Trade and Trade Finance in the 2008-09 Financial Crisis

Source: IMF Working Paper
 Published Date: January 2011
 DOI: 10.5089/9781455212507.001.A001

Global merchandise trade sharply declined in late 2008 and early 2009, and some press and financial market reports assigned a large role for the decline to trade finance. However, the available evidence suggests that shocks to trade finance were not the major factor in the decline in trade. Surveys of commercial banks by the IMF and others found that while bank-intermediated trade finance fell in value during the crisis, it fell by less than merchandise trade. As a result, the share of world trade supported by bank-intermediated trade finance increased despite higher pricing margins. Other explanations appear to account for the bulk of the reduction in international trade.

Tagging Your Selections

Each time you save a book, chapter, paper, or search, you will be prompted to assign a tag. Tags are terms that you assign to organize your selections in “My eLibrary”. They can be the name of a topic or a country or region of interest. For example, the tag could be named “Inclusive Growth” or “Europe”.

- You can use existing tags from previous searches by checking the box next to the tag.
- You can add new tags on the blank line.
- You can choose not to use any tags at all.

The screenshot shows a dialog box titled "Save this entry" with a close button in the top right. Below the title is a "Tags" section. There is a checked checkbox next to the tag "trade". Below that, a text input field contains "financial crisis" with the placeholder text "Add new tags separated by commas". At the bottom of the dialog are two buttons: "CANCEL" and "SAVE".

Creating a Custom Book

When you have finished searching and selecting, click on “My eLibrary” at the top of the page. You will see all of your saved content and searches. The lists also include anything you saved in previous sessions.

**Please note:* You cannot create a custom book using an entire book or journal. This will produce an error. To ensure that you are selecting only chapters and articles, use the Refine by checkboxes for chapter and article in the left column on the search results page.

Action options on the right hand side allow you to edit tags, cite a selection, or delete a selection. (1)

To create a custom book, place a checkmark in the box next to the item(s) you want in the book, then Add to Custom Book. (2)

The screenshot shows the "My eLibrary" interface with tabs for "Most Recent(2)", "My Content (4)", "My Searches (1)", "My Custom Books (0)", and "My Account". Below the tabs, it says "You're looking at 1-4 of 4 items." There are two buttons: "ADD TO CUSTOM BOOK" and "DELETE". Below these is a table of items:

You will be prompted to save your new book with a name, or add your new content to a book that you already created.
