Among the responsibilities of the International Monetary Fund, as set forth in its Articles of Agreement, is the obligation to "act as a center for the collection and exchange of information on monetary and financial problems." *Staff Papers* makes available to a wider audience papers prepared by the members of the Fund staff. The views presented in the papers are those of the authors and are not to be interpreted as necessarily indicating the position of the Executive Board or of the Fund. The authors have received considerable assistance from their colleagues on the staff of the Fund, and this general statement of indebtedness should be accepted in place of a detailed list of acknowledgments.

To facilitate electronic storage and retrieval of bibliographic data, *Staff Papers* has adopted the subject classification scheme developed by the *Journal of Economic Literature*.

Subscription: US\$18.00 a volume or the approximate equivalent in the currencies of most countries. Four numbers constitute a volume. Single copies may be purchased at \$5.00. Special rate to university libraries, faculty members, and students: \$9.00 a volume. Subscriptions and orders should be sent to:

EDITOR'S NOTE

The Editor invites from contributors outside the Fund brief comments (not more than 1,000 words) on published articles in *Staff Papers*. These comments should be addressed to the Editor, who will forward them to the author of the original article for reply. Both the comments and the reply will be considered for publication.

The term "country," as used in this publication, may not refer to a territorial entity that is a state as understood by international law and practice; the term may also cover some territorial entities that are not states but for which statistical data are maintained and provided internationally on a separate and independent basis.
