HEAVILY INDEBTED POOR COUNTRIES (HIPC) INITIATIVE AND MULTILATERAL DEBT RELIEF INITIATIVE (MDRI)— STATISTICAL UPDATE

IMF staff regularly produces papers proposing new IMF policies, exploring options for reform, or reviewing existing IMF policies and operations. The following document has been released and is included in this package:

- The **Staff Report** on Heavily Indebted Poor Countries (HIPC) Initiative and Multilateral Debt Relief Initiative (MDRI)—Statistical Update, prepared by IMF/WB staff and completed on December 12, 2014.

The staff report was issued to the Executive Board for information.

The policy of publication of staff reports and other documents allows for the deletion of market-sensitive information.

Electronic copies of IMF Policy Papers
are available to the public from

HEAVILY INDEBTED POOR COUNTRIES (HIPC) INITIATIVE AND MULTILATERAL DEBT RELIEF INITIATIVE (MDRI)— STATISTICAL UPDATE

EXECUTIVE SUMMARY

The HIPC Initiative and MDRI are nearly complete with 35 countries having already reached the completion point under the HIPC Initiative. One country, Chad, remains in the interim phase. Debt relief under the Initiatives has substantially alleviated debt burdens in recipient countries and has enabled them to increase their poverty-reducing expenditure by two and a half percentage points between 2001 and 2013.

Creditor participation in the Initiative has been strong amongst the multilateral and Paris Club creditors; however participation from the other creditor groups still needs to be strengthened. The total cost of debt relief to creditors under the HIPC Initiative is currently estimated to be US\$75.0 billion, while the costs to the four multilateral creditors providing relief under the MDRI is estimated to be US\$41.1 billion in end-2013 present value terms.

Approved By
**John Panzer and
Peter Allum**

Prepared by Jayendu De and Christian Gonzales under the supervision of Geneviève Verdier, and Reza Baqir (IMF), and by Signe Zeikate under the supervision of Sudarshan Gooptu (WB).

INTRODUCTION

1. This report provides an update on the status of implementation of the HIPC Initiative and the MDRI and the cost estimates of these Initiatives' in end-2013 present value (PV) terms.¹ This report provides an update to the overall progress made under the Initiative to date. In particular, the following figures and tables are updated:

- Trends in poverty-reducing spending and debt service in HIPCs (Annex III Tables AIII1–3)
- Costs of the initiatives by creditor and country (Tables 2 and 3 and Annex III Tables AIII4–14)
- Non-Paris Club bilateral creditor participation (Annex III Table AIII15)
- Commercial creditor litigation against HIPCs (Annex III Table AIII16)

PROGRESS IN THE IMPLEMENTATION OF THE HIPC/MDRI INITIATIVE

2. **The HIPC/MDRI Initiative is nearly complete.** Out of the 39 countries that have been eligible under the Initiative, 35 have already reached the completion point. Three pre-decision-point countries—Eritrea, Somalia, and Sudan—have yet to start the process of qualifying for debt relief under the Initiative, while Chad remains in the interim phase. The assessment for qualification and eligibility for Myanmar and Zimbabwe is yet to be fully completed.²

¹This is an update to the earlier report "[Heavily Indebted Poor Countries \(HIPC\) Initiative and Multilateral Debt Relief Initiative \(MDRI\)—Statistical Update](#)" December 19, 2013 that provides debt relief cost estimates in end 2012 PV terms. As agreed by the [IMF and IDA Boards](#) the core information on debt service and poverty-reducing expenditure, the cost of debt relief, creditor participation rates, and litigation against HIPCs should continue to be made available and updated regularly on the IMF and World Bank websites.

²Nepal remains potentially eligible. For further discussion, see "Heavily Indebted Poor Countries (HIPC) Initiative and Multilateral Debt Relief Initiative (MDRI)—Status of Implementation and Proposals for the Future of the HIPC Initiative"; IDA/R2011–0310 and IMF Policy Paper, November 8, 2011.

Chad				
3 Pre-Decision-Point HIPCs ^{3/}				
Eritrea	Somalia	Sudan		

1/ Countries that have qualified for irrevocable debt relief under the HIPC Initiative.
2/ Countries that have reached decision point under the HIPC Initiative, but have not yet reached completion point.
3/ Countries that are eligible or potentially eligible and may wish to avail themselves of the HIPC Initiative and MDRI.

3. Chad. Chad is the only country in the interim phase of the HIPC Initiative. A three-year arrangement under the ECF for a total amount of about US\$122.4 million, covering the period July 2014–June 2017, was approved on August 1, 2014. Satisfactory performance under the ECF is one of the prerequisites to achieve the HIPC completion point. A World Bank mission in May 2014 found that Chad had made good progress against the other HIPC completion-point triggers. The authorities have finalized the annual progress report on the implementation of the PRSP, for which a World Bank/IMF JSAN will be finalized by the end of 2014.

4. Eritrea. There have been no updates from the previous report in the case of Eritrea. As reported in the previous update, Eritrea has benefitted from the development of mining and the production of gold since 2011 and base metals since 2013, but its political situation remains fragile. The last Article IV Consultation for Eritrea took place in 2009 and there has been no discussion of an IMF-supported program.

5. Somalia. With the support of the World Bank and the IMF, the External Debt Technical Working Group was established to tackle Somalia's accumulated arrears and debt and to ensure that Somalia builds a credible track record of economic reforms needed for a SMP. Although Somalia is ineligible to receive financial assistance from the IMF or the World Bank due to its longstanding arrears of about US\$360 million and US\$270 million respectively, both institutions have been providing technical assistance and capacity development in key areas of their expertise with the IMF support directed towards central banking, financial governance and the development of macroeconomic statistical data systems. Staff will work on collecting basic real, fiscal, monetary, and external sector data and establishing a macroeconomic and financial framework. This would allow staff to conduct Article IV consultation discussions that have been delayed since 1990, as well as prepare the groundwork for a SMP. In addition, the World Bank is providing technical assistance to the senior staff of the Ministry of Finance on the full range of budget and policy management issues with the objectives of strengthening budget preparation, documentation, improving transparency and accountability in the mobilization and use of public resources and building capacity for

improved public financial management. The AfDB is also supporting the newly created Debt Management Unit to increase staff capacity and to reconstruct the debt database in a computerized debt management system.

6. Sudan. Sudan remains in arrears to the IMF, the World Bank, and the AfDB. Its arrears stood at US\$1,511.9 million to the IMF (as of July 18, 2014), US\$806 million to IDA (as of July 21, 2014), and US\$314 million to the AfDB (as of June 30, 2014). The authorities prepared and implemented a comprehensive reform package in September 2013 which had introduced new policy measures, including lifting of fuel subsidies and unifying the official and commercial exchange rates. On March 7, 2014 a new SMP for January–December 2014 was approved by the IMF. The performance under the SMP will aid the authorities to build a track record on cooperation with the IMF which should help in securing the necessary support for arrears clearance and debt relief in due time.

7. Myanmar. Myanmar has completed a 12-month Staff Monitored Program (SMP) ending in January 2014. The completion of this program enabled Myanmar to clear its external arrears vis-à-vis its Paris Club creditors, as well as the World Bank and the Asian Development Bank.

8. Zimbabwe. Zimbabwe remains in debt distress and will need a comprehensive arrears clearance framework with the international community.³ Zimbabwe's eligibility to receive assistance under the HIPC Initiative remains unclear. The recent indebtedness assessments based on loan-by-loan reconciled debt data indicate that Zimbabwe has met the indebtedness criterion for eligibility under the HIPC Initiative. However, to be eligible for assistance, the country also needs to clear its arrears to the PRGT.⁴ On the Bank side, a modification of, or exception to, IDA's HIPC Initiative income criteria would be required. To receive HIPC debt relief, Zimbabwe would also need to qualify for the Initiative. Qualification largely depends on the levels of debt vis-à-vis exports based on the latest fiscal year data, and on its policy performance. The recent assessment indicates that based on end-2013 debt-to-exports ratio, Zimbabwe would not qualify for the HIPC debt relief initiative. A Staff-Monitored Program (SMP) for Zimbabwe was approved in June 2013, its first IMF agreement in more than a decade. On October 29, 2014, the IMF Management completed the third review under the SMP and approved a successor SMP covering October 2014–December 2015. The main objectives of the new SMP are to strengthen Zimbabwe's external position, as a prerequisite to arrears clearance and resumption of debt service; and to show that the country has the capacity to implement policy reforms that could justify a financial arrangement with the Fund.

³[Staff Report for the 2014 Article IV Consultation](#)

⁴Due to arrears to the Poverty Reduction and Growth Trust (PRGT), in 2001 Zimbabwe was removed from the IMF's list of PRGT-eligible countries. Zimbabwe made payments to the PRGT in 2012 and 2013 totaling US\$7.5 million and US\$1.8 million, respectively. Payments in 2014 through end-October totaled US\$1.7 million. As of end-October 2014, Zimbabwe's arrears to the IMF and the Bank amounted to US\$119 million and US\$1,085 million, respectively.

DEBT SERVICE RELIEF AND POVERTY REDUCING EXPENDITURE

(Figure 1, Annex I Table AI3 and Annex III Tables AIII1–3)

- 9.** Debt relief under the Initiatives has substantially alleviated debt burdens in recipient countries and has enabled them to increase their poverty-reducing expenditures (Figure 1 and Annex III Table AIII1). However, recent data indicate that the decline in debt service has moderated and the debt service burden may increase in the near future.
- 10.** Despite the increase in poverty-reducing expenditures, the HIPC countries are lagging behind on reaching the MDG targets in many areas. The MDG target year of 2015 is fast approaching, however many countries in Sub-Saharan Africa, including HIPC countries, are seriously off target to meet the MDGs. The lowest achievements have been reported in the education and health related sectors. So far no HIPC had met the MDG challenge in the areas of (i) reducing infant mortality rate and (ii) combating HIV/AIDS and other diseases. Rwanda is the only HIPC country that met the MDG in the area of reducing maternal mortality rate. HIPC countries are performing relatively better in the areas of gender equality in primary education and access to safe drinking water. More than one third of the HIPC countries have increased access to improved water services and have already met the MDG on gender equality in primary education. In addition, one fifth of HIPC countries have reduced child mortality rates. Overall, there is a need to increase efforts and to accelerate progress in order to achieve most of the MDG targets by 2015.

UPDATE OF THE COSTS OF THE INITIATIVES

11. The total cost of debt relief to creditors under the HIPC Initiative is estimated at US\$75 billion in end-2013 present value (PV) terms (Table 2). These costs are broadly unchanged compared to the previous estimates in end-2012 PV terms. Changes reflect small revisions to data and a lower discount rate.⁵

12. The total cost of the MDRI for the four participating multilateral creditors is estimated at US\$41.1 billion in end-2013 PV terms (Table 3, Annex III Table AIII4).

	Post-Completion- Point HIPCs (35)	Interim HIPCs (1)	Total Post-Decision- Point HIPCs (36)	Pre-Decision- Point HIPCs (3)	Total (39)
	(I)	(II)	(III) = (I) + (II)	(IV)	(V) = (III) + (IV)

Sources: Country authorities, and World Bank, IMF, AfDB and IaDB staff estimates.

1/ Estimates are preliminary and subject to a number of assumptions, including the timing of HIPC decision and completion points, and, where applicable, of arrears clearance.

2/ These countries have qualified for MDRI relief. Figures are based on actual disbursements and commitments.
3/ The estimated costs for IMF reflect the stock of debt eligible for MDRI relief, which is the debt outstanding (principal only) as of end-2004 and that has not been repaid by the member and is not covered by HIPC assistance (<http://www.imf.org/external/np/pp/eng/2005/111605.htm>); including the cost of the MDRI-type, beyond-HIPC debt relief.

4/ IMF MDRI assistance to Cambodia and Tajikistan.

CREDITOR PARTICIPATION: MULTILATERAL CREDITORS

(see Annex III Tables 5, 6A, 6B, 7A, 7B, 8A, 8B, 9 and 10)

13. Over ninety-nine percent of multilateral creditors, estimated by their share in the total cost of HIPC debt relief to post-completion-point HIPCs, have committed to participate in the HIPC Initiative (Annex III, Table AIII5). A number of multilateral creditors receive support from the Debt Relief Trust Fund (DRTF), administered by IDA, to fulfill the provision of committed debt relief.⁶ As of end-August 2014, donors have contributed a total of US\$6.7 billion to the DRTF (See Annex III Table AIII10).⁷ The DRTF has accumulated investment income amounting to US\$602 million and has disbursed about US\$7.0 billion. The remaining amount of resources available in the DRTF (US\$0.5 billion), including the amount of unpaid pledges is estimated to be sufficient to help finance the expected debt relief costs to eligible creditors in respect to completion point countries and the pre-decision point HIPCs.^{8, 9, 10}

CREDITOR PARTICIPATION: OFFICIAL BILATERAL AND COMMERCIAL CREDITORS

(see Annex III Tables AIII11–16)

14. Paris Club creditors have committed to provide debt relief estimated at US\$21.5 billion in end-2013 PV terms to the 36 countries that have reached their decision points (Tables 11 and 12). Most members of the Paris Club have also voluntarily committed to provide additional debt relief beyond that required under the HIPC Initiative (Tables 12 and 13).

⁶Eligible creditors include: AfDB, BOAD, CABEI, CDB, CMCF, EADB, FONPLATA, IaDB, IBRD, IFAD, IDA and NDF.

⁷Annex III Table 10 excludes contributions from AfDB, which are non-cash transactions.

⁸An amount of unpaid pledges totals US\$145 million and includes US\$70 million from Germany and US\$75 million from the United States.

⁹Includes the Democratic Republic of Congo (DRC), Federal Democratic Republic of Ethiopia (Ethiopia) and Republic of Madagascar (Madagascar). DRC reached the completion point in June 2010. DRTF provided AfDB a debt relief grant of US\$425 million to support AfDB's provision of debt relief to DRC at completion point. However, the current low interest rate environment and AfDB's subsequent lower than estimated income from the investment of the completion point grant proceeds are expected to lead to a financing gap of US\$114 million that would not allow AfDB to reach its full share of the debt relief to DRC. AfDB also requested additional resources of US\$0.3 million to cover the shortage of funds to support the debt relief to Ethiopia and Madagascar, which reached the completion point in April 2004 and October 2004, respectively.

¹⁰Future debt relief costs are based on current estimates of completion point dates, debt outstanding, as well as assumptions regarding the applicable discount rates. These estimates do not take into consideration possible future additional debt relief to currently eligible HIPCs, additional relief due to potential slippages in completion point dates or other factors, including granting of debt relief to additional countries such as Zimbabwe, which currently does not meet the HIPC Initiative eligibility criteria.

15. The share of debt relief attributable to the non-Paris Club official bilateral creditors is estimated at US\$4.9 billion in end-2013 PV terms (Tables 14 and 15). So far, a little less than half of this expected debt relief has been delivered. Securing the participation of non-Paris Club official bilateral and private commercial creditors has been a challenge since the inception of the HIPC Initiative. Approximately thirty percent of the non-Paris Club creditors are yet to participate in the HIPC Initiative. Staff of the World Bank and the IMF have continued to rely on the use of moral suasion and on the efforts by the HIPCs themselves to increase the participation of these creditors. (Table 15).

Annex I. Country Status Under the Enhanced HIPC Initiative

Table AI1: HIPC Pre-Decision Point Countries

Country	Recent Political Development	Risk of Debt Distress	PRSP Status	IMF Program and Macroeconomic Status	Decision Point Date
Eritrea	Eritrea became independent in 1991 following a long conflict and remains a fragile state. President Isaias Afewerki has been in power since independence; and his party, the Eritrean People's Liberation Front, is the single political party. An unresolved border dispute with Ethiopia has dominated Eritrea's relations with its neighbors. The United Nations imposed sanctions against Eritrea in 2009 for supporting the Somali al Shabab militias. In 2011 another UN resolution required strict scrutiny of the government's use of resources from the exploitation of minerals.	In debt distress 12/1/2009	There is no recent PRSP and no ongoing work towards its preparation.	There are no ongoing discussions on a Fund-supported program. The 2009 Article IV Consultation was concluded in December 2009.	Uncertain
Somalia	Since its recognition in April 2013 and despite the challenging political and security conditions in Somalia, the authorities have been actively engaging with the Fund and the international community. Unfortunately, the high turnover of government officials is impairing the continuity of policy discussions and absorption of TA. Senior government officials and institutions continue to be the targets of terrorist attacks (in the past few months, the Presidential compound, the Parliament and the international airport were attacked). On the economic front, Somalia's economy grew at a moderate pace in 2013. GDP is estimated by staff to have expanded by 4.4 percent in 2013, thanks to high household consumption (from population growth and returning members of the Diaspora), government activity, and private-sector fixed capital formation. These estimates are, however, subject to substantial uncertainty on account of the poor data quality.	N/A	There is no PRSP and it is not expected to be prepared in the near term. However, the authorities prepared an economic recovery plan that was submitted at the high donor Brussels Conference which outlines the government program to address poverty reduction	Somalia has not had a Fund-supported program since 1987. Although the Fund cannot provide financial assistance to Somalia until its arrears have been cleared, over the past 12 months the Fund has provided ten TA missions in its key areas of expertise. The TA missions covered the following areas: (i) diagnosis of macroeconomic and institutional conditions; (ii) development of a possible currency reform program; (iii) the national budget; (iv) central bank accounting and governance; and, (v) development of statistical systems. In addition, LEG and MCM have been providing continuous support from headquarters on issues related to central bank operations, banking and licensing supervision; and, the development of a proper AML/CFT framework. IMF staff and the Somali authorities have made significant progress in the development of an initial GDP estimate, the preparation of the FY14 national budget and financial accounting and reporting at the central bank.	N/A
Sudan	As part of the secession agreements with South Sudan, Sudan agreed in September 2012 to temporarily retain all the external debt of the former Sudan under the so-called "zero-option". The agreement was based on two conditions: (i) that the international community gives firm commitment to the delivery of debt relief within two years of the agreement (deadline is September 2014); and (ii) South Sudan would join Sudan in outreach efforts for debt relief. The agreement also included that Sudan's external debt would be apportioned between the two countries - if the conditions were not met within the two-year deadline - based on a still to be defined formula (within six months from the deadline). However, recently, Sudan and South Sudan have agreed to extend the zero option for two years, till October 2016.	In debt distress 9/17/2014	The Interim-PRSP was officially shared with the World Bank in November, 2012. The I-PRSP and the Joint Staff Advisory Note were discussed at the Fund's and Bank's Executive Boards in September, 2013. The Government is currently implementing the Interim-PRSP and started a process to prepare a full PRSP.	A new staff-monitored program (SMP) for January-December 2014 was approved on March 7, 2014. The 2014 Article IV consultation was concluded on September 17, 2014.	N/A

Table AI2A: HIPC Decision-Point Countries: Status of Completion Point Triggers

Country	PRSP	Macroeconomic Stability	Public Financial Management (PFM)	Social Sector	Debt Management	Governance / Transparency / Anticorruption	Structural Reforms
Chad	The PRSP 2013-2015 is ongoing. An annual progress report for 2013 was finalised in 2014. A joint staff advisory note (JSAN) will be produced by IMF and the Bank to assess the implementation of the PRSP in 2013.	Chad Macroeconomic policy is anchored on the progressive reduction of the non oil primary deficit. Good progress was reflected in macroeconomic stabilisation in the last years, leading to the signature of an ECF with the IMF in August 2014.	Progress was achieved on several fronts in recent years, notably through a significant reduction in off budget expenditures, the computerisation of the budget expenditure and reporting.	All HIPC floating conditions for priority sectors were met in 2013, but that concerning repetition in primary school, reflecting Chad's difficulties to maintain quality of education for a growing number of students.	Debt Management is being strengthened through policy reforms and capacity building efforts supported by the World Bank.	Progress was recorded on several governance fronts in recent years: security of citizens, public financial management. The governance strategy implemented in 2013 will be assessed by the IMF and the Bank as part of the forthcoming JSAN.	N/A

Table AI2B: HIPC Decision-Point Countries: Summary by Country

Country	PRSP Status	Risk of Debt Distress	IMF Program	Completion Point Date (Planned)
Chad	A new PRSP (National Development Plan) covering a period from 2013 to 2015 was approved by the Government in February 2013. A Joint Staff Assessment (JSAN) on that PRSP was submitted to the Boards of the Fund and the Bank in July 2013. The authorities have finalized the annual progress report (APR) covering 2013 of the implementation of the PRSP, for which a JSAN will be prepared by December 2014.	High 08/1/2014	On August 1, 2014, the Executive Board of the International Monetary Fund (IMF) approved a three-year arrangement under the Extended Credit Facility (ECF) for a total amount equivalent to SDR 79.92 million—the first since 2005. This follows a broadly satisfactory implementation of a Staff Monitored Program (SMP) that Fund Staff monitored from June to December 2013. The last PRGF-supported program, approved in February 2005 and later extended through May 2008, expired without completion of a review. A SMP for April-October 2009 also expired without completion of a review.	First half of 2015

Table A13. HIPC Completion-Point Countries: Progress towards Achieving the MDGs

Due to a change in the methodology, the ratings in 2012 and in 2013 are not comparable to those for 2011. At the current rate of progress, if a country is expected to achieve the target between 2016 and 2020, it is rated as being "ON TARGET." Countries that are not expected to achieve the target by 2020 are rated as being "SERIOUSLY OFF TARGET." A country is assigned a rating only if there is data for at least two observations. The first observation should be for a year after 2002, and the most recent observation should be in the last 5 year period.

Annex II. Country Coverage, Data Sources, and Assumptions for the HIPC Initiative and MDRI Costing Exercise

A. Country Coverage

- The costing analysis for the 36 post-decision-point countries includes: Afghanistan, Benin, Bolivia, Burkina Faso, Burundi, Cameroon, Central African Republic, Chad, Côte d'Ivoire, Comoros, Democratic Republic of the Congo, Republic of Congo, Ethiopia, The Gambia, Ghana, Guinea, Guinea-Bissau, Guyana, Haiti, Honduras, Liberia, Madagascar, Malawi, Mali, Mauritania, Mozambique, Nicaragua, Niger, Rwanda, São Tomé and Príncipe, Senegal, Sierra Leone, Tanzania, Togo, Uganda, and Zambia.
- The costing analysis for the pre-decision-point countries is based on 3 HIPCs: Eritrea, Somalia, and Sudan.

B. Data Sources

- Staff estimates are based on HIPC Initiative decision and completion-point documents for all 36 post-decision-point countries or estimates presented in Heavily Indebted Poor Countries (HIPC Initiative)—List of Ring-Fenced Countries that Meet the Income and Indebtedness Criteria at end-2004 for the 3 pre-decision-point HIPCs.
- Data was updated through end-August 2014.

C. Assumptions for the HIPC Initiative and MDRI Costing Exercise

- Calculations of total costs include costs under the original and enhanced HIPC Initiative frameworks and the MDRI.
- Cost estimates for the HIPC Initiative are based on debt data after full use of traditional debt-relief mechanisms.
- The following exchange rates have been used for the MDRI calculations:

IDA and AfDF. The initial MDRI Trust Fund replenishment rate of 1.477380 US dollars per SDR was applied for the period FY07- FY08. Cost estimates for FY09-FY11 (corresponding to the period covered by the IDA 15 replenishment round) are based on the IDA15 foreign exchange reference rate of 1.524480 US dollars per SDR. Cost estimates for FY11 onward are based on the IDA16 foreign exchange reference rate of 1.50233 U.S. dollars per SDR.

IMF. The exchange rate of the date that debt relief was delivered, and, in cases where debt was not yet delivered, the rate as of end-December 2013 was used.

IaDB. Currency units in US dollars at end-2006.

D. Update of Cost Estimates in Present Value Terms

- The cost of HIPC Initiative assistance calculated in PV terms at the time of the decision-point is discounted to end-2013 using the average interest rate applicable to the debt relief. This rate was estimated at 2.61 percent and corresponds to the implicit long-term interest rate of currencies that comprise the SDR basket over the period 2011–13, calculated as a 6-month average of the Commercial Interest Reference Rate (CIRR) over this period, weighted by the participation of the currencies in the SDR basket. The same rate was used to calculate MDRI debt relief in end-2013 PV terms.

Sources: HIPC country documents, and World Bank and IMF staff estimates.

1/ Data refer to 36 post-decision-point HIPCs, unless specified otherwise.

2/ Debt service paid covers 2001–2013, and debt service due covers 2014–2018. For post-completion point HIPCs, debt service due reflects the negotiated relief by the debtor countries, additional debt relief, provided by some Paris Club Creditors on a voluntary basis, and MDRI (countries that have reached the completion point in the more recent years, debt service projections assume full HIPC Initiative debt relief along with additional debt relief by the Paris Club and MDRI). For pre-completion-point countries, debt service due includes interim debt relief and full HIPC Initiative and MDRI assistance expected at the projected completion point. See Appendix Table 2 for a detailed breakdown.

3/ As defined in PRSPs; excludes data for years in countries for which data is not available. See Table 3 for a country breakdown.

Sources: HIPC country documents, and World Bank and IMF staff estimates.

Note: Data corresponding to years of decision and completion points under the enhanced HIPC Initiative are in thin and thick boxes, respectively.

1/ Debt service paid covers 2001–2013, and debt service due covers 2014–2018. For post-completion point HIPCs, debt service due reflects the negotiated relief by the debtor countries, additional debt relief, provided by some Paris Club Creditors on a voluntary basis, and MDRI (for countries that have reached the completion point in the more recent years, debt service projections assume full HIPC Initiative debt relief along with additional debt relief by the Paris Club and MDRI). For pre-completion-point countries, debt service due includes interim debt relief and full HIPC Initiative and MDRI assistance expected at the projected completion point.

2/ Data reported on a fiscal year basis.

3/ Reached decision point prior 2000.

4/ Reached completion point prior 2000.

Sources: HIPC country documents, and World Bank and IMF staff estimates.

Note: Data corresponding to years of decision and completion points under the enhanced HIPC Initiative are in thin and thick boxes, respectively.

1/ The coverage of poverty-reducing expenditures varies across countries, but is generally consistent with the definition in the PRSP and the budget of each HIPC. In some countries, the definition of poverty-reducing expenditures has evolved over time to include more sectors; therefore, some of the increase in such spending over the 2001-2003 period may reflect changes in the definition. In the majority of countries expenditures on health and education are included but beyond that there are wide variations in the sectoral spending included.

2/ Central government revenue excluding grants.

3/ Currently fiscal data reported by authorities does not allow monitoring of poverty reduction expenditures.

4/ Reached decision point prior 2000.

5/ Reached completion point prior 2000.

Total Debt Relief Committed			...	76,378	49,843	126,220

Sources: HIPC documents, and World Bank and IMF staff estimates.

1/ Committed debt relief under the assumption of full participation of creditors.

2/ Nominal MDRI costs include principal and interest foregone for all multilaterals participating in the Initiative, except IMF, which only include principal. The estimated costs for IMF reflect the stock of debt eligible for MDRI relief, which is the debt outstanding (principal only) as of end-2004 and that has not been repaid by the member and is not covered by HIPC assistance (EBS/05/158 Revision 1, 12/15/2005).

3/ Topping-up assistance and assistance provided under the original HIPC Initiative are expressed in PV-terms as of the time of the decision point.

4/ No totals are shown because the amounts are in different PV terms (according to the date of the decision point).

5/ Also reached completion point under the original HIPC Initiative. The assistance includes original debt relief.

6/ Assistance includes topping up at completion point.

7/ IMF MDRI debt relief to Cambodia and Tajikistan.

8/ Liberia received MDRI-type (beyond-HIPC) debt relief at end-June 2010, which was financed from the Liberia Administered Account.

Source: International Monetary Fund.

1/ Includes interest on amounts committed under the enhanced HIPC Initiative.

2/ Excludes remaining HIPC Initiative assistance delivered.

3/ Includes commitment under the original HIPC Initiative.

4/ Côte d'Ivoire reached its decision point under the original HIPC Initiative in 1998, but did not reach its completion point under the original HIPC Initiative. Debt relief of SDR 17 million, committed to Côte d'Ivoire under the original HIPC Initiative, was therefore not delivered.

5/ Afghanistan, Comoros, Haiti, and Togo did not have MDRI-eligible credit and did not receive MDRI debt relief from the IMF. Côte d'Ivoire and Guinea had fully repaid MDRI-eligible debt by completion point date.

6/ Haiti received from the Post-Catastrophe Debt Relief Trust SDR 178 million on July 21, 2010.

7/ Liberia received MDRI-type (beyond-HIPC) debt relief at end-June 2010, which was financed from the Liberia Administered Account.

1/ The figures in this table were converted from SDR amounts using annual average US\$/SDR exchange rates for the HIPC disbursements and the exchange rate on the date of delivery of final debt relief disbursement.

2/ Includes also interest earned both on the commitment amount in PRG-HIPC Trust and on the amount in HIPC Umbrella Account.

3/ Haiti also received from the Post-Catastrophe Debt Relief Trust SDR 178 million on July 21, 2010.

4/ Liberia received MDRI-type (beyond-HIPC) debt relief of SDR 116.2 million at end-June 2010 financed from the Liberia Administered Account; equivalent to US\$171.9 million on June 30, 2010.

1/ Columns (1) to (7) describe the additional debt relief provided following a specific methodology under bilateral initiatives and need to be read as a whole for each creditor.

In column (1), "HIPCs" stands for eligible countries effectively qualifying for the HIPC process. A "100 percent" mention in the table indicates that the debt relief provided under the enhanced HIPC Initiative framework will be topped up to 100 percent through a bilateral initiative.

2/ Australia: Australia cancelled all HIPC claims.

3/ Belgium: cancellation at completion point 100 percent of ODA loans contracted before December 31, 2000.

4/ Denmark provides 100 percent cancellation of ODA loans and non-ODA credits contracted and disbursed before September 27, 1999.

5/ France: cancellation of 100 percent of debt service on pre-cutoff date commercial claims on the government as they fall due starting at decision point. Once countries have reached completion point, debt relief on ODA claims on the government will go to a special account and will be used for specific development projects.

6/ Finland: no post-Cutoff date claims

7/ If not treated in the Agreed Minutes at Completion Point, debt cancellation of 100% only on a case by case basis.

8/ Italy: cancellation of 100 percent of all debts (pre- and post-cutoff date, ODA and non-ODA) incurred before June 20, 1999 (the Cologne Summit).

At decision point, cancellation of accrued arrears and maturities falling due in the interim period. At completion point, cancellation of the stock of remaining debt.

9/ The Netherlands: 100 percent ODA (pre- and post-cutoff date debt will be cancelled at decision point); for non-ODA: in some particular cases (Benin, Bolivia, Burkina Faso, Ethiopia, Ghana, Mali, Mozambique, Nicaragua, Rwanda, Tanzania, Uganda and Zambia), the Netherlands will write off 100 percent of the consolidated amounts on the flow at decision point; all other HIPCs will receive interim relief up to 90 percent reduction of the consolidated amounts.

At completion point, all HIPCs will receive 100 per cent cancellation of the remaining stock of the pre-cutoff date debt.

10/ Norway has cancelled all ODA claims.

11/ Due to the current World Bank/IMF methodology for recalculating debt reduction needs at HIPC completion point, Norway has postponed the decisions on whether or not to grant 100% debt reduction until after HIPCs' completion point.

12/ Russia has no ODA claims

13/ Spain provides 100 percent cancellation of ODA and non-ODA claims contracted before January 1, 2004

14/ Sweden has no ODA claims.

15/ Switzerland has cancelled all ODA claims.

16/ Switzerland usually writes off 100 percent of government-owned claims of the remaining debt stock at Completion Point and provides at least full HIPC debt relief of claims held by the ECA (100% cancellation of all remaining claims with the exception of Honduras and Cameroon).

17/ United Kingdom: "beyond 100 percent" full write-off of all debts of HIPCs as of their decision points, and reimbursement at decision point of any debt service paid before the decision point.

18/ United States: cancellation of 100 percent of all debts (pre- and post-cutoff date, ODA and non-ODA) incurred before June 20, 1999 (the Cologne Summit).

At decision point, cancellation of accrued arrears and maturities falling due in the interim period. At completion point, cancellation of the stock of remaining eligible debt.

19/ 100% debt relief provides for countries reached Completion Point before December 31, 2006 as of December 21, 2006 and for countries reached Completion Point after December 31, 2006 as of date of Completion Point. No payments are expected from debtors from those dates.

20/ Exception is short term debt category

Sources: HIPC Country Documents; IMF staff estimates.

^{1/} Non-Paris Club creditors include those creditors that did not indicate their intention to participate in the Paris Club meeting at the time the completion point document for a particular country was being prepared. Thus, the claims of some creditors that are not permanent members of the Club, but were invited by the Paris Club to participate in the completion point debt negotiation for a given country and signed the Paris Club Agreed Minutes at the end of this negotiation, are not considered in here.

^{2/} Listed as Yugoslavia in decision point documents.

^{3/} Excludes claims held by the Československa Obchodní Banka on Mozambique at the time of decision point.

^{4/} Guatemala's claims on Nicaragua were taken over by Spain in a debt swap. Spain has agreed to provide HIPC Initiative debt relief to Nicaragua on those claims.

Sources: HIPC documents; country authorities; and Fund and Bank staff estimates.

1/ Based on information received as of August 2013. The information covers only creditors that have claims on post-completion-point countries. The information presented in the table is now based only on responses received from the IMF country team with consultations from the authorities. Creditors are not going to be surveyed which is a change in methodology compared to the previous status reports monitoring relief from the non-Paris creditors.

2/ Argentina, Brazil, the Republic of Korea, Kuwait, Mexico, Morocco, Portugal, South Africa, and Trinidad and Tobago are associated members of the Paris Club. As such, these countries participate in negotiation sessions of the Paris Club on a case-by-case basis, provided that certain conditions are met. Generally, creditors participating in a negotiation session for a particular country are considered Paris Club members for the purpose of HIPC calculations.

3/ In these cases, debtors have indicated that some relief has been provided but the information received is insufficient to quantify

4/ Partition of HIPC loans outstanding at decision point and the associated debt relief among members of the Former Yugoslavia is being determined with the help of the authorities.

5/ Guatemala's claims on Nicaragua were taken over by Spain in a debt swap. Spain has agreed to provide HIPC debt relief to Nicaragua on those claims.

6/ In June 2003, India announced its intention to write off all non-export credit claims on HIPCs. However, several agreements remain unsigned.

7/ The details for the debt relief provided are now available to be able to better estimate the effort by these creditors.

1/ Commercial creditors lawsuits against HIPCs are reported without assessing the merits of these disputes. The information reported in this table reflects responses by the authorities, and it

2/ Either original creditor or holder of current claim.

3/ "Judgement awarded" refers to cases in which the creditor has obtained a judgement against the HIPC but has not yet recovered the full payment on its claim. Settled refers to cases where the judgement has been awarded and both parties have been settled on their claims.

4/ Excludes accumulated interest, charges, and penalties.

5/ Amount could include interest, charges, and penalties.

6/ Judgement has been appealed. Approximate amount in USD, amount reported EUR 167 million.
