#### IMF available resources

(one-year forward commitment capacity, billion SDRs)

#### Related rates

SDR interest rate, rate of charge on IMF nonconcessional loans outstanding, and dollars per SDR

#### Note on IMF Special Drawing Rights

Special Drawing Rights (SDRs) are an international reserve asset, created by the IMF in 1969 to supplement the existing official reserves of member countries. SDRs are

allocated to member countries in proportion to their IMF quotas. The SDR also serves as the unit of account of the IMF and some other international organizations. Its value is based on a basket of key international currencies.
