# Staff Country Reports

## Republic of Kazakhstan: Statistical Appendix

This Statistical Appendix for the Republic of Kazakhstan was prepared by a staff team of the International Monetary Fund as background documentation for the periodic consultation with the member country. It is based on the information available at the time it was completed on June 8, 2005. The views expressed in this document are those of the staff team and do not necessarily reflect the views of the government of the Republic of Kazakhstan or the Executive Board of the IMF.

The policy of publication of staff reports and other documents by the IMF allows for the deletion of market-sensitive information.

To assist the IMF in evaluating the publication policy, reader comments are invited and may be sent by e-mail to [publicationpolicy@imf.org](mailto:publicationpolicy@imf.org).

Sources: Kazakhstani authorities; and Fund staff estimates.

1/ Cumulative since the end of the previous year.

2/ Includes revenues accrued to NFRK

3/ Oil royalties, bonuses, and production sharing agreements not included elsewhere, including a \$210 million bonus payment from a large oil company in 2001.

4/ The large discrepancy in the third quarter of 2002 is related to the repayment of a \$350 million eurobond, in which funds were transferred from the banking system to an escrow account in the third quarter, while repayment to foreign creditors did not take place until the fourth quarter.

Sources: Kazakhstani authorities; and Fund staff estimates.

1/ Cumulative since the end of the previous year.

2/ Oil royalties, bonuses, and production sharing agreements.

3/ Includes a \$210 million bonus payment from a large oil company in 2001.

4/ The large discrepancy in the third quarter of 2002 is related to the repayment of a \$350 million eurobond, in which funds were transferred from the banking system to an escrow account in the third quarter, while repayment to foreign creditors did not take place until the fourth quarter.

1/ Reported figures for 2000–01 current account have been adjusted for staff estimates of the underinvoicing of exports.

2/ For 2001 and 2002, the numbers reflect the effect of market valuation, in addition to transactions. The start-up assets in 2001 included \$660 million from the sale of a 5 percent government share in TCO. The remaining balance was from oil revenue.

3/ Estimates and projections are based on GDP at market exchange rates. Import data have been revised for the period 2000–04 in light of revisions to NBK's cif coefficients in March 2005.
