Association (BTMA) and Bangladesh Garment Manufacturers and Exporter Association (BGMEA) is US$30 million (previously US$25 million). Extension of EDF loans for a period of 90 days up to 270 days pursuant to Paragraph 3 of FE Circular No. 45 of December 31, 2017, still applies.

Prior approval

Yes. Up to 5% of export receipts (up to 33.3% in the case of books) may be remitted abroad for commissions without the BB approval.

Quantitative limits

No.

Indicative limits/bona fide test

Yes. Payment abroad of commissions or discounts and remittances for operating expenses is subject to indicative limits and verification.

Purchases by individuals in border markets, from the respective local currency, are limited to the equivalent of US$100. Besides the ERQ, the remittable amount for information technology (IT) and/or software firms is US$30,000. Within this limit, the amount that can be made through international cards (ICs) is US$6,000.

To facilitate export trade in meeting urgent needs, ADs are allowed to provide remittance facilities to the exporters for bona fide service payments to beneficiary’s bank account abroad up to US$5,000 or equivalent.

Investment-related payments

Yes.

Prior approval

No.

Quantitative limits

Yes.

Indicative limits/bona fide test

Yes. ADs may remit dividends to nonresident shareholders without the BB approval on receipt of an application from the company concerned. Applications must be supported by an audited balance sheet; a profit and loss statement; and a board resolution declaring to the head office dividends from profits earned from foreign firms, banks, insurance companies, and other financial institutions operating in Bangladesh. No approval is required for remittances on loans if a loan agreement has been cleared by the BIDA. Local stock brokerage firms acting in Bangladesh on behalf of foreign stock brokerage firms may repatriate, without the BB approval, a share of commission earnings to the respective foreign firms against services rendered to foreign portfolio investors for investment in Bangladesh. Private sector industrial enterprises approved by BIDA may release...
foreign exchange on account of royalty, fees for technical knowledge or technical assistance, and franchise fees to foreign persons or institutes through AD banks in accordance with the prescribed manner as defined by BIDA (BIDA guidelines of March 20, 2021, further circulated through FE Circular Letter No. 7 of April 11, 2021).

Submission of documents against dividends payable to foreign shareholders on behalf of enterprises operating in EZs/HTPs/EPZs (specialized zones) was waived pursuant to Paragraph 9, Chapter 20 of GFET.

Payments for travel Yes.

Prior approval No.

Quantitative limits No.

Indicative limits/bona fide test Yes. The indicative limit for private travel was increased to US$12,000 or equivalent an adult passenger a calendar year from US$5,000 and US$7,000 for travel to South Asian Association for Regional Cooperation (SAARC) member countries (Afghanistan, Bangladesh, Bhutan, India, Maldives, Nepal, Pakistan, and Sri Lanka) and Myanmar, and for travel to other countries, respectively. For minors (below 12 years of age), the applicable quota, as before, is half the amount for adults. The entire unused balance may be released to individuals traveling abroad with a one-way ticket, if it is for valid job or migration purposes. ADs may release foreign exchange without visa to the resident Bangladesh nationals proceeding to the countries/zones with provision of visa on port of entry/arrival basis up to the unused annual travel quota entitlement applicable for the country concerned subject to complying with other relevant instructions. The facility will also be applicable for official visits abroad by the officials of government/semi-government and autonomous bodies. ADs and licensed MCs may release foreign exchange on account of overseas allowances of the cockpit and cabin crews of Biman Bangladesh Airlines Ltd.

Releasable FC in cash US dollar notes for outgoing Bangladeshi residents is US$5,000 a person a trip from their annual entitlement applicable for personal travel quota/business travel quota/treatment abroad/immigration/higher education or other specially or generally approved purposes. The remainder or full amount of quota may be released in other freely convertible FCs in cash or in ICs. The business travel quota entitlement was revised in 2014. New exporters, importers, and producers for the local market are entitled to foreign exchange for travel abroad of US$400 a day, subject to a limit of US$4,000 a trip and US$10,000 a calendar year. Established exporters may also use balances in their ERQ (15% of exports of goods with high import content, such as ready-made garments (RMG), and 60% of repatriated export proceeds of merchandise and services) for business travel abroad. Senior-level (top two tiers) expatriates in Bangladesh under valid visas and work permits are entitled to the same business travel allowance as Bangladesh nationals, which may be used through international credit/debit cards. Higher amounts require documentation. Foreign exchange quota for business travel abroad is also applicable for local agents operating in Bangladesh on behalf of foreign principals. ADs may release foreign exchange in favor of private sector participants for attending seminar, conference, workshops, training, etc., abroad up to US$400 per diem irrespective of the countries of destination.

Personal payments Yes.
**Prior approval**
Yes. Foreigners retiring from Bangladesh do not need approval to transfer genuine savings from salaries/benefits, retirement benefits such as provident funds and pensions, and gratuities due under an employment contract approved by the BIDA. Permissible debits from NRTAs include, subject to approval or reporting requirements, outward remittances in FC for subsistence expenses for individual account holders and their family members in their country of residence.

**Quantitative limits**
Yes. Up to US$10,000 or its equivalent may be obtained for medical expenses without approval. Larger amounts require the BB approval, subject to submission of supporting documents. ADs may remit the registration fee to the bank accounts of the beneficiaries for medical checkup of migrant workers, the fee in case of invoices specifying details of the checkup and deduction of applicable taxes.

**Indicative limits/bona fide test**
Yes. Foreign exchange for education is available up to the cost of tuition and living expenses, as estimated by the educational institution concerned. Students are allowed to have travel entitlement (entire unused travel quota) against a one-way ticket when proceeding abroad for study. Permission is not required for the remittance of fees for approved undergraduate, postgraduate, diploma, and professional courses.

ADs may release foreign exchange for study of Bangladeshi students in permissible courses abroad in favor of the designated intermediary payment processing entity. In the context of COVID-19, to facilitate transactions on account of study, ADs may effect outward remittances abroad under online teaching arrangements subject to supporting documentation. This was no longer valid effective October 1, 2021.

Because of the concern that students intending to study abroad are in some cases required to pay a Health Insurance fee as a prerequisite for Visa/Admission, ADs are allowed to release foreign exchange on account of Health Coverage/Health Insurance/Medical Insurance fee, provided such fees are mandatory for Visa/Admission in permissible courses supported by documentary evidence from the concerned educational institution.

Foreign exchange is available for the support of dependents abroad, on presentation of a certificate from the Bangladesh Embassy in the country concerned, up to a reasonable level, which is based on prevailing prices. Applications for foreign exchange for studies abroad and for family maintenance are approved on verification of their validity. Foreign exchange may be remitted for right of landing/permanent residence fees required by foreign immigration authorities for Bangladesh nationals permanently emigrating abroad.

ADs may release foreign exchange toward remittance of publication-related fees for publication of articles in reputed international journals written by resident Bangladesh nationals. While effecting remittance, ADs verify the genuineness of the invoices from the publishing companies/publishers abroad and the deduction of applicable taxes.

**Foreign workers' wages**
Yes.

**Prior approval**
No.

**Quantitative limits**
Yes.

**Indicative limits/bona fide test**
Yes. Effective December 27, 2021, to bring further liberalization regarding family remittances: (1) ADs are allowed to remit up to 80% of earned net income after tax at any time during the year subject to availability of funds in the bank accounts of foreign
nationals working in Bangladesh pursuant to “Form of Application for Private Remittance by Foreign National to Countries Abroad” prescribed in Appendix 5/81 of GFET (Annexure-I) as amended. (2) The remaining 20% of foreign nationals’ net income is remittable at the end of the financial year on completion of income tax assessment, supported by certificate issued by the tax authority. (3) ADs are also allowed to remit foreign nationals’ net income from the employers’ FC Account opened and maintained for this purpose abroad where the family members of the foreign employees reside. Previously, foreign nationals could remit freely up to 75% of their net salary on a monthly basis in connection with service contracts approved by the government. The entire amount of their earned leave pay and savings could also be freely remitted after the end of their service period in Bangladesh. Besides their country of domicile, such monthly remittances were also allowed to be sent to other countries where their family members live as declared by them in the prescribed application form. Foreign nationals could remit up to 75% of their bonus after deduction and payment of applicable taxes in one transaction.

Credit card use abroad  Yes.

Payment in foreign exchange may be made through ICs (debit/credit/pre-paid) of internationally recognized issuing companies against different entitlements or different account balances. For bona fide business purposes, ADs are allowed to issue an international credit card for up to 3 top-level executives of an exporting firm/organization against their ERQ account and 3 top-level executives of an enterprise in EPZs and EZs from one card-issuing bank only.

ADs may issue international debit cards in favor of eligible persons against their annual travel entitlements subject to observance of several instructions. Effective September 23, 2021, ADs may endorse and set travel entitlements on relevant passports to concerned Bangladeshi nationals in ICs for multiple years up to their validity subject to compliance with relevant instructions. ADs may allow their cardholder customers to use ICs for online payment not exceeding US$300 or its equivalent for a single transaction against purchase of goods and services (such as downloadable application software and e-books), magazine/newspaper subscription fees and other legitimate goods and services (except prohibited ones) from reputed and reliable sources abroad.

Online payment from Bangladesh may be executed for actual payment against the following transactions, subject to admissible annual entitlements or balances of FC accounts linked to the concerned cards: (1) Bona fide payments by BASIS member IT/software firms (cf. Paragraph 11, Chapter 19 of GFET); (2) Membership fees, etc. (cf. Paragraph 12, Chapter 19 of GFET); (3) IT expenses (cf. Paragraph 13, Chapter 19 of GFET and FE Circular No. 33 of September 09, 2019); (4) Visa-processing fees (cf. Paragraph 14, Chapter 19 of GFET); (5) Hotel booking (cf. Paragraph 16, Chapter 19 of GFET); and (6) Mobile phone roaming bills (cf. Paragraph 18, Chapter 19 of GFET).

For online purchase of air tickets by travelers before proceeding abroad for subsequent air travels between destinations outside Bangladesh, ICs may be used. Bangladeshi travel operators may also provide such ticketing services to travelers for movements between destinations outside Bangladesh against payments by ICs. ADs may, under merchant agreements, provide acquiring services to travel operators in Bangladesh for capturing online payments settled through ICs against sales of air tickets for such travels. Acquiring
services by ADs may also be applicable for capturing payments against such sales to foreign nationals/nonresidents residing abroad or in Bangladesh. Such payments must be retained in margin accounts of travel operators.

Effective May 2, 2021, ADs may allow annual remittance facilities of US$10,000 or its equivalent to a member firm of e-Commerce Association of Bangladesh for meeting bona fide current expenses abroad through traditional banking channels or a card. ADs may issue refillable international credit/pre-paid card with US$2,000 to the nominated official of the remitter within the limit. Aggregate refills in cards and remittances by banking channels may not exceed US$10,000 a calendar year.

Effective May 31, 2021, ADs may use IC channels as alternative to traditional banking channel to effect outward remittances on behalf of customers for permissible payments in accordance with GFET and its subsequent circulars as follows: (1) Remittance for IT expenses as per Paragraph 40, Chapter 10 of GFET for non-cardholder individuals; (2) Membership fees, fees for application, registration, admission, examination, etc., as per Paragraph 9, Chapter 11 of GFET for non-cardholder individuals; (3) Release of foreign exchange for study abroad as per Paragraph 10, Chapter 11 of GFET; (4) Remittance of visa fees abroad as per Paragraph 11(B), Chapter 11 of GFET for non-cardholder individuals; (5) Remittance of immigration visa-processing fees, evaluation fees, right of landing fees as per Paragraph 12, Chapter 11 of GFET for non-cardholder individuals; (6) Registration/participation fee for attending training, seminar, workshop abroad as per Paragraph 14, Chapter 11 of GFET; (7) Remittance for academic/research journal subscription as per Paragraph 15, Chapter 11 of GFET; (8) Remittance toward publication-related fees of articles in international journals as per Paragraph 16, Chapter 11 of GFET; (9) Release of foreign exchange for travel on health ground as per Paragraph 2, Chapter 12 of GFET, provided total release through cash and ICs does not exceed the permissible limit; (10) Remittance on account of tour operators out of balances held in FC accounts as per Paragraph 22(f), Chapter 12 of GFET; and (11) Periodical remittances to counterparts abroad by travel operators as per Paragraph 2(a), FE Circular No. 40 of September 24, 2020.

General approval has been given for issuance of international credit, debit, and prepaid cards for use abroad by resident Bangladesh nationals issued against (1) balances in ERQs; (2) individual annual personal travel quota entitlements; (3) balances in RFCDAs; (4) foreign exchange entitlements (established by the government for each person intending to perform Hajj) of approved private Hajj agencies for food and lodging expenses of pilgrims in Saudi Arabia; (5) foreign exchange entitlements established by the MOF or an appropriate authority for official or semiofficial visits abroad by government officials, autonomous and semiautonomous institutions, and so forth; (6) per diem foreign exchange entitlements for private sector participants attending seminars, conferences, and workshops abroad arranged by recognized international organizations; (7) personal entitlements established yearly by the government for pilgrims intending to perform Hajj; (8) against balance in private FC accounts; (9) against annual entitlement for IT/software firms; (10) against membership fees, examination fees, etc.; (11) against business travel quota entitlement; (12) against IT expenses; and (13) against visa-processing fees. ADs may issue debit cards to NRBs and foreign nationals against the balances held in foreign exchange accounts opened and maintained with them. ADs may issue...
international debit cards in favor of eligible persons against their annual travel entitlements subject to observance of several instructions.

**Quantitative limits**
Yes.

**Indicative limits/bona fide test**
Yes. Transfers may be made up to the amount of the balance in respective foreign exchange accounts and respective entitlements.

**Other payments**
Yes. Banks may remit registration fees for attendance at training, seminars, and workshops abroad by officials of government, autonomous/semiautonomous entities, and banks and banking training institutions. Banks may also remit registration fees for officials of the private corporate sector and nongovernmental organizations (NGOs) who attend training, seminars, and workshops abroad without the BB permission. ADs no longer need to seek a first-time approval from BB to effect remittances on account of maintenance/support fees of proprietary/specialized software subject to observance of prescribed instructions. Permissible debits from NRTAs include, subject to approval and reporting requirements, outward remittances in FC for permissible procurement of goods and services from abroad for institutional account holders. ADs may remit funds for membership/affiliation fees of local business/professional entities to professional/scientific institutions abroad. AD banks may effect remittance toward the cost of advertisement of Bangladeshi products in foreign electronic and online media in dynamic, image, video, interactive, and/or other formats, after verifying the genuineness and bona fide of the requests through agreement and invoices and after deducting all applicable taxes.

**Prior approval**
Yes.

**Quantitative limits**
Yes. ADs may effect remittances on account of royalties, technical knowledge/technical know-how, technical assistance fee(s) by firms registered with the BIDA subject to the BIDA guidelines of March 20, 2021, further circulated through FE Circular Letter No. 7 of April 11, 2021. Permission of BB is not required for these transactions.

**Indicative limits/bona fide test**
Yes. Industrial enterprises producing for local markets and service sector industries are allowed to remit through their nominated ADs up to 1% of annual sales as declared in their previous year’s income tax or US$100,000, whichever is higher, for paying legitimate current account payments, such as audit fee, certification fee, commissioning fee, testing fee, and valuation fee.

**Proceeds from Invisible Transactions and Current Transfers**

**Repatriation requirements**
Yes. Proceeds of service exports are freely repatriable subject to declaration on Form C. However, traditional declaration on EXP Form is not required for export undertaken in non-physical form. Furthermore, declaration on Form C is not required for inward remittance up to US$10,000. Repatriation requirement against export of physical goods is equally applicable for exports of services as defined at Section 2 (bbb) of the FERA, 1947. Income against small-value service exports in non-physical form up to US$10,000 per transaction may be repatriated through international market places/platforms or eligible foreign payment operators, for example, Online Payment Gateway Service Providers, payment service aggregators, payment facilitators, and digital wallets. In this regard, service exporters may maintain notional/merchant accounts with international market places/platforms or eligible foreign payment operators to repatriate their income through ADs in Bangladesh.
Surrender requirements: Yes.

Surrender to the central bank: No.

Surrender to authorized dealers: Yes.

Service exporters are required to repatriate service income within statutory period and to sell the proceeds to ADs exceeding the eligible portion retainable in foreign exchange in ERQ.

Exporters of ICT-related services may retain 70% of net export earnings in foreign exchange in ERQ accounts, and service exporters other than ICT-related services may retain 60% of their export receipts in ERQ. Accordingly, on receipt of inward remittances, ERQ account of the exporters may be credited up to the permissible limit at their options and the remainder (or up to full, at exporter’s option) must mandatorily be credited in local currency accounts after conversion.

Effective July 14, 2022, the retention limit was reduced by half to 35% (for exporters of ICT-related services) and 30% (for other service exporters), respectively, until December 31, 2022.

Effective February 10, 2021, to facilitate small-value Information Technology-Enabled Services exports, Mobile Financial Service Providers (MFSPs) licensed by BB may repatriate export proceeds in association with internationally recognized Online Payment Gateway Service Providers/digital wallets and/or aggregators having operation in multiple countries.

Effective May 2, 2021, to facilitate e-commerce trade in the country, ADs may allow annual remittance facilities of US$10,000 or its equivalent to a member firm of e-Commerce Association of Bangladesh for meeting bona fide current expenses abroad through traditional banking channels or a card. ADs may issue refillable international credit/pre-paid card with US$2,000 to the nominated official of the remitter within the limit. Aggregate refills in cards and remittances by banking channels may not exceed US$10,000 a calendar year.

Bangladeshis working abroad may retain their earnings in foreign exchange accounts or in NFCD accounts. Unless they have an exemption from the BB, resident Bangladeshis must sell to an AD any foreign exchange they receive, whether held in Bangladesh or abroad, within one month of receipt. However, returning residents may keep, in foreign exchange accounts in their names, foreign exchange they brought in, provided it does not represent proceeds from exports from Bangladesh or commissions earned from business activities in Bangladesh. Residents must declare inward remittances from abroad, except remittances by Bangladeshis working abroad, using Form C for amounts exceeding US$10,000 or its equivalent. Foreigners residing in Bangladesh for more than six consecutive months must sell within one month of the date of receipt foreign exchange earned from business conducted in Bangladesh or services rendered while in Bangladesh.

ADs are advised to inform individual beneficiaries regarding their option for retention in FC before encashment of inward remittances. Without their consent, ADs should not outrightly encash inward remittances for credit in Taka accounts. ADs should also guide their customers on facilities of outward remittances out of retention amount for bona fide current account transactions pursuant to Paragraph 23(b)(3)(b), Chapter 8 and Paragraph 28(A), Chapter 13 of GFET, and subsequent circulars.

Restrictions on use of funds: Yes.

Balances held in ERQ accounts from proceeds against service exports may be used by exporters for bona fide business needs.
Capital Transactions

Controls on capital transactions  Yes.

Repatriation requirements  Yes. Residents must repatriate and sell to ADs the foreign exchange proceeds from all approved capital transactions abroad within one month.

Surrender requirements  Yes.

Surrender to the central bank  No.

Surrender to authorized dealers  Yes. Residents must repatriate and sell to ADs the foreign exchange proceeds from all approved capital transactions abroad within one month.

Controls on capital and money market instruments  Yes.

On capital market securities  Yes.

Shares or other securities of a participating nature  Yes.

Purchase locally by nonresidents  Yes.

Nonresidents may purchase shares locally without restriction or approval. Nonresidents may buy Bangladesh securities through stock exchanges against payment in freely convertible currency remitted from abroad through banking channels. Purchase of new public issues not yet listed in a stock exchange may be made directly from the company issuing the stock/security. ADs maintain NRTAs in the names of their overseas branches and correspondents against inward remittance in convertible FCs are allowed to issue shares in favor of the nonresidents by debiting the NRTAs.

For the purpose of repatriation of sale proceeds of nonresident equity investment in public limited companies not listed with the stock exchanges and private limited companies, BB accepts the fair value of the shares determined on the date of MoU for share sale–purchase agreement between the buyer and seller based on the latest audited financial statements of the target company. The fair value of the shares must be determined by weighted average calculation of all the 3 valuation approaches (that is, NAV approach, market value approach, and discounted cash flow approach) or on any of the suitable approaches depending on the nature of the company.

However, ADs may effect remittances on account of sales proceeds of shares regardless of the amount, the fair value of which is determined by the management of the target companies through NAV approach based on latest audited financial statements submitted together with tax returns, and ADs are allowed to remit sale proceeds without BB approval up to Tk. 100 million or equivalent in FC based on fair value determined by weighted average calculation of three valuation approaches or any of the suitable approaches depending on the nature of the company prescribed in Foreign Exchange Investment Department (FEID) Circular No. 1 of June 5, 2018, whereas for repatriation of sale proceeds below Tk.10 million or equivalent in FC, neither BB approval nor valuation report from independent valuer is required. However, ADs must report the share transactions to the FEID, BB, Head Office, Dhaka, within 14 days of transfer of shares pursuant to Paragraph 2(B), Chapter 9 of GFET. There are no approval requirement or quantitative limitations in force.

ADs may effect remittances on account of sales proceeds of shares of nonresidents in private/public limited companies not listed with stock
exchanges based on the NAV approach, regardless of the amount. Further, BB’s permission is not required to repatriate sales proceeds of shares up to Tk 10 million or equivalent in FC without a valuation report from independent valuers, or to repatriate between Tk 10 million and Tk 100 million or equivalent in FC on account of sales proceeds based on fair value determined using the valuation methods prescribed in FEID Circular No. 1 of May 6, 2018. This applies only to the sale of shares by nonresidents to residents. Post tax dividends and capital gains from sale proceeds of listed shares are credited to NITA and balance lying in NITA are freely remittable abroad. Since inception, nonresident investors purchase shares through NITA under Foreign Exchange Guideline as of May 31, 2009, through the Securities Custodians registered with Bangladesh Securities and Exchange Commission (BSEC) under the Securities and Exchange Commission (Security Custodial Service) Rules, 2003.

</table>
| By residents to nonresidents                         | Yes        | Effective January 1, 2022, until June 30, 2022, the usance period for imports of industrial raw materials including back-to-back imports, and imports of agricultural implements and chemical fertilizers under supplier/buyer credit may be extended up to 270 days. Previously, valid until December 31, 2021, for facilitation of trade transactions in the context of COVID-19, the usance period of back-to-back LCs opened under supplier/buyer credit could be extended on banker–customer relationship within the admissible rate of interest up to 180 days, as additional time from the permissible period of 180 days, for bona fide grounds required to settle the payments. With a view to facilitating export trade during COVID-19 without requiring permission of BB, input procurements under back-to-back LCs/usance LCs could be issued with realization clause on behalf of exporters operating outside specialized zones provided: (1) ADs verified the execution of the export orders; (2) there was a transparent arrangement under which suppliers were in agreement to accept the relevant LCs with realization clause; (3) LC liabilities would not be settled under “net-off” arrangement with export proceeds. ADs may extend the usance periods of the import of life-saving drugs up to maximum of 180 days instead of 90 days depending on the actual needs of their concerned clients. This facility was no longer valid effective April 1, 2021. ADs may open LCs on behalf of industrial units to import necessary spare parts of capital machineries for own industrial use up to 360 days usance basis. For such deferred payment imports, the prices must be internationally competitive and all in cost including usance interest must not exceed 6% a year. Since May 5, 2019, the all-in-
cost ceiling per year for usance period against imports under supplier/buyer credit was set at 6-month LIBOR plus 3.5% spread (maximum). Effective June 21, 2021, alternative reference/benchmark rate in the currency of financing, declared by competent bodies, may be applied with prescribed markup of 3.5% a year for permissible usance import under supplier/buyer credit. Where forward looking reference/benchmark rate with tenure-link is absent, the relative rate applied as reference/benchmark rate for import finance may be compounded in arrears to calculate effective interest for the tenure of credit. In case of risk-free reference/benchmark rate to be applied for financing, adjustment for risk premium not exceeding 2.5% a year on markup of 3.5% may be added with reference/benchmark rate compounded in advance or in arrear as necessary, for the relative tenure.

**Financial credits**

*By residents to nonresidents* Yes. Excep in certain cases, credits are subject to the BB approval.

*To residents from nonresidents* Yes. ADs may obtain short-term and overdraft loans from overseas branches and correspondents for a period not exceeding seven days at a time. Industrial enterprises may borrow funds or make deferred payments for imports for a period beyond 360 days, with BIDA approval.

Type A industries in EPZs/EZs may access short-term FC loans from parent companies/shareholders abroad and other Type A subsidiaries/associates operating in EPZs/EZs.

**Guarantees, sureties, and financial backup facilities**

Yes. ADs no longer need the BB approval to issue guarantees in FC up to SRIs 200,000 (SRIs, Saudi Arabian riyals) to official pilgrimage (Umrah) service providers in Saudi Arabia. ADs no longer need the BB approval to hold collateral on behalf of foreign bank branches or correspondents with respect to external borrowing by industrial enterprises approved by the BIDA. ADs may on behalf of residents issue bid bonds/performance bonds/guarantees in FC in favor of local project authorities against goods/services procurement tenders financed by the government, subject to regulations. Approval from the BB is also not required for issuing guarantees by the borrowers such as corporate guarantee, personal guarantee, and third-party guarantee, as per loan agreement, favoring foreign lenders in case of external borrowing approved by the BIDA. ADs may issue guarantee in taka or equivalent convertible FC on behalf of foreign-owned/foreign-controlled companies operating in Bangladesh, favoring concerned authorities in Bangladesh against foreign back-to-back guarantee acceptable to them subject to observance of some instructions.

*By residents to nonresidents* Yes. On behalf of residents, banks may issue guarantees or sureties in favor of nonresidents for permissible current transactions.

*To residents from nonresidents* Yes. Receipt of guarantees or sureties by residents from abroad requires full disclosure of the underlying transaction. ADs may issue guarantee, bid bond, or performance bond in local currency against taka equivalent on behalf of a nonresident firm/company favoring residents in Bangladesh, provided there is a back-to-back FC guarantee with suitable coverage for exchange rate fluctuation from counter guarantee issuing banks abroad.

**Controls on direct investment**

Yes.

***Outward direct investment***

Yes. All outward transfers of capital require approval. For resident-owned capital, approval is granted only in exceptional cases.

***Inward direct investment***

Yes. Investment, except in the industrial sector, requires approval. The Foreign Private Investment (Promotion and Protection) Act of 1980
provides for the protection and equitable treatment of foreign private investment, indemnification, protection against expropriation and nationalization, and guaranteed repatriation of investments. There is no ceiling on private investment. Tax exemptions are granted for periods of up to nine years, depending on location.

For the purpose of repatriation of sale proceeds of nonresident equity investment in public limited companies not listed with the stock exchanges and private limited companies, BB accepts the fair value of the shares determined on the date of MoU for share sale–purchase agreement between the buyer and seller based on the latest audited financial statements of the target company. The fair value of the shares must be determined by weighted average calculation of all the 3 valuation approaches (that is, NAV approach, market value approach, and discounted cash flow approach) or on any of the suitable approaches depending on the nature of the company. However, ADs may effect remittances on account of sales proceeds of shares regardless of the amount, the fair value of which is determined by the management of the target companies through NAV approach based on latest audited financial statements submitted together with tax returns, and ADs are allowed to remit sale proceeds without BB approval up to Tk. 100 million or equivalent in FC based on fair value determined by weighted average calculation of three valuation approaches or any of the suitable approaches depending on the nature of the company prescribed in FEID Circular No. 1 of June 5, 2018, whereas for repatriation of sale proceeds below Tk.10 million or equivalent in FC, neither BB approval nor valuation report from independent valuer is required. However, ADs must report the share transactions to the FEID, BB, Head Office, Dhaka, within 14 days of transfer of shares pursuant to Paragraph 2(B), Chapter 9 of GFET.

ADs may effect remittances on account of sales proceeds of shares of nonresidents in private/public limited companies not listed with stock exchanges based on the NAV approach, regardless of the amount. Further, BB’s permission is not required to repatriate sales proceeds of shares up to Tk 10 million or equivalent in FC without a valuation report from independent valuers, or to repatriate between Tk 10 million and Tk 100 million or equivalent in FC on account of sales proceeds based on fair value determined using the valuation methods prescribed in FEID Circular No. 1 of May 6, 2018. This applies only to the sale of shares by nonresidents to residents. Post tax dividends and capital gains from sale proceeds of listed shares are credited to NITA and balance lying in NITA are freely remittable abroad.

Remittance of funds for these purchases is not permitted.

Purchases of real estate by a nonresident with funds from abroad are allowed. ADs were allowed to extend mortgage loans in taka to NRBs working abroad for the purpose of housing in Bangladesh, subject to observance of the existing guidelines of Prudential Regulations for Consumer Financing. The housing finance facility provided to NRBs may not exceed the debt-equity ratio of 75:25.

Repatriation of sales proceeds is subject to the BB approval, which is not typically granted.

These transactions are not allowed.
To residents from nonresidents | Yes. | These transactions are not allowed.

*Gifts, endowments, inheritances, and legacies*

By residents to nonresidents | Yes. | Title transfers to nonresidents by way of inheritance are not restricted, but income and sales proceeds from such assets are transferable abroad with the BB authorization.

To residents from nonresidents | Yes. | Resident Bangladesh nationals must obtain government approval to receive gifts or endowments from a foreign donor. Inheritances must be reported to the BB. Net current income from estates inherited abroad must be repatriated.

*Settlement of debts abroad by immigrants*

Yes. | These transactions are usually not allowed, except for repayment of borrowing for industrial investment, in accordance with Board of Investment Bangladesh guidelines.

*Transfer of assets*

Yes. | These transactions are not allowed, except for movable personal assets.

Transfer abroad by emigrants | Yes. | These transactions are not allowed, except for standard travel allowances for residents.

Transfer into the country by immigrants | Yes. | These transactions are permitted; transfers exceeding US$5,000 or its equivalent must be declared. They must also comply with customs regulations (for duties) and Ministry of Commerce regulations (for eligibility of entry into Bangladesh).

*Transfer of gambling and prize earnings*

Yes. | Gambling is prohibited in Bangladesh.

---

**Provisions Specific to the Financial Sector**

Provisions specific to commercial banks and other credit institutions | Yes. | The BB approval is not required for taka advances through the purchase of checks from foreign embassies, international organizations, or foreign nationals employed by them and drawn on their accounts abroad. Foreign-owned/foreign-controlled companies in Bangladesh that engaged in manufacturing or services output activities for three years or longer in Bangladesh may access taka term loans from the domestic market regardless of the local content in their equity, subject to applicable credit norms and prudential parameters, including the single borrower exposure limit, and debt-equity ratio. Foreign-owned/foreign-controlled industrial enterprises in Bangladesh may access interest-free loans for working capital other than input procurement from parent companies/shareholders abroad for up to one year without prior approval. These loans are available to companies that have not yet obtained working capital financing from the local market. ADs were allowed to extend mortgage loans in taka to NRBs working abroad for the purpose of housing in Bangladesh, subject to observance of the existing guidelines of Prudential Regulations for Consumer Financing. The housing finance facility provided to NRBs may not exceed the debt-equity ratio of 75:25. ADs may extend working capital facilities to Type B (joint-venture) units of EPZs for the procurement of components needed for up to four months’ worth of production on the basis of the bank–customer relationship and the customer’s ability to repay from export proceeds.

Borrowing abroad | Yes. | ADs may obtain short-term and overdraft loans from overseas branches and correspondents for a period not exceeding seven days at a time.

Maintenance of accounts abroad | No. | The maintenance of these accounts is subject to notification to the BB.

Lending to nonresidents (financial or commercial credits) | Yes. | Lending to nonresidents is not allowed, except with the BB approval and in specific cases. Foreign-owned/foreign-controlled companies in Bangladesh that engaged in manufacturing or services output...
activities for three years or longer in Bangladesh may access taka term loans from the domestic market regardless of the local content in their equity, subject to applicable credit norms and prudential parameters, including the single borrower exposure limit, and debt-equity ratio. Foreign-owned/foreign-controlled industrial enterprises in Bangladesh may access interest-free loans for working capital other than input procurement from parent companies/shareholders abroad for up to one year without prior approval. These loans are available to companies that have not yet obtained working capital financing from the local market. To widen the scope of taka working capital loans for foreign-owned/foreign-controlled companies operating in Bangladesh, resident persons/companies may purchase commercial papers issued by such companies.

ADs were allowed to extend mortgage loans in taka to NRBs working abroad for the purpose of housing in Bangladesh subject to observance of the existing guidelines of Prudential Regulations for Consumer Financing. The housing finance facility provided to NRBs may not exceed the debt-equity ratio of 75:25.

<table>
<thead>
<tr>
<th>Liquid asset requirements</th>
<th>No.</th>
</tr>
</thead>
<tbody>
<tr>
<td>The LCR is calculated as High-Quality Liquid assets (HQLA) against the total net cash outflow over the next 30 calendar days. The LCR ratio must not be less than 100%. The Net Stable Funding Ratio, in line with Basel III framework, is defined as the Available Amount of Stable funding against the Required amount of Stable funding. The ratio must be greater than 100% on a quarterly basis. The LCR and Net Stable Funding Ratio are not differentiated based on currency and the FC liabilities are included in their calculation.</td>
<td></td>
</tr>
</tbody>
</table>
Banks must maintain SLR in easily convertible assets (cash, gold, unencumbered approved securities, etc.). The amount of SLR required to be maintained by the conventional banks on daily basis may not be less than 13% including the excess amount of CRR of their ATDTL in Bangladesh and for Shariah-based Islamic Banks, this amount may not be less than 5.5% (since February 1, 2014). Banks also maintain SLR for OBOs. The SLR for deposit taker NBFI's is 5% and 2.5% for non-deposit taker NBFI's (since June 1, 2020).

The SLR requirements are determined against the ATDTL held by the banks and NBFI's. They may maintain SLR both in local and FCs along with other approved securities. Banks and financial institutions separately maintain their required CRR and SLR.

Interest rate controls

Yes. Banks must maintain interest rates on FC deposits in line with international market rates, while they may freely determine at what interest rate they offer on local currency deposits with no restrictions or requirements.

Credit controls

No.

Differential treatment of deposit accounts held by nonresidents

No.

Reserve requirements

No. Banks are required to maintain reserve requirements equally for both resident and nonresident deposit accounts.

Liquid asset requirements

No. Banks are required to maintain liquid asset requirements equally for both resident and nonresident deposit accounts.

Interest rate controls

No. ADs may allow interest payments on ACU dollar and ACU euro accounts maintained with ADs by their correspondent banks in other ACU member countries.

Credit controls

No.

Investment regulations

No.

Abroad by banks

No. Commercial banks may open subsidiaries abroad with approval from BB.

In banks by nonresidents

No. Nonresidents can purchase shares issued by banks.

Open foreign exchange position limits

Yes. FC exposure of bank is defined as the sum of all FC-denominated assets and liabilities. The exposure also includes the net forward and other possible off-balance-sheet items (as decided by BB) in each currency. The limit of the total foreign exchange exposures (net open foreign exchange positions) either held in Bangladesh or abroad is a percentage of bank’s capital base. The capital base is defined as total eligible regulatory capital composed of Tier 1 and Tier 2. As of December 31, 2021, the limit on net open foreign exchange positions for all banks was US$1.03 billion.

On resident assets and liabilities

Yes. The limit on ADs’ net open foreign exchange positions is, effective March 31, 2022, 15% (previously 20%) of their capital and applies to the total exposures in foreign exchange (assets and liabilities in foreign exchange of a bank) either held in Bangladesh or abroad. The capital base is defined as total eligible capital composed of Tier 1 and Tier 2.

On nonresident assets and liabilities

Yes. The limit on ADs’ net open foreign exchange positions is, effective March 31, 2022, 15% (previously 20%) of their capital and applies to the total exposures in foreign exchange (assets and liabilities in foreign exchange of a bank) either held in Bangladesh or abroad. The capital base is defined as total eligible capital composed of Tier 1 and Tier 2.

Provisions specific to institutional investors

Yes. Institutional investors are not allowed to deal in foreign exchange including investing abroad.
Insurance companies

Limits (max.) on securities issued by nonresidents
No.

Limits (max.) on investment portfolio held abroad
No.

Limits (min.) on investment portfolio held locally
No.

Currency-matching regulations on assets/liabilities composition
No.

Pension funds

Limits (max.) on securities issued by nonresidents
Yes.

Pension funds of resident Bangladesh companies may not be invested abroad without the BB approval. However, there is no limit on local investment.

Limits (max.) on investment portfolio held abroad
Yes.

Pension funds of resident Bangladesh companies may not be invested abroad without the BB approval. However, there is no limit on local investment.

Limits (min.) on investment portfolio held locally
No.

There is no limit on local investment.

Currency-matching regulations on assets/liabilities composition
No.

There is no regulation on currency-matching regulations on assets/liabilities composition.

Investment firms and collective investment funds

Limits (max.) on securities issued by nonresidents
Yes.

Residents generally may not invest abroad, and there are no domestic securities issued by nonresidents because nonresidents may not issue any type of security in Bangladesh.

Limits (max.) on investment portfolio held abroad
Yes.

Residents generally may not invest abroad.

Limits (min.) on investment portfolio held locally
No.

There is no limit on local investment.

Currency-matching regulations on assets/liabilities composition
No.

There is no regulation on currency-matching regulations on assets/liabilities composition.

Changes during 2021 and 2022

Exchange Arrangement

Classification
Crawl-like arrangement 08/17/2021 The de facto exchange rate arrangement was reclassified to crawl-like from stabilized.

Foreign exchange market
Spot exchange market 09/11/2022 Bangladesh Foreign Exchange Dealers’ Association issued a notification for AD banks regarding policy for exchange rates in foreign exchange dealings: from this day, for settling import bills and other outward remittances, banks may charge a maximum of Tk. 1 over the weighted average buying rate of export proceeds and inward remittances. Banks also set the exchange rate in the interbank market emerging from this policy.

Resident Accounts

Foreign exchange accounts permitted
Held domestically 03/11/2021 Pursuant to BRPD Circular Letter No. 16, banks are allowed to open accounts through online applications of banks or Government service providing entities like such as Bangladesh Investment Development Authority, Bangladesh Economic Zones Authority, Bangladesh
Export Processing ZonesEPZ Authority, and Bangladesh Hi-Tech Park Authority, etc., under their one-stop service facilities.

Temporary nonresident Taka accounts and temporary foreign currency accounts may be opened in the name of proposed companies of foreign investors contemplating to invest in Bangladesh. Designated banks must observe Simplified Due Diligence in opening these temporary accounts and the regular Customer Due Diligence procedures before transferring balances held in these temporary accounts to the regular accounts immediately after incorporation of the companies along with other relevant instructions.

The COVID-19 measure from July 21, 2020, allowing banks and nonbank financial institutions to extend admissible Taka finance against overseas guarantees (preferable bank guarantee/standby LCs) to resident companies irrespective of ownership/controlling status subject to adherence to all applicable credit norms and prudential parameters, was extended until December 31, 2021.

Resident firms contracting to implement projects awarded by project implementing agencies abroad may open bank accounts in the respective countries jointly with nonresident co-partners to credit payments received against the works and short-term loans proceeds from external sources. Balances held in these accounts are useable for settlement of project-related bona fide payments abroad.

Nonresident Accounts

Foreign exchange accounts permitted

The types of income earned by expatriates that may be credited to foreign currency accounts was expanded.

Temporary nonresident Taka accounts and temporary foreign currency accounts may be opened in the name of proposed companies of foreign investors contemplating to invest in Bangladesh. Designated banks must observe Simplified Due Diligence in opening these temporary accounts and the regular Customer Due Diligence procedures before transferring balances held in these temporary accounts to the regular accounts immediately after incorporation of the companies along with other relevant instructions.

Interest rate is fixed for new deposits under nonresident foreign currency deposit accounts: Benchmark reference rate plus 2.25% for deposits off 1 year and up to 3 years, and Benchmark reference rate plus 3.25% for deposits above 3 years and up to 5 years.

Imports and Import Payments

The temporary provision that ADs may extend the usance periods of the import of life-saving drugs up to maximum of 180 days instead of 90 days depending on the actual needs of their concerned clients ended.

Alternative reference/benchmark rate in the currency of financing, declared by competent bodies, may be applied with prescribed markup of 3.5% a year for permissible usance import under supplier/buyer credit.

Until June 30, 2022, the usance period for imports of industrial raw materials including back-to-back imports, and imports of agricultural implements and chemical fertilizers under supplier/buyer credit may be extended up to 270 days. Previously, valid until December 31, 2021, for facilitation of trade transactions in the context of COVID-19, the usance period of back-to-back LCs opened under supplier/buyer credit could be extended on banker–customer relationship within the admissible rate of interest up to 180 days, as additional time from the permissible period of 180 days, for bona fide grounds required to settle the payments. With a view to facilitating export trade during COVID-19 without requiring permission of
Bangladesh Bank, input procurements under back-to-back LCs/usance LCs could be issued with realization clause on behalf of exporters operating outside specialized zones provided: (1) ADs verified the execution of the export orders; (2) there was a transparent arrangement under which suppliers were in agreement to accept the relevant LCs with realization clause; (3) LC liabilities would not be settled under “net-off” arrangement with export proceeds.

Minimum financing requirements

04/11/2022  Banks must ensure a minimum of 25% cash margin on imports except for certain essential products.
05/10/2022  The margin for opening import LCs was increased to a minimum of 75% for luxury products and 50% for other products except for certain essential products. Previously, it was a minimum of 25% cash margin on imports except for certain essential products.
07/04/2022  The margin for opening import LCs was increased to a minimum of 100% (previously 75%) for luxury products and 75% (previously 50%) for other products except for certain essential products.

Advance payment requirements

01/01/2022  ADs could effect, without repayment guarantee, advance payment up to US$500,000 or equivalent to other foreign currency for import of coronavirus-related life-saving drugs, medical kits/equipment, and other essential medical items. This facility was valid until December 31, 2021, and is no longer in force from this date.

Advance import deposits

04/11/2022  Banks must ensure a minimum of 25% cash margin on imports except for certain essential products.
05/10/2022  The margin for opening import LCs was increased to a minimum of 75% for luxury products and 50% for other products except for certain essential products. Previously, it was a minimum of 25% cash margin on imports except for certain essential products.
07/04/2022  The margin for opening import LCs was increased to a minimum of 100% (previously 75%) for luxury products and 75% (previously 50%) for other products except for certain essential products.

Documentation requirements

for release of foreign exchange
for imports

Letters of credit

01/01/2022  Until June 30, 2022, the usance period for imports of industrial raw materials including back-to-back imports, and imports of agricultural implements and chemical fertilizers under supplier/buyer credit may be extended up to 270 days. Previously, valid until December 31, 2021, for facilitation of trade transactions in the context of COVID-19, the usance period of back-to-back LCs opened under supplier/buyer credit could be extended on banker–customer relationship within the admissible rate of interest up to 180 days, as additional time from the permissible period of 180 days, for bona fide grounds required to settle the payments. With a view to facilitating export trade during COVID-19 without requiring permission of Bangladesh Bank, input procurements under back-to-back LCs/usance LCs could be issued with realization clause on behalf of exporters operating outside specialized zones provided: (1) ADs verified the execution of the export orders; (2) there was a transparent arrangement under which suppliers were in agreement to accept the relevant LCs with realization clause; (3) LC liabilities would not be settled under “net-off” arrangement with export proceeds.
05/01/2022  Recognized export-oriented units operating under the bonded warehouse system may import up to six months’ (previously four months’) supply of their raw and packing materials by establishing import LCs without reference to an export LC.

**Indicative limits/bona fide test**

| Foreign workers' wages | 12/27/2021 | To bring further liberalization regarding family remittances: (1) ADs are allowed to remit up to 80% of earned net income after tax at any time during the year subject to availability of funds in the bank accounts of foreign nationals working in Bangladesh pursuant to “Form of Application for Private Remittance by Foreign National to Countries Abroad” prescribed in Appendix 5/81 of Guidelines for Foreign Exchange Transactions (Annexure-I) as amended. (2) The remaining 20% of foreign nationals’ net income is remittable at the end of the financial year on completion of income tax assessment, supported by certificate issued by the tax authority. (3) ADs are also allowed to remit foreign nationals’ net income from the employers’ foreign currency account opened and maintained for this purpose abroad where the family members of the foreign employees reside. Previously, foreign nationals could remit freely up to 75% of their net salary on a monthly basis in connection with service contracts approved by the government. The entire amount of their earned leave pay and savings could also be freely remitted after the end of their service period in Bangladesh. Besides their country of domicile, such monthly remittances were also allowed to be sent to other countries |

©International Monetary Fund. Not for Redistribution
where their family members live as declared by them in the prescribed application form. Foreign nationals could remit up to 75% of their bonus after deduction and payment of applicable taxes in one transaction.

Credit card use abroad 05/02/2021 ADs may allow annual remittance facilities of US$10,000 or its equivalent to a member firm of e-Commerce Association of Bangladesh for meeting bona fide current expenses abroad through traditional banking channels or a card. ADs may issue refillable international credit/pre-paid card with US$2,000 to the nominated official of the remitter within the limit. Aggregate refills in cards and remittances by banking channels may not exceed US$10,000 a calendar year.

05/31/2021 ADs may use international card (IC) channels as alternative to traditional banking channel to effect outward remittances on behalf of customers for permissible payments in accordance with Guidelines for Foreign Exchange Transactions (GFET) and its subsequent circulars as follows:

(1) Remittance for IT expenses as per Paragraph 40, Chapter 10 of GFET for non-cardholder individuals; (2) Membership fees, fees for application, registration, admission, examination, etc., as per Paragraph 9, Chapter 11 of GFET for non-cardholder individuals; (3) Release of foreign exchange for study abroad as per Paragraph 10, Chapter 11 of GFET; (4) Remittance of visa fees abroad as per Paragraph 11(B), Chapter 11 of GFET for non-cardholder individuals; (5) Remittance of immigration visa-processing fees, evaluation fees, right of landing fees as per Paragraph 12, Chapter 11 of GFET for non-cardholder individuals; (6) Registration/participation fee for attending training, seminar, workshop abroad as per Paragraph 14, Chapter 11 of GFET; (7) Remittance for academic/research journal subscription as per Paragraph 15, Chapter 11 of GFET; (8) Remittance toward publication-related fees of articles in international journals as per Paragraph 16, Chapter 11 of GFET; (9) Release of foreign exchange for travel on health ground as per Paragraph 2, Chapter 12 of GFET, provided total release through cash and ICs does not exceed the permissible limit; (10) Remittance on account of tour operators out of balances held in foreign currency accounts as per Paragraph 22(f), Chapter 12 of GFET; and (11) Periodical remittances to counterparts abroad by travel operators as per Paragraph 2(a), FE Circular No. 40 of September 24, 2020.

09/23/2021 ADs may endorse and set travel entitlements on relevant passports to concerned Bangladeshi nationals in international cards for multiple years up to their validity subject to compliance with relevant instructions.

Proceeds from Invisible Transactions and Current Transfers

Repatriation requirements

Surrender requirements

Surrender to authorized dealers 02/10/2021 To facilitate small-value Information Technology-Enabled Services exports, Mobile Financial Service Providers licensed by Bangladesh Bank may repatriate export proceeds in association with internationally recognized Online Payment Gateway Service Provider/digital wallets and/or aggregators having operation in multiple countries.

05/02/2021 To facilitate e-commerce trade in the country, ADs may allow annual remittance facilities of US$10,000 or its equivalent to a member firm of e-Commerce Association of Bangladesh for meeting bona fide current expenses abroad through traditional banking channel or a
card. ADs may issue refillable international credit/pre-paid card with US$2,000 to the nominated official of the remitter within the limit. Aggregate refills in cards and remittances by banking channel may not exceed US$10,000 a calendar year.

07/14/2022

The retention limit was reduced by half to 35% (for exporters of ICT-related services) and 30% (for other service exporters), respectively, until December 31, 2022.

Capital Transactions

Controls on capital transactions

Controls on credit operations

Commercial credits

To residents from nonresidents

04/01/2021

The temporary provision that ADs may extend the usance periods of the import of life-saving drugs up to maximum of 180 days instead of 90 days depending on the actual needs of their concerned clients ended.

06/21/2021

Alternative reference/benchmark rate in the currency of financing, declared by competent bodies, may be applied with prescribed markup of 3.5% a year for permissible usance import under supplier/buyer credit.

01/01/2022

Until June 30, 2022, the usance period for imports of industrial raw materials including back-to-back imports, and imports of agricultural implements and chemical fertilizers under supplier/buyer credit may be extended up to 270 days. Previously, valid until December 31, 2021, for facilitation of trade transactions in the context of COVID-19, the usance period of back-to-back LCs opened under supplier/buyer credit could be extended on banker–customer relationship within the admissible rate of interest up to 180 days, as additional time from the permissible period of 180 days, for bona fide grounds required to settle the payments. With a view to facilitating export trade during COVID-19 without requiring permission of Bangladesh Bank, input procurements under back-to-back LCs/usance LCs could be issued with realization clause on behalf of exporters operating outside specialized zones provided: (1) ADs verified the execution of the export orders; (2) there was a transparent arrangement under which suppliers were in agreement to accept the relevant LCs with realization clause; (3) LC liabilities would not be settled under “net-off” arrangement with export proceeds.

Provisions Specific to the Financial Sector

Provisions specific to commercial banks and other credit institutions

Open foreign exchange position limits

On resident assets and liabilities

03/31/2022

The limit on ADs’ net open foreign exchange positions is 15% (previously 20%) of their capital.

On nonresident assets and liabilities

03/31/2022

The limit on ADs’ net open foreign exchange positions is 15% (previously 20%) of their capital.
BARBADOS

(Position as of June 30, 2022)

Status under IMF Articles of Agreement

Date of membership
December 29, 1970.

Article VIII
Yes. Date of acceptance: November 3, 1993.

Article XIV

Exchange Measures

Restrictions and/or multiple currency practices
No.

Exchange measures imposed for security reasons
No.

In accordance with IMF Executive Board Decision No. 144-(52/51)
No.

Other security restrictions
No.

Exchange Arrangement

Currency
Yes. The currency of Barbados is the Barbados dollar.

Other legal tender
No.

Exchange rate structure

Unitary
Yes.

Dual

Multiple

Classification

No separate legal tender

Currency board

Conventional peg
Yes. The exchange rate arrangement is a conventional pegged arrangement. The minister of finance, after consultation with the Central Bank of Barbados (CBB), pegged the Barbados dollar to the US dollar on July 5, 1975, pursuant to the Exchange Control Act and the CBB Act.

Stabilized arrangement

Crawling peg

Crawl-like arrangement

Pegged exchange rate within horizontal bands

Other managed arrangement

Floating
The Barbados dollar is pegged to the US dollar, the intervention currency, at BDS$2 per US$1 dollar. This rate applies to accounting and valuation. The exchange rate is determined by the CBB in consultation with the minister of finance.

The monetary policy framework is an exchange rate anchor vis-à-vis the US dollar.
Open letter

Parliamentary hearings

Other

Transparency

Publication of votes

Publication of minutes

Publication of inflation forecasts

Other monetary framework

**Exchange tax**

| Yes. |

**Exchange subsidy**

| No. |

**Foreign exchange market**

| Yes. |

- Certain businesses are allowed to exchange foreign currency. The exchange rate applied by commercial banks is determined by the CBB; banks, however, may charge processing fees.

**Spot exchange market**

| Yes. |

- As of December 31, 2021, eight institutions have been licensed to deal in foreign exchange with the public. The eight ADs comprise five commercial banks and three nonbank financial institutions. Effective June 8, 2021, permission was granted to operate one foreign exchange bureau. Previously, there were no foreign exchange bureaus.

**Operated by the central bank**

| Yes. |

**Foreign exchange standing facility**

| Yes. |

- The CBB buys and sells US dollars for Barbados dollars on demand from ADs and the government at the official rate. Buying and selling rates for the Canadian dollar, euro, and pound sterling are also officially quoted on the basis of their cross-rate relationships to the US dollar. The quoted rates include commission charges of 0.125% buying and 1.75% selling against the US dollar and 0.1875% buying and 1.8125% selling against the Canadian dollar, euro, and pound sterling.

**Allocation**

| No. |

**Auction**

| No. |

**Fixing**

| No. |

**Interbank market**

| Yes. |

- As of December 31, 2021, five banks and three nonbank financial institutions participate in the interbank market. Licenses are granted by the CBB.

**Over the counter**

| Yes. |

**Brokerage**

| No. |

**Market making**

| No. |

**Forward exchange market**

| Yes. |

- The CBB periodically obtains forward cover in the international foreign exchange market to cover or hedge its own or the central government’s exchange risk associated with foreign exchange loans not denominated in US dollars. Commercial banks may obtain forward cover in international markets. The CBB and commercial banks enter into swap transactions in US dollars, whereas
commercial banks switch freely among non-regional currencies.

**Arrangements for Payments and Receipts**

**Prescription of currency requirements** Yes. Settlements with residents of countries outside the CARICOM area may be made in any foreign currency or through an external account in Barbados dollars. Settlements with residents of CARICOM member countries other than Jamaica, Suriname, and Trinidad and Tobago may be made in the currency of the CARICOM country. Settlements with residents of Jamaica, Suriname, and Trinidad and Tobago may be made in their respective currency or in US dollars.

**Controls on the use of domestic currency** Yes. There are controls on the use of domestic currency with regard to settlement with residents of all CARICOM member countries. Settlements with residents of CARICOM member countries other than Jamaica, Suriname, and Trinidad and Tobago may be made in the currency of the CARICOM country. Settlements with residents of Jamaica, Suriname, and Trinidad and Tobago may be made in their respective currency or in US dollars.

**For current transactions and payments** Yes.

**For capital transactions** Yes.

Transactions in capital and money market instruments Yes.

Transactions in derivatives and other instruments Yes.

Credit operations Yes.

**Use of foreign exchange among residents** Yes. CBB permission is required for retail outlets to issue change in the same foreign currency in which purchases are made.

**Payments arrangements** Yes.

Bilateral payments arrangements Yes.

**Operative** Yes. There is a limited CARICOM regional bilateral payments system.

**Inoperative** No.

Regional arrangements Yes. Barbados is a member of CARICOM.

Clearing agreements Yes. Under clearing arrangements with regional monetary authorities, the CBB currently sells only two CARICOM country currencies: the Eastern Caribbean dollar and the Belize dollar. Trinidad and Tobago, Guyana, and Jamaican dollars float against the US dollar, and the CBB sets indicative selling rates based on rates supplied by the monetary authorities of these countries.

Barter agreements and open accounts No.

**Administration of control** Yes. Exchange control applies to all countries and is administered by the CBB, which authorizes ADs to approve current payments, including standard import payments. Additional authority is delegated to commercial banks for current account transactions ranging from BDS $7,500 to BDS$250,000. Commercial banks may release up to BDS $250,000 in foreign exchange for advance payments for imports to Barbados. Commercial banks may allow the transfer of funds to CARICOM countries for all current transactions, except those with special limits or restrictions. Trade controls are administered by the Ministry of Commerce, Consumer Affairs, and Business Development. The authority to approve payments to OECS countries
is delegated to ADs.

Resident Accounts

Foreign exchange accounts permitted Yes.

Held domestically Yes. All residents are allowed to hold foreign exchange accounts. ADs may credit 100% of the foreign exchange earned related to current account transactions by residents to their foreign exchange accounts without CBB approval.

Approval required No. Approval is not required to open foreign exchange accounts.

Held abroad Yes. Permission of the CBB must be received to open and operate accounts abroad. Balances may be transferred freely to Barbados.

Approval required Yes. Permission of the CBB must be received to open and operate accounts abroad. Balances may be transferred freely to Barbados.

Accounts in domestic currency held abroad No.

Accounts in domestic currency convertible into foreign currency Yes. ADs may convert according to the provisions in the CBB circulars; they may freely convert for education outside of Barbados, medical treatment outside of Barbados, gifts, and donations up to BDS $10,000.00 an annum for nonresident beneficiaries, for travel facilities as prescribed in the circulars, for import payments and sundry non-capital payments; relevant supporting documents must be provided. CBB permission is needed to convert for emigration allowances, repatriation of foreign investment by nonresidents, proceeds of property sale, disposal of liquid assets from estates, and all capital remittances.
Nonresident Accounts

Foreign exchange accounts permitted Yes. ADs may open foreign exchange accounts for nonresidents, including Barbadian and Caribbean Single Market and Economy (CSME) nationals permanently residing outside Barbados, without limit. Nonresidents may place the full amount of funds brought into Barbados in their foreign exchange accounts. Non-Barbadian nationals employed in the offshore sector are classified as nonresidents.

Approval required No. Nonresident foreign exchange account holders are not required to obtain CBB approval to remit abroad funds that are not the proceeds of payment for trade or non-trade transactions.

Domestic currency accounts Yes. These accounts may be credited with the proceeds from the sale of foreign currency, transfers from other external accounts, bank interest, and payments by residents for which the CBB has given general or specific permission. These accounts may be debited without restriction up to the balance in the account for payments to residents of Barbados, for the cost of foreign exchange required for travel or business purposes, and for any other payment covered by delegated authority to ADs. Other debits and any overdrafts require individual approval.

Convertible into foreign currency Yes. Balances on external accounts are convertible. External accounts are accounts held by nonresidents but denominated in Barbados dollars.

Approval required Yes. Approval is required for the ADs to open such accounts in joint names with one or more residents. Otherwise, CBB approval is not required.

Blocked accounts Yes. The CBB may require certain payments in favor of nonresidents that are ineligible for transfer to be credited to blocked accounts. Balances in blocked accounts may not be withdrawn without approval, other than for the purchase of approved securities.

Imports and Import Payments

Foreign exchange budget No.

Financing requirements for imports Yes.

Minimum financing requirements No.

Advance payment requirements Yes. ADs may release foreign exchange up to the equivalent of BDS $250,000 (c.i.f.) for advance payments for imports to Barbados. Advance payments in excess of BDS$250,000.00 must be considered by the CBB.

Advance import deposits No.

Documentation requirements for release of foreign exchange for imports Yes. ADs must have sight of a copy of the order for the goods certified by the importer or his certified agent or the ProForma invoice from the importer or his agent.

Domiciliation requirements Yes.

Preshipment inspection Yes.

Letters of credit Yes.

Import licenses used as exchange licenses No.

Other Yes. Payments for authorized imports are permitted on application and submission of documentary evidence (invoices and customs warrants) to ADs; payments for imports of crude oil and its
derivatives are subject to CBB approval.

Certain imports require individual licenses. Some items on the import-licensing list may be freely imported throughout the year, whereas other items are subject to temporary restrictions (particularly agricultural products, which tend to be subject to seasonal restrictions). Individual licenses are also required for imports of commodities that are subject to the provisions of the Oils and Fats Agreement, to which Barbados, Dominica, Grenada, Guyana, St. Lucia, St. Vincent and the Grenadines, and Trinidad and Tobago are signatories, whether the goods are being imported from CARICOM countries or from elsewhere. Special licensing arrangements have been made for the regulation of trade between Barbados and other CARICOM countries in 22 agricultural commodities.

Positive list
No.

Negative list
No.

Open general licenses
No.

Licenses with quotas
Yes. Not all goods that are subject to licensing are subject to quantitative restrictions or import surcharges. The CBB does not consider licenses when reviewing foreign exchange requests.

Other nontariff measures
No.

Import taxes and/or tariffs
Yes. Customs duties corresponding to the fourth phase of the CARICOM CET are in the range of 5%–20%. A VAT of 17.5% is levied. Tariffs ranging from 20% to more than 200% apply to imports of prepared meats, detergents, and T-shirts.

Taxes collected through the exchange system
No.

State import monopoly
Yes. Poultry products, onions, and sugar may be imported only by the Barbados Agricultural Development and Marketing Corporation, and milk may be imported only by the Pine Hill Dairy.

Exports and Export Proceeds

Repatriation requirements
No. There is no longer a requirement to repatriate proceeds within six months since the practice was discontinued by an authorization letter dated October 17, 2016.

Surrender requirements
Yes.

Surrender to the central bank
Yes. The CBB requires authorized foreign exchange dealers to surrender 5% of their gross foreign exchange purchases to the CBB. Reporting is done on a weekly basis.

Surrender to authorized dealers
No.

Financing requirements
No.

Documentation requirements
Yes.

Letters of credit
No.

Guarantees
No.

Domiciliation
No.

Preshipment inspection
No.

Other
Yes. Completion of an export form is required in duplicate detailing the goods, proceeds expected, and total shipment details.

ADs may approve all payments for insurance, freight, and fees relating to imports.

Approval is required for amounts above the quantitative limits.

The limit on unloading, storage costs, and administrative expenses is BDS$250,000 a transaction.

Commercial banks may approve all payments for insurance, freight, advertising, commissions, and fees relating to imports; however, they must report these transfers to the CBB.

For payments of profits and dividends above BDS$500,000.00 annually by companies resident in Barbados, CBB approval must be given.

Audited financial statements or auditor’s confirmation.

Residents are allowed BDS$20,000 a person a calendar year for private travel and BDS$1,000 a day up to BDS$60,000 a person a calendar year for business travel, with an allowance of foreign currency notes not exceeding the equivalent of BDS$2,500 a person a trip. Commercial banks have the authority to approve all payments for cash currency swaps by in-port ships and cruise liners.

Provision of the relevant document/s indicating imminent travel, for example, confirmed travel ticket.

There are no limits on payments for medical treatment or study abroad; however, these payments require approval from a commercial bank, based on appropriate documentation.

The limit on cash gifts is BDS$10,000 a person a year. Remittances for alimony and other support are allowed in accordance with court orders. Nonresidents residing outside Barbados may have their pensions remitted to them. Beneficiaries residing outside CARICOM countries may transfer abroad bequests or inheritances at the rate of BDS$250,000 in the first year and thereafter BDS$100,000 a year.
Commercial banks must, however, continue to report such transfers to the CBB. Approval is required for amounts above the limit.

*Indicative limits/bona fide test* Yes. Commercial banks may approve all payments with respect to bequests or inheritances that are because of beneficiaries resident in CARICOM countries, under the terms of the wills of persons who were resident or subject to the rules governing resident intestates for exchange control purposes.

Foreign workers' wages Yes. Wages in an external account or in a foreign exchange account may be remitted without limit.

*Prior approval* Yes. CBB will freely approve applications by foreign workers to remit funds over a 12-month period by way of our Form PP.

*Quantitative limits* No.

*Indicative limits/bona fide test* Yes. External accounts may not be overdrawn except with specific permission of the CBB. Provision of work permit or CARICOM Skilled National Certificate.

Credit card use abroad Yes. Locally issued credit cards may be used for transactions external to Barbados.

*Prior approval* No.

*Quantitative limits* Yes. The limits for foreign exchange usage set by the issuer are usually the same as for travel allowances. See IX.A.3.b.

*Indicative limits/bona fide test* Yes. Provision of relevant receipts.

Other payments Yes. Commercial banks are permitted to approve all payments abroad for sundry non-capital transactions.

*Prior approval* No.

*Quantitative limits* No. Payments are permitted up to the amount stated in the invoice.

*Indicative limits/bona fide test* Yes. Payments are permitted up to the amount stated in the relevant invoice.

**Proceeds from Invisible Transactions and Current Transfers**

*Repatriation requirements* No.

Surrender requirements Yes.

*Surrender to the central bank* Yes. The CBB requires authorized foreign exchange dealers to surrender 5% of their gross foreign exchange purchases to the CBB.

*Surrender to authorized dealers* No.

*Restrictions on use of funds* No.

**Capital Transactions**

*Controls on capital transactions* Yes. Capital account transactions with the ECCB area denominated in Eastern Caribbean dollars are free from controls, except for transactions in debt issues of OECS governments.

*Repatriation requirements* No.

*Surrender requirements* Yes.

*Surrender to the central bank* Yes. The CBB requires authorized foreign exchange dealers to surrender 5% of their gross foreign exchange purchases to the CBB.

*Surrender to authorized dealers* No. No surrender requirements for foreign currency coming into Barbados from securities and money market instruments purchased abroad.

**Provisions Specific to the Financial Sector**

- **Borrowing abroad**: Yes. Borrowing abroad by ADs to finance their domestic operations requires CBB approval. ADs may assume short-term liability positions in foreign currency to finance approved transfers for trade and non-trade transactions; however, they must sell 25% of the foreign currency borrowed to the CBB. ADs may approve borrowing by domestically owned parent companies from CARICOM and/or non-CARICOM sources for investment in their CARICOM subsidiaries and/or affiliates.

- **Maintenance of accounts abroad**: Yes. Accounts must be maintained with overseas correspondent banks.

- **Lending to nonresidents (financial or commercial credits)**: Yes. Exchange control permission is required.

- **Lending locally in foreign exchange**: No.

- **Purchase of locally issued securities denominated in foreign exchange**: Yes. Investment in local securities requires CBB approval.

- **Differential treatment of deposit accounts in foreign exchange**: Yes. A foreign currency reserve requirement is in place, calculated on the foreign currency deposits held at ADs, merchant banks, and trust and finance companies, to be deposited at the CBB. The cash reserve requirement ratio on deposits in foreign exchange is 2% and on local currency deposits 5%. There is also a 17.5% securities reserve requirement only on local currency deposits.

- **Liquid asset requirements**: No.

- **Interest rate controls**: No.

- **Credit controls**: No.

- **Differential treatment of deposit accounts held by nonresidents**: No. Nonresident deposit accounts are treated the same as resident deposit accounts. Differential treatment is based on whether the amount is in domestic currency.

Article XIV

Exchange Measures

Restrictions and/or multiple currency practices No.

Exchange measures imposed for security reasons Yes.

In accordance with IMF Executive Board Decision No. 144-(52/51) No.

Other security restrictions Yes.

Pursuant to Law of the Republic of Belarus No. 165-Z, of June 30, 2014, on Measures to Prevent Money Laundering, the Financing of Terrorism and Proliferation of Weapons of Mass Destruction (with amendments of May 13, 2020, November 20, 2020, and effective January 6, 2021), parties engaged in financial transactions must freeze and block funds and block financial transactions if a party to a transaction or a beneficiary thereof is an organization or an individual, including a sole proprietor, who are on the list of persons involved in terrorist activities.

Banks may deny a client’s request to perform a financial transaction (with the exception of receipt of funds) if the financial transaction meets the attributes of suspicious financial transactions that may constitute grounds for declining to perform it per the bank’s internal control rules;

suspend the financial transaction (except for receipt of funds), for no more than two business days, including the day when the client’s order to carry it out must be executed, to authorize the financial transaction or reject it in accordance with the second paragraph hereof;

unilaterally decline to execute an agreement to perform financial transactions in writing, if 2 or more decisions have been taken within a span of 6 months to decline the client’s financial transactions, giving mandatory written notice to the latter as provided in the banking law;

decline to connect the client to the remote banking services system, unilaterally terminate or suspend provision of services through such a system, if the financial transactions in question meet the criteria for rejecting (terminating, suspending) the connection which may constitute grounds for such actions according to the bank’s internal control rules;

decline to perform a financial transaction if there is evidence that the bank, including the nonresident bank where the beneficiary has an open account, or the beneficiary of the funds is involved in unlawful financial transactions or is subject to sanctions.

Exchange Arrangement

Currency Yes. The currency of Belarus is the Belarusian rubel.
Other legal tender: No.

Exchange rate structure:
- Unitary: Yes.
- Dual
- Multiple

Classification:
- No separate legal tender
- Currency board
- Conventional peg
- Stabilized arrangement
- Crawling peg
- Crawl-like arrangement
- Pegged exchange rate within horizontal bands
- Other managed arrangement

Floating: Yes. The de jure and de facto exchange rate arrangements are classified as floating. The National Bank carries out a flexible exchange rate policy that provides for using currency interventions to reduce the daily volatility of the exchange rate, and not for regulating its level. In accordance with the Republic of Belarus Monetary Policy Guidelines for 2022, with a sustained excess supply of foreign currency in the domestic exchange market, the National Bank purchases foreign currency to replenish international reserves. The National Bank of the Republic of Belarus (NBRB) does not publish data on its interventions.

In 2021, a stronger external demand in response to a recovery in trading partner countries contributed to a significant improvement in the balance of trade. The situation in the foreign exchange market was stable, with minor exchange rate fluctuations. Net foreign currency supply that had accumulated by end-2021, enabled the National Bank to replenish gold and foreign exchange reserves. The Belarusian ruble strengthened 1.2% against the US dollar, 9% against the euro, and 1.6% against the Russian ruble.

In H1, 2022, the Belarusian economy faced strong external shocks amidst growing sanctions and rising geopolitical tensions. In February through March, given elevated demand for foreign currency, the National Bank carried out limited foreign exchange interventions to stabilize the domestic foreign exchange market and ease exchange rate volatility. In the period of April to June, as the situation stabilized, the National Bank was making net foreign currency purchases fully offsetting the volume of sales earlier in the year. Six months into the year, the domestic foreign exchange market posted a marginal net foreign currency supply. On balance, in the period of January to June, 2022, the Belarusian ruble appreciated by 7.6% against the euro, and by 1% against the US dollar. The Belarusian ruble fell by 44.8% against the Russian ruble owing to a strong rally of the Russian ruble against global currencies.
Free floating

**Official exchange rate**

Yes. The NBRB sets official exchange rates daily against, effective August 1, 2022, 31 currencies with the addition of the Brazilian real (BRL), UAE dirham (AED), dong (VND), and Indian rupee (INR) to the list. The official exchange rates on a given date correspond to the rates of the Belarusian Currency and Stock Exchange (BCSE) observed on the preceding business day. Official exchange rates of US dollars, euros, and Russian rubles are set on the basis of BCSE trading sessions. Official exchange rates with the other currencies are based on US dollar cross-rates against these currencies. The official exchange rate is used to determine the rubel value of assets and liabilities denominated in foreign exchange. The official exchange rates of additional 47 currencies are set monthly. These rates are calculated on the basis of the US dollar–rubel exchange rate at the close of the most recent BCSE foreign exchange trading session, and their cross-rates against the US dollar in international foreign exchange markets on the last business day of the month. The official rates are valid until the new rates are published for the following month. The official rate is used for transactions with the official sector (customs charges and duties, other foreign-exchange-linked payments payable in local currency) and transactions in which sellers do not specify an alternative exchange rate.

The NBRB added, effective July 15, 2022, the Chinese yuan to the list of currencies in the foreign currency basket and assigned the following currency weights when calculating the value of the basket: 50% for the Russian ruble, 30% for the US dollar, 10% for the euro, and 10% for the Chinese yuan. This decision reflects changes in the structure of foreign economic flows and BCSE trade volumes in these currencies observed in 2022. With the addition of the Chinese yuan to the foreign currency basket, its official exchange rate against the Belarusian rubel is set at the end of the BCSE trading session.

**Monetary policy framework**

**Exchange rate anchor**

- **U.S. dollar**
- **Euro**
- **Composite**
- **Other**

**Monetary aggregate target**

Yes. The NBRB has a monetary policy targeting framework that sets growth in average broad money as an intermediate monetary policy target. Effective January 1, 2021, the rubel base money is the operational monetary policy target (previously, it was the domestic currency overnight rate). The goals and parameters of monetary policy are defined annually in the Monetary Policy Guidelines for the Republic of Belarus, approved by the president of the Republic of Belarus. The 2022 inflation target measured by CPI is set at the level of no more than 6% (December 2022 to December 2021). The average broad money is forecast to grow at 7%–13% (December 2022 to December 2021).

| Exchange tax | No. |
| Exchange subsidy | No. |
| Foreign exchange market | Yes. |

The foreign exchange market consists of: (1) the BCSE; (2) the interbank foreign exchange market; and (3) operations involving the purchase and sale of foreign currency between bank/nonbank lending and financial institutions and their customers, including cash foreign exchange operations.
Purchases and sales of foreign currency for rubels and conversion of foreign currency take place in the foreign exchange market through NBRB-licensed banks and nonbank lending and financial institutions. In addition, effective July 9, 2021, bank clients are allowed to purchase and sell foreign currency for Belarusian rubels through BCSE without the bank’s involvement. The NBRB does not impose limits on exchange rates. No commission is charged for the purchase and sale of foreign exchange in the OTC market. A bank may charge a commission only for the purchase and sale of currency in the BCSE, and the amount is based on the rates set by banks.

As of June 30, 2020, there were 24 banks and the Republic of Belarus Development Bank Open Joint-Stock Company, and 3 banks were undergoing bankruptcy or liquidation procedures. Most transactions in the foreign exchange market are spot transactions. Purchases and sales of cash foreign currency for rubels and conversion of foreign currency take place only through banks and nonbank lending and financial institutions licensed by the NBRB for foreign exchange operations with individuals.

Individuals are free to buy and sell foreign currency. Purchases and sales of foreign currency between Belarusian banks, between a Belarusian bank and a nonresident bank, and between banks and their corporate clients are performed in the OTC exchange market without restriction.

Businesses have the right to perform the purchase/sale of foreign currency in the OTC exchange market, and also through banks in BCSE, including continuous two-way auctions. There are no restrictions on the amounts for the foreign exchange purchase and sale transactions by business entities.

No restrictions have been established on the purchase and sale of foreign currency in the currency exchange (BCSE). Resident legal entities and individual entrepreneurs may buy foreign exchange for any current or capital transaction based on a request (or a payment order for transfer with purchase, if appropriate) submitted to any local bank. No supporting documentation (such as contracts and NBRB approvals) is required for the purchase of foreign exchange. The purchased foreign exchange is credited to the resident’s foreign exchange current account with the local bank and may be kept there for an unlimited period of time until the foreign exchange is used. Also, a resident is free to use the purchased foreign exchange for a purpose other than that indicated in the request submitted to the bank, and no additional notification of the bank is required.

The BCSE organizes a trading session through which the NBRB may intervene as necessary.

An electronic trading system operates in the BCSE based on the continuous two-way auction principle and negotiated deals. Trading on the BCSE is performed each business day. A two-way auction operates for four currencies (US dollar, euro, Russian ruble, and, effective July 15, 2022, Chinese yuan), while negotiated deals are used for transactions in other currencies. In a continuous two-way auction system, potential buyers submit their bids for the purchase of foreign exchange, and potential sellers simultaneously submit their offers for the sale of foreign exchange to
the system. Trades are performed on a real-time basis when the parameters of a buyer’s bid satisfy the parameters of a seller’s offer. Under continuous two-way auction trading, the purchase and sale of foreign exchange can be performed by the National Bank, the Republic of Belarus Development Bank Open Joint-Stock Company, banks, and nonbank lending and financial institutions, as well as by business entities. There are no limits on the bid-ask spreads or commissions of market participants. Nor are there restrictions on the amount of applications. A participant pays a fine to the BCSE for failure to fulfill or improper fulfillment of net obligations equal to a percentage of the unfulfilled net obligations as specified in an agreement with the BCSE for each day of delay. Information about the results of foreign currency trading is published on the BCSE website and is also disseminated by the BCSE on the basis of agreements on information services concluded with legal entities and individuals.

**Interbank market** Yes. As of June 30, 2020, there were 24 banks, and 3 banks were undergoing bankruptcy or liquidation procedures. Banks licensed by the NBRB and the Republic of Belarus Development Bank Open Joint-Stock Company may trade foreign exchange among themselves within the open foreign exchange position limit set by the NBRB. There are no limits on the bid-ask spreads or commissions of market participants. The NBRB does not intervene in the interbank market. The mentioned financial institutions may perform foreign exchange transactions both on the BCSE and in the OTC market.

Over the counter Yes. The interbank market operates over the counter.

Brokerage No. There is no brokerage system.

Market making No. There is no market-making agreement.

Forward exchange market Yes. The forward exchange market is regulated by the same provisions as the spot market.

Official cover of forward operations No.

Arrangements for Payments and Receipts

**Prescription of currency requirements** Yes. Foreign currency transactions between a resident legal entity and a nonresident legal entity are carried out in non-cash form without restrictions. Currency transactions in Belarusian rubles between residents and nonresidents are carried out in non-cash form without restrictions.

**Controls on the use of domestic currency** No. Law No. 226-Z of July 22, 2003 “On Foreign Exchange Regulation and Foreign Exchange Control” as amended as of July 9, 2021, does not distinguish between foreign exchange current and capital transactions.

**For current transactions and payments** No. When conducting currency transactions, residents and nonresidents may use Belarusian rubles: in a non-cash form for all currency transactions; and in cash for all currency transactions and in the amount established by the legislation of the Republic of Belarus.
The procedure for the regulation of foreign exchange transactions related to current transactions using Belarusian rubles is similar to the procedure for the regulation of foreign exchange transactions related to current transactions using foreign exchange.

The regulation of foreign exchange transactions related to the movement of capital in Belarusian rubles is the same as the regulation of foreign exchange transactions related to the movement of capital in foreign exchange.

Use of foreign exchange among residents | Yes. |

Settlements between residents in foreign exchange are prohibited, except in cases established by the law. The following foreign currency operations are allowed: (1) foreign currency settlements between individuals for foreign currency operations involving donation (endowment), cancellation of donation, provision of loans, repayment of loans and interest, placement into/release from custody; (2) foreign currency settlements between resident legal entities as payment for oil and gas; settlements with transport organizations for transportation of goods; budget settlements; servicing (repayment) of external government loans; bank settlements for reinsurance contracts in cases where insurance (coinsurance) contracts require reinsurance in accordance with the insurance legislation of the Republic of Belarus, etc.; (3) foreign currency settlements between resident legal entities and resident individuals for transactions in duty-free shops; third-party liability insurance policies ("green cards") held by vehicle owners traveling abroad; settlements for travel expenses abroad, etc.

Operative | Yes. |

In accordance with interstate agreements between the NBRB and the CBs of the Baltic countries, most countries in the CIS (except Azerbaijan, Kyrgyz Republic, Moldova, and Uzbekistan), the People’s Bank of China, and the Central Bank of the Islamic Republic of Iran, settlements take place in the currencies of the parties involved and in freely convertible currencies. Some agreements also allow settlements in currencies of other CIS countries. In accordance with a correspondent account agreement, the NBRB opened a correspondent account for the Interstate Bank and provides access to the NBRB’s automated interbank settlement system. This correspondent account is used for cross-border payments for liabilities of the Interstate Bank and its clients.

Inoperative | No. |

Regional arrangements | Yes. |

Belarus has arrangements with Moscow and various other regions in Russia and it also participates in the Agreement on the Establishment of a Payment Union of CIS Member Countries. Belarus is a signatory to the Treaty on the Eurasian Economic Union (EAEU Treaty) of May 29, 2014, which went into force on January 1, 2015. The specific considerations, grounds, and procedure for the
application of a particular nontariff regulatory measure within the EAEU are established under the Protocol on Nontariff Regulatory Measures with respect to Third Countries (Annex 7 to the EAEU Treaty).

**Resident Accounts**

| Foreign exchange accounts permitted | Yes. |
Residents may open foreign exchange accounts in banks without declaring the sources of their foreign exchange. The operation of the accounts is carried out in accordance with the procedure established for the use of an account, taking into consideration the requirements of the legislation governing the performance of current and capital transactions.

The following operations are performed with resident individual foreign exchange accounts: (1) placement and withdrawal of foreign currency (placement of a deposit, for example); (2) transfers among the holder’s own accounts in foreign currency in cases established by law; and (3) performance of settlements under foreign exchange transactions with residents and nonresidents in cases permitted by law (settlements at duty-free shops, settlements with banks on banking operations, settlements on National Bank and MOF bonds, etc.).

Individuals may withdraw foreign currency funds from their accounts without restrictions.

Resident legal entities are entitled to withdraw foreign exchange cash from their accounts and use it in cases established by law (to cover business travel expenses, and services provided by diplomatic and consular institutions of foreign states, etc.).

Resident legal entities are entitled to deposit noncash foreign currency into their accounts and use it in cases established by law. Specifically, (1) with nonresident legal entities, when conducting all foreign exchange operations; (2) with resident legal entities, settlements under reinsurance contracts; settlements with diplomatic and consular offices located outside the Republic of Belarus; settlements with transport and/or forwarding organizations, etc.; (3) with resident individuals outside the Republic of Belarus: when performing consular functions and collecting fees and charges for delivery of consular services by diplomatic missions and consular offices of the Republic of Belarus located outside the Republic of Belarus; under passenger and luggage transportation contracts, transportation of goods by resident individuals for personal needs in the territory of a foreign state; as payment for labor performed in the territory of a foreign state, etc.; (4) with nonresident individuals, outside the Republic of Belarus when conducting all foreign exchange operations.

Resident banks, individuals, and legal entities may open accounts with nonresident banks.

Pursuant to Article 17 of Law No. 226-Z of the Republic of Belarus of July 22, 2003, “On Foreign Exchange Regulation and Foreign Exchange Control,” as amended as of July 9, 2021, resident individuals and legal entities may open accounts in foreign banks in Belarusian rubels and foreign currency without restrictions, and carry out foreign currency operations on these accounts as set therein.

Resident individuals and resident banks may open accounts in nonresident banks without NBRB approval.

Pursuant to Article 17 of Law No. 226-Z of the Republic of Belarus of July 22, 2003, “On Foreign Exchange Regulation and Foreign Exchange Control,” as amended effective July 9, 2021, resident individuals and legal entities may open accounts in foreign banks in Belarusian rubels and foreign currency without restrictions, and carry out foreign currency operations on these accounts as set therein.

Previously, to open accounts at nonresident banks abroad, resident legal entities (other than banks) needed NBRB approval, with the exception of (1) accounts for the recording of credit operations, (2)
accounts for servicing diplomatic and other official representative offices of Belarus, as well as (3) accounts of representative offices of residents opened with nonresident banks in any country in any currency. Notification of accounts of representative offices of resident legal entities (other than banks) opened with nonresident banks was required.

Resident individuals and resident banks are not required to seek NBRB approval to open accounts in the domestic currency in nonresident banks.

Pursuant to Article 17 of Law No. 226-Z of the Republic of Belarus of July 22, 2003, “On Foreign Exchange Regulation and Foreign Exchange Control,” as amended effective July 9, 2021, resident individuals and legal entities may open accounts in foreign banks in Belarusian rubels and foreign currency without restrictions, and carry out foreign currency operations on these accounts as set therein. Previously, to open accounts at nonresident banks abroad, resident legal entities (other than banks) needed NBRB approval, with the exception of (1) accounts for the recording of credit operations, (2) accounts for servicing diplomatic and other official representative offices of Belarus, as well as (3) accounts of representative offices of residents opened with nonresident banks in any country in any currency. Notification of accounts of representative offices of resident legal entities (other than banks) opened with nonresident banks was required.

Accounts in domestic currency held abroad

Yes.

Accounts in domestic currency convertible into foreign currency

Yes.

Resident legal entities and individual entrepreneurs are not subject to any restrictions on foreign currency purchases. They may purchase foreign exchange for any current or capital transaction based on a request (or a payment order for transfer with purchase, if appropriate) submitted to any local bank. No supporting documentation (such as contracts and NBRB approvals) is required for the purchase of foreign exchange. The purchased foreign exchange is credited to the resident foreign exchange current account opened with the local bank and may be kept there for unlimited period of time until the foreign exchange is used. Also, resident legal entities and individual entrepreneurs are free to use the purchased foreign exchange for purposes other than those indicated in the request submitted to the bank; no further notification of the bank is required.

Individuals/residents may freely convert account balances in national currency to foreign currency.

Nonresident Accounts

Yes.

Nonresidents may open accounts with banks and nonbank lending and financial institutions of the Republic of Belarus in any currency for which the NBRB establishes an official exchange rate against the Belarusian rubel, following the procedure determined by the NBRB.

Funds on accounts of nonresident individuals and legal entities received by such nonresidents from current international transactions may be transferred freely abroad.

Transactions on current (settlement) accounts in foreign exchange of nonresident legal entities may be freely performed regardless of the type of transaction (including foreign exchange transactions associated with the purchase and sale of foreign exchange). The source of the funds may be receipts from abroad; proceeds from the sale of goods and services in Belarus, including sales to residents; debt service payments; interest on the accounts; funds from other foreign exchange accounts of nonresidents in Belarus; and earnings from investments and other operations with residents and nonresidents. These accounts may be debited for purchases of goods
and services, investments, and payments to residents and nonresidents. Funds from these accounts may be freely repatriated or exchanged for Belarusian rubels through authorized banks at the exchange rate set by the bank applicable to the operation, provided the Belarusian rubels are deposited with a Belarusian bank. Depositing/withdrawing foreign currency to/from nonresidents’ foreign currency accounts is not permitted, with the exception of diplomatic and other official missions, consular offices of foreign states, as well as international organizations, including their representative offices.

Nonresident individuals may open foreign currency accounts in authorized banks in Belarus, and carry out transactions in a manner set forth for resident individuals. (1) depositing and withdrawing cash in foreign currency (for example, in a deposit); (2) making transfers on their accounts, including those opened outside the Republic of Belarus; (3) conducting foreign exchange settlements with residents and nonresidents in cases permitted by law (settlements in duty-free shops, settlements with banks on banking operations, bond settlements with the MOF and the National Bank, etc.). Nonresident individuals may deposit and withdraw cash in foreign currency to/from their foreign currency accounts without restrictions.

| Approval required | Domestic currency accounts | Yes. | Nonresident legal entities may open (1) current (settlement) accounts of any type, (2) accounts to record deposits, and (3) other accounts at authorized banks of Belarus in Belarusian rubels. Nonresident legal entities may use cash Belarusian rubels in a manner and in the amount established by the legislation of the Republic of Belarus for resident legal entities. Nonresident individuals may open accounts in Belarusian rubels at banks and perform transactions on them according to the procedure established for resident individuals. There are no restrictions on foreign exchange transactions in Belarusian rubels by nonresident individuals, including those involving the deposit and withdrawal of cash Belarusian rubels. Funds on accounts of nonresident individuals and legal entities received by such nonresidents from current international transactions may be transferred freely abroad. |
| Approval required | Convertible into foreign currency | Yes. | Funds on accounts of nonresident individuals and legal entities may be converted to foreign currency. |
| Approval required | Blocked accounts | No. | The use of funds on accounts of nonresident legal entities does not require NBRB approval. |

**Imports and Import Payments**

| Foreign exchange budget | No. |
| Financing requirements for imports | Yes. |
| Minimum financing requirements | No. |
Exchange Control” as amended. Effective July 9, 2021, there are no deadlines and methods for completing foreign trade operations, and the execution of foreign trade contracts by residents is carried out on terms and within the deadlines specified by the parties to the contract. The terms and conditions for completion of obligations by the parties under foreign exchange export and import contracts are established on a contractual basis (subject to agreement between the parties) based on economic rationale. Previously, residents had to complete import transactions within 90 calendar days of advance payment. Delivery later than 90 days after payment required NBRB approval supported by a recommendation of the agency overseeing the importer (that is, local bodies of the Republic of Belarus Council of Ministers, regional or local executive committees).

In case of imports, if a nonresident fails to fulfill their obligations in full, resident legal entities must deposit Belarusian rubels and/or foreign currency into their accounts opened in the banks in the Republic of Belarus, except for cases when resident legal entities are exempt from depositing Belarusian rubels and/or foreign currency into their accounts opened in banks in the Republic of Belarus:

1. Taxes, fees, other mandatory payments to the budget in accordance with the legislation of the foreign state;
2. Payments to cover expenses of resident legal entities associated with performance of works, delivery of services (including transportation) in the territory of a foreign state during the period of their delivery;
3. Payments to cover expenses of resident legal entities associated with the upkeep of their branch and/or representative office located outside the Republic of Belarus;
4. Payment of liabilities of a resident legal entity owed to a bank in the Republic of Belarus and/or a foreign bank;
5. Payment of liabilities of a resident legal entity owed to another resident legal entity as per the terms of the transferable LC, if operations in foreign currency between these resident legal entities are permitted under Paragraph 1 of Article 12 hereof;
6. Monies withheld, paid in the form of remuneration as per the financing agreement against the assignment of a monetary claim (factoring contract), and a discount on the promissory note;
7. Monies withheld, paid in the form of remuneration and/or reimbursement of other expenses as per LCs opened in favor of the resident exporter to perform settlements under foreign exchange export contracts;
8. Monies withheld, paid in the form of remuneration and/or reimbursement of other expenses for a bank payment obligation issued in favor of the resident exporter to perform settlements under foreign exchange export contracts;
9. Monies withheld, paid in the form of commission as per reinsurance contracts;
10. Monies withheld by banks, nonresident legal entities in the form of remuneration (fee) when transferring Belarusian rubels and/or foreign currency;
11. Monies received by a resident legal entity during exhibitions, fairs, sports, and cultural events in the territory of a foreign state and earmarked to cover the cost of such events as they are being held;
12. Monies not subject to reimbursement by the insurance organization, in the amount of the deductible of the insured;
13. Monies owed to a nonresident legal entity subject to their fulfillment of certain conditions under a foreign currency contract in the form of a financial discount, defined as a reward (premium) which does not entail a change in the unit price of the shipped good
(cost of work, service), and is the difference between the cost of goods (work, services) as per the foreign currency contract, and the amount of Belarusian rubles and/or foreign currency received;
(14) Monies used in settlements carried out in accordance with international treaties of the Republic of Belarus;
(15) In case of netting arrangements arising from one or more foreign currency contracts;
(16) In case of termination of an obligation of a nonresident legal entity on the basis of an agreement on the termination of the obligation by novation, and on the provision of compensation in lieu of fulfillment of obligation;
(17) In other cases established by legislative acts.

The period of repatriation is determined by the resident legal entity based on the terms and conditions and actual terms of fulfillment of obligations by the parties to a foreign exchange contract for exports or imports. The procedure for determining such a period is established by the National Bank.

Effective July 9, 2021, NBRB permission is no longer required for payments for imports of goods and services delivered outside Belarus. Previously, payments for imports of goods and services delivered outside Belarus required an NBRB permit, which was issued at the request of the importer supported by a recommendation by the administrative body overseeing the importer (that is, local Council of Ministers of the Republic of Belarus, regional or local executive committees).

The specific considerations, grounds, and procedure for the application of a particular nontariff regulatory measure within the EAEU are established under the Protocol on Nontariff Regulatory Measures with respect to Third Countries (Annex 7 to the EAEU Treaty).

A permitting procedure for imports and exports of certain goods is carried out through licensing or the application of other administrative measures for the regulation of foreign trade activity, including the issuing of a finding (a permitting document) and other administrative measures.

Goods subject to such measures are included in the Uniform List of Prohibited or Restricted Goods for Import or Export by Member States of the Customs Union within the EAEU in Trade with Third Countries, approved by Eurasian Economic Commission Executive Council Decision No. 134 of August 16, 2012 (hereinafter – Uniform List), and in the List of goods allowed for imports into/exports from the Eurasian Economic Union Customs Territory approved by Decision No. 30 of April 21, 2015, of the Eurasian Economic Commission Board (hereinafter – List).

These goods include ozone-depleting substances; means of plant protection; hazardous waste; narcotics; psychotropic substances and their precursors, poisons; radio-electronic equipment; special technical equipment; encryption (cryptographic) equipment; human
organs and tissue; blood and its components; certain printed matter, audiovisual materials, and other media; certain types of service and civilian weapons, basic parts thereof, and ammunition; cultural assets; documents from national archival collections; information about mineral resources; live wild animals; wild plants; certain species of wild flora and fauna; equipment for harvesting aquatic biological resources; mineralogical collections and collectible mineralogical items; and rare species of live wild animals and plants.

In accordance with Resolution No. 486 of the Republic of Belarus Council of Ministers of June 23, 2016, the Republic of Belarus Ministry of Antimonopoly Regulation and Trade issues licenses for imports of goods into the customs territory of the Union included in the Uniform List and the List.

Resolution No. 486 also established lists of republic-level government authorities and other organizations that approve the issuing of licenses, and, in cases referred to in the Regulations on the Application of Restrictions, that issue findings (permitting documents) for the importation of goods included on the Uniform List and the List into the customs territory of the Union.

The list of documents and/or information to be submitted by interested parties to the authorized agency as part of administrative procedures, inter alia, to obtain licenses and permits for imports of certain categories of goods, as well as other required information, are outlined in Republic of Belarus Council of Ministers Resolution No. 548 of September 24, 2021, On Administrative Procedures Taken vis-à-vis Economic Agents.

In accordance with Council of Ministers Resolution No. 291 of May 26, 2021, on Licensing Imports of Finished Hides and Blanks for Shoe Uppers, the following measure was temporarily introduced (effective June 29, 2021, and ending effective December 29, 2021): imports of finished cowhides and leather blanks for shoe uppers attached to the footbed into the Republic of Belarus from outside the customs territory of the EAEU, on being placed under the customs procedures for release for domestic consumption (with the exception of placement under the customs procedure for release for domestic consumption for the purpose of performing actions under the free customs zone customs procedure), processing within the customs territory and within the territory of a free customs zone, are performed under one-time licenses issued by the Ministry of Antimonopoly Regulation and Trade in coordination with the Belarusian State Enterprise for the Production and Sale of Light Industrial Goods.

Pursuant to Resolution No. 365 of the Council of Ministers of the Republic of Belarus “On Licensing of Imports of Certain Types of Goods,” effective June 10, 2022, imports from EAEU Member States of tobacco products under HS code EAEU 2404 11 (tobacco sticks) are subject to a licensing requirement for a period of 6 months. Furthermore, exclusive licenses issued by the Ministry of Antimonopoly Regulation and Trade apply to imports from outside the customs territory of the EAEU to the Republic of Belarus of goods placed under customs release for domestic consumption (except for goods placed under customs release for domestic consumption to complete the free customs zone procedures) and free customs zone.

Positive list

No.

Negative list

Yes. A ban has been placed on imports of goods included in the Uniform List of goods subject to import/export bans or restrictions imposed on
Customs Union member states within the EAEU in trading with third countries (approved by Eurasian Economic Commission Executive Council Decision No. 134 of August 16, 2012), and in the list of goods allowed for imports/exports into/from the Eurasian Economic Union Customs Territory (approved by Board of the Eurasian Economic Commission Decision No. 30 of April 21, 2015, on Measures for Nontariff Regulation): ozone-depleting substances; hazardous waste; certain printed matter, audiovisual materials, and other media; means of plant protection; equipment for harvesting aquatic biological resources; certain types of service and civilian weapons, basic parts thereof, and ammunition; and products made from harp seals and harp seal pups.

Open general licenses No.

Licenses with quotas Yes. In accordance with Section 2.27 of the Uniform List of Goods for which Nontariff Regulatory Measures are Applied in Trade with Third Countries as specified in Clause 4 of the Protocol on Nontariff Regulatory Measures with respect to Third Countries (Annex 7 to Treaty on the EAEU), the following products are subject to import tariff quotas: fresh, chilled, or frozen pork; pork trimmings; frozen boneless chicken meat; and frozen boneless turkey meat. Licenses for imports of pork and poultry within the limits of the tariff quotas are issued by the Republic of Belarus Ministry of Antimonopoly Regulation and Trade.

Under the May 29, 2015, FTA between the EAEU and its member states, on the one hand, and Republic of Vietnam, on the other hand, tariff quotas are set for certain types of long-grain rice that originates in Vietnam and is imported into the territories of the member states of the EAEU. Licenses for importing certain types of rice are issued by the Republic of Belarus Ministry of Antimonopoly Regulation and Trade.

The FTA between the EAEU and its Member States, on the one hand, and the Republic of Serbia, on the other hand, of October 25, 2019, became effective July 10, 2021. In accordance with Annex 2 to the Agreement, tariff quotas are set for certain types of goods imported from the Republic of Serbia into the customs territory of the Union in the following amounts: 400 metric tons per year for certain types of cheeses (codes 0406 90 690 0, 0406 90 740 0, 0406 90 860 0, 0406 90 890 0, 0406 90 920 0, 0406 90 930 0, 0406 90 990 1, and 0406 90 990 9 of the EAEU Foreign Economic Activity Commodity Nomenclature); 35,000 liters of pure alcohol (100%) per year for liquors obtained as a result of the distillation of grape wine and grape extracts (codes 2208 20 290 0, 2208 20 890 0 of the EAEU Foreign Economic Activity Commodity Nomenclature); and 2,000,000,000 units per year for cigarettes containing tobacco (codes 2402 20 100 0, 2402 20 900 0 of the EAEU Foreign Economic Activity Commodity Nomenclature).

Other nontariff measures Yes. In accordance with Republic of Belarus Law No. 429-Z of August 27, 2008, the government has the exclusive right to import certain types of alcoholic beverages. Implementation has been awarded to legal entities that won government-organized tenders. In accordance with Decree No. 4 of the President of the Republic of Belarus of October 18, 2007, and Decree No. 152 of the President of the Republic of Belarus of April 22, 2022, “On Imports of Raw Tobacco and Tobacco Products,” the government has the exclusive right to import raw tobacco and tobacco products. Exercise of this right has been granted to Grodno Tobacco Factory Neman and Tabak-Invest, and for tobacco products to Belarustorg and Energo-Oil.

Republic of Belarus Council of Ministers Resolution No. 1397 of
September 23, 2008, established the procedure to allow imports of goods subject to import restrictions on non-economic grounds. EAEU is subject to common customs regulation in accordance with the provisions of the EAEU Treaty, the Customs Code of the EAEU, international agreements governing legal relations in the customs sphere, and acts constituting the law of the EAEU. The Common Customs Tariff of the Eurasian Economic Union (EAEU CCT) is a set of import customs duties for goods imported into the common customs territory of the Union from third countries, classified under the common nomenclature for foreign economic activities of the Union (EAEU TNVED). The EAEU CCT applies the following types of duties: ad valorem, calculated as a percentage of the customs value of taxable goods; specific, calculated per unit of taxable goods; and combined, mixing both these types. With a view to improving regulation of imports into the common customs territory of the EAEU, seasonal customs duties may apply in lieu of regular import customs duties, for a period of up to six months a year. EAEU CCT import duty rates apply depending on the country of origin of imported goods and the terms and conditions of imports, in accordance with the laws of members of the EAEU, unless otherwise indicated in the EAEU Treaty. Goods originating in and imported from CIS countries that have an ST-1 certificate are exempt from import customs duties.

With the aim of promoting the economic development of developing and least developed countries, in accordance with the EAEU Treaty, the Union may grant tariff preferences for goods from developing and/or least developed economies using the Union’s common system of tariff preferences.

For preferential goods imported into the Union’s customs territory from developing economies using the Union’s common system of tariff preferences, the import customs duty rates are equal to 75% of the rates under the Union’s CCT. For preferential goods imported into the Union’s customs territory from least developed economies using the Union’s common system of tariff preferences, the import customs duty rates are equal to 0% of the rates provided for under the Union’s CCT.

Decision No. 130 of the Customs Union Commission of November 27, 2009, on the CCT Regulation of the Eurasian Economic Union provides for a number of tariff concessions with respect to imported goods, as well as exemptions from import customs duties with respect to technological equipment and spare parts for such equipment; raw materials and supplies imported as part of an investment project in a priority area of activity; motor vehicles manufactured by business entities of member states applying the “industrial assembly” concept; equipment, including machinery, mechanisms, and materials that are part of the standard items provided with said equipment, and components (with the exception of those subject to excise taxes) imported at the expense of credits provided by foreign states and international financial institutions in accordance with international agreements by member states, and a number of other concessions.

The collection of indirect taxes and the mechanism for monitoring their payment when goods are imported in mutual trade between member countries of the Union are carried out in accordance with the procedure defined in the Protocol on the Procedure for the Collection of Indirect Taxes (Annex 18 to the EAEU Treaty).

### Exports and Export Proceeds

| Repatriation requirements | Yes. | Under the Republic of Belarus Law No. 226-Z of July 22, 2003, on Foreign Exchange Regulation and Foreign Exchange Control, resident legal entities engaged in export transactions must deposit Belarusian rubles and/or foreign currency in their accounts opened in banks in the Republic of Belarus. Effective July 9, 2021, the period of repatriation is set by the resident based on the conditions and actual terms of fulfillment of obligations by the parties to a foreign currency agreement for exports, in a manner set forth in the Instruction on Conducting Foreign Exchange Operations, approved by Resolution No. 147 of the Board of the NBRB of May 31, 2021. Previously, residents had to complete their foreign trade transactions under export contracts no later than 180 calendar days from date of shipment (transfer of protected information or exclusive rights to intellectual property), completion of work, or provision of services. Extensions beyond 180 days required NBRB permission. |
---|---|---  
Surrender requirements | No.  
Surrender to the central bank | No.  
Surrender to authorized dealers | No.  
Financing requirements | No.  
Documentation requirements | No.  
Letters of credit | No.  
Guarantees | No.  
Domiciliation | No.  
Preshipment inspection | No.  
Other | No.  
Export licenses | Yes. | Export from the Union customs territory of goods included in the Uniform List and the List is carried out as per the regulations permitting exports of goods subject to export restrictions, as approved by Eurasian Economic Commission Board Decision No. 134 of August 16, 2012, and Eurasian Economic Commission Board Decision No. 30 of April 21, 2015, on Measures for Nontariff Regulation. These goods include ozone-depleting substances and products containing them; hazardous waste; collectible objects in the area of mineralogy and paleontology and fossils; live wild animals, some wild plants, and wild medicinal raw materials; precious metals; unprocessed precious metals, waste and scrap of precious metals, ores and concentrates of precious metals, and raw materials containing precious metals; certain minerals; narcotic substances and drugs and psychotropic substances and their precursors; toxic substances; and special technical devices; encryption (cryptographic) devices; human organs, tissue, and blood and its components; service
and civilian weapons; information on mineral resources indicating areas and deposits of fuel and energy and mineral resources.

In the Republic of Belarus, permitting procedures are in place for the export of oil and petroleum products and ferrous and nonferrous metal waste and scrap, as well as mineral or chemical fertilizers and potassium fertilizers.

In accordance with Resolution No. 486 of June 23, 2016, licenses for exports of goods are issued by the Republic of Belarus Ministry of Antimonopoly Regulation and Trade. The same decree approved the list of government agencies and other organizations authorized to approve the issuing of licenses.

There are also prohibitions on exports from the Union’s customs territory of printed matter, audiovisual materials, and other media containing information that could harm the political or economic interests of Belarus or its state security, or the health and morals of its citizens; service and civilian weapons; and timber, recycled paper, cardboard, and waste paper (with respect to goods originating in the Republic of Kazakhstan) on the Uniform List and the List.

Effective March 23, 2022, until September 22, 2022, pursuant to Resolution No. 125 of the Council of Ministers of the Republic of Belarus of March 11, 2022, “On the introduction of a temporary ban on the export of certain types of goods,” exports from the Republic of Belarus of grain and cereals, seeds, meal and cake, products used as animal feed are banned for a period of 6 months. The measure also applies to exports to EAEU member states.

Effective March 23, 2022, until September 22, 2022, pursuant to Resolution No. 147 of the Council of Ministers of the Republic of Belarus of March 19, 2022, “On the introduction of a ban on the export of certain types of industrial goods,” exports of certain industrial goods (over 250 items) are temporarily banned for a period of 6 months. The measure also applies to exports to EAEU member states.

Effective April 4, 2022, until October 1, 2022, pursuant to Resolution No. 195 of the Council of Ministers of the Republic of Belarus of March 31, 2022, “On Non-Tariff Regulation Measures,” exports of soybean meal and rapeseed or kolza seeds, cake, fish feed, products used for the preparation of feed are subject to a licensing requirement for a period of 6 months. Exports of the following goods are subject to One-time licenses issued by the Ministry of Antimonopoly Regulation and Trade in coordination with the Ministry of Agriculture and Food apply for exports (1) outside the territory of the Republic of Belarus to the EAEU Member States, and (2) outside the customs territory of the EAEU in the Republic of Belarus to non-EAEU member states of goods placed under customs procedures for export, temporary export, processing outside the customs territory and reexport.

Effective July 8, 2022, until October 7, 2022, pursuant to Resolution No. 446 of the Council of Ministers of the Republic of Belarus of July 6, 2022, “On the introduction of a temporary ban on the export of certain types of goods,” exports from the Republic of Belarus of coarse buckwheat cereals, hulled buckwheat grain, ready-made buckwheat products, soft wheat flour and spelt are temporarily banned for a period of 3 months. The measure also applies to exports to EAEU member states.

under the customs export procedure, is subject to one-time licenses issued by the Ministry of Antimonopoly Regulation and Trade in coordination with the concern “Bellegprom.”

Effective August 18, 2022, until February 17, 2023, pursuant to Resolution No. 528 of the Council of Ministers of the Republic of Belarus of August 15, 2022, “On the Introduction of Licensing for Exports of White Crystalline Sugar,” exports of white crystalline sugar are subject to a licensing requirement for a period of 6 months. One-time licenses issued by the Ministry of Antimonopoly Regulation and Trade in coordination with the Concern “Belgospischeprom” apply to exports (1) outside the territory of the Republic of Belarus to the EAEU Member States, and (2) outside the customs territory of the EAEU in the Republic of Belarus to non-EAEU member states of goods regardless of their country of origin, placed under customs procedures for export, temporary export, processing outside the customs territory and reexport.

Without quotas

Exports of the following goods on the Uniform List and the List require licenses from the relevant government authority: ozone-depleting substances and products containing them; hazardous waste; collectible objects in the area of mineralogy and paleontology and fossils; live wild animals, some wild plants, and wild medicinal raw materials; precious metals; unprocessed precious metals, waste and scrap of precious metals, ores and concentrates of precious metals, and raw materials containing precious metals; some minerals; narcotic substances and drugs and psychotropic substances and their precursors; toxic substances; special technical devices; encryption (cryptographic) devices; human organs, tissue, and blood and its components; information on mineral resources indicating areas and deposits of fuel and energy and mineral resources; petroleum and petroleum products; and mineral and chemical fertilizers.

With quotas

Effective January 29, 2022, a zero-export quota was established for certain types of timber (codes 4401, 4403 and 4407 of the EAEU HS) for the Eurasian Economic Union member states.

Export taxes

Exports of goods, including to Kazakhstan and Russia, are not subject to VAT and are exempt from excise taxes.

Collected through the exchange system

No.

Other export taxes

Yes.

Export customs duties apply to a limited list of raw materials (petroleum products, potassium fertilizer, canola seeds, fuel wood and hardwood, processed and unprocessed lumber, raw hides) exported to countries outside the Union. Export customs duties on certain goods are established by the following regulatory legal acts: Decree No. 40 of the President of the Republic of Belarus of February 1, 2011, On the Establishment of Export Customs Duty Rates for Raw Hides; Decree No. 716 of December 31, 2010 of the President of the Republic of Belarus on Export Customs Duty Rates; Resolution No. 1932 of the Council of Ministers of the Republic of Belarus of December 31, 2010, on Export Duty Rates for Crude Oil and Certain Types of Oil Products; Decree No. 400 of the President of the Republic of Belarus of September 5, 2013, on the Establishment of the Export Customs Duty Rate for Potassium Fertilizers and Additions and Amendments to Decree No. 442 of the President of the Republic of Belarus of October 3, 2011, and to Decree No. 37 of the President of the Republic of Belarus of January 17, 2012; Decree No. 305 of the President of the Republic of Belarus of October 9, 2010, on the Establishment of Export Customs Duty Rates for Timber; Decree No. 272 of the President of the Republic of Belarus of May 21, 2010, on the Establishment of the Export Customs Duty Rate for Canola Seeds.

**Proceeds from Invisible Transactions and Current Transfers**

**Repatriation requirements** Yes. Under the Republic of Belarus Law No. 226-Z of July 22, 2003, on Foreign Exchange Regulation and Foreign Exchange Control, resident legal entities engaged in export transactions must deposit Belarusian rubles and/or foreign currency in their accounts opened in banks in the Republic of Belarus (repatriation). In case of imports, they must deposit Belarusian rubles and/or foreign currency if the nonresident fails to fulfill their obligations in full, subject to exceptions.

Effective July 9, 2021, the period of repatriation is set by the resident based on the conditions and actual terms of fulfillment of obligations by the parties to a foreign currency agreement for exports, in a manner set forth in the Instruction on Conducting Foreign Exchange Operations, approved by Resolution No. 147 of the Board of the NBRB of May 31, 2021. Previously, residents had to complete their foreign trade transactions under export contracts no later than 180 calendar days from date of shipment (transfer of protected information or exclusive rights to intellectual property), completion of work, or provision of services. Extensions beyond 180 days required NBRB permission.

**Surrender requirements** No.

**Surrender to the central bank** No.

**Surrender to authorized dealers** No.

**Restrictions on use of funds** No.

**Capital Transactions**

**Controls on capital transactions** Yes. In accordance with Law No. 226-Z “On Foreign Exchange Regulation and Foreign Exchange Control” of July 22, 2003, resident legal entities and, as of July 9, 2021, individuals are not required to seek NBRB permission to conduct foreign exchange operations. The law requires that residents (individuals and legal entities) register foreign currency contracts and submit documents and other information on fulfillment of obligations under registered foreign currency contracts in a manner established by the NBRB. Banks are not required to register foreign currency contracts when conducting operations with foreign currency valuable classified as banking operations.

Pursuant to Instruction No. 37 of February 12, 2021, “On registration of foreign currency contracts by residents,” effective July 9, 2021, foreign currency contracts signed between a resident and a nonresident are subject to registration when conducting foreign currency transactions defined therein, if the amount of monetary obligations under the foreign currency contract is not specified or is equal to or exceeds the equivalent of 2,000 base values (for resident individuals) or 4,000 base values (for resident legal entities and individual entrepreneurs) as of the date the contract is signed. Previously, resident individuals were required to obtain NBRB approval for certain capital transactions and legal entities were subject to registration regardless of the amount.

The base value in rubels is determined annually by the government; the base value was 29 rubels in 2021 and 32 rubels in 2022.

<td>The placement of stocks and bonds of foreign issuers within Belarus in accordance with procedures established by law, and of stocks and bonds of Belarusian issuers abroad, is permitted. The procedure for issuing securities pursuant to the Republic of Belarus Law on the Securities Market, and for their circulation and redemption is determined by (1) the NBRB, with the approval of the MOF, for NBRB securities, bearer bank savings books, checks, CDs, and savings certificates; and (2) the Council of Ministers for other securities. Registration of issues (additional issues) of securities is carried out by the MOF Securities Department — with respect to bonds and stocks issued by banks, nonbank credit and financial organizations, insurance organizations, professional securities market players, special financial organizations, and those located in the territory of the Minsk region, and the city of Minsk; MOF regional securities offices (by issuer’s territorial affiliation) — with respect to stocks issued by other issuers. Government securities and NBRB securities are not subject to state registration. In accordance with the Republic of Belarus Law on the Securities Market, exchange-traded bonds are bonds denominated in Belarusian rubels and issued in nondocumentary form, of which the placement and circulation are performed only in the trading system of the stock exchange. Exchange-traded bonds are issued by legal entities in accordance with the conditions established by Decree No. 277 of the President of the Republic of Belarus of April 28, 2006, on Certain Issues in the Regulation of the Securities Market (Paragraph 1.10 of the Decree). Exchange-traded bonds are registered by the BCSE OJSC following the procedure determined by the Republic of Belarus Council of Ministers (Paragraph 14.13 of the Uniform List of Administrative Procedures Performed by Government Authorities and Other Organizations with Respect to Legal Entities and Individual Entrepreneurs, approved by Resolution of the Republic of Belarus Council of Ministers No. 548 of September 24, 2021).</td>

</table>

©International Monetary Fund. Not for Redistribution
foreign investors may not hold more than 30% in the authorized capital of any insurance organization. If that figure is exceeded, the MOF terminates the registration of insurance organizations with the participation of foreign investors and/or issues special permits (licenses) to such organizations to perform insurance activities. Permission from the MOF is required to transfer shares of Belarusian issuers to a depot loro correspondent account of a nonresident depository that has established a correspondent relationship with the Republic Central Securities Depository.

Article 18 of the Republic of Belarus Law on the Securities Market of January 5, 2015, states that in the placement of securities, it is prohibited to establish in the issuer’s charter documents and/or in a decision regarding an issue (additional issue) of issue-grade securities a preferential right to acquire securities for certain investors over other investors or another investor, including the establishment of restrictions on the acquisition of issue-grade securities by nonresidents.

Nonresidents are not required to have NBRB permission or a certificate of registration for the placement of securities from the Securities Department of the MOF.

Pursuant to Instruction No. 37 of February 12, 2021, “On registration of foreign currency contracts by residents,” effective July 9, 2021, foreign currency contracts signed between a resident and a nonresident are subject to registration when residents buy securities issued by a nonresident, if the amount of monetary obligations under the foreign currency contract is not specified or is equal to or exceeds the equivalent of 2,000 base values (for resident individuals) or 4,000 base values (for resident legal entities and individual entrepreneurs) as of the date the contract is signed. Previously, resident individuals were required to obtain NBRB approval and legal entities were subject to registration regardless of the amount.

The base value in rubels is determined annually by the government; the base value was 29 rubels in 2021 and 32 rubels in 2022.

According to Article 27 of the Republic of Belarus Law on the Securities Market of January 5, 2015, a procedure was put in place for the placement and circulation of securities issued by nonresidents within the Belarus, which, in accordance with Republic of Belarus MOF Resolution No. 42 of June 13, 2016, includes (1) in the case of the placement of the securities of nonresident issuers: (a) registration by the republic government authority exercising the state regulation of the securities market of the issue prospectus for such securities prepared in one of the state languages of the Republic of Belarus and meeting the requirements established by that authority; (b) the transfer of the issue (or parts of the issue) of issue-grade securities of nonresident issuers for centralized storage in the depository system; (c) assignment to the issue-grade securities of nonresident issuers of an international securities (securities issue) identification code (ISIN code), and international classification of financial instruments code (CFI code); and (d) existence of an agreement defining the procedures for interaction between the republic government authority exercising government regulation of the securities market and the authority (entity) regulating the securities market in the state in which the nonresident issuer was established; and (2) in the case of the circulation of securities of nonresident issuers: (a) assignment to the issue-grade securities of nonresident issuers of an ISIN code and CFI code and (b) qualification of the issue-grade securities of nonresident issuers as securities in the Republic of Belarus in accordance with procedures established by the Republic of Belarus Council of Ministers.

The procedures for admission of the securities of nonresident issuers...
are determined by the MOF. Pursuant to Article 8 of the Law on the Securities Market, the Council of Ministers of the Republic of Belarus specifies the procedures for the qualification of the issue-grade securities of nonresident issuers as securities in Belarus. Pursuant to Article 6 of the Law, placement and circulation of securities of nonresident issuers may only be made on the organized market.

Pursuant to Instruction No. 37 of February 12, 2021, “On registration of foreign currency contracts by residents,” effective July 9, 2021, foreign currency contracts signed between a resident and a nonresident are subject to registration when residents buy securities issued by a nonresident, if the amount of monetary obligations under the foreign currency contract is not specified or is equal to or exceeds the equivalent of 2,000 base values (for resident individuals) or 4,000 base values (for resident legal entities and individual entrepreneurs) as of the date the contract is signed. Previously, resident individuals were required to obtain NBRB approval and legal entities were subject to registration regardless of the amount.

The base value in rubels is determined annually by the government; the base value was 29 rubels in 2021 and 32 rubels in 2022.

Pursuant to Law No. 52-Z of the Republic of Belarus on Investment Funds of July 17, 2017, the amount of funds used for the acquisition of financial instruments issued by nonresidents of the Republic of Belarus must not exceed 30% of the value of the assets of a joint-stock investment fund intended for investment, or the assets of a mutual fund.

Foreign placement of shares of domestic issuers does not require permission from the securities market regulator or the NBRB; however, shares of domestic issuers placed abroad must be registered in the Republic of Belarus pursuant to Article 18 of the Republic of Belarus Law on the Securities Market (a requirement related to the exercise of control functions over emission procedures and the correct formation of authorized funds, as well as for statistical purposes).

Open joint-stock companies in the Republic of Belarus (except for banks, nonbank credit and financial institutions, as well as legal entities that are part of a bank holding company and legal entities owning 5% of the bank’s stock or more) may issue and sell shares using foreign depositary receipts to attract foreign investment.

Purchases of bonds of Belarusian issuers by nonresidents do not require an NBRB license or permission from the MOF (Securities Department).

Article 18 of the Republic of Belarus Law on the Securities Market of January 5, 2015, states that in the placement of securities, an issuer has the right to establish in its charter documents and/or decision regarding an issue (additional issue) of issue-grade securities a restriction on the acquisition of securities by nonresidents.

Nonresidents are not required to have NBRB permission or a certificate of registration for the placement of securities from the Securities Department of the MOF.

Pursuant to Instruction No. 37 of February 12, 2021, “On registration of foreign currency contracts by residents,” effective July 9, 2021, foreign currency contracts signed between a resident and a nonresident are subject to registration when residents buy securities issued by a nonresident, if the amount of monetary obligations under the foreign currency contract is not specified or is equal to or exceeds...
the equivalent of 2,000 base values (for resident individuals) or 4,000 base values (for resident legal entities and individual entrepreneurs) as of the date the contract is signed. Previously, resident individuals were required to obtain NBRB approval and legal entities were subject to registration regardless of the amount. The base value in rubels is determined annually by the government; the base value was 29 rubels in 2021 and 32 rubels in 2022. According to Article 27 of the Republic of Belarus Law of January 5, 2015, on the Securities Market, a procedure was put in place for the placement and circulation of securities issued by nonresidents within the Belarus, which, in accordance with Republic of Belarus MOF Resolution No. 42 of June 13, 2016, includes (1) in the case of the placement of the securities of nonresident issuers: (a) registration by the republic government authority exercising the state regulation of the securities market of the issue prospectus for such securities prepared in a Republic of Belarus state language and meeting the requirements established by that authority; (b) the transfer of the issue (or parts of the issue) of issue-grade securities of nonresident issuers for centralized storage in the depository system; (c) assignment to the issue-grade securities of nonresident issuers of an ISIN code and CFI code; and (d) existence of an agreement defining the procedures for interaction between the republic government authority exercising government regulation of the securities market and the authority (entity) regulating the securities market in the state in which the nonresident issuer was established; and (2) in the case of the circulation of the securities of nonresident issuers: (a) assignment to the issue-grade securities of nonresident issuers of an ISIN code and CFI code and (b) qualification of the issue-grade securities of nonresident issuers as securities in the Republic of Belarus in accordance with procedures established by the Republic of Belarus Council of Ministers. The procedures for admission of the securities of nonresident issuers are determined by the MOF. Pursuant to Article 8 of the Law on the Securities Market, the Council of Ministers of the Republic of Belarus specifies the procedures for the qualification of issue-grade securities of nonresident issuers as securities in Belarus. Pursuant to Article 6 of the Law, placement and circulation of securities of nonresident issuers may only be made on the organized market. Pursuant to Instruction No. 37 of February 12, 2021, “On registration of foreign currency contracts by residents,” effective July 9, 2021, foreign currency contracts signed between a resident and a nonresident are subject to registration when residents buy securities issued by a nonresident, if the amount of monetary obligations under the foreign currency contract is not specified or is equal to or exceeds the equivalent of 2,000 base values (for resident individuals) or 4,000 base values (for resident legal entities and individual entrepreneurs) as of the date the contract is signed. Previously, resident individuals were required to obtain NBRB approval and legal entities were subject to registration regardless of the amount. The base value in rubels is determined annually by the government; the base value was 29 rubels in 2021 and 32 rubels in 2022. Pursuant to Law No. 52-Z of the Republic of Belarus on Investment Funds of July 17, 2017, the amount of funds used for the acquisition of financial instruments issued by nonresidents of the Republic of Belarus must not exceed 30% of the value of the assets of a joint-stock investment fund intended for investment, or the assets of a mutual fund.
the laws of a country whose legislation regulates such matters must be submitted to the MOF Securities Department within 10 days of the starting date of the placement of bonds within a foreign state.

NBRB permission is not required.

Nonresidents are not required to have NBRB permission or a certificate of registration for the placement of securities from the Securities Department of the MOF.

Pursuant to Instruction No. 37 of February 12, 2021, “On registration of foreign currency contracts by residents,” effective July 9, 2021, foreign currency contracts signed between a resident and a nonresident are subject to registration when residents buy securities issued by a nonresident, if the amount of monetary obligations under the foreign currency contract is not specified or is equal to or exceeds the equivalent of 2,000 base values (for resident individuals) or 4,000 base values (for resident legal entities and individual entrepreneurs) as of the date the contract is signed. Previously, resident individuals were required to obtain NBRB approval and legal entities were subject to registration regardless of the amount.

The base value in rubles is determined annually by the government; the base value was 29 rubles in 2021 and 32 rubles in 2022.

In accordance with the Article 8 of Republic of Belarus Law No. 231-Z of January 5, 2015, on the Securities Market, the MOF establishes the conditions and procedure for allowing the placement and trading of securities of nonresident issuers within the Republic of Belarus.

According to Article 27 of the Republic of Belarus Law of January 5, 2015, on the Securities Market, a procedure was put in place for the placement and circulation of securities issued by nonresidents within the Belarus, which, in accordance with Republic of Belarus MOF Resolution No. 42 of June 13, 2016, includes (1) in the case of the placement of the securities of nonresident issuers: (a) registration by the republic government authority exercising the state regulation of the securities market of the issue prospectus for such securities prepared in a Republic of Belarus state language and meeting the requirements established by that authority; (b) the transfer of the issue (or parts of the issue) of issue-grade securities of nonresident issuers for centralized storage in the depository system; (c) assignment to the issue-grade securities of nonresident issuers of an ISIN code and CFI code; and (d) existence of an agreement defining the procedures for interaction between the republic government authority exercising government regulation of the securities market and the authority (entity) regulating the securities market in the state in which the nonresident issuer was established; and (2) in the case of the circulation of the securities of nonresident issuers: (a) assignment to the issue-grade securities of nonresident issuers of an ISIN code and CFI code and (b) qualification of the issue-grade securities of nonresident issuers as securities in the Republic of Belarus in accordance with procedures established by the Republic of Belarus Council of Ministers.

The procedures for admission of the securities of nonresident issuers are determined by the MOF. Pursuant to Article 8 of the Law on the Securities Market, the Council of Ministers of the Republic of Belarus specifies the procedures for the qualification of issue-grade securities of nonresident issuers as securities in Belarus. Pursuant to Article 6 of the Law, placement and circulation of securities of nonresident issuers may only be made on the organized market.
of foreign currency contracts by residents,” effective July 9, 2021, foreign currency contracts signed between a resident and a nonresident are subject to registration when residents buy securities issued by a nonresident, if the amount of monetary obligations under the foreign currency contract is not specified or is equal to or exceeds the equivalent of 2,000 base values (for resident individuals) or 4,000 base values (for resident legal entities and individual entrepreneurs) as of the date the contract is signed. Previously, resident individuals were required to obtain NBRB approval and legal entities were subject to registration regardless of the amount.

The base value in rubels is determined annually by the government; the base value was 29 rubels in 2021 and 32 rubels in 2022. Pursuant to Law No. 52-Z of the Republic of Belarus on Investment Funds of July 17, 2017, the amount of funds used for the acquisition of financial instruments issued by nonresidents of the Republic of Belarus must not exceed 30% of the value of the assets of a joint-stock investment fund intended for investment, or the assets of a mutual fund.

Sale or issue abroad by residents No.

On collective investment securities Yes. Under Law No. 52-Z on Investment Funds of July 17, 2017, it is possible to create two types of investment funds: joint-stock investment funds and mutual funds. Joint-stock investment funds may issue only common (ordinary) shares. The issuing, circulation, and redemption of securities are performed in accordance with the given law, taking into account the specific considerations established by other legislative acts of the Republic of Belarus concerning investment funds. The procedure for issuing, circulation, and redemption of investment shares is also established by Republic of Belarus Law No. 52-Z of July 17, 2017, on Investment Funds. Investment shares are subject to state registration, and they are freely traded in the organized or other markets, unless otherwise established by legislative acts. Investment shares are recorded in the depository system.

Purchase locally by nonresidents No. Purchases locally by nonresidents of collective investment securities do not require the approval of the NBRB or the MOF.

Sale or issue locally by nonresidents No. There is no restriction on such transactions by nonresidents. NBRB approval is not required for the sale or issue of collective investment securities by nonresidents in the local market. Pursuant to Instruction No. 37 of February 12, 2021, “On registration of foreign currency contracts by residents,” effective July 9, 2021, foreign currency contracts signed between a resident and a nonresident are subject to registration when residents buy securities issued by a nonresident, if the amount of monetary obligations under the foreign currency contract is not specified or is equal to or exceeds the equivalent of 2,000 base values (for resident individuals) or 4,000 base values (for resident legal entities and individual entrepreneurs) as of the date the contract is signed. Previously, resident individuals were required to obtain NBRB approval and legal entities were subject to registration regardless of the amount.

The base value in rubels is determined annually by the government; the base value was 29 rubels in 2021 and 32 rubels in 2022. Pursuant to Instruction No. 37 of February 12, 2021, “On registration of foreign currency contracts by residents,” effective July 9, 2021, foreign currency contracts signed between a resident and a nonresident are subject to registration when residents buy securities issued by a nonresident, if the amount of monetary obligations under the foreign currency contract is not specified or is equal to or exceeds the equivalent of 2,000 base values (for resident individuals) or 4,000 base values (for resident individuals) or 4,000
base values (for resident legal entities and individual entrepreneurs) as of the date the contract is signed. Previously, resident individuals were required to obtain NBRB approval and legal entities were subject to registration regardless of the amount.

The base value in rubels is determined annually by the government; the base value was 29 rubels in 2021 and 32 rubels in 2022.

In accordance with the Republic of Belarus Law on Investment Funds of July 17, 2017, the amount of funds used for the acquisition of financial instruments issued by nonresidents of the Republic of Belarus must not exceed 30% of the value of the assets of a joint-stock investment fund intended for investment, or the assets of a mutual fund.

Commercial credits

By residents to nonresidents

Yes. Pursuant to Instruction No. 37 of February 12, 2021, “On registration of foreign currency contracts by residents,” effective July 9, 2021, resident legal entities must register a foreign currency contract for export, if the amount of monetary obligations under the foreign currency contract is not determined or is equal to or exceeds the equivalent of 4,000 base values on the date foreign currency contract is signed. Previously, NBRB permission was required for the deferral of receipt of proceeds from exports of goods (as well as work and services) more than 180 days; NBRB permission was required for deferral of more than 90 days of receipt of imports of goods (as well as work and services) that have been paid for.

The base value in rubels is determined annually by the government; the base value was 29 rubels in 2021 and 32 rubels in 2022.

To residents from nonresidents

Yes. Pursuant to Instruction No. 37 of February 12, 2021, “On registration of foreign currency contracts by residents,” effective July 9, 2021, resident legal entities must register a foreign currency contract for export, if the amount of monetary obligations under the foreign currency contract is not determined or is equal to or exceeds the equivalent of 4,000 base values on the date foreign currency contract is signed.

The base value in rubels is determined annually by the government; the base value was 29 rubels in 2021 and 32 rubels in 2022.

Financial credits

By residents to nonresidents

Yes. Pursuant to Instruction No. 37 of February 12, 2021, “On registration of foreign currency contracts by residents,” effective July 9, 2021, resident individuals and legal entities must register the foreign currency contract for the provision of a loan to a nonresident if the amount of monetary obligations under the foreign currency contract is not specified or is equal to or exceeds the equivalent of 2,000 base values (for resident individuals) and 4,000 base values (for resident legal entities and individual entrepreneurs) on the date the foreign currency contract is signed. Previously, resident individuals were required to have NBRB approval for granting financial loans to nonresidents for a period exceeding 180 days. Banks, nonbank lending institutions, and resident legal entities were not required to have NBRB approval. Resident banks and legal entities neither needed notification nor registration of such transactions.

The base value in rubels is determined annually by the government; the base value was 29 rubels in 2021 and 32 rubels in 2022.

To residents from nonresidents

Yes. Pursuant to Instruction No. 37 of February 12, 2021, “On registration of foreign currency contracts by residents,” effective July 9, 2021, resident individuals and legal entities must register the foreign currency contract which provides for disbursement of a credit or a loan from a nonresident if the amount of monetary obligations under the foreign currency contract is not specified or is equal to or exceeds the equivalent of 2,000 base values (for resident individuals) and 4,000 base values (for resident legal entities and individual entrepreneurs) on the date the foreign currency contract is signed. Previously, resident banks and resident legal entities and individuals were not required to have NBRB approval. Resident legal entities attracted credit (loans) from nonresidents through a registration procedure.

The base value in rubels is determined annually by the government; the base value was 29 rubels in 2021 and 32 rubels in 2022.

Guarantees, sureties, and financial transactions.

Yes.
backup facilities
By residents to nonresidents
Yes. Pursuant to Instruction No. 37 of February 12, 2021, “On registration of foreign currency contracts by residents,” effective July 9, 2021, foreign currency contracts signed between a resident and a nonresident are subject to registration when residents buy securities issued by a nonresident, if the amount of monetary obligations under the foreign currency contract is not specified or is equal to or exceeds the equivalent of 2,000 base values (for resident individuals) or 4,000 base values (for resident legal entities and individual entrepreneurs) as of the date the contract is signed. Previously, resident banks and resident legal entities and individuals were not required to have NBRB approval for the provision of guarantees and sureties to nonresidents. Such transactions by resident legal entities needed registration only regardless.

The base value in rubels is determined annually by the government; the base value was 29 rubels in 2021 and 32 rubels in 2022.

To residents from nonresidents No. Resident legal entities are not required to register foreign currency contracts involving receipt of guarantees and warranties from a nonresident.

Banks perform transactions involving the receipt of guarantees and sureties under special banking licenses (no permission, notification, or registration is required).

Controls on direct investment
Yes.

Outward direct investment
Yes. Pursuant to Instruction No. 37 of February 12, 2021, “On registration of foreign currency contracts by residents,” effective July 9, 2021, resident individuals and legal entities must register the foreign currency contract envisaging a contribution to the nonresident’s authorized fund if the amount of monetary obligations under the foreign currency contract is not specified or is equal to or exceeds the equivalent of 2,000 base values (for resident individuals) and 4,000 base values (for resident legal entities and individual entrepreneurs) on the date the foreign currency contract is signed. Previously, resident individuals were required to obtain NBRB approval and legal entities were subject to registration regardless of the amount.

The base value in rubels is determined annually by the government; the base value was 29 rubels in 2021 and 32 rubels in 2022.

Resident banks may open subsidiaries and branches outside the Republic of Belarus and have equity interest in the authorized funds of foreign banks with approval from the National Bank. Equity interest in the capital of legal entities, including foreign entities exceeding 5% of the authorized capital of a legal entity requires approval from the National Bank.

Inward direct investment
Yes. NBRB permission is not required. Foreign investments must be registered with the relevant local governments. Financial institutions must also register them with the NBRB. Insurance institutions, including those with foreign investments, must also be registered with the MOF. All types of activities and insurance services are subject to a special permit (license). When incorporating a firm with foreign interest, no limit is placed on the foreign investor’s share. Foreign investors’ share in the authorized capital of all insurance organizations may not exceed 30%. If that figure is exceeded, the MOF terminates the registration of insurance organizations with the participation of foreign investors and/or issues special permits (licenses) to such organizations to perform insurance activities.

The maximum participation of foreign capital in the banking system of Belarus is 50%. The NBRB terminates the state registration of banks whose founders (shareholders) are foreign investors once the maximum has been reached. Foreign exchange legislation does not...
restrict these transactions; however, NBRB approval is required for
transfers of bank shares by residents to nonresidents.
If a bank’s authorized fund increases by means of nonresident
contributions and/or by the bank and/or a resident shareholder
receiving bank shares in favor of nonresidents, a nonresident buyer
of shares or a resident intending to enter into such a transaction must
obtain prior approval from the National Bank.

Controls on liquidation of direct
investment

No.

Controls on real estate transactions

Yes.

Purchase abroad by residents

of foreign currency contracts by residents,” effective July 9, 2021,
resident individuals and legal entities must register the foreign
currency contract for purchase of real estate abroad if the amount of
monetary obligations under the foreign currency contract is not
specified or is equal to or exceeds the equivalent of 2,000 base values
(for resident individuals) and 4,000 base values (for resident legal
entities and individual entrepreneurs) on the date the foreign
currency contract is signed. Previously, resident individuals were
required to obtain NBRB approval and legal entities were subject to
registration regardless of the amount.
The base value in rubels is determined annually by the government;
the base value was 29 rubels in 2021 and 32 rubels in 2022.

Purchase locally by nonresidents

No.

Sale locally by nonresidents

No.

Controls on personal capital transactions

Yes.

Loans

Yes.

By residents to nonresidents

of foreign currency contracts by residents,” effective July 9, 2021,
resident individuals must register the foreign currency contract for an
extension of a loan to a nonresident, if the amount of monetary
obligations under the foreign currency contract is not specified or is
equal to or exceeds the equivalent of 2,000 base values on the date
foreign currency contract is signed. Previously, NBRB permission
was required for terms of over 180 days.
The base value in rubels is determined annually by the government;
the base value was 29 rubels in 2021 and 32 rubels in 2022.

To residents from nonresidents

of foreign currency contracts by residents,” effective July 9, 2021,
resident individuals must register the foreign currency contract for
borrowing of a loan from a nonresident, if the amount of monetary
obligations under the foreign currency contract is not specified or is
equal to or exceeds the equivalent of 2,000 base values on the date
foreign currency contract is signed.
The base value in rubels is determined annually by the government; the base value was 29 rubels in 2021 and 32 rubels in 2022.

**Gifts, endowments, inheritances, and legacies**

- **By residents to nonresidents**: Yes. Pursuant to Instruction No. 37 of February 12, 2021, “On registration of foreign currency contracts by residents,” effective July 9, 2021, resident individuals must register the foreign currency contract for a donation (endowment) in favor of a nonresident, if the amount of monetary obligations under the foreign currency contract is not specified or is equal to or exceeds the equivalent of 2,000 base values on the date foreign currency contract is signed. The base value in rubels is determined annually by the government; the base value was 29 rubels in 2021 and 32 rubels in 2022.

- **To residents from nonresidents**: Yes. Registration with the Department of Humanitarian Affairs under the Office of the President of the Republic of Belarus is required. This requirement was rescinded with respect to foreign gratuitous aid obtained by individuals. Registration is required both for statistical purposes and as a control measure for the receipt and designated use of aid.

**Settlement of debts abroad by immigrants**

- No.

**Transfer of assets**

- No.

**Transfer abroad by emigrants**

- No.

**Transfer into the country by immigrants**

- No.

**Transfer of gambling and prize earnings**

- No.

### Provisions Specific to the Financial Sector

**Provisions specific to commercial banks and other credit institutions**

- Yes. Banks and nonbank financial and lending institutions with an appropriate banking license may purchase and sell foreign exchange. Banks may perform these transactions without restriction within the limits of their open foreign exchange position. A banking license is required to engage in banking operations. The definition of "banks" includes banks and nonbank credit and financial organizations that are such in accordance with the legislation of the Republic of Belarus (Resolution of the NBRB Board No. 112 of July 28, 2005).

**Borrowing abroad**

- No. Borrowing abroad by banks and nonbank financial institutions is not subject to NBRB approval, registration, or notification.

**Maintenance of accounts abroad**

- No. Banks may open correspondent accounts in foreign banks in accordance with special permits (licenses) for banking activities.

**Lending to nonresidents (financial or commercial credits)**

- No. Loans issued to nonresidents by banks and nonbank credit and financial organizations are not subject to registration.

**Lending locally in foreign exchange**

- Yes. Banks and nonbank credit and financial organizations may not issue loans to individuals in foreign currency. The requirement with regard to lending to individuals in Belarusian rubels only is established in the Instruction on the Procedure for Providing Funds in the Form of Credit and their Return (Repayment), approved by NBRB Executive Board Resolution No. 149 of March 29, 2018, and also in Article 150 of the Banking Code of the Republic of Belarus. There are no restrictions on making loans in foreign currency to legal entities and individual entrepreneurs.

**Purchase of locally issued securities denominated in foreign exchange**

- No. Effective July 9, 2021, the nominal value of bonds which, under the terms of the prospectus, are placed in the territory of the Republic of Belarus, is determined by the Government of the Republic of Belarus.
Belarus, with the exception of government bonds and NBRB bonds, must be denominated in the official unit of currency of the Republic of Belarus. Settlements in foreign currency between residents on resident bonds denominated in foreign currency are prohibited, with the exception of government bonds and National Bank bonds.

Differential treatment of deposit accounts held by nonresidents

Reserve requirements

Yes.

Reserve requirements for funds attracted in foreign currency is set at 16%, and at 4% for funds attracted in domestic currency. The required reserve fund is accumulated in Belarusian rubels.

Liquid asset requirements

No.

The liquidity coverage and net stable funding ratios have been introduced as a requirement to ensure safe operation of banks, as provided for by the Basel III system standards. The value of each ratio is at least 100%.

For JSC “Development Bank of the Republic of Belarus,” only a net stable funding ratio (NSFR) of 100% is established. The rules for calculating liquidity ratios and their statutory minimum values are broadly in line with the recommendations of the Basel Committee on Banking Supervision.

In the context of the National Bank’s countercyclical measures adopted by NBRB Board Resolution No. 81 of March 18, 2020, “On Certain Issues of Regulating the Activities of Banks in 2020,” between April 22, 2022, and December 31, 2020, banks were allowed to apply the LCR of 80%. Effective January 1, 2021, NBRB Board Resolution No. 298 of September 18, 2020, “On Certain Issues of Regulating the Activities of Banks, Nonbanking Credit and Financial Organizations and JSC “Development Bank of the Republic of Belarus” in 2021,” extended the right to apply the LCR of 80% until June 30, 2021. Effective July 1, 2021, to December 31, 2021, the LCR value was increased to 90%. Effective March 21, 2022, the LCR was reduced to 80%.

The measure allowing banks classified as Group 1 systemically important banks to include an irrevocable line of credit opened by the National Bank as Level 1 highly liquid assets when calculating compliance with the LCR ended on December 31, 2020, and is no longer in force effective January 1, 2021. Effective May 27, 2022, until year-end, banks in the Group 1 systemically important banks may include an irrevocable credit line opened by the National Bank as part of highly liquid assets for the LCR calculation.

Interest rate controls

No.

Banks set interest rates on deposits in domestic and foreign currencies. The NBRB may make recommendations to banks about interest rate levels, regardless of the banks’ residency status.

Credit controls

No.

Differential treatment of deposit accounts

Reserve requirements

Yes.

Funds raised from nonresident banks and loans and funds received from nonresident clients in foreign exchange are not subject to reserve requirements.

Liquid asset requirements

No.

Liquid asset requirements are the same for deposit accounts of nonresidents and residents. For the LCR calculation, there is no difference between placing residents’ and nonresidents’ assets into the highly liquid assets category.

Interest rate controls

No.

There are no legislative restrictions for banks’ establishing the size of interest rates for bank loans (deposits) of legal entities and individuals depending on whether they are Belarus residents or nonresidents.
Credit controls
No.

Investment regulations
Yes.

Abroad by banks
Yes. Banks seeking to participate in the authorized fund of another legal entity must obtain an NBRB permit in the following cases: (1) acquisition of shares when they are distributed among the company’s founders, as well as interest in the authorized capital or stakes in the property of nonresidents; (2) purchase of a unitary enterprise in the form of a property complex and/or shares (an interest) in another legal entity as a long-term financial investment, and/or contribution to raise the nominal (actual) value of shares in such a legal entity, if after such an acquisition and/or contribution, its stake in the given legal entity’s authorized capital becomes equal to 5% or more (including cases when previously that stake was 5% or more), except for acquisition of shares (interest) and/or an increase in the nominal (actual) value of shares unrelated to the need for its contribution of additional funds as a result of disposal by other shareholders (partners) and/or redistribution of internal sources of the legal entity; (3) establishment by resident banks of subsidiaries and branches outside the Republic of Belarus and the participation by resident banks in the authorized capital of foreign banks; and (4) transfers to nonresidents based on commitments involving a resident’s purchase of real estate abroad.

These are prudential regulation requirements (except for Item (4)).

In keeping with memoranda of understanding (agreements) on banking supervision between the NBRB and the banking supervisors of individual countries, the parties may provide information regarding a potential investor, report on the issuing of licenses to open subsidiary banks and permits to participate in authorized capital of banks, and share other information.

In banks by nonresidents
Yes. The maximum participation of foreign capital in the banking system of Belarus is 50%. The NBRB terminates the state registration of banks whose founders (shareholders) are foreign investors once the maximum has been reached.

Foreign currency legislation does not restrict such operations, but NBRB permission is required in the following cases: (1) acquisition of ownership, administrative control, operational management, or receipt in trust of 5% or more of shares in the authorized capital of a bank as a result of one or more transactions by one legal entity or individual, including a shareholder of the bank, by a group of individuals and/or legal entities connected by an agreement, or by a group of subsidiary or dependent legal entities, as well as all subsequent acquisitions of bank shares by said persons; and (2) an increase in the authorized capital of a bank as a result of funds provided by nonresidents and/or the transfer of bank shares by a resident shareholder to a nonresident.

Decree No. 84 of the President of the Republic of Belarus of March 3, 2016, “On issue and circulation of shares using foreign depositary receipts,” prohibits issue of additional tranches of shares placed through foreign depositary receipts, sale through foreign depositary receipts of shares issued by banks, nonbank credit and financial organizations registered in the territory of the Republic of Belarus, and those issued by legal entities which are part of a bank holding company, and legal entities that own 5% or more of the bank’s stock.

Open foreign exchange position limits
Yes. The following limits are set for open foreign exchange positions: (1) the overall open position for all foreign currencies and precious metals in the form of bank bullion, revalued mint bullion, and revalued coins may not exceed 10% of the bank’s regulatory capital; (2) the net open position for each foreign currency and precious...
metal in the form of bank bullion, revalued mint bullion, and
revalued coins may not exceed 10% of a bank’s regulatory capital;
(3) the net open position for forward transactions for each foreign
currency and precious metal in the form of bank bullion, revalued
mint bullion, and revalued coins individually may not exceed 10% of
a bank’s regulatory capital. The forward portion of swap transactions
is not counted when calculating this limitation. Limits are calculated
generally by type of foreign currency or precious metal in the form of
bank bullion, revalued mint bullion, and revalued coins, regardless of
whether assets or liabilities apply to a resident or nonresident.

On resident assets and liabilities

Yes. The following limits are set for open foreign exchange positions:
(1) the overall open position for all foreign currencies and precious
metals in the form of bank bullion, revalued mint bullion, and
revalued coins may not exceed 10% of the bank’s regulatory capital;
(2) the net open position for each foreign currency and precious
metal in the form of bank bullion, revalued mint bullion, and
revalued coins may not exceed 10% of a bank’s regulatory capital;
(3) the net open position for forward transactions for each foreign
currency and precious metal in the form of bank bullion, revalued
mint bullion, and revalued coins individually may not exceed 10% of
a bank’s regulatory capital. The forward portion of swap transactions
is not counted when calculating this limitation.

Limits are calculated generally by type of foreign currency or
precious metal in the form of bank bullion, revalued mint bullion,
and revalued coins, regardless of whether assets or liabilities apply to
a resident or nonresident.

On nonresident assets and liabilities

Yes. The following limits are set for open foreign exchange positions:
(1) the overall open position for all foreign currencies and precious
metals in the form of bank bullion, revalued mint bullion, and
revalued coins may not exceed 10% of the bank’s regulatory capital;
(2) the net open position for each foreign currency and precious
metal in the form of bank bullion, revalued mint bullion, and
revalued coins may not exceed 10% of a bank’s regulatory capital;
(3) the net open position for forward transactions for each foreign
currency and precious metal in the form of bank bullion, revalued
mint bullion, and revalued coins individually may not exceed 10% of
a bank’s regulatory capital. The forward portion of swap transactions
is not counted when calculating this limitation.

Limits are calculated generally by type of foreign currency or
precious metal in the form of bank bullion, revalued mint bullion,
and revalued coins, regardless of whether assets or liabilities apply to
a resident or nonresident.

Provisions specific to institutional
investors

Yes. Limits may be established by the Council of Ministers and the
NBRB.

Insurance companies

Yes. Insurance companies must obtain permission from the MOF to
increase their authorized capital using funds from foreign investors
and/or insurance organizations that are subsidiaries of those foreign
investors, and to transfer shares (interest in the authorized capital) to
foreign investors and/or insurance organizations that are subsidiaries
of those foreign investors. The share of foreign investors in the
authorized capital of all insurance organizations must not exceed
30%.
If that maximum is exceeded, the MOF terminates the registration of
insurance organizations with the participation of foreign investors
and/or issues these organizations special permits (licenses) to
perform insurance activities.

Limits (max.) on securities issued by
nonresidents

Yes. Insurance laws do not establish any quantitative limits on the
purchase by Belarusian insurance companies of securities issued by
nonresidents. But insurance laws establish the following restrictions
and requirements:
(1) Belarusian state-owned insurance organizations and insurance organizations in which the state holds a stake in the authorized capital equal to more than 50% may not purchase securities issued by nonresidents (either at the expense of insurance reserves or at the expense of their own funds), except for participation in the establishment of insurance organizations and/or insurance brokers outside Belarus and/or the acquisition of interests (shares) in the authorized capital of such organizations (these should be carried out with the permission of the MOF); (2) Belarusian private insurance companies may purchase securities issued by nonresidents at their own expense free from liabilities and legal requirements (for example, minimum authorized fund resources are placed on bank accounts in the Republic of Belarus) in compliance with the diversification principle.

(3) (since September 26, 2020) Insurance organizations may place no more than 30% of insurance reserves under trust management for a specific term with banks in the Republic of Belarus or other resident commercial organizations operating in the Republic of Belarus and acting as trust managers for at least three years. Funds placed under trust management may be invested, inter alia, in securities issued by governments, CBs (national), banks of foreign states, international financial institutions and development banks as per the list and criteria defined by the MOF.

There are no quantitative restrictions on the portfolio of investments abroad. However, the establishment by insurance companies or insurance brokers of separate subdivisions outside Belarus, participation in the establishment of insurance companies and/or insurance brokers outside Belarus, or the acquisition of an interest (shares) in the authorized capital of such organizations requires MOF permission. Belarusian state-owned insurance organizations and insurance organizations in which the state holds a stake in the authorized capital equal to more than 50% may not purchase securities issued by nonresidents (either at the expense of insurance reserves or at the expense of their own funds), if they are not related to the participation in the establishment of insurance organizations and/or insurance brokers outside Belarus and/or the acquisition of interests (shares) in the authorized capital of such organizations (these should be carried out with the permission of the MOF).

Belarusian private insurance organizations may purchase securities issued by nonresidents at the expense of their own funds that are unencumbered and not subject to legislative requirements (for example, minimum authorized capital funds are placed in accounts at Republic of Belarus banks), in compliance with the principle of diversification.

(3) (since September 26, 2020) Insurance organizations may place no more than 30% of insurance reserves under trust management for a specific term with banks in the Republic of Belarus or other resident commercial organizations operating in the Republic of Belarus and acting as trust managers for at least three years. Funds placed under trust management may be invested, inter alia, in securities issued by governments, CBs (national), banks of foreign states, international financial institutions and development banks as per the list and criteria defined by the MOF.
### BELARUS

<tbody>
<tr>
<td>Currency-matching regulations on assets/liabilities composition</td>
<td>No.</td>
</tr>
<tr>
<td>Pension funds</td>
<td>No.</td>
</tr>
</tbody>
</table>

There are no pension funds acting as institutional investors in Belarus. This circumstance is because of the distributive pension system in the Republic of Belarus, which does not provide for an accumulative tier in the form of pension funds. In the event of a reform of the pension system and the creation of pension funds becomes possible, their creation and functioning will be carried out in accordance with the Law on Investment Funds of July 17, 2017, taking into consideration potential specific features established for such funds by legislative acts.

| Limits (max.) on securities issued by nonresidents                         | No.    |
| Limits (max.) on investment portfolio held abroad                         | No.    |
| Limits (min.) on investment portfolio held locally                         | No.    |
| Currency-matching regulations on assets/liabilities composition           | No.    |

| Investment firms and collective investment funds                          | Yes.   |

The activities of brokers, dealers, depositaries, trustees, clearinghouses, and organizers of securities trading are overseen by the MOF (Securities Department).

Under a banking license, banks may provide services related to the trust management of money (individual investments) and trust management of bank management funds (collective investments).

Republic of Belarus Law No. 52-Z on Investment Funds of July 17, 2017, provides for the possibility of creating two types of investment funds: joint-stock investment funds and mutual funds. The organization managing the assets of an investment fund may be a commercial company that has been created in accordance with the legislation of the Republic of Belarus and has gone through the state accreditation process. A specialized depository is a commercial company or unitary enterprise that has been created in accordance with the legislation of the Republic of Belarus and has gone through the state accreditation process.

The Republic of Belarus Council of Ministers establishes the procedure for the registration of rules governing mutual funds; it establishes the procedure for the state accreditation process, as well as the procedure and grounds for the suspension, renewal, and termination of state accreditation for operating as a management company and state accreditation for operating as a specialized depository; it establishes the procedure for the state registration of investment shares; and it exercises other authority related to the state regulation of relations involving investment funds.

State accreditation for operating as an investment fund management company is performed by the Republic of Belarus MOF following the procedure defined under Items 14.3.3, 14.3.2 (14.3.4) of the Uniform List of Administrative Procedures Performed by Government Authorities and Other Organizations with respect to Legal Entities and Individual Entrepreneurs, approved by Republic of Belarus Council of Ministers Resolution No. 548 of September 24, 2021.

The Regulation on the Financing of Commercial Organizations against a Concession of Rights (Claims) at the Expense of Funds...
Attracted through a Bond Issue, or with a Subsequent Bond Issue, approved by Decree of the President of the Republic of Belarus No. 154 of May 11, 2017, introduced the concept of an SFI. An SFI is a joint-stock company created for the performance of securitization operations. An SFI is prohibited from performing any entrepreneurial activity other than securitization operations and transactions involving the acquisition of financial assets during the period that bonds are in circulation (at the expense of temporarily available funds that are part of the assets that have been allocated), as well as transactions involving the conveyance of said financial assets. A SFI has the right to attract borrowed funds, including credits, for the acquisition of rights (claims) and for the payment of expenses related to a subsequent bond issue, for a term up to the day on which the bond placement ends, in an amount that does not exceed the cost of the rights (claims) acquired and the expenses related to the subsequent bond issue.

Limits (max.) on securities issued by nonresidents

Yes. The amount of funds used for the acquisition of financial instruments issued by nonresidents of the Republic of Belarus must not exceed 30% of the value of the assets of a joint-stock investment fund intended for investment, or the assets of a mutual fund.

Limits (max.) on investment portfolio held abroad

Yes. With regard to investment funds, the amount of funds used for the acquisition of financial instruments issued by nonresidents of the Republic of Belarus must not exceed 30% of the value of the assets of a joint-stock investment fund intended for investment, or the assets of a mutual fund.

 Limits (min.) on investment portfolio held locally

No. There are no limits on nonbank professional participants, SFIs, or investment fund management companies.

Currency-matching regulations on assets/liabilities composition

No. There are no limits on nonbank professional participants, SFIs, or investment fund management companies.

Changes during 2021 and 2022

Exchange Measures

Exchange measures imposed for security reasons

Other security restrictions 01/06/2021 Amendments to the Republic of Belarus Law No. 165-Z of June 30, 2014, on Measures to Prevent Money Laundering, the Financing of Terrorism, and the Financing of Proliferation of Weapons of Mass Destruction came into force.

Exchange Arrangement

Official exchange rate 07/15/2022 The National Bank of the Republic of Belarus added the Chinese yuan to the list of currencies in the foreign currency basket and assigned the following currency weights when calculating the value of the basket: 50% for the Russian ruble, 30% for the US dollar, 10% for the euro, and 10% for the Chinese yuan.

08/01/2022 The National Bank of the Republic of Belarus started setting official exchange rates daily against the Brazilian real (BRL), UAE dirham (AED), dong (VND), and Indian rupee (INR).

Monetary policy framework

Monetary aggregate target 01/01/2021 The operating target in monetary policy is the rubel base money (previously, it was the domestic currency overnight rate).

Foreign exchange market

07/09/2021 Bank clients are allowed to purchase and sell foreign currency for Belarusian rubels through Belarusian Currency and Stock Exchange without the bank’s involvement.

Spot exchange market

Operated by the central bank
A two-way auction operates for the Chinese yuan.

**Resident Accounts**

Pursuant to Article 17 of Law No. 226-Z of the Republic of Belarus of July 22, 2003, “On Foreign Exchange Regulation and Foreign Exchange Control,” as amended, resident individuals and legal entities may open accounts in foreign banks in Belarusian rubles and foreign currency without restrictions, and carry out foreign currency operations on these accounts as set therein.

Previously, to open accounts at nonresident banks abroad, resident legal entities (other than banks) needed National Bank of the Republic of Belarus approval, with the exception of (1) accounts for the recording of credit operations, (2) accounts for servicing diplomatic and other official representative offices of Belarus, as well as (3) accounts of representative offices of residents opened with nonresident banks in any country in any currency. Notification of accounts of representative offices of resident legal entities (other than banks) opened with nonresident banks was required.

**Imports and Import Payments**

There are no deadlines and methods for completing foreign trade operations, and the execution of foreign trade contracts by residents is carried out on terms and within the deadlines specified by the parties to the contract. The terms and conditions for completion of obligations by the parties under foreign exchange export and import contracts are established on a contractual basis (subject to agreement between the parties) based on economic rationale. Previously, residents had to complete import transactions within 90 calendar days of advance payment. Delivery later than 90 days after payment required National Bank of the Republic of Belarus approval supported by a recommendation of the agency overseeing the importer (that is, local bodies of the Republic of Belarus Council of Ministers, regional or local executive committees).

National Bank of the Republic of Belarus (NBRB) permission is no longer required for payments for imports of goods and services.
Import licenses and other non tariff measures

06/29/2021

In accordance with Council of Ministers Resolution No. 291 of May 26, 2021, on Licensing Imports of Finished Hides and Blanks for Shoe Uppers, the following measure was temporarily introduced (through December 29, 2021): imports of finished cowhides and leather blanks for shoe uppers attached to the footbed into the Republic of Belarus from outside the customs territory of the Eurasian Economic Union, on being placed under the customs procedures for release for domestic consumption (with the exception of placement under the customs procedure for release for domestic consumption for the purpose of performing actions under the free customs zone customs procedure), processing within the customs territory and within the territory of a free customs zone, are performed under one-time licenses issued by the Ministry of Antimonopoly Regulation and Trade in coordination with the Belarusian State Enterprise for the Production and Sale of Light Industrial Goods.

12/29/2021

The temporary measure pursuant to Council of Ministers Resolution No. 291 of May 26, 2021, on Licensing Imports of Finished Hides and Blanks for Shoe Uppers, ended.

06/10/2022

Imports from EAEU Member States of tobacco products under HS code EAEU 2404 11 (tobacco sticks) are subject to a licensing requirement for a period of 6 months.

06/10/2022

Exclusive licenses issued by the Ministry of Antimonopoly Regulation and Trade apply to imports from outside the customs territory of the EAEU to the Republic of Belarus of goods placed under customs release for domestic consumption (except for goods placed under customs release for domestic consumption to complete the free customs zone procedures) and free customs zone.

Licenses with quotas

07/10/2021

The FTA between the Eurasian Economic Union (EAEU) and its Member States, on the one hand, and the Republic of Serbia, on the other hand, of October 25, 2019, entered into force. In accordance with Annex 2 to the Agreement, tariff quotas are set for certain types of goods imported from the Republic of Serbia into the customs territory of the Union in the following amounts: 400 metric tons per year for certain types of cheeses (codes 0406 90 690 0, 0406 90 740 0, 0406 90 860 0, 0406 90 890 0, 0406 90 920 0, 0406 90 930 0, 0406 90 990 1, and 0406 90 990 9 of the EAEU Foreign Economic Activity Commodity Nomenclature); 35,000 liters of pure alcohol (100%) per year for liquors obtained as a result of the distillation of grape wine and grape extracts (codes 2208 20 290 0, 2208 20 890 0 of the EAEU Foreign Economic Activity Commodity Nomenclature); and 2,000,000,000 units per year for cigarettes containing tobacco (codes 2402 20 100 0, 2402 20 900 0 of the EAEU Foreign Economic Activity Commodity Nomenclature).

Exports and Export Proceeds

Repatriation requirements

07/09/2021

The period of repatriation is set by the resident based on the conditions and actual terms of fulfillment of obligations by the parties to a foreign currency agreement for exports, in a manner set forth in the Instruction on Conducting Foreign Exchange Operations, approved by Resolution No. 147 of the Board of the National Bank of the Republic of Belarus of May 31, 2021. Previously, residents had to complete their foreign trade transactions under export contracts no
later than 180 calendar days from date of shipment (transfer of protected information or exclusive rights to intellectual property), completion of work, or provision of services. Extensions beyond 180 days required NBRB permission.

03/23/2022
Until September 22, 2022, pursuant to Resolution No. 125 of the Council of Ministers of the Republic of Belarus of March 11, 2022, “On the introduction of a temporary ban on the export of certain types of goods,” exports from the Republic of Belarus of grain and cereals, seeds, meal and cake, products used as animal feed are banned for a period of 6 months. The measure also applies to exports to EAEU member states.

03/23/2022
Until September 22, 2022, pursuant to Resolution No. 147 of the Council of Ministers of the Republic of Belarus of March 19, 2022, “On the introduction of a ban on the export of certain types of industrial goods,” exports of certain industrial goods (over 250 items) are temporarily banned for a period of 6 months. The measure also applies to exports to EAEU member states.

04/04/2022
Until October 1, 2022, pursuant to Resolution No. 195 of the Council of Ministers of the Republic of Belarus of March 31, 2022, “On Non-Tariff Regulation Measures,” exports of soybean meal and rapeseed or kolza seeds, cake, fish feed, products used for the preparation of feed are subject to a licensing requirement for a period of 6 months. Exports of the following goods are subject to One-time licenses issued by the Ministry of Antimonopoly Regulation and Trade in coordination with the Ministry of Agriculture and Food apply for exports (1) outside the territory of the Republic of Belarus to the EAEU Member States, and (2) outside the customs territory of the EAEU in the Republic of Belarus to non-EAEU member states of goods placed under customs procedures for export, temporary export, processing outside the customs territory and reexport.

07/08/2022
Until October 7, 2022, pursuant to Resolution No. 446 of the Council of Ministers of the Republic of Belarus of July 6, 2022, “On the introduction of a temporary ban on the export of certain types of goods,” exports from the Republic of Belarus of coarse buckwheat cereals, hulled buckwheat grain, ready-made buckwheat products, soft wheat flour and spelt are temporarily banned for a period of 3 months. The measure also applies to exports to EAEU member states.

07/21/2022
Until January 21, 2023, pursuant to Resolution No. 470 of the Council of Ministers of the Republic of Belarus of July 19, 2022, “On Licensing of Export of Flax Fiber,” export of flax fiber is subject to a licensing requirement for a period of 6 months. Export from the Republic of Belarus of flax fiber originating from the territory of the Republic of Belarus, placed under the customs export procedure, is subject to one-time licenses issued by the Ministry of Antimonopoly Regulation and Trade in coordination with the concern “Bellegprom.”

08/18/2022
Until February 17, 2023, pursuant to Resolution No. 528 of the Council of Ministers of the Republic of Belarus of August 15, 2022, “On the Introduction of Licensing for Exports of White Crystalline Sugar,” exports of white crystalline sugar are subject to a licensing requirement for a period of 6 months. One-time licenses issued by the Ministry of Antimonopoly Regulation and Trade in coordination with the Concern “Belgospischeprom” apply to exports (1) outside the territory of the Republic of Belarus to the EAEU Member States, and (2) outside the customs territory of the EAEU in the Republic of Belarus to non-EAEU member states of goods regardless of their country of origin, placed under customs procedures for export, temporary export, processing outside the customs territory and reexport.

01/29/2022
A zero-export quota was established for certain types of timber (codes 4401, 4403 and 4407 of the EAEU HS) for the Eurasian
Economic Union member states.

### Payments for Invisible Transactions and Current Transfers

**Controls on these transfers**

**Trade-related payments**

| Indicative limits/bona fide test | 07/09/2021 | National Bank of the Republic of Belarus permission is no longer required for payment for imports with delivery outside Belarus to verify the bona fides of the transaction. |

### Proceeds from Invisible Transactions and Current Transfers

**Repatriation requirements**

| 07/09/2021 | The period of repatriation is set by the resident based on the conditions and actual terms of fulfillment of obligations by the parties to a foreign currency agreement for exports, in a manner set forth in the Instruction on Conducting Foreign Exchange Operations, approved by Resolution No. 147 of the Board of the National Bank of the Republic of Belarus (NBRB) of May 31, 2021. Previously, residents had to complete their foreign trade transactions under export contracts no later than 180 calendar days from date of shipment (transfer of protected information or exclusive rights to intellectual property), completion of work, or provision of services. Extensions beyond 180 days required NBRB permission. |

### Capital Transactions

**Controls on capital transactions**

| 07/09/2021 | Pursuant to Instruction No. 37 of February 12, 2021, “On registration of foreign currency contracts by residents,” foreign currency contracts signed between a resident and a nonresident are subject to registration when conducting foreign currency transactions defined therein, if the amount of monetary obligations under the foreign currency contract is not specified or is equal to or exceeds the equivalent of 2,000 base values (for resident individuals) or 4,000 base values (for resident legal entities and individual proprietors) as of the date the contract is signed. Previously, resident individuals were required to obtain National Bank of the Republic of Belarus approval for certain capital transactions and legal entities were subject to registration regardless of the amount. |

| Controls on capital and money market instruments | 07/09/2021 | Pursuant to Instruction No. 37 of February 12, 2021, “On registration of foreign currency contracts by residents,” foreign currency contracts signed between a resident and a nonresident are subject to registration when residents buy securities issued by a nonresident, if the amount of monetary obligations under the foreign currency contract is not specified or is equal to or exceeds the equivalent of 2,000 base values (for resident individuals) or 4,000 base values (for resident legal entities and individual proprietors) as of the date the contract is signed. Previously, resident individuals were required to obtain National Bank of the Republic of Belarus approval and legal entities were subject to registration regardless of the amount. |

### On capital market securities

**Shares or other securities of a participating nature**

| Sale or issue locally by nonresidents | 07/09/2021 | Pursuant to Instruction No. 37 of February 12, 2021, “On registration of foreign currency contracts by residents,” foreign currency contracts signed between a resident and a nonresident are subject to registration when residents buy securities issued by a nonresident, if the amount of monetary obligations under the foreign currency contract is not specified or is equal to or exceeds the equivalent of 2,000 base values (for resident individuals) or 4,000 base values (for resident legal entities and individual proprietors) as of the date the contract is signed. Previously, resident individuals were required to obtain National Bank of the Republic of Belarus approval and legal entities were subject to registration regardless of the amount. |

**Purchase abroad by residents**

| 07/09/2021 | Pursuant to Instruction No. 37 of February 12, 2021, “On registration of foreign currency contracts by residents,” foreign currency contracts signed between a resident and a nonresident are subject to registration when residents buy securities issued by a nonresident, if the amount of monetary obligations under the foreign currency contract is not specified or is equal to or exceeds the equivalent of 2,000 base values (for resident individuals) or 4,000 base values (for resident legal entities and individual proprietors) as of the date the contract is signed. Previously, resident individuals were required to obtain National Bank of the Republic of Belarus approval and legal entities were subject to registration regardless of the amount. |
Bonds or other debt securities

Sale or issue locally by nonresidents 07/09/2021

Previously, resident individuals were required to obtain National Bank of the Republic of Belarus approval and legal entities were subject to registration regardless of the amount.
Purchase abroad by residents  07/09/2021

Pursuant to Instruction No. 37 of February 12, 2021, “On registration of foreign currency contracts by residents,” foreign currency contracts signed between a resident and a nonresident are subject to registration when residents buy securities issued by a nonresident, if the amount of monetary obligations under the foreign currency contract is not specified or is equal to or exceeds the equivalent of 2,000 base values (for resident individuals) or 4,000 base values (for resident legal entities and individual proprietors) as of the date the contract is signed. Previously, resident individuals were required to obtain National Bank of the Republic of Belarus approval and legal entities were subject to registration regardless of the amount.

Controls on credit operations

Commercial credits

By residents to nonresidents  07/09/2021

Pursuant to Instruction No. 37 of February 12, 2021, “On registration of foreign currency contracts by residents,” resident legal entities must register a foreign currency contract for export, if the amount of monetary obligations under the foreign currency contract is not determined or is equal to or exceeds the equivalent of 4,000 base values on the date foreign currency contract is signed. Previously, National Bank of the Republic of Belarus (NBRB) permission was required for the deferral of receipt of proceeds from exports of goods (as well as work and services) more than 180 days; NBRB permission was required for deferral of more than 90 days of receipt of imports of goods (as well as work and services) that have been paid for.

To residents from nonresidents  07/09/2021

Pursuant to Instruction No. 37 of February 12, 2021, “On registration of foreign currency contracts by residents,” resident legal entities must register a foreign currency contract for export, if the amount of monetary obligations under the foreign currency contract is not determined or is equal to or exceeds the equivalent of 4,000 base values (for resident individuals) or 4,000 base values (for resident legal entities and individual proprietors) as of the date the contract is signed. Previously, resident individuals were required to obtain National Bank of the Republic of Belarus approval and legal entities were subject to registration regardless of the amount.
Financial credits

By residents to nonresidents

07/09/2021

Pursuant to Instruction No. 37 of February 12, 2021, “On registration of foreign currency contracts by residents,” resident individuals and legal entities must register the foreign currency contract for the provision of a loan to a nonresident if the amount of monetary obligations under the foreign currency contract is not specified or is equal to or exceeds the equivalent of 4,000 base values (for resident legal entities and individual entrepreneurs) on the date the foreign currency contract is signed. Previously, banks, nonbank lending institutions, and resident legal entities were not required to have National Bank of the Republic of Belarus approval. Resident banks and legal entities neither needed notification nor registration of such transactions.

To residents from nonresidents

07/09/2021

Pursuant to Instruction No. 37 of February 12, 2021, “On registration of foreign currency contracts by residents,” resident individuals and legal entities must register the foreign currency contract for the provision of a loan to a nonresident if the amount of monetary obligations under the foreign currency contract is not specified or is equal to or exceeds the equivalent of 2,000 base values (for resident individuals) on the date the foreign currency contract is signed. Previously, resident individuals were required to have National Bank of the Republic of Belarus approval for granting financial loans to nonresidents for a period exceeding 180 days.

Guarantees, sureties, and financial backup facilities

By residents to nonresidents

07/09/2021

Pursuant to Instruction No. 37 of February 12, 2021, “On registration of foreign currency contracts by residents,” foreign currency contracts signed between a resident and a nonresident are subject to registration when residents buy securities issued by a nonresident if the amount of monetary obligations under the foreign currency contract is not specified or is equal to or exceeds the equivalent of 2,000 base values (for resident individuals) or 4,000 base values (for resident legal entities and individual entrepreneurs) as of the date the contract is signed. Previously, resident banks and resident legal entities and individuals were not required to have National Bank of the Republic of Belarus approval. Resident legal entities attracted credit (loans) from nonresidents through a registration procedure.

Controls on direct investment

Outward direct investment

07/09/2021

Pursuant to Instruction No. 37 of February 12, 2021, “On registration of foreign currency contracts by residents,” resident individuals and legal entities must register the foreign currency contract envisaging a contribution to the nonresident’s authorized fund if the amount of monetary obligations under the foreign currency contract is not specified or is equal to or exceeds the equivalent of 2,000 base values on the date foreign currency contract is signed.
Controls on real estate transactions

*Purchase abroad by residents* 07/09/2021
Pursuant to Instruction No. 37 of February 12, 2021, “On registration of foreign currency contracts by residents,” resident individuals and legal entities must register the foreign currency contract for purchase of real estate abroad if the amount of monetary obligations under the foreign currency contract is not specified or is equal to or exceeds the equivalent of 2,000 base values (for resident individuals) and 4,000 base values (for resident legal entities and individual entrepreneurs) on the date the foreign currency contract is signed. Previously, resident individuals were required to obtain National Bank of the Republic of Belarus approval and legal entities were subject to registration regardless of the amount.

*Purchase locally by nonresidents* 07/09/2021
Pursuant to Instruction No. 37 of February 12, 2021, “On registration of foreign currency contracts by residents,” resident individuals and legal entities must register the foreign currency contract for the sale of real estate property located in the RB to a nonresident if the amount of monetary obligations under the foreign currency contract is not specified or is equal to or exceeds the equivalent of 2,000 base values (for resident individuals) and 4,000 base values (for resident legal entities and individual entrepreneurs) on the date the foreign currency contract is signed. Previously, resident legal entities had to notify banks when receiving funds from nonresidents for sales of real estate.

Controls on personal capital transactions

*Loans* 07/09/2021
Pursuant to Instruction No. 37 of February 12, 2021, “On registration of foreign currency contracts by residents,” resident individuals must register the foreign currency contract for an extension of a loan to a nonresident, if the amount of monetary obligations under the foreign currency contract is not specified or is equal to or exceeds the equivalent of 2,000 base values on the date foreign currency contract is signed. Previously, National Bank of the Republic of Belarus permission was required for terms of over 180 days.

*To residents from nonresidents* 07/09/2021
Pursuant to Instruction No. 37 of February 12, 2021, “On registration of foreign currency contracts by residents,” resident individuals must register the foreign currency contract for borrowing of a loan from a nonresident, if the amount of monetary obligations under the foreign currency contract is not specified or is equal to or exceeds the equivalent of 2,000 base values on the date foreign currency contract is signed.

*Gifts, endowments, inheritances, and legacies* 07/09/2021
Pursuant to Instruction No. 37 of February 12, 2021, “On registration of foreign currency contracts by residents,” resident individuals must register the foreign currency contract for a donation (endowment) in favor of a nonresident, if the amount of monetary obligations under the foreign currency contract is not specified or is equal to or exceeds the equivalent of 2,000 base values on the date foreign currency contract is signed.

**Provisions Specific to the Financial Sector**

Provisions specific to commercial banks and other
The nominal value of bonds which, under the terms of the prospectus, are placed in the territory of the Republic of Belarus, with the exception of government bonds and National Bank of the Republic of Belarus bonds, must be denominated in the official unit of currency of the Republic of Belarus.

Pursuant to National Bank of the Republic of Belarus Executive Board Resolution No. 298 of September 18, 2020, on Certain Issues in the Regulation of the Activities of Banks, Nonbank Lending and Financial Institutions, and the Republic of Belarus Development Bank Open Joint-Stock Company in 2021, the right to apply an LCR of 80% was extended to June 30, 2021.

The measure allowing banks classified as Group 1 systemically important banks to include an irrevocable line of credit opened by the National Bank as Level 1 highly liquid assets when calculating compliance with the LCR ended on December 31, 2020, and is no longer in force.

The required LCR was increased to 90%.

The required LCR was reduced to 80%.

Until year-end, banks in the Group 1 systemically important banks may include an irrevocable credit line opened by the National Bank as part of highly liquid assets for the LCR calculation.

<tr>
<td>Exchange rate structure</td>
<td>Unitary</td>
</tr>
</tbody>
</table>
The exchange rate arrangement of the euro area is free floating. Belgium participates in a currency union (EMU) with 18 other members of the EU and has no separate legal tender. The ECB publishes information regarding its interventions; it last intervened in March 2011. When it intervenes, the ECB intervenes at the quotes of the market makers.

The ECB publishes reference rates based on the daily concertation procedure between CBs within and outside the European System of Central Banks, which normally takes place at 2:15 p.m. Central European Time. On July 1, 2016, the ECB changed the publication time of the euro foreign exchange reference rates (ECB reference rates) from around 2:30 p.m. Central European Time to around 4:00 p.m. Central European Time. The reference rates against the euro are the average of the buying and selling rates. The publication regime aims to reinforce the distinction between exchange rate fixings used as benchmarks for transaction purposes and the ECB reference rates that are published for information purposes only.
To maintain price stability is the primary objective of the Eurosystem and of the single monetary policy for which it is responsible. This is stated in the Treaty on the Functioning of the European Union, Article 127(1). “Without prejudice to the objective of price stability,” the Eurosystem will also “support the general economic policies in the Community with a view to contributing to the achievement of the objectives of the Community.” These include a “high level of employment” and “sustainable and non-inflationary growth.” Effective July 7, 2021, price stability is defined as a symmetric 2% inflation target over the medium term. (Previously, it was defined as inflation rate below but close to 2% over the medium term.)

Controls on trade in gold (coins and/or bullion)
On domestic ownership and/or trade
On external trade
Controls on exports and imports of banknotes

In accordance with Regulation (EU) No. 2018/1672, cash controls have been implemented based on a mandatory declaration system for...
amounts of cash entering or leaving the EU with a value of €10,000 or more. Travelers entering or leaving the EU and carrying more than €10,000 are required to make a declaration to the relevant authorities of the member country through which they enter or leave the EU. The authorities must keep a record of such information and report it to their national financial intelligence unit. The obligation to declare is not fulfilled if the traveler makes no declaration or if the information provided is incorrect or incomplete. To check compliance with the regulation, the national authorities have the right to search natural persons, their baggage, and their means of transportation. In the event of failure to comply with the declaration obligation or suspicions of money laundering/terrorism financing, cash may be confiscated or retained administratively for a period of time between 30 and 90 days. The EC regulation requires member countries to impose effective, dissuasive, and proportionate penalties for failure to comply with the declaration obligation. If there are indications that cash is related to illegal activity, authorities of one member country may exchange information with authorities in other member countries. Under the framework of existing agreements on mutual administrative assistance, information obtained under the EC regulation may also be communicated to a third country in compliance with relevant national and EU provisions on the transfer of personal data to third countries. A similar mandatory declaration system exists when cash with a value of €10,000 or more is entering or leaving the EU non-accompanied. The EC regulation does not apply to physical cross-border transportation from one EU member country to another (that is, intra-EU transportation). Such transportation is not considered “cross-border” for the purposes of the EC regulation; the EC regulation only harmonizes the system for the EU’s external borders. However, the Royal Decree of January 26, 2014, implemented an obligation to declare physical cross-border transportation of cash from one EU member country to another at the request of an appropriate authority (mainly the Customs and Excise Administration).

  - Approval required: No.
  - Held abroad: Yes. Controls apply to deposits held with financial institutions not supervised by the authorities of an EU country if these deposits are to form part of the cover of the technical reserves of an insurance company or of the assets representative of the liabilities of a private pension fund. Movable assets outside the EEA are also acceptable, provided the National Bank of Belgium or a credit institution or
investment firm governed by the law of a member country and authorized as a depository attests that it holds these covering assets for the account of the insurance company or private pension fund, through an establishment within the EEA, at a credit institution or investment firm outside the EEA whose authorization the FSMA deems equivalent to its own.

| Approval required | No. |
| Accounts in domestic currency held abroad | Yes. |
| Accounts in domestic currency convertible into foreign currency | Yes. |

**Nonresident Accounts**

| Foreign exchange accounts permitted | Yes. |
| Approval required | No. |
| Domestic currency accounts | Yes. |
| Convertible into foreign currency | Yes. |
| Approval required | No. |
| Blocked accounts | Yes. |

Some accounts are blocked, by way of implementation of restrictive measures imposed for security reasons. The accounts held by certain entities and persons of Belarus, the Democratic Republic of the Congo, Libya, Syria, Russia, certain persons and entities associated with ISIL (Da’esh) and Al-Qaeda, and certain other persons, groups, and entities, with a view to combating terrorism are blocked.

Effective October 28, 2021, the accounts held by certain entities and persons of Belarus were blocked.

Effective April 5, 2021, the restrictions on Central African Republic entities have been removed, which were blocked since August 20, 2015.

**Imports and Import Payments**

| Foreign exchange budget | No. |
| Financing requirements for imports | No. |
| Minimum financing requirements | No. |
| Advance payment requirements | No. |
| Advance import deposits | No. |
| Documentation requirements for release of foreign exchange for imports | No. |
| Domiciliation requirements | No. |
| Preshipment inspection | No. |
| Letters of credit | No. |
| Import licenses used as exchange licenses | No. |
| Other | No. |
| Import licenses and other nontariff measures | Yes. |
| Positive list | No. |
| Negative list | Yes. Individual licenses are required for certain imports from some non-EU countries, including many textiles and weapons. All other products are free of license requirements. The prior surveillance system without quantitative restrictions of imports of certain iron and steel products originating in certain third countries ended. Effective March 1, 2022, the requirement for licenses of diamonds import was eliminated. |
| Open general licenses | No. |
| Licenses with quotas | Yes. The EU has a system of licenses for the import of agricultural products originating in third countries, notably for the administration of the relevant WTO tariff rate quotas. These import licenses allow the EU authorities to monitor trade flows and administer import tariff rate quotas. |
| Other nontariff measures | No. |
| Import taxes and/or tariffs | Yes. Belgium applies the Common Import Regime of the EU to imports of most agricultural and livestock products from non-EU countries. |
| Taxes collected through the exchange system | No. |
| State import monopoly | No. |

**Exports and Export Proceeds**

| Repatriation requirements | No. |
| Surrender requirements | No. |
| Surrender to the central bank | No. |
| Surrender to authorized dealers | No. |
| Financing requirements | No. |
| Documentation requirements | No. |
| Letters of credit | No. |
| Guarantees | No. |
| Domiciliation | No. |
| Preshipment inspection | No. |
| Other | No. |
| Export licenses | Yes. Export licenses are required for only a few products (mostly of a strategic nature), and for weapons. Effective March 1, 2022, the licenses requirement for the export of diamonds was eliminated. |

Effective January 31, 2021, export authorizations were required for the export of COVID-19 vaccines for a period of six weeks, which was extended effective March 13, 2021, until December 31, 2021.
Pursuant to Commission Implementing Regulation (EU) 2021/1071 of June 29, 2021, effective July 1, 2021, the authorization period was shortened until September 30, 2021. Effective October 1, 2021, the requirement for export authorization for the export of COVID-19 vaccines expired.

<td>Insurance or reinsurance companies must invest all their assets in accordance with the “prudent person” principle as described in the law (Article 190).</td>
</tr>
<tr>
<td>Limits (max.) on securities issued by nonresidents</td>
<td>Yes</td>
<td>Insurance or reinsurance companies governed by the Belgian law: There is no limit anymore because of the application of the prudent person principle. Insurance or reinsurance companies must invest all their assets in accordance with the “prudent person” principle as described in the law (Article 190). According to Article 191 of the Law of March 13, 2016, on the legal status and supervision of insurance or reinsurance companies “With respect to the whole portfolio of assets, insurance or reinsurance companies must only invest in assets and instruments the risks of which the company concerned can properly identify, measure, monitor, manage, control and report, and appropriately take into account in the assessment of its overall solvency needs in accordance with Article 91, § 1, second paragraph, 1. All assets, in particular those covering the minimum capital requirement and the solvency capital requirement, must be invested in such a manner as to ensure the security, quality, liquidity, and profitability of the portfolio as a whole. In addition, the localization of those assets must be such as to ensure their availability. Assets held to cover the technical provisions must also be invested in a manner appropriate to the nature and duration of the insurance and reinsurance obligations. Those assets must be invested in the best interest of all policyholders and beneficiaries taking into account any disclosed policy objective. In the case of a conflict of interest, insurance companies, or the entity which manages their asset portfolio, must ensure that the investment is made in the best interest of policyholders and beneficiaries.” This law will not be applicable to insurance or reinsurance companies governed by the law of another member state, which will be supervised by the home country. Insurance or reinsurance companies governed by the law of a third country: The same rules as for companies governed by the Belgian law are applicable (prudent person principle).</td>
</tr>
<tr>
<td>Limits (max.) on investment portfolio held abroad</td>
<td>Yes</td>
<td>For insurance or reinsurance companies governed by the Belgian law, the assets of the insurance and reinsurance companies can be localized in any country (in or outside the EEA). Nevertheless, investment in assets of countries outside the EEA and covering insurance (not reinsurance) risks situated inside this Area are subject to some conditions (Article 197 of Law of March 13, 2016) to ensure the effectiveness of the recovery and resolution measures against companies in difficulties (the limit of the power to dispose of assets). This law will not apply to insurance or reinsurance companies governed by the law of another member state, which will be supervised by the home country. For insurance or reinsurance companies governed by the law of a third country (provisions of the Law of March 13, 2016, are applicable at the Belgian branch), assets covering the technical provisions of insurance liabilities must be, in principle, localized inside the EEA. These assets can be localized outside the EEA if the law applicable to the winding-up procedures gives a similar protection to the policyholders as the Belgian law.</td>

assets/liabilities composition

Pension funds Yes.

Limits (max.) on securities issued by nonresidents Yes.

The technical provisions of pension funds must be covered at all times by sufficient and appropriate assets belonging to the IORP and allocated in a way that guarantees fulfillment of the obligations of the pension schemes they manage and application of the relevant legal and regulatory provisions for each fund.

The actual legislation for Belgian IORP contains no quantitative restrictions in this respect. Assets must be invested according to the principle of prudence and the following rules (control a posteriori):

1. The assets must be invested in the best interest of members and beneficiaries. If there is potential conflict of interest, the institution, or its portfolio manager, must ensure that the investment is made in the sole interest of members and beneficiaries.

   IORP can take into account the potential long-term impact of investment decisions on environmental, social, and governance factors.

2. The assets must be invested in such a manner as to ensure the security, quality, liquidity, and profitability of the portfolio as a whole.

3. The assets must be invested predominantly in regulated markets. Assets not traded in a regulated financial market must be kept to a prudent level.

4. Investments in derivative instruments are permitted insofar as they reduce investment risk or facilitate efficient portfolio management. They must be valued prudently, taking into account the underlying asset, and included in the valuation of the institution’s assets. The institution must avoid excessive risk exposure to a single counterparty and to other derivative operations.

5. The assets must be diversified in such a way as to avoid excessive reliance on any particular asset, issuer, or group of companies and accumulation of risk in the portfolio as a whole. Investments issued by the same issuer or by issuers of the same group must not expose the institution to excessive risk concentration.

6. Investments in, as well as loans granted to, and claims on the sponsoring company may not exceed 5% of the entire portfolio, and, if the sponsoring company belongs to a group, investment in, as well as loans granted to, and claims on companies of the same group as the sponsoring company may not exceed 10% of the portfolio. If the institution is sponsored by more than one company, investment in, as well as loans granted to, and claims on these companies must be made prudently, taking into account proper diversification.

   Derivative instruments that imply delivery are authorized only if at least one of the following conditions is met:

   1. The institution for occupational retirement provision holds the underlying assets as covering assets.

   2. The risks inherent in the highly liquid underlying assets are adequately covered by other liquid assets, provided the latter can be allocated to acquisition of underlying assets to be delivered, and provided the additional risk of this type of operation is adequately measured and managed.

   3. A clearing institution is involved that offers an adequate guarantee of the success of the operation, the derivative positions are evaluated daily at market value, and margin calls are issued at least once a day.

To apply the first paragraph, second point (of Article 28 of the Royal
Decree of January 12, 2007), a hedging instrument is considered liquid if, during a period of at least seven bank working days, it can be converted to cash at a price very close to the actual valuation of the instrument. The amount in cash must be at the disposal of the IORP at maturity or at the exercise date of the derivative. Financial instruments that are not traded in a regulated market may not serve as cover unless they are realizable within a reasonable time. This condition (of Article 29 of the Royal Decree of January 12, 2007) may be waived for credit institutions, insurance companies, and investment firms whose registered office is in an EU Member State – with FSMA approval.

Pension fund assets must be located within the EEA. By way of derogation from the first paragraph, movable cover assets outside the EEA are also accepted, provided the National Bank of Belgium or a credit institution or investment firm governed by the laws of an EU member and authorized to carry out the activity of depository attests that it holds these assets for the IORP’s account, through an EEA establishment at a credit institution or investment firm outside the EEA whose authorization the FSMA deems equivalent to its own.

### Limits (max.) on investment portfolio held abroad
- Yes.

### Limits (min.) on investment portfolio held locally
- No.

### Currency-matching regulations on assets/liabilities composition
- Yes.

### Investment firms and collective investment funds
- Yes.

### Limits (max.) on securities issued by nonresidents
- No.

### Limits (max.) on investment portfolio held abroad
- No.

### Limits (min.) on investment portfolio held locally
- No.

### Currency-matching regulations on assets/liabilities composition
- Yes.

For pension savings funds in the form of public open-end collective investment funds, up to 20% of the assets of such funds may be denominated in a currency other than euros. However, the assets denominated in a currency other than euros may be fully or partially hedged with financial derivatives for the currency risk, so that the hedged part is not taken into account for the determination of the maximum of 20%.

### Changes during 2021 and 2022

#### Exchange Measures

#### Exchange Arrangement

- Price stability is defined as a symmetric 2% inflation target over the medium term. (Previously, it was defined as inflation rate below but close to 2% over the medium term.)
Nonresident Accounts

Blocked accounts

04/05/2021  The restrictions on Central African Republic entities have been removed, which were blocked since August 20, 2015.

10/28/2021  The accounts held by certain entities and persons of Belarus were blocked.

Imports and Import Payments

Import licenses and other nontariff measures

03/01/2022  The requirement for licenses of diamonds import was eliminated.

Exports and Export Proceeds

Export licenses

01/31/2021  Export authorizations were required for the export of COVID-19 vaccines for a period of six weeks.

03/13/2021  The requirement for export authorization for the export of COVID-19 vaccines was extended until December 31, 2021.

07/01/2021  The requirement for export authorization for the export of COVID-19 vaccines was set to be in force until September 30, 2021, amending the previous end date of December 31, 2021.

10/01/2021  The requirement for export authorization for the export of COVID-19 vaccines expired.

03/01/2022  The licenses requirement for the export of diamonds was eliminated.

**Exchange tax**  Yes.  A stamp duty of 1.75% is levied on all conversions from Belize dollars to foreign currency greater than BZ$100 in value unless otherwise exempt via instructions from the MOF.

**Exchange subsidy**  No.

**Foreign exchange market**  Yes.  All transactions in foreign exchange must be conducted through ADs (that is, domestic banks, the accountant general, and the postmaster general). Domestic banks may buy and sell foreign exchange at the official rate in transactions with their clients and interbank transactions. The CBB sets the buying and selling rates as well as the maximum commissions for major currencies.

**Spot exchange market**  Yes.  Four domestic banks, the accountant general, and the postmaster general are licensed to deal in foreign exchange with the public. The CBB grants official licenses. There are also three international banks that operate in Belize. There are no lawfully operating foreign exchange bureaus in Belize. Domestic banks may buy and sell foreign exchange at the official rate in transactions with their clients and interbank transactions. The CBB sets the buying and selling rates as well as the maximum commissions for major currencies.

**Operated by the central bank**  Yes.  The CBB quotes daily rates for the Canadian dollar, pound sterling, euro, US dollar, and a number of currencies of the CARICOM member countries.

**Foreign exchange standing facility**  Yes.  The CBB provides US dollars to ADs and the government at the official rate with a specified commission.

**Allocation**  No.

**Auction**  No.

**Fixing**  No.

**Interbank market**  No.  Banks may trade in Belize dollars among themselves. They do not trade in foreign exchange among themselves. In 2021, there was only one offer or request to borrow on the interbank market among banks.

**Over the counter**  No.

**Brokerage**  No.

**Market making**  No.

**Forward exchange market**  No.

**Official cover of forward operations**  No.

**Arrangements for Payments and Receipts**

**Prescription of currency requirements**  Yes.
Controls on the use of domestic currency Yes.

For current transactions and payments Yes.

For capital transactions Yes.

Transactions in capital and money market instruments Yes.
Transactions in derivatives and other instruments Yes.
Credit operations Yes.

Use of foreign exchange among residents No. Pursuant to Act No. 6 of the 2010 Amendment to the CBB Act, residents who earn foreign exchange may not pay their taxes, utility bills, and other expenses in US dollars. Act No. 16 of the 2010 Amendment to the EPZ Act removed the requirement for EPZs to conduct business in US dollars. Section 21 of the CBB Act 2011 states that to be valid in Belize, all monetary contracts, obligations, or transactions in Belize, whether imposed or authorized by a law or otherwise, are deemed to be expressed and recorded and must be settled or discharged in Belize dollars unless specifically provided otherwise.

Payments arrangements Yes.

Bilateral payments arrangements Yes. A bilateral arrangement aims to eliminate the need to use US dollars or other non-regional currencies for regional transactions. Settlement under the arrangement is done monthly between CBs based on the net amount outstanding.

Operative Yes. There is a bilateral clearing arrangement in effect. Caribbean countries with bilateral clearing arrangements with Belize are Antigua and Barbuda, Barbados, Dominica, Grenada, Guyana, Jamaica, St. Kitts and Nevis, St. Lucia, St. Vincent and the Grenadines, and Trinidad and Tobago. Settlement under the bilateral clearing arrangement is done on a monthly basis between CBs based on the net amount outstanding.

Inoperative No.

Regional arrangements Yes. Belize is a member of CARICOM.

Clearing agreements No.

Barter agreements and open accounts No.

Administration of control Yes. The CBB administers exchange control, which applies to transactions with all countries. Authority over a wide range of operations is delegated to domestic banks in their capacity as ADs. Applications for foreign exchange processed by ADs are regularly forwarded to the CBB for auditing and record keeping. Capital transactions require CBB approval. The Government of Belize, including government ministries and departments, is no longer subject to the Exchange Control Regulations.

Payments arrears No.

Official No.

Private No.

Controls on trade in gold (coins and/or bullion) Yes. Residents may not hold monetary gold, except with CBB.

On domestic ownership and/or trade Yes.
**Belize**

On external trade: Yes. Monetary gold may not be imported or exported without CBB approval.

### Controls on exports and imports of banknotes

On exports: Yes.

- **Domestic currency**: Yes. Travelers may take abroad up to BZ$500 a trip. Larger amounts require CBB approval, which is liberally granted with supporting documentation.
- **Foreign currency**: Yes. The amount of foreign currency resident travelers may take abroad is limited. Nonresidents may take abroad the equivalent of BZ$500 or the amount imported.

On imports: Yes.

- **Domestic currency**: Yes. Each traveler may bring in BZ$500 a trip.
- **Foreign currency**: No. There is no limit on the importation of currency. However, any amount over BZ$10,000 requires a customs declaration.

### Resident Accounts

- **Foreign exchange accounts permitted**: Yes.
  - Held domestically: Yes. Domestic commercial banks may open foreign exchange accounts for residents. The CBB reserves the right to prohibit specific accounts. These accounts are demand accounts utilized solely for the purpose of meeting external obligations, and the Exchange Control Regulations apply to these accounts. Residents are not allowed to maintain foreign exchange accounts in international banks. Amendments in the International Banking Act provide for such exceptions, namely companies that operate in the Commercial Free Zone/Designated Processing Areas (DPAs) and government-owned entities. (See IBA amendment 2017.)
  - **Approval required**: Yes.
  - Held abroad: Yes. Foreign exchange accounts held abroad must be approved by the CBB.
  - **Approval required**: Yes.

- **Accounts in domestic currency held abroad**: No.
- **Accounts in domestic currency convertible into foreign currency**: No.

### Nonresident Accounts

- **Foreign exchange accounts permitted**: No. Only banks licensed under the International Banking Act may maintain foreign exchange accounts for nonresidents.
- **Approval required**: No. Domestic banks are not allowed to maintain foreign exchange accounts with nonresidents, except in rare cases with approval granted by the CBB.
- **Domestic currency accounts**: Yes. Nonresidents may maintain domestic currency accounts with domestic commercial banks. These accounts may be credited with proceeds from the sale of foreign currency.
- **Convertible into foreign currency**: Yes.
- **Approval required**: Yes.
- **Blocked accounts**: Yes. Funds held in such accounts are subject to specific or general
Belize applies the fourth phase of the CARICOM CET. Duties range from 5% to 100%, and a number of items (particularly agricultural inputs) enter duty-free. Imports by most of the public sector and certain nonprofit, imports of an emergency or humanitarian nature, and goods for reexportation are exempt, as are goods originating in the CARICOM area. Some items are subject to revenue-replacement duties ranging from 5% to 50%. An environmental tax of 2% is

Valid invoices and customs documents are required for approval of foreign exchange for imports. As stated in Exchange Control Direction No. 18/2014, all domestic banks must offer foreign currency for sale to a designated importer to cover payments for fuel in an orderly and timely manner. The amount of foreign currency that each bank must provide is the proportion of the fuel bill equivalent to the bank’s share of foreign assets within the banking system. The CBB provides each domestic bank with a notice specifying the minimum amount of foreign currency it must offer for sale to the designated importer to cover monthly fuel payments.

For reasons of health, standardization, and protection of domestic industries, import licenses are required for a number of goods, mostly food and agricultural products and certain household and construction products; such licenses are granted liberally. Licenses are also required for pharmaceuticals and prescription medications from the chief pharmacist and director of health services before importation. Ministry of Agriculture, specifically Belize Agricultural Health Authority (BAHA), sets regulations to protect Belize’s agriculture industry from foreign pests that may be transported through the products.

Belize applies the fourth phase of the CARICOM CET. Duties range from 5% to 100%, and a number of items (particularly agricultural inputs) enter duty-free. Imports by most of the public sector and certain nonprofit, imports of an emergency or humanitarian nature, and goods for reexportation are exempt, as are goods originating in the CARICOM area. Some items are subject to revenue-replacement duties ranging from 5% to 50%. An environmental tax of 2% is...
Taxes collected through the exchange system: No.

State import monopoly: Yes. The Belize Marketing and Development Corporation has an import monopoly on onions, and other vegetables when a shortage exists in the country.

Exports and Export Proceeds

Repatriation requirements: Yes.

Surrender requirements: Yes.

Surrender to the central bank: Yes. The CBB requires the direct surrender of sugar export proceeds.

Surrender to authorized dealers: Yes. Export proceeds must be surrendered to ADs no later than six months after the date of shipment, unless directed otherwise by the CBB.

Financing requirements: No.

Documentation requirements: Yes.

Letters of credit: No.

Guarantees: No.

Domiciliation: No.

Preshipment inspection: No.

Other: Yes. The exporter is required to fill out a form that provides information on the type of goods exported, the quantity, and export value. At the time of exportation, one XCH2 form is to be completed for export shipments valued at more than BZ$10,000. The foreign exchange proceeds from exports must be sold to or deposited with an Authorized Dealer in Belize who will endorse the XCH2 form indicating that payment has been received. The exporter or his agent must then forward the bank-endorsed XCH2 form to the CBB.

Export licenses: Yes.

Without quotas: Yes. Export licenses are required for the exportation of live animals, excluding pets; fish, crustaceans, and mollusks, excluding agricultural species; lumber and logs; beans; citrus fruits; sugar; and wild flora and fauna.

With quotas: No.

Export taxes: Yes.

Collected through the exchange system: No.

Other export taxes: Yes. Transshipments are subject to a 1.5% customs administration fee. Export duty is collected only on waste or scrap metals at BZ$10.00 a ton.

Payments for Invisible Transactions and Current Transfers

Controls on these transfers: Yes.

Trade-related payments: Yes.

Prior approval: Yes. For the payment and transfer of commissions, approval is granted by the CBB, subject to clearance by the commissioner of income tax.
**Quantitative limits**  No.  

**Indicative limits/bona fide test**  Yes.  Transactions for CBB approval must be accompanied by customs entry documentation and relevant invoices. Foreign exchange is provided up to the invoiced limit.  

**Investment-related payments**  Yes.  

**Prior approval**  Yes.  Interest payments are subject to CBB approval and clearance by the CIT; these require a copy of the loan agreement and amortization schedule and proof of the loan disbursement. For transfers of profits and dividends, an income statement and a declaration of dividends must be presented along with clearance by the CIT.  

**Quantitative limits**  No.  

**Indicative limits/bona fide test**  Yes.  Transactions for CBB approval must be accompanied by documents from a reputable firm and of a recent date. Limits are based on amounts stated in the document submitted. A system of calculations and cross-checks is used to verify principal payments on loans. Payments are directed to the firms or names indicated in the documents.  

**Payments for travel**  Yes.  

**Prior approval**  No.  The following limits are in effect for ADs for (1) nonbusiness travel by residents, the equivalent of BZ$6,000 a person a trip; (2) business travel by residents, BZ$500 a person a day; (3) medical travel, BZ$6,000 a person a trip; and (4) business or nonbusiness travel by nonresidents, BZ$500 a person a trip, unless payment is made from an external account or with foreign currency proceeds. Travel amounts in excess of these limits should be directed to the CBB for approval. Resident travelers must sell their excess holdings of foreign currency to an AD on returning to Belize. The CBB reserves the right to waive these limits.  

**Indicative limits/bona fide test**  Yes.  Documentation required to obtain foreign currency includes a valid passport, visa, and plane ticket where applicable. Requests for larger amounts should include a letter from the company to support foreign exchange purchases for business travel and a letter or invoices from a doctor to support purchases for medical travel.  

**Personal payments**  Yes.  For the transfer of pensions and payments for family maintenance and alimony, CBB approval is required. CIT clearance is not required for family maintenance.  

**Quantitative limits**  Yes.  ADs may approve up to BZ$1,000 a person a year or its equivalent for gifts.  

**Indicative limits/bona fide test**  Yes.  ADs provide foreign exchange up to the invoiced amount for correspondence course tuition with proper documentation. Payments related to medical costs can be made directly to the doctor, hospital, or applicant with original invoices or bills.  

**Foreign workers’ wages**  Yes.  

**Prior approval**  Yes.  Approval for remittance of wages is granted by the CBB.  

**Quantitative limits**  No.  

**Indicative limits/bona fide test**  Yes.  A letter is required from the employer showing proof of income.
Credit card use abroad | Yes. Credit card purchases in Belize must be settled in Belize dollars (Direction No. 4/2014).
---|---
Prior approval | No.
Quantitative limits | Yes. Limits are set by the domestic bank that issued the credit card.
Indicative limits/bona fide test | No.
Other payments | Yes.
Prior approval | Yes. For the transfer of consulting and legal fees, approval is granted by the CBB, subject to clearance by the CIT.
Quantitative limits | No.
Indicative limits/bona fide test | Yes. Similar requirements apply for subscriptions and membership fees for study abroad or any other professional organization.

### Proceeds from Invisible Transactions and Current Transfers

| Repatriation requirements | Yes. All proceeds from invisible transactions must be repatriated and surrendered to an AD. There is no specified timeframe for surrender and repatriation requirements, and proceeds are expected to be surrendered and repatriated without delay. |
| Surrender requirements | Yes. |
| Surrender to the central bank | No. |

**Provisions Specific to the Financial Sector**

| Provisions specific to commercial banks and other credit institutions | Yes. | Domestic banks and credit unions are regulated and supervised by the CBB. |
Borrowing abroad

Yes.

All residents, except for domestic banks and international banks, require the specific permission of the CBB to borrow from a nonresident. Only domestic banks are free of any requirements or regulations to borrow from abroad, subject to such directions by the CBB that would restrict them from doing so. Because other credit institutions are not ADs, they require specific permission to do so.

Maintenance of accounts abroad

Yes.

All residents, except for domestic banks and international banks, require the permission of the CB to maintain an account abroad. Only commercial banks are free from any requirements or regulations to hold accounts abroad, subject to such directions by the CB that would restrict them from doing so. Because other credit institutions are not ADs, they require specific permission to do so.

Lending to nonresidents (financial or commercial credits)

Yes.

Direction No. 12 specifies that residents require the specific permission of the CBB for a nonresident to borrow from a resident, including domestic commercial banks. International banks are licensed to carry out international banking business with nonresidents.

Lending locally in foreign exchange

Yes.

Written CBB permission is required. Domestic commercial banks in Belize may not, without the prior approval of the CBB, lend in foreign currency to residents of Belize for any purpose, regardless of the amount. International banks are permitted to lend in foreign exchange to a Designated Processing Developer or Business, Commercial Free Zone Developer or Business, and entities wholly owned or majority controlled by the Government of Belize and Social Security Board.

Purchase of locally issued securities denominated in foreign exchange

Yes.

Domestic banks may invest foreign assets in sovereign and/or commercial securities subject to CBB approval.

Differential treatment of deposit accounts in foreign exchange

No.

Reserve requirements

No.

Liquid asset requirements

No.

Interest rate controls

No.

Credit controls

No.

Differential treatment of deposit accounts held by nonresidents

Yes.

Nonresidents are required to use offshore banks. Nonresidents need prior approval from the CBB to open an account at a domestic bank.

Reserve requirements

No.

Liquid asset requirements

Yes.

The liquid asset requirement is 24% for nonresidents’ deposits (and in rare cases, residents) at international banks. For domestic banks, the liquid asset requirement is 21% on both residents’ and nonresidents’ deposits in both domestic and foreign currency.

#### Changes during 2021 and 2022

No significant changes occurred in the exchange and trade system.
BENIN

(Position as of June 30, 2022)

Status under IMF Articles of Agreement

Date of membership

Article VIII
Yes. Date of acceptance: June 1, 1996.

Article XIV

Exchange Measures

Restrictions and/or multiple currency practices
No. 

Exchange measures imposed for security reasons
Yes. No restrictions as reported in the latest IMF staff report as of December 31, 2021.

In accordance with IMF Executive Board Decision No. 144-(52/51)
No.

Other security restrictions
Yes. A regional framework to fight money laundering (AML) and the financing of terrorism (AFT) exists through two WAEMU Directives from 2002 (AML) and 2007 (AFT) as amended. This comprehensive framework facilitates the implementation of UNSC resolutions based on a list of persons and entities prepared by the Committee.

Exchange Arrangement

Currency
Yes. The currency of Benin is the CFA franc (XOF).

Other legal tender
No.

Exchange rate structure

Unitary
Yes.

Dual

Multiple

Classification

No separate legal tender

Currency board

Conventional peg
Yes. The exchange rate arrangement of the WAEMU is a conventional peg. Benin participates in a currency union with seven other members of the WAEMU and has no separate legal tender. A monetary cooperation agreement between the WAEMU member states and France was concluded on December 21, 2019, to replace the agreement dated December 4, 1973. The Monetary Cooperation Agreement is based on three pillars: (1) a common issuing institution, (2) fixed parity with the euro, and (3) a guarantee of unlimited convertibility.

Stabilized arrangement

Crawling peg
### BENIN

#### Crawl-like arrangement

#### Pegged exchange rate within horizontal bands

#### Other managed arrangement

#### Floating

#### Free floating

**Official exchange rate**

Yes. The CFA franc is officially pegged to the euro, the intervention currency, at the fixed rate of CFAF 655.957 per euro. Exchange rates for other currencies are derived from the rates for the currency concerned in the Paris foreign exchange market vis-à-vis the euro. The official rate is used for accounting and valuation purposes. The Conference of Heads of State and Government may decide to amend the Monetary Cooperation Agreement between the WAMU member countries and France.

---

### Monetary policy framework

#### Exchange rate anchor

Yes.

**U.S. dollar**

Yes. The monetary policy framework is an exchange rate anchor vis-à-vis the euro. The operational target of price stability is defined as an annual inflation rate in the WAEMU that falls within a band of ±1% around a central rate of 2%. The Harmonized CPI is the benchmark rate to measure inflation.

**Composite**

**Target with tolerance band**

**Band/Range**

**Target measure**
The commission rate charged by registered intermediaries on transfers outside the WAEMU that are authorized by their clientele is 0.6%. This commission is reversed in full to the National Treasury and is a portion of its tax revenue.

Authorized intermediaries (licensed intermediary banks and licensed exchange dealers) freely set the buying and selling rates for foreign currencies, with the exception of the euro, which must be traded at the official fixed parity of CFAF 655.957 per euro. The commission on foreign exchange transactions may not exceed 2% for the euro. Instruction No. 013-11-2015 of November 10, 2015, on the terms and conditions for conducting rapid money transfers as a subagent within the WAEMU applies.

The entities authorized to conduct nonelectronic foreign currency transactions are authorized intermediary banks and individuals and companies authorized to conduct nonelectronic transactions with the public by decision of the minister of finance. Authorized intermediaries must comply with the provisions in effect on the financial conditions for executing OTC foreign exchange transactions that involve foreign currencies and issue a transaction slip for all transactions with a client. Moreover, to provide satisfactory information to clients, they are required to permanently post at their windows the rates actually charged for the different currencies and post-notification that a transaction slip must be issued for all foreign exchange transactions on presentation of the requestor’s identity document. Exchange bureaus may conduct transactions in foreign currencies (except the euro) with the BCEAO. Entities authorized to perform OTC operations may not make
transfers or payments in foreign currency with other countries or maintain accounts abroad. As of December 31, 2021, Benin had 12 banks and 73 authorized OTC exchange dealers.

Operated by the central bank
Yes.

Foreign exchange standing facility
Yes. The BCEAO exchanges foreign currency for CFA francs at rates published on the international markets, with the exception of the euro, which is traded at the official fixed rate of CFAF 655.957 per euro. The nonelectronic currency exchange windows are open to owners of accounts on the BCEAO books and to the general public. A commission of 0.5% is charged on all transactions with the public (purchases and sales) and on all withdrawals by banks and financial institutions (including euro withdrawals). However, no commission is charged for the following operations: (1) OTC foreign banknote exchanges conducted by state entities, government employees of WAEMU member states on mission abroad, and officials of the CB and their beneficiaries and (2) payments made by banks and financial institutions.

Allocation
No.

Auction
No.

Fixing
No.

Interbank market
Yes. Transactions in CFA francs between authorized intermediaries are allowed. As of December 31, 2021, 12 banks participated in the domestic currency interbank market. There is no regulated foreign currency interbank market in the WAEMU.

Over the counter
Yes.

Brokerage
No.

Market making
No.

Forward exchange market
Yes. Residents of the WAEMU zone are permitted to conduct the following transactions in the foreign exchange derivatives market with authorized intermediary banks established in the WAMU or with foreign banks: outright forward foreign exchange contracts (over the counter), foreign exchange options, foreign exchange swaps, and cross-currency swaps. Transactions in foreign exchange options are limited to the following two types of transactions: options to purchase foreign currency, purchased by residents of the WAEMU zone from an authorized intermediary bank established in the WAMU or from a foreign bank, and options to sell foreign currency, purchased by residents of the WAEMU zone from an authorized intermediary bank established in the WAMU or from a foreign credit institution. Authorized intermediary banks must simultaneously cover the exchange risk they incur with respect to derivative instruments traded with their customers. The underlying commercial and financial operations must relate to imports and exports of goods and services by a resident, foreign borrowing operations by a resident (drawings and repayments), or direct foreign investment in a resident company. All legitimate foreign currency needs are ultimately met by the BCEAO.

Official cover of forward operations
No.
### Arrangements for Payments and Receipts

</tr>
</tbody>
</table>
the committee of governors of the CBs of ECOWAS members and payments for exports from one member country to another member country of finished products originating in countries whose CB or monetary authority is not a WAMA member.

Barter agreements and open accounts No.

Administration of control Yes. On April 1, 2010, the institutional reform of the WAMU and the BCEAO went into effect, with the adoption of the following new basic instruments: (1) the WAMU Treaty, (2) the BCEAO Charter, (3) the Bank Regulation Act, and (4) the Convention governing the WAMU Banking Commission. All WAEMU residents are treated as residents of Benin for the purposes of preparing the external position of banks, domiciliation and repatriation of export revenue, issuance and sales of securities, gold imports and exports, investment and lending transactions, and physical exports of means of payment and securities by postal package or ordinary mail. However, for statistical purposes with regard to the balance of payments, all countries other than Benin are considered foreign countries. Moreover, all transfers with other countries must be made through registered intermediary banks, the postal service, or the BCEAO.

Payments arrears No.

Official No.

Private No.

Controls on trade in gold (coins and/or bullion) Yes.

On domestic ownership and/or trade No.

On external trade Yes. Gold imports and exports require MOF authorization, except (1) imports and exports by the Public Treasury and the BCEAO; (2) imports and exports of items with a low gold content (lined or plated objects); and (3) imports and exports, by travelers, of objects made of gold limited to a total weight of 500 grams. Imports and exports of gold within the WAEMU area are not subject to any restrictions.

Controls on exports and imports of banknotes Yes.

On exports Yes.

Domestic currency Yes. Travelers may freely export CFA franc (XOF) banknotes from one WAEMU member country to another. Resident individuals and legal entities other than the BCEAO and its banking and commercial correspondents outside the WAEMU are prohibited from sending and receiving CFA franc banknotes issued by the BCEAO.

Foreign currency Yes. The reexportation of foreign banknotes by nonresident travelers is permitted up to the equivalent of CFAF 500,000; the reexportation of foreign banknotes above this ceiling requires documentation demonstrating either the importation of the foreign banknotes or their purchase against other means of payment registered in the name of the traveler or through the use of nonresident deposits in local banks. Residents of the WAEMU zone traveling to countries that are not WAEMU members are required to declare foreign currency on their person in excess the equivalent of CFAF 5 million. They are allowed to carry up to the equivalent of CFAF 2 million a person in banknotes not issued by the BCEAO. Larger amounts may be exported in the form of traveler’s checks, prepaid debit and payment cards, conventional debit and payment cards, and other means of payment. Foreign exchange allowances issued by authorized intermediaries in the form of traveler’s checks or prepaid debit and payment cards
must be based on the need to cover customary, personal travel expenses, if they exceed the equivalent of CFAF 2 million a person. The issuance of foreign currency to resident travelers is subject to the presentation of travel documents and a valid passport or national identification card.

### On imports
- **Yes.**

#### Domestic currency
- **Yes.** Resident and nonresident travelers may freely import domestic currency (CFA franc (XOF)). However, resident individuals and legal entities other than the BCEAO and its banking and commercial correspondents outside the WAEMU are prohibited from sending and receiving banknotes in domestic currency (CFA franc (XOF)).

#### Foreign currency
- **No.** Residents of the WAEMU zone and nonresidents of the WAEMU zone may freely import CFA area banknotes denominated in foreign currencies. Such means of payment in excess of or equal to the equivalent of CFAF 5 million must be declared to customs. Nonresident travelers must declare to customs foreign currency exceeding the equivalent of CFAF 5 million on entry and exit.

### Resident Accounts

#### Foreign exchange accounts permitted
- **Yes.**

#### Held domestically
- **Yes.**

#### Approval required
- **Yes.** Foreign exchange accounts in currencies other than the euro may be opened domestically with MOF authorization after non-objection from the BCEAO. The authorization specifies the operations that may be credited or debited on each such an account. These accounts are valid for a renewable term of up to one year. They cannot be credited with deposits of CFA banknotes or by debiting a CFA franc account. On expiration of the term set in the authorization, accounts are closed unless a new authorization is obtained.

#### Held abroad
- **Yes.**

#### Approval required
- **Yes.** Individuals who are residents of the WAEMU and temporarily staying or traveling outside of the WAEMU may open bank accounts outside the WAEMU to deposit foreign currency legally exported and any income acquired outside of the WAEMU during their travel or temporary stay outside of the WAEMU. These individuals are required to repatriate balances on such accounts within 30 days of return to the WAEMU. In any circumstance other than the foregoing, opening of foreign accounts by WAEMU residents is subject to MOF authorization by after non-objection from the BCEAO. The MOF authorization specifies the operations that may be credited or debited on such accounts valid for up to one year. In the event of a failure to obtain a new MOF authorization, the accredited intermediary must request that the account be closed by the end of the term authorized and that any balance be repatriated to a WAEMU member country within eight days.

### Nonresident Accounts

#### Foreign exchange accounts permitted
- **Yes.**

#### Approval required
- **Yes.** Intermediaries authorized in the WAEMU are authorized to open accounts in euros for the benefit of nonresidents, subject to proof of...
their status and actual residence. Nonresident accounts denominated in foreign currency other than euros are subject to BCEAO authorization.

Nonresident foreign currency accounts are valid for a renewable period of two years. In the event of a failure to obtain renewal (through a new BCEAO authorization for foreign exchange other than the euro), these accounts must be closed. The balances of these accounts may be freely transferred abroad after verification.

### Domestic currency accounts
Yes.

### Convertible into foreign currency
Yes. Authorized intermediaries may open nonresident accounts in CFA francs and in euros, under their own responsibility, depending on the status and actual residence of the applicant. These accounts may be debited for spot purchases of foreign exchange.

### Approval required
No.

#### Open general licenses
No.

#### Licenses with quotas
No.

#### Other nontariff measures
No.
Import taxes and/or tariffs: Yes.

The ECOWAS CET entered into force in Benin on January 1, 2015. The CET, amended in accordance with Supplementary Law No. A/SA.1/06/09 of June 22, 2009, to include the additional tariff bracket of 35% called “Category 4: specific goods for economic development,” has five tariff brackets (0%, 5%, 10%, 20%, and 35%). Two additional taxes are planned to protect the budding ECOWAS industrial sector and the other strategic sectors: (1) a temporary adjustment tax on imports for five years intended to offset the reduced tariff protection for community products as a result of CET implementation and (2) a temporary supplementary protection tax for up to two years applicable to products imported from third countries in direct competition with similar products manufactured by an ECOWAS member country. In accordance with the spirit of Resolution No. A/DEC.17/01/06 of January 12, 2006, the adoption of the CET, as amended by Supplementary Law No. A/SA.1/06/09 of June 22, 2009, the previous WAEMU and ECOWAS community levies continue to be imposed for a temporary period of five years. Consequently, for five years, imports from ECOWAS nonmember countries will be subject to a 0.8% community levy, in addition to an ad valorem ECOWAS community levy of 0.5%.

Taxes collected through the exchange system: No.

State import monopoly: No.

Exports and Export Proceeds

Repatriation requirements: Yes.

Resident economic operators must collect and repatriate within 30 days of the payment due date the entire proceeds of sales of goods abroad in the country of origin with the bank with which the transaction is domiciled. The payment due date is specified in the trade agreement and normally falls within a period of 120 days after the goods are dispatched.

Surrender requirements: Yes.

Surrender to the central bank: Yes.

Export proceeds must be surrendered by ADs to the BCEAO within 30 days of the payment due date, which may not exceed 120 days after shipment of the goods. To cover its current foreign exchange needs, the domiciling bank may hold up to 20% of its export proceeds as own foreign exchange resources. However, it must ensure that its total foreign exchange resources to cover its requirements do not exceed 5% of total customer demand deposits; otherwise, the surplus must be surrendered to the BCEAO.

Surrender to authorized dealers: Yes.

Proceeds must be surrendered to authorized banks within 30 days of the payment due date. Export revenue may be surrendered to intermediaries other than banks with which the transaction is domiciled if authorized by the BCEAO, provided they furnish the domiciling bank with the documents required for the domiciliation file to be closed.

Financing requirements: No.
