Mexico has 12,578 tariff codes in the Law on General Duties of Imports and Exports: 97% of the tariff codes have ad valorem taxes between 0% and 20%, and 57% of the tariff codes are exempt from import customs duty. The maximum rate on imports is 75% and is applicable to a few products, including meat and edible offal of rooster and hen and fructose. Used cars from countries without a trade agreement have a 50% tax on imports. Imports from members of the NAFTA, LAIA, and the EFTA, Chile, Colombia, Costa Rica, El Salvador, the EU, Guatemala, Honduras, Israel, Japan, Nicaragua, Peru, Uruguay, Vietnam, Brunei Darussalam, Malaysia, Singapore, Australia, New Zealand, receive preferential duty treatment. There is a preferential tariff ranging from 0% to 10% for imports under the Sector Specific Programs (PROSEC) only for inputs that are used in the production of specific products, regardless of whether the goods to be produced are for export or for domestic market. By the end of 2018, the number of tariff codes included in PROSEC was 989, being the Automotive, Electrical, and Electronic products the most benefited sectors.

No tariffs are applied to goods imported temporarily for repair or transformation, which will be returned abroad. Mexico applies antidumping and anti-subsidy duties to the following products: bond paper and rebar from Brazil; atomizers, chemical products, steel products, mushrooms, bicycles, coaxial cable “guidewire,” blenders, pencils, ceramic tiles, cookware, polyester, rachel-type synthetic fiber blankets, ceramic dinnerware and ceramic parts, metallic balloons, cooking pots, and aluminum foil from China; steel pipe from the United Kingdom; epoxidized soybean oil, rubber, chemical products, steel products, and chicken leg and thigh from the United States; rubber and steel products from Japan; rubber, polyester, and steel products from Korea; steel products from Italy, France, Germany, Portugal, Romania, Russia, Kazakhstan, Spain, Taiwan Province of China, and Ukraine; steel products and antibiotics from India; and epoxidized soybean oil from Argentina. Effective June 5, 2018, Mexico implemented tariffs to 71 tariff codes for merchandises coming from the United States; as well, Mexico implemented 15% tariffs to imports for 186 tariff codes; previously,
97 tariff codes were extended on October 17, 2017. Effective August 17, 2018, Mexico implemented a tariff of 15% for 3 additional tariff codes which concluded on November 30th of the same year.

Taxes collected through the exchange system
No.

Export licenses
Yes. Most exports do not require licenses. Exports of a few items related to drugs, narcotic substances, endangered species, and archeological objects are prohibited. Also exports of weapons and other goods that have as destination countries under sanctions by the UNSC are banned. Petroleum products and their derivatives; industrial raw diamonds; some iron ore; chemical, nuclear, and conventional weapons and their parts and components; dual-use goods; and software and related technologies items require an export license.

Without quotas
Yes. Exports of petroleum products and their derivatives (gasoline, kerosene, propane, butane, etc.), wild species, hazardous substances and wastes, nuclear material, and drugs and narcotic substances and their inputs (precursors) considered high risk require a license. Industrial raw diamonds require a license in accordance with the Kimberley Process Certification Scheme. Licenses are also required for certain iron ore; chemical, nuclear, and conventional weapons and their parts and components; dual-use goods; and software and related technology items used in the manufacture and proliferation of conventional weapons and weapons of mass destruction, in accordance with the Wassenaar Arrangement, Australia Group, and Nuclear Suppliers Group.

Effective January 10, 2018, the Agreement establishing the classification and codification of goods was modified whose importation, exportation, admission, or exit is subject to sanitary regulation by the Ministry of Health was amended to regulate the import and export of two precursor synthetic substances. Effective May 25, 2018, the Agreement which establishes the classification
and codification of goods, and products whose import and export are subject to regulation by the Ministry of Environment and Natural Resources was amended to regulate the import and export of endangered species listed in the appendices to the CITES. Effective July 12, 2018, the Agreement which establishes the classification and codification of goods, and products whose import and export are subject to regulation by the Ministry of Agriculture, Animal Breeding, Rural Development, Fisheries and Food was amended to regulate the importation of pork. The Agreement establishing the classification and codification of oil and oil modification is set whose import and export are subject to prior approval by the Ministry of Energy.

With quotas
Yes. Sugar exports require prior permission, and a maximum export quota is set when the exports’ destination is the United States. The Agreement to permit the export of sugar is published.

Export taxes
Yes. Export taxes ad valorem of 25% apply to bituminous mixtures based on natural asphalt, natural bitumen, petroleum bitumen, mineral tar, or mineral tar pitch (for example, bituminous mastics, cutbacks), with the exception of fluidized bitumens and asphalt bituminous mixtures put up for retail sale in containers of a capacity not exceeding 200 liters.

- **Purchases of shares and other equities** may be affected by the inward direct investment laws. These laws determine which activities are reserved for the government and Mexican investors. With prior authorization of the MOE and, when applicable, by the NBSC, investment trusts may be established by Mexican banks acting as trustees. These trusts issue neutral investment instruments that may be acquired by foreign investors, which may only grant to their holders economic rights and, in some cases, limited corporate rights, without granting voting rights in Ordinary General Meetings.

- **Foreign institutions** must be authorized by the MOE to engage, regularly, in commercial activities. Foreign securities publicly offered in the domestic market could be registered in the National Registry of Securities (NRS). Foreign securities may be listed in the international quotation system through securities firms or credit institutions or else, by the issuer.

- Credit institutions and securities firms may purchase shares of foreign financial entities with the prior authorization of the NBSC. Insurance institutions may only acquire equity shares denominated in foreign currency, with prior authorization of the MOF, considering the opinion of the CNSF and BM. Retirement fund management companies must invest 60% of their equity in shares of the investment companies that they manage. These investment companies may invest up to 20% of the total assets in foreign securities managed in compliance with the investment regime that is established by the National Retirement Savings System Commission (NRSSC).

- **Public offerings abroad** of securities issued in Mexico must be notified to the NBSC. The NRS must have information related to such offerings.

- **Purchase of debt instruments** may only be made through securities firms or credit institutions.

- **Foreign institutions** must be authorized by the MOE before engaging in commercial activities. The public offering of securities in the national territory requires NBSC authorization. Foreign securities publicly offered in the domestic market could be registered in the NRS. In the international quotation system, foreign securities may be listed through securities firms or credit institutions.

- Commercial banks’ foreign exchange risk position may not exceed 15% of their core capital at the close of operations each day. Insurance institutions may only acquire equity securities denominated in foreign currency issued by the Federal Government and registered in the NRS. Retirement fund management companies must invest 60% of their equity in shares of the investment companies that they manage. These investment companies may invest up to 20% of the total assets in foreign securities managed in compliance with the investment regime that is established by the NRSSC.

- **Public offerings abroad** of securities issued in Mexico must be notified to the NBSC. National securities offered publicly in foreign markets may be registered in the NRS.
performing any commercial activities. Retirement fund management companies must invest 60% of their equity in shares of the investment companies they manage, and these investment companies may invest up to 20% of the total assets managed in foreign securities in compliance with the regime established by the NRSSC.

Sale or issue locally by nonresidents: Yes. Foreign institutions must be authorized by the MOE before engaging, regularly, in commercial activities. The public offering of securities in the national territory requires prior NBSC authorization. Foreign securities publicly offered in the domestic market must be registered in the NRS.

Purchase abroad by residents: Yes. Commercial banks’ foreign exchange positions may not exceed 15% of their core capital at the close of operations each day. Insurance institutions may only acquire equity securities denominated in foreign currency issued by the Federal Government and registered in the NRS. Retirement fund management companies must invest 60% of their equity in shares of the investment companies they manage. These investment companies may invest up to 20% of the total assets managed in foreign securities in compliance with the regime established by the NRSSC.

Sale or issue abroad by residents: Yes. Public offerings abroad of securities issued in Mexico must be notified to the NBSC. National securities offered publicly in foreign markets must be registered in the NRS.

On collective investment securities: Yes. Foreign institutions must be authorized by the MOE before performing commercial activities. The Board of Directors of each investment fund management company must establish holding limits per shareholder, regardless of the holder’s nationality or residence.

Purchase locally by nonresidents: Yes. To operate as an investment fund, NBSC authorization is required. The information prospectus for the public markets as well as its modifications requires the authorization by the NBSC. The investment fund’s prospectus mentioned may not be used, in any other language, by any other entity other than an investment fund. Foreign securities publicly offered in the domestic market must be registered in the NRS.

Purchase abroad by residents: Yes. Commercial bank’s foreign exchange positions may not exceed 15% of their core capital at the close of operations each day. Insurance companies may only acquire equity securities denominated in foreign currency issued by the Federal Government and registered in the NRS. Retirement fund management companies must invest 60% of their equity in shares of the investment companies they manage. These investment companies may invest up to 20% of the total assets managed in foreign securities in compliance with the regime established by the NRSSC.

The Board of Directors of each management company must establish maximum holding limits for individual stocks of the shareholders, regardless of holder’s nationality or residence.

Sale or issue locally by nonresidents: Yes. Public offerings abroad of securities issued in Mexico must be notified to the NBSC. National securities offered publicly in foreign markets must be registered in the NRS.

Sale or issue abroad by residents: Yes. Under the regulations governing derivative operations: (1) A simplified BM authorization procedure applies to commercial banks and securities firms for the conduction of derivative operations. (2) Multiple-scope financial companies may engage in derivative operations over underlying assets to cover their own risks without BM authorization. (3) Credit derivative operations may only be carried out by commercial banks and securities firms, the latter only on behalf of third parties. (4) Commercial banks, securities firms,
investment funds, multiple-scope financial companies, and general
deposit warehouses, prior to entering into any derivative operation
with any of the following counterparties, must collect the
counterparty’s currently valid Legal Entity Identifier Code: (a)
commercial banks, (b) securities firms, (c) investment funds, (d)
multiple-scope financial companies, (e) general deposit warehouses,
(f) insurance institutions, (g) investment funds management
companies, (h) retirement funds specialized investment companies,
(i) credit unions, (j) development support organizations, and (k)
foreign financial entities. Insurance institutions may enter into
derivative operations solely for risk hedging, in accordance with
general regulations issued by the CNSF. Retirement funds
specialized investment companies may only enter into derivative
operations with prior authorization from BM, as proposed by the
NRSSC.

**Purchase locally by nonresidents** No.
**Sale or issue locally by nonresidents** No.
**Purchase abroad by residents** Yes.
**Sale or issue abroad by residents** Yes.

**Controls on credit operations** Yes.

**Commercial credits**
- By residents to nonresidents No.
- To residents from nonresidents No.

**Financial credits**
- By residents to nonresidents Yes.
- To residents from nonresidents Yes.

Commercial bank’s credit operations with related persons may not
exceed 35% of the basic part of their net capital. Any commercial
bank granting a credit to a person or group of individuals considered
to be a unique entity by reason of a common risk must meet the limit
established by the NBSC according to their capitalization level. In
addition, there are controls on credits and loans granted by insurance
institutions or insurance mutual companies in foreign currency.

**Guarantees, sureties, and financial backup facilities**
- By residents to nonresidents No.
- To residents from nonresidents Yes.

It is forbidden to enter into any agreement with foreign bonding
companies to guarantee actions of individuals bound to fulfill
obligations in Mexico, except for re-bonding operations or when they
are received by national bonding companies as countersecurity.

**Controls on direct investment** Yes.

**Outward direct investment** No.

**Inward direct investment** Yes.

Controls apply to (1) acquisition of more than 49% of the capital
stock of a Mexican company and are subject to review if the total
assets of that company exceed, effective May 29, 2018, MEX
$18,211,163,933.16 (eighteen thousand two hundred eleven million
one hundred sixty-three thousand nine hundred thirty-three pesos and
sixteen cents), previously MEX$4,005,167,839,31; (2) acquisition of land for agricultural, livestock farming, and forestry purposes; “T” class shares may be acquired from the companies that own the property up to 49%; (3) investment in (a) provision of fuel and lubricants for ships, aircraft, and railroad equipment exceeding 49% of the capital stock; (4) investment exceeding 49% of capital stock in fishing, other than aquaculture, in coastal and fresh waters or in the exclusive economic zone; (5) investment in air, maritime, and ground transportation and related services, including cabotage and port services, except (a) participation up to 25% in the capital stock of national air transportation, specialized air transportation, and aero taxis transportation; up to 49% in air terminal management and more of 49%, or above, if an authorization is granted (b) participation up to 49% in the capital stock of naval companies engaged in interior navigation and, except tourism cruises and the exploitation of dredges and other naval devices for the construction, conservation, and operation of ports; in integral port management and port services of pilotage for the ships that develop interior navigation; and in companies involved only in the exportation of high-speed ships and port services for interior navigation (full ownership may be authorized); (c) railroad-related services and participation up to 49% in the capital stock of a railway concessionaire enterprise (full ownership may be authorized); and (d) participation in the capital stock of a company engaged in national ground transportation of passengers, tourists, and freight within Mexico; (6) investment exceeding 49% of the capital stock in radio broadcasting, and for newspapers printing and publishing for exclusive national distribution; (7) investment by a foreign government or government enterprise in commercial banks, financial holding companies, securities firms, insurance institutions and insurance mutual companies, bonding institutions and investment fund management companies; (8) in the restricted zone, acquisition of real estate is available only for Mexicans and Mexican companies and investment in residential real estate by firms with foreign participation incorporated in the country; (9) investment in aircraft building, assembly, or repair; shipbuilding and ship repairs; or any activity requiring a concession, other than railways, except through a company incorporated in Mexico; and (10) investment by foreigners in legal services and private education services exceeding 49% of the capital stock, except with favorable decision of the National Commission on Foreign Investment (NCFI) authorization.

| Controls on liquidation of direct investment | No. |
| Controls on real estate transactions | Yes. |
| Purchase abroad by residents | Yes. Commercial banks may acquire only real estate necessary for the accomplishment of their purposes. |
| Purchase locally by nonresidents | Yes. Controls apply to the direct acquisition by foreign nonresidents of real estate inside the restricted zone (a 100-kilometer strip along the Mexican land border and a 50-kilometer strip in and from the Mexican coast). Foreign nonresidents may acquire real estate inside the restricted zone through a real estate trust. To purchase real estate outside the restricted zone, foreign nonresidents must agree to consider themselves Mexican and to refrain from invoking the protection of their governments regarding the property acquired. Such acquisitions may take place through the acquisition of shares of Mexican institutions dedicated to nonresidential activities, notifying it to the Ministry of Foreign Affairs; or through a real estate trust for residential activities within the restricted zone, with Ministry of Foreign Affairs approval. |

Provisions Specific to the Financial Sector

Provisions specific to commercial banks and other credit institutions

Yes.

Borrowing abroad

Yes. Borrowing abroad is permitted. Open foreign exchange positions of commercial banks must not exceed 15% of their core capital. Commercial banks’ foreign exchange liabilities must not exceed 1.83 times of their core capital. However, BM can authorize higher positions in foreign currency for a maximum period of 5 days within a 12-month period for each limit.

Maintenance of accounts abroad

Yes. Foreign exchange risk positions of both total and for each foreign currency must not exceed the daily limit of 15% of a bank’s core capital. However, BM can authorize higher positions in foreign currency for a maximum period of 5 days within a 12-month period for each limit.

Lending to nonresidents (financial or commercial credits)

Yes. Commercial banks must diversify their risks to keep performing their transactions. There are maximum limits on the amounts commercial banks may lend resulting from the integral risk management and a specific regime regarding related persons, regardless of the borrower’s residence. If a commercial bank extends credit to an individual or a group of individuals considered as a single individual because of common risk, it must comply with the limit established by the NBSC in accordance with the institution’s capitalization.

Lending locally in foreign exchange

Yes. There are maximum limits on the amount commercial banks may lend, regardless of the borrower’s nationality or residence, and on their net open foreign exchange position. Open foreign exchange positions may not exceed 15% of core capital. If a commercial bank grants a credit to a person or to a group of individuals who are considered to constitute a single person because of a common risk, the commercial bank will have to comply with the limits established by the NBSC, in accordance with the institution’s capitalization.

©International Monetary Fund. Not for Redistribution
On nonresident assets and liabilities

Yes. The same regulations governing resident assets and liabilities apply.

Provisions specific to institutional investors

Yes. The IFL, Insurance and Bond Institutions Law, and SML apply.

Insurance companies

Yes.

Limits (max.) on securities issued by nonresidents

Yes. Insurance institutions may invest in equity of other insurance institutions; insurance entities, reinsurance or foreign rebonding institutions; investment societies or societies, which operate for them; administrators of retirement funds and retirement funds specialized investment companies. Said investments may only be done with the surplus of the minimal paid equity, with prior authorization of the CNSF, and the amount cannot be part of the Own Admissible Funds, which support the requirement of solvency equity.

Limits (max.) on investment portfolio held abroad

Yes. Insurance institutions can only acquire risks through investment of technical reserves in foreign currency, as also the risks taken in national currency, which offer assured sums referend to the exchange rates’ behavior. This must be carried out through securities issued in foreign currency, supported by the Federal Government and registered in the National Securities Registry and the other securities pointed out in the correspondent regulations.

Limits (min.) on investment portfolio held locally

No.

Currency-matching regulations on assets/liabilities composition

No.

Pension funds

Yes.

Limits (max.) on securities issued by nonresidents

Yes. Retirement fund management companies may invest up to 40% of their capital in real estate, furniture, and equipment and the remaining 60% of such capital in shares of the investment companies they manage, regardless of their nationality.

Limits (max.) on investment portfolio held abroad

Yes. Retirement funds specialized investment companies may invest up to 20% of their total assets in foreign securities authorized by the NRSSC.

Limits (min.) on investment portfolio held locally

Yes. Retirement fund management companies may invest up to 40% of their capital in real estate, furniture, and equipment, and the remaining 60% of such capital in shares of the investment companies they manage.

Currency-matching regulations on assets/liabilities composition

Yes. Retirement funds specialized investment companies may invest up to 20% of their total assets in foreign securities authorized by the NRSSC.

Investment firms and collective investment funds

Yes.

Limits (max.) on securities issued by nonresidents

Yes. Regardless of the issuer’s residence, controls apply to the purchase of national or foreign securities by investment funds in variable-income and in debt instruments, whether on their own or on behalf of their clients. Investment funds in variable-income and debt instruments may invest in assets that must be registered in the National Securities Registry or in the International Quotation System; assets that have been registered, authorized, or regulated, for their public sell in general, by the Securities Commissions or equivalent organism of the States; issued by the CB or by a recognized international organism; in demand deposits in national or foreign financial entities, in
national or foreign currency; or in derivative financial instruments.

The investment funds in variable-income and debt instruments may invest in structured products, stock fiduciary certificates, and asset-backed securities, as long as the securities are considered under their investment regime. Structured products must contain the obligation of paying down the principal and a determined minimum rate.

Investment funds in variable-income and debt instruments must comply with their investment regime prospect.

Investment funds may not obtain nor dispose of assets that are property of or administered by institutions from the same financial group that may imply any type of conflict of interests.

Regardless of the issuer’s residence, controls apply to the purchase of national or foreign securities by investment funds in variable-income and in debt instruments, whether on their own or on behalf of their clients.

Investment funds of variable-income and the debt instruments may invest in assets that must be registered in the National Securities Registry or in the International Quotation System, assets that have been registered, authorized, or regulated, for their public sell in general, by the Securities Commissions or equivalent organism of the States; issued by the CB or by a recognized international organism; in demand deposit in national or foreign financial entities, in national or foreign currency; or in derivative financial instruments.

If the foreign securities are registered, authorized, or regulated, for their public sell in general, in Member States of the Pacific Alliance, the transactions must be made with agreements that enable the access to the negotiation systems.

Investment funds in variable-income and the debt instruments may invest in structured products, stock fiduciary certificates, and asset-backed securities, as long as the securities are considered under their investment regime.

The structured products must contain the obligation of paying down the principal and a determined minimum rate. Investment funds in variable-income and debt instruments must comply with their investment regime prospect.

Investment funds may not obtain nor dispose assets that are property or administered by institutions from the same financial group, that may imply any type of conflict of interests.

Regardless of the issuer’s residence, controls apply to the purchase of national or foreign securities by investment funds in variable-income and in debt instruments, whether on their own or on behalf of their clients.

The investment in securities and derivative financial instruments related to the same financial institution may not exceed 40% of the net asset value of the investment fund. The amount of investments in financial institutions that individually constitute more than 15% of the net asset value of the investment fund may not exceed, jointly, the 60% of the net asset value. Both percentages are subject to the exceptions outlined in the respective articles.

Investment funds must maintain at all times a minimum percentage of easily collectible securities and values with term up to three months, according to the objective, investment prospect and stock trading policies outlined in their information disclosure to the investment markets.

The percentage must be noted in the information disclosure. For the purposes of this disposition, easily collectible securities are those that represent up to 50% of the volume of daily operation in the market under consideration, by issuer, type of security or series, corresponding to the average of the last 60 labor days of operation. This requirement is equally applicable to the investments in
derivative financial instruments quoted at the stock market.

Currency-matching regulations on assets/liabilities composition
No.

Changes during 2018 and 2019

Exchange Arrangement

Monetary policy framework
Inflation-targeting framework

Transparency
Publication of minutes
05/17/2018 Banco de México (BM) modified some elements of its monetary policy communication strategy: (1) The minutes on the monetary policy decision include the voter’s identity. If there are dissenting opinions in the voting, the reasons for such dissents are included as well. (2) The transcripts of the Governing Board’s meeting involving monetary policy decisions are available to the public three years after the corresponding meeting took place. (3) The monetary policy decision press release (monetary policy statement) and the corresponding minutes are published simultaneously in both Spanish and English. (4) The speeches and public presentations of the members of the Governing Board are also published. These materials are available to the public on BM’s official webpage no later than two days after the event.

**Classification**

| No separate legal tender |                                   |
| Currency board |                                   |
| Conventional peg |                                   |
| Stabilized arrangement |                                   |
| Crawling peg |                                   |
The de jure and de facto exchange rate arrangements are classified as floating. The NBM intervenes in the domestic foreign exchange interbank market to smooth out sharp exchange rate fluctuations of MDL against the US dollar. Sharp fluctuations are not specifically defined. However, the NBM intervenes based on market conditions and future expectations of market participants. These interventions do not aim to change the trend of the exchange rate determined by the market. The NBM intervenes directly at the market-quoted rates and publishes aggregated monthly data on its website regarding its interventions and interbank market turnover. The data shows interventions by currency and type of operation (spot or derivative). In 2018, foreign exchange inflows continued to exceed foreign exchange outflows but to a lower extent as compared to the previous years, given a stronger growth of imports as compared to exports, which led to a deterioration of trade balance by 30%, highest deficit being observed in Q4 (BPM6 data). Remittances continued to grow, but at a slightly slower rate as compared to 2017 (+12% against +13%). Regarding other balance of payments dynamics in 2018, there was a pickup in FDI, but at the same time, there were higher payments of dividends. These developments combined have contributed to a lower foreign exchange surplus liquidity on the internal market as compared to the post-banking crisis years.

In 2018–Q2 2019, the domestic foreign exchange market, implicitly the exchange rate, was also affected by the local and general election phases (which took place in Q2 2018 and Q1 2019).

The CB has performed most of its foreign exchange purchase interventions in Q1 and Q3, 2018, periods of higher foreign exchange surplus and respectively stronger appreciation pressures on the exchange rate. A part of CB’s purchase interventions was related to reserve accumulation following FDI in 2018.

The foreign exchange surplus on the domestic market is a common seasonal development for Q3, while in Q1, it was related to the appreciation of EUR and other main trading partner currencies against the US dollar (EUR is the main/preferred saving and remittance currency for Moldovan nationals).

In Q2 2018, the CB has intervened occasionally to offset higher misbalances on the foreign exchange market, which would cause larger swings in the exchange rate, if left unresolved. In Q2 2018, the net foreign exchange demand from agents was partially for dividend payments, with pressures on the exchange rate being also because of the pre-election phase, which have incentivized businesses and consumers to temporarily hoard foreign currency. The same factors along with stronger demand for foreign exchange from energy importers persisted in Q4 2018–Q1 2019 prompting the CB to intervene with foreign exchange sales.

In Q2 2019, the exchange rate of the MDL continued a normal depreciation path. At the same time, the CB has significantly reduced its presence in the domestic foreign exchange market.

Aggregate monthly data on CB’s transactions with the domestic banks is published. Data is available by gross amount, by currency and by transaction type.

Data on CB’s net foreign exchange interventions can be found in the press release on the evolution of official reserve assets, which is...
Free floating

**Official exchange rate**

Yes. The official exchange rate of the leu against the US dollar is determined daily as the weighted average of the exchange rates applied for spot noncash transactions performed in the interbank and intrabank domestic market. The official exchange rate of the leu against other foreign currencies is based on the official exchange rate of the leu against the US dollar and the cross-rate of the respective foreign currency against the US dollar on international markets. The official exchange rate is used for accounting and statistical purposes.

**Monetary policy framework**

Exchange rate anchor

*U.S. dollar*

*Euro*

*Composite*

*Other*

Monetary aggregate target

**Inflation-targeting framework**

Yes.

**Target setting body**

Yes.

Government

Central Bank

Monetary Policy Committee

*Central Bank Board*

Yes. The Executive Board of the National Bank of the Republic of Moldova is responsible for the development and approval of the monetary policy, deciding on the base rate, the required reserves ratio, the confidence band of the standing facilities, and the foreign exchange interventions. According to the Law on the NBM No. 548-XIII of July 21, 1995, the NBM is the CB of the Republic of Moldova, an autonomous public legal entity developing and promoting monetary and foreign exchange policies. Under Article 4 (1) of the Law on the NBM, the primary objective is to achieve and maintain price stability. In the long term, a configuration of proper macroeconomic and monetary conditions is anticipated which will decrease the sustainable level of prices’ growth rate, so that the NBM will gradually diminish the inflation target to better anchor the inflation expectations.

*Other*

Government and Central Bank

**Inflation target**

Yes.

**Target number**

Yes.
The NBM sets the inflation target of 5.0% annually with a possible deviation of ±1.5 percentage points (pps) calculated using the consumer price index.

The NBM believes that “price stability” can be quantitatively defined using the rate of inflation measured by the consumer price index at the end of year and published by the National Bureau of Statistics of the Republic of Moldova. Inflation is measured using headline consumer price index, compiled by National Bureau of Statistics.

The horizon over which the inflation target must be accomplished is two years (eight quarters).

The monetary market conditions are guided by the NBM through the base rate, which is the main indicator for the monetary market in the short run. The base rate is the reference rate for the main short-term monetary policy operations. The NBM also uses complementary monetary policy instruments, such as standing facilities, required reserves ratio, and intervention in the foreign exchange market. These instruments directly influence short-term nominal interest rates in the money market.

Deposit and lending facility is part of a symmetric corridor of ±3 pps to the base rate.

If there is a deviation of the inflation rate exceeding the deviation interval, the NBM will publish a plan of corrective actions to bring the inflation within the established band.

On December 29, 2016, the NBM stopped publishing votes of members of the Executive Board at monetary policy meetings. Previously, the Inflation Report contained summaries of the minutes of the NBM’s Executive Board meetings on monetary policy and the number of votes in favor and against the decision. In this respect, the summaries were published six months after the decision was made.

The Inflation Reports Nos. 3, 4 in 2017, Nos. 1, 2, 3, 4 in 2018 and Nos. 1, 2 in 2019 were published without summaries of the minutes of the NBM’s Executive Board meetings on monetary policy.

The NBM publishes the Inflation Report quarterly to evaluate the efficiency of the monetary policy, which will include an analysis of the macroeconomic situation, a forecast for medium-term (two years) inflation, as well as the analysis of the risks regarding the future achievement of the quantitative target.

Foreign exchange purchased by individuals against cash at licensed
Exchange subsidy No.

Foreign exchange market Yes. According to the Law on Foreign Exchange Regulation, licensed banks and foreign exchange entities may freely determine their bid-ask spreads on foreign exchange purchases and sales as well as their commissions for operations with clients.

Spot exchange market Yes. Licensed banks and foreign exchange entities are the authorized participants in the domestic foreign exchange market. Foreign exchange entities include foreign exchange offices, hotels, and licensed banks. As of December 31, 2018, there were 11 licensed banks, 372 licensed foreign exchange offices (including their 53 branches), 8 licensed hotels, and 780 licensed bank foreign exchange bureaus. Licensed banks may buy from and sell to residents and nonresidents any currency (intrabank market). Foreign exchange entities may buy from and sell to individuals (residents and nonresidents) any currency. Licensed banks and foreign exchange entities may set their foreign exchange buying and selling rates.

Operated by the central bank Yes. The Moldovan foreign exchange market is decentralized.

Foreign exchange standing facility No.

Allocation No.

Auction Yes. The NBM conducts interbank foreign exchange auctions (in the form of multiple price auctions) for purchases and sales of foreign currency against lei between the NBM and licensed banks through a common trading platform (based on Bloomberg). The NBM notifies the licensed banks about the auction by sending an announcement message through the common trading platform at the latest 30 minutes before the start of the auction. The announcement message contains among other information the amount of foreign currency proposed by the NBM to be sold or bought. The frequency of the auction is not regulated. Licensed commercial banks are eligible to participate. Only one bid a participating bank is permitted, with a minimum amount of 100,000 units of the traded foreign currency. Auction participants are not required to finance specific international transactions with the foreign exchange obtained at the auction. The results are disclosed to the participating banks within one hour of the end of the auction. In case of default of the auction participants, the NBM may apply the penalties for the late payment to the respective bank according to the Agreement on the Interbank Foreign Exchange
Fixing: No.

Interbank market: Yes. Currently, 11 licensed banks participate in the domestic foreign exchange interbank market, under the Agreement on the Interbank Foreign Exchange Market in the Republic of Moldova. The Law on Foreign Exchange Regulation allows licensed banks to set bid and ask rates for their foreign exchange transactions. Under the Agreement on the Interbank Foreign Exchange Market in the Republic of Moldova, (1) spreads (difference between the bid and ask rates) may be determined by the quoting party and (2) banks may not charge fees on foreign exchange transactions in the domestic interbank market. The Law on Payment Services and Electronic Money allows resident nonbank payment service providers and electronic money institutions to perform foreign currency exchange transactions closely related to the electronic money issuance or to the provision of payment services. Under the Law on Capital Markets, resident investment firms may perform foreign exchange buying and selling transactions related to the provision of investment services. The NBM intervenes directly with market participants at their quoted rates. As of end of 2018, 11 banks participated in the interbank market.

Over the counter: Yes. The interbank market operates over the counter.

Brokerage: No.

Market making: No.

Forward exchange market: Yes. This market is small and operations are insignificant. There is a small swap market in which NBM is one of the counterparties. Transactions with these instruments were allowed starting with March 23, 1998, when the first Agreement on Interbank Foreign Exchange Market in the Republic of Moldova was signed.

Official cover of forward operations: No.

References to legal instruments and hyperlinks: This information can be found at the AREAER ONLINE database: http://www.elibrary-areaer.imf.org/Pages/Reports.aspx.

Arrangements for Payments and Receipts

Prescription of currency requirements: Yes. Payments and transfers in foreign currency in Moldova may be performed only in the cases specified by law. Payments and transfers to or from foreign countries may be performed in domestic or foreign currency, except when, in accordance with international treaties, payments and transfers must be in foreign currency or convertible foreign currency.

Controls on the use of domestic currency: Yes. Payments and transfers in Moldova between residents and nonresidents may be freely conducted in domestic currency. To facilitate noncash payments and transfers by legal entities, the use of cash in domestic currency between residents and nonresidents is limited.

For current transactions and payments: Yes. Provisions of Art. 5 of the Law on Foreign Exchange Regulation governing international current transactions in foreign currency also apply to those effected with domestic currency. Payments and
transfers in Moldova between residents and nonresidents may be freely conducted in domestic currency. Payments and transfers to or from foreign countries may be performed in domestic or foreign currency, except when, in accordance with international treaties, payments and transfers must be in foreign currency or convertible foreign currency. To facilitate noncash payments and transfers by legal entities, the use of cash in domestic currency between residents and nonresidents is limited.

For capital transactions | Yes. | Provisions of Art. 6-16 and 28-34 of the Law on Foreign Exchange Regulation governing international capital transactions in foreign currency also apply to those effected with domestic currency, except for some regulations on exports and imports of cash.

Transactions in capital and money market instruments | Yes. | Provisions of the Law on Foreign Exchange Regulation governing international capital transactions, as described in Section XI.A.2. of this report, in foreign currency also apply to those effected with domestic currency. Payments and transfers in Moldova between residents and nonresidents may be freely conducted in domestic currency. Payments and transfers to or from foreign countries may be performed in domestic or foreign currency, except when, in accordance with international treaties, payments and transfers must be in foreign currency or convertible foreign currency. To facilitate noncash payments and transfers by legal entities, the use of cash in domestic currency between residents and nonresidents is limited.

Transactions in derivatives and other instruments | Yes. | Provisions of the Law on Foreign Exchange Regulation governing international capital transactions, as described in Section XI.A.3. of this report, in foreign currency also apply to those effected with domestic currency. Payments and transfers in Moldova between residents and nonresidents may be freely conducted in domestic currency. Payments and transfers to or from foreign countries may be performed in domestic or foreign currency, except when, in accordance with international treaties, payments and transfers must be in foreign currency or convertible foreign currency. To facilitate noncash payments and transfers by legal entities, the use of cash in domestic currency between residents and nonresidents is limited.

Credit operations | Yes. | Provisions of the Law on Foreign Exchange Regulation governing international capital transactions, as described in Section XI.A.4. of this report, in foreign currency also apply to those effected with domestic currency. Payments and transfers in Moldova between residents and nonresidents may be freely conducted in domestic currency. Payments and transfers to or from foreign countries may be performed in domestic or foreign currency, except when, in accordance with international treaties, payments and transfers must be in foreign currency or convertible foreign currency. To facilitate noncash payments and transfers by legal entities, the use of cash in domestic currency between residents and nonresidents is limited.

Use of foreign exchange among residents | Yes. | The use of foreign currency among residents is allowed only in cases stipulated in Art. 21 and 22 of the Law on Foreign Exchange Regulation and other relevant laws.

Payments arrangements | Yes. | There are several bilateral agreements for the promotion of investment and trade development that include provisions on payments between the signatories, including with Romania and negotiations are under way with Turkey.

Bilateral payments arrangements | Yes. | Operative

Inoperative | No. |

Regional arrangements | Yes. | The regional trade agreements in which the Republic of Moldova
takes part offer a preferential trade regime by eliminating import duties as well as other tariff and nontariff barriers. The Republic of Moldova signed the following Free Trade Agreements (FTAs): Association Agreement and Deep and Comprehensive Free Trade Area with EU, FTA with CIS countries, FTA with CEFTA countries, and FTA with the Republic of Turkey. The Republic of Moldova also benefits from unilateral trade preferences offered under the Generalized System of Preferences (GSP) signed with Canada, EU, Japan, Norway, Switzerland, and the United States.

**Clearing agreements**

No.

**Barter agreements and open accounts**

No.

**Administration of control**

Yes.

The NBM is responsible for (1) formulating and implementing the government monetary and foreign exchange policy, (2) establishing the exchange rate regime of the leu, (3) holding and managing the country’s foreign exchange reserves, (4) licensing foreign exchange offices and hotels for cash currency exchange activity with individuals, (5) approving foreign exchange operations that are subject to authorization under the Law on Foreign Exchange Regulation, and (6) exercising control over agents of foreign exchange control. According to the Law on Regulation of Repatriation of Funds, Goods, and Services Obtained from External Economic Transactions, control over the repatriation of funds, goods, and services is exercised by fiscal authorities, who verify repatriation through on-site inspections of legal entities’ economic activities. The Law on Foreign Exchange Regulation specifies the authorities and agents of foreign exchange control and the scope of their authority. The authorities of foreign exchange control are the NBM, customs authorities, financial inspection/control bodies, the Ministry of Finance and State Tax Services, National Commission for Financial Markets (NCFM), Office for Prevention and Fight Against Money Laundering, and Court of Accounts. The agents of foreign exchange control are:

- licensed banks;
- foreign exchange offices;
- hotels with NBM licenses for cash currency exchange activity with individuals;
- resident legal entities authorized to handle the exchange of postal money orders;
- resident nonbank payment services providers; and
- resident electronic money issuers in connection with the issuance of electronic money and providing payment services related to the issuance of electronic money.

The foreign exchange control authorities exercise control within the limits of their authority. Foreign exchange control agents exercise control over payments and transfers in foreign exchange operations carried out by residents and nonresidents through such agents.

**Payments arrears**

No.

**Official**

No.

**Private**

No.

**Controls on trade in gold (coins and/or bullion)**

Yes.

Entrepreneurial activity in the field of precious metals and stones is carried out based on licenses issued by the Public Services Agency. Since the July 2010 dissolution of the State Depository of Valuables,
the valuables in the State Fund of Precious Metals and Precious Stones have been transmitted to various authorities (for example, NBM, Ministry of Education, Culture and Research). Secondhand stores and pawnshops may not purchase or accept for storage or as collateral precious metal bullion or precious metal coins. Pawnshops do not have the right to receive the following: foreign currency; valuable papers; objects that do not belong to private individuals; real estate; antique objects or other old objects; coins of precious metals; metals and precious stones, which are raw material, waste or objects for technical and production purposes; means of transport (excluding bicycles and mopeds); waste and scrap containing precious metals extracted from the machine when scrapped.

Under the Law on the Precious Metals and Stones Regime, legal entities and individuals are entitled to hold objects of precious metals.

On external trade

Yes. A license from the Public Services Agency is required, which allows imports and exports of precious metals and stones.

**Controls on exports and imports of banknotes**

Yes. Imports and exports of foreign exchange values (cash in foreign and domestic currency, materialized securities, payment instruments in foreign and domestic currency) are regulated by the Law on Foreign Exchange Regulation. Imports and exports of coins containing precious metals are governed by the legislation regulating precious metals and articles thereof. If both cash (domestic and foreign currency) and traveler’s checks in foreign currency are imported or exported, the limits of €10,000 and €50,000 (including for declaration) specified below apply to the total amount imported or exported. If securities and payment instruments in both domestic and foreign currency (other than traveler’s checks) are imported or exported, the declaration limit of €10,000 indicated below applies to the total amount imported or exported.

On exports

Yes. Fees for customs procedures are not charged on exports of domestic currency and foreign currency in cash from Moldova by commercial banks and the NBM.

**Domestic currency**

Yes. Nonresident banks and licensed banks may export domestic currency cash with NBM approval. Exportation by nonresident banks and licensed banks of domestic currency cash in an amount not exceeding MDL 100,000 does not require the NBM approval. Exports by licensed banks and other resident legal entities of domestic currency banknotes and coins to be used to test currency-processing machines also do not require NBM approval. Once the test is completed, but no later than six months from the date of exportation, the cash must be returned. Exports of banknotes and coins by licensed banks and nonresident banks must be declared in writing to customs. Resident and nonresident individuals may export, when departing Moldova, domestic currency cash (1) in amounts not exceeding €10,000 or its equivalent an individual a trip without submission of supporting documentation to customs authorities and (2) between €10,000 and €50,000 or the equivalent an individual a trip with written declaration and submission to customs of the following supporting documents for the amount exceeding €10,000 or its equivalent: (a) customs documents confirming the importation of currency and/or (b) export permission from a licensed bank or the NBM. Individuals may not export domestic currency cash in unaccompanied luggage. Resident and nonresident legal entities may
export cash in domestic currency in cases stipulated by the Law on Foreign Exchange Regulation via their official representatives. In case of exports of cash in domestic currency by individuals who are also representatives of legal entities, the requirements (including declaration) established for individuals apply for the total amount of exported funds, except when customs legislation allows exceptions for certain categories of individuals and legal entities. Residents and nonresidents may export securities and payment instruments in domestic currency without limit, subject to declaration in written form to customs as follows: (1) by licensed banks and nonresident banks, regardless of the amount of exported securities and payment instruments; and (2) by individuals and official representatives of legal entities, if the total amount of exported securities and payment instruments exceeds the equivalent of €10,000 an individual a trip, except when customs legislation allows exceptions for certain categories of individuals and legal entities. Payment cards are excluded from the definition of payment instruments of the Law on Foreign Exchange Regulation.

**Foreign currency**

Yes. Licensed banks and nonresident banks may export foreign currency cash without NBM approval. Licensed banks and nonresident banks may export traveler’s checks in foreign currency without NBM approval. Exports of banknotes, coins, and traveler’s checks by licensed banks and nonresident banks must be declared in written form to customs. Resident and nonresident individuals may export when departing Moldova foreign currency cash and traveler’s checks in foreign currency (1) up to €10,000 or its equivalent an individual a trip without submission of supporting documentation to customs authorities and (2) between €10,000 and €50,000 or the equivalent an individual a trip by written declaration and submission to the customs authorities of the following supporting documents for the amount exceeding €10,000 or its equivalent: (a) customs documents confirming the importation of currency into Moldova and/or (b) export permission issued by a licensed bank or the NBM. Individuals may not export foreign currency cash and traveler’s checks in foreign currency in unaccompanied luggage. Resident and nonresident legal entities may export cash in foreign currency and traveler’s checks in foreign currency in cases stipulated by the Law on Foreign Exchange Regulation (for example, exports of cash by employees for business trip expenses abroad) via their official representatives. In case of exports of cash in foreign currency and traveler’s checks in foreign currency by individuals who are also representatives of legal entities, the requirements (including declaration) established for individuals are applied for the total amount of the funds exported, except when customs legislation allows exceptions for certain categories of individuals and legal entities. Residents and nonresidents may export securities and payment instruments other than traveler’s checks in foreign currency without limit, subject to declaration in written form to customs as follows: (1) by licensed banks and nonresident banks, regardless of the amount of exported securities and payment instruments; and (2) by individuals and by official representatives of legal entities, if the total amount of exported securities and payment instruments exceeds €10,000 or its equivalent an individual a trip, except when customs legislation allows exceptions for certain categories of individuals and legal entities. Payment cards are excluded from the definition of payment instruments of the Law on Foreign Exchange Regulation.

**On imports**

Yes. Fees for customs procedures and customs duties are not charged on imports of domestic currency and foreign currency in cash to Moldova by commercial banks and the NBM. Only the NBM is exempted from the VAT on import of domestic currency and foreign
## Domestic Currency

Yes.

Nonresident banks and licensed banks may import cash in domestic currency with NBM approval. Importation by nonresident banks and licensed banks of domestic currency cash in an amount not exceeding MDL 100,000 does not require the NBM approval. The importation by licensed banks and other resident legal entities of banknotes and coins in domestic currency earlier exported to be used to test currency-processing machines also does not require the NBM approval. Cash must be returned after the testing, but no later than six months from the date of exportation. Imports of banknotes and coins by licensed banks and nonresident banks must be declared in written form to customs. Resident and nonresident individuals may, when entering Moldova, import unlimited banknotes and coins in domestic currency, subject to declaration in written form to customs if amounts exceed the equivalent of €10,000 an individual a trip. Importation of domestic currency cash in unaccompanied luggage by an individual is not allowed. Resident and nonresident legal entities may import domestic currency cash in cases stipulated by the Law on Foreign Exchange Regulation (for example, imports of cash by nonresident legal entities to make payments for exports of goods and services) via their official representatives. In case of imports of cash in domestic currency by individuals who are also representatives of legal entities, the requirements (including the declaration requirement) established for individuals are applied for the total amount of the funds imported, except when customs legislation allows exceptions for certain categories of individuals and legal entities. Residents and nonresidents may import securities and payment instruments in domestic currency without limit, subject to declaration in written form to the customs authorities as follows: (1) by licensed banks and nonresident banks, regardless of the amount of imported securities and payment instruments; and (2) by individuals and by official representatives of legal entities, if the total amount of imported securities and payment instruments exceeds the equivalent of €10,000 an individual a trip, except when customs legislation allows exceptions for certain categories of individuals and legal entities. Payment cards are excluded from the definition of payment instruments of the Law on Foreign Exchange Regulation.

## Foreign Currency

Yes.

Importation of foreign currency cash as well as traveler’s checks in foreign currency by licensed banks and nonresident banks may be made without NBM approval. Banknotes, coins, and traveler’s checks in foreign currency imported by licensed banks and nonresident banks must be declared to customs in writing. Resident and nonresident individuals, when entering Moldova, may import unlimited banknotes, coins, and traveler’s checks in foreign currency, subject to declaration in written form to the customs authorities if amounts exceed €10,000 or its equivalent an individual a trip. Individuals may not import foreign currency cash and traveler’s checks denominated in foreign currency in unaccompanied luggage. Resident and nonresident legal entities may import foreign currency cash and traveler’s checks in foreign currency in cases stipulated by the Law on Foreign Exchange Regulation (for example, imports of cash by nonresident legal entities to make payments for exports of goods and services) via their official representatives. In cases of importation of cash in foreign currency and traveler’s checks in foreign currency by individuals who are also representatives of legal entities, the requirements (including declaration) established for individuals are applied for the total amount of the funds imported, except when customs legislation allows exceptions for certain categories of individuals and legal entities. Residents and nonresidents may import securities and payment instruments other
than traveler’s checks in foreign currency without limit, subject to declaration in written form to the customs authorities as follows: (1) by licensed banks and nonresident banks, regardless of the amount of imported securities and payment instruments; and (2) by individuals and by official representatives of legal entities, if the total amount of imported securities and payment instruments exceeds €10,000 or its equivalent an individual a trip, except when customs legislation allows exceptions for certain categories of individuals and legal entities. Payment cards are excluded from the definition of payment instruments of the Law on Foreign Exchange Regulation.

This information can be found at the AREAER ONLINE database: http://www.elibrary-areaer.imf.org/Pages/Reports.aspx.

**Resident Accounts**

**Foreign exchange accounts permitted**

Yes. Residents may perform foreign exchange operations in cash, in cashless form or with payment instruments, including through foreign and domestic currency accounts and by using traveler’s checks as specified in legislation.

**Held domestically**

Yes. Resident legal entities and individuals may freely open accounts in any foreign currency with licensed banks. Residents’ foreign exchange accounts may be credited with foreign exchange purchased locally or received from abroad or from other legal sources. Residents may freely sell to licensed banks foreign currency from their accounts. Resident account holders may use foreign exchange in their accounts to make payments and transfers according to the legislation, including—with NBM approval—for transactions that are subject to such approval under the Law on Foreign Exchange Regulation. There are no restrictions on the use of funds for current international transactions. Domestic transactions must be settled in domestic currency, except as specified by law. Foreign currency earnings of resident legal entities must be deposited at licensed banks. Payments and transfers by resident legal entities must take place through noncash transfers, unless explicitly stipulated by law. Cash deposits to and withdrawals from resident individuals’ foreign exchange accounts are not restricted. Resident legal entities and individuals may open payment accounts in foreign currency with resident nonbank payment service providers, except for payment accounts related to the issuance of electronic money (that may be opened in domestic currency only). These accounts in foreign currency are for payments only and are subject to the foreign exchange legislation. Resident nonbank payment service providers may carry out foreign currency exchange transactions closely related to the electronic money issuance or to the provision of payment services.

**Approval required**

Yes. Residents are allowed to open domestic foreign exchange accounts without NBM approval. Since July 1, 2016, the right of MOF to grant approvals to public institutions for opening of bank accounts was withdrawn. Thus, it is forbidden for budgetary authorities/institutions to open bank accounts for making operations through financial institutions.

**Held abroad**

Yes. Law No. 94 of May 13, 2016, on amending and supplementing of the Law on Foreign Exchange Regulation introduced express provisions related to the nonbank payment service providers and accounts opened with them. If accounts to be opened with financial institutions abroad by residents are subject to NBM approval, these accounts may be opened with such approval. NBM approval specifies allowable operations for these accounts and may specify balance limits, fund maintenance periods, and other conditions. If resident accounts opened with financial institutions abroad do not
require NBM approval, payments and transfers through these accounts must comply with foreign exchange legislation, including NBM approval for certain operations under the Law on Foreign Exchange Regulation. Residents may open payment accounts with nonresident payment service providers. Funds from resident accounts abroad may be freely transferred to Moldova.

| Approval required | Yes. | NBM approval is required for all residents to hold accounts opened with financial institutions abroad, with the following additional exceptions: (1) resident individuals during a temporary stay abroad; (2) residents making direct investments and real estate investments abroad, if the opening of such accounts by investors (in their own name) is compulsory under the laws of the country where the investments are made; (3) resident public institutions; (4) licensed banks, in their own name, if required for their financial activities; (5) resident legal entities in the name of their representative office for the office’s activity; (6) residents opening accounts related to guarantee deposit if the guarantee amount does not exceed €10,000 (or its equivalent); (7) residents opening accounts aimed at performing operations related to loans/credits/guarantees from nonresidents, if the amount of a loan/credit/guarantee does not exceed €10,000 (or its equivalent). |
| Accounts in domestic currency held abroad | Yes. | Law No. 94 of May 13, 2016, on amending and supplementing of the Law on Foreign Exchange Regulation introduced express provisions related to the nonbank payment service providers and accounts opened with them. NBM approval is required for all residents to hold accounts opened with financial institutions abroad, with the following exceptions: (1) resident individuals during their temporary stay abroad; (2) residents making direct investments and real estate investments abroad, if the opening of such accounts by investors (in their own name) is compulsory under the laws of the country where the investments are made; (3) resident public institutions; (4) licensed banks, in their own name, if required for their financial activities; (5) resident legal entities in the name of their representative office for the office’s activity; (6) residents opening accounts related to guarantee deposit if the guarantee amount does not exceed €10,000 (or its equivalent); (7) residents opening accounts aimed at performing operations related to loans/credits/guarantees from nonresidents, if the amount of a loan/credit/guarantee does not exceed €10,000 (or its equivalent). Residents may open payment accounts with nonresident payment service providers. |
| Accounts in domestic currency convertible into foreign currency | Yes. | Funds in leu-denominated accounts of resident individuals and legal entities with licensed banks may be freely converted through those banks to foreign exchange for any lawful purpose. Licensed banks may purchase foreign currency against domestic currency without restriction. The Law on Payment Services and Electronic Money allows resident nonbank payment service providers to carry out foreign currency exchange transactions closely related to the electronic money issuance or to the provision of payment services, which are subject to provisions of the foreign exchange legislation. |

This information can be found at the AREAER ONLINE database: http://www.elibrary-areaer.imf.org/Pages/Reports.aspx.

Nonresident Accounts

Foreign exchange accounts permitted | Yes. | Nonresident individuals and legal entities may freely open with licensed banks accounts in any foreign currency. These accounts may be credited with funds from abroad, through purchases in the domestic foreign exchange market, and from other legal sources. Nonresidents with foreign exchange accounts at licensed banks in Moldova are permitted to transfer the balances from these accounts. |
abroad or sell them in the foreign exchange market through licensed banks without restriction. Balances from these accounts may also be used for other operations as specified by law. Payments and transfers in Moldova between residents and nonresidents and between nonresidents may take place in domestic and foreign currency, except as indicated by law. Payments and transfers to and from the accounts of nonresident legal entities must take place through noncash transfers, unless explicitly allowed by law. Cash may be deposited in and withdrawn from nonresident individuals’ foreign exchange accounts without restriction. The law specifies the foreign exchange operations, including deposits in and withdrawals from accounts in foreign and domestic currency, which nonresidents may perform in cash or using payment instruments. Nonresident legal entities and individuals may open payment accounts in foreign currency with resident nonbank payment service providers, except for payment accounts related to the issuance of electronic money (that may be opened in domestic currency only). These accounts in foreign currency are for payments only and are subject to the foreign exchange legislation. Resident nonbank payment service providers may carry out foreign currency exchange transactions closely related to the electronic money issuance or to the provision of payment services.

Approval required  No.

**Domestic currency accounts**  Yes. Nonresident individuals and legal entities may freely open with licensed banks accounts in domestic currency. These accounts may be credited with funds obtained from the sale of foreign currency in the domestic foreign exchange market and from other legal sources. Nonresidents with leu accounts at licensed banks as well as on their payment accounts opened with resident nonbank payment services providers may transfer the balances from these accounts abroad or convert them to foreign currency in the foreign exchange market through licensed banks without restriction. Balances from these accounts may also be used for other operations according to the legislation. Payments and transfers to and from the accounts of nonresident legal entities must take place through noncash transfers, unless explicitly allowed by law. Cash may be deposited in and withdrawn from nonresident individuals’ accounts in domestic currency without restriction. The law specifies the foreign exchange operations, including deposits in and withdrawals from accounts in foreign and domestic currency, which nonresidents may perform in cash or using payment instruments. Nonresident legal entities and individuals may open payment accounts in domestic currency with resident nonbank payment service providers. These accounts are for payments only and are subject to the foreign exchange legislation. Resident nonbank payment service providers may carry out foreign currency exchange transactions closely related to the electronic money issuance or to the provision of payment services.

Convertible into foreign currency  Yes. Balances from leu accounts of nonresidents opened with licensed banks may be converted freely to foreign currency. Resident nonbank payment service providers may carry out foreign currency exchange transactions closely related to the electronic money issuance or to the provision of payment services, which are subject to provisions of the foreign exchange legislation.

Approval required  No.

**Blocked accounts**  No.

**References to legal instruments and hyperlinks**  This information can be found at the AREAER ONLINE database: http://www.elibrary-areaer.imf.org/Pages/Reports.aspx.
## Imports and Import Payments

Unless stipulated otherwise by law, goods must be imported and services rendered, as a rule, no later than two years from the date of advance payment. The value of all imported goods and rendered services must equal the amount paid. If a contract is not executed, the amount of the advance payment must be repatriated to Moldova no later than two years after such advance payment. However, the length of this period may vary, depending on the type of contract.

The following imports are subject to licensing for the purpose of consumer protection and to ensure compliance with domestic standards: dual-purpose goods and technologies, ammunition, military equipment, and special compounds for the manufacture thereof; explosive substances; nuclear products and technology; medicine, equipment for the manufacture of medicine, and medical equipment; chemicals; cultures for developing microorganisms; and stupefying or psychotropic materials and compounds for their derivation or production. Sugar imports are subject to authorization to monitor the volume of imports from countries that have signed FTAs with Moldova and are not members of the WTO (for example, Belarus) in conformity with Government Decision No. 134 of February 10, 2009. For WTO members, importation of sugar is performed on the basis of the first in first out principle and within the limits of tariff quotas, in conformity with Government Decision No. 114 of February 22, 2012. Sugar imports from EU members are based on a system for administration of tariff quotas that relies on the first in first out principle, under the registration in SIIV ASYCUDA World of the customs declaration.

The Republic of Moldova also applies preferential tariff rate quotas within FTAs, particularly within DCFTA with EU and with Turkey.

Payments for Invisible Transactions and Current Transfers

Controls on these transfers Yes. To perform payments and transfers, residents and nonresidents may purchase foreign currency from licensed banks and from resident nonbank payment service providers. Individuals may also purchase foreign currency from foreign exchange entities. Resident legal entities may make payments and transfers to nonresidents and residents abroad up to the amounts specified in the supporting documents submitted to licensed banks and to resident nonbank payment service providers.
Effective May 1, 2018, the resident legal entities may make noncash payments/transfers within foreign exchange operations without submission to the resident payment service providers of the justifying documents in the event that:
(1) transfers from the licensed bank account to its bank account opened with another licensed bank or with the foreign financial institution;
(2) transfers from the resident nonbank payment service providers account to its account opened with another resident payment service provider as well as in the case specified in item (4);
(3) transfers to other accounts of the resident legal entity (other than the resident payment service provider) opened with the same or another resident payment service provider;
(4) transfers by the resident legal entity (other than the licensed bank) to its accounts opened with the foreign financial institutions on the basis of the authorizations issued by the NBM, which provide for the possibility of making transfers into these accounts from the accounts opened with the resident payment service providers and do not contain the requirement of presentation of justifying documents to the resident payment service provider;
(5) payments/transfers abroad for the purposes stipulated in Art. 23
(1) letters a) and c) of the Law No. 62-XVI of March 21, 2008; (6) payment abroad of the state tax established by the legislation of the foreign state; (7) payments/transfers (other than those referred to in items (1) – (6) and transfers to their accounts, opened with foreign financial institutions without NBM authorization in the cases provided for in Art. 13 par. (5) letters b), c), e), and f) of the Law No. 62-XVI of March 21, 2008), where those represent payments/transfers in the amount not exceeding EUR 10,000 (or their equivalent) each payment/transfer, being performed within foreign exchange operations which are not subject to notification/authorization according to the Law No. 62-XVI of March 21, 2008. Effective May 1, 2018, resident individuals may make payments or transfers to nonresidents and residents abroad up to the amounts specified in the supporting documents submitted to licensed banks and to resident nonbank service providers, except as specified in NBM regulations (see below). The payments/transfers may be made by the resident individual in favor of nonresidents and abroad in favor of residents, in accordance with the Law No. 62-XVI of March 21, 2008, as follows: (1) without submission to the resident payment service provider of the justifying documents, in the event that the single payment/transfer meets both of the following conditions: (a) the payment/transfer in favor of a nonresident is made in the amount not exceeding EUR 10,000 (or their equivalent); (b) the payment/transfer is made within the foreign exchange operation that is not subject to notification/authorization according to the Law No. 62-XVI of March 21, 2008; (2) other cases than those indicated in sub-item (1) – when submitting to the resident payment service provider the justifying documents confirming the purpose of the payment/transfer and containing data on the amount of the payment/transfer. Effective May 1, 2018, the nonresident individual must be allowed to perform the transfer abroad of funds in foreign currency/domestic currency for the purpose of family expenses in favor of each family member – resident individuals who are staying abroad and nonresident individuals, as follows: (1) in the amount not exceeding EUR 10,000 (or their equivalent) – without presentation to the resident payment service provider the justifying documents; (2) in the amount exceeding EUR 10,000 (or their equivalent) – on submission to the resident payment service provider of the justifying documents: (a) confirming the membership of the family; (b) confirming the necessity for the payment/transfer to be made by the individual in favor of whom the transfer is made and containing data in the amount of the payment/transfer. The nonresident individual must be allowed to perform the payments/transfers in foreign currency abroad, other than those specified, as follows: (1) without submission to the resident payment service provider of the justifying documents, in the following cases: (a) transfer on his own name; (b) a payment/transfer in favor of an individual/legal entity in the amount not exceeding EUR 10,000 (or their equivalent); (2) a payment/transfer in favor of an individual/legal entity in other cases than those established in sub-item (1) – on submission to the resident payment service provider of the justifying documents confirming the necessity of making the payment/transfer and containing data on the amount of the payment/transfer.
Effective May 1, 2018, the nonresident legal entities must be allowed to perform noncash payments/transfers abroad without submitting to resident payment service providers of justifying documents in the event that:

1. the transfers are made on the name of the same account holder;
2. the payments/transfers are made by financial institutions from abroad;
3. transfers/payments are made by nonresident payment service providers in their quality of payment service providers/electronic money issuers;
4. payments/transfers are made by the representative offices of international organizations, by diplomatic missions, consular offices, and other official representative offices of foreign states accredited in the Republic of Moldova, as well as by international organizations;
5. payments/transfers are made by nonresident legal entities which are institutions implementing technical assistance projects/foreign financing projects for the Republic of Moldova, for purposes related to implementation of the projects, only in relation to individuals;
6. payment of state tax established by the legislation of the foreign state;
7. payments/transfers other than those referred to in items (1) – (6) in the amount not exceeding EUR 10,000 (or their equivalent) each payment/transfer.

No.

Indicative limits/bona fide test
Yes. Payments are permitted up to the amount set forth in the supporting documents.
Effective May 1, 2018, individuals/legal entities are allowed to make payments in the amount of up to €10,000 (previously €1,000) or its equivalent, without the submission of supporting documents.

Personal payments
Yes.

Prior approval
No.

Quantitative limits
No.

Indicative limits/bona fide test
Yes.

Effective May 1, 2018, the following apply to current payments and transfers abroad (in foreign and domestic currency) by resident individuals a transaction:

1. for family expenses: (a) a transfer in the amount not exceeding EUR 10,000 (previously €1,000) (or their equivalent) – without submission to the resident payment service provider of the justifying documents; (b) a transfer in the amount of over EUR 10,000 (previously €1,000) (or their equivalent) – on submission to the resident payment service provider of the documents: (i) confirming family membership; (ii) confirming the need for the payment/transfer to be made by the individual in favor of whom the transfer is made and containing data on the amount of the payment/transfer;

2. in the resident’s name for current expenses during a temporary stay abroad: (a) a transfer in the amount not exceeding EUR 10,000 (or their equivalent) – without the submission of the justifying documents to the resident payment service provider; (b) a transfer in the amount exceeding EUR 10,000 (or their equivalent) – on submission to the resident payment service provider of the documents: (i) confirming the fact of temporary stay abroad (for example, confirmation from a foreign educational institution, a medical institution or from workplace abroad, the temporary residence permit in the respective foreign state); (ii) confirming the necessity of performing the payment/transfer by the individual and containing data regarding the amount of the payment/transfer;

3. in the resident’s name to obtain an entry visa, on submission of documentation confirming the reason for the visit and the need for funds abroad: (a) a transfer in the amount not exceeding EUR 10,000 (or their equivalent) – without the submission of the justifying documents to the resident payment service provider; (b) a transfer in the amount exceeding EUR 10,000 (or their equivalent) – on submission to the resident payment service provider of: (i) the document/information confirming the need of availability of funds abroad on the name of the respective individual to obtain a visa and containing data on the amount of necessary funds (for example, the document/information of the diplomatic mission of the foreign state that specifies the requirement to deposit funds to the account opened with a foreign bank to obtain an entry visa and the amount necessary to be deposited); (ii) the documents confirming the purpose/reason of the visit, required for the submission to the respective diplomatic mission/consular office to obtain the respective visa; and

4. for the benefit of a nonresident in other cases: (a) without submission to the resident payment service provider of the justifying documents, in the event that the single payment/transfer meets both of the following conditions: (i) the payment/transfer in favor of a nonresident is made in the amount not exceeding EUR 10,000 (or their equivalent); (ii) the payment/transfer is made within the foreign exchange operation that is not subject to notification/authorization according to the Law No. 62-XVI of March 21, 2008; (b) other cases than those indicated in sub-item (1) – when submitting to the resident
payment service provider the justifying documents confirming the purpose of the payment/transfer and containing data on the amount of the payment/transfer.

Effective May 1, 2018, the following apply to current payments and transfers abroad (in foreign and domestic currency) by nonresident individuals:

(1) transfer abroad for family expenses: (a) in the amount not exceeding EUR 10,000 (previously €1,000) (or their equivalent) – without presentation to the resident payment service provider the justifying documents;
(b) in the amount exceeding EUR 10,000 (previously €1,000) (or their equivalent) – on submission to the resident payment service provider of the justifying documents: (i) confirming the membership of the family; (ii) confirming the necessity for the payment/transfer to be made by the individual in favor of whom the transfer is made and containing data in the amount of the payment/transfer; and
(2) other payments and transfers abroad: (a) without submission to the resident payment service provider of the justifying documents in the following cases: (i) transfer on his own name; (ii) a payment/transfer in favor of an individual/legal entity in the amount not exceeding EUR 10,000 (or their equivalent); (b) a payment/transfer in favor of an individual/legal entity in other cases than those established in sub-item (1) – on submission to the resident payment service provider of the justifying documents confirming the purpose of making the payment/transfer and containing data on the amount of the payment/transfer.

Foreign workers' wages  No.
Prior approval  No.
Quantitative limits  No.
Indicative limits/bona fide test  No.
Credit card use abroad  Yes. International cards may be issued to individuals and legal entities against resident and nonresident accounts with licensed banks. International cards issued against lei or foreign exchange accounts of resident individuals may be used abroad for up to €10,000 or its equivalent a month for withdrawal of cash or traveler’s checks. Resident individuals’ cards may be used abroad for payments and transfers in accordance with the foreign exchange legislation without quantitative limits. Resident legal entities may use international cards issued against their accounts for foreign exchange operations in accordance with the foreign exchange legislation without quantitative limits.

Prior approval  No.
Quantitative limits  Yes. International cards issued against leu or foreign exchange accounts of resident individuals may be used abroad for up to €10,000 or its equivalent a month for withdrawal of cash or traveler’s checks.
Indicative limits/bona fide test  Yes. Effective May 1, 2018, the rules for payments and transfers associated with current foreign exchange operations of resident made with the use of their cards abroad are the same as for noncash payments and transfers.

Other payments  Yes.
Prior approval  No.
Quantitative limits  No.
Effective May 1, 2018, payments are permitted up to the amount set forth in the supporting documents, except:

1. The resident legal entities:
   - (a) transfers from the licensed bank account to its bank account opened with another licensed bank or with the foreign financial institution;
   - (b) transfers from the resident nonbank payment service provider account to its account opened with another resident payment service provider as well as in the case specified in letter (d);
   - (c) transfers to other accounts of the resident legal entity (other than the resident payment service provider) opened with the same or another resident payment service provider;
   - (d) transfers by the resident legal entity (other than the licensed bank) to its accounts opened with the foreign financial institutions on the basis of the authorizations issued by the NBM, which provide for the possibility of making transfers into these accounts from the accounts opened with the resident payment service providers and do not contain the requirement of presentation of justifying documents to the resident payment service provider;
   - (e) payments/transfers abroad for the purposes stipulated in Art. 23 par. (1) letters a) and c) of the Law No. 62-XVI of March 21, 2008;
   - (f) payment abroad of the state tax established by the legislation of the foreign state;
   - (g) payments/transfers (other than those referred to in letters (a) – (f), where those represent payments/transfers in the amount not exceeding EUR 10,000 (or their equivalent) each payment/transfer, being performed within foreign exchange operations which are not subject to notification/authorization according to the Law No. 62-XVI of March 21, 2008.

2. The resident individual:
   - (a) the payment/transfer in favor of a nonresident is made in the amount not exceeding EUR 10,000 (or their equivalent);
   - (b) the payment/transfer is made within the foreign exchange operation that is not subject to notification/authorization according to the Law No. 62-XVI of March 21, 2008;

3. The nonresident individual:
   - (a) transfer on his own name;
   - (b) a payment/transfer in favor of an individual/legal entity in the amount not exceeding EUR 10,000 (or their equivalent);

4. The nonresident legal entities:
   - (a) the transfers are made on the name of the same account holder;
   - (b) the payments/transfers are made by financial institutions from abroad;
   - (c) transfers/payments are made by nonresident payment service providers in their quality of payment service providers/electronic money issuers;
   - (d) payments/transfers are made by the representative offices of international organizations, by diplomatic missions, consular offices, and other official representative offices of foreign states accredited in the Republic of Moldova, as well as by international organizations;
   - (e) payments/transfers are made by nonresident legal entities which are institutions implementing technical assistance projects/foreign financing projects for the Republic of Moldova, for purposes related to implementation of the projects, only in relation to individuals;
   - (f) payment of state tax established by the legislation of the foreign state;
   - (g) payments/transfers other than those referred to in letters (a) – (f) in the amount not exceeding EUR 10,000 (or their equivalent) each payment/transfer.

Proceeds from Invisible Transactions and Current Transfers

Repatriation requirements: Yes. Unless stipulated otherwise by law, proceeds received by resident legal entities from invisible transactions must be repatriated to Moldova, as a rule, no later than two years from the date the services are provided as stipulated in the confirming documents. If services are not rendered by nonresidents to resident legal entities, any advance payment must be repatriated no later than two years after payment.

Surrender requirements: No.

Surrender to the central bank: No.

Surrender to authorized dealers: No.

Restrictions on use of funds: No.

Capital Transactions

Controls on capital transactions: Yes. According to the Law on Foreign Exchange Regulation, capital transactions do not require NBM approval, except as specified by law. NBM approval is required for certain capital transactions of residents that imply capital outflow. The authorization regime does not generally apply to (1) capital foreign exchange operations involving the MOF and the NBM, (2) capital foreign exchange operations with national public budget funds, and (3) foreign exchange operations related to guarantees as laid down in Article 4 item 12 of the Law No. 184 of July 22, 2016, on financial collateral arrangements. Operations involving receipt by residents from nonresidents of certain categories of loans and credits and guarantees must be notified by residents to the NBM for statistical purposes. When amount of a loan/credit/guarantee from nonresident does not exceed €50,000 or its equivalent, it is not subject to notification to the NBM. Foreign exchange operations related to guarantees as laid down in Article 4 item 12 of the Law No. 184 of July 22, 2016, on financial collateral arrangements are not subject to notification to NBM. The NBM approval for capital transactions of residents that imply capital outflow does not generally apply to foreign exchange operations not exceeding EUR 10,000 (or their equivalent). Capital foreign exchange transactions are subject, among other requirements, to submission of supporting documents to the licensed bank and to resident nonbank payment service providers, except as specified under NBM regulations. To make such payments, foreign currency may be purchased from licensed banks and resident nonbank payment service providers.

Repatriation requirements: Yes. Proceeds received by resident legal entities from capital transactions must be repatriated to Moldova unless a specific exemption has been granted by law. Law No. 1466 of January 29, 1998, on Regulation of Repatriation of Funds, Goods, and Services, Obtained from External Economic Transactions regulates the repatriation of proceeds by resident legal entities in Moldova. The repatriation period depends on the type of contract as specified in Article 3 “Deadlines of repatriation of funds, goods, and services originating from foreign economic transactions.”

Surrender requirements: No.
Surrender to the central bank  No.
Surrender to authorized dealers  No.

Controls on capital and money market instruments  Yes.

Issuance in Moldova of securities denominated in foreign currency is not permitted. The procedures for purchases of government securities by foreign investors at auction are similar to those for local investors. Effective July 31, 2018, a foreign investor may purchase government securities of a single international securities identification number (ISIN) according to the purchase limit of government securities, if it is announced in Communiqué of government securities placement. A noncompetitive bid submitted by an investor for government securities may not exceed more than 3% of the indicative volume of the issue announced at the reference auction, under a single ISIN.

On capital market securities  Yes.

Shares or other securities of a participating nature  Yes.

According to the Law on the NCFM in case of violations in the securities market, to protect the rights of investors and the public, the NCFM may suspend the placement and circulation of securities admitted on the regulated market, outside regulated market, or multilateral trading facility (MTF), as well as clearing and settlement of transactions. According to the amendments to the Law on Capital Market regarding information disclosure, if the shareholder has acquired or alienated the voting shares of an issuer considered a public interest entity, the shareholder is required to inform the issuer and the NCFM within four working days of acquisition or alienation, if, after the transaction, the share reaches, exceeds, or falls below 5%, 10%, 15%, 20%, 25%, 33%, 50%, 66%, 75%, or 90%. The company must disclose information about its activity in accordance with this law, the Capital Market Law, and the normative acts of the NCFM. Therewith, an issuer that is considered to be a public interest entity will disclose publicly the information. The number of shares granting control over the company must be determined by the conditions for exercising control in the situations established by the capital market legislation. The natural or legal person that holds, directly or indirectly, alone or together with the persons acting in concert with it, more than 50% of the voting shares, which are in the circulation of the company or of the securities that can be converted or offer the right to purchase the voting shares, is obliged to carry out a mandatory takeover bid within three months from the date of making subscriptions (in the register of shareholders) regarding acquisition of shares. Up to the fulfillment of the requirements mentioned above, the person holding more than 50% has the right to vote at the general meeting of the shareholders within 25% of the voting shares, which are in the circulation of the company. The total number of voting shares belonging to this person must be taken into account only for the establishment of the quorum at the holding of the general meeting of the shareholders. The person holding more than 50% and/or its representatives is registered with the entire stock of securities held. The takeover bid may be initiated only in respect of securities issued by public interest entities. A mandatory takeover bid can be carried out by: (1) A natural or legal person who holds, directly or indirectly, alone or together with persons acting in concert, more than 50% of the voting rights of a company or transferable securities or offers the right to purchase the securities with the right to vote, is obliged to make a takeover bid regarding the purchase at a fair price of securities of the same class held by other persons; (2) A legal person who directly or indirectly owns more than 50% of all the voting securities of an issuer must be obliged to
initiate a mandatory takeover bid whenever its founders change (associations or shareholders) who, together with the persons with whom they act in concert, hold a majority of the voting rights in that legal person. The takeover bid is voluntary if the bidder, failing this obligation, submits a takeover bid related to the purchase of a number of voting securities of an issuer that pursues or aims to obtain more than 50% of the total number of these securities. A takeover bid prospectus is approved by the NCFM and must be published within seven working days. A minority shareholder, who obtained the shares against patrimonial vouchers or its legal successor, may require the acquisition of its shares by a person who alone or with affiliates owns more than 90% of the total number of voting shares. The price offered for the shares of minority shareholders must equal at least the highest of the following: (1) the weighted average share price in transactions over the 12 months preceding the date of notification of the application, (2) the per share net asset value (NAV) in accordance with the issuer’s latest financial position, (3) the per share market value of net assets, calculated by the censors committee on the basis of the valuation report drawn up by a specialized organization which is not a related party of the company, or (4) the nominal (set) value of shares. The majority shareholder, within 30 working days of receipt of the application, must notify the minority shareholder of the fixed price according to the criteria mentioned above. Payment for the shares by the majority shareholder may take place with the consent of the minority shareholder at a price in accordance with the application within 30 working days of acceptance of the price. The stock exchange must disclose the following information for securities admitted on the regulated market or a MTF: (1) date and time of the transaction, (2) class and government registration number of the securities traded, (3) price per security, (4) type of transaction, and (5) amount and share of securities in the transaction of the respective class. Insiders may purchase and sell securities of the issuer if information that could influence the securities price is disclosed before the purchase and the price are established according to the securities market law. The Regulation on licensing and authorization on the capital market set requirements for granting, suspending, and withdrawing licenses and authorizations on the capital market according to the EU Directives. It stipulates new requirements for equity capital, internal policies, internal control, entity’s management, technical audit for registrars, approval of delegated agents and accepted persons, evaluation procedure of qualified holdings in the investment firm, market operator, and central depository (NCFM Decision No. 56/11). In a transaction with financial instruments admitted on a regulated market, outside regulated market, or a MTF, investment firms must disclose information on the volume, price, and data of these transactions. For transactions in financial instruments admitted to trading outside regulated markets or MTFs, reports must be submitted to the NCFM no later than one working day after the transaction as prescribed by the NCFM. Licensed/authorized entities must also disclose other information on their activity according to the law. Reports on events and actions affecting the financial and economic activities of the issuer must be published by the issuer in accordance with the normative acts. The Rules of the regulated market of the Moldova Stock Exchange were approved by NCFM Decision No. 23/3 of May 8, 2015, published in the Official Gazette No. 115-123/758 of May 15, 2015. Previous rules were repealed and the new rules stipulate new requirements for admission of issuers on the regulated market and additional requirements on information disclosure, introduce the requirement for approval by the supervisory
authority of the manager and members of the council and the requirement for technical audit of the information system, increase the minimum amount for equity capital to €100,000 within three years up to €1 million within 10 years. The Instruction on reporting of licensed and authorized entities on the capital market was approved by NCFM Decision No. 38/5 of July 3, 2015. The new Instruction on reporting provides requirements on the reporting method and conditions for legal entities authorized and licensed to provide services on the capital market. It includes provisions regarding the conditions for information disclosure and principles to which the reports should comply.

Purchase locally by nonresidents  Yes.

Foreign investors must purchase securities of issuers registered in Moldova as set forth in the legislation. The shareholders of professional participants in securities markets may be any natural or legal persons. Proposed acquirer must notify the NCFM in writing before the acquisition of shares placed by an investment firm if they intend to obtain a qualifying holding or increase their holding at a level equal to or exceeding 20%, 30%, or 50% of the share capital. The NCFM will in no more than 60 working days from the date of acknowledgment review the documents submitted by the potential acquirer and assess the reputation of the proposed acquirer, the reputation and experience of any person who will manage the investment, and the financial soundness of the proposed acquirer. Particular attention will be paid to the type of business the investment firm intends to carry out. In case of rejection of the proposed acquisition, the potential acquirer will be notified on the day the notice is issued. The NCFM rejects the proposed procurement draft if the result of the assessment reflects that a qualifying holding is or will be directly or indirectly held by persons resident in jurisdictions where there are not implemented international standards of transparency.

Sale or issue locally by nonresidents  Yes.

Foreign securities for public offering in Moldova must be in the form of Moldovan depository receipts (MDRs). According to Article 9 of the Law on Capital Markets (1) MDRs may be issued only on shares and bonds of foreign issuers subject to registration by the relevant foreign authority. (2) MDR issuance may not exceed the market value of the underlying shares and bonds issued by foreign issuers at the time of issuance. (3) The issuer of the MDRs is obligated to (a) pay dividends and any other payments paid by the foreign issuer to the holders of MDRs; (b) repurchase the MDRs at the request of their holders; (c) publicly disclose and/or submit to MDR holders the financial reports and any other information disclosed by foreign issuers. (4) The issuer of the MDRs may not (a) issue the MDRs for a longer maturity than the term of the underlying shares and bonds issued by the foreign issuers; (b) sell the underlying shares and bonds issued by the foreign issuer before the maturity of the MDRs. (5) The issuer of the MDRs may request payment for the activities laid down in paragraph (3) subpara. (a) and (b), which is to be set out in the decision of issuance of the MDRs and not changed before the term of maturity of the MDRs. (6) In case of insolvency of the issuer of MDRs, shares and bonds of foreign issuers as well as dividends and any other payments paid by the foreign issuer will not be included in the debtor mass and will be used to repurchase the MDRs from their holders. Issuance of MDRs requires registration with the NCFM. Issuance in Moldova of securities denominated in foreign currency is not permitted. According to the Law on Foreign Exchange Regulation, purchases by residents from nonresidents of foreign financial instruments are subject to NBM approval as follows: (1) purchases by residents of foreign financial instruments within the admission thereof to the local capital market through sale by the

**Purchase abroad by residents**

Yes. According to the Law on Foreign Exchange Regulation, NBM approval is required for purchases by residents of foreign financial instruments as follows: (1) on a foreign stock exchange or (2) on the OTC foreign capital market. NBM approval is not required for purchases of foreign financial instruments, as follows: (1) by licensed banks, as well as the entities whose activity is regulated and supervised by the NCFM; (2) by other residents where: (a) amount of operation does not exceed €10,000 (or its equivalent); or (b) financial instruments are issued by international organizations.

**Sale or issue abroad by residents**

Yes. The NCFM registers the securities issued by residents in Moldova and issues permits for securities to circulate outside the country.

**On money market instruments**

Yes. The procedures for purchasing government securities by foreign investors at auction are similar to those for local investors. Effective July 31, 2018, a foreign investor may purchase government securities within a single ISIN according to the purchase limit of government securities, if it is announced in Communique of government securities placement. A noncompetitive bid submitted by an investor for government securities may not exceed more than 3% of the indicative volume of the issue announced at the reference auction, under a single ISIN.

**Purchase locally by nonresidents**

Yes. According to the Law on Foreign Exchange Regulation, purchases by residents from nonresidents of foreign financial instruments on the local money market, including through sale by the issuer, are subject to NBM approval. NBM approval is not required for purchases of foreign financial instruments, as follows: (1) by licensed banks, as well as the entities whose activity is regulated and supervised by the NCFM; (2) by other residents where: (a) amount of operation does not exceed €10,000 (or its equivalent); or (b) financial instruments are issued by international organizations. Foreign securities for public offering in Moldova must be in the form of MDRs. According to Article 9 of the Law on Capital Markets (1) MDRs may be issued only on shares and bonds of foreign issuers subject to registration by the relevant foreign authority. (2) MDR issuance may not exceed the market value of the underlying shares and bonds issued by foreign issuers at the time of issuance. (3) The issuer of the MDRs must (a) pay dividends and any other payments paid by the foreign issuer to the holders of MDRs; (b) repurchase the MDRs at the request of their holders; (c) publicly disclose and/or submit to MDR holders the financial reports and any other information disclosed by foreign issuers. (4) The issuer of the MDRs may not (a) issue the MDRs for a longer maturity than the term of the underlying shares and bonds issued by the foreign issuers; (b) sell the underlying shares and bonds issued by the foreign issuer before the term of maturity of the MDRs. (5) The issuer of the MDRs may request payment for the activities laid down in paragraph (3) subpara. (a) and (b), which is to be set out in the decision of issuance of the MDRs and not changed before the maturity of the MDRs. (6) In case of insolvency of the issuer of MDRs, shares and bonds of foreign issuers as well as dividends and any other payments paid by the foreign issuer will not be included in the debtor mass and will be used to repurchase the MDRs from their holders. Issuance of MDRs requires NCFM registration.

**Sale or issue locally by nonresidents**

Yes. According to the Law on Foreign Exchange Regulation, purchases by residents from nonresidents of foreign financial instruments on the local money market, including through sale by the issuer, require NBM approval. NBM approval is not required for purchases of foreign financial instruments.
instruments, as follows: (1) by licensed banks, as well as the entities whose activity is regulated and supervised by the NCFM; (2) by other residents where: (a) amount of operation does not exceed €10,000 (or its equivalent); or (b) financial instruments are issued by international organizations.

Sale or issue abroad by residents

No. According to the Law on Foreign Exchange Regulation and Law on Capital Market no controls apply to the sale or issue abroad by residents of these instruments.

On collective investment securities

Yes. The provisions of the Law on Foreign Exchange Regulation governing transactions regarding purchases by residents of foreign financial instruments on the capital market apply.

Purchase locally by nonresidents

No. Under the Law on Foreign Exchange Regulation and Law on Capital Market, there is no control on purchases locally by nonresidents of collective investment securities.

Sale or issue locally by nonresidents

Yes. According to the Law on Foreign Exchange Regulation, NBM approval is required for purchases by residents from nonresidents of foreign financial instruments as follows: (1) within their admission to the local capital market through sale by the issuer; and (2) on the OTC local capital market. NBM approval is not required for purchases of foreign financial instruments from nonresidents, as follows: (1) by licensed banks, as well as the entities whose activity is regulated and supervised by the NCFM; (2) by other residents where: (a) amount of operation does not exceed €10,000 (or its equivalent); or (b) financial instruments are issued by international organizations.

Purchase abroad by residents

Yes. According to the Law on Foreign Exchange Regulation, NBM approval is required for purchases by residents of foreign financial instruments as follows: (1) on a foreign stock exchange or (2) on the OTC foreign capital market. NBM approval is not required for purchases of foreign financial instruments as follows: (1) by licensed banks, as well as the entities whose activity is regulated and supervised by the NCFM; (2) by other residents where: (a) amount of operation does not exceed €10,000 (or its equivalent); or (b) financial instruments are issued by international organizations.

Sale or issue abroad by residents

No. According to the Law on Foreign Exchange Regulation and Law on Capital Market, no controls apply to the sale or issue abroad by residents of these instruments.

Controls on derivatives and other instruments

Yes. According to the Law on Foreign Exchange Regulation, nonresidents may purchase on the local foreign exchange market through authorized participants foreign currency against other foreign currency and domestic currency without restriction.

Purchase locally by nonresidents

No. According to the Law on Foreign Exchange Regulation, nonresidents may purchase on the local foreign exchange market through authorized participants foreign currency against other foreign currency and domestic currency without restriction. NBM approval is required for purchases from nonresidents of foreign derivatives and other instruments by residents. NBM approval is not required for purchases of foreign derivatives and other instruments, as follows: (1) by licensed banks, as well as the entities whose activity is regulated and supervised by the NCFM; (2) by other residents where: (a) amount of operation does not exceed €10,000 (or its equivalent); or (b) derivatives are issued by international organizations.

Sale or issue locally by nonresidents

Yes. According to the Law on Foreign Exchange Regulation, nonresidents may sell on the local foreign exchange market through authorized participants foreign currency against other foreign currency and domestic currency without restriction. NBM approval is required for purchases from nonresidents of foreign derivatives and other instruments by residents. NBM approval is not required for purchases of foreign derivatives and other instruments, as follows: (1) by licensed banks, as well as the entities whose activity is regulated and supervised by the NCFM; (2) by other residents where: (a) amount of operation does not exceed €10,000 (or its equivalent); or (b) derivatives are issued by international organizations.

Purchase abroad by residents

Yes. According to the Law on Foreign Exchange Regulation, purchases of foreign exchange abroad by residents are subject to NBM approval, except for (1) licensed banks; (2) resident individuals who are staying abroad temporarily; (3) resident legal entities and resident
individuals who have accounts abroad and conduct exchange operations according to the regime of the respective account established under the legislation of Moldova; and (4) other residents, where the amount of a currency exchange operation does not exceed €10,000 (or its equivalent). NBM approval is required for purchases of foreign derivatives and other instruments by residents. NBM approval is not required for purchases of foreign derivatives and other instruments, as follows: (1) by licensed banks, as well as the entities whose activity is regulated and supervised by the NCFM; (2) by other residents where: (a) amount of operation does not exceed €10,000 (or its equivalent); or (b) derivatives are issued by international organizations.

Sale or issue abroad by residents

Yes. The NCFM registers securities issued by residents in Moldova and issues permits for securities to circulate outside the country. According to the Law on Foreign Exchange Regulation, sale of foreign exchange abroad by residents is subject to NBM approval, except for (1) licensed banks; (2) resident individuals who are staying abroad temporarily; (3) resident legal entities and resident individuals who have accounts abroad and conduct exchange operations according to the regime of the respective account established under the legislation of Moldova; and (4) other residents, where the amount of a currency exchange operation does not exceed €10,000 (or its equivalent).

Controls on credit operations

Yes. Credit operations contracted or guaranteed by the government and by administrative-territorial units, as well as credit operations contracted by government and municipal companies, as well as by businesses with more than 50% of statutory capital held by government and/or administrative-territorial units do not have to be notified to the NBM. According to amendments in the Law on Public Debt, State Guarantees and State On-Lending, the notion of public debt was changed to the notion of public sector debt (Law No. 89 of May 29, 2014), which implies changes to the applicable categories of credit operations.

Commercial credits

Yes. Residents must comply with the repatriation period provided for by the relevant legislation. NBM approval is not required for commercial loans or credits provided by residents, including licensed banks to nonresidents.

By residents to nonresidents

Yes. Notification to the NBM is required for interest-bearing commercial loans and credits, except for factoring operations for which the nonresident factor assumes the risk of the nonresident debtor’s insolvency. Also, notification to NBM is not required if the amount of a commercial loan/credit does not exceed €50,000 (or its equivalent). There are no other requirements in addition to the notification to the NBM.

Financial credits

Yes. NBM approval is required except for the following: (1) financial leasing, (2) credits granted by licensed banks, and (3) other loans/credits of which value does not exceed €10,000 (or its equivalent).

By residents to nonresidents

Yes. Notification to the NBM is required for financial loans or credits, except for (1) interbank credits with an initial repayment period of less than one year and (2) loans or credits received from nonresidents through credit cards issued by nonresidents at a resident’s request. However, notification to NBM is not required if the amount of a loan/credit does not exceed €50,000 (or its equivalent). There are no other requirements in addition to the notification to the NBM.
Guarantees, sureties, and financial backup facilities

By residents to nonresidents Yes. NBM approval is required for the issuance by a resident nonbank guarantor of a guarantee (1) based on a transaction between two nonresidents and (2) in the form of a deposit guarantee. However, NBM approval is not required if the amount of a guarantee does not exceed €10,000 (or its equivalent).

To residents from nonresidents No. Notification for statistical purposes to the NBM is required for guarantees issued by a nonresident guarantor based on a transaction between two residents. However, notification to the NBM is not required if the amount of a guarantee does not exceed €50,000 (or its equivalent). Guarantees issued by a nonresident guarantor based on a transaction between a resident and a nonresident, as well as foreign exchange operations related to guarantees as laid down in Article 4 item 12 of the Law No. 184 of July 22, 2016, on financial collateral arrangements are not subject to notification to the NBM.

Controls on direct investment

Outward direct investment No. Under the Law on Foreign Exchange Regulation, long-term loans and credits for a period longer than five years, for the purpose of establishing or maintaining lasting economic links, as well as any other types of outward direct investments are not subject to NBM authorization.

Inward direct investment Yes. Long-term loans and credits (for a period longer than five years) in an amount exceeding €50,000 (or its equivalent), for the purpose of establishing or maintaining lasting economic links, are subject to notification to the NBM for statistical purposes. Within the framework of direct investment, nonresidents may not own agricultural land and forests.

Controls on liquidation of direct investment No. Foreign investors may transfer abroad funds obtained domestically as a result of liquidation of direct investment after having fulfilled fiscal obligations.

Controls on real estate transactions

Purchase abroad by residents No.

Purchase locally by nonresidents Yes. Nonresidents may own property in Moldova, except agricultural land and forests.

Sale locally by nonresidents Yes. Agricultural land and forests inherited by nonresidents in accordance with Moldovan law may be sold only to resident individuals or legal entities.

Controls on personal capital transactions

Loans

By residents to nonresidents Yes. NBM approval is required for loans by resident individuals to nonresident individuals, except for loans not exceeding €10,000 or its equivalent.

To residents from nonresidents No.

Gifts, endowments, inheritances, and legacies

By residents to nonresidents Yes. Resident individuals may grant to nonresident individuals donations in various forms (gifts, grants) with NBM approval, except for donations not exceeding €10,000 or its equivalent. Funds in the form of inheritances or legacies from residents to nonresidents may be transferred abroad without NBM approval.

To residents from nonresidents No.

### Provisions Specific to the Financial Sector

#### Provisions specific to commercial banks and other credit institutions

Yes.

The acquisition by the bank of any qualifying holding in a foreign entity is subject to the prior approval of the NBM if, as a result of the acquisition, the entity must be included in the scope of prudential consolidation. The total net MDL exposure of a bank indexed to foreign currency to individuals, including those engaged in entrepreneurial or other activities, may not exceed 30% of eligible capital, of which total net exposure, other than mortgages, may not exceed 10% of eligible capital of banks. Residents of jurisdictions that do not implement international transparency standards may not hold directly or indirectly equity shares in the capital of banks. The mechanism for setting up a branch of a foreign bank provides for requirements related to licensing, endowment capital (which have to be the same as the capital that a bank must maintain) and conditions for carrying out the activity.

#### Borrowing abroad

Yes.

Notification to the NBM is required for (1) financial loans and credits, except for (a) interbank loans with an initial repayment period of less than one year and (b) loans and credits received from nonresidents through credit cards issued by nonresidents at a resident’s request; (2) commercial loans and credits bearing interest, except for factoring operations in which the nonresident factor assumes the risk for the nonresident debtor’s insolvency; and (3) loans/credits within operations related to direct investments. However, notification to NBM is not required if the amount of a loan/credit does not exceed €50,000 (or its equivalent). Licensed SCAs may not perform activity abroad or in foreign currency. Effective October 1, 2018, with regard to the activity of nonbank credit organizations, there are no restrictions.

#### Maintenance of accounts abroad

Yes.

Licensed banks may open accounts with financial institutions. Based on the Law on Foreign Exchange Regulation, the information is introduced to clarify the type of institutions with which residents may open account abroad based on the NBM’s approval in foreign and domestic currency necessary for carrying out financial activities without the NBM’s approval. Under the foreign exchange legislation, credit institutions other than licensed banks may open accounts with financial institutions abroad with the NBM’s approval.

#### Lending to nonresidents (financial or commercial credits)

No.

The NBM’s approval is not required for financial loans or credits granted by licensed banks to nonresidents. The NBM’s approval is not required for commercial loans or credits provided by licensed banks to nonresidents.

#### Lending locally in foreign exchange

Yes.

Licensed banks may grant foreign currency loans to residents as follows: (1) for payments and transfers with nonresidents, (2) for repayment of other credits received from licensed banks for the purpose of payments and transfers with nonresidents, (3) for purposes provided for in the credit agreements concluded between...
the Moldovan government and nonresidents and between licensed
banks and international financial organizations, (4) for interbank
lending related to the financial activities of licensed banks, (5) to
resident legal entities involved in exports of goods (including leased
assets) and services against financial means in foreign currency, and
(6) to legal entities engaged in insurance, leasing, and microfinancing
activity.

**Reserve requirements**

<table>
<thead>
<tr>
<th>Yes.</th>
</tr>
</thead>
</table>

The required reserve ratio in Moldovan lei and freely convertible currency (US dollar and euro) was at the same level of 11% (NBM Decision No. 10 of January 27, 2011). Since the period of July 8, 2011–August 7, 2011, the required reserve ratio in MDL and freely convertible currency (US dollar and euro) was at the same level of 14% (NBM Decision No. 109 of May 26, 2011). As from the beginning of 2015, the required reserve ratio in MDL increased gradually as follows:

- from the period February 8, 2015–March 7, 2015–16% (NBM Decision No. 25 of January 29, 2015);
- from the period March 8, 2015–April 7, 2015–18% (NBM Decision No. 25 of January 29, 2015);
- from the period June 8, 2015–July 7, 2015–20% (NBM Decision No. 119 of April 30, 2015);
- from the period July 8, 2015–August 7, 2015–22% (NBM Decision No. 139 of May 28, 2015);
- from the period August 8, 2015–September 7, 2015–26% (NBM Decision No. 165 of June 25, 2015);
- from the period September 8, 2015–October 7, 2015–32% (NBM Decision No. 200 of July 30, 2015);
- from the period October 8, 2015–November 7, 2015–35% (NBM Decision No. 3 of August 26, 2015);
- from the period April 8, 2017–May 7, 2017–37% (NBM Decision No. 73 of March 27, 2017);
- from the period May 8, 2017–June 7, 2017–40% (NBM Decision No. 102 of April 27, 2017);
- from the period September 16, 2018–October 15, 2018–42.5% (NBM Decision No. 220 of September 4, 2018).

The required reserve ratio applied to freely convertible currency has remained unchanged at the level of 14% by July 15, 2019. Starting with July 16, 2019, it is 17% (NBM Decision No. 170 as of June 16, 2019).

Liquid asset requirements No.
Interest rate controls No.
Credit controls No.
Investment regulations Yes.

Abroad by banks Yes. According to the Law on Foreign Exchange Regulation, purchases by licensed banks of foreign financial instruments do not require NBM approval. However, under the Law on Banking Activity, the acquisition by the bank of any qualifying holding in a foreign entity is subject to the prior approval of the NBM if, as a result of the acquisition, the entity must be included in the scope of prudential consolidation.

In banks by nonresidents Yes. Residents of jurisdictions that do not implement the international transparency standards may not hold direct or indirect equity interests in the capital of banks. Banks and foreign bank branches are established in the same conditions stipulated in the Law on Banking Activity and Law on State Registration of Legal Entities and Individual Entrepreneurs No. 220-XVI from October 19, 2007. Foreign banks are allowed to establish branches in the Republic of Moldova without legal personality, with the condition that existing legislative framework in the country of origin and/or its application does not prevent the exercise of the National Bank supervisory functions.

Open foreign exchange position limits Yes. Balance sheet foreign exchange assets may not exceed 125% or be less than 75% of balance sheet foreign exchange liabilities. The open long or short foreign exchange position limit for each currency may not, respectively, exceed or be less than 10% of the regulatory capital. The open long or short foreign exchange position limit for all currencies may not, respectively, exceed or be less than 20% of regulatory capital.

On resident assets and liabilities Yes. Limits on open foreign exchange positions apply equally to assets and liabilities of residents and nonresidents. Balance sheet foreign exchange assets may not exceed 125% or be less than 75% of balance sheet foreign exchange liabilities. The open long or short foreign exchange position limit for each currency may not, respectively, exceed or be less than 10% of the regulatory capital. The open long or short foreign exchange position limit for all currencies may not, respectively, exceed or be less than 20% of regulatory capital.

On nonresident assets and liabilities Yes. Limits on open foreign exchange positions apply equally to assets and liabilities of residents and nonresidents. Balance sheet foreign exchange assets may not exceed 125% or be less than 75% of balance sheet foreign exchange liabilities. The open long or short foreign exchange position limit for each currency may not, respectively, exceed or be less than 10% of the regulatory capital. The open long or short foreign exchange position limit for all currencies may not, respectively, exceed or be less than 20% of regulatory capital.

Provisions specific to institutional investors Yes.
Insurance companies Yes.

Limits (max.) on securities issued by nonresidents Yes. When placing the assets accepted as coverage for technical provisions and for the minimum margin of solvency, the insurer (reinsurer) must respect the rules of distribution of investment in securities issued by foreign governments and/or national banks or...
international financial organizations; such amounts may represent no more than 5% for the same issuer and no more than 20% of the total value of the total technical reserves, excluding the share of the reinsurer, and one-half of the minimum solvency margin. According to the Law on Foreign Exchange Regulation, purchases of foreign financial instruments by insurance companies do not require NBM approval. Other foreign exchange operations (under the Law on Foreign Exchange Regulation) of insurance companies are subject to the same regulations as other resident legal entities (except licensed banks).

Changes during 2018 and 2019

Imports and Import Payments

Documentation requirements for release of foreign exchange for imports

Other

05/01/2018

Only import payments in domestic and foreign currency in the amount exceeding EUR 10,000 transfer may require submission of supporting documents to licensed banks and to resident nonbank payment service providers. Previously, all payments had to be supported by the appropriate documentation.

Payments for Invisible Transactions and Current Transfers

Controls on these transfers

05/01/2018

The nonresident individual must be allowed to perform the transfer abroad of funds in foreign currency/domestic currency for the purpose of family expenses in favor of each family member – resident individuals who are staying abroad and nonresident individuals, as follows:

(1) in the amount not exceeding EUR 10,000 (or their equivalent) – without presentation to the resident payment service provider the justifying documents;

(2) in the amount exceeding EUR 10,000 (or their equivalent) – on submission to the resident payment service provider of the justifying documents:

(a) confirming the membership of the family;

(b) confirming the necessity for the payment/transfer to be made by the individual in favor of whom the transfer is made and containing data in the amount of the payment/transfer.

The nonresident individual must be allowed to perform the payments/transfers in foreign currency abroad, other than those specified, as follows:

(1) without submission to the resident payment service provider of the justifying documents, in the following cases:

(a) transfer on his own name;

(b) a payment/transfer in favor of an individual/legal entity in the amount not exceeding EUR 10,000 (or their equivalent);

(2) a payment/transfer in favor of an individual/legal entity in other cases than those established in sub-item (1) – on submission to the resident payment service provider of the justifying documents confirming the necessity of making the payment/transfer and containing data on the amount of the payment/transfer.

05/01/2018

The resident legal entities may make noncash payments/transfers
within foreign exchange operations without submission to the resident payment service providers of the justifying documents in the event that:

(1) transfers from the licensed bank account to its bank account opened with another licensed bank or with the foreign financial institution;

(2) transfers from the resident nonbank payment service providers account to its account opened with another resident payment service provider as well as in the case specified in item (4);

(3) transfers to other accounts of the resident legal entity (other than the resident payment service provider) opened with the same or another resident payment service provider;

(4) transfers by the resident legal entity (other than the licensed bank) to its accounts opened with the foreign financial institutions on the basis of the authorizations issued by the National Bank of Moldova (NBM), which provide for the possibility of making transfers into these accounts from the accounts opened with the resident payment service providers and do not contain the requirement of presentation of justifying documents to the resident payment service provider;

(5) payments/transfers abroad for the purposes stipulated in Art. 23 par. (1) letters a) and c) of the Law No. 62-XVI of March 21, 2008;

(6) payment abroad of the state tax established by the legislation of the foreign state;

(7) payments/transfers (other than those referred to in items (1) – (6) and transfers to their accounts, opened with foreign financial institutions without NBM authorization in the cases provided for in Art. 13 par. (5) letters b), c), e), and f) of the Law No. 62-XVI of March 21, 2008), where those represent payments/transfers in the amount not exceeding EUR 10,000 (or their equivalent) each payment/transfer, being performed within foreign exchange operations which are not subject to notification/authorization according to the Law No. 62-XVI of March 21, 2008.

The resident individuals may make payments or transfers to nonresidents and residents abroad up to the amounts specified in the supporting documents submitted to licensed banks and to resident nonbank service providers, except as specified in National Bank of Moldova regulations (see below). The payments/transfers may be made by the resident individual in favor of nonresidents and abroad in favor of residents, in accordance with the Law No. 62-XVI of March 21, 2008, as follows:

(1) without submission to the resident payment service provider of the justifying documents, in the event that the single payment/transfer meets both of the following conditions:

(a) the payment/transfer in favor of a nonresident is made in the amount not exceeding EUR 10,000 (or their equivalent);

(b) the payment/transfer is made within the foreign exchange operation that is not subject to notification/authorization according to the Law No. 62-XVI of March 21, 2008;

(2) other cases than those indicated in sub-item (1) – when submitting to the resident payment service provider the justifying documents confirming the purpose of the payment/transfer and containing data on the amount of the payment/transfer.

The nonresident legal entities must be allowed to perform noncash payments/transfers abroad without submitting to resident payment service providers of justifying documents in the event that:

(1) the transfers are made on the name of the same account holder;

(2) the payments/transfers are made by financial institutions from abroad;

(3) transfers/payments are made by nonresident payment service providers in their quality of payment service providers/electronic
money issuers;
(4) payments/transfers are made by the representative offices of international organizations, by diplomatic missions, consular offices, and other official representative offices of foreign states accredited in the Republic of Moldova, as well as by international organizations;
(5) payments/transfers are made by nonresident legal entities which are institutions implementing technical assistance projects/foreign financing projects for the Republic of Moldova, for purposes related to implementation of the projects, only in relation to individuals;
(6) payment of state tax established by the legislation of the foreign state;
(7) payments/transfers other than those referred to in items (1) – (6) in the amount not exceeding EUR 10,000 (or their equivalent) each payment/transfer.

Trade-related payments

*Indicative limits/bona fide test* 05/01/2018

Individuals and legal entities are allowed to make payments in the amount of up to €10,000 (up from €1,000) or its equivalent without the submission of supporting documents.

Investment-related payments

*Indicative limits/bona fide test* 02/13/2018

The National Bank of Moldova (NBM) must be notified by residents of some categories of private loans from nonresidents specified in Art. 6 of the Law on Foreign Exchange Regulation if the amount of these loans is exceeding EUR 50,000. Previously, the NBM needed to be notified even for loans below EUR 50,000.

Payments for travel

*Indicative limits/bona fide test* 05/01/2018

Individuals/legal entities are allowed to make payments in the amount of up to €10,000 (against EUR 1,000 previously) or its equivalent, without the submission of supporting documents.

Personal payments

*Indicative limits/bona fide test* 05/01/2018

The following apply to current payments and transfers abroad (in foreign and domestic currency) by resident individuals a transaction:

(1) for family expenses: (a) a transfer in the amount not exceeding EUR 10,000 (previously €1,000) (or their equivalent) – without submission to the resident payment service provider of the justifying documents; (b) a transfer in the amount of over EUR 10,000 (previously €1,000) (or their equivalent) – on submission to the resident payment service provider of the documents:

(i) confirming family membership; (ii) confirming the need for the payment/transfer to be made by the individual in favor of whom the transfer is made and containing data on the amount of the payment/transfer;

(2) in the resident’s name for current expenses during a temporary stay abroad: (a) a transfer in the amount not exceeding EUR 10,000 (or their equivalent) – without the submission of the justifying documents to the resident payment service provider; (b) a transfer in the amount exceeding EUR 10,000 (or their equivalent) – on submission to the resident payment service provider of the documents:

(i) confirming the fact of temporary stay abroad (for example, confirmation from a foreign educational institution, a medical institution or from workplace abroad, the temporary residence permit in the respective foreign state); (ii) confirming the necessity of performing the payment/transfer by the individual and containing data regarding the amount of the payment/transfer;

(3) in the resident’s name to obtain an entry visa, on submission of documentation confirming the reason for the visit and the need for funds abroad: (a) a transfer in the amount not exceeding EUR 10,000 (or their equivalent) – without the submission of the justifying
documents to the resident payment service provider; (b) a transfer in the amount exceeding EUR 10,000 (or their equivalent) – on submission to the resident payment service provider of: (i) the document/information confirming the need of availability of funds abroad on the name of the respective individual to obtain a visa and containing data on the amount of necessary funds (for example, the document/information of the diplomatic mission of the foreign state that specifies the requirement to deposit funds to the account opened with a foreign bank to obtain an entry visa and the amount necessary to be deposited); (ii) the documents confirming the purpose/reason of the visit, required for the submission to the respective diplomatic mission/consular office to obtain the respective visa; and

(4) for the benefit of a nonresident in other cases: (a) without submission to the resident payment service provider of the justifying documents, in the event that the single payment/transfer meets both of the following conditions: (i) the payment/transfer in favor of a nonresident is made in the amount not exceeding EUR 10,000 (or their equivalent); (ii) the payment/transfer is made within the foreign exchange operation that is not subject to notification/authorization according to the Law No. 62-XVI of March 21, 2008; (b) other cases than those indicated in sub-item (1) – when submitting to the resident payment service provider the justifying documents confirming the purpose of the payment/transfer and containing data on the amount of the payment/transfer.

The following apply to current payments and transfers abroad (in foreign and domestic currency) by nonresident individuals:

(1) transfer abroad for family expenses: (a) in the amount not exceeding EUR 10,000 (previously €1,000) (or their equivalent) – without presentation to the resident payment service provider the justifying documents;
(b) in the amount exceeding EUR 10,000 (previously €1,000) (or their equivalent) – on submission to the resident payment service provider of the justifying documents: (i) confirming the membership of the family; (ii) confirming the necessity for the payment/transfer to be made by the individual in favor of whom the transfer is made and containing data in the amount of the payment/transfer; and

(2) other payments and transfers abroad: (a) without submission to the resident payment service provider of the justifying documents in the following cases: (i) transfer on his own name; (ii) a payment/transfer in favor of an individual/legal entity in the amount not exceeding EUR 10,000 (or their equivalent); (b) a payment/transfer in favor of an individual/legal entity in other cases than those established in sub-item (1) – on submission to the resident payment service provider of the justifying documents confirming the purpose of making the payment/transfer and containing data on the amount of the payment/transfer.

Credit card use abroad

_Indicative limits/bona fide test_ 05/01/2018

The rules for payments and transfers associated with current foreign exchange operations of resident made with the use of their cards abroad are the same as for noncash payments and transfers.

Other payments

_Indicative limits/bona fide test_ 05/01/2018

Payments are permitted up to the amount set forth in the supporting documents, except:

(1) The resident legal entities:
(a) transfers from the licensed bank account to its bank account opened with another licensed bank or with the foreign financial institution;
(b) transfers from the resident nonbank payment service provider account to its account opened with another resident payment service...
Controls on capital transactions

A foreign investor may purchase government securities of a single international securities identification number (ISIN) according to the purchase limit of government securities, if it is announced in Communiqué of government securities placement. A noncompetitive bid submitted by an investor for government securities may not
On capital market securities

Bonds or other debt securities

Purchase locally by nonresidents 07/31/2018

A foreign investor may purchase government securities within a single international securities identification number (ISIN) according to the purchase limit of government securities, if it is announced in Communiqué of government securities placement. A noncompetitive bid submitted by an investor for government securities may not exceed more than 3% of the indicative volume of the issue announced at the reference auction, under a single ISIN.

On money market instruments

Purchase locally by nonresidents 07/31/2018

A foreign investor may purchase government securities within a single international securities identification number (ISIN) according to the purchase limit of government securities, if it is announced in Communiqué of government securities placement. A noncompetitive bid submitted by an investor for government securities may not exceed more than 3% of the indicative volume of the issue announced at the reference auction, under a single ISIN.

Provisions Specific to the Financial Sector

Provisions specific to commercial banks and other credit institutions 01/01/2018

The bank may have holdings in enterprises, other than a financial sector entity or a nonbank entity of up to 10% of the bank’s eligible capital. Banks must be prohibited from having aggregate holdings in such enterprises, which exceeds 20% of its eligible capital or grant the bank control over the enterprise. The acquisition by the bank of any qualifying holding in a foreign entity is subject to the prior approval of the National Bank of Moldova if, as a result of the acquisition, the entity must be included in the scope of prudential consolidation.

06/08/2018

Quantitative and qualitative requirements toward the audit firm and the audit team for its approval by the National Bank of Moldova have been set.

07/30/2018

Banks apply new provisions related to treatment of credit risk based on standardized approach, operational risk based on fundamental and standardized approach, settlement/delivery risk and market risk. New provisions transpose partially, in the part related to banks, Regulation (EU) No. 575/2013. The COREP instruction lays down uniform requirements in relation to supervisory reporting in the context of the new prudential framework. The first presentation of the reports will be performed for the situation as of July 31, 2018.

Borrowing abroad 10/01/2018

There are no restrictions with regard to the activity of nonbank credit organizations.

Differential treatment of deposit accounts in foreign exchange Reserve requirements 09/16/2018

From the period September 16, 2018–October 15, 2018, the required reserve ratio in Moldovan leu increased to 42.5% from 40%.

07/16/2019

The required reserve ratio applied to freely convertible currency increased to 17%.

Exchange Measures

- Restrictions and/or multiple currency practices: Yes.
  The IMF staff report for the 2017 Article IV Consultation and Request for an Extended Arrangement under the Extended Fund Facility with Mongolia states that, as of April 14, 2017, Mongolia maintained two MCPs subject to IMF jurisdiction. First, the modalities of the multi-price auction system give rise to an MCP because there is no mechanism in place which ensures that exchange rates of accepted bids at the multi-price auction do not deviate by more than 2%. In addition, Mongolia has an official exchange rate (reference rate) that is mandatorily used for government transactions (as opposed to the commercial market rate). Therefore, by way of official action, the authorities have created market segmentation. While Order #699 of the Bank of Mongolia (BOM) issued December 3, 2010, sets forth that the reference rate is determined based on the weighted average of market rates used from 4:00 p.m. of the previous day to 4:00 p.m. of the current day, the IMF staff is of the view that this Order does not eliminate the market segmentation and multiplicity of effective rates arising from it. Accordingly, in the absence of a mechanism to ensure that the commercial rates and the reference rate do not deviate by more than 2%, the way the reference rate is used in government transaction gives rise to an MCP subject to IMF approval. (Country Report No. 17/140)

- Exchange measures imposed for security reasons: Yes.
- In accordance with IMF Executive Board Decision No. 144-(52/51) No.
- Other security restrictions: Yes.
  Restrictions are imposed on certain transactions with the former Republic of Serbia and Montenegro.
  This information can be found at the AREAER ONLINE database: http://www.elibrary-areaer.imf.org/Pages/Reports.aspx.

Exchange Arrangement

- Currency: Yes.
  The currency of Mongolia is the Mongolian togrog.
- Other legal tender: No.

Exchange rate structure

- Unitary
- Dual
- Multiple Yes.
  The exchange rate structure is classified as multiple because the official exchange rate may differ from the market rate by more than 2%, and a multiple price auction was introduced without a formal
mechanism to prevent a spread exceeding 2% of effective rates between the winning bids. Since the inception of the auction, however, winning bids have never deviated by more than 2%. To eliminate the risk of accepted bids deviating by more than 2%, the BOM introduced, a single-price auction, from October 1, 2015, that is, where all accepted offers are fulfilled at a single cutoff rate.

**Classification**

- No separate legal tender
- Currency board
- Conventional peg
- Stabilized arrangement
- Crawling peg
- Crawl-like arrangement
- Pegged exchange rate within horizontal bands
- Other managed arrangement: Yes.

The de jure exchange rate arrangements is floating. The BOM reserves the right to intervene in the foreign exchange market. The BOM intervenes through the auction to moderate the rate of change in line with macroeconomic fundamentals. Because of economic activation, in 2018, Mongolia’s imports rose by 36% to US$5.9 billion, an increase of FED policy rate resulted in lower foreign exchange inflow, and BOP showed deficit of US$141 million. As a result of these macroeconomic situations, exchange rate was 2643.69 at the end of 2018, incurring MNT appreciation of 8.9%.

Subsequently, the BOM’s intervention in the foreign exchange market through auction has increased drastically compared to previous year. In December 2018, the BOM has launched its foreign exchange trading platform to facilitate interbank foreign exchange trades and its foreign exchange auctions. The BOM publishes the cutoff rate for each auction on its website. Because the exchange rate followed a depreciating trend within a 2% band against the US dollar from September 2017 and has increased its volatility since April 2018, while still being managed, the de facto exchange rate arrangement was reclassified twice: (1) retroactively to crawl-like from floating, effective September 18, 2017, and (2) to other managed from crawl-like, effective April 11, 2018.

**Floating**

**Free floating**

**Official exchange rate:** Yes.

The BOM’s closing rate—tugrik against US dollar—is calculated as the sum of weighted purchase and sale rates multiplied by total purchase and sale volume percentages, respectively. Purchase and sale volumes are based on transactions between 4:00 p.m. of the previous day and 4:00 p.m. of the current day reported by banks by 4:40 p.m. every business day. The closing reference rate is announced by 5:40 p.m. everyday once it is cleared by the director of the Reserve Management and Financial Markets Department at the BOM. Calculation of reference rates of tugrik against all other foreign currencies is based on rates in international markets between 4:00 p.m. and 4:30 p.m. of the current day. The reference rate is used in accounting, customs valuation, and government transactions with the BOM. For accounting purposes, the daily reference rate is the
BOM’s closing rate on the previous day. The reference rate is announced each weekday except national holidays.

The BOM has had a monetary aggregate targeting framework since the mid-1990s with reserve money as the operating target and M2 as the intermediate target. However, because of the remonetization process and the volatility of the money multiplier since 2007, the BOM has not strictly adhered to its monetary targets (except during 2009–11, when the BOM had an IMF-supported program). It has pursued an eclectic anchoring strategy involving the monitoring of a broad range of financial (exchange rate, money and credit growth, interest rate) and real (domestic demand, current account, production) indicators. Since 2012, the BOM has been pursuing a more forward-looking approach by introducing the Forecasting and Policy Analysis System (FPAS) in which monetary policy decision is based on macroeconomic forecasts. The current policy strategy of the BOM can be considered as inflation-targeting framework, but it is not fully pledged. The target for 2018–2019 is 8%. The target measure is headline inflation (CPI) with current horizon of 2018–2020. Effective November 28, 2018, the policy rate was increased by 100 basis points (bps) to 11%. Inflation targets are set in the Monetary Policy Guideline, which is prepared by the BOM and approved by the parliament. Realization of the target is reported to the parliament. Minutes of the MPC meetings are published on the BOM website. Inflation forecasts are published quarterly in the Inflation Report.

Banks and nonbank financial institutions (NBFIs) may freely set their exchange rates in transactions with their clients. There were 14 commercial banks and 539 NBFIs in Mongolia as of December 31, 2018.

The operations of foreign exchange bureaus have been delegated to NBFIs licensed by the Financial Regulatory Committee. As of December 31, 2018, 47 currency bureaus were active in the domestic foreign exchange market. NBFIs are approved to purchase and sell banknotes and make foreign currency payments and transfers on behalf of their clients but may not have accounts abroad.

A two-way multiple price foreign exchange auction is held twice a week. The BOM additionally introduced a single-price foreign exchange auction by amendment of the auction regulation on October 1, 2015. The amount of purchase and sale is not announced in advance. Only commercial banks may participate in the auction. Commercial banks may propose three bids and three offers and may...
freely determine their bid and offer prices. Maximum and minimum amounts apply. The buying and selling limit for one bid must be in the range of US$0.2–US$8.0 million. The BOM publishes the results of the auctions on its website within the day.

**Fixing**

No.

**Interbank market**

Yes. There are 14 banks and the Development Bank of Mongolia that participate in the interbank foreign exchange market. There are no limits on the bid-ask spread and commission of market participants. In 2018, there were 13 banks that actively participated in the interbank foreign exchange market.

**Over the counter**

Yes. Commercial banks may trade foreign exchange with each other over the counter and may freely set their buying and selling rates.

**Brokerage**

No.

**Market making**

Yes. The three largest banks in the Mongolian banking sector are playing a major role as market makers.

**Forward exchange market**

Yes. Banks are granted a supplementary foreign exchange settlement license from the BOM for the purpose of carrying out forward exchange transaction. As of December 31, 2018, the BOM did not issue any forward agreements with the commercial banks.

**Official cover of forward operations**

No.

| Shares or other securities of a participating nature | Yes. 
  *Purchase locally by nonresidents* | Yes.  
  The controlling shareholder, alone or together with related persons, must inform the Financial Regulatory Commission, Mongolian stock exchange, and the public via its website of any 5% increase or decrease in the share volume of a company’s controlling shareholders within five working days.  
  *Sale or issue locally by nonresidents* | Yes.  
  A legal person listed on a foreign exchange may list and trade its securities on a stock exchange in Mongolia on approval of the Financial Regulatory Commission. The issuer must indicate in the prospectus of the securities to be issued in Mongolia the regulatory differences between Mongolia and the country in which the securities were initially issued. The issuer must also make provisions for investors’ potential risks and make arrangements for the exercise of their rights. The criteria for foreign security issuance in Mongolia and the list of accepted foreign exchanges are determined by the Financial Regulatory Commission. 
  Granting ownership free of charge and selling securities on credit in the primary market are prohibited, unless stated otherwise in the law.  
  *Purchase abroad by residents* | Yes.  
  According to the Foreign Exchange Law, residents may purchase shares or other securities of a participating nature abroad. Effective April 1, 2018, pursuant to amendments to the Banking Law announced January 18, 2018, banks may not establish subsidiary companies or hold minority interest of more than 20% in any company. All banks must comply with this requirement by January 1, 2019.  
  *Sale or issue abroad by residents* | No.  
  Companies listed on the Stock Exchange of Mongolia may also list and trade a certain portion of their securities and depository receipts on a foreign stock exchange. To issue securities in foreign countries, a company must register them with the Financial Regulatory Commission, which sets the registration rules.  
| Bonds or other debt securities | Yes. |
| **Purchase locally by nonresidents** | Yes.  
  Registration with the depository house through brokers and dealer companies is required.  
| **Sale or issue locally by nonresidents** | Yes.  
  The issuance of bonds or other debt securities by nonresidents is prohibited. Bonds or other debt securities may be issued only by the government on the approval of the parliament or by companies registered in Mongolia. The lending of securities is prohibited.  
<p>| Purchase abroad by residents | No. |
| <strong>Sale or issue abroad by residents</strong> | No. |
| <strong>On money market instruments</strong> | No. |</p>

**Purchase locally by nonresidents**

Foreign-registered investment funds may not publicly offer or sell their shares and unit rights in Mongolia. A foreign-registered investment fund may offer its shares and unit rights (privately) through a closed offer on authorization of the Financial Regulatory Commission. The regulation and requirements for such authorization must be approved by the Financial Regulatory Commission.

**Sale or issue locally by nonresidents**

Banks and nonbanks are subject to net open position limits which are established by regulations approved by the BOM and Financial Regulatory Commission. Derivative transactions are taken into account in estimation of net open positions. In addition, credit equivalent amount of derivatives is calculated. And these calculations are taken into account in the capital adequacy requirements.

**Purchase abroad by residents**

Commercial and financial credits must be registered with the BOM within 15 working days of concluding the credit agreement. Residents must submit a loan registration form to the BOM.

**Sale or issue abroad by residents**

Commercial and financial credits must be registered with the BOM within 15 working days of concluding the credit agreement. Residents must submit a loan registration form to the BOM.
### Outward direct investment

Yes.

Effective April 1, 2018, pursuant to amendments to the Banking Law announced January 18, 2018, banks may not establish subsidiary companies or hold minority interest of more than 20% in any company. All banks must comply with this requirement by January 1, 2019.

### Provisions Specific to the Financial Sector

#### Provisions specific to commercial banks and other credit institutions

Yes. Effective July 1, 2018, pursuant to amendments to the AML/CFT Law, the scope of reporting entities became broader by including dealers in precious metals and stones and accountants; the duties of reporting entities include understanding their risks associated with AML/CFT and adopting internal procedures which cover regular, enhanced, and simplified customer due diligence measures; supervising authorities will conduct risk-based supervision; liability and sanctions for violation of the Law and associated regulations were strengthened.

#### Borrowing abroad

Yes. The registration of foreign borrowing is not required except as required for the purpose of combating terrorism and money laundering.

According to the Law on Foreign Current and Capital Operations (OGM No. 045/05 of 28 July 2005, OGM No. 062/08 of 15 October 2010, OGM No. 040/11 of 8 August 2011, OGM No. 062/13 of 31 December 2013, and OGM No. 070/17 of 27 October 2017), Article 8, exchange operations may be performed by legal persons and entrepreneurs, which have contract with a bank, and are registered for performing exchange operations. The CB must prescribe in detail terms and manner of performing exchange operations.

The Central Bank of Montenegro (CBM) is not responsible for issuing licenses for performing bureau de change operations, and banks are not obliged to submit data and information about other persons with whom they concluded the contract on performing bureau de change operations. Banks must perform exchange operations in their own name and for their own account. Other legal persons may perform exchange operations in their own name and for a bank’s account, subject to signing an agreement with the bank. According to the Decision on Detailed Requirements and Manner of Performing Bureau De Change Operations (OGM No. 27/11), Article 2, banks must perform bureau de change operations in their own name and for their own account. Other legal persons and entrepreneurs (hereinafter: the ADs) may perform bureau de change activities in their own name and for a bank’s account, subject to signing an agreement with the bank on performing bureau de change activities and the dealer’s registration for the performance of this activity. The bank must be accountable for the operations of the AD with whom it has signed the agreement on performing bureau de change activities. Bureau de change activities at border crossings and on vessels may be performed by persons employed in the bank and/or AD, subject to a separate approval of the bank.

</tbody>
</table>

Payments for imports of goods and services are free of restrictions, provided documentary proof is submitted.

Payments for imports may be made through authorized banks and in cash. Residents must provide the bank with the standard import documentation.

Import licensing procedures are maintained for various reasons including protection of national security, human, animal or plant life or health, and to meet commitments under international conventions to which Montenegro is a signatory, for example, the CITES. As of the end of 2017, these requirements covered approximately 356 ten-digit HS tariff items, or 3.6% of all tariff lines, comprising explosives, headgears, optical instruments, pharmaceutical products, insecticides, contact lenses, uranium, and apparatus based on the use of X-rays or alpha, beta, or gamma radiation.

An estimated 96.4% of all tariff items may be imported freely. Goods not included on the control list (negative list) may be imported and exported freely.

Montenegro prohibits a few imports, mainly to protect health, safety, security, the environment, and natural resources. Imports of radioactive waste (HS28.44.10.10, HS28.44.30.55, and HS28.44.50) and trade in nuclear materials (from HS28.44.20.25 to HS28.44.20.99) are prohibited. No other import prohibitions are in place. Regarding the importation of used products, certain technical requirements must be met. Used motor vehicles being imported or being placed on the Montenegrin market for the first time can be put into free circulation on determination of the level of costs for the type approval of such vehicles. Waste tires can only be imported for processing, on the basis of an approval or an import license issued by
the Environmental Protection Agency, provided their import does not endanger the environment or human health.

Open general licenses | No.
Licenses with quotas | Yes. Montenegro applies tariff-rate quotas only under its RTAs. They currently affect imports of 149 agricultural products from the EU in line with the Stabilisation and Association Agreement (for example, poultry meat, fish, cheese, waters, and wine) since 2008 and imports of dried fruit from Turkey since 2010. Tariff-rate quotas are allocated by the Customs Administration on a first-come, first-served basis. Between 2012 and 2017, the fill-in ratio of these tariff-rate quotas ranged from 0% (certain fish) to 100% (for example, certain fish, cheese, meat, water); the average rate rose from 30.8% (2012) to 59.8% (2013), 74.3% (2014), and 74.8% (2015) before dropping to 72.5% (2016), and 69.1% (2017).
Other nontariff measures | No. Export and import quotas have been eliminated in Serbia and Montenegro, in accordance with an agreement between the two republics for harmonizing their trade, customs, and indirect tax regimes.
Import taxes and/or tariffs | Yes. The Law on Customs Tariff stipulates customs duty payments for imports of goods at a rate that does not exceed 50%. The average tariff rate is 5.24%.
Taxes collected through the exchange system | No.
State import monopoly | No.

Exports and Export Proceeds

Repatriation requirements | No.
Surrender requirements | No.
Surrender to the central bank | No.
Surrender to authorized dealers | No.
Financing requirements | No.
Documentation requirements | Yes.
Letters of credit | No.
Guarantees | No.
Domiciliation | No.
Preshipment inspection | Yes.
Other | No.
Export licenses | Yes. Nonautomatic export licenses are required for the following commodities: drugs, medicines, blood and pharmaceutical products, precious metals, explosives, arms, military equipment, and national art treasures. To (1) preserve the stability of the supply of raw materials to the processing sector; (2) ensure the stability of the population of the
northern part of Montenegro who use wood for heating; (3) preserve the stability of the prices of fuel; and (4) control the preservation of the forest fund, combat illegal harvesting, and control the implementation of the cutting in line with the cutting plan.

Montenegro has in place a licensing regime for export of raw wood and certain wood products. Effective May 14, 2018, the scope of the licensing regime was revised, and four tariff lines added thereby bringing the total to 30 tariff lines that are restricted (OGM No. 33/2018). Effective April 30, 2019, the validity of the licensing regime for exports of raw wood and certain products was extended for two more years (OGM No. 24/2019).

With quotas No.

Export taxes No.

Collected through the exchange system No.

Other export taxes No.

Insurance companies may deposit and invest their technical provisions in (1) securities issued by Montenegro and CBs and governments of foreign countries rated at least A or its equivalent by...
widely accepted, internationally recognized rating agencies; (2) shares traded on the organized securities market in Montenegro; and (3) shares of foreign legal entities, provided they have been listed on the stock exchange for at least last two years and if they have a credit rating of at least “A” awarded by Standard & Poor’s or Fitch-IBCA or at least “A2” awarded by Moody’s. According to the Article 7 of the Rulebook, the above-mentioned assets could be deposited and invested within the following restrictions:
(1) Maximum limits for total assets (Article 7, paragraph 1):
effective September 29, 2018, up to 30% (previously 15%) in the assets referred to in Article 6, paragraph 6, and in securities issued by the CBs and governments of foreign countries and which have rating of at least “A” or its equivalent, awarded by generally accepted, internationally recognized rating agencies;
(2) Maximum limits for individual asset (Article 7, paragraph 2):
effective September 29, 2018, up to 10% in securities of the same issuer from the assets covered by Article 6, paragraph 6, and in securities issued by the CBs and governments of foreign countries and which have rating of at least “A,” or its equivalent, awarded by generally accepted, internationally recognized rating agencies.

The MOF may prescribe other investments considered adequate in terms of safety, yield, and marketability.

A nonresident seeking to acquire real estate must prove to the appropriate public authority that the real estate acquired is necessary for the nonresident to do business in Montenegro. Purchases of real estate designated as restricted (such as in national parks or border areas) are prohibited. Proceeds from these transactions may be transferred abroad freely, provided tax liabilities have been settled.

As per Article 90 of the Insurance Law, insurance companies may deposit and invest their technical provisions in securities issued by Montenegro and CBs and governments of foreign countries rated at least “A” or its equivalent by widely accepted, internationally recognized rating agencies. According to Article 6 of the Rulebook on Depositing and Investing the Technical Provisions of the Insurance Undertaking (OGM No. 062/18), insurance undertaking may deposit and invest in following...
securities:
(1) debt securities issued by or securities guaranteed by governments or CBs of an EU member state or a member state of the OECD or an international financial organization to which one or more EU member states or one or more OECD member countries belong, if they have a credit rating for long-term borrowing in domestic and foreign currency at least equal to the credit rating of Montenegro awarded by Standard & Poor’s or Fitch-IBCA or Moody’s (Article 6, paragraph 2);
(2) effective September 29, 2018, bonds and other debt securities issued or guaranteed by the municipal governments in Montenegro, an EU member state, or an OECD member state (Article 6, paragraphs 3 and 4);
(3) debt securities of foreign legal entities traded on a stock exchange in the countries where they are registered, provided their credit rating awarded by Standard & Poor’s or Fitch-IBCA is at least “A” or if awarded by Moody’s at least “A2” (Article 6, paragraph 5);
(4) shares of foreign legal entities provided they have been listed on the stock exchange listing for at least last two years and have a credit rating approved by the Standard & Poor’s or Fitch-IBCA rating agencies with at least “A” and/or Moody’s with at least “A2” (Article 6, paragraph 6);
(5) effective September 29, 2018, investment units of investment funds that are registered in Montenegro, an EU member state, or an OECD member state (Article 6, paragraph 8).

According to the Article 7 of the Rulebook, the above-mentioned assets could be deposited and invested within the following restrictions:

Maximum limits for total assets (Article 7, paragraph 1):
(1) effective September 29, 2018, up to 30% (previously 15%) in the assets referred to in Article 6, paragraphs 2, 5, and 6, and in securities issued by the CBs and governments of foreign countries and which have rating of at least “A” or its equivalent, awarded by generally accepted, internationally recognized rating agencies;
(2) effective September 29, 2018, up to 30% in the assets referred to in Article 6, paragraphs 3 and 4;

Maximum limits for individual asset (Article 7, paragraph 2):
(1) effective September 29, 2018, up to 10% in securities of the same issuer from the assets covered by Article 6, paragraphs 2, 5, and 6, and in securities issued by the CBs and governments of foreign countries and which have rating of at least “A,” or its equivalent, awarded by generally accepted, internationally recognized rating agencies;
(2) effective September 29, 2018, up to 20% in bonds and other debt securities of the same issuer from the assets covered by the Article 6, paragraphs 3 and 4.

Effective September 29, 2018, according to Article 9 of the Rulebook, the special provisions funds for benefits secured by an insurance contract that are directly related to the investments value (that is, special technical provisions for unit-linked insurance product) must be deposited and invested with the following restrictions:
(1) up to 50% in investment units of one investment fund;
(2) up to 70% in investment units of investment funds managed by the same management company or investment funds are related legal persons.

The insurance undertaking invests special provisions for benefits secured by an insurance contract that are directly related to the investments value in investment units of investment funds registered outside Montenegro if:
(1) a credit rating for the long-term debt of an EU member state or the OECD, in which the investment fund is registered, is not lower than the credit rating that Montenegro has,

(2) the net assets of an investment fund is not less than €100 million,

(3) the investment policy of an investment fund allows the conclusion of options and forward contracts solely for the purpose of protecting the assets and liabilities of an investment fund, and

(4) the investment fund is not registered in the territories in which the exemption from payment of taxes has been carried out, or in which the minimum tax rates (off-shore zone) are applied.

Generally, the MOF may prescribe other investments considered adequate in terms of safety, yield, and marketability.

As per Article 90 of the Insurance Law, insurance companies may deposit and invest their technical provisions in securities issued by Montenegro and CBs and governments of foreign countries rated at least “A” or its equivalent by widely accepted, internationally recognized rating agencies.

According to Article 6 of the Rulebook on Depositing and Investing the Technical Provisions of the Insurance Undertaking (OGM No. 062/18), insurance undertaking may deposit and invest in following securities:

(1) debt securities issued by or securities guaranteed by governments or CBs of an EU member state or a member state of the OECD or an international financial organization to which one or more EU member states or one or more OECD member countries belong, if they have a credit rating for long-term borrowing in domestic and foreign currency at least equal to the credit rating of Montenegro awarded by Standard & Poor’s or Fitch-IBCA or Moody’s (Article 6, paragraph 2);

(2) effective September 29, 2018, bonds and other debt securities issued or guaranteed by the municipal governments in Montenegro, an EU member state, or an OECD member state (Article 6, paragraphs 3 and 4);

(3) debt securities of foreign legal entities traded on a stock exchange in the countries where they are registered, provided their credit rating awarded by Standard & Poor’s or Fitch-IBCA is at least “A” or if awarded by Moody’s at least “A2” (Article 6, paragraph 5);

(4) shares of foreign legal entities provided they have been listed on the stock exchange listing for at least last two years and have a credit rating approved by the Standard & Poor’s or Fitch-IBCA rating agencies with at least “A” and/or Moody’s with at least “A2” (Article 6, paragraph 6);

(5) effective September 29, 2018, investment units of investment funds that are registered in Montenegro, an EU member state, or an OECD member state (Article 6, paragraph 8).

According to the Article 7 of the Rulebook, the above-mentioned assets could be deposited and invested within the following restrictions:

Maximum limits for total assets (Article 7, paragraph 1):

(1) effective September 29, 2018, up to 30% (previously 15%) in the assets referred to in Article 6, paragraphs 2, 5, and 6, and in securities issued by the CBs and governments of foreign countries and which have rating of at least “A” or its equivalent, awarded by generally accepted, internationally recognized rating agencies;

(2) effective September 29, 2018, up to 30% in the assets referred to in Article 6, paragraphs 3 and 4;

Maximum limits for individual asset (Article 7, paragraph 2):

(1) effective September 29, 2018, up to 10% in securities of the same issuer from the assets covered by Article 6, paragraphs 2, 5, and 6, and in securities issued by the CBs and governments of foreign
countries and which have rating of at least “A,” or its equivalent, awarded by generally accepted, internationally recognized rating agencies;

(2) effective September 29, 2018, up to 20% in bonds and other debt securities of the same issuer from the assets covered by the Article 6, paragraphs 3 and 4.

Effective September 29, 2018, according to Article 9 of the Rulebook, the special provisions funds for benefits secured by an insurance contract that are directly related to the investments value (that is, special technical provisions for unit-linked insurance product) must be deposited and invested with the following restrictions:

(1) up to 50% in investment units of one investment fund;
(2) up to 70% in investment units of investment funds managed by the same management company or investment funds are related legal persons.

The insurance undertaking invests special provisions for benefits secured by an insurance contract that are directly related to the investments value in investment units of investment funds registered outside Montenegro if:

(1) a credit rating for the long-term debt of an EU member state or the OECD, in which the investment fund is registered, is not lower than the credit rating that Montenegro has,
(2) the net assets of an investment fund is not less than €100 million,
(3) the investment policy of an investment fund allows the conclusion of options and forward contracts solely for the purpose of protecting the assets and liabilities of an investment fund, and
(4) the investment fund is not registered in the territories in which the exemption from payment of taxes has been carried out, or in which the minimum tax rates (off-shore zone) are applied.

Generally, the MOF may prescribe other investments considered adequate in terms of safety, yield, and marketability.

Limits (min.) on investment portfolio held locally

No. There is no prescribed minimum for investment portfolio held locally.

Currency-matching regulations on assets/liabilities composition

n.r.

Pension funds

Yes. In accordance with Article 38 of the Law on Voluntary Pension Funds, the assets of a pension fund may be invested in the following types of assets: (1) short-term notes and other short-term securities issued by Montenegro and local governments and short-term bank deposits as specified by the regulations of the Securities Commission; (2) long-term bonds and other long-term securities issued by Montenegro and local governments, joint-stock companies registered with the Securities Commission and traded on the stock exchanges in Montenegro or other countries and traded in organized capital markets of OECD and EU countries, and by foreign nonstate entities traded in the organized capital markets of OECD and EU countries; (3) stocks issued by joint-stock companies registered with the Securities Commission and traded on the stock exchanges in Montenegro; foreign joint-stock companies and closed-end investment funds traded in the organized capital markets of OECD and EU countries; (4) units of domestic and foreign open-end investment funds if they invest in the securities of issuers registered in Montenegro or OECD or EU countries; (5) other investments specified by the regulations of the Securities Commission, except as referred to in Article 39 of the law (this option has not been used in practice); and (6) real estate in Montenegro. A pension fund may acquire no more than 10% of a particular security’s issue. No more than 10% of a pension fund’s assets may be invested in the securities
of a single issuer. As an exception to the limits in paragraphs 2 and 3 of this article, a pension fund’s assets may be invested in assets stipulated in paragraph 1, item 1 and item 2 line 1, without limitation. In accordance with Article 39 of the Law on Voluntary Pension Funds, the assets of a pension fund may not be invested in (1) stocks, bonds, and other securities that are not traded on stock exchanges or organized markets, except the units of open-end investment funds; (2) assets that may not be divested under the law; (3) physical assets that are not traded on organized markets and whose value is uncertain (including, for example, antiques, works of art, and motor vehicles); (4) stocks, bonds, and other securities issued by (a) a stockholder of a pension company; (b) the custodian of a pension fund; (c) a person related to the entities listed in items (a) and (b); (d) a management company; or (e) a brokerage or dealing house, or a licensed bank that trades securities on behalf of the management company; and (5) other assets as specified by the Securities Commission.

In accordance with the Law on Voluntary Pension Funds, there is no maximum limit on the purchase of securities issued by nonresidents. During the process of preparing the investment policy and prospectus for voluntary pension funds, the management company must define limits for securities issued by nonresidents. In addition, in accordance with Article 38 of the Law on Voluntary Pension Funds, the assets of a pension fund may be invested in the following types of assets: (1) short-term notes and other short-term securities issued by Montenegro and local governments, and short-term bank deposits as specified by the regulations of the Securities Commission; (2) long-term bonds and other long-term securities issued by Montenegro and local governments, joint-stock companies registered with the Securities Commission and traded at the stock exchanges in Montenegro or other countries and traded in the organized capital markets of OECD and EU countries, and by foreign nonstate entities traded in the organized capital markets of OECD and EU countries; (3) stocks issued by joint-stock companies registered with the Securities Commission that are traded on the stock exchanges in Montenegro, foreign joint-stock companies and closed-end investment funds traded in the organized capital markets of OECD and EU countries; (4) units of domestic and foreign open-end investment funds if they invest in the securities of issuers registered in Montenegro or OECD or EU countries; (5) any other investment specified by the regulations of the Securities Commission, other than the investments referred to in Article 39 of the law; and (6) real estate in Montenegro. A pension fund may acquire no more than 10% of a particular security’s issue, and no more than 10% of its assets may be invested in the securities of a single issuer.

In accordance with the Law on Voluntary Pension Funds, there is no maximum limit on investment abroad. During the process of preparing the investment policy and prospectus for voluntary pension funds, the management company must define limits on investments abroad. In accordance with Article 38 of the Law on Voluntary Pension Funds, the assets of a pension fund may be invested in the following types of assets: (1) short-term notes and other short-term securities issued by Montenegro and local governments and short-term bank deposits as specified by the regulations of the Securities Commission; (2) long-term bonds and other long-term securities issued by Montenegro and local governments, joint-stock companies registered with the Securities Commission and traded on the stock exchanges in Montenegro or other countries and traded in the organized capital markets of OECD and EU countries, and by foreign nonstate entities traded in the organized capital markets of OECD and EU countries, and by foreign nonstate entities traded in the organized capital markets of OECD and EU countries.
and EU countries; (3) stocks issued by joint-stock companies registered with the Securities Commission and traded on the stock exchanges in Montenegro and by foreign joint-stock companies and closed-end investment funds traded in the organized capital markets of OECD and EU countries; (4) units of domestic and foreign open-end investment funds if they invest in the securities of issuers registered in Montenegro or OECD or EU countries; (5) any other form of investment specified by the regulations of the Securities Commission, other than those referred to in Article 39 of the law; and (6) real estate in Montenegro. A pension fund may acquire no more than 10% of a particular security’s issue, and no more than 10% of a pension fund’s assets may be invested in the securities of a single issuer.

### Limits (min.) on investment portfolio held locally

<table>
<thead>
<tr>
<th>Limits (min.) on investment portfolio held locally</th>
<th>No.</th>
</tr>
</thead>
</table>

In accordance with the Law on Voluntary Pension Funds, there is no minimum limit on investments held locally. During the process of preparing the investment policy and prospectus for voluntary pension funds, the management company must define limits on investments held locally, but there are no strict limits defined by the law. In accordance with the Law on Voluntary Pension Funds, a pension fund’s assets may be invested in the following assets without limitation: (1) short-term notes and other short-term securities issued by the government of Montenegro and local governments, as well as short-term bank deposits, as specified by the regulations of the Securities Commission; and (2) long-term bonds and other long-term securities issued by the government of Montenegro and local governments.

Article 27 of the Law on Investment Funds prescribes the following: (1) Open-end funds may invest no more than (a) 10% of assets in transferable securities or money market instruments issued by the same entity; and (b) 20% of assets in deposits with the same subject. (2) Exposure of open-end funds to counterparty risk in OTC derivatives transactions may not exceed (a) 10% of assets if the counterparty is a credit institution referred to in Article 25, paragraph 1, item 4, of the law; and (b) 5% of assets in other cases. (3) The total value of transferable securities and money market instruments held by open-end funds in issuers in which more than 5% of assets are invested may not exceed 40% of total assets. (4) The limitation referred to in paragraph 3 of this article does not apply to deposits or transactions in OTC derivatives with financial institutions subject to prudential supervision. (5) Notwithstanding the limits referred to in paragraph 1 of this article, open-end funds may not, if it would cause investment of more than 20% of assets in the same company, combine (a) investments in transferable securities or money market instruments issued by such company; (b) deposits with the respective company; and (c) exposures arising from transactions in OTC derivatives in which the respective company is involved. (6) Notwithstanding paragraph 1 of this article, open-end funds may invest no more than 35% of assets in transferable securities or money market instruments of the same company, if transferable securities or money market instruments are issued or guaranteed by the state, the local government, or an international organization. (7) Notwithstanding paragraph 1 of this article, open-end funds may invest no more than 25% of assets in bonds, if bonds are issued by a credit institution with a registered office in an EU member state that is under the supervision of the relevant authority for the purpose of...
protection of bondholders. (8) Funds raised by issuing bonds referred to in paragraph 7 of this article must be invested in assets that until the maturity of the bond may back claims on bonds, and that would be, in case of bankruptcy of the issuer, used for payment of principal and accrued unpaid interest. (9) If an open-end fund invests more than 5% of its assets in bonds referred to in paragraph 7 of this article issued by the same entity, the total value of these investments may not exceed 80% of open-end fund assets. (10) If an open-end fund invests more than 5% of its assets in transferable securities and money market instruments in accordance with paragraphs 6 and 7 of this article, those transferable securities are not taken into account when applying limits specified in paragraph 2 of this article. (11) Investments in transferable securities and money market instruments issued by the same entity, or in deposits or derivative instruments issued by the same entity, which are carried out in accordance with recognized international accounting standards are considered to be a single company for the purpose of calculating limits referred to in this article. Open-end funds may cumulatively invest no more than 20% of assets in transferable securities and money market instruments within the same group. Article 81, paragraph 1, items 4 and 5, of the Law on Investment Funds prescribes allowable investments of a closed-end investment fund as follows: (1) deposits with authorized banks in Montenegro or in another country, provided they are subject to supervision and limitations equivalent to supervision and limitations established by the regulations, maturing within no more than 12 months and withdrawable at any time; (2) forwards and options and other financial derivatives traded on an organized market, provided they are based on financial investment instruments, financial indices, interest rates, exchange rates, or currencies in which the fund is permitted to invest according to its prospectus and articles of association; business activities agreed on in other organized markets and concluded with institutions subject to supervision of the appropriate authority in Montenegro or in an EU member state, subject to reliable and verifiable daily valuation and sellable at any time, and that may be liquidated or completed by settlement at their fair value at the request of the fund. Such instruments may be used solely to reduce or limit risk or increase yields and reduce costs of the fund without increasing the risk—that is, that they should not change the investment strategy, objectives, or limitations defined by this law and the prospectus and/or articles of association of the fund. The fund’s prospectus must provide for investment in these instruments and the purpose for which they may be used (protection against the risk and/or to achieve the investment objectives of the fund) and indicate that risk evaluation of these instruments has been provided. Article 62, paragraph 2, of the Law on Investment Funds prescribes that an investment fund for investment in initial capital may not invest more than 20% of its net assets in any other company.

Limits (max.) on investment portfolio held abroad

Yes.

Article 27 of the Law on Investment Funds prescribes the following: (1) Open-end funds may invest no more than (a) 10% of assets in transferable securities or money market instruments issued by the same entity; and (b) 20% of assets in deposits with the same subject. (2) Exposure of open-end funds to counterparty risk in OTC derivatives transactions may not exceed (a) 10% of assets if the counterparty is a credit institution referred to in Article 25, paragraph 1, item 4, of the law; and (b) 5% of assets in other cases. (3) The total value of transferable securities and money market instruments held
by open-end funds in issuers in which more than 5% of assets are invested may not exceed 40% of total assets. (4) The limitation referred to in paragraph 3 of this article does not apply to deposits or transactions in OTC derivatives with financial institutions subject to prudential supervision. (5) Notwithstanding the limits referred to in paragraph 1 of this article, open-end funds may not, if it would cause investment of more than 20% of assets in the same company, combine (a) investments in transferable securities or money market instruments issued by such company; (b) deposits with the respective company; and (c) exposures arising from transactions in OTC derivatives in which the respective company is involved. (6) Notwithstanding paragraph 1 of this article, open-end funds may invest no more than 35% of assets in transferable securities or money market instruments of the same company, if transferable securities or money market instruments are issued or guaranteed by the state, the local government, or an international organization. (7) Notwithstanding paragraph 1 of this article, open-end funds may invest no more than 25% of assets in bonds, if bonds are issued by a credit institution with a registered office in an EU member state that is under the supervision of the relevant authority for the purpose of protection of bondholders. For bonds issued by foreign institutions not registered in an EU member state, the 10% limit indicated in item (1) applies. (8) Funds raised by issuing bonds referred to in paragraph 7 of this article must be invested in assets that until the maturity of the bond may back claims on bonds, and that would be, in case of bankruptcy of the issuer, used for payment of principal and accrued unpaid interest. (9) If an open-end fund invests more than 5% of its assets in bonds referred to in paragraph 7 of this article issued by the same entity, the total value of these investments may not exceed 80% of open-end fund assets. (10) If an open-end fund invests more than 5% of its assets in transferable securities and money market instruments in accordance with paragraphs 6 and 7 of this article, those transferable securities are not taken into account when applying limits specified in paragraph 2 of this article. (11) Investments in transferable securities and money market instruments issued by the same entity, or in deposits or derivative instruments issued by the same entity, which are carried out in accordance with paragraphs 1–8 of this article, may not together exceed 35% of the open-end fund’s assets. (12) Companies in the same group as the group that keeps the consolidated accounts in accordance with recognized international accounting standards are considered to be a single company for the purpose of calculating limits referred to in this article. Open-end funds may cumulatively invest no more than 20% of assets in transferable securities and money market instruments within the same group. Article 81, paragraph 1, items 4 and 5, of the Law on Investment Funds prescribes allowable investments of a closed-end investment fund as follows: (1) deposits with authorized banks in Montenegro or in another country, provided they are subject to supervision and limitations equivalent to supervision and limitations established by the regulations, maturing within no more than 12 months and withdrawable at any time; (2) forwards and options and other financial derivatives traded on an organized market, provided they are based on financial investment instruments, financial indices, interest rates, exchange rates, or currencies in which the fund is permitted to invest according to its prospectus and articles of association; business activities agreed on in other organized markets and concluded with institutions subject to supervision of the appropriate authority in Montenegro or in an EU member state, subject to reliable and verifiable daily valuation and sellable at any time, and that may be liquidated or completed by...
settlement at their fair value at the request of the fund. Such instruments may be used solely to reduce or limit risk or increase yields and reduce costs of the fund without increasing the risk—that is, that they should not change the investment strategy, objectives, or limitations defined by this law and the prospectus and/or articles of association of the fund. The fund’s prospectus must provide for investment in these instruments and the purpose for which they may be used (protection against the risk and/or to achieve the investment objectives of the fund) and indicate that risk evaluation of these instruments has been provided. Article 62, paragraph 2, of the Law on Investment Funds prescribes that an investment fund for investment in initial capital may not invest more than 20% of its net assets in any other company.

Limits (min.) on investment portfolio held locally

Yes.

Article 27 of the Law on Investment Funds prescribes the following:
(1) Open-end funds may invest no more than (a) 10% of assets in transferable securities or money market instruments issued by the same entity; and (b) 20% of assets in deposits with the same subject.
(2) Exposure of open-end funds to counterparty risk in OTC derivatives transactions may not exceed (a) 10% of assets if the counterparty is a credit institution referred to in Article 25, paragraph 1, item 4, of the law; and (b) 5% of assets in other cases. (3) The total value of transferable securities and money market instruments held by open-end funds in issuers in which more than 5% of assets are invested may not exceed 40% of total assets. (4) The limitation referred to in paragraph 3 of this article does not apply to deposits or transactions in OTC derivatives with financial institutions subject to prudential supervision. (5) Notwithstanding the limits referred to in paragraph 1 of this article, open-end funds may not, if it would cause investment of more than 20% of assets in the same company, combine (a) investments in transferable securities or money market instruments issued by such company; (b) deposits with the respective company; and (c) exposures arising from transactions in OTC derivatives in which the respective company is involved. (6) Notwithstanding paragraph 1 of this article, open-end funds may invest no more than 35% of assets in transferable securities or money market instruments of the same company, if transferable securities or money market instruments are issued or guaranteed by the state, the local government, or an international organization. (7) Notwithstanding paragraph 1 of this article, open-end funds may invest no more than 25% of assets in bonds, if bonds are issued by a credit institution with a registered office in an EU member state that is under the supervision of the relevant authority for the purpose of protection of bondholders. (8) Funds raised by issuing bonds referred to in paragraph 7 of this article must be invested in assets that until the maturity of the bond may back claims on bonds, and that would be, in case of bankruptcy of the issuer, used for payment of principal and accrued unpaid interest. (9) If an open-end fund invests more than 5% of its assets in bonds referred to in paragraph 7 of this article issued by the same entity, the total value of these investments may not exceed 80% of open-end fund assets. (10) If an open-end fund invests more than 5% of its assets in transferable securities and money market instruments in accordance with paragraphs 6 and 7 of this article, those transferable securities are not taken into account when applying limits specified in paragraph 2 of this article. (11) Investments in transferable securities and money market instruments issued by the same entity, or in deposits or derivative instruments issued by the same entity, which are carried out in accordance with paragraphs 1–8 of this article, may not together exceed 35% of the open-end fund’s assets. (12) Companies in the same group as the group that keeps the consolidated accounts in accordance with
recognized international accounting standards are considered to be a single company for the purpose of calculating limits referred to in this article. Open-end funds may cumulatively invest no more than 20% of assets in transferable securities and money market instruments within the same group. Article 81, paragraph 1, items 4 and 5, of the Law on Investment Funds prescribes allowable investments of a closed-end investment fund as follows: (1) deposits with authorized banks in Montenegro or in another country, provided they are subject to supervision and limitations equivalent to supervision and limitations established by the regulations, maturing within no more than 12 months and withdrawable at any time; (2) forwards and options and other financial derivatives traded on an organized market, provided they are based on financial investment instruments, financial indices, interest rates, exchange rates, or currencies in which the fund is permitted to invest according to its prospectus and articles of association; business activities agreed on in other organized markets and concluded with institutions subject to supervision of the appropriate authority in Montenegro or in an EU member state, subject to reliable and verifiable daily valuation and sellable at any time, and that may be liquidated or completed by settlement at their fair value at the request of the fund. Such instruments may be used solely to reduce or limit risk or increase yields and reduce costs of the fund without increasing the risk—that is, that they should not change the investment strategy, objectives, or limitations defined by this law and the prospectus and/or articles of association of the fund. The fund’s prospectus must provide for investment in these instruments and the purpose for which they may be used (protection against the risk and/or to achieve the investment objectives of the fund) and indicate that risk evaluation of these instruments has been provided. Article 62, paragraph 2, of the Law on Investment Funds prescribes that an investment fund for investment in initial capital may not invest more than 20% of its net assets in any other company.

Changes during 2018 and 2019

Exports and Export Proceeds

Export licenses

Without quotas

05/14/2018 The scope of the licensing regime was revised, and four tariff lines added thereby bringing the total to 30 tariff lines that are restricted (OGM No. 33/2018).

04/30/2019 The validity of the licensing regime for exports of raw wood and certain products was extended for two more years (OGM No. 24/2019).

Capital Transactions

Controls on capital transactions

Controls on capital and money market instruments

On capital market securities

Shares or other securities of a participating nature

Purchase abroad by residents

09/29/2018 According to the Article 7 of the Rulebook, the assets of insurance
companies comprising their technical provisions could be deposited and invested within the following restrictions:

(1) Maximum limits for total assets (Article 7, paragraph 1):
up to 30% (previously 15%) in the assets referred to in Article 6, paragraph 6, and in securities issued by the CBs and governments of foreign countries and which have rating of at least “A” or its equivalent, awarded by generally accepted, internationally recognized rating agencies;

(2) Maximum limits for individual asset (Article 7, paragraph 2):
up to 10% in securities of the same issuer from the assets covered by Article 6, paragraph 6, and in securities issued by the CBs and governments of foreign countries and which have rating of at least “A,” or its equivalent, awarded by generally accepted, internationally recognized rating agencies.

Provisions Specific to the Financial Sector

According to Article 9 of the Rulebook, the special provisions funds for benefits secured by an insurance contract that are directly related to the investments value (that is, special technical provisions for unit-linked insurance product) must be deposited and invested with the following restrictions:

(1) up to 50% in investment units of one investment fund;

(2) up to 70% in investment units of investment funds managed by the same management company or investment funds are related legal persons.

The insurance undertaking invests special provisions for benefits secured by an insurance contract that are directly related to the investments value in investment units of investment funds registered outside Montenegro if:

(1) a credit rating for the long-term debt of an EU member state or the OECD, in which the investment fund is registered, is not lower
than the credit rating that Montenegro has,
(2) the net assets of an investment fund is not less than €100 million,
(3) the investment policy of an investment fund allows the conclusion
of options and forward contracts solely for the purpose of protecting
the assets and liabilities of an investment fund, and
(4) the investment fund is not registered in the territories in which the
exemption from payment of taxes has been carried out, or in which
the minimum tax rates (off-shore zone) are applied.

According to Article 6 of the Rulebook on Depositing and Investing
the Technical Provisions of the Insurance Undertaking (OGM No.
062/18), insurance undertaking may deposit and invest in following
securities: bonds and other debt securities issued or guaranteed by the
municipal governments in Montenegro, an EU member state, or an
OECD member state (Article 6, paragraphs 3 and 4); and investment
units of investment funds that are registered in Montenegro, an EU
member state, or an OECD member state (Article 6, paragraph 8).

According to the Article 7 of the Rulebook, assets of insurance
undertaking could be deposited and invested within the following
restrictions:
Maximum limits for total assets (Article 7, paragraph 1):
(1) up to 30% (previously 15%) in the assets referred to in Article 6,
paragraphs 2, 5, and 6, and in securities issued by the CBs and
governments of foreign countries and which have rating of at least
“A,” or its equivalent, awarded by generally accepted, internationally
recognized rating agencies;
(2) up to 30% in the assets referred to in Article 6, paragraphs 3 and
4;
Maximum limits for individual asset (Article 7, paragraph 2):
(1) up to 10% in securities of the same issuer from the assets covered
by Article 6, paragraphs 2, 5, and 6, and in securities issued by the
CBs and governments of foreign countries and which have rating of
at least “A,” or its equivalent, awarded by generally accepted,
internationally recognized rating agencies;
(2) up to 20% in bonds and other debt securities of the same issuer
from the assets covered by the Article 6, paragraphs 3 and 4.

According to Article 9 of the Rulebook, the special provisions funds
for benefits secured by an insurance contract that are directly related
to the investments value (that is, special technical provisions for unit-
linked insurance product) must be deposited and invested with the
following restrictions:
(1) up to 50% in investment units of one investment fund;
(2) up to 70% in investment units of investment funds managed by
the same management company or investment funds are related legal
persons.

The insurance undertaking invests special provisions for benefits
secured by an insurance contract that are directly related to the
investments value in investment units of investment funds registered
outside Montenegro if:
(1) a credit rating for the long-term debt of an EU member state or
the OECD, in which the investment fund is registered, is not lower
than the credit rating that Montenegro has,
(2) the net assets of an investment fund is not less than €100 million,
(3) the investment policy of an investment fund allows the conclusion
of options and forward contracts solely for the purpose of protecting
the assets and liabilities of an investment fund, and
(4) the investment fund is not registered in the territories in which the
exemption from payment of taxes has been carried out, or in which
the minimum tax rates (off-shore zone) are applied.
062/18), insurance undertaking may deposit and invest in following securities: bonds and other debt securities issued or guaranteed by the municipal governments in Montenegro, an EU member state, or an OECD member state (Article 6, paragraphs 3 and 4); and investment units of investment funds that are registered in Montenegro, an EU member state, or an OECD member state (Article 6, paragraph 8).

According to the Article 7 of the Rulebook, assets of insurance undertaking could be deposited and invested within the following restrictions:

Maximum limits for total assets (Article 7, paragraph 1):
(1) up to 30% (previously 15%) in the assets referred to in Article 6, paragraphs 2, 5, and 6, and in securities issued by the CBs and governments of foreign countries and which have rating of at least “A,” or its equivalent, awarded by generally accepted, internationally recognized rating agencies;
(2) up to 30% in the assets referred to in Article 6, paragraphs 3 and 4;

Maximum limits for individual asset (Article 7, paragraph 2):
(1) up to 10% in securities of the same issuer from the assets covered by Article 6, paragraphs 2, 5, and 6, and in securities issued by the CBs and governments of foreign countries and which have rating of at least “A,” or its equivalent, awarded by generally accepted, internationally recognized rating agencies;
(2) up to 20% in bonds and other debt securities of the same issuer from the assets covered by the Article 6, paragraphs 3 and 4.

### Exchange Measures

| Restrictions and/or multiple currency practices | No. |
| Exchange measures imposed for security reasons | Yes. |
| In accordance with IMF Executive Board Decision No. 144-(52/51) | Yes. |
| Other security restrictions | Yes. |

No restrictions as reported in the latest IMF staff report as of December 31, 2018.

In accordance with the relevant UNSC resolutions, authorization from the Foreign Exchange Office (FEO) is required to conduct financial transactions with resident or nonresident individuals or entities with suspected links to international terrorism.

Morocco maintains restrictions against certain countries pursuant to UNSC resolutions. The negative lists of persons with suspected links to international terrorism organizations drawn up by the UN and/or similar institutions are taken into consideration. They do not benefit from any money transfer authorizations and remain under permanent surveillance.

This information can be found at the AREAER ONLINE database: http://www.elibrary-areaer.imf.org/Pages/Reports.aspx.

### Exchange Arrangement

| Currency | Yes. |
| Other legal tender | No. |

The currency of Morocco is the Moroccan dirham. Commemorative gold coins with a face value of DH 250 and DH 500 and commemorative silver coins with a face value of DH 50, DH 100, DH 150, and DH 200 are also legal tender.

**Exchange rate structure**

| Unitary | Yes. |
| Dual | |
| Multiple | |

**Classification**

| No separate legal tender | |
| Currency board | |
| Conventional peg | |
| Stabilized arrangement | Yes. |

The de jure exchange rate arrangement is a pegged exchange rate with horizontal bands vis-à-vis a composite, effective January 15, 2018, when the limit for the exchange rate band in relation to the central rate was increased to +/−2.5% from +/−0.3%. Previously, the
exchange rate arrangement was a conventional peg. Since April 2015, the basket has been composed of the euro and the US dollar, with weights of 60% and 40%, respectively. The Bank Al-Maghrib (BAM) had published until November 5, 2018, its daily foreign exchange purchases and sales on its website. The BAM has not intervened in the foreign exchange market since March 2018. The authority to establish the fixed exchange rate arrangement is found in Dahir No. 1-05-38 of November 23, 2005, promulgating Law No. 76-03 establishing the charter of the BAM (Chapter II, Missions, Section I, Core missions, Article 8). The exchange arrangement falls within the purview and prerogatives of the Ministry of Economy and Finance. The BAM is responsible for its operational implementation (quoted rates, ranges) and any changes and monitors the foreign exchange market. Because the exchange rate has remained stabilized within a 2% band against the US dollar–euro basket, the de facto exchange rate arrangement was reclassified to stabilized from a conventional peg arrangement, effective January 15, 2018.

Floating
Free floating

**Official exchange rate**

The dirham has been pegged since 1973 to a basket of currencies weighted in accordance with the geographic distribution of Morocco’s foreign trade. The composition of this basket is subject to adjustment. Since April 2015, the basket has been composed of the euro and the US dollar, with weights of 60% and 40%, respectively. The BAM sets the central dirham/US dollar exchange rate, as well as the limits for the exchange rate bands in relation to the central rate at, effective January 15, 2018, +/-2.5% (previously, +/-0.3%). However, the BAM may establish limits for the exchange rate bands against another currency. Based on its published methodology, the BAM establishes daily reference exchange rates for the dirham based on quotes listed by banks with market maker status as outlined in the BAM’s Circular.

**Monetary policy framework**

Exchange rate anchor

*U.S. dollar*

*Euro*

*Composite*

Yes. The monetary policy framework is an exchange rate anchor vis-à-vis a composite comprising the euro and the US dollar. Within the framework of an exchange rate fixed to a currency composite, the BAM adopted a monetary policy framework in 2006 based on various inflation indicators, with the overnight interest rate as its operational target to pursue its main objective of price stability. On March 22, 2016, the BAM lowered the reference interest rate to 2.25%. Since April 2015, the basket has been composed of the euro and the US dollar, with weights of 60% and 40%, respectively.

Exchange tax

Yes.  Banks charge a 0.1% commission on foreign exchange transactions
for dirhams with customers, as well as with foreign banks. This commission is not charged on transactions between Moroccan banks. For banknote transactions with foreign banks, the commission is not charged.

Exchange subsidy | No.
Foreign exchange market | Yes. The foreign exchange market was established in 1996.
Spot exchange market | Yes. Banks must adhere to the band rates set by the BAM when performing spot market foreign exchange transactions in exchange for dirhams, referred to in Articles 2 and 4 of the Decision of the Governor of the BAM on how to apply the exchange rate regime. The exchange rate band in relation to the central rate is set at, effective January 15, 2018, +/−2.5% (previously, +/−0.3%). The FEO’s Foreign Exchange Policy Statement defines spot foreign exchange transactions as follows: (1) the purchase and sale of foreign currencies against dirhams by banks, between themselves, with the BAM, or with their customers; (2) the purchase and sale of foreign currencies against other foreign currencies by banks, between themselves, with customers, with foreign banks, or with the BAM. Banks are authorized to carry out, either on their own account or on behalf of their customers, spot foreign exchange transactions, hedging transactions, loan-borrowing transactions in accordance with the provisions of BAM Instructions, and to establish foreign exchange positions, in accordance with the procedures laid down by the BAM. Amounts repatriated and not paid into the foreign currency accounts referred to in the provisions of the foreign exchange regulations in force must be transferred under market conditions and in accordance with the procedures laid down by the BAM regarding the applicable exchange rates within three working days of receipt of the funds by the bank. The equivalent in dirhams must be immediately made available to the beneficiary by the bank that received the funds. For foreign exchange transfers, licensed banks and exchange bureaus freely determine their bid-ask spread within, effective January 15, 2018, the 5% (previously, 0.6%) range established by the BAM. Banks charge a 0.1% commission on foreign exchange transactions for dirhams with customers, as well as with foreign banks. This commission is not charged on transactions between Moroccan banks. For banknote transactions with foreign banks, the commission is not charged. Banks are authorized to buy and sell foreign currency among themselves and with customers and to maintain foreign exchange positions on terms established by the BAM. Purchase, sale, and arbitrage operations among banks or on behalf of their clients may be denominated in any currency traded in the foreign exchange market. Banks may conduct foreign currency buying and selling operations with foreign banks and the BAM for any currency traded in the foreign exchange market. The BAM reserves the right not to list certain currencies even if they are traded in the foreign exchange market. Currencies not listed by the BAM may be traded by banks among themselves or with their foreign correspondents. There were 15 financial institutions active on the foreign exchange market as of December 31, 2018. For OTC operations, authorized intermediary banks are authorized as follows:

(1) Authorized intermediaries, foreign exchange bureaus, and payment institutions, licensed for this purpose by the FEO, may engage in trading involving foreign banknotes and traveler’s checks with customers. Only credit institutions with the status of authorized intermediary
may negotiate with customers LCs, bank checks, and money orders. These institutions may also engage in currency trading involving foreign banknotes with Moroccans and foreigners holding foreign exchange accounts. For OTC foreign exchange operations, licensed intermediary banks may (a) buy or sell foreign currency banknotes and traveler’s checks with their customers, and (b) repurchase nonresidents’ dirhams at the end of their stay in Morocco from previously surrendered foreign currency. The FEO permits exchange bureaus and payment institutions authorized to conduct OTC operations to buy and sell foreign banknotes and traveler’s checks with their customers as allowed by foreign exchange regulations. Foreign exchange bureaus and payment institutions authorized to conduct OTC transactions may buy, in exchange for domestic currency, foreign banknotes and/or foreign-currency-denominated traveler’s checks and sell for cash, in exchange for domestic currency, foreign banknotes and traveler’s checks, as part of the allowance for tourists, the Hajj pilgrimage, missions, and internships abroad by personnel of central and local governments and of public institutions and enterprises, and the educational allowance for students (the emigration allowance was discontinued effective January 14, 2019). Foreign exchange bureaus may not hold cash in excess of DH 500,000 (DH 600,000 for exchange bureaus in airport duty-free (hors douane) departure lounges or bonded arrival areas). Foreign exchange bureaus must deal with a licensed intermediary bank or the BAM to transfer their surplus holdings and cash traveler’s checks. Certain establishments—other than licensed bank intermediaries, exchange bureaus, and payment institutions—may also be authorized by the FEO to purchase foreign banknotes and/or traveler’s checks for dirhams on behalf of a licensed bank intermediary they have freely chosen. These authorizations are known as sub-delegations and the beneficiaries as sub-delegates. Such establishments are classified as hotels, guesthouses, tourism residences, youth hostels, international passenger carriers, travel agencies, and car rental firms with offices at ports and airports, and authorized casinos. Sub-delegates may engage, for the account of an authorized intermediary, in operations involving the purchase of foreign banknotes or negotiation of traveler’s checks with customers. (2) Authorized intermediaries, foreign exchange bureaus, and payment institutions may deal in foreign banknotes, traveler’s checks, LCs, bank checks, and money orders in foreign exchange with their customers up to the limits allowed by the maximum rates applied by the BAM at the central rate ±5% for sales and purchases, respectively. Sub-delegates engage in the transactions referred to in Article 1(3) of the BAM Circular on OTC transactions at the exchange rates agreed on with the authorized intermediary on whose behalf they are dealing. Rates applied to OTC exchange transactions are net, inclusive of all charges and commissions. Foreign exchange bureaus and payment institutions must go to a credit institution with the status of authorized intermediary trade in foreign banknotes and cash traveler’s checks. These operations are carried out on the terms and conditions agreed on between the parties. The number of foreign exchange bureaus authorized by the FEO to participate exclusively in OTC exchange operations was 665 as of December 31, 2018. The BAM intervenes in the exchange rate market, on its own initiative, via buy or sell currency auctions in exchange for dirhams. The BAM sets: (1) the currency for its interventions on the exchange
rate market; and (2) the terms of eligibility for auctions. It may also intervene using other instruments, such as OTC currency sales or purchases in exchange for dirhams, currency loans or borrowings, and foreign exchange swaps against the dirham.

The BAM buys or sells foreign currency in exchange for dirhams at the official buying and selling exchange rates on the interbank market, mainly through auctions. The BAM, as fiscal agent of the Treasury, executes the latter’s foreign exchange payment orders.

The BAM does not verify transactions when dealing with commercial banks.

Effective January 15, 2018, the BAM organizes on its own initiative auctions to buy or sell US dollars in exchange for dirhams on an electronic platform. It may also organize auctions for other currencies. Only banks with market maker status are authorized to participate in the currency auctions. The first auction took place January 15, 2018. Before each session, the BAM uses the auction platform to publish its contribution pages on Reuters, Bloomberg, and its website, with the press release setting out the characteristics of the following call for tenders: Session date; Purchase or Sale; Currency; Amount; Opening time; Closing time; Value date.

Bids must comply with the following conditions: The minimum amount per bid is US$500,000; the amount of the bid must be a multiple of 500,000; each bid may be divided, at most, into 3 tranches of a multiple of 500,000; the amount per bid must not exceed the amount of the auction announced by the BAM. The BAM sets and publishes the fluctuation band, in relation to the central exchange rate, which it uses as a basis for operating on the foreign exchange market. To that end, it sets a minimum and maximum exchange rate for each auction. Bidders may modify or cancel their bids until the auction closing time.

At the closing time of the auction session, the bids submitted to the BAM are deemed firm and irrevocable. The BAM publishes the overall results of the auction on its website as well as on its contribution pages on Reuters and Bloomberg.

Over and above the requirements of market maker banks, there is no specific mechanism governing transactions in the domestic foreign exchange market. Banks may carry out foreign exchange transactions with other banks. As of December 31, 2018, there were 15 banks operating in the interbank market.

The BAM sets the limit for the exchange rate for the exchange of foreign banknotes against the dirham at +/-5% in relation to the central exchange rate. The BAM sets the OTC band rate limits of the dirham against other currencies. It may postpone setting the OTC band rate limit of one or more currencies in the event of a major event affecting them. When performing OTC foreign exchange transactions, banks must apply exchange rates that fall within the band rate limits referred to in Article 8 of the Decision of the Governor of the BAM on how to apply the exchange rate regime. The BAM informs banks of the exchange rates of listed currencies against the US dollar applicable to the foreign banknote transactions it carries out with them at the time of publication of the rate limits. Regarding OTC foreign exchange transactions between the BAM and banks, the settlement of foreign banknote transactions initiated by banks with the BAM is carried out by hedging in foreign currency.
with their foreign correspondent banks. These transactions involve only the banknotes of listed foreign banks and result in the payment of 1% commission, before tax, to the BAM.

**Brokerage**

No.

**Market making**

Yes. Banks with market maker status must meet the following requirements: (1) Provide continuous buy/sell trading quotes of USD/MAD on the spot market listed on Reuters and Bloomberg, with updates every 15 seconds; (2) Provide firm buy/sell spot market quotes for USD/MAD on the trading platform for at least 6 banks with market maker status within the limits of their daily requirements; (3) Provide simultaneous and identical quotes on the trading platform and on Reuters and Bloomberg contribution pages; (4) Provide quotes for a minimum of US$500,000 with a maximum bid-ask spread of 50 basis points (bps) within the limits of the daily requirement; (5) Provide reciprocal daily commitments vis-à-vis relevant market makers in terms of amounts and spread; (6) Perform all trades relating to the reciprocal quote commitments on the trading platform; (7) Perform all other operations not relating to reciprocal commitments on the Bloomberg or Reuters platform.

**Forward exchange market**

Yes. Banks may perform the following hedging operations against the following risks on behalf of their customers or for their own proprietary purposes, in compliance with the foreign exchange regulations in effect: (1) Hedging operations against foreign exchange rate risk for foreign currencies against dirhams and foreign currencies against other foreign currencies; (2) Hedging operations against interest rate risk; (3) Hedging operations against the risk of commodity fluctuations taken out by Moroccan legal entities with banks or foreign broker-dealers on an organized international market; commodities include mining, energy, and agricultural products, as well as timber, coal, silver, and other precious metals; (4) Hedging transactions against any risk inherent in any asset or debt. Banks are required to ensure that the unwinding of hedging transactions does not exceed the settlement periods of the current or underlying capital transaction provided for in the commercial or financial contracts concluded in this context. Hedging transactions, carried out by banks with their customers, must be covered by a contract in the framework of the International Swaps and Derivatives Association (ISDA), the French Banking Federation (FBF), or the European Market Infrastructure Regulation (EMIR). Hedging transactions – foreign exchange transactions against dirhams – carried out with customers are subject to foreign exchange commissions in accordance with current regulations. The FEO Circular of January 19, 2018, on hedging operations specifies the terms and conditions of hedging operations with regard to the above-mentioned risks, which must be related to actual commercial or financial operations when the hedge relates to a current or capital transaction linked to the activity of the company (which must have been in business for at least three years) and when the amount to be hedged does not exceed the amount of the transaction and the settlement does not exceed the settlement deadlines. These provisions are intended to prevent speculative transactions in the foreign exchange market. To facilitate and expand hedging operations, effective January 19, 2018, banks may offer their customers a combination of instruments as part of the same hedging operation. Hedging transactions may also result in the unwinding of positions arising from such transactions. In addition, hedging the stock of imported commodities may cover exported/imported products as well as imported and stored products.
For hedging against any risk inherent in any asset or debt, banks may conclude these transactions only on a proprietary basis or on behalf of certain institutional entities – credit institutions and similar entities, insurance companies, and collective investment funds (organismes de placement collectif en titrisation). Institutional investors were also allowed to cover capital transactions, such as investments made abroad by UCITS or insurance companies.

### Arrangements for Payments and Receipts

**Prescription of currency requirements**

Transactions between Morocco and foreign countries—regardless of the type—must be settled in foreign currencies quoted by the BAM or in convertible dirhams.

**For current transactions and payments**

As a general rule, settlement of current transactions between residents and nonresidents must be made in currencies listed by the BAM.

However, importers of services are authorized to use dirhams on the national territory to settle transactions for import services rendered in Morocco by nonresident natural persons.

“Special” accounts denominated in dirhams may be opened in the name of nonresident foreign natural or legal persons in the cases and conditions set out in the 2019 General Instruction on Foreign Exchange Operations.

Current transactions within the national territory may only be settled in the national currency.

Any foreign exchange transaction not specifically defined remains subject to the authorization of the Exchange Office.

**For capital transactions**

As a general rule, settlement of capital transactions between residents and nonresidents must be made in currencies listed by the BAM.

Capital transactions within the national territory may only be settled in the national currency.

Any foreign exchange transaction not specifically defined remains subject to the authorization of the Exchange Office.

**Transactions in capital and money market instruments**

As a general rule, settlement of capital transactions between residents and nonresidents must be made in currencies listed by the BAM.

Capital transactions within the national territory may only be settled in the national currency.

**Transactions in derivatives and other instruments**

As a general rule, settlement of capital transactions between residents and nonresidents must be made in currencies listed by the BAM.

Capital transactions within the national territory may only be settled in the national currency.

**Credit operations**

As a general rule, settlement of the credit transactions between residents and nonresidents must be made in currencies listed by the BAM.

However, banks are allowed to grant loans in national currency to nonresidents: (1) Loans in dirhams granted by banks to nonresident foreign individuals and Moroccans residing abroad, intended to finance the acquisition and/or development of real estate in Morocco; (2) Consumer loans granted in dirhams by banks to foreign personnel working for diplomatic representations accredited in Morocco or international organizations based or represented in Morocco; (3) Credit lines and facilities granted to branches registered with the FEO as part of the execution of contracts in Morocco, the remuneration of which is denominated entirely in dirhams.
Credit transactions within the national territory may only be settled in national currency.

Transactions among residents in Morocco must be denominated and settled in domestic currency.

</table>

A regional payments arrangement among the CBs of Algeria, Libya, Mauritania, Morocco, and Tunisia governs payment operations among those countries. Economic operators may settle their transactions either within the framework of these arrangements or by following normal procedures.

Payments between Morocco and AMU countries may be made either under the unified bilateral payments agreement concluded between AMU countries or through the banking system.

Payments between Morocco and the AMU countries and all related documents must be denominated either in one of the currencies of the two countries involved in the transaction or in a currency that is jointly quoted by the two countries.

Clearing agreements | No. |

Barter agreements and open accounts | No. |

Administration of control | Yes. |

Foreign exchange controls are overseen by the FEO (Office des Changes) and the Administration of Customs and Indirect Taxes, both under the MOF. The Office has delegated the execution of the main exchange regulation measures to authorized banks. Foreign exchange controls involve verifying that all foreign exchange transactions are conducted in accordance with the regulations in effect.

Payments arrears | No. |

Official | No. |

Private | No. |

Controls on trade in gold (coins and/or bullion) | Yes. |

Residents may purchase, hold, and sell gold coins in Morocco for numismatic or investment purposes. Ten different types of foreign gold coins are traded on the Casablanca Stock Exchange, which does not, however, deal in gold bars.

Any individual or legal entity wishing to operate as a manufacturer or merchant of items made of platinum, gold, or silver, is required to file a declaration with the customs precious metal warranty office, eight days prior to the date on which the establishment opens or commences operation (Article 4 of Dahir No. 1-77-340 and Article 91 of Minister of Finance arrêté 1309-77).

This application must include the following supporting documents: (1) A copy certified as true to the original from the register of commerce; (2) A certificate of registration in the business license tax rolls (rôles des patentes), prepared for the year during which the declaration is prepared.

Items made from platinum, gold, or silver, except for those articles weighing one gram or less, imported into or manufactured in
Morocco, must be presented to the customs precious metal warranty offices to undergo assay and, if necessary, to be covered with hallmarks indicating warranty (Article 44 of Dahir No. 1-77-340). The items thus presented may not have a fineness of less than the following minimum amounts: (1) for platinum items: 950 per mille; (2) for gold items: 750 per mille; (3) for silver items: 800 per mille. Manufacturers and merchants (including itinerant traders) of platinum, gold, or silver items are required to keep a register signed and initialed by the chief of the customs precious metal warranty office with local jurisdiction, in which register they must enter the type, number, weight, and fineness of the articles made of these materials which they are purchasing, selling, or receiving to repair, and they must do so on a daily basis and at the very time when these items are bought, sold, or brought in (Articles 93 and 94(2) of the Minister of Finance arrêté).

On external trade

Yes.

Imports of gold are subject to authorization from the Administration of Customs and Indirect Taxes. The MOF fixes a quota annually for the importation of gold ingots. The quota is allocated among jewelers and industrial users of precious metals. Exports of gold are also regulated.

Controls on exports and imports of banknotes

Yes.

**On exports**

Exports of domestic banknotes are subject to authorization. However, authorized intermediary banks or operators established in the export free zones may export dirham-denominated banknotes to the Tangiers Export Free Zone with an export declaration. The dirhams must be drawn from convertible dirham accounts of operators in the export zone and used solely for payments to residents for the following expenditures: wages and other wage-earner remuneration up to any amount and transportation, repairs, work, and supplies of products from the territory covered up to DH 5,000 an operation and subject to an annual ceiling of DH 150,000 an operator. Travelers may export up to DH 2,000 in dirham banknotes. Authorized intermediary banks may set up foreign exchange counters on sea ferries operating between Morocco and other countries. The rules governing such foreign exchange counters (1) allow banks to bring aboard the ferry, under customs control, a stock of dirham banknotes for each crossing; and (2) limit such transactions at these counters to the purchase of foreign banknotes against dirhams from Moroccan citizens and foreign residents or nonresidents traveling to Morocco. Stocks of dirham banknotes for such counters must be brought aboard the ferry under customs control. For this purpose, the bank must execute with customs a dirham export declaration at the time of the ferry’s departure.

**Domestic currency**

Yes.

**Foreign currency**

Yes.

Foreign and Moroccan nonresidents may export foreign-currency-denominated means of payment previously imported or debited from their foreign exchange or convertible dirham accounts. Nonresident individuals (foreigners and Moroccans residing abroad) are not required to show a declaration to Customs filled out on entering the territory or a foreign currency receipt when, at the end of their stay, they resell remaining dirhams from previous exchange transactions to foreign exchange bureaus, payment institutions authorized to conduct OTC exchange transactions, and authorized intermediary banks situated at ports or airports, up to DH 2,000 a passport. Residents may also export foreign banknotes within the limits specified in the foreign exchange regulations (for example, for travel allowances).
Nonresident individuals are authorized, when leaving Morocco, to export previously imported foreign-currency-denominated means of payment in accordance with the foreign exchange regulations currently in force. Moroccans residing abroad may buy foreign currency back from banks and export up to 50% of the foreign currency repatriated and sold on the foreign exchange market over the last twelve months up to a maximum of DH 100,000, excluding the foreign currency credited to their convertible dirham accounts.

**On imports**

Yes.

**Domestic currency**

Yes. The importation of domestic banknotes is subject to authorization. Travelers are, however, authorized to import up to DH 2,000 in dirham banknotes.

**Foreign currency**

No. Nonresident travelers may bring in unlimited amounts of foreign banknotes, traveler’s checks, and other means of payment denominated in foreign exchange, including negotiable bearer instruments. The term “negotiable bearer instruments” means monetary bearer instruments such as traveler’s checks; negotiable instruments (especially checks, promissory notes, and money orders) that are either payable to the bearer or freely endorsable or made out to a fictitious beneficiary or in any form that permits a transfer by simple remittance; and incomplete instruments (especially checks, promissory notes, and money orders) that are signed but do not indicate the beneficiary. Resident travelers may also import unlimited amounts of foreign banknotes, but must surrender them for dirhams within 30 days of their return to Morocco. Imports of foreign banknotes must be declared at customs offices when the amount to be imported exceeds the equivalent of DH 100,000. Imports of foreign currency banknotes less than the equivalent of DH 100,000 may be covered, if desired, by a written declaration filed with customs on entering Morocco.

This information can be found at the AREAER ONLINE database: http://www.elibrary-areaer.imf.org/Pages/Reports.aspx.

**Resident Accounts**

Yes.

**Foreign exchange accounts permitted**

Yes.

Two types of accounts may be opened: (1) Foreign resident individuals and foreign firms may open foreign exchange accounts in Moroccan banks without limitation. These accounts may be credited with transfers from abroad, any foreign-exchange-denominated means of payment (for example, banknotes, traveler’s checks), and foreign currency that was withdrawn from a Moroccan bank in accordance with current foreign exchange regulations. Deposits of foreign banknotes by the account holder must be supported with an original signed foreign exchange import declaration from the border customs services or another document attesting to the origin of the foreign exchange. These accounts may be debited for transfers abroad and for the surrender of foreign currency for dirhams for all domestic settlements. There are no restrictions on interest payments on these accounts, on transfers between foreign exchange accounts, or on transfers between foreign exchange accounts and convertible dirham accounts. Authorized banks may issue international credit cards to holders of these accounts. Overdrafts on these accounts are not permitted. (2) Moroccan exporters of goods and services (including fishing companies) may open foreign exchange accounts and deposit up to 70% of the repatriated foreign exchange receipts from exports. The portion that Moroccan exporters of goods in the
The aeronautics and space industries may hold is 85% of export earnings in convertible dirham or foreign exchange accounts. The accounts may be credited in full or in part at the discretion of the exporter. In the case of a partial credit, the remaining amount may subsequently be credited to the account within one year of the date the foreign exchange was sold in the foreign exchange market. Exporters’ foreign exchange accounts may also be credited without restriction with (1) transfers from other foreign exchange or convertible dirham accounts belonging to the same account holder, (2) funds debited from foreign exchange accounts and sold in the foreign exchange market, and (3) funds withdrawn from convertible dirham accounts for payment of expenses in Morocco. These funds may be credited to exporters’ accounts within a period of one year of the date on which they were withdrawn. The accounts may also be credited with foreign banknotes withdrawn for professional travel purposes and not used, provided the account is credited within 30 days of the date foreign currency was withdrawn for travel that did not take place or for travel that did take place within 30 days of entry into Morocco. The accounts may be debited (1) for foreign exchange expenses related to the account holder’s professional activity, (2) to credit another foreign exchange or convertible dirham account in the name of the same account holder, and (3) to sell foreign exchange in the foreign exchange market. Authorized banks may issue international credit cards to holders of these accounts. Overdrafts are not permitted in foreign exchange accounts. Authorized banks may open foreign exchange accounts for foreign placement operations for insurance and reinsurance companies, UCITS, and OPCCs (Organisme de Placement Collectif en Capital (Capital Investment Organizations)), and make transfers related to foreign deposit, investment, and placement operations. They may also open foreign exchange accounts to allow traders to improve their management of international trade operations while avoiding exchange rate fluctuations and commissions and fees related to sales and repurchases of foreign currency. Authorized intermediary banks may open, on behalf of nonexporter individuals or firms, foreign exchange accounts to facilitate use of annual allowances in their favor under exchange regulations currently in force. Effective January 1, 2019, banks are authorized to open, on behalf of companies that do not have a foreign currency account—micro-credit associations, associations recognized as being of public utility, cooperatives and professional federations as well as individuals engaged in professional activity—and who benefit from a business travel allowance, a foreign currency or convertible dirham account for “business travel allowance” for the purpose of receiving the allowance. These accounts may record on the credit side up to 100% of the allowances related to business travel. Such accounts may also be freely debited (1) with foreign banknotes to meet business travel needs; (2) with outward transfers or Internet purchases, in connection with the above-mentioned business travel (hotel bookings, transport costs abroad, etc.); (3) for the issuance of bank checks and/or traveler’s checks; and (4) for the issuance or charging of international bank cards in accordance with the provisions of the exchange regulations. Authorized intermediary banks may also open foreign exchange accounts in the name of recipients of the tourism allowance. These accounts may be credited (1) with 100% of the tourism travel allowances and (2) with the tourism travel allowances for the individual’s minor children or spouse. Such accounts may be debited.
(1) with foreign banknotes to meet needs associated with tourism or
business travel; (2) with outward transfers or Internet purchases in
connection with tourism travel; (3) for the issuance of bank checks
and/or traveler’s checks; and (4) for the issuance or charging of
international bank cards issued in accordance with the exchange
regulations.

Authorized intermediaries may open on their books foreign exchange
accounts in the name of insurers and reinsurers for the purpose of
engaging in the collection of premiums or settlement of amounts of
compensation for claims associated with foreign exchange policies
signed in accordance with instructions from the minister of finance.
These accounts may be credited (1) with the amounts of the
premium, which is to be settled in foreign exchange; (2) with the
share of premiums accruing to the insurer under a coinsurance policy.
In such cases, the transfer must be made by debiting the “foreign
exchange insurance” account of the lead insurer; (3) with the
payments of reinsurers and co-insurers to cover their liabilities; (4)
with the payments in connection with recoveries (recours et
sauvetage); (5) for foreign exchange purchases required to cover
liabilities originating from insurance policies underwritten in foreign
exchange if the balance on a foreign exchange insurance account is
unable to cover liabilities borne by the insurer; (6) for the refund of
premiums paid to a reinsurer following termination of the policy.
They may be debited (1) with compensation for claims as allowed by
the exchange regulations; (2) with shares of premiums and other
amounts owed to co-insurers; (3) with premiums and amounts owed
to reinsurers under reinsurance agreements; and (4) with
commissions and charges payable in foreign exchange in favor of a
nonresident insurance intermediary under an insurance policy
denominated in foreign exchange. Insurance and reinsurance
enterprises licensed in Morocco and required to accept on a
reinsurance basis the risks envisaged by current exchange regulations
as well as risks ceded from foreign insurers, may open on the books
of authorized intermediaries accounts known as “reinsurance
acceptances in foreign exchange—local business” and “reinsurance
acceptances in foreign exchange—foreign business.”

Insurance and reinsurance enterprises, engaging in reinsurance
acceptances for operations insured in foreign exchange under a
policy underwritten with an insurance and reinsurance enterprise,
may open reinsurance acceptances in foreign exchange—local
business accounts on the books of authorized intermediaries. Local
business is defined as risk situated in Morocco covered by insurance
policies in foreign currencies and underwritten with Moroccan
insurers and ceded to Moroccan reinsurers. A reinsurance acceptance
in foreign exchange-local business account may be credited with (1)
amounts paid by direct insurers, on the understanding that these
payments must be made by debiting their insurance in foreign
exchange-local business accounts; and (2) with amounts owed by
reinsurance reinsurers (rétrocessionnaires) in settlement of their
liabilities on retroceded risks. A reinsurance acceptance in foreign
exchange-local business account may be debited (1) with amounts
owed to reinsurance reinsurers; and (2) with reinsurance balances
and shares in compensation for claims accruing to direct insurers.
Insurance and reinsurance enterprises engaging in reinsurance
acceptances for operations insured in foreign exchange under a
policy underwritten with an insurance and reinsurance enterprise
may open reinsurance acceptances in foreign exchange-local
business accounts on the books of authorized intermediaries. Local
business is defined as risk situated in Morocco covered by insurance
policies denominated in foreign currencies and underwritten with
Moroccan insurers and ceded to Moroccan reinsurers. A reinsurance acceptance in foreign exchange-local business account may be credited with (1) amounts paid by direct insurers, on the understanding that these payments must be made by debiting their insurance in foreign exchange-local business accounts; and (2) with amounts owed by reinsurance reinsurers (rétrocessionnaires) in settlement of their liabilities on retroceded risks. A reinsurance acceptance in foreign exchange-local business account may be debited (1) with amounts owed to reinsurance reinsurers; and (2) with reinsurance balances and shares in compensation for claims accruing to direct insurers.

Insurance and reinsurance enterprises accepting on a reinsurance basis foreign business denominated in foreign exchange may open a reinsurance acceptance in foreign exchange-foreign business account with an authorized intermediary. Foreign business is defined as risk situated abroad covered by insurance policies underwritten with foreign insurers and ceded to Moroccan reinsurers. A reinsurance acceptance in foreign exchange-foreign business account may be credited (1) with shares of premiums accruing to the reinsurer in connection with business accepted; and (2) with the balance in favor of the reinsurer. This account may be debited (1) with shares of compensation for claims borne by the reinsurer; and (2) with the balance in favor of the ceding company.

Operators duly licensed under Moroccan insurance regulations to engage in reinsurance brokerage operations, which serve to place abroad risks entrusted by foreign insurance and reinsurance firms, may open a currency-specific account referred to as a “foreign exchange reinsurance brokerage account” on the books of authorized intermediaries. These accounts may be credited with funds received from foreign insurance and reinsurance firms in connection with premiums, compensation on claims, reinsurance balances, and brokerage commissions. These accounts may be debited with amounts paid to foreign insurance and reinsurance firms in connection with premiums, compensation on claims, and reinsurance balances. Brokerage commissions accruing to Moroccan brokers must be surrendered in the foreign exchange market immediately after encashment.

The categories of capital that may be freely managed by entities with Casablanca Finance City (CFC) status and that therefore may be deposited in their foreign exchange or convertible dirham accounts at authorized intermediary banks were defined. Entities with CFC status may freely open foreign currency accounts in banks in Morocco to manage their foreign currency holdings in one of the following categories: (1) capital entrusted by nonresident investors to entities with CFC status for placement or investment purposes; (2) capital collected by entities with CFC status for their own account when issuing securities abroad or mobilizing external financing; (3) holdings in foreign exchange accounts or convertible dirham accounts opened on the books of authorized intermediaries in the name of foreign individuals or legal entities or in the name of Moroccans residing abroad and made available to entities with CFC status by the holders of such accounts; (4) funds made available to entities with CFC status by Moroccan financial institutions licensed to engage in foreign placement operations; and (5) holdings in foreign exchange accounts or convertible dirham accounts opened in the name of entities with CFC status and engaging in services export operations and (6) any other foreign-source foreign currency holdings.

Entities with CFC status engaging in services export transactions may open foreign exchange accounts or convertible dirham accounts...
on the books of authorized intermediary banks. Such accounts may be credited with 100% of proceeds from services rendered to nonresident entities by entities with CFC status.

Effective January 19, 2019, for hedging operations against the risk of commodity price fluctuation on behalf of Moroccan legal entities, banks are required to open foreign currency accounts on their books. Foreign currency accounts, dedicated to customer hedging transactions, must record all related financial flows, including the security deposit, daily margin calls, and premiums received or paid.

**Approval required**
Yes.

Approval is not required for resident foreign exporters of goods and services; nonexporters who are beneficiaries of business travel allowances and individuals with tourism allowances; insurance and reinsurance firms; operators authorized to engage in brokerage operations; entities with CFC status for needs associated with management of their foreign exchange assets; entities with CFC status engaging in services export operations; and effective January 19, 2019, Moroccan legal entities that have subscribed to hedging instruments against commodity price fluctuation risks.

**Held abroad**
Yes.

Authorized banks may transfer funds for investment purposes as deposits to foreign banks on their own behalf and on behalf of (1) insurance and reinsurance companies for up to 5% of the total volume of their reserves, (2) retirement agencies for up to 5% of the total volume of their reserves, and (3) UCITS and, effective January 14, 2019, OPCCs for up to 10% of their net assets for dirham-denominated subscriptions and, effective January 14, 2019 100% for subscriptions collected in foreign currency. Authorized banks may open foreign currency accounts related to management of hedging operations against the risk of fluctuation in the price of certain commodities. These accounts devoted exclusively to managing hedging operations must record all financial flows relating to hedging of the risk of price fluctuations of certain commodities, including the security deposit, margin calls, premiums received, etc.

Effective January 14, 2019, FEO approval is no longer required for the opening of foreign currency accounts in foreign banks for companies holding contracts abroad. These accounts may credit the amounts of advances transferred, revenue for services rendered abroad under contracts, and debit the amounts of expenditure incurred abroad in the execution of these contracts and transfers to Morocco.

**Approval required**
Yes.

Foreign residents do not require approval to open these accounts.

**Accounts in domestic currency held abroad**
No.

Residents may not open dirham accounts abroad.

**Accounts in domestic currency convertible into foreign currency**
Yes.

Resident foreign nationals may open accounts in convertible dirhams in Moroccan banks. The accounts may be credited with the proceeds of foreign exchange sales and amounts transferable from Morocco, in accordance with exchange regulations. The accounts may be debited to purchase foreign exchange or for any other domestic settlement. There are no restrictions on interest payments or on transfers between accounts abroad in convertible dirhams and between convertible dirham accounts and foreign exchange accounts. Authorized banks may issue international credit cards and checks to the holders of these accounts. Overdrafts on these accounts are not permitted. Exporters of goods and services (including fishing companies) may open accounts in convertible dirhams in Moroccan banks. These accounts may be credited with the dirham equivalent of 70% of foreign exchange that is repatriated and transferred to approved intermediary banks for exports of goods and services. The accounts may be credited in full or in part at the discretion of the...
In the case of a partial credit, the remaining amount may subsequently be credited to the account within a maximum period of one year from the date the foreign exchange was sold on the foreign exchange market. Convertible dirham accounts may be credited with (1) amounts from other foreign exchange or convertible dirham accounts belonging to the same exporter; (2) foreign banknotes withdrawn and not used, provided the account is credited within 30 days of the date the foreign currency is withdrawn; (3) the amount of expenses for which funds have been debited from the account for operations that have been partially or fully cancelled; and (4) amounts withdrawn from foreign exchange accounts and sold in the foreign exchange market and those debited from a convertible dirham account to cover expenses in Morocco. These amounts may be credited to the exporter’s account within a maximum of one year from the date of the debit. Funds in these accounts may be used to finance expenditures related to professional activities. The maximum amount of repatriated export earnings exporters may place in a foreign exchange or a convertible dirham account is 70% (85% for companies in the aeronautics and space sector). Holders of these accounts may obtain international credit cards and checks from authorized banks, but overdrafts are not permitted. Authorized intermediary banks may open convertible dirham accounts in the name of individuals to facilitate use of the annual allowances specified in the exchange regulations and to combine in one foreign exchange or convertible dirham account in the name of an individual the tourism travel allowances for the individual’s minor children or spouse. These accounts may be credited (1) with 100% of the tourism travel allowances and (2) with the tourism travel allowances for the individual’s minor children or spouse. Such accounts may be debited (1) with foreign banknotes to meet needs associated with tourism or business travel; (2) with outward transfers or Internet purchases in connection with tourism travel; (3) for the issuance of bank checks and/or traveler’s checks; and (4) for the issuance or charging of international bank cards issued in accordance with the exchange regulations.

Effective January 1, 2019, banks are authorized to open, on behalf of companies that do not have a foreign currency account – micro-credit associations, associations recognized as being of public utility, cooperatives and professional federations as well as individuals engaged in professional activity – and who benefit from a business travel allowance, a foreign currency or convertible dirham account for “business travel allowance” for the purpose of receiving the allowance.

The categories of capital that may be freely managed by entities with CFC status and that therefore may be deposited in their foreign exchange or convertible dirham accounts opened at authorized intermediary banks were defined. Entities with CFC status may freely open convertible dirham accounts in banks in Morocco to manage their foreign currency holdings in one of the following categories: (1) capital entrusted by nonresident investors to entities with CFC status for placement or investment purposes; (2) capital collected by entities with CFC status for their own account when issuing securities abroad or mobilizing external financing; (3) holdings in foreign exchange accounts or convertible dirham accounts opened on the books of authorized intermediaries in the name of foreign individuals or legal entities or in the name of Moroccans residing abroad and made available to entities with CFC status by the holders of such accounts; (4) funds made available to entities with CFC status by Moroccan financial institutions licensed to engage in foreign placement operations pursuant to exchange...
regulations; (5) holdings in foreign exchange accounts or convertible dirham accounts opened in the name of entities with CFC status and engaging in services export operations; and (6) any other foreign-source foreign currency holdings.

Entities with CFC status engaging in services export transactions may open foreign exchange accounts or convertible dirham accounts at authorized intermediary banks. Such accounts may be credited with 100% of proceeds from services rendered to nonresident entities by entities with CFC status.

### Nonresident Accounts

<table>
<thead>
<tr>
<th>Foreign exchange accounts permitted</th>
<th>Yes.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Two types of accounts may be opened:</td>
<td></td>
</tr>
<tr>
<td>(1) Foreign exchange accounts in the names of foreign nationals may be maintained by nonresident individuals and legal entities of foreign nationality. These accounts may be credited with transfers from abroad; foreign banknotes, checks, and traveler’s checks; any other means of payment denominated in foreign currency; and foreign currency withdrawn from domestic banks, in accordance with exchange regulations. Deposits of foreign banknotes by the account holder must be justified by an original signed import declaration from the border customs offices or any other supporting document. These accounts may be debited for transfers abroad or for the surrender of foreign currency for dirhams for all domestic settlements.</td>
<td></td>
</tr>
<tr>
<td>(2) Foreign exchange accounts may be opened by Moroccan nationals residing abroad. These accounts may be credited with transfers from abroad; traveler’s checks, foreign banknotes, or any other means of payment denominated in foreign currency; and foreign currency withdrawn from domestic banks in accordance with exchange regulations. They may be debited for transfers abroad and for the surrender of foreign currency for dirhams for all domestic settlements. There are no restrictions on interest payments on these accounts, transfers between foreign exchange accounts, or transfers between foreign exchange accounts and convertible dirham accounts. A set of conditions and modalities governing the opening and functioning of nonresident accounts denominated in foreign currency and in dirhams include the following: (1) specification of arrangements related to the crediting of foreign exchange accounts and foreign accounts in convertible dirhams with foreign banknotes; and (2) distinction between foreign accounts in convertible dirhams held in the names of foreign correspondents of Moroccan banks and those held in the names of customers (individuals and legal entities other than foreign correspondents).</td>

</table>
payment of interest on these accounts. (3) Nonresident foreigners whose funds are deemed nontransferable under the exchange regulations may deposit those funds in convertible term accounts at authorized intermediary banks. Funds from these accounts may be transferred within four years at a rate of 25% a year. Nonresident foreign currency and dirham accounts are subject to the following: (1) definition of modalities related to the crediting of foreign exchange accounts and foreign accounts in convertible dirhams with foreign banknotes; (2) distinction between foreign accounts in convertible dirhams in the name of foreign correspondents of Moroccan banks and those in the name of customers (individuals and legal entities other than foreign correspondents); and (3) extension of the authorization for nonresident foreigners to hold dirham-denominated accounts called “special accounts” to other entities—namely diplomatic representatives; international organizations headquartered or represented in Morocco; foreign staff of diplomatic missions and international organizations; businesses operating in EPZs and financial centers and those under contract to provide goods or services in Morocco; and effective January 14, 2019, nonresident foreign individuals who have outstanding dirham-denominated loans with Moroccan banks.

Convertible into foreign currency Yes. Funds in convertible dirham accounts held by foreign nonresident natural or juridical persons and Moroccans residing abroad are freely convertible.

Approval required No.

**Blocked accounts** Yes. Nonresident foreigners with funds deemed nontransferable under the exchange regulations may deposit them in convertible term accounts at authorized intermediary banks. Funds from these accounts may be transferred within four years at a rate of 25% a year. Holders of convertible term accounts and those acquiring them, including Moroccans residing abroad, may use these funds freely for domestic expenditures in dirhams, including investment. Investments financed from the accounts are covered by the convertibility arrangements for a period of two years from the date of the investment.

**References to legal instruments and hyperlinks** This information can be found at the AREAER ONLINE database: http://www.elibrary-areaer.imf.org/Pages/Reports.aspx.

**Imports and Import Payments**

**Foreign exchange budget** No.

**Financing requirements for imports** Yes.

**Minimum financing requirements** No.

**Advance payment requirements** Yes. Importers may make advance payments of up to 30% of the total import value of goods (50% for companies operating in the aeronautical and space sector). Importers may make advance payments of up to 30% of the total value of the import of services (up to 50% of the price invoiced for the cost of repairs and technical overhauls abroad of Moroccan fishing vessels or ships). Effective January 14, 2019, the ceiling for the advance payment of imports of goods was harmonized and the advance payment of the total amount of imports was authorized for categorized companies. Importers of goods are authorized to pay in advance for the import of goods in the following cases: (1) Up to the foreign currency equivalent of DH 200,000, regardless of the nature of the goods to be imported; (2) Up to 100% of the amount invoiced for imports of goods to be carried out by companies that have been categorized by...
the FEO and the General Directorate of Tax or by the FEO and the Customs and Indirect Taxes Administration; (3) Up to DH 1 million for companies in the aeronautics and space industries sector registered with the FEO; (4) Up to the value of the second-hand equipment acquired at auctions, on presentation of an invoice or any document in lieu thereof, drawn up by the foreign company that organizes these sales and stipulating the obligation to pay before the equipment is collected. The importation of services was redefined to include all services rendered to a resident by a nonresident in Morocco. These services may be rendered in Morocco or abroad. The provision of training, expertise, and analysis services of all kinds may be provided abroad. The ceiling for advance payment by importers of services was increased. They may make advance payments before the delivery of the service when it is so stipulated in the commercial contract: (1) Up to the foreign currency equivalent of DH 100,000, regardless of the imported service; (2) Up to the amount invoiced, in the case of equipment repairs (including aircraft) or the processing of products temporarily exported abroad and related incidental costs. Previously, importers could make advance payments for (1) goods, up to 30% of the total import value; (2) software worth at least DH 50,000, up to 50%; (3) software worth less than DH 50,000, up to 100%; (4) used capital goods acquired at auction, up to 100%; (5) goods such as industrial molds, servers, and telecommunications equipment manufactured specifically for Moroccan companies and used abroad, up to 100%. There was no option to make advance payments for the importation of goods up to DH 200,000. Importers could pay for imports before the due date in a commercial contract without requiring the foreign supplier to provide a discount of at least 3%. The rules governing payments for imports by operators in the aeronautics and space industries stipulated that these operators could pay in advance for imports of up to DH 1 million (Article 245), make a down payment of up to 50% of the total value of the imports (Article 242), and settle the full amount before entry of the merchandise in Morocco, based solely on the final invoice and shipping documents. Importers could pay in advance for imports of goods, within the following limits: (1) DH 100,000 irrespective of the type of merchandise to be imported; and (2) DH 200,000 for merchandise imported under customs arrangements involving temporary importation for inward processing with payment, and capital goods as defined by the Harmonized Commodity Description and Coding System.

**Advance import deposits**

<table>
<thead>
<tr>
<th>Description</th>
<th>Requirement</th>

<tbody>
<tr>
<td>Documentation requirements for</td>
<td>Yes.</td>
</tr>
<tr>
<td>release of foreign exchange for imports</td>
<td></td>
</tr>
<tr>
<td>Domiciliation requirements</td>
<td>Yes.</td>
</tr>
</tbody>
</table>

Entities and individuals duly listed in the trade register may engage in operations involving the import of goods and international trade, including services not related to commercial operations.

Effective January 14, 2019, the domiciliation requirement for service import operations was abolished. For imports of goods, an import security must be obtained by the importer and domiciled at an authorized bank to cover payment for goods and related fees. This domiciliation is not required for imports that do not involve payments. The import security for the purchase of goods for noncommercial use such as books, periodicals, and technical and scientific documentation by residents for their own use is also waived if the purchase value does not exceed DH 20,000. Importers in the aeronautics and space industries may domicile a single import commitment for imports from various suppliers in one or several countries.
Resident individuals may make Internet transactions involving imports of goods and services by using an international credit card, up to DH 10,000 for each calendar year.

Except for goods imported by air or by post, insurance policies for imports must be taken out with insurance companies in Morocco. For certain groups of goods, however, insurance policies may be underwritten abroad. This group includes: (1) externally financed imports if the terms include foreign insurance; (2) capital goods and equipment under turnkey contracts; (3) crude oil, gas, heifers, and wood; (4) imports whose risk cannot be covered by insurance and reinsurance companies established in Morocco; and (5) imports under free trade agreements for risk that may or may not be covered by insurance and reinsurance companies established in Morocco. Importers may, as part of their import operations, contract insurance in foreign currency with insurance and reinsurance companies established in Morocco when these contracts are signed by or on behalf of nonresidents or when the regulations authorize the underwriting of insurance abroad. Payments for discrepancies arising from the ullage of petroleum products and derivatives and payments of imports by a third party in lieu of the initial importer have been liberalized. Liberalization measures have been implemented to allow free settlement of the following transactions: (1) settlements of differentials noted between the amounts on bills of lading and those imputed by the customs services for grains, mining products, and chemicals; (2) settlements related to variations in content for the liquidation of sugar, oil, and mineral imports; (3) settlements of general average contributions for ships transporting merchandise to Morocco; and (4) settlements for disputed claims related to imports.

Effective January 14, 2019, payments for imports made in connection with sales exhibitions are subject to FEO authorization. Resident individuals may make Internet transactions involving imports of goods and services by using an international credit card, up to DH 10,000.

Imports are not restricted, except for arms and explosives, secondhand clothing, chemical products that deplete the ozone layer, white weapons, drones, and used tires and wheels with used tires or retreads. These products require an import license issued by the DFT. Imports of products that pose a threat to public health, morals, order, or security are prohibited.

Imports may be restricted for limited periods to protect new industries or counteract dumping. Safeguard (tariff) measures may be established for periods of five years to protect new industries, and they may be extended to eight years. In the case of dumping, the product in question is subject to import declaration for up to nine months, and this measure is renewable once. During this period, investigations are carried out to determine whether dumping is taking place and, if it is, to determine
the tariff measures that need to be introduced. Individuals may import merchandise valued at up to DH 20,000 a year that is not to be resold. Commercial activities of individuals not registered in the Commercial Registry and without a tax identification number must be authorized by the DFT.

**Import taxes and/or tariffs** Yes. Customs duties are levied on an ad valorem basis. A large number of goods are only subject to a 2.5% import duty. Imports of products to be used in the manufacture of goods for export are exempt from customs duties. Specific rates are applied to certain agricultural products.

**Taxes collected through the exchange system** No.

**State import monopoly** No.

**References to legal instruments and hyperlinks** This information can be found at the AREAER ONLINE database: http://www.elibrary-areaer.imf.org/Pages/Reports.aspx.

### Exports and Export Proceeds

**Repatriation requirements** Yes. There is no obligation to sign an export declaration (titre d’exportation) for any freely exportable product or merchandise. Export proceeds must be repatriated within 150 days of customs declaration. Effective January 14, 2019, the deadline for repatriating the export proceeds from goods sold on consignment was also set at 150 days (previously 180 days). The repatriation requirement does not apply to exports of goods involving no payment, which includes (1) noncommercial goods with a value less than or equal to DH 10,000; (2) samples whose value is less than or equal to DH 20,000; (3) pharmaceuticals, documents, and promotional materials shipped in connection with free samples up to 3% of the value of medications to be exported with payment, provided they are shipped simultaneously with the pharmaceuticals to be exported with payment; (4) toxic waste for disposal abroad; (5) goods shipped temporarily under economic customs arrangements; (6) goods shipped to make up for missing items or replace defective merchandise; (7) goods returned to the Moroccan exporter for additional work; (8) goods previously imported, recognized as not conforming to the order or defective, on presentation to customs of a bank certificate stating that no payment has been or will be made under the pertinent import commitment; (9) products shipped for tests and analyses by foreign laboratories; and (10) books, reviews, periodicals, and journals imported and not sold.

Proceeds from exports may be collected abroad and used directly to finance imports of goods and raw materials needed to manufacture goods for exportation. Exporters of goods may freely extend commercial credits to nonresidents for up to 150 days. Credits with longer terms may be granted FEO approval, if justified by commercial necessity. Exporters and authorized intermediary banks may extend supplier and buyer credits to foreign customers for up to 85% of the value of exported goods or works and of the provision of services abroad. These credits may be short or medium term for all categories of goods and services and long term for capital goods (repayment up to eight years).

**Surrender requirements** Yes.

**Surrender to the central bank** No.

**Surrender to authorized dealers** Yes. Foreign exchange must be surrendered within one month of payment by the foreign buyer. In principle, this date must not be more than...
150 days from the date of the shipment of goods. This deadline may be extended if warranted by business conditions and approved by the FEO. Exporters of goods and services may hold up to 70% of their export earnings in convertible dirham or foreign exchange accounts. Exporters of goods and services in the aeronautics and space industries may hold up to 85% of export earnings in convertible dirham or foreign exchange accounts. Exporters of goods may grant their foreign clients a discount of up to 5% of the invoice price for reasons such as late delivery, contribution to packaging, rebates on turnover, missing or defective items, or payments in cash. Exporters of goods in the aeronautics and space industries may grant their foreign clients a discount of up to 10% of the invoice price for reasons such as late delivery, contribution to packaging, rebates on turnover, missing or defective items, or payments in cash.

Financing requirements

No.

Documentation requirements

Yes.

Letters of credit

No.

Guarantees

No.

There is no obligation to sign an export declaration (titre d’exportation) for operations involving the export of any freely exportable product or merchandise. No guarantee is required. The customs declaration provides proof of export.

Domiciliation

No.

Preshipment inspection

No.

Preshipment inspection is not required; however, exports of food products are subject to quality control.

Other

Yes.

Entities and individuals duly listed in the trade register may engage in international trade operations, including services not related to commercial operations. Exporters may make: (1) payment of factoring commissions, (2) payment of fees for exports up to 10% of the value of the good or service exported, (3) payment of miscellaneous expenses incurred abroad for the shipment of goods to Morocco, (4) payment of expenses related to seafood exports, and (5) price concessions on exports of goods (revision of prices following weight or content analysis and cancellation of orders).

Export licenses

Yes.

Without quotas

Yes.

Exports of grain flour, charcoal, archeological items, leather and hides, raw algae and agar-agar, and chemical products that deplete the ozone layer require export licenses issued by the DFT.

With quotas

No.

Export taxes

Yes.

Collected through the exchange system

No.

Other export taxes

Yes.

A 1% quality control tax is levied on exports of foodstuffs.

This information can be found at the AREAER ONLINE database: http://www.elibrary-areaer.imf.org/Pages/Reports.aspx.

Payments for Invisible Transactions and Current Transfers

Controls on these transfers

Yes.

Trade-related payments

Yes.

Authorized banks may make payments for: (1) fees relating to international trade transactions, transportation, services, technical assistance, income from capital (including interest and dividends), and wages; (2) transfers of amounts owed to foreign suppliers for
international business transactions (purchases of goods and services abroad for direct sale to foreign customers) conducted by Moroccan corporations or individuals; and (3) transfers for services by nonresidents at call centers in Morocco, such as rental of specialized lines or satellite segments, use of telephone lines abroad, etc. Effective January 14, 2019, the importation of services was redefined to include all services rendered to a resident by a nonresident in Morocco. These services may be rendered in Morocco or abroad. The provision of training, expertise, and analysis services of all kinds may be provided abroad.

Entities with CFC status may transfer funds for foreign technical assistance expenses and services by foreign contractors and for the following: (1) subsidiaries’ share of expenses incurred by their parent company, such as management and headquarters’ expenses, royalties, and research and development expenses relating to the activity of entities with CFC status; (2) expenses billed by the parent company, including those relating to personnel; and (3) expenses relating to services shared by subsidiaries and parent companies, such as information technology (IT)-related expenses, human resource management costs, expenses relating to accounting/finance services, and training expenses.

Authorized intermediaries may transfer to the account of entities with CFC status remuneration owed in connection with management fees. Clarification of provisions governing outlays associated with the transfer of personnel by a parent company specifies that these outlays refer to fees billed to entities with CFC status in connection with the transfer of foreign personnel or Moroccans residing abroad transferred to the Moroccan subsidiary. These outlays include wages, payroll taxes, expatriation allowances, and other incidental costs such as those for housing, airline tickets, travel, etc. paid abroad for the benefit or the account of such personnel.

International courier services have been liberalized.

International messaging services refer to services performed under an agreement between a Moroccan international messaging company and its nonresident partner, entailing (1) collection of mail and parcels delivered by customers established in Morocco and their shipment abroad through the nonresident partner’s network; and (2) receipt of mail and parcels originating abroad via the nonresident partner’s network and their distribution to recipients in Morocco.

Operators in the aeronautics and space industries may settle several types of services, including contributions to the research programs of their parent companies, access to IT systems, and miscellaneous administrative and management services and transfer payments to parent companies for separation of foreign, expatriate, or transferred personnel.

| Prior approval | No. |
| Quantitative limits | No. |
| Indicative limits/bona fide test | Yes. |

Payments for freight, unloading, and storage are not restricted. Importers may pay for overweight freight charges in amounts not exceeding 10% of the amount initially stated in the commercial contract, as well as any penalty for late shipment or landing of the goods. Representation and brokerage charges of exports of goods and services may be settled for up to 10% of their value. Rental fees for stands and exhibitor fees for fairs and exhibitions abroad by residents without a foreign exchange or a convertible dirham account may be transferred by authorized intermediaries on presentation of an invoice or fee slip signed by the organizer of the fair or exhibition.

Costs related to consignment sales may be settled directly by...
deduction from the selling price of the goods sold on consignment, including such costs as commissions, transit charges, handling charges, customs duty, packaging and repackaging costs, warehousing and storage fees, expert costs, analysis or sampling fees, destruction expenses in case of damage, costs for advertising and promotion incurred by foreign commission merchants and purchasing cooperatives, costs of transportation to or from Morocco, and costs incurred by foreign consignees for marketing goods sold on consignment (fresh fruit and vegetables, citrus fruits, flowers, fishing products). Authorized intermediaries may also freely transfer funds returned by the General Treasury for the VAT on bills of purchase in Morocco collected by diplomatic and consular representatives and representatives of international public organizations and their foreign staff.

Insurance underwriting for commercial transactions is carried out in accordance with insurance regulations. The regulatory framework governing insurance and reinsurance operations lists the foreign currency operations eligible for insurance in Morocco and authorizes economic operators to contract insurance with insurance and reinsurance companies abroad. The foreign currency operations for which economic operators may contract insurance denominated in foreign currency with insurance and reinsurance companies in Morocco are as follows: (1) imports and exports, when the related contracts are signed by or on behalf of nonresidents; (2) merchandise shipments from a foreign country or a free trade zone in Morocco to a foreign country within the framework of international business transactions initiated by resident operators; (3) exports not involving payments; (4) risk in free trade and offshore areas established in the national territory; (5) aviation risk (hull and civil liability); and (6) “contractor’s all risk” operations, when the insured party is a nonresident. The foreign currency operations for which insurance may be contracted with foreign insurance and reinsurance companies are as follows: (1) mandatory insurance for which coverage cannot be found with insurance and reinsurance companies in Morocco; (2) aviation and maritime and transportation insurance, including international road transportation (hull and cargo), whether or not covered by insurance and reinsurance companies in Morocco; (3) import insurance related to payment for certain goods (crude oil, gas, and diesel fuel; heifers; wood; goods imported by air or by post; externally financed imports if the terms include foreign insurance) whose import certificate is expressed in c.i.f. value and for which the importer is required to accept insurance abroad; and (4) premiums payable by Moroccan ship owners to foreign associations as coverage for certain risks related to the development of their shipping company that cannot be covered by insurance and reinsurance companies in Morocco. Moroccan businesses with construction contracts abroad may transfer up to 20% of the contract amount to defray their initial expenses and liberalized transfers for technical assistance required for the performance of contracts abroad. The regulatory framework for international transport is set out in the 2019 General Instruction on Foreign Exchange Operations. Effective January 1, 2019, the regime applicable to international transport was reorganized with the aim of simplification, through the creation of a single “international transport account” account, to record all transactions carried out with the same foreign partner.

Since 1992, income generated by foreign investments in Morocco is freely transferable, without limitation in amount and duration, when the investments are financed in foreign currency. This income is freely transferable to nonresident foreigners, even in the absence of foreign currency financing.

Investment-related payments | Yes.
There are indicative limits on transfers of interest, which must be market based. The exchange regulation states that the applicable interest rates must correspond to the market rates but does not give a quantified limit.

Limits vary by the type of journey.

Tourism allowance: Effective January 1, 2019, DH 45,000 which may be increased by a supplement equal to 10% of income tax. The overall amount of the tourism allowance may not exceed DH 100,000 a person and a calendar year. Previously, the allowance was DH 40,000 a person a year. An additional allowance of DH 20,000 could be granted for a minor child accompanying a parent during travel abroad on the passport of the beneficiary parent.

Religious travel allowance: DH 15,000 a person a calendar year for Umrah pilgrimage; DH 15,000 a person a calendar year for the Hajj pilgrimage; an additional DH 20,000 for the staff of the travel agency accompanying pilgrims, per accompanying person a trip.

Business travel allowance: 100% of the amount of corporate or income tax (for companies subject to that tax) paid by the companies and subsidiaries, referred to in Article 105, in the past fiscal year, up to DH 500,000 a calendar year; 100% of the amount of income tax for individuals engaged in professional activity, as referred to in Article 105, in the past fiscal year, up to DH 100,000 a calendar year; DH 60,000 for companies that paid corporate tax of less than DH 60,000, those exempt from corporate tax, and Moroccan micro-credit associations or associations deemed to be in the public interest, Moroccan cooperatives and professional federations.

For a given trip, the tourism allowance may be combined, in whole or in part, with any other foreign exchange allowances under a general or special FEO authorization. The same allowance for tourism travel may also be granted to Moroccan nationals living abroad. Foreign residents who wish to travel abroad may be granted the foreign exchange equivalent of all their income savings.

Moroccans and foreign nationals residing in Morocco and Moroccans residing abroad are eligible for a foreign exchange allowance equivalent to DH 15,000 for umra (lesser pilgrimage) travel.

Allowances for tourism and umra travel may be delivered in whole or in part, by subrogation, to Moroccan travel agencies approved by the Ministry of Tourism for tourism, family, cultural, or private travel abroad by means of an individual or group check or by transfer to foreign service providers.

With regard to tourism and religious travel (1) pilgrims may make advance payment of living expenses if required by contractual provisions; (2) pilgrims may purchase foreign exchange for personal expenses; (3) travel agencies may, in case of overrun of their allowances, use funds in their convertible dirham and/or foreign-currency-denominated accounts to cover the expenses of pilgrims and their travel companions; and (4) intermediaries may issue securities guaranteeing the settlement of services to be provided to pilgrims and their travel companions on behalf of Saudi service providers, at the request and on behalf of travel agencies organizing Hajj trips. Business travel by exporters of goods and services may be financed without restriction by debiting foreign exchange or...
convertible dirham accounts in Moroccan banks. For business travel other than by exporters of goods and services, a tax criterion is used to determine the maximum business travel allowance banks may provide to individuals and legal entities for companies without convertible dirham and foreign exchange accounts. The allowance is 100% of the amount of corporate or income tax (for companies subject to that tax) paid by such companies in the past fiscal year, up to DH 500,000 a calendar year; 100% of the amount of income tax for Moroccans engaged in professional activity, with an increased ceiling for such allowances to 100% of the income tax they paid in the past fiscal year, up to DH 100,000; and up to DH 60,000 for companies that paid corporate tax of less than DH 60,000, those exempt from corporate tax, and Moroccan micro-credit associations or associations deemed to be in the public interest. Effective January 14, 2019, cooperatives and professional federations also benefit from the DH 60,000 allowance for business travel. Larger allowances may be approved by the FEO on proof of need. The allowances for specific business travel may not be added to other allowances, except for the tourism allowance.

The emigration allowance was discontinued effective January 14, 2019.

Personal payments Yes.
Prior approval No.
Quantitative limits No.
Indicative limits/bona fide test Yes.

Licensed banks may provide foreign exchange allowances to Moroccans for travel abroad for medical treatment, up to the equivalent of DH 30,000 a trip, and may make transfers, without restriction, on patients’ behalf for treatment abroad to hospitals and medical institutions. Licensed banks are also authorized to transfer sums relating to the purchase of medicine, medical supplies, and medical tests by foreign laboratories. Banks may make transfers for study abroad as follows: (1) an annual departure allowance equivalent to DH 25,000, paid in one or several installments. (2) allowances for living expenses of up to DH 10,000 a month. Transfers may be higher on presentation of supporting documents, with the possibility of making advance transfers for up to twelve months. (3) For the corresponding rents and charges (trustee fees, taxes, and fees related to the conclusion of the lease): up to the amount indicated in the required documents. (4) For tuition and fees: up to the amount indicated in the required documents.

Effective January 14, 2019, students may benefit from additional transfers for living expenses and rent for the year following the end of their studies. Banks are authorized to transfer the repayment of student loans contracted with foreign banks and the costs of visits abroad for language-learning purposes. To cover the costs of internships and missions abroad, banks may sell foreign exchange to staff of public agencies, local governments, public institutions and enterprises, and foreign institutions or organizations up to the amount allocated by their employers, or up to DH 2,000 a day, within an overall limit of DH 20,000 a trip, if the mission order does not cover the costs of the mission or the internship. The allowance of DH 20,000 for the father, mother, or guardian of a minor student leaving Morocco for the first time and the allowance for acquisition of computer hardware among the facilities granted for study travel abroad were eliminated.
Medical personnel in public agencies, local governments, and public institutions and enterprises wishing to attend professional events abroad may also purchase foreign exchange. If the costs of the mission or internship are borne in full by the traveler, banks may provide DH 2,000 a day up to DH 20,000 a trip. Banks may transfer funds to cover immigration application fees. The immigration allowance was discontinued effective January 14, 2019. Requests for additional amounts require FEO approval, which is granted on presentation of supporting documents. Banks may transfer funds for family assistance up to DH 10,000 a year.

Foreign workers’ wages

No. Foreigners residing in Morocco and employed in either the private or public sector or engaged in industrial, commercial, agricultural, or certain other professions may transfer all their income. They may also freely contribute to pension or social security funds in their countries of origin. These arrangements apply equally to Moroccans’ foreign spouses. Commercial banks are authorized to transfer pensions paid by government or private organizations to retirees residing permanently abroad. In addition, retired foreigners and Moroccans’ foreign spouses may transfer their entire pensions. They may also transfer severance benefits paid by their Moroccan employers by order of a Moroccan court. Authorized banks may make payments for after-tax earnings of foreign or Moroccan artists residing abroad who are invited to exhibit or perform in Morocco, and transfers of prize money won at film festivals.

Credit card use abroad

Yes. Banks may issue credit cards without restriction to (1) foreigners holding accounts in foreign exchange or convertible dirhams; (2) staff of international organizations whose offices or headquarters are in Morocco; (3) Moroccans residing abroad who hold accounts in convertible dirhams or in foreign exchange; (4) exporters of goods and services who hold accounts in foreign exchange or convertible dirham accounts; (5) economic operators, other than exporters of goods and services, who have a foreign exchange travel allowance; and (6) effective January 14, 2019, drivers for the payment of vehicle-related expenses (International Road Transport) and travel expenses. Authorized banks may also issue international credit cards to any Moroccan or foreign individual eligible for a foreign exchange allowance under the exchange regulations for travel for tourism, religious, medical, or educational purposes. Banks may issue resident individuals international credit cards to pay for purchases made over the Internet, up to DH 10,000 a year. Effective January 14, 2019, startups listed by the Digital Development Agency may pay, by international payment card, for services up to DH 500,000.

### Proceeds from Invisible Transactions and Current Transfers

#### Repatriation requirements

Yes. Moroccan residents and legal entities must repatriate foreign exchange receipts accruing from their claims on nonresidents and sell them in the foreign exchange market. Resident foreigners must repatriate only foreign exchange receipts that result from their activities in Morocco. Repatriation must take place within one month of the date of the claim. For exports of services, repatriation must be made within, effective January 1, 2019, 90 days of the provision of services (previously 60 days). Exporters of services from Morocco and entities engaged in work or the provision of services abroad may grant credits to their foreign clients in an amount not to exceed 85% of the value of the services provided.

#### Surrender requirements

Yes.

#### Surrender to the central bank

No.

#### Surrender to authorized dealers

Yes. Exporters of services may keep up to 70% of their foreign exchange receipts in foreign currency or convertible dirham accounts. Proceeds from exports of services must be repatriated within 60 days following the date on which the services are delivered.

### Restrictions on use of funds

No.

companies for up to 5% of the total volume of their reserves, (2) retirement agencies for up to 5% of the total volume of their reserves, and (3) UCITS and, effective January 14, 2019, OPCCs for up to 10% of their net assets for dirham-denominated subscriptions and, effective January 14, 2019, 100% for subscriptions collected in foreign currency. Resident foreign nationals may engage in these transactions, provided they are financed with their own foreign exchange holdings.

- **Sale or issue abroad by residents**: Yes. These operations are subject to FEO approval.

- **On collective investment securities**: Yes. The regulations governing money market instruments apply.

- **Purchase locally by nonresidents**: No.

- **Sale or issue locally by nonresidents**: Yes. Issuance of these instruments by nonresidents is subject to authorization.

- **Purchase abroad by residents**: Yes. Purchases abroad by residents are subject to FEO authorization. Authorized banks may transfer funds for the purchase of financial instruments listed or traded on regulated markets in OECD, EU, and AMU member countries on their own behalf and on behalf of (1) insurance and reinsurance companies for up to 5% of the total volume of their reserves, (2) retirement agencies for up to 5% of the total volume of their reserves, and (3) UCITS and, effective January 14, 2019, OPCCs for up to 10% of their net assets for dirham-denominated subscriptions and, effective January 14, 2019, 100% for foreign currency-denominated subscriptions. Resident foreign nationals may engage in these transactions, provided they are financed with their own foreign exchange holdings.

- **Sale or issue abroad by residents**: Yes. Approval is required.

- **Controls on derivatives and other instruments**: Yes.

- **Purchase locally by nonresidents**: Yes. Authorized intermediary banks may offer instruments to hedge against exchange, interest rate, and commodity price fluctuation risks only to resident operators.

- **Sale or issue locally by nonresidents**: Yes. Only Moroccan banks may offer instruments to hedge against exchange, interest rate, and commodity price fluctuation risks to operators.

- **Purchase abroad by residents**: Yes. Derivatives transactions must be based on real trade or financial transactions and may not be speculative. Economic agents may negotiate directly with international broker-dealers or through authorized banks to hedge against price fluctuation risk for certain commodities that are or may be traded on a secondary market. These transactions must take place through dedicated multicurrency accounts at Moroccan banks. Authorized banks may offer their customers options for exchanging dirhams and foreign currency and one foreign currency for another, to the exclusion of foreign instruments. To hedge against customer risk, authorized banks must have recourse to the local interbank market. If they are unable to find the appropriate hedging instrument in the local market, they may turn to the international market for foreign exchange hedging instruments. Hedging transactions must be backed by the foreign exchange options selected by customers. Authorized intermediary banks may also offer instruments to hedge against the risk of interest rate fluctuation to resident economic operators with foreign loans. Authorized banks may offer their customers forward cover for foreign exchange and may do so by borrowing or investing foreign exchange at the same maturities as the hedging operations. Authorized intermediaries may also sign, on their own behalf or on
behalf of their customers (1) spot or forward contracts for foreign currency swaps, (2) swap contracts with their foreign correspondents, and (3) swap contracts for foreign exchange and dirhams, regardless of the maturity date, on behalf of Moroccan companies with concessional financing by foreign governments or public agencies or international development institutions.

Effective January 19, 2018, for hedging against any risk inherent in any asset or debt, banks may conclude these transactions only on a proprietary basis or on behalf of certain institutional entities – credit institutions and similar entities, insurance companies, and collective investment funds (organismes de placement collectif en titrisation). Institutional investors were also allowed to cover capital transactions, such as investments made abroad by UCITS or insurance companies.

<td>Effective January 14, 2019, banks are authorized to issue bank guarantees and guarantees to residents to cover commitments made to nonresidents, when such commitments arise from current or capital transactions carried out in accordance with the provisions of the 2019 General Instruction on Foreign Exchange Operations.</td>
</tr>
<tr>
<td>By residents to nonresidents</td>
<td>Yes.</td>
<td></td>
</tr>
</tbody>
</table>
Previously, Moroccan banks could issue sureties to nonresidents on behalf of residents for (1) participation of the latter in markets abroad (provision of goods or services); (2) refunds of down payments received from foreign customers; and (3) guarantees of loans and other financial instruments in accordance with foreign exchange regulations. Authorized intermediary banks could issue sureties for (1) substitution of a holdback corresponding to the portion payable in foreign currency under a public or private contract awarded to a nonresident; (2) guarantees of payment related to commitments to nonresidents for maritime transportation and certain road and air transport operations; (3) guarantees in favor of foreign banks granting medium- or long-term loans to nonresident foreigners and to Moroccans residing abroad, up to the total value of the property to be purchased; and (4) payment to foreign lenders of the foreign currency equivalent of the amounts received, within the framework of contracts to perform work and/or provide services fully or partly financed by foreign lenders, in lieu of the contract principals. Authorized intermediaries had to issue sureties on behalf of goods and services exporters guaranteeing payment in the context of commitments to nonresidents when such commitments were derived from transactions related to exports of goods and/or services. Authorized intermediary banks could issue outright surety or performance bonds for exporters of services in favor of nonresidents.

Effective January 14, 2019, banks are authorized to issue or to accept bank guarantees and guarantees to nonresidents to cover commitments made to residents, when such commitments arise from current or capital transactions carried out in accordance with the provisions of the 2019 General Instruction on Foreign Exchange Operations. Guarantees and sureties issued by Moroccan banks on behalf of a nonresident to a resident must be counter-secured by foreign banks. Moroccan banks may issue or accept, in favor of residents, sureties issued on behalf of nonresidents in support of the participation of those nonresidents in public or private contracting, the supply of goods and services, and the refund of down payments. They may also issue sureties on behalf of nonresidents in settlement of tax liabilities and financial obligations. A counter guarantee from a foreign bank is required for sureties issued by Moroccan banks on behalf of nonresidents. Sureties issued for the account of a nonresident in favor of a resident must be counter guaranteed by a first-class bank abroad. When claims are entered under sureties issued or accepted in favor of residents on behalf of nonresidents, the proceeds must be repatriated to Morocco.

Outward direct investment

Outward direct investment is subject to FEO approval, but resident firms in operation for at least three years whose accounts have been certified by an external auditor may invest without authorization up to an annual maximum of DH 100 million for investment in Africa and DH 50 million for other continents. This investment must be related to the usual activity of the firm and may take various forms—for example, the establishment of new enterprises, equity participation in existing enterprises, the opening of representative or liaison offices, branches, etc. Investors may freely reinvest the proceeds from the sale or liquidation of their investments abroad. Resident foreigners may invest abroad, provided the operations are financed from their own funds abroad or from their holdings in convertible dirhams or foreign exchange. Financial enterprises having CFC status were allowed to engage in their outward investment operations: (1) with no requirements on the...
minimum number of activities (however, legal entities are required to show at least three years of minimum number of activities); (2) with no restriction on the amount for the share subscribed for by nonresidents or resident aliens in the capital of investment funds having CFC status (the ceilings of DH 100 million and DH 50 million apply only to shares subscribed for by residents).

</tbody>
</table>

There are no controls on transfers made directly through the banking system of the proceeds of the liquidation or sale of foreign investments, including capital gains, when such investment is financed by the sale of foreign exchange or by debit from a convertible dirham account in foreign currency.

These operations are subject to the investment regulations.

Purchases of real estate abroad by Moroccan residents require FEO authorization. Resident foreigners may purchase real estate abroad with funds from foreign exchange accounts.

Foreign nationals may purchase real estate, except farmland.

These operations are subject to FEO approval. However, Moroccan banks may grant loans in dirhams to nonresident foreigners and Moroccans residing abroad for the purchase or development of real estate in Morocco, up to 70% of the price of the real estate to be purchased or developed. They may also grant dirham-denominated consumer loans to foreign personnel working for diplomatic representations accredited in Morocco or international organizations based or represented in Morocco.

These earnings are transferable, provided the gambling was financed with foreign currency.

investment funds

Limits (max.) on securities issued by nonresidents

Yes. UCITS may invest abroad in the form of bank deposits with foreign banks, debt securities, and financial instruments listed or traded on regulated markets in other countries, for up to 10% of the value of their assets.

Effective January 14, 2019, the foreign placement regime was extended to OPCCs with the possibility for UCITS and OPCCs to invest abroad up to 100% of collected subscriptions in foreign currencies.

Limits (max.) on investment portfolio held abroad

Yes. UCITS may invest abroad in the form of bank deposits with foreign banks, debt securities, and financial instruments listed or traded on regulated markets in other countries, for up to 10% of the value of their assets.

Limits (min.) on investment portfolio held locally

No. There is no minimum limit applicable to the portion of the investment portfolio that may be held locally.

Changes during 2018 and 2019

Exchange Arrangement

Classification

Stabilized arrangement 01/15/2018 The de jure exchange rate arrangement is a pegged exchange rate with horizontal bands vis-à-vis a composite, when the limit for the exchange rate band in relation to the central rate was increased to +/-2.5% from +/-0.3%. Previously, the exchange rate arrangement was a conventional peg.

01/15/2018 Because the exchange rate has remained stabilized within a 2% band against the US dollar–euro basket, the de facto exchange rate arrangement was reclassified to stabilized from a conventional peg arrangement.

Official exchange rate 01/15/2018 The limits for the exchange rate bands in relation to the central rate were increased to +/-2.5% from +/-0.3%.

Foreign exchange market

Spot exchange market 01/15/2018 For foreign exchange transfers, licensed banks and exchange bureaus freely determine their bid-ask spread within the 5% (previously, 0.6%) range established by the Bank Al-Maghrib.

01/15/2018 The exchange rate band in relation to the central rate, to which banks must adhere when performing spot market foreign exchange transactions in exchange for dirhams, was set at +/-2.5% (previously, +/-0.3%).

01/14/2019 The emigration allowance provided through foreign exchange bureaus and cash transfer corporations authorized to conduct OTC transactions was discontinued.

Operated by the central bank

Auction 01/15/2018 The Bank Al-Maghrib organizes on its own initiative auctions to buy or sell US dollars in exchange for dirhams on an electronic platform. It may also organize auctions for other currencies. Only banks with market maker status are authorized to participate in currency auctions.

Forward exchange market 01/19/2018 To facilitate and expand hedging operations, banks were allowed to offer their customers a combination of instruments as part of the same hedging operation. Hedging transactions may also result in the unwinding of positions arising from such transactions. In addition,
hedging the stock of imported commodities may cover export/imported products as well as imported and stored products.

For hedging against any risk inherent in any asset or debt, banks may conclude these transactions only on a proprietary basis or on behalf of certain institutional entities – credit institutions and similar entities, insurance companies, and collective investment funds (organismes de placement collectif en titrisation). Institutional investors were also allowed to cover capital transactions, such as investments made abroad by UCITS or insurance companies.

Resident Accounts

Foreign exchange accounts permitted

Held domestically

01/01/2019

Banks were authorized to open, on behalf of companies that do not have a foreign currency account – micro-credit associations, associations recognized as being of public utility, cooperatives and professional federations as well as individuals engaged in professional activity – and who benefit from a business travel allowance, a foreign currency or convertible dirham account for “business travel allowance” for the purpose of receiving the allowance.

Approval required

01/19/2019

Approval is not required for Moroccan legal entities that have subscribed to hedging instruments against commodity price fluctuation risks.

Held abroad

01/14/2019

Foreign Exchange Office approval is no longer required for the opening of foreign currency accounts in foreign banks for companies holding contracts abroad. These accounts may credit the amounts of advances transferred, revenue for services rendered abroad under contracts, and debit the amounts of expenditure incurred abroad in the execution of these contracts and transfers to Morocco.

In addition to UCITS, authorized banks may transfer funds for investment purposes as deposits to foreign banks on behalf of Capital Investment Organizations (Organisme de Placement Collectif en Capital) for up to 10% of their net assets for dirham-denominated subscriptions. At the same time, for both UCITS and OPCCs investments abroad were allowed up to 100% of collected subscriptions in foreign currencies.

Accounts in domestic currency convertible into foreign currency

01/01/2019

Banks were authorized to open, on behalf of companies that do not have a foreign currency account – micro-credit associations, associations recognized as being of public utility, cooperatives and professional federations as well as individuals engaged in professional activity – and who benefit from a business travel allowance, a foreign currency or convertible dirham account for “business travel allowance” for the purpose of receiving the allowance.

Nonresident Accounts

Domestic currency accounts

01/14/2019

The authorization for nonresident foreigners to hold dirham-denominated accounts called “special accounts” was extended to nonresident foreign individuals who have outstanding dirham-denominated loans with Moroccan banks.

Imports and Import Payments
Financing requirements for imports
Advance payment requirements 01/14/2019
The ceiling for the advance payment of imports of goods was harmonized and the advance payment of the total amount of imports was authorized for categorized companies. Importers of goods are authorized to pay in advance for the import of goods in the following cases: (1) Up to the foreign currency equivalent of DH 200,000, regardless of the nature of the goods to be imported; (2) Up to 100% of the amount invoiced for imports of goods to be carried out by companies that have been categorized by the Foreign Exchange Office (FEO) and the General Directorate of Tax or by the FEO and the Customs and Indirect Taxes Administration; (3) Up to DH 1 million for companies in the aeronautics and space industries sector registered with the FEO; (4) Up to the value of the second-hand equipment acquired at auctions, on presentation of an invoice or any document in lieu thereof, drawn up by the foreign company that organizes these sales and stipulating the obligation to pay before the equipment is collected.
The importation of services was redefined to include all services rendered to a resident by a nonresident in Morocco. These services may be rendered in Morocco or abroad. The provision of training, expertise, and analysis services of all kinds may be provided abroad. The ceiling for advance payment by importers of services was increased. They may make advance payments before the delivery of the service when it is so stipulated in the commercial contract: (1) Up to the foreign currency equivalent of DH 100,000, regardless of the imported service; (2) Up to the amount invoiced, in the case of equipment repairs (including aircraft) or the processing of products temporarily exported abroad and related incidental costs.
Previously, importers could make advance payments for (1) goods, up to 30% of the total import value; (2) software worth at least DH 50,000, up to 50%; (3) software worth less than DH 50,000, up to 100%; (4) used capital goods acquired at auction, up to 100%; (5) goods such as industrial molds, servers, and telecommunications equipment manufactured specifically for Moroccan companies and used abroad, up to 100%. There was no option to make advance payments for the importation of goods up to DH 200,000. Importers could pay for imports before the due date in a commercial contract without requiring the foreign supplier to provide a discount of at least 3%. The rules governing payments for imports by operators in the aeronautics and space industries stipulated that these operators could pay in advance for imports of up to DH 1 million (Article 245), make a down payment of up to 50% of the total value of the imports (Article 242), and settle the full amount before entry of the merchandise in Morocco, based solely on the final invoice and shipping documents. Importers could pay in advance for imports of goods, within the following limits: (1) DH 100,000 irrespective of the type of merchandise to be imported; and (2) DH 200,000 for merchandise imported under customs arrangements involving temporary importation for inward processing with payment, and capital goods as defined by the Harmonized Commodity Description and Coding System.

Documentation requirements for release of foreign exchange for imports
Domiciliation requirements 01/14/2019
The domiciliation requirement for service import operations was abolished.
Other 01/14/2019
Payments for imports made in connection with sales exhibitions are subject to Foreign Exchange Office authorization.
**Exports and Export Proceeds**

**Repatriation requirements**  
01/14/2019  
The deadline for repatriating the export proceeds from goods sold on consignment was set at 150 days (previously 180 days).

**Payments for Invisible Transactions and Current Transfers**

**Controls on these transfers**

**Trade-related payments**  
01/14/2019  
The importation of services was redefined to include all services rendered to a resident by a nonresident in Morocco. These services may be rendered in Morocco or abroad. The provision of training, expertise, and analysis services of all kinds may be provided abroad.

**Indicative limits/bona fide test**  
01/01/2019  
The regime applicable to international transport was reorganized with the aim of simplification, through the creation of a single “international transport account” account, to record all transactions carried out with the same foreign partner.

**Payments for travel**

**Quantitative limits**  
01/01/2019  
The travel allowance was increased to DH 45,000 which may be increased by a supplement equal to 10% of income tax. The overall amount of the tourism allowance may not exceed DH 100,000 a person and a calendar year. Previously, the allowance was DH 40,000 a person a year. An additional allowance of DH 20,000 could be granted for a minor child accompanying a parent during travel abroad on the passport of the beneficiary parent.

**Indicative limits/bona fide test**  
01/14/2019  
The emigration allowance was discontinued.

**Personal payments**

**Indicative limits/bona fide test**  
01/14/2019  
Cooperatives and professional federations may benefit from the DH 60,000 allowance for business travel.

**Credit card use abroad**

**Indicative limits/bona fide test**  
01/14/2019  
Startups listed by the Digital Development Agency may pay, by international payment card, for services up to DH 500,000.

**Proceeds from Invisible Transactions and Current Transfers**

**Repatriation requirements**  
01/01/2019  
For exports of services, repatriation must be made within 90 days of the provision of services (previously 60 days).

**Capital Transactions**

**Controls on capital transactions**

**On capital market securities**

**Bonds or other debt securities**

**Purchase abroad by residents**  
01/14/2019  
In addition to UCITS, authorized banks may transfer funds for the purchase of debt securities listed or traded on regulated markets on behalf of Capital Investment Organizations (Organisme de Placement Collectif en Capital - OPCC) for up to 10% of their net assets for dirham-denominated subscriptions. At the same time, for both UCITS and OPCCs investments abroad were allowed up to 100% of collected subscriptions in foreign currencies.
On money market instruments

Purchase abroad by residents 01/14/2019

In addition to UCITS, authorized banks may transfer funds to purchase financial instruments listed or traded on regulated markets on behalf of Capital Investment Organizations (Organisme de Placement Collectif en Capital - OPCC) for up to 10% of their net assets for dirham-denominated subscriptions. At the same time, for both UCITS and OPCCs investments abroad were allowed up to 100% of collected subscriptions in foreign currencies.

On collective investment securities

Purchase abroad by residents 01/14/2019

In addition to UCITS, authorized banks may transfer funds for the purchase of financial instruments listed or traded on regulated markets in OECD, EU, and AMU member on behalf of Capital Investment Organizations (Organisme de Placement Collectif en Capital - OPCC) for up to 10% of their net assets for dirham-denominated subscriptions. At the same time, for both UCITS and OPCCs investments abroad were allowed up to 100% of collected subscriptions in foreign currencies.

Controls on derivatives and other instruments

Purchase abroad by residents 01/19/2018

For hedging against any risk inherent in any asset or debt, banks may conclude these transactions only on a proprietary basis or on behalf of certain institutional entities – credit institutions and similar entities, insurance companies, and collective investment funds (organismes de placement collectif en titrisation). Institutional investors were also allowed to cover capital transactions, such as investments made abroad by UCITS or insurance companies.

Controls on credit operations

Guarantees, sureties, and financial backup facilities

By residents to nonresidents 01/14/2019

Banks were authorized to issue bank guarantees and guarantees to residents to cover commitments made to nonresidents, when such commitments arise from current or capital transactions carried out in accordance with the provisions of the 2019 General Instruction on Foreign Exchange Operations. Previously, Moroccan banks could issue sureties to nonresidents on behalf of residents for (1) participation of the latter in markets abroad (provision of goods or services); (2) refunds of down payments received from foreign customers; and (3) guarantees of loans and other financial instruments in accordance with foreign exchange regulations. Authorized intermediary banks could issue sureties for (1) substitution of a holdback corresponding to the portion payable in foreign currency under a public or private contract awarded to a nonresident; (2) guarantees of payment related to commitments to nonresidents for maritime transportation and certain road and air transport operations; (3) guarantees in favor of foreign banks granting medium- or long-term loans to nonresident foreigners and to Moroccans residing abroad, up to the total value of the property to be purchased; and (4) payment to foreign lenders of the foreign currency equivalent of the amounts received, within the framework of contracts to perform work and/or provide services fully or partly financed by foreign lenders, in lieu of the contract principals. Authorized intermediaries had to issue sureties on behalf of goods and services exporters guaranteeing payment in the context of commitments to nonresidents when such commitments were derived from transactions related to exports of goods and/or services. Authorized intermediary banks could issue outright surety or performance bonds for exporters of services in favor of nonresidents. Banks were authorized to issue or to accept bank guarantees and...
guarantees to nonresidents to cover commitments made to residents, when such commitments arise from current or capital transactions carried out in accordance with the provisions of the 2019 General Instruction on Foreign Exchange Operations.

Provisions Specific to the Financial Sector

Provisions specific to commercial banks and other credit institutions
Lending locally in foreign exchange

01/14/2019
Banks were authorized to use the foreign currency held in foreign exchange accounts opened on their books for the purpose of granting loans to finance import, export, international trade and investment operations, and to finance the operational cycle of industrial companies located in EPZs located in Morocco.

Provisions specific to institutional investors
Investment firms and collective investment funds
Limits (max.) on securities issued by nonresidents

01/14/2019
The foreign placement regime was extended to Capital Investment Organizations (Organisme de Placement Collectif en Capital – OPCCs) with the possibility for UCITS and OPCCs to invest abroad up to 100% of collected subscriptions in foreign currencies.
MOZAMBIQUE
(Position as of December 31, 2018)

Exchange Arrangement

Currency
Yes. The currency of Mozambique is the Mozambican metical. Polymer Mt 20, Mt 50, and Mt 100 notes are in circulation, and Mt 200, Mt 500, and Mt 1,000 notes have been improved to make them more durable. Also in circulation are Mt 0.50, Mt 1, Mt 2, Mt 5, and Mt 10 coins.

Other legal tender
No.

Exchange rate structure

Unitary
Yes. Commercial banks must apply uniform exchange rates in their transactions with the public, irrespective of their nature or purpose, that is, the purchase and sale of foreign exchange involving notes, foreign currency and other foreign operations or receivables.

Dual

Multiple

Classification

No separate legal tender

Currency board

Conventional peg

Stabilized arrangement

Crawling peg

Crawl-like arrangement

Pegged exchange rate within horizontal
bands
Other managed arrangement
Floating

Yes. Both the de jure and de facto exchange rate arrangements are classified as floating. As a major conduit for foreign aid flows, the Bank of Mozambique (BM) is the main channel for foreign exchange into the market. It also intervenes to smooth seasonal fluctuations. For its transactions in Mozambique’s interbank foreign exchange market (MCI), the BM uses the quotes shown on the screen for each commercial bank.

Free floating

Official exchange rate

Yes. The official (benchmark) market exchange rate is calculated as the simple average of the exchange rates quoted daily by commercial banks at three moments in the day: 9:30 a.m., 12:30 p.m., and 3:30 p.m.

Core inflation
The monetary policy regime is based on the interest rate as an operating target. The monetary policy interest rate is called the interbank money market rate (MIMO rate). The framework is considered transitory until the adoption of an explicit inflation-targeting regime and has as main characteristics: (1) MIMO rate as a signaling rate to the market of the BM monetary policy stance; (2) the MIMO rate is defined based on the analysis of the domestic and international recent macroeconomic development, as well as the inflation projections, weighted to its associated risks; (3) the MIMO rate is fixed within the corridor formed by the interest rate of the Standing Lending Facility and Deposit Standing Facility; (4) the bank manages very short liquidity through repo and reverse repo overnight operations, to ensure that the interest rate of the transactions contracted in the interbank market for this period fluctuates around the MIMO rate; and (5) for the management of longer-term liquidity, the bank uses reverse repo operations of 7 up to 364 days and the issuance of BT of 91, 182, and 364 days, as well as the adjustment of the coefficient and period of compliance with the reserve requirement.

ADs may trade freely with their customers. The maximum bid-ask spread is 2%, excluding the commissions charged by the banks on foreign exchange transactions.

Commercial banks, MCI participants, and exchange bureaus can establish operations with customers at freely negotiated rates. Negotiated transactions between the BM and commercial banks have a spot-value date (up to two business days). Fifteen banks and 14 foreign exchange bureaus are authorized to buy and sell foreign exchange. The BM grants licenses to deal in foreign exchange. The establishment of foreign exchange bureaus is subject to authorization by the BM. Foreign exchange bureaus may not enter into foreign exchange transactions directly with the BM, and they may not make
foreign currency payments or transfers on behalf of their clients. Foreign exchange bureaus may maintain accounts abroad subject to authorization by the BM.

Operated by the central bank  Yes.

Foreign exchange standing facility  No.

Allocation  No.

Auction  No. The MCI regulations are currently being revised with a view to introducing foreign exchange auctions.

Fixing  Yes. Interbank market operations and operations with the BM are carried out using the BM’s software. All US dollar–meticais buying and selling quotes of banks authorized to operate in the MCI are shown on a screen. The quotes may be adjusted as many times a day as necessary during MCI operating hours, 8:30 a.m. to 3:30 p.m. The average official exchange rate of the day is set at 3:30 p.m. (close of business). All operations between the banks and the BM are based on the exchange rates shown on the screen. The exchange rate used for accounting and valuation purposes is the benchmark rate, calculated at 3:30 p.m. on each business day.

Interbank market  Yes. Commercial banks may engage in interbank transactions through the MCI. Exchange bureaus may not participate in the MCI. Fifteen commercial banks participate in this market. The BM stipulates a maximum bid-ask spread of 20 cents for transactions between commercial banks, and a maximum bid-ask spread of 2% for commercial banks’ transactions with customers. The BM intervenes in the MCI at prices quoted by the commercial banks through the BM’s application software (Meticalnet). The BM is a price taker. As of end 2018, there were 15 banks participating in the interbank foreign exchange market.

Over the counter  No.

Brokerage  No.

Market making  Yes. Commercial banks participating in the MCI must adhere to a code of conduct and honor up to one firm quote of US$50,000 a day. The maximum spread between the foreign exchange buying and selling rates is set by the BM. Within these limits, commercial banks may freely set their exchange rates in interbank transactions. The maximum spread between buying and selling rates is set by the BM and communicated to market participants, which implies that rates are based exclusively on market criteria determined by participating institutions.

Forward exchange market  Yes. Commercial banks may carry out spot transactions. The use of this market is not common. The BM does not carry out forward exchange transactions.

Official cover of forward operations  No.

**Resident Accounts**

The use of foreign currency by residents for domestic transactions is common, although regulated.

The BM is responsible for foreign exchange policy and administers its control.

Gold exports are subject to BM approval.

Residents other than monetary authorities may hold gold for numismatic purposes or as jewelry or ornaments.

The exportation of gold is governed by special regulations; the same regulations that apply to other imported items are applicable to the importation of nonmonetary gold. The exportation of gold is subject to registration and approval by the BM.

Exports of domestic currency are subject to a limit of Mt 10,000.

Immigrants may export foreign banknotes up to the equivalent of US $5,000 and, above that, up to the amount they declared on entry.

Imports of foreign currency in excess of, effective December 7, 2018, US$10,000 (previously US$5,000) or its equivalent must be declared.
Foreign exchange accounts permitted | Yes.  
---|---  
Held domestically | Yes.  

Foreign exchange accounts may be credited with (1) deposits of banknotes and traveler’s checks; (2) bank account transfers; (3) funds from foreign loans; (4) deposits of other payment instruments accepted by the banking system; (5) funds from loans or intended to repay such loans; and (6) export proceeds and foreign investment income without limits. Foreign exchange may be withdrawn from resident accounts only for travel abroad and is limited to the equivalent of, effective December 7, 2018, US$10,000 (previously US$5,000) a transaction. For local payments, the funds need to be converted to local currency. Balances in these accounts may not be transferred abroad freely. These accounts may be debited for payments abroad, subject to Notice No. 20/GBM/2017 of December 27, 2017 (Foreign Exchange Regulation).

Approval required | No.  
Held abroad | Yes.  

These accounts are subject to approval by the BM, but balances may be freely transferred home.

Approval required | Yes.  

Residents must obtain BM approval to open these accounts.

Accounts in domestic currency held abroad | No.  
Accounts in domestic currency convertible into foreign currency | No.

This information can be found at the AREAER ONLINE database: [http://www.elibrary-areaer.imf.org/Pages/Reports.aspx](http://www.elibrary-areaer.imf.org/Pages/Reports.aspx).

Nonresident Accounts

Foreign exchange accounts permitted | Yes.  
Approval required | No.  
Domestic currency accounts | Yes.  

Domestic currency accounts held in connection with capital operations are subject to approval by the BM.

Convertible into foreign currency | Yes.  

Confirmation of the origin of the funds and approval are required. Transfers of such funds abroad are permitted with confirmation of their origin.

Approval required | Yes.  

Approval is required when these accounts involve capital operations.

Blocked accounts | No.

This information can be found at the AREAER ONLINE database: [http://www.elibrary-areaer.imf.org/Pages/Reports.aspx](http://www.elibrary-areaer.imf.org/Pages/Reports.aspx).

Imports and Import Payments

Foreign exchange budget | No.  
Financing requirements for imports | Yes.  
Minimum financing requirements | No.  
Advance payment requirements | Yes.  

Documentary proof of delivery must be presented.

Advance import deposits | No.

Documentation requirements for release of foreign exchange for imports | Yes.  

Approval is not required for payments and transfers for current transactions, but registration is necessary.

Domiciliation requirements | Yes.  

Import transactions must be made through a commercial bank.

Proceeds from Invisible Transactions and Current Transfers

- Repatriation requirements: Yes.
- Surrender requirements: Yes.
- **Surrender to the central bank**: Yes. Certain Mozambicans working abroad under officially arranged contracts (specifically, miners in South Africa) must remit 60% of their earnings through the BM and convert them to meticais.
- **Surrender to authorized dealers**: Yes.
- Restrictions on use of funds: No.

References to legal instruments and hyperlinks: This information can be found at the AREAER ONLINE database: http://www.elibrary-areaer.imf.org/Pages/Reports.aspx.

Capital Transactions

- **Controls on capital transactions**: Yes. Controls apply to all capital transactions in accordance with the Foreign Exchange Law No. 11/2009. Pursuant to this law, regulations have established procedures for (1) obtaining BM approval and registration of capital transactions and (2) dealing with failure to register within the prescribed time limit.

- Repatriation requirements: No.
- **Surrender requirements**: No.
- **Surrender to the central bank**: No.
- **Surrender to authorized dealers**: No.
- Controls on capital and money market instruments: Yes. Pension funds may invest in securities abroad up to 10% of total assets.
- **On capital market securities**: Yes.
  - Shares or other securities of a participating nature: Yes. BM approval is required if the transaction is not conducted on the stock exchange.
  - **Purchase locally by nonresidents**: Yes. Nonresidents may not invest in securities through financial intermediaries, except when such securities transactions are conducted on the stock exchange, pursuant to a special regime.
provided for by law. Otherwise, they require authorization by the BM. There is no established foreign exchange limit.

Purchase abroad by residents

Yes. BM approval is required prior to the transaction for amounts above US$250,000 a year.

Sale or issue abroad by residents

Yes. BM approval is required prior to the transaction.

Bonds or other debt securities

Yes.

Purchase locally by nonresidents

Yes. Stock exchange purchases must be intermediated by banks, in which case no prior approval is required.

Sale or issue locally by nonresidents

Yes. BM approval is required prior to the transaction. There are no registered cases of such transactions in Mozambique.

Purchase abroad by residents

Yes. BM approval is required prior to the transaction for amounts above US$250,000 a year.

Sale or issue abroad by residents

Yes. BM approval is required prior to the transaction.

On money market instruments

Yes.

Purchase locally by nonresidents

Yes. Prior BM approval is required for these transactions.

Sale or issue locally by nonresidents

Yes. Prior BM approval is required for these transactions.

Purchase abroad by residents

Provisions Specific to the Financial Sector

<p>| Provisions specific to commercial banks and other credit institutions | Yes. |
| Borrowing abroad | Yes. | Approval is required, and all foreign borrowing must be registered with the BM. |
| Maintenance of accounts abroad | Yes. | BM approval is required. |
| Lending to nonresidents (financial or commercial credits) | Yes. | This is considered a capital transaction subject to the Foreign Exchange Law; there are no quantitative limits. |
| Lending locally in foreign exchange | Yes. | Banks must record a 50% provision on lending if there are strong doubts about repayment or if borrowers are not exporters. Banks must record a 100% provision for overdue credits. |
| Purchase of locally issued securities denominated in foreign exchange | No. |
| Differential treatment of deposit accounts held by nonresidents | No. |
| Reserve requirements | Yes. | Commercial banks must hold a minimum of 8% of their eligible deposits in legal reserves on a daily basis over a period of two weeks. This reserve requirement applies to deposits in both domestic and foreign currencies. |
| Liquid asset requirements | Yes. |
| Interest rate controls | No. |
| Credit controls | No. |
| Reserve requirements | No. |
| Liquid asset requirements | No. |
| Interest rate controls | No. |
| Credit controls | No. |
| Investment regulations | Yes. | Commercial banks and other credit institutions are subject to Law No. 3/93 (Foreign Investment in Mozambique), Law No. 11/2009 (Foreign Exchange) and Notice No. 20/GBM/2017 of December 27, 2017 (Foreign Exchange Regulation). |
| Abroad by banks | Yes. | Commercial banks and other credit institutions are subject to Law No. 3/93 (Foreign Investment in Mozambique), Law No. 11/2009 (Foreign Exchange) and Notice No. 20/GBM/2017 of December 27, 2017 (Foreign Exchange Regulation). |
| In banks by nonresidents | Yes. | Commercial banks and other credit institutions are subject to Law No. 3/93 (Foreign Investment in Mozambique), Law No. 11/2009 (Foreign Exchange) and Notice No. 20/GBM/2017 of December 27, 2017 (Foreign Exchange Regulation). |
| Open foreign exchange position limits | Yes. | Limits are set as a percentage of core capital. Credit institutions may not have, at the close of each day, a global foreign exchange position that is more than 20% of their own capital or a foreign exchange position in each foreign currency that is more than 10% of their own capital. |
| On resident assets and liabilities | Yes. | Limits on foreign exchange positions are based on credit institutions’ own capital regardless of their residence status. |
| On nonresident assets and liabilities | Yes. | Limits on foreign exchange positions are based on credit institutions’ own capital regardless of their residence status. |</p>

Decree No. 42/03 of December 10, 2003, regulates the financial guarantees required of insurance companies.

Decree No. 25/2009 of August 17, 2009, establishes the legal framework governing the constitution and management of pension funds, representing complementary social security.

Decree No. 54/99 of September 8, 1999, states that investment funds are prohibited from acquiring (1) shares in a fund managed by the same asset management unit; (2) any assets used as collateral or guarantees or otherwise pledged; (3) securities issued or held by the asset management company; (4) securities issued or held by entities holding a 10% or more interest in the asset management company; (5) securities issued or held by entities in which the asset management company holds an interest of 20% or more; (6) securities issued by entities that are members of the management or executive body of the asset management company; (7) securities issued or held by entities in which one or more members of the management or executive body hold an interest of 20% or more; (8) securities issued or held by entities on whose management or executive body one or more administrators of the asset management company serve; (9) securities placed on the market pursuant to placement agreements by the asset management company, the custodian, and by entities holding an interest of 10% or more in the asset management company, except in the case of initial public offerings; and (10) jointly owned real property. Regulations on the limits on portfolio investments and the composition of investment funds are currently being prepared.

Mozambique Stock Exchange rules apply. BM approval is required prior to the transaction for amounts above US$250,000 a year.

Foreign exchange accounts permitted
Held domestically

12/07/2018
The amount of foreign currency that may be withdrawn from resident accounts for travel abroad was increased to US$10,000 from US$5,000 a transaction.
MYANMAR

(Position as of February 28, 2019)

Status under IMF Articles of Agreement

Date of membership

January 3, 1952.

Article VIII

Yes.

Article XIV

Yes.

Exchange Measures

Restrictions and/or multiple currency practices

Yes. The IMF staff report for the 2017 Article IV Consultation with Myanmar states that, as of February 9, 2018, Myanmar continues to avail itself of transitional arrangements under Article XIV, although it has eliminated all Article XIV restrictions. However, Myanmar still maintained an exchange restriction and a MCP subject to IMF approval under Article VIII. The exchange restriction subject to IMF jurisdiction arises from the requirement of tax certification for authorizing transfers of net investment income abroad. The MCP arises from the two-way, multi-price foreign currency auction in the absence of a mechanism for maintaining winning bids within 2% of each other. (Country Report No. 18/90)

Exchange measures imposed for security reasons

Yes. In accordance with the provisions under the Counter-Terrorism Law enacted in June 2014, the Central Committee of Counter Terrorism released the Order Nos. 1/2015 and 3/2015 in relation to the freezing and prohibition of assets and financial resources of international terrorist or terrorist groups. Following these orders, the Central Bank of Myanmar (CBM) issued letters to banks and nonbank financial institutions (NBFIs) to comply with provisions under the Counter-Terrorism Law. After the enactment of Counter-Terrorism Law, the CBM issued Instruction No. 6/2014 of October 3, 2014, Letter No. Mababa/BRD/Hwe (42/2015) of January 20, 2015, Letter No. Mababa/BRD/AML/CFT (7/2015) of March 13, 2015, Letter No. Mababa/BRD/AML/CFT (14/2015) of November 27, 2015, and Letter No. Mababa/BRD/AML/CFT (7/2016) of January 29, 2016, to banks and NBFIs. According to the name list of Taliban or Al-Qaida terrorists designated as terrorists by US Executive Order No. 13224, the UN 1267 Sanctions Committee forwarded by the Ministry of Foreign Affairs of Myanmar, US Embassy, Australian Embassy and through the UN website, the CBM issued seven letters in 2006, seven letters in 2007, nine letters in 2008, six letters in 2009, one letter in 2011, and two letters in 2013, respectively, to all state-owned banks and private banks to comply with the CBM Directive No. 2/2002 issued March 7, 2002, which required banks to freeze funds and other assets of and prohibit transactions with suspected terrorists and terrorist organizations to report these accounts related with terrorists to the CBM. With reference to the Anti-Money Laundering Central Board’s letter that the Central Committee for Counter Terrorism has issued the freezing order No. 3/2016 of May 19, 2016, with respect to freezing and prohibiting of money, properties and funds of terrorists and terrorist organizations including the ISIL, Taliban, and Al-Qaida terrorist groups and the groups associated with those terrorist groups under the Sanctions list of UNSC. Therefore, the
CBM instructed state-owned banks, private banks, foreign bank branches, and finance companies to comply with the Order No. 3/2016 issued by the Central Committee for Counter Terrorism. According to the UNSC Resolution Nos. 2270 (2016), 2371 (2017), 2375 (2017), and 2397 (2017), the CBM issued four letters in 2017 to all banks, NBFI, and mobile financial services providers for freezing and prohibition of money, properties and funds of the related persons and organizations of Democratic People’s Republic of Korea which are included in the freeze lists of the said resolutions.

Moreover, the CBM has directed the aforesaid Institutions to take necessary due diligence on the information about the U.S. Department of the Treasury’s “Treasury acts to Increase Economic Pressure on North Korea and Protect the US Financial System” in 2017.

According to the UNSC Resolution Nos. 1267(1999), 1989(2011), 2253(2015), and 2462(2019), the CBM has issued nine letters in 2019 to all banks, NBFI, and mobile financial services providers for freezing and prohibition of money, properties and funds of ISIL (Da’esh) (Al-Qaida) which are included in the freeze lists of the said resolutions.

Following the Standing Order Nos. 1/2017 and 1/2018 of Central Committee for Counter Terrorism, Countering the Financing of Terrorism Working Committee, the CBM has released two letters in 2017 and 2018 to all banks, NBFI, and mobile financial services providers for freezing and prohibition of money, properties and funds of Bengali Extremist Terrorists designated by Central Committee for Counter Terrorism, Arakan Rohingya Salvation Army and persons who related with such persons and the name list of Arakan Rohingya Salvation Army.

According to the Standing Order No. 3/2017 of Central Committee for Counter Terrorism, Countering the Financing of Terrorism Working Committee, all banks, NBFI, and mobile financial services providers are instructed to regularly update the UNSC’s list of Terrorist List and Terrorist Group and enhance customer due diligence to freeze and prohibit of money, properties, and funds of the said terrorists.

In 2018, Myanmar Financial Intelligence Unit’s Directives in relation with high-risk and non-cooperative jurisdictions was circulated to all banks, NBFI, and mobile financial services providers to apply EDD measures to business relationship and transactions with natural and legal persons, and financial institutions, from countries called for by the FATF.

Other security restrictions No.

Exchange Arrangement

Currency Yes. The currency of Myanmar is the Myanmar kyat.

Other legal tender No.

Exchange rate structure

Unitary

Dual

Multiple Yes. The exchange rate structure is classified as multiple because of the MCP. The MCP results because the multiple price foreign exchange
Auction gives rise to multiple exchange rates at which successful bids are sold, which may differ by more than 2% as there is no mechanism in place to prevent such deviation.

The de jure exchange rate arrangement is a managed float. The CBM has no predetermined target for the level of the kyat exchange rate and expects the value to fluctuate with supply and demand in the market. In 2018, the CBM made progress in allowing market forces to play a bigger role in determining the exchange rate. The foreign exchange reference rate largely followed a formula consisting of a weighted average of foreign exchange interbank and bank-customer market rates, with occasional small deviations. The CBM also abolished the trading band (reference rate +/- 0.8%) in August 2018, which clarified the current system and should lead to an increase in the volume and representativeness of the formal market. The CBM issued February 4, 2019, a formal regulation announcing the market-based exchange rate as the new reference rate. Indicative cross-rates for certain other currencies are based on Thomson Reuters and the IMF website. The CBM reserves the right to intervene to moderate excessive exchange rate volatility in the foreign exchange market. The de facto exchange rate regime was reclassified to other managed from a stabilized arrangement, effective April 20, 2018.

| Floating                          | Yes. |
| Free floating                     |      |

Effective February 5, 2019, the CBM computes and publishes daily reference exchange rate based on transactions in the foreign exchange market in accordance with CBM Instruction No. 5/2019. The reference exchange rate is computed by assigning weights to average rate between executed interbank foreign exchange transactions among AD banks, and the average rate of transactions between AD banks and their customers. This reference rate is an indicative rate, and participants in the foreign exchange market are not required to use it in their transactions. Previously, the reference exchange rate was determined at the foreign exchange auctions organized by the CBM. The cutoff rate in the CBM’s daily foreign exchange auction was used as the CBM reference exchange rate for that day’s trading. This reference rate was used to set the midrate in the retail money changer (MC) market, in the wholesale interbank market for ADs, and for foreign exchange transactions with the government.

Effective January 21, 2019, indicative cross-rates for certain other currencies are based on Thomson Reuters and the IMF website. Previously, indicative cross-rates were based on Thomson Reuters,

Accountability
The spot market consists of the retail MC counters and wholesale ADs market, including foreign exchange auctions organized by the CBM. As of June 30, 2019, 25 private banks and 335 nonbank companies were licensed to carry out the money changing business. Of these private banks, 19 are also licensed as ADs and may conduct wholesale noncash transactions. In addition, three state banks and 13 foreign bank branches are licensed as ADs. Some state banks also have money changing counters. The Myanmar Foreign Trade Bank has three MC counters, the Myanmar Investment and Commercial Bank (MICB) maintains one MC counter, and the Myanmar Economic Bank (MEB) maintains three MC counters. Effective August 13, 2018, the CBM abolished the trading band (reference rate +/− 0.8%) for foreign exchange transactions. Previously, licensed MCs and ADs conducted exchange transactions within a +/− 0.8% band of the reference exchange rate, which was determined by the daily cutoff rate in the CBM’s foreign exchange auctions. Customers may buy or sell in the retail market up to US$10,000 or its equivalent in Singapore dollars and euros without documentation. For larger amounts, documentation may be required.

The CBM holds daily two-way multiple price foreign exchange (US dollar) auctions open to AD banks. Currently, 19 private banks and 3 government-owned banks hold AD licenses and are eligible to participate. Participants may submit bids to buy and/or sell foreign exchange. Foreign exchange auctions are announced publicly by the CBM at least one business day before the auction. The announcement lists the time and place, bid requirements, settlement period, and other information as necessary. Once bids are submitted and a cutoff price is determined by the CBM, bids to buy foreign exchange above and sell foreign exchange below the cutoff price are satisfied in full; bids at the cutoff price may be prorated.
settle foreign exchange transactions among themselves through foreign currency accounts abroad. ADs are allowed to offer larger noncash foreign exchange services to customers and to trade directly with each other in the AD market. Actual exchange rates quoted by wholesale foreign exchange interbank market are prevailing market rates. Authorized private banks participate in the interbank foreign exchange market. Thus far, 34 banks have accessed the interbank market activities, and the turnover sees a prominent improvement. The CBM does not intervene with market participants in the interbank market.

- Over the counter: Yes.
- Brokerage: No.
- Market making: No.
- Forward exchange market: No.
- Official cover of forward operations: No.

ADs are allowed to participate in the forward exchange market.

Arrangements for Payments and Receipts

- Prescription of currency requirements: Yes.
- Controls on the use of domestic currency: Yes.
  - For current transactions and payments: Yes.
  - For capital transactions: Yes.
  - Transactions in capital and money market instruments: Yes.
  - Transactions in derivatives and other instruments: Yes.
  - Credit operations: Yes.
- Use of foreign exchange among residents: Yes.
  - Residents may hold up to the equivalent of US$10,000 in foreign currency (euros, Singapore dollars) for six months after receipt. Foreign exchange account holders may transfer funds from their accounts to settle transactions between residents without approval. Residents may deposit the foreign currency in AD banks. Until June 30, 2013, FECs could be used for payments between residents.

Payments arrangements: Yes.

- Bilateral payments arrangements: No.
- Operative: No.
- Inoperative: No.
- Regional arrangements: Yes. Myanmar is a member of ASEAN.
- Clearing agreements: No.
- Barter agreements and open accounts: Yes. There are bilateral trade arrangements with neighboring countries. These arrangements do not provide for the extension of credit.
- Administration of control: Yes. The Foreign Exchange Management Law provides the legal
Payments arrears  Yes.

Official  Yes.  The Paris Club creditors, in January 2013, agreed to write off 50% of all arrears (US$10 billion) and reschedule the remainder over 15 years with a seven-year grace period. The write-off is being phased in, with 25% after approval of the IMF Staff-Monitored Program and the remaining 75% on its successful completion. In February 2014, the Staff-Monitored Program was successfully completed with the support of the IMF. Under the Staff-Monitored Program, quantitative targets and structural benchmarks were met. Therefore, the second tranche of debt reduction went into effect in March 2014 to fulfill the 50% cancellation.

Private  No.

Controls on trade in gold (coins and/or bullion)  Yes.
On domestic ownership and/or trade  No.
On external trade  Yes.  Companies owned by Myanmar citizens are allowed to export gold in line with certain regulations of Notification No. 7/2018 issued January 22, 2018. Effective February 22, 2018, the regulation of Notification No. 7/2018 came into force, which stipulates companies owned by Myanmar citizen are allowed to undertake export and import on international standard gold bullion, gold jewelry, and handicraft made by gold after receiving the approval from the concerned authority and obtaining export/import license (previously, private sector imports and exports of gold are not allowed). Companies that trade international standard gold bullion should adhere to the regulation under the Foreign Exchange Management Law of CBM.

Controls on exports and imports of banknotes  Yes.
On exports  Yes.
Domestic currency  Yes.
Foreign currency  Yes.  Currency note can be exported in line with regulations under the Foreign Exchange Management Law. Myanmar residents traveling abroad may take out foreign currency up to US$10,000 or its equivalent on presentation of a passport, visa, and airline ticket.

On imports  Yes.
Domestic currency  Yes.
Foreign currency  Yes.  Foreigners may bring in foreign currency up to US$10,000 or its equivalent without declaration.

References to legal instruments and hyperlinks  This information can be found at the AREAER ONLINE database: http://www.elibrary-areaer.imf.org/Pages/Reports.aspx.

Resident Accounts

Foreign exchange accounts permitted  Yes.  Myanmar nationals, national firms, foreign firms, foreigners, and diplomats may open foreign currency accounts at government-owned banks and private banks that have been issued international banking licenses. Foreign exchange balances in accounts with banks with international banking licenses may be used for all payments,
including import payments. Account holders may make import payments with licenses issued by the Ministry of Commerce (MOC) on the basis of LCs or telegraphic transfer. Account holders may use funds from their account to purchase airline tickets for family visits abroad and to make payments for imports, examination fees for their children, and medical treatment abroad. Foreign exchange balances may be withdrawn in cash up to US$10,000 a week. Transfer of funds between accounts is permitted.

Approval required: Yes.

Held abroad: Yes. These accounts may be opened, but approval is required. Banks must report to the CBM within a week about the situation of opening foreign exchange account abroad.

Approval required: Yes.

Accounts in domestic currency held abroad: No. Residents are not allowed to open accounts in kyat abroad.

Accounts in domestic currency convertible into foreign currency: Yes. Conversion is permitted only for payment of official expenses and is subject to approval by the Ministry of Planning and Finance (MOPF).

References to legal instruments and hyperlinks: This information can be found at the AREAER ONLINE database: http://www.elibrary-areaer.imf.org/Pages/Reports.aspx.

Nonresident Accounts

Foreign exchange accounts permitted: Yes. Myanmar nationals, foreign firms, foreigners, and diplomats may open foreign currency accounts at ADs. Foreign exchange balances in accounts with ADs may be used for all payments, including import payments. Account holders may use funds from their accounts to purchase airline tickets for family visits abroad and to pay for imports, examination fees, and medical treatment abroad. Foreign exchange balances may be withdrawn in cash up to US$10,000 a week. Transfer of funds between accounts is permitted.

Approval required: No. CBM approval is not required for nonresidents to open foreign exchange accounts with government-owned or private banks.

Domestic currency accounts: Yes. These accounts are permitted, but all debits and credits require authorization.

Convertible into foreign currency: Yes. These accounts may be converted, but approval is required. In case of foreign exchange demand for import purposes balances in domestic currency account may be converted to foreign currency if there is sufficient foreign exchange.

Approval required: Yes.

Blocked accounts: No.

References to legal instruments and hyperlinks: This information can be found at the AREAER ONLINE database: http://www.elibrary-areaer.imf.org/Pages/Reports.aspx.

Imports and Import Payments

Foreign exchange budget: Yes. An import program for the public sector is prepared annually as part of the foreign exchange budget drawn up by the MOPF.

Financing requirements for imports: Yes. Foreign exchange balances may be used for all payments, including import payments. Foreign exchange purchased from MC counters may be freely used to pay for imports after depositing funds to a foreign exchange account with an AD.

Minimum financing requirements: No.

Advance payment requirements: No.

According to the Myanmar Investment Law (MIL), investors will get two types of approvals which mean Permit and Endorsement. According to Section 36 of the MIL, the investor must submit a proposal to the Myanmar Investment Commission and invest after receiving the Permit for the following investment activities stipulated in the rules: (1) investment activities that are essential to the Union strategy; (2) large capital-intensive investment projects; (3) projects which are likely to cause a large impact on the environment and the local community; (4) investment activities which use state-owned land and buildings; (5) investment activities which are designated by the government to require the submission of a proposal to the Commission. Any other investment activities which are not included in Section 36, no investor is required to submit a proposal to the Commission for such investments. However, to enjoy the right to use land under Chapter XII, and one or more than one or all of the exemptions and reliefs under Sections 75, 77, and 78, an endorsement application must be submitted in the stipulated form to the Commission Office (Section 37). Section 65 of the MIL, the investor needs to establish and register a company or sole proprietorship or legal entities or branches of such entities under the laws to invest. Under Section 42, these types of investment activities must be stipulated as restricted investments: (1) investment activities allowed to be carried out only by the Union; (2) investment activities that are not allowed to be carried out by Foreign investors; (3) investment activities allowed only in the form of a joint venture with any citizen-owned entity or any Myanmar citizen; and (4) investment activities to be carried out with the approval of the relevant ministries. An Investor proposing to make a Restricted Investment under Section 42 of the Law must notify within three months from the commencement of implementation of the Investment to the Commission Office or State or Regional Committee Office of its
Investment. (Rule 23 + 24). According to Section 51(a), the investor may appoint any citizen who is a qualified person as senior manager, technical and operational expert, or advisor in his investment within the Union in accordance with the laws. In respect of transfers of funds made by Foreign investors under Section 56, such funds, including capital accounts or current accounts under the Foreign Exchange Management Law, may be transferred through banks authorized with a foreign exchange dealer license and legally established in the Union with freely usable currencies (Section 61).

In respect of tax incentives, investors can enjoy the following benefits: As per Section 75(a): With respect to the income tax exemptions, designated the less developed regions as Zone (1), the moderately developed regions as Zone (2), and the adequately developed regions as Zone (3), the Commission must, with the approval of the government, issue a notification and may grant income tax exemptions to investment activities in Zone (1) for a period of seven consecutive years including the year of commencement of commercial operation, investment activities in Zone (2) for a period of five consecutive years including the year of commencement of commercial operation, and investment activities in Zone (3) for a period of three consecutive years including the year of commencement of commercial operation. As per Section 75(b): With the approval of the government, the Commission may change the designation of the zones from time to time depending on the development of the respective regions. As per Section 75(c): Income tax exemptions must be granted only for the sectors specified by the Commission in the notification as the sectors to promote the investments. As per Section 77, the Commission may scrutinize and grant the following exemptions or reliefs from customs duty and other internal taxes to the investor if applied: (1) exemptions or reliefs from customs duty or other internal taxes or both on machineries, equipments, instruments, machinery components, spare parts, construction materials unavailable locally, and materials used in the business, which are imported as they are actually required, during the construction period or during the preparatory period of the investment business; (2) exemptions or reliefs from the customs duty or other internal taxes or both on the importation of the raw materials and partially manufactured goods conducted by an export-oriented business for the purposes of the manufacture of products for export; (3) reimbursement of customs duty or other internal taxes or both on imported raw materials and partially manufactured goods which are used to manufacture products for export; (4) if the volume of investment is increased with the approval of the Commission and the original investment business is expanded during the permitted period of investment, exemptions or relief from the customs duty or other internal taxes or both on machineries, equipment, instruments, machinery components, spare parts, materials used in the business, and construction materials unavailable locally, which are imported as they are actually required for use in the business which is being expanded as such. As per Section 78, the Commission may scrutinize and grant the following exemptions and reliefs, as required, to the investor if applied: (1) exemptions or reliefs from income tax if the profit obtained from the investment that has obtained a Permit or an Endorsement is reinvested in such investment business or in any similar type of investment activity within one year; (2) right to depreciation for the purpose of income tax assessment, after computing such depreciation from the year of commencement of commercial operation based on a depreciation rate which is less than the stipulated lifetime of the machinery, equipment, building, or capital assets used in the investment; (3) right to deduct expenses
which are incurred for the research and development relating to the investment activities carried out within the Union and actually required for the economic development of the Union from the assessable income. As per Section 79, the Foreign investors have to pay income tax on their income at the rates applicable to the citizens residing within the Union.

Foreign investors may transfer abroad the following funds relating to the investments made under this law including: (1) capital designated under the provisions relating to capital account rules stipulated by the CBM; (2) proceeds, profits from the asset, dividends, royalties, patent fees, license fees, technical assistance and management fees, shares and other current income resulting from any investment under this Law; and (3) proceeds from the total or partial sale or liquidation of an investment or property owned by an investment (Section 56 of the MIL). The government guarantees not to nationalize any investment carried out in accordance with the law. Except under the following conditions, the government guarantees not to take any measures which expropriate or indirectly expropriate or is likely to effect a result in the termination of an investment: (1) actually necessary for the interest of the Union or its citizen; (2) nondiscriminatory manner; (3) measures in accordance with the applicable laws; (4) prompt, fair, and adequate payment of compensation (Section 52 of the MIL). If the investor discontinues the investment before the expiry of the permitted period, after paying the tax exemptions or reliefs or both enjoyed during importation in accordance with the approval of the Commission, the investor is to sell, export, and dispose all machineries, equipment, motor vehicles, and all other articles imported from abroad with the customs duty, other internal taxes, and tax exemption or relief or both for his investment (Section 68 of the MIL).

**Controls on liquidation of direct investment**
Yes.

**Controls on real estate transactions**
Yes.

**Purchase abroad by residents**
Yes. These transactions are subject to the CBM’s approval.

**Purchase locally by nonresidents**
Yes. Foreigners may not own land but as per Section 50(a) of the MIL an Investor who obtains permit or endorsement under this Law has the right to obtain a long-term lease of land or building from the owner if it is private land or building, or from the relevant government departments or government organization if it is land managed by the government, or land or building owned by the Union in accordance with the stipulations to do investment. Foreign investor may lease land or building either from the government or government organizations or from owners of private land or building from commencing on the date of receipt of a Permit or an Endorsement of the Myanmar Investment Commission up to an initial period of 50 years in accordance with the stipulation (Section 50(b) of the MIL). After the expiry of the term of the right to use land or building or the period of right to lease of land or building permitted under subsection (b), a consecutive period of 10 years and a further consecutive period of 10 years extension to such period of lease of land or building may be obtained with the approval of the Myanmar Investment Commission (Section 50(c) of the MIL). The Myanmar Investment Commission must, for the purpose of the development of the entire Union with the approval of the Pyidaungsu Hluttaw submitted through the government, grant a longer period for the right to lease land or building and the right to use land under this Law, to investors who invest in a least developed and remote region (Section 50(f) of the MIL).

**Sale locally by nonresidents**
Yes.
Controls on personal capital transactions  

Yes.

**Loans**  

Yes.  

Foreigner may transfer the funds which are described in Section 56 of the MIL, and with respect to transferring a loan or taking a loan, it must be transferred and taken with the approval of the CBM, in accordance with the stipulated regulations. Investors can make the transfer of capital or expenditures and foreign loans from abroad, which are required to be used for their investment within the Union in accordance with applicable laws (Section 63 of the MIL). In the event of serious balance of payments or external financial difficulties, the government may adopt or maintain restrictions on payments or transfers related to investments in accordance with the Foreign Exchange Management Law and other international commitments (Section 64 of the MIL).

By residents to nonresidents  

Yes.  

The approval requirement applies to both loans received by and provided to residents from nonresidents.

To residents from nonresidents  

Yes.  

The approval requirement applies to both loans received by and provided to residents from nonresidents.

**Gifts, endowments, inheritances, and legacies**  

Yes.

| Floating                      | |
The Namibian dollar is pegged to the South African rand at par. The exchange rate of the Namibian dollar vis-à-vis other currencies is determined on the basis of cross-rates in international markets of the rand vis-à-vis the currencies concerned. The official exchange rate is used for accounting and valuation purposes. The BON is authorized to make changes to the exchange rate arrangement.

The monetary policy framework is an exchange rate anchor vis-à-vis the rand.

The monetary policy framework is an exchange rate anchor vis-à-vis the rand.
The foreign exchange market in Namibia has developed as an extension of the foreign exchange market in South Africa. ADs are allowed to determine freely their bid-ask spread and foreign exchange commissions with their clients.

Foreign exchange bureaus are allowed to operate in the spot foreign exchange market and are subject to licensing by the CB. As of May 31, 2019, there were seven foreign exchange bureaus in Namibia. Foreign exchange bureaus may engage only in travel-related transactions and may not transact directly with the CB. They may not maintain accounts abroad, and their operations are limited to the purchase and sale of banknotes.

The BON buys and sells Namibian dollars for rand at par with no commission. The BON deals only with ADs and the government. The BON does not verify the validity of transactions when dealing with banks.

Banks trade among themselves in foreign currency.

ADs are permitted to conduct forward exchange operations, including providing forward cover, with residents in any foreign currency with respect to authorized trade and nontrade transactions.
Forward exchange contracts may cover the entire period of the outstanding commitments and accruals. Forward cover is also provided to nonresidents, subject to certain conditions. Gold mining companies and houses may sell forward anticipated receipts of their future gold sales. Forward cover is provided in US dollars only and is available to ADs for maturities not exceeding 12 months at a time in the form of swap transactions involving Namibian dollars (rand) and US dollars, with a margin based on the interest rate differential between the two currencies. The CB does not participate in the forward foreign exchange market.

Official cover of forward operations  Yes. Special forward cover at preferential rates is provided for import financing.

This information can be found at the AREAER ONLINE database: http://www.elibrary-areaer.imf.org/Pages/Reports.aspx.

Arrangements for Payments and Receipts

Prescription of currency requirements  Yes. All countries outside the CMA constitute the nonresident area. The rand is legal tender in Namibia. Settlements by or to residents of the CMA within the nonresident area may be made in rand to and from a nonresident account or in any foreign currency.

Controls on the use of domestic currency  Yes.

For current transactions and payments  Yes. Settlement by or to residents of the CMA within the nonresident area may be made in Namibian dollars to and from a nonresident account or in any foreign currency.

For capital transactions  Yes. Namibian dollars may not be used to settle interest and principal payments.

Transactions in capital and money market instruments  Yes. Namibian dollars may not be used to settle interest and principal payments.

Transactions in derivatives and other instruments  No.

Credit operations  Yes. Namibian dollars may not be used to settle interest and principal payments.

Use of foreign exchange among residents  Yes. In accordance with CMA arrangements, residents are not allowed to transact business in foreign currencies. Transactions may be invoiced in foreign currencies, but payments must be made in the local currency.

Payments arrangements  Yes.

Bilateral payments arrangements  No.

Operative  No.

Inoperative  No.

Regional arrangements  Yes. Namibia is part of the CMA, and no restrictions are applied to payments within the CMA.

Clearing agreements  No.

Barter agreements and open accounts  No.

Administration of control  Yes. The BON has delegated some powers to ADs that assist the BON in administering exchange controls. If an AD is not authorized to approve a transaction under the terms of the Exchange Control Regulations, an application is filed with the BON. The norms applied by the BON in scrutinizing applications are subject to CMA policy guidelines.

Payments arrears  No.
Official No.

Private No.

Controls on trade in gold (coins and/or bullion) Yes. The Exchange Control Regulations prohibit the purchase and sale, both domestically and abroad, of unworked gold by Namibian residents without the specific authorization of the BON. All such requests are considered on their merits.

On domestic ownership and/or trade Yes. Residents are permitted to purchase, hold, and sell gold coins within the CMA for numismatic and investment purposes only.

On external trade Yes. Exports and imports of gold require approval of the monetary authority.

Controls on exports and imports of banknotes Yes.

On exports Yes.

Domestic currency Yes. Individuals may export no more than N$25,000 in BON banknotes in addition to the basic travel allowance. A currency conversion agreement between the Bank of Namibia and the National Bank of Angola allowed business people and traders to export Namibian dollars to Angola and Angolan kwanzas to Namibia and exchange them for local currency for trading purposes. The import of Angolan kwanzas to Namibia was suspended from December 1, 2015. However, Namibian dollars are still exported to Angola under specific arrangements in terms of the Currency Conversion Agreement.

Foreign currency Yes. Residents and contract workers departing from Namibia to destinations outside the CMA may take out their travel allowance in foreign banknotes. Foreign visitors leaving Namibia may take with them the unspent portion of the proceeds of foreign currency imported and exchanged in Namibia.

On imports Yes.

Domestic currency Yes. On entry from countries outside the CMA, residents and nonresidents may bring in no more than N$25,000 in Namibian banknotes or, effective July 13, 2018, R25,000 in South African banknotes (previously R10,000). There are no limitations on the importation of domestic currency from Eswatini, Lesotho, and South Africa.

Foreign currency Yes. Importation of foreign currency by nonresidents of the CMA is unrestricted. However, Namibian residents are allowed to import into Namibia only the residual balance of foreign currency initially exported. A currency conversion agreement between the Bank of Namibia and the National Bank of Angola allowed business people and traders to export Namibian dollars to Angola and Angolan kwanzas to Namibia and exchange them for local currency for trading purposes. The import of Angolan Kwanzas to Namibia was suspended from December 1, 2015. However, Namibian dollars are still exported to Angola under specific arrangements in terms of the Currency Conversion Agreement.

Resident Accounts

Foreign exchange accounts permitted Yes.

Held domestically Yes. Resident private individuals are allowed to hold foreign exchange accounts with local ADs, subject to approval. Exporters may retain export proceeds for 180 days after receipt in foreign exchange accounts with ADs. Up to the equivalent of, effective July 13, 2018,
N$6 million (previously N$4 million) a year may be held in a domestic foreign exchange account. Balances may only be effected through the commercial banking system on condition that all the requirements are met.

<table>
<thead>
<tr>
<th>Approval required</th>
<th>Yes.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Held abroad</td>
<td>Yes.</td>
</tr>
</tbody>
</table>

Approval is required and is granted to resident individuals on the merit of the application. Approval is not required for investments up to the equivalent of, effective July 13, 2018, N$6 million (previously N$4 million) a year or to retain abroad income earned overseas. Balances may be transferred to the home country freely.

<table>
<thead>
<tr>
<th>Approval required</th>
<th>Yes.</th>
</tr>
</thead>
</table>

Foreign bank accounts for investment up to the equivalent of, effective July 13, 2018, N$6 million (previously N$4 million) a year do not require approval.

| Accounts in domestic currency held abroad | No. |
| Accounts in domestic currency convertible into foreign currency | Yes. |

Payments in foreign currency may be effected from resident accounts, provided the transaction is covered under the Exchange Control Regulations, or with approval.

| References to legal instruments and hyperlinks | This information can be found at the AREAER ONLINE database: http://www.elibrary-areaer.imf.org/Pages/Reports.aspx. |

### Nonresident Accounts

<table>

<tr>
<td>Blocked accounts</td>
<td>Yes.</td>
</tr>
</tbody>
</table>

ADs are required to open separate accounts on behalf of nonresident clients to distinguish between normal clearing accounts and foreign exchange trading accounts. This requirement does not affect the transferability of funds. Nonresidents may open foreign exchange accounts, and funds in these accounts are freely transferable. These accounts may be credited with all authorized payments by residents, with the proceeds of sales of foreign currency to ADs, and with payments from nonresidents’ accounts. They may be debited for payments to CMA residents for any purpose (other than loans), payments to nonresidents for any purpose, transfer to a local nonresident account or remittance to any country outside the CMA, purchases of any foreign currency, and payments to account holders residing in Namibia for short periods.

### Imports and Import Payments

| Foreign exchange budget | No. |

Residents who emigrated from Namibia on or before February 28, 2002, may transfer their blocked funds abroad freely through an authorized bank. The assets of residents who emigrated after that date are subject to normal emigration procedures. Effective July 13, 2018, emigrants may transfer up to the equivalent of N$10 million (previously N$8 million) a family or N$6 million (previously N$4 million) an individual, inclusive of any assets previously transferred abroad. Transfers in excess of these limits are subject to a transfer tax of 10% of the amount in excess of the limit. Emigrants may subsequently transfer annual income from their remaining blocked assets, but may not dispose of the assets through sale to Namibian residents.

| References to legal instruments and hyperlinks | This information can be found at the AREAER ONLINE database: http://www.elibrary-areaer.imf.org/Pages/Reports.aspx. |
Financing requirements for imports: Yes.

Minimum financing requirements: No.

Advance payment requirements: Yes. Foreign exchange may be provided for advance payment up to 100% of the ex-factory cost of capital goods to be imported. The previous limit (50% of the ex-factory cost) on the provision of foreign exchange for advance payments for imports of capital goods exceeding N$20 million was eliminated. ADs must, however, ascertain that an order would be refused without the advance payment and that such payment is typical in the trade concerned. There are no limits on advance payments for noncapital goods.

Advance import deposits: No.

Documentation requirements for release of foreign exchange for imports: Yes. Documentation confirming receipt of the imported articles into Namibia (for example, a bill of entry or local mail receipts) is required.

Domiciliation requirements: No.

Preshipment inspection: No.

Letters of credit: Yes. Letters of credit may be established locally by ADs.

Import licenses used as exchange licenses: No.

Other: No.

Import licenses and other non tariff measures: Yes. There are no restrictions on imports originating in any country of the SACU. Imports from countries outside the SACU are usually licensed in conformity with South Africa's import regulations. These permits are valid for one year for imports and are expressed in terms of value. At present, about 90% of imports require a permit.

Positive list: No.

Negative list: Yes. Namibia has the right to restrict certain imports (through customs duties or quantitative restrictions) from countries outside the SACU and, under certain conditions, from countries within the SACU.

Open general licenses: No.

Licenses with quotas: No.

Other non tariff measures: No.

Import taxes and/or tariffs: Yes. A general sales tax of 10% is levied on all imports in addition to a sales duty between 0% and 15%, depending on the type of commodity.

State import monopoly: No.

References to legal instruments and hyperlinks: This information can be found at the AREAER ONLINE database: http://www.elibrary-areaer.imf.org/Pages/Reports.aspx.

Exports and Export Proceeds

Repatriation requirements: Yes. Export proceeds must generally be repatriated within 180 days of receipt.

Surrender requirements: Yes.

Surrender to the central bank: No.

### Capital Transactions

**Controls on capital transactions** | Yes.  
---|---
The investment limit for private residents abroad is the equivalent of, effective July 13, 2018, N$6 million (previously N$4 million) a year. Proceeds from the sale of quoted or unquoted CMA securities, real estate, and other equity investments by nonresidents are freely transferable.

**Repatriation requirements** | No.  
---|---
Proceeds from capital transactions may be retained abroad indefinitely.

**Surrender requirements** | Yes.  
---|---
Surrender to the central bank | No.  
Surrender to authorized dealers | Yes.  
Proceeds must be surrendered to ADs when transferred to Namibia. The proceeds must be received through a commercial bank and be converted within 30 days from the date of accrual.

**Controls on capital and money market instruments** | Yes.  
---|---
Securities issued by nonresidents may not exceed 65% of the total assets of insurance companies. Since September 25, 2017, qualifying institutions (that is, insurance companies, pension funds, fund managers) may invest up to 35% of total assets under management by fund managers and unit trust management companies in portfolios held abroad without BON approval on presentation of a letter issued by Namibia Financial Institutions Supervisory Authority (NAMFISA) confirming that the investment is within the 35% limit.

**On capital market securities** | Yes.  
---|---
Inward transfers of capital from non-CMA countries for equity investment are freely permitted.

**Shares or other securities of a participating nature** | Yes.  
---|---
Purchase locally by nonresidents | No.  
Sale or issue locally by nonresidents | No.  
Purchase abroad by residents | Yes.  
Securities issued by foreign entities may be listed on the Namibian Stock Exchange (NSX).

**Sale or issue abroad by residents** | Yes.  
---|---
These transactions are permitted, effective July 13, 2018, up to the N$6 million (previously N$4 million) yearly foreign investment limit for resident individuals. Namibian corporations may invest substantial amounts in SADC member countries, and dual listing of companies on both the NSX and other SADC stock exchanges is permitted. Securities issued by nonresidents may not exceed 65% of the total assets of insurance companies. Since September 25, 2017, qualifying institutions (that is, insurance companies, pension funds, fund managers) may invest up to 35% of total assets under management by fund managers and unit trust management companies in portfolios held abroad without BON approval on presentation of a letter issued by NAMFISA confirming that the investment is within the 35% limit.
the NSX and other SADC stock exchanges is permitted.

**Bonds or other debt securities**

- **Purchase locally by nonresidents**: Yes.
- **Sale or issue locally by nonresidents**: No. There is no minimum holding period requirement for such bonds.
- **Purchase abroad by residents**: Yes. Residents are allowed to invest in foreign instruments listed on the NSX. They may also invest in securities, effective July 13, 2018, up to the N$6 million (previously N$4 million) yearly foreign investment limit for resident individuals. Securities issued by nonresidents may not exceed 65% of the total assets of insurance companies. Since September 25, 2017, qualifying institutions (that is, insurance companies, pension funds, fund managers) may invest up to 35% of total assets under management by fund managers and unit trust management companies in portfolios held abroad without BON approval on presentation of a letter issued by NAMFISA confirming that the investment is within the 35% limit.

- **Sale or issue abroad by residents**: Yes. These transactions require approval and must be serviced from abroad if the funds are used abroad and from local sources if the funds are transferred to Namibia.

**On money market instruments**

- **Purchase locally by nonresidents**: No.
- **Sale or issue locally by nonresidents**: Yes. Exchange Control approval is required.
- **Purchase abroad by residents**: Yes. Residents may invest in foreign instruments listed on the NSX. They may also invest in instruments, effective July 13, 2018, up to the N$6 million (previously N$4 million) yearly foreign investment limit for resident individuals. Securities issued by nonresidents may not exceed 65% of the total assets of insurance companies. Since September 25, 2017, qualifying institutions (that is, insurance companies, pension funds, fund managers) may invest up to 35% of total assets under management by fund managers and unit trust management companies in portfolios held abroad without BON approval on presentation of a letter issued by NAMFISA confirming that the investment is within the 35% limit.

### Controls on real estate transactions

**Purchase abroad by residents** Yes.

Real estate purchases are permitted up to the foreign investment limit of, effective July 13, 2018, N$6 million (previously N$4 million) a year. Other purchases are subject to Exchange Control approval. The BON is now considering applications by private individuals to invest in fixed property (for example, vacation homes and farms) in SADC member countries.

**Purchase locally by nonresidents** No.

**Sale locally by nonresidents** No.

### Controls on personal capital transactions

Yes.

### Loans

Yes.

**By residents to nonresidents** Yes.

ADs may allow the transfer of loans up to N$1 million an applicant a year. Residents require approval to extend larger loans to nonresidents.

**To residents from nonresidents** Yes.

Foreign loans to residents are subject to approval to ensure that the level of the interest paid is reasonable in terms of prevailing international rates and that repayment does not disrupt the balance of payments.

### Gifts, endowments, inheritances, and legacies

Yes.

**By residents to nonresidents** Yes.

Cash bequests and the cash proceeds of legacies and distributions from estates to nonresidents may be remitted abroad. There is a N$1 million limit for gifts a person a year. There are no controls on endowments.

**To residents from nonresidents** Yes.

Residents must declare funds obtained and repatriate them to Namibia. An exemption may be obtained from the BON for the retention of such funds abroad. Transfers by ADs of monetary gifts of up to N$1 million an applicant are allowed annually.

### Settlement of debts abroad by immigrants

Yes.

If immigrants have formally declared their assets and liabilities and have no cash resources available with which to pay a debt, the BON may consider requests for exemption.

### Transfer of assets

Yes.

**Transfer abroad by emigrants** Yes.

The regulations that apply to the transfer of assets abroad in South Africa also apply in Namibia. Emigrants are allowed to export household and personal effects for a family or single person up to an overall limit of, effective July 13, 2018, N$10 million (previously N$8 million) or N$6 million (previously N$4 million), respectively. Emigrants are allowed to transfer abroad funds in excess of the aforementioned limits, subject to a transfer tax of 10% of the amount in excess of the limits.

**Transfer into the country by immigrants** Yes.

Immigrants are required to furnish the exchange control authorities with a complete account of their foreign assets and liabilities at the time of their arrival. Any foreign assets they transfer to Namibia may, through the same channel, be retransferred abroad.

**Transfer of gambling and prize earnings** Yes.

Namibians are discouraged from participating in international lotteries; therefore, most requests are denied.

This information can be found at the AREAER ONLINE database: http://www.elibrary-areaer.imf.org/Pages/Reports.aspx.

### Provisions Specific to the Financial Sector

Yes.

**Provisions specific to commercial banks and other credit institutions** Yes.

ADs are generally permitted to raise funds abroad in their own name for the financing of Namibia’s foreign trade and for other approved purposes.
Maintenance of accounts abroad

No.

Lending to nonresidents (financial or commercial credits)

Yes. Approval is required for lending not related to trade. Only companies that are 75% or more foreign owned are subject to exchange controls, and local financial assistance may be granted to nonresident-owned companies against a nonresident’s guarantee.

Lending locally in foreign exchange

Yes. ADs may lend money locally in Namibian dollars. However, lending locally in foreign currency is not allowed.

Purchase of locally issued securities denominated in foreign exchange

Yes. These transactions are not allowed.

Differential treatment of deposit accounts in foreign exchange

No. If these deposits are liabilities to the public arising from operations in Namibia, they are included in the calculation of the minimum liquid assets and reserve requirements.

Reserve requirements

No.

Liquid asset requirements

No.

Interest rate controls

No.

Credit controls

No. The limit on credit facilities to any person or group of related persons is 30% of a banking institution’s capital funds. In addition to the above limit, credit facilities of more than 10% of capital funds may not exceed, in aggregate, 800% of the total capital funds of the banking institution in Namibia. These limits apply to all customers, regardless of their citizenship status.

Differential treatment of deposit accounts held by nonresidents

No. If these deposits are liabilities to the public arising from operations in Namibia, they are included in the calculation of the minimum liquid assets and reserve requirements.

Reserve requirements

No.

Liquid asset requirements

No.

Interest rate controls

No.

Credit controls

No. The regulations governing deposit accounts in foreign exchange apply.

Investment regulations

Yes.

Abroad by banks

Yes. Banking institutions must at all times maintain assets in Namibia of an aggregate value of at least 100% of their liabilities payable in Namibian dollars (excluding capital funds), minus any debit balances in rand, in the clearing account held with their associate banks in South Africa.

In banks by nonresidents

No.

Open foreign exchange position limits

Yes. There is no distinction between residents and nonresidents. The net open position limit is 15% of a bank’s share capital and unimpaired reserves.

On resident assets and liabilities

Yes. There is no distinction between residents and nonresidents. The net open position limit is 15% of a bank’s share capital and unimpaired reserves.

On nonresident assets and liabilities

Yes. There is no distinction between residents and nonresidents. The net open position limit is 15% of a bank’s share capital and unimpaired reserves.

Provisions specific to institutional investors

Yes.

Insurance companies

Yes.
### Limits (max.) on securities issued by nonresidents
- **Yes.** The maximum is 65% of the total assets of insurance companies.
- **Yes.** Since September 25, 2017, qualifying institutions (that is, insurance companies, pension funds, fund managers) may invest up to 35% of total assets under management by fund managers and unit trust management companies in portfolios held abroad without BON approval on presentation of a letter issued by NAMFISA confirming that the investment is within the 35% limit.

### Limits (min.) on investment portfolio held locally
- **Yes.** Effective August 31, 2018, the minimum level of investment portfolio held locally was increased to 45% from 35% of the total assets of the insurance companies.

### Currency-matching regulations on assets/liabilities composition
- **No.**

### Pension funds
- **Yes.** The maximum is 65% of the total assets of pension funds.
- **Yes.** Since September 25, 2017, qualifying institutions (that is, insurance companies, pension funds, fund managers) may invest up to 35% of total assets under management by fund managers and unit trust management companies in portfolios held abroad without BON approval on presentation of a letter issued by NAMFISA confirming that the investment is within the 35% limit.

### Limits (min.) on investment portfolio held locally
- **Yes.** Effective August 31, 2018, the minimum level of investment portfolio held locally was increased to 45% from 35% of the total assets of the pension fund.

### Currency-matching regulations on assets/liabilities composition
- **No.**

### Investment firms and collective investment funds
- **Yes.**
- **No.**
- **Yes.** Since September 25, 2017, qualifying institutions (that is, insurance companies, pension funds, fund managers) may invest up to 35% of total assets under management by fund managers and unit trust management companies in portfolios held abroad without BON approval on presentation of a letter issued by NAMFISA confirming that the investment is within the 35% limit.

Outward direct investment  n.a.

Inward direct investment  Yes.

Registration and other fees can be rebated for corporations held entirely by Nauruan citizens. Foreign corporations, defined as those incorporated outside Nauru or with their head office or principal place of business outside of Nauru, must provide financial and other information to the Registrar and appoint an agent in Nauru.

Controls on liquidation of direct investment  n.a.

There are no restrictions on the repatriation of profit or capital. There are no restrictions on the making of payments due such as interest on loans and dividends and other income from investments.

Controls on real estate transactions  Yes.

Purchase abroad by residents  n.a.

Purchase locally by nonresidents  Yes.

Only Nauruans are eligible to own land. Non-Nauruans may lease land, but only with the approval of the president. All transfers, sales, and leases of land in Nauru require the consent of the president.

Sale locally by nonresidents  n.a.

Controls on personal capital transactions  n.a.

Loans  n.a.

By residents to nonresidents  n.a.

To residents from nonresidents  n.a.

Gifts, endowments, inheritances, and legacies  n.a.

By residents to nonresidents  n.a.

To residents from nonresidents  n.a.

Settlement of debts abroad by  n.a.

**Changes during 2018 and 2019**

No significant changes occurred in the exchange and trade system.
NEPAL
(Position as of December 31, 2018)

Status under IMF Articles of Agreement

Date of membership
September 6, 1961.

Article VIII
Yes.

Article XIV

Exchange Measures

Restrictions and/or multiple currency practices
Yes.
The IMF staff report for the 2017 Article IV Consultation with Nepal states that as of March 13, 2017, the Industrial Enterprises Act places a 75% limit on the conversion and transfer to foreign currency of salaries of nonresidents from countries where convertible currency is in circulation. Since the limit applies to amounts that may be less than net salaries, it gives rise to an exchange restriction under Article VIII. (Country Report No. 17/74)

Exchange measures imposed for security reasons
No.

In accordance with IMF Executive Board Decision No. 144-(52/51)
No.

Other security restrictions
No.

References to legal instruments and hyperlinks
This information can be found at the AREAER ONLINE database: http://www.elibrary-areaer.imf.org/Pages/Reports.aspx.

Exchange Arrangement

Currency
Yes. The currency of Nepal is the Nepalese rupee.

Other legal tender
No.

Exchange rate structure

Unitary
Yes.

Dual

Multiple

Classification

No separate legal tender

Currency board

Conventional peg
Yes. The exchange rate arrangement is a conventional peg vis-à-vis the Indian rupee. The Nepal Rastra Bank (NRB) is designated as the agency that may decide on changes in the exchange rate system.

Stabilized arrangement

Crawling peg

Crawl-like arrangement

Pegged exchange rate within horizontal
bands
Other managed arrangement

Floating
Free floating

Official exchange rate  Yes.  The Nepalese rupee has been pegged to the Indian rupee at the rate of Nrs. 1.6 per Indian rupee since February 1993. The reference rate of the US dollar quoted by the NRB is based on the midrate of US dollar/Indian rupee (USD/INR) in the Indian foreign exchange market at the stipulated time. Buying and selling rates are quoted daily for certain other currencies, with quotes based on the buying and selling rates for the US dollar in markets abroad. The official exchange rate is fixed by the NRB. The NRB deals directly with the government and other public entities at the official exchange rate. The official exchange rate is used for accounting and valuation for NRB and government transactions.

Monetary policy framework

Exchange rate anchor  Yes.

U.S. dollar
Euro
Composite
Other  Yes.  The monetary policy framework is an exchange rate anchor vis-à-vis the Indian rupee.

The foreign exchange market in Nepal comprises the NRB, licensed banks and financial institutions, remittance companies, trekking tours and travel agents, money changers, exporters, importers, and hotels. Under Foreign Exchange (Regulation) Act, 2019 (1962), institutions must obtain licenses from the NRB to deal in foreign exchange. As of December 31, 2018, 28 Class A banks and 13 Class B financial institutions (BFIs) and 2,980 other institutions were licensed to deal in foreign exchange with the public. BFIs at the national level may engage in foreign exchange transactions with the NRB to maintain their foreign currency positions. Financial institutions with a paid-up capital of Nrs. 2,500 million are included in Class B national-level financial institutions. They may purchase and sell foreign exchange, maintain nostro accounts abroad, and make foreign currency payments and transfers, except restricted and capital transactions, on behalf of their clients. Commissions charged by ADs are regulated.

Market participants are allowed to pursue spot exchange rate transactions under prevailing NRB rules and regulations under the Foreign Exchange (Regulation) Act, 2019 (1962). Banks may freely determine their exchange rates for transactions with their clients for convertible foreign currencies, except Indian rupees. Twenty-eight Class A Banks and National Levels B class development banks are licensed to carry out such transactions.

The NRB has an unlimited foreign exchange standing facility for banks and BFIs. The purchase and sale of US dollars between BFIs and the NRB take place through the NRB purchase and sale window, open Monday through Friday. BFIs may purchase convertible
currency banknotes against their accounts with the NRB if adequate funds are available. The NRB deals directly with the government and other public entities at the official exchange rate.

**Allocation**
Yes.

The NRB verifies underlying documentation when dealing with ADs.

**Auction**
No.

**Fixing**
No.

**Interbank market**
Yes.

There is no broker system or market-making agreement. BFIs are the participants in the interbank market. They may enter into interbank transactions in foreign currency, including Indian rupees, under mutually agreed terms and conditions. As of December 31, 2018, 28 banks and 36 other BFIs had foreign exchange licenses from the NRB Foreign Exchange Department. Market participants may determine their bid-ask spreads up to 60 paisa on the US dollar.

**Over the counter**
Yes.

**Brokerage**
No.

**Market making**
No.

**Forward exchange market**
Yes.

Banks may contract forward exchange cover for current account transactions under mutually agreed terms and conditions with their clients. Proprietary forwards up to 30% of core capital (outstanding at any time) are permitted for banks. The NRB does not participate in forward transactions.

**Official cover of forward operations**
No.

**References to legal instruments and hyperlinks**
This information can be found at the AREAER ONLINE database:
http://www.elibrary-areaer.imf.org/Pages/Reports.aspx.

### Arrangements for Payments and Receipts

**Prescription of currency requirements**
Yes.

Convertibility between the Indian rupee and the Nepalese rupee is unrestricted in Nepal. Payments and transactions with Bhutan and India must be settled in Indian rupees, except when approval is granted by the NRB.

**Controls on the use of domestic currency**
Yes.

**For current transactions and payments**
Yes.

Domestic currency may not be used for international current account transactions. Current transactions with ACU member countries other than India must take place through the ACU. Goods and services imported from India through global tender by organizations, the corporate sector, and projects may be settled in US dollars. Other imports and proceeds from exports to India must be settled in Indian rupees. Proceeds from exports to other countries must be received in convertible currency. Commercial banks may engage in renminbi transactions with Chinese tourists, Nepalese visitors to China, and Nepalese students studying in China. There are 163 items imported from India that may be settled in US dollars. Guardian parents and students may make payments in US dollars from their US dollar accounts to a university or college in India for tuition fees (Circular No. 555 of 2067/11/23). Commercial banks may make payments in US dollars for imports from India by international organizations maintaining accounts in foreign currency for their own use (Circular No. 580 of 2069/05/01).

**For capital transactions**
Yes.

Domestic currency may not be used for the settlement of capital transactions.

**Transactions in capital and money market**
Yes.

Domestic currency may not be used for the settlement of capital transactions.
### Instruments

<table>
<thead>
<tr>
<th>Transactions in derivatives and other instruments</th>
<th>Yes.</th>
<th>Domestic currency may not be used for the settlement of capital transactions.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Credit operations</td>
<td>Yes.</td>
<td>Domestic currency may not be used for the settlement of capital transactions.</td>
</tr>
</tbody>
</table>

### Use of foreign exchange among residents

Yes. Residents (including registered entities) must be licensed by the NRB to use foreign exchange under the Foreign Exchange (Regulation) Act, 2019 (1962). Commercial banks may engage in interbank transactions in foreign currency, including Indian rupees. Resident individuals may purchase Indian rupees and sell them to the NRB or ADs.

### Payments arrangements

Yes. Payments in convertible currency may be made freely, subject to the procedures prescribed by the NRB. All exchange transactions must be settled through ADs; however, nonbank ADs are allowed to sell foreign currency under the passport facilities to meet travel expenses. Otherwise, these nonbank ADs are licensed to accept foreign currency for their services.

### Administration of control

Yes. Commercial banks are permitted to import gold with quantitative restrictions. Importers may import silver under OGLs without quantitative restrictions.

### Controls on trade in gold (coins and/or bullion)

No. Imports of gold are allowed under prescribed limits. These limits do not affect facilities given to individuals under a hand-carry bylaw. Jewelry exporters are no longer permitted to import gold.

### Controls on exports and imports of banknotes

Yes. Nepalese residents may carry with them Rs 5,000 while traveling to and from abroad.

#### Domestic currency

Yes. Foreign banknotes, other than Indian banknotes, may not be taken out by residents without permission. Foreign currency equivalent to US$5,000 may be taken out by foreigners. Larger amounts must be declared to Customs Officers for verification and certification.

#### Foreign currency

Yes. Importation of domestic currency is subject to controls.

#### Domestic currency

Yes. Residents and nonresidents may bring in foreign banknotes freely but...
must declare amounts exceeding US$5,000. No limits apply to the amount of Indian rupees brought in by residents and Indian nationals; however, Indian rupees more than 100 in denominations are prohibited to exchange. It is prohibited to bring Indian rupees more than 100 in denominations into Nepal.

This information can be found at the AREAER ONLINE database: http://www.elibrary-areaer.imf.org/Pages/Reports.aspx.

**Resident Accounts**

**Foreign exchange accounts permitted** Yes.

**Held domestically** Yes. Exporters may deposit up to 100% of export earnings in a foreign exchange account to cover trade-related expenses. Nepalese citizens who earn foreign exchange abroad (except in Bhutan and India) for more than three months and resident companies with a contract under a global tender and eligible to receive foreign exchange may also open foreign exchange accounts. Commercial banks may accept deposits in most freely usable currency and may freely determine the rate of interest on deposits. Banks may establish a minimum balance on time deposits. Foreign exchange earners (exporters and the tourism sector) may make payments from their foreign exchange accounts directly to foreign parties for promotional activities, such as booth reservations, registration fees, and service charges. Remittance agencies licensed by the NRB, employment agencies, and money changers may also open foreign exchange accounts. Remittance agencies may hold foreign exchange in their foreign exchange account for 15 days only. Guardian parents and students may make payments in US dollars from their US dollar accounts to a university or college in India for tuition fees (Circular No. 631, 2071/09/18). BFIs may open account for specific persons and institutions as prescribed by the NRB. Balance may be transferred on the basis of documents up to US$10,000 at a time, not exceeding US$20,000 a year for service payments, and US$500 cash payment by diplomats.

**Approval required** No.

**Held abroad** Yes. Approval is required to open these accounts. There are no restrictions on transfers and operation of accounts.

**Approval required** Yes. Approval is required to open these accounts. Commercial banks may open foreign exchange accounts abroad for facilitating e-commerce payments.

**Accounts in domestic currency held abroad** No. Residents are not allowed to open domestic currency accounts abroad.

**Accounts in domestic currency convertible into foreign currency** No.

**References to legal instruments and hyperlinks**

This information can be found at the AREAER ONLINE database: http://www.elibrary-areaer.imf.org/Pages/Reports.aspx.

**Nonresident Accounts**

**Foreign exchange accounts permitted** Yes. Diplomats and foreign nationals, except Indian nationals, are free to open foreign exchange accounts with Nepalese banks. Accounts may be maintained in all specified convertible currency, and balances in these accounts may be transferred abroad freely. Commercial banks may make payments in US dollars for imports from India by international organizations maintaining accounts in foreign currency for their own use. (Circular No. 580 of 2069/05/01).

**Approval required** No.

**Domestic currency accounts** Yes. Foreign nationals on business visas or work permits may open
accounts in domestic currency. Seventy five percent of salaries and 100% of provident fund and foreign currency taken in may be transferred.

Convertible into foreign currency Yes.
Approval required Yes. Approval from the NRB is required for repatriation.
Blocked accounts No.
References to legal instruments and hyperlinks This information can be found at the AREAER ONLINE database: http://www.elibrary-areaer.imf.org/Pages/Reports.aspx.

Imports and Import Payments

Foreign exchange budget No.
Financing requirements for imports Yes. Commercial banks may make payments in US dollars for imports from India by international organizations with accounts in foreign currency for their own use for prescribed goods only.
Minimum financing requirements No.
Advance payment requirements No.
Advance import deposits Yes. There are requirements of 2% for industrial materials and 10% for commercial goods in the customs account.
Documentation requirements for release of foreign exchange for imports
Domiciliation requirements Yes. Only a registered entity may open an LC to import goods. Documents required are the importer’s registration with the relevant authority, memorandum of association and articles of association, pro forma invoice/contract, updated tax clearance certificate, etc.
Preshipment inspection No.
Letters of credit Yes. Banks are required to obtain information regarding the creditworthiness (business credibility information) of suppliers before opening LCs in excess of the equivalent of US$50,000.
Import licenses used as exchange licenses Yes. These are required only for certain items, such as poppy seeds and limited food items (Circular No. 580, 2069/05/01 No. 13).
Other Yes. The maximum amount for payments by draft or wire transfer by importers is US$50,000 (Circular No. 655, 2073/4/28). Imports are also allowed on a documentary collection basis (documents-against-payment as well as acceptance) under the provision of International Chamber of Commerce Publication Uniform Rules for Collections (URC) No. 522, Circular No. 581.

Import licenses and other nontariff measures
Positive list Yes. Most imports are covered by OGLs.
Negative list Yes. Imports of plastic scraps, bags, and sheets of less than 20 microns; beef; restricted azo dyes; lightbulbs with high carbon dioxide emissions; arms; ammunition; wireless transmitters; used machinery and equipment; wild animals and their parts; precious metals (except gold and silver); and jewelry require special permission from the government. Imports of live birds and their unprocessed meat products and eggs and other unprocessed bird-related items from all Asian countries—except Bangladesh, Bhutan, India, and Sri Lanka—are prohibited.
Open general licenses Yes. Positive list goods and permitted goods are allowed as per Circular No. 647.

</tbody>
</table>
Prior approval | Yes. Approval is required from the NRB at the request of the employer organization.
Quantitative limits | Yes. Foreign workers may remit up to 75% of their wages.
Indicative limits/bona fide test | Yes. A business visa or work permit is required.
Credit card use abroad | Yes. Credit cards may be used abroad under specific guidelines and limits. BFIs may issue the credit cards for foreigners having foreign currency accounts in Nepal and BFIs may fix terms and conditions (Circular No. 625, 2071/05/04).
Prior approval | No.
Quantitative limits | Yes. The limit for credit card use abroad is US$15,000.
Indicative limits/bona fide test | No.
Other payments | Yes. Foreign exchange earners (exporters and the tourism sector) are allowed to make payments from their foreign exchange accounts directly to a foreign party for promotional activities such as booth reservations, registration fees, and service charges. Commercial banks are permitted to make payments for business credit reports for their own purposes.
Prior approval | Yes. The maximum amount for miscellaneous payments to institutions that may be made on the basis of supporting documents is US$10,000. NRB approval is required if the amount exceeds the limit.
Quantitative limits | No.
Indicative limits/bona fide test | No.

**Proceeds from Invisible Transactions and Current Transfers**

Repatriation requirements | Yes.
Surrender requirements | Yes. Foreign exchange earnings from invisible transactions may be retained in a foreign exchange account. Other current transfers, such as workers’ remittances collected from abroad through authorized remittance companies, may also be retained in foreign exchange accounts up to 15 days.
Surrender to the central bank | No.
Surrender to authorized dealers | Yes. Remittance companies are required to surrender the foreign currency they brought into the country after 15 days.
Restrictions on use of funds | Yes. Earnings deposited in a foreign exchange account by entities and individuals may be used freely to meet their obligations on the basis of supporting documents.
References to legal instruments and hyperlinks | This information can be found at the AREAER ONLINE database: [http://www.elibrary-areaer.imf.org/Pages/Reports.aspx](http://www.elibrary-areaer.imf.org/Pages/Reports.aspx).

**Capital Transactions**

Controls on capital transactions | Yes. Outward flow of capital is restricted. NRB may give approval, in some specific cases, on the basis of recommendation of the government of Nepal (GON). Approval from NRB is required to repatriate the amount received by the sale of the share of foreign investment, profit, principal, and interest. (Foreign Investment Restriction Act 2021(1964 AD); Foreign Investment and Technology Transfer Act, 1992; and Public Notice: 2069-10-09 of NRB).

| Controls on derivatives and other instruments                        | Yes.        | Commercial banks may provide forward contracts to institutions involved in foreign exchange transactions and enter into interest rate swap arrangements with foreign banks and other financial entities without NRB approval. Banks and some other financial institutions may enter into transactions in derivatives and other instruments, such
as forward operations, swaps, options, and futures, and may invest their convertible foreign exchange in financial instruments of any maturity. However, these transactions are subject to guidelines approved by the board of the respective banks and financial institutions.

**Purchase locally by nonresidents**
Yes. These transactions are prohibited.

**Sale or issue locally by nonresidents**
Yes. These transactions are prohibited.

**Purchase abroad by residents**
Yes. These transactions are prohibited for residents except banks.

**Sale or issue abroad by residents**
Yes. These transactions are prohibited.

**Controls on credit operations**
Yes. Specified borrowers may borrow from abroad in accordance with public notices and guidelines issued by the NRB under the Foreign Exchange (Regulation) Act, 2019 (1962).

**Commercial credits**
Yes.

- **By residents to nonresidents**
  Yes. These transactions are prohibited.

- **To residents from nonresidents**
  Yes. NRB approval is required if credit is provided with bailment and pledge in any form of domestic asset or security.

**Financial credits**
Yes. NRB approval is required if credit is provided.

- **By residents to nonresidents**
  Yes. These transactions are prohibited.

- **To residents from nonresidents**
  Yes. NRB approval is required.

**Guarantees, sureties, and financial backup facilities**
Yes. Approval is granted on a case-by-case basis.

- **By residents to nonresidents**
  No. Pursuant to NRB regulation, BFIs may issue guarantees for their nonresident clients.

- **To residents from nonresidents**
  Yes. Required documentation includes VAT information and proof of citizenship.

**Controls on direct investment**
Yes.

**Outward direct investment**
Yes. Nepalese citizens, whether or not they reside in Nepal, may not make any type of investment in foreign countries, except as specifically permitted by government notice. Citizens living abroad who invest funds earned abroad may keep those investments after returning to Nepal if they notify the NRB. Other exemptions include the purchase and sale of insurance policies abroad and investments abroad by banking and financial institutions incorporated in Nepal.

**Inward direct investment**
Yes. Investments require approval from the Department of Industry. Foreign investment is not permitted in cottage, small-scale, or defense-related industries. Foreign investors may hold 100% equity in large and medium industries.

**Controls on liquidation of direct investment**
Yes. Controls are based on the provisions of the Companies Act.

**Controls on real estate transactions**
Yes. Only residents may own real estate.

**Purchase abroad by residents**
Yes. These transactions are prohibited.

**Purchase locally by nonresidents**
Yes. These transactions are prohibited.

**Sale locally by nonresidents**
Yes. These transactions are prohibited.

**Controls on personal capital transactions**
Yes. These transactions are controlled.

**Loans**
Yes. These transactions are controlled.
By residents to nonresidents

Yes. These transactions are prohibited.

To residents from nonresidents

Yes. A person may borrow US$500,000 at zero interest rate for minimum five years, and firms, companies, and institutions may borrow on the recommendation from their regulator.

Gifts, endowments, inheritances, and legacies

Yes. These transactions are prohibited.

By residents to nonresidents

Yes. Permission from the relevant authority is required.

To residents from nonresidents

Yes. These transactions are restricted.

Settlement of debts abroad by immigrants

Transfer of assets

Transfer abroad by emigrants

Yes. Emigrants cannot transfer assets out of Nepal.

Transfer into the country by immigrants

Yes. Immigrants may transfer assets into Nepal.

Transfer of gambling and prize earnings

No.

Provisions Specific to the Financial Sector

Provisions specific to commercial banks and other credit institutions

Yes. Commercial banks may enter into interest rate swap arrangements with foreign banks and other financial entities without NRB approval.

Borrowing abroad

Yes. BFIs may borrow from abroad as specified. Specifically, up to 25% of core capital, with loan duration of 1–5 years at rate or fee of maximum 6-month LIBOR+3% and no collateral.

Maintenance of accounts abroad

Yes. NRB approval is required.

Lending to nonresidents (financial or commercial credits)

Yes. NRB approval is granted on a case-by-case basis.

Lending locally in foreign exchange

Yes. Exporters, tourism-related businesses, and firms involved in energy generation or production are entitled to such credits.

Purchase of locally issued securities denominated in foreign exchange

Yes. Only power generating and transmission company can issue debenture in foreign currency for specific project up to 60% of the project cost.

Differential treatment of deposit accounts in foreign exchange

Yes. Differential treatment is based on the type of currency. Convertible currency deposit accounts may be opened only if the holder has foreign exchange earnings.

Reserve requirements

No.

Liquid asset requirements

No.

Interest rate controls

No.

Credit controls

Yes. Controls apply to export credits.

Differential treatment of deposit accounts held by nonresidents

No.

Reserve requirements

No.

Liquid asset requirements

No.

Interest rate controls

No.

### Changes during 2018 and 2019

No significant changes occurred in the exchange and trade system.
NETHERLANDS
(Position as of December 31, 2018)

Status under IMF Articles of Agreement

Date of membership December 27, 1945.

Article XIV

Exchange Measures

Restrictions and/or multiple currency practices No. No restrictions as reported in the latest IMF staff report as of December 31, 2018.

Exchange measures imposed for security reasons Yes. The Netherlands maintains certain restrictions in accordance with EU regulations and the relevant UNSC resolutions on the making of payments and transfers for international transactions (including obligations to freeze assets) with respect to the following: Afghanistan, Belarus, Burundi, Central African Republic, Democratic Republic of the Congo, Egypt, Eritrea, Guinea (Conakry), Guinea-Bissau, Haiti, Islamic Republic of Iran, Iraq, Democratic People’s Republic of Korea, Lebanon, Libya, Myanmar, Russia, Somalia, South Sudan, Sudan, Syria, groups associated with terrorism (foreign organizations associated with terrorism including Al-Qaida and ISIS (Da’esh)), Tunisia, Ukraine, Yemen, and Zimbabwe.

In accordance with IMF Executive Board Decision No. 144-(52/51) Yes.

Other security restrictions No.

References to legal instruments and hyperlinks This information can be found at the AREAER ONLINE database: http://www.elibrary-areaer.imf.org/Pages/Reports.aspx.

Exchange Arrangement

Currency Yes. The currency of the Netherlands is the euro.

Other legal tender No.

Exchange rate structure

Unitary Yes.

Dual

Multiple

Classification

No separate legal tender

Currency board

Conventional peg

Stabilized arrangement

Crawling peg
Crawl-like arrangement
Pegged exchange rate within horizontal bands
Other managed arrangement
Floating
Free floating | Yes. | The exchange rate arrangement of the euro area is free floating. The Netherlands participates in a currency union (EMU) with 18 other members of the EU and has no separate legal tender. The euro, the common currency, floats freely and independently against other currencies. The ECB publishes information regarding its interventions; it last intervened in March 2011. When it intervenes, the ECB intervenes at the quotes of the market makers.

Official exchange rate | Yes. | The ECB publishes a reference rate based on the daily concertation procedure between CBs within and outside the European System of Central Banks. The publication time of the euro foreign exchange reference rates is around 14:30 Central European Time to around 16:00 Central European Time. The reference rate against the euro is the average of the buying and selling rates.

| Target with tolerance band |

Band/Range
To maintain price stability is the primary objective of the Eurosystem and of the single monetary policy for which it is responsible. This is stated in the Treaty on the Functioning of the EU, Article 127(1). “Without prejudice to the objective of price stability,” the Eurosystem will also “support the general economic policies in the Community with a view to contributing to the achievement of the objectives of the Community.” These include a “high level of employment” and “sustainable and non-inflationary growth.” Price stability is defined as an inflation rate below but close to 2% over the medium term.
The foreign exchange market operates on the basis of a market-making agreement for large professional market participants, such as banks. Smaller participants usually use a broker. In theory, there are no limits on bid-ask spreads. Excessive spreads, however, would be deemed “off-market” and are, therefore, not allowed. Commissions must also be market based. Intervention, if any, must be coordinated within the Eurosystem and takes place directly via market makers at their quoted rates (best price). Banks licensed by the DNB may trade in the interbank foreign exchange market. As of December 31, 2018, 91 banks have a banking license.

The interbank market operates on the basis of a market-making agreement, under which participants commit to a maximum spread and a minimum amount to trade. To the extent that the necessary contracts are in place, banks may participate in the interbank foreign exchange market. There are no limits on the bid-ask spreads and commissions of market participants.

The CB may engage in foreign exchange swaps or foreign exchange forwards in the global market for investment purposes.

This information can be found at the AREAER ONLINE database: http://www.elibrary-areaer.imf.org/Pages/Reports.aspx.

Arrangements for Payments and Receipts

Prescription of currency requirements No.

Controls on the use of domestic currency No.

For current transactions and payments No.

For capital transactions

Transactions in capital and money market instruments No.

Transactions in derivatives and other instruments No.

Credit operations No.

Use of foreign exchange among residents No.

Payments arrangements No.

Bilateral payments arrangements No.

Operative No.

Inoperative No.

Regional arrangements No.
Clearing agreements No.
Barter agreements and open accounts No.
Administration of control No.
Payments arrears No.
Official No.
Private No.
Controls on trade in gold (coins and/or bullion) No.
On domestic ownership and/or trade No.
On external trade No.
Controls on exports and imports of banknotes No.

In accordance with EC Regulation No. 1889/2005, cash controls have been implemented based on a mandatory declaration system for amounts of cash entering or leaving the EU with a value of €10,000 or more. Travelers entering or leaving the EU and carrying more than €10,000 are required to make a declaration to the relevant authorities of the member country through which they enter or leave the EU. The authorities must keep a record of such information and report it to their national financial intelligence unit. The obligation to declare is not fulfilled if the traveler makes no declaration or if the information provided is incorrect or incomplete. To check compliance with the regulation, the national authorities have the right to search natural persons, their baggage, and their means of transportation. In the event of failure to comply with the declaration obligation, cash may be confiscated. The EC regulation requires member countries to impose penalties for failure to comply with the declaration obligation. If there are indications that cash is related to illegal activity, authorities of one member country may exchange information with authorities in other member countries. Under the framework of existing agreements on mutual administrative assistance, information obtained under the EC regulation may also be communicated to a third country in compliance with relevant national and EU provisions on the transfer of personal data to third countries. The EC regulation does not apply to physical cross-border transportation from one EU member country to another (that is, intra-EU transportation). Such transportation is not considered “cross-border” for the purpose of the EC regulation; the EC regulation only harmonizes the system for the EU’s external borders.

On exports No.

*Domestic currency* No. Travelers entering or leaving the EU and carrying more than €10,000 are required to make a declaration to the relevant authorities of the member country through which they enter or leave the EU.

*Foreign currency* No. Travelers entering or leaving the EU and carrying more than €10,000 are required to make a declaration to the relevant authorities of the member country through which they enter or leave the EU.

On imports No.

*Domestic currency* No. Travelers entering or leaving the EU and carrying more than €10,000 are required to make a declaration to the relevant authorities of the member country through which they enter or leave the EU.

*Foreign currency* No. Travelers entering or leaving the EU and carrying more than €10,000 are required to make a declaration to the relevant authorities of the member country through which they enter or leave the EU.

The DNB applies Article 351 of the Capital Requirements Regulation (CRR—Regulation (EU) No. 575/2013). The CRR does not impose an explicit limit on open foreign exchange positions, but there is a prudential capital requirement of 8% of an institution’s own funds under Article 351 (if the sum of the overall net foreign exchange position and net gold position exceeds 2% of an institution’s total own funds).

Exchange Measures

Restrictions and/or multiple currency practices No.

Exchange measures imposed for security reasons
Yes. No restrictions as reported in the latest IMF staff report as of December 31, 2018.

In accordance with IMF Executive Board Decision No. 144-(52/51)
Yes. Measures have been taken to prohibit dealing with or making available to any person assets of the Taliban or of other designated individuals and organizations associated with terrorism, in accordance with the relevant UNSC resolutions.

Other security restrictions
Yes. Dealing with or making available to any person assets of the former government of Iraq, except for transfers to the Development Fund for Iraq or as authorized by the minister of foreign affairs and trade, is prohibited. Dealing with or making available to any person assets or funds belonging to Charles Taylor’s and his associates’ former regime in Liberia is also prohibited within New Zealand and by New Zealand citizens abroad.

Exchange Arrangement

Currency
Yes. The currency of New Zealand is the New Zealand dollar.

Other legal tender
No.

Exchange rate structure

Unitary
Yes.

Dual

Multiple

Classification

No separate legal tender
Currency board
Conventional peg
Stabilized arrangement
Crawling peg
Crawl-like arrangement
Pegged exchange rate within horizontal bands

Other managed arrangement

Floating Yes. The de jure exchange rate arrangement is free floating. The exchange rate is determined on the basis of supply and demand in the foreign exchange market. The Reserve Bank of New Zealand (RBNZ) may intervene if the exchange rate is exceptionally high or low, if that rate is not justified by economic fundamentals, and if there is a material prospect that the intervention will influence the exchange rate. Interventions may not be used as an attempt to influence the long-term trend of the exchange rate. The RBNZ publishes information on its foreign currency assets and liabilities, including its foreign currency intervention capacity (stock of reserves available for intervention) and foreign exchange swap position, on its website but does not publish data on its direct intervention. The de facto exchange rate arrangement is classified as floating.

Free floating

Official exchange rate Yes. The RBNZ publishes a reference exchange rate for statistical purposes, sourced from the New Zealand Financial Markets Association. The New Zealand Financial Markets Association publishes reference rates for the New Zealand dollar at 2:00 p.m. (also known as the WM/Reuters New Zealand dollar 2:00 p.m. fixes), based on internationally accepted best practice calculation methods.

Monetary policy framework

Exchange rate anchor

U.S. dollar

Euro

Composite

Other

Monetary aggregate target

Inflation-targeting framework Yes. Monetary policy is formulated at achieving and maintaining stability in the general level of prices over the medium term and supporting maximum sustainable employment.

Target setting body Yes.

Government

Central Bank

Monetary Policy Committee

Central Bank Board

Other

Government and Central Bank

Effective April 1, 2019, the Minister of Finance and Governor of the Reserve Bank agreed a remit setting out the RBNZ’s new dual employment and price stability objectives. Under Section 8 of the RBNZ Act, the RBNZ, acting through the Monetary Policy Committee (MPC), is required to formulate monetary policy with the goals of maintaining a stable general level of prices over the medium
term and supporting maximum sustainable employment. The remit sets out the objectives as follows: (1) keep future annual inflation between 1% and 3% over the medium term, with a focus on keeping future inflation near the 2% midpoint; and (2) support maximum sustainable employment. The remit replaces the previous Policy Targets Agreement (PTA) between the Minister of Finance and Governor. Previously, the Reserve Bank Act required that price stability be defined in a specific and public contract, the PTA, negotiated between the minister of finance and the RBNZ governor.

The remit sets out the Reserve Bank’s operational objectives, consistent with the economic objectives contained in Section 8 of the Act (stability in the general level of prices over the medium term and supporting maximum sustainable employment). While the first remit was agreed between the Minister of Finance and the Governor – to support a smooth transition between frameworks – all future remits will be issued by the Minister of Finance. The remit will be reviewed every five years and will be issued by the Minister of Finance following public, non-binding advice from the Reserve Bank.

Effective April 1, 2019, the MPC was established and a charter issued that would govern the decision making for the MPC. The MPC would comprise members internal and external to the RBNZ. The MPC will formulate monetary policy through decisions like the level of the official cash rate (OCR). The first charter was an agreement between the Minister of Finance and the Governor. All future charters will be agreements between the Minister of Finance and the MPC. The Minister and MPC may agree to review the charter at any time, and it must be reviewed whenever the remit is reviewed (every five years).

**Inflation target**

Yes.

**Target number**

Yes.

**Point target**

Yes.

**Target with tolerance band**

Yes. Effective April 1, 2019, the MPC’s operational objective is to keep future annual inflation between 1% and 3% over the medium term, with a focus on keeping future inflation near the 2% midpoint.

Previously, the Policy Targets Agreement defined price stability as keeping future consumer price index inflation outcomes between 1% and 3% on average over the medium term, with a focus on keeping future average inflation near the 2% target midpoint.

**Band/Range**

Yes.

**Target measure**

Yes. The target is defined in terms of the All Groups Consumers Price Index (CPI) published by Statistics New Zealand. This records the change in the price of a weighted “basket” of goods and services purchased by an “average” New Zealand household. The percentage change of this index is typically referred to as “CPI inflation.” The contents of the basket are defined by Statistics New Zealand, which periodically reviews and re-weights them, using data obtained from its annual Household Economic Survey.

**Core inflation**

No.

**Target horizon**

Yes. Medium term.

**Operating target (policy rate)**

Yes.
Operating target (policy rate)

Policy rate

Yes.
The policy rate is the OCR. The CB pays interest on settlement account balances for daily interbank transactions, and charges interest on overnight borrowing, at rates related to the OCR.

Other

n.a.

Accountability

Yes.

Open letter

No.

Parliamentary hearings

Yes. The RBNZ appears before the Select Committee, the Finance and Expenditure Committee, on the day following the release of each quarterly Monetary Policy Statement.

Other

No.

Transparency

Yes.

Publication of votes

Yes. Effective April 1, 2019, the charter governing the decision making for the MPC states that the MPC must aim to reach decisions by consensus. However, in the event consensus cannot be reached, a vote will be taken, and the record of this vote published with the summary record of meeting. The votes will be unattributed.

Publication of minutes

Yes. Effective April 1, 2019, a summary record of meeting must be published following each meeting of the MPC. The points this record must contain are outlined in the charter governing the decision making for the MPC, and discussions are not attributed to individuals.

Publication of inflation forecasts

Yes. The thinking behind the Reserve Bank’s setting of the OCR is published four times a year in an accountability document known as the Monetary Policy Statement.

Other monetary framework

Exchange tax

No.

Exchange subsidy

No.

Foreign exchange market

Yes. ADs may freely determine their exchange rates and commissions in foreign exchange transactions with their clients.

Spot exchange market

Yes. There is no foreign exchange licensing regime in New Zealand.

Operated by the central bank

No.

Foreign exchange standing facility

No.

Allocation

No.

Auction

No.

Fixing

No.

Interbank market

Yes. The RBNZ licenses 15 locally incorporated and 11 overseas incorporated commercial banks for all banking operations; there are no specific licenses required for interbank foreign exchange operations. There are no limits on the bid-ask spreads and commissions of market participants. The RBNZ intervenes via market makers. As of December 31, 2018, there were four banks actively operating in the interbank market in New Zealand.

Over the counter

No.
The foreign exchange market operates based on a market-making agreement. Licenses are not issued or required for institutions to participate in the foreign exchange market. There are four domestic banks that are market makers in the New Zealand spot exchange market.

The RBNZ uses foreign exchange swaps for liquidity management purposes. Transactions are handled with market participants directly or via brokers.

</table>

Import prohibitions and restrictions are maintained to (1) protect the safety and security of New Zealanders (for example, firearms, other weapons, dangerous dogs, controlled drugs); (2) protect the environment and animal and plant life (for example, biological products, hazardous substances); and (3) comply with international agreements (for example, ozone-depleting substances).

Tariffs apply mainly to imported manufactured products that compete with domestic production. Most primary products that compete with domestic production are admitted duty free. In 2009, all remaining tariff rates were reduced to either 10% or 5%. Import tariffs will remain at their current levels until at least June 2021. Tariffs on clothing, footwear, carpets, ambulances, and motor homes are set at 10%. There are multilateral, bilateral, and regional preferential tariffs. Effective December 30, 2018, the Comprehensive and Progressive Agreement for Trans-Pacific Partnership (CPTPP) entered into force among Australia, Canada, Japan, Mexico, New Zealand, and Singapore. Under reciprocal free trade agreements, tariffs on goods originating from the following countries or territories have either been removed or are being reduced for eventual elimination: Australia, Brunei Darussalam, Canada, Chile, China, Hong Kong SAR, Japan, Korea, Malaysia, Mexico, Singapore, Taiwan Province of China, Thailand, and ASEAN member countries. The ASEAN-Australia-New Zealand Free Trade Agreement (AANZFTA) is in effect between Australia, Brunei Darussalam, Cambodia, Indonesia, Lao P.D.R., Malaysia, Myanmar, New Zealand, Philippines, Singapore, Thailand, and Vietnam. Goods from least developed countries and Pacific island economies are duty free under nonreciprocal free trade arrangements. Eligible imports from the United Kingdom and developing economies are also given tariff preference. In August 2017, the government decided to keep import tariffs unchanged until at least July 31, 2021, except where they are...
being reduced through trade agreements. The Tariff (Concessions) Amendment Order 2014 went into effect, introducing temporary tariff concessions on residential building materials to assist Canterbury earthquake rebuilding and Auckland housing demand. This tariff concession was reviewed in October 2018 and will remain in place. It is due for review in 2023. As a signatory to the WTO Information Technology Agreement (II), New Zealand eliminated, effective July 1, 2019, the customs duties on Information Technology Agreement (II) goods.

Export licenses have been introduced to protect New Zealand’s culture (for example, on protected New Zealand objects), human life or animal life (for example, on hazardous waste, live animals); or support the Sanitary and Phytosanitary Agreement (for example, on certain animal products) or marketing or quality requirements (for example, kiwifruit and horticulture). For conservation reasons, there are also restrictions on exports of various animals and plants. Certain items classified as strategic goods may be exported only if specific requirements have been met and an export permit has been issued.

New Zealand administers export licenses for some agricultural products (such as beef and dairy) to comply with tariff-quota regimes of some trading partners.

Consent is required under (1) Section 12 of the Overseas Investment Act 2005 for the acquisition by an overseas person or associate of an overseas person of (a) an interest in sensitive land and (b) rights or interests in securities of a person (A), if A owns or controls (directly or indirectly) an interest in sensitive land and as a result of the acquisition the overseas person or associate has a 25% or more ownership or controlling interest in A, or an increase in an existing 25% or more ownership or controlling interest in A, or A becomes an overseas person. Sensitive land investments must meet an “investor” test and generally benefit New Zealand or a group of New Zealanders. If the sensitive land is nonurban land of more than five hectares, the benefit must be substantial and identifiable. If it is farmland, its sale must be advertised in accordance with the Overseas Investment Regulations 2005, unless exempted. (2) Section 13 of the Overseas Investment Act 2005 for (a) the acquisition by an overseas...
person or associate of an overseas person of rights and interests in the securities of a person (A), if as a result of the acquisition the overseas person or associate has a 25% or more ownership or controlling interest in A, or an increase in an existing 25% or more controlling interest in A, and the value of the securities or consideration or the value of the assets of A and its subsidiaries with an interest of 25% or more exceeds $NZ 100 million; (b) the establishment by an overseas person of a business in New Zealand, if the business operates more than 90 days a year (whether consecutively or in aggregate) and the total expected expenditure exceeds $NZ 100 million; and (c) the acquisition by an overseas person or associate of property (including goodwill and other intangible assets) in New Zealand used in conducting business, if the total value exceeds $NZ 100 million. “Significant business asset” investments must meet an investor test. (3) Section 57B of the Fisheries Act 1996 for the acquisition by an overseas person or associate of (a) an interest-in-fishing quota; or (b) rights or interests in securities of a person (A), if A owns (directly or indirectly) an interest-in-fishing quota and as a result of the acquisition the overseas person or associate has an ownership of 25% or more or a controlling interest in A or an increase in a 25% or more ownership or a controlling interest in A, or A becomes an overseas person. Fishing quota investments must meet an investor and a national interest test. Only New Zealanders may acquire, without the consent of the Crown, 49.9% or more of the shares of Chorus Limited or an interest in equity securities that confers 10% or more of the total voting rights in Air New Zealand Limited. Under the Overseas Investment Regulations 2005, minor increases in shareholding and certain securitization and underwriting arrangements are exempt from the above requirements. Implementing an obligation under the Protocol on Investment to the New Zealand-Australia Closer Economic Relations Trade Agreement signed February 16, 2011, effective January 1, 2019, the threshold for Australian nongovernment investment in significant business assets in New Zealand was increased to $NZ 530 million from $NZ 516 million (previously, it was increased to $NZ 516 million from $NZ 501 million, effective January 1, 2018). In general, an investor qualifies as an Australian nongovernment investor if it is an Australian individual, is located in Australia, and does substantive business in Australia, or is more than 75% owned or controlled by Australians and New Zealanders. The investor may not be owned or controlled by the Australian government or a foreign government. Effective January 1, 2019, the threshold for Australian government investment in significant business assets was increased to $NZ 111 million from $NZ 108 million (previously, it was increased to $NZ 108 million from $NZ 105 million, effective January 1, 2018). In general, an investor qualifies as an Australian government investor if it is either the Australian government or an entity or branch in Australia and 25% or more owned or controlled by the Australian government. The investor may not be a foreign government or 25% or more owned or controlled by a foreign government. These thresholds will be updated annually based on changes in gross domestic product (GDP). If an Australian investor wishes to invest in a significant business asset that includes sensitive land and/or fishing quota, the investment must be screened. On August 22, 2018, the Overseas Investment Amendment Act 2018 received Royal assent. As a result of these amendments, effective October 22, 2018, “residential land” is a category of “sensitive land” in the Act. As such, overseas persons must generally obtain consent to acquire residential land. Consent may be granted in circumstances
where the applicant is: committing to reside, and become tax resident, in New Zealand (that is, spending at least 183 days of every year in New Zealand living in the residence for which consent to purchase was received); committing to increase the stock of residential housing on a piece of land (either by building a new, or expanding an existing, residential development or long-term accommodation facility); or to convert to a non-residential use (that is, establishing business operations on the site). Consistent with the Protocol on Investment to the New Zealand-Australia Closer Economic Relations Trade Agreement and the New Zealand-Singapore Closer Economic Partnership, Australian and Singaporean investors are not subject to screening of residential (but not otherwise sensitive) land. Consent may also be granted for overseas persons to acquire residential land subject to an exemption certificate; however, there are still restrictions on their use of the land under such circumstances – including a requirement that they cannot reside at the property.

The Overseas Investment Amendment Act 2018 also narrows the existing exemptions for profits à prendre. In particular, effective October 22, 2018, consent is required for an overseas person to obtain an interest in forestry-related profits à prendre of 1000 hectares or greater a year and other regulated profits à prendre of five hectares or more. At the same time as the range of land interests for which consent is required to conduct forestry activities was expanded, the pathways to obtain consent to acquire forestry assets (whether freehold, leasehold, profits à prendre, or through a forest registration right) were streamlined through the introduction of “the special benefits test” for forestry. Under this test, investors may obtain consent to acquire forestry assets if they satisfy the criteria specified in the Overseas Investment Regulations 2018. Previously, a more general test was in place which required investors to demonstrate that their investment would be of benefit to New Zealand.

Controls on liquidation of direct investment  No.
Controls on real estate transactions  Yes.
Purchase abroad by residents  No.
Purchase locally by nonresidents  Yes.

Foreign investment in certain types of land must meet an investor test and generally must benefit New Zealand or a group of New Zealanders. If sensitive land is nonurban land of more than five hectares, the benefit must be substantial and identifiable. Consent is required for acquisitions of the following: nonurban land exceeding five hectares; land on specified islands exceeding 0.4 hectares; land on all other islands (other than the North or South Island); the foreshore or seabed; land exceeding 0.4 hectares including or adjoining the bed of a lake; land containing or adjoining land held for conservation purposes, reserves, public parks, recreation, open space, or historic or heritage areas; land in excess of 0.2 hectares adjoining the foreshore; land adjoining regional parks; land adjoining certain listed land under Section 37 of the Overseas Investment Act 2005; land of more than 0.4 hectares including reserves, parks, and other sensitive areas.

On August 22, 2018, the Overseas Investment Amendment Act 2018 received Royal assent. As a result of these amendments, effective October 22, 2018, “residential land” is a category of “sensitive land” in the Act. As such, overseas persons must generally obtain consent to acquire residential land. Consent may be granted in circumstances where the applicant is: committing to reside, and become tax resident, in New Zealand (that is, spending at least 183 days of every year in New Zealand living in the residence for which consent to purchase was received); committing to increase the stock of residential housing on a piece of land (either by building a new, or expanding an existing, residential development or long-term accommodation facility); or to convert to a non-residential use (that is, establishing business operations on the site). Consistent with the Protocol on Investment to the New Zealand-Australia Closer Economic Relations Trade Agreement and the New Zealand-Singapore Closer Economic Partnership, Australian and Singaporean investors are not subject to screening of residential (but not otherwise sensitive) land. Consent may also be granted for overseas persons to acquire residential land subject to an exemption certificate; however, there are still restrictions on their use of the land under such circumstances – including a requirement that they cannot reside at the property.

The Overseas Investment Amendment Act 2018 also narrows the existing exemptions for profits à prendre. In particular, effective October 22, 2018, consent is required for an overseas person to obtain an interest in forestry-related profits à prendre of 1000 hectares or greater a year and other regulated profits à prendre of five hectares or more. At the same time as the range of land interests for which consent is required to conduct forestry activities was expanded, the pathways to obtain consent to acquire forestry assets (whether freehold, leasehold, profits à prendre, or through a forest registration right) were streamlined through the introduction of “the special benefits test” for forestry. Under this test, investors may obtain consent to acquire forestry assets if they satisfy the criteria specified in the Overseas Investment Regulations 2018. Previously, a more general test was in place which required investors to demonstrate that their investment would be of benefit to New Zealand.

Controls on liquidation of direct investment  No.
Controls on real estate transactions  Yes.
Purchase abroad by residents  No.
Purchase locally by nonresidents  Yes.

Foreign investment in certain types of land must meet an investor test and generally must benefit New Zealand or a group of New Zealanders. If sensitive land is nonurban land of more than five hectares, the benefit must be substantial and identifiable. Consent is required for acquisitions of the following: nonurban land exceeding five hectares; land on specified islands exceeding 0.4 hectares; land on all other islands (other than the North or South Island); the foreshore or seabed; land exceeding 0.4 hectares including or adjoining the bed of a lake; land containing or adjoining land held for conservation purposes, reserves, public parks, recreation, open space, or historic or heritage areas; land in excess of 0.2 hectares adjoining the foreshore; land adjoining regional parks; land adjoining certain listed land under Section 37 of the Overseas Investment Act 2005; land of more than 0.4 hectares including reserves, parks, and other sensitive areas.

On August 22, 2018, the Overseas Investment Amendment Act 2018 received Royal assent. As a result of these amendments, effective October 22, 2018, “residential land” is a category of “sensitive land” in the Act. As such, overseas persons must generally obtain consent to acquire residential land. Consent may be granted in circumstances where the applicant is: committing to reside, and become tax resident, in New Zealand (that is, spending at least 183 days of every year in New Zealand living in the residence for which consent to purchase was received); committing to increase the stock of residential housing on a piece of land (either by building a new, or expanding an existing, residential development or long-term accommodation facility); or to convert to a non-residential use (that is, establishing business operations on the site). Consistent with the Protocol on Investment to the New Zealand-Australia Closer Economic Relations Trade Agreement and the New Zealand-Singapore Closer Economic Partnership, Australian and Singaporean investors are not subject to screening of residential (but not otherwise sensitive) land. Consent may also be granted for overseas persons to acquire residential land subject to an exemption certificate; however, there are still restrictions on their use of the land under such circumstances – including a requirement that they cannot reside at the property.

The Overseas Investment Amendment Act 2018 also narrows the existing exemptions for profits à prendre.   - **Limits (min.) on investment portfolio held locally**  
  No.

  - **Currency-matching regulations on assets/liabilities composition**  
  No.

- **Pension funds**  
Yes.
| **Limits (max.) on securities issued by nonresidents** | No. |
| **Limits (max.) on investment portfolio held abroad** | No. |
| **Limits (min.) on investment portfolio held locally** | Yes. |

The Overseas Investment Act 2005 governs superannuation scheme investments if the superannuation scheme’s trustee is an “overseas person” and the investment is in “sensitive land, significant business assets or fishing quota,” as defined in the law. Superannuation schemes (within the meaning of Section 6(1) of the Financial Markets Conduct Act 2013) that hold assets for the benefit of members are exempt from the law’s consent provisions if at least 75% of the members are New Zealanders or ordinarily reside in New Zealand.

| **Currency-matching regulations on assets/liabilities composition** | No. |
| **Investment firms and collective investment funds** | Yes. |
| **Limits (max.) on securities issued by nonresidents** | No. |
| **Limits (max.) on investment portfolio held abroad** | No. |
| **Limits (min.) on investment portfolio held locally** | Yes. |

The Overseas Investment Act 2005 governs investments by investment firms and funds if the investment firm or fund is an “overseas person” and the investment is in “sensitive land or significant business assets,” as defined in the law. Portfolio investors may apply for an exemption that results in their interest in a target entity not contributing to that entity being deemed to be an overseas person. To qualify for this exemption, the investment by the portfolio investor must generally be less than 10% and not grant control over the target entity.

| **Currency-matching regulations on assets/liabilities composition** | No. |

### Changes during 2018 and 2019

**Exchange Arrangement**

**Monetary policy framework**

**Inflation-targeting framework**

**Target setting body**

Government and Central Bank  

04/01/2019

The Minister of Finance and Governor of the Reserve Bank agreed a remit setting out the Reserve Bank of New Zealand’s (RBNZ’s) new dual employment and price stability objectives. Under Section 8 of the RBNZ Act, the RBNZ, acting through the Monetary Policy Committee, is required to formulate monetary policy with the goals of maintaining a stable general level of prices over the medium term and supporting maximum sustainable employment. The remit sets out the objectives as follows: (1) keep future annual inflation between 1% and 3% over the medium term, with a focus on keeping future inflation near the 2% midpoint; and (2) support maximum sustainable employment. The remit replaces the previous Policy Targets Agreement (PTA) between the Minister of Finance and Governor. Previously, the Reserve Bank Act required that price stability be defined in a specific and public contract, the PTA, negotiated between the minister of finance and the RBNZ governor.
The Monetary Policy Committee (MPC) was established and a charter issued that would govern the decision making for the MPC. The MPC would comprise members internal and external to the Reserve Bank of New Zealand. The MPC will formulate monetary policy through decisions like the level of the official cash rate. The first charter was an agreement between the Minister of Finance and the Governor. All future charters will be agreements between the Minister of Finance and the MPC.

**Inflation target**

- **Target number**
- **Target with tolerance band**

The Monetary Policy Committee’s operational objective is to keep future annual inflation between 1% and 3% over the medium term, with a focus on keeping future inflation near the 2% midpoint. Previously, the Policy Targets Agreement defined price stability as keeping future consumer price index inflation outcomes between 1% and 3% on average over the medium term, with a focus on keeping future average inflation near the 2% target midpoint.

**Transparency**

- **Publication of votes**
- **Publication of minutes**

The charter governing the decision making for the Monetary Policy Committee (MPC) states that the MPC must aim to reach decisions by consensus. However, in the event consensus cannot be reached, a vote will be taken, and the record of this vote published with the summary record of meeting. The votes will be unattributed.

A summary record of meeting must be published following each meeting of the Monetary Policy Committee (MPC). The points this record must contain are outlined in the charter governing the decision making for the MPC, and discussions are not attributed to individuals.

**Imports and Import Payments**

- **Import taxes and/or tariffs**

The Comprehensive and Progressive Agreement for Trans-Pacific Partnership entered into force among Australia, Canada, Japan, Mexico, New Zealand, and Singapore.

As a signatory to the WTO Information Technology Agreement (ITA) (II), New Zealand eliminated the customs duties on ITA (II) goods.

**Capital Transactions**

- **Controls on capital transactions**

- **Controls on direct investment**

The threshold for Australian government investment in significant business assets was increased to $NZ 108 million from $NZ 105 million.

The threshold for Australian nongovernment investment in significant business assets in New Zealand was increased to $NZ 516 million from $NZ 501 million. The threshold is updated annually based on changes in gross domestic product.

As a result of the amendments introduced in the Overseas Investment Amendment Act 2018, “residential land” falls into the category of “sensitive land” in the Act. As such, overseas persons must generally obtain consent to acquire residential land. Consent may be granted in circumstances where the applicant is: committing to reside, and become tax resident, in New Zealand (that is, spending at least 183 days of every year in New Zealand living in the residence for which consent to purchase was received); committing to increase the stock of residential housing on a piece of land (either by building a new, or expanding an existing, residential development or long-term

- The currency of Nicaragua is the Nicaraguan córdoba.
- The de jure exchange rate arrangement is a crawling peg. The Central Bank of Nicaragua (BCN) publishes aggregated monthly data pertaining to BCN foreign exchange transactions with the banks and the government. The crawl is set to 5% against the US dollar on an annual basis.
Floating

Free floating

**Official exchange rate**  Yes. The official exchange rate of the córdoba is determined and preannounced by the BCN. The official exchange rate is calculated daily using the formula \((1 + 0.05)^{1/365}\). The official exchange rate is used for BCN purchases of US dollars from the banks and the government and is used to calculate the exchange rate for BCN US dollar sales to these agents. The official exchange rate is used as a reference for the settlement of foreign exchange contracts payable in local currency, such as BCN bonds, and as an anchor for fixing market exchange rates.

**Monetary policy framework**

**Exchange rate anchor**  Yes.

**U.S. dollar**  Yes. The monetary policy framework is an exchange rate anchor vis-à-vis the US dollar. Monetary operations are aimed at maintaining an adequate level of international reserves to support the crawling peg regime. Open market operations are the CB’s primary monetary policy tool and are conducted to absorb a target volume of liquidity consistent with the desired level of reserve accumulation. In addition, the BCN buys and sells foreign exchange in accordance with banking system demand.

Exchange tax  No. There is no tax, but the BCN applies a commission to the sale of foreign exchange: the official exchange rate plus a commission of 1%.

Exchange subsidy  No.

Foreign exchange market  Yes. In the foreign exchange market, the observed difference between the selling rate and the official rate is usually less than 1%, given the current exchange arrangement. Agents may freely determine their foreign exchange commissions with their clients. The Exchange Desk Module (Microsoft Management Console) continues to be operational. It is available to banks, financial institutions, and the government (through the Ministry of Finance and Public Credit) for online purchases and sales of foreign exchange (US dollars and euros) against córdobas. The Microsoft Management Console makes it possible to buy and sell US dollar against córdobas in real time, and to buy and sell euros against córdobas with a delay (but within the same business day) because they require BCN authorization.

Spot exchange market  Yes. Participants in the foreign exchange market are the BCN, the government, banks, financial institutions, exchange bureaus, individuals, and legal entities that usually buy and sell foreign exchange. As of December 31, 2018, there were 9 institutions registered with the BCN as participants in the foreign exchange market: 8 commercial banks, 1 state bank, 2 financial institutions, 1 exchange bureau, and 7 legal entities. Exchange bureaus are not regulated and, depending on their articles of agreement, may engage in all civil and merchant activities, but their main purpose is the purchase and sale of foreign exchange. At present, the exchange bureau manages foreign accounts.

Operated by the central bank  Yes.

Foreign exchange standing facility  Yes. The BCN exchanges US dollars and euros for córdobas at the official
rate only for the government, banks, and financial corporations registered with the BCN. There are no restrictions on the amount, and the origin and destination of the foreign currency do not have to be declared. Transactions between the BCN and the government and financial institutions are effected directly.

| Allocation | No. |
| Fixing | No. |

*Interbank market* Yes. Banks and financial institutions are allowed to trade among themselves at freely determined rates. As of December 31, 2018, 8 banks and 2 financial institutions participated in the interbank market. The BCN does not intervene in the interbank market. Article 60 of the BCN Financial Rules indicates that the interbank market operates independently of the BCN. The difference between the purchasing price and the selling price, and the commissions for market participants, are not subject to limits.

| Over the counter | Yes. |
| Brokerage | No. |
| Market making | No. |
| Forward exchange market | No. |

*Official cover of forward operations* No.

References to legal instruments and hyperlinks This information can be found at the AREAER ONLINE database: http://www.elibrary-areaer.imf.org/Pages/Reports.aspx.

**Arrangements for Payments and Receipts**

*Prescription of currency requirements* No. There are no restrictions. However, financial institutions must report to the SIBOIF all individual transactions, including multiple or partial transactions, such as deposits, withdrawals, currency exchanges, securities trading, and other financial transactions, and other payments or transfers involving the exchange of currency in cash and exceeding US$10,000 or its equivalent in domestic currency. International loans may be settled in the currency of the lender or in any other currency set by the lender.

| Controls on the use of domestic currency | No. |
| For current transactions and payments | No. |
| For capital transactions | No. |
| Transactions in capital and money market instruments | No. |
| Transactions in derivatives and other instruments | No. |
| Credit operations | No. |
| Use of foreign exchange among residents | No. |

**Payments arrangements** Yes. Public sector external debt contracts with bilateral and multilateral creditors include a payments arrangement specifying payment modalities and currency. There are no payments arrangements for private sector transactions.

| Bilateral payments arrangements | No. |
Operative: No.

Inoperative: No.

Regional arrangements: Yes. The Treaty on Payments and Securities Settlement Systems in Central America and the Dominican Republic remains in effect between the Dominican Republic, El Salvador, Guatemala, Honduras, and Nicaragua. Under the Payments Treaty, the Payments System Interconnection between Central America and the Dominican Republic is also in effect. In January 2013, the Treaty Establishing the Single Regional Payments Clearing System (SUCRE, Sistema Unitario de Compensación Regional de Pagos) went into effect in Nicaragua. Payments may take place through this system for trade operations with the other treaty signatories (Bolivia, Cuba, Ecuador, Venezuela).

Clearing agreements: No.

Barter agreements and open accounts: No.

Administration of control: Yes. Exchange operations between private agents are not restricted. Banks, financial enterprises, exchange bureaus, individuals, and legal entities may freely buy and sell to the public US dollars or any other freely convertible foreign currency for any amount or purpose. However, banks, financial enterprises, and exchange bureaus are subject to prior registration with the BCN as participants in the foreign exchange market for statistical purposes.

Payments arrears: Yes.

Official: Yes. Government and public sector arrears (most of which are attributable to the BCN) to bilateral creditors (non-Paris Club members) relate to debt subject to relief under the Heavily Indebted Poor Countries Initiative.

Private: Yes. Negotiations continue on one pending claim (for about US$25.9 million) with a creditor that did not participate in the external commercial debt buyback operation (about US$1.4 billion) launched in October 2007 and concluded in December 2008. This claim is also subject to relief under the Heavily Indebted Poor Countries Initiative.

Controls on trade in gold (coins and/or bullion): Yes.

On domestic ownership and/or trade: Yes. The Ministry of Development, Industry, and Commerce (MIFIC) and the National Administration of Geological Resources coordinate, manage, and supervise the mining, production, and exportation of gold. Individuals and legal entities may trade gold coins only for numismatic purposes.

On external trade: Yes. A permit from the MIFIC is required to export gold.

Controls on exports and imports of banknotes: Yes.

On exports: Yes.

Domestic currency: Yes. Exports equivalent to US$10,000 or more require a customs declaration. Outward transfers by financial institutions must comply with the regulations issued by the SIBOIF.

Foreign currency: Yes. Exports equivalent to US$10,000 or more require a customs declaration. Financial institutions may carry out export operations in compliance with provisions established by the Directorate General of Customs.

On imports: Yes.
### Domestic currency

| Yes. | Imports equivalent to US$10,000 or more require a customs declaration. Imports of domestic currency are carried out by the BCN. |

### Foreign currency

| Yes. | Imports equivalent to US$10,000 or more require a customs declaration. The BCN is the only entity authorized to import nonredeemable currencies. |

### References to legal instruments and hyperlinks

This information can be found at the AREAER ONLINE database: http://www.elibrary-areaer.imf.org/Pages/Reports.aspx.

### Resident Accounts

#### Foreign exchange accounts permitted

| Yes. |

#### Held domestically

| Yes. | Checking, savings, and term deposit accounts are available both in US dollars and in euros. There are no restrictions on transferring balances abroad, although a fee may be charged. |

#### Approval required

| No. | The opening of foreign exchange accounts in the national financial system must comply with SIBOIF standards. |

#### Held abroad

| Yes. | Foreign exchange accounts must comply with the standards for the prevention of laundering of money and other assets and commodities and the financing of terrorism and with other SIBOIF, BCN, and Financial Analysis Unit standards. |

#### Approval required

| No. |

#### Accounts in domestic currency held abroad

| No. |

#### Accounts in domestic currency convertible into foreign currency

| Yes. | Most accounts denominated in córdobas are indexed to the US dollar, except for current account deposits. Conversion may be effected through foreign exchange operations with financial institutions and exchange bureaus at buying and selling market rates. |

#### References to legal instruments and hyperlinks

This information can be found at the AREAER ONLINE database: http://www.elibrary-areaer.imf.org/Pages/Reports.aspx.

### Nonresident Accounts

#### Foreign exchange accounts permitted

| Yes. | Only foreigners with approved immigration status (for example, diplomatic missions and international organizations) may open these accounts. |

#### Approval required

| No. |

#### Domestic currency accounts

| Yes. | Only foreigners with approved immigration status may open these accounts. |

#### Convertible into foreign currency

| Yes. | Conversion may be effected through foreign exchange operations with financial institutions and exchange bureaus at buying and selling market rates. |

#### Approval required

| No. |

#### Blocked accounts

| No. |

#### References to legal instruments and hyperlinks

This information can be found at the AREAER ONLINE database: http://www.elibrary-areaer.imf.org/Pages/Reports.aspx.

### Imports and Import Payments

#### Foreign exchange budget

| No. |

#### Financing requirements for imports

| No. |

#### Minimum financing requirements

| No. |
### Advance payment requirements
No.

### Advance import deposits
No.

### Documentation requirements for release of foreign exchange for imports
Yes.

### Domiciliation requirements
No.

### Preshipment inspection
No.

### Letters of credit
No. LC requirements are regulated in contracts between importers and nonresident suppliers. Some import payments are made through certified drafts, but almost all are made through LCs.

### Import licenses used as exchange licenses
No.

### Other
Yes. All importers must register with the unified taxpayers’ register. They may obtain foreign currency in the foreign exchange market (financial institutions and exchange bureaus) without restriction. All purchases and sales equivalent to US$10,000 or more require a declaration indicating the origin and destination of the funds.

### Import licenses and other nontariff measures
Yes. Imports of some medications for human and veterinary use and of agrochemicals require a license. Canned food products require a permit from the Nicaragua Ministry of Health, MINSA.

### Positive list
No.

### Negative list
Yes. Certain categories of imports are banned.

### Open general licenses
No.

### Licenses with quotas
Yes. Import quotas under CAFTA, for the Dominican Republic, Panama, Taiwan Province of China, and WTO countries, and tariff quotas for supplies (yellow corn, chicken, corn syrup, milled rice, rice) are in effect.

### Other nontariff measures
Yes. Measures apply to certain imports, including those related to public health, national security, the environment, and national emergencies.

### Import taxes and/or tariffs
Yes. The import tariff regime is harmonized with that of the CACM. The maximum tariff rate, which applies to chicken legs and thighs, is 137%. There is a tariff elimination schedule under the Dominican Republic-CAFTA framework. A selective consumption tax is imposed on imports of sugar, alcoholic and nonalcoholic beverages, and tobacco cigarettes. Imports are subject to a VAT of 15%, with a few exceptions.

### Taxes collected through the exchange system
No.

### State import monopoly
No.

### References to legal instruments and hyperlinks
This information can be found at the AREAER ONLINE database: http://www.elibrary-areaer.imf.org/Pages/Reports.aspx.

Provisions Specific to the Financial Sector

Provisions specific to commercial banks and other credit institutions  Yes.
Borrowing abroad  Yes.  Institutions may borrow abroad, subject to compliance with regulations governing foreign indebtedness. Violation of these regulations is punishable by fines under the General Law on Banks, Nonbank Financial Institutions, and Financial Groups.
Maintenance of accounts abroad  No.  Standards on investments and deposits held abroad are issued by the SIBOIF.
Lending to nonresidents (financial or commercial credits)  No.
Lending locally in foreign exchange  No.  Banks may extend loans in general and collect them in the same currency in which they were granted.
Purchase of locally issued securities denominated in foreign exchange  Yes.  These instruments may be issued by the BCN, the government, or any private corporation registered on the Stock Exchange of Nicaragua.
Differential treatment of deposit accounts in foreign exchange  No.  Reserve requirements are the same as for deposits in national currency. Requirements must be fulfilled in the currency of the underlying deposits. The current reserve requirements are 10% of deposits on a daily basis, and 12% of average deposits on a fortnightly basis.

Liquid asset requirements  No.

NIGER

(Position as of December 31, 2018)

Status under IMF Articles of Agreement

Date of membership
April 24, 1963.

Article VIII
Yes. Date of acceptance: June 1, 1996.

Article XIV

Exchange Measures

Restrictions and/or multiple currency practices
No.

Exchange measures imposed for security reasons
Yes.

In accordance with IMF Executive Board Decision No. 144-(52/51)
No.

Other security restrictions
Yes.

No restrictions as reported in the latest IMF staff report as of December 31, 2018.

A regional framework was created within the WAEMU to fight transnational financial crime. It comprises the Uniform Law on the Fight Against Money Laundering, based on Directive No. 07/2002/CM/UEMOA, and the Uniform Law on the Fight Against the Financing of Terrorism in WAEMU member countries, based on Directive No. 04/2007/CM/UEMOA. In Niger, the uniform law was passed under Reference No. 2016-33 of October 31, 2016, on the fight against money laundering and financing of terrorism is a fusion of the law on the fight against money laundering, based on Directive No. 07/2002/CM/UEMOA, and Uniform Law on the Fight Against the Financing of Terrorism in WAEMU Member Countries, based on the Directive No. 04/2007/CM/UEMOA. The overarching instrument facilitates the implementation of UNSC resolutions based on a list of people and entities prepared by the Committee. Directive No. 02/2015/CM/UEMOA of July 2, 2015, of the WAEMU Council of Ministries on the fight against money laundering and the financing of terrorism in WAEMU member countries is in effect.

Exchange Arrangement

Currency
Yes. The currency of Niger is the CFA franc (XOF).

Other legal tender
No.

Exchange rate structure

Unitary
Yes.

Dual

Multiple

Classification

No separate legal tender

Currency board
The exchange rate arrangement of the WAEMU is a conventional peg. Niger participates in a currency union with seven other members of the WAEMU and has no separate legal tender. The Monetary Cooperation Agreement between the WAEMU member countries and France was concluded December 4, 1973. It was maintained after the French franc was replaced by the euro by the Council of the European Union decision of November 23, 1998. The Monetary Cooperation Agreement is based on three pillars: (1) a common issuing institution, (2) fixed parity with the euro, and (3) a guarantee of unlimited convertibility. In exchange for the unlimited convertibility of the CFA franc to euros, the WAEMU members are required to deposit 50% of their reserve holdings to the operations account with the French Treasury in accordance with the Amendment to the Operations Account Convention signed by France and the BCEAO September 20, 2005.

The CFA franc is officially pegged to the euro, the anchor currency, at the fixed rate of CFAF 655.957 per euro. Exchange rates for other currencies are derived from the rates for the currency concerned in the Paris foreign exchange market vis-à-vis the euro. The official rate is used for accounting and valuation. The Conference of Heads of State and Government may decide to amend the Monetary Cooperation Agreement between the WAMU member countries and France.

The monetary policy framework is an exchange rate anchor vis-à-vis the euro. The operational target of price stability is defined as an annual inflation rate in the WAEMU that falls within a band of ±1% around a central rate of 2%. The Harmonized Consumer Price Index is the benchmark rate to measure inflation.

Exchange tax  Yes.  A 0.6% commission rate is charged by registered intermediaries on transfers outside the WAEMU on behalf of their customers. This commission reverts to the National Treasury as tax revenue.

Exchange subsidy  No.

Foreign exchange market  Yes.  Authorized intermediaries (banks and nonelectronic exchange dealers) freely determine the buying and selling rates of foreign currencies, with the exception of the euro, which must be traded at the official fixed rate of CFAF 655.957 per euro. The commission on foreign exchange transactions may not exceed 2%.
Instruction No. 013-11-2015 on the terms and conditions for conducting rapid money transfers as a subagent within the WAEMU is in force.

Nonelectronic foreign currency transactions can be conducted by authorized intermediary banks and individuals or companies specifically authorized by decision of the minister of finance, with the consent of the BCEAO. Authorized intermediaries must comply with the provisions in effect on the financial conditions for engaging in nonelectronic foreign exchange transactions that involve foreign currencies and must issue a transaction slip for all transactions with a client. Moreover, to provide satisfactory information to clients, they are required to (1) permanently post at their windows the rates actually charged for the different currencies and (2) post notification that a transaction slip must be issued for all foreign exchange transactions on presentation of the requestor’s identity document.

In their operations with customers, authorized banks and OTC dealers freely determine the buying and selling rates of foreign currencies, with the exception of the euro, which is traded at the official fixed rate of CFAF 655.957 and may be subject to a maximum commission of 2.0%. At December 31, 2018, there were 12 active banks in the country and 65 licensed exchange entities in Niger, including 52 exchange bureaus. Authorized foreign exchange agents may purchase foreign currency from the BCEAO, which exchanges foreign currencies for CFA francs based on the euro exchange rate on international markets. These transactions are subject to a commission charge of 0.5%. Furthermore, only banks are authorized to hold accounts abroad and to carry out payments and transfers in foreign currency on behalf of their clients. Authorized OTC entities may only conduct sales and purchases of means of payment denominated in foreign currency.

Operated by the central bank Yes.

The BCEAO exchanges foreign currency for CFA francs at the rates published on the international markets, with the exception of the euro, which is traded at the official fixed rate of CFAF 655.957 per euro. The nonelectronic currency exchange windows are open to owners of accounts on the BCEAO books and to the general public. A commission of 0.5%, for purchases or sales, is charged on all transactions.

Allocation No.

Auction No.

Fixing No.

Interbank market Yes.

Transactions in CFA francs between authorized intermediaries are allowed. As of December 31, 2018, 8 out of 12 banks participated in the domestic currency interbank market. There is no regulated foreign currency interbank market in the WAEMU.

Over the counter Yes.

Brokerage No.

Market making No.

Forward exchange market Yes.

Residents of the WAEMU zone are permitted to conduct the following transactions on the foreign exchange derivatives market with authorized intermediary banks established in the WAMU or with foreign banks: outright forward foreign exchange contracts...
(over the counter), foreign exchange options, foreign exchange swaps, and cross-currency swaps. Transactions in foreign exchange options are limited to the following two types of transactions: options to buy or sell foreign currency, available to residents of the WAEMU zone to purchase from an authorized intermediary bank in the WAEMU or from a foreign bank. Authorized intermediary banks are required to simultaneously cover the exchange risk they incur with respect to derivative instruments traded with their customers. The underlying commercial and financial operations must relate to imports and exports of goods and services by a resident, foreign borrowing operations by a resident (drawings and repayments), or direct foreign investment in a resident company. All legitimate foreign currency needs are ultimately met by the BCEAO.

Official cover of forward operations No.

References to legal instruments and hyperlinks This information can be found at the AREAER ONLINE database: http://www.elibrary-areaer.imf.org/Pages/Reports.aspx.

Arrangements for Payments and Receipts

Prescription of currency requirements Yes. Niger is linked to the French Treasury via the BCEAO through an operations account for settlements with France, Monaco, the Comoros, and the CEMAC member countries, mainly in euros. Settlements with countries outside the WAEMU are made in foreign currencies, while between WAEMU countries is settled in CFA francs.

Controls on the use of domestic currency Yes. The CFA franc may not be used as payment for current international transactions and capital transactions with countries outside the WAEMU.

For current transactions and payments Yes. The CFA franc may not be used as payment for current international transactions with countries outside the WAEMU. However, the CFA franc is guaranteed unlimited convertibility through an open operating account with the French Treasury.

For capital transactions Yes. The CFA franc may not be used for the settlement of international capital transactions with non-WAEMU countries. Investments by residents of the WAEMU zone outside the WAEMU are subject to prior authorization by the minister of finance, and at least 75% of the investment must be financed through foreign borrowing.

Transactions in capital and money market instruments Yes. The CFA franc may not be used for the settlement of transactions in capital and money market instruments with non-WAEMU countries. Foreign investment by residents of the WAEMU zone is subject to authorization by the MOF. At least 75% of the investment must be financed through foreign borrowing. The interested party must request authorization through a letter designating the authorized intermediary to settle the payment. Purchases of foreign negotiable securities authorized by the regional capital markets authority to be issued or sold in WAEMU members do not require Ministry of Economy and Finance (MEF) authorization.

Transactions in derivatives and other instruments Yes. Residents of WAEMU member countries may engage in the following operations on derivatives and other instruments with accredited banks established in the WAEMU or foreign banks: (1) forward contract, foreign exchange swaps, and options. Operations on derivatives with foreign banks outside the WAEMU can only relate to the purchase or sale, by a resident, of foreign exchange other than the euro or another currency from the Franc Zone.

Credit operations Yes. Loans of any kind, CFA franc overdrafts, and, in general, any advances granted by authorized intermediaries to nonresidents of the WAEMU zone are subject to prior authorization by the Directorate of
External Financial Relations of the MOF, after BCEAO approval.

The CFA franc is the only legal tender, and residents of the WAEMU zone may not use foreign exchange for domestic transactions. Regulatory provisions require residents of the WAEMU zone to surrender to an intermediary bank all income or proceeds in foreign currency received abroad or paid by a nonresident.

Use of foreign exchange among residents Yes.

Payments arrangements Yes.

Bilateral payments arrangements No.

Operative No.

Inoperative No.

Regional arrangements Yes. An operations account is maintained with the French Treasury that links national operations accounts for WAEMU member countries. All purchases and sales of foreign currencies and euros against CFA francs are ultimately settled through a debit or a credit to the operations account.

Clearing agreements Yes. There is a multilateral clearing agreement between the WAEMU countries and the other ECOWAS member countries (Cabo Verde, The Gambia, Ghana, Guinea, Liberia, Nigeria, Sierra Leone) as part of the WAMA. All payments for current transactions between countries whose CBs are WAMA members may be made under the clearing agreement. However, this excludes transactions specified by the committee of governors of the CBs of ECOWAS members and payments for exports from one member country to another member country of finished products originating in countries whose CB or monetary authority is not a WAMA member.

Barter agreements and open accounts No.

Administration of control Yes. The institutional reform of the WAMU and the BCEAO establishes the following new basic instruments: (1) the WAMU Treaty, (2) the BCEAO Charter, (3) the Bank Regulation Act, and (4) the Convention governing the WAMU Banking Commission. All WAEMU residents are treated as residents of Niger for the purposes of preparing the external position of banks, domiciliation and repatriation of export revenue, issuance and sales of securities, gold imports and exports, investment and lending transactions, and physical exports of means of payment and securities by postal package or ordinary mail. However, for statistical purposes with regard to the balance of payments, all countries other than Niger are considered foreign countries. Moreover, all transfers with other countries must be made through registered intermediary banks, the postal service, or the BCEAO.

Payments arrears No.

Official No.

Private No.

Controls on trade in gold (coins and/or bullion) Yes.

On domestic ownership and/or trade No.

On external trade Yes. Gold imports and exports require MOF authorization, except (1) imports and exports by the Public Treasury and the BCEAO; (2) imports and exports of items with a low gold content (lined or plated objects); and (3) imports and exports, by travelers, of objects made of gold limited to a total weight of 500 grams.
Controls on exports and imports of banknotes

On exports

Yes.

**Domestic currency**

Yes. Travelers may freely export CFA franc banknotes from one WAEMU member country to another. Resident individuals (that is, from any WAEMU member country) and legal entities other than the BCEAO and its banking and commercial correspondents outside the WAEMU are prohibited from sending and receiving CFA franc banknotes issued by the BCEAO.

**Foreign currency**

Yes. The reexportation of foreign banknotes by nonresident travelers is permitted up to the equivalent of CFAF 5,00,000; the reexportation of foreign banknotes above this ceiling requires documentation demonstrating either the importation of the foreign banknotes or their purchase against other means of payment registered in the name of the traveler or through the use of nonresident deposit accounts in local banks. Residents of the WAEMU zone traveling to countries that are not WAEMU members are required to declare foreign currency on their person in excess the equivalent of CFAF 1 million. They are allowed to carry up to the equivalent of CFAF 2 million a person in banknotes not issued by the BCEAO. Larger amounts may be exported in the form of traveler’s checks, prepaid debit and payment cards, conventional debit and payment cards, or other means of payment. Foreign exchange allowances issued by authorized intermediaries in the form of traveler’s checks or prepaid debit and payment cards must be based on the need to cover customary, personal travel expenses, if they exceed the equivalent of CFAF 2 million a person. The issuance of foreign currency to resident travelers is subject to the presentation of travel documents and a valid passport or national identification card.

On imports

Yes.

**Domestic currency**

Yes. Residents of the WAEMU zone and nonresidents of the WAEMU zone may freely import domestic currency (CFA franc – XOF) banknotes. However, individuals and legal entities other than the BCEAO and its banking and commercial correspondents outside the WAEMU are prohibited from receiving banknotes in domestic currency (CFA franc – XOF). The redemption by the BCEAO of banknotes exported outside its area of issuance was suspended. Pursuant to this measure, registered intermediary banks are not authorized to receive shipments of CFA franc (XOF) banknotes from their correspondents located outside the WAEMU area.

**Foreign currency**

No. Residents of the WAEMU zone and nonresidents of the WAEMU zone may freely import CFA area banknotes denominated in foreign currencies. Such means of payment in excess of the equivalent of CFAF 1 million must be declared to customs. Nonresident travelers must declare to customs foreign currency exceeding the equivalent of CFAF 1 million on entry and exit. Regulatory provisions require residents to surrender to an authorized intermediary bank all revenue or proceeds in foreign currency collected abroad or received from a nonresident.

**References to legal instruments and hyperlinks**

This information can be found at the AREAER ONLINE database: http://www.elibrary-areaer.imf.org/Pages/Reports.aspx.

**Resident Accounts**

Foreign exchange accounts permitted

Yes.

Held domestically

Yes.
### Nonresident Accounts

| Approval required | Yes. | Foreign exchange accounts in currencies other than the euro may be opened domestically with MOF authorization after non-objection from the BCEAO. The authorization specifies the operations that may be credited or debited on each such an account. These accounts are valid for a renewable term of up to one year. They cannot be credited with deposits of CFA banknotes or by debiting a CFA franc account. On expiration of the term set in the authorization, accounts are closed unless a new authorization is obtained. |
| Held abroad | Yes. | Individuals who are residents of the WAEMU temporarily staying or traveling outside of WAEMU may open bank accounts outside the WAEMU to deposit foreign currency legally exported and any income acquired outside of the WAEMU during their travel or temporary stay outside of the WAEMU. These individuals are required to repatriate balances on such accounts within 30 days of return to the WAEMU. In any circumstance other than the foregoing, opening of foreign accounts by WAEMU residents is subject to MOF authorization by after non-objection from the BCEAO. The MOF authorization specifies the operations that may be credited or debited on such accounts. In the event of a failure to obtain a new MOF authorization, the accredited intermediary must request that the account be closed by the end of the term authorized and that any balance be repatriated to a WAEMU member country within eight days. |

| Accounts in domestic currency held abroad | No. |
| Accounts in domestic currency convertible into foreign currency | No. |

| References to legal instruments and hyperlinks | This information can be found at the AREAER ONLINE database: http://www.elibrary-areaer.imf.org/Pages/Reports.aspx. |

### Nonresident Accounts

| Approval required | Yes. | Nonresident accounts denominated in euros may be freely opened by intermediaries accredited in the WAEMU on justification by the beneficiaries of their status and residence outside of the WAEMU. Nonresident accounts denominated in foreign currency other than euros are subject to BCEAO authorization. Nonresident foreign currency accounts are valid for a renewable period of two years. In the event of a failure to obtain renewal (through a new BCEAO authorization for foreign exchange other than the euro), these accounts must be closed. The balances of these accounts may be freely transferred abroad after verification. |

| Domestic currency accounts | Yes. | Authorized intermediaries may open nonresident accounts in CFA francs and in euros, under their own responsibility, depending on the status and effective residence of the applicant. These accounts may be debited for spot purchases of foreign exchange. |
| Convertible into foreign currency | Yes. |

| Approval required | No. |
| Blocked accounts | No. |

| References to legal instruments and hyperlinks | This information can be found at the AREAER ONLINE database: http://www.elibrary-areaer.imf.org/Pages/Reports.aspx. |

Exports and Export Proceeds

This information can be found at the AREAER ONLINE database: http://www.elibrary-areaer.imf.org/Pages/Reports.aspx.
**Repatriation requirements**  Yes.  Resident economic operators are required to collect and repatriate within one month of the payment due date the entire amount of sales of goods abroad in the country of origin with the bank with which the transaction is domiciled. The payment due date is specified in the trade agreement and normally falls within a period of 120 days after the goods are dispatched.

**Surrender requirements**  Yes.  

*Surrender to the central bank*  Yes.  Export proceeds must be surrendered by ADs to the BCEAO within 30 days of the payment due date, which may not exceed 120 days after shipment of the goods. To cover its current foreign exchange needs, the domiciling bank may hold up to 20% of its export proceeds as own foreign exchange resources. However, it must ensure that its total foreign exchange resources to cover its requirements do not exceed 5% of total customer demand deposits; otherwise, the surplus must be surrendered to the BCEAO.

*Surrender to authorized dealers*  Yes.  Proceeds must be surrendered to authorized banks within 30 days of the payment due date. Authorized intermediaries must then surrender the foreign exchange to the BCEAO by transfer through the issuing bank. Export revenue may be surrendered to intermediaries other than banks with which the transaction is domiciled if authorized by the BCEAO. Sales of foreign exchange by exporters to ADs other than the domiciling bank are permitted, provided they furnish the domiciling bank with the documents required for the domiciliation file to be closed.

**Financing requirements**  No.  

**Documentation requirements**  Yes.  

Letters of credit  No.  

Guarantees  No.  

Domiciliation  Yes.  Export transactions of more than CFAF 10 million, except those between WAEMU countries, must be domiciled with an authorized intermediary bank.

Preshipment inspection  No.  

Other  Yes.  A customs declaration is required.

**Export licenses**  Yes.  

Without quotas  Yes.  Authorization is required for exports of gold.

With quotas  No.  

**Export taxes**  Yes.  

Collected through the exchange system  No.  

Other export taxes  Yes.  Taxes on exports and reexports are collected through customs. These include a statistical fee of 3% on exports and a special reexport tax of 10%, except for tobacco products, which are taxed at 5% for Nigeria-bound exports and 15% for exports to the rest of the world.

**Payments for Invisible Transactions and Current Transfers**

**Controls on these transfers**  Yes.  Payments and transfers for current transactions with WAEMU and non-WAEMU countries may be made freely through authorized
intermediaries. Transfers exceeding CFAF 5,00,000 are subject to
documentary requirements. Payments and receipts of foreign ships
on stopovers in WAEMU countries or by WAEMU ships abroad are
considered current transactions.

Proceeds from Invisible Transactions and Current Transfers

Repatriation requirements
Yes. Proceeds from invisible transactions with non-WAEMU countries must be repatriated. Residents of the WAEMU zone are required to surrender to an authorized intermediary all revenues and income in foreign currency collected abroad or received from a nonresident. Such operations must be conducted within no more than one month after the payment due date.

Surrender requirements
Yes.

Surrender to the central bank
Yes. Holdings exceeding the current needs of the credit institution must be surrendered to the BCEAO immediately. Credit institutions may hold net claims in foreign exchange with their banking correspondents outside the WAEMU to cover their current foreign exchange requirements in connection with customer transactions. In addition, ADs must surrender to the BCEAO, at its request, all BCEAO-issued currency and all or part of their assets in euros and in other foreign currencies.

Surrender to authorized dealers
Yes. All proceeds from invisible transactions with non-WAEMU countries must be surrendered to an AD within one month of the payment due date. Resident travelers must surrender to an authorized intermediary, within eight days of their arrival in Niger, foreign banknotes and other means of payment denominated in foreign currency worth more than the equivalent of CFAF 5,00,000.

Restrictions on use of funds
No.

References to legal instruments and hyperlinks
This information can be found at the AREAER ONLINE database: http://www.elibrary-areaer.imf.org/Pages/Reports.aspx.

Capital Transactions

Controls on capital transactions
Yes. Capital transactions between WAEMU countries are unrestricted. Outward capital transfers require MOF authorization, except (1) amortization of debts and repayment of short-term loans to finance industrial and commercial operations, (2) payments required on foreign exchange derivatives transactions or raw material or commodity derivatives transactions, and (3) transfers of the proceeds of liquidated investments or the sale of foreign securities by
nonresidents of the WAEMU zone. Capital receipts from non-WAEMU countries are generally permitted.

**Repatriation requirements**
Yes. Proceeds from the sale or liquidation of residents of the WAEMU zone’s investments abroad must be repatriated within one month through a registered intermediary, if the resident does not have a reinvestment authorization.

**Surrender requirements**
Yes.

**Surrender to the central bank**
Yes. Holdings exceeding the current needs of the credit institution must be surrendered to the BCEAO immediately. Credit institutions may hold net claims in foreign exchange with their banking correspondents outside the WAEMU to cover their current foreign exchange requirements in connection with customer transactions. In addition, ADs must surrender to the BCEAO, at its request, all BCEAO-issued currency and all or part of their assets in euros and in other foreign currencies.

**Surrender to authorized dealers**
Yes. Reinvestment of the proceeds from liquidation operations is subject to authorization by the minister of finance. In the absence of such authorization, these proceeds should be repatriated and surrendered within one month through an authorized intermediary. The surrender requirement applies to proceeds from all capital transactions.

**Controls on capital and money market instruments**
Yes. RCPSFM authorization is required for the following operations: (1) issuance or marketing of securities and real assets of foreign entities, (2) solicitation of investment, and (3) publicity or advertising for investment abroad. Securities and mutual funds issued outside the WAEMU by a private or public entity that is not a resident of a member country may not be listed on a regional securities exchange. The provisions are identical to those pertaining to shares and other securities of a participating nature. Soliciting the public of the WAEMU by nonresident entities is subject to authorization by the BCEAO in its capacity as the authority responsible for regulating the external financial relations of WAEMU countries. The Code of the Inter-African Conference on Insurance Markets (CIMA Code) requires insurance companies of each CIMA member country to invest domestically a minimum of 50% of resources collected locally, with the remainder to be invested only in other CIMA member countries.

**On capital market securities**
Yes. The Code of the Inter-African Conference on Insurance Markets (CIMA Code) requires insurance companies of each CIMA member country to invest domestically a minimum of 50% of resources collected locally, with the remainder to be invested only in other CIMA member countries.

**Shares or other securities of a participating nature**

**Purchase locally by nonresidents**
No. Purchases in the country by nonresidents of the WAEMU zone are unrestricted. However, these purchases are subject to declaration to the MOF and the BCEAO for statistical purposes.

**Sale or issue locally by nonresidents**
Yes. The issuance of securities and the sale of corporate or foreign securities by nonresidents of the WAEMU zone are subject to authorization from RCPSFM (Conseil Regional de l’Epargne Publique – CREPMF in French), with the authorization of the BCEAO acting in its capacity as the authority in charge of regulating external financial relations. There are no controls on the sale of securities resulting from divestiture of an investment in the form of a transfer between a nonresident and a resident, but such sales are subject to the regulations governing the financial settlement of the operation. Settlement of securities transactions by transfer abroad or by credit to a nonresident account requires submission of an exchange authorization to the MOF for approval, accompanied by...
<p>| Purchase abroad by residents | Yes. | The purchase of foreign securities by residents of the WAEMU zone and the transfer abroad of funds for this purpose are subject to MOF authorization. Authorization is not required for purchases of foreign securities whose issuance or offering for sale in the WAEMU countries has been authorized by the RCPSFM. The Code of the Inter-African Conference on Insurance Markets (CIMA Code) requires insurance companies of each CIMA member country to invest domestically a minimum of 50% of resources collected locally, with the remainder to be invested only in other CIMA member countries. |
| Sale or issue abroad by residents | No. | Residents of the WAEMU zone may sell local corporate securities abroad. If these operations result in foreign control of domestic establishments, foreign investors are required to make a prior declaration to the MOF. The sale of securities to liquidate an investment abroad must be declared to the MOF for statistical purposes. Residents of the WAEMU zone may also issue securities abroad, except for those constituting a loan, provided all issues are declared to the Directorate of External Finance and the BCEAO for statistical purposes. |
| Bonds or other debt securities | Yes. | The regulations governing shares or other securities of a participating nature apply. |
| Purchase locally by nonresidents | No. | These purchases are subject to declaration to the MOF for statistical purposes. There are no controls on the sale of securities resulting from the divestiture of investment in the form of a transfer between a nonresident and a resident, but such sales are subject to the regulations governing the financial settlement of the operation. There is no minimum holding period. |
| Sale or issue locally by nonresidents | Yes. | The issuance of securities and the sale of corporate or foreign securities by nonresidents of the WAEMU zone are subject to RCPSFM authorization. There are no controls on the sale of securities resulting from divestiture of an investment in the form of a transfer between a nonresident and a resident, but such sales are subject to the regulations governing the financial settlement of the operation. Settlement of securities transactions by transfer abroad or by credit to a nonresident account requires submission of an exchange authorization to the MOF for approval, accompanied by supporting documentation. |
| Purchase abroad by residents | Yes. | The purchase of foreign securities by residents of the WAEMU zone and the transfer abroad of funds for this purpose are subject to MOF authorization and must be at least 75% financed with foreign borrowing. Authorization is not required for purchases of foreign securities whose issuance or offering for sale in WAEMU countries is authorized by the RCPSFM. The Code of the Inter-African Conference on Insurance Markets (CIMA Code) requires insurance companies of each CIMA member country to invest domestically a minimum of 50% of resources collected locally, with the remainder to be invested only in other CIMA member countries. |
| Sale or issue abroad by residents | No. | Residents of the WAEMU zone may sell local corporate securities abroad. If these operations result in foreign control of domestic entities, foreign investors are required to make a declaration to the MOF. The sale of securities for liquidation of an investment abroad must be declared to the MOF for statistical purposes. Issuance of securities constituting a loan by residents of the WAEMU zone to nonresidents of the WAEMU zone must be made through an authorized bank and must be reported to the MOF for statistical purposes. |
| On money market instruments | Yes. | The regulations governing shares or other securities of a participating nature apply. |</p>

©International Monetary Fund. Not for Redistribution
If these operations result in foreign control of domestic establishments, foreign investors are required to make a declaration to the MOF. The sale of securities for liquidation of an investment abroad must be declared to the MOF for statistical purposes. Issuance of securities constituting a loan by residents of the WAEMU zone to nonresidents of the WAEMU zone must be made through an authorized bank and must be reported to the MOF for statistical purposes.

Residents of the WAEMU zone may hedge risk using foreign exchange derivatives for the following commercial and financial operations: (1) imports and exports of goods and services; (2) foreign borrowing operations by a resident (drawings and repayments); and (3) negotiation of FDI in a resident enterprise.

Residents of the WAEMU zone may hedge risk using derivatives. They must be backed by the residents of the WAEMU zone’s imports or exports of raw materials and commodities. Residents of the WAEMU zone are not authorized to purchase raw materials or commodities on foreign markets for delivery within the framework of a derivatives transaction in raw materials or commodities.

The purchase of derivatives by nonresidents of the WAEMU zone on the domestic market is treated as a loan contracted by a resident with a nonresident. As such, it is permitted. The purchase must be executed through an authorized intermediary and must be reported to the MOF and the BCEAO for statistical purposes.

These instruments are subject to general regulations that apply to securities and investments. Residents of the WAEMU zone are permitted to purchase foreign exchange derivatives from nonresidents of the WAEMU zone.

These instruments are subject to general regulations that apply to securities and investments. Residents of the WAEMU zone may freely purchase abroad or from nonresidents of the WAEMU zone call or put options on primary commodities or securities transactions. Residents of the WAEMU zone may not purchase commodities or securities in foreign markets to be delivered in complying with a put option contract. Put options must be placed on assets that can be acquired locally by the resident seller for delivery abroad in execution of the contract. Residents of the WAEMU zone are permitted to purchase foreign currency purchase options on the foreign exchange derivatives market from an authorized intermediary bank established in the WAMU or from a foreign credit institution.

Residents of the WAEMU zone are permitted to purchase foreign currency sell options on the foreign exchange derivatives market from an authorized intermediary bank established in the WAMU or from a foreign (that is, nonresident of WAEMU) credit institution.

Borrowing by residents of the WAEMU zone from nonresidents of the WAEMU zone must be conducted through authorized intermediaries (whenever borrowed funds are made available for use in the country), unless otherwise indicated by the MOF.

The date on which payment falls due is specified in the contract and should in principle be no later than 120 days after the date of shipment.

There are no controls, and repayments of commercial credits are generally conducted without prior authorization, subject to the presentation of documents attesting to the validity of the commercial operation or of the services rendered, as well as the payment due date, to the licensed intermediary bank responsible for handling the repayment.
Financial credits

By residents to nonresidents: Yes. These credits require MOF approval. Outward transfers to service such facilities require an exchange authorization, subject to the approval of the MOF and substantiated by documentation.

To residents from nonresidents: No. There are no controls on these credits, but they must be reported for statistical purposes to the MOF and the BCEAO when granted and when repaid, except for the following credits: (1) mail overdrafts: CFA franc overdrafts for durations not to exceed the normal mail delivery times; (2) LCs available by acceptance, issued to exporters at the request of the authorized intermediaries’ foreign correspondent banks; and (3) credit provided pursuant to a financial agreement between a WAEMU member country and a foreign government or pursuant to an interbank arrangement approved by the Directorate of External Finance. The necessary funds must be transferred from abroad through an authorized agent. There are no controls on repayment of loans, provided the authorized agent handling the settlement is furnished with documentation attesting to the validity of the transaction. Borrowing abroad is unrestricted.

Guarantees, sureties, and financial backup facilities

By residents to nonresidents: Yes. The granting of guarantees and sureties is subject to MOF approval. Transfers abroad of funds to service these facilities require the issuance of an exchange authorization, subject to MOF approval, and the submission of supporting documents.

To residents from nonresidents: No. These facilities may be granted freely, although the funds required for servicing them must be transferred abroad by an authorized bank. If, however, these transactions take place between a resident direct investment company and its parent company located abroad, they are considered to be direct investments and therefore require prior declaration to the MEF and the BCEAO for statistical purposes.

Controls on direct investment: Yes. Direct investment implies control of a company or enterprise in excess of 10% of the capital of the company (such as shares listed on a stock exchange). All investment outside of WAEMU by residents of the WAEMU, including investment through foreign companies under the direct or indirect control of residents of the WAEMU and investment by foreign branches or subsidiaries of companies established in a WAEMU member country, requires MOF authorization.

Outward direct investment: Yes. All investment abroad by residents of the WAEMU zone is subject to MOF authorization. At least 75% of such investment must be financed by foreign loans. Authorization is not required for purchases of foreign securities whose issuance or offering for sale in the WAEMU countries has been authorized by the RCPSFM (Conseil Regional de l’Epargne Publique et des Marches Financiers – CREPMF in French).

Inward direct investment: Yes. FDI, including by resident companies that are directly or indirectly under foreign control and by branches or subsidiaries of foreign companies, must be reported to the MOF for statistical purposes. An investment is not considered a direct investment, unless it exceeds 10% of the capital of the company.

Controls on liquidation of direct investment: No. The liquidation of investments abroad must be reported to the MOF and the CB for statistical purposes. Reinvestment of the proceeds of the liquidation is subject to MOF authorization. If reinvestment is not authorized, the liquidation proceeds must be repatriated within one month through an authorized intermediary. The sale of foreign investments by nonresidents of the WAEMU zone is unrestricted, but must be reported to the MOF and the CB for statistical purposes.
Controls on real estate transactions | Yes.
---|---
**Purchase abroad by residents** | Yes. These purchases require MOF authorization.
**Purchase locally by nonresidents** | No. Purchases for purposes other than direct investment in a business, branch, or company are allowed. They require a declaration to the MOF for statistical purposes.
**Sale locally by nonresidents** | No. Sales by nonresidents of the WAEMU zone to residents of the WAEMU zone require the submission of supporting documentation to the authorized intermediary that handles the settlement and must be declared to the MOF and the BCEAO for statistical purposes.
Controls on personal capital transactions | Yes. Personal capital transactions between residents of the WAEMU zone and nonresidents of the WAEMU zone must be made through the BCEAO, the postal administration, or an authorized intermediary bank, unless authorization is obtained from the MOF.
**Loans** | Yes. The regulations governing securities and investments apply.
By residents to nonresidents | Yes. These transactions require MOF authorization. The individuals concerned may not engage in such operations as a professional occupation without first being licensed and included on the list of approved financial institutions.
To residents from nonresidents | No. These transactions may be made freely but are subject to declaration to the MOF and the BCEAO for statistical purposes when disbursed and when repaid.
**Gifts, endowments, inheritances, and legacies** | Yes.
By residents to nonresidents | Yes. Inheritances and dowries are generally allowed. Gifts and endowments, however, are subject to MOF and BCEAO authorization. These transactions must be conducted through an authorized intermediary and comply with the relevant anti-money-laundering and terrorism financing provisions.
To residents from nonresidents | No. These transactions do not require authorization but are subject to declaration to the minister of finance and the BCEAO for statistical purposes.
**Settlement of debts abroad by immigrants** | Yes. Immigrants with resident status must obtain MOF authorization to settle debts contracted abroad while they were nonresidents of the WAEMU zone.
**Transfer of assets** | Yes.
Transfer abroad by emigrants | Yes. These transactions are subject to MOF authorization if the value exceeds CFAF 5,00,000 a person. There are no restrictions on transfers of amounts below this threshold.
Transfer into the country by immigrants | Yes. Foreign accounts (in foreign currency or CFA francs) of nonresidents of the WAEMU zone who become residents of the WAEMU zone must be closed. However, these residents of the WAEMU zone may maintain abroad bank accounts opened and financial assets acquired while they were nonresidents of the WAEMU zone. New transfers to these accounts require MOF approval.
**Transfer of gambling and prize earnings** | Yes. These transfers are conducted free through authorized intermediaries, subject to the presentation of supporting documents and compliance with the relevant provisions on combating money laundering and financing of terrorism.
**References to legal instruments and hyperlinks** | Yes. This information can be found at the AREAER ONLINE database: http://www.elibrary-areaer.imf.org/Pages/Reports.aspx.

---

**Provisions Specific to the Financial Sector**

**Provisions specific to commercial banks and other credit institutions** | Yes. The Uniform Law on the Treatment of Dormant Accounts on the Books of Financial Agencies of the Member States of the WAMU by
the Council of Ministers of the Union took effect September 28, 2012. Decision No. CM/UMOA/023/2012 sets the deadline (December 31, 2013) for including this law in the domestic legislation of the WAMU members. These procedures were included in Niger’s legislation by law on October 17, 2014, and adopted by the National Assembly on October 23, 2014.

Borrowing abroad is unrestricted. For statistical purposes, these transactions must be declared to the MOF and the BCEAO when granted and when repaid, except for the following credits: (1) mail overdrafts: CFA franc overdrafts for durations not to exceed the normal mail delivery times; (2) LCs available by acceptance, issued to exporters at the request of the authorized intermediaries’ foreign correspondent banks; and (3) credit provided pursuant to a financial agreement between a WAEMU member country and a foreign government or pursuant to an interbank arrangement approved by the Directorate of External Finance.

Banks and financial institutions are authorized to open accounts with their correspondent banks for settling transactions for their account or the accounts of their customers. However, banks are not authorized to hold in these accounts amounts that exceed their current requirements. In accordance with Regulation No. 09/2010/CM/UEMOA on the External Financial Relations of the WAEMU Member States, to cover their foreign currency requirements, banks are authorized to hold the following in banking institutions located in non-WAEMU countries: (1) demand deposits not exceeding the total amount on their books of import payments domiciled by clients, payable within a period of eight days, and (2) demand deposits not exceeding the balance of their open foreign accounts in foreign currencies other than euros and their open resident accounts in foreign currency. The total amount of these assets may not exceed 5% of the clients’ outstanding demand deposits. Assets in excess of foreign currency requirements must be surrendered to the BCEAO.

Commercial lending is allowed. Financial credits are subject to MOF authorization following BCEAO approval.

No explicit regulations exist regarding these transactions, but MOF authorization is required with BCEAO approval.

These purchases require MOF authorization if their issuance was not approved by the RCPSFM.

A reserve requirement of 3% applies to WAEMU banks. Demand deposits, other deposit accounts, and loan accounts are included in the base for the calculation of the required reserves. The base for the calculation of the required reserves to be held with the CB includes customer foreign currency deposits.

According to the prudential framework applicable to WAEMU banks and financial institutions that perform banking operations, the minimum standard liquid asset requirement is 75%.

The wear rate in WAEMU member countries is set at 15% for banks and at 24% for decentralized financial systems.

Loans of any kind, CFA franc overdrafts, and, in general, any advances granted to nonresidents of the WAEMU zone are subject to MOF authorization, after BCEAO approval. These claims are included in the external position of banks and financial institutions, which is subject to special monitoring.

Banking regulations make no distinction among resident deposit accounts, nonresident deposit accounts, and foreign deposit accounts.
Reserve requirements No.

Liquid asset requirements No.

Interest rate controls No.

Credit controls Yes. Any overdraft or advance granted to a nonresident requires MOF authorization with BCEAO approval.

Investment regulations Yes. The regulations governing direct investment apply.

Abroad by banks Yes. All investment abroad by residents of the WAEMU zone is subject to MOF authorization. At least 75% of such investment must be financed by foreign loans. Authorization is not required for the purchase of foreign securities whose issuance or offering for sale in the WAEMU countries has been authorized by the RCPSFM (Conseil Régional de l’Epargne Publique et des Marchés Financiers – CREPMF in French).

In banks by nonresidents Yes. These transactions may, depending on their volume, be subject to authorization by the minister of finance. The banking law stipulates that investment by any person in a bank that would have the effect of changing the minority and/or majority voting rights requires authorization by the minister of finance.

Open foreign exchange position limits Yes. No prudential ratios apply. Because of the surrender requirement, banks may not maintain open foreign exchange positions. However, the BCEAO grants individual dispensations that allow banks to keep working balances in their correspondent accounts to assist in the smooth completion of international payments, up to the equivalent of 5% of total customer demand deposits. However, to cover their foreign currency requirements, banks are authorized to hold in non-WAEMU zone banks assets allocated to the execution of current customer operations, listed as follows: (1) demand deposits not exceeding the total amount on their books of import payments domiciled by clients, payable within a period of eight days, and (2) demand deposits not exceeding the balance of their open foreign accounts in foreign currencies other than euros and their open resident accounts in foreign currency.

On resident assets and liabilities Yes. No prudential ratios apply. Because of the surrender requirement, banks may not maintain open foreign exchange positions. However, the BCEAO grants individual dispensations that allow banks to keep working balances in their correspondent accounts to assist in the smooth completion of international payments. To cover their foreign currency requirements, banks are authorized to hold deposits in banking institutions located in non-WAEMU countries as follows: (1) demand deposits not exceeding the total amount on their books of import payments domiciled by clients, payable within a period of eight days, and (2) demand deposits not exceeding the balance of their open foreign accounts in foreign currencies other than euros and their open resident accounts in foreign currency.

On nonresident assets and liabilities Yes. No prudential ratios apply. Because of the surrender requirement, banks may not maintain open foreign exchange positions. However, the BCEAO grants individual dispensations that allow banks to keep working balances in their correspondent accounts to assist in the smooth completion of international payments. To cover their foreign currency requirements, banks are authorized to hold deposits in banking institutions located in non-WAEMU countries as follows: (1) demand deposits not exceeding the total amount on their books of import payments domiciled by clients, payable within a period of eight days, and (2) demand deposits not exceeding the balance of their open foreign accounts in foreign currencies other than euros and their open resident accounts in foreign currency.

Their open resident accounts in foreign currency.

Controls are imposed by the CIMA Code.

The Code of the Inter-African Conference on Insurance Markets (CIMA Code) requires insurance companies of each CIMA member country to invest domestically a minimum of 50% of resources collected locally, with the remainder to be invested only in other CIMA member countries.

The Code of the Inter-African Conference on Insurance Markets (CIMA Code) requires insurance companies of each CIMA member country to invest domestically a minimum of 50% of resources collected locally, with the remainder to be invested only in other CIMA member countries.

The Code of the Inter-African Conference on Insurance Markets (CIMA Code) requires insurance companies of each CIMA member country to invest domestically a minimum of 50% of resources collected locally, with the remainder to be invested only in other CIMA member countries.

The Code of the Inter-African Conference on Insurance Markets (CIMA Code) requires insurance companies of each CIMA member country to invest domestically a minimum of 50% of resources collected locally, with the remainder to be invested only in other CIMA member countries.

The CIMA Code specifies that liabilities in a given currency must be covered by assets denominated in the same currency.

The issuance, presentation, and floating of securities of any kind by foreign governments, local authorities, foreign companies, or international institutions are subject to authorization by the regional capital markets authority (CREPMF).

With the exception of foreign securities issued or sold with CREPMF authorization in WAEMU member countries, all investment abroad by residents of the WAEMU zone is subject to MEF authorization and must be at least 75% financed with foreign borrowing.

The issuance, presentation, and floating of securities of any kind from foreign governments, local authorities, foreign companies, or international institutions are subject to CREPMF authorization.

With the exception of foreign securities issued or sold in WAEMU member countries with CREPMF authorization, all investment abroad by WAEMU residents is subject to MEF authorization and must be at least 75% financed with foreign borrowing.

**Changes during 2018 and 2019**

No significant changes occurred in the exchange and trade system.
NIGERIA

(Position as of March 31, 2019)

Status under IMF Articles of Agreement

Date of membership March 30, 1961.

Article VIII Yes.

Article XIV Yes.

Exchange Measures

Restrictions and/or multiple currency practices Yes. The IMF staff report for the 2018 Article IV Consultation with Nigeria states that, as of February 15, 2018, Nigeria maintained the following exchange restrictions subject to IMF approval under Article VIII, Section 2(a), of the IMF’s Articles of Agreement: (1) an exchange restriction arising from the prohibition to access foreign exchange at the Nigerian foreign exchange markets for the payment of imports of 40 categories of items; (2) an exchange restriction arising from the rationing of foreign exchange in the Central Bank of Nigeria’s (CBN’s) IFEM and Secondary Market Intervention Sale (SMIS) windows, and its allocation based on the CBN’s determination of priority categories of transactions; and (3) an exchange restriction arising from existing limits on the amounts of foreign exchange available when traveling abroad (business travel allowance (BTA)/personal travel allowances (PTAs)), which cannot be exceeded even on verification of the bona fide nature of the transaction. In addition, Nigeria maintains the following MCPs subject to IMF approval under Article VIII, Sections 2(a) and 3, of the IMF’s Articles of Agreement: (1) an MCP arising from the intervention practice of the CBN that results in the establishment of an official exchange rate for use in all official transactions, which in practice differs by more than 2% from the rate used by commercial banks in the CBN foreign exchange windows (SMIS, SME, IFEX, and Invisibles) and by money transfer operators; (2) an MCP arising from the large spread between the official exchange rate and the rates in the parallel market, caused by the CBN’s limitation on the availability of foreign exchange which channels current international transactions to such market; and (3) an MCP arising from the potential spread of more than 2% in the exchange rates at which the CBN sells foreign exchange to successful auction bidders in the SMIS window. (Country Report No. 18/63)

Exchange measures imposed for security reasons No.

In accordance with IMF Executive Board Decision No. 144-(52/51) No.

Other security restrictions No.

Exchange Arrangement

Currency Yes. The currency of Nigeria is the Nigerian naira.

Other legal tender No.
Exchange rate structure

Unitary

Dual

Multiple 

Yes. There are multiple exchange rates: (1) In January 2019, the exchange rate at the CBN’s official window (IFEM) was N 306/$ (used mainly for petroleum imports and in limited predetermined quantities for some banks). (2) In January 2019, the Investors & Exporters’ window (IFEX) exchange rate was around N 360/$–N 365/$. (3) In January 2019, the foreign exchange rate at which international money transfer operators (IMTOs) transact was approximately N 360/$. (4) In January 2019, the bureau de change (BDC) rate was around N 360/$. (5) In January 2019, the approved rate for invisibles (PTA/BTA transactions) was around N 360/$. (6) In January 2019, the exchange rate through the SME window for small and medium enterprises was around N 360/$. (7) In January 2019, exchange rates on the SMIS wholesale and retail sales by the CBN were around N 330/$–N 345/$.

Classification

No separate legal tender

Currency board

Conventional peg

Stabilized arrangement  

Yes. The de jure exchange rate arrangement is floating. The CBN explicitly aims to maintain an exchange rate principally driven by market forces, but intervenes to reduce volatility and to counteract speculative attacks on the national currency. The de facto exchange rate arrangement is classified as stabilized.

Crawling peg

Crawl-like arrangement

Pegged exchange rate within horizontal bands

Other managed arrangement

Floating

Free floating

Official exchange rate  

Yes. The official exchange rate is determined by the market. The official exchange rate is the rate at which the interbank market closes. Interbank is the main market in which the banks trade among themselves. The official exchange rate is the rate used for tax and duty payments and other accounting purposes.

Monetary policy framework

Exchange rate anchor

U.S. dollar

Euro

Composite
Monetary aggregate target: Yes. Monetary policy targets broad money (M2) via a policy interest rate corridor. The monetary policy rate (MPR) was 14% and reduced by the CBN to 13.5% effective March 26, 2019. The MPC set the asymmetric corridor for the CBN’s lending and deposit facilities at +200 basis points and −500 basis points and maintained the cash reserve requirements (CRR) used to manage liquidity to 22.5%.
Publication of inflation forecasts

- Foreign exchange purchased from the CBN and not used must be returned to the CBN within 72 hours. Unused foreign exchange acquired from sources other than the CBN is exempt from mandatory sale and may be used for interbank transactions. ADs are not allowed to have a bid-ask spread exceeding 50 kobo. The commission charged by the ADs is guided by the provisions of the Guide to Bank Charges, which is reviewed periodically by the CBN. According to the CBN Guide to Bank Charges (May 1, 2017), the commissions are:
  1. 1% of the value involved—flat (or as determined from time to time by the CBN) for purchases from the CBN; and
  2. negotiable subject to a maximum spread of 50 kobo per US dollar for interbank purchases. Collection charge on checks is 1% of check value or US $10, whichever is lower. The rate for spot purchases from customers is the interbank rate.

Spot exchange market | Yes. |

- There are different exchange rates used for different transactions:
  1. In January 2019, the exchange rate at the CBN’s official window (IFEM) was N 306/$ (used mainly for petroleum imports and in limited predetermined quantities for some banks).
  2. In January 2019, the Investors & Exporters’ window (IFEX) exchange rate was around N 360/$–N 365/$.
  3. In January 2019, the foreign exchange rate at which IMTOs transact was approximately N 360/$.
  4. In January 2019, the BDC rate was around N 360/$.
  5. In January 2019, the approved rate for invisibles (PTA/BTA transactions) was around N 360/$.
  6. In January 2019, the exchange rate through the SME window (where the CBN intervenes to ensure payment for eligible imports by small and medium enterprises with a limit of US$20,000 a customer a quarter) was around N 360/$.
  7. In January 2019, exchange rates on the SMIS wholesale and retail sales by the CBN were around N 330/$–N 345/$.

The CBN established a single market structure through the autonomous/interbank market, that is, the interbank foreign exchange market with the CBN participating in the foreign exchange market through interventions directly in the interbank market or through “SMISs.” It is used by banks to transact among themselves for proceeds from export and personal transfers. This window is to provide liquidity to investors and exporters and was a bid to boost liquidity in the system and reduce the corridor between the official and BDC market.

Approved IMTOs are directed to sell foreign exchange sourced from remittances to their approved banks and CBN. The banks are expected to monetize 25% of the proceeds for their use to fund any eligible transaction, while the 75% is to be sold to and monetized by the CBN for sale to BDCs. IMTO operators cannot sell foreign exchange to BDCs directly.

The market participants in the foreign exchange market are as follows: banks (commercial, merchant, and non-interest banks) and BDCs licensed by the CBN. As of May 31, 2018, the number of banks was 27, while BDCs was 4,106.

Exchange bureaus (BDC) may only deal in banknotes and coins, buying and selling traveler’s checks, and other business as approved by the CBN. They may not engage in foreign business or foreign correspondence relationships, or directly or indirectly in any form of
outward or inward foreign currency transfers or credit card services. BDCs are not allowed to maintain accounts abroad.

Operated by the central bank  Yes. The CBN sells foreign exchange to the IFEM. Other windows are SMIS, IFEX SME, and BDC.

Foreign exchange standing facility  No.

Allocation  Yes. The CBN sells foreign exchange to the IFEM according to the availability and demand of foreign exchange and documented needs of customers of the IFEM participants. Funds not used by banks within 72 hours of the value date must be returned to the CBN for repurchase at the CBN buying rate.

Auction  Yes. The CBN sells foreign exchange at the SMISs, both wholesale and retail. SMISs are operated via the multiple price book building process using the FMDQ-Thomson Reuters foreign exchange auction system. There is no predetermined spread in SMIS. There is a limit of 1% of the total on offer to single customers on the SMIS retail. All sales to end users must be trade backed. Only foreign exchange primary dealers can participate in the auction.

Fixing  No.

Interbank market  Yes. The interbank rate is determined among interbank players; the CBN discourages speculative bids, and the rate as of June 30, 2019, was N325/$. ADs’ bid-ask spread may not exceed 50 kobo. The commission is subject to the limit specified in the Guide to Bank Charges. Funds purchased from the CBN but not used by banks within 72 hours of the value date are to be returned to the CBN for repurchase at the CBN buying rate. As of December 31, 2018, the interbank had 28 institutions participating with licenses acquired from the CBN.

Over the counter  Yes.

Brokerage  No.

Market making  No.

Forward exchange market  Yes. Forward exchange transactions in the interbank market are permitted among ADs and between dealers and their customers, subject to prudential limits and provided the transactions relate to trade in goods and services. The CBN engages in foreign exchange forward transactions with the aim of transforming and deepening the Nigerian financial markets. These transactions take place with ADs in the market for the benefit of foreign exchange users in the economy.

Official cover of forward operations  No.

References to legal instruments and hyperlinks  This information can be found at the AREAER ONLINE database: http://www.elibrary-areaer.imf.org/Pages/Reports.aspx.

Arrangements for Payments and Receipts

Prescription of currency requirements  Yes. Domestic currency may not be used to settle international current or capital transactions.

Controls on the use of domestic currency  Yes. All international payments are subject to required and regulated documentation as specified in the foreign exchange manual.
Domestic currency may not be used to settle international current or capital transactions.

For capital transactions

Yes. Official funds may not be used for capital account transactions. Domestic currency may not be used to settle international current or capital transactions.

Transactions in capital and money market instruments

Yes. Domestic currency may not be used to settle international current or capital transactions.

Transactions in derivatives and other instruments

Yes. Domestic currency may not be used to settle international current or capital transactions.

Credit operations

Yes. Domestic currency may not be used to settle international current or capital transactions.

Use of foreign exchange among residents

Yes. The currency for all local transactions is the naira. Circular BSD/DIR/GEN/LAB/08/013 prohibits the general public from pricing or denoting the cost of any product or service in any foreign currency.

Payments arrangements

Yes.

Bilateral payments arrangements

Yes.

Operative

Yes. Arrangement with China to use yuan renminbi for trade settlements was concluded April 27, 2018.

Inoperative

No.

Regional arrangements

No.

Clearing agreements

No.

Barter agreements and open accounts

No.

Administration of control

Yes. The CBN formulates basic foreign exchange policy and issues directives as appropriate for the operation of the foreign exchange market. The CBN approves and revokes the appointment of ADs and authorized buyers of foreign currency and supervises and monitors the operations of the interbank market and exchange bureaus. The CBN also licenses and regulates the exchange bureaus.

Payments arrears

No.

Official

No.

Private

No.

Controls on trade in gold (coins and/or bullion)

Yes.

On domestic ownership and/or trade

Yes. Residents other than the monetary authorities, producers of gold, and authorized industrial users must have special permission to hold or acquire gold in any form other than jewelry or coins, at home or abroad.

On external trade

Yes. The importation and exportation of gold in any form other than jewelry require specific licenses issued by the Federal Ministry of Finance (FMF).

Controls on exports and imports of banknotes

No. There are no limits or requirements for exports and imports of domestic or foreign currency beyond the declaration requirement.

On exports

No.

Domestic currency

No. Exports of naira notes and coins by travelers, including residents, exceeding effective August 1, 2018, N 100,000 (previously, N 20,000) must be declared.

Foreign currency

No. Exports exceeding US$10,000 or its equivalent must be declared.
### Imports and Import Payments

#### Domestic currency
- **Imports of naira notes and coins by travelers, including residents, exceeding effective August 1, 2018, N 100,000 (previously, N, 20,000) must be declared.**

#### Foreign currency
- **Imports of amounts exceeding US$10,000 or its equivalent must be declared.**

#### Resident Accounts
- **Foreign exchange accounts permitted**: Yes.
- **Held domestically**: Yes.
- **Approval required**: No.
- **Held abroad**: Yes.
- **Approval required**: No.
- **Accounts in domestic currency held abroad**: No.
- **Accounts in domestic currency convertible into foreign currency**: Yes. Conversion is permitted only of balances remaining after completion of a contract or of the account holder’s business in Nigeria. Conversion is permitted for outward transfers for dividends, profits, interest, and other income on foreign investment with evidence of a Certificate of Capital Importation (CCI). All payment by residents abroad should be subject to appropriate documentations.

#### Nonresident Accounts
- **Foreign exchange accounts permitted**: Yes.
- **Domestic currency accounts**: Yes. Funds derived from local sources may be deposited in nonresident accounts.
- **Convertible into foreign currency**: Yes. Nonresident accounts may be credited with proceeds from services rendered locally, and remittances may be effected subject to adequate documentation. Nonresident can convert the balances in the accounts to foreign currency for transfer abroad.

</tbody>
</table>

### Financing requirements for imports

<table>
<thead>
<tr>
<th>Requirement</th>
<th>Status</th>
</tr>
</thead>
<tbody>
<tr>
<td>Yes.</td>
<td></td>
</tr>
</tbody>
</table>

#### Minimum financing requirements

Yes.

Foreign exchange may not be sold in the foreign exchange market for imports of goods on the negative list, which is issued by the FMF. Foreign exchange may not be acquired in the foreign exchange market for imports of goods on the list of items not valid for foreign exchange published by the CBN (CBN Circular TED/FEM/FPC/GEN/01/010). Imports of goods on this list are not prohibited, provided the importer uses their own funds without recourse to the Nigerian foreign exchange markets.

### Advance payment requirements

Yes.

Effective August 1, 2018, down payments on imports not exceeding 15% of f.o.b. value of transaction are allowed. Advance payments are allowed subject to presentation of performance bond by the supplier from reputable bank in his home country. Previously, installment and down payments of up to 20% of the f.o.b. value of the transaction were allowed.

### Advance import deposits

Yes.

Advance import deposits are treated like advance payments. Effective August 1, 2018, advance import deposits not exceeding 15% of f.o.b. value of transaction are allowed. Advance import deposits are allowed subject to presentation of performance bond by the supplier from reputable bank in his home country. Previously, advance import deposits of up to 20% of the f.o.b. value of the transaction were allowed.

### Documentation requirements for release of foreign exchange for imports

Yes.

Foreign exchange for imports may be released after submission of the required documents which include shipping and commercial documents.

### Domiciliation requirements

No.

### Preshipment inspection

Yes.

Imports are subject to destination inspection instead of preshipment inspection, regardless of their value. Certain categories of imports, including used vehicles, vaccines, and explosives, are not included in the destination inspection program.

### Letters of credit

No.

Under the destination inspection program, the combined certificate of value and origin, packing list, and bill of lading are the key payment documents. Importers may use LCs or their preferred payment mode for import payments. It is not mandatory to use LCs.

### Import licenses used as exchange licenses

No.

### Other

Yes.

The documents required for foreign exchange settlements for imports are: (1) Bill of lading. (2) Certificate of origin (formerly combined certificate of value and origin). (3) Commercial invoice. (4) Exit note (formerly, Exit Gate). (5) Form “M”. (6) Packing list. (7) Single Goods Declaration. (8) Product Certificate. Transactions involving the use of bills for collection are permitted. Transactions executed by the private sector do not, however, carry any government guarantee or obligation. Remittances must be made through the official foreign exchange market or with autonomous funds, and the relevant shipping documents for the transactions must be handled by an AD. Single Goods Declaration is required for making payments and should be submitted not later than 90 days from the bill of lading date.

### Import licenses and other nontariff measures

Yes.

#### Positive list

No.

#### Negative list

Yes.

Imports of the following items are prohibited: live or dead birds including frozen poultry, bird eggs, pork, beef, cassava, refined
vegetable oil, cocoa butter, powder and cakes, spaghetti/noodles, fruit juice in retail packs, water including mineral and carbonated water containing added sugar or sweetening or flavored, ice snow, other nonalcoholic beverages (excluding energy and health drinks), beer and stout, bagged cement, medications, waste pharmaceuticals, soaps and detergents, mosquito repellent coils, sanitary wares of plastic, domestic articles and wares of plastic (excluding baby feeding bottles and flushing cisterns and waterless toilets), toothpicks, retreaded and used pneumatic tires but excluding used tires for retreading of size, corrugated paper and cardboard items excluding baby diapers, incontinence pads for adult use and exercise books, telephone recharge cards and vouchers, textile fabrics, carpet and rugs of all types, garments and other textiles, footwear, bags, and suitcases (excluding safety shoes), hollow glass bottles of a capacity exceeding 150 ml (0.15 liter) of all kinds used for packaging of beverages, used compressors, used air conditioners and used refrigerators, used motor vehicles more than 10 years old, furniture excluding baby walkers, laboratory cabinets, stadium chairs, and skeletal parts of furniture such as blanks, and ballpoint pens and parts, including refills.

Open general licenses  No.
Licenses with quotas  Yes.
Other nontariff measures  Yes.

Import taxes and/or tariffs  Yes.

In line with the 2008–12 Tariff Book, in a second attempt to harmonize Nigeria’s tariff regime with the ECOWAS CET, there are five categories of customs duties: (1) category 0 (0%): necessities such as most educational materials; (2) category 1 (5%): primary raw materials; (3) category 2 (10%): intermediate products—for example, CKD refrigerators and televisions; (4) category 3 (20%): finished goods not produced locally and that do not require protection—for example, televisions, refrigerators, generators, etc.; and (5) category 4 (35%): finished goods that are manufactured locally and therefore require some protection in the interest of promoting local industries. Tariff protection is high for finished goods. In addition, the following import surcharges apply: a 5% port development surcharge, a 1% raw materials and development council surcharge, a 0.02% freight rate stabilization surcharge earmarked for the Nigeria Shippers’ Council, and an ECOWAS levy of 0.5%. Certain categories of imports are exempt from import taxes. Imports that were duty free in the past are now subject to a duty of at least 2.5%. Imports of sugar confectionery are prohibited. Imports of sugar are subject to a 50% duty.

Taxes collected through the exchange system  No.
State import monopoly  No.

References to legal instruments and hyperlinks  This information can be found at the AREAER ONLINE database: http://www.elibrary-areaer.imf.org/Pages/Reports.aspx.

Exports and Export Proceeds

Repatriation requirements  Yes.
Surrender requirements  No.

Export proceeds must be repatriated within 90 days of the date of shipment for oil exports and 180 days for non-oil exports.
Surrender to the central bank No. Oil and oil service companies and government agencies may sell their foreign exchange in the interbank market or to the CBN whichever they prefer.

Surrender to authorized dealers No. Non-oil exporters may sell their export proceeds to AD banks at interbank rates or use the funds to finance eligible transactions. Inflows for the domestic operations of oil companies are sold directly to banks. Oil and oil service companies and government agencies may sell their foreign exchange in the interbank market.

Financing requirements No.

Documentation requirements Yes.

Letters of credit Yes. Payment for exports must be made with advance payments, LCs, or bills for collection.

Guarantees No.

Domiciliation No.

Preshipment inspection Yes. Exports are subject to preshipment inspection, regardless of their value, except personal effects; used motor vehicles; day-old chicks; human remains; vaccines; yeast; periodicals and magazines; noncommercial exports, such as gifts, trade samples, and printed business materials; machinery and equipment for repairs abroad; and supplies for diplomatic consular missions and international organizations. Exporters must pay a service charge of 1% of the f.o.b. value, which accrues to the Nigerian Export Supervision Scheme (NESS).

Export licenses Yes.

Without quotas Yes. Production of unrefined gold and petroleum products is subject to licensing. The exportation of African antiques, works of art, and objects used in African ceremonies is prohibited, except under certain conditions. Exports of timber (rough and sawed), raw hides and skins, scrap metal, unprocessed rubber latex and rubber lumps, palm kernels, and yam tubers are prohibited. Production and exports of petroleum are handled by the Nigerian National Petroleum Corporation and marginal field operators.

With quotas No.

Export taxes No.

Collected through the exchange system No.

Other export taxes No.

### Other payments

Yes.

### Prior approval

No.

### Quantitative limits

Yes. Up to 5% of consulting and legal fees for high-technology projects, for which local expertise is not available, may be remitted.

### Indicative limits/bona fide test

Yes. Such payments are allowed, subject to documentation requirements.

### References to legal instruments and hyperlinks

This information can be found at the AREAER ONLINE database: http://www.elibrary-areaer.imf.org/Pages/Reports.aspx.

### Proceeds from Invisible Transactions and Current Transfers

#### Repatriation requirements

Yes. All proceeds must be received through banks and repatriated within 90 days of the date of shipment for oil exports and 180 days for non-oil exports.

#### Surrender requirements

No.

#### Surrender to the central bank

No. Oil and oil service companies and government agencies may sell their foreign exchange in the interbank market or to the CBN.

#### Surrender to authorized dealers

No. Inflows for the domestic operations of oil companies must be sold directly to ADs. There is no deadline to surrender these proceeds.

#### Restrictions on use of funds

No.

### Capital Transactions

#### Controls on capital transactions

#### Repatriation requirements

No.

#### Surrender requirements

No.

#### Surrender to the central bank

No.

#### Surrender to authorized dealers

No.

#### Controls on capital and money market instruments

Yes. Applications for private capital transfers abroad are processed by banks, with documentation.

#### On capital market securities

Yes.

#### Shares or other securities of a participating nature

Yes.

#### Purchase locally by nonresidents

No.

#### Sale or issue locally by nonresidents

No. These transactions may be conducted through ADs, subject to documentation requirements.

#### Purchase abroad by residents

Yes. Foreign exchange may not be acquired in the foreign exchange market for purchases of shares denominated in foreign currency (CBN Circular TED/FEM/FPC/GEN/01/010). Purchases of such securities are not prohibited, provided the purchaser uses their own funds without recourse to the Nigerian foreign exchange markets.

#### Sale or issue abroad by residents

No. Residents may sell to nonresidents any security payable in naira without approval.

#### Bonds or other debt securities

Yes. The debt management office regulates the purchase of selected documents.
Nigerian foreign debt instruments (mainly CBN promissory notes arising from past consolidation of unsecured trade credit arrears) at a discount and the disposition of the naira proceeds on the conversion of such debt.

Purchase locally by nonresidents: No. No controls apply to purchases by nonresidents of debt instruments. There is no minimum holding period requirement for such bonds.

Sale or issue locally by nonresidents: No.

Purchase abroad by residents: Yes. Foreign exchange may not be acquired in the foreign exchange market for purchases of Eurobonds or foreign currency bonds (CBN Circular TED/FEM/FPC/GEN/01/010). Purchases of such securities are not prohibited, provided the purchaser uses their own funds without recourse to the Nigerian foreign exchange markets.

Sale or issue abroad by residents: No.

On money market instruments: Yes. Foreign nationals and entities may invest in Nigeria in money market instruments such as commercial paper, negotiable certificates of deposit, bankers’ acceptances, and treasury bills. The proceeds of foreign investment in money market instruments must be sold in the market for naira, for which the investor is issued a CCI as evidence of the investment to facilitate repatriation of capital or profits.

Purchase locally by nonresidents: No.

Sale or issue locally by nonresidents: No.

Purchase abroad by residents: Yes. Foreign exchange may not be acquired in the foreign exchange market for purchases of foreign currency bonds (including money market instruments) (CBN Circular TED/FEM/FPC/GEN/01/010). Purchases of such securities are not prohibited, provided the purchaser uses their own funds without recourse to the Nigerian foreign exchange markets. Transfers to external accounts are permitted.

Sale or issue abroad by residents: No.

On collective investment securities: No.

Purchase locally by nonresidents: No.

Sale or issue locally by nonresidents: No.

Purchase abroad by residents: No.

Sale or issue abroad by residents: No.

Controls on derivatives and other instruments: No.

Purchase locally by nonresidents: No.

Sale or issue locally by nonresidents: No.

Purchase abroad by residents: No.

Sale or issue abroad by residents: No.

Controls on credit operations: Yes.

Commercial credits: Yes.

By residents to nonresidents: No. FMF approval is not required for nonresident individuals or companies (other than banks) registered in Nigeria that are controlled directly or indirectly from outside Nigeria. Licensed banks in Nigeria...
may grant loans and permit overdrafts for periods of up to 14 days and may increase the amount of any advance or overdraft by the amount of loan interest or bank charges payable thereon. Loans, bank overdrafts, and other credit facilities may also be arranged to finance Nigerian imports and exports.

To residents from nonresidents Yes. FMF approval is not required for individuals, firms, companies, or branches resident in Nigeria to borrow abroad. However, official agencies and government-controlled corporations need FMF approval to borrow abroad. Government-controlled corporations and agencies also require FMF approval for supplier credits abroad.

Provisions Specific to the Financial Sector

Provisions specific to commercial banks and other credit institutions

Yes.

Borrowing abroad

Yes.

Documentation is required as described in BSD/DIR/GEN/LAB/07/037 on Prudential Regulation for the Management of Foreign Exchange Risks of Banks. The aggregate foreign currency borrowing of a bank excluding intergroup and interbank (Nigerian banks) borrowing should not exceed 125% of its shareholders’ funds unimpaired by losses.

Maintenance of accounts abroad

No.

Documentation is required.

Lending to nonresidents (financial or commercial credits)

Yes.

Licensed banks in Nigeria may grant loans and permit overdrafts for periods of up to 14 days and may increase the amount of any advance or overdraft by the amount of loan interest or bank charges payable thereon. Documentation is required. Lending is subject to the single obligor limit of 20% of shareholders’ funds unimpaired by losses.

Lending locally in foreign exchange

Yes.

The aggregate foreign currency borrowing of a bank excluding intergroup and interbank (Nigerian banks) borrowing should not exceed 125% of its shareholders’ funds unimpaired by losses. The 125% limit supersedes the 200% specified in Section 6 of the 2001 Guidelines for Foreign Borrowing for On-Lending by Nigerian Banks.

Banks should borrow and lend in the same currency (natural hedging) to avoid currency mismatch associated with foreign currency risk. The basis of the interest rate for borrowing should be the same as that of lending; that is, there should be no mismatch in floating and fixed interest rates, to mitigate basis risk associated with foreign borrowing interest rate risk.

Purchase of locally issued securities denominated in foreign exchange

Yes.

Foreign exchange may not be acquired in the foreign exchange market for purchases of Eurobonds, foreign currency bonds, or foreign currency share purchases (CBN Circular TED/FEM/FPC/GEN/01/010). Purchases of such securities are not prohibited, provided the purchaser uses their own funds without recourse to the Nigerian foreign exchange markets.

Differential treatment of deposit accounts in foreign exchange

Yes.

Reserve requirements

No.

Liquid asset requirements

Yes.

Liquid asset requirements are not applied to foreign exchange deposits. The liquidity requirements are specified in BSD/DO/CIR/GEN/VOL.02/044 of January 29, 2009.

Interest rate controls

No.
<table>
<thead>

### Changes during 2018 and 2019

#### Exchange Arrangement

**Monetary policy framework**

- **Monetary aggregate target**
  
  03/26/2019 The monetary policy rate was reduced by the Central Bank of Nigeria from 14% to 13.5%.

#### Arrangements for Payments and Receipts

**Payments arrangements**

- **Bilateral payments arrangements**
  
  04/27/2018 Arrangement with China to use yuan renminbi for trade settlements was concluded.

#### Imports and Import Payments

**Financing requirements for imports**

- **Advance payment requirements**
  
  08/01/2018 Down payments on imports not exceeding 15% of f.o.b. value of transaction are allowed. Previously, installment and down payments of up to 20% of the f.o.b. value of the transaction were allowed.

- **Advance import deposits**
  
  08/01/2018 Advance import deposits not exceeding 15% of f.o.b. value of transaction are allowed. Previously, advance import deposits of up to 20% of the f.o.b. value of the transaction were allowed.

#### Payments for Invisible Transactions and Current Transfers

**Controls on these transfers**

- **Credit card use abroad**
  
  07/04/2018 The limits on overseas usage of naira-denominated credit cards are US$100 daily (previously, US$300 a day) and/or cumulative maximum limit of US$3,000.00 monthly. The yearly limit of US $50,000.00 was removed.

### Capital Transactions
Controls on capital transactions

Gifts, endowments, inheritances, and legacies

By residents to nonresidents

08/01/2018

Residents may make cash gifts not exceeding US$500 (previously, US$1,500) or its equivalent a year to individuals, subject to documentation requirements. Larger amounts require prior Central Bank of Nigeria approval.

08/01/2018

Amounts larger than US$500 for cash gifts by residents to nonresident individuals require prior Central Bank of Nigeria approval (previously, larger amounts were not allowed).
REPUBLIC OF NORTH MACEDONIA
(Position as of March 31, 2019)

Status under IMF Articles of Agreement

Date of membership
December 14, 1992.

Article VIII
Yes. Date of acceptance: June 19, 1998.

Article XIV

Exchange Measures

Restrictions and/or multiple currency practices
No.

Exchange measures imposed for security reasons
Yes.
In accordance with IMF Executive Board Decision No. 144-(52/51)
Yes.
In accordance with UNSC resolutions and Council of the EU regulations, the Republic of North Macedonia (RNM) maintains exchange restrictions with respect to certain officials of Belarus; Côte d'Ivoire; Egypt; Guinea; the Islamic Republic of Iran; Iraq; Libya, in view of the situation there; Syria; certain persons and entities in Tunisia; and Zimbabwe.

Other security restrictions
No.

References to legal instruments and hyperlinks
This information can be found at the AREAER ONLINE database: http://www.elibrary-areaer.imf.org/Pages/Reports.aspx.

Exchange Arrangement

Currency
Yes. The currency of the RNM is the North Macedonian denar.

Other legal tender
No.

Exchange rate structure

Unitary
Yes.

Dual

Multiple

Classification

No separate legal tender

Currency board

Conventional peg

Stabilized arrangement
Yes. The de jure exchange rate arrangement is floating. Under the Law on Foreign Exchange Operations (Article 33), the denar exchange rate is freely determined on the basis of supply and demand in the foreign exchange market. This arrangement is still in place under the current legislation. However, the National Bank of the Republic of North Macedonia (NBRNM) participates in the foreign exchange market (Article 34), to achieve the goals determined with the monetary and the foreign exchange policies. The NBRNM is implementing the monetary...
strategy of targeting the nominal exchange rate against the euro, the
temporary objective of the monetary policy being the maintenance
of the denar exchange rate stability. Thus, the NBRNM maintains a
stable exchange rate within a narrow fluctuation band of bid-ask
exchange rates determined by the Committee for Operational
Monetary Policy.
Size and direction of the interventions are published on a regular
quarterly basis, in the Quarterly Report of the NBRNM (Balance of
Payments section, Financial Account subsection, in the part
commenting on the developments of the foreign exchange reserves).
The de facto exchange rate arrangement is classified as a stabilized
arrangement.

Crawling peg

Crawl-like arrangement

Pegged exchange rate within horizontal bands

Other managed arrangement

Floating

Free floating

**Official exchange rate**

Yes. On the basis of the daily quotes of the market makers, the NBRNM
determines the nominal denar exchange rate against the euro. This
rate is determined at the end of each business day as the average of
the daily bid-ask quotes for euros among the market makers in the
interbank foreign exchange market.
According to the Law on Foreign Exchange Operations, the official
exchange rate is used for accounting and balance of payments
statistics. The denar exchange rate is published daily on the NBRNM
website.

**Monetary policy framework**

Exchange rate anchor

Yes.

**U.S. dollar**

Yes.

**Euro**

Beginning in October 1995, the NBRNM implemented a monetary
policy strategy of targeting the denar exchange rate against the
German mark until 2002 and thereafter against the euro. This
monetary policy strategy stems from the importance of the exchange
rate of the domestic currency for a small open economy as a
transparent nominal anchor for credible monetary policy.
Accordingly, the monetary policy framework is using an exchange
rate anchor vis-à-vis the euro.
According to the Law on Foreign Exchange Operations, foreign exchange sales and purchases must take place in the foreign exchange market. The exchange market operates at two levels: wholesale (companies, commercial banks, NBRNM) and retail (foreign exchange bureaus, natural persons). The wholesale market is also divided into two segments: (1) transactions between clients and banks and (2) interbank market transactions. Banks freely set the
exchange rate in transactions with their clients, in accordance with supply and demand in the foreign exchange market. Banks buy and sell foreign exchange on their own account and on behalf of third-party accounts. Savings houses participate in the foreign exchange market as all other resident entities; in other words, they buy and sell foreign exchange on their own behalf only with banks licensed by the NBRNM to deal in the foreign exchange market. Other entities may purchase and sell foreign exchange on their own behalf only with entities (banks and foreign exchange bureaus) approved by the NBRNM. Foreign exchange bureaus have accounts with domestic banks and may engage in transactions, as legal entities, with those banks. Resident entities other than banks and foreign exchange bureaus may purchase foreign exchange for payments abroad and sell foreign exchange collected from abroad in the foreign exchange market. Resident natural persons may purchase and sell foreign exchange in the market for other purposes as well. Residents other than natural persons may not purchase or sell foreign exchange through foreign exchange bureaus. As of December 31, 2018, 243 entities were licensed as foreign exchange bureaus (14 banks, 1 savings house, and 228 trading companies). These bureaus cannot deal directly with the NBRNM. They may purchase foreign currency cash and checks from foreign and domestic natural persons and sell foreign currency cash to domestic and foreign natural persons. Foreign exchange bureaus may not maintain accounts abroad. Their operations are limited to the purchase and sale of banknotes, where they may sell foreign currency cash to foreign natural persons in the same way as they sell it to domestic natural persons. Automated teller machines (ATMs) with a function for foreign exchange operations are available to banks. The NBRNM participates in the foreign exchange market to maintain a stable exchange rate. The frequency of intervention depends on the conditions in the market. The NBRNM intervenes only through banks (market makers). The NBRNM intervenes through market makers on its own initiative or on that of the market makers. The NBRNM bid-ask quotes are published daily on the market makers’ segment of the electronic trading platform. When the NBRNM intervenes on its own initiative, it does so at the quotes of the market makers. When the NBRNM intervenes on the market makers’ initiative, the NBRNM bid-ask quotes are used. In case there are larger imbalances between supply and demand in the foreign exchange market, the NBRNM may buy and sell foreign currency with all banks.

- **Operated by the central bank**: No.
- **Foreign exchange standing facility**: No.
- **Allocation**: No.
- **Auction**: No.
- **Fixing**: No.
- **Interbank market**: Yes. An electronic trading platform is used for quotes and interbank trading. All 15 banks licensed to deal in the foreign exchange market participate in the interbank market. The bid-ask spread is limited to MKD 0.25 in the interbank market.
- **Over the counter**: Yes. The foreign exchange market, both among banks and between banks and their clients, operates over the counter.
Six banks are market makers in the interbank market. The NBRNM introduced market makers to decrease its presence in the foreign exchange market and to enable banks to satisfy foreign exchange liquidity needs among themselves when demand and supply are in broad equilibrium. The Market Makers’ Agreement as amended in 2014 is in effect. Market makers have the exclusive right to trade with the NBRNM; they must also continuously quote bid-ask rates with a predefined spread. The maximum bid-ask spread on quotes with each other is MKD 0.05 per euro, and the minimum transaction between a market maker and the NBRNM in the foreign exchange market maker segment is €0.5 million. Market makers must quote a bid-ask spread of MKD 0.25 with other banks. No commission is charged on foreign exchange transactions apart from the bid-ask spread.

Outright forward and foreign exchange swap transactions are allowed in the foreign exchange market, but this segment of the market is in the early phase of development, with no regular transactions.

This information can be found at the AREAER ONLINE database: http://www.elibrary-areaer.imf.org/Pages/Reports.aspx.

The Macedonian Interbank Payment System offers cross-border payments in euros through Trans-European Automated Real-time Gross settlement Express Transfer system (TARGET2) for the domestic banks and their clients. Furthermore, correspondent banking arrangements of domestic banks with foreign banks are used for commercial payments, and correspondent arrangements of the NBRNM with foreign CBs or commercial banks are used for payments of government agencies and budget entities.

All settlements must be in denars, except (1) purchases and sales of foreign exchange by natural persons from authorized foreign exchange bureaus, (2) principal and interest earnings on resident based on foreign exchange deposit accounts, (3) denomination of obligations of contracts among residents, and (4) extensions and return of credit from authorized banks to residents under conditions determined by the NBRNM.

TARGET2 payment system is used for payments in euro through the correspondent arrangement with Banca d’Italia.

An agreement is maintained with Slovenia.

Resident Accounts

Foreign exchange accounts permitted

Yes.

Held domestically

Yes. Residents, on proof of identity, may open foreign exchange accounts without restriction. Resident legal entities may open foreign exchange accounts on presentation of registration with the Central Registry (CR). Funds from these accounts may not be transferred abroad, but payments can be made abroad on the basis of appropriate documentation (invoice, contract, etc.) showing international payment liability. These provisions are prescribed in the NBRNM Decision on the method of opening resident foreign currency accounts. Pursuant to amendments to Article 4 Paragraph 3 of the Law on Foreign Exchange Operations, residents which are authorized banks were allowed to hold foreign means of payment on foreign exchange account with the NBRNM for the purposes of conducting payment operations through foreign payment systems, such as the TARGET2, and the NBRNM may approve intraday credit and overnight credit facilities in foreign currency to authorized banks for the smooth performance of payment through such foreign payment systems (Official Gazette Issue 97/15).

Pursuant to Article 4 Paragraph 2 of the Law on Foreign Exchange Operations, the domestic banks may keep foreign means of payment on foreign exchange accounts or foreign currency deposits with the banks in the RNM, authorized under the Banking Law.

Approval required

No.

Held abroad

Yes. The following residents may freely open and maintain accounts abroad:

Diplomatic, consular, and other representative offices of North Macedonia abroad, financed by the budget of the RNM.

Natural persons with permanent residence in North Macedonia, who temporarily reside abroad for three months or more during their residence abroad.

Natural persons with permanent residence in North Macedonia, residing temporarily abroad for six months or more during their residence abroad.

Natural persons with permanent residence in North Macedonia, who temporarily reside abroad during their residence abroad, and have a valid work permit.

Natural persons with permanent residence in North Macedonia, who temporarily reside abroad as employees of a diplomatic representative office abroad and members of their immediate families, during their residence abroad, and have a valid permit to work in a diplomatic representative office abroad.

Foreign natural persons who temporarily reside in North Macedonia who have valid residence or work permit valid for a period of at least six months.

Natural persons with permanent residence in North Macedonia who in the foreign country acquired the right to personal retirement, pension of a deceased spouse, welfare, child support, tuition for a child whose parent is deceased, and premium/indemnification of life insurance. The acquired right must be proved by appropriate documentation issued by a competent authority abroad.
Natural persons with permanent residence in North Macedonia, who at the same time have a valid foreign passport containing the address of the residence abroad.

Effective March 8, 2019, the following were also allowed to freely open and maintain accounts abroad without approval: residents who have sold real property abroad, for recovery of claims based on the sale of the property; residents who rent out real property abroad, for recovery of claims based on lease of the property; residents who have acquired real property abroad, for payment of costs for the property abroad; residents who hold securities abroad, for recovery of claims based on sale of securities abroad, dividends, interests or other proceeds based on the securities.

Accounts in countries that are part of the Single Euro Payments Area (SEPA) are considered to be in a single country.

Pursuant to Article 23 Paragraph 1 of the Law on Foreign Exchange Operations, the banks may open and hold accounts abroad.

Approval required

NBRNM approval is required for a resident: who has concluded a contract for performing investment works abroad; who intends to open a representative office abroad as part of a company; who provides services in the international transport of goods and passengers; who provides services in the area of scholarly work; for recovery of claims based on a court decision made by a competent court abroad or extrajudicial settlement concluded abroad; for recovery of claims abroad based on VAT returns on commercial transactions; for recovery of claims abroad based on goods delivered or services provided on the basis of won international bids. Effective March 8, 2019, the following were allowed to freely open and maintain accounts abroad without approval: residents who have sold real property abroad, for recovery of claims based on the sale of the property; residents who rent out real property abroad, for recovery of claims based on lease of the property; residents who have acquired real property abroad, for payment of costs for the property abroad; residents who hold securities abroad, for recovery of claims based on sale of securities abroad, dividends, interests or other proceeds based on the securities.

Accounts in domestic currency held abroad

No.

Accounts in domestic currency convertible into foreign currency

Yes.

Only resident natural persons are permitted to make such transactions. Legal entities are allowed to buy foreign currency only for the purpose of execution of payment order to nonresidents.

Nonresident Accounts

Foreign exchange accounts permitted

Yes.

Nonresidents may open foreign exchange accounts on proof of identity. Nonresidents, other than diplomatic representatives of foreign countries and representatives of international institutions, must obtain a certificate from the customs authorities for cash deposits larger than the equivalent of €10,000 a month. The certificate is not needed in these cases:

(1) during one month, up to the amount that, under the regulations, a written confirmation is not necessarily issued when entering North Macedonia;

(2) if the funds are actually unspent cash foreign currency previously withdrawn from their accounts, within three months from the withdrawal date;

(3) if the funds derive from the sale of products to air passengers.
The method and terms of opening and maintaining nonresident accounts are regulated in the NBRNM Council Decision, which prescribes the basis for the banks to be able to receive payments of cash foreign currency and cash denars.

Nonresidents may open denar accounts on proof of identity. Nonresident diplomatic representatives of foreign countries and representatives of international institutions may use these accounts without restriction. Other nonresidents may use these accounts only for payments received based on visas, revenue from air traffic operations, unspent cash denars withdrawn from their accounts, and during one month, up to the amount for which, under the regulations, free entry of cash domestic currency is allowed when entering North Macedonia (120,000 denars).

### Capital Transactions

**Controls on capital transactions**
- Yes.
- Repatriation requirements: No.
- **Surrender requirements**
  - No.
  - Surrender to the central bank: No.
  - Surrender to authorized dealers: No.

**Controls on capital and money market instruments**
- Yes.

According to the Law on Foreign Exchange Operations, “securities” denote: (1) shares issued by joint-stock companies and limited partnerships with shares; (2) shares of investment funds operating in accordance with law; (3) bonds, money market instruments, derivative financial instruments, certificate of foreign securities; and (4) other financial instruments which the Securities and Exchange Commission (SEC) classifies as securities.

**On capital market securities**
- Yes.

**Shares or other securities of a participating nature**
- Yes.

**Purchase locally by nonresidents**
- Yes.

Nonresidents are allowed to purchase securities issued locally only through an authorized participant. All foreign investments registered with the CR are protected from nationalization. The transfer of profits and other proceeds is permitted freely after all tax obligations in North Macedonia are met. Nonresidents may not invest in certain sectors (such as arms production, trade in narcotics, protection of historical and cultural heritage). There are no other controls on the purchase of shares and securities locally by nonresidents.

**Sale or issue locally by nonresidents**
- Yes.

Nonresidents may issue or sell locally shares or other securities of a participating nature with permission from the SEC.

**Purchase abroad by residents**
- Yes.

Effective December 4, 2018, with the entering into the second phase of the Stabilization and Association Agreement concluded between the Republic of North Macedonia and the EU, by force of law (Law on Foreign Exchange Operations), legal restrictions were removed from portfolio investments of residents abroad. Residents may access international financial markets, taking their own investment risk. The requirement for submission of reports to the NBRNM on all residents’ portfolio investments in securities abroad, as well as the modifications in these investments, including their sale, still stands. Direct investments are not restricted, but residents must report the investment and subsequent modifications to the CR within 60 days of the capital transaction—the legal basis for acquisition of a direct investment abroad.

Previously, authorized banks and other investment intermediaries could purchase portfolio investments abroad, under prescribed requirements. Banks could freely purchase capital market instruments if: (1) shares were traded on an authorized regulated securities market (stock exchange); (2) the security (all other financial instruments, apart from shares) or the issuer of the security had a long-term credit rating of at least “BBB” (according to the rating of “Standard and Poor’s” or “Fitch”) or “Baa2” (according to
the rating of “Moody’s”); (3) they were in dematerialized form; and (4) the bank had the securities on its disposal freely. Authorized banks were allowed to invest in securities abroad on their own behalf and for their account freely if the securities were part of the bank’s trading portfolio, were measured on a mark-to-market basis, and the bank allocated capital for market risk according to the methodology for capital adequacy.

Furthermore, resident subsidiaries established in the technological industrial development zones in the RNM were allowed to purchase shares issued by the parent entity for rewarding of their employees, for their own account, and on behalf of the employees. Residents could purchase securities traded on foreign stock exchanges if these stock exchanges had agreements with the North Macedonian Stock Exchange for trading connection, acquisition, or merger.

Insurance companies and pension funds may purchase securities abroad in accordance with their appropriate laws. For insurance companies, a maximum of 20% of the total assets covering technical provisions may be invested in securities issued by nonresidents. Pension funds may invest in securities issued outside the RNM up to 50% of total investments, subject to sub-limits.

**Sale or issue abroad by residents**

Yes. Permission from the SEC is required for residents to issue securities abroad.

**On money market instruments**

Yes.

**Purchase locally by nonresidents**

No. Nonresidents are allowed to purchase securities issued locally. There are no other controls on the purchase of money market instruments locally by nonresidents.

**Sale or issue locally by nonresidents**

Yes. Nonresidents may issue or sell locally securities with permission from the SEC.

**Purchase abroad by residents**

Yes. Effective December 4, 2018, with the entering into the second phase of the Stabilization and Association Agreement concluded between the Republic of North Macedonia and the EU, by force of law (Law on Foreign Exchange Operations), legal restrictions were removed from portfolio investments of residents abroad. Residents may access international financial markets, taking their own investment risk. The requirement for submission of reports to the NBRNM on all residents’ portfolio investments in securities abroad, as well as the modifications in these investments, including their sale, still stands.

Direct investments are not restricted, but residents must report the investment and subsequent modifications to the CR within 60 days of the capital transaction—the legal basis for acquisition of a direct investment abroad. Previously, there were legal restrictions for residents buying foreign money market instruments. Authorized banks and other investment intermediaries were exempt from this restriction. Authorized banks could freely purchase instruments on the money market and other short-term debt instruments abroad if the security, the issuer, or the guarantor was given a short-term credit rating of at least “A-2” (according to “Standard and Poor’s”), F3 (according to “Fitch”), or “P-3a” (according to “Moody’s”), the securities were in dematerialized form, and the bank had the securities on its disposal freely.

Insurance companies and pension funds may purchase securities abroad in accordance with their appropriate laws. For insurance companies, a maximum of 20% of the total assets covering technical provisions may be invested in securities issued by nonresidents. Pension funds may invest in securities issued outside the RNM up to 50% of total investments, subject to sub-limits.

**Sale or issue abroad by residents**

Yes. Permission from the SEC is required for residents to issue securities abroad.

**On collective investment securities**

Yes.

**Purchase locally by nonresidents**

Yes. Nonresidents are allowed to purchase securities issued locally only through an authorized participant. There are no other controls on purchases of collective investment securities locally by nonresidents.

**Sale or issue locally by nonresidents**

Yes. Nonresidents may issue or sell shares in open-ended investment funds locally with SEC permission and only through registered subsidiary in the RNM, which is not a separate legal entity.

**Purchase abroad by residents**

Yes. Effective December 4, 2018, with the entering into the second phase of the Stabilization and Association Agreement concluded between the Republic of North Macedonia and the EU, by force of law (Law
on Foreign Exchange Operations), legal restrictions were removed from portfolio investments of residents abroad. Residents may access international financial markets, taking their own investment risk. The requirement for submission of reports to the NBRNM on all residents’ portfolio investments in securities abroad, as well as the modifications in these investments, including their sale, still stands. Direct investments are not restricted, but residents must report the investment and subsequent modifications to the CR within 60 days of the capital transaction—the legal basis for acquisition of a direct investment abroad.

Previously, there were legal restrictions for residents buying foreign investment fund units. Exception of these restrictions was provided for authorized banks and other investment intermediaries. Authorized banks could freely purchase investment fund units abroad if: (1) the open investment fund was established with the approval of the supervisory, regulatory, or any other competent authority in the country which was given a long-term credit rating of at least “BBB” (according to the “Standard and Poor’s” or “Fitch”) or “Baa2” (according to the rating of “Moody’s”); (2) the price of the unit certificates was published on a daily basis; and (3) the open investment fund had custodian—bank or specialized depositary institution—with relevant approval from supervisory, regulatory, or any other competent authority for performing such an activity which was given a long-term credit rating of at least “BBB” (according to the “Standard and Poor’s” or “Fitch”) or “Baa2” (according to the rating of “Moody’s”).

Insurance companies and pension funds may purchase securities abroad in accordance with their appropriate laws. For insurance companies, a maximum of 20% of the total assets covering technical provisions may be invested in securities issued by nonresidents. Pension funds may invest in securities issued outside the RNM up to 50% of total investments, subject to sub-limits.

Sale or issue abroad by residents

Yes. Permission from the SEC is required for residents to issue securities abroad.

Controls on derivatives and other instruments

Yes.

Purchase locally by nonresidents

Yes. Both the standardized and non-standardized derivatives are considered as a security.

In the case of standardized derivatives (options), nonresidents are allowed to purchase derivatives issued locally through an authorized participant.

In the case of non-standardized derivatives, nonresidents may enter into such contracts only with banks, insurance companies, pension funds, and investment funds as well as the national deposit insurance fund, in accordance with appropriate laws.

Sale or issue locally by nonresidents

Yes. Nonresidents may buy or sell derivatives locally with SEC permission. Non-standardized derivatives may be entered only with bank, insurance companies, pension funds, and investment funds as well as the national deposit insurance fund, in accordance with appropriate laws.

Purchase abroad by residents

Yes. Effective December 4, 2018, with the entering into the second phase of the Stabilization and Association Agreement concluded between the Republic of North Macedonia and the EU, by force of law (Law on Foreign Exchange Operations), legal restrictions were removed from portfolio investments of residents abroad. Residents may access international financial markets, taking their own investment risk. The requirement for submission of reports to the NBRNM on all residents’ portfolio investments in securities abroad, as well as the modifications in these investments, including their sale, still stands.
Direct investments are not restricted, but residents must report the investment and subsequent modifications to the CR within 60 days of the capital transaction—the legal basis for acquisition of a direct investment abroad.

Previously, there are legal restrictions applied to residents for buying foreign investment fund units. Exception of these restrictions was provided for authorized banks and other investment intermediaries. Authorized banks could freely purchase derivative financial instruments for which the transactions were being concluded on authorized regular market (stock exchanges) if the bank had concluded a clearing arrangement with an authorized market participant, that was being given a long-term credit rating of at least “BBB”), according to the rating of “Standard and Poor’s” or “Fitch”) or “Baa2” (according to the rating of “Moody’s”). For the derivative financial instruments for which the transactions were concluded on the OTC market, the following requirements applied: (1) the transaction was reported in the trade repository and the clearing of the transaction was performed through the central counterparty, with both institutions being authorized for such type of activities by competent supervisory, regulatory, or any other relevant authority; or (2) the other counterparty of the transaction was bank or other financial institution that was given a long-term credit rating of at least “A-” (according to the rating “Standard and Poor’s” or “Fitch”) or “A3” (according to the rating of “Moody’s”); or (3) the other counterparty of the transaction was bank or financial institution, which was a related entity with the authorized bank, pursuant to the Banking Law. In these instances, when an authorized bank concluded a transaction for derivative financial instrument whose price depended directly or indirectly on the price of a security, such a security, or its issuer or guarantor had to be given a long-term credit rating of at least “BBB” (according to the rating of “Standard and Poor’s” or “Fitch”) or “Baa2” (according to the rating of “Moody’s”).

Insurance companies and pension funds may purchase securities abroad in accordance with their appropriate laws. For insurance companies, a maximum of 20% of the total assets covering technical provisions may be invested in securities issued by nonresidents. Pension funds may invest in securities issued outside the RNM up to 50% of total investments, subject to sub-limits.

**Sale or issue abroad by residents**  Yes. Residents may issue or sell derivatives abroad with permission from the SEC.

**Controls on credit operations**  No. Credit transactions between residents and nonresidents are not restricted; however, concluded credit operations must be recorded with the NBRNM for statistical purposes. The NBRNM may not deny the recording of credit transactions.

**Guarantees, sureties, and financial backup facilities**  No.

By residents to nonresidents  No. Guarantees and sureties issued by residents to nonresidents are not...
Guarantees issued in their own right (that is, not related to particular loan agreements between residents and nonresidents) must be reported to the NBRNM for statistical purposes. Residents must submit to the NBRNM a monthly summary of all guarantees issued, containing stock and flow data.

To residents from nonresidents

Controls on direct investment

*Outward direct investment* No. Residents must register investments exceeding 10% of the equity capital of a company with the CR within 60 days.

*Inward direct investment* Yes. Nonresidents may invest in existing companies, establish their own firms, and establish joint ventures under the same conditions as domestic investors. Nonresidents may not invest in certain sectors (such as arms production, trade in narcotics, protection of historical and cultural heritage). Imports by joint-venture companies of raw materials, spare parts, and equipment not produced domestically are exempt from customs duty if the foreign share in the investment is at least 20%. All foreign investment registered with the CR is protected from nationalization. The transfer of profits and other proceeds is permitted freely after all tax obligations in the RNM are met.

Controls on liquidation of direct investment

Controls on real estate transactions

*Purchase abroad by residents* No. Effective December 4, 2018, with the entering into the second phase of the Stabilization and Association Agreement concluded between the Republic of North Macedonia and the EU, by force of law (Law on Foreign Exchange Operations), investments in real estate abroad are not restricted. However, residents must report the investment and subsequent modifications to the CR within 60 days of the capital transaction—the legal basis for acquisition of a direct investment abroad. Previously, residents were not allowed to invest in real estate abroad. The government could acquire real estate abroad for diplomatic and consular purposes.

*Purchase locally by nonresidents* Yes. Nonresidents may acquire real estate locally, pursuant to the provisions of a special law or an international agreement, under the condition of reciprocity. Acquisitions of real estate must be registered with the CR within 60 days.

*Sale locally by nonresidents* Yes. For those nonresidents who may buy real estate in the RNM, the sale of that real estate to residents should be registered with the CR, after fulfillment of RNM tax obligations.

Controls on personal capital transactions

*Loans* No. Individuals may freely receive and extend loans. Only loan transactions between unrelated persons must be recorded with the NBRNM for statistical purposes. The NBRNM may not deny the recording of credit transactions.

By residents to nonresidents No. Individuals may freely receive and extend loans. Only loan transactions between unrelated persons must be recorded with the NBRNM for statistical purposes. The NBRNM may not deny the recording of credit transactions.

To residents from nonresidents No. Individuals may freely receive and extend loans. Only loan transactions between unrelated persons must be recorded with the NBRNM for statistical purposes. The NBRNM may not deny the recording of credit transactions.

*Gifts, endowments, inheritances, and legacies* Yes.

Provisions Specific to the Financial Sector

<table>
<thead>
<tr>
<th>Provisions specific to commercial banks and other credit institutions</th>
<th>Yes. The NBRNM Credit Register contains a historical database for banks’ and savings houses’ credit exposure (consisting of claims on loans: regular, past due, nonperforming, interest, fees, investments, off-balance-sheet items, etc.) to residents and nonresidents. The database is updated by banks and savings houses monthly.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Borrowing abroad</td>
<td>Yes.</td>
</tr>
<tr>
<td>Maintenance of accounts abroad</td>
<td>Yes.</td>
</tr>
<tr>
<td>Lending to nonresidents (financial or commercial credits)</td>
<td>Yes. The total exposure to one entity (including connected parties) may not exceed 25% of a bank’s own funds. If the entity is a qualified shareholder (owning more than 5% of the voting shares of a bank), the total exposure to that entity, including its affiliated parties, may not exceed 10% of the bank’s own funds. The bank’s exposure to its subsidiary including connected persons is limited to 10% of the bank’s own funds.</td>
</tr>
<tr>
<td>Lending locally in foreign exchange</td>
<td>Yes. Commercial banks may lend in foreign currency to residents for payments abroad. If legal entities intend to use the loan proceeds domestically, the proceeds must be in denars. Credit exposure to one person, including connected parties, may not exceed 25% of a bank’s own funds. The NBRNM determines the conditions for extending loans in foreign exchange.</td>
</tr>
<tr>
<td>Purchase of locally issued securities denominated in foreign exchange</td>
<td>Yes. Total credit exposure (loans, securities, etc.) to the issuer (and connected parties) may not exceed 25% of a bank’s own funds. If the entity is a qualified shareholder (owns more than 5% of the voting shares of a bank), the total exposure to that entity, including its affiliated parties, may not exceed 10% of the bank’s own funds. The bank’s exposure to a subsidiary including connected parties is limited to 10% of its own funds. A bank’s investment in shares of a nonfinancial institution may not exceed 15% of its own funds.</td>
</tr>
<tr>
<td>Differential treatment of deposit accounts in foreign exchange</td>
<td>Yes. The reserve requirement (RR) ratio on foreign currency liabilities is 15%; for domestic currency liabilities with a foreign exchange clause, it is 50%; and for domestic currency liabilities, it is 8%. For banks’ short-term liabilities to nonresident financial companies with contractual maturity up to one year, the requirement is 13%. In addition, the RR ratio of 0% is applied to following categories: (1) liabilities to natural persons in domestic currency with contractual maturity of over one year as well as to all liabilities to natural</td>
</tr>
</tbody>
</table>
persons (in domestic currency with foreign exchange clause and in foreign currency), with contractual maturity of over two years; (2) liabilities based on repo transactions in domestic currency; (3) liabilities based on issued debt securities in domestic currency and original maturity of at least two years, in the amount of the nominal value; (4) liabilities to nonresidents – financial institutions in domestic currency, in domestic currency with foreign exchange clause and in foreign currency, with contractual maturity of over two years.

RR in domestic currency is fulfilled with funds on the accounts with the NBRNM, on average basis during the RR period. For the RR in euro (EUR), 30% of the amount calculated by applying the RR rate on foreign currency liabilities is fulfilled in domestic currency. The rest of the amount of RR in euro is fulfilled on fix level, by placing funds on the NBRNM accounts abroad up to 95% of the RR on the first day of period, while 5% of RR in EUR is fulfilled with funds on bank foreign exchange accounts in the domestic payment system. Effective November 14, 2018, the NBRNM started charging remuneration on RR in euro at a rate equal to the interest rate on the ECB’s overnight deposit facility applicable as of the last day of the reserve maintenance period. If the average daily outstanding amount of bank’s funds allocated to the foreign exchange account in euro in the domestic payment system exceeds 5% of the calculated RR in euro for the entire reserve maintenance period, remuneration is charged on the excess allocated funds at a rate equal to the interest rate on the ECB’s overnight deposit facility applicable as of the last day of the reserve maintenance period less 0.15 percentage points.

Liquid asset requirements

No. The following minimum liquidity requirements apply: (1) a liquidity ratio of up to 30 days equal to 1, as a ratio of assets and liabilities maturing in the following 30 days; and (2) a liquidity ratio of up to 180 days equal to 1, as a ratio of assets and liabilities maturing in the following 180 days.

60 days. Approval from the NBRNM is required when investments reach 5%, 10%, 20%, 33%, 50%, and 75% of total shares of the bank or shares with voting rights. (The same requirement applies to residents.)

The limit on the aggregate open foreign exchange position is 30% of banks’ own funds. Limits on positions in each currency must be determined internally by each bank.

Insurance companies, pension funds, and investment funds may purchase securities abroad in accordance with the laws governing their operations.

The assets covering technical provisions are subject to limits; a maximum of 20% of the total assets covering technical provisions may be invested in securities issued by nonresidents.

The assets covering technical provisions are subject to limits; a maximum of 20% of the total assets covering technical provisions may be invested in securities issued by nonresidents.

The following limits apply to investment of the assets covering technical provisions: (1) cash and assets of business accounts of insurance companies (bank accounts), up to 3%; (2) deposits in banks licensed by the NBRNM, up to 60%; (3) securities issued by the RNM and NBRNM and bonds and other debt securities guaranteed by the RNM, up to 80%; (4) bonds and other debt securities issued or guaranteed by a local government of the RNM, up to 10%; (5) bonds and other debt securities traded on a regulated securities market in the RNM, up to 35%—investments in the same issuer may not exceed 5%; (6) bonds and other debt securities not traded on a regulated securities market whose issuer is a legal entity established in the RNM, up to 5%—investments in the same issuer may not exceed 1%; (7) shares traded on a regulated securities market in the RNM, up to 25%—investments in the same issuer may not exceed 5%; (8) shares not traded on a regulated securities market whose issuer is a legal entity established in the RNM, up to 5%—investments in the same issuer may not exceed 1%; and (9) shares and shares of investment funds registered in the RNM, up to 20%.

The following limits apply to the investment of capital: (1) Up to 60% may be invested in real estate, equity capital of other insurance companies, and financial institutions and other legal entities. (2) Up to 15% may be used for advance payments and loans approved by the insurance company under the general terms and conditions of insurance, based on presentation of the company’s policies for which premiums are paid on time. Individual investments of the insurance company in such loans may not exceed 1% of the value of its capital.

Assets covering technical provisions must be diversified to avoid overreliance on any one category of assets, market, or investment. The insurance company must adjust its investments in assets covering the technical provisions that are exposed to potential loss resulting from a change in interest rates, exchange rate fluctuations, credit risk, and other market risks to the liabilities under insurance contracts affected by those changes.

Pension funds’ investments are subject to the following limits: (1) no limit for single bonds issued and authorized by EU and OECD

©International Monetary Fund. Not for Redistribution
governments; (2) 5% of total investment in instruments issued by a single company authorized in an EU or OECD country; (3) 15% of total investment in participation units or shares of investment funds issued by a single investment company authorized in an EU or OECD country; and (4) 5% of total investment in participation units or shares of a single investment fund managed by a company authorized in an EU or OECD country.

**Limits (max.) on investment portfolio held abroad**

Yes. Mandatory pension funds may invest in (1) securities issued outside the RNM, up to 50% of total investments; (2) bonds, bills, and other securities issued or authorized by foreign governments or CBs of an EU or OECD country, up to 50% of total investments; (3) bonds, bills, and other fixed-income securities of private foreign companies or banks of an EU or OECD country, up to 30% of total investments; and (4) shares and securities traded on the primary stock exchange of an EU or OECD country in participation units, shares, and other securities of mutual and investment funds based and authorized in an EU or OECD country that invest primarily in quoted equities in these countries, up to 30% of total investments. Voluntary pension funds may invest in (1) securities issued outside the RNM, up to 50% of total investments. Within this limit they may invest in (a) debt securities of municipalities, nongovernment foreign companies, or banks of EU and OECD members with an investment-grade-level rating from a reputable international rating agency; (b) shares issued by foreign companies or banks with an investment-grade-level rating by a reputable international rating agency and traded on the main stock exchanges of EU and OECD members; and (c) participation units, shares, and other securities issued by authorized open-end and closed-end investment funds established in EU and OECD members, up to 30% of total investments; and (2) bonds and other securities issued by foreign governments or CBs of EU and OECD members and debt securities issued by the ECB, EIB, and World Bank, up to 50% of total investments.

**Limits (min.) on investment portfolio held locally**

Yes. Pension funds’ investments may not exceed (1) 80% of total investments in bonds, bills, and other securities issued or guaranteed by the RNM or the NBRNM; (2) 30%, in the case of mandatory pension funds and 60%, in the case of voluntary pension funds, of total investments in interest-bearing bank deposits in banks licensed by the NBRNM; (3) 60% of total investments in certificates of deposit (CDs), bonds, and mortgage-backed securities issued or guaranteed by banks licensed by the NBRNM; (4) 40% of total investments in bonds and other securities issued by joint-stock companies (other than banks) in the RNM approved by the SEC and traded on organized and supervised RNM securities markets and in commercial notes issued by first-class joint-stock companies (other than banks) in the RNM; (5) 10% of total investment in bonds issued by municipalities in the RNM for mandatory pension funds and for voluntary pension funds; (6) 30% of total investments in shares issued with SEC approval by joint-stock companies in the RNM, other than closed-end investment funds, and traded on organized and supervised RNM securities markets; (7) 5% of total investments in participation units and shares of open-end and closed-end investment funds in the RNM authorized by the SEC under the Law on Investment Funds; and (8) for mandatory pension funds, 1.5% of total investment in participation units and shares of private investment funds in the RNM authorized by the SEC that invest in shares and participation units of micro, small, and medium RNM companies.

**Currency-matching regulations on assets/liabilities composition**

n.a. These are not applicable to defined contribution systems.
Investment firms and collective investment funds

The Law on Investment Funds allows investment funds to purchase securities abroad. Limits are not defined according to investment in securities issued by nonresidents or residents or investment portfolios held abroad or domestically, but according to the types of financial instruments (transferable securities, money market instruments, deposits, shares or stocks of investment funds, term and optional contracts, and other financial derivative instruments, etc.) and in terms of a single issuer. Therefore, there are no specific limits on investment in securities issued by nonresidents or residents.

Limits (max.) on securities issued by nonresidents

There are no limits on purchases of securities issued by nonresidents.

Limits (max.) on investment portfolio held abroad

There are no limits on the portion of the investment portfolio held abroad.

Limits (min.) on investment portfolio held locally

There are no limits on the portion of investment portfolio held locally.

Currency-matching regulations on assets/liabilities composition

No.

Purchase abroad by residents

12/04/2018
With the entering into the second phase of the Stabilization and Association Agreement concluded between the Republic of North Macedonia and the EU, by force of law (Law on Foreign Exchange Operations), legal restrictions were removed from portfolio investments of residents abroad. Residents may access international financial markets, taking their own investment risk. The requirement...
for submission of reports to the National Bank of the Republic of North Macedonia on all residents’ portfolio investments in securities abroad, as well as the modifications in these investments, including their sale, still stands.

Previously, authorized banks and other investment intermediaries could purchase portfolio investments abroad, under prescribed requirements. Banks could freely purchase capital market instruments if: (1) shares were traded on an authorized regulated securities market (stock exchange); (2) the security (all other financial instruments, apart from shares) or the issuer of the security had a long-term credit rating of at least “BBB” (according to the rating of “Standard and Poor’s” or “Fitch”) or “Baa2” (according to the rating of “Moody’s”); (3) they were in dematerialized form; and (4) the bank had the securities on its disposal freely. Authorized banks were allowed to invest in securities abroad on their own behalf and for their account freely if the securities were part of the bank’s trading portfolio, were measured on a mark-to-market basis, and the bank allocated capital for market risk according to the methodology for capital adequacy. Furthermore, resident subsidiaries established in the technological industrial development zones in the Republic of North Macedonia were allowed to purchase shares issued by the parent entity for rewarding of their employees, for their own account, and on behalf of the employees.

Residents could purchase securities traded on foreign stock exchanges if these stock exchanges had agreements with the North Macedonian Stock Exchange for trading connection, acquisition, or merger.

With the entering into the second phase of the Stabilization and Association Agreement concluded between the Republic of North Macedonia and the EU, by force of law (Law on Foreign Exchange Operations), legal restrictions were removed from portfolio investments of residents abroad. Residents may access international financial markets, taking their own investment risk. The requirement for submission of reports to the National Bank of the Republic of North Macedonia on all residents’ portfolio investments in securities abroad, as well as the modifications in these investments, including their sale, still stands.

Previously, residents could not purchase bonds or other debt securities abroad, apart from banks and other investment intermediaries. Authorized banks could freely purchase bonds and other long-term debt instruments abroad if the security, the issuer, or the guarantor was given a long-term credit rating of at least “BBB” (according to “Standard and Poor’s” (S&P) or “Fitch”) or “Baa2” (according to “Moody’s”), the securities were in dematerialized form, and the bank had the securities on its disposal freely. Authorized banks were allowed to invest in securities abroad on their own behalf and for their account freely if the securities were part of the bank’s trading portfolio, were measured on a mark-to-market basis, and the bank allocated capital for market risk according to the methodology for capital adequacy. Residents could purchase securities traded on foreign stock exchanges if these stock exchanges had agreements with the North Macedonian Stock Exchange for trading connection, acquisition, or merger.
investments of residents abroad. Residents may access international financial markets, taking their own investment risk. The requirement for submission of reports to the National Bank of the Republic of North Macedonia on all residents’ portfolio investments in securities abroad, as well as the modifications in these investments, including their sale, still stands.

Previously, there were legal restrictions for residents buying foreign money market instruments. Authorized banks and other investment intermediaries were exempt from this restriction. Authorized banks could freely purchase instruments on the money market and other short-term debt instruments abroad if the security, the issuer, or the guarantor was given a short-term credit rating of at least “A-2” (according to “Standard and Poor’s”), F3 (according to “Fitch”), or “P-3a” (according to “Moody’s”), the securities were in dematerialized form, and the bank had the securities on its disposal freely.

instruments for which the transactions were being concluded on authorized regular market (stock exchanges) if the bank had concluded a clearing arrangement with an authorized market participant, that was being given a long-term credit rating of at least “BBB”), according to the rating of “Standard and Poor’s” or “Fitch”) or “Baa2” (according to the rating of “Moody’s”). For the derivative financial instruments for which the transactions were concluded on the OTC market, the following requirements applied: (1) the transaction was reported in the trade repository and the clearing of the transaction was performed through the central counterparty, with both institutions being authorized for such type of activities by competent supervisory, regulatory, or any other relevant authority; or (2) the other counterparty of the transaction was bank or other financial institution that was given a long-term credit rating of at least “A-” (according to the rating “Standard and Poor’s” or “Fitch”) or “A3” (according to the rating of “Moody’s”); or (3) the other counterparty of the transaction was bank or financial institution, which was a related entity with the authorized bank, pursuant to the Banking Law. In these instances, when an authorized bank concluded a transaction for derivative financial instrument whose price depended directly or indirectly on the price of a security, such a security, or its issuer or guarantor had to be given a long-term credit rating of at least “BBB” (according to the rating of “Standard and Poor’s” or “Fitch”) or “Baa2” (according to the rating of “Moody’s”).

With the entering into the second phase of the Stabilization and Association Agreement concluded between the Republic of North Macedonia and the EU, by force of law (Law on Foreign Exchange Operations), investments in real estate abroad are not restricted. However, residents must report the investment and subsequent modifications to the Central Registry within 60 days of the capital transaction—the legal basis for acquisition of a direct investment abroad. Previously, residents were not allowed to invest in real estate abroad. The government could acquire real estate abroad for diplomatic and consular purposes.

Provisions Specific to the Financial Sector

The National Bank of the Republic of North Macedonia started charging remuneration on reserve requirement in euro at a rate equal to the interest rate on the ECB’s overnight deposit facility applicable as of the last day of the reserve maintenance period. If the average daily outstanding amount of bank’s funds allocated to the foreign exchange account in euro in the domestic payment system exceeds 5% of the calculated reserve requirement in euro for the entire reserve maintenance period, remuneration is charged on the excess allocated funds at a rate equal to the interest rate on the ECB’s overnight deposit facility applicable as of the last day of the reserve maintenance period less 0.15 percentage points.

Classification

No separate legal tender

Currency board

Conventional peg

Stabilized arrangement
The de jure and de facto exchange rate arrangements are classified as free floating; the krone floats freely and independently against other currencies. The exchange rate is determined on the basis of supply and demand in the foreign exchange market. The Norges Bank (NB) does not normally intervene to influence the exchange rate of the krone; however, it may intervene in the foreign exchange market on short notice if the krone deviates substantially from the level the NB considers reasonable in relation to fundamentals and if exchange rate developments weaken the prospect of achieving the inflation target. The NB may also intervene in response to pronounced short-term fluctuations in the krone when liquidity in the foreign exchange market falls to a very low level. The NB has not intervened in the foreign exchange market since January 1999. Foreign exchange purchases or sales for the Government Pension Fund Global are publicly preannounced on the CB website. In extraordinary circumstances, the NB may provide foreign exchange liquidity via collateralized operations. This was done between September 2008 and July 2009.

The NB’s exchange rates are middle rates (that is, the midpoint between buying and selling rates in the interbank market at a given time). Rates are usually determined at 2:15 p.m. local time. On July 1, 2016, the NB changed the publication time of the daily exchange rate to around 4:00 p.m. local time. The change was made as a result of the change in publication time by the ECB of the euro foreign exchange reference rates. The exchange rates are intended to serve only as an indication and are not binding on the NB or other banks, but they are often used as a reference and for historical comparisons.
the interest rate on banks’ deposits up to a quota in the NB. NB’s Executive Board sets the key rate. The Executive Board is appointed by the King in Council and is made up of the Governor, two Deputy Governors, and five external members. The Executive Board functions as a unified group and the members are collectively responsible for the Bank’s decisions. NB’s Executive Board has included voting records in the minutes of monetary policy meetings since June 21, 2017.

Central Bank

Monetary Policy Committee

Central Bank Board

Other

Government and Central Bank

Inflation target

Yes.

Target number

Yes.

Point target

Yes. The point target is set as the annual consumer price inflation of close to 2% over time. It was revised to 2% through Royal Decree, effective March 2, 2018, pursuant to Section 2, third paragraph, of Act No. 28 of May 24, 1985, on Norges Bank and the Monetary System, etc. (NB Act). Previously (March 29, 2001–March 2, 2018), the inflation point target was 2.5%. The new regulation on monetary policy was effective March 2, 2018.

Target with tolerance band

Band/Range

Target measure

Yes. Monetary policy shall maintain monetary stability by keeping inflation low and stable. The operational target of monetary policy shall be annual consumer price inflation of close to 2% over time. Inflation targeting shall be forward-looking and flexible so that it can contribute to high and stable output and employment and to counteracting the buildup of financial imbalances.

CPI

Yes. The operational target of monetary policy is annual consumer price inflation of close to 2% over time. The NB uses the consumer price index (CPI) defined and published by Statistics Norway.

Core inflation

Target horizon

Yes. The NB sets the interest rate with a view to stabilizing inflation at target in the medium term. The horizon will depend on disturbances to which the economy is exposed and the effects on the outlook for inflation and for output and employment.

Operating target (policy rate)

Yes.

Policy rate

Yes. NB’s most important monetary policy instrument is the key policy rate, which is the interest rate on banks’ deposits up to a quota in the NB. This interest rate is also called the sight deposit rate.

Target corridor band

Yes. The key policy rate is the midpoint in an interest rate corridor with a width of 200 basis points. The lower limit is equal to the reserve rate. Each bank with an account at the NB is assigned an individual quota for reserves (in nominal Norwegian krone (NOK) terms). Reserves within the quota are remunerated at the key policy rate. Reserves in excess of the quota are remunerated at the reserve rate which is equal to the sight deposit rate minus 100 basis points. The upper limit in
the interest rate corridor is equal to the D-loan rate, which is the interest rate on NB’s standing lending facility. The D-loan rate is equal to the sight deposit rate plus 100 basis points.

Other

Accountability  Yes.
Open letter  n.a.
Parliamentary hearings  Yes. The governor of the NB provides an assessment of the monetary policy in an open hearing each year before the Standing Committee on Finance and Economic Affairs in connection with the Storting deliberations on the Financial Markets Report.

Other  n.a.

Transparency  Yes.
Publication of votes  Yes. The NB has included the Executive Board’s voting records in the published minutes of monetary policy meetings since June 21, 2017.
Publication of minutes  Yes. On May 3, 2017, NB’s Executive Board decided to publish the minutes of monetary policy meetings. The content of the minutes is included in the Executive Board’s assessment, which is published at the same time as the interest rate decision is announced. The decision was made effective from the monetary policy meeting on June 21, 2017.
Publication of inflation forecasts  Yes. The Monetary Policy Report with financial stability assessment is published four times a year, in March, June, September, and December. The Report assesses the interest rate outlook and forms the basis for NB’s advice on the level of the countercyclical capital buffer. The Report includes projections of developments in the Norwegian economy.

Other monetary framework

Exchange tax  No.
Exchange subsidy  No.
Foreign exchange market  Yes. Commercial banks may freely set the exchange rate and commissions in transactions with their clients.
Spot exchange market  Yes. Norwegian banks, credit institutions, branches of credit institutions, finance and mortgage companies, payment institutions, and e-money institutions may deal in foreign exchange with the public. Approximately 250 (218 ex e-money institutions/payment institutions, for whom the activities are restricted) entities are licensed by Finanstilsynet, the financial supervisory authority of Norway. Norwegian law does not restrict such entities from opening and maintaining accounts abroad. The NB does not engage in foreign exchange transactions with foreign exchange bureaus.

Operated by the central bank  No.
Foreign exchange standing facility  No.
Allocation  No.
Auction  No.
Fixing  No.
Interbank market  Yes. The interbank foreign exchange market consists of 10–15 banks licensed by Finanstilsynet. There are no limits on the bid-ask spreads
Over the counter: Yes. The interbank foreign exchange market consists of 10–15 banks and operates mostly on electronic trading platforms.

Brokerage: No.

Market making: No.

Forward exchange market: Yes. The NB may use foreign exchange swaps to supply krone liquidity to Norwegian and foreign banks. Foreign exchange swaps may also be used to supply liquidity in foreign currency (generally US dollars) to Norwegian banks. Extraordinary liquidity supplied in foreign currency is reserved for very special situations and is based on an assessment of the stability of Norwegian financial markets and the Norwegian payment system. Maturities for foreign exchange swaps vary and depend on the liquidity situation in the banking system. The NB provided irregular foreign currency swaps between May 2008 and May 2009.

Official cover of forward operations: No.

References to legal instruments and hyperlinks: This information can be found at the AREAER ONLINE database: http://www.elibrary-areaer.imf.org/Pages/Reports.aspx.

**Arrangements for Payments and Receipts**

**Prescription of currency requirements**

Controls on the use of domestic currency: No.

*For current transactions and payments*:

*For capital transactions*:

Transactions in capital and money market instruments: No.

Transactions in derivatives and other instruments: No.

Credit operations: No.

Use of foreign exchange among residents: No.

**Payments arrangements**

Yes. Norway participates in the Continuous Linked Settlement system. Norwegian banks participate in the EURO1, STEP1, and STEP2 pan-European clearing systems of the Euro Banking Association. Single Euro Payments Area (SEPA) payments to and from Norway may be carried out by Norwegian banks with offices in the EU or by Scandinavian banks operating in Norway.

Bilateral payments arrangements: No.

*Operative*: No.

*Inoperative*: No.

Regional arrangements: Yes. Norway participates in the Continuous Linked Settlement system. Norwegian banks participate in the EURO1, STEP1, and STEP2 pan-European clearing systems of the Euro Banking Association.

Clearing agreements: No.

Barter agreements and open accounts: No.

**Administration of control**

Yes. Regulated banks and finance companies and their branches may engage in foreign exchange services. Specialized foreign exchange...
dealers may also be authorized as finance companies. Licensed payment institutions and electronic money institutions may, under the Act on Financial Undertakings and Financial Groups, provide international payment services as well as foreign exchange services as a closely related ancillary service. This act and the appurtenant Regulations on Financial Institutions and Financial Groups (Financial Institutions Regulations) implement EU Payment Services Directive (EC) No. 2015/2366. The Foreign Exchange Register Act requires banks, branches, finance companies, electronic money institutions, and payment institutions to report foreign exchange transactions and payments to and from Norway to the foreign exchange register operated by the Directorate of Taxes.

**Payments arrears**
- Official: No.
- Private: No.

**Controls on trade in gold (coins and/or bullion)**
- On domestic ownership and/or trade: No.
- On external trade: No.

**Controls on exports and imports of banknotes**
- On exports:
  - Domestic currency: No.
  - Foreign currency: No.
- On imports:
  - Domestic currency: No.
  - Foreign currency: No.

**References to legal instruments and hyperlinks**
This information can be found at the AREAER ONLINE database: http://www.elibrary-areaer.imf.org/Pages/Reports.aspx.

**Resident Accounts**
- Foreign exchange accounts permitted: Yes.
  - Held domestically: Yes.
  - Approvals required: No.
  - Held abroad: Yes.
  - Approvals required: No.
- Accounts in domestic currency held abroad: Yes.
- Accounts in domestic currency convertible into foreign currency: Yes.

Anyone taking coins or banknotes in domestic or foreign currency exceeding the equivalent of Nkr 25,000 in or out of the Norwegian customs territory must notify the Customs Authority on the prescribed declaration form. This requirement also applies to imports and exports by mail or courier. Traveler’s checks and other monetary instruments are treated the same as cash.
Nonresident Accounts

Foreign exchange accounts permitted  Yes.
Approval required  No.

Domestic currency accounts  Yes.
Convertible into foreign currency  Yes.
Approval required  No.

Blocked accounts  Yes.
The following are subject to financial restrictions involving the blocking of accounts: (1) Afghanistan/Taliban; (2) Al-Qaida and ISIL; (3) Burma/Myanmar; (4) certain individuals in Burundi; (5) certain individuals and entities from the Darfur region in Sudan; (6) certain individuals in Egypt; (7) certain individuals from the Republic of Guinea; (8) certain individuals and entities from Guinea-Bissau; (9) (1) certain citizens of Belarus; (10) certain individuals associated with the former government of Iraq; (11) certain individuals and entities from the Islamic Republic of Iran; (12) Yemen; (13) (2) certain individuals and entities from the Democratic Republic of the Congo; (14) Lebanon; (15) certain individuals and entities from Libya; (16) Mali; (17) certain individuals and entities from the Democratic People’s Republic of Korea; (18) certain individuals in Russia; (19) certain individuals and entities from the Central African Republic; (20) Somalia; (21) certain individuals and entities from Syria; (22) South Sudan; (23) Tunisia; (24) Ukraine; (25) certain individuals and entities from Venezuela; (26) certain individuals of Zimbabwe.

Imports and Import Payments

Foreign exchange budget  No.
Financing requirements for imports  No.
Minimum financing requirements  No.
Advance payment requirements  No.
Advance import deposits  No.

Documentation requirements for release of foreign exchange for imports  No.
Domiciliation requirements  No.
Preshipment inspection  No.
Letters of credit  No.
Import licenses used as exchange licenses  No.
Other  No.
Import licenses and other nontariff measures  Yes.
### Positive list
No.

### Negative list
Yes.

Imports of certain goods from the Islamic Republic of Iran, Iraq, the Democratic People’s Republic of Korea (as amended), Somalia (as amended), and Syria are prohibited. Other imports subject to regulation are listed and require licenses. Imports of certain goods and movement of assets and payments to and from Belarus, Burundi, the Central African Republic, the Democratic Republic of the Congo, Egypt, Guinea, Guinea-Bissau, Iran, Iraq, the Democratic People’s Republic of Korea, Lebanon, Libya, Somalia, Sudan (Darfur), South Sudan, Syria, Tunisia, Ukraine/Russia, Venezuela, Yemen, and Zimbabwe are controlled and under certain circumstances prohibited. Imports of goods and payments to and from listed entities and persons (including members of Al-Qaida, ISIL (Da'esh), and the Taliban) may also be prohibited.

### Open general licenses
Yes.

Import licenses are maintained mainly for preferential quota administration purposes.

### Licenses with quotas
Yes.

### Other nontariff measures
Yes.

Certain measures are imposed for environmental, health, safety, sanitary, and phytosanitary reasons or to satisfy labeling requirements.

### Import taxes and/or tariffs
Yes.

Under the EEA and other preferential agreements, most imports are not subject to tariffs. In general, tariffs applied to industrial goods are zero, except for some clothes and other textiles; tariffs applied to agricultural products are higher. All products from least developed countries may be imported free of duties and tariffs.

### Taxes collected through the exchange system
No.

### State import monopoly
No.

### References to legal instruments and hyperlinks

Provisions Specific to the Financial Sector

| Provisions specific to commercial banks and other credit institutions | Yes. |
| Borrowing abroad | No. |
| Maintenance of accounts abroad | No. |
| Lending to nonresidents (financial or commercial credits) | Yes. |

Credit institutions and investment firms are subject to nondiscriminatory exposure regulations. In accordance with the Capital Requirements Regulation, CRR/Capital Requirements Directive, CRD IV, net positions must be within 25% of eligible capital (Tier 1 + Tier 2, provided Tier 2 is equal to or less than one-third of Tier 1 capital, c.f. CRR Article 4(71)). For financial counterparties the limits are 25%, €150 million, or 100% depending on the reporting institution’s eligible capital.

Other monetary framework

**Exchange tax**
No.

**Exchange subsidy**
No.

**Foreign exchange market**
Yes.
Banks may freely set the commission on their currency conversion transactions with their clients.

**Spot exchange market**
Yes.
Eighteen commercial banks and 16 money exchange establishments are involved in currency conversion under the rial–US dollar fixed peg arrangement and participate in exchange market.

**Operated by the central bank**
Yes.
Commercial rates for other currencies are based on market rates in London.

**Foreign exchange standing facility**
Yes.
The Central Bank of Oman (CBO) sets the rates and stands ready to buy and sell foreign currency at the announced rates. The CBO deals only with the government and commercial banks.

**Allocation**
No.

**Auction**
No.

**Fixing**
No.

**Interbank market**
Yes.
There are no restrictions on the bid-ask rates. All commercial banks may participate in the interbank market (that is, no restrictions are imposed; market participation is conditional on individual commercial banks’ foreign currency liquidity position). As mentioned before, 18 banks engage in the interbank market.

**Over the counter**
Yes.
The foreign exchange derivatives market is limited to trade-related activities in forward contracts.

**Brokerage**
No.

**Market making**
Yes.
The interbank foreign exchange market operates under a market-making agreement.

**Forward exchange market**
Yes.
The foreign exchange derivatives market is limited to trade-related activities in forward contracts.

**Official cover of forward operations**
Yes.

**References to legal instruments and hyperlinks**
This information can be found at the AREAER ONLINE database: http://www.elibrary-areaer.imf.org/Pages/Reports.aspx.

**Arrangements for Payments and Receipts**

**Prescription of currency requirements**
No.

**Controls on the use of domestic currency**
No.
For current transactions and payments: No.

For capital transactions: No.
  - Transactions in capital and money market instruments: No.
  - Transactions in derivatives and other instruments: No.
  - Credit operations: No.

Use of foreign exchange among residents: No.

Payments arrangements: Yes.
  - Bilateral payments arrangements: No.
    - Operative: No.
    - Inoperative: No.
  - Regional arrangements: Yes. Oman is a member of the GCC Customs Union.

Clearing agreements: No.

Barter agreements and open accounts: No.

Administration of control: Yes. The CBO has exclusive authority over exchange control; there is no exchange control legislation.

Payments arrears: No.

Licensed banks with investment banking licenses may market foreign investment products without CBO approval, subject to the following: (1) Tier 3 of the investment banking license (investment brokerage and investment advisory services) is required. (2) Permission applies to simple and generic investment products (equity and fixed-income investments); banks must report unusual products, including investments such as quasi-equity, subordinated liabilities. The CBO expects banks to be diligent; they are specifically forbidden to market products in the nature of or related to derivatives, insurance, deposit mobilization for overseas banks. High-risk, speculative, and ambiguous products are forbidden. (3) Licensed banks must have the necessary infrastructure, including qualified and trained personnel and systems. Their internal policies approved by their board and controlling offices must include, among other things, the appropriateness and acceptability of products and counterparties, employee conduct, processes, control, and disclosure. (4) Licensed banks must ensure that their products originate from accredited banks and mutual funds and are approved by the appropriate regulators. (5) Capital Market Authority regulations and guidelines must be followed. (6) Banks may not grant loans for investment or against investment and public marketing. (7) Banks may not assume liability or responsibility for the performance of products, but must ensure due diligence and disclosure. (8) Banks must ensure that products suit customers’ sophistication and ability to absorb risk. Forceful and aggressive marketing is prohibited. All risk and information about issuers, managers, regulators, auditors, past performance, liquidity, exit options, and fees and other costs must be brought to the attention of investors, and transparency must be maintained. Risk disclosure, in particular, is essential. Along with prospectuses and other relevant documents, banks must provide a brief summary of essential details (product description, issuer, regulators, other parties involved, fees and costs, exit options, past performance, risk factors). (9) Systems must monitor and update customers on portfolio performance. If there is no such requirement
in the offer arrangement, sources of such information (issuer’s website, contact details, etc.) must be included in the prospectus. (10) Banks must follow know-your-customer guidelines and instructions on combating money laundering and terrorism financing legislation. Licensed banks must submit quarterly details of all new products offered with a brief summary (as per Point 8 above), amount collected, and commissions during the quarter to the manager of the Banking Development Department within 30 days of the end of the quarter.

</tbody>
</table>

These purchases and transactions are limited to underlying trade-related transactions.
Licensed banks with investment banking licenses are forbidden to market products in the nature of or related to derivatives, insurance, deposit mobilization for overseas banks, and Islamic banking.

Nonresident investment in businesses in Oman requires approval. Foreign ownership is generally limited to 70%, but may be 100% in certain cases. For prudential purposes, all locally incorporated banks must be public joint-stock companies and must comply with the regulation on shareholding limits (that is, up to 15% for an individual and related parties, up to 25% for an incorporated body, and up to 35% for a joint-stock company or a holding company and its related parties). Non-Omanis may invest in investment funds—funds for the investment of savings in securities—up to 49% of a fund’s total investment.

In general, these transactions are not allowed. Some exceptions apply to citizens of GCC countries. Nonresidents may, however, purchase freehold properties in “tourism designated” areas.

There are no restrictions on the sale of freehold properties by nonresidents.
To residents from nonresidents | No.
---|---
Settlement of debts abroad by immigrants | No.
Transfer of assets | No.
Transfer abroad by emigrants | No.
Transfer into the country by immigrants | No.
Transfer of gambling and prize earnings | No.

### Provisions Specific to the Financial Sector

| Provisions specific to commercial banks and other credit institutions | Yes. |
---|---|

| Borrowing abroad | Yes. |
---|---|

Foreign borrowing by individual commercial banks is restricted by prudential regulations to 300% of their net worth. Subceilings of 200% and 100% are applicable to foreign borrowing with maturity up to five years and two years, respectively.

| Maintenance of accounts abroad | No. |
---|---|

Effective April 1, 2018, the aggregate foreign exchange balance of local banks with foreign banks may not exceed 75% of the bank’s local net worth (previously, 50%).

| Lending to nonresidents (financial or commercial credits) | Yes. |
---|---|

Lending to nonresidents (other than banks) is limited to 20% of the lending bank’s net worth, with a limit of 2.5% for individual nonresident borrowers (other than banks). However, lending to nonresidents including banks is limited to 30% of the lending bank’s net worth, with a limit of 5% for individual nonresident bank. Domestic currency lending to nonresidents is not allowed, except to embassies and diplomats. Effective April 1, 2018, the limit on banks’ credit exposures to nonresidents (both banks and other than banks) was increased from 50% to 75% of the bank’s local net worth.

| Lending locally in foreign exchange | No. |
---|---

| Purchase of locally issued securities denominated in foreign exchange | No. |
---|---

| Differential treatment of deposit accounts in foreign exchange | No. |
---|---

| Reserve requirements | No. |
---|---

| Liquid asset requirements | No. |
---|---

| Interest rate controls | No. |
---|---

| Credit controls | No. |
---|---

| Differential treatment of deposit accounts held by nonresidents | No. |
---|---
**Reserve requirements** No.

**Liquid asset requirements** No.

**Interest rate controls** No.

**Credit controls** No.

**Investment regulations** Yes.

**Abroad by banks** Yes.

Banking Law 2000 sets the following prudential restrictions on bank investments abroad: (1) Bonds, notes, debentures, and other payment obligations of companies domiciled outside Oman may not exceed 25% of the 10% ceiling (of the amount of the net worth of the licensed bank) applicable to all such instruments in general, regardless of the place of domiciliation. (2) Publicly marketed securities issued or guaranteed by foreign governments and their agencies that mature within 90 days of acquisition must be payable in a currency freely convertible at the time of acquisition. (3) Shares and securities of corporations domiciled and organized outside Oman that are not authorized for investment under the provisions of Article 65(b) of Banking Law 2000, provided such investment if made in related companies or other licensed banks is approved by the Board of Governors, may not exceed 25% of the 20% ceiling (of the net worth of the licensed bank) applicable to all such shares and securities in general, regardless of the place of domiciliation.

**In banks by nonresidents** Yes.

For prudential purposes, all locally incorporated banks in Oman must be in the form of public joint-stock companies and must comply with the regulation on shareholding limits (that is, up to 15% for an individual and related parties, up to 25% for an incorporated body, and up to 35% for a joint-stock company or a holding company and its related parties).

**Open foreign exchange position limits** Yes.

A limit of 40% of banks’ Tier 1 capital applies. To limit maturity mismatches, the cumulative gaps in domestic and foreign currency may not exceed:

- 15% of cumulative liabilities (outflows) in each of the first two time bands (up to one month and 1–3 months),
- 20% of cumulative liabilities (outflows) in 3–6-month time band, and
- 25% of cumulative liabilities (outflows) in 6–9-month and 9–12-month time bands.

**On resident assets and liabilities** Yes.

**On nonresident assets and liabilities** Yes.

**Provisions specific to institutional investors** Yes.

**Insurance companies** Yes.

There is a 25% limit on foreign investments of insurance companies’ out of total investment.

**Limits (max.) on securities issued by nonresidents** Yes.

There is a 25% limit on foreign investments of insurance companies’ out of total investment.

**Limits (max.) on investment portfolio held abroad** Yes.

There is a 25% limit on foreign investments of insurance companies’ out of total investment.

**Limits (min.) on investment portfolio held locally** Yes.

Minimum of 30% of total investment should be invested as deposits in financial institutions—licensed by CBO—and government bonds.

**Currency-matching regulations on assets/liabilities composition** n.a.

**Pension funds** Yes.

**Limits (max.) on securities issued by** Yes.

There is a 50% limit on overall investments denominated in foreign
| nonresidents | currency, with sublimit by country. | There is a 50% limit on overall investments denominated in foreign currency, with sublimit by country. |
| Limits (max.) on investment portfolio held abroad | Yes. | Short-term investments in deposits and T-bills or certificates of deposits (CDs) may not exceed 20% of total investments. Investments in locally issued bonds may not be less than 30% of total investments and not exceed 80%. |
| Limits (min.) on investment portfolio held locally | Yes. | |

| Currency-matching regulations on assets/liabilities composition | n.a. | |
| Investment firms and collective investment funds | Yes. | |
| Limits (max.) on securities issued by nonresidents | No. | |
| Limits (max.) on investment portfolio held abroad | No. | |
| Limits (min.) on investment portfolio held locally | Yes. | (1) The fund may not hold more than 10% of the outstanding securities of any issuer.
(2) The fund’s investments in any securities issued by any single issuer may not exceed 10% of the net asset value of the fund. This provision may not apply to index funds.
(3) The investment fund may not borrow more than 10% of its net asset value. |

| Currency-matching regulations on assets/liabilities composition | No. | |

Changes during 2018 and 2019

Provisions Specific to the Financial Sector

| Provisions specific to commercial banks and other credit institutions |  |
| Maintenance of accounts abroad | The limit on aggregate foreign exchange balance of local banks with foreign banks was increased from 50% to 75% of the bank’s local net worth. |
| Lending to nonresidents (financial or commercial credits) | The limit on banks’ credit exposures to nonresidents (both banks and other than banks) was increased from 50% to 75% of the bank’s local net worth. |
PAKISTAN

(Position as of July 31, 2019)

Status under IMF Articles of Agreement

Date of membership

July 11, 1950.

Article VIII

Yes. Date of acceptance: July 1, 1994.

Article XIV

Exchange Measures

Restrictions and/or multiple currency practices

Yes.

The IMF staff report for the First Post-Program Monitoring Discussions with Pakistan states that, as of February 16, 2018, the cash margin requirements on import payments constitute an exchange restriction and multiple currency practice subject to IMF jurisdiction under Article VIII, 2(a) and 3. (Country Report No. 18/78)

Exchange measures imposed for security reasons

No.

In accordance with IMF Executive Board Decision No. 144-(52/51)

No.

Other security restrictions

No.

References to legal instruments and hyperlinks

This information can be found at the AREAER ONLINE database: http://www.elibrary-areaer.imf.org/Pages/Reports.aspx.

Exchange Arrangement

Currency

Yes. The currency of Pakistan is the Pakistani rupee.

Other legal tender

No.

Exchange rate structure

Unitary

Yes.

Dual

Multiple

Classification

No separate legal tender

Currency board

Conventional peg

Stabilized arrangement

Crawling peg

Crawl-like arrangement

Pegged exchange rate within horizontal bands

Other managed arrangement

Yes. The de jure exchange rate arrangement is floating. Exchange rate is
determined by the market forces, that is, demand and supply of foreign exchange. The State Bank of Pakistan (SBP) does not explicitly or implicitly commit to an exchange rate target or path. The SBP intervenes in the market to curb speculative pressures for ensuring smooth functioning of the markets. Since December 2017, the exchange rate volatility has increased while still being managed. Therefore, the de facto exchange rate arrangement was reclassified retroactively to “other managed” from “stabilized,” effective December 11, 2017. The SBP does not publish data related to market intervention.

Other monetary framework Yes. The SBP’s monetary policy framework is characterized by a multiple indicator approach. The SBP has sought to control inflation by influencing aggregate demand relative to productive capacity through short-term interest rate adjustment—that is, the magnitude and direction of change in the policy rate are broadly based on the assessment of overall macroeconomic conditions, in particular the near-term inflation path vis-à-vis annually projected inflation by the Government of Pakistan (GOP), which then implicitly serves as SBP’s target for inflation. Thus, in practice, this implicit inflation target serves as a nominal anchor in the current monetary policy approach. Assessment of monetary aggregates still serves as a useful gauge of inflation pressure. Since 2009, the SBP has adopted an interest rate corridor framework. In May 2015, the SBP introduced a policy target rate. Since July 17, 2019, the policy target rate is set at 13.25%, SBP’s reverse repo rate (that is, ceiling rate) at 13.75%, and SBP’s repo rate (that is, floor rate) at 11.75%.

Exchange tax No.

Exchange subsidy No.

Foreign exchange market Yes. ADs may determine their own rates of exchange, both for ready and forward transactions for the public, subject to the condition that the margin between the buying and selling rates should not exceed, effective November 29, 2018, 50 paisa per US dollar (previously 20 paisa per US dollar) or its equivalent in other currencies.

Spot exchange market Yes. The SBP issues licenses to banks to operate as ADs, in foreign exchange. As of December 31, 2018, the number of ADs was 30. The SBP also issues licenses to exchange companies (ECs) to deal in foreign currency notes, coins, postal notes, money orders, bank drafts, traveler’s checks, and remittance transfers and licenses to ECs of category B (ECBs) under the prescribed criteria. ECBs may purchase and sell foreign currency notes and coins only. Hotels with a three-star rating or higher may also buy foreign currency from their customers. As of December 31, 2018, 27 full-fledged ECs, 25 ECBs, and 29 (restricted authorized) hotels were operational. Full-fledged ECs may make outward remittances in
accordance with the regulations. Importers, exporters, and businesses may shop around for the best rates without recourse to the SBP. Individuals may purchase foreign exchange from or sell it to ECs at freely negotiated rates in accordance with the regulations. Banks are limited to a spread of, effective November 29, 2018, 50 paisa (previously 20 paisa) in all foreign currency quotes to customers. For ECs (both category A and category B), the spread between the buying and selling rates of US dollar, pound sterling, euro, Saudi Arabian riyal, and U.A.E. dirham may not exceed 1% of their buying rate. For all other foreign currencies, the ECs need to ensure to maintain a competitive spread (Foreign Exchange Circular No. 6 of May 12, 2015). ECs may not make trade-related remittances on behalf of their customers. To focus ECs on their primary function of promoting home remittances, ECs may make outward remittances on behalf of bona fide customers for permissible transactions for up to 75% of the home remittances they handled in the preceding month. ECs must report remittances in the prescribed format by the fifth day of every month (FE Circular No. 4 of 2008). Some government foreign exchange transactions (for example, debt-service payments) are conducted directly by the SBP, at interbank market rates. The total number of financial institutions in Pakistan is 200.

Operated by the central bank No.
Foreign exchange standing facility No.
Allocation No.
Auction No.
Fixing No.

Interbank market Yes. As of December 31, 2018, 30 banks participated in the interbank market. ADs may determine their own rates of exchange, both for spot and forward transactions. There are no SBP restrictions on bid-ask spreads of interbank transactions. SBP intervention is conducted at market-determined prices.

Over the counter Yes.
Brokerage Yes. Interbank brokers also operate in the foreign exchange market. All interbank brokers are accredited by the Financial Markets Association of Pakistan.
Market making Yes. The Reuters Dealing System is commonly used for market making.
Forward exchange market Yes. The maximum term of forward cover by banks for trade transactions is 12 months, although this may be rolled over; these facilities are also available for funds transferred from abroad for portfolio investment. Forward cover against exports on a contract basis is permitted. Forward booking for imports is allowed, provided the minimum tenor is one month and the tenor matches the maturity of the underlying LC. Importers may also cover their non-rupee exposure through foreign exchange options. ADs may extend forward cover for exports and foreign private loans. The SBP oversees and regulates the foreign exchange derivatives market in accordance with the SBP circular on derivatives issued in November 2004. The CB participates in the forward foreign exchange market.

Official cover of forward operations No.

foreign exchange within limits prescribed by the SBP as bona fide. The SBP licenses ECs to deal in foreign currency notes, coins, postal notes, money orders, bank drafts, traveler’s checks, and transfers. The SBP also licenses ECBs, which may only purchase and sell foreign currency notes and coins. Hotels with a three-star rating or higher may buy foreign exchange from their customers and sell it to banks.

**Payments arrears**
- Official: No.
- Private: No.

**Controls on trade in gold (coins and/or bullion)**
- On domestic ownership and/or trade: No.
- On external trade: No.

Local trade in gold bullion is unrestricted.

**Controls on exports and imports of banknotes**
- Yes.

**Domestic currency**
- Yes. An individual may take out up to, effective August 30, 2018, PRs 3,000 (previously PRs 500) to India and PRs 10,000 (previously PRs 3,000) to other countries.

**Foreign currency**
- Yes. Any person is allowed to take out of Pakistan US dollars or its equivalent in other foreign currencies subject to the following limits: a person a visit and a person a year, respectively: (1) 1,000 and 6,000 for individuals up to 5 years old; (2) 5,000 and 30,000 for individuals between 5 and 18 years old; (3) 10,000 and 60,000 for individuals above 18 years old (Finance Division’s Notification F.E.1/2015-SB of June 1, 2015).

Nongovernmental organizations (NGOs) and other UN (welfare) organizations working in Afghanistan may take to Afghanistan more than PRs 10,000. Exports of foreign currency by banks are not restricted. ECs may export foreign currencies other than US dollars following the prescribed procedures and declaration at SBP-Customs Joint Booths at Jinnah International Airport, Karachi, Allama Iqbal International Airport, Lahore, Benazir Bhutto International Airport, Islamabad, and Bacha Khan International Airport, Peshawar. ECs must ensure to receive the proceeds in equivalent US dollars against exported currencies in their foreign currency accounts maintained with banks in Pakistan within three working days or import cash in US dollars against export of permissible foreign currencies.

**On imports**
- Yes.

**Domestic currency**
- Yes. Any person may bring into Pakistan up to, effective August 30, 2018, Rs 3,000 (previously PRs 500) from India and Rs 10,000 (previously PRs 3,000) from other countries.

**Foreign currency**
- No. Any person may bring into Pakistan from any country any foreign currency notes or banknotes without limit. However, declaration has to be submitted to Customs authorities at arrival if the amount is exceeding US$10,000.

<tr>
<td>Yes.</td>
<td>Foreign currency accounts may be credited with remittances received from abroad, traveler’s checks issued outside Pakistan (whether in the name of account holder or in the name of any other person), and foreign exchange generated by encashment of securities issued by the GOP. A foreign currency account of a citizen of Pakistan resident in Pakistan may also be credited with cash foreign currency, but effective April 12, 2018, only if the account holder is a filer as defined in Income Tax Ordinance of 2001 (previously, irrespective of tax filer status). However, receipts from exports of goods and services, earnings from services of residents, earnings and profits of overseas offices or branches of Pakistani firms or companies and banks, and foreign exchange released from Pakistan for a specific purpose may not be credited to these accounts. Foreign exchange accounts of resident corporations and legal entities may not be credited with foreign currency purchased in the open market. These accounts may be permanently retained, and operations and remittances from foreign exchange accounts are not restricted. ADs may keep or invest their deposits abroad or in Pakistan. ADs that lend these funds to borrowers in Pakistan for trade-related activities must observe SBP prudential regulations. ADs may decide the rate of return they offer to depositors. ADs may open foreign currency accounts and extend trade loans under the FE-25 program in US dollars, pounds sterling, euros, Japanese yen, Canadian dollars, U.A.E. dirhams, Saudi Arabian riyals, Chinese renminbi, Swiss francs, and Turkish liras (Foreign Exchange Circular No. 4 of September 4, 2012).</td>

### Nonresident Accounts

The following may open foreign exchange accounts and transact freely with banks in Pakistan without SBP approval: (1) Pakistan nationals residing abroad; (2) foreign nationals, whether residing abroad or in Pakistan; (3) charitable organizations; (4) firms and companies owned by persons who are otherwise eligible; and (5) diplomatic missions and the staffs of international organizations. ADs are free to decide the rate of return they offer to depositors. Deposit holders wishing to make payments in Pakistan in rupees must first convert the foreign exchange drawn from their accounts to rupees. If Pakistan nationals holding such accounts return to Pakistan, they may retain the accounts permanently. There is no ceiling on interest rates on these accounts. Funds mobilized under the foreign exchange account program need not be surrendered to the SBP, nor does the SBP provide forward cover for such accounts.
Domestic currency accounts Yes. The accounts of individuals, firms, or companies residing abroad are designated nonresident accounts. Different rules apply to the nonresident rupee accounts of individuals, firms, and companies, on one hand, and to the nonresident rupee accounts of banks, on the other hand.

Banks may open and maintain, effective July 16, 2019, two categories of nonresident rupee accounts for individuals and entities without prior approval of the State Bank.

(1) Nonresident Rupee Account-Repatriable (NRAR): Debit and credits of such accounts are subject to applicable regulations. An ATM/debit card to the account holder and supplementary ATM/debit cards in the name of family members of the account holder resident in Pakistan may be issued. These cards may be used for transactions in and outside Pakistan.

(2) Nonresident Rupee Account-Non-repatriable (NRAN): All legitimate debit and credit transactions in these accounts as those permissible for resident PKR accounts are allowed. However, the funds available in these accounts may not be used abroad through ATM/debit cards or other delivery channels. Previously, banks could open nonresident accounts for nonbank nonresidents without SBP approval if the accounts were opened with funds received from abroad through banking channels or with rupee funds accepted for remittance abroad. Debits and credits to nonresident accounts for specified purposes could be made by authorized banks without approval. Foreign shipping companies and airlines with offices or agents in Pakistan could open and operate interest-bearing rupee accounts, provided the interest was used only to meet local expenses. Banks could issue bank cards as well as supplementary bank cards to individual nonresident rupee account holders. Withdrawals were allowed only in Pakistan.

Convertible into foreign currency Yes. Domestic currency accounts are convertible to foreign currency when opened as convertible rupee accounts with funds received from abroad or credited with funds otherwise accepted for remittance abroad.

Blocked accounts Yes. A blocked account refers to an account opened as a blocked account at any branch or office in Pakistan of a bank authorized in this behalf by the State Bank or an account blocked by the order of the State Bank.

Holders of frozen (old) foreign exchange accounts are permitted to purchase US dollar bonds of the GOP against outstanding balances in their foreign exchange accounts. Accounts of residents of India are blocked, other than the accounts of the Indian Embassy and its personnel.

Imports and Import Payments

Foreign exchange budget No.

Financing requirements for imports Yes. According to the Import Policy Order (IPO) 2016, imports may be made against all modes of payment subject to the procedures prescribed by the SBP. Instructions for private sector importers to enter into commodities exchange agreements, imports by public sector agencies and imports under loans, credits, or bilateral assistance are given in paragraph 3 (2,3,4) of the IPO.

However, in cases, where ADs deem that an importer’s request for advance payments merits consideration, they may approach the SBP on a case-by-case basis for approval. Effective August 29, 2018, ADs were allowed to make advance payment up to US$10,000 or equivalent an invoice without the requirement of LC or bank guarantee from the supplier for the import of the following items: (1) Essential medicines and devices, (2) Aircraft-related spare parts and components, (3) Laboratory equipment and instruments imported by educational institutions for their own use, (4) Newspapers, magazines, periodicals, books, etc. Effective September 14, 2018, ADs were allowed to make advance payment up to US$50,000 or equivalent an invoice for import of life-saving medicines and devices. Effective January 1, 2019, ADs were allowed to make advance payment up to US$10,000 or equivalent an invoice without the requirement of LC or bank guarantee from the supplier for the import of raw materials and spare parts by importers and exporters for their own use only.</td>

</tr>
</tbody>
</table>
The importation of ozone-depleting substances (N. 18, Part-I, Appendix-B of IPO 2016 of April 18, 2016) is subject to policy and quota allocations of the Ministry of Climate Change. There is also a quantitative restriction in case of chemicals notified via S. Nos. 19-38 of Appendix –B of the IPO. Effective June 14, 2018, SRO No. 772(I)/2018 repealed SRO No. 1112(1)/2014 making imports of arms and ammunition listed at Sr. No. 65 of Part (I) of Appendix-B of IPO 2016 importable subject to the licensing conditions listed in SRO No. 772. Previously, they were allowed on a quantity basis and were regulated on the basis of quota allocation for reasons of public order.

Imports from Israel and of goods of Israeli origin are prohibited. There are 75 items on the restricted list that are importable by specific consumers under conditions prescribed in Part-I, Appendix-B of the IPO. There are 35 items for which procedural requirements are prescribed in Part-II, Appendix-B of the IPO considering the health and safety issues. Around 103 items notified in the IPO have to meet minimum standards at the import stage.

Pursuant to Finance Act 2019, effective July 1, 2019, the rates of tax to be collected by the Collector of Customs under Section 148 are as follows: (1) 1% of the import value as increased by customs duty, sales tax, and federal excise duty for (a) Industrial undertaking importing remeltable steel (PCT Heading 72.04) and directly reduced iron for its own use; (b) Persons importing potassic fertilizers in pursuance of Economic Coordination Committee of the cabinet’s decision No. ECC-155/12/2004 of December 9, 2004; (c) Persons importing urea; (d) Manufacturers covered under Notification SRO No. 1125(I)/2011; (e) Persons importing gold; (f) Persons importing cotton; and (g) Persons importing LNG. (2) 2% of the import value as increased by customs duty, sales tax, and federal excise duty for persons importing pulses. (3) 3% of the import value as increased by customs duty, sales tax, and federal excise duty for commercial importers covered under Notification SRO No. 1125(I)/2011 of December 31, 2011, and importing items covered under SRO No. 1125(I)/2011 of December 31, 2011. (4) 4% for persons importing coal. (5) 4% for persons importing finished pharmaceutical products that are not manufactured otherwise in Pakistan, as certified by the Drug Regulatory Authority of Pakistan. (6) 4.5% for ship breakers on import of ships. (7) 5.5% for industrial undertakings not covered under S. Nos. 1 to 6. (8) 5.5% for companies not covered under S. Nos. 1 to 7. (9) 6% for persons not covered under S. Nos. 1 to 8. (10) 1.75% of the import value as increased by customs duty, sales tax, and federal excise duty for industrial undertaking importing plastic raw material falling under PCT Heading 39.01 to 39.12 for its own use. (11) 4.5% of the import value as increased by customs duty, sales tax, and federal excise duty for commercial importer, importing plastic raw material falling under PCT Heading 39.01 to 39.12. The rate of tax on import of mobile phones by any person is as follows based on the cost and freight (c.f.r.) value of mobile phone in US dollar: (1) Rs 70 for those up to US$30; (2) Rs 730 for those exceeding US$30 and up to US$100; (3) Rs 930 for those exceeding US$100 and up to US$200; (4) Rs 970 for those exceeding US$200 and up to US$350; (5) Rs 3,000 for those exceeding US$350 and up to US$500; (6) Rs 5,200 for those exceeding US$500. The provisions of Section 148 do not apply on mobile phones brought in personal baggage under the Baggage Rules 2006 (under Clause (60E) of Part IV of the Second Schedule to the Income Tax Ordinance 2001). These tax rates are increased by 100% for persons whose names do not appear in the active taxpayers’ list under Rule 1 of the Tenth Schedule to the Income Tax Ordinance 2001.
Previously, the tax rates for non-filers varied with the type of import and for many categories were less than 100% greater than the rates for filers.

No advance tax on imports of tillage and seedbed preparation equipment, seeding or planting equipment, irrigation, drainage, and agrochemical application equipment, harvesting, threshing, and storage equipment, post-harvest handling and processing and miscellaneous machinery, as specified in Clause (91) (Annex-1) of Part-IV of Second Schedule to the Income Tax Ordinance 2001 is levied under Section 148.

Withholding tax under Section 148 on import of hybrid cars is collected at the following reduced rates: 100% for cars with engine capacity of up to 1200 cc, 50% for 1201–1800 cc, and 25% for 1801–2500 cc.

Effective July 1, 2019, the tax withheld on import from a commercial importer is a minimum tax. The policy for income and tax changed from a “final tax regime” to a “minimum tax regime” to improve the realization of the tax potential and reduce domestic and international transfer pricing for tax purposes. Previously, the final tax regime was applicable to commercial importers, traders of goods, contractors, brokerage and commission, etc. Persons involved in certain transactions were not required to pay tax on actual profit, maintain books of accounts, or undergo audit. Instead, the tax deducted or collected on these transactions was treated as final tax.

### Exports and Export Proceeds

**Repatriation requirements**

Yes. Proceeds must be repatriated through an AD by the due date or within six months of the date of shipment, whichever is earlier, except for hand-knotted carpets for which the repatriation time is 270 days from the date of shipment. Exporters may retain export proceeds, including advance payments in foreign currency, with an AD for three working days and sell them to ADs, who keep the retained proceeds in special exporters’ accounts.

**Surrender requirements**

Yes.

**Surrender to the central bank**

No.

**Surrender to authorized dealers**

Yes. Exporters are required to sell export proceeds in the interbank market within three working days. Exporters may retain between 2% and 15% of the f.o.b. value in their foreign exchange accounts to effect foreign payments for such expenses as advertising, purchases of designs and patterns, market studies, and bona fide export claims and to cover export proceeds, without SBP approval. For software and service sector exports, this limit is 35%. Exporters reporting an increase of more than 10% in export earnings may keep 50% of the additionally earned amount in foreign exchange accounts.
Financing requirements

Yes.
Foreign currency financing is available for a maximum of 180 days. All foreign exchange loans against intended exports may be settled only through export proceeds or remittances from abroad. However, to facilitate exporters, SBP has modified the above policy covering all aspects of foreign currency financing requirements from issuance of loans till their final settlements. Further, ADs have been delegated powers to settle outstanding export loans up to US$50,000 (or equivalent in other foreign currencies) themselves through interbank market.

Documentation requirements

Yes.
The documents required are a firm order, invoices, goods declaration, transport document of goods (B/L, AWB), and Form E. The goods declaration is filed by the exporter during the clearance of goods at ports/airports/etc. The Form E requirement does not apply to exports of textbooks for schools and colleges for Pakistani students and other institutions operating under embassies abroad. This exemption also applies to literary, religious, educational, and general books if the value of individual shipments does not exceed US$10,000 or its equivalent.

Letters of credit

No.

Guarantees

No.

Domiciliation

No.

Preshipment inspection

Yes.
As per S. No. 7, Schedule II of the Export Policy Order 2016, the export of rice is subject to the conditions and procedures specified by the Ministry of Commerce. At the moment, no specific procedure has been specified by the Ministry of Commerce. Whereas, as per S. No. 17, Schedule II of Export Policy Order 2016, the export of surgical instruments is subject to certificate/test report to be issued by the Sialkot Material Testing Laboratory. The Department of Plant Protection regulates the transborder management of consignments of plant and plant material under the Pakistan Plant Quarantine Act, 1976, and Rules, 1967, and International Standards of Phytosanitary Measures developed under the International Plant Protection Convention through its plant quarantine outposts established at all exit/entry points, the department issues phytosanitary certificates. Imports and exports of animal products are regulated through the Pakistan Animal and Quarantine Department (Import and Export of Animals and Animal Products) Ordinance, 1979 (Ordinance No. XLIXXX of 1979). The Marine Fisheries Department enforces Pakistan Fish Inspection and Quality Control Act, 1997, and issues certificates of quality for fish and fish products for exportation.

Other

No.

Export licenses

No.

Without quotas

No.

With quotas

No.

Export taxes

Yes.
An export development surcharge at 0.25% of export value is deducted under Section 11 of Finance Act 2019 by commercial banks from the foreign exchange proceeds realized on exports.

Collected through the exchange system

Yes.
Taxes apply as follows: (1) foreign exchange proceeds on exports of goods, 1%; (2) foreign exchange proceeds on account of an indent commission or agent commission 5% (Finance Act 2016); (3) foreign
exchange proceeds on inland back-to-back LCs or related arrangements, 1%; (4) exports of goods by an industrial enterprise in an EPZ, 1%; and (5) deduction by a direct exporter on payment to an indirect exporter, 1%. The following are exempt from export taxes: (1) exports of computer software, information technology (IT) services, and IT-enabled services, extended until, effective July 1, 2019, June 30, 2025 (provided 80% of the export proceeds is brought into Pakistan in foreign exchange remitted from outside Pakistan through normal banking channels); (2) exporters who are also manufacturers and registered for sales tax as exporters/manufacturers and are engaged in the manufacture of carpet, leather, and related articles; surgical goods; sporting goods; and textiles and related goods—are exempt from tax on their monthly electric bills; and (3) exporters of cooking oil and/or vegetable ghee to Afghanistan, if tax under Section 148 on imports of edible oil has already been paid.

This information can be found at the AREAER ONLINE database: http://www.elibrary-areaer.imf.org/Pages/Reports.aspx.

Payments for Invisible Transactions and Current Transfers

Controls on these transfers

Yes. ADs may issue foreign-currency-denominated traveler’s checks for any purpose, provided they are paid for with an equivalent amount of foreign currency. ECs may also transfer funds abroad on behalf of individuals, subject to related rules and regulations.

Trade-related payments

Yes. Pursuant to Finance Act 2019, effective July 1, 2019, the tax rate on brokerage or commission fee is 10% of the amount of the payment in the case of advertising agents; 8% of the amount of the payment in case of life insurance agents where commission received is less than Rs. 0.5 million an annum, and 12% of the amount of payment in all other cases. These tax rates are increased by 100% if the person’s name is not appearing in the active taxpayers’ list. Previously, for non-filers the tax rates were as follows: on brokerage or commission fee – 15% of the amount of the payment in the case of advertising agents, 16% of the amount of the payment in case of life insurance agents where commission received was less than Rs. 0.5 million an annum, and 15% of the amount of payment in all other cases. Exemptions under Part IV of the Second Schedule to the Income Tax Ordinance of 2001 apply to (1) special-purpose vehicles for securitization (Clause 38); (2) venture capital companies (Clause 38A); (3) individuals making payments to the National Investment Trust, a collective investment plan, a modaraba or approved pension fund, an approved income payment plan, a real estate investment trust plan, a private equity and venture capital fund, a recognized provident fund, an approved superannuation fund, or an approved gratuity fund (Clause 47B); (4) payments to the International Finance Corporation under the International Finance Corporation Act of 1956 (XXVII of 1956, Clause 67); (5) payments to the Asian Development Bank under the Asian Development Bank Ordinance of 1971 (IX of 1971, Clause 69); and (6) payments to the ECO Trade and Development Bank (Clause 72).

Prior approval

No.

Quantitative limits

No.

Indicative limits/bona fide test

Yes. Indicative limits or bona fide tests apply to the payment of commissions.

Investment-related payments

Yes. Pursuant to Finance Act 2015, remittance of dividends/profits by a company to its headquarters abroad is subject to a tax of 7.5% in the case of dividends declared or distributed by purchaser of a power project privatized by Water and Power Development Authority.
(WAPDA) or on shares of a company set up for power generation or on shares of a company, supplying coal exclusively to power generation projects; and 12.5% for filers and 17.5% for non-filers other than mentioned above.

**Prior approval**

No.

**Quantitative limits**

Yes. Effective November 29, 2018, caps on interest rates were prescribed according to the purpose of the loan as follows: (1) Project Financing 3–5 years: Benchmark rate + 350 bps; (2) Project Financing above 5 years: Benchmark rate + 600 bps; (3) Working Capital Financing 6–12 months: Benchmark rate + 200 bps; (4) Bridge Financing 6–12 months: Benchmark rate + 200 bps; (5) Import Loans 2–5 years: Benchmark rate + 350 bps; (6) Export Loans up to 240 days: Benchmark rate + 200 bps. Previously, interest payments were allowed up to 1.5% over LIBOR on borrowing for general purposes. Foreign-controlled companies could borrow at LIBOR +1% for their working capital requirements. However, project loans were contracted on best possible terms.

**Indicative limits/bona fide test**

No.

**Payments for travel**

Yes.

**Prior approval**

No.

**Quantitative limits**

No.

**Indicative limits/bona fide test**

Yes. ADs may provide travel allowances in bona fide cases.

**Personal payments**

Yes. Foreign exchange allowances for students’ tuition fees and expenses, as required by institutions, may be obtained from ADs without approval from the SBP. No restrictions apply under Pakistan’s insurance laws. The SBP’s Foreign Exchange Manual provides additional clarification.

ADs may remit foreign exchange on behalf of the Hajj Group Organizers (HGOs) to vendors/service providers in Saudi Arabia under certain conditions. Total remittances per pilgrim into account of HGO/direct payments to vendors in Saudi Arabia must not exceed 80% of the Hajj Package being offered to the individual pilgrim. In case aggregate remittance against all services by an HGO on any given day exceeds US$100,000, the concerned HGO will approach the Exchange Policy Department, SBP, along with related details through the concerned AD for prior approval. To facilitate the HGOs to make arrangements of Maktab, housing, catering, transportation, guides, etc., in Saudi Arabia, the ADs have been allowed to make advance remittances on behalf of HGOs up to 30% of the individual Hajj Package through interbank market.

ADs can make remittances on behalf of the Umrah Organizers directly to vendors/service providers in Saudi Arabia on account of booking of hotels, transport, and other associated purpose(s), if any. AD may remit in foreign exchange up to US$ 50,000 a transaction on behalf of resident Pakistanis for medical treatment. ADs may also remit to educational institutions abroad on behalf of Pakistani students up to US$ 70,000 a student a calendar year. For amounts in excess of these limits, ADs may submit the requests to the SBP with supporting documentation.

ADs may release foreign exchange up to a maximum of US$100,000 on an invoice with respect to payments for IT services. This applies to companies incorporated in Pakistan and branches of foreign companies that operate in Pakistan with the permission of the Board of Investment and that pay local taxes and repatriate their profits abroad. ADs may remit lease payments by airlines incorporated in Pakistan up to the guaranteed hours; payments for time over the guaranteed hours require SBP approval.

SBP approval is required for ECs to make outward remittances or sale of foreign currency to customers of more than US$50,000 or its equivalent (FE Circular No. 6 of 2008). However, this requirement does not apply to sales of foreign currency to banks or ECs. No limits apply to subscriptions and membership fees paid by individuals.

The SBP, in consultation with SECP, allowed local insurance companies to issue US-dollar-denominated insurance policies on a notional basis to meet the condition of foreign lenders for foreign currency loans. Issuers must obtain a recommendation letter from the SECP for each issuance proposal as prescribed in SECP Circular of December 11, 2017. However, premium and claims are required to be paid in PKR only.

</tr>
</tbody>
</table>

The proceeds from invisible earnings have to be repatriated to Pakistan; however, there is no deadline for it.

Proceeds of foreign exchange earnings must be sold to an AD. It is permissible for exporters to retain the export proceeds, including advance payments in foreign currency, with an AD in Pakistan for three working days and to sell them within this period to any AD.

eligible investors against remittance from abroad through the banking channel, from investor’s own account maintained abroad. Effective April 10, 2018, the GOP has also issued US-dollar-denominated bonds under a tax amnesty scheme for declaration of foreign assets held abroad and domestic assets. Investment in these bonds could originally be made until June 30, 2018, only against repatriation of foreign assets from abroad and foreign currency balances (as of March 31, 2018) held in Pakistan. Citizens of Pakistan who have declared their foreign assets and domestic foreign currency accounts under the tax amnesty scheme were eligible to invest in these bonds. The scheme was extended effective July 1, 2018, until July 31, 2018, when it expired.

**Purchase locally by nonresidents**  
No. Nonresidents are allowed to trade in registered corporate debt instruments and bonds listed on the stock exchange, federal investment bonds, Pakistan investment bonds, and market treasury bills through SCRaPs maintained with designated banks. Foreign bank branches in Pakistan and foreign-controlled investment banks may invest in registered, listed corporate debt instruments in the primary and secondary markets as prescribed by the SBP from time to time. There is no minimum holding period requirement for bonds or debt securities.

**Sale or issue locally by nonresidents**  
Yes. Nonresidents are allowed to sell bonds or other debt securities through SCRaPs maintained with designated banks. Nonresidents may solicit subscriptions in Pakistan with SECP approval, under Section 446 of the Companies Act 2017.

**Purchase abroad by residents**  
Yes. SBP approval is required for investment abroad by residents. Locally established mutual funds are allowed to invest abroad for the purposes of diversifying their asset classes or portfolios up to 30% of the aggregate funds mobilized (including foreign currency funds) in permissible categories, subject to a cap of US$15 million or its equivalent at any given time. Approval of the SBP and the SECP is required (FE Circular No. 11 of August 12, 2005).

**Sale or issue abroad by residents**  
Yes. Residents may sell or issue securities with SECP approval, under Section 95 of Securities Act 2015. The proceeds must be remitted through an AD as indicated in Foreign Exchange Manual.

**On money market instruments**  
Yes. No controls apply to the purchase of certificates of investment, Pakistan investment bonds, market treasury bills, or term finance certificates by nonresidents.

**Purchase locally by nonresidents**  
No. Nonresidents are not permitted to issue such instruments in Pakistan.

**Sale or issue locally by nonresidents**  
Yes. These transactions are not permitted through ADs.

**Purchase abroad by residents**  
Yes. Residents may sell or issue money market instruments after obtaining approval from the SECP. Subject to the approval of the SBP, the proceeds associated with these issues must be repatriated to Pakistan as indicated in the SBP Foreign Exchange Manual and foreign exchange circulars issued by the SBP. These proceeds may be used to purchase plant equipment or machinery from abroad. Funds may be transferred to service these securities issues.

**Sale or issue abroad by residents**  
Yes. Nonresidents may solicit subscriptions in Pakistan with SECP approval.

**On collective investment securities**  
Yes. These transactions are generally not permitted through ADs.

Guarantees, securities, and financial backup facilities issued by companies to nonresident directors of companies are subject to compliance with Section 182 of the Companies Act 2017, which prescribes that guarantees, loans, and securities to directors (residents or nonresident) be granted after the approval of SECP and for the given purpose only.

These transactions are subject to compliance with other credit controls.

Direct investment abroad requires approval under foreign exchange laws. Pakistanis as well as residents, including firms and companies, may make equity-based investments, other than portfolio investments, in companies abroad (for example, joint ventures); however, proceeds from such investments must be repatriated. Investments in associated foreign companies/enterprises are subject to compliance with Section 199 of the Companies Act 2017, which requires prior approval of members in a general meeting.

Regulation No. 5(7) of the Companies (Investment in Associated Companies or Associated Undertakings) Regulations 2017 in force since December 6, 2017, specifies that a company may not extend to an associated company or associated undertaking any loan or advance as running finance, revolving line of credit or any other similar facility for a period beyond one year. Members may approve renewal of such loans or advances pursuant to Section 199 of the Act. Substantial shareholders or officers of companies having shareholding in a foreign company or corporate body must report to the company their shareholding in specified manner from May 31, 2017. Companies must report to the Commission the information received during the year, through the annual return.

Approval is not required for investment in the manufacturing, agriculture, infrastructure, social, and services sectors, except the banking sector. There is no minimum foreign equity investment requirement in any sector except banking. There is no upper limit on the share of foreign equity, except in specific sectors, including airlines, banking, agriculture, and media. Investment in arms and ammunition, security, printing, currency and minting, high explosives, and radioactive substances requires approval. New investment in the production of alcoholic beverages is prohibited.

The disinvestment proceeds emerging from outward FDI are required to be repatriated to Pakistan through normal banking channels. There are no controls on the disinvestment proceeds due to be repatriated in terms of the inward FDI and it is allowed to be freely remitted from Pakistan.

Residents are not permitted to purchase real estate abroad.

<th>Yes.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Banks are required to maintain domestically not less than 80% of their assets against time and demand liabilities. Foreign-controlled investment banks are permitted to borrow locally for their working capital requirements up to 100% of their paid-up capital, reserves, etc., subject to nonbank financial institution rules. Effective November 25, 2018, aggregate liabilities, excluding contingent liabilities and security deposits, of a non-deposit-taking nonbank finance company (NBFC) may not exceed ten times of its equity. Contingent liabilities of a NBFC may not exceed the following maximum limits based on credit rating: 2 times of equity for AA- and above; 1.5 times of equity for A- to A+; 0.5 times of equity for BBB+. Previously, aggregate liabilities, excluding contingent liabilities and security deposits, of a NBFC could not exceed seven times its equity for the first two years of operations and ten times its equity in subsequent years, and its contingent liabilities could not exceed seven times its equity for the first two years of its operation and ten times its equity in subsequent years. A deposit-taking NBFC is required to maintain CAR of 8% for the first two years from coming into force of amendments made in Nonbank Finance Companies and Notified Entities Regulations 2008 through SRO of November 25, 2015, and 10% for subsequent years following the criteria in Schedule IX A of Nonbank Finance Companies and Notified Entities Regulations 2008.</td>

ADs may grant rupee loans to the foreign-controlled companies subject to observance of Prudential Regulations prescribed under the Banking Companies Ordinance. Credits of up to six months are permitted with respect to exported goods. Effective November 29, 2018, foreign-controlled companies registered in Pakistan under the Companies Act 2017 may borrow from local sources in PKR for any purpose except for the purchase of shares. Previously, they could borrow in PKR to meet their working capital requirements, and foreign-controlled companies engaged in manufacturing were also permitted to borrow from local sources for capital expenditure.

ADs may open foreign currency accounts and extend trade loans under the FE-25 program in US dollars, pounds sterling, euros, Japanese yen, Canadian dollars, U.A.E. dirhams, Saudi Arabian riyals, Chinese renminbi, Swiss francs, and Turkish liras. Interbank placements and swaps and other sources of foreign currency liquidity permitted under SBP rules and regulations may be used to extend trade loans in the above currencies. However, the currency of the loan must be the same as that of the underlying LC/firm trade contract (Foreign Exchange Circular No. 04 of September 4, 2012).

There is no regular issuance of foreign-currency-denominated securities in the domestic market. ADs are not allowed to use FE-25 deposits for foreign-currency-denominated instruments below investment grade.

All bank and nonbank financial institutions that accept foreign currency deposits may use deposited funds freely in Pakistan. Any other use is subject to prudential regulations.

The cash reserve requirement (CRR) for all conventional banks is a fortnightly average of 5% (subject to a daily minimum of 3%) on total demand liabilities and time deposits with a tenor of less than one year. Time liabilities (excluding time deposits with a tenor of less than one year) are exempt from the CRR. Development finance institutions (DFIs) must maintain a CRR of 1% of their total time and demand liabilities during the reserve maintenance period. The reserve maintenance period for banks and DFIs is two weeks starting on a Friday and ending on a Thursday. Liabilities subject to the statutory liquidity requirement (SLR) as of close of business on Friday (the first day of the reserve maintenance period) are taken into account for determination of the required CRR. Microfinance banks must keep a CRR equivalent to 5% of deposits (including demand deposits and time deposits with a tenor of less than one year).

Foreign currency deposits raised under FE Circular No. 25 of 1998 are subject to the CRR and a special cash reserve requirement (SCRR). The CRR on foreign currency deposits of commercial banks is 5%; the SCRR is 15%. The CRR on foreign currency deposits of Islamic banks is 5%; the SCRR is 6%. There is no system of averaging period being adopted for the reserve requirement on foreign currency deposits. The reserve maintenance week starts from Friday and end on following Thursday. For this reserve maintenance period, all the relevant ratios are required to be maintained on daily basis based on foreign currency balances as of previous Friday (that

©International Monetary Fund. Not for Redistribution
Deposit-taking NBFCs must keep 15% of their customer deposits (excluding deposits of financial institutions) in government securities or instruments or investments prescribed by the Commission. Such investments or instruments must be valued at cost or market value whichever is lower and any shortfall in the value of such investments or instruments must be immediately made up. Provided these instruments or investments are for the benefit of the depositors only, such instruments must be kept unencumbered and disclosed separately in the financial statements of the NBFC. This condition also applies to a deposit-taking NBFC whose permission to raise deposits has been suspended or cancelled until all deposits have been repaid.

**Liquid asset requirements** Yes. The SLR for all banks is 19% of total demand liabilities and time deposits with tenors of less than one year. Time liabilities (excluding time deposits with a tenor of less than one year) are not subject to the SLR. SLR for Islamic banks/Islamic banking branches is 14%. The DFIs must keep 15% of their total time and demand liabilities as SLR. Microfinance banks must keep an SLR equivalent to 10% of total demand liabilities and time liabilities with a tenor of less than one year.

**Interest rate controls** No.

**Credit controls** No.

**Differential treatment of deposit accounts held by nonresidents** No.

**Reserve requirements** No.

**Liquid asset requirements** No.

**Interest rate controls** No.

**Credit controls** No.

**Investment regulations** Yes.

**Abroad by banks** Yes. Banks accepting foreign currency deposits may not invest these funds in foreign-currency- or local-currency-denominated instruments below investment grade. They may not invest or place such deposits in fund management plans of other banks, DFIs, or NBFCs in Pakistan or abroad. The investing bank may not place in a single institution an amount exceeding 25% of the total investable funds, available with the investing bank, under the FE-25 Deposit Scheme. Banks must comply with all other relevant prudential regulations.

**In banks by nonresidents** Yes. Investment by nonresidents is allowed in banks. However, 5% or more shareholding is subject to SBP approval.

**Open foreign exchange position limits** Yes. The foreign exchange exposure limit (FEEL) is applicable on overall basis irrespective of resident or nonresident status of assets and liabilities.

**On resident assets and liabilities** Yes. The FEEL is applicable on overall basis irrespective of resident or nonresident status of assets and liabilities. The aggregate FEEL for each bank is 20% of its audited paid-up capital (free of losses). The maximum FEEL is PRs 3.5 billion. However, the SBP reserves the right to assign a FEEL to any bank below 20% of its paid-up capital (free of losses) based on trends observed in its FEEL utilization.

**On nonresident assets and liabilities** Yes. The FEEL is applicable on overall basis irrespective of resident or nonresident status of assets and liabilities. The aggregate FEEL for
each bank is 20% of its audited paid-up capital (free of losses). The maximum FEEL is PRs 3.5 billion. However, the SBP reserves the right to assign a FEEL to any bank below 20% of its paid-up capital (free of losses) based on trends observed in its FEEL utilization.

Provisions specific to institutional investors

Yes.

Insurance companies

Yes.

The SBP, in consultation with SECP, allowed local insurance companies to issue US-dollar-denominated insurance policies on a notional basis to meet the condition of foreign lenders for foreign currency loans. Issuers must obtain a recommendation letter from the SECP for each issuance proposal as prescribed in SECP Circular of December 11, 2017. However, premium and claims are required to be paid in PKR only.

Limits (max.) on securities issued by nonresidents

Yes.

Nonresidents’ issuance of securities in the local market requires SECP approval. Resident insurance companies may purchase securities issued by nonresidents, if these securities have been approved by the SECP, on their own behalf with no restrictions. However, these investments may or may not be admissible for determining the solvency of an insurance company, depending on whether the company in question has exceeded the limits under Section 32 of Insurance Ordinance 2000 read with Rule No. 12 of the Insurance Rules 2017.

Investment for the purpose as per Section 32(6) of the Insurance Ordinance 2000 includes all forms of shares, debentures, bonds, deposits, and other securities and derivative instruments, and includes immovable property whether or not occupied by the insurer.

Limits (max.) on investment portfolio held abroad

Yes.

Resident insurance companies may invest abroad on their own behalf with no restrictions. However, these investments may or may not be admissible for determining the solvency of an insurance company, depending on whether the company in question has exceeded the limits under Section 32 of Insurance Ordinance 2000 read with Rule No. 12 of the Insurance Rules 2017.

Limits (min.) on investment portfolio held locally

Yes.

Under Section 35 read with Rule No. 16 of the Insurance Rules 2017, 30% of the shareholder or statutory fund of a life insurer other than the portion with investment-linked policies alone must be invested in government securities. An additional 10% must be invested in a combination of government securities and other approved securities. Approved securities are defined in Section 2(iii) of the Insurance Ordinance as government securities and other securities based on the revenues of the federal government or of a provincial government, guaranteed fully as regards principal and profit or return (however called or designated) by the federal government or a provincial government, and debentures and other securities issued under the authority of an act of the federal legislature or any provincial legislature by or on behalf of the trustees of the port of Karachi; securities issued under the authority of any act of parliament or of a provincial assembly; and securities specified as approved for the purpose of this ordinance by the federal government by notification in the official gazette.

Insurers are also required to keep minimum deposits with the SBP under Section 29 of Insurance Ordinance 2000, which must be higher of 10 million rupees or 10% of the insurers paid-up capital, provided the Commission may, subject to achievement of levels of solvency as required by this ordinance, abolish the requirement for deposits specified by this section by reducing the required minimum amount to zero.

Currency-matching regulations on assets/liabilities composition

No.

If a life insurer is engaged in life insurance business in a currency other than the local currency where its liabilities—including policy holder liabilities—are, then all assets pertaining to those policies...
must be in that currency for the purpose of determining solvency as stated under Section 35(5) of the Insurance Ordinance of 2000 read with Rule No. 14 of the Insurance Rules 2017. Section 14(6) of the Insurance Ordinance of 2000 requires a separate statutory fund for policies issued outside Pakistan. Section 32(4) of the Insurance Ordinance of 2000 allows shares of a company incorporated outside Pakistan to be included for the purpose of determining the solvency of an insurance company, depending on whether the company has exceeded the limits under Section 32 of the Insurance Ordinance of 2000 read with Rule No. 12 of the Insurance Rules 2017. Accounting of such transactions falls under International Accounting Standard (IAS) 21.

Pension funds

Yes. Only locally incorporated life insurance companies and asset management companies are allowed to offer pension funds. Pension funds may invest in local equity, debt, money markets, and commodity future contracts traded on the PMEX. Other investments, including overseas investment, are subject to SECP approval.

Limits (max.) on securities issued by nonresidents

Yes. Pension funds may invest in local equity, debt, money markets, and commodity future contracts traded on the PMEX. Other investments, including overseas investment, are subject to SECP approval.

Limits (max.) on investment portfolio held abroad

Yes. Pension funds may invest in local equity, debt, and money markets. Other investments, including overseas investment, are subject to SECP approval.

Limits (min.) on investment portfolio held locally

Yes. The investment policy issued for pension funds sets various sector and security limits. Rule 24 of Voluntary Pension System Rules specified by the Commission indicates the relevant limits.

Currency-matching regulations on assets/liabilities composition

No.

Investment firms and collective investment funds

Yes. For purposes of diversifying their asset classes or portfolios, locally established mutual funds are allowed to invest abroad up to 30% of aggregate funds (including foreign currency funds) in permissible categories, subject to a cap of US$15 million or its equivalent at any given time. Approval of the SBP and the SECP is required.

Limits (max.) on securities issued by nonresidents

Yes. The SBP approves investment abroad and imposes limits on investment amounts. For purposes of diversifying their asset classes or portfolios, locally established mutual funds are allowed to invest abroad up to 30% of aggregate net assets of a fund (including foreign currency funds) in permissible categories, subject to a cap of US$15 million or its equivalent at any given time. Approval of the SBP and the SECP is required.

Limits (max.) on investment portfolio held abroad

Yes. Collective investment schemes are not allowed to invest more than 10% of their total net assets in a single entity; 25% in securities of a single sector, as classified by the stock exchange; and 35% in a single group, with a 10% limit for listed group companies of the AMC managing the fund. However, separate exposure limits have been defined for certain types of collective investment schemes. Regulation 55 of NBFC Regulations 2008 stipulates specific exposure limits for different types of funds.

Limits (min.) on investment portfolio held locally

Yes. The investment policy issued for pension funds sets various sector and security limits. Rule 24 of Voluntary Pension System Rules specified by the Commission indicates the relevant limits.

Currency-matching regulations on assets/liabilities composition

No.

This information can be found at the AREAER ONLINE database: http://www.elibrary-areaer.imf.org/Pages/Reports.aspx.

Changes during 2018 and 2019
Exchange Arrangement

The de facto exchange rate arrangement was reclassified retroactively to “other managed” from “stabilized,” effective December 11, 2017. The change is reflected as of January 1, 2018, corresponding to the first day of the period covered in this year’s Annual Report on Exchange Arrangements and Exchange Restrictions.

Foreign exchange market

The margin between the buying and selling rates within which ADs may determine their own rates of exchange was increased to 50 paisa from 20 paisa per US dollar or its equivalent in other currencies.

Spot exchange market

Banks are limited to a spread of 50 paisa (previously 20 paisa) in all foreign currency quotes to customers.

Arrangements for Payments and Receipts

Controls on exports and imports of banknotes

On exports

Domestic currency

An individual may take out up to PRs 3,000 (previously PRs 500) to India and PRs 10,000 (previously PRs 3,000) to other countries.

On imports

Domestic currency

Any person may bring into Pakistan up to Rs 3,000 (previously PRs 500) from India and Rs 10,000 (previously PRs 3,000) from other countries.

Resident Accounts

A foreign currency account of a citizen of Pakistan resident in Pakistan may be credited with cash foreign currency only if the account holder is a filer as defined in Income Tax Ordinance of 2001 (previously, irrespective of tax filer status).

Nonresident Accounts

Banks may open and maintain two categories of nonresident rupee accounts for individuals and entities without prior approval of the State Bank.

(1) Nonresident Rupee Account-Repatriable (NRAR): Debit and credits of such accounts are subject to applicable regulations. An ATM/debit card to the account holder and supplementary ATM/debit cards in the name of family members of the account holder resident in Pakistan may be issued. These cards may be used for transactions in and outside Pakistan.

(2) Nonresident Rupee Account-Non-repatriable (NRAN): All legitimate debit and credit transactions in these accounts as those permissible for resident PKR accounts are allowed. However, the funds available in these accounts may not be used abroad through ATM/debit cards or other delivery channels. Previously, banks could open nonresident accounts for nonbank nonresidents without SBP approval if the accounts were opened with funds received from abroad through banking channels or with rupee funds accepted for remittance abroad. Debits and credits to nonresident accounts for specified purposes could be made by authorized banks without approval. Foreign shipping companies and airlines with offices or agents in Pakistan could open and operate interest-bearing rupee accounts, provided the interest was used only to meet local expenses. Banks could issue bank cards as well as supplementary bank cards to
individual nonresident rupee account holders. Withdrawals were allowed only in Pakistan.

**Imports and Import Payments**

**Financing requirements for imports**

**Advance payment requirements**

07/14/2018  
Advance payments against irrevocable LCs up to 100% of the value of the goods and up to US$10,000 an invoice for the import of all eligible items without the requirement of LC or bank guarantee from the supplier abroad by ADs on behalf of importers were restricted to support balance of payments. However, in cases, where ADs deem that an importer’s request for advance payments merits consideration, they may approach the SBP on a case-by-case basis for approval.

08/29/2018  
ADs were allowed to make advance payment up to US$10,000 or equivalent an invoice without the requirement of LC or bank guarantee from the supplier for the import of the following items: (1) Essential medicines and devices, (2) Aircraft-related spare parts and components, (3) Laboratory equipment and instruments imported by educational institutions for their own use, (4) Newspapers, magazines, periodicals, books, etc.

09/14/2018  
ADs were allowed to make advance payment up to US$50,000 or equivalent an invoice for import of life-saving medicines and devices.

01/01/2019  
ADs were allowed to make advance payment up to US$10,000 or equivalent an invoice without the requirement of LC or bank guarantee from the supplier for the import of raw materials and spare parts by importers and exporters for their own use only.

**Import licenses and other nontariff measures**

**Licenses with quotas**

06/14/2018  
SRO No. 772(I)/2018 repealed SRO No. 1112(1)/2014 making imports of arms and ammunition listed at Sr. No. 65 of Part (I) of Appendix-B of IPO 2016 importable subject to the licensing conditions listed in SRO No. 772. Previously, they were allowed on a quantity basis and were regulated on the basis of quota allocation for reasons of public order.

**Import taxes and/or tariffs**

07/01/2019  
The tax withheld on import from a commercial importer is a minimum tax. The policy for income and tax changed from a “final tax regime” to a “minimum tax regime” to improve the realization of the tax potential and reduce domestic and international transfer pricing for tax purposes. Previously, the final tax regime was applicable to commercial importers, traders of goods, contractors, brokerage and commission, etc. Persons involved in certain transactions were not required to pay tax on actual profit, maintain books of accounts, or undergo audit. Instead, the tax deducted or collected on these transactions was treated as final tax.

07/01/2019  
Pursuant to Finance Act 2019, the rates of tax to be collected by the Collector of Customs under Section 148 are as follows: (1) 1% of the import value as increased by customs duty, sales tax, and federal excise duty for (a) Industrial undertaking importing remeltable steel (PCT Heading 72.04) and directly reduced iron for its own use; (b) Persons importing potassic fertilizers in pursuance of Economic Coordination Committee of the cabinet’s decision No. ECC-155/12/2004 of December 9, 2004; (c) Persons importing urea; (d) Manufacturers covered under Notification SRO No. 1125(I)/2011; (e) Persons importing gold; (f) Persons importing cotton; and (g) Persons importing LNG. (2) 2% of the import value as increased by customs duty, sales tax, and federal excise duty for persons importing pulses. (3) 3% of the import value as increased by customs duty, sales tax, and federal excise duty for commercial importers covered under Notification SRO No. 1125(I)/2011 of December 31, 2011, and importing items covered under SRO No. 1125(I)/2011 of December
31, 2011. (4) 4% for persons importing coal. (5) 4% for persons importing finished pharmaceutical products that are not manufactured otherwise in Pakistan, as certified by the Drug Regulatory Authority of Pakistan. (6) 4.5% for ship breakers on import of ships. (7) 5.5% for industrial undertakings not covered under S. Nos. 1 to 6. (8) 5.5% for companies not covered under S. Nos. 1 to 7. (9) 6% for persons not covered under S. Nos. 1 to 8. (10) 1.75% of the import value as increased by customs duty, sales tax, and federal excise duty for industrial undertaking importing plastic raw material falling under PCT Heading 39.01 to 39.12 for its own use. (11) 4.5% of the import value as increased by customs duty, sales tax, and federal excise duty for commercial importer, importing plastic raw material falling under PCT Heading 39.01 to 39.12.

The rate of tax on import of mobile phones by any person is as follows based on the c.f.r. value of mobile phone in US dollar: (1) Rs 70 for those up to US$30; (2) Rs 730 for those exceeding US$30 and up to US$100; (3) Rs 930 for those exceeding US$100 and up to US$200; (4) Rs 970 for those exceeding US$200 and up to US$350; (5) Rs 3,000 for those exceeding US$350 and up to US$500; (6) Rs 5,200 for those exceeding US$500. The provisions of Section 148 do not apply on mobile phones brought in personal baggage under the Baggage Rules 2006 (under Clause (60E) of Part IV of the Second Schedule to the Income Tax Ordinance 2001). These tax rates are increased by 100% for persons whose names do not appear in the active taxpayers’ list under Rule 1 of the Tenth Schedule to the Income Tax Ordinance 2001. Previously, the tax rates for non-filers varied with the type of import and for many categories were less than 100% greater than the rates for filers.

Exports and Export Proceeds

Export taxes

<table>
<thead>
<tr>
<th>Other export taxes</th>
<th>07/01/2019</th>
</tr>
</thead>
<tbody>
<tr>

</tbody>
</table>

Pursuant to Finance Act 2019, the tax rate on brokerage or commission fee is 10% of the amount of the payment in the case of advertising agents; 8% of the amount of the payment in case of life insurance agents where commission received is less than Rs. 0.5 million an annum, and 12% of the amount of payment in all other cases. These tax rates are increased by 100% if the person’s name is not appearing in the active taxpayers’ list. Previously, for non-filers the tax rates were as follows: on brokerage or commission fee – 15% of the amount of the payment in the case of advertising agents, 16% of the amount of the payment in case of life insurance agents where commission received was less than Rs. 0.5 million an annum, and 15% of the amount of payment in all other cases.

Investment-related payments

</tbody>
</table>

Caps on interest rates were prescribed according to the purpose of the loan as follows: (1) Project Financing 3–5 years: Benchmark rate + 350 bps; (2) Project Financing above 5 years: Benchmark rate + 600 bps; (3) Working Capital Financing 6–12 months: Benchmark rate +
200 bps; (4) Bridge Financing 6–12 months: Benchmark rate + 200 bps; (5) Import Loans 2–5 years: Benchmark rate + 350 bps; (6) Export Loans up to 240 days: Benchmark rate + 200 bps. Previously, interest payments were allowed up to 1.5% over LIBOR on borrowing for general purposes. Foreign-controlled companies could borrow at LIBOR +1% for their working capital requirements. However, project loans were contracted on best possible terms.

Capital Transactions

The Government of Pakistan issued US-dollar-denominated bonds under a tax amnesty scheme for declaration of foreign assets held abroad and domestic assets. Investment in these bonds could be made until June 30, 2018, only against repatriation of foreign assets from abroad and foreign currency balances (as of March 31, 2018) held in Pakistan. Citizens of Pakistan who declared their foreign assets and domestic foreign currency accounts under the tax amnesty scheme were eligible to invest in these bonds.

The tax amnesty scheme was extended until July 31, 2018.

The Government of Pakistan (GOP) tax amnesty scheme, in which citizens of Pakistan who declared their foreign assets and domestic foreign currency accounts were eligible to invest in GOP US-dollar-denominated bonds, expired.

The Government of Pakistan launched US-dollar-denominated Pakistan Banao Certificates mainly for overseas Pakistanis. Investment in these certificates may only be made by eligible investors against remittance from abroad through the banking channel, from investor’s own account maintained abroad.

Provisions Specific to the Financial Sector

Aggregate liabilities, excluding contingent liabilities and security deposits, of a non-deposit-taking nonbank finance company may not exceed ten times of its equity. Previously, they could not exceed seven times its equity for the first two years of operation and ten times its equity in subsequent years.

Contingent liabilities of a nonbank finance company may not exceed the following maximum limits based on credit rating: 2 times of equity for AA- and above; 1.5 times of equity for A- to A+; 0.5 times of equity for BBB+. Previously, its contingent liabilities could not exceed seven times its equity for the first two years of its operation and ten times its equity in subsequent years.

The following requirements apply to banks for raising foreign currency loans from international financial institutions for liquidity management: (1) Banks are allowed to raise loans up to 100% (previously 50%) of unimpaired capital. (2) Banks may deploy the loan proceeds locally in the interbank market including financing of trade transactions. Previously, banks could use the funds only by entering into swaps in the interbank market. (3) Banks may raise these loans on Benchmark rate + 350 bps (previously LIBOR+1.5%). Previously, there was also a requirement that the net forward purchases in foreign currency could not be lower than the outstanding loan amount.

Foreign-controlled companies registered in Pakistan under the Companies Act 2017 may borrow from local sources in PKR for any
purpose except for the purchase of shares. Previously, they could
borrow in PKR to meet their working capital requirements, and
foreign-controlled companies engaged in manufacturing were also
permitted to borrow from local sources for capital expenditure.
PALAU
(Position as of December 31, 2018)

Status under IMF Articles of Agreement

This information can be found at the AREAER ONLINE database: http://www.elibrary-areaer.imf.org/Pages/Reports.aspx.

There are no limitations on the use of domestic currency in international payments for current or capital transactions.
Use of foreign exchange among residents  No. Foreign exchange may be used freely among residents.

**Payments arrangements**  Yes.

Bilateral payments arrangements  No.

Operative  No.

Inoperative  No.

Regional arrangements  Yes. Palau is in the process of negotiating its participation in PACER and PICTA. Palau has signed on to PACER; however, it has not ratified it. There is another subsidiary arrangement called PACER Plus which Palau has yet to sign or ratify. As for PICTA, Palau has signed on to Trade in Services (TIS) but has not yet ratified it, while it is yet to sign Trade in Goods (TIG). Palau does support the regional efforts and introductions of PACER and PICTA for Pacific island economies to develop their private sector’s ability to trade and enter new markets but is limited in its participation because of its MFN clause under Palau-US COFA (Compact of Free Association). At the moment, Palau continues to receive funding assistance from Pacific Islands Forum Secretariat (PIFS), Australia and New Zealand, to improve institutions, facilities and for the National Government to implement PACER and PICTA when Palau does eventually sign and ratify said agreements.

Clearing agreements  No.

Barter agreements and open accounts  No.

Administration of control  No.

Payments arrears  No.

Official  No.

Private  No.

**Controls on trade in gold (coins and/or bullion)**  No.

On domestic ownership and/or trade  No.

On external trade  No.

**Controls on exports and imports of banknotes**  No. No restrictions apply to exports or imports of banknotes; however, transactions that exceed the equivalent of US$10,000 and appear suspicious must be reported under the provisions of the Money Laundering Act.

On exports  No.

**Domestic currency**  No.

Foreign currency  No.

On imports  No. No restrictions apply to exports or imports of banknotes; however, transactions that exceed the equivalent of US$10,000 and appear suspicious must be reported under the provisions of the Money Laundering Act.

**Domestic currency**  No.

Under the Palau National Code, all foreign investment must be approved by the Foreign Investment Board. Foreign nationals, except those who invest jointly with a Palauan national, may not invest in certain categories. The 2011 Foreign Investment Regulations detail the restricted and semi-restricted sectors. The following businesses are reserved solely for Palauan citizens: (1) wholesale or retail sale of goods; (2) all land transportation including bus services, taxi services, and car rentals; (3) tour guides, fishing guides, diving guides, and any other form of water transportation services; (4) travel and tour agencies; and (5) commercial fishing for other than highly migratory species. While these businesses are officially closed to foreign investment, there is a prevalent use of partnership companies.
in several categories, in which the foreign investor owns less than 50%. The retail sector, as well as travel- and tour-related businesses, currently has numerous foreign investors via such partnership companies. In semi-restricted sectors (pursuant to regulations from 2010), businesses can include foreign ownership as long as a Palauan citizen also has an ownership interest. There are no minimum or maximum requirements for percentage ownership for the foreign investor as long as the monetary and/or Palauan-employment minimums for all foreign investments are met. These semi-restricted businesses are: (1) handicraft and gift shops; (2) bakeries; (3) bar services; (4) operations/selling products being produced by wholly Palauan-owned manufacturing enterprise; (5) equipment rentals for both land and water within the Republic, including equipment for purpose of tourism; and (6) any such other businesses, as the Foreign Investment Board may determine. Sectors not listed as either closed or semi-restricted are presumed to be open for foreign investment. The Foreign Investment Board may, however, amend the semi-restricted sector list for “any such other businesses as the Board may determine.”

According to the constitution, only Palau nationals and corporations wholly owned by Palau nationals may acquire title to land or waters in Palau.

Provisions Specific to the Financial Sector

Provisions specific to commercial banks and other credit institutions

Specific provisions apply only to the National Development Bank of Palau, a government-owned bank that is not involved in commercial
Borrowing abroad  No.

Maintenance of accounts abroad  No.

Lending to nonresidents (financial or commercial credits)  No.

Lending locally in foreign exchange  No.

Purchase of locally issued securities denominated in foreign exchange  No.

Differential treatment of deposit accounts in foreign exchange  No.
  Reserve requirements  No.
  Liquid asset requirements  No.
  Interest rate controls  No.
  Credit controls  No.

Differential treatment of deposit accounts held by nonresidents  No.
  Reserve requirements  No.
  Liquid asset requirements  No.
  Interest rate controls  No.
  Credit controls  No.

Investment regulations  No.

Abroad by banks  No.

In banks by nonresidents  No.

Open foreign exchange position limits  No.
  On resident assets and liabilities  No.
  On nonresident assets and liabilities  No.

Provisions specific to institutional investors  Yes.
  Insurance companies  No.
  Limits (max.) on securities issued by nonresidents  No.
  Limits (max.) on investment portfolio held abroad  No.
  Limits (min.) on investment portfolio held locally  No.
  Currency-matching regulations on assets/liabilities composition  No.
  Pension funds  Yes.

Limits are imposed on the Civil Service Pension Plan for risk-management purposes—“The assets of the Fund may be invested in stocks, bonds, negotiable instruments, real properties, or such other financial instruments or other assets as the Agent may determine; provided all the assets must be invested with the highest standard of...
care to ensure the preservation of the principal of the Fund. Investment in speculative ventures of any kind or nature is expressly prohibited.”

| Limits (max.) on securities issued by nonresidents | No. | No restrictions. |
| Limits (max.) on investment portfolio held abroad | No. | No restrictions. |
| Limits (min.) on investment portfolio held locally | No. | No restrictions. |
| Currency-matching regulations on assets/liabilities composition | No. | |
| Investment firms and collective investment funds | No. | There are no investment firms licensed to operate in Palau. However, the Bank of Hawaii provides investment services to the Compact of Free Association Trust Fund, under the regulations contained therein. Such activity is not prohibited. |

Accountability
In Panama, foreign exchange flows are unrestricted. There are no restrictions on operations. The number of authorized foreign exchange bureaus is unavailable; however, they only buy and sell banknotes.

All institutions may participate freely in the foreign exchange market. No limits are set on the bid-ask spread or on commissions for market participants. All banks with a general banking license may operate on the interbank market. The current number is 55 banks.

Imports and exports of gold by residents other than the monetary authorities in any form, other than jewelry carried as personal effects by travelers, require a license. Exports of unworked gold produced in Panama are subject to an export duty of 1% ad valorem, and exports of gold coins (other than US coins, which are exempt) are subject to a duty of 0.5%.

**Controls on exports and imports of banknotes**

| On exports                                           | Yes.|

The Federal Reserve Bank (FRB) verifies payment amounts, deposits, status of banknotes, and inventory and makes arrangements with shippers handling international cash with regard to the date of delivery to the shipper and the date on which the currency is deposited with the FRB. A SWIFT message is sent by the FRB International Department confirming the date, amount, and denominations to deliver (in US dollars only), and the shipper provides proof of delivery to the FRB once the shipment is delivered. The FRB then credits the account with the amount of the deposit.

**Domestic currency**

| Yes.|

The following controls apply: (1) FRB approval by three administrative officers and the executive security manager is required. (2) The International Department carries out monthly reconciliation and whenever there is a transaction. (3) No more than B 60 million may be exported, and the number and weight of bags are restricted. The following prohibitions apply: (1) Transactions will not be carried out unless there is a SWIFT message with the FRB. (2) Deposits that do not comply with the FRB’s operational circulars are returned to the bank. (3) Transshipment by shipping companies is not permitted. (4) Contracts must be on door-to-door terms (from the
FRB to the National Reserve, and vice versa). (5) Deposits from the FRB must be received during normal business hours. (6) No action may be taken unless security is present. (7) Nothing may be dispatched to banks or branches unless the order is in writing (originals in the case of banks and emailed spreadsheets in the case of branches). (8) Payment will not be made unless the documents match the agreements with banks and branches. (9) Only the National Reserve may authorize repacking of a bag and must later receive an audit memorandum from the shipper.

Import licenses and other nontariff measures: No. No import licenses are required in Panama. A contingent mechanism was negotiated under a WTO agreement to facilitate the exchange of phytosanitary permits for rice products, pork, poultry, and tomato paste and puree, allowing imports of these products at preferential tariff rates.

Positive list: No.

Negative list: No.

Open general licenses: No.

Licenses with quotas: No.

Other nontariff measures: No.

Import taxes and/or tariffs: Yes. Tariff rates are calculated on an ad valorem basis and assessed on the...
c.i.f. value of imports. Trade reform has resulted in simplified tariff bands of 0%, 3%, 5%, 10%, and 15%. Exceptions to the maximum tariff of 15% are automobiles (17%) and sugar (50% on imports exceeding a historical average price range). Also excluded are other products (mainly foodstuffs) whose tariffs are the maximum (and declining) levels negotiated with the WTO, including dairy products (50%–155%); rice (90%); onions (90%); beef (40%); pork (70%–90%); boneless and whole hams (83%); some poultry (300%); cabbages, carrots, celery, and lettuce (32.5%); cooking oils (20%–30%); margarine (15%); salt (87%); ketchup (70%); and tomato paste and puree (87%). Imports into the Colón Free Zone and the newly established EPZs are exempt from duty. There is a free trade agreement in effect between Panama and the United States. It aims to (1) reduce tariffs on 88% of US imports to 0%, (2) phase out the remaining tariffs over the course of 10 years, (3) increase agricultural import quotas, (4) simplify and harmonize sanitary requirements, and (5) clarify market access for public procurement (including by Panama Canal authorities).

Taxes collected through the exchange system: No.

State import monopoly: No.

References to legal instruments and hyperlinks: This information can be found at the AREAER ONLINE database: http://www.elibrary-areaer.imf.org/Pages/Reports.aspx.

Exports and Export Proceeds

Repatriation requirements: No.

Surrender requirements: No.

Surrender to the central bank: No.

Surrender to authorized dealers: No.

Financing requirements: No.

Documentation requirements: No.

Letters of credit: No.

Guarantees: No.

Domiciliation: No.

Preshipment inspection: No.

Other: No.

Export licenses: Yes. There are phytosanitary export licenses required to export certain goods from Panama (such as grain and fresh fruit and vegetables). Exports of certain drugs, firearms, and ammunition are prohibited or restricted. In addition, exports of certain plants and animals in danger of extinction in accordance with CITES are prohibited. Wood requires an export permit issued by the National Environment Authority (ANAM), in accordance with Executive Decree No. 57 of 5 June 2002 governing wood exports; non-ferrous scrap requires a special license granted by the Directorate-General of Customs (DGA) (Executive Decree No. 32 of 8 February 1991). Any product (including raw materials and machinery) may be imported into the Colón Free Zone and stored, modified, processed, assembled,
repackaged, and reexported without being subject to customs procedures.

Without quotas: Yes.
With quotas: No.

**Export taxes**
- Collected through the exchange system: No.
- Other export taxes: Yes.

Exports of some marine species, flammable products, and weapons are subject to a permit or compliance with special formalities. For reasons of sustainability and to boost national value added, exports of wood in slabs and blocks or simply planed are prohibited. Panama does not apply any export taxes except on products manufactured from native woods. Domestic taxes are not imposed on exports.

**Changes during 2018 and 2019**

No significant changes occurred in the exchange and trade system.
PAPUA NEW-GUINEA

(Position as of December 31, 2018)

Status under IMF Articles of Agreement

Date of membership
October 9, 1975.

Article VIII
Yes. Date of acceptance: December 4, 1975.

Article XIV

Exchange Measures

Restrictions and/or multiple currency practices
Yes.

The IMF Staff Report for the 2018 Article IV Consultation with Papua New Guinea states that, as of November 9, 2018, Papua New Guinea maintained the following exchange restrictions subject to IMF approval under Article VIII, Section 2(a) of the IMF's Articles of Agreement arising from: (1) the requirement to obtain a tax clearance certificate evidencing the payment of all taxes prior to making payments or transfers for certain current international transactions and (2) the rationing of foreign exchange and its allocation by the Bank of Papua New Guinea (BPNG) to certain priority items, which results in undue delays and arrears in current international payments. Papua New Guinea also maintains the following MCPs subject to IMF approval under Article VIII, Section 3: (1) a MCP arising from the spread of more than 2% between the rates set by the BPNG for its foreign exchange allocations to authorized foreign exchange dealers (AFEDs) and the rates used by AFEDs in transactions with their clients and (2) an MCP arising from the potential spread deviation of more than 2% between the rates set by the BPNG for its foreign exchange transactions with the government and embassies and the rates used by AFEDs in transactions with their clients. (Country Report No. 18/352)

Exchange measures imposed for security reasons
No.

In accordance with IMF Executive Board Decision No. 144-(52/51)
No.

Other security restrictions
No.

References to legal instruments and hyperlinks
This information can be found at the AREAER ONLINE database: http://www.elibrary-areaer.imf.org/Pages/Reports.aspx.

Exchange Arrangement

Currency
Yes. The currency of Papua New Guinea is the Papua New Guinea kina.

Other legal tender
No.

Exchange rate structure

Unitary

Dual

Multiple
Yes.

There is a multiple exchange rate structure as a result of MCPs arising (1) from the spread of more than 2% between the rates set by the BPNG for its foreign exchange allocations to AFEDs and the rates used by AFEDs in transactions with their clients and (2) from
the potential spread deviation of more than 2% between the rates set by the BPNG for its foreign exchange transactions with the government and embassies and the rates used by AFEDs in transactions with their clients.

<table>
<thead>
<tr>
<th>Classification</th>
<th>Yes.</th>
</tr>
</thead>
<tbody>
<tr>

<tr>
<td>Other managed arrangement</td>
<td></td>
</tr>
<tr>
<td>Floating</td>
<td></td>
</tr>
<tr>
<td>Free floating</td>
<td></td>
</tr>
</tbody>
</table>

**Official exchange rate**

The de jure exchange rate arrangement is floating. The exchange rate of the kina is determined in the interbank market, in which ADs participate. The BPNG intervenes in the foreign exchange market to smooth extreme fluctuations; however, it does not publish information on its interventions. On June 4, 2014, the BPNG introduced an exchange rate trading margin with a kina buying rate within 75 basis points (bps) above the interbank midrate and a kina selling rate within 75 bps below the midrate. Since August 2017, the exchange rate has followed a depreciating trend within a 2% band against the US dollar. Accordingly, the exchange rate arrangement is classified as a crawl-like arrangement.

<table>
<thead>
<tr>
<th>Monetary policy framework</th>
<th>Yes.</th>

<tr>
<td><em>Euro</em></td>
<td></td>
</tr>
<tr>
<td><em>Composite</em></td>
<td></td>
</tr>
<tr>
<td><em>Other</em></td>
<td></td>
</tr>
</tbody>
</table>

The official exchange rate is the interbank market midrate which is determined by the interaction between demand for foreign currency (offer) and supply of foreign currency (bid) by the ADs, including the BPNG. The live price at the close of trading becomes the official rate. The BPNG publishes official exchange rates based on the closing interbank US dollar–kina rate for use by government departments and institutions as well as the ADs. There is small margin on trades done for US dollar–kina rate for use by government departments and institutions as well as the ADs.

<table>
<thead>
<tr>
<th>Monetary aggregate target</th>
<th>Yes.</th>
</tr>
</thead>
</table>

Monetary policy is conducted within the reserve money framework. The BPNG announces the policy rate—the kina facility rate—monthly and uses open market operations to implement monetary policy. It also uses direct instruments from time to time, including cash reserve requirement, to assist in the conduct of
monetary policy (liquidity management). Low inflation is a key operational objective, although there is no immediate target or numerical target.

Under the Central Banking Act 2000, the objectives of the CB include the formulation and implementation of monetary policy with a view to achieving and maintaining price stability. The objective of price stability means that the BPNG strives for low inflation, and stable interest and exchange rates, but without particular targets. Under the Central Banking Act 2000, the formulation of monetary policy is broadly guided by analysis of the main factors that affect price stability and an understanding of their economic consequences. The BPNG sets annual growth projections, in line with its monetary policy stance, on monetary aggregates in its semiannual monetary policy statements, released in March 31 and September 30. The BPNG does not pursue inflation targeting.

Inflation-targeting framework

Publication of minutes

Publication of inflation forecasts

Other monetary framework

**Exchange tax**  No.

**Exchange subsidy**  No.

**Foreign exchange market**  Yes.  The BPNG is the exchange control authority. ADs deal in foreign exchange in house with exporters and importers and buy and sell excess foreign exchange in the interbank market. The BPNG may buy or sell foreign exchange in the interbank market, if necessary, to smooth out exchange rate volatility.

**Spot exchange market**  Yes.  ADs, which consist of four commercial banks and two nonbank financial institutions, provide foreign exchange service to customers, including spot transactions. ADs publish buying and selling rates for customers, and may determine their own commissions with their clients. They may trade in kina against US dollars, but within a trading margin of 75 basis points above or below the official reference rate determined in the interbank market.

To enhance competition in the foreign exchange market, nine currency exchange bureaus are licensed by the BPNG to deal in physical notes and coins and cash traveler’s checks. The BPNG clearance must be obtained before additional products are offered to customers. Exchange bureaus may not maintain foreign currency accounts (FCAs) for their customers.

**Operated by the central bank**  No.

**Foreign exchange standing facility**  No.

**Allocation**  No.

**Auction**  No.

**Fixing**  No.

**Interbank market**  Yes.  ADs (4 commercial banks and 2 nonbanks) participate in the interbank market. There are no limits on the bid and offer spreads. The BPNG may buy or sell foreign exchange in the interbank market, if necessary, to smooth out exchange rate volatility.

The BPNG executes deals at the rates quoted by the ADs. If there is only a bid and no offer or vice versa, the BPNG as a market participant, may place a counterbid or offer.

**Over the counter**  Yes.  Customers may engage in OTC transactions with licensed ADs. Customers include individuals, businesses, and other organizations.

**Brokerage**  Yes.  The BPNG acts as a broker for ADs under the current arrangement. There are no brokerage fees charged.

**Market making**  Yes.  ADs continuously make a market for their major customers.
Exporters and importers may engage in forward cover transactions with the four commercial banks at market-determined rates. Each commercial bank is subject to a prudential limit on its uncovered forward position. Currently, commercial banks may not bring a forward cover order to the interbank market. They may deal with forward orders in house with their own resources (foreign currency) but may not use BPNG intervention (which is for spot orders only) to fund forward orders. The BPNG may participate in the forward market with commercial banks but not directly with their clients.

Official cover of forward operations
No.

References to legal instruments and hyperlinks
This information can be found at the AREAER ONLINE database: http://www.elibrary-areaer.imf.org/Pages/Reports.aspx.

Arrangements for Payments and Receipts

Prescription of currency requirements
Yes. Contractual commitments to persons residing outside Papua New Guinea and expressed in foreign currency may be paid in the same foreign currency. Export proceeds may be received in any foreign currency.

Controls on the use of domestic currency
No.

For current transactions and payments
No.

For capital transactions
No.

Transactions in capital and money market instruments
No.

Transactions in derivatives and other instruments
No.

Credit operations
No.

Use of foreign exchange among residents
Yes. An agreement by a resident that creates an obligation in favor of another resident in a foreign currency (domestic transaction) requires a prior BPNG approval. All domestic transactions involving two resident parties must be settled in kina; if one of the two parties has foreign currency, it must be converted to kina for the settlement.

Payments arrangements
Yes.

Bilateral payments arrangements
Yes.

Operative
Yes. There is a bilateral payments agreement with Fiji, which is operational.

Inoperative
No.

Regional arrangements
Yes. Papua New Guinea participates in the Economic Partnership Agreement (EPA) with the EU and African, Caribbean and the Pacific (ACP) Countries and is a signatory to South Pacific Regional Trade and Economic Cooperation Agreement (SPARTECA), PICTA, Melanesian Spearhead Group Trade Agreement (MSGTA); Asia-Pacific Economic Cooperation (APEC); and the WTO.

The bilateral, regional, sub-regional, and multilateral trade agreements in which Papua New Guinea participates are consistent with WTO agreements and provisions. These agreements also contain provisions regarding intellectual property rights.

Clearing agreements
No.

Barter agreements and open accounts
No.

Administration of control
Yes. The overall policy is determined by the government with advice from
the BPNG. The BPNG has delegated considerable power to ADs to deal with foreign exchange transactions. All current and capital account transactions, government transactions, and current and capital account contracts (agreements) are exempt from obtaining a prior authorization of the BPNG. However, the capital and current account transactions and contracts are subject to the BPNG’s reporting requirement and TCC requirement of the Internal Revenue Commission (IRC).

### Payments arrears

- **Official**: No.
- **Private**: No.

### Controls on trade in gold (coins and/or bullion)

- **Yes.** Exportation or importation of gold is regulated.
- **On domestic ownership and/or trade**: No. Residents may trade gold freely within Papua New Guinea.
- **On external trade**: Yes. The exportation or importation of gold requires a license from the BPNG.

### Controls on exports and imports of banknotes

- **Yes.** Removal or export of more than K 20,000.00 in kina banknotes and coins by residents and nonresidents requires a prior BPNG approval. It is also required for exports for numismatic purposes.
- **On exports**: Yes.
  - **Domestic currency**: Yes. Removal or export of foreign currency banknotes and coins in excess of equivalent of K 20,000.00 by residents and nonresidents requires a prior approval of the BPNG.
  - **Foreign currency**: Yes.

- **On imports**: No.
  - **Domestic currency**: No.
  - **Foreign currency**: No.

### Resident Accounts

- **Foreign exchange accounts permitted**: Yes.
- **Held domestically**: Yes.
<table>
<thead>
<tr>
<th>Approval required</th>
<th>Yes.</th>
<th>A prior approval of BPNG is required to open FCAs for PNG residents.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Held abroad</td>
<td>Yes.</td>
<td>There are two categories of FCAs. First are those accounts covered under the project development agreements which usually involve movement of large and lumpy foreign exchange, which may cause significant kina exchange rate volatility if these flows are allowed to enter the domestic foreign exchange market. Second are those FCAs which are not covered by project development agreements, but are required to receive foreign currency income and to settle contractual obligation to nonresidents abroad. With a prior BPNG approval, residents may open FCAs of both categories outside Papua New Guinea. Account holders must submit a Monthly FCA Report to the BPNG.</td>
</tr>
<tr>
<td>Approval required</td>
<td>Yes.</td>
<td>These accounts may be held abroad, but a prior BPNG approval is required. Accounts of ADs that are not nostro or vostro accounts require a prior approval of the BPNG.</td>
</tr>
<tr>
<td>Accounts in domestic currency held abroad</td>
<td>No.</td>
<td>Residents cannot maintain domestic currency accounts abroad.</td>
</tr>
<tr>
<td>Accounts in domestic currency convertible into foreign currency</td>
<td>Yes.</td>
<td>BPNG approval is required to convert kina accounts held with ADs into FCAs. Funds in domestic accounts denominated in kina can be converted to foreign currency and repatriated abroad without approval, except for removal of kina in excess of K 20,000.00 in physical notes and coins.</td>
</tr>
<tr>
<td>References to legal instruments and hyperlinks</td>

<td>This information can be found at the AREAER ONLINE database: <a href="http://www.elibrary-areaer.imf.org/Pages/Reports.aspx">http://www.elibrary-areaer.imf.org/Pages/Reports.aspx</a>.</td>
</tr>
</tbody>
</table>

**Nonresident Accounts**

| Foreign exchange accounts permitted | Yes. | ADs may open nonresident FCAs in accordance with BPNG guidelines. The dealers must report nonresident FCA balances to the BPNG. ADs can transfer funds abroad from balances of domestic accounts. |
| Approval required | No. | |
| Domestic currency accounts | Yes. | Nonresident expatriates domiciled or living in PNG under foreign embassy and consulate arrangements or multilateral arrangements, including such institutions, can operate kina accounts. ADs may hold such accounts in PNG under correspondent banking arrangements for nonresidents. All other nonresidents cannot open and operate kina accounts. |
| Convertible into foreign currency | Yes. | Conversion to foreign currency is permitted. |
| Approval required | No. | |
| Blocked accounts | No. | |

**Imports and Import Payments**

| Foreign exchange budget | No. | |
| Financing requirements for imports | Yes. | All new trade finance loans provided by ADs must be approved by the BPNG. |
Minimum financing requirements: No.
Advance payment requirements: No.
Advance import deposits: No.

**Documentation requirements for release of foreign exchange for imports**: Yes.

ADs may process and remit import payments abroad. Payments must be supported with summary commercial invoices, customs forms, and duly completed balance of payments (BOP) reporting forms.

Payments exceeding K 10,000.00 must be reported to BPNG on BOP reporting form for imports, by an AD.

For import payments between K 5,000.00 and K 10,000.00, must be reported to BPNG on an aggregate BOP reporting form for imports, by an AD.

For import payments below K 5,000.00, ADs may process import payments without submitting their reports to the BPNG. An AD is obliged to provide details of these transactions on request.

The Financial Markets Department at the BPNG has issued some of the foreign exchange reports in 2017 to get more visibility into the other trades that are done by ADs that fall outside the threshold of K 3.0 million. This is to facilitate the capture of all transactions and currency of trade and be reported to the CB. The Financial Markets Department is now monitoring all SWIFT transactions through a SWIFT enhancement, namely the “Swift Scope” which has been in operation since early 2017.

All other documentation required to verify the orders remains, including the TCC issued by the IRC as specified in BPNG foreign exchange operational guidelines.

Domiciliation requirements: No.
Preshipment inspection: No.

**Letters of credit**: Yes.

A prior approval of the BPNG is required for ADs to issue LCs in favor of nonresidents as guarantees. The BPNG’s approval is not required when such credits are from nonresidents in favor of residents.

Import licenses used as exchange licenses: No.
Other: No.

**Import licenses and other nontariff measures**: Yes.

Positive list: No.
Negative list: No.
Open general licenses: No.
Licenses with quotas: No.
Other nontariff measures: Yes.

The purpose of these measures is to restrict or prohibit the importation of certain goods to protect health, security, bio-security, and morals.

Import taxes and/or tariffs: Yes.

There are four major ad valorem tariff rates (0%, 15%, 25%, 40%) and some additional specific tariff rates, including 70% on sugar and...
20% on mackerel. To assist local industries, the following measures apply: (1) The tariff on canned dark tuna is 20%. (2) The tariff on canned baked beans is 25%.

Taxes collected through the exchange system
No.

State import monopoly
Yes. A state import monopoly applies to the importation of military equipment.

This information can be found at the AREAER ONLINE database: http://www.elibrary-areaer.imf.org/Pages/Reports.aspx.

Exports and Export Proceeds

Repatriation requirements
Yes. All exporters not covered by a project agreement must repatriate all export proceeds and convert them to kina or deposit into onshore FCAs. The repatriation must be done within three months for the Shipment Date of export. Any offset against offshore liabilities is not permitted.

For an exporter with an approved offshore FCA, any surplus funds in the account after meeting offshore liabilities must be repatriated to PNG within three months from the date of export and converted to kina or deposited any surplus funds into a domestic FCA.

Those exporters covered under a project agreement are required to repatriate any surplus funds after meeting their 3-month forward commitments to offshore suppliers of goods and services.

Surrender requirements
No.

Surrender to the central bank
No.

Surrender to authorized dealers
No. All exporters not covered by a project agreement must repatriate all export proceeds and convert them to kina or deposit into onshore FCAs. The repatriation must be done within three months for the Shipment Date of export. Any offset against offshore liabilities is not permitted.

For an exporter with an approved offshore FCA, any surplus funds in the account after meeting offshore liabilities must be repatriated to PNG within three months from the date of export and converted to kina or deposited into a domestic FCA.

Those exporters covered under a project agreement are required to repatriate any surplus funds after meeting their 3-month forward commitments to offshore suppliers of goods and services.

Financing requirements
Yes. ADs cannot provide trade finance loans in any currency except with a prior authorization of the BPNG.

Documentation requirements
Yes.

Letters of credit
No.

Guarantees
No.

Domiciliation
No.

Preshipment inspection
No.

Other
Yes. Customs documentation must be submitted to an AD after each shipment. ADs may process export receipts without submitting them to the BPNG. A BOP form must be completed for export proceeds exceeding K 10,000 or its equivalent.
### Payments for Invisible Transactions and Current Transfers

#### Controls on these transfers
- **Yes.** Current account transactions are exempted from exchange controls and may be made without limit.

  - Remittances to a tax haven require a TCC from the IRC.
  - Remittances to other countries in excess of, effective January 1, 2018, K 500,000 (previously K 200,000) require a TCC from IRC, where applicable.
  - The BPNG’s reporting requirements must be met for current account transactions.

#### Trade-related payments
- **Yes.**

  - **Prior approval**
    - **No.**
  - **Quantitative limits**
    - **No.**

  - **Indicative limits/bona fide test**
    - **Yes.** A bona fide test is applied, in the form of a documentation requirement. Contractual Documents such as loan agreements, lease agreements, and consultancy agreements and commercial invoices must be presented to an AD for payments abroad.

#### Investment-related payments
- **Yes.**

  - **Prior approval**
    - **No.**
  - **Quantitative limits**
    - **No.**

  - **Indicative limits/bona fide test**
    - **Yes.** Service payments on foreign debt may be made through an AD. A bona fide test is applied. For dividends, a signed copy of company directors’ declaration to pay dividends must be provided, together with a completed BOP reporting form (BOP Form). For interest payments, commercial invoices, a copy of signed and executed loan agreement, and a completed BOP reporting form must be provided.

  Dividends and interest may be remitted through an AD, subject to the provision of a TCC from IRC for payments in excess of, effective January 1, 2018, K 500,000 (previously, K 200,000) (or the foreign currency equivalent) and submission of the relevant BOP Forms.

#### Payments for travel
- **Yes.**

  - **Prior approval**
    - **No.**
Quantitative limits  
No.

Indicative limits/bona fide test  
Yes.  
A bona fide test is applied, in the form of documentation requirement. Identity and travel itinerary must be presented, together with a completed BOP reporting form where required.

Personal payments  
Yes.

Prior approval  
No.

Quantitative limits  
No.

Indicative limits/bona fide test  
Yes.  
A bona fide test is applied, in the form of documentation requirement. Commercial invoice, TCC from IRC, and any other relevant supporting documents must be provided, together with a completed BOP Form.

Foreign workers' wages  
Yes.

Prior approval  
No.

Quantitative limits  
No.

Indicative limits/bona fide test  
Yes.  
A bona fide test is applied, in the form of documentation requirement. A worker must produce a worker permit, a written confirmation from employer, and TCC from IRC as supporting documents to remit foreign worker wages.

Credit card use abroad  
Yes.  
Credit cards or other similar cards may be used only for travel and travel-related expenses.

Prior approval  
No.

Quantitative limits  
No.

Indicative limits/bona fide test  
No.

Other payments  
Yes.

Prior approval  
No.

Quantitative limits  
No.

Indicative limits/bona fide test  
Yes.  
A bona fide test is applied, in the form of documentation requirement. Other relevant documents and commercial invoices, and a TCC from IRC, must be submitted together with a completed BOP Form.

### Exchange Arrangement

- **Currency**: Yes. The currency of Paraguay is the guaraní.
- **Other legal tender**: No.

**Exchange rate structure**

- **Unitary**: Yes.
- **Dual**: No.
- **Multiple**: No.

**Classification**

- **No separate legal tender**: No.
- **Currency board**: No.
- **Conventional peg**: No.
- **Stabilized arrangement**: No.
- **Crawling peg**: No.
- **Crawl-like arrangement**: Yes.

The de jure exchange rate arrangement is classified as floating. The exchange rate is determined by supply and demand. The objective of the CBP under Article 3 of Law No. 489/95 is to preserve and safeguard the stability of the currency and promote the efficiency and stability of the financial system. Article No. 47 states the following: “Within the framework of the National Government’s economic policy and the laws, the Central Bank of Paraguay (CBP) shall administer the legal provisions and their regulations that set the exchange rate regime, as well as the...
control measures over current foreign collections and payments and capital movements that are only adopted by the Powers of the State in circumstances of exceptional national emergency.

Foreign exchange operations shall be carried out on the free foreign exchange market which, for the purposes of this Law, is made up of entities authorized to operate in the foreign exchange market.

Anyone may engage in foreign exchange operations.

The exchange rate shall be that freely agreed on by the parties involved, in accordance with supply and the demand.”

Article No. 50 establishes the following: “The Free Exchange Market shall operate with foreign currency and other documents, checks, drafts, or foreign exchange transfer securities derived from the export and import of goods, services, and capital movements, except in cases of specific prohibitions established by the Law or by provisions founded by the Executive Branch.

The CBP shall operate in the foreign exchange market to ensure its normal, competitive, and balanced operation and to respect the fundamental trends in the supply and demand of foreign currency.

Foreign currency trading by the CBP shall aim to mitigate the effects of seasonal fluctuations in supply and demand and offset erratic capital flows and speculative movements that could disrupt the market or the exchange rate.”

The CBP, in its capacity as a financial agent of the government (Article 71 of its Organic Charter – Law No. 489), buys US dollars from the government, received by the latter in the form of royalties and compensation paid by the bi-national hydroelectric entities, in exchange for guaraníes. These dollars purchased from the public sector are returned to the market via sales to the financial system according to CBP announcements. On the second working day of each month, the CBP publishes daily data of exchange operations (with the public sector and with the financial sector) of the previous month on its institutional website. Additionally, operations are also published according to classification, either compensatory or complementary.

In 2018, the CBP’s net purchases with the financial system were US$ -1,273.1 million, while net purchases with the public sector were US$ 930.32 million. The highest level of foreign currency sales to the Financial Sector corresponds to the CB’s effort to moderate the abrupt exchange rate volatility, without altering the market trend, taking into account the context of regional depreciation because of external shocks of rising international interest rates, the US-China trade war, and the increase in the risk level of emerging countries following the US sanctions imposed on Turkey in August.

Since June 2018, the exchange rate followed a depreciating trend within a 2% band against the US dollar. Accordingly, the de facto exchange rate arrangement was reclassified to crawl-like from floating, effective June 11, 2018.

---

**Pegged exchange rate within horizontal bands**

**Other managed arrangement**

**Floating**

**Free floating**

**Official exchange rate** Yes. The CBP publishes average nominal exchange rates (buying and selling) daily, calculated on the basis of financial entities’
transactions with nonfinancial customers beginning at US$50,000, weighted by amounts. The CBP also publishes a benchmark exchange rate daily, which is the simple average between the buying and selling exchange rates calculated as explained in the previous paragraph.

**Monetary policy framework**

*Exchange rate anchor*

- **U.S. dollar**
- **Euro**
- **Composite**
- **Other**

*Monetary aggregate target*

*Inflation-targeting framework* Yes. The CBP adopted an inflation-targeting framework according to Resolution No. 22, Minute No. 31, of May 2011.

*Target setting body* Yes.

- **Government**
- **Central Bank**
- **Monetary Policy Committee**

The Open Market Operations Executive Committee (Comité Ejecutivo de Operaciones de Mercado Abierto–CEOMA) is the body responsible for implementing the monetary policy of the CBP, to maintain the price stability, by providing a framework for nominal predictability for the Paraguayan economy.

The CEOMA is responsible for: (1) Analysis of the international economic climate and the domestic economy. (2) Inflation forecasting and simulations. (3) Making recommendations on setting the benchmark interest rate or the monetary policy rate (MPR). (4) Establishing the monetary policy implementation strategy. (5) Provide information to the Markets Committee on the general guidelines for implementing the monetary and exchange rate policy.

**Decisions:**

Decisions adopted by the CEOMA shall be based on the following: (1) Technical criteria to be presented by Economic Studies, the Superintendency of Banks, and the Markets Directorate. (2) Analysis of prevailing economic conditions by the members of CEOMA, with the latter being able to have their dissenting opinions reflected in the minutes. (3) The final decision shall be adopted by the president and members of the Board on the basis of the preceding paragraphs. The decisions taken by the CEOMA must be recorded in the minutes prepared by the Secretariat of CEOMA.

The CEOMA of the CBP shall be made up of: (1) The chairman and the directors of the Board of the CBP, all of whom shall have the right to speak and vote. The CEOMA shall be chaired by the president or the interim president of the CBP. If the need arises, the meeting may also be chaired by one of the directors of the CBP designated by his/her peers at the start of the meeting. (2) The chief economist. (3) The superintendent of banks. (4) The director of markets.

Whenever the Board deems it fit, other public servants and/or persons external to the institutions may also be invited to attend its meetings.
Other

Government and Central Bank

**Inflation target**  Yes.  Executive Board Resolution by which the Inflation Targets scheme is officially implemented.

**Target number**  Yes.

**Point target**

**Target with tolerance band**  Yes.  The inflation target for 2019 and beyond is 4%.

**Band/Range**  Tolerance band of +/- 2%.

**Target measure**  Yes.

**CPI**  Yes.  Total inflation is used as the indicator. The Lowe formula (modified Laspeyres) is used to calculate the index.

**Core inflation**

**Target horizon**  n.a.

**Operating target (policy rate)**  Yes.

**Policy rate**  Yes.  The CBP’s operational monetary policy objective is the Interbank Loan Interest Rate (TIB). The TIB should fluctuate around the same level as the TPM. Since July 2019, the monetary policy rate has been 4.50%.

**Target corridor band**  Yes.  The cap of the corridor band for the Standing Liquidity Facility (Facilidad Permanente de Liquidez – FPL) is the monetary policy rate (TPM) and the floor is the Permanent Deposit Facility (FPD). Until June 7, 2019, the Corridor was structured as follows: FPL = TPM + 100 bps; FPD = TPM – 25 bps. Since June 10, 2019, the Corridor has been structured as follows: FPL = TPM + 50 bps; FPD = TPM – 25 bps.

Other

**Accountability**  Yes.

**Open letter**  n.a.

**Parliamentary hearings**  n.a.

**Other**  Yes.  The CBP submits a quarterly report to the national Congress.

**Transparency**  Yes.

**Publication of votes**  Yes.  Votes are confidential in nature. However, once the recommendations have been made, they are disclosed to the general public through a press release published on its website on the same day of the meeting. The schedule of monthly meetings of the CEMOA is also published on its website.

**Publication of minutes**  Yes.  The minutes are confidential. However, once the recommendations have been made, they are disclosed to the general public through a press release published on its website on the same day of the meeting. The schedule of monthly meetings of the CEMOA is also published on its website.

**Publication of inflation forecasts**  n.a.
Commercial banks may freely set exchange rates and commissions in transactions with their clients.

As of December 31, 2018, there were 17 banks, 9 financial institutions, and 29 exchange houses licensed by the CBP to operate in the foreign exchange market. There is no parallel market.

Under Article 5 of Law No. 2794/05, exchange houses require CBP authorization to operate in the foreign exchange market and may not engage in foreign exchange transactions with the CBP. That same law prohibits exchange houses from maintaining accounts abroad or making foreign currency payments and transfers on behalf of their customers.

The CBP conducts its operations with the sole aim of managing its balance sheet (programmed sales) and occasionally to prevent market volatility.

Scheduled sales of US dollars to the financial system offset the US dollars purchased from the government (MOF).

Foreign exchange operations (whether programmed sales or supplementary operations) generally take place through competitive auctions, awarded at multiple prices, for both purchases and sales of US dollars.

Via a communiqué on its institutional website, the CBP publishes the amount to be auctioned on a daily basis, which may be increased depending on market conditions.

The minimum amount of a foreign currency purchase or sale by the CBP for regulatory purposes is US$200,000, and operations will only be carried out in multiples of one hundred thousand (100,000) dollars.

The institutions of the financial system defined in Law No. 861/97 may participate in the exchange operations (purchase-sale of foreign currency) of the CBP.

If it is found that the financial institution has not complied with the operating rules of the CBP, the operation will be canceled and the authorities will be informed of the situation at the close of daily operations. In such a case, the financial institution will be suspended from operating with the CBP for a period of 30 calendar days.

In the foreign currency purchase operations of the CBP, where the financial institution cannot demonstrate that the default originated in errors attributable to its counterparty, and in foreign currency sale operations of the CBP, in cases where the corresponding financial institution does not have the resources in guaraníes to cover the operation in its local currency account in the CBP before the established schedule, the following measures must be taken:

Fine for non-compliance: In the event of default, whether for the purchase or sale of currency to the CBP by a financial institution, a fine will be applied to that institution according to the following formula and criteria:
When the CBP sells Dollars: Fine = Trade Amount in USD x (Agreed CBP sale price – Wholesale purchase price on t +1)
When the CBP buys Dollars: Fine = Trade Amount in USD x (Wholesale CBP sale price – Agreed purchase price on t +1)

The full results of the month’s auctions are published on the second business day of the month as aggregated data.

Fixing
No.

Interbank market
Yes. The interbank market is understood to mean transactions carried out between banks only. There were 17 banks participating in the interbank market as of December 2018. These banks do not need to be licensed to participate in the interbank market because all banks licensed by the CBP automatically form part of the interbank market. There are no limits on the bid-ask spread and commissions of market participants.

Over the counter
Yes. The interbank market operates over the counter on DATATEC, an electronic platform supplied by a private firm. There are also OTC operations between institutions.

Brokerage
No.

Market making
No.

Forward exchange market
Yes. Commercial banks and finance companies may conduct forward transactions for trade operations on terms freely negotiated with customers. Financial institutions may conduct forward transactions with residents and nonresidents.

Net long or short positions on forward transactions with residents have an applicable limit. Such positions may not exceed the smaller of the two: 2 times the average volume of banking operations of banks in the last three months or 80% of effective net worth in the previous month converted to US dollars.

In the case of forward transactions with nonresidents, it is considered that (modified from Resolution No. 11, Minute No. 34 of May 31, 2018):
Effective May 31, 2018, the purchase volume of forward transactions made in US dollars with nonresidents may not exceed 3% of the effective net worth in the previous month converted to US dollars.
The sales volume of forward transactions carried out in US dollars with nonresidents may not exceed 3% of the effective net worth in the previous month converted to US dollars.

Effective October 18, 2018, forward transactions that do not involve the guaraní are exempt from that limit. Resolution No. 15, Minute No. 67 of October 18, 2018.

Official cover of forward operations
No.

### Resident Accounts

- **Foreign exchange accounts permitted:** Yes.
- **Held domestically:** Yes.  
  Accounts may be held without restriction.
- **Approval required:** No.
- **Held abroad:** Yes.  
  Accounts may be held without restriction and usually operate as deposit accounts. Account holders may conduct all operations through the local banking system or deal with a nonresident bank. There are no restrictions on the transfer of balances to the country of origin.

- **Approval required:** No.
- **Accounts in domestic currency held abroad:** Yes.
- **Accounts in domestic currency convertible into foreign currency:** Yes.

### Nonresident Accounts

- **Foreign exchange accounts permitted:** Yes.
- **Approval required:** No.  
  Nonresidents do not require approval to hold foreign exchange accounts. Some banks have internal requirements in connection with temporary residence or the reason for the stay.
- **Domestic currency accounts:** Yes.
Convertible into foreign currency: Yes.
Approval required: No.
Blocked accounts: No. Except in the case of judicial problems specified in the Civil Code and in Law No. 805/96 amending various articles of Chapter XXVI, Title II, Book III, of the Civil Code and creating the method of the deferred-payment bank check, abolishing Law No. 941/64, and removing the penalties from the use of postdated checks and its amendments.

### Imports and Import Payments

**Foreign exchange budget**: No.
**Financing requirements for imports**: No.
**Minimum financing requirements**: No.
**Advance payment requirements**: No.
**Advance import deposits**: No.
**Documentation requirements for release of foreign exchange for imports**: No.
**Domiciliation requirements**: No.
**Preshipment inspection**: No.
**Letters of credit**: No.
**Import licenses used as exchange licenses**: No.
**Other**: No.

**Import licenses and other nontariff measures**: Yes.

**Positive list**: Yes. The following items such as apparel, fuels, steel products, among others, are mentioned in the positive list.
**Negative list**: Yes. The following items such as tripolyphosphates, used clothing, and used cars more than ten years old are mentioned in the negative list.
**Open general licenses**: No.
**Licenses with quotas**: No.
**Other nontariff measures**: No.

**Import taxes and/or tariffs**: Yes. As a member of MERCOSUR, Paraguay applies its CET composed of 24 rates ranging up to 30%. Under the agreed transitional implementation of the CET, Paraguay maintains a number of waivers of the CET for computer equipment, telecommunications equipment, processed foods, textiles, clothing, and shoes. Paraguay benefits from a waiver of the increase in MERCOSUR’s CET from 20% to 35% for shoes and clothing and from 18% to 26% for textiles.
**Taxes collected through the exchange system**: No.
**State import monopoly**: Yes. A large share of military equipment and supplies is imported by state agencies, as are diesel fuel and banknotes for issuance. Internet services continue to be partially liberalized.
State import monopoly

Yes.

A large share of military equipment and supplies is imported by state agencies, as are diesel fuel and banknotes for issuance. Internet services continue to be partially liberalized.

Nonresident agents may conduct forward foreign exchange operations. Effective May 31, 2018, forward transactions made in US dollars with nonresidents may not exceed 3% of the effective net worth in the previous month converted to US dollars.

Effective October 18, 2018, forward transactions that do not involve the guaraní are exempt from that limit. Resolution No. 15, Minute No. 67 of October 18, 2018.

### Controls on credit operations

| Commercial credits | No. |
| By residents to nonresidents | No. |
| To residents from nonresidents | No. |
| Financial credits | Yes. |
| By residents to nonresidents | Yes. |

Credits extended and deposits made by a bank in Paraguay to a foreign bank or financial institution, along with that institution’s endorsements, sureties, and other guarantees, may not exceed 20% of the bank’s effective net worth. This ceiling may be increased to 50%
for Tier 1 banks and 70% if the excess in each of the preceding cases is represented by issued LCs. For these purposes, LCs payable under the LAIA Reciprocal Payments and Credit Agreement are not taken into account. Section b.2 of Resolution No. 3 Minute No. 25 of April 5, 2017 (Regulating Law No. 5787 amending Law No. 861). Banks’ credits, contingent credits, and financial leasing operations to individuals and corporations abroad, with certain exceptions, may not exceed 5% of effective net worth. This ceiling may be increased to 20% with a sufficient guarantee that it can back the transaction in an amount equal at least to the excess over the aforementioned ceiling. Section b.4 of Resolution No. 3 Minute No. 25 of April 5, 2017 (Regulating Law No. 5787 amending Law No. 861).

Provisions Specific to the Financial Sector

Provisions specific to commercial banks and other credit institutions

Borrowing abroad

No.

Pursuant to Law No. 861/96, banks and finance companies may conduct credit operations with domestic and foreign banks and finance companies, and make deposits with each other. Pursuant to Law No. 489/95 (Article 56), supervised institutions that contract credit operations abroad must report them to the CBP, with the exception of ordinary banking operations.

Maintenance of accounts abroad

Yes.

Credits extended and deposits made by a bank in Paraguay to a foreign bank or financial institution, along with that institution’s endorsements, sureties, and other guarantees, may not exceed 20% of the bank’s effective net worth. This ceiling may be increased to 50% for Tier 1 banks and 70% if the excess in each of the preceding cases is represented by issued LCs. For these purposes, LCs payable under the LAIA Reciprocal Payments and Credit Agreement are not taken into account. Section b.2 of Resolution No. 3 Minute No. 25 of April 5, 2017 (Regulating Law No. 5787 amending Law No. 861).

Lending to nonresidents (financial or commercial credits)

Yes.

Credits extended and deposits made by a bank in Paraguay to a foreign bank or financial institution, along with that institution’s endorsements, sureties, and other guarantees, may not exceed 20% of the bank’s effective net worth. This ceiling may be increased to 50% for Tier 1 banks and 70% if the excess in each of the preceding cases is represented by issued LCs. For these purposes, LCs payable under the LAIA Reciprocal Payments and Credit Agreement are not taken into account. Section b.2 of Resolution No. 3 Minute No. 25 of April 5, 2017 (Regulating Law No. 5787 amending Law No. 861). Banks’ credits, contingent credits, and financial leasing operations to individuals and corporations resident abroad, with certain exceptions, may not exceed 5% of effective net worth. This ceiling may be increased to 20% with a sufficient guarantee that it can back the transaction in an amount equal at least to the excess over the aforementioned ceiling. Section b.4 of Resolution No. 3 Minute No. 25 of April 5, 2017 (Regulating Law No. 5787 amending Law No. 861).

Lending locally in foreign exchange

Yes.

These transactions must comply with the bank’s net position limit.

Purchase of locally issued securities denominated in foreign exchange

Yes.

These transactions must comply with the bank’s net position limit.

Differential treatment of deposit accounts in foreign exchange

Yes.

The following reserve requirements apply to deposits in foreign currency:
(1) 24% for terms of up to 360 days (including sight deposits);
(2) 16.5% for terms of 361 days to 540 days;
(3) 0% for terms above 541 days.

Reserve requirements

Yes.

The following reserve requirements apply to deposits in foreign currency:
(1) 24% for terms of up to 360 days (including sight deposits);
(2) 16.5% for terms of 361 days to 540 days;
(3) 0% for terms above 541 days.
**Liquid asset requirements** No.

**Interest rate controls** Yes. Interest rates applicable to credit card transactions may not exceed three times the average deposit rate in effect on the market. There is also a rate defined as constituting usury, which must not be exceeded. It is constructed on the average of consumer rates charged by banks and finance companies, respectively.

**Credit controls** No.

**Differential treatment of deposit accounts held by nonresidents** No.

**Reserve requirements** No.

**Liquid asset requirements** No.

**Interest rate controls** No.

**Credit controls** No.

**Investment regulations** Yes.

**Abroad by banks** Yes. Banks may invest up to 20% of their effective net worth in shares of financial institutions abroad, with the prior authorization of the CBP, in addition to the other considerations set out in Law No. 861/96. Article 40 Number 17 authorizes the purchase of shares in foreign banks or other institutions that operate in financial intermediation or in the stock market, or are auxiliaries of one or the other, for the purpose of achieving international scope for their activities.

**In banks by nonresidents** No. As an anti-money-laundering control and prudential oversight measure, entities supervised by the Superintendency of Banks may not sell, assign, or transfer their shares to individuals or legal entities domiciled in countries deemed to be tax havens.

**Open foreign exchange position limits** Yes. The following categories were established for financial system entities’ net position in foreign currency in relation to effective net worth:

1. Category A: short position of 10% to long position of 20%.
2. Category B: long position of 40% to long position of 50%.
3. Category C: long position of 90% to long asset position of 100%.

Financial entities must notify the Superintendency of Banks within the first five business days of each year of their category, which they may choose freely, and must remain in that category until the end of the year.

The daily net long operating position, defined as the positive difference between purchases and sales of foreign exchange by financial entities and other entities licensed to operate in the domestic foreign exchange market, may not exceed US$5 million, except in cases in which the Board of the CBP expressly and previously authorizes the exceeding of this limit, by substantiated petition of a financial entity, by means of which the situation establishing the exception is approved as long as the overrun does not affect the stability of the foreign exchange market.

Effective May 31, 2018, forward transactions made in US dollars with nonresidents may not exceed 3% of the effective net worth in the previous month converted to US dollars.

Effective October 18, 2018, forward transactions that do not involve the guarani are exempt from that limit. Resolution No. 15, Minute No. 67 of October 18, 2018.

## Changes during 2018 and 2019

**Exchange Arrangement**
Classification

Crawl-like arrangement 06/11/2018 Since June 2018, the exchange rate followed a depreciating trend within a 2% band against the US dollar. Accordingly, the de facto exchange rate arrangement was reclassified to crawl-like from floating.

Foreign exchange market

Forward exchange market 05/31/2018 The purchase volume of forward transactions made in US dollars with nonresidents may not exceed 3% of the effective net worth in the previous month converted to US dollars. The sales volume of forward transactions carried out in US dollars with nonresidents may not exceed 3% of the effective net worth in the previous month converted to US dollars.

10/18/2018 Forward transactions in US dollars with nonresidents, which do not involve the guarani, are exempt from the limit of 3% of the effective net worth in the previous month converted to US dollars.

Arrangements for Payments and Receipts

Prescription of currency requirements

Controls on the use of domestic currency
For capital transactions
Transactions in derivatives and other instruments 10/18/2018 Forward transactions in US dollars with nonresidents, which do not involve the guarani, are exempt from the limit of 3% of the effective net worth in the previous month converted to US dollars.

Payments arrangements

Bilateral payments arrangements
Operative 07/07/2018 The operational implementation of the payment system (SML) with Brazil took effect.

Capital Transactions

Controls on capital transactions

Controls on derivatives and other instruments
Purchase locally by nonresidents 05/31/2018 Forward transactions made in US dollars with nonresidents may not exceed 3% of the effective net worth in the previous month converted to US dollars.

10/18/2018 Forward transactions in US dollars with nonresidents, which do not involve the guarani, are exempt from the limit of 3% of the effective net worth in the previous month converted to US dollars.

Sale or issue locally by nonresidents 05/31/2018 Forward transactions made in US dollars with nonresidents may not exceed 3% of the effective net worth in the previous month converted to US dollars.

10/18/2018 Forward transactions in US dollars with nonresidents, which do not involve the guarani, are exempt from the limit of 3% of the effective net worth in the previous month converted to US dollars.

Provisions Specific to the Financial Sector

Provisions specific to commercial banks and other credit institutions
Open foreign exchange position limits 05/31/2018 Forward transactions made in US dollars with nonresidents may not exceed 3% of the effective net worth in the previous month converted to US dollars.

10/18/2018 Forward transactions in US dollars with nonresidents, which do not involve the guarani, are exempt from the limit of 3% of the effective
net worth in the previous month converted to US dollars.

### Exchange Arrangement

**Currency**: Yes.  
*The currency of Peru is the sol.*

**Other legal tender**: No.

**Exchange rate structure**

**Unitary**: Yes.

**Dual**, **Multiple**

**Classification**

**No separate legal tender**

**Currency board**

**Conventional peg**

**Stabilized arrangement**

**Crawling peg**

**Crawl-like arrangement**

**Pegged exchange rate within horizontal bands**

**Other managed arrangement**

**Floating**: Yes.  
*The de jure and de facto exchange rate arrangements are floating. The exchange rate is determined by supply and demand. The BCRP*
intervenes in the foreign exchange market to limit volatility without altering the exchange rate trend. BCRP interventions can also be conducted through dollar-indexed bonds and foreign exchange swaps. The BCRP publishes daily information about its intervention operations (prices and amounts) on its website with one-day lag.

**Free floating**

**Official exchange rate**  No.  The legal framework of the floating exchange rate system is established by Executive Decree No. 268-91-EF (March 26, 1991), which states that the exchange rate for foreign currency operations is determined in the foreign exchange market by the free interaction of supply and demand. Consequently, there is no official exchange rate. For private contracts involving transactions with foreign currency, Article 1237 of the Civil Code establishes that the exchange rate for valuation in domestic currency of obligations denominated in foreign currency is the ask exchange rate at the due or payment date of the contract. The Economic Studies Department of the Superintendence of Banks, Insurance Companies, and Pension Funds (SBS), within its role of promoting the transparent flow of information in the financial system (Article 32 of SBS Resolution No. 4027-2011), proposes the methodology for recording the exchange rate and interest rates (both freely determined). To contribute to the provision of information and for statistical purposes, the SBS publishes the daily exchange rate on its website. The daily exchange rate is registered as the bid and ask prices for banking operations recorded on DATATEC.

**Monetary policy framework**

Exchange rate anchor

- **U.S. dollar**
- **Euro**
- **Composite**
- **Other**

Monetary aggregate target

- **Inflation-targeting framework**  Yes.

**Target setting body**  Yes.

- **Government**
- **Central Bank**  Yes.

**Monetary Policy Committee**

- **Central Bank Board**  Yes.  According to the constitution of Peru, the BCRP is a public autonomous entity whose role is to preserve monetary stability. The BCRP is responsible for regulating the money supply and credit in the financial system, for managing the country’s international reserves, and for reporting on the nation’s finances. The CB’s inflation target is aimed at anchoring inflation expectations at a similar level to the inflation rate observed in developed economies and reflects the BCRP’s permanent commitment with monetary stability. Decisions are taken by majority vote. In case of a tie, the vote of the Governor of the BCRP is the decisive vote.
Government and Central Bank

Inflation target
Yes.

Target number
Yes.

Point target

Target with tolerance band

Band/Range
Yes. The BCRP has a continuous inflation target range between 1% and 3%.

Target measure
Yes. Inflation is defined as the year-on-year (y-o-y) percentage change in the consumer price index. Headline inflation is the consumer price index inflation, and this is the reference for the inflation-targeting regime accountability.

CPI
Yes.

Core inflation

Target horizon
No. The inflation target range must be met on a continuous basis.

Operating target (policy rate)
Yes.

Policy rate
Yes. The overnight interbank interest rate is the operating target of monetary policy. Certificates of deposit (CDs) issued in local currency by the BCRP are the main monetary instrument for open-market operations. The BCRP also issues CDs indexed to the policy rate, currently 2.75% (since March 2018), and charges a commission on transfers of these CDs to resident and nonresident institutions, except between resident financial institutions. The commission is currently 4%. Time deposits in the BCRP are also used as a sterilization instrument. In addition, CDs indexed to the exchange rate and denominated in local currency continue to be used as a monetary regulatory instrument to mop up liquidity in the financial system. They are also used by private banks as part of their exchange position. The BCRP issues CDs redeemable in US dollars, which facilitate its intervention in the spot foreign exchange market. Similarly, the BCRP participates in foreign exchange swap auctions with financial institutions.

Target corridor band

n.a.

Transparency
Yes.

Publication of votes
No.

Publication of minutes
No.

Publication of inflation forecasts
Yes. The BCRP publishes quarterly the Inflation Report where the inflation forecasts among other macroeconomic variable forecasts are presented.
Other monetary framework

Exchange tax  No.
Exchange subsidy  No.

Foreign exchange market  Yes.  Commercial banks may freely set their exchange rates and foreign exchange commissions in transactions with their clients.
Spot exchange market  Yes.  All lending institutions (including banks and microfinance institutions) are licensed to deal in foreign exchange with the public. The SBS is the official institution in charge of granting licenses to exchange bureaus and moneychangers. Currently, there are 806 exchange bureaus and 1,023 foreign exchange moneychangers. Exchange bureaus and moneychangers are not allowed to make transactions directly with the CB and their operations are limited to purchase and sale of banknotes.

Operated by the central bank  No.
Foreign exchange standing facility  No.
Allocation  No.
Auction  No.
Fixing  No.

Interbank market  Yes.  The foreign exchange market in Peru operates on two platforms: (1) DATATEC and (2) Reuters. All banks are licensed to participate in the interbank foreign exchange market. There were 17 banks as of December 31, 2018. Licenses are granted by the SBS. There are no limits on bid-ask spreads. However, all banks are subject to a daily ceiling according to the risk policy of the banking institution. The BCRP intervenes in the market via DATATEC at its quoted rates or by proposing its own prices. The BCRP may launch auctions of CDs indexed to the exchange rate. Auctions are not conducted on a regular basis. Auction participants who default on their obligations may be temporarily barred from participation. All lending institutions (including banks and microfinance entities) are eligible to participate. Auction results are published on the BCRP's website and DATATEC, Reuters, and Bloomberg terminals. Transactions in the foreign exchange market by private pension funds (Administradoras Privadas de Fondos de Pensiones) may not exceed a daily limit of 0.75% of the value of the fund and of 1.75% for the preceding five days (SBS Resolution No. 561-2013).

Over the counter  Yes.  Dealing takes place through Reuters, which allows direct negotiation between two counterparties.
Brokers  Yes.
Market making  Yes.  Participants bid and ask anonymously (based on a market-making agreement) through DATATEC.
Forward exchange market  Yes.  The BCRP does not participate in the forward foreign exchange market. The BCRP participates in foreign exchange swap auctions with financial institutions.

Official cover of forward operations  No.

### Provisions Specific to the Financial Sector

**Provisions specific to commercial banks and other credit institutions**  Yes.

Borrowing abroad  No.

Maintenance of accounts abroad  No. These accounts are permitted, but capital income from investment abroad is subject to income tax.

Lending to nonresidents (financial or commercial credits)  No.

Lending locally in foreign exchange  No.

Purchase of locally issued securities denominated in foreign exchange  No.

Differential treatment of deposit accounts in foreign exchange  Yes.

**Reserve requirements**  Yes.

For financial stability purposes, deposit accounts in domestic and foreign currency are treated differently: Reserve requirement rates (RRR) applicable to domestic currency accounts are as follows: (1) The reserve requirement rate in domestic currency is 5%. The minimum requirement of funds deposited in current accounts at the CB is 1.0%. (2) A special reserve requirement of 35% is applied to obligations in domestic currency that are indexed to foreign exchange variations. This special RRR has been reduced: (a) From 70% to 48% on December 27, 2016 (Circular No. 029-2016); (b) From 48% to 46% on February 27, 2017 (Circular No. 005-2017); (c) From 46% to 44% on April 28, 2017 (Circular No. 013-2017); (d) From 44% to 42% on June 21, 2017 (Circular No. 020-2017); (e) From 42% to 41% on August 22, 2017 (Circular No. 028-2017); (f) From 41% to 40% on September 28, 2017 (Circular No. 030-2017); (g) From 40% to 39% on December 22, 2017 (effective January 1, 2018, Circular No. 037-2017); (h) From 39% to 38% on January 26, 2018 (effective February 1, 2018, Circular No.
Reserve rate requirements applicable to foreign currency accounts are as follows: (1) There is a minimum reserve requirement rate of 9%, but for macroprudential purposes, the BCRP requires additional reserves, which are determined based on a marginal reserve rate and a cap on the average reserve rate, both currently at 35%. Effective July 1, 2018, the cap on average reserve requirement rate was reduced to 35% from 36%. Previously, the cap was effective April 1, 2018, reduced to 36% from 37%, effective March 1, 2018, reduced to 37% from 38%, effective February 1, 2018, reduced to 38% from 39%, and effective January 1, 2018, reduced to 39% from 40%. (2) The marginal reserve requirement rate in foreign currency is 35%. This marginal RRR has been reduced: (a) From 70% to 48% on December 27, 2016 (effective January 2017, Circular No. 030-2016); (b) From 48% to 46% on February 27, 2017 (effective March 2017, Circular No. 006-2017); (c) From 46% to 44% on April 28, 2017 (effective May 2017, Circular No. 014-2017); (d) From 44% to 42% on June 21, 2017 (effective July 2017, Circular No. 020-2017); (e) From 42% to 41% on August 22, 2017 (effective September 2017, Circular No. 028-2017); (f) From 41% to 40% on September 28, 2017 (effective October 2017, Circular No. 030-2017); (g) From 40% to 39% on December 22, 2017 (effective January 1, 2018, Circular No. 037-2017); (h) From 39% to 38% on January 26, 2018 (effective February 1, 2018, Circular No. 004-2018); (i) From 38% to 37% on February 21, 2018 (effective March 1, 2018, Circular No. 007-2018); (j) From 37% to 36% on March 23, 2018 (effective April 1, 2018, Circular No. 011-2018); (k) From 36% to 35% on June 28, 2018 (effective July 1, 2018, Circular No. 023-2018).

(3) Foreign-exchange-indexed obligations are subject to a special reserve requirement rate of 9%. (4) An additional reserve requirement is established if bank’s average daily balance of total loans (excluding the average balance of credits for foreign trade and the average balance of loans granted as of January 1, 2015, for a term greater than 3 years that exceed an amount of US$10 million) exceeds the greater amount between:

(a) 80% of the balance of credits in foreign currency reached as of September 30, 2013 (excluding the balance of credits for foreign trade).

(b) The total balance of credits in foreign currency of December 2017 (excluding the average balance of credits for foreign trade and the average balance of loans granted as of January 1, 2015, for a term greater than 3 years that exceed an amount of US$10 million) plus 40% of the accumulated flow with respect to December 2017 of the average credit in national currency, excluding from that flow the corresponding to mortgage, consumer, and foreign trade credit. For the conversion to dollars of this flow, the 2017 end-of-period accounting exchange rate, published by the SBS, will be used.

(c) 1.04 times the total balance of credits in foreign currency of December 2017 (excluding the average balance of credits for foreign trade and the average balance of loans granted as of January 1, 2015, at a term greater than 3 years that exceed an amount of US$10 million). This additional reserve will be applied to total bank’s liabilities.

Also, an additional reserve is established for banks whose average daily balance of the total automobile credits and mortgage in dollar that exceeds 50% of the balance reached as of February 28, 2013, or
9% of their last effective equity published by the SBS, whichever results greater, they will be subject to an additional reserve equivalent to 15% of the percentage deviation from the limit. The limits on average daily balance of total automobile credits and mortgage in dollars were reduced to 50% (from 60%) of the balance reached as of February 28, 2013, or 9% (from 12% of the last effective equity on February 22, 2019 (effective March 1, 2019, Circular No. 005-2019).

Coverage of legal reserve requirements includes liabilities of foreign branches. The general reserve rate requirement applies to the following operations: (1) foreign-exchange-indexed obligations; (2) obligations with nonresident institutions with maturities of two years or more that exceed certain limits and operations; and (3) obligations derived from credit with nonresident institutions. A type of repo operation is used to inject nuevos soles (new sol; this operation allows the BCRP to provide soles to financial institutions in exchange for an equivalent amount of foreign currency reserve funds, which is deducted from their dollar reserve requirements up to an amount equal to 20% of their obligations subject to foreign currency reserve requirements (an expansionary operation). Another new type of repo operation was implemented to support the conversion to national currency of loans granted by financial institutions in foreign currency. Under the terms of the operation, the CB sells foreign currency to the financial institution on the spot date to finance this conversion (a currency substitution operation). Synthetic forwards are also included in the calculation used for limits on foreign exchange derivatives.

### Liquid asset requirements

Flooding

The de jure exchange rate arrangement is free floating. The Bangko Sentral ng Pilipinas (BSP) adheres to a market-determined exchange rate policy with some scope for occasional action solely to prevent potentially disruptive sharp fluctuations that may have an adverse impact on the inflation outlook. The importation season, which was around July to September, and the inflows because of seasonal remittances in the 4th quarter were taken into consideration in estimating the possible intervention amount. However, the BSP does not target or support a given level of exchange rate; it allows the value of the peso to be determined by the demand for and supply of foreign currencies. The BSP may participate in the US dollar–peso market directly with market participants or via market makers and does not disclose intervention data. Data on currency swaps settled in foreign currency and non-deliverable forwards (NDFs) settled in domestic currency are reported monthly in Sections II and IV, respectively, of the Data Template on International Reserves and Foreign Currency Liquidity, which is posted on the BSP website. In general, the peso was on an appreciating trend between January and July 2019 amid market optimism on positive developments in US-China trade relations and the dovish remarks from the US Federal Reserves. On a year-to-date basis, the peso appreciated against the US dollar by 1.20% to close at ₱51.96/US$1 on August 6, 2019, from the end-December 2018 closing rate of ₱52.58/US$1. The de facto exchange rate arrangement is classified as floating.

Free floating

Official exchange rate

The BSP publishes reference rates daily based on the Bankers Association of the Philippines (BAP)-weighted USD/PHP average rate, with Bloomberg as its calculating agent, and on the Reuters Eikon system foreign exchange previous day’s New York closing price for other currencies. These are used to determine the value of foreign currency vis-à-vis the US dollar, euro, and peso.

Government
Central Bank

Monetary Policy Committee
The Development Budget Coordination Committee (DBCC), in consultation with the BSP, sets a fixed inflation target over a multi-year period to promote a longer-term view on inflation, help anchor inflation expectations, and foster greater flexibility in economic decisions. On approval by the DBCC, the BSP announces the inflation target to the public. The DBCC is composed of the principals of the four member agencies namely, Department of Budget and Management, Department of Finance, National Economic and Development Authority, and the Office of the President. The BSP was invited to join the DBCC as a resource institution to provide inputs on monetary measures and policies. Although the responsibility of achieving the inflation target rests primarily with the BSP, the joint announcement of the inflation target reflects active government participation in achieving the goal of price stability.

The BSP has employed fixed multi-year inflation targets in replacement of the previous variable annual inflation target since July 2010. The National Government’s (NG’s) inflation target has a tolerance interval of ±1 percentage point (pp) around the target. It is measured in terms of the average year-on-year (y-o-y) change in the consumer price index over the calendar year. 2011: 4.0% ± 1 pp (3.0%–5.0%); 2012–2014: 4.0% ± 1 pp (3.0%–5.0%); 2015–2016: 3.0% ± 1 pp (2.0%–4.0%); 2017–2018: 3.0% ± 1 pp (2.0%–4.0%). On February 26, 2019, in line with the inflation-targeting framework, the DBCC, through its Resolution No. 2019-01, decided to maintain the current inflation target at 3.0% with a tolerance band of ±1 pp for 2019–2020 and to set the inflation target at 3.0% ± 1.0 pp for 2021–2022. These decisions were announced to the public, with effect on February 8, 2019.

The primary objective of BSP monetary policy is “to promote price stability conducive to a balanced and sustainable growth of the economy and employment.” The government’s inflation target is defined in terms of the average y-o-y change in the consumer price index over the calendar year and is set two years ahead in consultation with the BSP.

The BSP adopts a two-year policy horizon (current and one year ahead) in setting the medium-term inflation targets.

The BSP’s primary monetary policy instrument is its overnight reverse repurchase rate.

The overnight lending facility (OLF) and the overnight deposit facility (ODF) rates form the upper and lower bounds of the corridor, which are set at 50 basis points (bps) around the overnight reverse rate.
To ensure accountability in cases where the BSP fails to achieve the inflation target, the BSP Governor issues an Open Letter to the President outlining the reasons why actual inflation did not fall within the target, along with the steps that would be taken to bring the inflation toward the target. The Open Letter contains explanation clauses, a predefined set of acceptable circumstances under which the BSP failed to achieve its inflation target. Open Letters to the president were issued on January 16, 2004, January 18, 2005, January 25, 2006, January 19, 2007, January 14, 2008, January 26, 2009, January 28, 2016, and January 20, 2017, and January 25, 2019.

Detailed report on economic developments is submitted to the President and Congress, on a quarterly and annual basis. These reports are released to the public as the BSP’s Report on Economic and Financial Developments and Annual Report.

The decisions of the Monetary Board (MB) concerning monetary policy are determined by consensus. No attribution of votes to individual Board members is made to emphasize the collegial and consensus-based nature of the decision-making process.

The BSP publishes the highlights of each MB meeting on the monetary policy stance, with a lag of four weeks. The highlights of each MB meeting contain the key considerations in the formulation of the monetary policy stance, including the inflation outlook, output, and domestic liquidity and credit conditions.

The BSP discloses updated baseline inflation forecasts after each MB meeting on the monetary policy stance (which is held eight times a year). In addition, the BSP also publishes in greater detail the inflation outlook using a fan chart in its quarterly Inflation Report. The fan chart depicts the probability of different inflation outcomes based on the central projection (corresponding to the baseline forecast of the BSP) and the risks surrounding the inflation outlook.

Commercial banks may freely set their exchange rates and margins in transactions with their clients.

Universal and commercial banks licensed by the BSP to operate in the Philippines may engage in spot foreign exchange transactions in pesos and US dollars and in other third-currency transactions. Member banks of the Bankers BAP may trade in the peso–US dollar spot market via the Bloomberg trading platform. As of December 31, 2018, there were 45 BAP member banks, of which 37 have trades on the Bloomberg terminal. Residents may purchase foreign exchange from foreign exchange dealers (FXDs) and money changers (MCs) for outward investment in any amount. The BSP Financial Market Operations Sub-Sector does not deal with MCs. Thrift banks (TB), rural banks, and cooperative banks may buy and sell foreign exchange under the pertinent foreign exchange rules and regulations.

## Arrangements for Payments and Receipts

### Prescription of currency requirements
Yes. Payments for exports may be made in the following currencies: Australian dollars, Bahrain dinars, Kuwaiti dinars, Brunei dollars, Canadian dollars, Chinese yuan, Euros, Hong Kong dollars, Indonesian rupiah, Korean won, Pound sterling, Saudi Arabian riyals, Singapore dollars, Swiss francs, Thai baht, U.A.E. dirhams, US dollars, Japanese yen, and any other currency declared convertible with the BSP.

### Controls on the use of domestic currency
Yes. The use of domestic currency for international payments and receipts is not allowed, except for imports from and exports to ASEAN countries.

### For current transactions and payments
Yes. The use of domestic currency for international payments and receipts is not allowed, except for exports to ASEAN countries (provided the BSP is not asked to intervene in the clearing of any balances from this payment scheme and gold sales to the BSP which are considered constructive exports).

### For capital transactions
Yes.

#### Transactions in capital and money market instruments
Yes. Transactions in capital and money market instruments are subject to the PHP 50,000 limit on cross-border transfer of local currency under domestic laws and regulations.

#### Transactions in derivatives and other instruments
Yes. Effective March 8, 2019, customers may hedge their market risks arising from foreign exchange obligations through foreign exchange forwards (deliverable and non-deliverable) and foreign exchange swaps with AABs provided the underlying transaction is eligible for servicing using foreign exchange resources of AABs or AAB-forex corps.

All NDF contracts by banks with residents must be settled in Philippine pesos.

#### Credit operations
Yes. Banks may extend peso financing to nonresidents to fund the following:
(1) Without prior BSP approval – specific cases allowed under the MORB; or
(2) Subject to prior BSP approval – for use in projects/programs/purposes that are: (a) not covered by item (1) above; and (b) legitimate and not contrary to laws, regulations, public order, public health, public safety, or public policy.

Offshore issuances by nonresidents of peso-denominated bonds/notes and similar debt instruments (whether to be settled in foreign or local currency) must be registered with the BSP to be eligible for servicing using foreign exchange resources of AABs/AAB-forex corps, where the transaction will involve: (1) inward remittance of foreign exchange to the Philippines by the nonresident issuer/investor; or (2) participation of a resident enterprise or any of its offshore offices, branches, subsidiaries, and affiliates as issuer, guarantor, or beneficiary under the transaction. The transaction must comply with the rules on cross-border transfer of Philippine currency as well as pertinent rules and regulations of the government agencies/entities.

### Use of foreign exchange among residents
Yes.

There are no restrictions on the use of foreign exchange among residents, provided the sale of foreign exchange by AAB/AAB-forex corps is supported by documentation.

Residents may also purchase any amount of foreign exchange from FXDs and MCs, subject to the following documentary requirements: (1) application to sell/purchase foreign currency; and (2) supporting documents for purchase of foreign exchange if the amount exceeds US$10,000 for non-trade current account purposes or for all other
purposes, regardless of the amount involved. FXDs/MCs must only be allowed to sell foreign currencies in an amount not exceeding US$10,000 or its equivalent a transaction, and not exceeding US$50,000 or its equivalent per month per customer. Exemption or higher limits may be granted by the appropriate department of the BSP Financial Supervision Sector if justified by the business model of the MC/FXD. FXDs’/MC’s’ pay-outs of more than PHP 500,000 or its foreign currency equivalent in any single transaction with customers or counterparties must only be made via check payment or direct credit to deposit accounts.

Payments arrangements  Yes.
Bilateral payments arrangements  No.
Operative  No.
Inoperative  No.
Regional arrangements  Yes. The Philippines is a member of ASEAN.
Clearing agreements  No.
Barter agreements and open accounts  No.
Administration of control  Yes. Foreign exchange regulations are administered by the BSP on the basis of existing laws and policy decisions adopted by the MB of the BSP.
Payments arrears  No.
Official  No.
Private  No.
Controls on trade in gold (coins and/or bullion)  Yes. Gold may be freely bought and sold, except gold produced by small-scale miners, including panned gold, which must be sold to the BSP. The importation of gold in any form is allowed without any restriction, except (1) coin blanks essentially of gold, which require prior BSP clearance; and (2) articles made in whole or in part of gold, silver, or other precious metals or alloys whose stamp, brand, or mark does not indicate their actual fineness of quality which is a prohibited import. The exportation of gold in any form is likewise allowed, except (1) gold from small-scale mining, including panned gold, which must be sold to the BSP; and (2) articles made in whole or in part of gold, silver, or other precious metals or alloys whose stamp, brand, or mark does not indicate their actual fineness of quality, which is a prohibited export.
Controls on exports and imports of banknotes  Yes.
On exports  Yes. The maximum amount of domestic currency that can be exported without prior BSP written authorization is up to PHP 50,000. For amounts exceeding PHP 50,000, resident and nonresident travelers must obtain prior written authorization from the BSP.
Domestic currency  Yes. For anti-money-laundering (AML) purposes, travelers must complete a foreign currency and other foreign-exchange-denominated bearer monetary instruments declaration form and submit it to the Bureau of Customs for cross-border transportation of amounts exceeding US.
$10,000 or its equivalent. Information must be provided on the source and purpose of the transportation of the currency or monetary instrument, among others.

Nonresident Accounts

Foreign exchange accounts permitted

Yes.

An offshore banking unit (OBU) may freely engage in all normal banking transactions with nonresidents and/or with other OBUs, involving any currency other than the Philippine peso. There are no restrictions on the withdrawal by the depositor of his deposit or on the transfer of the same abroad, except those arising from the contract between the depositor and the bank. Any person, natural or juridical, may deposit foreign currencies with Philippine banks authorized to operate a foreign currency deposit unit (FCDU) or expanded FCDU. There is no restriction on the withdrawal by the depositor of his foreign currency deposit or on the transferability of the same abroad, except those arising from the contract between the depositor and the bank. The foreign exchange account may be funded by own foreign exchange or foreign exchange remitted from abroad.
Domestic currency accounts: Yes. These accounts are allowed if they are funded as follows and documented: (1) inward remittances of convertible foreign exchange; (2) peso income of nonresidents from, or peso sales proceeds of, properties in the Philippines that may be owned by nonresidents under existing laws; (3) onshore peso receipts of nonresidents from residents for services rendered by the former to the latter, for which the resident was entitled to buy foreign exchange from AABs and AAB-forex corps for remittance to the nonresident service provider; (4) peso receipts of expatriates working in the Philippines with contracts of less than one year representing salary/allowance/other benefits; (5) onshore peso funds of (a) foreign students enrolled for at least one semester in the Philippines and (b) nonresident Filipinos; (6) cash collateral used for investments under Securities Borrowing and Lending or similar arrangements; and (7) peso proceeds from domestic sales by nonresident issuers of Philippine Stock Exchange (PSE)-listed equity securities.

Convertible into foreign currency: Yes. This is permitted for peso deposit accounts funded by eligible funds and subject to compliance with Section 3.2 of the Foreign Exchange Manual.

Approval required: No.

Blocked accounts: Yes. Banks are prohibited from dealing with nonresidents who are designated and covered by freeze orders under relevant Anti-Money-Laundering Council resolutions.

References to legal instruments and hyperlinks: This information can be found at the AREAER ONLINE database: http://www.elibrary-areaer.imf.org/Pages/Reports.aspx.

Imports and Import Payments

Foreign exchange budget: No.

Financing requirements for imports: Yes.

Minimum financing requirements: No.

Advance payment requirements: No. This is allowed with documentation.

Advance import deposits: Yes. Foreign exchange purchased from AABs/AAB-forex corps for advance payment of imports must either be: (1) remitted directly to the intended nonresident beneficiary’s account (including payment/treasury centers/hubs of a group of companies) on the date of purchase; or (2) credited to the resident importer’s FCDU (with the same or another AAB) for eventual remittance by the depository AAB to the intended nonresident beneficiary (including payment/treasury centers/hubs of a group of companies) for settlement of import obligation. Provided, if the depository bank is different from the foreign exchange selling institution: (1) the foreign exchange selling institution must directly transfer the foreign exchange purchases to the depository bank of the purchaser; and (2) the depository bank must also be the foreign exchange remitting AAB. Previously, foreign exchange purchased from AABs and/or AAB-forex corps for advance payment of imports had to be directly remitted to the nonresident beneficiary on the date of purchase.

Documentation requirements for release of foreign exchange for imports: Yes. Sales of foreign exchange by AABs and/or AAB-forex corps and BSP-registered FXDs and MCs for payments of imports are allowed subject only to documentation. AABs and AAB-forex corps may sell foreign exchange to residents for payment of importations, subject to submission of the following to the foreign exchange selling...
institution: (1) for sale not exceeding US$500,000 (for individuals) and US$1,000,000 (for corporates/other entities) or its equivalent in other foreign currency a client a day, submission of a duly accomplished Application to Purchase (ATP) foreign exchange form; (2) for sale exceeding US$500,000 (for individuals) and US$1,000,000 (for corporates/other entities) or its equivalent in other foreign currency a client a day, submission of a duly accomplished ATP form and documents listed under existing rules; and (3) for sale of foreign exchange (regardless of the amount) to settle net payables under intercompany netting arrangement (pen Account) among nonbank-related parties, submission of a duly accomplished ATP form and documents listed under existing rules.

Foreign exchange purchased from AABs/AAB-forex corps for payment of importations must either be: (1) remitted directly to the intended nonresident beneficiary’s account (including payment/treasury centers/hubs of a group of companies) on the date of purchase; or (2) credited to the resident importer’s FCDU (with the same or another AAB) for eventual remittance by the depository AAB to the intended nonresident beneficiary (including payment/treasury centers/hubs of a group of companies) for settlement of import obligation: Provided, if the depository bank is different from the foreign exchange selling institution: (1) the foreign exchange selling institution must directly transfer the foreign exchange purchases to the depository bank of the purchaser; and (2) the depository bank must also be the foreign exchange remitting AAB.

LCs must be opened on or before the date of shipment. Only one LC may be opened for each import transaction; amendments do not require BSP approval.

The importation of certain products is regulated or prohibited for reasons of public health and safety, environmental considerations, national security, international commitments, or the development and rationalization of local industries.

Commodity imports are classified into three categories: (1) freely importable, (2) regulated, and (3) prohibited. Imports of regulated products require a clearance certificate or permit from the appropriate government regulatory agency or office; imports of prohibited commodities are not allowed under existing laws.

Tariff quota licenses are issued for some sensitive agricultural products.

The tariff structure clusters around four tariff rates: 0%, 1%, 3%, and 5%. The number of tariff lines dutiable at these rates accounts for more than 56% of the total tariff lines. The Philippines is a party to the common effective preferential tariff of the AFTA.
system
State import monopoly No.

All foreign nationals seeking employment in the Philippines must obtain employment permit from the Department of Labor and Employment. However, the following categories of foreign nationals are exempted from securing an employment permit: (1) All members of the diplomatic service and foreign government officials accredited by and with reciprocity arrangement with the Philippine government. (2) Officers and staff of international organizations of which the Philippine government is a member and their legitimate spouses desiring to work in the Philippines. (3) All foreign nationals granted exemption by law. (4) Owners and representatives of foreign principals whose companies are accredited by the Philippine Overseas Employment Administration (POEA), who come to the Philippines for a limited period and solely for the purpose of interviewing Filipino applicants for employment abroad. (5) Foreign nationals who come to the Philippines to teach, present, and/or conduct research studies in universities and colleges as visiting, exchange, or adjunct professors under formal agreements between the universities or colleges in the Philippines and foreign universities or colleges; or between the Philippine government and foreign government, provided the exemption is on a reciprocal basis. (6) Permanent resident foreign nationals and probationary or temporary resident visa holders under Section 13 of the Philippine Immigration Act of 1940. Nonresidents are allowed to open/maintain peso deposit accounts with AABs funded by peso receipts of expatriates working in the Philippines with contracts less than one year. Foreign exchange may be purchased from AABs/AAB-forex corps for salary/bonus/dividends/other benefits of foreign nationals, subject to submission of the applicable documents depending on the amount involved.

Prior approval No.
Quantitative limits No.
Indicative limits/bona fide test Yes. AAB/AAB-forex corps may sell foreign exchange to residents to cover payments to nonresident beneficiaries for non-trade current account purposes (excluding foreign/foreign currency loans and investments) subject to the submission of the following to the foreign exchange selling institution: (1) for sale not exceeding US$500,000 (for individuals) and US$1,000,000 (for corporates/other entities) or its equivalent in other foreign currency a client a day, a duly accomplished ATP form; and (2) for sale exceeding US$500,000 (for individuals) and US$1,000,000 (for corporates/other entities) or its equivalent in other foreign currency a client a day, a duly accomplished ATP form and supporting documents required under
existing rules. Foreign exchange purchased from AABs/AAB-forex corps must either be: (1) remitted directly to the intended nonresident beneficiary’s account (including payment/treasury centers/hubs of a group of companies) on the date of purchase; or (2) credited to the resident purchaser’s FCBU (with the same or another AAB) for eventual remittance by the depository AAB to the intended nonresident beneficiary (including payment/treasury centers/hubs of a group of companies) for the declared purpose. Provided, if the depository bank is different from the foreign exchange selling institution: (1) the foreign exchange selling institution must directly transfer the foreign exchange purchases to the depository bank of the purchaser; and (2) the depository bank must also be the foreign exchange remitting AAB. Starting February 14, 2017, FXDs/MCs must only be allowed to sell foreign exchange currencies in an amount not exceeding US$10,000 or its equivalent transaction, and not exceeding US$50,000 or its equivalent per month per customer. Quantitative limits  No.

Indicative limits/bona fide test  Yes.

AAB/AAB-forex corps may sell foreign exchange to residents to cover payments to nonresident beneficiaries for non-trade current account purposes (excluding foreign/foreign currency loans and investments) subject to the submission of the following to the foreign exchange selling institution: (1) for sale not exceeding US$500,000 (for individuals) and US$1,000,000 (for corporates/other entities) or its equivalent in other foreign currency a client a day, a duly accomplished ATP form; (2) for sale exceeding US$500,000 (for individuals) and US$1,000,000 (for corporates/other entities) or its equivalent in other foreign currency a client a day, a duly accomplished ATP form and supporting documents required under existing rules. Foreign exchange purchased from AABs/AAB-forex corps must either be: (1) remitted directly to the intended nonresident beneficiary’s account (including payment/treasury centers/hubs of a group of companies) on the date of purchase; or (2) credited to the resident purchaser’s FCBU (with the same or another AAB) for eventual remittance by the depository AAB to the intended nonresident beneficiary (including payment/treasury centers/hubs of a group of companies) for the declared purpose. If the depository bank is different from the foreign exchange selling institution: (1) the foreign exchange selling institution must directly transfer the foreign exchange purchases to the depository bank of the purchaser; and (2) the depository bank must also be the foreign exchange remitting AAB. Residents are allowed to purchase foreign exchange (regardless of the amount) from AAB/AAB-forex corps to cover credit card obligation to another resident subject to submission to the foreign exchange selling AAB/AAB-forex corps of a duly accomplished ATP form and supported by documents listed under existing rules. BSP-registered FXDs and MCs may sell foreign exchange for non-trade current account purposes up to US$10,000 or its equivalent without supporting documents. Larger amounts require supporting documents. From February 14, 2017, FXDs/ MCs must
only be allowed to sell foreign exchange currencies in an amount not exceeding US$10,000 or its equivalent transaction, and not exceeding US$50,000 or its equivalent per month per customer. Exemption or higher limits may be granted by the appropriate department of the BSP-FSS if justified by the business model of the MC/FXD. FXD/MCs’ pay-outs of more than PHP 500,000 or its foreign currency equivalent in any single transaction with customers or counterparty must only be made via check payment or direct credit to deposit accounts.

Capital Transactions

Controls on capital transactions Yes.
Foreign loans and investments registered with the BSP may be serviced using foreign exchange purchased from AABs, AAB-forex corps, and BSP-registered FXDs and MCs, subject to documentary requirements. Effective March 8, 2019, additional short-term private sector loans cited in Section 24.3 of the Foreign Exchange Manual are no longer required to be registered with the BSP to allow access to the foreign exchange resources of the banking sector provided these are duly reported to the BSP by the borrower/creditor.

| Repatriation requirements | No. |
| Surrender requirements    | No. |
| Surrender to the central bank | No. |
| Surrender to authorized dealers | No. |
| Controls on capital and money market instruments | Yes. |
| Securities sold by banks or NBFI's without recourse or subject of |
quasi-banking activities are delivered to the purchaser’s/lender’s designated BSP-accredited custodian or, the options available for delivery of securities involving local purchases from banks or NBFI under BSP supervision were expanded to include SEC-authored central securities depositories.

**On capital market securities**  
Yes.  
As a general rule, no securities may be sold or offered for sale to the public within the country unless such securities have been registered with and are permitted to be sold by the SEC.

**Shares or other securities of a participating nature**  
Yes.  
If at least one of the parties in a securities transaction is a bank or a NBFI under BSP supervision, securities purchased must be held by a BSP-accredited securities custodian or registry or SEC-authorized central securities depository that is a third party – that is, with no subsidiary or affiliate relationship with the issuer or seller of the securities. However, if the purchaser is a nonresident who is a party to an existing global custody agreement governed by foreign laws and conventions under which the bank or NBFI is designated as custodian or subcustodian, the requirement for a third-party BSP-accredited custodian or SEC-registered central securities depository does not apply. Registration of the shares purchased with BSP or with registering banks is necessary only if the foreign exchange needed for capital repatriation and remittance of dividends, profits, and earnings thereon will be purchased from AABs and/or AAB-forex corps.

**Purchase locally by nonresidents**  
Yes.  
The shares or securities issued or sold by nonresidents are subject to the same SEC approval and registration requirements as those issued by local companies. Payment for redemption of such shares or securities must not, however, involve the purchase of foreign exchange from AABs and/AAB-forex corps. Foreign firms whose securities are listed and traded on a local stock exchange must designate a transfer agent and registrar in the Philippines. Residents may purchase foreign exchange from AABs and/or AAB-forex corps without BSP approval for investment in foreign-currency-denominated instruments issued onshore by nonresidents, provided these do not exceed US$60 million an investor a year when aggregated with other allowable outward investments. Effective March 8, 2019, resident investors may purchase foreign exchange in excess of the US$60 million annual threshold without prior BSP approval, subject to the 15-day prior notification to the BSP and documentation. Nonresident issuances of notes/bonds or similar instruments in the domestic market must require BSP approval before execution.

**Sale or issue locally by nonresidents**  
Yes.  
Residents are free to invest abroad without restriction. Residents may purchase foreign exchange from AABs and/or AAB-forex corps without BSP approval for investment in foreign-currency-denominated instruments issued onshore by nonresidents, provided these do not exceed US$60 million an investor a year when aggregated with other allowable outward investments. Effective March 8, 2019, resident investors may purchase foreign exchange in excess of the US$60 million annual threshold without prior BSP approval subject only to 15-day prior notification to BSP and documentation. Residents may also purchase foreign exchange from FXDs and MCs for outward investments, regardless of the amount, subject to documentation. Banks’ investments in subsidiaries and affiliates abroad are subject to BSP approval.

**Sale or issue abroad by residents**  
Yes.  
Private sector borrowing may be freely obtained, provided there is no guarantee from the government sector and payments are not funded with AABs’ and/or AAB-forex corps’ resources. Effective March 8,
2019, foreign loans/borrowings of the private sector that are not publicly guaranteed and will be serviced using foreign exchange purchased from AABs or AAB-forex corps no longer require prior BSP approval but are subject to notification and registration to the BSP. Public sector borrowing requires BSP approval. Banks that wish to issue unsecured subordinated debt must secure the approval of the BSP.

Investments of residents which will require settlement in foreign currency in favor of another resident must be governed by the rules on resident-to-resident transactions. AAB/AAB-forex corps may sell foreign exchange (regardless of amount) to nonbank residents for their foreign exchange transactions with other residents subject to the submission to the foreign exchange selling institution of a duly accomplished ATP foreign exchange and supported by documents such as: a.) contract/agreement or equivalent document evidencing the payable to resident, including those covering transactions between residents; and b.) proof of amount due or any equivalent document showing amount required/due.

That is, AAB/AAB-forex corps may sell foreign exchange (regardless of amount) to nonbank residents for their foreign exchange transactions with other residents subject to the submission to the foreign exchange selling institution of a duly accomplished ATP foreign exchange and supported by documents such as: a.) contract/agreement or equivalent document evidencing the payable to resident, including those covering transactions between residents; and b.) proof of amount due or any equivalent document showing amount required/due.

Controls on derivatives and other instruments

Yes.

Derivatives are considered securities under the Securities Regulation Code and are being administered by the SEC. Banks may engage in generally authorized derivatives activities without BSP approval, provided they follow the risk management guidelines for derivatives transactions and comply with laws, rules, and regulations for this activity. BSP approval is required for banks to engage in all financial derivatives activities not expressly classified as "generally authorized."

U/KBs may act as dealer of forward foreign exchange contracts subject to BSP licensing requirements and compliance with sales and marketing guidelines. On the other hand, all banks may apply for limited user (to transact as end-user) or special broker (to facilitate transactions) authority for forward foreign exchange transactions subject to BSP regulations.

Universal banks, commercial banks, and other banks with limited user derivatives authority may engage only in foreign exchange forwards and swap transactions with other banks and nonresidents if the latter are hedging market risk or covering funding requirements. Foreign exchange regulations and documentary requirements for derivatives apply. TBs authorized to issue foreign LCs and pay, accept, and negotiate import and export drafts and bills of exchange may apply for Type 2 derivatives authority to be a dealer, broker, and end-user of deliverable foreign exchange forwards subject to certain conditions. The total notional amount of banks' NDFs involving Philippine pesos is limited to 20% and 100%, respectively, of the capital of domestic banks and local branches of foreign banks. Anti-money-laundering laws, rules, and regulations; relevant SEC rules; foreign exchange regulations; and documentary requirements for derivatives also apply.

Purchase locally by nonresidents

Yes.

U/KBs may act as dealer of forward foreign exchange contracts, subject to BSP licensing requirements and compliance with sales and marketing guidelines. Derivatives involving forward purchases of foreign exchange by nonresidents are not allowed, except for BSP-registered foreign
**Sale or issue locally by nonresidents**

Yes.

As a general rule, no securities may be sold or offered for sale to the public within the country unless such securities have been registered with and are permitted to be sold by the SEC. Derivatives fall under the definition of securities.

U/KBs may act as dealer of forward foreign exchange contracts, subject to BSP licensing requirements and compliance with sales and marketing guidelines. On the other hand, all banks may apply for limited user (to transact as end-user) or special broker (to facilitate transactions) authority for forward foreign exchange transactions subject to BSP regulations.

Nonresidents’ derivatives transactions involving local currency require BSP approval.

**Purchase abroad by residents**

Yes.

Foreign exchange contracts that do not involve local currency are unrestricted. Contracts involving local currency are subject to restrictions on the importation and exportation of local currency.

Banks that wish to engage in derivatives transactions not considered generally authorized are required to secure license from the BSP.

**Sale or issue abroad by residents**

Yes.

Foreign exchange contracts that do not involve local currency are unrestricted. Contracts involving local currency are subject to restrictions on the importation and exportation of local currency.

Banks that wish to engage in derivatives transactions not considered generally authorized are required to secure license from the BSP.

**Controls on credit operations**

Yes.

Republic Act No. 3765, the Truth in Lending Act, requires the disclosure of finance charges in connection with extensions of credit.

**Commercial credits**

Yes.

These transactions may be freely undertaken, provided they do not involve foreign exchange purchased from AABs and/or AAB-forex corps. Banks may extend peso financing to nonresidents to fund the following:

1. Without prior BSP approval – specific cases allowed under the MORB; or
2. Subject to prior BSP approval – for use in projects/programs/purposes that are: (a) not covered by item (1) above; and (b) legitimate and not contrary to laws, regulations, public order, public health, public safety, or public policy.

**By residents to nonresidents**

Yes.

These transactions may be freely undertaken, provided they do not involve foreign exchange purchased from AABs and/or AAB-forex corps. Banks may extend peso financing to nonresidents to fund the following:

1. Without prior BSP approval – specific cases allowed under the MORB; or
2. Subject to prior BSP approval – for use in projects/programs/purposes that are: (a) not covered by item (1) above; and (b) legitimate and not contrary to laws, regulations, public order, public health, public safety, or public policy.

**To residents from nonresidents**

Yes.

Private sector borrowing is permitted, provided it is not guaranteed by the government sector and payments are not funded with AABs’ and/or AAB-forex corps’ resources. Effective March 8, 2019, foreign loans/borrowings of the private sector that are not publicly guaranteed and will be serviced using foreign exchange purchased from AABs or AAB-forex corps no longer require prior BSP approval but are subject to notification and registration to the BSP. Foreign loans/borrowings of the public sector and of the private sector that are guaranteed by the public sector require prior BSP approval.

**Financial credits**

Yes.

Loans by nonresidents from expanded foreign currency deposit units (EFCDUs), regardless of maturity, do not require BSP approval, provided (1) they are not guaranteed by the government sector; (2) they are serviced with foreign exchange purchased outside AABs and/or AAB-forex corps; and (3) relevant banking regulations are followed, including the single borrower limit.

**By residents to nonresidents**

Yes.

These transactions may be freely undertaken if they do not involve foreign exchange purchased from AABs and/or AAB-forex corps.

**To residents from nonresidents**

Yes.

Private sector borrowing may be freely obtained, provided there is no guarantee from the government sector and payments are not funded.
with AABs’ and/or AAB-forex corps’ resources. Effective March 8, 2019, foreign loans/borrowings of the private sector that are not publicly guaranteed and will be serviced using foreign exchange purchased from AABs or AAB-forex corps no longer require prior BSP approval but are subject to notification and registration to the BSP. Foreign loans/borrowings of the public sector and of the private sector that are guaranteed by the public sector require prior BSP approval. Banks that wish to issue unsecured subordinated debt must secure the approval of the BSP.

**Guarantees, sureties, and financial backup facilities**

- By residents to nonresidents: Yes.
  - Guarantees for public sector accounts that may give rise to actual foreign obligation of the public sector to nonresidents and those issued by government-owned and government-controlled corporations [excluding public sector banks and NBFIs with quasi-banking functions] in favor of nonresidents require BSP approval. Guarantees issued by resident banks and other financial institutions, including public sector banks and NBFIs with quasi-banking functions that cover foreign obligations for account of the private sector other than foreign loans need not be registered, but must be reported to the BSP to be eligible for servicing using foreign exchange purchased from AABs and/or AAB-forex corps.

- To residents from nonresidents: Yes.
  - Guarantees that are related to foreign/foreign currency loans/borrowings that require BSP approval/registration must already form part of the loan terms submitted for BSP approval/registration (as applicable). In case of a call on such guarantee: (1) The borrower/guarantor must submit a written notification to the BSP target date of settlement of the call on the guarantee to allow servicing using foreign exchange resources of AABs/AAB-forex corps; and (2) the borrower must comply with pertinent rules covering the underlying obligation (including reportorial requirements).
  - Guarantees by nonresident foreign banks and financial institutions as well as other nonresident entities to cover private sector peso loan/foreign currency loans from banks operating in the Philippines authorized under existing regulations need not be registered, but must be reported to the BSP to be eligible for servicing with foreign exchange purchased from AABs and/or AAB-forex corps.

**Controls on direct investment**

- Yes.

**Outward direct investment**

- Yes.
  - Residents may invest abroad without restriction. Residents may purchase foreign exchange from AABs and/or AAB-forex corps for investment abroad up to US$60 million or its equivalent an investor a year, a fund a year for qualified investors. Effective March 8, 2019, resident investors may purchase foreign exchange in excess of the US$60 million annual threshold without prior BSP approval, subject to the 15-day prior notification to the BSP and documentation.
  - Residents may also purchase foreign exchange from FXDs and MCs for outward investment, including investment in bonds and notes of the Philippines and other Philippine entities requiring settlement in foreign currency, regardless of the amount, provided such purchases are supported by documentation.

**Inward direct investment**

- Yes.
  - Foreign inward investments registered with the BSP may be serviced using foreign exchange purchased from AABs, AAB-forex corps, and BSP-registered FXDs and MCs, subject to documentary requirements. Inward FDIs may be registered with BSP. A BSP Registration Document (BSRD) will be issued by the BSP as evidence of the investment. For the purpose of registration, foreign exchange funding for cash investments must be remitted to the
Philippines but Effective March 8, 2019, need not be converted to pesos except for the cases cited in Section 36.3 of the Foreign Exchange Manual. Foreign investments need not be registered with the BSP, unless the foreign exchange needed to service repatriation of capital and remittance of dividends, profits, and earnings is purchased from AABs or and AAB-forex corps. Foreign exchange may be purchased from AABs and AAB-forex corps for outward remittance for the equivalent of the peso sales/divestment proceeds (including dividends, profits, earnings) of BSP-registered foreign investments in accordance with prescribed procedures and supported by prescribed documents. Registering banks for foreign investments may sell for outward remittance the equivalent foreign exchange of (1) excess pesos funded with inward remittance of foreign exchange as follows: peso proceeds of foreign exchange inwardly remitted minus the peso amount actually used for BSP-registered investments; and (2) interest earned on the excess pesos, subject to certain conditions.

| Controls on liquidation of direct investment | No. |
| Controls on real estate transactions | Yes. |
| Purchase abroad by residents | Yes. |

Residents who have their own foreign exchange assets may freely engage in these transactions. Residents may purchase foreign exchange from AABs and/or AAB-forex corps without BSP approval for investment in real property abroad, including condominium units, provided these do not exceed US$60 million an investor a year when aggregated with other allowable outward investments. Effective March 8, 2019, resident investors may purchase foreign exchange in excess of the US$60 million annual threshold without prior BSP approval, subject to the 15-day prior notification to the BSP and documentation.

| Purchase locally by nonresidents | Yes. |
| Sale locally by nonresidents | Yes. |

Purchases are subject to constitutional and legal limits. Under the Philippine Constitution, foreign nationals and foreign companies are not allowed to directly own land. Ownership of private lands in the Philippines is reserved for Philippine citizens and corporations that are considered Philippine nationals. The Philippine Foreign Investment Act allows foreign nationals and companies to indirectly own land by acquiring up to 40% ownership of a corporation that is considered a Philippine national, that is qualified to own land (corporations that are considered Philippine nationals are those corporations or partnerships with at least 60% of the capital stock outstanding owned by Filipinos). Foreign nationals and foreign companies may also acquire condominium units and shares in condominium corporations up to not more than 40% of the total and outstanding capital stock of a Filipino-owned or controlled condominium corporation subject to the rules under the Condominium Act of the Philippines.

| Controls on personal capital transactions | Yes. |
| Loans | Yes. |
By residents to nonresidents

Yes.

Loans are permitted, provided foreign exchange is not purchased from AABs and/or AAB-forex corps. Banks may extend peso financing to nonresidents to fund the following:

(1) Without prior BSP approval – specific cases allowed under the MORB; or

(2) Subject to prior BSP approval – for use in projects/programs/purposes that are: (a) not covered by item (1) above; and (b) legitimate and not contrary to laws, regulations, public order, public health, public safety, or public policy.

To residents from nonresidents

Yes.

Private sector borrowing may be freely obtained, provided there is no guarantee from the government sector and payments are not funded with AABs’ and/or AAB-forex corps’ resources. Effective March 8, 2019, foreign loans/borrowings of the private sector that are not publicly guaranteed and will be serviced using foreign exchange purchased from AABs or AAB-forex corps no longer require prior BSP approval but are subject to notification and registration to the BSP. Foreign loans/borrowings of the public sector and of the private sector that are guaranteed by the public sector require prior BSP approval. Banks that wish to issue unsecured subordinated debt must secure the approval of the BSP.

Gifts, endowments, inheritances, and legacies

Yes.

By residents to nonresidents

Yes.

Private land may not be transferred or conveyed, except to individuals, corporations, or associations qualified to acquire or hold land in the public domain.

To residents from nonresidents

No.

Settlement of debts abroad by immigrants

No.

Transfer of assets

No.

Transfer abroad by emigrants

No.

Transfer into the country by immigrants

No.

Transfer of gambling and prize earnings

Yes.

Transfers are subject to appropriate supporting documents. The use of domestic currency for international payments and receipts is generally allowed but subject to rules on cross-border transfer of local currency, that is, any person may import or export, or bring with him into or take out of the country, or electronically transfer, legal tender Philippine notes and coins and other bills of exchange drawn in pesos against banks operating in the Philippines in an amount not exceeding PHP 50,000 without prior written authorization from the BSP.

This information can be found at the AREAER ONLINE database: http://www.elibrary-areaer.imf.org/Pages/Reports.aspx.

Provisions Specific to the Financial Sector

Yes.

Banks with foreign exchange trading corporations as subsidiaries or affiliates must make available daily the names of counterparties and other details of purchases and sales of foreign exchange. Banks authorized to operate an FCDU may engage in the following in any acceptable currency: (1) accept deposits and trust accounts from residents and nonresidents; (2) deposit funds, regardless of maturity, at foreign banks abroad, OBUs, and other FCDUs/EFCDUs; (3) invest in readily marketable foreign-currency-denominated debt instruments; (4) grant short-term foreign currency loans as allowed by BSP regulations; (5) borrow at any maturity from EFCDUs, foreign banks abroad, and OBUs and short term from other FCDUs;
(6) engage in foreign currency–foreign currency swaps with the BSP, OBUs, and other FCDUs/EFCDUs; (7) engage in securities lending activities as a lender, subject to certain conditions; (8) engage in repo agreements involving foreign-currency-denominated government securities; (9) purchase foreign-currency-denominated government securities under resale agreements from other banks’ FCDUs/EFCDUs, nonresident financial institutions, and OBUs; (10) issue hybrid Tier 1 capital instruments; (11) engage in US dollar-denominated repo agreements with the BSP; and (12) invest in foreign-currency-denominated structured products issued by banks and special-purpose vehicles of high credit quality. In addition, banks authorized to operate expanded FCDUs (EFCDUs) may engage in the following: (1) invest in foreign-currency-denominated debt instruments; (2) grant foreign currency loans as allowed by the BSP; (3) borrow from other FCDUs/EFCDUs and from nonresidents and OBUs, as permitted by foreign borrowing rules; (4) engage in foreign currency–foreign currency swaps; (5) engage in foreign exchange trading and, with BSP approval, in financial futures and options trading; (6) on request/instructions of a foreign correspondent bank, issue LCs for a nonresident importer in favor of a nonresident exporter and pay, accept, or negotiate drafts/bills of exchange under the LC; and (7) engage in direct purchases of export bills of resident exporters.

</tbody>
</table>
Differential treatment of deposit accounts held in foreign exchange

Reserve requirements

Yes.

There is no reserve requirement for deposit accounts in foreign exchange. However, banks are required to have 100% asset cover on foreign currency deposits and effective February 15, 2018, the requirement of maintaining 30% of asset cover in the form of liquid assets was lifted. The liquidity and statutory reserve requirements for peso deposits and deposit substitute liabilities of universal and commercial banks are unified into a single, combined reserve requirement of 16% from previously 20% effective May 31, 2019, except for long-term negotiable certificates of deposit (CDs), which are subject to lower reserve requirement 4%.

Liquid asset requirements

Yes.

Depository banks with FCDUs and EFCDUs must maintain at all times 100% asset cover for their foreign currency liabilities, except for US dollar-denominated repo agreements with the BSP. Effective February 15, 2018, the requirement of at least 30% of the cover for these liabilities to be in liquid assets was lifted. Effective February 15, 2018, the requirement for EFCDUs of universal and commercial banks, of at least 70% of the cover must be in the same currency as the deposit liability, and up to 30% in other acceptable foreign currencies was lifted. The requirement of FCDUs of TBs and rural and cooperative banks to maintain foreign currency cover in the same currency as the deposit liability was likewise lifted. Under the BSP framework on LCR, banks are expected to be able to meet their liquidity needs in each currency, although the framework only requires the LCR to be met and reported in a “single currency” (that is, in peso terms).

Arrangements for Payments and Receipts

**Prescription of currency requirements**

**Controls on the use of domestic currency**

*For capital transactions*

Transactions in derivatives and other instruments 03/08/2019

Customers may hedge their market risks arising from foreign exchange obligations through foreign exchange forwards (deliverable and non-deliverable) and foreign exchange swaps with AABs provided the underlying transaction is eligible for servicing using foreign exchange resources of AABs or AAB-forex corps.

**Capital Transactions**

Additional short-term private sector loans cited in Section 24.3 of the Foreign Exchange Manual are no longer required to be registered with the Bangko Sentral ng Pilipinas (BSP) to allow access to the foreign exchange resources of the banking sector provided these are duly reported to the BSP by the borrower/creditor.

bands
Other managed arrangement
Floating
Free floating Yes. The de jure exchange rate arrangement is free floating; the exchange rate of the zloty is determined on the basis of supply and demand in the foreign exchange market, and the zloty is traded freely against all currencies. Narodowy Bank Polski (NBP, National Bank of Poland), however, may intervene in the foreign exchange market if necessary to ensure domestic macroeconomic and financial stability. The NBP does not disclose its intervention data. Given that NBP intervened in the foreign exchange market last time in 2013, the de facto exchange rate arrangement is classified as free floating. In addition, the MOF has continued the sale of foreign currency funds partially on the foreign exchange market and through the CB.

Official exchange rate Yes. Exchange rates are freely determined by the market. The NBP calculates and publishes daily rates for convertible currencies. Euro rates fixing is based on foreign exchange market rates as quoted on trading platforms between 10:55 and 11:00 a.m. local time (average foreign exchange market rates between specified period of time). Exchange rates for other major currencies are calculated from cross-currency rates against the euro as quoted on trading platforms. The NBP daily rates are mainly used for statistical and accounting purposes. In general for accounting purposes, these rates are used to recalculate amounts and cash flow in foreign currency into zloty. The rates are also used by businesses to price foreign-exchange-denominated assets and liabilities as well as settlement rates for exchange-traded derivatives. As regards financial markets, the rates are used as the fixing price in the settlement of derivatives (options, etc.).

Monetary policy framework
Exchange rate anchor

U.S. dollar
Euro
Composite
Other
Monetary aggregate target
Inflation-targeting framework Yes. Monetary policy is based on flexible inflation targeting. Within this framework, the Monetary Policy Council (MPC) sets the inflation target and adjusts monetary instruments (predominantly the NBP policy interest rates) to keep headline inflation close to the target in the medium term. Since 2004 the NBP has pursued a medium-term inflation target of 2.5% with a symmetrical band of deviations of ±1% pp (percentage point). The medium-term orientation of the target does not involve any definition or guidance about the time-specific horizon of inflation returning to target in case of deviation. The NBP’s inflation-targeting framework is laid down in Monetary Policy Guidelines, which—in line with the constitution of the Republic of Poland—are presented to the lower chamber of the Polish parliament (Sejm) on an annual basis. The constitution also imposes an obligation on the MPC to present a Report on Implementation of the Guidelines to Sejm each year. These are the
main annual documents for informing the public about the causes and nature of the shocks behind inflation target misses. The MPC, however, retains a large degree of discretion over the reaction to these shocks. In addition, the implementation of the monetary policy guidelines is assessed by the Polish Supreme Audit Office, also on an annual basis.

Target setting body

Yes.

Government

Central Bank

Yes.

Monetary Policy Committee

Yes.

According to the Polish Constitution, the NBP shall be responsible for the value of Polish currency. The Act on NBP states that "the basic objective of the activity of NBP shall be to maintain price stability, while supporting the economic policy of the Government, insofar as this does not constrain the pursuit of the basic objective of NBP." In line with the above-mentioned legal guidelines, the numerical value of the inflation target was set by the MPC in "Monetary Policy Strategy beyond 2003" published in February 2003. The target is confirmed each year in Monetary Policy Guidelines, published annually.

Monetary policy decisions are taken by majority vote with the presence of at least 5 members of the MPC, including Chairperson (the President of the NBP), who has the deciding vote in case of a tie. Inflation target is set by the MPC which has the right to modify the target.

Yes.

CPI

Yes. Target measure refers to the annual change in the consumer price inflation. The consumer price inflation (the overall price index of consumer goods and services – headline CPI) is computed and published by the Statistics Poland (GUS – the Central Statistical Office of Poland).

The target is set at 2.5% with a symmetric band for deviations of +/-1 pp in the medium term (thus, it is a continuous target, not an end-year target).

Core inflation

Target horizon

Yes. The target horizon is medium term. The Council flexibly determines the time necessary for inflation to return to the target depending on the character of the shock, its persistence, and the overall assessment of risks posed by the shock to both price stability and broadly understood macroeconomic stability in the medium term.
**Target horizon**

Yes.

The target horizon is medium term. The Council flexibly determines the time necessary for inflation to return to the target depending on the character of the shock, its persistence, and the overall assessment of risks posed by the shock to both price stability and broadly understood macroeconomic stability in the medium term.

**Operating target (policy rate)**

Yes.

Policy rate

Yes. The instrument of key significance for the monetary policy implementation is the NBP reference rate. By determining the yields on open market operations, this rate influences the interest on short-term money market instruments, in particular unsecured interbank deposits. The range of fluctuations of interbank overnight interest rates is determined by the NBP deposit and lombard rates.

**Target corridor band**

Other

**Accountability**

Yes.

Open letter

No.

Parliamentary hearings

Yes. Once a year the President of the NBP attends the parliamentary hearing to present the NBP’s Annual Report.

Other

Yes. The key communication instruments include the cyclical publications: Information from the meeting of the MPC (with the accompanying press conferences held after the Council’s meetings), Minutes of the MPC decision-making meetings, and Inflation Reports. Once a year, the NBP also publishes its Annual Report, Report on Monetary Policy Implementation, and Monetary Policy Guidelines.

**Transparency**

Yes.

Publication of votes

Yes. Pursuant to the decision of the MPC, the NBP will be publishing the motions on its website relating to interest rates, together with a breakdown of votes cast by individual MPC members. The rules for publishing are as follows: If the motion was not passed – after the lapse of 6 weeks from the date of voting, at 14.00 hours; if the resolution on interest rates was adopted – after the results of voting on the resolution have been published in Monitor Sądowy i Gospodarczy (Court and Economic Monitor). If, in addition to adopting a resolution on interest rates, other motions were voted at the MPC meeting which did not receive a majority vote, the results of voting on such motions are posted on the NBP website after the announcement of voting results on the adopted resolution in the Court and Economic Monitor. In accordance with the principles adopted by the MPC, information on any motions regarding the NBP interest rates which were submitted during one-day MPC meetings is published, in the first instance, in the Minutes of the MPC decision-making meetings. Thus, voting results are not released prior to the publication of the Minutes.

Publication of minutes

Yes. The Minutes of the MPC decision-making meeting are published prior to the next decision-making meeting of the MPC. In principle, the publication takes place approximately 2 weeks after the MPC decision-making meeting – on Thursdays at 2 p.m. However, when the break between the MPC meetings is longer/shorter than usually Minutes are published with somewhat longer/shorter lag, but always before the next MPC decision-making meeting. Content of the Minutes: main issues discussed by the MPC and arguments raised during the discussion; the decision on interest rates and information on the motion/s raised and whether it/they received a majority vote (no voting records are published in the Minutes); no individual views (no names of individual MPC members) approx. 3–4 pages.

Publication of inflation forecasts

Yes. NBP projections are prepared three times a year and published in March, July, and November Inflation Reports. In addition to the publication of the Inflation Report, a separate press conference is
held to present current projections. The press conference—together with the accompanying presentation—is available on the NBP website. The projection covers economic developments up to three years ahead from the publication date.

Other monetary framework

Exchange tax  No.

Exchange subsidy  No.

Foreign exchange market  Yes.  ADs may freely determine their exchange rates and foreign exchange commissions in transactions with their clients.

Spot exchange market  Yes.  Banks may deal in foreign exchange without a separate license. There are also 4,873 foreign exchange offices (cantors) allowed to deal in foreign exchange with the public; cantors do not need a special permit but must be registered in the register of cantors. Cantors do not conclude foreign exchange transactions with the NBP. They may conclude transactions with other banks, cantors, and retail customers. Their operations are limited to the purchase and sale of banknotes; they may not make foreign currency payments and transfers on behalf of their clients. In their business activity, they may not maintain accounts abroad. Foreign exchange offices may not provide payment services as defined in Directive No. 2015/2366 on payment services (money transfers).

Operated by the central bank  No.

Foreign exchange standing facility  No.

Allocation  No.

Auction  No.

Fixing  No.

Interbank market  Yes.  Market makers are market participants who continuously quote buying and selling prices to other market participants. No additional license is required for a bank to operate in the foreign exchange market. There are no limits on the bid-ask spreads or commissions of market participants. In recent years, NBP intervened directly with market participants at their quoted rates. Domestic commercial banks have direct access to the interbank foreign exchange market; however, activity in this market is relatively concentrated (with almost 90% of turnover generated by 10 banks).

Over the counter  No.

Brokerage  Yes.  The foreign exchange market is based on a market-making agreement as well as a brokerage system.

Market making  Yes.  The foreign exchange market is based on a market-making agreement as well as a brokerage system.

Forward exchange market  Yes.  The NBP does not participate in the foreign exchange derivatives market.

Official cover of forward operations  No.

References to legal instruments and hyperlinks  This information can be found at the AREAER ONLINE database: http://www.elibrary-areaer.imf.org/Pages/Reports.aspx.

Arrangements for Payments and Receipts

Prescription of currency requirements  No.
Controls on the use of domestic currency No.

*For current transactions and payments* No.

*For capital transactions* No.

Transactions in capital and money market instruments No.
Transactions in derivatives and other instruments No.
Credit operations No.

Use of foreign exchange among residents No.

**Payments arrangements** Yes.

Bilateral payments arrangements No.

*Operative* No.

*Inoperative* No.

Regional arrangements Yes. Poland is a member of the EU.

Clearing agreements No.

Barter agreements and open accounts No.

**Administration of control** Yes. The authority to make changes in the Foreign Exchange Law rests with the parliament. Regulations are promulgated by the MOF, in cooperation with the President of the NBP. General foreign exchange permits are granted by the MOF as regulations; individual permits are granted by the NBP as administrative decisions. Decisions concerning individual foreign exchange permits are subject to appeal to the appropriate regional administrative. The NBP exercises control over foreign exchange permits, exchange office activities, and submission by residents to the NBP of their banking statistics for the purpose of compiling balance of payments data and the external assets and liabilities position of the country.

**Payments arrears** No.

Official No.

Private No.

**Controls on trade in gold (coins and/or bullion)** Yes.

On domestic ownership and/or trade Yes. Residents may hold gold in any form. Trading in gold, other than in jewelry form, is a regulated economic activity and requires registration with the President of the NBP.

On external trade Yes. The exportation of foreign gold (gold coins) is subject to declaration procedures (written declaration at the border).

**Controls on exports and imports of banknotes** No. In accordance with EU Regulation (EC) No. 1889/2005, cash controls have been implemented based on a mandatory declaration system for amounts of cash entering or leaving the EU with a value of €10,000 or more. Travelers entering or leaving the EU and carrying more than €10,000 are required to make a declaration to the relevant authorities of the member country through which they enter or leave the EU. The authorities must keep a record of such information and report it to their national financial intelligence unit. The obligation to declare is not fulfilled if the traveler makes no
declaration or if the information provided is incorrect or incomplete. To check compliance with the regulation, the national authorities have the right to search natural persons, their baggage, and their means of transportation. In the event of failure to comply with the declaration obligation, cash may be confiscated. The regulation requires member countries to impose penalties for failure to comply with the declaration obligation. If there are indications that cash is related to illegal activity, authorities of one member country may exchange information with authorities in other member countries. Under the framework of existing agreements on mutual administrative assistance, information obtained under the regulation may also be communicated to a third country in compliance with relevant national and EU provisions on the transfer of personal data to third countries. The regulation does not apply to physical cross-border transportation from one EU member country to another (that is, intra-EU transportation). Such transportation is not considered “cross-border” for the purposes of the regulation; the regulation only harmonizes the system for the EU’s external borders.

On exports

No.

The exportation of foreign or domestic banknotes with a total value exceeding the equivalent of €10,000 is subject to declaration procedures (written declaration at the border).

*Domestic currency*

No.

The exportation of foreign or domestic banknotes with a total value exceeding the equivalent of €10,000 is subject to declaration procedures (written declaration at the border).

*Foreign currency*

No.

The exportation of foreign or domestic banknotes with a total value exceeding the equivalent of €10,000 is subject to declaration procedures (written declaration at the border).

On imports

No.

The importation of domestic or foreign banknotes exceeding the equivalent of €10,000 is subject to written declaration at the border.

*Domestic currency*

No.

The importation of domestic or foreign banknotes exceeding the equivalent of €10,000 is subject to written declaration at the border.

*Foreign currency*

No.

The importation of domestic or foreign banknotes exceeding the equivalent of €10,000 is subject to written declaration at the border.

This information can be found at the AREAER ONLINE database: http://www.elibrary-areaer.imf.org/Pages/Reports.aspx.

**Resident Accounts**

**Foreign exchange accounts permitted**  Yes.

**Held domestically**  Yes.

Depositing funds in a foreign exchange account is permitted and balances may be transferred abroad freely, subject to specific regulations.

**Approval required**  No.

**Held abroad**  Yes.

Residents (individuals and enterprises) are allowed to maintain accounts in the member countries of the EU, EEA, and OECD without permission. Accounts in other countries may be maintained only for settlements with nonresidents. Controls apply to deposits of funds with nonresident institutions by a privately managed occupational pension fund. The allocation of assets of insurance companies is not subject to limits but must remain consistent with prudent person principle specified in Article 276 of the Act of 11 September 2015 on insurance and reinsurance activity. The limit on open pension funds’ investments in assets denominated in a currency other than the national one is 30%. The total value of open pension fund assets invested in assets denominated in currency other than the national one may not exceed 30%. For occupational pension funds the value of assets denominated in a currency other
than the national one may not exceed 30% of a fund’s total assets. Assets of pension funds may be invested in assets denominated in currencies of EU, EEA, and OECD member countries. For Employee Capital Plans (PPK), the value of assets denominated in a currency other than the national one may not exceed 30% of total assets.

Approval required Yes.
Accounts in domestic currency held abroad Yes. The regulations for foreign exchange accounts held abroad also apply to these accounts. The allocation of assets of insurance companies is not subject to limits but must remain consistent with prudent person principle specified in Article 276 of the Act of 11 September 2015 on insurance and reinsurance activity. For occupational pension funds the value of assets denominated in a currency other than the national one may not exceed 30% of a fund’s total assets. Assets of pension funds may be invested in assets denominated in currencies of EU, EEA, and OECD member countries. For PPK, the value of assets denominated in a currency other than the national one may not exceed 30% of total assets.

Accounts in domestic currency convertible into foreign currency No.

References to legal instruments and hyperlinks This information can be found at the AREAER ONLINE database: http://www.elibrary-areaer.imf.org/Pages/Reports.aspx.

Nonresident Accounts

Foreign exchange accounts permitted Yes.
Approval required No.

Domestic currency accounts Yes. Domestic currency accounts may or may not pay interest, depending on the agreement with the bank, and they may be credited with funds from any source that is in compliance with foreign exchange regulations.

Convertible into foreign currency Yes. These accounts may be converted to foreign currency.
Approval required No.

Blocked accounts No.

Controls on capital and money market instruments Yes.

On capital market securities Yes.

Shares or other securities of a participating nature Yes.

Purchase locally by nonresidents Yes. Controls apply to the purchase of shares and other securities of a participating nature, which may be affected by regulations on FDI. Information must be provided to the Polish Financial Supervision Authority (KNF), to the issuer, and to the public if certain thresholds in voting power or stock purchase are exceeded.

Sale or issue locally by nonresidents Yes. Under the EU uniform rule, public offerings of securities in Poland generally require approval of a prospectus by the competent authority of the issuer’s home member state (in general EU country of issuer’s incorporation) provided the KNF is notified by that authority about such approval. Prospectus should then be published. Only in case of public offers with small value and/or addressed to specific investors there is no obligation to publish a prospectus or a much lighter document is required (like a memorandum). In case of issuer from a member state other than Poland, if a public offering or admission to trading on a regulated market is provided for in Poland as a host member country, the prospectus approved by the home member country is valid in Poland, provided the KNF is notified by the appropriate authority in the issuer’s home country. In case the issuer’s country of incorporation is not an EU country, prospectus in general must be approved by the KNF.

Purchase abroad by residents Yes. Controls apply to the purchase of securities issued by nonresidents from countries other than EU, EEA, and OECD by privately managed pension funds. The allocation of assets of insurance companies is not subject to limits but must remain consistent with...
prudent person principle specified in Article 276 of the Act of 11 September 2015 on insurance and reinsurance activity. Open pension funds may invest up to 30% of their assets in assets denominated in a currency other than the national one. The total value of open pension fund assets invested in assets denominated in currency other than the national one may not exceed 30%. For occupational pension funds the value of assets denominated in a currency other than zlotys may not exceed 30% of a fund’s total assets. Pension fund assets may be invested in assets denominated in zlotys or currencies of EU, EEA, and OECD countries. These assets may be invested in the following capital market securities of a participation nature with an original maturity of more than one year: (1) shares of companies listed on a regulated market and bonds convertible to the shares of such companies, as well as preemptive rights and rights to shares listed on that market; (2) shares, preemptive rights, and rights to shares for public offer; (3) participation units of closed-end collective investment institutions, as follows: (a) whose sole objective is collective investment of funds collected through public or private offering of their participation units in securities, money market instruments, and other property rights; (b) that are authorized by the financial market supervisory authorities in the country in which they are established or whose operations require notification to those authorities, if according to their articles of incorporation their participation units are not offered publicly, traded on a regulated market, or admitted to the alternative trading system and they can be purchased by individuals only in a single purchase of not less than €40,000; (c) that are under the direct supervision of the financial market supervisory authorities in the country in which they are established; (d) that in accordance with the law of the country of their establishment are required to have a depository holding the assets of the institution; and (e) that are managed by entities whose activities are authorized by the financial market supervisory authorities in the country in which they are established; (4) participation units issued by open-end collective investment institutions, as follows: (a) whose sole objective is collective investment of funds collected through public or private offering of their participation units in securities, money market instruments, and other property rights; (b) that are authorized by the financial market supervisory authorities in the country in which they are established, or whose operations require notification to those authorities; (c) that are under the direct supervision of the financial market supervisory authorities in the country in which they are established; (d) that in accordance with the law of the country of their establishment are required to have a depository holding the assets of the institution; and (e) that are managed by entities whose activities are authorized by the financial market supervisory authorities in the country in which they are established; and (5) depository receipts admitted to trading on the regulated market.

Sale or issue abroad by residents
Yes.

Under the EU uniform rules, any public offering of securities in a member state other than Poland generally requires approval of a prospectus by the KNF, KNF notification of the host member state’s competent authority, and publication of the prospectus in the host member state.

Bonds or other debt securities
Yes.

Purchase locally by nonresidents
Yes.

The regulations governing shares or other securities of a participating nature apply.
Sale or issue locally by nonresidents | Yes. | The regulations governing shares or other securities of a participating nature apply. However in case of debt securities with a high nominal value, the KNF can be chosen by the issuer to approve its prospectus.

Purchase abroad by residents | Yes. | Controls apply to the purchase of securities issued by nonresidents from countries other than EU, EEA, and OECD countries by privately managed pension funds. The allocation of assets of insurance companies is not subject to limits but must remain consistent with prudent person principle specified in Article 276 of the Act of 11 September 2015 on insurance and reinsurance activity. Open pension funds may invest up to 30% of their assets in assets denominated in a currency other than the national one. The total value of open pension fund assets invested in assets denominated in currency other than the national one may not exceed 30%. For occupational pension funds the value of assets denominated in a currency other than zlotys may not exceed 30% of a fund’s total assets. Pension fund assets may be invested in assets denominated in zlotys or currencies of EU, EEA, or OECD members. These assets may be invested in the following debt securities with an original maturity of more than one year: (1) bonds and other securities issued by the governments or the CBs as well as loans and credits made to the aforesaid entities; (2) bonds and other debt securities representing the issuer’s pecuniary obligation, which are guaranteed or backed by the governments or the CBs, and deposits, credit, and loans guaranteed or backed by the aforesaid entities; (3) deposits in banks or credit institutions authorized by the financial market supervisory authorities—acquisition of currency is permissible solely for settlement of the current liabilities of the pension fund as a result of acquisition or disposal of investments within the pension fund’s investment policy; (4) bonds and other debt securities, subject to public offer, issued by regional or local public authorities; (5) bonds and other debt securities, other than subject to public offer, issued by regional or local public authorities; (6) debt securities whose issuer may limit liability for the obligations arising from them to the amount of income or value of the property of the project to which the bondholder has priority over other creditors and whose issuer is one of the following: (a) appropriate regional or local public authorities; (b) banks or credit institutions, particularly implementing government programs, including using funds from the EU and international financial institutions, government infrastructure programs, and government programs for development of small and medium enterprises; (c) government funds providing financial support for capital funds investing in businesses; (d) companies in which the entities listed in (a) have shares that give those entities more than 50% of the total votes, unless the sole objective of the company is to meet the needs of local communities or to perform tasks related to public utility; (e) companies whose sole objective is to perform tasks related to public utility on the basis of agreements with the entities listed in (a) that will perform these tasks at least for a period equal to the period of maturity of securities issued for this purpose; and (f) companies that will perform tasks related to public utility or will provide services in the field of transportation or communication as well as maintenance and development of the communication infrastructure or the transportation infrastructure, as authorized by law or based on concession or permit, at least for a period equal to the period of maturity of securities issued for this purpose; (7) bonds and other debt securities subject to public offer issued by entities other than regional or local public authorities, which are secured for their full nominal value and possible interest rate; (8) bonds and other debt securities, other than subject to public offer, issued by entities other than regional or local public authorities.
that are secured in an amount corresponding to the full nominal value and possible interest rate; (9) other bonds and other debt securities subject to public offer; and (10) bonds and other debt securities of companies listed on the regulated market. Please see category XII.B. “Provisions specific to institutional investors.” For PPK, the value of assets denominated in a currency other than the national one may not exceed 30% of total assets.

For UCITS, the coordinated procedures from UCITS Directive apply. Controls apply to the purchase of collective investment securities issued by nonresidents in countries other than EU, EEA, and OECD. The allocation of assets of insurance companies is not subject to limits but must remain consistent with prudent person principle specified in Article 276 of the Act of 11 September 2015 on insurance and reinsurance activity. Open pension funds may invest up to 30% of their assets in assets denominated in a currency other than the national one. The total value of open pension fund assets invested in assets denominated in currency other than the national one may not exceed 30%. For occupational pension funds the value of assets denominated in a currency other than zlotys may not exceed 30% of a fund’s total assets. Pension fund assets may be invested in assets denominated in zlotys or in currencies of member countries of the EU, EEA, or OECD. These assets may be invested in the following collective investment securities: (1) participation units issued by closed-end collective investment institutions, as follows: (a) whose sole objective is collective investment of the funds collected through public or private offering of their participation units in securities, money market instruments, and other property rights; (b) that are authorized by the financial market supervisory authorities in the country in which they are established or whose operations require notification to those authorities, if under their articles of incorporation their participation units are not offered publicly or admitted to trading on a regulated market or the alternative trading system, and they can be purchased by individuals solely in a single purchase of not less than €40,000; (c) they operate under the direct supervision of the financial market supervisory authorities in the country in which they are established; (d) in accordance with the law of the country of their establishment they are required to have a depository holding the assets of the institution; and (e) they are managed by entities authorized by the financial market supervisory authorities in the country in which they are established; (2) participation units issued by open-end collective investment institutions, as follows: (a) whose sole objective is collective investment of the funds collected through public or private offering of their participation units in securities, money market instruments, and other property rights; (b) that are authorized by the financial market supervisory authorities in the country in which they are established, or whose operations require notification of those authorities; (c) that are under the direct supervision of the financial market supervisory authorities in the country in which they are established; (d) that in accordance with the law of the country of their establishment they are required to have a depository holding the assets of the institution, and (e) that they are managed by entities whose activities are authorized by the financial market supervisory authorities in the country in which they are established. Please see category XII.B. “Provisions specific to institutional investors.” For PPK, the value of assets denominated in a currency other than the national one may not exceed 30% of total assets.

Coordination procedures from UCITS and Alternative Investment Fund Managers Directive apply.

©International Monetary Fund. Not for Redistribution
Sale or issue locally by nonresidents: Yes.

No controls apply to the sale of derivatives and other instruments issued previously acquired by nonresidents. The regulations governing shares or other securities of a participating nature apply in case of derivatives being transferable securities and other instruments being transferable securities according to Polish and EU law generally require approval of a prospectus by the KNF and its publication. Only in case of public offers with small value and/or addressed to specific investors there is no obligation to publish a prospectus or a much lighter document is required (a memorandum). In case of issuer from a member state other than Poland, if a public offering or admission to trading on a regulated market is provided for in Poland as a host member country, the prospectus approved by the home member country is valid in Poland, provided the KNF is notified by the appropriate authority in the issuer’s home country.

Purchase abroad by residents: Yes.

Controls apply to the purchase of derivatives and other instruments issued by nonresidents in countries other than EU, EEA, and OECD. New regulations concerning the allocation of assets of insurance companies are consistent with prudent person principle resulting from the implementation of the Solvency II Directive. According to Article 276 of the Act of 11 September 2015 on insurance and reinsurance activity, assets of insurance and reinsurance companies should be invested according to prudent person principle. This act is an implementation of Directive 2009/138/EC of 25 November 2009 on the taking-up and pursuit of the business of Insurance and Reinsurance (Solvency II) and prudent person principle is provided in Art. 132 of this directive. The main principles are: (1) With respect to the whole portfolio of assets, insurance and reinsurance companies must only invest in assets and instruments whose risks the company concerned can properly identify, measure, monitor, manage, control, and report, and appropriately take into account in the assessment of its overall solvency needs. (2) All assets, in particular those covering the Minimum Capital Requirement and the Solvency Capital Requirement, must be invested in such a manner as to ensure the security, quality, liquidity, and profitability of the portfolio as a whole. In addition, the localization of those assets must be such as to ensure their availability. (3) Assets held to cover the technical provisions must also be invested in a manner appropriate to the nature and duration of the insurance and reinsurance liabilities. Those assets must be invested in the best interest of all policyholders and beneficiaries taking into account any disclosed policy objective.

Sale or issue abroad by residents: Yes.

The regulations governing shares or other securities of a participating nature apply in case of derivatives being transferable securities and other instruments being transferable securities according to Polish and EU law. Controls apply to the issuance of derivatives and other instruments by residents in countries other than EU, EEA, and OECD. Controls apply to the issuance of derivative instruments by residents outside EU, EEA, or OECD countries. In case of derivatives and other instruments in the form of securities, under the EU uniform rule, any public offering of securities in a member state other than Poland generally requires approval of a prospectus by the KNF, KNF notification of the host member state’s competent authority, and publication of the prospectus in the host country.

Controls on credit operations: Yes.

Commercial credits: Yes.

By residents to nonresidents: Yes. Pension funds are not allowed to grant credits and loans. Insurance companies are not allowed to grant credits, but they are allowed to grant loans. New regulations concerning the allocation of assets of...
insurance companies are consistent with prudent person principle resulting from the implementation of the Solvency II Directive. According to Article 276 of the Act of 11 September 2015 on insurance and reinsurance activity, assets of insurance and reinsurance companies should be invested according to prudent person principle. This act is an implementation of Directive 2009/138/EC of 25 November 2009 on the taking-up and pursuit of the business of Insurance and Reinsurance (Solvency II) and prudent person principle is provided in Art. 132 of this directive. The main principles are: (1) With respect to the whole portfolio of assets, insurance and reinsurance companies must only invest in assets and instruments whose risks the company concerned can properly identify, measure, monitor, manage, control, and report, and appropriately take into account in the assessment of its overall solvency needs. (2) All assets, in particular those covering the Minimum Capital Requirement and the Solvency Capital Requirement, must be invested in such a manner as to ensure the security, quality, liquidity, and profitability of the portfolio as a whole. In addition, the localization of those assets must be such as to ensure their availability. (3) Assets held to cover the technical provisions must also be invested in a manner appropriate to the nature and duration of the insurance and reinsurance liabilities. Those assets must be invested in the best interest of all policyholders and beneficiaries taking into account any disclosed policy objective. UCITS are not allowed to grant credits and loans. Alternative investment funds (AIFs) are allowed to grant loans up to 50% of their assets.

To residents from nonresidents  No.

Financial credits  Yes.

By residents to nonresidents  Yes. Pension funds are not allowed to grant credits and loans. Insurance companies are not allowed to grant credits, but they are allowed to grant loans. New regulations concerning the allocation of assets of insurance companies are consistent with prudent person principle resulting from the implementation of the Solvency II Directive. According to Article 276 of the Act of 11 September 2015 on insurance and reinsurance activity, assets of insurance and reinsurance companies should be invested according to prudent person principle. This act is an implementation of Directive 2009/138/EC of 25 November 2009 on the taking-up and pursuit of the business of Insurance and Reinsurance (Solvency II) and prudent person principle is provided in Art. 132 of this directive. The main principles are: (1) With respect to the whole portfolio of assets, insurance and reinsurance companies must only invest in assets and instruments whose risks the company concerned can properly identify, measure, monitor, manage, control, and report, and appropriately take into account in the assessment of its overall solvency needs. (2) All assets, in particular those covering the Minimum Capital Requirement and the Solvency Capital Requirement, must be invested in such a manner as to ensure the security, quality, liquidity, and profitability of the portfolio as a whole. In addition, the localization of those assets must be such as to ensure their availability. (3) Assets held to cover the technical provisions must also be invested in a manner appropriate to the nature and duration of the insurance and reinsurance liabilities. Those assets must be invested in the best interest of all policyholders and beneficiaries taking into account any disclosed policy objective. UCITS are not allowed to grant credits and loans. AIFs are allowed to grant loans up to 50% of their assets.
To residents from nonresidents: No.

Guarantees, sureties, and financial backup facilities:
- By residents to nonresidents: No.
- To residents from nonresidents: No.

Controls on direct investment: Yes.

Outward direct investment: Yes. An NBP permit is required for direct investment, with the exception of the purchase of shares and interests in companies based in Bilateral Investment Treaty countries. No controls apply to investments in EU, EEA, or OECD countries.

Inward direct investment: Yes. Controls apply to (1) the provision of asset management services by branches of nonresident investors to domestic pension funds; (2) the acquisition of land reserved for agriculture or forests, and acquisition of water areas, unless authorization is granted; (3) investment in airlines established in the country that must be majority owned and effectively controlled by EU members and/or nationals of EU members, unless otherwise provided for through an international agreement to which the EU is a signatory; (4) investment in a broadcasting company, if it raises foreign ownership of the share capital above 33%; (5) investment in an enterprise operating in the gambling and betting sector, except through an enterprise incorporated in Poland in which foreign ownership of the share capital is 49% or less; (6) investment in a registered vessel, except through an enterprise incorporated in Poland; (7) the extent that under Directive 2009/65/EC a depository must either have its registered office or be established in the home EU member state of the UCITS and under Directive 2011/61/EU a depository must have its registered office or branch in the home EU member state of the AIF; and (8) the operation of a branch as a mortgage bank to the extent that a mortgage bank is defined under Polish law as an institution authorized to issue mortgage securities in domestic markets, and thereby reserved for financial institutions incorporated under domestic law. A bank may open a branch in Poland; however, it may not issue mortgage bonds on its territory; the single EU passport principle does not apply to them.

Controls on liquidation of direct investment: No.

Controls on real estate transactions: Yes.

Purchase abroad by residents: Yes. Pension funds are not allowed to invest directly in real estate. Pension fund assets may be invested in assets denominated in zlotys or in currencies of member countries of the EU, EEA, or OECD. New regulations concerning the allocation of assets of insurance companies are consistent with prudent person principle resulting from the implementation of the Solvency II Directive. According to Article 276 of the Act of 11 September 2015 on insurance and reinsurance activity, assets of insurance and reinsurance companies should be invested in accordance with prudent person principle. This act is an implementation of Directive 2009/138/EC of 25 November 2009 on the taking-up and pursuit of the business of Insurance and Reinsurance (Solvency II) and prudent person principle is provided in Art. 132 of this directive. The main principles are: (1) With respect to the whole portfolio of assets, insurance and reinsurance companies must only invest in assets and instruments whose risks the company concerned can properly identify, measure, monitor, manage, control, and report, and appropriately take into account in the assessment of...
its overall solvency needs. (2) All assets, in particular those covering the Minimum Capital Requirement and the Solvency Capital Requirement, must be invested in such a manner as to ensure the security, quality, liquidity, and profitability of the portfolio as a whole. In addition, the localization of those assets must be such as to ensure their availability. (3) Assets held to cover the technical provisions must also be invested in a manner appropriate to the nature and duration of the insurance and reinsurance liabilities. Those assets must be invested in the best interest of all policyholders and beneficiaries taking into account any disclosed policy objective. Nonresidents may acquire real estate or other immovable property in Poland only with permission from the Ministry of the Interior, except if it is inherited. Under the Law on Acquisition of Real Estate by Foreigners, foreigners may also acquire real estate without a permit if (1) the real estate is an apartment; (2) the foreigner has lived in Poland for at least five years since obtaining a permanent residence visa; (3) the foreigner has been married to a Polish citizen for at least two years (the purchased real estate must constitute part of matrimonial community property); or (4) the real estate is purchased by nonresident juridical persons for statutory purposes, and the real estate is no larger than 4,000 square meters if it is in an urban area. The Council of Ministers may issue a regulation defining other cases for which a permit is not required, provided the size of the acquired real estate does not exceed 4,000 square meters in urban and 10,000 square meters in rural areas. The Council of Ministers may also extend the area to be acquired without a permit to 12,000 square meters in urban and 30,000 square meters in rural areas. Poland maintained rules until 2009 regarding the acquisition of secondary residences by foreigners other than nationals of EU member countries and nationals of countries that are parties to the EEA and who have been legal residents of Poland continuously for four years. Rules regarding the acquisition of agricultural land and forests are in effect until 2016. Under these rules, nationals of another EU member country or of a country that is party to the EEA who want to establish themselves as self-employed farmers and who have been legally resident and leasing land continuously in Poland as a natural or legal person for at least three years are not subject to any procedures other than those that apply to nationals of Poland; in some western and northern “voivods” (state administrations), the residence and leasing period is for a minimum of seven years.

**Provisions Specific to the Financial Sector**

**Provisions specific to commercial banks and other credit institutions:** Yes.
Borrowing abroad: No.
Maintenance of accounts abroad: No.
Lending to nonresidents (financial or commercial credits): Yes.

The Capital Requirements Regulation (CRR), among other things, covers areas of regulation such as large exposures, risk weights for credit exposures, and calculation of own funds requirements for foreign exchange risk. In general, CRR does not differentiate between residents and nonresidents. According to CRR provisions, banks are subject to large exposure limits, which apply to exposures to both residents and nonresidents. The CRR also allows for, under certain conditions, national competent authorities to set higher risk weight for exposures secured by mortgage on commercial immovable property, which applies both to residents and nonresidents. According to the Regulation of the Minister of Development and Finance of May 25, 2017, on a higher risk weight for exposures secured by mortgages on immovable properties, risk weight applicable to exposures secured by mortgage on commercial immovable property located in Poland amounts to 100% (this regulation concerns banks using the Standardized Approach for determining capital requirement).

Lending locally in foreign exchange: Yes.

According to Article 6 paragraph 1 of the Act of March 23, 2017, on Mortgage Loan and on Supervision over Credit Intermediaries and Appointed Representatives, mortgage loans may be granted only in the currency or be indexed to the currency in which the consumer receives most of his income or holds most of his funds or other assets valued in the currency of mortgage loan or in the currency to which the mortgage loan is indexed. Additionally, Recommendation S (KNF Act No. 148/2013)—which is non-legally binding act but issued based on the Banking Act—concerning good practices with regard to mortgage credit exposures requires banks to grant loans only in the currency of the borrower’s income. Recommendation T concerning good practices with regard to risk management of retail credit exposures requires banks in case of loans granted in currency different from the one in which borrower receives income, to disclose comprehensive pre-contractual information regarding foreign exchange risk and apply stricter creditworthiness standards (KNF Resolution No. 59/2013).

According to the Regulation of the Minister of Development and Finance of May 25, 2017, on a higher risk weight for exposures secured by mortgages on immovable properties, risk weight applicable to exposures secured by mortgage on residential immovable property located in Poland in case of which installments depend on exchange rates relating to currency other that the one in which borrower receives income amounts to 150% (this regulation concerns banks using the Standardized Approach for determining capital requirement).

### Investment regulations
Yes.

### Abroad by banks
Yes.

- The CRR replaced domestic regulations concerning among other things large exposures, risk weights, and calculation of own funds requirements for foreign exchange risk. According to provisions of the CRR, banks are subject to large exposure limits, which apply to exposures to both residents and nonresidents.

### In banks by nonresidents
No.

### Open foreign exchange position limits
Yes.

- The CRR replaced domestic regulations on the calculation of own funds requirements for foreign exchange risk. According to its provisions, banks are subject to large exposure limits, which apply to exposures to both residents and nonresidents. There is no binding direct limit on open foreign exchange positions. However, in accordance with the CRR if the sum of the overall net foreign exchange position and net gold position exceeds 2% of total own funds, banks must calculate own funds requirements for foreign exchange risk in line with the provisions of the CRR. The relevant Polish regulations, which implemented the capital requirements provided for in EC Directives Nos. 2006/48/EC and 2006/49/EC, are now superseded by the CRD IV package consisting of the CRD and the CRR.

### On resident assets and liabilities
Yes.

### On nonresident assets and liabilities
Yes.

### Provisions specific to institutional investors
Yes.

- Insurance companies
No.

- In compliance with EU directives and the Polish Act on Insurance and Reinsurance Activity, a KNF permit is required for non-EU entities to open an insurance business; insurance companies located in the EU are subject to the general provisions of EU and domestic law. The KNF must be notified of investment transactions that would result in the acquisition of 10%, 20%, one-third, or 50% of shares or voting power or in an increase beyond 10%, 20%, one-third, or 50% of total shares or voting power. The KNF must also be notified whenever a given entity intends to become a parent company (either directly or indirectly) of an insurance or reinsurance company...
Limits (max.) on securities issued by nonresidents

No.

New regulations concerning the allocation of assets of insurance companies are consistent with prudent person principle resulting from the implementation of the Solvency II Directive. According to Article 276 of the Act of 11 September 2015 on insurance and reinsurance activity, assets of insurance and reinsurance companies should be invested according to prudent person principle. This act is an implementation of Directive 2009/138/EC of 25 November 2009 on the taking-up and pursuit of the business of Insurance and Reinsurance (Solvency II) and prudent person principle is provided in Art. 132 of this directive. The main principles are: (1) With respect to the whole portfolio of assets, insurance and reinsurance companies must only invest in assets and instruments whose risks the company concerned can properly identify, measure, monitor, manage, control, and report, and appropriately take into account in the assessment of its overall solvency needs. (2) All assets, in particular those covering the Minimum Capital Requirement and the Solvency Capital Requirement, must be invested in such a manner as to ensure the security, quality, liquidity, and profitability of the portfolio as a whole. In addition, the localization of those assets must be such as to ensure their availability. (3) Assets held to cover the technical provisions must also be invested in a manner appropriate to the nature and duration of the insurance and reinsurance liabilities. Those assets must be invested in the best interest of all policyholders and beneficiaries taking into account any disclosed policy objective. With respect to assets other than assets held in respect of life insurance contracts where the investment risk is borne by the policy holders:

(1) the use of derivative instruments must be possible insofar as they contribute to a reduction of risks or facilitate efficient portfolio management,

(2) investment and assets which are not admitted to trading on a regulated financial market must be kept to prudent levels,

(3) assets must be properly diversified in such a way as to avoid excessive reliance on any particular asset, issuer or group of undertakings, or geographical area and excessive accumulation of risk in the portfolio as a whole,

(4) investments in assets issued by the same issuer, or by issuers belonging to the same group, may not expose the insurance undertakings to excessive risk concentration.

The absence of regulatory limits on investments does not mean that undertakings can take investment decisions without any regard to prudence and to the interests of policyholders. The insurance and reinsurance companies are obliged to possess the risk-management system. According to Article 57 of Act of insurance and reinsurance activity, the risk-management system must cover investments, in particular derivatives. The requirements concerning the risk-management system are laid down in Act of insurance and reinsurance activity, which implements appropriate regulations of Solvency II Directive. When undertakings have a material investment in other currencies, the insurance company must properly identify and manage the currency risk. Furthermore, the currency risk is taken into account when the undertakings calculate solvency capital requirement. In short, the higher the currency risk exposure, the more the solvency capital requirement.

Limits (max.) on investment portfolio held abroad

No.

New regulations concerning the allocation of assets of insurance companies are consistent with prudent person principle resulting from the implementation of the Solvency II Directive. | Pension funds | Yes. |
| Limits (max.) on securities issued by nonresidents | Yes. |
| Limits (max.) on investment portfolio held abroad | Yes. |

Open pension funds are allowed to invest up to 30% of their assets in assets denominated in a currency other than the national one, and such investments may be only in assets denominated in currency of countries that are member countries of the EU, EEA, or OECD. A list of asset categories in which open pension fund may invest is mentioned in Article 141 of the Polish Act on the Organization and Operation of Pension Funds.

Open pension funds may invest up to 30% of their assets in assets denominated in a currency other than zlotys may not exceed 30% of a fund’s total assets. Assets of pension funds (both occupational and open) may be invested in assets denominated in zlotys or in currencies of the member countries of the EU, EEA, or OECD. A list of asset...
categories in which pension funds may invest is mentioned in Article 141 of the Polish Act on the Organization and Operation of Pension Funds: (1) bonds, bills, and other securities issued by the governments or the CBs as well as loans and credits made to the aforesaid entities; (2) bonds and other debt securities representing the issuer’s financial obligation that are guaranteed or backed by the governments or the CBs as well as deposits, credits, and loans guaranteed or backed by the aforesaid entities; (3) deposits in banks or credit institutions authorized by the financial market supervisory authorities—acquisition of currency may occur solely for the settlement of the current liabilities of the pension fund arising from acquisition or disposal of investments within the pension fund’s investment policy; (4) shares of companies listed on the regulated market and bonds convertible to the shares of such companies, as well as preemptive rights and rights to shares listed on that market; (5) shares, preemptive rights, and rights to shares subject to public offer; (6) participation units issued by closed-end collective investment institutions, as follows: (a) whose sole objective is collective investment of the funds collected through public or private offering of their participation units in securities, money market instruments, and other property rights; (b) that are authorized by the financial market supervisory authorities in the country in which they are established, or whose operation requires notification to those authorities, if according to their articles of incorporation their participation units are not offered publicly or admitted to trading on a regulated market or the alternative trading system, and they can be purchased by individuals, solely in a single purchase of not less than €40,000; (c) that operate under the direct supervision of the financial market supervisory authorities in the country in which they are established; (d) that in accordance with the law of the country of their establishment are required to have a depository holding the assets of the institution; and (e) that are managed by entities authorized by the financial market supervisory authorities in the country in which those entities are established; (7) participation units issued by open-end collective investment institutions, as follows: (a) whose sole object of their activity is collective investment of the funds collected through the public or private offering of their participation units in securities, money market instruments, and other property rights; (b) that are authorized by the financial market supervisory authorities in the country in which they are established, or their operation requires notification to those authorities; (c) that operate under the direct supervision of the financial market supervisory authorities in the country in which they are established; (d) that in accordance with the law of the country of their establishment are required to have a depository holding the assets of the institution; and (e) that are managed by entities authorized by the financial market supervisory authorities in the country in which those entities are established; (8) bonds and other debt securities subject to public offer issued by the appropriate regional or local public authorities; (9) bonds and other debt securities other than subject to public offer issued by the appropriate regional or local public authorities; (10) debt securities, the issuer of which may limit liability for the obligations arising from them to the amount of income or value of the property of the project to which the bondholder has the priority right over other creditors of the issuer and the issuers of which may be the following entities: (a) appropriate regional or local public authorities; (b) banks or credit institutions, implementing particularly government programs, including government programs implemented using funds from the EU and international financial institutions, infrastructural
government programs, and government programs related to the
development of the sector of small and medium enterprises; (c) state
funds implementing activity providing financial support to capital
funds investing in businesses; (d) companies, in which the entities
listed in (a) have the number of shares that provides those entities
with more than 50% of the total number of votes in these companies,
unless the sole object of the activity of the company is to meet the
needs of local communities or to perform tasks related to public
utility; (e) companies whose sole objective are tasks related to public
utilities on the basis of agreements with the entities listed in item (a)
and that will perform these tasks at least for a period equal to the
period of maturity of securities issued for this purpose; and (f)
companies that will perform tasks related to public utilities or will
provide services in the field of transportation or communication as
well as maintenance and development of the communication
infrastructure or the transportation infrastructure, pursuant to the
authorization contained in the law or on the basis of the concession
or the permit, at least for a period equal to the period of maturity of
securities issued for this purpose; (11) bonds and other debt securities
subject to public offer issued by entities other than the appropriate
regional or local public authorities that have been secured in the
amount corresponding to the full nominal value and possible interest
rate; (12) bonds and other debt securities other than subject to public
offer issued by entities other than the appropriate regional or local
public authorities, which have been secured in the amount
corresponding to the full nominal value and possible interest rate;
(13) other bonds and other debt securities subject to the public offer;
(14) bonds and other debt securities for which the entities required to
meet the benefits are companies listed on the regulated market; (15)
debt securities issued by a credit institution subject to special public
supervision designed to protect the holders of those securities,
provided the amounts received from the issuance of these securities
are invested by the issuer in assets that throughout the period until
redemption ensure fulfillment of all cash benefits resulting from
these securities and that in the event of insolvency of the issuer have
priority in the recovery of all cash benefits resulting from these
securities; and (16) depository receipts admitted to trading on the
regulated market. According to Paragraph 2 of the aforementioned
Article 141, open pension funds are not allowed to invest in asset
categories listed in Points 1–2.

There are no specific limitations on investment activities in securities
issued by nonresidents; however in case of open-end investment
funds, investments in securities and/or money market instruments
traded on an organized market, as well as in securities and money
market instruments whose admission to such trading is ensured in a
country other than Poland and/or an OECD member country require
the KNF’s consent. The KNF may also consent to investments of
open-end funds’ assets in deposits with a foreign bank.
Changes during 2018 and 2019

No significant changes occurred in the exchange and trade system.
PORTUGAL

(Position as of July 31, 2019)

Status under IMF Articles of Agreement

Date of membership

Article VIII
Yes. Date of acceptance: September 12, 1988.

Article XIV

Exchange Measures

Restrictions and/or multiple currency practices
No.

Exchange measures imposed for security reasons
Yes.

In accordance with IMF Executive Board Decision No. 144-(52/51)
Yes.

Pursuant to Executive Board Decision No. 144-(52/51), Portugal implements UNSC resolutions (UNSCRs) that approve restrictive measures (related to freezing of funds and other economic resources) directly and immediately by way of Article 8(3) of the Constitution of the Portuguese Republic and Law No. 97/2017, and does so for the preservation of international security.

As a full-fledged member of the EU, Portugal also benefits from decisions and regulations of the Council of the EU implementing UNSCRs that approve restrictive measures related to freezing of funds and other economic resources, as well as imposing restrictive measures of EU initiative.

Portugal has all of the rights and obligations stemming from its membership at the EU. Therefore, all directly applicable EU legislation applies in Portugal including all decisions adopted in the framework of the Common Foreign and Security Policy (CFSP) and all regulations based on Article 215 of the Treaty on the Functioning of the EU. Details on these restrictive measures are available on the following websites:

- eeas.europa.eu/topics/sanctions-policy/423/sanctions-policy_en
- data.europa.eu/euodp/pt/data/dataset/consolidated-list-of-persons-groups-and-entities-subject-to-eu-financial-sanctions/resource/5a1d5dd6-244e-4118-82d3-db3be0554112

Exchange measures in accordance with IMF Executive Board Decision No. 144-(52/51) were notified to the IMF effective July 30, 2019.

Other security restrictions
No.

Exchange measures in accordance with IMF Executive Board Decision No. 144-(52/51) were notified to the IMF effective June 8, 2018.

The exchange rate arrangement of the euro area is free floating. Portugal participates in a currency union (EMU) with 18 other members of the EU and has no separate legal tender. The euro, the common currency, floats freely and independently against other currencies. The ECB publishes information regarding its interventions; it last intervened in March 2011. When it intervenes, the ECB intervenes at the quotes of the market makers.

The ECB publishes a reference rate based on the daily concertation procedure between CBs within and outside the European System of Central Banks. The publication time of the euro foreign exchange reference rates is around 14:30 Central European Time to around 16:00 Central European Time. The reference rates against the euro are the average of the buying and selling rates. The exchange rates against the euro published by the ECB are released for reference purposes only.

### Monetary policy framework

**Exchange rate anchor**

- *U.S. dollar*

**Monetary aggregate target**

**Inflation-targeting framework**

**Target setting body**

- Government
- Central Bank

**Monetary Policy Committee**
To maintain price stability is the primary objective of the Eurosystem and of the single monetary policy for which it is responsible. This is stated in the Treaty on the Functioning of the EU, Article 127(1). “Without prejudice to the objective of price stability,” the Eurosystem will also “support the general economic policies in the Union with a view to contributing to the achievement of the objectives of the Union.” These include a “high level of employment” and “sustainable and non-inflationary growth.” Price stability is defined as an inflation rate below but close to 2%. ADs may freely determine their exchange rates and foreign exchange.
commissions in transactions with their clients. However, in accordance with Notice No. 8/2009, customers must be informed of fees and charges before the sale of products and services, and the list of fees and charges must be visible and easily accessible to customers in all branches.

</tr>
</tbody>
</table>
There are no exchange controls. Foreign trade policy is implemented by the Ministry of Economy. The Tax and Customs Authority within the MOF is responsible for administering trade controls and for issuing import and export licenses, declarations, and certificates.

In accordance with EU legal acts, there is a ban on trade in gold, precious metals, and diamonds with the government of the Democratic People’s Republic of Korea (DPRK) (as of May 2016, as amended) and Syrian public agencies (as of June 2013, as amended).

In accordance with EC Regulation No. 1889/2005 and Decree-Law No. 61/2007 of March 14, 2007, there is a mandatory declaration system for cash entering or leaving the EU with a value of €10,000 or more. Travelers entering or leaving the EU and carrying more than €10,000 are required to make a declaration to the relevant authorities of the member country through which they enter or leave the EU. The authorities must keep a record of such information and report it to their national financial intelligence unit. The obligation to declare is not fulfilled if the traveler makes no declaration or if the information provided is incorrect or incomplete. To check compliance with the regulation, the national authorities have the right to search natural persons, their baggage, and their means of transportation. In the event of failure to comply with the declaration obligation, cash may be confiscated. The EC regulation requires member countries to impose penalties for failure to comply with the declaration obligation. If there are indications that cash is related to illegal activity, authorities of one member country may exchange information with authorities in other member countries. Under the framework of existing agreements on mutual administrative assistance, information obtained under the EC regulation may also be communicated to a third country in compliance with relevant national and EU provisions on the transfer of personal data to third countries. The EC regulation does not apply to physical cross-border transportation from one EU member country to another (that is, intra-EU transportation). Such transportation is not considered “cross-border” for the purposes of the EC regulation; the EC regulation only harmonizes the system for the EU’s external borders. According to
Decree-Law No. 61/2007 of March 14, 2007, when required by the Portuguese customs authorities, a similar declaration must be presented when cash is transported within the EU. The single European Cash Declaration Form is used for declaration. The form allows the identification of a person or legal entity by its tax ID number. In accordance with EC regulations, there is a ban on the provision of new DPRK banknotes and coins to or for the benefit of the CB of the DPRK (as of May 2016, as amended), and a ban on the provision of new Syrian banknotes and coins (as of June 2013, as amended).

Capital Transactions

Controls on capital transactions  Yes. Regulation (EU) No. 2015/847 entails the prohibition of initiating wire transfers without complete information.
Some capital movements and transactions may be subject to restrictions adopted in the framework of the EU CFSP, specifically decisions and regulations of the Council of the EU implementing the UNSCRs that approve restrictive measures related to freezing of funds and other economic resources, as well as imposing restrictive measures of EU initiative.

Repatriation requirements  No.
Surrender requirements  No.
Surrender to the central bank  No.
Surrender to authorized dealers  No.

Controls on capital and money market instruments
On capital market securities  No.
Shares or other securities of a participating nature  No.

Purchase locally by nonresidents  No.
Sale or issue locally by nonresidents  No.
There are requirements concerning the information to be disclosed to the public by the buyer of shares or other securities of a participating nature when such purchases occur through a public takeover bid. Such public offers are subject to (1) prior registration with the Portuguese Securities Markets Commission (Comissão do Mercado de Valores Mobiliários—CMVM), pursuant to Article 114 of the Securities Code; and (2) prior publication of the respective prospectus (Article 134 of the Securities Code). Qualifying holdings in listed companies are subject to disclosure based on the EU Transparency Directive: Articles 16 et seq. of the Securities Code lay down the framework for disclosure triggered by a ladder of holding thresholds. Prospectuses approved by the appropriate authority of another EU country, pertaining to public offerings of takeover bids of shares admitted to trading in Portugal, are recognized by the CMVM, subject to translation into Portuguese and provided the CMVM receives the necessary documentation (Article 147-A of the Securities Code). There are requirements concerning the information to be disclosed to the public by the issuers of shares or other securities of a participating nature. When securities of less than €100,000 in nominal value (or subscription price as applicable) are offered to the public in Portugal, a prospectus is required and subject to approval by the CMVM and to public disclosure by the offeror (Articles 108, 111, 114, and 134 of the Securities Code). If the issuer is registered in another EU country, or if the securities were or are to be admitted to trading in a regulated market in another EU country, the approval of the prospectus may be the responsibility of that country’s authority, if that is the choice of the issuer or of the offeror (Article 145 of the Security Code). A prospectus approved by the appropriate authority of an EU Member State is valid in Portugal if the CMVM...
receives the necessary documentation (Article 146 of the Securities Code)—the prospectus in English, the Portuguese translation of the summary, and the documents’ certificate of approval. The CMVM may approve prospectuses of an issuer from a non-EU country if they are drawn up according to international standards of organizations of securities supervisory authorities—namely the International Organization of Securities Commissions (IOSCO)—and contain information required under the Securities Code and the Prospectus Regulation (Article 147 of the Securities Code).

There are requirements concerning the information to be disclosed to the public. Sales or issues of shares or other securities of a participating nature through a public offering launched simultaneously in Portugal and abroad require the prior publication of a prospectus (Article 134 of the Securities Code), which must be approved by the CMVM (Article 145, Subparagraph 1, of the Securities Code). If the sale or issue occurs through a public offering launched only abroad, the CMVM has no authority to control such offers, but may be consulted by foreign authorities.

There are requirements concerning the information to be disclosed to the public before bonds and other debt securities are offered to the public. A prospectus must be published and be subject to approval by the CMVM (Article 114 of the Securities Code).

There are requirements concerning the information to be disclosed to the public before bonds and other debt securities are offered to the public. When securities of less than €100,000 in nominal value (or subscription price as applicable) are offered to the public in Portugal, a prospectus is required and is subject to approval by the CMVM and to public disclosure by the offeror, pursuant to Articles 108, 111, 114, and 134 of the Securities Code. If the issuer is registered in another EU country or if the securities were or are to be admitted to trading in a regulated market, the approval of the prospectus may be the responsibility of that country’s authority, if that is the choice of the issuer or of the offeror (Article 145 of the Security Code). A prospectus approved by the appropriate authority of an EU country is valid in Portugal as long as the CMVM receives the necessary documentation (Article 146 of the Securities Code)—the prospectus in English, the Portuguese translation of the summary, and the certificate of approval of such documents. The CMVM may also approve prospectuses of an issuer from a non-EU country, provided they are drawn up in accordance with international standards set by international organizations of securities supervisory authorities—namely IOSCO—and contain information required under the Securities Code and the Prospectus Regulation (Article 147 of the Securities Code).
On money market instruments  No.
Purchase locally by nonresidents  No.
Sale or issue locally by nonresidents  No. There are requirements concerning the information to be disclosed to the public. Pursuant to Article 12(2) of Decree-Law No. 69/2004 of March 25, 2004, before commercial paper is offered to residents, the issuer must prepare an information document for CMVM approval. Furthermore, according to Article 17(8), issuance of commercial paper for which a prospectus is optional is subject to the same requirements as public offers for which a prospectus is mandatory under the securities law. CMVM Regulation No. 2/2014 of November 4, 2014, provides additional guidance related to the issuance of commercial paper.

Purchase abroad by residents  No.
Sale or issue abroad by residents  No.

On collective investment securities  Yes.
Purchase locally by nonresidents  No.
Sale or issue locally by nonresidents  Yes. Only the marketing and sale of units in foreign alternative investment funds to local retail investors require CMVM authorization. Sale and issuance of units of EU harmonized funds – UCITS – are allowed, under the national regime resulting from the Directive 2009/65/EC (UCITS Directive), subject to a notification to CMVM from the home country competent authority. Sale and issuance of units of EU alternative investment funds distributed only to professional investors are allowed, under the national regime resulting from the Directive 2011/61/EU (Alternative Investment Fund Managers Directive or AIFMD), subject to a notification to CMVM from the home country competent authority. Sale and issuance of units of third country alternative investment funds distributed only to professional investors are allowed, subject to CMVM’s authorization and, after the date to be specified on the delegated act to be adopted by the Commission pursuant to Article 67(6) of AIFMD, subject to notification to CMVM by the competent authority. The national regime on UCITS and alternative investment funds is established in the General Framework of Collective Investment Schemes. Venture capital, social entrepreneurship, and specialized investment funds follow the regime established in the General Framework of Collective Investment Schemes (according to Article 65 of the Legal Framework of Venture Capital, Social Entrepreneurship, and Specialized Alternative Investment).

Purchase abroad by residents  No.
Sale or issue abroad by residents  No. In the case of UCITS funds and pursuant to the UCITS Directive, the CMVM, as the home country authority, sends passport notifications to the relevant authority in the EU host country where the units are to be marketed. Management companies authorized in the EEA may also establish UCITS in another member country. These features are regulated under the above-mentioned General Framework of Collective Investment Schemes. In accordance with the AIFMD, EEA management companies authorized by their home country authority may manage, market, and sell to professional investors, under an EU passport, units of EU and third country alternative investment funds in other EEA countries. Marketing and sale of such units to retail investors are subject to host-country laws.

Controls on derivatives and other  No. As a special case because of the high risk involved in certain types of
differential contracts (CFDs) and in binary options, their marketing, distribution, or sale to retail investors was prohibited throughout the territory of the EU under the European Securities and Markets Authority (ESMA) decisions (EU) Nos. 2018/1636 and 2018/2064, implemented in Portugal by the Regulation CMVM No. 5/2019. The prohibition applies to the marketing, distributing, or selling either by Portuguese firms to resident and to nonresident retail investors or to non-Portuguese firms to resident retail investors. The Portuguese Regulation is in force effective July 3, 2019, and is a permanent measure. Previously, ESMA decisions with identical scope were applied effective July 2, 2018, for binary options, and effective August 1, 2018, for CFDs, as temporary measures that were renewed every three months.

Nondiscriminatory prudential rules apply to the authorization of credit institutions and financial companies. Controls apply to (1) establishment of branches of credit institutions or financial companies owned or controlled by non-EU investors, for which earmarked capital is required in an amount equal to the minimum required by Portuguese law for credit institutions or financial companies of the same type with their headquarters in Portugal; (2) establishment of branches of foreign insurers and reinsurers originating in non-EU member countries, for which a special deposit and financial guarantee are required and whose parent company must have been authorized to exercise such an activity for at least five years; (3) ownership of Portuguese flag vessels other than through an enterprise incorporated in Portugal or in an EU country; (4) investments in airlines established in the country that must be majority owned and effectively controlled by EU countries and/or nationals of EU states, unless otherwise provided for through an
international agreement to which the EU is a signatory; (5) establishment of travel agencies by non-EU investors, except through an enterprise incorporated in Portugal; and (6) the extent that under UCITS and AIFMD Directives, a depository of a UCITS must either have its registered office in the same EU country as that of the enterprise or be established in the EU country if its registered office is in another EU country.

### Provisions Specific to the Financial Sector

| Provisions specific to commercial banks and other credit institutions | Yes. |
| Borrowing abroad | No. |
| Maintenance of accounts abroad | No. |
| Lending to nonresidents (financial or commercial credits) | No. |
| Lending locally in foreign exchange | No. |
| Purchase of locally issued securities denominated in foreign exchange | No. |
Differential treatment of deposit accounts in foreign exchange  
Reserve requirements  No.  
Liquid asset requirements  No.  
Interest rate controls  No.  
Credit controls  No.  

Differential treatment of deposit accounts held by nonresidents  
Reserve requirements  No.  
Liquid asset requirements  No.  
Interest rate controls  No.  
Credit controls  No.  

Investment regulations  Yes.  

Abroad by banks  Yes.  
Nondiscriminatory prudential rules apply to (1) the establishment of branches abroad, which requires notification to and approval from the BdP; (2) the establishment of subsidiaries in non-EEA countries, which requires notification to and approval from the BdP; (3) the acquisition of qualifying holdings in foreign credit institutions, which requires notification to the BdP; and (4) effective January 1, 2018, for less significant institutions and from January 1, 2016, for significant institutions, limits on other investments outside the financial sector (for example, capital holdings in a company exceeding 15% of a bank’s own funds, or the total amount of qualifying holdings exceeding 60% of a bank’s own funds, whichever is higher, are subject to a risk weight of 1250%—in both cases, these limits are not applied to shareholdings in companies supervised on a consolidated basis with the shareholding bank).  

In banks by nonresidents  Yes.  
Nondiscriminatory prudential rules apply to the authorization of credit institutions and financial companies and to the acquisition of qualifying holdings in credit institutions. Controls apply to establishment of branches of credit institutions owned or controlled by non-EU investors or financial companies owned or controlled by foreign investors, which requires earmarked capital in an amount equal to the minimum required by Portuguese law for credit institutions or financial companies of the same type with their headquarters in Portugal.  

Open foreign exchange position limits  Yes.  
No absolute limits apply. However, prudential minimum own funds requirements apply on a nondiscriminatory basis to credit institutions, according to EU rules envisaged in Regulation (EU) No. 575/2013 of the European Parliament and of the Council of 26 June 2013, on prudential requirements for credit institutions and investment firms. These requirements are applied to resident and nonresident assets and liabilities.  

On resident assets and liabilities  Yes.  
No absolute limits apply. However, prudential minimum own funds requirements apply on a nondiscriminatory basis to banks and other credit institutions, according to EU rules envisaged in Regulation (EU) No. 575/2013 of the European Parliament and of the Council of 26 June 2013, on prudential requirements for credit institutions and investment firms.  

On nonresident assets and liabilities  Yes.  
No absolute limits apply. However, prudential minimum own funds requirements apply on a nondiscriminatory basis to banks and other
credit institutions, according to EU rules envisaged in Regulation (EU) No. 575/2013 of the European Parliament and of the Council of 26 June 2013, on prudential requirements for credit institutions and investment firms.

### Provisions specific to institutional investors

<table>
<thead>
<tr>
<th>Insurance companies</th>
<th>Yes.</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Nondiscriminatory prudential rules apply to foreign insurance companies (non-EEA) in the following situations: (1) setting up a subsidiary, which requires approval by the Portuguese Insurance and Pension Funds Supervisory Authority (Autoridade de Supervisão de Seguros e Fundos de Pensões—ASF); (2) forming a branch requires ASF approval (in accordance with Law No. 147/2015 of September 9, 2015); (3) acquisition of an insurance supplier already established in the host country, which requires ASF approval; and (4) acquisition of qualifying holdings in insurance companies. Law No. 147/2015 of September 9, 2015, establishing the Regime Applicable to the taking up and pursuit of Insurance and Reinsurance Activities came into effect.

### Limits (max.) on securities issued by nonresidents

<table>

Exchange Arrangement

Currency

Yes. The currency of Qatar is the Qatari riyal.

Other legal tender

No.

Exchange rate structure

Unitary

Yes.

Dual

Multiple

Classification

No separate legal tender

Currency board

Conventional peg

Yes. The exchange rate arrangement is a conventional pegged arrangement vis-à-vis the US dollar. The targeted peg was officially authorized by Amiri Decree No. 34 of 2001 issued in July 2001, replacing the de jure exchange rate policy of pegging to the SDR, which had been in effect since 1975. The Qatar Central Bank (QCB) does not publish data on its interventions.

Stabilized arrangement

Crawling peg

Crawl-like arrangement

Pegged exchange rate within horizontal bands
Official exchange rate

Yes. The riyal is pegged to the US dollar at QR 3.64 per US dollar. The official rate is used for accounting and valuation.

Monetary policy framework

Yes. The monetary policy framework aims at maintaining fixed parity between the QR with the US dollar at QR 3.64 per US dollar. QCB’s monetary policy is drawn and implemented to manage the short-term interbank rates with a view to sustain the fixed parity between the QR and the US dollar. The current QCB interest rates framework focuses on the average overnight interbank rate as the operating target. The aim is to align the average overnight interbank rate within the QCB deposit rate (QCBDR) through liquidity management operations.

Target horizon
Exchange rates of commercial banks for transactions in US dollars are based on the buying and selling rates of the QCB. The buying and selling rates of commercial banks for other currencies are based on the QCB’s rates for the US dollar and on the market rates for the other currency against the US dollar. A spread of QR 0.0085 is applied to exchange transactions with the public. Thirty-seven institutions are licensed by the QCB to deal in foreign exchange with the public. These institutions consist of 17 commercial banks and 20 foreign exchange bureaus, which are allowed to operate subject to licensing by the QCB. Foreign exchange bureaus do not engage in foreign exchange transactions directly with the QCB, but they may maintain accounts abroad. Their operations are not limited to the purchase and sale of banknotes; they may also make foreign currency payments and transfers on behalf of their clients.

Commercial banks trade US dollars domestically based on the price determined by the QCB, plus a margin of 0.24% when dealing with the public. Commercial banks trade other currencies based on the QCB-determined exchange rates of riyals against US dollars and market-determined rates of other currency against the US dollar. Commercial banks have a margin of 0.24% for US dollar trades and trade other currencies through the US dollar.

The QCB buys and sells foreign currency at the announced rates every business day from 8:00 a.m. to 1:00 p.m., unless it decides otherwise. The QCB purchases US dollars at a fixed rate of QR 3.6385 and sells US dollars at a fixed rate of QR 3.6415 to banks in Qatar. The QCB does not deal directly either with the government or
with other public entities.

Banks are allowed to trade foreign exchange among themselves. All commercial banks (17) participate in the interbank market. There are no limits on the bid-ask spreads and commissions of market participants.

The interbank foreign exchange market is based on a market-making agreement.

In the commercial banking sector, importers may purchase foreign exchange in the forward market. However, the QCB does not participate in the foreign exchange derivatives market.

This information can be found at the AREAER ONLINE database: http://www.elibrary-areaer.imf.org/Pages/Reports.aspx.

Arrangements for Payments and Receipts

Prescription of currency requirements No. All settlements with Israel are prohibited. There are no other prescribed currency requirements.

Controls on the use of domestic currency No.

For current transactions and payments No.

For capital transactions No.

Transactions in capital and money market instruments No.

Transactions in derivatives and other instruments No.

Credit operations No.

Use of foreign exchange among residents No.

Payments arrangements Yes.

Bilateral payments arrangements Yes.

Operative Yes. Qatar has payments agreements with Egypt and Lebanon. Following a memorandum of understanding with the China Banking Regulatory Commission and the People’s Bank of China (PBC), to allow Qatar to be a center for renminbi clearing and settlement, direct payments with China and Hong Kong SAR in renminbi have been reported.

Inoperative No.

Regional arrangements Yes. Qatar is a member of the GCC Customs Union.

Clearing agreements Yes. Qatar has clearing agreements with GCC countries.

Barter agreements and open accounts No.

Administration of control Yes. The QCB is the exchange control authority, but there is no exchange...
control legislation. Import licenses are issued by the Ministry of Commerce and Industry.

Provisions Specific to the Financial Sector

Provisions specific to commercial banks and other credit institutions  Yes. On January 7, 2015, the Foreign Account Tax Compliance Act (FATCA) related to intergovernmental agreement was signed. The Model 1 intergovernmental agreement is considered in effect by the US Treasury. On November 10, 2017, Qatar signed the Common Reporting Standard Multilateral Competent Authority Agreement that will enable the automatic exchange of financial account information pursuant to the OECD/G20 Common Reporting Standard.

Borrowing abroad  Yes. There are no limits on direct borrowing from abroad; however, QCB approval is required for bond issuance for the purpose of borrowing. For the purpose of calculating credit ratios, borrowing from foreign banks and issuance of debt securities are limited to 100% of a bank’s Tier 1 capital. Within this limit, borrowing from foreign banks is limited to 50% of Tier 1 capital.

Maintenance of accounts abroad  No.

Lending to nonresidents (financial or commercial credits)  No.

Lending locally in foreign exchange  Yes. Banks are required to comply with the sound banking norms while granting credit facilities in foreign currencies as per the customers’ actual requirements, cash flows, sources of repayments and banks credit policy and pricing policy taking into account interest/return rate gap risk, foreign exchange rate risk, and open position risk.

Purchase of locally issued securities denominated in foreign exchange  No.

Differential treatment of deposit accounts in foreign exchange  No.

Reserve requirements  No.

Liquid asset requirements  No.

Interest rate controls  No.

Credit controls  No.

Differential treatment of deposit accounts held by nonresidents  No.
Reserve requirements | No.
Liquid asset requirements | No.
Interest rate controls | No.
Credit controls | No.
Investment regulations | Yes.

Investment Regulations:
Investment ceilings with respect to bank’s capital and reserves are as follows:
(1) Total ceilings on securities portfolio (equity, debt, and Sukuk) are 25%.
(2) Total ceilings of securities held outside Qatar are 15%.
(3) Total ceilings of unlisted securities: inside Qatar are 10% and outside Qatar 5%.
(4) Ceiling on investments in a single entity, which do not exceed total (investment and credit) risk exposure determined by the QCB for a single customer or single financial institution is 5%.

Exemptions to the above limits are as follows:
(1) Debt securities and Sukuk issued or guaranteed by Qatari Government or issued by QCB.
(2) Debt securities and Sukuk issued by national banks licensed by QCB.
(3) Zero percent risk-weighted debt securities and Sukuk according to Basel II framework inside or outside Qatar. Such debt securities and Sukuk must be eligible for inclusion in Level 1 of high-quality liquid assets under the LCR. Total (investment and credit) risk exposure in a single entity (a financial institution or customer) should not exceed the credit concentration limit as determined by QCB.
(4) Ceiling for investment in associates: 35% total ceiling for all associates (including participations, finance, and risk exposures), and 25% ceiling for a single company similar as for all associates.
(5) Ceiling for investment in real estates for Islamic banks: All types of investments in real estate limit at 10% of banks capital and reserves, which include: (a) owned real estates for the purpose of investment (for purposes of leasing or trading); (b) participation in unlisted real estate mutual funds; and (c) unlisted real estate Sukuk which is a common ownership in a real estate.

Abroad by banks | Yes.

Investment Regulations:
Investment ceilings with respect to bank’s capital and reserves are as follows:
(1) Total ceilings on securities portfolio (equity, debt, and Sukuk) are 25%.
(2) Total ceilings of securities held outside Qatar are 15%.
(3) Total ceilings of unlisted securities: inside Qatar are 10% and outside Qatar 5%.
(4) Ceiling on investments in a single entity, which do not exceed total (investment and credit) risk exposure determined by the QCB for a single customer or single financial institution is 5%.

Exemptions to the above limits are as follows:
(1) Debt securities and Sukuk issued or guaranteed by Qatari Government or issued by QCB.
(2) Debt securities and Sukuk issued by national banks licensed by QCB.
(3) Zero percent risk-weighted debt securities and Sukuk according to Basel II framework inside or outside Qatar. Such debt securities and Sukuk must be eligible for inclusion in Level 1 of high-quality liquid assets under the LCR. Total (investment and credit) risk exposure in a single entity (a financial institution or customer) should
not exceed the credit concentration limit as determined by QCB. (4) Ceiling for investment in associates: 35% total ceiling for all associates (including participations, finance, and risk exposures), and 25% ceiling for a single company similar as for all associates. (5) Ceiling for investment in real estates for Islamic banks: All types of investments in real estate limit at 10% of banks capital and reserves, which include: (a) owned real estates for the purpose of investment (for purposes of leasing or trading); (b) participation in unlisted real estate mutual funds; and (c) unlisted real estate Sukuk which is a common ownership in a real estate. 

Foreign investment in the banking and insurance sectors requires approval of the cabinet. There is a cap on the net open position equal to 25% of bank’s capital and reserves for US dollars, 5% for other currencies with an overall limit of 30%.

## Exchange Measures

| Restrictions and/or multiple currency practices | No. |
| Exchange measures imposed for security reasons | Yes. |
| In accordance with IMF Executive Board Decision No. 144-(52/51) | Yes. |

In accordance with UNSC Resolution Nos. 1267 (1999), 1333 (2000), 1373 (2001), and 1988 (2011), certain restrictions are maintained against the listed terrorists and the Taliban, aimed at freezing their accounts and banning all payments to persons and organizations related to terrorism.

Other security restrictions Yes.

Measures have been taken to freeze the accounts and assets of listed individuals, groups, and organizations associated with terrorism, and for safety reasons such as nonproliferation of weapons of mass destruction (that is, UNSC Resolution No. 1540 (2004)). These measures were taken in accordance with UNSC resolutions, updated by the 14 committees empowered (the activity of three committees being terminated as a result of lifting the related restrictions). In accordance with UNSC Resolution No. 1989 (2011), certain restrictions are maintained against the listed terrorists and the Taliban, aimed at freezing their accounts and banning all payments to persons and organizations related to terrorism.

## Exchange Arrangement

<table>
<thead>
<tr>
<th>Currency</th>
<th>Yes.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Other legal tender</td>
<td>Yes.</td>
</tr>
</tbody>
</table>

The currency of Romania is the Romanian leu.

The transferable ruble continues to be used as a unit of account for outstanding balances of the former CMEA.
The de jure exchange rate arrangement is managed floating; the exchange rate of the leu is determined in the interbank foreign exchange market. The National Bank of Romania (NBR) may intervene to smooth excessive exchange rate fluctuations. There is no formal definition of excessive exchange rate fluctuations: the assessment is based on domestic and international market circumstances and on prevailing macroeconomic conditions. The NBR intervenes either directly with market participants at their quoted rates or via market makers. The NBR does not publish information on its interventions.

From July 2016, the leu followed a depreciating trend within a narrow 2% band against the euro, and stabilized since January 2018 (with one realignment in January 2019). Therefore, the de facto ER arrangement was reclassified twice: (1) retroactively to crawl-like from floating, effective July 22, 2016; and (2) to stabilized from crawl-like, effective January 25, 2018. The de facto methodology for classification of exchange rate regimes is based on a backward-looking statistical approach that relies on past exchange rate movement and historical data. Therefore, this reclassification does not imply statements or views on future or intended policies nor does it imply a policy commitment on the part of the country authorities.

Official exchange rate

The NBR quotes rates for 30 foreign currencies and the SDR. The exchange rates are based on the quotes of 10 local banks licensed to perform foreign exchange transactions. These banks are selected by the NBR, taking into consideration their participation in the interbank foreign exchange market. The use of exchange rates listed by the NBR is not compulsory for foreign exchange transactions and accounting records.
Central Bank

Monetary Policy Committee

Central Bank Board

Other

Government and Central Bank Yes. The inflation target is set by the CB in consultation with the government. Within the NBR, the inflation target is adopted through a decision of the NBR Board.

Inflation target Yes.

Target number Yes.

Point target

Target with tolerance band Yes. Flat multi-annual inflation target of 2.5%±1 percentage point is adopted.

Band/Range

Target measure Yes.

CPI Yes. The flat multi-annual inflation target is defined in terms of the annual change in the consumer price index (that is, year-on-year (y-o-y) headline inflation). The consumer price index is based on the national definition.

Core inflation

Target horizon Yes. Flat multi-annual inflation target is adopted.

Operating target (policy rate)

Policy rate Yes. As of July 31, 2019, the policy rate is 2.5%. The monetary policy interest rate is the interest rate on NBR’s main open-market operations, which normally have a maturity of one week.

Target corridor band Yes. The interest rates on the NBR’s standing facilities, that is, the deposit facility and the lending facility, were set at ±1.00 percentage points around the monetary policy rate as from November 8, 2017. As of July 31, 2019, these interest rates stood at 1.5% (deposit facility) and 3.5% (lending facility).

Other

Accountability Yes.

Open letter No.

Parliamentary hearings No.

Other Yes. According to NBR’s Statute (Article 35(4)), on behalf of the Board, the governor must submit to the parliament, until June 30 of the following year, the NBR’s annual report, which covers the NBR’s activities, annual financial statements, and the auditor’s report, subject to debate, but not voted in the joint session of the two Chambers of parliament.

Transparency Yes. NBR’s monetary policy decisions are communicated and explained to the public via: press releases, press briefings following the decisions, inflation reports (presented in detail in press conferences), publication of minutes, and annual reports.

Publication of votes No.
Publication of minutes: Yes. Starting with the NBR Board meeting of September 30, 2016, the account (minutes) of discussions underlying monetary policy decisions are published in the “Monetary Policy” section on the NBR website within seven calendar days after each Board meeting dedicated to monetary policy issues. The aim is to provide the general public with the rationale and economic data behind monetary policy decisions. The minutes include the outcome of the vote and the voting results are not attributed.

Publication of inflation forecasts: Yes. In the context of the inflation-targeting framework, the NBR updates and publishes its medium-term inflation forecast on a quarterly basis within the inflation report.

Other monetary framework:
- Exchange tax: No.
- Exchange subsidy: No.
- Foreign exchange market: Yes. Residents and nonresidents are allowed access to the foreign exchange market without supporting documents. Juridical persons other than authorized credit institutions may purchase or sell foreign exchange through intermediaries. Individual persons may purchase or sell foreign currency either through intermediaries or through foreign exchange offices authorized by the MPF, except those supervised by the NBR. Commercial banks and exchange bureaus are free to set both their exchange rates and commissions in transactions with their clients. Article 24 Paragraph (1) (b) of Law No. 656/2002 on the prevention and sanctioning of money laundering and on measures for preventing and combating terrorism financing (AML/CFT), republished as amended, designates the National Agency for Fiscal Administration (NAFA) for anti-money laundering and combating the financing of terrorism (AML/CFT) supervision of specialized foreign exchange entities, except those supervised by the NBR. MPF Order No. 663/2012 stipulates the structure of the supervisory committee, and MPF Order No. 664/2012 regulates the currency exchange and licensing requirements of these entities. The committee is made up of seven members representing the MPF (legal and tax structures, legislative regulation structure), NAFA, National Office for the Prevention and Control of Money Laundering, and law enforcement. The Secretariat is from the MPF’s General Directorate Management of Specifically Regulated Sectors.

Spot exchange market: Yes. Foreign exchange offices conduct transactions with foreign currency banknotes and accept traveler’s checks denominated in those currencies. They may also conduct transactions with foreign currencies that are not quoted. Licensing and control of foreign exchange offices/bureaus are performed by the MPF. Foreign exchange offices are not allowed to perform payments and transfers on behalf of their clients, because the payment services may only be legally performed in Romania by credit institutions, payment institutions, and electronic money institutions. Foreign exchange offices may maintain accounts abroad.

Operated by the central bank: No.

Foreign exchange standing facility: No.

Allocation: No.

Auction: No.

Fixing: No.
**Interbank market**

Yes. Credit institutions are authorized within their scope of activity to participate in the interbank market as intermediaries and on their own behalf. There are no limits on the bid-ask spreads or commissions of market participants. As of December 31, 2018, 28 Romanian legal banks and 8 branches of foreign banks participated in the interbank foreign exchange market. The NBR can intervene both directly and via market makers in the interbank market. Public data on interbank foreign exchange market are available on a monthly basis on NBR’s website.

**Over the counter**

No.

**Brokerage**

No.

**Market making**

Yes. The foreign exchange market operates based on market makers.

**Forward exchange market**

Yes. Euro–leu and US dollar–leu futures contracts are traded on the Sibiu Monetary Financial and Commodities Exchange. Banks and clients also conduct forward transactions in the interbank foreign exchange market. The NBR has participated in the forward foreign exchange market only twice and has not participated since 2009.

**Official cover of forward operations**

No.

**References to legal instruments and hyperlinks**

This information can be found at the AREAER ONLINE database: http://www.elibrary-areaer.imf.org/Pages/Reports.aspx.

Use of foreign exchange among residents for trading in goods and services is prohibited, with certain exceptions.

Payments to and from countries with which Romania has bilateral payments arrangements are made only in convertible currencies and in accordance with the procedures set forth in those arrangements. Current and capital transactions are performed freely between residents and nonresidents in foreign currency and lei.
Official No.

Private No.

**Controls on trade in gold (coins and/or bullion)** Yes. Economic operators or traders who perform precious metals activities are authorized by the National Authority for Consumer Protection.

**On domestic ownership and/or trade** Yes. Economic operators or traders who perform precious metals activities are authorized by the National Authority for Consumer Protection.

**On external trade** Yes. Economic operators or traders who perform precious metals activities are authorized by the National Authority for Consumer Protection.

**Controls on exports and imports of banknotes** No. NBR regulations (NBR Regulation No. 4/2005 on the Foreign Exchange Regime) do not stipulate controls on exports and imports of banknotes, but in accordance with Regulation (EC) No. 1889/2005, cash controls require mandatory declaration of cash entering or leaving the EU equivalent to €10,000 or more. Travelers entering or leaving the EU and carrying cash of a value equivalent to €10,000 or more must make a declaration to the relevant authorities of the member country through which they enter or leave the EU. The authorities must keep a record of such information and report it to their national financial intelligence unit. Thus, in accordance with the requirements to declare cash under Regulation (EC) No. 1889/2005 on controls of cash entering or leaving the Community and based on the Article 5 Paragraph 12 of Law No. 656/2002 on AML/CFT, the NAFA is required to communicate to the NOPCML (financial intelligence unit Romania), on a monthly basis, all the information it holds regarding declarations by natural persons of cash in domestic or foreign currency equal to or above the limit in Regulation (EC) No. 1889/2005. In addition, Law No. 656/2002, republished as amended, requires the NAFA to immediately notify the financial intelligence unit of suspicion of money laundering/financing of terrorism (ML/FT). The obligation to declare is not fulfilled if the traveler makes no declaration or if the information provided is incorrect or incomplete. To check compliance with the regulation, the national authorities have the right to search natural persons, their baggage, and their means of transportation. In the event of failure to comply with the declaration obligation, cash may be confiscated. The EC regulation requires member countries to impose penalties for failure to comply with the declaration obligation. If there are indications that cash is related to illegal activity, authorities of one member country may exchange information with authorities in other member countries, and the information must be transmitted to the EC. Under the framework of existing agreements on mutual administrative assistance, information obtained under the EC regulation may also be communicated to a third country in compliance with relevant national and EU provisions on the transfer of personal data to third countries. The EC regulation does not apply to physical cross-border transportation from one EU member country to another (that is, intra-EU transportation). Such transportation is not considered “cross-border” for the purposes of the EC regulation; the EC regulation only harmonizes the system for the EU’s external borders.

**On exports** No.

**Domestic currency** No. NBR regulations (NBR Regulation No. 4/2005 on the Foreign Exchange Regime) do not stipulate controls on exports and imports of banknotes, but in accordance with Regulation (EC) No.
1889/2005, cash controls require mandatory declaration of cash entering or leaving the EU equivalent to €10,000 or more. Travelers entering or leaving the EU and carrying cash of a value equivalent to €10,000 or more must make a declaration to the relevant authorities of the member country through which they enter or leave the EU.

**Foreign currency**

No.

NBR regulations (NBR Regulation No. 4/2005 on the Foreign Exchange Regime) do not stipulate controls on exports and imports of banknotes, but in accordance with Regulation (EC) No. 1889/2005, cash controls require mandatory declaration of cash entering or leaving the EU equivalent to €10,000 or more. Travelers entering or leaving the EU and carrying cash of a value equivalent to €10,000 or more must make a declaration to the relevant authorities of the member country through which they enter or leave the EU.

**Domestic currency**

No.

NBR regulations (NBR Regulation No. 4/2005 on the Foreign Exchange Regime) do not stipulate controls on exports and imports of banknotes, but in accordance with Regulation (EC) No. 1889/2005, cash controls require mandatory declaration of cash entering or leaving the EU equivalent to €10,000 or more. Travelers entering or leaving the EU and carrying cash of a value equivalent to €10,000 or more must make a declaration to the relevant authorities of the member country through which they enter or leave the EU.

**Foreign currency**

No.

NBR regulations (NBR Regulation No. 4/2005 on the Foreign Exchange Regime) do not stipulate controls on exports and imports of banknotes, but in accordance with Regulation (EC) No. 1889/2005, cash controls require mandatory declaration of cash entering or leaving the EU equivalent to €10,000 or more. ### Provisions Specific to the Financial Sector

<table>
<thead>
<tr>
<th>Provisions specific to commercial banks and other credit institutions</th>
<th>Yes.</th>
<th>Credit institutions’ accounting reports must conform to International Financial Reporting Standards. Following implementation of International Financial Reporting Standards 9, starting by 2018, which has replaced International Accounting Standard 39 Financial Instruments: Recognition and Measurement, a regulation has been issued at European level (Regulation (EU) No. 2017/2395 amending Regulation (EU) No. 575/2013 as regards transitional arrangements for mitigating the impact of the introduction of International Financial Reporting Standards 9 on own funds and for the large exposures treatment of certain public sector exposures denominated in the domestic currency of any Member State). Under this regulation, credit institutions were able to choose for a progressive phase-in regime (with a maximum duration of 5 years) to mitigate that potentially significant negative impact on Common Equity Tier 1 capital arising from expected credit loss accounting. The prudential filter regulation (NBR Regulation No. 16/2012 on the Classification of Credits and Investments and the Establishment and Use of Prudential Value Adjustments) was repealed by NBR Regulation No. 1/2018.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Borrowing abroad</td>
<td>No.</td>
<td>NBR Regulation No. 5/2013 (as amended and supplemented) requires that credit institutions have in place policies and processes for the identification, measurement, evaluation, monitoring, reporting, and control or decreasing of country risk and transfer risk. Credit institutions must set limits on country exposures. The credit institution’s management body approves the strategies, processes, and policies on the management of country risk and transfer risk to ensure that these policies and processes are implemented effectively and are fully integrated into the overall risk management of the credit institution.</td>

<tr>
<td>Lending locally in foreign exchange</td>
<td>Yes.</td>
<td>Capital requirements addressing foreign exchange risk, indirectly affecting local lending in foreign exchange, are included in Regulation (EU) No. 575/2013 on prudential requirements for credit institutions and investment firms and amending Regulation (EU) No. 648/2012. This regulation is directly applicable across the EU and supersedes the previous regulation (NBR-NSC Regulation No. 22/27/2006) on capital adequacy of credit institutions and investment firms (repealed with effect from January 1, 2014) which included provisions on capital requirements for foreign exchange risk and foreign exchange position limits. Article 351 of Regulation (EU) No. 575/2013 requires banks whose overall net foreign exchange position exceeds 2% of their own funds to calculate capital requirements for foreign exchange risk. There is a different provisioning regime for foreign exchange loans by nonbank financial institutions to unhedged borrowers under NBR Regulation No. 5/2012 on the Classification and the Establishment, Adjustment, and Use of Specific Credit-Risk Provisions relevant to Romanian entities under the supervision of the NBR, other than credit institutions. The provisioning costs for foreign exchange loans to unhedged borrowers are higher than those for local currency lending. According to NBR Regulation No. 17/2012, as supplemented, creditors must warn unhedged clients of the consequences of exchange rate depreciation on debt obligations and establish the</td>

</tbody>
</table>
maximum debt levels (debt-to-income ratio, DTI) for consumer loans. Effective January 1, 2019, the NBR Regulation No. 17/2012 provides for an aggregate Debt-service-to-income (DSTI) ceiling of 40% of which the maximum DSTI for loans denominated or indexed in a foreign currency granted to debtors exposed to foreign exchange risk is 20%. The maximum levels of DSTI are increased by 5 percentage points in case of a mortgage loan contracted by the debtor for the purchase of the first residential property to be occupied by the debtor (including Prima Casa loans). The caps on the DSTI have been set including taking into account the impact of the currency risk, the interest rate risk, and the risk of decrease of the eligible income available during the period of the credit life, while the shock factors previously provided within the regulation were eliminated. The regulation provides also for an exemption from the maximum level of the aggregate DSTI, under certain conditions, for up to 15% of the loans granted by a creditor. LTV ratios apply to foreign currency consumer loans (75%) and for foreign currency credit agreements secured by mortgages as follows: (1) 85% for lei; (2) 75% for euros, for unhedged borrowers; (3) 60% for other foreign currency, for unhedged borrowers; and (4) 80% for foreign currency credit, for hedged borrowers. Following the entry into force of the Capital Requirements Directive (CRD) IV package in 2014, the requirements for credit institutions were incorporated into NBR Regulation No. 5/2013 on prudential requirements for credit institutions.

Minimum reserve requirement ratios can differ according to the currency and residual maturity involved. The minimum reserve requirement ratio on leu-denominated liabilities of credit institutions is 8%. The minimum reserve requirement ratio on foreign-currency-denominated liabilities was reduced in two steps during 2016, from 14% to 10% (to 12% from 14%, as from January 24, 2016, and to 10% from 12%, as from October 24, 2016) and then to 8% in 2017 (effective May 24, 2017). The minimum reserve ratio on leu- and foreign-currency-denominated liabilities with a residual maturity of over two years without early withdrawal, transfer, or repayment clauses is zero.

Following the entry into force of the CRD IV package, all its requirements for credit institutions were incorporated into NBR
Regulation No. 5/2013 on prudential requirements for credit institutions. According to the amended regulation, for qualifying holdings (direct or indirect holdings in an enterprise that represent 10% or more of the capital or of the voting rights or that make it possible to exercise significant influence over the management, except financial sector entities or enterprises deemed by the relevant authority to be engaged in the following: (1) direct extension of banking; (2) activities ancillary to banking; and (3) leasing, factoring, management of unit trusts, management of data processing services, or similar activity) for the purpose of calculating the capital requirement, Romanian credit institutions must apply a risk weight of 1.250% to the greater of the following: (1) the amount of qualifying holdings in excess of 15% of eligible capital; or (2) the total amount of qualifying holdings that exceed 60% of the eligible capital of the institution (NBR Regulation No. 5/2013 on prudential requirements for credit institutions and Regulation No. 575 of the European Parliament and of the Council of June 26, 2013, on prudential requirements for credit institutions and investment firms and amending Regulation (EU) No. 648/2012 (Capital Requirements Regulation)). Total investments outside the financial sector may not exceed 60% of a bank’s own capital (Regulation No. 575 of the European Parliament and of the Council of June 26, 2013, on prudential requirements for credit institutions and investment firms and amending Regulation (EU) No. 648/2012 (Capital Requirements Regulation)). Banks may not acquire shares in a nonfinancial entity, either resident or nonresident, if that results in control over that entity. In addition, NBR approval is needed if a bank intends to acquire a qualifying holding in a financial entity outside the EU, if this entity will be included in the scope of the bank’s prudential consolidation (Government Emergency Ordinance No. 99/2006 regarding Credit Institutions and Capital Adequacy, approved by Law No. 227/2007, as amended).

In banks by nonresidents

Yes. Advance NBR notification is required for investments by residents or nonresidents of 10% or more in a bank’s capital. The NBR may oppose the acquisition within (generally) 60 working days of notification.

Open foreign exchange position limits

Yes. Foreign exchange risk capital requirements are included in Regulation (EU) No. 575/2013 on prudential requirements for credit institutions and investment firms and amending Regulation (EU) No. 648/2012. This regulation is directly applicable across the EU and supersedes the previous (NBR-NSC Regulation No. 22/27/2006) on capital adequacy of credit institutions and investment firms (repealed with effect from January 1, 2014) which included provisions on capital requirements for foreign exchange risk and foreign exchange position limits. Article 351 of Regulation (EU) No. 575/2013 requires banks whose overall net foreign exchange position exceeds 2% of their own funds to calculate capital requirements for foreign exchange risk.

On resident assets and liabilities

Yes.

On nonresident assets and liabilities

Yes.

Provisions specific to institutional investors

Yes.

Insurance companies

Yes. Insurance/reinsurance companies are licensed and supervised under the Law No. 237/2015 on the authorization and supervision of the business of insurance and reinsurance, which transposes the European Union Directive (EC) No. 2009/138 on the taking-up and pursuit of the business of Insurance and Reinsurance (Solvency II).
with subsequent completions. The regulatory framework is completed by the European Commission’s Regulations (Commission Delegated Regulation 2015/35 and all the other Regulations laying down implementing/regulatory technical standards with regard to different area of the Directive), which are binding in their entirety and directly applicable in all Member States, and by the secondary legislation issued by the Romanian FSA to implement the European Insurance and Occupational Pensions Authority (EIOPA) Guidelines or to regulate other aspects not covered by the legislative acts previously mentioned. Solvency II is a risk-based supervision regime, imposing for the insurance/reinsurance companies to determine their solvency capital requirements (SCR) and minimum capital requirements (MCR) depending on the risks associated to their businesses, using the standard formula provided by the Directive or their own internal models approved by the FSA, and to cover them with eligible own funds. The regulatory framework establishes detailed rules for insurance/reinsurance companies related to their system of governance, classification of own funds in three tiers, eligibility criteria of own funds for covering of SCR, methodologies to calculate technical provisions, etc. The Solvency II regime does not apply to specific insurance companies which fulfill certain conditions (such as gross written premiums under €5 million, technical reserves under €25 million, locally business only, non-underwriting of liability, credit and suretyship risks, etc.). For this category of insurance companies, member states are allowed to impose their own licensing and supervision conditions. In Romania, for this category of insurance companies, the FSA decided to maintain the former supervision regime, with some improvements mainly related to the qualitative requirements (such as those related to system of governance, public disclosure, etc.). Consequently, for the insurance companies falling out the scope of Solvency II regime, there are no significant changes in legal requirements related to available and minimum solvency margin, minimum guarantee fund, methodology to calculate the technical reserves, assets admitted to cover the technical reserves and other quantitative requirements) comparing to those applicable before January 1, 2016, the former provisions being included in the Regulation No. 28/2015 on the operation of supervised insurers in accordance with the national regime. According to Article 24, the categories of assets admitted to cover the technical reserves are: (1) investments: (a) government securities and treasury notes; (b) securities issued by local public administration authorities; (c) bonds and other money and capital market instruments, similar therewith, traded on a supervised market; (d) shares and other variable yield securities, similar therewith, traded on a supervised market; (e) units in UCITS and other investment funds; (f) deposits and current accounts with credit institutions; (g) land and buildings owned by the insurers, except for agricultural land and land located outside the built-up area of localities; (2) receivables: (a) receivables with contractors and intermediaries resulting from direct insurance operations and acceptances in reinsurance; (b) the part of the technical reserves related to contracts ceded in reinsurance, except for the contracts ceded to captive insurers and reinsurers and which do not have a rating granted by at least one of the rating agencies registered or certified according to Regulation (EC) No. 1.060/2009 of the European Parliament and of the Council of September 16, 2009, on credit rating agencies; (c) interest receivable related to the assets admitted to cover the gross technical reserves; (3) other assets: (a) acquisition costs carried forward; (b) available cash. The rules for the diversification of the admitted assets are established in Article 26 as
follows: (1) The insurers may invest maximum: (a) 50% of the gross technical reserves in shares, bonds, and other capital market instruments traded on a regulated and supervised market, as well as units with UCITS and other investment funds in compliance with the provisions of Letter b); (b) 5% of the gross technical reserves in shares and other negotiable securities treated as shares, bonds, debt securities, and other money or capital market instruments, as well as units with UCITS and other investment funds issued by the same entity; (c) 20% of the gross technical reserves in land and buildings, in compliance with the provisions of Letter d) and of Article 24(4); (d) 10% of the gross technical reserves in one land or building or in a number of plots of land or buildings sufficiently closely located so as to be considered a single investment; (e) 90% of the gross technical reserves in deposits and available funds with credit institutions, but not more than 20% of the gross technical reserves in a single credit institution; (f) 3% of the gross technical reserves in cash; (g) 5% of the part of the technical reserves related to the contracts ceded in reinsurance to insurers/reinsurers that do not have a rating granted by at least one of the rating agencies registered or certified according to Regulation (EC) No. 1.060/2009. (2) In the case of the categories of assets admitted to cover the gross technical reserves, other than those referred to in Paragraph (1), for which no maximum limits were provided, when investing them, the insurers must comply with the following rules: (a) the assets covering the gross technical reserves must be diversified so that there is no excessive use of a certain category of assets, of an investment market, or of an investment; (b) the investments in certain types of assets posing a high risk either because of the nature of the asset or because of the status of the issuer must be limited to a prudential level; (c) the limits of certain categories of assets must have regard to the treatment of reinsurances in the calculation of the technical reserves; (d) if the assets held represent an investment in a subsidiary that manages in full or in part the insurers’ investments in their name, when applying the provisions of Article 23 (6), Articles 24–26 hereof, and those regarding the categories of gross technical reserves for the insurers pursuing life insurance business provided by the FSA regulations, they must take into account the subsidiary’s assets, the treatment of the assets of other subsidiaries of the insurers being similar.

With the implementation of the Solvency II regime, there are no investment restrictions. The insurance/reinsurance companies invest all their assets in accordance with the “prudent person” principle (in assets and instruments whose risks the company concerned can properly identify, measure, monitor, manage, control, and report; all assets, in particular those covering the MCR and the SCR, must be invested in such a manner as to ensure the security, quality, liquidity, and profitability of the portfolio as a whole and the localization of those assets must be such as to ensure their availability). The absence of regulatory limits on investments does not mean that undertakings can take investment decisions without any regard to prudence and to the interests of policyholders. The requirements of Solvency II and of the Commission Delegated Regulation No. 2015/35 cover extensively some of the main aspects of the prudent person principle, such as asset-liability management, investment in derivatives, liquidity risk management, and concentration risk management. For the insurance companies falling out the scope of Solvency II regime, the FSA Regulation No. 28/2015 provides that the assets that cover gross technical provisions must be placed in Romania. These insurers may invest gross technical provisions in (1) government bonds and treasury bills; (2) debt securities, bonds, and other money and capital market instruments traded in supervised markets; (3) shares and other
variable yield participations traded in supervised markets; and (4) units in UCITS and other investment funds.

With the implementation of the Solvency II regime, there are no investment restrictions. The insurance/reinsurance companies invest all their assets in accordance with the “prudent person” principle (in assets and instruments whose risks the company concerned can properly identify, measure, monitor, manage, control, and report; all assets, in particular those covering the MCR and the SCR, must be invested in such a manner as to ensure the security, quality, liquidity, and profitability of the portfolio as a whole and the localization of those assets must be such as to ensure their availability).

Investment risk management policy – Rule No. 35/2015:
In its risk management policy, the undertaking should cover at least the following information with regard to investments:
(1) the level of security, quality, liquidity, and profitability the undertaking is aiming for with regard to the whole portfolio of assets and how it plans to achieve this;
(2) its quantitative limits on assets and exposures, including off-balance-sheet exposures, that are to be established to help to ensure the undertaking achieves its desired level of security, quality, liquidity, profitability, and availability for the portfolio;
(3) the level of availability the undertaking is aiming for with regard to the whole portfolio of assets and how it plans to achieve this;
(4) consideration of the financial market environment;
(5) the conditions under which the undertaking can pledge or lend assets;
(6) the link between market risk and other risks in adverse scenarios;
(7) the procedure for appropriately valuing and verifying the investment assets;
(8) the procedures to monitor the performance of the investments and review the policy when necessary;
(9) how the assets are to be selected in the best interest of policyholders and beneficiaries.

For the insurance companies falling out the scope of Solvency II regime, the FSA Regulation No. 28/2015 provides that the assets that cover gross technical provisions must be placed in Romania. These insurers may invest gross technical provisions in (1) government bonds and treasury bills; (2) debt securities, bonds, and other money and capital market instruments traded in supervised markets; (3) shares and other variable yield participations traded in supervised markets; and (4) units in UCITS and other investment funds.
liquidity, profitability, and availability for the portfolio;
(3) the level of availability the undertaking is aiming for with regard
to the whole portfolio of assets and how it plans to achieve this;
(4) consideration of the financial market environment;
(5) the conditions under which the undertaking can pledge or lend
assets:
(6) the link between market risk and other risks in adverse scenarios;
(7) the procedure for appropriately valuing and verifying the
investment assets;
(8) the procedures to monitor the performance of the investments and
review the policy when necessary;
(9) how the assets are to be selected in the best interest of
policyholders and beneficiaries.
For the insurance companies falling out of the scope of Solvency II
regime, the FSA Regulation No. 28/2015 provides the following
maximum limits of the investments covering gross technical
provisions: (1) 50% in shares, bonds, and other instruments traded in
a regulated and supervised capital market and in debt securities in
companies for collective investment in securities, according to the
provisions of point (2); (2) 5% in shares and other negotiable
securities treated as shares, bonds, debt certificates, and other money
and capital market instruments and in debt securities in companies
for collective investment in securities issued by the same company;
(3) 20% in land and buildings (agricultural land and land outside
built-up areas may not cover technical provisions); (4) 10% in a
single land or building investment or in multiple land and building
investments close enough together to be considered one investment;
and (5) 90% in deposits and accounts in credit institutions, with no
more than 20% of the gross technical provisions in a single credit
institution. The above maximum limits apply to the total value of the
technical gross provisions and are similar for life and non-life
activity. For both non-life-insurance and life insurance activity, the
assets covering the technical provisions must be evaluated on a
prudential basis, taking into account the minimum between the book
value and the market value. If a certain asset does not have rules
regarding maximum limits, the FSA may restrict the use of that asset.

Currency-matching regulations on
assets/liabilities composition

Yes.
from the currency resulting from the implementation of the procedures mentioned in this article, the insurers’ commitments may be paid in that currency. (7) The insurers may choose not to cover the technical reserves with matching assets if the implementation of the procedures provided by this article results in their obligation to keep the assets in a currency not exceeding 7% of the assets expressed in other currency, to comply with the principle of matching assets. (8) If the commitments may be paid in a currency of a third country, if the investments in such currency are regulated, if the currency is subject to transfer restrictions or if, for similar reasons, the currency is not appropriate to cover technical reserves, the insurers do not have the obligation to comply with the principle of matching assets. (9) The insurers may hold assets that are not matching to cover an amount not exceeding 20% of their obligations in a certain currency.

Pension funds

Yes. Pension funds are governed by Law No. 411/2004 regarding privately administered pension funds, as amended, and Law No. 204/2006 on voluntary pension funds, as amended. The Private Pensions Guarantee Fund was established under Law No. 187/2011 to guarantee the rights of members and beneficiaries of the private pension system. Annual contributions that private pension funds’ management companies make to the Private Pensions Guarantee Fund are computed based on provisions of Norm No. 2/2013. As a first measure for guaranteeing the rights of members and beneficiaries, privately administered pension fund management companies are required to establish a technical provision based on the provisions of Norm No. 13/2012. The market regulator is The FSA–The Private Pensions Sector, formerly known as the Private Pension System Supervisory Commission.

Limits (max.) on securities issued by nonresidents

Yes. Laws and other regulations do not set different limits on securities issued by residents and nonresidents from the EU or the EEA. Some regulations refer to specific securities issued by countries that are not EU or EEA members traded on regulated markets in Romania, EU members, and EEA countries. There are general rules for portfolio diversification. Under the primary law provisions (Article 25 of Law No. 411/2004 and Article 87 of Law No. 204/2006) and secondary legislation (Norm No. 11/2011 on the investment and evaluation of private pension fund assets, as amended), the assets of pension funds may be invested in (1) money market instruments up to 20% with the following sublimits: (a) current accounts in lei or foreign currency in banks authorized to operate in Romania, EU members, or EEA countries up to 5%; (b) bank deposits in lei or foreign currency in banks authorized to operate in Romania, EU members, or EEA countries up to 20%; (c) treasury bills traded on regulated markets or on a secondary market in Romania, EU members, or EEA countries up to 20%; (d) reverse repo agreements with credit institution counterparties up to 5%; (2) government bonds (including treasury bills designated in (1) (c)) issued by the MPF, EU members, or EEA countries up to 70%; (3) municipal bonds and other securities issued by local authorities in Romania, EU members, or EEA countries and traded on regulated markets in Romania, EU members, or EEA countries up to 30%; (4) securities traded on regulated markets in Romania, EU members, or EEA countries up to 50% with the following sublimits: (a) shares and rights traded on regulated markets in Romania, EU members, or EEA countries up to 50%; (b) corporate bonds, except those that embed derivatives up to 30%; (5) government bonds issued by countries that are not EU or EEA members, traded on regulated markets in Romania, EU members, or EEA countries up to 15%; (6) municipal bonds and other securities issued by local authorities of countries that are not EU or EEA members, traded on regulated markets in Romania, EU members, or
EEA countries up to 10%; (7) bonds issued by the World Bank, EBRD, and EIB and traded on regulated markets in Romania, EU members, or EEA countries up to 15%; (8) bonds issued by foreign nongovernmental institutions, except as indicated in (7) traded on regulated markets in Romania, EU members, or EEA countries up to 5%; (9) UCITS including exchange-traded funds in Romania or EU members up to 5%; and (10) exchange-traded commodities and non-UCITS traded on regulated markets in Romania, EU members, or EEA countries up to 3%.

In addition, Emergency Government Ordinance No. 38/2019 introduced the possibility for the assets of privately administered pension funds to be invested:

(1) in shares and bonds of public private partnerships issued in accordance with Emergency Government Ordinance No. 39/2018 regarding public private partnerships or in infrastructure investment funds up to 15%;

(2) financial instruments traded on regulated markets and issued by real estate investment funds or companies undertaking real estate activities such as real estate development or marketing, purchasing and selling own real estate, letting and sub-letting activities, and facility management up to 3%;

(3) private equity shares or bonds issued by companies in Romania, EU members or EEA countries or units issued by private equity funds from EU members or EEA countries up to 10%.

According to Norm No. 19/2012 amending Norm No. 11/2011, investment limits for private pension funds were tightened as follows: Pension funds may invest in (1) up to 10% of total shares (ordinary and preferred) of a single issuer; (2) up to 10% of the preferred shares of a single issuer; (3) up to 25% of shares and units issued by UCITS, exchange-traded funds, non-UCITS, or exchange-traded commodities; and (4) up to 10% of total bonds of a single issuer, except government bonds. As secondary legislation, the Private Pension System Supervisory Commission issued Norm 19/2012, which modified and completed Norm No. 11/2011, regarding the investment of pension funds’ assets, the valuation of fixed-income securities (mark to market), and the general investment activity.

Laws and other regulations do not set different limits on securities held abroad or locally, issued by residents or nonresidents. Some provisions of Norm No. 11/2011 refer to limits for specific securities issued by countries that are not EU or EEA members (third countries) traded on regulated markets in Romania, EU members, and EEA countries.

There are no maximum limits on investment portfolio held abroad set...
**held abroad**

by Law No. 126/2018 on Markets in Financial Instruments, GEO No. 32/2012 as further amended and supplemented, and Law No. 74/2015 as further amended and supplemented) or by FSA regulations for investment firms or collective investment schemes (UCITS and non-UCITS).

**Limits (min.) on investment portfolio held locally**

No.

There are no minimum limits set by the capital market laws (Law No. 126/2018 on Markets in Financial Instruments, GEO No. 32/2012 as further amended and supplemented, and Law No. 74/2015 as further amended and supplemented) or by ASF/NSC regulations for investment firms or collective investment schemes (UCITS and non-UCITS).

**Currency-matching regulations on assets/liabilities composition**

No.

There are no relevant regulations for investment firms or collective investment schemes.

**Changes during 2018 and 2019**

**Exchange Arrangement**

**Classification**

Stabilized arrangement 01/25/2018

From January 2018 the exchange rate stabilized within a 2% band against the euro, with one realignment in January 2019. Therefore, the de facto ER arrangement was reclassified to stabilized from crawl-like.

Crawl-like arrangement 01/01/2018

From July 2016, the leu followed a depreciating trend within a narrow 2% band against the euro. Therefore, the de facto ER arrangement was reclassified retroactively to crawl-like from floating, effective July 22, 2016. The change is reflected as of January 1, 2018, corresponding to the first day of the period covered in this year’s Annual Report on Exchange Arrangements and Exchange Restrictions.

**Provisions Specific to the Financial Sector**

**Provisions specific to commercial banks and other credit institutions**

Lending locally in foreign exchange 01/01/2019

National Bank of Romania Regulation No. 17/2012 provides for an aggregate Debt-service-to-income (DSTI) ceiling of 40% of which the maximum DSTI for loans denominated or indexed in a foreign currency granted to debtors exposed to foreign exchange risk is 20%. The regulation provides also for an exemption from the maximum level of the aggregate DSTI, under certain conditions, for up to 15% of the loans granted by a creditor.

**Provisions specific to institutional investors**

Pension funds

**Limits (max.) on securities issued by nonresidents** 09/19/2019

Emergency Government Ordinance No. 38/2019 introduced the possibility for the assets of privately administered pension funds to be invested:

1. in shares and bonds of public private partnerships issued in accordance with Emergency Government Ordinance No. 39/2018 regarding public private partnerships or in infrastructure investment funds up to 15%;

2. financial instruments traded on regulated markets and issued by real estate investment funds or companies undertaking real estate activities such as real estate development or marketing, purchasing and selling own real estate, letting and sub-letting activities, and...
facility management up to 3%;
(3) private equity shares or bonds issued by companies in Romania, EU members or EEA countries or units issued by private equity funds from EU members or EEA countries up to 10%.

In accordance with UNSC resolutions and Russian legislative acts, restrictions have been imposed on current international transactions for reasons of national and international security with respect to the following organizations and countries:

1. Al-Qaida and the Taliban movement, and the Islamic State of Iraq and the Levant (ISIL, Da’esh) (freezing without delay of the funds and other financial assets of organization members, prohibition against all operations); 
2. the Democratic Republic of the Congo (freezing of financial assets); 
3. Somalia (freezing of financial assets and ban on financial assistance).

Other security restrictions Yes.

Certain commercial and financial transactions with the Central African Republic and the Democratic Republic of the Congo are prohibited.

Restrictions with regard to Eritrea were lifted by UNSC Resolution No. 2444 (2018). Russian Federation Presidential Decree No. 348 of July 22, 2019, on the Repeal of Certain Provisions of Russian
Federation Presidential Decree No. 933 of July 22, 2010, on Measures to implement UNSC Resolution No. 1907 of December 23, 2009, was adopted. BR Letter No. IN-014-12/1 of January 16, 2019, on the Update of the Sanctions List of the UNSC Committee on Libya, and on the UNSC Resolution Regarding Eritrea, was published.

<td>Floating</td>
<td>Yes. The de jure and de facto exchange rate arrangements are free floating. Under this arrangement, the exchange rate of the ruble is determined by market factors. Following the transition to the free floating exchange rate arrangement, the BR retained the ability to intervene in the domestic foreign exchange market in the event of threats to financial stability. BR information about the frequency and volumes of the BR’s foreign currency interventions is posted on the BR’s website under the “Liquidity of the banking sector and monetary policy instruments”</td>
</tr>
</tbody>
</table>
subsection of the “Statistics” section.
Since 2017, the MOF implemented a new mechanism of foreign exchange purchases and sales to enhance the stability and predictability of local economic conditions and to reduce the impact of price volatility in the global energy market on Russia’s economy and public finance (budget rule). Trade volumes depend on the amount of oil and gas revenues of the federal budget. As long as the actual Urals price exceeds the benchmark oil price of US$40/bbl (in real terms, adjusted for US inflation), the MOF should purchase, through the BR, foreign exchange in the amount of additional oil and gas revenues. If the actual prices drop below this level, the MOF should sell foreign exchange in the amount of the resulting shortfall of oil and gas revenues. It was specified that the cumulative (from the beginning of operations) foreign exchange sales volumes should not exceed the cumulative purchase volumes. The size of these operations should be announced at the start of every month and purchases should be evenly distributed within the month. Effective January 1, 2018, only the current exchange rate is used to calculate the amount of foreign exchange purchase/sales. Previously the amount of foreign exchange purchases/sales took into account the difference between the current and budgeted exchange rates. Effective January 1, 2018, the condition that restricted the cumulative (from the beginning of operations) foreign exchange sales volumes not to exceed the cumulative purchase volumes was eliminated.

From mid-August to end-2018, the BR suspended the purchase of foreign exchange under the budget rule with the aim of limiting exchange rate volatility and associated risks to financial stability. In comments on August 10, 2018, the BR reported that it could make an adjustment in the daily volume of foreign exchange purchased in the currency market through implementation of the budget rule mechanism. Effective August 23, 2018, the BR announced the suspension of foreign exchange purchases until end-September 2018, and effective September 14, 2018, it announced the suspension of foreign exchange purchases until end-2018. Effective December 14, 2018, the BR Board of Directors decided to resume purchases starting from January 15, 2019. It was announced that deferred purchases could be performed gradually throughout 2019 and subsequent years (these purchases began on February 1, 2019, and it is assumed that they will be carried out regularly over 36 months). The foreign exchange purchase program is preannounced, is predictable, involves small daily amounts, and is not triggered by an exchange rate level.

Data on operations involving the purchase (sale) of foreign exchange performed by the BR on instructions from the Russian Ministry of Finance are published on the official website of the Bank of Russia on a daily basis in the Factors Affecting Banking Sector Liquidity table (under the column Operations of the Russian Ministry of Finance Involving the Purchase (Sale) of Foreign Exchange in the Domestic Exchange Market).

The BR establishes official exchange rates for a number of foreign currencies against the ruble. These rates may be used in calculating state budget revenues and expenditures for payments and settlements by state administrative agencies with businesses, organizations, and individuals and for taxation and accounting. Regulation of the use of the official exchange rates of foreign currencies against the ruble for various purposes, including the areas of their mandatory use, is not within the BR’s purview. Official exchange rates are set every business day and take effect the next calendar day. Information on official rates is published on the
BR’s website the day they are set and in the next edition of the BR Bulletin. The official rate for each currency applies until the next official rate becomes effective. The official US dollar–ruble exchange rate is calculated on the basis of quotes for this currency pair in the domestic interbank foreign exchange market. The calculation of official rates for other foreign currencies against the ruble is based on quotes of these currencies against the US dollar in the global market and the official exchange rate of the US dollar and the ruble.

**Monetary policy framework**

Exchange rate anchor

- *U.S. dollar*
- *Euro*
- *Composite*
- *Other*

Monetary aggregate target

Inflation-targeting framework Yes. The BR is pursuing monetary policy within an inflation-targeting framework. The principal objective of the monetary policy is to ensure price stability, which means achieving a low inflation rate and keeping inflation consistently low.

**Target setting body**

Yes.

Government

Central Bank

- *Monetary Policy Committee*
- *Central Bank Board*
- *Other*

Government and Central Bank Yes. The inflation target (its level and type) is established in the Key Elements of the Uniform State Monetary Policy, which are drafted by the BR and presented to the Russian Federation government and the State Duma of the Russian Federation for consideration.

**Inflation target**

Yes.

**Target number**

Yes.

**Point target**

Yes. A medium-term target was set for bringing inflation down to 4% in 2017 and keeping it close to this level in the future.

**Target with tolerance band**

Yes. The inflation target is set on the basis of the consumer price index calculated by Rosstat, reflecting the rate of growth in consumer prices in relation to the corresponding month of the previous year.

**Band/Range**

Yes. The consumer price index measures the change over time of the cost of a consumer basket – a set of food, non-food items and services consumed by the average household.

**CPI**

Yes. The consumer price index measures the change over time of the cost of a consumer basket – a set of food, non-food items and services consumed by the average household.
The BR does not set specific dates or time periods when the achievement of the inflation target is assessed, but strives to ensure that annual inflation is near 4% on an ongoing basis.

The main monetary policy rate (the key rate) is set by the BR Board of Directors. This rate corresponds to the minimum interest rate at the BR 1-week repo auctions and the maximum interest rate at the BR 1-week deposit auctions. Under the BR operating procedure, the aim is for the one-day rate in the interbank credit market to be close to the key rate.

Reporting on inflation targets is not done in the form of open letters. The Chairman of the BR presents to the State Duma the Annual Report of the BR and Key Elements of the Uniform State Monetary Policy.

Reporting on the achieving of inflation targets is also done in the Monetary Policy Report. The main channels for presenting information on monetary policy are the official website of the BR (press releases, publications, including quarterly issues of the Monetary Policy Report, the Key Elements of the Uniform State Monetary Policy, and the Annual Report of the BR), as well as public speeches by the BR management, including regular press conferences on the results of meetings of the Board of Directors of the BR and comments on certain topics in the media.

The minutes of meetings of the Board of Directors of the BR are not published on the official website of the BR. Following the meetings of the Board of Directors of the BR, an official statement of the key rate is published (at 1:30 p.m. on the same day Moscow time). After supporting (quarterly) meetings, press conferences are held with the participation of the Chairman of the BR and a new issue of the Monetary Policy Report is published.

The publication of inflation forecasts is made quarterly (Report on Monetary Policy).

Pursuant to Federal Law No. 86-FZ of July 10, 2002, on the Central Bank of the Russian Federation, the BR licenses credit institutions to handle banking transactions (Paragraph 8 of Article 4). Branches may handle all or some of the banking operations (including purchase and sell foreign exchange cash) that are provided for under the banking license of the credit institution (or the regulation on the branch) and delegated to them. Internal structural subdivisions that purchase and sell foreign exchange cash must also handle other transactions.
delegated to them by the credit institution. Operations with foreign exchange cash are performed in accordance with relevant BR regulations. Pursuant to Articles 8.8 and 8.9 of the BR Regulation No. 135-I of April 2, 2010, basic and universal banking licenses allow credit organizations to carry out operations in foreign currency. As of December 31, 2018, the number of credit institutions (other than branches) licensed to perform banking operations in foreign exchange was 517 banks and 44 nonbank credit institutions.

**Operated by the central bank**

Yes.

**Foreign exchange standing facility**

Yes. Foreign exchange swap operations involving the sale of US dollars for rubles may be performed. Interest rates are set at the key rate minus 1.00 percentage point (pp) for the ruble side of the transaction and LIBOR +1.50 percentage points (pps) a year for the foreign exchange side. Information about the parameters is posted on the BR’s website.

**Allocation**

No.

**Auction**

Yes. To supply Russian credit institutions with foreign currency, there are 1-week, 28-day, and 12-month repo auctions in US dollars and euros (the possibility of holding 12-month repo auctions was suspended as of April 1, 2016); the BR applies the minimum interest rates on these operations. The spreads with respect to the LIBOR rate for 1-week and 28-day repo operations are 2 pps. The BR has not performed the relevant operations since October 2017. Furthermore, the BR does not perform credit auctions in connection with the expiration of the given mechanism. The maximum debt of credit institutions to the BR under repo operations in foreign currency in 2019 has been set at US $15 billion.

**Fixing**

No.

**Interbank market**

Yes. The interbank market operates on the Moscow Exchange Open Joint-Stock Company and over the counter. As of December 31, 2018, 246 credit institutions had foreign currency claims on interbank loans, including repo operations; 114 credit organizations had debts on interbank loans, including repo, in foreign currency, 532 credit organizations had claims on correspondent accounts (nosto) in foreign currency, and 139 credit organizations had liabilities for correspondent accounts (loro) in foreign currency. BR currency interventions are carried out on the basis of the market rate. There are no restrictions on the spread between the exchange rates of buyers and sellers or on the commissions of market participants.

**Over the counter**

Yes.

**Brokerage**

Yes. As of December 31, 2018, there were 44 banks and 51 noncredit financial institutions performing brokerage activities in the foreign exchange section of the Moscow Stock Exchange Public Joint-Stock Company. As of July 24, 2019, there were 43 banks and 50 noncredit financial institutions performing brokerage activities in the foreign exchange section of the Moscow Stock Exchange Public Joint-Stock Company. The data presented take into account the definition of broker and brokerage activity as provided in Article 3 of Federal Law No. 39-FZ of April 22, 1996, on the Securities Market: “Brokerage activity is activity involving the execution of an order from a customer (including an issuer of issue-grade securities at the time of their placement) to conclude civil-legal transactions with securities and/or to conclude contracts that are derivative financial instruments, carried out on the basis of contracts with the customer for which a
fee is charged (referred to hereinafter as a brokerage service contract)."

“A professional participant in the securities market who performs brokerage activity is called a broker.”

There were 14 credit institutions and 5 noncredit financial institutions with market-making status in the Moscow Exchange Open Joint-Stock Company foreign exchange section as of December 31, 2018. As of July 24, 2019, there are 13 banks and 3 noncredit financial institutions with market-making status in the foreign exchange section of the Moscow Stock Exchange Public Joint-Stock Company.

Forward transactions are concluded by authorized banks. Trading in futures contracts is performed in currency exchanges, with most trading concentrated in the Moscow Exchange Open Joint-Stock Company.

The BR does not participate in the domestic currency derivatives market, but it does use swap transactions to provide ruble and foreign exchange liquidity. Under Russian securities market laws, one-day currency swap transactions by the BR are not considered financial derivatives.

Official cover of forward operations

No.

### Administration of control

Yes. The BR’s functions include the enforcement of foreign exchange control regulations, supervision and monitoring of operations by authorized banks, and regulation of banks’ open foreign exchange positions. In addition to the BR, federal executive government authorities (as authorized by the government and within the limits of their jurisdiction) exercise control over foreign exchange operations, except those performed by credit institutions and noncredit financial institutions performing the types of activities indicated in Federal Law No. 86-FZ of July 10, 2002, on the Central Bank of the Russian Federation (BR).

### Payments arrears

No.

### Official

No.

### Private

No.

### Controls on trade in gold (coins and/or bullion)

Yes. Information on transactions with precious metals and precious stones subject to obligatory control in accordance with the requirements of Russian legislation on combating money laundering and the financing of terrorism must be reported to the Federal Financial Monitoring Service (Rosfinmonitoring).

### On domestic ownership and/or trade

No. Residents (including banks) must be licensed by the Ministry of Industry and Trade to export gold. Banks also must be licensed by the BR to conduct transactions in precious metals to export gold.

### On external trade

Yes. Foreign and domestic banknotes may be exported and imported by residents and nonresidents in accordance with procedures established by law. A uniform procedure has been established for imports into and exports from Russia of both foreign and domestic currency by residents and nonresidents.

### Controls on exports and imports of banknotes

No. Resident and nonresident individuals may export rubles from the customs territory of the Customs Union (Armenia, Belarus, Kazakhstan, the Kyrgyz Republic, and Russia) without limitation. For single exports of domestic currency exceeding the equivalent of US$10,000, a written customs declaration is required indicating the total amount being exported. Single exports of rubles by resident and nonresident legal entities must be declared in writing to the customs authorities.

### Domestic currency

No. Resident and nonresident individuals may export foreign exchange cash from the customs territory of the Customs Union (Armenia, Belarus, Kazakhstan, the Kyrgyz Republic, and Russia) without limitation. For single exports of foreign exchange cash exceeding the equivalent of US$10,000, a written customs declaration is required indicating the total amount being exported. Single exports of foreign currency by resident and nonresident legal entities must be declared in writing to the customs authorities.

### On exports

No.

### Foreign currency

No. Resident and nonresident individuals may import rubles into the customs territory of the Customs Union (Armenia, Belarus, Kazakhstan, the Kyrgyz Republic, and Russia) without limitation. For single imports of domestic currency exceeding the equivalent of US$10,000, a written customs declaration is required indicating the total amount being imported. Single imports of rubles by resident and nonresident legal entities must be declared in writing to the customs authorities.

### On imports

No.
Resident and nonresident individuals may import foreign exchange cash into the customs territory of the Customs Union (Armenia, Belarus, Kazakhstan, the Kyrgyz Republic, and Russia) without limitation. For single imports of domestic currency exceeding the equivalent of US$10,000, a written customs declaration is required indicating the total amount being imported.

Single imports of foreign currency by resident and nonresident legal entities must be declared in writing to the customs authorities.

This information can be found at the AREAER ONLINE database: http://www.elibrary-areaer.imf.org/Pages/Reports.aspx.

Resident Accounts

Foreign exchange accounts permitted: Yes.

- Held domestically: Yes.

Residents may open foreign exchange accounts with authorized banks without restriction and perform foreign exchange operations on such accounts in accordance with the foreign exchange legislation.

Foreign exchange accounts for residents are opened, maintained, and closed following the same procedure as for domestic currency accounts opened by authorized banks on the basis of a bank account or deposit agreement.

Accounts of residents in foreign currency opened with authorized banks may be used for any operations, with the exception of operations in foreign currency between residents that are not listed in Article 9 of Federal Law No. 173-FZ.

Residents may transfer funds from their accounts (deposits) at authorized banks to their own accounts opened at banks outside Russia without restriction.

- Approval required: No.

- Held abroad: Yes.

Residents, except as indicated under Federal Law No. 79-FZ of May 7, 2013, on Prohibiting Certain Categories of Persons from Opening and Maintaining Accounts (Deposits) and Holding Cash and Valuables at Foreign Banks Located Outside the Territory of the Russian Federation and Holding and/or Using Foreign Financial Instruments, may without restriction open accounts (deposits) in foreign currency and in rubles at banks abroad. Federal Law No. 79-FZ of May 7, 2013, concerns public servants.

Residents must notify the tax authorities where they are registered of the opening and closing of these accounts and of any change in account details no later than one month after opening or closing or change in account details, and they must also file reports on the movement of cash on accounts abroad.

Resident authorized banks licensed to engage in ruble and foreign exchange transactions may maintain correspondent accounts with nonresident banks. They may also open accounts with nonresident banks to service the activities of their representative offices abroad, subject to notification requirements. Foreign branches of authorized banks may freely maintain accounts with nonresident banks subject to the permission of the parent bank.

Pursuant to Federal Law No. 92-FZ of May 1, 2017, on Amending Certain Legislative Acts of the Russian Federation, two types of banks were defined: those with a basic license and those with a universal license. A bank with a basic license is not permitted to open bank (correspondent) accounts at foreign banks, with the exception of the opening of an account at a foreign bank for the purpose of participating in a foreign payment system. A bank with a universal license that has obtained the status of a bank with a basic license or
that has changed its status to that of a nonbank credit institution, or a bank with a basic license that has changed its status to that of a nonbank credit institution, is required to abrogate a bank (correspondent) account agreement with a foreign bank within one year of the date such status is acquired. This restriction does not apply to cases in which an account is opened at a foreign bank for the purpose of participating in a foreign payment system.

Residents may transfer to their accounts with banks outside Russia funds from their accounts with authorized banks or from other accounts with banks abroad. Residents’ transfers of funds to their accounts with banks outside Russia from their accounts with authorized banks require, at the time of the first transfer, presentation to the authorized bank of the notification provided to the tax authority where the resident is registered and acknowledgment of receipt of that notification.

Effective January 1, 2018, any types of foreign exchange transactions on accounts (deposits) opened with banks abroad are allowed between residents that stay outside the territory of the Russian Federation in the aggregate for more than 183 days in a calendar year.

If resident individuals are abroad in the aggregate for more than 183 days in a calendar year, then they are exempted for the period of their stay abroad from submitting a notice to the tax authority. When returning to Russia (if the period of the stay abroad in the aggregate was less than 183 days in a calendar year), such an individual must notify the tax authority of accounts abroad before June 1 of the year following the reporting year and must also submit to tax authorities with which he is registered reports on the movement of funds on accounts (deposits) at banks located outside the Russian Federation.

Effective January 1, 2018, the requirement that individuals, at the time of the first transfer of funds to their accounts opened at banks outside Russia from their accounts at authorized banks, must present to the authorized bank the notification of the opening of the account provided to the tax authority where the resident is registered and acknowledgment of receipt of that notification by the tax authority was lifted. Residents’ accounts at banks outside Russia may be credited with interest earned on the balance of such accounts, as well as a minimum deposit required by respective bank while opening an account (deposit), cash placed in an account (deposit), and funds received as a result of conversion operations using funds credited to such accounts (deposits), as well as funds received as a result of the following: (1) if funds in rubles are transferred from the account of another resident in Russia and if funds in rubles are transferred from the account of another resident abroad; (2) transfers in connection with execution of the Russian budget; (3) transfers for carrying out the activities of Russian diplomatic missions, consulates, and other official offices abroad and of permanent missions to interstate or intergovernmental organizations; (4) transfers of foreign currency by a Russian resident to another resident’s account abroad that do not exceed in one business day through one authorized bank the equivalent of US$5,000 at the official RUB exchange rate on the date the funds are debited; (5) transfers for settlements between transportation entities and individuals abroad, as well as with branches, representative offices, and other subdivisions of legal entities, under passenger transportation agreements; (6) transfers by residents from their accounts with authorized banks to accounts of related residents (spouse or close relative—direct forebear or descendant; parent, child, brother, sister, grandparent, grandchild, full-blooded or half-blooded, with a common father or mother, adoptive parent, adopted child) opened with authorized banks or with
banks abroad; (7) transfers of foreign exchange from accounts with authorized banks to the accounts of Russian diplomatic missions, consulates, and other official representative offices abroad and to the accounts of permanent Russian missions to interstate or intergovernmental organizations by federal executive branch authorities through their representatives or representative offices and by entities authorized to use those accounts for the payment of wages and other payments for maintenance of their representatives or personnel of their representative offices abroad and for payment of business travel expenses; (8) settlements with resident individuals abroad, with the branches, representative offices, and other subdivisions of legal entities established under Russian law, as well as with nonresident individuals, under contracts for the transportation of passengers, and settlements in foreign exchange and rubles by resident individuals abroad and with nonresident individuals, under contracts for the transportation of freight by individuals for personal, family, household, and other noncommercial needs; (9) wages paid and other payments made to resident individuals related to the performance of their official duties outside Russia under labor agreements (contracts) with nonresidents, and in the form of payment for and/or reimbursement of expenses incurred by such resident individuals in connection with official business travel abroad; (10) payments to individuals in accordance with rulings of courts of foreign states, with the exception of decisions by international commercial arbitration bodies; (11) payments of pensions, scholarships, child support, and other payments of a social nature to individuals; (12) insurance payments to individuals effected by nonresident insurers; and (13) payments made in the process of returning funds previously paid by resident individuals, including the return of funds transferred in error, the refunding of money for a product previously purchased by a resident individual from a nonresident and subsequently returned, or for a service for which a nonresident was paid by a resident; (14) a gift of foreign exchange assets to a spouse or close relatives.

Funds may also be credited to residents’ accounts opened with banks abroad as follows: (1) Foreign currency may be credited to accounts of resident legal entities or third parties to fulfill their obligations under credit facilities and loan agreements with nonresident agents of foreign governments and under credit facilities and loan agreements with residents of OECD and FATF member countries for a period exceeding two years. (2) Nonresident contractors may pay the local expenses of residents in connection with the construction of properties in foreign countries; remaining funds must be transferred to residents’ accounts with authorized banks. (3) Foreign currency obtained by residents from exhibitions and sports, cultural, and other similar events abroad must be used to cover expenses of such events for the duration of the event. (4) Foreign currency proceeds must be credited to the accounts of resident transportation entities with banks abroad for payment of aerial navigation, airport, and port fees and other fees in foreign countries; expenses associated with the servicing of air, river, and seacraft and other vehicles of such transportation entities and their passengers abroad; and expenses for the activities of branches, representative offices, and other offices of such transportation entities abroad.

The foreign currency from items (1) and (3) above credited to the accounts of residents or third parties with banks abroad must be used to meet the residents’ obligations as specified under said items or transferred to accounts with authorized banks.

In addition to the funds referred to above, the following funds received from nonresidents may be credited to accounts opened by
resident individuals at banks in OECD or FATF member countries: (1) income from the leasing (or subletting) of the resident individual’s real estate or other property located outside Russia to nonresidents; (2) funds paid in the form of accumulated interest (coupon) income provided for under the terms of an issue of foreign securities belonging to a resident individual, as well as other income on foreign securities (dividends, payments on bonds and bills, and payments when there is a reduction in the authorized capital of an issuer of a foreign security); (3) funds paid to a resident individual in the form of income earned from the placement of funds and/or securities in trust with a nonresident trust manager.

Effective January 1, 2018, the following funds may also be credited to accounts of resident individuals opened at banks of OECD or FATF member countries: (1) those received by a resident individual from a nonresident as a result of the sale of a vehicle owned by the resident individual to the nonresident under a purchase and sale agreement outside Russia; (2) those received by a resident individual from a nonresident as a result of the sale of real estate owned by the resident individual outside the territory of Russia to the nonresident under a purchase and sale agreement, provided such real estate is registered (located) in the territory of a foreign state that is a member of the OECD or FATF, and such foreign state has joined the Multilateral Competent Authority Agreement on Automatic Exchange of Financial Account Information of October 29, 2014, or has another international agreement with the Russian Federation providing for the automatic exchange of financial information, and at the same time an account (deposit) of the resident individual has been opened at a bank located in the territory of such foreign state.

Effective January 1, 2018, the following funds may also be credited to accounts of residents abroad: (1) foreign currency received under operations between resident individuals who have spent a total of more than 183 days in a calendar year outside the Russian Federation, which are performed outside the Russian Federation; (2) those returned as taxes by the competent authorities of the state visited by the resident.

Effective March 18, 2018, the following funds may also be credited to accounts of residents abroad: those received as wages and other payments in foreign currency outside the Russian Federation by resident individuals under labor agreements with resident legal entities providing for the performance by such resident individuals of their official duties outside the Russian Federation;

Effective September 1, 2018, funds received under operations related to the inheritance of foreign exchange assets and the transfer of foreign exchange assets by an estate to beneficiaries of the estate may also be credited to accounts of residents abroad.

Nonresident Accounts

Foreign exchange accounts permitted Yes. Nonresidents have the right to open bank accounts (bank deposits) in foreign currency at authorized banks within Russia. They may carry out any operations on their accounts in foreign currency and in Russian rubles. Nonresidents have the right without restriction to transfer foreign currency from their bank accounts (bank deposits) at authorized banks to their own accounts (deposits) at banks abroad. Effective January 3, 2018, BR Regulation No. 181-I of August 16, 2017, replaced Regulation No. 138-I of June 4, 2012, which, among other things, abolished the requirement for transaction passports and established the procedure for registering foreign trade contracts; reduced the number of documents submitted to authorized banks for currency control; raised the threshold for the amount of obligations for which the contract or loan agreement is subject to mandatory registration. The amount of obligations must be equal to or exceed the equivalent of: 3 million rubles for import contracts or credit agreements and 6 million rubles for export contracts (previously, the threshold amount of obligations under the contract or loan agreement was US$50,000); submission to the authorized bank by residents of the documents related to the conduct of foreign exchange transactions under contracts with nonresidents is no longer required if the amount of obligations is equal to or exceeds 200,000 rubles.

Approval required No.

Domestic currency accounts Yes. Nonresidents may without restriction make transfers of rubles between their accounts and from accounts abroad to accounts at authorized banks or from accounts at authorized banks to accounts abroad or at other authorized banks. Foreign exchange operations between residents and nonresidents with rubles as a means of payment are performed without restriction. Nonresidents, except individuals, in the performance of a foreign exchange operation involving the debiting of rubles from the nonresident’s own bank account opened at an authorized bank in rubles must submit to the authorized bank a settlement document for a foreign exchange operation, indicating (except for certain cases) the code for the type of foreign exchange operation corresponding to the purpose of the payment. Follow-up monitoring of the performance of the aforementioned operations is performed within the context of monitoring residents who are parties to such operations.

Convertible into foreign currency Yes.

Approval required No.

Blocked accounts No.

Imports and Import Payments

Foreign exchange budget No.

Financing requirements for imports Yes.

Minimum financing requirements No.
| Advance payment requirements | Yes. | The requirement concerning the importation of goods into the Russian Federation after a resident has made an advance payment for imports within the deadline established by a foreign trade agreement (contract) is provided for by the foreign exchange legislation of the Russian Federation. Thus, when performing foreign trade activity residents are required, within the deadlines specified by foreign trade agreements (contracts), to either import the goods into the Russian Federation or provide for the return to the Russian Federation of the funds paid to nonresidents as an advance payment. When performing foreign trade activity residents are required to provide information to authorized banks about the deadlines for nonresidents’ fulfillment of obligations under foreign trade agreements (contracts) through the transfer of goods to residents based on the advance payments made by the residents, and the deadlines for the return of said advance payments in accordance with the terms of the foreign trade agreements (contracts). In the event that goods are not imported into the Russian Federation and an advance payment is not returned, this information is forwarded by the authorized bank to the foreign exchange control body (the Russian Federal Customs Service), which applies administrative enforcement measures against the resident for violation of the repatriation requirement. |
| Advance import deposits | No. | |
| Documentation requirements for release of foreign exchange for imports | Yes. | Effective January 3, 2018, submission to the authorized bank by residents of the documents related to the conduct of foreign exchange transactions under any contracts with nonresidents is not required if the amount of obligations under them does not exceed 200,000 rubles. In the case of a contract the obligations under which exceed the equivalent of 200,000 rubles but do not exceed the equivalent of 3,000,000 rubles, when debiting foreign currency from its account a resident must submit to the authorized bank documents related to the performance of the transaction, together with the order to debit the foreign currency. In the case of an import contract the obligations under which are equal to or greater than the equivalent of 3,000,000 rubles, a resident must register the contract with an authorized bank. The following are subject to registration with an authorized bank: (1) agreements, including agency agreements, commission agreements, and trust agreements providing for the importation of goods into the Russian Federation in the performance of foreign trade activity; (2) agreements providing for the purchase and/or performance of services related to the purchase within the Russian Federation (or outside the Russian Federation) of fuel and lubricants (bunker fuel), food, material and technical supplies, and other goods (with the exception of spare parts and equipment) necessary to ensure the operation and maintenance of vehicles, regardless of their type and purpose, en route or at intermediate stopping points or parking areas; (3) agreements, including agency agreements, commission agreements, and trust agreements, with the exception of agreements referred to under (1), (2), and (4), which provide for the performance of work, delivery of services, or the transfer of information and intellectual property, including exclusive rights thereto; (4) agreements providing for the transfer of movable and/or real property under a rental agreement or financial lease agreements (leasing). To register a contract, a resident importer must present to an authorized bank an import contract (excerpt from a contract) containing information needed by the authorized bank for registration. |
of the contract and the performance of foreign exchange control, including oversight of the resident’s compliance with repatriation requirements, as well as other information needed by the authorized bank.

Exports and Export Proceeds

Residents engaged in foreign trade activity must credit to their accounts at authorized banks, within the time periods specified in the foreign trade contracts, funds in foreign currency or rubles due to them under the terms of said contracts for goods delivered to nonresidents, work performed for them, services provided to them, and information or intellectual property transferred to them, including exclusive rights thereto, except when: (1) foreign currency is credited to accounts of resident legal entities or third parties with banks abroad to fulfill the obligations of resident legal entities under credit facilities and loan agreements with nonresident agents of
foreign governments and under credit facilities and loan agreements with residents of OECD or FATF members for a period exceeding two years; (2) nonresident contractors pay the local expenses of residents in connection with residents’ construction of properties abroad, after which remaining funds must be transferred to residents’ accounts with authorized banks; (3) foreign currency obtained from exhibitions and sports, cultural, and other similar events abroad is used for expenses of such events, for the duration of the event; (4) foreign currency is used to offset counterclaims for obligations between (a) resident and nonresident entities that conduct fishing operations abroad and provide services abroad under agency agreements with residents; (b) resident and nonresident transportation entities performing services abroad for residents under agreements with them; or (c) resident and nonresident transportation entities if settlement takes place through specialized entities established by international organizations in the area of international transportation and of which such resident transportation entities are members; (5) foreign currency is used to offset counterclaims for obligations resulting from reinsurance agreements or service agreements connected with reinsurance agreements between nonresidents and resident insurance entities or insurance brokers; (6) foreign currency proceeds are credited to the accounts of resident transportation entities with banks abroad to pay for the expenses of such transportation entities abroad in connection with the payment of aerial navigation, airport and port fees and other mandatory fees abroad; expenses associated with the servicing of air, river, and seacraft and other vehicles and their passengers abroad; and expenses connected with branches, representative offices, and other offices abroad; (7) there is offsetting of counterclaims on obligations arising from agreements concluded between residents engaged in exports of natural gas in the gaseous state and nonresidents that provide for the purchase and sale of natural gas in the gaseous state, and agreements under which nonresidents have obligations to residents in connection with the transit of natural gas in the gaseous state across the territory of foreign states.

Effective April 14, 2018, compliance with the repatriation requirement is not necessary: (1) when a resident provides foreign currency or the currency of the Russian Federation to a nonresident under a loan agreement related to the financing of geological research, exploration, and/or extraction of minerals, a list of which is given in Article 337 of the Russian Federation Tax Code, in the event that said loan agreement contains conditions stating that the repayment of the funds provided depends on the fact and volume of the extraction of minerals and/or the amount of earnings from their sale, and when conditions specified in the loan agreement occur the funds are not repaid; (2) when similar counterclaims under loan agreements between a resident and nonresident are offset, provided the nonresident’s counterclaim arose as a result of the granting of a loan to the resident through the crediting of funds to an account opened by the resident at an authorized bank; (3) when a resident provides foreign currency or the currency of the Russian Federation to a nonresident under a loan agreement related to the financing of investment and/or innovation activity, in the event that when conditions specified in the loan agreement occur the funds are not repaid in the amount of the resident’s investment in the authorized capital, securities, or acquisition of debt liabilities of the same nonresident, or in the event that the funds are not repaid owing to the nonresident’s insolvency (bankruptcy), and in this case the resident must meet one of the following conditions: (a) the resident is a legal entity included in the list of legal entities
providing state support for innovation activity in the forms established by Federal Law No. 127-FZ of August 23, 1996, on Science and State Science and Technology Policy, in accordance with Article 4, part 1.1, paragraph 1, subparagraph (e), of Federal Law No. 209-FZ of July 24, 2007, on the Development of Small and Medium-Sized Business in the Russian Federation:

(b) the resident is a commercial company, at least 50% of the shares in which (equity stakes in the authorized capital of which) are held by legal entities referred to under subparagraph (a) of this paragraph, or it is a commercial company in which legal entities referred to under subparagraph (a) of this paragraph have the right to directly and/or indirectly control at least 50% of the votes attributed to voting shares (equity stakes) comprising the authorized capital of the given commercial company;

(c) the resident is a managing partner of an investment partnership in which the share held by legal entities referred to under subparagraph (a) of this paragraph in the total property of the partners is at least 50%;

(d) the resident is an investment fund management company, at least 50% of the shares in which (investment units of which) are held by legal entities referred to under subparagraph (a) of this paragraph.

Effective August 10, 2018, compliance with the repatriation requirement is not necessary when counterclaims on obligations arising from agreements on the provision of international telecommunications services, including international roaming services, are offset between a nonresident and a resident that are international telecommunications operators, including situations in which settlements between them are performed through specialized settlement organizations registered within member states of the International Telecommunication Union.

The foreign currency credited in accordance with items (1) and (3) above to the accounts of residents or third parties with banks abroad must be used to meet the residents’ obligations as specified under said items or transferred to accounts with authorized banks.

Residents fulfill the repatriation requirement if they have arranged for receipt in their bank account of payment under a contract insuring against a nonresident’s failure to fulfill obligations under a foreign trade contract as specified in Federal Law No. 82-FZ of May 17, 2007, on the Development Bank (as amended), for activities related to insuring export loans and investments against business and/or political risks, provided the ratio in the insurance contract between the insurance amount and the insured value (level of indemnification) equals or exceeds the value established by law.

Foreign exchange operations related to settlements in foreign currency within the framework of financing agreements concluded between residents against the assignment of a monetary claim (factoring), under which monetary claims in foreign currency or rubles owed to residents by nonresidents on foreign trade contracts are assigned to residents who are financial agents (factors), are performed without restriction. For the purpose of ensuring compliance with the obligation on the part of residents to repatriate funds when performing foreign trade activity, a resident who has entered into a foreign trade contract with a nonresident and who has assigned the monetary claim under the contract to a resident factor, is required to ensure that funds are received from the nonresident according to the general rule – within the time period specified by the foreign trade contract. Monitoring of residents’ compliance with the repatriation requirement is carried out within the framework of monitoring performed effective January 3, 2018, in accordance with BR Instruction No. 181-I of August 16, 2017, on the Procedure for...
the Submission of Supporting Documents and Information by Residents and Nonresidents to Authorized Banks in the Performance of Foreign Exchange Operations, on Standard Accounting and Reporting Forms for Foreign Exchange Operations, and the Procedure and Deadlines for their Submission.

Effective January 3, 2018, residents are not required to provide an authorized bank with documents related to the performance of foreign exchange operations under any contracts with nonresidents if the amount of obligations under them does not exceed 200,000 rubles.

In the case of a contract the obligations under which exceed the equivalent of 200,000 rubles, a resident must provide an authorized bank with documents related to the performance of foreign exchange operations under the given contract within the following time periods:

- when foreign currency is debited from an account, simultaneously with the order to debit the foreign currency;
- when foreign currency is credited, no later than 15 business days after the date it is credited.

In the case of an export contract the obligations under which are equal to or greater than the equivalent of 6,000,000 rubles, a resident must register the contract with an authorized bank.

The following are subject to registration with an authorized bank: (1) agreements, including agency agreements, commission agreements, and trust agreements providing for the export of goods from the Russian Federation in the performance of foreign trade activity, with the exception of the export (import) of securities in documentary form; (2) agreements providing for the sale and/or performance of services related to the sale within the Russian Federation (or outside the Russian Federation) of fuel and lubricants (bunker fuel), food, material and technical supplies, and other goods (with the exception of spare parts and equipment) necessary to ensure the operation and maintenance of vehicles, regardless of their type and purpose, en route or at intermediate stopping points or parking areas; (3) agreements, including agency agreements, commission agreements, and trust agreements, with the exception of agreements referred to under (1), (2), and (4), which provide for the performance of work, delivery of services, or the transfer of information and intellectual property, including exclusive rights thereto; (4) agreements providing for the transfer of movable and/or real property under a rental agreement or financial lease agreements (leasing).

A resident exporter that is planning to fulfill its obligations under an export contract must provide information to an authorized bank about the export contract that is needed for its registration (referred to hereinafter as information) or an excerpt from the export contract containing information needed by the authorized bank for registration of the export contract and the performance of foreign exchange control, including oversight of the resident exporter’s compliance with repatriation requirements, and other information needed by the authorized bank.

An export contract must be presented by a resident exporter to an authorized bank no later than 15 business days after the registration.
of the export contract by the authorized bank if information alone was provided by the resident exporter for the purpose of the contract’s registration. Previously, passporting requirements applied.

Letters of credit  No.
Guarantees  No.
Domiciliation  No.
Preshipment inspection  Yes.

Effective January 3, 2018, a resident exporter that is planning to fulfill its obligations under an export contract must provide information to an authorized bank about the export contract that is needed for its registration (referred to hereinafter as information) or the an excerpt from the export contract containing information needed by the authorized bank for registration of the export contract and the performance of foreign exchange control, including oversight of the resident exporter’s compliance with repatriation requirements, and other information needed by the authorized bank.

An export contract must be presented by a resident exporter to an authorized bank no later than 15 business days after the registration of the export contract by the authorized bank if information alone was provided by the resident exporter for the purpose of the contract’s registration. Previously, residents (excluding individuals) were required to set up a transaction passport at an authorized bank for each contract (credit agreement) with obligations equal to or greater than the equivalent of US$50,000 at the official BR exchange rate.

Export licenses  Yes.
Without quotas  No.
With quotas  Yes.

Export taxes  Yes.
Collected through the exchange system  No.
Other export taxes  Yes.

Export taxes are levied on more than 350 items, and the rate for most of them is 3.75%, with a maximum rate of 30% for natural gas. A number of goods, including petroleum and petroleum products, are subject to specific duties. Certain goods are subject to combined duties.

Proceeds from Invisible Transactions and Current Transfers
Repatriation requirements Yes. All proceeds from exports received by residents must be credited in full to their accounts opened with authorized banks within the time periods provided for under foreign trade contracts, except as indicated below. Residents are not required to credit foreign currency or rubles to their bank accounts at authorized banks if (1) foreign currency is credited to accounts of resident legal entities or third parties with banks abroad to fulfill the obligations of resident legal entities under credit facilities and loan agreements with nonresident entities that are agents of foreign governments, and under credit facilities and loan agreements entered into with residents of OECD or FATF member countries for a period exceeding two years; (2) nonresident
contractors pay the local expenses of residents in connection with residents’ construction of properties in foreign countries after which any remaining funds must be transferred to residents’ accounts with authorized banks; (3) foreign currency obtained by residents from exhibitions and sports, cultural, and other similar events abroad is used to cover expenses of such events, for the duration of the event; (4) foreign currency is used to offset counterclaims for obligations between (a) resident and nonresident entities that conduct fishing operations outside Russia and that provide services outside Russia to the residents under agency agreements with them; (b) resident and nonresident transportation entities performing services outside Russia for the residents under agreements with them; or (c) resident and nonresident transportation entities if the settlements between them are made through specialized settlement entities established by international organizations in the area of international transportation and of which such resident transportation entities are members; (5) foreign currency is used to offset counterclaims for obligations resulting from reinsurance agreements or service agreements connected with reinsurance agreements between nonresidents and resident insurance entities or insurance brokers; (6) foreign currency proceeds are credited to the accounts of resident transportation entities with banks abroad to pay for their expenses abroad in connection with the payment of aerial navigation, airport and port fees, and other mandatory fees in foreign countries; expenses associated with the servicing of air, river, and seacraft and other vehicles of such transportation entities and their passengers abroad; and expenses in connection with the activities of branches, representative offices, and other offices of such transportation entities abroad; (7) there is offsetting of counterclaims on obligations arising from agreements concluded between residents engaged in exports of natural gas in the gaseous state and nonresidents that provide for the purchase and sale of natural gas in the gaseous state, and agreements under which nonresidents have obligations to residents in connection with the transit of natural gas in the gaseous state across the territory of foreign states.

Effective April 14, 2018, compliance with the repatriation requirement is not necessary: (1) when a resident provides foreign currency or the currency of the Russian Federation to a nonresident under a loan agreement related to the financing of geological research, exploration, and/or extraction of minerals, a list of which is given in Article 337 of the Russian Federation Tax Code, in the event that said loan agreement contains conditions stating that the repayment of the funds provided depends on the fact and volume of the extraction of minerals and/or the amount of earnings from their sale, and when conditions specified in the loan agreement occur the funds are not repaid; (2) when similar counterclaims under loan agreements between a resident and nonresident are offset, provided the nonresident’s counterclaim arose as a result of the granting of a loan to the resident through the crediting of funds to an account opened by the resident at an authorized bank; (3) when a resident provides foreign currency or the currency of the Russian Federation to a nonresident under a loan agreement related to the financing of investment and/or innovation activity, in the event that when conditions specified in the loan agreement occur the funds are not repaid in the amount of the resident’s investment in the authorized capital, securities, or acquisition of debt liabilities of the same nonresident, or in the event that the funds are not repaid owing to the nonresident’s insolvency (bankruptcy), and in this case the resident must meet one of the following conditions: (a) the resident is a legal entity included in the list of legal entities
providing state support for innovation activity in the forms established by Federal Law No. 127-FZ of August 23, 1996, on Science and State Science and Technology Policy, in accordance with Article 4, part 1.1, paragraph 1, subparagraph (e), of Federal Law No. 209-FZ of July 24, 2007, on the Development of Small and Medium-Sized Business in the Russian Federation;

(b) the resident is a commercial company, at least 50% of the shares in which (equity stakes in the authorized capital of which) are held by legal entities referred to under subparagraph (a) of this paragraph, or it is a commercial company in which legal entities referred to under subparagraph (a) of this paragraph have the right to directly and/or indirectly control at least 50% of the votes attributed to voting shares (equity stakes) comprising the authorized capital of the given commercial company;

(c) the resident is a managing partner of an investment partnership in which the share held by legal entities referred to under subparagraph (a) of this paragraph in the total property of the partners is at least 50%;

(d) the resident is an investment fund management company, at least 50% of the shares in which (investment units of which) are held by legal entities referred to under subparagraph (a) of this paragraph.

Effective August 10, 2018, compliance with the repatriation requirement is not necessary when counterclaims on obligations arising from agreements on the provision of international telecommunications services, including international roaming services, are offset between a nonresident and a resident that are international telecommunications operators, including situations in which settlements between them are performed through specialized settlement organizations registered within member states of the International Telecommunication Union.

The foreign currency credited in accordance with items (1) and (3) above to the accounts of residents or third parties with banks abroad must be used to meet the residents’ obligations as specified under said items or transferred to accounts opened with authorized banks. Residents fulfill the repatriation requirement if they have arranged for receipt in their bank account of payment under a contract insuring against a nonresident’s failure to fulfill obligations under a foreign trade contract as specified in Federal Law No. 82-FZ of May 17, 2007, on the Development Bank (as amended), for activities related to insuring export loans and investments against business and/or political risks, provided the ratio in the insurance contract between the insurance amount and the insured value (level of indemnification) equals or exceeds the value established by law.

Foreign exchange operations related to settlements in foreign currency within the framework of financing agreements concluded between these residents against the assignment of a monetary claim (factoring), under which monetary claims in foreign currency or the currency of the Russian Federation owed to residents by nonresidents on foreign trade contracts are assigned to residents who are financial agents (factors), are performed without restriction. For the purpose of ensuring compliance with the obligation on the part of residents to repatriate funds when performing foreign trade activity, a resident who has entered into a foreign trade contract with a nonresident and who has assigned the monetary claim under the contract to a resident factor, is required to ensure that funds are received from the nonresident according to the general rule – within the time period specified by the foreign trade contract. Monitoring of residents’ compliance with the repatriation requirement is carried out within the framework of monitoring performed from January 3, 2018, onward in accordance with BR Instruction No. 181-I of August 16, 2017, on...
the Procedure for the Submission of Supporting Documents and Information by Residents and Nonresidents to Authorized Banks in the Performance of Foreign Exchange Operations, on Standard Accounting and Reporting Forms for Foreign Exchange Operations, and the Procedure and Deadlines for their Submission.

**Capital Transactions**

| Controls on capital transactions | Yes. |
| Repatriation requirements | No. |
| Surrender requirements | No. |
| Surrender to the central bank | No. |
| Surrender to authorized dealers | No. |
| Controls on capital and money market instruments | Yes. |
| On capital market securities | Yes. |
| Shares or other securities of a participating nature | Yes. |
| Purchase locally by nonresidents | Yes. |

The Federal Law on Foreign Exchange Regulation and Foreign Exchange Control does not restrict the purchase of shares or other equity-based securities by nonresidents (either from nonresidents or from residents). Special restrictions are in place for the banking and insurance sectors. There is 50% quota for the participation of foreign capital in the Russian banking system (Federal Law No. 395-1 of December 2, 1990, “On Banks and Banking Activities”). The quota for the participation of foreign capital in the authorized capital of insurance companies is set at 50% (Article 6 of Russian Federation Law No. 4015-1 of November 27, 1992, on the Organization of the Insurance Business in the Russian Federation). The quota for the participation of foreign capital in the authorized capital of insurance companies is calculated by the BR as of January 1 following the procedure established by BR Directive No. 3386-U of September 22, 2014, on the Procedure for Calculation of the Level of (Quota for) the Participation of Foreign Capital in the Authorized Capital of Insurance Companies and Lists of Documents Needed to Obtain Approval from the BR for the Transfer of Shares (Equity Stakes in the Authorized Capital) of Insurance Companies to Foreign Investors and/or their Subsidiaries.

Insurance companies are required to obtain prior approval of the insurance supervisory authority for:
- an increase in the size of their authorized capital at the expense of funds of foreign investors and/or their subsidiaries;
- a transfer of their shares (equity stakes in their authorized capital) to foreign investors (including their sale to foreign investors), while
Russian shareholders (partners) are required to obtain prior approval of the insurance supervisory authority for the transfer of shares (equity stakes in the authorized capital) of an insurance company held by them to foreign investors and/or their subsidiaries. If the quota for the participation of foreign capital in the authorized capital of insurance companies exceeds 50%, the insurance supervisory authority refuses to grant prior approval to insurance companies that are subsidiaries of foreign investors (parent companies) or in which the equity stake held by foreign investors in the authorized capital is more than 49% or would be as a result of such transactions (Russian Federation Law No. 4015-1 of November 27, 1992, on the Organization of the Insurance Business in the Russian Federation).

An insurance company that is a subsidiary of a foreign investor (a parent company) or in which the equity stake held by foreign investors in the authorized capital is more than 49%, which has obtained a license to perform insurance activities after August 22, 2012, has the right to perform insurance activities in the Russian Federation if the foreign investor (parent company) has been an insurance company doing business in accordance with the legislation of the relevant state for at least five years (Article 6 of Russian Federation Law No. 4015-1 of November 27, 1992, on the Organization of the Insurance Business in the Russian Federation).

The performance of a transaction (transactions) involving the acquisition of shares (equity stakes) in an insurance company by an individual or legal entity (including acquisition as part of a group of persons) in an amount that is greater than 10% (including any shares or equity stakes previously acquired) requires prior approval of the insurance supervisory authority (this requirement also applies to residents) (Article 32.10 of Russian Federation Law No. 4015-1 of November 27, 1992, on the Organization of the Insurance Business in the Russian Federation).

Transactions between nonresidents with domestic securities in Russia are performed under requirements set out in the antimonopoly law, the securities market law, and the Federal Law of November 21, 2011, No. 325-FZ, on organized trading.

Transactions resulting in control by a foreign investor or group of persons over business entities that are of strategic significance (that is, defense and state security) are subject to approval by the federal executive body authorized to carry out control functions over foreign investments in Russia.

Securities market law does not provide for special types of control of transactions between nonresidents involving domestic securities.

Under the foreign exchange law, there are no restrictions on the sale or issuance of shares or other equity securities by nonresidents. Specific aspects of the placement and trading of securities of foreign issuers in Russia are governed by the law on the securities market (specifically Article 51.1 of Federal Law No. 39-FZ of April 22, 1996, on the Securities Market).

According to Article 51.1 of Federal Law No. 39-FZ of April 22, 1996, on the Securities Market: (1) Foreign financial instruments may be traded in Russia as securities of foreign issuers, provided the following conditions are met simultaneously: (a) the foreign financial instruments are assigned an international securities identification code (number) and an international financial instrument classification code; and (b) the foreign financial instruments are classified as securities following the procedure established by the BR. (2) Securities of foreign issuers that meet the requirements of Paragraph 1 may be placed and/or publicly traded in Russia if the issuers are: (a) foreign entities established in countries that are OECD members,
members or observers of the FATF, and/or members of the Committee of Experts on the Evaluation of Anti-Money-Laundering Measures and the Financing of Terrorism of the Council of Europe (MONEYVAL), and/or members of the Common Economic Space; (b) foreign entities established in countries that have the relevant agencies (relevant organizations) with which the federal executive agency responsible for the securities market has a cooperation agreement; (c) international financial institutions included in a list approved by the Russian government; (d) the foreign governments indicated in (a) and (b) and those countries’ autonomous CBs and administrative-territorial units; and (e) foreign organizations whose securities are listed on a foreign exchange included in a list approved by the BR in accordance with Paragraph 4, Article 51.1. (3) Foreign issuers’ securities may be placed in Russia by a decision of the BR, provided the prospectus for these securities is registered by the BR. (4) Foreign issuers’ securities that meet the requirements of Paragraphs 1 and 2 of Article 51.1 may be traded publicly in Russia based on a decision by a Russian exchange allowing for their organized trading. Such a decision may be made by a Russian exchange if the securities, other than securities of international financial institutions, are listed on a foreign exchange that is included in a list approved by the BR and no restrictions on the securities have been established by Russian law or international law. (5) International financial institutions’ securities may be publicly placed and/or traded in Russia, provided the conditions for the trading of these securities do not contain any restrictions regarding their trading among an unrestricted group of persons and/or the offering of the securities to an unrestricted group of persons.

The foreign exchange law does not prohibit the purchase abroad of shares or other equity securities by residents. There are certain restrictions: (1) the share of securities of foreign issuers and Russian depositary receipts in the composition of the aggregated investment portfolio consisting of funds intended for housing for military personnel may not exceed 30%; (2) nonstate pension funds that carry out compulsory pension insurance (a) may have assets in foreign currency in their portfolios in an amount not exceeding 30% of the value of the investment portfolio and (b) may have securities of international financial organizations, as well as units (stocks, shares) of foreign index investment funds (including securities receivables and (or) securities to be transferred during the second part of the repo transaction) if the share of such instruments does not exceed 20% of the value of the investment portfolio; (3) pension reserves intended for fulfilling obligations under voluntary insurance agreements may not have a total share exceeding 30% in sovereign securities of foreign issuers, securities of international financial organizations, shares of foreign joint-stock companies, corporate shares of foreign business entities, and shares of foreign investment funds in pension reserves. The legislation also establishes restrictions on the investment of an insurer’s equity (capital) and insurance reserves. Thus, the total value of assets located outside the Russian Federation in which an insurer’s equity (capital) is invested may not exceed 35% of the regulatory solvency margin or the minimum amount of authorized capital (the larger of the two indicators). Furthermore, the proportion of foreign assets in insurance reserves, with the exception of that accounted for by reinsurers who are not residents of the Russian Federation, may not exceed 30%.

Article 24 of the Federal Law on Banks and Banking states that banks with a basic license have the right to perform operations and transactions, including those involving acquisition, only with

| Purchase abroad by residents | Yes. |
securities listed on the first (highest) list of a trading organizer in whose capital the BR holds a stake, and securities that meet the requirements of the BR established in Directive No. 4979-U. Taking into consideration the requirements for the listing of securities on the first (highest) list established by Regulation No. 534-P and the stock exchange, securities of foreign issuers as well as securities denominated in foreign currency may be included in the list.

This law does not impose restrictions on: (1) the composition of counterparties of banks with a basic license in transactions with such securities, including those based on the private law of counterparties (other than transactions in which banks with a basic license act as creditors, considering the prohibition on lending to foreign persons); (2) the possibility of the performance of transactions by banks with a basic license with such securities outside of the relevant stock exchange.

Compliance with the established requirements is evaluated by the BR within the context of banking supervision.

<td>The foreign exchange law of Russia does not prohibit purchases of bonds or other debt securities by residents abroad. Federal Law No. 39-FZ of April 22, 1996, on the Securities Market does not impose requirements or restrictions on the acquisition by residents of securities abroad. When transferring securities, which were acquired abroad and are intended for qualified investors under the legislation on the Russian securities market, into Russia for registration, the holder of such securities must have the status of a qualified investor (pursuant to Article 51.1, paragraph 14, of Federal Law No. 39-FZ of April 22, 1996, on the Securities Market (referred to hereinafter as Law No. 39-FZ), if the securities of foreign issuers have not be admitted for public placement and/or public circulation in the Russian Federation in accordance with this article, then the requirements and restrictions established by this Federal Law for the circulation of securities intended for qualified investors apply to the circulation of such securities. Pursuant to Article 27.6, paragraph 3, of Law No. 39-FZ, the acquisition and conveyance of securities intended for qualified investors, as well as the provision (acceptance) of said securities as collateral to ensure the fulfillment of obligations, may be performed only through brokers. This rule does not apply to investors who are qualified by virtue of federal law when they perform said transactions, or to cases in which a person has acquired said securities as a result of universal legal succession, conversion, including reorganization, distribution of the property of a legal entity being liquidated, as well as other cases established by the BR.</td>
<td></td>
</tr>
</tbody>
</table>
Pursuant to Article 3, paragraph 5, of Law No. 39-FZ, a broker has the right to acquire securities intended for qualified investors and to enter into derivatives contracts intended for qualified investors, only if the client on whose behalf the transaction is being performed (the contract is being concluded) is a qualified investor in accordance with Article 51.2, paragraph 2, of this Federal Law (referred to hereinafter as qualified investors by virtue of federal law) or is recognized by the broker as a qualified investor in accordance with this Federal Law).

Article 24 of the Federal Law on Banks and Banking states that banks with a basic license have the right to perform operations and transactions, including those involving acquisition, only with securities listed on the first (highest) list of a trading organizer in whose capital the BR holds a stake, and securities that meet the requirements of the BR established in Directive No. 4979-U. Taking into consideration the requirements for the listing of securities on the first (highest) list established by Regulation No. 534-P and the stock exchange, securities of foreign issuers as well as securities denominated in foreign currency may be included in the list.

This law does not impose restrictions on: (1) the composition of counterparties of banks with a basic license in transactions with such securities, including those based on the private law of counterparties (other than transactions in which banks with a basic license act as creditors, considering the prohibition on lending to foreign persons); (2) the possibility of the performance of transactions by banks with a basic license with such securities outside of the relevant stock exchange.

Compliance with the established requirements is evaluated by the BR within the context of banking supervision.

**Sale or issue abroad by residents**

Yes. The foreign exchange law of Russia does not prohibit the purchase or issuance of bonds or other debt securities by residents outside of Russia. According to Article 16 of Federal Law No. 39-FZ of April 22, 1996, on the Securities Market, organization of the circulation of issue-grade securities of a Russian issuer outside the Russian Federation, including circulation through the placement of securities of foreign issuers certifying rights with respect to issue-grade securities of Russian issuers in accordance with foreign law, requires authorization by the BR.

**On money market instruments**

Yes. Under the Russian foreign exchange law, there are no restrictions on purchases of money market instruments by nonresidents (from nonresidents or residents). Transactions between nonresidents with domestic securities in Russia are performed under requirements set out in the antimonopoly law and the securities market law.

Pursuant to Article 27.5-1, paragraph 3, of Federal Law No. 39-FZ of April 22, 1996, on the Securities Market, the placement and circulation of BR bonds are performed only among Russian credit institutions.

**Sale or issue locally by nonresidents**

Yes. Under the foreign exchange law, there are no restrictions on the sale or issuance of bonds or other debt securities by nonresidents.

Specific aspects of the placement and trading of securities of foreign issuers in Russia are governed by the law on the securities market (specifically Article 51.1 of Federal Law No. 39-FZ of April 22, 1996, on the Securities Market).

**Purchase abroad by residents**

Yes. There are no prohibitions in the foreign exchange legislation against the purchase of money market instruments by residents outside of Russia.

Article 24 of the Federal Law on Banks and Banking states that...
banks with a basic license have the right to perform operations and transactions, including those involving acquisition, only with securities listed on the first (highest) list of a trading organizer in whose capital the BR holds a stake, and securities that meet the requirements of the BR established in Directive No. 4979-U. In accordance with the banking legislation, there are two types of banks: those with a basic license and those with a universal license. A bank with a basic license may not place funds attracted for deposit with foreign legal entities, foreign organizations that are not legal entities under foreign law, or individuals who are subject to the private law of a foreign state. Such restrictions do not apply to banks with a universal license. Compliance with the established requirements is evaluated by the BR within the context of banking supervision.

<tbody>
<tr>
<td><strong>Controls on direct investment</strong></td>
<td>Yes.</td>
</tr>
<tr>
<td><strong>Outward direct investment</strong></td>
<td>Yes.</td>
</tr>
</tbody>
</table>

Direct investments by resident individuals and resident legal entities that are not credit institutions are permitted, provided the requirements of the foreign currency law of Russia are met (for example, those related to investments of pension funds).

There are no restrictions on direct investment by resident credit institutions associated with their acquisition of stocks (equity stakes) of foreign entities except when approval from the BR must be obtained following the established procedure. Such approval must be obtained to establish a subsidiary in a foreign state, and also to acquire the status of a parent company with respect to an existing nonresident organization in which a credit institution would have the ability to determine decisions made by the given organization’s management bodies by virtue of a dominant stake in the authorized capital, in accordance with an agreement that has been concluded, or in some other manner.

Banks with a universal banking license and capital in the amount of 1 billion rubles or more may have subsidiaries (branches) abroad subject to authorization and in accordance with BR requirements. There is no provision granting banks with a basic license the right to open a branch and/or subsidiary in a foreign state. Until January 1, 2019, that right is preserved for banks recognized as banks with a universal license and having capital of at least 1 billion rubles and a general license to perform banking operations, in accordance with the first and second parts of Article 35 of the Federal Law on Banks and Banking. General licenses issued before June 1, 2017, to perform banking operations remain in force until they are replaced in the prescribed manner.

The BR does not issue authorization to establish subsidiaries in countries (in areas) that are included, in the manner specified by the laws of Russia, among those governments (areas) that do not participate in international cooperation in the area of combating money laundering and financing of terrorism.

Approval from the BR is required for transactions involving the acquisition of shares issued by a Russian credit institution, the placement and/or trading of which outside Russia is carried out through their placement in accordance with the foreign securities law pertaining to foreign issuers and granting rights with regard to issued securities of Russian issuers. The threshold for participation in Russian credit institutions without BR approval is 10% (this restriction also applies with respect to residents of the Russian Federation).

BR approval is also required when operations are performed that result in the establishment of control over shareholders (stakeholders) of a Russian credit institution who hold more than 10% of the shares (equity stakes) in the given credit institution (this restriction also applies with respect to residents of the Russian Federation).

In accordance with the Treaty between Russia and Belarus on the creation of the Union State, the BR has established through Regulation No. 217-P that transfers of funds in rubles and in foreign currency for participation in the authorized capital of Belarusian banks, as well as the acquisition (disposal) of shares issued by Belarusian banks and stakes in the authorized capital of Belarusian banks, are to be carried out by authorized banks in accordance with Russian legislation on banks and banking, subject to notification requirements. Authorized banks are required to notify the BR.
Inward direct investment                Yes.

Direct investments are subject to certain limitations:
(1) Requirements have been established for foreign investors and
groups of persons that include a foreign investor, for their investment
in the authorized capital of business entities that are of strategic
significance in providing for the national defense and state security,
and/or for the completion of transactions resulting in the
establishment of control over such business entities. In this
connection, transactions carried out by foreign governments or
international organizations or organizations under their control that
result in acquisition of the right directly or indirectly to control more
than 25% of the total number of votes attached to voting shares
(equity stakes) constituting the authorized capital of a Russian
business entity, or some other ability to block decisions of such a
business entity’s governing authorities, are subject to approval in
accordance with the procedures specified in Articles 9–12 of the
Federal Law on the Procedure for Making Foreign Investments in
Business Entities that are of Strategic Significance in Providing for
the National Defense and State Security, except transactions in which
the participants are international financial organizations established
under international treaties to which Russia is a party or international
financial organizations with which Russia has entered into
international treaties. The list of those international financial
organizations is approved by the Russian government. (Resolution
No. 119-R of the Russian Federation Government of February 3,
2012.)

(2) In accordance with Federal Law No. 372-FZ of December 14,
2015, on Amendments to Articles 16 and 18 of the Federal Law on
Banks and Banking, adopted on the basis of the Russian Federation’s
commitments in connection with accession to the WTO, the level of
participation of foreign capital in the Russian Federation’s banking
system is taken into account when considering whether the BR will
issue a permit to establish a credit institution with foreign
investments. Russian Federation law does not provide for the
possibility of opening branches of foreign credit institutions within
the territory of the Russian Federation. In accordance with federal
laws, the BR performs state accreditation of representative offices of
foreign credit institutions, as well as accreditation of foreign
nationals who will be working at the representative offices.
The level of participation of foreign capital in the aggregate
authorized capital of credit institutions licensed to perform banking
operations is calculated as the ratio of nonresidents’ foreign
investments in the authorized capital of credit institutions that are
licensed to perform banking operations to the aggregate authorized
capital of such credit institutions.
The procedure for calculating the level of participation of foreign
capital is defined under Article 18 of the Federal Law on Banks and
Banking and BR Directive No. 3948-U of January 28, 2016, on the
Procedure for Calculating the Level of Participation of Foreign
Capital in the Aggregate Authorized Capital of Credit Institutions
Licensed to Perform Banking Operations (referred to hereinafter as
Directive No. 3948).
The following foreign investments are not included in the calculation
of foreign investments in the authorized capital of credit institutions
licensed to perform banking operations:
(1) investments made in the authorized capital from the earnings of
the credit institutions received in the Russian Federation or
repatriated to the Russian Federation from abroad;
(2) investments made in the authorized capital by subsidiary credit
institutions of foreign banks licensed to perform banking operations, and all subsequent investments by said institutions in the authorized capital of credit institutions licensed to perform banking operations;
(3) investments made before January 1, 2007, in the authorized capital of credit institutions licensed to perform banking operations;
(4) investments made in the authorized capital of credit institutions licensed to perform banking operations, the privatization of which was performed after August 22, 2012;
(5) investments representing 51% or more of the shares (equity stakes) in the authorized capital of a credit institution licensed to perform banking operations, performed after January 1, 2007, on the condition that said shares (equity stakes) are held by an investor for 12 or more years, unless the BR has adopted a decision before the expiration of this time period to continue to include said investments in the calculation and has published this decision. The procedure for the adoption by the BR of such a decision and for its publication is established by the BR.

The maximum level of participation of foreign capital in the aggregate authorized capital of credit institutions licensed to perform banking operations is 50%.

When the quota is reached, the BR performs the following measures with respect to foreign investments:
(1) it refuses to register a credit institution with foreign investments and to issue it a banking license;
(2) it imposes a ban on an increase in the authorized capital of a credit institution licensed to perform banking operations using nonresidents’ funds and on the conveyance of shares (equity stakes) in the credit institution in favor of nonresidents if such actions mean that the quota will be exceeded. Shares (equity stakes) in a credit institution that have been conveyed (sold) in violation of such a ban are not voting shares and are not taken into account in determining a quorum at a general meeting of shareholders (stakeholders) of the credit institution for the period that such a ban is in effect. In the event that a transaction is performed to convey (acquire) shares (equity stakes) in a credit institution in violation of the ban, the BR files a petition requesting that the relevant transaction be declared null and void.

The measures provided for under the sixth part of Article 18 of the Federal Law on Banks and Banking are not applied with respect to foreign investments referred to under items 1 and 2 of the second part of Article 18 of the Law on Banks and Banking.

The measures provided for under item 2 of the sixth part of Article 18 of the Federal Law on Banks and Banking are not applied with respect to foreign investments intended for the authorized capital of credit institutions licensed to perform banking operations as defined in accordance with regulatory acts of the BR on the basis of international agreements of the Russian Federation.

The BR ceases to apply the measures provided for under the sixth part of Article 18 of the Federal Law on Banks and Banking in the event that the level of participation of foreign capital in the aggregate authorized capital of credit institutions licensed to perform banking operations is less than 50%.

The level of participation of foreign capital in the aggregate authorized capital of credit institutions licensed to perform banking operations is calculated by the BR following the procedure it establishes as of January 1 of each year.

Information about the level of participation of foreign capital in the aggregate authorized capital of credit institutions licensed to perform banking operations and about the indicators used for its calculation is subject to publication in the official publication of the BR, the
Bulletin of the BR, and it is also posted on the official website of the BR no later than February 15 of the current year.

As of January 1, 2017, the level of participation of foreign capital in the aggregate authorized capital of credit institutions licensed to perform banking operations was 13.51%.

(3) Restrictions have been established on the use of mineral resources by foreign investors and by legal entities in which foreign investors hold a stake.

(4) Restrictions apply on certain types of activities of insurance companies that are subsidiaries of foreign investors or have a foreign ownership stake in their authorized capital of over 49%, other than insurance companies that were subsidiaries of foreign investors on the date Federal Law No. 234-FZ of July 23, 2013, went into effect, if they were previously authorized for such activity. As of January 1, 2019, the quota for participation by foreign capital in the authorized capital of insurance companies with an insurance license was 11.99%. If the level of (quota for) the participation of foreign capital in the authorized capital of insurance companies exceeds 50%, the insurance supervisory authority stops issuing insurance licenses to insurance companies that are subsidiaries of foreign investors (parent companies) or in which the equity stake held by foreign investors in the authorized capital is more than 49%. Thus, said insurance companies may not provide personal life, health, or property insurance in the Russian Federation at the expense of funds allocated for these purposes from the respective budget to federal executive government authorities (insured parties); insurance related to the procurement of goods, work, and services to meet state and municipal needs; or insurance for the property interests of government and municipal organizations. These restrictions do not apply to insurance companies that were subsidiaries of foreign investors on the date Federal Law No. 204-FZ of November 20, 1999, went into effect, if they were previously authorized for such activity. A quota of 50% was set on foreign capital in the authorized capital of insurance companies. If this percentage is exceeded, the insurance supervisory authority stops issuing licenses for the performance of insurance activities to insurance companies that are subsidiaries of foreign investors or have a foreign ownership stake in their authorized capital over 49%. Payment by foreign investors for the shares (equity stakes in authorized capital) of insurance companies held by them is performed exclusively in monetary form in the currency of the Russian Federation.

Insurance companies must obtain authorization for the following: (1) an increase in their authorized capital from funds of foreign investors and/or their subsidiaries; and (2) transfers of shares (equity stakes in authorized capital) to a foreign investor (including for sale to foreign investors). Russian shareholders (stakeholders) must obtain authorization to transfer their shares (equity stakes) to foreign investors and/or their subsidiaries. The insurance supervisory authority refuses to grant prior approval [sic]. Authorization may not be denied to insurance companies that are subsidiaries of foreign investors or that have a foreign ownership in their authorized capital exceeding 49% that attain this status as a result of the transactions indicated if the established quota of 50% is not exceeded when completing such transactions.

Consent from the BR is required in the event that a legal entity or individual, or a group of individuals defined in accordance with Article 9 of Federal Law No. 135-FZ of July 26, 2006, on the Protection of Competition, acquires more than 10% of the shares (equity stakes) in a credit institution (including those previously acquired) when performing one or several transactions, including
Consent from the BR is also required when a legal entity or individual (or group of individuals) establishes direct or indirect (through third parties) control (including acquisition in the secondary market) with respect to the shareholders (stakeholders) of a credit institution who hold more than 10% of the shares (equity stakes) of the credit institution.

| Controls on liquidation of direct investment | No. |
| Controls on real estate transactions | Yes. |
| Purchase abroad by residents | No. |
| Purchase locally by nonresidents | Yes. |
| Sale locally by nonresidents | No. |
| Controls on personal capital transactions | Yes. |
| Loans | No. |
| By residents to nonresidents | No. |
| To residents from nonresidents | No. |
| Gifts, endowments, inheritances, and legacies | Yes. |
| By residents to nonresidents | Yes. |
| To residents from nonresidents | Yes. |

Foreign citizens, foreign legal entities, persons without citizenship, and legal entities in whose authorized (share) capital the stake of foreign citizens, foreign legal entities, or persons without citizenship is over 50% may hold land parcels for agricultural use only under a leasing arrangement.

The receipt as a result of a gift (endowment) of more than 10% of the stocks (shares) of a Russian credit institution, insurance company, microfinance company, private pension fund, or investment fund, mutual fund, and private pension fund management company requires the consent of the BR. When more than 10% of the stocks (shares) of a Russian credit institution, insurance company, microfinance company, private pension fund, or investment fund, mutual fund, and private pension fund management company are received through inheritance, the consent of the BR is considered to have been obtained. The heir must confirm that his business reputation meets the requirements established by law. In addition, the heir must meet these requirements on an ongoing basis and in the established cases must confirm compliance with the requirements regarding his financial position on an annual basis. There is essentially no difference between the “approval” and “consent” of the BR, but the term “approval” is used with respect to noncredit financial institutions, while “consent” is used with respect to credit institutions.

### Provisions Specific to the Financial Sector

<table>
<thead>
<tr>
<th>Provisions specific to commercial banks and other credit institutions</th>
<th>Yes.</th>
</tr>
</thead>
<tbody>
<tr>
<td>The term “credit institution” describes participants in the Russian banking sector. According to the Russian legislation, credit institutions include banks and nonbank credit institutions that carry out certain types of banking operations. The terms “nonresident bank,” “foreign bank,” and “foreign credit institution” are used for nonresidents. All credit institutions that perform banking operations in Russia must be residents. There are two types of banks: those with a basic license and those with a universal license. For banks with a basic license, there are restrictions with regard to the performance of activities with foreign counterparties: (1) there are restrictions on the performance of certain banking operations and transactions, for example, the issuing of credits to foreigners; (2) there are partial restrictions on their ability to open correspondent accounts at foreign banks; (3) there are restrictions on their legal capacity in transactions with financial instruments (securities). At the same time, there are no provisions specific to banks with a basic license in terms of the performance of banking operations and transactions in foreign currency.</td>
<td></td>
</tr>
</tbody>
</table>

| Borrowing abroad | No. |
| Maintenance of accounts abroad | Yes. |
| Authorized banks may open correspondent accounts with banks abroad pursuant to the terms specified in the banking license issued by the BR or determined by federal laws. There are two types of banks: those with a basic license and those with a universal license. A bank with a basic license is not permitted to open bank (correspondent) accounts at foreign banks, with the exception of the opening of an account at a foreign bank for the purpose of participating in a foreign payment system. A bank with a universal license that has obtained the status of a bank with a basic license or that has changed its status to that of a nonbank credit institution, or a bank with a basic license that has changed its status to that of a nonbank credit institution, is required to abrogate a bank (correspondent) account agreement with a foreign bank within one year of the date such status is acquired. This restriction does not apply to cases in which an account is opened at a foreign bank for the purpose of participating in a foreign payment system. |

| Lending to nonresidents (financial or commercial credits) | Yes. |
| There are two types of banks: those with a basic license and those with a universal license. A bank with a basic license may not perform the placement of funds attracted for deposit, attract for deposit and place precious metals, open and maintain bank accounts in precious metals and perform transfers with them, issue bank guarantees to |
foreign legal entities, to foreign organizations that are not legal entities under foreign law, or to individuals who are subject to the private law of a foreign state. A bank with a basic license does not have the right to acquire rights of claim against, to perform leasing operations with, or to issue sureties with respect to said entities. There are two types of banks: those with a basic license and those with a universal license. A bank with a basic license may not perform the placement of funds attracted for deposit, attract for deposit and place precious metals, open and maintain bank accounts in precious metals and perform transfers with them, issue bank guarantees to foreign legal entities, to foreign organizations that are not legal entities under foreign law, or to individuals who are subject to the private law of a foreign state. A bank with a basic license does not have the right to acquire rights of claim against, to perform leasing operations with, or to issue sureties with respect to said entities. The Federal Law on Banks and Banking does not establish any provisions specific to the performance of operations that involve lending to Russian citizens and legal entities in foreign currency by banks with a basic license.

Higher risk ratios are established for banks for calculating the capital adequacy ratio for credits and investments in debt securities in foreign currency.

Effective July 1, 2018, they are:
- for credits (securities) of non-exporter companies – 130%;
- for credits (securities) of exporters – 110%;
- for credits intended for the purchase of real estate – 150%.

Purchase of locally issued securities denominated in foreign exchange

No.

Differential treatment of deposit accounts in foreign exchange

Yes.

Reserve requirements

Yes.

Reserve requirements are imposed on: (1) liabilities to nonresident legal entities (including nonresident banks) in rubles and/or in foreign currency; (2) liabilities to resident and nonresident individuals in rubles and/or in foreign currency; and (3) other liabilities in rubles and/or foreign currency. Effective July 1, 2019, for banks holding a general license and nonbank credit institutions the reserve requirement is 4.75% for all categories of liabilities in domestic currency subject to reserve requirements (liabilities to nonresident legal entities and individuals, other liabilities). The reserve requirements for banks holding a basic license are: 4.75% for liabilities to nonresident legal entities and 1% for liabilities to individuals and other liabilities.

The reserve requirement for credit institution’s liabilities in foreign currency is 8%. These requirements are in effect starting with the regulation of the size of required reserves for July 2019.

The BR established the quick (N2), current (N3), and long-term liquidity ratios, which are defined as the ratio of assets to liabilities, taking into consideration maturities, amounts, types of assets and liabilities, and other factors, and are calculated for operations in all currencies, and no requirements have been established for separate compliance with them in rubles and/or other currencies.

Only the current liquidity ratio (N3) is specified for banks with a basic license.

A LCR developed in accordance with Basel III is applicable to systemically important credit institutions (SICIs) on a consolidated basis in the event that an SICI is the main credit institution of a banking group, and on an individual basis when an SICI is not the main credit institution of a banking group as defined for regulatory
purposes. The LCR is calculated in accordance with the procedure established by BR Regulation No. 421-P of May 30, 2014, on the Procedure for the Calculation of the LCR (Basel III), taking into account the specific aspects established by BR Regulation No. 510-P of December 3, 2015, on the Procedure for the Calculation of the LCR (Basel III) by SICIs.

With the aim of establishing an effective liquidity risk management system, SICIs are required to perform separate calculations and forward information to the BR on the LCR values in rubles and in each significant foreign currency. In addition to deposits in rubles, only funds denominated in US dollars and euros may be treated as stable funds of individuals and small businesses with a lower outflow rate compared to funds classified as unstable, when all of the conditions for stability as defined by Basel III are met.

When determining the amount of highly liquid assets, the procedure for the calculation of the liquidity coverage indicator/LCR (LCI/LCR) also provides for limiting the amount of assets denominated in certain foreign currencies to the amount of the net expected outflow of funds in the same foreign currency as established by Basel III, with the outflow calculated in accordance with Regulation No. 421-P/Regulation No. 510-P. At the same time, considering the initial shortage in the Russian banking sector of highly liquid assets defined in accordance with Basel III, Regulation No. 510-P allows for the inclusion of highly liquid assets denominated in US dollars, euros, Japanese yen, pounds sterling, and Swiss francs in the LCR numerator in an amount that exceeds the net expected outflow of funds in the same foreign currency, taking into account the restrictions established by Regulation No. 510-P (Basel III option 2).

No separate standards are applied in the Russian banking regulation establishing requirements for coverage by liquid assets of deposits (liabilities) attracted by credit institutions in foreign or domestic currency.

There is a structural liquidity ratio (the NSFR) developed in accordance with Basel III in effect for SICIs, which is applied on a consolidated basis if an SICI is the main credit institution of a banking group, and on an individual basis when an SICI is not the main credit institution of a banking group as defined for regulatory purposes. The NSFR is calculated according to the procedure established by BR Regulation No. 596 P of July 26, 2017, on the Procedure for the Calculation of the Structural Liquidity Ratio (NSFR) (Basel III) by SICIs.

No separate standards establishing requirements for calculation of the NSFR in foreign or domestic currency are applied in Russian banking regulation.

The classification of funds of individuals and small businesses into stable and unstable, including classification based on the currency, for the purpose of calculating the NSFR, is the same as that applied to the LCR as indicated above.

In accordance with the Federal Law on Consumer Credit (Loans), the BR calculates and publishes on a quarterly basis the average market value of the total cost of consumer credit (loans) (TCC) in terms of percent per annum by categories of consumer credit (loans) defined by the BR. For credits in foreign currency, the TCC may not exceed the smaller of the following values: (1) 365% per annum or (2) more than one-third of the average market value of the TCC for the corresponding category in the given quarter. There is a similar limit for credits in rubles.

In accordance with the Federal Law on the Insurance of Bank Deposits in the Russian Federation, the BR calculates and publishes

**Interest rate controls** Yes.
on a monthly basis the base rate of return on deposits (separately for deposits in rubles and in foreign currency). The base rate of return on deposits is used for the identification of banks that pay an additional rate or a higher additional rate for insurance contributions to the mandatory deposit insurance fund. If a bank allows even one deposit in foreign currency to exceed the base rate of return on deposits by between 2 and 3 percentage points or by more than 3 percentage points per annum in any month of a quarter, the bank is considered to meet the criteria for the payment of an additional rate or a higher additional rate for insurance contributions. There is a similar limit for deposits in rubles.

**Credit controls**

No.

**Differential treatment of deposit accounts held by nonresidents**

Yes.

**Reserve requirements**

No.

Reserve requirements are imposed on: (1) liabilities to nonresident legal entities (including nonresident banks) in rubles and/or in foreign currency; (2) liabilities to resident and nonresident individuals in rubles and/or in foreign currency; and (3) other liabilities in rubles and/or foreign currency.

For banks holding a general license and nonbank credit institutions the reserve requirement is 4.75% for all categories of liabilities in domestic currency subject to reserve requirements (liabilities to nonresident legal entities and individuals, other liabilities). The reserve requirements for banks holding a basic license are: 4.75% for liabilities to nonresident legal entities and 1% for liabilities to individuals and other liabilities.

The reserve requirement for credit institution’s liabilities in foreign currency is 8%. These requirements are in effect starting with the regulation of the size of required reserves for July 2019.

**Liquid asset requirements**

No.

**Interest rate controls**

Yes.

In accordance with the Federal Law on Consumer Credit (Loans), the BR calculates and publishes on a quarterly basis the average market value of the total cost of consumer credit (loans) (TCC) in terms of percent per annum by categories of consumer credit (loans) defined by the BR. For credits in foreign currency, the TCC may not exceed the smaller of the following values: (1) 365% per annum or (2) more than one-third of the average market value of the TCC for the corresponding category in the given quarter. There is a similar limit for credits in rubles.

In accordance with the Federal Law on the Insurance of Bank Deposits in the Russian Federation, the BR calculates and publishes on a monthly basis the base rate of return on deposits (separately for deposits in rubles and in foreign currency). The base rate of return on deposits is used for the identification of banks that pay an additional rate or a higher additional rate for insurance contributions to the mandatory deposit insurance fund. If a bank allows even one deposit in foreign currency to exceed the base rate of return on deposits by between 2 and 3 percentage points or by more than 3 percentage points per annum in any month of a quarter, the bank is considered to meet the criteria for the payment of an additional rate or a higher additional rate for insurance contributions. There is a similar limit for deposits in rubles.

**Credit controls**

No.

**Investment regulations**

Yes.

**Abroad by banks**

Yes.

There are no restrictions on direct investment by resident credit institutions associated with their acquisition of stocks (stakes) of
foreign entities except when leading to the establishment of subsidiaries abroad.
At the same time, the BR has established the N6 and N12 ratios, which limit the maximum exposure per borrower (or group of related borrowers) and the use of a bank’s equity (capital) to purchase shares (equity stakes) of other legal entities, including those located abroad. The N6 ratio is defined as the ratio of the aggregate liabilities of a borrower (or group of related borrowers) to a bank and liabilities to third parties to the bank’s equity (capital).
The N12 ratio is defined as the maximum ratio of funds invested by a bank in the acquisition of shares (equity stakes) of other legal entities to the bank’s equity (capital).
Banks with a basic license do not calculate the N12 ratio.
Banks with a universal banking license and capital in the amount of 1 billion rubles or more may have subsidiaries (branches) abroad subject to authorization and in accordance with BR requirements. There is no provision granting banks with a basic license the right to open a branch and/or subsidiary in a foreign state. Until January 1, 2019, that right is preserved for banks recognized as banks with a universal license and having capital of at least 1 billion rubles and a general license to perform banking operations, in accordance with the first and second parts of Article 35 of the Federal Law on Banks and Banking. General licenses issued before June 1, 2017, to perform banking operations remain in force until they are replaced in the prescribed manner.
The BR does not authorize subsidiaries in countries (areas) designated by Russian law among those that do not participate in international cooperation to combat money laundering and the financing of terrorism.
Approval from the BR is required for transactions involving the acquisition of shares and/or their receipt in trust that are issued by a Russian credit institution, the placement and/or trading of which outside Russia is carried out through their placement in accordance with the foreign securities law pertaining to foreign issuers and granting rights with regard to issued securities of Russian issuers.
The threshold for participation in a Russian credit institution without BR consent is 10% (this restriction applies to residents of the Russian Federation as well).
BR approval is also required when operations are performed that result in the establishment of control over shareholders (equity stakeholders) of a Russian credit institution holding more than 10% of the shares (equity stakes) in the credit institution (this restriction applies to residents of the Russian Federation as well).
In accordance with the Treaty between Russia and Belarus on the creation of the Union State, the BR has established that transfers of funds in rubles and in foreign currency for participation in the authorized capital of Belarusian banks, as well as the acquisition (disposal) of shares issued by Belarusian banks, and stakes in the authorized capital of Belarusian banks, are to be carried out by authorized banks in accordance with Russian legislation on banks and banking, subject to notification requirements. Authorized banks are required to forward information to the BR regarding participation in the authorized capital of Belarusian banks following the procedure established by regulatory acts of the BR.

The requirements established by Russian law regarding the acquisition of shares (equity stakes) in credit institutions extend to all investors regardless of their country of origin. The acquisition and/or receipt in trust (referred to hereinafter as acquisition) of more than 1% of the shares (equity stakes) of a credit institution resulting from the performance of one or more

In banks by nonresidents Yes.

©International Monetary Fund. Not for Redistribution
transactions by a single legal entity or individual, or group of persons defined in accordance with Federal Law No. 135-FZ of July 26, 2006, on the Protection of Competition, must be reported to the BR (with the exception of cases in which the shares (equity stakes) are acquired when a credit institution is being established). The threshold for participation in a Russian credit institution without BR consent is 10% (this restriction applies to residents of the Russian Federation as well). BR consent is also required for the establishment by a legal entity or an individual, as a result of the performance of one or more transactions, of direct or indirect (through third parties) control over shareholders (stakeholders) of a credit institution holding more than 10% of the shares (equity stakes) of the credit institution (referred to hereinafter as the establishment of control over the shareholders (stakeholders) of a credit institution) (this restriction applies to residents of the Russian Federation as well).

These requirements also apply to the acquisition of more than 1% of the shares (equity stakes) of a credit institution, more than 10% of the shares (equity stakes) of a credit institution, and/or the establishment of control with respect to shareholders (stakeholders) of a credit institution by a group of persons recognized as such in accordance with Federal Law No. 135-FZ of July 26, 2006, on the Protection of Competition.

The BR has the right to refuse to give its consent for the performance of a transaction (or transactions) aimed at the acquisition of more than 10% of the shares (equity stakes) of a credit institution and/or at gaining control of shareholders (stakeholders) of a credit institution if:

1. the financial condition of the person performing the transaction (or transactions) aimed at the acquisition of more than 10% of the shares (equity stakes) of a credit institution, or at the acquisition of 10% or less of the shares (equity stakes) of a credit institution, and that is part of a group of persons acquiring (holding) more than 10% of the shares (equity stakes) of a credit institution, as well as an individual or legal entity exercising control over said legal entities, and/or at gaining control of shareholders (stakeholders) of a credit institution, is found to be unsatisfactory;

2. the antimonopoly authority has not approved a petition for consent to a transaction (or transactions) submitted in accordance with Federal Law No. 135-FZ of July 26, 2006, on the Protection of Competition, if the transaction (or transactions) aimed at the acquisition is (are) subject to controls in accordance with the antimonopoly legislation;

3. there is no decision regarding prior consent to a transaction or to the acquisition of control in accordance with Federal Law No. 57-FZ of April 29, 2008, on the Procedure for Making Foreign Investments in Business Entities that are of Strategic Significance in providing for the National Defense and State Security, if the transaction (or transactions) aimed at the acquisition is (are) subject to controls in accordance with said federal law;

4. the person performing the transaction (or transactions) aimed at the acquisition of more than 10% of the shares (equity stakes) of a credit institution and/or at gaining control of shareholders (stakeholders) of a credit institution or their single-member executive bodies, has an unsatisfactory business reputation as established under Article 16, part 1, paragraph 5, of Federal Law No. 395-1 of December 2, 1990, on Banks and Banking;

5. there are other grounds provided for under federal laws and BR regulations adopted in accordance with them.

The BR refuses to consent to a transaction (or transactions) aimed at the acquisition of more than 10% of the shares (equity stakes) of a
credit institution and/or at gaining control of shareholders (stakeholders) of a credit institution if a court previously found the person performing the transaction aimed at the acquisition of more than 10% of the shares (equity stakes) of a credit institution and/or at gaining control of shareholders (stakeholders) of a credit institution, guilty of causing losses to any credit institution in the performance of his duties as a member of the credit institution’s board of directors (or supervisory board), as the sole executive officer of the credit institution or a deputy executive officer, and/or as a member of a collegial executive body (executive board, administrative board).

Establishment of a Russian credit institution with the participation of foreign investments requires prior authorization from the BR. In accordance with Federal Law No. 372-FZ of December 14, 2015, on Amendments to Articles 16 and 18 of the Federal Law on Banks and Banking, adopted on the basis of the Russian Federation’s commitments in connection with accession to the WTO, the level of participation of foreign capital in the Russian Federation’s banking system is taken into account when considering whether the BR will issue a permit to establish a credit institution with foreign investments.

The level of participation of foreign capital in the aggregate authorized capital of credit institutions licensed to perform banking operations is calculated as the ratio of nonresidents’ foreign investments in the authorized capital of credit institutions that are licensed to perform banking operations to the aggregate authorized capital of said credit institutions.

The procedure for calculating the level of participation of foreign capital is defined under Article 18 of the Federal Law on Banks and Banking and BR Directive No. 3948-U of January 28, 2016, on the Procedure for Calculating the Level of Participation of Foreign Capital in the Aggregate Authorized Capital of Credit Institutions Licensed to perform Banking Operations.

The following foreign investments are not included in the calculation of foreign investments in the authorized capital of credit institutions licensed to perform banking operations:

1. investments made in the authorized capital of credit institutions licensed to perform banking operations that are financed at the expense of earnings of said credit institutions received in the Russian Federation or are repatriated to the Russian Federation from abroad;
2. investments made in the authorized capital of credit institutions licensed to perform banking operations by subsidiary credit institutions of foreign banks licensed to perform banking operations, and all subsequent investments by said institutions in the authorized capital of credit institutions licensed to perform banking operations;
3. investments made before January 1, 2007, in the authorized capital of credit institutions licensed to perform banking operations;
4. investments made in the authorized capital of credit institutions licensed to perform banking operations, the privatization of which was performed after August 22, 2012;
5. investments representing 51% or more of the shares (equity stakes) in the authorized capital of a credit institution licensed to perform banking operations, performed after January 1, 2007, on the condition that said shares (equity stakes) are held by an investor for 12 or more years, unless the BR has adopted a decision before the expiration of this time period to continue to include said investments in the calculation and has published this decision. The procedure for the adoption by the BR of such a decision and for its publication is established by the BR.

The maximum level of participation of foreign capital in the aggregate authorized capital of credit institutions licensed to perform
banking operations is 50% (Federal Law No. 395-1 of December 2, 1990, “On Banks and Banking Activities”).

When the maximum level is reached, the BR performs the following measures with respect to foreign investments:

(1) it refuses to register a credit institution with foreign investments and to issue it a banking license;

(2) it imposes a ban on an increase in the authorized capital of a credit institution licensed to perform banking operations using nonresidents’ funds and on the conveyance of shares (equity stakes) in the credit institution in favor of nonresidents if such actions mean that the quota will be exceeded.

Shares (equity stakes) in a credit institution that have been conveyed (sold) in violation of such a ban are not voting shares and are not taken into account in determining a quorum at a general meeting of shareholders (stakeholders) of the credit institution for the period that such a ban is in effect. In the event that a transaction is performed to convey (acquire) shares (equity stakes) in a credit institution in violation of the ban, the BR files a petition requesting that the relevant transaction be declared null and void.

The measures provided for under the sixth part of Article 18 of the Federal Law on Banks and Banking are not applied with respect to foreign investments referred to under items 1 and 2 of the second part of Article 18 of the Law on Banks and Banking.

The measures provided for under item 2 of the sixth part of Article 18 of the Federal Law on Banks and Banking are not applied with respect to foreign investments intended for the authorized capital of credit institutions licensed to perform banking operations as defined in accordance with regulatory acts of the BR on the basis of international agreements of the Russian Federation.

The BR ceases to apply the measures provided for under the sixth part of Article 18 of the Federal Law on Banks and Banking in the event that the level of participation of foreign capital in the aggregate authorized capital of credit institutions licensed to perform banking operations is less than 50%.

The level of participation of foreign capital in the aggregate authorized capital of credit institutions licensed to perform banking operations is calculated by the BR following the procedure it establishes as of January 1 of each year.

Information about the level of participation of foreign capital in the aggregate authorized capital of credit institutions licensed to perform banking operations and about the indicators used for its calculation is subject to publication in the official publication of the BR, the Bulletin of the BR, and it is also posted on the official website of the BR no later than February 15 of the current year.

As of January 1, 2017, the level of participation of foreign capital in the aggregate authorized capital of credit institutions licensed to perform banking operations was 13.51%.

BR Regulation No. 626-P of December 28, 2017, established the procedure and criteria for assessing the financial position of individuals who perform a transaction aimed at acquiring more than 10% of shares of a credit institution and/or gaining control of shareholders of the credit institution. BR Regulation No. 625-P establishes the procedure for assessing the compliance by such persons with business reputation requirements.
The absolute value of the total of all long (short) open foreign exchange positions of a credit institution is limited to 20% of the credit institution’s equity (capital). The limits are subject to calculation and observance on a daily basis.

The calculation of open foreign exchange positions includes balance-sheet assets and liabilities, as well as off-balance-sheet claims and liabilities of credit institutions, the value of which depends on changes in the exchange rates of foreign currencies against the ruble set by the BR and/or the prices for precious metals (if a foreign exchange revaluation of such assets (claims) and liabilities has a direct (or deferred) impact on the amount of credit institutions’ equity (capital)).

The limits on open foreign exchange positions of credit institutions are 20% of the equity (capital) for all foreign currencies and precious metals and 10% of the equity (capital) for any individual foreign currency and precious metal. Included in the calculation are on-balance-sheet and off-balance-sheet positions denominated in foreign currency or are dependent on changes in the exchange rates of foreign currency or the official prices for precious metals. These limits are subject to calculation and observance on a daily basis. All types of a credit institution’s assets (claims) and liabilities (obligations) denominated in foreign currencies and/or precious metals that carry exchange rate risk, and/or in rubles, the size of which depends on changes in the relevant exchange rates of the foreign currencies against the ruble established by the BR, and/or changes in prices for precious metals, regardless of the jurisdiction of the customer/counterparty, are included in the calculation. With regard to the inclusion of positions arising from operations with nonresidents in the calculation of the open foreign exchange position, no additional conditions and/or restrictions are established.

Restrictions apply on certain types of activities of insurance companies that are subsidiaries of foreign investors or have a foreign ownership stake in their authorized capital of over 49%, other than insurance companies that were subsidiaries of foreign investors on the date Federal Law No. 234-FZ of July 23, 2013, went into effect, if they were previously authorized for such activity.

Thus, said insurance companies may not provide personal life, health, or property insurance in the Russian Federation at the expense of funds allocated for these purposes from the respective budget to federal executive government authorities (insured parties); insurance related to the procurement of goods, work, and services to meet state and municipal needs; or insurance for the property interests of government and municipal organizations. These restrictions do not apply to insurance companies that were subsidiaries of foreign investors on the date Federal Law No. 204-FZ of November 20, 1999, went into effect, if they were previously authorized for such activity. A quota of 50% was set on foreign capital in the authorized capital of insurance companies. If this percentage is exceeded, the insurance supervisory authority stops issuing licenses for the performance of insurance activities to insurance companies that are subsidiaries of foreign investors or have a foreign ownership stake in their authorized capital over 49%. As of January 1, 2019, the quota for participation by foreign capital in the authorized capital of insurance companies with an insurance license was 11.99%.

Insurance companies must obtain authorization for the following: (1) an increase in their authorized capital from funds of foreign investors and/or their subsidiaries; and (2) transfers of shares (equity stakes in
authorized capital) to a foreign investor (including for sale to foreign investors). Russian shareholders (stakeholders) must obtain authorization to transfer their shares (equity stakes) to foreign investors and/or their subsidiaries. Authorization may not be denied [sic]. The insurance supervisory authority denies prior authorization to insurance companies that are subsidiaries of foreign investors or that have a foreign ownership in their authorized capital exceeding 49% that attain this status as a result of the transactions indicated if the established quota of 50% is not exceeded when completing such transactions.

Limits (max.) on securities issued by nonresidents

There are no (maximum) limits on the investment (for example, of technical reserves) of insurance companies in securities issued by nonresidents.

Limits (max.) on investment portfolio held abroad

The total value of assets located outside of the Russian Federation in which an insurer’s equity (capital) is invested may not exceed 35% of the regulatory solvency margin or the minimum amount of authorized capital (the larger of the two indicators). Furthermore, the proportion of foreign assets in insurance reserves, with the exception of that accounted for by reinsurers who are not residents of the Russian Federation, may not exceed 30%.

Limits (min.) on investment portfolio held locally

There are no minimum requirements for investments locally.

Currency-matching regulations on assets/liabilities composition

No.

Pension funds

Yes.

Limits (max.) on securities issued by nonresidents

Yes.

For nonstate pension funds carrying the mandatory pension insurance, (1) assets denominated in a foreign currency must make up no more than 30% of the value of the investment portfolio; (2) securities of international financial institutions, as well as participation units (shares, stakes) of foreign index investment funds (including securities expected to be obtained and/or subject to transfer under the second part of a repurchase agreement) must, together, constitute no more than 20% of the value of the investment portfolio.

The total share accounted for by securities of governments of foreign states, securities of international financial institutions, shares of foreign joint-stock companies, bonds of foreign businesses, and shares (participation units) of foreign investment funds may constitute no more than 30% of pension reserves (resources intended for fulfilling obligations under voluntary insurance agreements).

Said paragraphs of Regulation No. 580-P have been in effect since July 13, 2017.

Limits (max.) on investment portfolio held abroad

Yes.

For nonstate pension funds carrying the mandatory pension insurance, (1) assets denominated in a foreign currency must make up no more than 30% of the value of the investment portfolio; (2) securities of international financial institutions, as well as participation units (shares, stakes) of foreign index investment funds (including securities expected to be obtained and/or subject to transfer under the second part of a repurchase agreement) must, together, constitute no more than 20% of the value of the investment portfolio.

The total share accounted for by securities of governments of foreign states, securities of international financial institutions, shares of foreign joint-stock companies, bonds of foreign businesses, and shares (participation units) of foreign investment funds may constitute no more than 30% of pension reserves (resources intended for fulfilling obligations under voluntary insurance agreements).
Said paragraphs of Regulation No. 580-P have been in effect since July 13, 2017.

| Limits (min.) on investment portfolio held locally | No. |
| Limits (max.) on securities issued by nonresidents | No. |
| Limits (max.) on investment portfolio held abroad | No. |
| Limits (min.) on investment portfolio held locally | No. |
| Currency-matching regulations on assets/liabilities composition | No. |

There are no maximum limits on the investments of investment firms and collective investment funds abroad, in securities issued by nonresidents, or minimum requirements for investments locally.

### Changes during 2018 and 2019

#### Exchange Arrangement

**Free floating**
- **01/01/2018** The condition that restricted the cumulative (from the beginning of operations) foreign exchange sales volumes not to exceed the cumulative purchase volumes was eliminated.
- **01/01/2018** Only the current exchange rate is used to calculate the amount of foreign exchange purchase/sales. Previously, the amount of foreign exchange purchases/sales took into account the difference between the current and budgeted exchange rates.
- **08/23/2018** The Bank of Russia announced the suspension of foreign exchange purchases until end-September 2018.
- **09/14/2018** The Bank of Russia announced the suspension of foreign exchange purchases until end-2018.
- **12/14/2018** The Bank of Russia Board of Directors decided to resume purchases starting from January 15, 2019. It was announced that deferred purchases could be performed gradually throughout 2019 and subsequent years (these purchases began on February 1, 2019, and it is assumed that they will be carried out regularly over 36 months).

#### Resident Accounts

**Foreign exchange accounts permitted**
- **01/01/2018** Federal Law No. 427-FZ of December 28, 2017, “On Amendments to the Federal Law on Currency Regulation and Currency Control” became effective. Any types of foreign exchange transactions on accounts (deposits) opened with banks abroad are allowed between residents that stay outside the territory of the Russian Federation in the aggregate for more than 183 days in a calendar year. The list of allowed foreign exchange transactions was expanded. These accounts (deposits) may be credited with funds (1) received by a resident from a nonresident for a vehicle sold to a nonresident under a purchase and sale agreement owned by an individual resident outside Russia; (2) received by a resident individual from a nonresident for real estate sold by a resident individual outside the territory of Russia to a resident individual.
nonresident under a purchase and sale agreement, provided such real
estate is registered (located) in the territory of a foreign state –
member of the OECD or FATF, and such a foreign state has joined
the multilateral agreement of the competent authorities on the
automatic exchange of financial information of October 29, 2014, or
another international agreement providing for the automatic exchange
of financial information, and at the same time an account of a
resident individual is opened at a bank located in the territory of such
a foreign country; (3) which are returned as taxes by the competent
authorities of the state of residence of the resident. The procedure for
notifying residents of accounts at banks abroad and reporting on such
accounts was changed. Individuals who are abroad in the aggregate
less than 183 days in a calendar year must notify the tax authority at
the place of registration no later than one month from the day of
account opening, changing of account details, or closure. If resident
individuals are abroad in the aggregate for more than 183 days in a
calendar year, then they are exempted for the period of their stay
abroad from submitting a notice to the tax authority. When returning
to Russia (if the period of the stay abroad in the aggregate was less
than 183 days in a calendar year), such an individual must notify the
tax authority of accounts abroad before June 1 of the year following
the reporting year.

01/01/2018
The requirement that individuals, at the time of the first transfer of
funds to their accounts opened at banks outside Russia from their
accounts at authorized banks, must present to the authorized bank the
notification of the opening of the account provided to the tax
authority where the resident is registered and acknowledgment of
receipt of that notification by the tax authority was lifted. Residents’
accounts at banks outside Russia may also be credited with funds
received as a result of the following: (1) if funds in rubles are
transferred from the account of another resident in Russia and if
funds in rubles are transferred from the account of another resident
abroad; (2) a gift of foreign exchange assets to a spouse or close
relatives.

03/18/2018
The following funds may also be credited to accounts of residents
abroad: those received as wages and other payments in foreign
currency outside the Russian Federation by resident individuals under
labor agreements with resident legal entities providing for the
performance by such resident individuals of their official duties
outside the Russian Federation.

09/01/2018
Funds received under operations related to the inheritance of foreign
exchange assets and the transfer of foreign exchange assets by an
estate to beneficiaries of the estate may also be credited to accounts
of residents abroad.

**Nonresident Accounts**

01/03/2018
Bank of Russia Regulation No. 181-I of August 16, 2017, replaced
Regulation No. 138-I of June 4, 2012, which, among other things,
abolished the requirement for transaction passports and established
the procedure for registering foreign trade contracts; reduced the
number of documents submitted to authorized banks for currency
control; raised the threshold for the amount of obligations for which
the contract or loan agreement is subject to mandatory registration.
The amount of obligations must be equal to or exceed the equivalent
of: 3 million rubles for import contracts or credit agreements and 6
million rubles for export contracts (previously, the threshold amount
of obligations under the contract or loan agreement was US$50,000);
submission to the authorized bank by residents of the documents
related to the conduct of foreign exchange transactions under

2019 ANNUAL REPORT ON EXCHANGE ARRANGEMENTS AND EXCHANGE RESTRICTIONS
INTERNATIONAL MONETARY FUND

©International Monetary Fund. Not for Redistribution
contracts with nonresidents is no longer required if the amount of obligations is equal to or exceeds 200,000 rubles.

**Imports and Import Payments**

Submission to the authorized bank by residents of the documents related to the conduct of foreign exchange transactions under any contracts with nonresidents is not required if the amount of obligations under them does not exceed 200,000 rubles.

In the case of a contract the obligations under which exceed the equivalent of 200,000 rubles but do not exceed the equivalent of 3,000,000 rubles, when debiting foreign currency from its account a resident must submit to the authorized bank documents related to the performance of the transaction, together with the order to debit the foreign currency.

In the case of an import contract the obligations under which are equal to or greater than the equivalent of 3,000,000 rubles, a resident must register the contract with an authorized bank.

The following are subject to registration with an authorized bank: (1) agreements, including agency agreements, commission agreements, and trust agreements providing for the importation of goods into the Russian Federation in the performance of foreign trade activity; (2) agreements providing for the purchase and/or performance of services related to the purchase within the Russian Federation (or outside the Russian Federation) of fuel and lubricants (bunker fuel), food, material and technical supplies, and other goods (with the exception of spare parts and equipment) necessary to ensure the operation and maintenance of vehicles, regardless of their type and purpose, en route or at intermediate stopping points or parking areas; (3) agreements, including agency agreements, commission agreements, and trust agreements, with the exception of agreements referred to under (1), (2), and (4), which provide for the performance of work, delivery of services, or the transfer of information and intellectual property, including exclusive rights thereto; (4) agreements providing for the transfer of movable and/or real property under a rental agreement or financial lease agreements (leasing).

To register a contract, a resident importer must present to an authorized bank an import contract (excerpt from a contract) containing information needed by the authorized bank for registration of the contract and the performance of foreign exchange control, including oversight of the resident’s compliance with repatriation requirements, as well as other information needed by the authorized bank.

A resident must register an import contract the obligations under which are equal to or greater than the equivalent of 3,000,000 rubles with an authorized bank no later than the date that a declaration of the goods or a document used as a declaration of the goods in accordance with the legislation on customs regulation is filed.

Previously, residents (excluding individuals) were required to set up a transaction passport at an authorized bank for each contract (credit agreement) with the total obligations equal to or greater than the equivalent of US$50,000.

**Exports and Export Proceeds**

Monitoring of residents’ compliance with the repatriation requirement is carried out within the framework of monitoring performed in accordance with Bank of Russia Instruction No. 181-I of August 16, 2017, on the Procedure for the Submission of Supporting Documents and Information by Residents and Nonresidents to Authorized Banks in the Performance of Foreign
Exchange Operations, on Standard Accounting and Reporting Forms for Foreign Exchange Operations, and the Procedure and Deadlines for their Submission.

Compliance with the repatriation requirement is not necessary: (1) when a resident provides foreign currency or the currency of the Russian Federation to a nonresident under a loan agreement related to the financing of geological research, exploration, and/or extraction of minerals, a list of which is given in Article 337 of the Russian Federation Tax Code, in the event that said loan agreement contains conditions stating that the repayment of the funds provided depends on the fact and volume of the extraction of minerals and/or the amount of earnings from their sale, and when conditions specified in the loan agreement occur the funds are not repaid; (2) when similar counterclaims under loan agreements between a resident and nonresident are offset, provided the nonresident’s counterclaim arose as a result of the granting of a loan to the resident through the crediting of funds to an account opened by the resident at an authorized bank; (3) when a resident provides foreign currency or the currency of the Russian Federation to a nonresident under a loan agreement related to the financing of investment and/or innovation activity, in the event that when conditions specified in the loan agreement occur the funds are not repaid in the amount of the resident’s investment in the authorized capital, securities, or acquisition of debt liabilities of the same nonresident, or in the event that the funds are not repaid owing to the nonresident’s insolvency (bankruptcy), and in this case the resident must meet one of the following conditions:

(a) the resident is a legal entity included in the list of legal entities providing state support for innovation activity in the forms established by Federal Law No. 127-FZ of August 23, 1996, on Science and State Science and Technology Policy, in accordance with Article 4, part 1.1, paragraph 1, subparagraph (e), of Federal Law No. 209-FZ of July 24, 2007, on the Development of Small and Medium-Sized Business in the Russian Federation;

(b) the resident is a commercial company, at least 50% of the shares in which (equity stakes in the authorized capital of which) are held by legal entities referred to under subparagraph (a) of this paragraph, or it is a commercial company in which legal entities referred to under subparagraph (a) of this paragraph have the right to directly and/or indirectly control at least 50% of the votes attributed to voting shares (equity stakes) comprising the authorized capital of the given commercial company;

(c) the resident is a managing partner of an investment partnership in which the share held by legal entities referred to under subparagraph (a) of this paragraph in the total property of the partners is at least 50%;

(d) the resident is an investment fund management company, at least 50% of the shares in which (investment units of which) are held by legal entities referred to under subparagraph (a) of this paragraph.

Compliance with the repatriation requirement is not necessary when counterclaims on obligations arising from agreements on the provision of international telecommunications services, including international roaming services, are offset between a nonresident and a resident that are international telecommunications operators, including situations in which settlements between them are performed through specialized settlement organizations registered within member states of the International Telecommunication Union.

Residents are not required to provide an authorized bank with documents related to the performance of foreign exchange operations under any contracts with nonresidents if the amount of obligations...
under them does not exceed 200,000 rubles.

In the case of a contract the obligations under which exceed the equivalent of 200,000 rubles, a resident must provide an authorized bank with documents related to the performance of foreign exchange operations under the given contract within the following time periods:

- when foreign currency is debited from an account, simultaneously with the order to debit the foreign currency;
- when foreign currency is credited, no later than 15 business days after the date it is credited.

In the case of an export contract the obligations under which are equal to or greater than the equivalent of 6,000,000 rubles, a resident must register the contract with an authorized bank.

The following are subject to registration with an authorized bank: (1) agreements, including agency agreements, commission agreements, and trust agreements providing for the export of goods from the Russian Federation in the performance of foreign trade activity, with the exception of the export (import) of securities in documentary form; (2) agreements providing for the sale and/or performance of services related to the sale within the Russian Federation (or outside the Russian Federation) of fuel and lubricants (bunker fuel), food, material and technical supplies, and other goods (with the exception of spare parts and equipment) necessary to ensure the operation and maintenance of vehicles, regardless of their type and purpose, en route or at intermediate stopping points or parking areas; (3) agreements, including agency agreements, commission agreements, and trust agreements, with the exception of agreements referred to under (1), (2), and (4), which provide for the performance of work, delivery of services, or the transfer of information and intellectual property, including exclusive rights thereto; (4) agreements providing for the transfer of movable and/or real property under a rental agreement or financial lease agreements (leasing).

A resident exporter that is planning to fulfill its obligations under an export contract must provide information to an authorized bank about the export contract that is needed for its registration (referred to hereinafter as information) or an excerpt from the export contract containing information needed by the authorized bank for registration of the export contract and the performance of foreign exchange control, including oversight of the resident exporter’s compliance with repatriation requirements, and other information needed by the authorized bank.

An export contract must be presented by a resident exporter to an authorized bank no later than 15 business days after the registration of the export contract by the authorized bank if information alone was provided by the resident exporter for the purpose of the contract’s registration.

Previously, passporting requirements applied.

A resident exporter that is planning to fulfill its obligations under an export contract must provide information to an authorized bank about the export contract that is needed for its registration (referred to hereinafter as information) or an excerpt from the export contract containing information needed by the authorized bank for registration of the export contract and the performance of foreign exchange control, including oversight of the resident exporter’s compliance with repatriation requirements, and other information needed by the authorized bank.

An export contract must be presented by a resident exporter to an authorized bank no later than 15 business days after the registration of the export contract by the authorized bank if information alone was provided by the resident exporter for the purpose of the
contract’s registration. Previously, residents (excluding individuals) were required to set up a transaction passport at an authorized bank for each contract (credit agreement) with obligations equal to or greater than the equivalent of US$50,000 at the official BR exchange rate.

**Proceeds from Invisible Transactions and Current Transfers**

**Repatriation requirements**

- **01/03/2018** Monitoring of residents’ compliance with the repatriation requirement is carried out within the framework of monitoring performed in accordance with Bank of Russia Instruction No. 181-I of August 16, 2017, on the Procedure for the Submission of Supporting Documents and Information by Residents and Nonresidents to Authorized Banks in the Performance of Foreign Exchange Operations, on Standard Accounting and Reporting Forms for Foreign Exchange Operations, and the Procedure and Deadlines for their Submission.

- **04/14/2018** Compliance with the repatriation requirement is not necessary: (1) when a resident provides foreign currency or the currency of the Russian Federation to a nonresident under a loan agreement related to the financing of geological research, exploration, and/or extraction of minerals, a list of which is given in Article 337 of the Russian Federation Tax Code, in the event that said loan agreement contains conditions stating that the repayment of the funds provided depends on the fact and volume of the extraction of minerals and/or the amount of earnings from their sale, and when conditions specified in the loan agreement occur the funds are not repaid; (2) when similar counterclaims under loan agreements between a resident and nonresident are offset, provided the nonresident’s counterclaim arose as a result of the granting of a loan to the resident through the crediting of funds to an account opened by the resident at an authorized bank; (3) when a resident provides foreign currency or the currency of the Russian Federation to a nonresident under a loan agreement related to the financing of investment and/or innovation activity, in the event that when conditions specified in the loan agreement occur the funds are not repaid in the amount of the resident’s investment in the authorized capital, securities, or acquisition of debt liabilities of the same nonresident, or in the event that the funds are not repaid owing to the nonresident’s insolvency (bankruptcy), and in this case the resident must meet one of the following conditions:
  
  (a) the resident is a legal entity included in the list of legal entities providing state support for innovation activity in the forms established by Federal Law No. 127-FZ of August 23, 1996, on Science and State Science and Technology Policy, in accordance with Article 4, part 1.1, paragraph 1, subparagraph (e), of Federal Law No. 209-FZ of July 24, 2007, on the Development of Small and Medium-Sized Business in the Russian Federation;
  
  (b) the resident is a commercial company, at least 50% of the shares in which (equity stakes in the authorized capital of which) are held by legal entities referred to under subparagraph (a) of this paragraph, or it is a commercial company in which legal entities referred to under subparagraph (a) of this paragraph have the right to directly and/or indirectly control at least 50% of the votes attributed to voting shares (equity stakes) comprising the authorized capital of the given commercial company;
  
  (c) the resident is a managing partner of an investment partnership in which the share held by legal entities referred to under subparagraph (a) of this paragraph in the total property of the partners is at least 50%;
(d) the resident is an investment fund management company, at least 50% of the shares in which (investment units of which) are held by legal entities referred to under subparagraph (a) of this paragraph. Compliance with the repatriation requirement is not necessary when counterclaims on obligations arising from agreements on the provision of international telecommunications services, including international roaming services, are offset between a nonresident and a resident that are international telecommunications operators, including situations in which settlements between them are performed through specialized settlement organizations registered within member states of the International Telecommunication Union.

Crawl-like arrangement | Yes. |

The de jure exchange rate arrangement is floating. The National Bank of Rwanda (BNR) has intervened directly to prevent undue fluctuations in the exchange rate. Since March 2015, the exchange rate has followed a depreciating trend within a 2% band against the US dollar. Accordingly, the de facto exchange rate arrangement is classified as a crawl-like arrangement. The BNR discloses its data on its interventions on the market.
Other managed arrangement
Floating
Free floating

Official exchange rate

Yes. The BNR’s official rate is based on the weighted average of the previous day’s market rates of foreign exchange interbank and BNR intervention transactions, if any. Otherwise, the BNR follows the trend of the previous day’s selling rates of commercial banks to their clients for transfer operations only. This methodology aims to unify the BNR middle rate by shifting to a market-based rate represented by foreign exchange interbank and intervention transactions. The rate is determined every morning and is the basis for financial institutions’ valuation of their financial assets.

Exchange tax  No.

Exchange subsidy  No.

Foreign exchange market  Yes. Authorized intermediaries freely set their exchange rates and commissions in transactions with their clients.

Spot exchange market  Yes. As of December 31, 2018, there were 16 banks, including 11 commercial banks, 20 microfinance institutions, 1 cooperative bank, 1 development bank, 439 licensed saving and credit cooperatives and 85 foreign exchange bureaus licensed by the BNR. The foreign exchange bureaus do not enter into transactions with the BNR and may not open accounts abroad. They may only purchase and sell banknotes and may not make foreign currency payments and transfers on behalf of their clients. The minimum capital requirement for foreign exchange bureaus is FRw 50 million since February 22, 2017. The BNR placed a moratorium on licensing new foreign exchange bureaus on February 22, 2017.

Operated by the central bank  Yes.

Foreign exchange standing facility  No.

Allocation  Yes. When market assessment indicates undue volatility in the market, the BNR announces to market participants its intention to intervene in the market.

Auction  No.

Fixing  No.

Interbank market  Yes. The interbank market operates on the basis of direct transactions between banks. As of December 31, 2018, there were 11 commercial banks licensed by the BNR to participate in the foreign exchange interbank market. There are no limits on the bid-ask spreads or commissions for market participants. The CB intervenes directly with market participants (commercial banks) at the preannounced
intervention rate based on the market rate.
The market operates over the counter.

Over the counter Yes. The market operates over the counter.

Brokerage No.  

Market making No.  

Forward exchange market Yes. A forward exchange market in which banks may take forward positions of 1 to 12 months on behalf of exporters and importers has been authorized but is not yet operational. The CB does not participate in the forward foreign exchange market. However, the BNR has entered into long-term foreign exchange swaps with commercial banks.

Official cover of forward operations No.

Arrangements for Payments and Receipts

Prescription of currency requirements No.

Controls on the use of domestic currency No.

For current transactions and payments No.

For capital transactions No.

Transactions in capital and money market instruments No.

Transactions in derivatives and other instruments No.

Credit operations No.

Use of foreign exchange among residents No. Residents may only trade in the domestic currency.

Payments arrangements Yes. Foreign exchange operations are governed by Regulation No. 05/2013 of October 21, 2013, “Governing Foreign Exchange Operations.”

Bilateral payments arrangements No.

Operative No.

Inoperative No.

Regional arrangements Yes. Payments to and from COMESA member countries are made through the Regional Payment and Settlement System (REPS), while payments with East African countries are made through the East African Payment System (EAPS). Both payments systems are operational.

Clearing agreements Yes. Rwanda participates in the COMESA and EAC clearing agreements.

Barter agreements and open accounts Yes. An arrangement exists with Uganda, but it is not operational.

Administration of control Yes. Foreign exchange authority is vested in the BNR, which has delegated the authority to authorized banks and foreign exchange bureaus.

Payments arrears No.

Official No.

Commercial credits No.

By residents to nonresidents No. Capital transactions on commercial credits are fully liberalized.

To residents from nonresidents No.

Financial credits No.

By residents to nonresidents No. Capital transactions on financial credits are fully liberalized.

To residents from nonresidents No. Resident financial institutions may lend to nonresidents according to the banking regulatory framework. There are reporting requirements for statistical purposes.

Guarantees, sureties, and financial backup facilities No.

Residents may freely contract loans in foreign currency from nonresident banks and international financial institutions to finance their activities, but they need to take into consideration the interest rate risks and ensure that the foreign exchange risk is mitigated. For statistical purposes, the loan agreement must be recorded with the BNR together with the following information: (1) contract identification number; (2) date of contract; (3) amount of loan; (4) loan currency; (5) reason for the loan; (6) interest rate; (7) commissions; (8) repayment period; (9) grace period; (10) maturity period; (11) frequency of payment; (12) existence of guarantee. Licensed banks no longer need a certificate of loan registration from the BNR before they may transfer interest and reimburse capital (Regulation No. 05/2013 of October 21, 2013, Governing Foreign Exchange Operations).
By residents to nonresidents No.
To residents from nonresidents No.
Controls on direct investment No. Inward and outward transactions on direct investment are fully liberalized. The key components of these transactions are (1) participation in a new or existing enterprise with a view to establishing or maintaining lasting economic links; (2) establishment and extension of branches or new enterprises belonging solely to the person providing the capital and the acquisition in full of existing enterprises; and (3) reinvestment of profits with a view to maintaining lasting economic links. Before repatriation, licensed intermediaries authorized to transfer foreign currency must request relevant supporting documents. There are some requirements for statistical purposes.

Outward direct investment No.

Inward direct investment No.

Controls on liquidation of direct investment No. Repatriation of current income relating to local investments, as well as the net profit from liquidation of capital invested by transfers of foreign currency to the country, may be freely carried out by licensed banks with supporting documents.

Controls on real estate transactions No.

Purchase abroad by residents No.

Purchase locally by nonresidents No.

Sale locally by nonresidents No.

Controls on personal capital transactions No. Licensed banks may approve applications from Rwandan resident entities related to personal transactions on the basis of the transaction’s documentary evidence. The key components of those transactions include the following: (1) loans, gifts, and endowments; (2) dowries; (3) inheritances and legacies; (4) settlement of debts by persons in their previous country of residence; (5) transfers of residents’ assets in the event of emigration at the time of their move and during their period of stay abroad; (6) transfers, during their period of stay, of persons’ savings to their previous country of residence; (7) death taxes; (8) damages; and (9) refunds in the case of cancellation of contracts and refunds of uncalled for payments. Licensed banks must be satisfied with the documentary evidence of payment due. The KYC principle must be observed at all times.

Loans No.

By residents to nonresidents No.

To residents from nonresidents No.

Gifts, endowments, inheritances, and legacies No.

By residents to nonresidents No.

To residents from nonresidents No.

Settlement of debts abroad by immigrants No.

Transfer of assets No.

Transfer abroad by emigrants No.

Investment regulations Yes. Commercial banks’ investments are subject to the prudential standards observed (foreign and local investment, exchange exposure limits, and the KYC principle).

**Abroad by banks** Yes. Regulation No. 06/2011 on Banking Placement applies (Article 5). Banks must observe the quantitative limits and prohibition set forth in Article 5 of the regulation.

**In banks by nonresidents** Yes. Regulation No. 05/2013 of October 21, 2013, Governing Foreign Exchange Operations and Regulation No. 10/2011 on Shareholding in Banks apply (Article 4). The approval from the CB is required, and a natural person cannot exceed 25% of the shares.

Open foreign exchange position limits Yes. Long and short foreign exchange positions are subject to limits of ±20% of banks’ capital and reserves. Banks’ foreign exchange positions may not exceed the limit for two consecutive business days.

**On resident assets and liabilities** Yes. Open foreign exchange position limits apply for both resident and nonresident assets and liabilities. Long and short foreign exchange positions are subject to limits of ±20% of banks’ capital and reserves. Banks’ foreign exchange positions may not exceed the limit for two consecutive business days.

**On nonresident assets and liabilities** Yes. Open foreign exchange position limits apply for both resident and nonresident assets and liabilities. Long and short foreign exchange positions are subject to limits of ±20% of banks’ capital and reserves. Banks’ foreign exchange positions may not exceed the limit for two consecutive business days.

**Provisions specific to institutional investors** Yes.

**Insurance companies** No. There are no restrictions, provided they comply with Regulation No. 12/2009 of October 13, 2009, on Market Conduct Requirements for Insurers and Insurance Intermediaries and Regulation No. 001/2010 of October 28, 2010, relating to market capacity facilitation for foreign insurers apply.

**Limits (max.) on securities issued by nonresidents** No. No applicable regulation.

**Limits (max.) on investment portfolio held abroad** No. No applicable regulation.

**Limits (min.) on investment portfolio held locally** No. Regulation No. 05/2009 of July 29, 2009, on licensing requirements and other requirements for carrying out insurance business applies. Article 20 on investments operations sets limits on asset allocation for various investment classes as percentage of total assets.

**Currency-matching regulations on assets/liabilities composition** No. No applicable regulation.

**Pension funds** Yes. Regulation No. 05/2016 of September 26, 2016, of the BNR established operational and other requirements for pension schemes.

**Limits (max.) on securities issued by nonresidents** Yes. A pension scheme may not invest more than 15% of the total value of its assets outside Rwanda (Regulation No. 05/2016, of September 26, 2016, Article 26).

**Limits (max.) on investment portfolio held abroad** Yes. A pension scheme may not invest more than 15% of the total value of its assets outside Rwanda (Regulation No. 05/2016, of September 26, 2016, Article 26).
Limits (min.) on investment portfolio held locally
No.  No such limits apply.

Currency-matching regulations on assets/liabilities composition
No.  No currency-matching regulations apply.

Investment firms and collective investment funds
No.  No restrictions as long as they comply with Law No. 40/2011 of September 20, 2011, which regulates collective investment funds in Rwanda. Collective investment funds are regulated by the Capital Market Authority. Residents and nonresidents are treated the same.

Limits (max.) on securities issued by nonresidents
No.

Limits (max.) on investment portfolio held abroad
No.

Limits (min.) on investment portfolio held locally
No.

Currency-matching regulations on assets/liabilities composition
No.

Exchange Arrangement

Currency Yes. The currency of Samoa is the Samoan tala.

Other legal tender No.

Exchange rate structure

Unitary Yes.

Dual

Multiple

Classification

No separate legal tender

Currency board

Conventional peg Yes.

The CBS Act of 2015 states that the CBS is responsible for setting the exchange rate. The exchange rate arrangement is a conventional peg vis-à-vis a currency composite of currencies of its major trading partners. Currencies included in the Samoan tala basket are the US dollar, New Zealand dollar, Australian dollar, and euro. Annual reviews of the currency weights in the Samoan tala basket reflect the payment pattern of Samoa’s trade in goods and travel receipts in the previous calendar year. The Samoan tala fluctuates based on the movements of the currencies within the basket. The CBS stands ready to maintain the stability of the nominal value of the Samoan tala through a direct adjustment, if necessary and relevant. This is only considered when the authorities identify a significant adverse economic impact on the Samoan economy from any unforeseen major event (externally or domestically).
The Samoan tala continues to be pegged to a basket of the currencies of Samoa’s main trading partners – Australia, New Zealand, USA, and Euro. The currency weights are reviewed on an annual basis, taking into account Samoa’s distribution of trade and travel transactions between Samoa and its main trading partners. The CBS Board of Directors endorses the outcomes of these annual reviews within the first quarter of each year. A review of the 2018 currency basket weights was endorsed by the CBS Board of Directors, effective February 1, 2018.

The exchange rate may be adjusted within a ±2% range at the discretion of the Governor, however for adjustments greater than ±2% the approval of the CBS Board is necessary. Only the CBS may decide on a change in the exchange rate arrangement, if it is deemed necessary after extensive study. The official exchange rate is used for accounting and valuation purposes.

The primary monetary policy objective of the CBS is price stability, while ensuring sustained economic growth and adequate level of foreign exchange reserves. Operationally, the CBS targets reserve money (primarily, the commercial banks’ excess reserve level, that is, demand deposit balances of the commercial banks held at CBS, private sector credit growth, and M2), using the level of CBS securities to influence liquidity. Monetary policy is implemented through open-market operations with CBS securities that have tenors ranging from 14 days to 365 days. But the turnover is low. There is no secondary market for CBS securities. Interbank trading on securities and foreign exchange is very limited, and the local money market remains shallow. The CBS monitors inflation (to ensure it does not exceed 3%), private sector credit growth, and foreign exchange reserves, with the exchange rate policy offering a complementary role to ensure imported inflation is contained and to ensure the competitiveness of Samoa’s external sector, where necessary given the small size of the economy.

Foreign exchange market Yes. Authorized banks may freely determine their bid-ask spreads and foreign exchange commissions, except for the US dollar, with their clients. A bid-ask spread of 170 basis points is set for the US dollar.
by the CBS, within which commercial banks may determine their
spreads and commissions. Other participants in the foreign exchange market, namely authorized
money changers, are allowed to freely determine their bid-ask
spreads and foreign exchange commissions. The CB, however,
collects and monitors these data to ensure the exchange rates offered
to the general public are consistent with those by authorized banks.

There are 4 commercial banks and 12 authorized foreign exchange
dealers as of December 31, 2018. Of the 12 authorized foreign
exchange dealers, 11 are authorized to provide both money exchange
and money transfer services for their clients, and 1 is solely an
authorized money changer authorized to purchase and sell foreign
currency banknotes. In contrast to authorized commercial banks, the
operations of authorized money transfer operators (MTOs) and
money changers are limited in the types of transactions that can be
carried out. Authorized MTOs may conduct some foreign exchange
transactions similar to authorized commercial banks (for example,
make payments between Samoa and the rest of the world), while
authorized money changers are licensed by CBS to only buy and sell
foreign currency banknotes (in exchange with Samoan tala) in
Samoa. The minimum capital requirement placed on authorized
money changers is SAT 30,000.

Authorized money exchange businesses may not conduct foreign
exchange transactions directly with the CBS. Only the commercial
banks may buy and sell US dollars directly with the CBS.

There is no capital market in foreign currencies yet.

### Operated by the central bank

Yes.

When dealing with commercial banks, the CBS deals at the spot
exchange rate valued two days later.

### Foreign exchange standing facility

Yes.

The CBS sells and buys foreign currency, currently US dollars, in the
foreign exchange market at the request of commercial banks. The
bid-ask spread is 20 basis points around the official midrate. Aside
from local commercial banks, the CBS also sells and buys US dollars
from World Bank finance institutions (International Bank for
Reconstruction and Development (IBRD) and International
Development Association(IDA)). The CBS also transacts with the
government, as its bank: the CBS may buy foreign currency funds
relating to government and sell the Samoan tala in exchange, and
provide payment services for foreign exchange payments abroad.

The CBS does not allocate a specific amount of foreign currency to
its AD banks; it buys and sells foreign exchange at the banks’
request, mainly to cover for any short position in the banking system.
For the purpose of foreign exchange reserves management, the CBS
generally asks commercial banks the purpose and source of
substantial sums of foreign exchange sold or bought. The CBS
generally does not verify these major transactions—deemed normal
foreign exchange flows for regular clients’ large payments for
imports, including for oil—according to any particular conditions.
However, where a major transaction includes a CBS approved
overseas capital payment, verification is made by reference to the
Exchange Control approval, if any. Overseas capital payments are
sometimes given a set payment date, so the actual timing and
occurrence of these flows may be verified. However, most overseas
capital payments, including dividend repatriation (to parent
companies or headquarter office abroad), may be made anytime
within 30 days of CBS approval, so timing and occurrence cannot be
verified. Commercial banks are sometimes able to service these
flows with their own foreign currency holdings rather than by
purchasing US dollars from the CBS. Some flows (for example,
forward exchange contracts) are expected to be self-sourced and do
not require US dollar purchases from the CBS.

Commercial banks may buy and sell foreign exchange among themselves. If they cannot obtain or sell their foreign exchange in the interbank market, they may buy from or sell (US dollars only) to the CBS. Interbank market participants are the four licensed commercial banks (ANZ Bank, Bank of South Pacific, National Bank of Samoa, and Samoa Commercial Bank). The CBS does not impose limits on the bid-ask spread for foreign exchange trade in the interbank market.

When dealing among themselves, commercial banks deal on the spot and settle/value the deal two days later.

Commercial banks deal directly with each other on the interbank market; there is no broker between the buyer and seller.

The interbank market operates under an arrangement whereby the transacting participants mutually agree to a single exchange rate at which they may trade foreign exchange. For instance, commercial banks might agree to use the CBS midrate for US dollars to buy or sell US dollars among themselves.

Commercial banks are permitted to make forward exchange contracts. The CBS does not participate in the foreign exchange derivatives market.

This information can be found at the AREAER ONLINE database: http://www.elibrary-areaer.imf.org/Pages/Reports.aspx.

**Arrangements for Payments and Receipts**

**Prescription of currency requirements** Yes.

<td>The CBS has overall responsibility for the administration of foreign exchange control: it delegates some authority to AD banks and selected foreign exchange dealers. In principle, all capital payments to nonresidents require CBS approval; however, commercial banks and foreign exchange dealers (MTOs) may approve most current payments without limits, with supporting documentation, usual due diligence, and compliance with anti-money-laundering requirements. There is no limit on money transfer companies’ transfers for current payments. Banks and money transfer companies may transfer unlimited amounts for advance payments and import payments, with documentation. Other current transactions are still subject to specified limits. For example, authorized foreign exchange dealers and commercial banks may purchase and sell foreign exchange cash equivalent to up to SAT 20,000 an individual for travel purposes. Larger amounts that are to be hand carried during travel abroad require CBS approval.</td>

business may open, with CBS approval, foreign currency deposit accounts with one of the four AD banks. CBS approval is granted only, subject to appropriate documentation, to those who are genuine earners of foreign exchange and have a genuine need to settle overseas commitments with foreign exchange.

Prior CBS approval is required for the transfer of funds abroad for capital transactions and some current payments (namely, management fees, dividends to foreign shareholders, insurance and/or reinsurance premiums of CBS-licensed institutions). A Balance of Payments (BOP) form to be authorized by the CBS is required to be submitted to the commercial banks and/or MTOs for processing of payment. If funds are moved for the purpose of current payments (for example, imports), AD banks and MTOs delegated by the CBS may effect payment and, effective March 1, 2018, complete foreign exchange payment details on their respective telegraphic transfer (TT) form, for later submission electronically to the CBS with the appropriate supporting documentation at the end of the month (previously, they filled out BOP forms on their clients’ behalf and submitted it to the CBS with the appropriate supporting documentation at the end of the month).

### Held abroad

- **Yes.** If foreign exchange accounts held abroad are for the purpose of investments in those countries, prior CBS approval is required, as part of Exchange Control regulations relating to capital payment transactions. In general, however, in the case of residents who also have dual citizenship, this is difficult to monitor or ascertain.

### Approval required

- **Yes.** CBS approval is required to hold foreign exchange accounts abroad mainly if it relates to investments overseas by residents.

### Accounts in domestic currency held abroad

- **No.** Exports of domestic currency are subject to exchange control regulations. However, there is no specific clause in the regulations indicating that accounts denominated in tala may or may not be held abroad.

### Accounts in domestic currency convertible into foreign currency

- **Yes.** CBS approval is required to convert from domestic currency account to foreign currency, only in relation to capital payment transactions. In other cases funds from a domestic currency account in Samoa may be converted to foreign currency consistent with the delegated authorities granted to AD banks.

### References to legal instruments and hyperlinks

This information can be found at the AREAER ONLINE database: http://www.elibrary-areaer.imf.org/Pages/Reports.aspx.

### Nonresident Accounts

- **Foreign exchange accounts permitted**
  - Yes. Nonresidents who earn foreign exchange may open a foreign currency deposit account with any of the commercial banks without CBS approval.
  - Funds from these accounts may be freely transferred abroad for any current international transaction.
  - Prior CBS approval is required only when foreign exchange accounts of nonresidents held in Samoan banks are closed and funds are requested to be transferred overseas. Effective August 1, 2018, transfers up to the equivalent of SAT 50,000 from a closed foreign exchange account of a nonresident may be authorized and processed by the commercial banks. Amounts in excess of SAT 50,000 equivalent require prior CBS approval. Previously, any amount required CBS approval.

### Approval required

- **No.**

### Domestic currency accounts

- **Yes.** External Accounts are accounts in Samoan tala held by individuals,
organizations, or entities that are regarded as nonresident with authorized banks under Exchange Control purposes. Opening domestic currency accounts does not require CBS approval, but there are restrictions on the types of funds in Samoan tala that may be credited to these accounts as follows.

External Accounts may be credited with funds sourced from the following: (1) interest payable on the account; (2) payments from other External Accounts; (3) payments by residents of Samoa for which permissions have been given either under a delegated authority given to the banks in an Exchange Control notice or specifically by the CB; (4) the proceeds of sale of foreign currency by the account holder sourced externally or remaining from travel funds; (5) the proceeds of Samoan currency notes received from the account holder when he is leaving Samoa after a temporary visit provided the authorized bank maintaining the account is reasonably satisfied that the notes were obtained in Samoa by the sale of foreign currency or by the debit of an External Account or were brought into the country by the traveler; (6) salaries and wages due from employment in Samoa.

External Accounts may be debited with: (1) payments to residents of Samoa; (2) payments to other External Accounts; (3) payments in cash in Samoa; (4) cost of foreign exchange facilities for travel purchased in accordance with EC Notice 9; (5) cost of foreign currency purchased by the account holder in accordance with Notice EC Notice 5; and (6) payment in foreign currency to nonresidents.

Banks are authorized to debit an External Account without any limits within their delegated authority, except for capital transactions, which still requires CBS approval. An Exchange Control BOP2 form is to be completed at all times, as required by CBS. There is an exemption from these exchange control requirements for official accounts of diplomatic corps (for example, embassies, delegations, consulates and offices of high commissioners, UN agencies).

| Convertible into foreign currency | Yes. |
| Approval required | No. |
| Blocked accounts | No. |
| References to legal instruments and hyperlinks | This information can be found at the AREAER ONLINE database: http://www.elibrary-areaer.imf.org/Pages/Reports.aspx. |

Imports and Import Payments

| Foreign exchange budget | No. |
| Financing requirements for imports | No. |
| Minimum financing requirements | No. |
| Advance payment requirements | No. |
| Advance import deposits | No. |
| Documentation requirements for release of foreign exchange for imports | Yes. |
| Domiciliation requirements | No. |
| Preshipment inspection | Yes. |

The following documents are required before a bank or a MTO may process a payment of imports. For goods already arrived and cleared by the Samoa Customs: original suppliers’ invoices stating the value of imported goods, original bill of lading or airway bill with details...
of current shipment/cargo, and relevant original customs documents on receipt of goods in Samoa. There is no limit on the amount. For advanced import payments, prior to shipment of goods: pro forma invoice from supplier stating request for payment prior to shipment of goods and original customs SAD documents for stamping within 30 days of arrival of goods in Samoa. There is no limit on the amount.

Letters of credit  Yes. Commercial banks may accept invoices from importers in addition to LCs.

Import licenses used as exchange licenses  No.

Other  No.

Import licenses and other nontariff measures  Yes.

Positive list  Yes.

Negative list  Yes. The importation of a few products is prohibited for reasons of security or health or as a result of trade agreements, such as PICTA. Importation of refrigerators that use chlorofluorocarbons is prohibited for environmental reasons. Honey is also prohibited for reasons of biosecurity and the protection of the local industry. There are also restrictions on the importation of meat and meat products from Asia. The importation of non-biodegradable plastic bags is prohibited, as well as any pornographic material. Drugs and firearms are also on the negative list. Effective March 22, 2018, the ban on domestic commercial sale of turkey tails was lifted, allowing their importation for commercial sale. Previously, they could only be imported for personal use subject to a 300% duty.

Open general licenses  Yes. Importation of motor vehicles requires a license; however, there are no quantitative restrictions on the number of vehicles that may be imported. Imports of meat, meat products, livestock, and plants and plant products in commercial consignments are usually covered under OGLs. Private consignments are limited, but there is flexibility, depending on the reasons why an applicant requests for amounts more than necessary for private individual consumption.

Licenses with quotas  No. Most licenses for general imports do not have quantitative limits. The government may allow importers to bring in goods up to a certain value free of duty. Imports exceeding this value are subject to the usual duty rates.

Other nontariff measures  Yes. Imports of motor vehicles more than 10 years old are prohibited as are imports of eggs without expiration dates on their carton. For regulated imports (for example, eggs, meat, meat products, livestock, plants, plant products) the exporting country must comply with Samoa Quarantine Service requirements. Regulated imports of meat and meat products must have a health certificate from the exporting country to obtain an Samoa Quarantine Service import permit. For plants and plant products, a phytosanitary certificate is required.

Import taxes and/or tariffs  Yes. Import duties are levied on an ad valorem basis on the c.i.f. value. There are four general rates of duty—0%, 5%, 8%, and 20%. Duty on machinery and agricultural imports is 8% and 5%, respectively; there is no longer duty on motor vehicles, but an excise tax is imposed according to the vehicle’s manufacture year and engine capacity. In addition, there is an import excise tax on imports of alcohol, soft drinks, tobacco, and petroleum. Companies that produce for export may receive full or partial exemption from duty and excise taxes on inputs and capital equipment. Amendments to the Customs Act of 1977 have been passed to ensure compliance with WTO requirements and for other related purposes.
There is a Value Added Goods and Services Tax of 15%, which applies to both imported and locally produced goods and services and is added to the price of taxable goods and services. Businesses with annual turnover of SAT 78,000 or more from taxable activities must register with the Ministry for Revenue to pay the tax and submit tax returns at regular periods.

This information can be found at the AREAER ONLINE database: http://www.elibrary-areaer.imf.org/Pages/Reports.aspx.

**Exports and Export Proceeds**

**Repatriation requirements**
Yes. Export proceeds (of individuals or businesses) must be received no later than two months from shipment date if exporting to countries other than American Samoa, and within one month of shipment date if going to American Samoa.

All export proceeds must be realized through an authorized foreign exchange dealer (that is, authorized commercial bank or MTO). Export proceeds may not, for any purpose, be utilized and/or retained abroad for an extended period, without approval of the CBS. The CBS allows exporters (individuals or businesses) to credit their foreign currency accounts with export proceeds and to debit them to meet import payments and other business-related commitments as approved by the CB at the time of application for such accounts. The exporters have the discretion to sell to the banks any foreign currency from their accounts for Samoan tala. Confirmation of receipts of export proceeds can be in the form of a bank statement from the authorized banks stating credits of proceeds or receipts of funds received through a MTO.

**Surrender requirements**
No.

**Surrender to the central bank**
No.

**Surrender to authorized dealers**
No.

**Financing requirements**
No.

**Documentation requirements**
Yes. In addition to LCs, commercial invoices, certificates of value and origin, and bills of lading are now accepted by commercial banks for documentation requirements.

**Guarantees**
No.

**Domiciliation**
No.

**Preshipment inspection**
Yes. The Customs Department examines export documents. The Samoa Quarantine Service may inspect and certify items for export if a phytosanitary or a health certificate is required by the country to which the goods are exported.

**Other**
No.

**Export licenses**
Yes. Exporters must be registered with the CBS prior to any shipments departing from Samoa. Export of certain agricultural products may be prohibited by the Minister of Agriculture and Fisheries on grounds of low quality or by order of the Head of State to alleviate domestic
shortages or for any reasons deemed necessary from time to time.

With quotas  No.

Export taxes  No.

Collected through the exchange system  No.

Other export taxes  No.

References to legal instruments and hyperlinks  This information can be found at the AREAER ONLINE database:
http://www.elibrary-areaer.imf.org/Pages/Reports.aspx.

Payments for Invisible Transactions and Current Transfers

Controls on these transfers  Yes.  Prior CBS approval is required for certain current transaction payments abroad for services. These include payments overseas of management fees, insurance/reinsurance premiums by CBS-licensed institutions (for example, banks, MTOs and insurance companies) and dividends.

Trade-related payments  Yes.  ADs may approve these payments, provided applicants submit relevant documentary proof.

Prior approval  No.

Quantitative limits  No.

Indicative limits/bona fide test  Yes.  Applicants have to submit documentary proof.

Investment-related payments  Yes.

Prior approval  Yes.  There may be limits on the amount that may be remitted abroad subject to prevailing liquidity and economic conditions in Samoa. Resident individuals or companies remitting investment-related payments abroad must obtain CBS approval and provide documentary proof for the amount of such payments. If a single transaction is so large that it would severely affect the CB’s level of foreign reserves, the payment must be made in installments instead of as a single large payment. Effective August 1, 2018, the approval for transfer abroad of investment funds withdrawn by individuals from local nonbank financial institutions (for example, investments with the Unit Trust of Samoa, contribution funds with the Samoa National Provident Fund; as part of migration overseas) was delegated to commercial banks and MTOs for amounts up to SAT 30,000. Larger amounts still require CBS approval.

Quantitative limits  No.

Indicative limits/bona fide test  Yes.  There are no indicative limits, and approval is granted if documentation requested by the CB is provided. If a single transaction is so large that it would severely affect the CB’s level of foreign reserves, the payment must be made in installments instead of as a single large payment.

Payments for travel  Yes.

Prior approval  Yes.  Amounts exceeding SAT 20,000 (equivalent in foreign currency) a person a trip may be purchased with CBS approval in the event the traveler is hand carrying the foreign funds during his/her travel across borders.

No prior approval is required if travel funds are to be transferred through the banks or MTOs.

Quantitative limits  Yes.  Residents and expatriates traveling overseas may purchase from commercial banks foreign currency equivalent to SAT 20,000 a
person a trip. Larger amounts may be purchased with CBS approval in the event the traveler is hand carrying the foreign funds during his/her travel across borders.

### Indicative limits/bona fide test

<table>
<thead>
<tr>
<th>Personal payments</th>
<th>Yes.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Prior approval</td>
<td>Yes.</td>
</tr>
</tbody>
</table>

Valid travel documents, such as a return airline ticket, passport, and visa, are required.

### Prior approval

Prior approval is only required if payment for family support exceeds, effective August 1, 2018, SAT 50,000 an applicant a year (previously, SAT 20,000 an applicant a year). Family support refers to assisting with daily living expenses for family overseas. It does not cover family alimony/maintenance.

### Quantitative limits

Payment for family support exceeding, effective August 1, 2018, SAT 50,000 an applicant a year (previously, SAT 20,000 an applicant a year) requires CBS approval. Family support refers to assisting with daily living expenses for family overseas. It does not cover family alimony/maintenance.

### Indicative limits/bona fide test

There are no limits on remittances for medical treatment abroad; however, documentary evidence is required. There is no specific limit on costs for study abroad, but the amount requested must be supported by documentary evidence that the beneficiary is enrolled at an educational institution abroad and that the costs are in line with the prevailing costs in the country of study.

### Foreign workers' wages

Expatriate workers with local contracts of one year and longer are considered residents; however, they are not required to obtain CBS approval if they wish to repatriate their net earnings during their contract period. Earnings not repatriated during the contract period may be repatriated at the end of the contract period.

Regulations on nonresident domestic currency accounts apply. Prior CBS approval is required when foreign exchange accounts of nonresidents held in Samoan banks are closed (for example, at the end of a foreign worker’s contract) and funds are requested to be transferred overseas. Effective August 1, 2018, transfers up to the equivalent of SAT 50,000 from a closed foreign exchange account of a nonresident may be authorized and processed by the commercial banks. Amounts in excess of SAT 50,000 equivalent require prior CBS approval. Previously, any amount required CBS approval.

### Quantitative limits

No.

### Indicative limits/bona fide test

Foreign workers who wish to remit wages abroad must confirm to the AD banks that they are expatriates and provide supporting documents, such as an employment permit or visa, confirmation of the salary earned, other employment documents that verify the legitimacy of the source of the income, and documents to support the purpose of the remittance abroad.

### Credit card use abroad

The CBS does not regulate the use of credit cards, which is typically up to commercial banks.

### Prior approval

In the event that the credit card is used for a foreign capital payment, prior CBS approval would be required. However, because of known limits on credit cards, it would be unlikely that any capital payments would require the use of credit cards.

### Quantitative limits

No. The CBS places no quantitative limits on credit card use abroad. However, because AD banks issue the credit cards, it is their responsibility to ensure that their use complies with the foreign exchange limits on outward transfers under the Exchange Control regulations.
###SAMOA

**Indicative limits/bona fide test**  
**No.** Verification of the use of credit cards is the responsibility of the commercial banks that issue them.

**Other payments**  
**Yes.**

**Prior approval**  
**No.** These are delegated to AD banks and MTOs to process and do not require prior CBS approval.

**Quantitative limits**  
**No.** There are no quantitative limits. However, the applicant must satisfy the CBS’ request for relevant supporting documentation.

**Indicative limits/bona fide test**  
**Yes.** There are no specific limits on subscriptions and membership fees; amounts requested must be supported by documentary evidence.

**References to legal instruments and hyperlinks**  
This information can be found at the AREAER ONLINE database: [http://www.elibrary-areaer.imf.org/Pages/Reports.aspx](http://www.elibrary-areaer.imf.org/Pages/Reports.aspx).

###Proceeds from Invisible Transactions and Current Transfers

**Repatriation requirements**  
**Yes.** There is no specific time limit before which proceeds from invisible transactions and transfers are to be repatriated back to Samoa. Generally, the export of services would require the receipt of funds into the Samoan banking system immediately following the service rendered. Otherwise, the same rules apply as in the export of goods. Specifically, export proceeds must be received no later than two months from shipment date if exporting to countries other than American Samoa, and within one month of shipment date if going to American Samoa. The CBS allows exporters (individuals or businesses) to credit their foreign currency accounts with export proceeds and to debit them to meet import payments and other business-related commitments as approved by the CB at the time of application for such accounts. The exporters have the discretion to sell to the banks any foreign currency from their accounts for Samoan tala.

**Surrender requirements**  
**Yes.**

**Surrender to the central bank**  
**No.**

**Surrender to authorized dealers**  
**Yes.** On their return, resident travelers must sell to banks all unused foreign exchange they bring in to Samoa. There is no deadline for the sale of unused foreign exchange by resident travelers.

**Restrictions on use of funds**  
**No.**

**References to legal instruments and hyperlinks**  
This information can be found at the AREAER ONLINE database: [http://www.elibrary-areaer.imf.org/Pages/Reports.aspx](http://www.elibrary-areaer.imf.org/Pages/Reports.aspx).

###Capital Transactions

**Controls on capital transactions**  
**Yes.** Most of capital transfers or payments require CBS approval. Local money markets remain shallow. There is currently no capital market in foreign currencies in Samoa.

**Repatriation requirements**  
**Yes.** There is no deadline for the repatriation of proceeds from capital transactions made abroad by a resident. However, any expected dividend flows that are due from the approved capital investment abroad are expected to be repatriated into Samoa.

**Surrender requirements**  
**Yes.**

**Surrender to the central bank**  
**No.**

**Surrender to authorized dealers**  
**Yes.** There is no deadline for the surrender of proceeds from capital transactions made abroad by a resident to AD. However, residents are required to sell their foreign exchange receipts to commercial banks or authorized money changers.

The CBS does not impose reserve requirements, liquid asset requirements, or interest on foreign exchange deposit accounts at commercial banks and credit institutions. However, approval from the CBS is required for residents intending to open and hold domestically any foreign currency account, as well as in the case of foreign currency loans by residents.

The CBS does not impose reserve requirements on foreign exchange deposit accounts at commercial banks and credit institutions, but it imposes a 4.5% reserve requirement on commercial banks’ domestic currency deposit accounts.

All domestic currency deposit accounts are captured in the 4.5% reserve requirement imposed by the CBS on commercial banks’ domestic currency deposit accounts, even if an account holder is a nonresident. However, foreign currency accounts of nonresidents are not included in the 4.5% reserve requirement.

The liberalization of the financial sector led to the elimination of all direct CBS controls on credit operations. Commercial banks must now regulate and monitor their own credit operations.

Commercial banks generally set their own limits on open foreign exchange positions for each currency; however, these limits must be approved by the CBS. Commercial banks do not have different limits for resident and nonresident assets and liabilities.

The Insurance Act, 2007, authorizes the CBS to carry out prudential supervision of insurance companies. These limits are not specifically defined. However, investment involving the outflow of foreign exchange is subject to the Exchange Control Regulations, 1999, and may therefore require CBS approval and documentation.

Although the Insurance Act, 2007, does not specify a maximum for insurance companies’ investments held abroad, any investment involving the outflow of foreign exchange is subject to the Exchange Control Regulations, 1999, and may therefore require CBS approval and documentation.

Investments held abroad require CBS approval under the Exchange Control Regulations, 1999. Documentation is required.

There are no limits on these investments, but they are subject to CBS’ exchange control regulations.

These limits are not specifically defined. However, investment involving the outflow of foreign exchange is subject to the Exchange Control Regulations, 1999, and may therefore require CBS approval and documentation.

These limits are not specifically defined; however, how much these investment firms are permitted to hold in portfolios abroad will depend on prevailing liquidity conditions in the financial system and are subject to CBS’ exchange control regulations.

This information can be found at the AREAER ONLINE database: http://www.elibrary-areaer.imf.org/Pages/Reports.aspx.

Changes during 2018 and 2019

Exchange Arrangement

**Payment for family support exceeding SAT 50,000 an applicant a year (previously, SAT 20,000 an applicant a year) requires Central Bank of Samoa approval. Family support refers to assisting with daily living expenses for family overseas. It does not cover family alimony/maintenance.**

#### Capital Transactions

**Transfers up to the equivalent of SAT 50,000 from a closed foreign exchange account of a nonresident may be authorized and processed by the commercial banks. Amounts in excess of SAT 50,000 equivalent require prior Central Bank of Samoa (CBS) approval. Previously, any amount required CBS approval.**
Approval of regular repayments of overseas debts by resident individuals (for example, overseas student loans, preexisting debts while resident in other countries) was delegated to authorized commercial banks and money transfer operators subject to documentation requirements. The following exceptions apply, which still require prior Central Bank of Samoa approval: (1) payment for the settlement of an overseas loan; (2) any refinancing of an overseas debt or mortgage; (3) repayment of foreign currency loans with local banks; and (4) new external loans while resident of Samoa.
SAN MARINO

(Position as of October 31, 2019)

Status under IMF Articles of Agreement

Date of membership

Article VIII
Yes.
Date of acceptance: September 23, 1992.

Article XIV

Exchange Measures

Restrictions and/or multiple currency practices
No.
No restrictions as reported in the latest IMF staff report as of December 31, 2018.

Exchange measures imposed for security reasons
Yes.
In accordance with EU regulations and the relevant UNSC resolutions, San Marino maintains exchange and/or payment restrictions for the preservation of national or international security.

In accordance with IMF Executive Board Decision No. 144-(52/51)
Yes.
In accordance with EU regulations and the relevant UNSC resolutions, San Marino maintains exchange and/or payment restrictions for the preservation of national or international security.

Other security restrictions
Yes.
Law No. 92 of June 17, 2008, and subsequent amendments, adopted, in compliance with the international obligations assumed by San Marino to combat money laundering, terrorism, financing of terrorism, and activities that threaten international peace and security, provides for the adoption of restrictive measures conforming to the resolutions of the UNSC or one of its Committees. The restrictive measures include the following: (1) the freezing of funds and economic resources held or controlled, directly or indirectly, by persons, entities, or groups included in the list drawn up by the appropriate UN Committee; (2) commercial restrictions, including commercial restrictions on imports or exports and arms embargoes; (3) restrictions of a financial nature, including financial restrictions or financial assistance and prohibition against providing financial services; and (4) restrictions of any other nature, including restrictions on technical assistance, flight prohibitions, prohibition against entry or transit, diplomatic sanctions, the suspension of cooperation, and the boycotting of sporting events.

Exchange Arrangement

Currency
Yes.
The currency of San Marino is the euro.

Other legal tender
Yes.
Although the gold scudo is legal tender, it is not used in transactions because its numismatic value exceeds its defined legal value of €37.50 per scudo. Euro collector coins and gold scudi are not used in transactions because their numismatic value exceeds their nominal value.

Exchange rate structure

Unitary
Yes.

Dual

Multiple

Classification
No separate legal tender Yes.

The exchange rate arrangement is an exchange arrangement with no separate legal tender. On March 27, 2012, San Marino signed a monetary agreement with the EU repealing the previous monetary agreement of November 29, 2000. The agreement authorizes San Marino to use the euro as its official currency, grant legal tender status to euro banknotes and coins, and issue limited quantities of euro coins. San Marino is committed to adopting the relevant EU legislation (on euro banknotes and coins; combating fraud and counterfeiting; banking and financial legislation, including the prevention of money-laundering and statistical reporting requirements) within the time specified by that agreement. The list of legal acts to be implemented and the time limits for their transposition are reviewed each year by a “Joint Committee” as provided by Articles 8 and 11 of the Monetary Agreement.

Foreign exchange transactions are conducted through banks without restriction at rates quoted in international markets.

No foreign exchange bureaus have been authorized.
A broker-based interbank foreign exchange market is in place. As of December 31, 2018, six banks have been authorized by the Central Bank of San Marino (CBSM) and are operating. The CBSM does not intervene with market participants.

The system is broker based; therefore, any bank authorized for exchange intermediation may trade currencies for its own account or on behalf of its clients. There are no limits on the bid-ask spreads and commissions of market participants.

Forward exchange transactions may be conducted through banks without restriction at rates quoted in international markets. The CBSM does not participate in the forward foreign exchange market.

This information can be found at the AREAER ONLINE database: http://www.elibrary-areaer.imf.org/Pages/Reports.aspx.

Settlements with foreign countries on foreign accounts are made in convertible currencies or in euros.

The CBSM may authorize Sammarinese banks to maintain “nostro account” with financial institutions (FIs) abroad for cross-border transactions. Currently, five banks out of six are authorized. Authorized banks are required to provide statistical information to the CBSM. Unauthorized banks may carry out cross-border payments.
transactions through an authorized Sammarinese bank or an Italian bank. Residents of San Marino are allowed to freely conduct cross-border transactions, with settlement effected through authorized Sammarinese and Italian intermediaries.

### Imports and Import Payments

**Foreign exchange budget** | No.

**Financing requirements for imports** | No.

**Minimum financing requirements** | No.

**Advance payment requirements** | No.

**Advance import deposits** | No.

**Documentation requirements for release of foreign exchange for imports** | No.

**Domiciliation requirements** | No.

**Preshipment inspection** | No.

**Letters of credit** | No.

**Import licenses used as exchange licenses** | No.

**Other** | No.
| **Import licenses and other nontariff measures** | No. | A general business license is required to engage in trade transactions. Imports from the EU are not subject to restrictions; imports from non-EU countries are subject to EU regulations. |
| **Positive list** | No. |
| **Negative list** | No. |
| **Open general licenses** | No. |
| **Licenses with quotas** | No. |
| **Other nontariff measures** | No. |
| **Import taxes and/or tariffs** | Yes. | Customs duties on imports from outside the EU are collected by EU customs authorities on behalf of San Marino. A tax is levied by San Marino on imports at the time of entry. The structure of this tax corresponds closely to the Italian VAT, but the average effective rate is about 5% lower. Taxes levied on imports are rebated when the goods are reexported. Aircrafts registered in San Marino are exempt from import duties or VAT if their maximum takeoff weight exceeds 5,700 kg. Ships over 10 meters long owned by foreign entities and stationed outside the territorial waters of countries with which San Marino has stationing and port usage agreements are not subject to import tax. |
| **Taxes collected through the exchange system** | No. |
| **State import monopoly** | Yes. | The importation of tobacco, electricity, gas, and water is reserved for the public sector. |
| **References to legal instruments and hyperlinks** | This information can be found at the AREAER ONLINE database: http://www.elibrary-areaer.imf.org/Pages/Reports.aspx. |

**Exports and Export Proceeds**

| **Repatriation requirements** | No. |
| **Surrender requirements** | No. |
| **Surrender to the central bank** | No. |
| **Surrender to authorized dealers** | No. |
| **Financing requirements** | No. |
| **Documentation requirements** | No. |
| **Letters of credit** | No. |
| **Guarantees** | No. |
| **Domiciliation** | No. |
| **Preshipment inspection** | No. |
| **Other** | No. |
| **Export licenses** | No. | Only a general business license is required to engage in trade transactions. Exports to the EU are not subject to restrictions; exports to non-EU countries are governed by EU regulations. |
| **Without quotas** | No. | Customs clearance of exports of arms, works of art, and precursor and dual-use products must be carried out at the customs offices identified by the EU-San Marino Cooperation Committee. |
With quotas  No.

Export taxes  No.

Collected through the exchange system  No.

Other export taxes  No.

Any public offering of financial instruments must be authorized by the CBSM and may be carried out only by banks or other financial companies authorized for the activity, as provided by Annex 1, Letter D, of Law No. 165/2005. In addition, Regulation No. 2006-03 issued by the CBSM applies.

The granting of financial credit to a person or a company is subject to the provisions of the banking law as well as to those of the CBSM. Under these provisions, banks and other credit institutions are required to periodically submit information on credit operations to the CBSM. This provision applies to all types of credit operations. In addition, the average interest rates applied by the financial system are monitored, and maximum rates are established to prevent usury (Article 207 of the Penal Code). Loans and guarantees granted by banks, financial companies, and loan funds, as well as collaterals received should be reported to the Central Credit Registry held by the CBSM.
Commercial credits

By residents to nonresidents Yes. The granting of financial credit to a person or a company is subject to the provisions of the banking law as well as to those of the CBSM. Under these provisions, banks and other credit institutions are required to periodically submit information on credit operations to the CBSM. This provision applies to all types of credit operations. In addition, the average interest rates applied by the financial system are monitored, and maximum rates are established to prevent usury.

To residents from nonresidents No.

Financial credits

By residents to nonresidents Yes. The granting of a financial credit to a person or a company is subject to the provisions of the banking law provisions as well as to those of the CBSM. Under these provisions, banks and other credit institutions are required to periodically submit information on credit operations to the CBSM. This provision applies to all types of credit operations. In addition, the average interest rates applied by the financial system are monitored, and maximum rates are established to prevent usury.

To residents from nonresidents No.

Guarantees, sureties, and financial backup facilities

No.

By residents to nonresidents No.

To residents from nonresidents No.

Controls on direct investment Yes.

Outward direct investment

No.

Inward direct investment Yes. Residents and nonresidents may not establish companies in some specific economic sectors without the government’s approval. The Decree No. 176/2018 (December 2018), ratified effective March 26, 2019, by the Decree No. 50/2019, abolished the preliminary nonimpediment (“nulla osta”) of the Congress of State (Government), for any authorization by the supervisory authority, or any change in its authorization, for the exercise of reserved activities relates to activities in Sections A (banking), C (fiduciary activity), D (investment services), E (collective investment services), G (insurance), and H (reinsurance) of Attachment 1. Previously, authorization by the supervisory authority, or any change in its authorization, must be followed by a declaration of nonimpediment by the Congress of State (government) if authorization for the exercise of reserved activities relates to the abovementioned economic sectors.

The following sectors are also regulated and subject to specific authorization by the government or the authorities: (1) gambling (including entrepreneurial activities); (2) socio-health-care; (3) the economic and commodity sectors in accordance with Delegated Decree No. 116 of December 12, 2007, as amended and completed (Delegated Decree No. 17 of February 12, 2009, and Delegated Decree No. 122 of August 31, 2009), whose entrepreneurial activities are subject to government authorization.

Controls on liquidation of direct investment No.

Controls on real estate transactions Yes.
### Provisions Specific to the Financial Sector

<table>
<thead>
<tr>
<th>Provisions specific to commercial banks and other credit institutions</th>
<th>Yes.</th>
</tr>
</thead>
</table>
system stability in case of banks’ compulsory liquidation are established by law. Deposits in banks under suspension of payment are also protected under the law. The Oversight Committee, at the behest of the commissioners and with the approval of the CBSM’s Supervision Committee, may permit banks in extraordinary administration whose payments are suspended to allow depositors to withdraw cash and/or make payment arrangements to satisfy essential and urgent needs. Decree Law No. 111/2011 (issued July 22, 2011) on measures to guarantee the stability of the banking system sets up a guarantee fund for depositors. Decree Law No. 61/2012 on urgent measures to support the economy and various tax provisions introduced (1) tax benefits and credit facilities for banks, as part of the operations authorized by the CBSM, to acquire the liabilities of entities under extraordinary administration and (2) exemption from income tax on capital gains from the sale of investments in San Marino by foreign companies to affiliates to support intragroup reorganization. Decree Law No. 63/2012 on urgent provisions concerning public guarantee of loans granted by the CBSM extended the provisions of Decree Law No. 158/2009 to the end of 2012, allowing the Excellency Room to guarantee loans of last resort paid during 2012. Decree Law No. 67/2012 on urgent measures to support the financial system exempted from income tax capital gains from transfers of assets or businesses or business units to affiliates for San Marino companies. It also allowed deduction from taxable income in the 10 subsequent years of tax losses not yet taken by the operating company and matured over the three years before receipt of the assets or businesses or business units. The measures encourage reorganization, concentration, and aggregation of entities in the financial sector. Banks and FIs must publish on their website their “beneficial owners.” An extraordinary tax of 1.5% applies to the financial industry, calculated on the total accumulated losses of entities that opted to carry forward tax losses incurred in 2009–12 without time limits, if the option was exercised by March 31, 2013 (Law No. 150/2012 on Financial Forecast of the State and Public Entities for the 2013 financial year and multyear financial statements 2013/15). Regulation No. 2012-01, titled Regulation No. 2007-07, Update III—Regulation No. 2011-03, Update I, revised certain prudential rules by (1) extending the deadline for the sale of property acquired for debt collection, taking into account the actual date of release of the goods; (2) repealing the risk weight of 200% for nonperforming loans and keeping the weight of 150%, except for leases already weighted at 50%, which, if nonperforming, are weighted at 100%; (3) defining restructured loans for reporting and budget purposes; (4) removing reference to the constraints of employment, with the secretary of labor; (5) simplifying requirements for periodic review of credit with a regular repayment plan; (6) extending the deadline to comply with the new standards of prudential supervision for companies with limited operating powers to December 21, 2012; and (7) extending the deadline for financial companies to adopt the new prudential supervision provisions when granting credit to December 21, 2012. Regulation No. 2012-02, titled Regulation No. 2007-07, Update IV—Regulation No. 2011-03, Update II, updated the definition of nonperforming loans to reflect the notion of restructured loans introduced by Regulation No. 2012-01. Regulation No. 2012-03 on miscellaneous measures reviewed the supervisory provisions currently in force. It (1) introduced the concept of “adjusted regulatory capital” by adjustments to the calculation of total regulatory capital and prudential limits at the group level; (2) simplified the use of centralization forms for certain intragroup business functions, in view of recent aggregation between
financial intermediaries; and (3) harmonized regulations on the professional requirements of corporate banking and financial officers to facilitate integration between the financial systems of San Marino and Italy through mutual transfer of expertise. Circular No. 2012-01 introduced a new obligation to detect changes in cash at banks exceeding the limit subject to registration in the Anti-Money-Laundering Computer Archive. Circular No. 2013-01 requires nonbank financial companies, as of December 31, 2012, to report quarterly on (1) solvency and operational risk capital requirements, (2) large exposures, (3) lending with related parties, and (4) top 30 debtors. Reports differ according to the organization of the company. Regulation No. 2013-01 on the Register of Authorized Entities—Update No. II (1) extended to authorized entities, other than banks, the requirement to publish in the registry financial statements and the identity of shareholders with more than 5% of capital stock; (2) extended the publication of balance sheets in the registry from the last one to the last three financial years; and (3) established a separate section of the registry, called List of Subjects Unsubscribed, for identification data of all companies previously entered in the registry and the reason for removal. Regulation No. 2013-04 implemented Law No. 101 of July 29, 2013 (Collection of provisions of notes and coins), which governs the organizational requirements, procedures, terms, and forms applicable to the management of cash by banks, post offices, valuables transporters, money changers, etc. which must conform their treatment of cash, even withdrawal of banknotes or euro coins unfit for circulation or suspected of being counterfeit, to EU operational standards. Regulation No. 2013-05 for entry into the Single Euro Payments Area (SEPA) aims to harmonize the national payment system with rules introduced at the EU level for SEPA implementation. SEPA’s goal is to provide services within the EU payment area that are secure, competitively priced, easy to use, and reliable through the introduction of common technical and business requirements for credit transfers and direct debits in euros. This regulation introduced rules governing the rights and obligations of the parties with regard to payment services, adopting European Directive 2007/64/EC of the European Parliament and of the Council of 13 November 2007. Decree Law No. 82 of July 12, 2013, ratified by Decree Law No. 98 of July 25, 2013, amended the anti-money laundering/combating the financing of terrorism legislation, following the recommendations of the Committee of Experts on the Evaluation of Anti-Money Laundering Measures and the Financing of Terrorism. Law No. 101 of July 29, 2013, regarding euro banknotes and coins aims to implement the monetary agreement between San Marino and the EU of March 27, 2012, with Council Chamber Decree No. 120 of August 7, 2012, particularly regarding euro banknotes and coins and measures to prevent fraud and forgery. Law No. 102, of July 29, 2013, regarding penalties for fraud and counterfeiting brings it in line with Framework EU Council Decision No. 2001/413/JHA of May 28, 2001, concerning criminal law, representing further adjustment to the monetary convention. Law No. 100 of July 29, 2013, amends the criminal code, the criminal procedure code, and the provisions on civil procedure and judicial matters; it amended Article 199 bis of the Criminal Code, introducing the crime of “self-laundering.” Delegated Decree No. 24 of March 4, 2014, ratified by Delegated Decree No. 77 of May 19, 2014—“Provisions on administrative sanctions applied by the Central Bank of the Republic of San Marino and the Financial Intelligence Agency and on liabilities of corporate bodies,” amending several provisions regarding administrative sanctions applied by the CBSM and Financial Intelligence Unit (FIU) is in force. Delegated Decree No.
24/2014 amended several provisions regarding administrative sanctions applied by the CBSM and the FIU. Law No. 219 of 2014 “Budget Law 2015” containing specific provisions to the financial sector introduced tax incentives to encourage disposal of assets between authorized parties, directly or through their prior contribution in mutual funds (Article 67) and integrated discipline on the service centralization of information on credit risks, to prepare a risk center able to exchange information with foreign central counterparties, under a waiver from the privacy and operating costs borne by users (Article 71). Delegated Decree No. 178/2014 “Provisions relating to the status of politically exposed persons” and FIU Instruction 2014/04 “Politically Exposed Persons – Preventive measures” updated legislation regarding politically exposed persons (PEPs) to align it with the most recent FATF standards. Regulation No. 2014-01 “Regulation on financial promotion and cold calling” governs the professional activities of financial promoters and cold calling regarding financial instruments and investment services in San Marino. Regulation No. 2014-02 “Regulation on measurement of the anti-usury threshold rate pursuant to Article 207 of the Criminal Code” is in effect. The regulation updates the previous legislation with specific regard to the method of recording the actual rates, the statistical reporting to the supervisory authority, and the determination and publication of threshold rates. Regulation No. 2014-03 “Regulation on the Register of Parent Companies” governs the On-line Register of Parent Companies, referred to in Article 56 of the Law on Companies and Banking, Financial and Insurance Services, where the composition of the banking and financial groups operating in San Marino and the main information about the parent and components (financial and nonfinancial) are recorded. Regulation No. 2014-04 “Regulation on payment services and issuance of electronic money (payment institutions and electronic money institutions)” combines as a single comprehensive set of regulations governing the conduct of payment services and electronic money issuing services in San Marino and aims essentially at implementing the introduction and application of European laws on the purchase of electronic money and payment services, already achieved in part with the introduction of the SEPA regulation, and refers in particular to the following EU Directives: (1) No. 2007/64/CE – November 13, 2007 (so-called PSD (Payment Services Directive)); (2) No. 2009/110/CE – September 16, 2009 (so-called ELM Directive (Electronic Money Directive)); and (3) No. 924/2009 – September 16, 2009. Circular No. 2014-01 “Protest information service” is in force. The main purpose of this circular is to update the legislation in force, giving full implementation to Article 51 of the Law on Companies and Banking, Financial and Insurance Services, taking into account new features concerning the collection, recording, access, and transmission of such information. Delegated Decree No. 22 of 26 February 2015 on ratification of Delegated Decree No. 212 of 5 December 2014 “Constitution of company Poste San Marino S.p.a.” that, given the transformation of San Marino Ente Poste into a limited company (named Poste San Marino S.p.a.), determines the times of that transformation and specifies that the Statute must be adopted during the constitution of the company. Delegated Decree No. 99 of 30 June 2015 “Access of members of the Great and General Council to information on beneficial owners of authorized entities under the Law No. 165/2005” that, in implementation of Article 68, Paragraph 2 of Law No. 219/2014, regulates the conditions of access of counselors to information on beneficial owners of authorized entities, as well as measures to ensure the confidentiality of such information. Law No. 189 of 22
December 2015, “Budget Law 2016,” that in particular: (1) relates to the guarantee fund for depositors, to put into effect the protection for depositors, the State will transfer to the fund €5 million, which will be added to banks’ contributions, and instructs the CBSM to prepare the regulatory changes according to the new European legislation; (2) amends Article 103 of Law 165/2005 (Relations with foreign supervisory authorities) to allow the CBSM to exchange information with foreign counterparties even in the absence of a memorandum in respect of reciprocity and confidentiality conditions. Law Decree No. 198 of 30 December 2015, “Urgent provisions for financial operations” (ratified by Law Decree No. 4/2016) that, in particular: (1) introduces a discipline relating to dematerialization of stocks, to put into effect the protection for depositors, the State will transfer to the fund €5 million, which will be added to banks’ contributions, and instructs the CBSM to prepare the regulatory changes according to the new European legislation; (2) introduces the possibility to open passive online accounts. Government Regulation No. 5-2016 “Criteria, mode and timing for the transferring of amounts of cash to the Deposit Guarantee Fund with the Central Bank.” The regulation provides measures for transferring the amounts of money confiscated from the accounts noncompliant with the Anti-Money Laundering-Combating the Financing of Terrorism (AML-CFT) provisions in the matter of customer Due Diligence to the Deposit Guarantee Fund with the Central Bank. CBSM Regulation No. 2015-01 “Regulation on information supervision for banks,” which governs regulatory reporting for banks, defining a general and unified framework of rules in terms of preparation, control, approval, and forwarding to the CBSM of regulatory reporting for banks, is in force. The regulation merges into a single organic measure the general supervisory rules applicable to the reports prepared and sent to the CBSM by banks. CBSM Regulation No. 2015-02 “Regulation on the national payment system,” which updates the regulations on the management of the National Payment System and introduces measures to correct the provisions contained in Regulation Nos. 2014-04 and 2013-05 to ensure full transposition of Directives Nos. 2007/64/EC (so-called PSD) of 13 November 2007 and 2009/110/EC (so-called electronic money directive (EMD)); CBSM Regulation No. 2015-03 “Miscellany of measures aimed at reviewing the supervisory provisions currently in force,” which introduced, among others, the following changes to the current regulatory framework: (1) the special “moratoria” to the 30 September 2016 of the terms within banks and the financial companies must alienate the ownership interests and the immovable goods acquired for recovery credits; (2) the possibility, within certain time limits and on the occurrence of certain conditions, to permit mutual funds with a single participant/contributor, to facilitate the use of such structures in a special-purpose vehicle (SPV) according to the nonperforming loan; (3) reduction from 5% to 2% of the shareholding threshold for publication of shareholders in the Register of Authorized Subjects; (4) obligation for banks, financial company, payment institutions, and electronic money institutions, to set up a complaints office and to provide for, in contracts, the out-of-court forms of dispute resolution, if available. CBSM Circular No. 2015-01 “Monthly information requirements to banks concerning the statement of accounts (monthly statement of accounts of banks),” that, according to Regulation No. 2015-01, involved reviewing the monthly and quarterly reporting requirements of banks in accounting. This Circular has improved the quality of information, simplified the signaling framework, and upgraded the information data sets available from the banking system also to achieve full compliance with the new reporting requirements.
by the ECB and the IMF. CBSM Circular No. 2015-02 “Disclosure obligations concerning Risks Central” came into force. Article 50 of Law 165/2005 establishes and regulates Credit risk data centralization service providing technical measures and standards for the disclosure of the information. CBSM Circular No. 2016-01 “disclosure obligations concerning Credit Registry – Update I” came into force. This amendment to CBSM Circular No. 2015-02 postpones the entry into force of some provisions concerning the exchange of information between FIs and the Credit Registry. Law Decree No. 83 of June 2015 “Ratification of Decree Law No. 47 of 10 April 2015 – Urgent provision to combat terrorism” extends the scope of some provisions in matter of CFT. CBSM Regulation 2016-01 on the guarantee fund depositor. CBSM Regulation 2016-02 on the annual accounts and consolidated accounts of banks and other FIs.

CBSM Regulation 2016-03 on the Miscellany of measure reviewing other provision in force.

CBSM Circular No. 2016-01 on information requirement concerning the credit central registry (Update I).

Regulation No. 2017-02: Amending Regulation of Regulation No. 2006-01. Regulation No. 2017-03 on insurance and reinsurance mediation – Update No. V.

Regulation No. 2017-05 amending the Regulation No. 2016-01 on Deposit Guarantee Scheme.

Regulation No. 2017-06 on various amendments to the supervisory rules in force.

Regulation No. 2017-07 on the provisions regulating life insurance agreements.

Regulations No. 2017-08 on electronic checks’ protest.

Circular no. 2017-01 – Method of determining contributions to the Guarantee Fund for Depositors.

Circular No. 2017-02 – Circular on the information to submit about insurance agreements in force.

Circular No. 2017-03 on compulsory information concerning financial statements. Circular No. 2017-04 on compulsory information concerning the situation of accounts (SC).

Delegated Decree No. 15 of February 1, 2018 (Ratifying Delegated Decree No. 128 of October 31, 2017): Provisions aimed at encouraging the return of capitals and the emergence of assets held abroad.

Law No. 102 of June 14, 2019, “Bank Resolution Law” (following principles of BRRD Directive, but with a Bail Out criteria).

| Borrowing abroad | No. |
| Maintenance of accounts abroad | Yes. |
| Lending to nonresidents (financial or commercial credits) | Yes. |

Regardless of the borrower’s residence, limits apply to lending. In particular, pursuant to Part VII, Title IV, Article 2, of Regulation Nos
Lending locally in foreign exchange | Yes.
--- | ---
Purchase of locally issued securities denominated in foreign exchange | No.
Differential treatment of deposit accounts in foreign exchange | No.
Reserve requirements | No.
Liquid asset requirements | No.
Interest rate controls | No.
Credit controls | No.
Differential treatment of deposit accounts held by nonresidents | No.

**Reserve requirements** | No.
**Liquid asset requirements** | No.
**Interest rate controls** | No.
**Credit controls** | No.
**Investment regulations** | Yes.

The acquisition of shares in the capital of a bank or financial company above certain thresholds requires CBSM authorization.

**Abroad by banks** | Yes.
The purchase of securities of a participating nature exceeding 10% in foreign financial or nonfinancial companies by Sammarinese banks and financial companies must be authorized by the CBSM.

**In banks by nonresidents** | Yes.
Regardless of the investor’s residence, the purchase of securities of a participating nature exceeding 2% of a Sammarinese bank’s capital or 5% of a Sammarinese financial company’s capital must be authorized by the CBSM.

**Open foreign exchange position limits** | No.
**On resident assets and liabilities** | No.
**On nonresident assets and liabilities** | No.
**Provisions specific to institutional investors** | Yes.

2007-07 and 2011-03, (1) banks and other credit institutions (financial companies) may not lend to any counterparty or group of related counterparties more than 25% of their regulatory capital (individual limit) and (2) such exposure may not exceed eight times regulatory capital.

Pursuant to Part VII, Title IV, Article 2, of Regulation Nos. 2007-07 and 2011-03, (1) banks and other credit institutions (financial companies) may not lend to any counterparty or group of related counterparties more than 25% of their regulatory capital (individual limit) and (2) such exposure may not exceed eight times regulatory capital.

A Protocol, Parliament Decree No. 7 of 22 January 2016 – Ratification of the Protocol, amending the Agreement between the European Community and the Republic of San Marino providing for measures equivalent to those laid down in the Council Directive 2003/48/EC on taxation of savings income in the form of interest payments entered into force. This has led to the termination of the application of the withholding tax on the EU residents’ account holder interest income. Previously, according to the Savings Tax Agreement and a 2004 memorandum of understanding with the EU, San Marino, like other countries that provided banking confidentiality protection and wanted to maintain it, applied a withholding tax on EU residents’ interest income.

<tr>
<td>Insurance companies</td>
<td>Yes.</td>
<td>Insurance companies are regulated under CBSM Regulation No. 2008-01, which provides the general regulatory framework for life insurance business. Currently, it is not possible to conduct non-life-insurance or reinsurance business in San Marino.</td>
</tr>
<tr>
<td>Limits (max.) on securities issued by nonresidents</td>
<td>Yes.</td>
<td>There are no limits on the aggregate amount of investments in securities issued by nonresidents. CBSM Regulation No. 2008-01 provides for limits for specific categories of securities.</td>
</tr>
<tr>
<td>Limits (max.) on investment portfolio held abroad</td>
<td>Yes.</td>
<td>Financial assets representing technical provisions must be kept in a bank authorized by the CBSM to carry out banking activity in San Marino. The CBSM may allow insurance companies to hold investment portfolios abroad on request. These restrictions do not apply to portfolios that do not make up technical provisions (Article 83, CBSM Regulation No. 2008-01).</td>
</tr>
<tr>
<td>Limits (min.) on investment portfolio held locally</td>
<td>Yes.</td>
<td>Financial assets representing technical provisions must be kept in a bank authorized by the CBSM to carry out banking activity in San Marino. The CBSM may allow insurance companies to hold investment portfolios abroad on request (Article 83 of CBSM Regulation No. 2008-01).</td>
</tr>
<tr>
<td>Currency-matching regulations on assets/liabilities composition</td>
<td>Yes.</td>
<td>Exchange risk exposure must be reported to the CBSM.</td>
</tr>
<tr>
<td>Pension funds</td>
<td>n.r.</td>
<td>Private pension funds are not regulated under Sammarinese law, so no Sammarinese private pension funds are active in San Marino. However, foreign private pension funds may be placed in San Marino. Law No. 191/2011 (on Reforming Social Security) established a mandatory public complementary pension fund.</td>

Changes during 2018 and 2019

Arrangements for Payments and Receipts

Controls on exports and imports of banknotes

Banks must ask for the customers’ declarations of cross-border transportation, if they deem that the cash is of cross-border origins.

Capital Transactions

Controls on capital transactions

Controls on direct investment

Inward direct investment

The Decree No. 176/2018, ratified by the Decree No. 50/2019, abolished the preliminary nonimpediment (“nulla osta”) of the Congress of State (Government), for any authorization by the supervisory authority, or any change in its authorization, for the exercise of reserved activities relates to activities in Sections A (banking), C (fiduciary activity), D (investment services), E (collective investment services), G (insurance), and H (reinsurance) of Attachment 1. Previously, authorization by the supervisory authority, or any change in its authorization, must be followed by a declaration of nonimpediment by the Congress of State (government) if authorization for the exercise of reserved activities relates to the abovementioned economic sectors.

Controls on real estate transactions

Purchase locally by nonresidents

Purchases by domestic companies and foreign citizens (residents and nonresidents) no longer require approval of the Council of Twelve, following the Delegated Decree No. 105/2019. Previously, the purchase of real estate by domestic companies and foreign citizens required the approval of the Council of Twelve.

2871

Law No. 154/2019 (from Articles 21 to 27) containing the same provision substituted Decree No. 105/2019 (which expired September 19, 2019).

Article VIII

Yes.

Article XIV

Yes.

Exchange Measures

Restrictions and/or multiple currency practices

Yes. The IMF staff report for the 2018 Article IV Consultation, Fifth Review under the Extended Credit Facility, Request for Waivers for Nonobservance of Performance Criteria, and Financing Assurances Review with São Tomé and Príncipe states that, as of July 9, 2018, São Tomé and Príncipe did not maintain restrictions under Article XIV. However, it maintained one previously identified and one newly identified restriction subject to IMF approval under Article VIII. The previously identified exchange restriction regarding limitations on the transferability of net income from investment arises from Article 3(g) and Article 18 of the Investment Code (Law No. 19/2016). The restriction results from the requirement that taxes and other obligations to the government have to be paid/fulfilled as a condition for transfer, to the extent the requirement includes the payment of taxes and the fulfillment of obligations unrelated to the net income to be transferred. In the context of the 2018 Article IV Consultation, staff found that São Tomé and Príncipe maintained an additional exchange restriction that is subject to IMF approval under Article VIII. This exchange restriction arises from limitations on the availability of foreign exchange through rationing of foreign exchange by the Bank of São Tomé and Príncipe (BCSTP). This exchange restriction also gives rise to a MCP as the rationing has channeled bona fide current transactions to the parallel market where the exchange rate is at a spread of more than 2% from the exchange rate in the formal market. (Country Report No. 18/251)

Exchange measures imposed for security reasons

No.

In accordance with IMF Executive Board Decision No. 144-(52/51)

No.

Other security restrictions

No.

of a spread between the official and the parallel market rates.

### Classification

- No separate legal tender
- Currency board

**Conventional peg** Yes. The exchange rate arrangement is a conventional peg against the euro. Beginning February 1, 2009, the focus of the BCSTP switched from the US dollar to the euro, which became the new reference currency for the peg on January 1, 2010. The Organic Law of the BCSTP authorizes it to make decisions regarding exchange rate policy.

### Monetaride policy framework

**Exchange rate anchor** Yes.

- **U.S. dollar**
- **Euro** Yes. The monetary policy framework is an exchange rate anchor vis-à-vis the euro.

**Composite**

**Other**

- Monetary aggregate target
- Inflation-targeting framework

**Target setting body**

- Government
- Central Bank
When commercial banks purchase and sell euro in transactions with their customers, they must use the fixed exchange rate published by the BCSTP (official exchange rate). In case of euro purchases, the charging of any commission is prohibited, while in case of euro sales, banks are allowed to charge a commission up to 2%. Purchase and sale by banks of other foreign currencies in transactions with their customers may be carried out at the exchange rates set by...
commercial banks, with the condition that the spread between buying and selling rates does not exceed 4%. In case of euro purchase from the public, exchange bureaus must use the fixed exchange rate published by the BCSTP, with no commission permitted to be charged. The BCSTP regulation does not impose any rule for exchange bureaus with regard to setting of selling exchange rate for euro, as well as buying and selling exchange rates for other foreign currencies, except for the requirement to include all commissions in the exchange rates. In its sale transactions in euro with financial institutions, the BCSTP charges a 1.5% commission, while on its purchases of euros with financial institutions, the BCSTP charges a 0.5% commission.

**Spot exchange market**
Yes.

De jure there is only one foreign exchange bureau authorized to deal in foreign exchange under NAP No. 24/2009, regulating foreign exchange bureaus, in force since January 1, 2010: specifically, the São Tomé and Príncipe dobra foreign exchange bureau, which obtained a license from the CB in April 2015. In practice however, there are several foreign exchange bureaus and unregulated agents dealing in foreign exchange in the country without special and prior authorization from the CB, as required under Article 7(1) of Decree-Law No. 32/99, the Foreign Exchange Law. Under the terms of Article 12 of NAP No. 24/2009, foreign exchange bureaus can engage in the following transactions: purchase and sale of foreign exchange; foreign currency trading, purchase and sale of traveler’s checks, purchase and sale of banknotes and coins with the CB for foreign exchange transactions or the transfer of foreign exchange surpluses; and purchase and sale of banknotes and coins with commercial banks. Article 13 of the same NAP prohibits foreign exchange bureaus from transferring foreign exchange abroad and from all other transactions not specified in Article 12.

**Operated by the central bank**
Yes.

Under NAP No. 05/2017 – Regulations on Foreign Exchange Coverage, the BCSTP applies a foreign exchange allocation system. Under Article 18(2) of the Foreign Exchange Law, the BCSTP will purchase and sell foreign exchange “to the State” as its financial agent.

**Foreign exchange standing facility**
No.

**Allocation**
Yes.

Under the terms of Article 18 of Decree-Law No. 32/99, the Foreign Exchange Law, the BCSTP may purchase and sell foreign exchange from and to commercial banks indiscriminately, depending on the external situation and need to control money supply, provided the latter cumulatively fulfill the requirements for applying for foreign exchange cover and eligibility specified in Articles 6 and 7 of NAP No. 05/2017 – Regulation on Exchange Coverage. Foreign exchange is made available to commercial banks for customer’s external payments through foreign exchange coverage provided by the BCSTP via two modalities laid down by the BCSTP regulations (1) through selling foreign exchange after customers’ import payments already made and (2) through direct foreign exchange coverage that means selling foreign exchange for making current international payments. The BCSTP finances current international transactions at the official exchange rate only after verification of the bona fide nature of the bank’s request. These include only completed goods’ import transactions fulfilling the specified requirements. Access to foreign exchange is limited to financial institutions whose net position in the transaction currency is less than 12% of their qualified capital and in total foreign currency less than 25% of qualified capital. Financial institutions must be in compliance with the CB’s regulations on bank liquidity and capital adequacy. Financial institutions may have access to the CB’s facilities regardless of the
above conditions (direct foreign exchange coverage) if the foreign exchange is for importation of goods only (previously, of both goods and services) during a crisis or for the importation of fuel.

The BCSTP has stopped using this instrument since the fixed exchange rate regime “Fixed parity of the dobra against the euro” came into force on January 1, 2010.

São Tomé and Príncipe has no official payment arrangement with the CB of any other country at the present time.

There is an inoperative payments agreement with Angola whose balance has been converted to outstanding Angolan debt with São Tomé and Principe and is still pending payment. According to information reported by the Debt Office, this debt was sold to a group and is currently being negotiated through the Angolan government.

Regional arrangements | No.  
Clearing agreements   | No.  
Barter agreements and open accounts | No.  
Administration of control | Yes.  Pursuant to Article 6(1) of Decree-Law No. 32/99, the Foreign Exchange Law, the CB, as the country’s foreign exchange authority,
regulates the functioning of the foreign exchange market, supervises the entities authorized to deal in foreign exchange, and oversees foreign exchange transactions.

**Payments arrears** Yes.

**Official** Yes. As of end-2018, the government had pre-Heavily Indebted Poor Countries (HIPC) Initiative legacy arrears to Angola and Italy, totaling US$54.9 million. In addition, it had post-HIPC arrears to Angola, Brazil, and Equatorial Guinea, totaling US$10.7 million. Finally, a loan from Nigeria in the amount of $30 million is under dispute.

**Private** No. There are no private payment arrears.

**Controls on trade in gold (coins and/or bullion)** No. There are no legal restrictions on trading in gold.

**On domestic ownership and/or trade** No.

**On external trade** No.

**Controls on exports and imports of banknotes** Yes.

**On exports** Yes.

**Domestic currency** Yes. Effective March 6, 2018, travelers are entitled to remove dobra banknotes and coins up to the limit of 5 examples of each denomination up to a total of 1,944 in new dobras, and 944,692.50 in old dobras. Amounts in excess of these limits must be seized by the competent authority and handed over to the CB. Previously, travelers were allowed to remove national banknotes and coins up to the limit of Db 4,900,000 that was equivalent to 200 euros.

**Foreign currency** Yes. Residents traveling abroad are allowed to carry or transport with them foreign currency (in banknotes and coins) in an amount corresponding to nDb 245,000.00, that is equivalent to 10,000.00 euros. Nonresidents leaving the country with more than nDb 245,000.00 that is equivalent of 10,000.00 euros in foreign currency or other foreign means of payment, except credit cards, payment cards, bank checks, or traveler’s checks issued abroad in their name, must, if and when asked to do so by the competent authorities, provide evidence that they entered the country with the same amount or higher. Evidence must be provided in the form of the original declaration, duly filled in on entry into the country, or in the form of a certificate of origin issued by a national financial institution in compliance with the existing legislation.

**On imports** No.

**Domestic currency** No.

**Foreign currency** No.

**References to legal instruments and hyperlinks** This information can be found at the AREAER ONLINE database: http://www.elibrary-areaer.imf.org/Pages/Reports.aspx.

**Resident Accounts**

**Foreign exchange accounts permitted** Yes.

**Held domestically** Yes. Pursuant to Article 16 of Decree-Law No. 32/99, the Foreign Exchange Law, deposit accounts in dobras or any foreign currency can be freely opened and operated, both by residents and by nonresidents, without restriction, subject to fulfillment of the legal
procedures defined in NAP No. 10/11, on opening and operating accounts in foreign currency.

Imports and Import Payments

| Foreign exchange budget | Yes. |
| Financing requirements for imports | No. |
| Minimum financing requirements | No. |
| Advance payment requirements | No. |
| Advance import deposits      | No. |
| Documentation requirements for release of foreign exchange for imports | Yes. |
| The BCSTP determines its foreign exchange budget on the basis of information obtained in collaboration with the Treasury and major economic agents. |
| Pursuant to Article 12(2) of Decree-Law No. 32/99, the Foreign Exchange Law, the BCSTP guarantees the convertibility and transfer abroad of the foreign exchange needed to pay for imports, provided the importer has the funds needed to cover the corresponding amount in the commercial banks. |
| The advance deposit requirement involving the opening of an LC depends on what was agreed between the bank and the importer. Normally an advance deposit is not required. |
Foreign exchange is made available to commercial banks for customer’s import payments through foreign exchange coverage provided by the BCSTP via two modalities laid down by the BCSTP regulations (1) through selling foreign exchange after customers’ import payments already made and (2), in case of fuel imports and other imports of goods in period of crisis, through direct foreign exchange coverage that means selling foreign exchange for making current international payments. A bank application for foreign exchange cover must be supported by the following: (1) listing of the amounts of imports for which the foreign exchange is required; (2) documentary evidence of the money transfer (MT); (3) documentary justification of the operation, namely: (a) definitive invoices with dates no older than six months from the date of the application for foreign exchange cover; (b) documentary evidence of the shipment from point of origin or unloading of the merchandise from the national customs territory; (4) date of transfer request, by the client, and effective date of the operation; and (5) any other documents if the BCSTP considers they are necessary.

Import licenses are granted freely by the General Directorate of Commerce. Certification of timely payment of tax liabilities must also be requested from the Ministry of Planning and Finance. Pursuant to Paragraph 2 of Article 13A of Decree-Law No. 11/2011, regulating commercial activity and its licensing, in force as from May 18, 2011, all private firms or collective entities that export and/or import merchandise, specified in Tables A1 and A2 of this instrument, are exempt from the requirement to register in the Commerce Department. Paragraph 3 of the same article establishes a requirement for licenses or endorsements for other commercial activities.

Also, pursuant to Paragraph 3 of Article 13A of Decree-Law No. 11/2011, the reexportation of products that incorporate minerals, environmental reserves, and national security requires a license to be obtained from the Commerce Department.
Exports and Export Proceeds

**Repatriation requirements**

No. Article 13(2) of Decree-Law No. 32/99, the Foreign Exchange Law provides that all foreign earnings received from exports must be delivered in full to the financial system; but in practice this article is not applied.

**Surrender requirements**

No.

**Surrender to the central bank**

No. Pursuant to Article 13 of Decree-Law No. 32/99, exporters may freely dispose of foreign exchange earnings from export activities, apart from the portion withheld by the BCSTP; but in practice this has never been applied.

**Surrender to authorized dealers**

No.

**Financing requirements**

No. There is no legal requirement in force.

**Documentation requirements**

Yes. Exporters must submit the Preshipment Document (Boletim prévio de Exportação—BRPE) to the bank for certification purposes.

**Letters of credit**

No.

**Guarantees**

No.

**Domiciliation**

No.

**Preshipment inspection**

Yes. Pursuant to Article 279 of Decree-Law No. 39/2009, the Customs Code, the formalities for export clearance are as follows: request, declaration, verification of the elements of the declaration, order number, payment and receipt number, verification, re-verification, and authorization for shipment.

**Other**

No.

**Export licenses**

Yes. Pursuant to Paragraph 2 of Article 13A of Decree-Law No. 11/2011, regulating commercial activity and its licensing, in force as from May 18, 2011, all private firms or collective entities that export and/or import merchandise, specified in Tables A1 and A2 of this instrument, are exempt from the requirement to register in the Commerce Department. Paragraph 3 of the same article establishes a requirement for licenses or endorsements for other commercial activities.

Also, pursuant to Paragraph 3 of Article 13A of Decree-Law No. 11/2011, the exportation of mineral products, products essential for the economy, and products of environmental reserves requires a license to be obtained from the Commerce Department.

**Without quotas**

Yes. Pursuant to Article 13C of Decree-Law No. 11/2011, regulating commercial activity and its licensing, operations to export and/or import merchandise that are exempt under Article 13(2) will be subject to an annual operating fee to be specified in a joint notice issued by the specific sector minister and minister of finance.

**With quotas**

No.

**Export taxes**

No. There are no export taxes. However, banks charge a commission of 0.125% on the collection of export proceeds—with a minimum equivalent to US$25 and a maximum of US$300—when the LC is opened, and an additional commission of 0.125% is collected when funds are received. Banks also charge a postage levy of Db 39,000.

**Collected through the exchange system**

No.

**Other export taxes**

No.

Changes during 2018 and 2019

Exchange Arrangement

Exchange rate structure

Dual

07/09/2018
The exchange rate structure of São Tomé and Príncipe is re-classified from unitary to dual because of the existence of a spread between the official and the parallel market rates.

Official exchange rate

01/01/2018
The official exchange rate is set at new Db 24.50 per euro, and the CB is committed to maintaining the peg of the dobra to the euro. Previously, the official exchange rate was Db 24,500 per euro.

Arrangements for Payments and Receipts

Controls on exports and imports of banknotes

On exports

Domestic currency

03/06/2018
Travelers are entitled to remove dobra banknotes and coins up to the limit of 5 examples of each denomination up to a total of 1,944 in new dobras, and 944,692.50 in old dobras. Amounts in excess of these limits must be seized by the competent authority and handed over to the CB. Previously, travelers were allowed to remove national banknotes and coins up to the limit of Db 4,900,000 that was equivalent to 200 euros.

No separate legal tender

Currency board

Conventional peg Yes.

The exchange rate arrangement is a conventional pegged arrangement. The rate of the riyal against the US dollar is determined by the Saudi Arabian Monetary Authority (SAMA) and has been stable since June 1986. The SAMA, in coordination with the minister of finance, decides on changes in the exchange rate arrangement. Historically, the SAMA has not published its intervention data.
Other managed arrangement

Floating

Free floating

**Official exchange rate**

| Yes. | The exchange rate of the riyal is pegged to the US dollar at the official rate of buying and selling that is 3.75 per US dollar. The official rate is used for accounting and valuation. |

**Monetary policy framework**

**Exchange rate anchor**

| Yes. | The monetary policy framework is an exchange rate anchor vis-à-vis the US dollar. |

  Spot exchange market  Yes.

Operated by the central bank  Yes.
Foreign exchange standing facility  Yes.
Allocation  No.
Auction  No.
Fixing  No.
Interbank market  Yes.
  Over the counter  Yes.
  Brokerage  Yes.

There are 29 banks and 77 money changers authorized to engage in foreign exchange transactions with the public. Money changers do not engage in transactions directly with the SAMA. Grade B money changers may conduct only spot transactions. Grade A money changers may also transfer foreign exchange in the domestic and international markets for their customers. Grade A money changers may have accounts outside Saudi Arabia. Money changers freely determine the bid-ask spread with their clients. Banks are allowed to determine freely their bid-ask spread in transactions with their clients. ADs are allowed to determine foreign exchange commissions with their clients within the SAMA limit.

The SAMA provides foreign exchange to ADs at the official buying and selling rates, but does not engage in foreign exchange allocation, auctions, or fixing. Moreover, the SAMA deals directly with the government and other public entities.

There are 29 licensed banks (13 domestic banks and 16 foreign bank branches) to undertake interbank foreign exchange and money market transactions. The interbank market operates over the counter, with the participation of market makers and brokers and an active interbank market in riyals and US dollars quoted by commercial banks. There are no limits on the bid-ask spreads and commissions of market participants, except for US dollars where there is an internal limit on the volume of US dollars sold from the SAMA to local banks and branches of foreign banks.
### Market making
Yes.

### Forward exchange market
Yes. Forward market operates over the counter. The commercial banking sector has an active forward market to cover exchange risk for up to 12 months. To discourage multi-leg USD/SAR forward structured product which speculates against the USD/SAR peg, participants must seek SAMA prior approval before entering into these non-linear derivatives transaction.

### Official cover of forward operations
No.

Yes.

Account operations follow usual business practices and are monitored according to Anti-Money-Laundering and Countering Financing of Terrorism regulations. Balances may be transferred abroad subject to relevant Anti-Money-Laundering and Countering Financing of Terrorism regulation provisions. Foreigners with temporary visas (for the first three months only) and invited by an organization or business may open bank accounts as a preliminary step toward obtaining a regular residence permit (iqama).

Approval required

No.

Held abroad

Yes.

Account operations, including balance transfers, are subject to local legal requirements. Funds received from abroad are subject to relevant Anti-Money-Laundering and Countering Financing of Terrorism regulation provisions.

Approval required

No.

Accounts in domestic currency held abroad

No.

Accounts in domestic currency convertible into foreign currency

Yes.

Engaging in the securities business must be authorized by the CMA, unless the business is exempted pursuant to the Securities Business Regulations. Under the CMA Authorized Persons Regulations, applicants for authorization to engage in dealing, managing, or custodial business must be established in Saudi Arabia and be either (1) a subsidiary of a local bank, (2) a joint-stock company, (3) a subsidiary of a Saudi joint-stock company engaged in the financial services business, or (4) a subsidiary of a foreign financial institution licensed under the Banking Control Law issued by Royal Decree No. M/5 of 22/2/1386H (of June 11, 1966). Applicants for authorization to engage in advisory or business arrangement services may be of any legal type established in Saudi Arabia.

Purchasing securities locally by nonresidents is subject to the following. For direct investment in these securities: (1) The Rules for Qualified Foreign Financial Institutions Investment in Listed Securities (QFI Rules) issued by the CMA Board on May 4, 2015, set out the procedures, requirements, and conditions for qualifying foreign investors to invest in listed securities in the Saudi market and specify their obligations and the obligations of authorized persons in this regard. The QFI Rules were amended effective January 9, 2018, to: (a) Relax some of the restrictions that were previously enforced on the qualification of potential foreign investors, such as lowering the required minimum limit of asset under management or custody (AUM) for the financial institution to $500 million (SR 1.87 billion) from $1 billion (SR 3.75 billion); (b) Eliminate the requirement for the CMA’s review and approval of the qualification application; (c) Eliminate the investor experience requirement; (d) Qualify the affiliates of QFIs or foreign portfolio managers and their managed funds without the need to submit separate applications; (e) Ease some of the continuous obligations requirements on QFIs. (2) The CMA’s Board issued a resolution allowing nonresident foreign investors to invest directly in the parallel equity market (Nomu) effective January 1, 2018. For non-direct investment in these securities: (1) Nonresident foreigners, either institutions or individuals, may invest in such securities through access products (“swap agreements”), with authorized persons, which transfer economic benefits but not legal title, subject to the conditions and requirements set out in the CMA’s Board Resolution of August 17, 2008. Pursuant to amendments of the CMA Board Resolution of July 2015 from January 4, 2017, the limit on the percentage of foreign investments via swap agreements in the Saudi capital market was increased from 5% to 10% of the shares of the issuer whose shares are listed or convertible debt instruments of the issuer. The 10% limit is not calculated as an aggregate limit on the foreign investor and any affiliates together, that is, an affiliate of a foreign investor may invest to the 10% limit regardless of the investment of the foreign investor. Effective May 3, 2018, the Resolution was amended allowing swap holders to open QFI account while retaining the swap account for grace period of one year, providing foreign investor with choice of channel for trading. (2) Nonresident foreigners may also hold units in mutual funds,
including exchange-traded funds (ETFs), which may invest in Saudi listed securities. (3) Nonresident GCC citizens are treated equal to residents in Saudi Arabia and allowed to invest directly in the Saudi Stock Exchange.

The CMA Board issued the Investment Accounts Instructions of April 3, 2016, to regulate the opening and operation of investment accounts held by authorized persons licensed by the CMA (dealing, managing, or custody) and to define the related investment accounts controls and supervisory rules. The Instructions were amended by CMA Board Resolution effective November 21, 2018, to, inter alia, remove some requirements for opening investment accounts for foreign investors, such as copies of identification documents of the owner of the QFI.

Complementary to the QFI rules, effective June 26, 2019, the CMA approved the “Instructions for the Foreign Strategic Investors’ Ownership in Listed Companies.” They are aimed at foreign legal persons who intend to own a strategic shareholding in listed companies, and for which the aim is to promote the financial or operational performance of the listed companies on the long term. Among the most prominent features of the Instructions is that foreign strategic investors are excluded from all requirements of QFI rules, including the investment limits stipulated in Article 14 of the QFI Rules that the maximum proportion of the shares of any issuer whose shares are listed or convertible debt instrument of the issuer that may be owned by all foreign investors in aggregate is 49%. However, foreign strategic investors may not dispose of any of the shares they own in accordance with the Instructions within a period of two years after the date of ownership of such shares, and limits by other regulators or a company’s own rules still apply. In addition, the procedures for opening accounts and owning shares through authorized persons were eased.

For investments in banks by nonresidents, there is a limit of 60% of capital, and permission of the authorities is required. Effective June 26, 2019, the overall limit was removed for foreign strategic investor ownership in listed companies, and they require SAMA’s approval for acquiring 50% or more of a bank’s capital. However, foreign strategic investors may not dispose of any of the shares they own within a period of two years after the date of ownership of such shares, and limits by other regulators or a company’s own rules still apply. For investments in banks by nonresidents, there is a limit of 60% of capital, and permission of the authorities is required. Effective June 26, 2019, the overall limit was removed for foreign strategic investor ownership in listed companies, and they require SAMA’s approval for acquiring 50% or more of a bank’s capital. However, foreign strategic investors may not dispose of any of the shares they own within a period of two years after the date of ownership of such shares, and limits by other regulators or a company’s own rules still apply.

**Sale or issue locally by nonresidents** Yes. Issuances and offerings of securities are under the CMA’s jurisdiction and require its approval or notification depending on the offer type. Foreign issuers must comply with the Exchange Listing Rules and any foreign listing requirements that the CMA may issue in the future, which will detail the requirements that are imposed on the foreign issuers. All issuances and offerings must be conducted through a person authorized in Saudi Arabia.

**Purchase abroad by residents** Yes. No restrictions apply, except that insurance companies may not invest more than 20% in foreign securities unless approved by the SAMA. In addition, a limit of 10% applies to foreign-currency-denominated investments. However, this limit may be changed according to the investment policy submitted by the insurance company and approved by the SAMA. SAMA approval is required for Saudi Arabian banks to acquire shares in foreign companies. However, any security issued abroad may only be advertised in Saudi Arabia through a person authorized in Saudi Arabia and subject to the provisions of Part 3 of the Securities Business Regulations.

**Sale or issue abroad by residents** No. There are no restrictions on the sale or issuance of securities abroad by residents, which are subject to the laws where the sale or issuance
takes place. However, pursuant to paragraph a/6 of Article 6 of the Capital Market Law, the CMA has the power to approve, cancel, or suspend the listing of Saudi issuers’ securities traded on the Saudi Stock Exchange on stock exchanges abroad. Only authorized persons may conduct securities business in Saudi Arabia, unless exempt.

Bonds or other debt securities
Yes.

Rules on the Offer of Securities and Continuing Obligations (OSCO Rules) describe the requirements for issuance and offering of bonds and other debt securities either through public offering or through private placement. The OSCO Rules also contain provisions regulating the issuance and trading of securities through a special purpose entity. The Rules for Special Purpose Entities issued by the CMA Board regulate the establishment, licensing, and activities of the SPE that is responsible for issuing debt instruments.

Purchase locally by nonresidents
Yes.

Purchasing securities locally by nonresidents is subject to the following.

For direct investment in these securities: (1) The Rules for Qualified Foreign Financial Institutions Investment in Listed Securities (QFI Rules) issued by the CMA Board on May 4, 2015, set out the procedures, requirements, and conditions for qualifying foreign investors to invest in listed securities in the Saudi market and specify their obligations and the obligations of authorized persons in this regard. The QFI Rules were amended effective January 9, 2018, to:
   (a) Relax some of the restrictions that were previously enforced on the qualification of potential foreign investors, such as lowering the required minimum limit of asset under management or custody (AUM) for the financial institution to $500 million (SR 1.87 billion) from $1 billion (SR 3.75 billion); (b) Eliminate the requirement for the CMA’s review and approval of the qualification application; (c) Eliminate the investor experience requirement; (d) Qualify the affiliates of QFIs or foreign portfolio managers and their managed funds without the need to submit separate applications; (e) Ease some of the continuous obligations requirements on QFIs. (2) The CMA’s Board issued a resolution allowing nonresident foreign investors to invest directly in the parallel equity market (Nomu) effective January 1, 2018.

For non-direct investment in these securities: (1) Nonresident foreigners, either institutions or individuals, may invest in such securities through access products ("swap agreements"), with authorized persons, which transfer economic benefits but not legal title, subject to the conditions and requirements set out in the CMA’s Board Resolution of August 17, 2008. From January 4, 2017, CMA Board Resolution of July 2015 was amended by changing the limit on the percentage of foreign investments via swap agreements in the Saudi capital market from 5% to 10% of the shares of the issuer whose shares are listed or convertible debt instruments of the issuer. The 10% limit is calculated as an aggregate limit on the foreign investor and any affiliates together, that is, an affiliate of a foreign investor may invest to the 10% limit regardless of the investment of the foreign investor. Effective May 3, 2018, the Resolution was amended allowing swap holders to open QFI account while retaining the swap account for grace period of one year, providing foreign investor with choice of channel for trading. (2) Nonresident foreigners may also hold units in mutual funds, including ETFs, which may invest in Saudi listed securities. (3) Nonresident GCC citizens are treated equal to residents in Saudi Arabia and allowed to invest directly in the Saudi Stock Exchange.

The CMA Board issued the Investment Accounts Instructions of April 3, 2016, to regulate the opening and operation of investment accounts held by authorized persons licensed by the CMA (dealing, managing, or custody) and to define the related investment accounts.
controls and supervisory rules. The Instructions were amended by CMA Board Resolution effective November 21, 2018, to, inter alia, remove some requirements for opening investment accounts for foreign investors, such as copies of identification documents of the owner of the QFI.

There are no controls on portfolio investment in government securities by foreign nationals. There is no minimum holding period requirement for such bonds.

**Sale or issue locally by nonresidents** Yes. The issuance and sale of securities, including debt securities, are under the jurisdiction of the CMA and require its approval or notification depending on the offer type. In all cases, foreign issuers must comply with the Exchange Listing Rules and any foreign listing requirements that the CMA may issue in the future, which will detail the requirements that are imposed on the foreign issuers. The issuer must be a Saudi joint-stock company, except where the provisions of Article 14 “cross listing” of the listing rules apply. All issuances and offerings must be conducted through a person authorized in Saudi Arabia.

**Purchase abroad by residents** Yes. No restrictions apply, except that insurance companies may not invest more than 20% in foreign securities unless approved by the SAMA. In addition, a limit of 5% applies to foreign government bonds and bonds issued by foreign companies. However, any security issued abroad may only be advertised in Saudi Arabia through a person authorized in Saudi Arabia and subject to the provisions of Part 3 of the Securities Business Regulations.

**Sale or issue abroad by residents** No. There are no restrictions on the sale or issuance of securities abroad by residents, which are subject to the laws where the sale or issuance takes place. However, pursuant to paragraph a/6 of Article 6 of the Capital Market Law, the CMA has the power to approve, cancel, or suspend the listing of Saudi securities of Saudi issuers traded on the Saudi Stock Exchange on stock exchanges abroad. Only authorized persons may conduct securities business in Saudi Arabia unless exempt.

**On money market instruments** Yes.

**Purchase locally by nonresidents** Yes. Purchasing securities locally by nonresidents is subject to the following.

For direct investment in these securities: (1) The Rules for Qualified Foreign Financial Institutions Investment in Listed Securities (QFI Rules) issued by the CMA Board on May 4, 2015, set out the procedures, requirements, and conditions for qualifying foreign investors to invest in listed securities in the Saudi market and specify their obligations and the obligations of authorized persons in this regard. The QFI Rules were amended effective January 9, 2018, to: (a) Relax some of the restrictions that were previously enforced on the qualification of potential foreign investors, such as lowering the required minimum limit of asset under management or custody (AUM) for the financial institution to $500 million (SR 1.87 billion) from $1 billion (SR 3.75 billion); (b) Eliminate the requirement for the CMA’s review and approval of the qualification application; (c) Eliminate the investor experience requirement; (d) Qualify the affiliates of QFIs or foreign portfolio managers and their managed funds without the need to submit separate applications; (e) Ease some of the continuous obligations requirements on QFIs. Issuance and sale of securities, including money market instruments, in Saudi Arabia are under the jurisdiction of the CMA and must require its approval or notification depending on the offer type. In all cases, foreign issuers must comply with the Exchange Listing Rules and any foreign listing requirements that the CMA may issue approve in the future, which will detail the requirements that are imposed on the foreign issuers. All issuances and offerings must be conducted through a person authorized in Saudi Arabia.

There are no restrictions on the purchase of securities abroad by residents. However, any security issued abroad may only be advertised in Saudi Arabia through a person authorized in Saudi Arabia and subject to the provisions of Part 3 of the Securities Business Regulations.

There are no restrictions on the sale or issuance of securities abroad by residents, which are subject to the laws where the sale or issuance takes place. However, pursuant to paragraph a/6 of Article 6 of the Capital Market Law, the CMA has the power to approve, cancel, or suspend the listing of any Saudi security of any Saudi issuer traded on the Saudi Stock Exchange on any stock exchange abroad. Only authorized persons may conduct securities business in Saudi Arabia unless exempt.

The Capital Market Law defines investment funds as collective investment schemes. There is no distinction between collective investment schemes. Nonresidents may invest in CIS funds, including ETFs. The CMA Board of Commissioners issued the Real-Estate Investment Traded Funds Instructions, covering offering requirements, unitholders’ consent on the fundamental changes, unitholder meetings, disclosure requirements, trading halt and cancelation of listing, and termination of the Real-Estate Investment Traded Fund.
Effective June 30, 2019, the SAMA issued a circulation allowing banks operating in the Kingdom to distribute collective investment schemes in accordance with the CMA’s circular that governs the contractual relationship between the bank and the authorized person.

Sale or issue locally by nonresidents: Yes.

Public offering of CIS investment is restricted to persons authorized by the CMA to conduct managing activities. However, foreign funds may offer units in foreign funds through a distributor (with a dealing as an agent activity license) as a private offer. All issuances and offerings must be conducted through a person authorized in Saudi Arabia and in accordance with the Investment Funds Regulations issued by the CMA (as amended).

Purchase abroad by residents: No.

There are no restrictions on the purchase of securities abroad by residents. However, any security issued abroad may only be advertised in Saudi Arabia through a person authorized in Saudi Arabia and subject to the provisions of Part 3 of the Securities Business Regulations.

Sale or issue abroad by residents: No.

There are no restrictions on the sale or issuance of securities by residents abroad.

Controls on derivatives and other instruments: Yes.

A derivative market is at the final stages of establishment and is expected to be launched before the end of 2019.

Purchase locally by nonresidents: No.

Sale or issue locally by nonresidents: Yes.

Issuance and sale of securities, including derivatives and other instruments, in Saudi Arabia are under the jurisdiction of the CMA and require its approval or notification depending on the type of offer. In all cases, rules for residents and nonresidents are the same, unless such securities will be listed on the Saudi Stock Exchange, in which case the issuer must be a Saudi joint-stock company, except where the provisions of Article 10 “cross listing” of the Exchange listing rules apply. All issuances and offerings must be conducted through a person authorized in Saudi Arabia.

Purchase abroad by residents: No.

There are no restrictions on the purchase of securities abroad by residents. However, any security issued abroad may only be advertised in Saudi Arabia through a person authorized in Saudi Arabia and subject to the provisions of Part 3 of the Securities Business Regulations.

Sale or issue abroad by residents: No.

There are no restrictions on the sale or issuance of securities, including derivatives and other instruments, abroad by residents, which are subject to the laws where the sale or issuance takes place. However, pursuant to paragraph a/6 of Article 6 of the Capital Market Law, the CMA has the power to approve, cancel, or suspend the listing of Saudi securities of Saudi issuers traded on the Saudi Stock Exchange on stock exchanges abroad. Only authorized persons may conduct securities business in Saudi Arabia unless exempt.

Controls on credit operations: Yes.

Commercial credits: Yes.

By residents to nonresidents: Yes.

Saudi Arabian banks and finance companies must obtain permission from the SAMA.

To residents from nonresidents: Yes.

SAMA permission is required for riyal-denominated loans made through Saudi Arabian banks. SAMA approval is required for banks and finance companies to borrow abroad except for interbank transactions. Pursuant to Article 68 of the Implementing Regulation of the Law on the Supervision of Finance Companies, a SAMA non-objection letter is required for finance companies to obtain foreign loans or loans in a currency other than the Saudi riyal.

| **Outward direct investment** | Yes. | Approved foreign investment enjoys the same privileges as domestic capital. The Foreign Investment Law allows foreign investors to invest directly in most economic sectors—with or without local participation, subject to sectoral limits—and imposes a tax rate of 20% on most foreign company profits, with two exceptions: (1) An 85% tax rate applies to profits of investment in the oil and hydrocarbon sector. (2) A basic tax rate of 30% applies to profits of investment in the natural gas sector as long as the internal rate of return of the project does not exceed 8%. For investments with an internal rate of return exceeding 8%, a sliding scale with higher tax rates applies, up to 85% for an internal rate of return exceeding 20%. There is a list of economic sectors where foreign investors may not invest. The negative list includes the following. (1) Industrial Sector: (a) Oil exploration, drilling, and production, except the services related to the mining sector listed as CPC 5115+883 in international classification codes; (b) Manufacturing of military equipment, devices, and uniforms; (c) Manufacturing of civilian explosives. (2) Service Sector: (a) Catering to military sectors; (b) Security and detective services; (c) Real estate investment in Makkah and Madinah; (d) Tourist orientation and guidance services related to Hajj and Umrah; (e) Printing and publishing, except the following activities: Pre-printing services (internationally classified as CPC 88442), Printing Presses (CPC 88442), Drawing and calligraphy (CPC 87501), Photography (CPC 875), Radio and Television Broadcasting Studios (CPC 96114), Foreign Media Offices and Correspondents (CPC 962); Promotion and Advertising (CPC 871), Public Relations (CPC 86506), Publication (CPC 88442), Press Services (CPC 88442), Production,
selling, and renting of computer software (CPC 88), Media consultancies and studies (CPC 853), Typing and copying (CPC 87505 + 87904), Motion picture and video tape distribution services (CPC 96113); (f) Commission agents (CPC 621); (g) Services provided by midwives, nurses, physical therapy services, and quasi-doctoral services (CPC 93191); (h) Fisheries; (i) Poison centers, blood banks, and health quarantines. Effective February 18, 2018, the following sectors were opened to foreign investors: (1) Recruitment and employment services; (2) Real estate brokerage; (3) Audiovisual and media services; (4) Commission agents; (5) Land transport services. There were several other reforms to attract FDI: On May 2, 2016, the foreign investment license requirements were reduced to two documents. The instant license and renewal system was launched in June 2017. Post services were automated (license renewal, company activities amendment, adding branches), and the time to issue new licenses was reduced (from average of 20 hours to less than 3 hours). The validity of foreign investment licenses is five years.

For investments in banks by nonresidents, there is a limit of 60% of capital, and permission of the authorities is required. Effective June 26, 2019, the overall limit was removed for foreign strategic investor ownership in listed companies, and they require SAMA’s approval for acquiring 50% or more of a bank’s capital. However, foreign strategic investors may not dispose of any of the shares they own within a period of two years after the date of ownership of such shares, and limits by other regulators or a company’s own rules still apply.

| Controls on liquidation of direct investment | No. |
| Controls on real estate transactions | Yes. |
| Purchase abroad by residents | No. |
| Purchase locally by nonresidents | Yes. |

In principle, the purchase of real estate is restricted to Saudi Arabian nationals, corporations, and institutions and nationals and institutions of GCC members. The Regulation of Ownership and Investment in Real Estate by Non-Saudis (Royal Decree No. M/15 of 17/4/1421H) allows foreign investors to purchase real estate as needed for their business, including housing for their staff. Further, with an appropriate foreign investment license, foreign investors may purchase real estate for investment purposes in all cities except Mecca and Medina, provided the investment is at least SRls 30 million. Investment in Mecca and Medina is restricted to Saudi Arabian nationals, corporations, and institutions. Foreign residents may own real estate.

The conditions for foreign individuals are:
(1) Non-Saudi natural persons legally residing in Saudi Arabia are allowed to acquire real estate for their private residence, following permission from the Ministry of Interior (Law of Real Estate Ownership and Investment by Non-Saudis, Article 2); (2) The property must be outside the perimeter of Makkah and Madinah Al-Munawwarah (Law of Real Estate Ownership and Investment by Non-Saudis, Article 5). The conditions for foreign companies are:
(1) The approval of the body issuing the license (Law of Real Estate Ownership and Investment by Non-Saudis, Article 1); (2) The property must be outside the perimeter of Makkah and Madinah Al-Munawwarah (Law of Real Estate Ownership and Investment by Non-Saudis, Article 5). The conditions for foreign companies licensed to invest in land and buildings: (1) If the license includes purchasing buildings or land for the purpose of building on it and
investing it by means of selling or renting, the total cost of the project, land and construction, may not be less than 30 million riyals. This amount may be amended by the Council of Ministers. Such real estate must be invested within five years from its acquirement (Law of Real Estate Ownership and Investment by Non-Saudis, Articles 1 and 5); (2) The property must be outside the perimeter of Makkah and Madinah Al-Munawarrah. (Law of Real Estate Ownership and Investment by Non-Saudis, Article 5); (3) The approval of the body issuing the license (Law of Real Estate Ownership and Investment by Non-Saudis, Article 1).

Changes during 2018 and 2019

Capital Transactions

The CMA’s Board issued a resolution allowing nonresident foreign investors to invest directly in the parallel equity market (Nomu). The Rules for Qualified Foreign Financial Institutions Investment in Listed Securities (QFI Rules) issued by the CMA Board on May 4, 2015, were amended to (1) Relax some of the restrictions that were previously enforced on the qualification of potential foreign investors, such as lowering the required minimum limit of asset under management or custody (AUM) for the financial institution to $500 million (SR 1.87 billion) from $1 billion (SR 3.75 billion); (2) Eliminate the requirement for the CMA’s review and approval of the qualification application; (3) Eliminate the investor experience requirement; (4) Qualify the affiliates of QFIs or foreign portfolio
managers and their managed funds without the need to submit separate applications; (5) Ease some of the continuous obligations requirements on QFIs.

05/03/2018 CMA’s Board Resolution of August 17, 2008, was amended allowing swap holders to open QFI account while retaining the swap account for grace period of one year, providing foreign investor with choice of channel for trading.

11/21/2018 The Investment Accounts Instructions of the CMA Board of April 3, 2016, were amended to, inter alia, remove some requirements for opening investment accounts for foreign investors, such as copies of identification documents of the owner of the QFI.

06/26/2019 The overall limit of 60% ownership in a bank’s capital was removed for foreign strategic investor ownership in listed companies, and they require Saudi Arabian Monetary Authority’s approval for acquiring 50% or more of a bank’s capital. However, foreign strategic investors may not dispose of any of the shares they own within a period of two years after the date of ownership of such shares, and limits by other regulators or a company’s own rules still apply.

06/26/2019 Complementary to the QFI rules, the CMA approved the “Instructions for the Foreign Strategic Investors’ Ownership in Listed Companies.” They are aimed at foreign legal persons who intend to own a strategic shareholding in listed companies, and for which the aim is to promote the financial or operational performance of the listed companies on the long term. Among the most prominent features of the Instructions is that foreign strategic investors were excluded from all requirements of QFI rules, including the investment limits stipulated in Article 14 of the QFI Rules that the maximum proportion of the shares of any issuer whose shares are listed or convertible debt instrument of the issuer that may be owned by all foreign investors in aggregate is 49%. However, foreign strategic investors may not dispose of any of the shares they own in accordance with the Instructions within a period of two years after the date of ownership of such shares, and limits by other regulators or a company’s own rules still apply. In addition, the procedures for opening accounts and owning shares through authorized persons were eased.

Bonds or other debt securities

Purchase locally by nonresidents 01/01/2018 The CMA’s Board issued a resolution allowing nonresident foreign investors to invest directly in the parallel equity market (Nomu).

01/09/2018 The Rules for Qualified Foreign Financial Institutions Investment in Listed Securities (QFI Rules) issued by the CMA Board on May 4, 2015, were amended to (1) Relax some of the restrictions that were previously enforced on the qualification of potential foreign investors, such as lowering the required minimum limit of asset under management or custody (AUM) for the financial institution to $500 million (SR 1.87 billion) from $1 billion (SR 3.75 billion); (2) Eliminate the requirement for the CMA’s review and approval of the qualification application; (3) Eliminate the investor experience requirement; (4) Qualify the affiliates of QFIs or foreign portfolio managers and their managed funds without the need to submit separate applications; (5) Ease some of the continuous obligations requirements on QFIs.

05/03/2018 CMA’s Board Resolution of August 17, 2008, was amended allowing swap holders to open QFI account while retaining the swap account for grace period of one year, providing foreign investor with choice of channel for trading.

11/21/2018 The Investment Accounts Instructions of the CMA Board of April 3, 2016, were amended to, inter alia, remove some requirements for opening investment accounts for foreign investors, such as copies of identification documents of the owner of the QFI.
identification documents of the owner of the QFI.

**On money market instruments**

Purchase locally by nonresidents

01/01/2018 The CMA’s Board issued a resolution allowing nonresident foreign investors to invest directly in the parallel equity market (Nomu).

01/09/2018 The Rules for Qualified Foreign Financial Institutions Investment in Listed Securities (QFI Rules) issued by the CMA Board on May 4, 2015, were amended to (1) Relax some of the restrictions that were previously enforced on the qualification of potential foreign investors, such as lowering the required minimum limit of asset under management or custody (AUM) for the financial institution to $500 million (SR 1.87 billion) from $1 billion (SR 3.75 billion); (2) Eliminate the requirement for the CMA’s review and approval of the qualification application; (3) Eliminate the investor experience requirement; (4) Qualify the affiliates of QFIs or foreign portfolio managers and their managed funds without the need to submit separate applications; (5) Ease some of the continuous obligations requirements on QFIs.

05/03/2018 CMA’s Board Resolution of August 17, 2008, was amended allowing swap holders to open QFI account while retaining the swap account for grace period of one year, providing foreign investor with choice of channel for trading.

11/21/2018 The Investment Accounts Instructions of the CMA Board of April 3, 2016, were amended to, inter alia, remove some requirements for opening investment accounts for foreign investors, such as copies of identification documents of the owner of the QFI.

**On collective investment securities**

Purchase locally by nonresidents

06/30/2019 The Saudi Arabian Monetary Authority issued a circulation allowing banks operating in the Kingdom to distribute collective investment schemes in accordance with the CMA’s circular that governs the contractual relationship between the bank and the authorized person.

**Controls on direct investment**

**Inward direct investment**

02/18/2018 The following sectors were opened to foreign investors: (1) Recruitment and employment services; (2) Real estate brokerage; (3) Audiovisual and media services; (4) Commission agents; (5) Land transport services.

06/26/2019 The overall limit of 60% ownership in a bank’s capital was removed for foreign strategic investor ownership in listed companies, and they require Saudi Arabian Monetary Authority’s approval for acquiring 50% or more of a bank’s capital. However, foreign strategic investors may not dispose of any of the shares they own within a period of two years after the date of ownership of such shares, and limits by other regulators or a company’s own rules still apply.

SENEGAL
(Position as of December 31, 2018)

Status under IMF Articles of Agreement

Date of membership
August 31, 1962.

Article VIII
Yes. Date of acceptance: June 1, 1996.

Article XIV

Exchange Measures

Restrictions and/or multiple currency practices
No. No restrictions as reported in the latest IMF staff report as of December 31, 2018.

Exchange measures imposed for security reasons
Yes.

In accordance with IMF Executive Board Decision No. 144-(52/51)
Yes.

Other security restrictions
Yes. A regional framework to fight money laundering (AML) and the financing of terrorism (AFT) was created at the regional level through two WAEMU Directives in 2002 (AML) and 2007 (AFT). This comprehensive framework facilitates the implementation of UNSC resolutions based on a list of persons and entities prepared by the Committee. It was updated in 2015 at the regional level through a new WAEMU Directive which was incorporated into Senegal’s corpus in 2018.

Exchange Arrangement

Currency
Yes. The currency of Senegal is the CFA franc (XOF).

Other legal tender
No.

Exchange rate structure

Unitary
Yes.

Dual

Multiple

Classification

No separate legal tender

Currency board

Conventional peg
Yes. The exchange rate arrangement of the WAEMU is a conventional peg. Senegal participates in a currency union with seven other members of the WAEMU and has no separate legal tender. The Monetary Cooperation Agreement between the WAEMU member countries and France was concluded December 4, 1973. It was maintained after the French franc was replaced by the euro by the Council of the European Union decision of November 23, 1998. The Monetary Cooperation Agreement is based on three pillars: (1) a
common issuing institution, (2) fixed parity with the euro, and (3) a
guarantee of unlimited convertibility. In exchange for the unlimited
convertibility of the CFA franc to euros, the WAEMU members are
required to deposit 50% of their reserve holdings to the operations
account with the French Treasury in accordance with the Amendment
to the Operations Account Convention signed by France and the
BCEAO on September 20, 2005.

**Other monetary framework**

**Exchange tax**  Yes.  A commission of 0.6% is levied on transfers to all countries that are not members of the WAEMU. This commission is surrendered to the Treasury and constitutes a portion of its tax revenue.

**Exchange subsidy**  No.

**Foreign exchange market**  Yes.  Authorized intermediaries (authorized intermediary banks and authorized nonelectronic exchange dealers) freely determine the buying and selling rates of foreign currencies, with the exception of the euro, which must be traded at the official fixed rate of CFAF 655.957 per euro. The commission on foreign exchange transactions may not exceed 2%. Instruction No. 013-11-2015 on the terms and conditions for conducting rapid money transfers as a subagent within the WAEMU is in force.

**Spot exchange market**  Yes.  The entities authorized to conduct nonelectronic foreign currency transactions are authorized intermediary banks and individuals or companies authorized to conduct nonelectronic transactions by decision of the minister of finance, with the consent of the BCEAO.
Authorized intermediaries must comply with the provisions in effect on the financial conditions for executing banknote foreign exchange transactions that involve foreign currencies and issue a transaction slip for all transactions with a client. Moreover, to provide satisfactory information to clients, they are required to (1) permanently post at their windows the rates actually charged for the different currencies and (2) post notification that a transaction slip must be issued for all foreign exchange transactions on presentation of the requestor’s identity document. Banks and registered banknote exchange houses are intermediaries authorized by the minister of finance to conduct foreign exchange transactions with the public. Entities authorized to conduct cash exchange transactions, of which there were 641 on December 31, 2018, are authorized to procure travelers’ checks and foreign banknotes from licensed intermediaries for their customers. They are authorized to accept travelers’ checks denominated in foreign currencies from their customers and to sell them to licensed intermediaries. Licensed exchange dealers are not authorized to make payments or transfers in foreign currencies abroad or to hold accounts abroad.

In their operations with customers, authorized intermediaries (authorized intermediary banks and authorized OTC dealers) freely determine the buying and selling rates of foreign currencies, with the exception of the euro, which is traded at the official fixed rate of CFAF 655.957, and may be subject to a maximum commission of 2.0%.

Operated by the central bank Yes. The BCEAO supplies at the official rate the foreign currency that each authorized intermediary needs to make payments abroad.

Foreign exchange standing facility Yes. The BCEAO exchanges foreign currency for CFA francs on commercial banks’ demand at the rates published on the international markets, without commission, with the exception of the euro, which is traded at the official fixed rate of 655.957 per euro. The nonelectronic currency exchange windows are open to owners of accounts on the BCEAO books and to the general public. A commission of 0.5% is charged on all transactions with the public (purchases and sales) and all withdrawals by banks and financial institutions (including euro withdrawals). However, no commission is charged for the following operations (1) OTC foreign banknote exchanges conducted by state entities, government employees of WAEMU Member States on mission abroad, and officials of the CB and their beneficiaries, and (2) The CB purchases foreign exchange in exchange for CFA francs at the daily rate, without a commission, at the request of commercial banks that present such foreign exchange at its windows, for purposes of their payments.

Allocation No.

Auction No.

Fixing No.

Interbank market Yes. Transactions in CFA francs between authorized intermediaries are allowed. However, there is no regulated interbank foreign exchange market in the WAEMU.

Over the counter Yes.

Brokerage No.

Market making No.

Forward exchange market Yes. Residents of the WAEMU zone are permitted to conduct the following transactions in the foreign exchange derivatives market
with authorized intermediary banks established in the WAMU or with foreign banks: outright forward foreign exchange contracts (over the counter), foreign exchange options, foreign exchange swaps, and cross-currency swaps.

Transactions in foreign exchange options are limited to the following two types of transactions: options to purchase foreign currency, purchased by residents of the WAEMU zone from an authorized intermediary bank established in the WAMU or from a foreign bank, or options to sell foreign currency, purchased by residents of the WAEMU zone from an authorized intermediary bank established in the WAMU or from a foreign credit institution.

Authorized intermediary banks are required to simultaneously cover the exchange risk they incur in respect of derivative instruments traded with their customers.

The underlying commercial and financial operations must relate to imports and exports of goods and services by a resident, foreign borrowing operations by a resident (drawings and repayments), or direct foreign investment in a resident company.

All legitimate foreign currency needs are ultimately met by the BCEAO.

This information can be found at the AREAER ONLINE database: http://www.elibrary-areaer.imf.org/Pages/Reports.aspx.

Arrangements for Payments and Receipts

Prescription of currency requirements

Senegal is linked to the French Treasury via the BCEAO through an operations account, through which settlement of transactions with France, Monaco, and other operations account countries (WAEMU and CEMAC members and the Comoros) is made mainly in euros. Payments with countries outside the WAEMU are made in foreign currencies. Trade with other WAEMU countries is settled in CFA francs.

Controls on the use of domestic currency

The CFA franc may not be used for the payment of current international transactions or capital transactions with countries outside the WAEMU.

For current transactions and payments

The CFA franc may not be used for the payment of current international transactions with countries outside the WAEMU. However, the CFA franc is guaranteed unlimited convertibility through an open operating account with the French Treasury.

For capital transactions

The CFA franc may not be used for capital transactions with countries outside the WAEMU. Investments by residents of the WAEMU zone outside the WAEMU are subject to prior authorization by the minister of finance, and at least 75% of the investment must be financed through foreign borrowing.

Transactions in capital and money market instruments

The CFA franc may not be used for capital transactions with countries outside the WAEMU. Foreign investment by residents of the WAEMU zone is subject to authorization by the MOF. At least 75% of the investment must be financed through foreign borrowing. The interested party must request authorization through a letter designating the authorized intermediary to settle the payment. Purchases of foreign negotiable securities authorized by the regional capital markets authority to be issued or sold in WAEMU members do not require Ministry of Economy and Finance (MEF) authorization.

Transactions in derivatives and other instruments

Residents of WAEMU member countries may engage in the following operations on derivatives and other instruments with accredited banks established in the WAEMU or foreign banks: (1)
forward contract, foreign exchange swaps, and options. When the transaction is backed by an operation other than the importation of goods and services, the CFA franc is the counterparty currency of the foreign exchange spot forward, foreign exchange option, or foreign exchange swap operation.

**Credit operations**
Yes. Loans of any kind, CFA franc overdrafts, and, in general, any advances granted by authorized intermediaries to nonresidents of the WAEMU zone are subject to prior authorization by the Directorate of External Financial Relations of the MOF, after BCEAO approval.

**Use of foreign exchange among residents**
Yes. The CFA franc is the only legal tender, and residents of the WAEMU zone may not use foreign exchange for domestic transactions.

**Payments arrangements**
Yes.

<table>
<thead>
<tr>
<th>Bilateral payments arrangements</th>
<th>No.</th>
</tr>
</thead>
</table>

**Operative**
No.

**Inoperative**
No.

**Regional arrangements**
Yes. An operations account is maintained with the French Treasury that links operations account countries. All purchases and sales of foreign currencies or euros against CFA francs are settled through a debit or credit to the operations account.

**Clearing agreements**
Yes. There is a multilateral clearing agreement between the WAEMU countries and the other ECOWAS member countries (Cabo Verde, The Gambia, Ghana, Guinea, Liberia, Nigeria, Sierra Leone) as part of the WAMA. All payments for current transactions between countries whose CBs are Wama members may be made under the clearing agreement. However, this excludes transactions specified by the committee of governors of the CBs of ECOWAS members and payments for exports from one member country to another member country of finished products originating in countries whose CB or monetary authority is not a WAMA member.

**Barter agreements and open accounts**
No.

**Administration of control**
Yes. The institutional reform of the WAMU and the BCEAO establishes the following new basic instruments: (1) the WAMU Treaty, (2) the BCEAO Charter, (3) the Bank Regulation Act, and (4) the Convention governing the WAMU Banking Commission. Exchange control is administered jointly by the minister of finance and the BCEAO. Most of the authority to supervise foreign exchange transactions is delegated to authorized banks, which are required to report these operations to the minister of finance. The BCEAO is also authorized to collect—either directly or through banks, financial institutions, the postal administration, or judicial agents—information necessary to compile balance of payments statistics. Customs officers monitor outflows of foreign exchange and confirm imports and exports of goods. All WAEMU residents are treated as residents of Senegal for the purposes of preparing the external position of banks, domiciliation and repatriation of export revenue, issuance and sales of securities, gold imports and exports, investment and lending transactions, and physical exports of means of payment and securities by postal package or ordinary mail. However, for statistical purposes with regard to the balance of payments, all countries other than Senegal are considered foreign countries. Moreover, all transfers with other countries must be made through registered intermediary banks, the postal service, or the BCEAO.

**Domestic currency**

Travelers may freely export CFA franc (XOF) banknotes from one WAEMU member country to another. Resident individuals (that is, from a WAEMU member country) and legal entities other than the BCEAO and its banking and commercial correspondents outside the WAEMU are prohibited from sending and receiving CFA franc (XOF) banknotes issued by the BCEAO.

**Foreign currency**

Reexports of foreign banknotes by nonresident travelers are allowed up to the equivalent of CFAF 5,00,000; reexports of foreign banknotes above this ceiling require documentation demonstrating either the importation of the foreign banknotes or their purchase against other means of payment registered in the name of the traveler or through the use of nonresident deposit accounts in local banks. Nonresident travelers must declare to customs foreign currency exceeding the equivalent of CFAF 1 million on exit. Residents of the WAEMU zone traveling to countries that are not WAEMU members are required to declare foreign currency on their person in excess the equivalent of CFAF 1 million. They are allowed to carry up to the equivalent of CFAF 2 million a person in banknotes not issued by the BCEAO. Amounts in excess of this ceiling may be exported in the form of traveler’s checks, prepaid debit and payment cards, conventional debit and payment cards, or other means of payment. Foreign exchange allowances issued by authorized intermediaries in the form of traveler’s checks or prepaid debit and payment cards must be based on the need to cover customary, personal travel expenses, if they exceed the equivalent of CFAF 2 million a person. The issue of foreign currency to resident travelers is subject to the presentation of travel documents and a valid passport or national identification card.

**Domestic currency**

Resident and nonresident travelers may freely import domestic currency (CFA franc – XOF). However, WAEMU resident individuals and legal entities other than the BCEAO and its banking and commercial correspondents outside the WAEMU are prohibited from receiving banknotes in domestic currency.

**Foreign currency**

There are no restrictions on resident and nonresident travelers’ importation of foreign-currency-denominated means of payment, which must be declared to customs authorities if they exceed the equivalent of CFAF 1 million. Resident travelers must surrender foreign banknotes and other foreign-currency-denominated means of payment exceeding CFAF 5,00,000 to an authorized intermediary within eight days of arrival in any WAEMU member country.

<td><strong>Individuals who are residents of the WAEMU temporarily staying or traveling outside of WAEMU</strong></td>
<td>Individuals who are residents of the WAEMU temporarily staying or traveling outside of WAEMU may open bank accounts outside the WAEMU to deposit foreign currency legally exported and any income acquired outside of the WAEMU during their travel or temporary stay outside of the WAEMU. These individuals are required to repatriate balances on such accounts within 30 days of return to the WAEMU. In any circumstance other than the foregoing, opening of foreign accounts by WAEMU residents is subject to MOF authorization by after non-objection from the BCEAO. The MOF authorization specifies the operations that may be credited or debited on such accounts. In the event of a failure to obtain a new MOF authorization, the accredited intermediary must request that the account be closed by the end of the term authorized and that any balance be repatriated to a WAEMU member country within eight days.</td>
